Department of Human Services
Vocational Rehabilitation Program

Vision
Every Oregonian with a disability, who desires to work, is given an equitable opportunity and means.

Mission
Vocational Rehabilitation's (VR) mission is to assist Oregonians with disabilities to achieve, maintain and advance in employment and independence. VR partners with Oregonians with disabilities to gain employment through a variety of services designed to assist in identifying and mitigating the functional impediments created by disability.

Program
VR is a state and federal program authorized by state law and the federal Rehabilitation Act of 1973, amended in 1998 and in 2014 by the Workforce Innovation and Opportunity Act (WIOA).

VR helps Oregonians with disabilities gain employment through a variety of services. This includes helping youth with disabilities transition to jobs as they become adults; providing individualized counseling and supports to job seekers with disabilities to overcome barriers to employment; helping employers realize the benefit of employing diverse people with disabilities; and partnering with other state and local organizations that coordinate and provide equitable employment and workforce programs. Employment helps people with disabilities progress toward self-sufficiency, become involved in their communities, and live more engaged and satisfying lives.

All working-age Oregonians who experience a disability and are legally entitled to work are potentially eligible for VR services. Individuals who experience a medical, cognitive or psychiatric diagnosis that results in a functional impediment to employment are typically eligible. Recipients of Social Security disability benefits are presumed eligible for services.

VR has a diverse staff of counselors with expertise in the areas of intellectual and developmental disabilities (I/DD), deafness and hearing impairments, mental health, motivational interviewing, spinal injury, and traumatic brain injury. Additionally, the counselors consider the participant's cultural and linguistic needs .

Individuals we serve

Vocational Rehabilitation employees provide direct services through a network of local offices across Oregon. For a list, see:
http://www.oregon.gov/dhs/vr/Pages/officelocation.aspx

Services are provided by rehabilitation counselors and support staff who deliver direct client services through 34 field offices and multiple single employee outstations in Work Source Oregon Centers and other human services agencies across the state. As the demographics in Oregon are changing, VR is adapting accordingly to provide culturally and linguistic services to Oregonians and to help diversify the state workforce.

VR Data**:**

- Helped 16,907 individuals, 5,188 entering an individualized plan for employment and obtained 2,925 employment outcomes in fiscal year 2019.
- Contracted with 120 school districts and consortia on behalf of 184 high schools to provide serves for approximately 1,851 students each year.
- Assisted 853 individuals with intellectual and developmental disabilities (I/DD) obtain jobs in federal fiscal year 2019.
- The number of clients rehabilitated in VR by Race/Ethnicity for the state fiscal year 2019 breaks down to 116 American Indian or Alaskan Native, 249 Hispanic or Latino, 2,525 White, 7 African American, 29 Native Hawaiian or other Pacific Islander, and 70 Asian.
- VR staff in the field served 1,364 Oregonians who reported some level of hearing loss as their primary disability. Of those, 309 labeled themselves "Deaf" and 577 labeled themselves "hard of hearing." Consumers with hearing loss represented 8% of the total population served by VR during state fiscal year 2019.

Services Provided: VR is designed under five primary areas: basic services, youth programs, supported employment, career counseling information and referral, and independent living. In addition, VR is engaged in Oregon's Employment First program in partnership with the Office of Developmental Disability Services and is

actively engaged in improving workforce partnerships as a core partner in the state workforce programs.

Basic Services: These are basic services provided to individuals whose disabilities present a potential barrier to employment. A rehabilitation counselor conducts a comprehensive assessment to evaluate vocational potential, including diagnostic and related services necessary for the determination of eligibility for services as well as the nature and scope of services to be provided. Vocational counseling and guidance build on this assessment and help the client identify a vocational goal. The counselor, in partnership with the client, develops an individualized plan for employment and authorizes appropriate services in support of the plan while maintaining a counseling relationship with the client.

Youth Transition Program (YTP): YTP operates as a partnership between VR, the Oregon Department of Education (ODE), the University of Oregon's College of Education and local Oregon school districts. At least 75 percent of students with disabilities in YTP complete high school and transition to a job or postsecondary education at a rate exceeding the national average. This internationally and nationally recognized school-to-work transition approach is a best practice for young people with disabilities. YTP bridges the gap between school and work by providing coordinated vocational rehabilitation services while the student is in school and ensuring a smooth transition to adult services and employment after completion of school. YTP currently serves more than 1,851 students in more than 120 school districts through comprehensive VR services.

Pre-Employment Transition services (Pre-ETS): In 2014, Congress passed the Workforce Innovation and Opportunity Act (WIOA). This new federal legislation provides an opportunity for students ages 14-21 who are presumed to be eligible for VR services to receive Pre-Employment Transition Services (Pre-ETS). These services provide students an opportunity to access services such as:

- Career Exploration
- Post-Secondary Counseling
- Self-Advocacy Instruction
- Work-Based Learning Experiences
- Workplace Readiness Training

Pre-ETS services are organized and delivered in collaboration with Local Education Agencies, and Local Education Service Districts. In 2019, VR provided 21,493 pre-employment transition services.

Supported Employment Services: These services target individuals with the most significant disabilities for whom employment was not possible through traditional means, but who can obtain and maintain competitive employment in the community with job coaching and ongoing supports. Basic vocational rehabilitation services are provided on a time-limited basis for each client. Oregon Health Authority (OHA), the Office of Developmental Disability Services (ODDS), other community programs, families and private employers are responsible for the follow-along services once VR has completed placement and training services. Supported Employment Services combine traditional VR services and support services provided by job coaches, typically at job sites.

Career Counseling, Information and Referral (CCIR): The WIOA created these services in the 2014 update to the Rehabilitation Act. States began the subminimum wage projects in 2017. These services provide career counseling, information and referral to individuals (any age) known by VR to be employed at subminimum wage. Employers with 14C certificates from Department of Labor are allowed to employ individuals at less than minimum wage. These employers are required to provide information about training opportunities (self-advocacy, self-determination, and peer support); however, the employers are prohibited from providing the CCIR as this is a required function by VR. In 2019, the VR program provided CCIR to 676 individuals, and 80% of these individuals indicated they are interested in competitive integrated employment opportunities.

Independent Living: Services are available through seven Centers for Independent Living (CILs). The CILs are nonprofit organizations that provide information and referral, independent living skills training, peer counseling, systems and individual advocacy, and transition services for youth. CILs also provide a range of services based on local needs, many of which complement services provided through other state and federally funded programs. Services are provided through a peer-mentoring model, with an emphasis on self-help, self-advocacy, and consumer responsibility.

CILs are part of a federal program established in the Rehabilitation Act of 1973. Oregon's State Independent Living Council was established by Governor's Executive Order 94-12 in 1994. VR has the responsibility to:

- Receive, account for, and disburse funds received by the state;
- Provide administrative support services to the CILs;
- Keep records and provide access to such records as required by the

Administration on Community Living (the federal authority for the Independent Living program); and
- Fund and support the State Independent Living Council's resource plan.

VR and the Work Incentive Network (WIN) provide benefits planning through a contract with the CILs. WIN was developed as a pilot project through a Medicaid Infrastructure Grant and provides benefits and work incentives planning to individuals with significant disabilities who want to obtain, maintain or increase their employment, but should not lose other benefits and medical coverage. This allows people on disability benefits to become employed, gain more levels of self-sufficiency, become engaged in their communities, and live a higher quality of life. They also begin paying taxes and reduce reliance on publicly funded services.

Employment First: Youth and adults with intellectual and developmental disabilities (I/DD) are significantly underrepresented in Oregon's workforce. With appropriate services and assistance, most people with I/DD can work successfully in the community. The state is seeking to increase employment of people with I/DD in integrated workplaces through increased efforts around the Employment First policy and the Settlement Agreement (Lane vs. Brown) with targeted outcomes.

The Governor's Executive Order 13-04 and subsequent EO 15-01 directs state agencies and programs, including VR, DHS' Office of Developmental Disability Services (ODDS) and the Oregon Department of Education (ODE), to increase community-based employment services for people with I/DD and to reduce state support of sheltered work. VR has specialized counselors around the state committed to working with people with I/DD to find employment in the community.

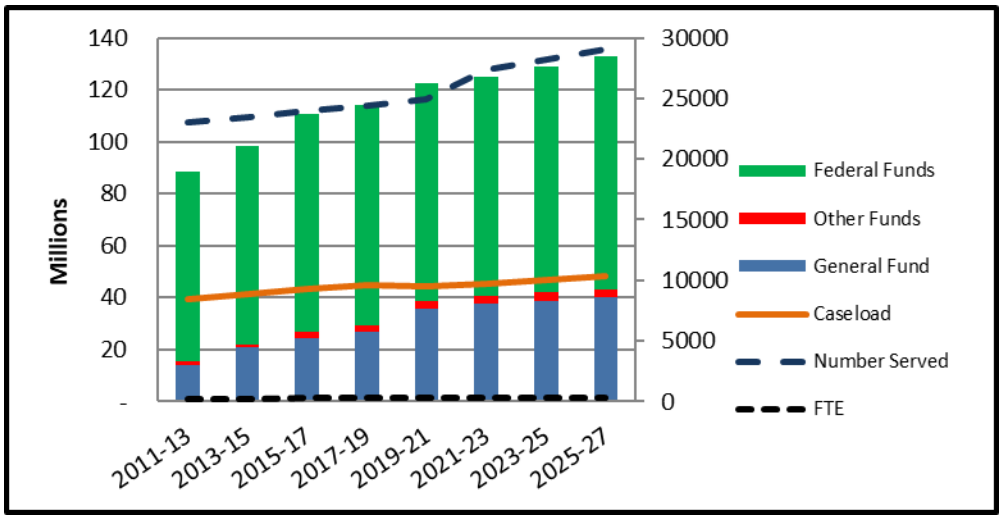
Tribal Partnerships: The General VR program continues to partner with and support the Tribal VR Programs in the Confederated Tribes of the Umatilla, Confederated Tribes of Warm Springs, Confederated Tribes of Siletz, Confederated Tribes of Grand Ronde and the Klamath Tribes. Each tribe shares an individualized vision for its program and identifies how state VR can support delivering services to all Native Americans.

This collaboration includes:
- Sharing consumers with complex disability-based barriers to employment requiring specialized rehabilitation services

- Cross-training new VR counselors on the cultural customs specific to the tribal organization
- Joint rehabilitation trainings for state and tribal VR counselors
- Facilitation of tribal VR directors and tribal leaders to meet with the Department of Human Services Director
- Sharing space within the WorkSource buildings

Workforce Partnerships: With the passage and implementation of the Workforce Opportunity and Innovation Act (WIOA) of 2014, VR has been identified as a core partner in the workforce system. VR has been working closely with the core workforce partners to create a system that is less siloed, more efficient, inclusive, equitable and diverse.

VR, DHS' Self Sufficiency Program (SSP), the Oregon Employment Department, local workforce development boards, and Adult Basic Education programs around the state have been meeting to ensure all our services are aligned, minimizing duplication and creating opportunities to expand services that meet the needs of our joint clients. Moving toward this shared purpose has increased awareness of the needs of individuals with disabilities seeking employment while creating more opportunities for our clients in local economies.



VR continues to create opportunities for diverse individuals with disabilities to gain equitable access and benefit from various workforce strategies. Moving forward, VR will enhance employer outreach strategies to engage employers and conduct outreach and education to show that our diverse clients are reliable, dependable and skilled workers who also happen to have disabilities. VR will also engage employers to provide work-based learning opportunities for all clients, including youth transitioning into post-secondary careers and apprenticeships.

As part of its integration into the workforce system as a core partner, VR has representation on the nine local workforce development boards in the state. VR also has a larger role in the statewide Workforce and Talent Development Board. As a core member of the workforce system, VR and its workforce partners have developed and updated the unified state plan that guides collaborative efforts to build an effective and strong workforce system.

Department of Human Services: Vocational Rehabilitation

Primary Long-Term Focus Area: Safer, Healthier Communities
Secondary Long-Term Focus Area: A Thriving Oregon Economy
Program Contact: Keith Ozols

Vocational Rehabilitation Funding Sources, Caseload Levels and FTEs

Note: Cost-per-case increase is the result of a growing number of people with cognitive disorders requiring services that come with higher costs.

Program Overview

Vocational Rehabilitation (VR) helps Oregonians with disabilities obtain, maintain, regain and advance in employment through counseling, specialized training and job placement. This includes helping youth with disabilities transition from the educational system to the workforce; assisting adults with disabilities achieve, maintain or advance in employment; helping employers overcome barriers to employing people with disabilities; and partnering with other state and local organizations that coordinate employment and workforce programs. The public workforce system in Oregon, of which VR is a federally mandated member,

includes the following state agency partners: Oregon Employment Department (OED), Self Sufficiency Program (SSP), VR, and the Higher Education Coordinating Commission (HECC). Agencies work in conjunction with the Governor's office and Local Workforce Development Boards. A Workforce System Executive Team is tasked with communication among partners and ensuring system alignment.

A total of 425,992 working-age Oregonians, under age 65, experience a disability, but only 37 percent are employed (Census Bureau Facts from 2014-2018/American Community Survey). Employment helps people with disabilities become more self-sufficient, involved in their communities, and live more engaged and satisfying lives.

All working-age Oregonians who experience a disability that creates a barrier to employment and are legally entitled to work are potentially eligible for VR services. Individuals who experience a medical, cognitive or psychiatric diagnosis that results in an impediment to employment typically are eligible for services. Recipients of Social Security disability benefits are presumed eligible for services. Approximately 95 percent of all eligible clients currently served by VR are people with significant disabilities. These individuals typically experience multiple functional limitations requiring several services provided over an extended period.

VR has counselors who specialize in the areas of intellectual and developmental disabilities (I/DD), deafness and hearing impairments, mental health, motivational intervention, spinal injury, and traumatic brain injury; however, the majority of VR counselors provide services to a wide array of Oregonians with disabilities.

Services are provided by rehabilitation counselors and support staff who deliver direct client services through 34 field offices and multiple single employee outstations in one-stop career centers and other human services agencies across the state.

Specialized services that help clients be as independent as possible are provided through seven Centers for Independent Living (CILs) located throughout the state. Both Information and Referral, as well as comprehensive services are provided.

VR staff work in partnership with community organizations and businesses to develop employment opportunities for people with disabilities. These activities range from live resume events and job fairs to presenting disability awareness workshops in local businesses. VR also offers business services that include consultations with employers about diversifying their workforces by hiring people with disabilities and pre-screening services to match employers with clients who are qualified, reliable job candidates.

Program Description

VR is designed under four primary areas: basic services, youth programs, supported employment, and independent living. VR is also engaged in Oregon's Employment First initiative. VR is a core partner in the implementation of the Workforce Innovations and Opportunities Act and is committed to improving access to the workforce system for Oregonians with disabilities. VR works with the Commission for the Blind and Oregon's Tribal VR (121) Programs.

Basic Services

These are basic services provided to individuals whose disabilities present an impediment to employment. The Vocational Rehabilitation Counselor (VRC) conducts a comprehensive assessment to evaluate vocational potential, including diagnostic and related services necessary for the determination of eligibility for services as well as the nature and scope of services to be provided. Vocational counseling and guidance build on this assessment and helps the client identify a vocational goal. The counselor, in partnership with the client, develops an individualized plan for employment and authorizes services and training in support of the plan while maintaining a counseling relationship with the client.

Youth Transition Program (YTP)
YTP operates as a partnership between VR, the Oregon Department of Education (ODE), the University of Oregon's College of Education, and local Oregon school districts. At least 75 percent of students with disabilities in YTP complete high school and transition to a job or postsecondary education, a rate that exceeds the national average. This internationally and nationally recognized school-to-work transition approach is a best practice for young people with disabilities. Local YTP teams deliver pre-employment transition services so students can begin career exploration while they are still in school. These services include career counseling, counseling on postsecondary education and training options, work-based learning experience, work-readiness skills development and training in self-advocacy. YTP bridges the gap between school and work by providing coordinated vocational rehabilitation services while the student is in school and ensuring a smooth transition to adult services and employment after completion of school. YTP currently serves about 2,388 students in more than 136 school districts.

Supported Employment Services
These services enable Oregonians with the most significant disabilities, including youth with the most significant disabilities, to achieve and maintain competitive integrated employment. Vocational rehabilitation supported employment services (i.e., job coaching, training normally done at the job site) are time-limited, lasting from job placement until the individual is stable in their job and long-term supports are in place. Oregon Health Authority's Behavioral Services, community programs and families, Office of Developmental Disability Services (ODDS, or private employers provide long-term supports after the individual reaches job stabilization, which continue after the client has exited the VR Program.

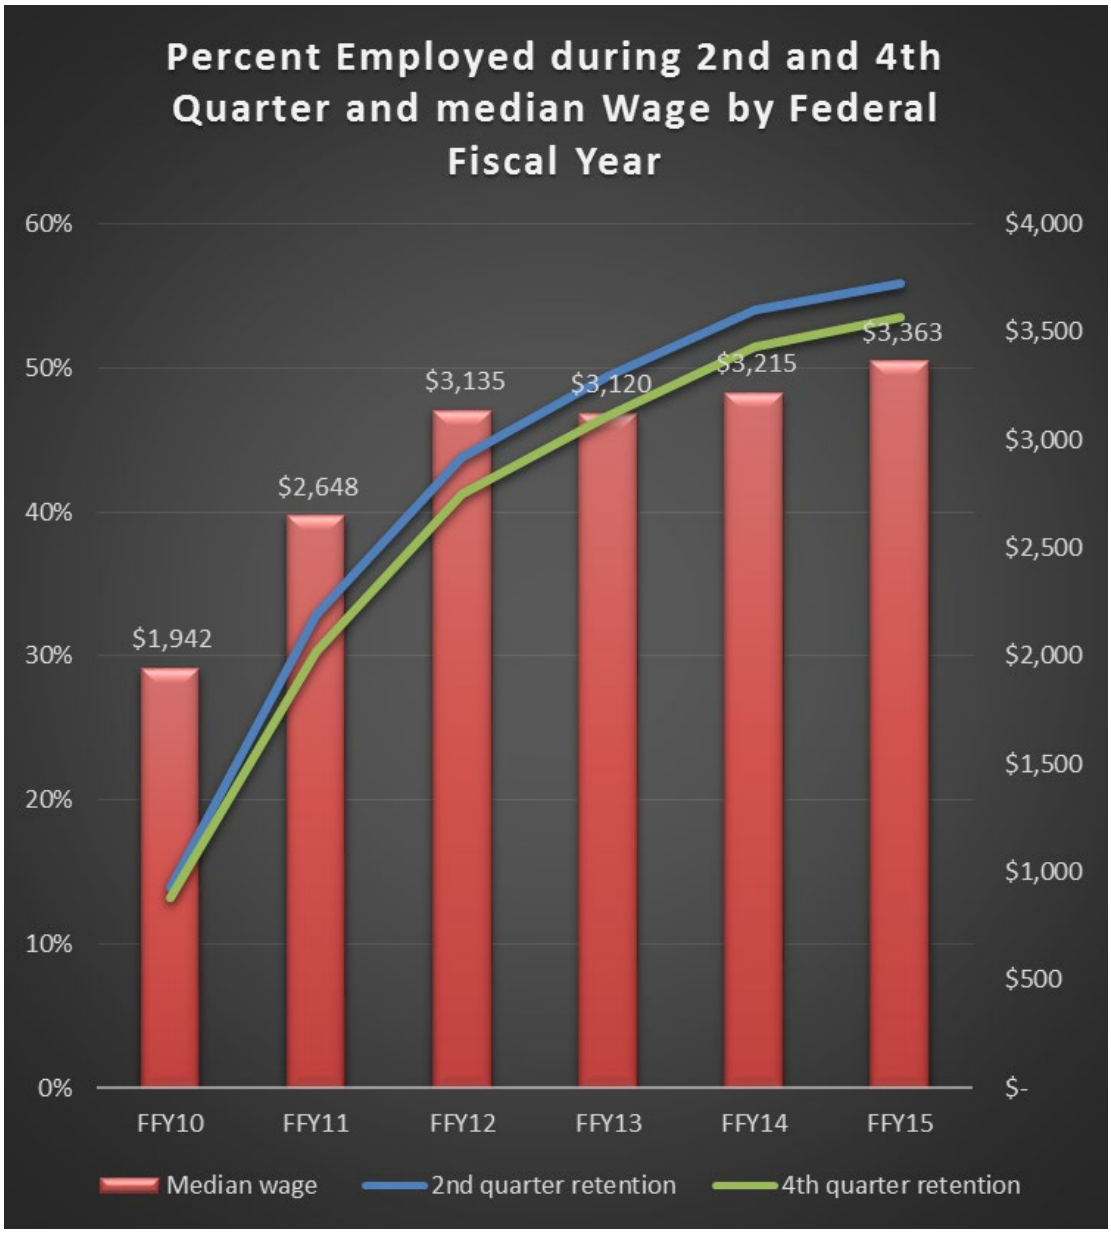
Program Justification and Link to Focus Areas

VR assists individuals with disabilities to establish a foundation by identifying a personal vision, goals and steps necessary to achieve success in education and employment, and become independent, productive citizens. The VR program and the services provided primarily link to the governor's initiative relating to Safer and Healthier Communities. It has been shown that higher rates of employment result in healthier and safer communities. This is especially true, in regard to

Oregonians with disabilities, who are underrepresented in the workforce. Secondarily, by creating better access to the workforce system, we are increasing the number of employable Oregonians, many of whom bring in skills and attributes necessary to today's economy, thereby contributing to a Thriving Oregon Economy.

Employment and Jobs

- The VR Program has developed a plan in partnership with the workforce system as defined by the Workforce Innovations and Opportunities Act (WIOA) which includes goals regarding employment outcomes for clients, to increase skills upgrading and certification of Oregonians with disabilities seeking employment
- As a result of the Lane v. Brown Settlement, the state is seeking to increase employment of people with intellectual and developmental disabilities (I/DD) in integrated workplaces through increased efforts around the Employment First initiative. The Governor's Executive Order 15-01 and the Settlement Agreement directs state agencies and programs, including VR, DHS' Office of Developmental Disabilities Services (ODDS) and the Oregon Department of Education (ODE), to increase community-based employment services for people with I/DD and to reduce state support of sheltered work. VR has specialized counselors around the state committed to working with people with I/DD to find employment in the community.
- VR assisted 939 people with I/DD and 559 individuals with psychiatric disabilities to obtain jobs in federal fiscal 2019
- In federal fiscal year 2019, 2,868 individuals obtained and maintained work through the basic rehabilitation program. VR Employer Services provides training and technical assistance to employers for new hires and incumbent workers and identifies and refers qualified candidates.
- VR continues to contract and collaborate with the Community Connections program in reaching out to and providing specialized job placements services to native Spanish-speaking individuals with disabilities. The focus of these services has been in Portland, Clackamas, Salem and Woodburn, which have large Latino communities. This program had 128 successful employment closures with VR during the federal fiscal year 2019.



- VR is continuing to increase community engagement with communities of color, non- or limited-English speaking communities and other communities across the state. VR works with DHS to provide information in alternative formats and language to communities across the state.

Program Performance

Vocational Rehabilitation measures its performance primarily by employment outcomes. Employment outcomes are defined as the number of individuals who obtained and successfully maintained employment for a minimum of 90 days. The chart below shows employment outcomes for the program since FFY2012.

VOCATIONAL REHABILITATION							
		FFY19	**FFY18**	**FFY17**	**FFY16**	**FFY15**	**FFY14**

	SSI/SSDI	1062	1157	998	967	815	646
Percent Rehabilitated		56%	57%	59%	62%	63%	62%
Avg Hourly Wage		$ 14.26	$ 13.84	$ 12.78	$ 13.09	$ 12.18	$ 12.07
Avg. Weekly Hours		25	26	26	26	27	27
Cost per Rehabilitation		$7,583.15	$7,088.07	$6,580.74	$6,574.50	$6,471.00	$6,473.59

The Workforce Innovation and Opportunities Act of 2015 added several measures with emphasis on long-term employment. The graph below displays some of the new measures the program will be expected to achieve.

Education

- The internationally recognized Youth Transition Program has expanded to more than 136 school districts in Oregon. More than 75 percent of students

with disabilities in YTP complete high school and transition to a job or postsecondary education, a rate that exceeds the national average. YTP bridges the gap between school and entry into the workforce by providing coordinated vocational rehabilitation services while the student is in school and ensuring a smooth transition to adult services and employment after completion of school. YTP currently serves about 2,388 students in more than 136 school districts.

- VR utilizes Supported Employment, an evidence-based model, which allows individuals with developmental and intellectual disabilities to work in competitive employment in the community with needed supports.
- The Independent Living program partners with schools and families to support the transition of students with disabilities to secondary education and/or work.
- Memorandums of Agreement with the Office of Developmental Disabilities Services and the Oregon Department of Education are designed to more effectively align transition services, identify opportunities to braid and leverage funding in order to increase the number of students with disabilities.
- Introduction of services in partnership with ODE to meet WIOA requirements to expend 15 percent of our Federal Funds to meet Pre-Employment Transition Services as required by the WIOA.

Healthy and Safe Communities

The Independent Living Program consists of the following partners: 7 Centers for Independent Living, Oregon State Independent Living Council, Oregon Commission for the Blind and Department of Human Services – Vocational Rehabilitation. Federal funding is provided through the Administration on Community Living – ACL in both direct awards to individual Centers and pass through funding through the Vocational Rehabilitation program. Pass through funding requires a minimum State General Fund (SGF) match of 10%.

The mission of the Independent Living Network as established through the State Plan for Independent Living (SPIL): To empower people in Oregon who experience disabilities to direct their lives, access their communities and fulfill their responsibilities at their desired level of independence.

Centers for Independent Living

Centers for Independent Living (CILs) are non-residential community-based organizations that provide services and advocacy for individuals with all types of disabilities. There are nearly 500 CILs across the United States. There are seven private, nonprofit CILs in Oregon. Each CIL has a board of directors. Boards are made up of at least 51% of individuals with disabilities. CIL staff, play an important role in the delivery of services to enhance the independence of people with disabilities and are also, as required by the Rehabilitation Act, composed of 51 percent people with disabilities.

Services provided in CILs include peer support, independent living skills training, information and referral, advocacy and transition including services that; facilitate transition from nursing homes and other institutions to the community, provide assistance to those at risk of entering institutions, and facilitate transition youth to postsecondary life. CILs also work to make communities more accepting of individuals with disabilities. CILs provide services to individuals of all ages and all disabilities. The seven CILs in Oregon are located in: Portland, Eugene, Roseburg, Grants Pass, Klamath Falls, Bend and Ontario and are contracted to serve 22 of the 36 counties throughout the state.

CILs are mandated through the federal Rehabilitation Act, under the Administration for Community Living (ACL). Title VII, Chapter 1 of the Act states the current purpose of the program is to "promote a philosophy of independent living including a philosophy of consumer control, peer support, self-help, self-determination, equal access, and individual and system advocacy, in order to maximize the leadership, empowerment, independence, and productivity of individuals with disabilities, and the integration and full inclusion of individuals with disabilities into the mainstream of American society."

Oregon State Independent Living Council (SILC)

The SILC is established by Executive Order of the Governor as a separate governmental entity, independent of any State agency. The governor appointments the members of the SILC. Member composition of the SILC must also meet the

51% majority of people with disabilities as required by the Rehabilitation Act. The SILC has bylaws and policies and procedures that align with the federal requirements set forth in the Rehabilitation Act and Assurances and Indicators of minimum compliance, as well as State requirements.

Vocational Rehabilitation – Special Services Independent Living Program
Vocational Rehabilitation (VR) serves as the Designated State Entity (DSE), to receive, administer and account for the funds made available to the State under Title VII, Chapter 1, Part B of the Rehabilitation Act and State General Funds appropriated for Oregon's IL Network. The match rate for Title VII, Chapter 1, Part B funds is 10 percent General Fund; 90 percent Federal Funds. All partners of the IL Program receive funds through VR through executed state contracts.

Independent Living Outcomes

YEAR	FY2019	FY2018	FY2017	FY2016
Information & Referral Services	18,327	29,345	34,292	26,637
Total Consumer Service Records (CSRs)	2,426	2,309	2,208	2,221
Percent of New Consumer Service Records (New CSRs)	58%	60%	62%	66%
Percent of Closed CSRs with All Goals Complete	67%	78%	74%	68%

Enabling Legislation/Program Authorization

VR is a state and federal program authorized by Oregon state law (ORS 344.511et seq.) and the Workforce Innovation and Opportunity Act of 2014.

The Independent Living Program is a federal program established in Title VII of the Rehabilitation Act of 1973, as amended, and regulated by the Code of Federal Regulations, Title 45, and Part 1329. In conjunction, Oregon's State Independent Living Council was established in 1994 by Governor's Executive Order 94-12. VR

is listed as the designated state entity for this program in the State Plan for Independent Living, per Section 704 of Title VII.

Funding Streams

VR is funded through the federal Department of Education. It receives a formula-based grant with Match and Maintenance of Effort requirements. The match rate for Vocational Rehabilitation is 21.3 percent General Fund; 78.7 percent Federal Funds. For Independent Living the match rate is 10 percent General Fund; 90 percent Federal Funds. Grant dollars cannot be utilized by other programs. Program income, which is reinvested back into VR, includes Social Security reimbursement and Youth Transition Program grants.

FUNDING JUSTIFICATION AND SIGNIFICANT CHANGES to 21-23 CSL

This does not include statewide reductions.

131	VR TOTAL					
Social Security Cost Reimbursement	GF	OF	FF	TF	Positions	FTE
	-	-	170,746	170,746	1	1.00

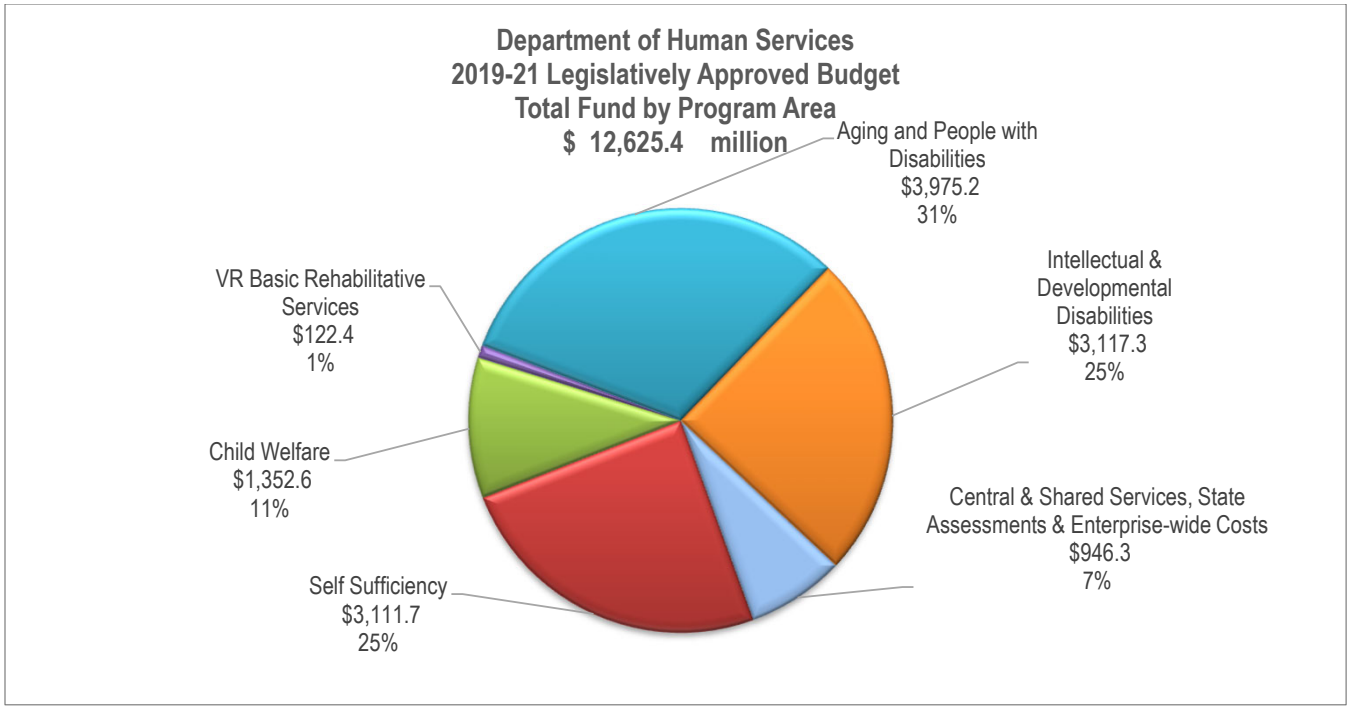
Currently Vocational Rehabilitation (VR) is not fully capturing all Social Security reimbursement available to its consumers who received Social Security Insurance (SSI) and/or Social Security Disability Insurance (SSDI) benefits and who become employed as a result of VR services. Historically these revenues have approached $10M per biennium. Proposed changes in the Ticket to Work program would create a revenue stream to fund ongoing supports for individuals with the most severe disabilities.

132	VR TOTAL					
Benefits Counseling Services (WIN)	GF	OF	FF	TF	Positions	FTE
	1,170,720	-	-	1,170,720	-	-

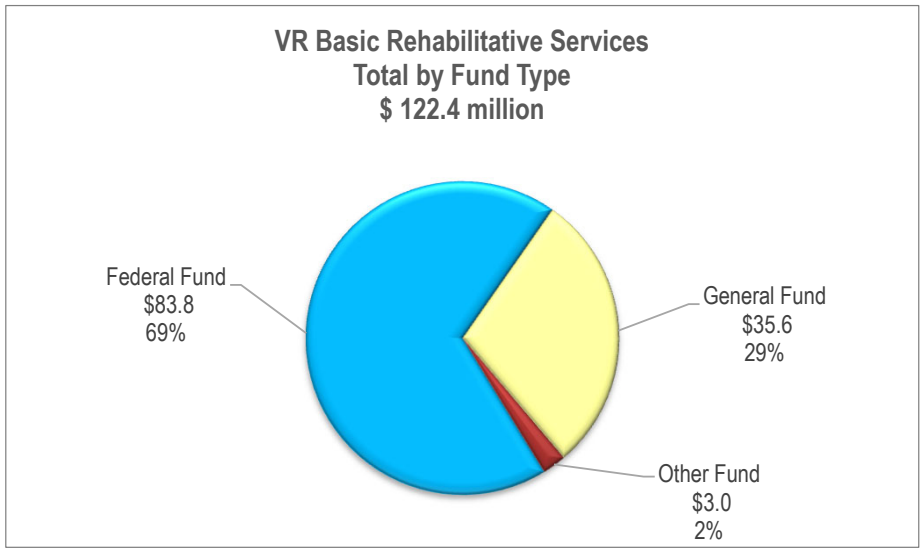
This Benefits Counseling Services POP is designed to provide benefits counseling to people with disabilities. WIN provides services to approximately 1,100 participants per year, but over 1,500 are referred to WIN for benefits counseling, leaving unserved over 400 per year who are not employed, but are on the employment path. Currently 1,450 individuals are awaiting benefits counseling services in Oregon. Many more who are not currently employed but are on the employment path are encouraged to contact the WIN Help desk for answers to general questions instead of being referred for specific and comprehensive benefits planning services. This can cause individuals with disabilities working towards independence to no longer seek employment or lose their jobs due to benefit loss or fear of benefit loss. A minimal increase in benefits counselors can significantly increase jobs and independence for individuals with disabilities.

Benefits counseling is a complicated service and requires significant training. For that reason, WIN, which is responsible for certifying and maintaining quality across the state, will require more training and administrative staff in order to support additional benefits counselors. Specifically, WIN is seeking funding for 4 FTE contract Work Incentive Specialists and 4 FTE contract for the Work Incentive Network.

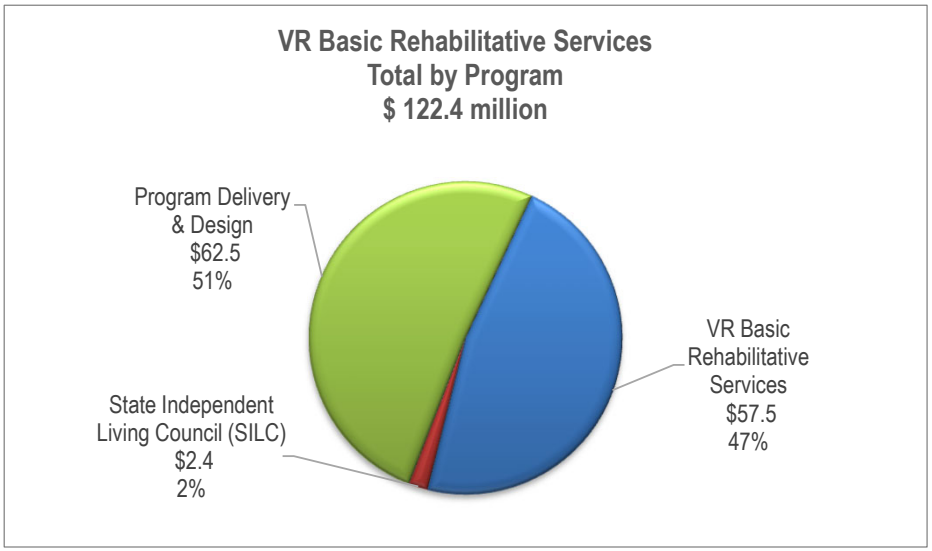
Benefits counseling will also help people with I/DD get and maintain employment in their communities by supporting them to understand the impact of wages and increases in minimum wage on their benefits and by supporting them to develop a plan for managing benefits while working. The Lane v. Brown Settlement Agreement, Governor's Executive Orders 13-04 and 15-01, Oregon's Employment First policy, and new federal and state regulations regarding ODDS services require that integrated community employment be the first and priority service option for individuals with I/DD. These initiatives, paired with the new increase to minimum wage, will require support for individuals with I/DD to understand the impact of integrated community employment on their benefits.



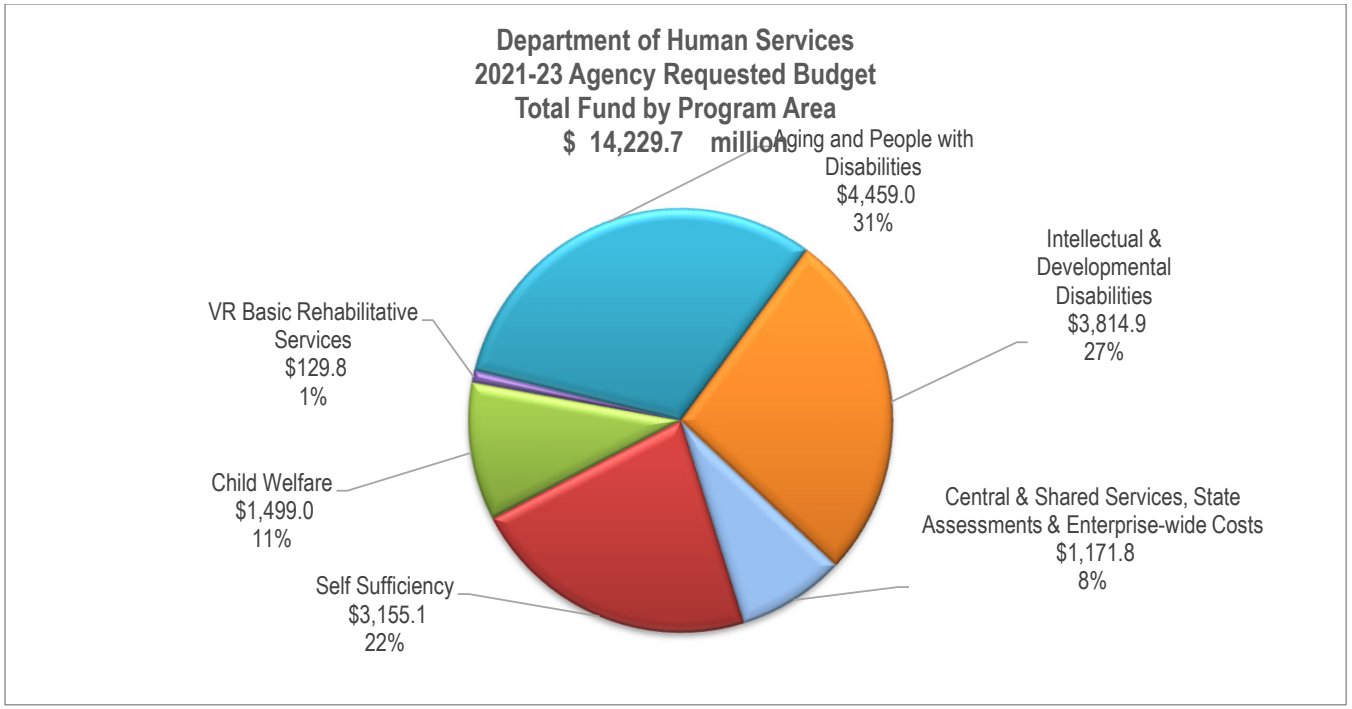
Additionally, new employment service rates were developed with Employment Provider Organizations which would ensure adequate funding for the cost of benefits counseling services for people with I/DD; however, in order to fully fund these rates some additional funding is required. Without this POP, many of those



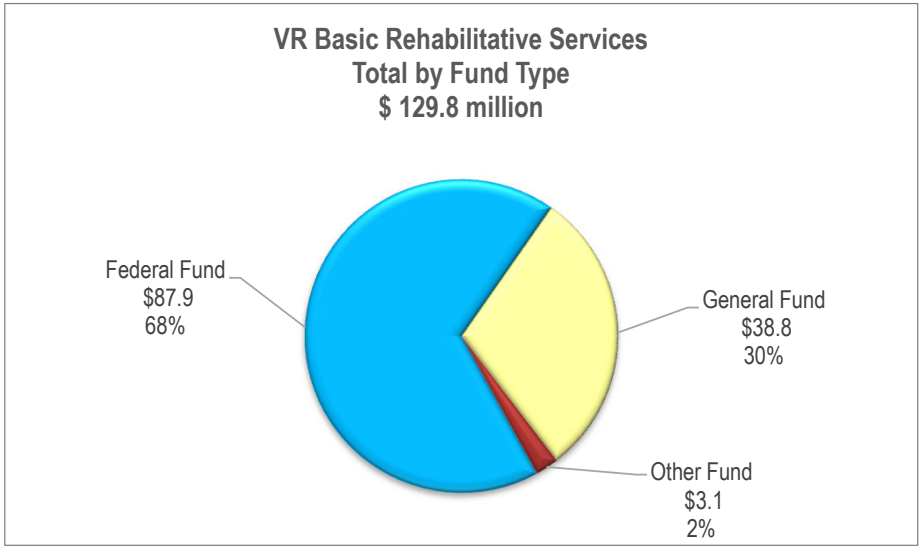
who would otherwise work in integrated community jobs may not receive the necessary support to do so, and it will be difficult to meet the requirements of the Settlement Agreement and new federal regulations.



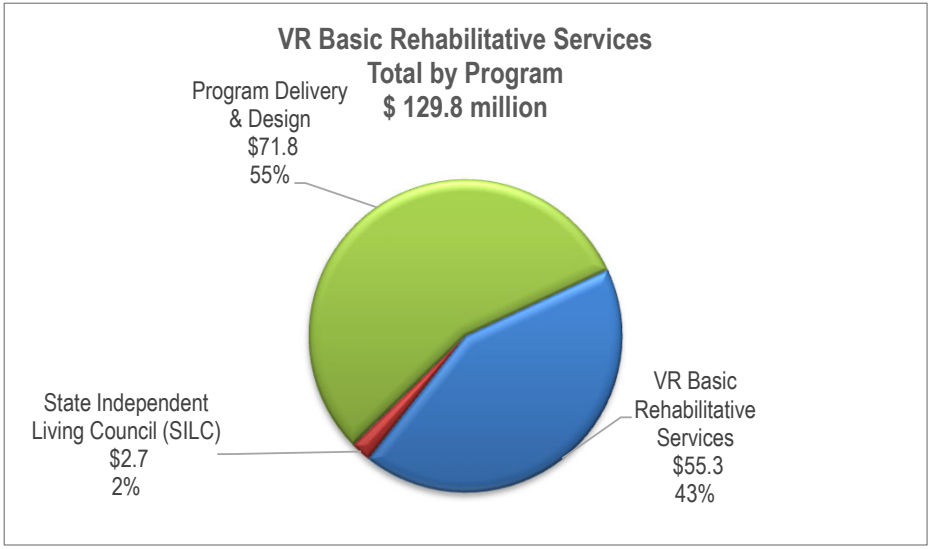
133	VR TOTAL					
	GF	OF	FF	TF	Positions	FTE
Workload Model Equity Staffing	-	-	3,306,740	3,306,740	11	11.00



Implementation of WIOA 2014 requires a fundamental change in service delivery for the VR programs, especially in the area of disabled youth in schools and the continuing alignment and integration of the VR program into the statewide Workforce system. In order to meet these requirements additional staff are required to lead and manage the VR program in order that the Program can meet its Federal mandate and not incur any penalty to the State for not doing so. Oregon VR must expend at least 15 percent of the federal funds to provide or arrange for the provision of these new pre-employment transition services for students with disabilities. VR is also required to coordinated with the 197 local school districts throughout Oregon in the delivery of these services. The requested positions in VR Workload Model Equity POP were made to address the changes resulting from WIOA. The equity staffing supports the new programmatic requirements for the program and for the increased level of field management needs.



Additional Changes:
Federal funds limitation was phased out by ($4,446,741) due to the end of federal period clean-up.



Department of Human Services
Aging and People with Disabilities Program

Mission

To help Oregonians in their own communities achieve well-being and independence through opportunities that protect, empower, respect choice and preserve dignity.

Vision

Oregon's older adults, people with physical disabilities and their families have easy access to services, support and early interventions that help maintain independence, promote well-being, honor choice, respect cultural preferences and uphold dignity.

Goals

To ensure that:

- Older adults and people who experience disabilities feel safe, respected and are able to live independently.
- Services meet changing needs and are easily accessible.
- All services are equity based and focused on the individual and their unique communities.
- The program remains innovative, preventive and demonstrates high-quality outcomes.
- Oregon continues to be a national leader in supporting broad, transparent collaboration with consumers and stakeholders.

Individuals we serve

During the 2021-2023 biennium, we expect to serve:

- More than 5,000 unique individuals age 60 and older through Oregon Project Independence.
- More than 36,450 older adults and people with physical disabilities per month with long-term services and supports paid through Medicaid.
- More than 212,000 older individuals through Older Americans Act services.

- More than 172,860 Oregonians with direct financial support services.
- Approximately 40,000 Oregonians who live in APD-licensed, long-term care facilities.
- More than 45,000 individuals who receive a Social Security Disability determination, helping many accesses federal income benefits available to individuals with a disability.
- More than 17,000 individuals protected from ongoing abuse.

Aging and Disability Resource Connection

Oregonians needing information and referral services about any APD programs or services and other resources that serve seniors and people with disabilities may contact the Aging and Disability Resource Connection (ADRC) of Oregon. The ADRC is a collaborative public-private partnership that streamlines consumer access to a complicated and confusing aging and disability service delivery system. ADRC services are free to Oregonians and the service raises visibility and awareness of the full range of options available. The ADRC provides trusted information and assistance and empowers people to make informed decisions. Through trained options counselors, Oregonians can develop action plans to address long-term services and supports needs that align with consumer preferences, their financial situation, strengths, values and needs. If a person is likely to be eligible for Medicaid long-term services and supports, they will be referred to APD local offices or Area Agencies on Aging (AAAs) for a full assessment.

Employees from both APD local offices and AAAs throughout Oregon are responsible for providing direct client services. Employees also determine eligibility for the aging and people with disabilities population for medical programs provided through the Oregon Health Authority (OHA). During 2019 calendar year, the ADRC received more than 77,724 direct contacts and 111,000 web hits.

APD is impacted by demographic growth in the older adult population and is increasingly serving a more diverse population. APD strives to identify disparities in outcomes for diverse populations and identify strategies to serve all individuals in a culturally and linguistically appropriate manner.

Adult Protective Services

APD and some AAA offices are responsible for investigating instances of abuse against older adults and persons with physical disabilities across the state. Elder abuse, and other adult abuse, is costly both from a human and financial perspective. A person who has experienced abuse is likely to have increased health and long-term care costs. In Oregon, there are currently 742,000 individuals over the age of 65 and another 426,000 with physical disabilities who are 18 or older; all who could become victims of abuse. In the 2019 calendar year, APS staff responded to more than 50,800 reports of abuse and conducted investigations in 17,131. Of the cases investigated, 67 percent were in the community and 33 percent were in facilities. Financial exploitation and neglect remain the most common forms of abuse for seniors and people with disabilities. In the 2019 calendar year, more than 50 percent of the alleged victims involved in community investigations did not have Medicaid at the time of the investigation. APS is often our first opportunity to work with these individuals and help protect them from neglect and harm.

Licensing

The APD Safety, Oversight and Quality Unit (SOQ) licenses many providers of long-term care for people who are aging and physically disabled. These providers range across the continuum of care. Through diligent oversight, investigation of complaints and reports of potential abuse, and corrective action, SOQ reduces future instances of unsafe conditions and improves the quality of care. These services are most effective when they are provided in a quality model aimed at preventing harm in the first place to protect the safety and health of vulnerable Oregonians.

The providers licensed by SOQ include adult foster homes, assisted living facilities, residential care facilities, nursing homes, conversion facilities, intensive intervention care facilities and facilities with memory care endorsements. SOQ strives to ensure service equity and delivery of culturally and linguistically appropriate services are provided to Oregonians.

Medicaid Services

In Oregon, approximately 36,000 older adults and people with physical disabilities use Medicaid long-term services provided through APD each month, with slightly more forecasted for the 2021-2023 biennium. By federal law, each state must develop criteria for access to nursing facility care paid by Medicaid. Criteria must include financial and asset tests as well as service eligibility criteria. The federal

government, through Centers for Medicare and Medicaid Services (CMS), must approve any criteria established by the states.

Many older adults and individuals with disabilities need assistance from other people to perform daily activities and to ensure their health and safety. To accurately identify those who need assistance, DHS created service priority levels (SPLs) to establish eligibility for Medicaid long-term services and supports. SPLs prioritize services for older adults and people with physical disabilities whose well-being and survival would be in jeopardy without services. Level 1 reflects the most impaired while Level 17 reflects the least impaired; levels are based on the ability of the person to perform activities of daily living (ADLs). ADLs are personal activities required for continued health and well-being. These include mobility, eating, toileting, cognition and personal hygiene. Prior to 2003, DHS served individuals through SPL 17. Since then**,** because of budget constraints, only levels 1-13 are funded.

APD assists thousands of Oregonians ─ who require ADL services and instrumental activities of daily living (IADL) services, which include housekeeping and meal preparation ─ in selecting competent providers and establishing effective working relationships with those service providers. Due to the increasingly diverse population served, the program requires supports that are equally diverse, linguistically and culturally appropriate.

Programs

APD's budget is sectioned into three key areas: program services, program design and program delivery.

Program Services

Program services focus on supporting seniors and people with disabilities in maintaining the utmost independence while supporting their individual needs.

Services are provided through six programs:

- Older Americans Act
- Oregon Project Independence
- Financial support services
- In-home services
- Community-based care facilities including adult foster homes

- Nursing facilities

Older Americans Act: This is a federal program and is administered through APD. It provides federal funding for locally developed programs for individuals ages 60 and older. APD distributes funds to local Area Agencies on Aging (AAAs) for service delivery through subcontractors. It is estimated that approximately 227,000 Oregonians currently access these services. The AAAs develop services, within federal expectations, that meet the needs and preferences unique to individuals in their local area. Program mandates require services target those with the most significant economic and social need, to minorities and those residing in rural areas. There is no income or asset requirements to receive services except those related to the Senior Community Service Employment Program (SCSEP).

APD distributes federal funds to the AAAs using a federally approved intra-state funding formula based on the demographics and square mileage of each area. APD encourages and incentivizes culturally specific and linguistically competent supports within all programs. Programs might include; family caregiver supports, nutrition via congregate and home-delivered meal programs, senior employment, legal services or elder abuse prevention services. Most AAAs also sponsor and promote evidence-based wellness and chronic health condition management activities. They may also provide assistance to senior centers.

Oregon Project Independence (OPI): This is a state-funded program offering in-home services and related supports to individuals 60 years of age and older or people who have been diagnosed with Alzheimer's or a related dementia disorder. Approximately 3,440 Oregonians were served in this program during calendar year 2019. It represents a critical element in Oregon's strategy to prevent or delay individuals from leaving their own homes to receive services in more expensive facility settings or depleting their personal assets sooner than necessary and accessing more expensive Medicaid health and long-term service benefits. The program was expanded by the 2005 Oregon Legislature to include younger adults with disabilities. However, funding was not provided until 2014 and 2015. The funding allowed for a pilot program to expand the program to adults ages 19-59 with physical disabilities.

OPI is administered statewide by local Area Agencies on Aging (AAAs). Many areas have waiting lists due to high demand and limited program funding. Client eligibility is determined by an assessment of functional ability and natural supports related to activities of daily living. Typical services include assistance with

housekeeping, bathing, grooming, health care tasks, meal preparation, caregiver respite, chore services, adult day services and transportation.

The OPI program has no financial asset limitations for clients. A sliding fee scale is applied to clients with net monthly income between 100 and 200 percent of the federal poverty level (FPL) to pay toward the cost of service. A small group with income above 200 percent of FPL pays the full rate for services provided. Generally, this is because they benefit from the case management; ongoing support and monitoring, in addition to the actual purchased services.

Financial support services: APD has programs designed to meet a variety of special circumstances for certain low-income populations.

- *General assistance (GA) program:* With this program, APD serves individuals with severe disabilities who are experiencing homelessness or who are at risk of homelessness. To be eligible for the GA program, individuals must meet all of the following criteria:

    - Be homeless or at risk of homelessness;
    - Be an adult, age 18-64, with no minor children living with them;
    - Have a severe disability that meets Social Security disability criteria;
    - Be receiving Presumptive Medicaid medical assistance;
    - Meet all eligibility criteria for Supplemental Security Income (SSI);
    - Apply for SSI and appeal any denials received; and
    - Sign an Interim Assistance Agreement (IAR), allowing DHS to recover GA funds paid to them once awarded SSA benefits.

    General assistance program benefits include up to $545 per month in housing assistance, $90 in utility assistance per month, $60 in cash assistance per month, and free assistance with the Social Security application and appeals process.

- *Cash payments – special needs:* APD is required to meet maintenance of effort (MOE) payments for low-income aged and disabled Oregonians who receive federal Supplemental Security Income (SSI) benefits. These benefits are focused on payments that allow clients to maintain independence and mobility in a safe environment. Examples of special needs payments include help for non-medical transportation, repairs of broken appliances such as a furnace, or for such things as adapting a home's stairs into a ramp.

- *Employed Persons with Disabilities Program (EPD):* This program allows people with a disability to work to their full extent and not lose Medicaid coverage. To be eligible, a person must be deemed to have a disability by Social Security Administration criteria, be employed and have adjusted income of less than 250 percent of FPL. Eligible individuals pay a monthly participation fee and are eligible for the full range of Medicaid benefits and services. APD currently serves approximately 2,000 individuals in the EPD program.

- *Other benefits:* The Centers for Medicare and Medicaid Services (CMS) requires DHS to coordinate with Medicare in many areas and clients need help accessing other programs for which they are eligible. The federal Medicare program is the most common program clients need assistance with. APD determines client eligibility and submits client data to CMS for two Medicare-related programs: Medicare buy-in and Medicare Part D low-income subsidy. APD served more than 140,000 clients in March 2020 in these two programs. These programs help low-income beneficiaries with their cost-sharing requirements. Securing this coverage also ensures Medicare remains in a "first payor" status, ultimately saving the state's Medicaid program significant money.

Social Security Disability Determination Services:

APD determines eligibility for Social Security Disability and Supplemental Security Income benefits on behalf of the Social Security Administration. In federal fiscal year 2019, Disability Determination Services finalized decisions on 45,356 claims.

Medicaid Services and Supports:

Medicaid-funded Long-Term Services and Supports provides eligible individuals fundamental activities of daily living (ADLs) such as mobility, elimination, cognition, eating, bathing, dressing, and personal hygiene. These services ensure that the person is living in a safe and healthy environment. All services promote choice, independence and dignity. Services can be provided in nursing facilities, or community settings such as residential care, assisted living, memory care, foster homes or in the person's own home. In December 2020, APD served 35,515 unique individuals through Medicaid Services and Supports.

In-home services: In-home services are the cornerstone of Oregon's community-based care system and were created to meet the preferences of seniors and people with disabilities throughout Oregon. For older adults or people with physical disabilities, the ability to live in their own homes is compromised by the need for support in regular activities of daily living. For more than 25 years, Oregon has created options to meet people's needs in their own homes. All options are funded with support of the Medicaid program through home- and community-based waivers or state plan options. Oregon has been able to create cost-effective programs that meet people's needs in their homes and other community settings using these options and spared Oregonians from the unnecessary use of much higher cost services, primarily offered in nursing facilities.

Services to older adults and people with physical disabilities are designed to support assistance with fundamental activities of daily living (ADLs), such as mobility, cognition, eating, elimination, personal hygiene, dressing, and bathing. To receive in-home services, an individual must be financially eligible for Medicaid. A case manager works with the client and together they identify needs and develop a plan for the in-home services. There are different options that an individual can select to receive in-home services.

- *Medicaid client-employed Home Care Workers:* Home Care Workers (HCW) are hired directly by the client and provide many of the services Medicaid clients need to remain in their own homes. The client, or his or her selected representative, is responsible for performing the duties of an employer. These duties include selecting, hiring and providing on-site direction in the performance of the care provider duties authorized by a case manager to meet the client's individual needs and circumstances. The HCW must pass a criminal background check. In conjunction with the client, APD develops and authorizes a service plan, makes payment to the HCW on behalf of the client and provides ongoing contact with the client to ensure his or her service needs are met. More than 16,750 clients are expected to receive services supplied by HCWs each month in 2021-2023.

  The Oregon Home Care Commission (HCC) was established in 2000 by an amendment to the Oregon Constitution. It is a public commission dedicated to ensuring high-quality home care services to APD clients using client-employed providers. Service Employees International Union Local 503, Oregon Public Employees Union, represents approximately 17,000 HCWs. For purposes of collective bargaining, HCC serves as the HCW employer of record. The Commission maintains a statewide, computerized registry of

workers and provides an extensive training curriculum. The HCC also makes training available to clients to better understand their employer responsibilities and increase their skill in managing the use of HCWs.

- *In-home agency services:* Many clients prefer to receive their in-home services through an in-home care agency. In-home care agencies (IHCA) are licensed by the Oregon Health Authority. These agencies employ, assign and schedule caregivers to perform the tasks authorized by the client's case manager. APD contracts with licensed IHCAs throughout the state. IHCAs work closely with DHS case managers and clients to ensure services are provided as authorized and to ensure the quality of the work performed.

- *Medicaid Independent Choices Program:* This program offers a choice to clients in the way they receive in-home services and increases clients' self-direction and independence. Clients receive a cash benefit based on their assessed need. They purchase and directly pay for services. Clients are responsible for locating providers, paying their employees, and withholding and paying necessary taxes. Depending upon how they manage their service benefit, many can purchase a few additional services or items otherwise not covered by Medicaid to increase their independence or well-being.

- *Medicaid adult day services*: Adult Day Services (ADS) provide supervision and care for clients with functional or cognitive impairments. Service may be provided for half or full days in stand-alone centers, hospitals, senior centers and licensed care facilities. ADS providers are certified, but not licensed, by DHS.

- *Medicaid home-delivered meals:* Home-delivered meals are provided for to those who are homebound and unable to go to sites, such as senior centers, for meals. These programs generally provide a hot midday meal and, often, frozen meals for days of the week beyond the provider's delivery schedule.

- *Medicaid (state plan) personal care services:* Individuals who do not meet service priority levels (SPLs), but have some personal care needs, may qualify for Medicaid Personal Care Services. Services are generally limited to no more than 20 hours a month. Personal care services are more limited than the standard Medicaid Long term Services and Supports benefit.

- *Medicaid specialized living services:* The services are provided through a contract with APD and targeted to a specific group of clients living in their own apartments and assisted by a specialized program offering direct service and structured supports.

Community-based facilities: These include a variety of 24-hour care settings and services to provide an alternative to nursing facilities. Services include assistance with activities of daily living, medication oversight and social activities. Services can include nursing and behavioral supports to meet complex needs. State and federal guidelines related to health and safety of these facilities must be met.

- *Adult foster homes:* Services are provided in home-like settings licensed for five or fewer individuals who are not related to the foster home provider. Homes may specialize in certain services, such as serving ventilator-dependent residents.

- *Assisted living and residential care facilities:* Licensed 24-hour service settings serve six or more residents and facilities range in size from six to more than 100 beds. The difference between residential care and assisted living is generally in the structural set up of the facility and the fact that generally in residential care, individuals have shared rooms. Either type of facility can seek a Memory Care endorsement on top of the underlying licensure. There are additional requirements for Memory Care Facilities. Registered nurse consultation services are required by regulation.

- *Conversion facilities:* A conversion facility is a nursing facility that has decided to "convert" its license to that of a residential care facility. The facility must go through the federal process of "closing" the nursing facility before going through a state process for "converting" the building to a residential care facility.

- *Intensive intervention care facilities:* Intensive Intervention Care (IIC) facilities are small residential care facilities designed to serve individuals with high behavioral and mental health needs. Five or fewer people can live in a single IIC home.

- *Enhanced care services:* Specialized 24-hour programs in licensed care settings that provide intensive behavioral supports for seniors and people with physical disabilities who have needs that cannot be met in any other

setting. These programs support clients with combined funding from APD and the Oregon Health Authority's mental health program.

- *Memory Care Community Endorsement:* These facilities are licensed as an Assisted Living Facility or Residential Care Facility or Nursing Facility and serve individuals with Alzheimer's disease, other forms of dementia and other cognitive diseases. They are required to have enhanced training and a more secure setting for their residents. The endorsement is in addition to the underlying licensure.

- *Program for the All-inclusive Care for the Elderly (PACE):* PACE is a capped Medicare/Medicaid Program built on a care model that combines all Medicare and Medicaid medical services and long-term services and supports into one program. Currently, nearly 1,700 Oregonians age 55 and older are served in this program that generally allows them to attend adult day services and live in a variety of settings through Providence Elder Place. PACE programs are responsible for providing and coordinating their clients' full health and long-term service needs in all of these settings or an in-home setting. Additional providers will be opening in the near future.

Nursing facilities: Institutional services for older adults and people with physical disabilities are provided in nursing facilities licensed and regulated by DHS. Nursing facilities provide individuals with skilled nursing services, housing, related services and ongoing assistance with activities of daily living.

Oregon has led the nation since 1981 in the development of lower cost alternatives to institutional (nursing facility) care. Home- and community-based alternatives to nursing facility services emphasize independence, dignity and choice and offer needed services and supports at lower costs than medical models.

Program Design

Staff and services support the administration of APD programs, including:

- Central leadership and administration
- Medicaid eligibility and federal waiver administration
- Development and maintenance of policy and administrative rules
- Oversight of licensed care facilities
- Ensuring Medicaid provider enrollment
- Support and leadership for various advisory councils.

- Administration of the Older Americans Act
- Home Care Commission

Program Delivery

Staff and services provide direct services to Oregonians, including:

- Direct service staff located in local offices throughout the state
- Case management
- Presumptive Medicaid Disability Determination Team
- State Family/Pre-SSI
- Disability Determination Services
- Administration of Medicare Modernization Act and Buy-in programs
- Provider payments and relations
- Adult Protective Services investigations
- Adult Foster Home, Nursing Facility and Community-Based Care licensing
- Long-term care referral services registry

Eligibility and case management services are delivered throughout the state by APD and Area Agency on Aging (AAA) employees. ORS Chapter 410 allows AAAs to determine which populations they wish to serve and which programs they wish to administer. Type B Transfer AAAs choose to provide Medicaid services in addition to Older Americans Act and OPI services. In areas where the AAAs (Type A - AAAs) do not provide Medicaid services, APD has local offices to serve older adults and people with disabilities.

APD and AAA case managers perform a variety of roles in serving older adults and people with disabilities. They determine long-term services and supports eligibility, assist individuals in developing person-centered service plans, and find qualified providers. They address issues and concerns regarding providers. They act as advocates and champions for consumer rights. They assist individuals in accessing supports available through APD and other programs. In short, case managers are the front line in protecting individuals from abuse and neglect.

APD case managers face increasingly complex work. In just the past seven years, APD implemented Waivered Case Management expectations requiring monthly contact on every case. Due to changes to the Fair Labor Standards Act, APD added more responsibilities on working with home care workers, including managing hourly caps, limiting overtime and ensuring access to adequate

services. Based on federal expectations, APD has also increased expectations on person-centered planning and ensuring individuals' safety. Legal requirements have made notices more complex and detailed, requiring more case management time to issue each notice.

History

During the past 40 years, there has been a profound shift in society's understanding of the importance of independence for aging and people with disabilities. Traditionally, states had provided services to these individuals in institutional settings such as nursing facilities. Oregon's first nursing facility opened in the 1940s. With the passage of the federal statute creating Medicaid, the state began to pay for nursing facility services for eligible individuals in the 1960s.

The Older Americans Act also passed in the 1960s, which over time, has expanded additional protections and services to vulnerable older adults, including access to home-delivered meals, senior centers, transportation, family caregiver support, legal services and the Office of the Long Term Care Ombudsman to uphold rights and resolve complaints.

Professional standards and public thinking about how to best serve people with disabilities began to change and community living became more accessible. Leading the nation in the 1970s, Oregon developed legislation that recognized the importance of assisting seniors in maintaining their independence and recognizing their inherent dignity. Later, on a national level, civil rights were strengthened and expanded by the Americans with Disabilities Act, in the areas of employment, public accommodations, transportation and housing. Community integration, a right, became more available to individuals with disabilities as accessibility increased and society began to accept people with disabilities as part of the community. Families had the ability to remain intact and to keep their loved ones — child, adult or senior — at home.

Federal dollars to fund Medicaid waivers first became available in 1981 for "Home and Community-Based Services." That same year, the Oregon Legislature updated its policies around disabilities and found that significant numbers of people with disabilities lived in institutions because adequate community services did not exist. The Legislature mandated that the state work to empower people with disabilities, keep them as independent as possible, and develop service settings that were alternatives to institutionalization. The 1981 Oregon Legislature also created the

Senior Services Division and a strong statutory mandate to support seniors in their own homes and community settings outside of institutions. This action forged the way for Oregon to lead the nation in the development of lower-cost alternatives to institutional care.

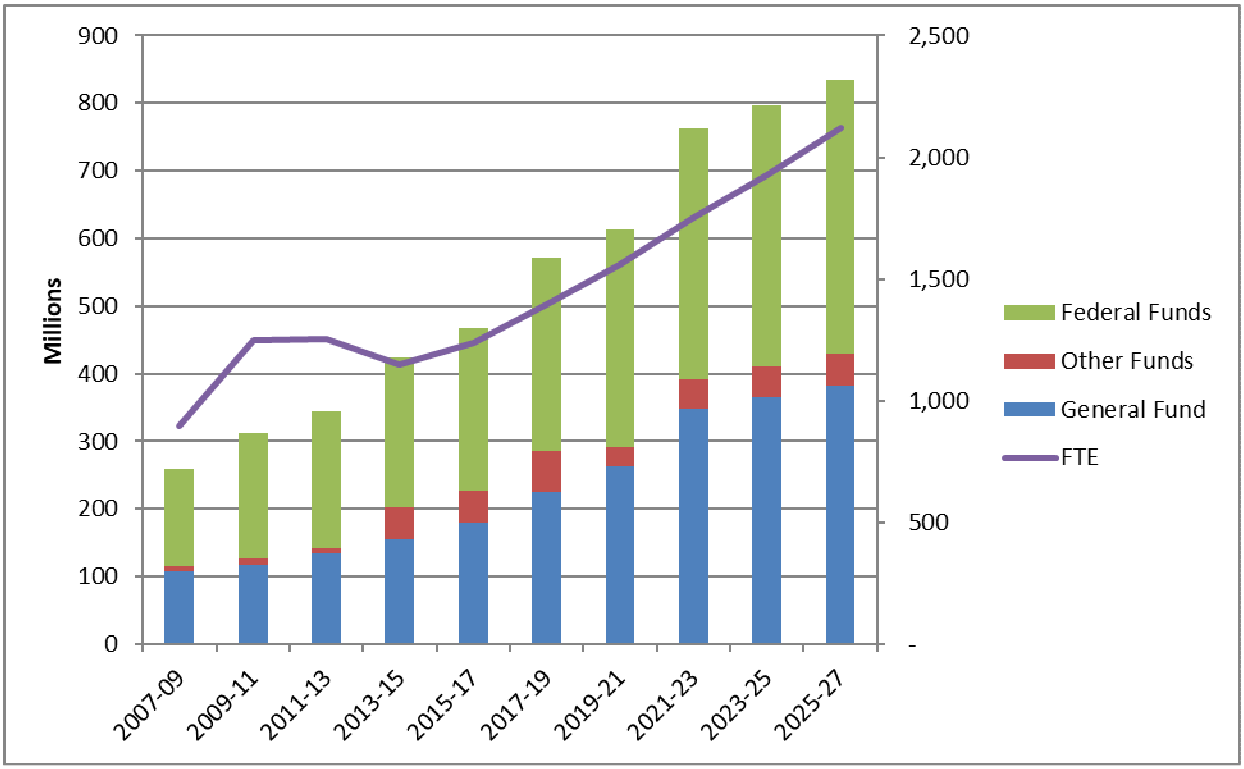
In response to that mandate, Oregon applied for, and received, the first home and community-based waiver that allowed Medicaid funds to provide long-term services outside an institution. Throughout the 1980s and 1990s, Oregon received waivers that allowed services for unique groups of people. For Medicaid-eligible older adults and people with disabilities in Oregon, this has meant that the provision of long-term care has, in large measure, shifted away from nursing facilities to in-home services, assisted living facilities, residential care facilities and adult foster homes. In 2013, APD worked with the Legislature to shift from waivers to a state plan that allowed the state to gain additional federal funds to support individuals receiving services through the Medicaid program.

Future populations

The aging population is growing rapidly. The number of people 65 and older in the United States is expected to increase to 55 million in 2020, to 70 million by 2030, and to 88.5 million ─ or 20 percent of the population ─ in 2050.

The aging population in Oregon will increase dramatically as baby-boomers continue to enter the retirement age. The aging population growth rate has exceeded 4 percent annually since 2011. Estimates show 48 percent more older adults in 2020 than in 2010. This population of elders are typically more financially challenged than previous generations.

In 2016, approximately 17 percent of Oregon's population was 65 years or older. By 2030, the percentage is expected to increase to nearly 20 percent.



In Oregon, people 85 years or older make up a small but rapidly growing group within the total population. By the end of 2010, approximately 76,000 Oregonians will have reached age 85. By 2020, the number is expected to reach nearly 120,000, an increase of almost 64 percent.

A focus on service equity and diversity, including individuals of different races, ethnicities, genders, sexual orientation, disability, age and other under-served populations, will create new approaches to service delivery that ensure all

individuals have access to critical supports and services and achieve desired outcomes.

Department of Human Services: Delivery and Design

Primary Long-Term Focus Area: Safer, Healthier Communities
Secondary Long-Term Focus Area:
Program Contact: Mike McCormick

APD expects to see a rebound in caseload growth in the coming biennium with increased complexity in the individuals it serves. APD faces immediate challenges to sustain staffing levels to meet the growing need for services and higher expectations on those workers.

Program Overview

The Aging and People with Disabilities (APD) delivery system provides services and supports to Oregonians over the age of 60 and to adults with physical disabilities. The population is a diverse cross-section of Oregonians that requires supports that take into account race, ethnicity and language; gender expression, and sexual orientation. APD provides services to individuals recognizing their unique individuality and lived experiences.

Design and Delivery includes staff create programs and services and provide technical assistance for Oregon's long-term care system as well as the staff and partners who directly provide services in over 50 offices located throughout the state.

Program Description

The APD program delivery system provides respectful and inclusive services and eligibility determinations to over 160,000 Oregonians. Some of the services accessed by individuals include:

- Medical assistance (Oregon Health Plan and Medicare premium assistance)
- Disability determinations
- Supplemental nutrition assistance
- Long term services and supports

Some individuals access financially based services such as Medical assistance and are served by eligibility staff only; case management services are provided to individuals accessing long term services and supports only. Approximately 35,000 of the 160,000 individuals APD serves access long-term care services and supports. For these individuals, local case management services generally consists of assessment, choices counseling, service plan development, risk monitoring and ongoing monitoring. Additionally, local offices have memorandums of understanding (MOUs) with local Coordinated Care Organizations. These MOUs focus on joint accountability for coordinating care for individuals accessing long-term care services. State and Area Agency on Aging (AAA) case managers are the front line in ensuring effective care coordination occurs for individuals served by APD's long-term care system.

Local staff license adult foster homes, including those that do not participate in Medicaid. Local staff also provide adult protective services, consisting of investigations of abuse and neglect against seniors and people with disabilities.

APD has historically earned local service delivery staff through a caseload ratio model (e.g. one eligibility worker for every 500 cases). In the 13-15 biennium, the Legislature authorized the transition to a workload model. This model differs from the caseload ratio model in that it measures time required to perform tasks and captures work performed for individuals who are never found eligible. However, the model has fallen out of date recently and needs an overhaul. Additionally it only captures the work that staff are able to do and does not account for changes in expectations and the work they are unable to complete.

The delivery system is comprised of both state staff and AAA staff located in communities throughout Oregon. Under ORS 410.270, AAAs have the right to elect to deliver Medicaid services locally. Currently, four AAAs have elected this option. These four AAAs (Multnomah County, Northwest Senior and Disability Services, Oregon Cascades West Council of Government. and Lane Council of Governments) serve the most populous areas of Oregon. APD serves the remainder of the state including Washington and Clackamas counties.

The Oregon Home Care Commission (HCC) is also included in the Design and Delivery Program Area. Under Oregon's constitution, the HCC is responsible for ensuring the quality of home care services for seniors and people with disabilities. The Commission maintains a web-site of home care workers and personal support workers that can be accessed by all Oregonians, including those not served by Medicaid. Training is provided to both consumers and home care workers in a variety of areas addressing safety and quality. The efforts of the HCC are critical to the successful delivery of long-term care services to Oregonians.

APD's Design and Delivery area also includes the staff that design and administer services centrally. Some of the major services provided include:

- Negotiating system design with federal partners
- Developing program policy and maintaining administrative rules
- Paying providers
- Executing contracts

- Negotiating and implementing collective bargaining agreements
- Maintaining provider rates

Program Justification and Link to Focus Areas

There is a direct link between this program and the goal of Safer, Healthier Communities. The APD Delivery system supports individuals living in their communities in settings of their choice, whether in their own home, a community-based care facility or a nursing facility. Partnerships between local law enforcement, local court systems, and local advocates are critical to ensuring the senior and disability populations are protected from neglect and abuse.

Enabling Legislation/Program Authorization

Oregon Revised Statutes 410.070 charges the agency with primary responsibility for the planning, coordination, development, and evaluation of policy, programs and services for older adults and people with disabilities in Oregon. Area Agencies on Aging have universal responsibilities as articulated in ORS 410.210. Additionally, ORS 410.270 authorizes Area Agencies on Aging to perform services locally that would otherwise be administered by state staff if they elect to do so.

Funding Justification and Significant Changes to CSL

Aging and People with Disabilities - 2021-23 POP Request	GF	OF	FF	TF	Positions	FTE
101 - ODHHS Staffing Accommodations	327,880	-	294,662	622,542	3	2.64

This Policy Package would significantly improve ODHHS' ability to address underserved Deaf and hard of hearing Oregonians and their families in a data-informed way, and to cultivate stronger ASL and captioning services statewide, bringing our Deaf and hard of hearing services closer to national standards.

Aging and People with Disabilities - 2021-23 POP Request	GF	OF	FF	TF	Positions	FTE
102 - Community Abuse Determination Project	2,549,127	-	-	2,549,127	12	10.56

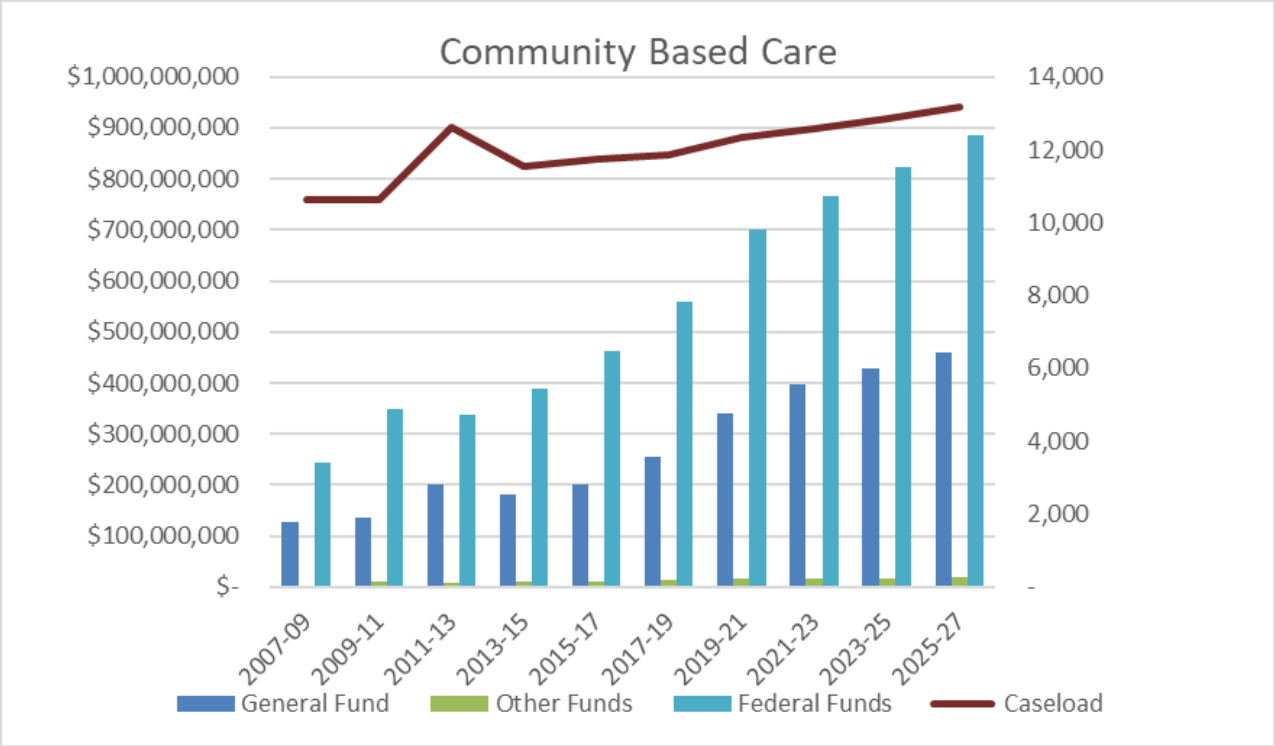
Significant legislative changes to increase safety of vulnerable Oregonians served by DHS Aging & People with Disabilities (APD) have been signed into law over the last ten years. In addition, internal audits and a DOJ memo outlined draft recommendations for DHS/APD procedural due process for persons substantiated in abuse investigations. DOJ and Internal Audits have highlighted critical weaknesses in APD's safety and protection system for Oregon's ever-growing vulnerable populations of older adults and adults with physical disabilities. The

investment of the resources necessary for APD to respond to these changes has not occurred. As a result, APD is currently not in compliance with multiple statutory requirements, DOJ and audit recommendations related to safety; and are not providing statutorily mandated levels of oversight to APS Specialists.

Aging and People with Disabilities - 2021-23 POP Request	GF	OF	FF	TF	Positions	FTE
103 - OPI Expansion and Family Caregiver Support	2,822,950	-	2,822,608	5,645,558	38	28.50

This policy package would create a stable and sustainable program to assist consumers who need a lighter amount of supports through an expanded Oregon Project Independence (OPI) program, as well as a program to support consumers receiving supports from unpaid or family caregivers, with the goal of helping these consumers remain independent while delaying or avoiding entry into the Medicaid long term services and supports system.

Aging and People with Disabilities - 2021-23 POP Request	GF	OF	FF	TF	Positions	FTE
104 - Improv Health by Reduc Social Isolation	220,182	-	220,165	440,347	2	1.92



Loneliness and isolation can be as harmful than smoking 15 cigarettes as day and lead to increased chronic disease and premature death. APD Medicaid in-home consumers are at disproportionate risk of isolation with between 6-14% reporting feeling isolated or alone. APD is seeking funding to provide new services to combat loneliness/isolation among APD in-home consumers and improve health.

Aging and People with Disabilities - 2021-23 POP Request	GF	OF	FF	TF	Positions	FTE
207 - Provider Time Capture M&O	2,561,753	-	1,747,642	4,309,395	7	7.00

The Department of Human Services (DHS) and Oregon Health Authority (OHA) in-home care programs need a system that will increase program integrity and comply with the federal 21st Century CURES Act for Electronic Visit Verification (EVV) System and the U.S. Department of Labor Fair Labor Standards Act (FLSA). This would be done with the implementation of a time, attendance and payment system for the program's Home Care Workers and Personal Support Workers (HCW/PSW). The drivers for this work include a need for: 1. Improved timeliness and accuracy of data 2. Improved compliance with federal, state, and bargaining requirements 3. Increased efficiency and internal controls 4. Decreased duplication of efforts across agencies 5. HCW/PSW to accurately and timely report services provided across programs 6. Decrease dependency on outdated legacy systems This POP requests General Fund to implement ongoing maintenance and enhancements that build upon a base system implemented in the 2021-23 biennium that would result in an integrated solution that meets the 21st Century Cures Act criteria and helps protect vulnerable Oregonians. Not funding this POP would limit Oregon's ability support the system.

Department of Human Services: Medicaid Long-Term Care Community-Based Care

Primary Long-Term Focus Area: Safer, Healthier Communities
Secondary Long-Term Focus Area:
Program Contact: Mike McCormick

Access to care was challenging when a robust private-pay market existed in the mid-2000s. An investment by the Legislative Assembly in 2008 strengthened access considerably.

Program Overview

Community-based care is considered the middle layer of Oregon's long-term care continuum and includes a variety of 24-hour care settings and services for low-income seniors and people with physical disabilities who cannot meet their own activities of daily living. These services are part of Oregon's nationally recognized home and community-based care system, which provides a critical, cost-effective alternative to nursing facilities.

Eligibility for services is based upon a combination of financial criteria and service needs. An individual's service needs are calculated as a "service priority level" which ranges from 1 (highest need) to 18 (lowest need). In the 2003 budget crisis, funding to serve individuals with service priority levels 14 through 17 was eliminated (SPL 18 was not funded at that time). These levels remain unfunded through Medicaid; however, some (not all) of the needs can be met for these individuals through Older Americans Act and Oregon Project Independence programs.

Program Funding Request

APD Community Based Care				
	General Fund	**Other Fund**	**Federal Fund**	**Total Funds**
19-21 LAB	$340,563,556	$15,559,662	$701,871,290	$1,057,994,508
21-23 ARB	$398,018,839	$15,898,547	$767,301,098	$1,181,218,484
Difference	$57,455,283	$338,885	$65,429,808	$123,223,976
% Diff	**16.87%**	**2.18%**	**9.32%**	**11.65%**

Program Description

The State of Oregon strives to meet the needs and expectations of increasingly diverse populations, and community-based care provides a critical alternative to nursing facilities for seniors and people with disabilities who cannot meet their own daily needs.

Eligibility for long-term care services and supports is based upon a combination of financial criteria and service needs. Recipients contribute their own funds toward room and board directly to community-based care facilities, while the state pays for services consisting mostly of assistance with activities of daily living (walking, transferring, eating, dressing, grooming, bathing, hygiene, toileting, and cognition) and instrumental activities of daily living (meal preparation, housekeeping, laundry, shopping, medication, and oxygen management). Nursing facility care is a guaranteed Medicaid benefit to eligible individuals. If the state did not use alternatives to nursing facility level of care, more than 31,000 individuals,

including more than 12,200 in community-based care, would likely be receiving services in nursing facilities at approximately 300 percent of the cost of community-based care services.

Community-based care includes:

- Adult foster homes, which serve five or fewer individuals in a home-like setting.
- Residential care facilities (RCF), which serve six or more individuals in a facility with private or shared rooms and common areas.
- Assisted living facilities (ALF), which serve six or more individuals in their own apartments.
- Memory care facilities, licensed as either an ALF or RCF, with an endorsement allowing them to specialize in serving individuals with dementia.
- Enhanced-care services, which serve APD eligible individuals complicated by significant mental health needs. This program is jointly funded between DHS and the Oregon Health Authority.
- Program of All-Inclusive Care for the Elderly (PACE) serves more than 1,600 individuals via a fully capitated premium. The program is jointly funded with Medicare and Medicaid dollars and provides an integrated program for medical and long-term services. Participants are 55 years of age or older, generally attend adult day services, and live in a variety of settings representative of Oregon's long-term care continuum. PACE providers are responsible for providing and coordinating the full health and long-term service needs of their clients in all of these setting types.

APD competes with the private pay market for access to most community-based care. Most facilities have a mix of private pay and Medicaid residents. As the society ages and the economy strengthens, APD may lose access due to competition for open beds with the private pay market.

Adult foster homes are represented by SEIU and have collective bargaining rights. Factors such as safety and quality cannot be negotiated; however, issues such as training and service rates are mandatory subjects of bargaining.

Each community-based care setting must meet federal and state laws and regulations related to health, safety and service delivery. Mandatory services

include assistance with activities of daily living, medication oversight, and social activities. Some settings that serve individuals with more complex needs may include additional services, such as nursing and behavioral supports.

Program Justification and Link to Focus Areas

Community-based care is a direct link to the Safer, Healthier Communities focus area (Oregonians are healthy and have the best possible quality of life at all ages). The program maximizes federal resources while reducing unnecessary costs in higher levels of care. With one of the lowest levels of nursing facility utilization in the country, Oregon is at the forefront of using community-based care as a core alternative to nursing facilities. With ongoing support, Oregon can meet the target of serving 90 percent of the publicly funded long-term care caseload in-home and community-based care in the next ten years (up from 86 percent).

Program Performance

A key goal of the Department of Human Services (DHS) is that people are safe and living as independently as possible. DHS currently measures this goal based on the percentage of individuals living in their own homes in lieu of a licensed care facility, as well as the percentage of individuals who move to a less restrictive service settings such as community- based care. As of May 2020, DHS served 12,312 individuals in community-based care, compared to 4,433 in nursing facilities.

Community-based care service plans have been proven to be a cost-effective alternative to nursing facility care. Costs range by facility type and assessed need of the individual. The monthly average cost by setting is:

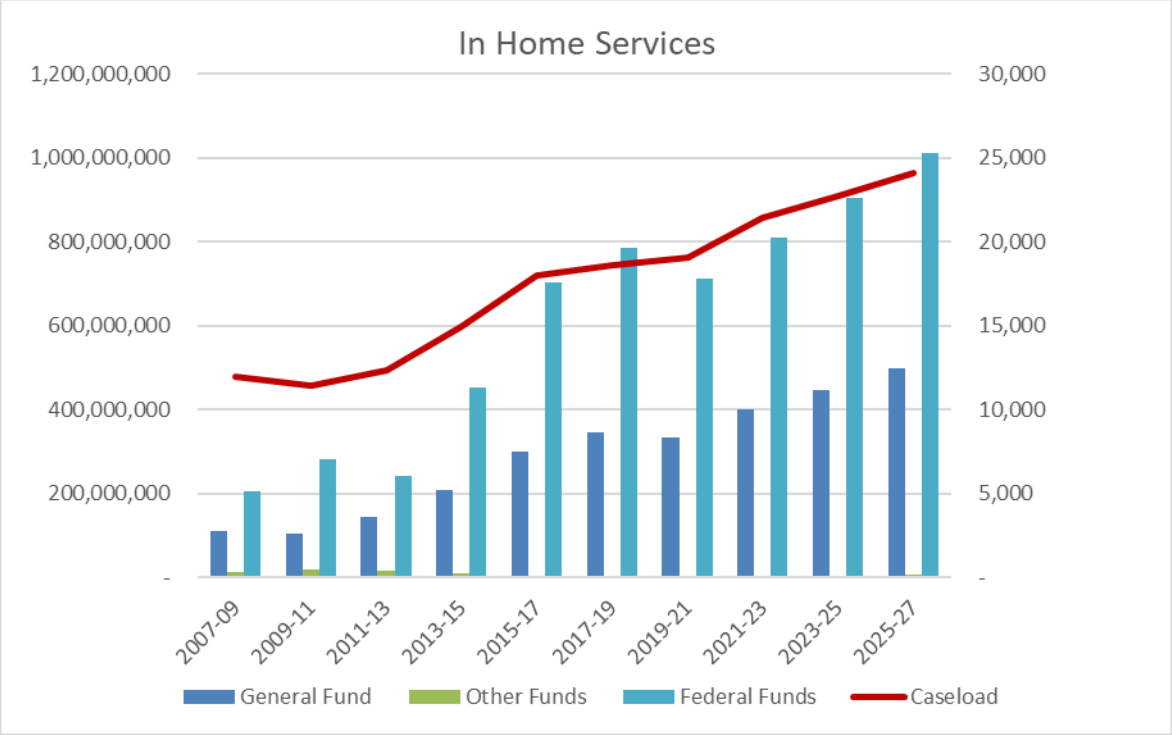
- AFHs: $3,930
- RCFs: $2,280
- RCFs (Specialized, including Memory Care): $5,270
- ALFs: $2,760

The cost of similar services provided in a nursing facility exceeds $10,575 per month.

Enabling Legislation/Program Authorization

Community-based care is operated under a variety of Medicaid home and community-based options. The newest mechanism is the 1915(k) State Plan Option or, "K plan." Through the K plan the state provides services that substitute for nursing facility services, the mandated benefit for Medicaid eligible individuals. The K plan provides an enhanced federal match allowing the state to draw down additional federal funds to support the Medicaid program. Additionally, ORS 410 and ORS 443 provide statutory policy and structure to the services offered.

Funding Streams



Community-based care services are funded through the Medicaid program. Therefore, the federal government pays approximately 67 percent and the state pays 33 percent. There is a small amount of funding from the estates of former recipients. When a Medicaid recipient passes away, the state is required by federal law to recover money spent for the individual's care from the recipient's estate. These funds are reinvested in services for other individuals, offsetting the need for general funds.

Funding Justification and Significant Changes to CSL

N/A

Department of Human Services: Medicaid Long-Term Care In-Home Services

Primary Long-Term Focus Area: Safer, Healthier Communities
Secondary Long-Term Focus Area:
Program Contact: Mike McCormick

In the 13-15 biennium, in-home agency and personal care budgets were moved from 'other services' to In-Home care for reporting purposes.

Program Overview

In-home services are the least restrictive service offered in Oregon's long-term care continuum. This program funds Medicaid long-term care services to seniors and people with disabilities in their own homes. Individuals are eligible to receive the same services in a nursing facility. In 2013, Oregon added a new Medicaid, 1915(k) State Plan Option, or "K plan," that provides additional flexibility and federal funds. Approximately 53 percent of individuals served in Oregon's long-term care system are served in their own homes. In-home services offer an

opportunity to provide individualized care in a respectful, sensitive, and inclusive manner to Oregonians from a variety of diverse backgrounds.

Program Funding Request

APD In Home Care				
	GF	OF	FF	TF
19-21 LAB	$ 334,113,299	$ 4,197,619	$ 712,695,791	$ 1,051,006,709
21-23 ARB	$ 401,396,735	$ 4,378,117	$ 811,032,746	$ 1,216,807,598
Difference	$ 67,283,436	$ 180,498	$ 98,336,955	$ 165,800,889
% Difference	20%	4%	14%	16%

Program Description

This cost-effective program enables eligible low-income seniors and people with disabilities to remain in their own homes and established communities. Individuals from culturally diverse backgrounds benefit from this program that provides enhanced independence, health, safety, and quality of life. Oregon's model of long-term care is referred to as a social model, distinctly different from a medical model of care. Social models of care focus on client autonomy, respect, choice, and individualized care planning. Individuals are viewed holistically, provided supports that enhance independence, dignity, and respect.

Eligibility for services is based upon a combination of financial criteria and service needs. An individual's service needs are calculated as a "service priority level" which ranges from 1 (highest need) to 18 (lowest need). In the 2003 budget crisis, funding to serve individuals with service priority levels 14 through 17 was eliminated (SPL 18 was not funded at that time). These levels remain unfunded through Medicaid; however, some (not all) of the needs can be met for these individuals through Older Americans Act and Oregon Project Independence programs.

In-home supports include necessary assistance with activities of daily living (walking, transferring, eating, dressing, grooming, bathing, hygiene, toileting, and cognition) and instrumental activities of daily living (meal preparation, housekeeping, laundry, shopping, medication, and oxygen management). Assistance ranges from several hours per week to 24 hours per day. Without these supports, more than 19,000 individuals would likely receive services in a more

costly nursing facility. Oregon provides a variety of in-home service options available to individuals based on preference, choice, and cost-effectiveness.

Consumer-Employed Provider Program

Individuals participating in this program receive services from homecare workers. The in-home recipient is considered the employer and is empowered and responsible to hire, train, supervise, track hours worked, address performance deficiencies, and discharge providers. Homecare workers are paid a set rate established through collective bargaining, which the State pays on the individual's behalf. The Oregon Home Care Commission establishes homecare worker enrollment standards and training for homecare workers, both of which contribute to the quality of in-home services. APD is forecasted to serve approximately 20,000 individuals in this program in the 2021-2023 biennium.

Independent Choices Program

This program is a 1915(j) State Plan Option and allows individuals to exercise more decision-making authority in identifying, accessing, managing, and purchasing goods and services that enhance independence, dignity, choice, and well-being. This option is popular among individuals who wish to take complete control over the planning, budget and provision of services. In the Independent Choices Program, the cost of the established service plan is "cashed-out" and deposited into the eligible individual's dedicated Independent Choices Program checking account. The individual then pays providers directly based on an individually negotiated rate. Participants have the flexibility to use a portion of the funds to purchase goods that enhance their independence and are unavailable through the medical plan, such as a wheelchair lift for a vehicle or a wheelchair ramp for their home. The State performs periodic monitoring with an emphasis on to ensure that the funds are used to meet the individual's service needs and that funds are used appropriately. APD is forecasted to serve approximately 600 individuals in this program in the 2021-2023 biennium.

Specialized Living Services

These services are designed to serve a specific special-needs consumer base, such as those with traumatic brain injuries or quadriplegia who would otherwise require 24-hour care. The services are provided through contracts with qualified vendors

who provide specialized, shared-attendant services to individuals living in their own homes or apartments. APD is forecasted to serve approximately 200 individuals in this program in the 2017-2019 biennium.

Cost Drivers

The major cost drivers of the in-home services program are the current number of eligible individuals, their level of needed assistance, the length of time receiving services, and the growing population of those requiring services. The population served is much different than it was 30 years ago when Oregon first received a waiver to allow in-home services. With the advancement of medical technology and treatment options, individuals are living longer with chronic disease and significant disabilities. Another major cost driver is the provision of wages and benefits for homecare workers tied to collective bargaining. This includes set wages, paid time off, workers' compensations premiums, unemployment insurance, and other benefits.

Program Justification and Link to Focus Areas

In-home services link to the Safer, Healthier Communities focus area. In the early 1980s, Oregon was the first state awarded a Medicaid 1915(c) Home and Community-Based Services waiver from the Centers for Medicare and Medicaid Services, which allowed Oregon to serve individuals in their homes and communities. In 2013, Oregon added a new, 1915(k) State Plan Option, or "K plan," that provides additional flexibility and funds. In an independent study conducted by AARP, Oregon received an overall ranking of 4th out of 50 states in terms of choice of settings and providers, quality of life and quality of care, and effective transitions from nursing facilities back into the community. Across the nation, Oregon continues to be a leader for serving individuals in their own homes.

The program empowers individuals to direct their own services and make choices that enhance their quality of life, live with dignity, and remain as independent as possible. Health and safety are maintained through the provision of necessary assistance with activities of daily living and instrumental activities of daily living. Consistent provision of services, including medication management and the preparation of nutritious meals, delays or diverts an individual's entry into more costly care settings.

Program Performance

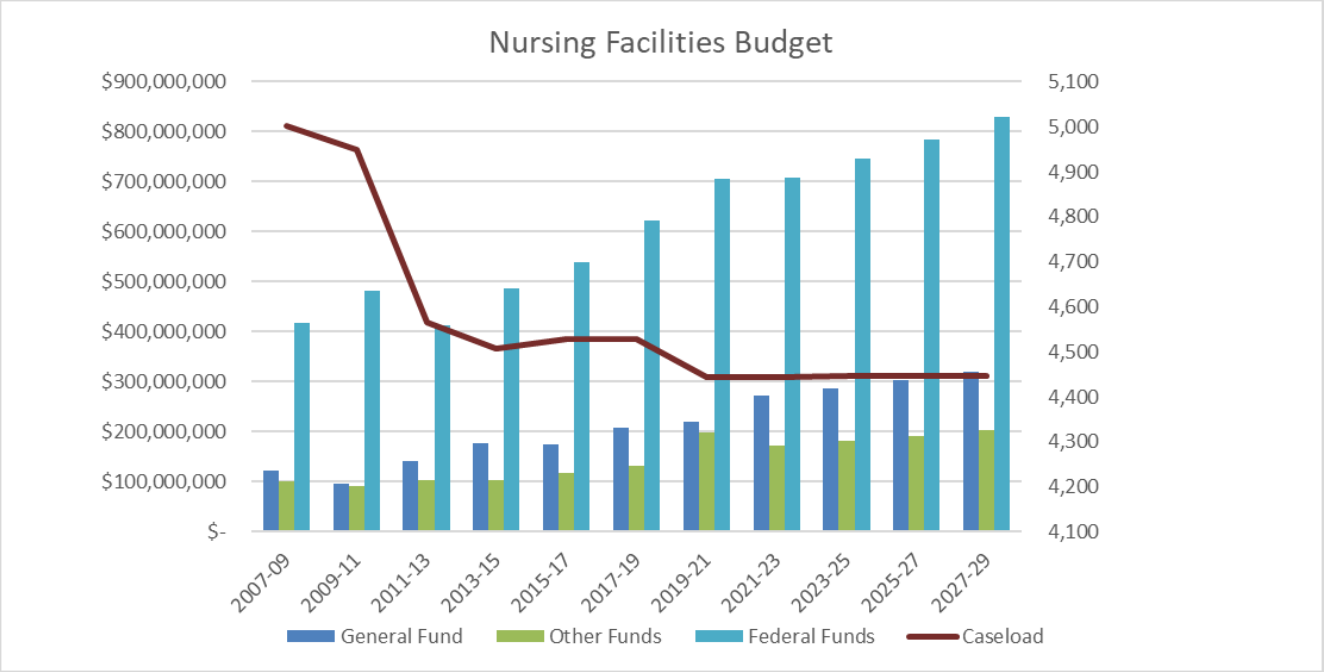
A key goal of the Department of Human Services (DHS) is that people are safe and living as independently as possible. DHS currently measures this goal based on the percentage of individuals living in their own homes in lieu of a licensed care facility, as well as the percentage of individuals who move to a less restrictive service setting.

Enabling Legislation/Program Authorization

Medicaid is an entitlement program that was enacted in 1965 under Title XIX of the Social Security Act. Eligible individuals have the right to receive long-term care services in a nursing facility. While states are not required to participate in Medicaid, they must follow Medicaid rules to receive federal matching funds. Oregon's Long-Term Care system operates under a variety of Medicaid options which allows long-term care services to be provided in home and community-based settings, more cost effective than the required nursing facility service.

Funding Streams

In-home services are funded through the Medicaid program. Therefore, the federal government pays approximately 67 percent and the state pays 33 percent. There is a small amount of funding from the estates of former recipients. When a Medicaid recipient passes away, DHS is required by federal law to recover money spent for the individual's care from the recipient's estate. These funds are reinvested in services for other individuals, offsetting the need for general funds.



Funding Justification and Significant Changes to CSL

Aging and People with Disabilities - 2021-23 POP Request	GF	OF	FF	TF	Positions	FTE
104 - Improving Health by Reducing Social Isolation	2,659,405	-	5,312,915	7,972,320	0	0.00

Loneliness and isolation can be as harmful than smoking 15 cigarettes as day and lead to increased chronic disease and premature death. APD Medicaid in-home consumers are at disproportionate risk of isolation with between 6-14% reporting feeling isolated or alone. APD is seeking funding to provide new services to combat loneliness/isolation among APD in-home consumers and improve health.

Department of Human Services: Medicaid Long-Term Care Nursing Facilities

Primary Long-Term Focus Area: Safer, Healthier Communities
Secondary Long-Term Focus Area:
Program Contact: Mike McCormick

Caseload has shifted toward an overall downward trend as more and more individuals choose to receive long-term care services in a home or community-based setting.

Program Overview

Nursing facility services are the institutional option available in Oregon's long-term care continuum, which also consists of in-home and community-based care. Nursing facilities are generally considered the most restrictive setting of the three options offered; however, this program is important for individuals with the highest levels of acuity and is a mandated federal benefit under the Medicaid program. Nursing facility services are the guaranteed benefit (entitlement) by federal law for individual who meet nursing facility level of care criteria set by the state.

Program Funding Request

APD Nursing Facilities				
	General Fund	**Other Fund**	**Federal Fund**	**Total Funds**
19-21 LAB	$220,164,090	$198,115,292	$706,734,135	$1,125,013,517
21-23 ARB	$273,020,139	$172,381,705	$707,365,071	$1,152,766,915
Difference	$52,856,049	-$25,733,587	$630,936	$27,753,398
% Diff	**24.01%**	**-12.99%**	**0.09%**	**2.47%**

Program Description

Nursing facilities are most appropriate for people with high acuity needs requiring 24-hour medical oversight and a protective/structured setting. They offer short-term care for individuals who need rehabilitation services or 24-hour nursing. They may be appropriate for a limited number of individuals who need long-term care due to permanent health problems too complex or serious for in-home or community-based care settings.

Nursing facility rates cover basic, complex, pediatric, enhanced care, and post-hospital extended care. Services vary in nursing care facilities, but generally consist of the following:

- Medical treatment prescribed by a doctor;
- Physical, speech, and occupational therapy;
- Assistance with personal care activities such as eating, walking, bathing, and using the toilet (custodial care); and
- Social services.

Oregon currently has 129 licensed nursing facilities with 10,731 licensed beds, a continued decrease in both since the 2017 Legislative Session. These facilities have approximately 2.3 million annual resident days, of which nearly 70 percent

are Medicaid clients. The majority of residents were admitted directly from acute care hospitals with a very small percentage from home.

Payer	Long-Term Care – Nursing Facility
Medicare	14.03%
Medicaid	70.81
Private Pay	15.16%

There has been a significant increase in the number and percentage of Medicaid consumers receiving services. There has been a significant increase in revenue coming from Medicaid in the last biennium. It is now 70.81% of NF revenue compared to 61% previously.

The main cost drivers are low census in nursing facilities, the length of stay in a nursing facility, and the steady increase in the daily reimbursement rate. The nursing facility reimbursement rate is tied to the provider assessment statute. The current nursing facility reimbursement rate is $357.73 per resident per day, and the provider assessment rate is $27.28. In the 2021-2023 biennium, the provider assessment is expected to account for approximately $142.2 million of $3.6 billion in total APD program expenditures.

Program Justification and Link to Focus Areas

Nursing facility services link to the Safer, Healthier Communities focus area. Though nursing facility level of care is a guaranteed benefit, Oregon has been the national leader in creating cost-effective alternatives that meet people's needs in their homes and other community settings, such as assisted living facilities, in-home care, retirement communities, residential care, and adult foster homes. Oregon continues to work closely with individuals and their families to offer the full array of community-based services. The new State Plan Authority approved by the Centers for Medicare and Medicaid Services in July 2013 provides Medicaid-funded resources to assist individuals in transitioning from nursing facilities.

Nursing facilities are an important service in our continuum, meeting the needs of some individuals with higher acuity levels; however, DHS still believes there are opportunities to decrease its usage. Oregon continues to highlight, strengthen, and encourage the use of community-based care facilities instead of nursing facilities. DHS has established a goal of decreasing the percentage of long-term care

recipients utilizing nursing facility services to 10 percent. As of May 2020, the percentage of long-term care recipients utilizing nursing facilities services is 12.4 percent.

Program Performance

Nursing facilities are heavily regulated by the federal government and are licensed and routinely monitored by the state. The state establishes requirements for nursing facilities that promote quality of care and maximization of personal choice and independence for residents.

DHS remains diligent in diverting and relocating people who receive Medicaid-funded long-term care services from nursing facilities into home or community settings. One-way performance is measured in this program is by the occupancy percentage of nursing facilities. Oregon has the lowest occupancy in the nation at 64 percent compared with the national average of 82 percent.

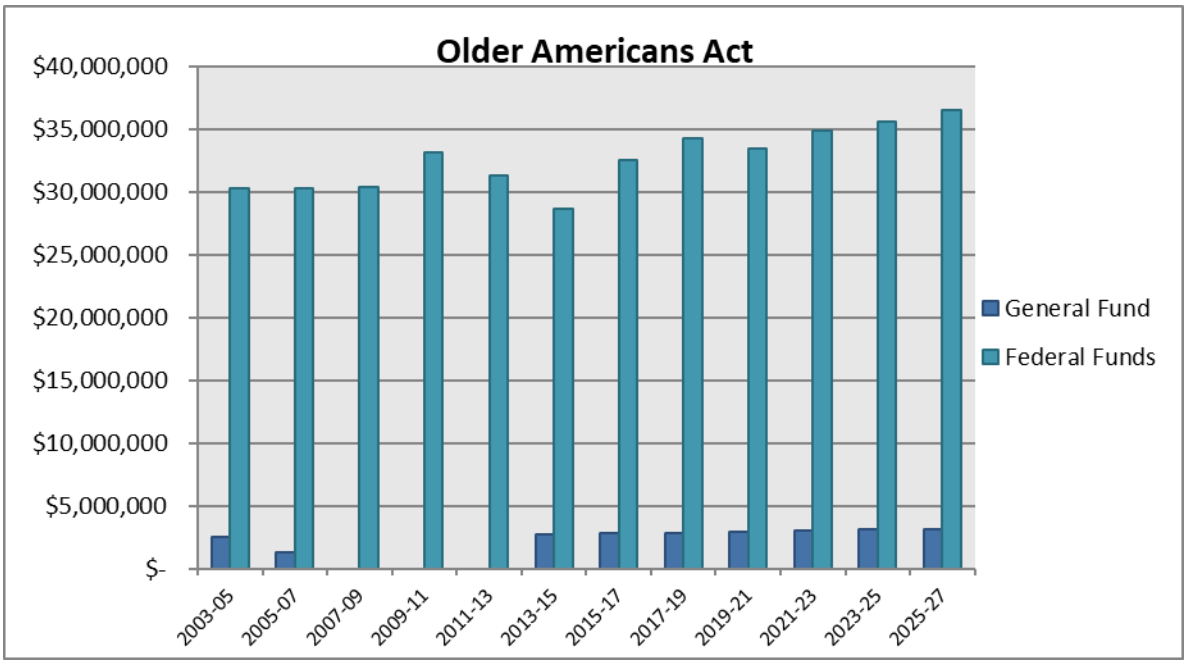
Enabling Legislation/Program Authorization

Medicaid is an entitlement program that was enacted in 1965 under Title XIX of the Social Security Act. While states are not required to participate in Medicaid, in order to receive federal matching funds states must follow the Medicaid rules. Oregon's long-term care system operates under Medicaid state plan authority. All clients qualify for nursing facility care have the choice of receiving care in other settings such as in-home or in community-based care settings.

Oregon's nursing facility reimbursement rate and accompanying provider assessment authorization is promulgated in ORS 409.736. The 2013 Legislative Assembly reauthorized the provider assessment through 2020.

Funding Streams

Nursing facility services are funded through the Medicaid program; therefore, the federal government pays approximately 61 percent with the remaining 39 percent being split between state general funds and provider taxes. In the 2019-2021 biennium, provider taxes from nursing facilities are expected to total $136.9 million There is $28.2 million in biennial funding from the estates of former



recipients. When a Medicaid recipient passes away, the state is required by federal law to recover expenditures for the individual's care from the recipient's estate. These funds are reinvested in services for other individuals, offsetting the need for general fund.

Funding Justification and Significant Changes to CSL

N/A

Department of Human Services: Older Americans Act

Primary Long-Term Focus Area: Safer, Healthier Communities
Secondary Outcome Area:
Program Contact: Mike McCormick

Older Americans Act funding comes primarily from the federal government. In 2019, OAA funding helped serve nearly 213,000 Oregonians.

Program Overview

Services and supports available to individuals under the Older Americans Act (OAA) provide vital assistance designed to prevent or delay entry into Medicaid-funded long-term care such as In-Home or 24-hour residential services. The OAA is a Federal law that set out a national aging network structure consisting of the U.S. Administration on Aging (AoA) now part of the Administration for Community Living, State Units on Aging (DHS/Aging and People with Disabilities program), and Area Agencies on Aging (AAAs). The OAA authorizes funding and services through this network to serve older individuals in their homes and communities, through local entities. All individuals, aged 60 or older, regardless of income are eligible to receive services but the programs are targeted

towards those in greatest social or economic need. A specific focus on how to better serve diverse populations of older adults across race/ethnicity, sexual orientation, gender, veteran status, and other intersecting categories are essential with the continually changing demographics of Oregon.

Program Funding Request

APD Older Americans Act				
	GF	**OF**	**FF**	**TF**
19-21 LAB	2,877,112	-	33,427,805	36,304,917
21-23 ARB	3,000,828	-	34,865,201	37,866,029
Diff.	123,716	-	1,437,396	1,561,112
% Diff.	**4.30%**	**0.00%**	**4.30%**	**4.30%**

Program Description

Older Americans Act services are administered entirely by 16 local Area Agencies on Aging. To qualify for OAA supported services an individual must meet the following criteria:

- Be 60 years of age or older;
- Be a caregiver of someone 60 years of age or older (or younger if the person is diagnosed with Alzheimer's Disease or related dementia) or an older relative caring for a child 18 year of age or younger or an individual with disabilities age 18 or older; or
- Be 55 or older and have an adjusted income at or below 125 percent of Federal Poverty Level for the Senior Community Service Employment Program (Title V).

Please Note: There is no income or asset/resource criteria for eligibility, except for the Senior Community Service Employment Program (Title V).

The Older Americans Act authorizes services and funding by title

Title III
Supportive Services - Provides assistance to maintain independence through assisted transportation, information and referral/assistance, in-home care, adult day care, chore services, home modification and other housing help, legal assistance,

mental health outreach, and assistive devices. Title III also partially funds Oregon's Aging and Disability Resource Connection (ADRC), which provides unbiased information, referral, and options counseling for individuals (consumers, family members, caregivers) needing long-term services and supports.

Nutrition Services - In order to reduce hunger and food insecurity and promote socialization, health, and well-being the Act authorizes both home-delivered (commonly known as Meals on Wheels) and congregate (community setting, senior center, community center, etc.) meals programs. The Act also requires nutrition education and counseling.

Services Incentive Program (NSIP) - Supplements funding authorized under Title III for food used in meals served under the Older Americans Act. States receive an allocation based on the number of meals served under the OAA in the state in proportion to the total number of meals served by all states.

Preventive Health Services - Authorizes evidence-based programs that promote healthy lifestyles through physical activity, appropriate diet and nutrition and self-management of chronic health conditions.

National Family Caregiver Support Program - Provides individual and group options counseling, training, and respite care for family members and friends who are primary caregivers to seniors. This program also provides support to older relatives and raising grandchildren.

Title V

Senior Community Service Employment Program (SCSEP) – Authorizes a community service and work-based training program for older workers that provides subsidized, service-based training for low-income persons 55 or older who are unemployed and have poor employment prospects. Participants are paid minimum wage for approximately 20 hours per week while they develop valuable skills and connections to help them find and keep jobs in their communities. Title V funding is awarded to DHS/APD from the U.S. Department of Labor and is competitively sub-granted to a qualified job training organization.

Title VII

Elder Rights Services - Provides a focus on the physical, mental, emotional and financial well-being of older Americans. Services include pension counseling, legal assistance, and elder abuse prevention education.

Ombudsman Program - Establishes an Office of the State Long-Term Care Ombudsman program to identify, investigate, and resolve complaints made by or on behalf of residents of licensed care facilities (nursing homes, assisted living, and adult foster homes) and promote system changes that will improve the quality of life and care for residents. The allocation for this program is 100 percent passed through to the Office of the Long-Term Care Ombudsman, a separate state agency from APD.

OAA Funding

OAA funding is granted to each State Unit on Aging (DHS/APD) based on a population formula. The State Unit on Aging sub-grants Title III funds to Oregon's 16 designated Area Agencies on Aging (AAA) based on a state population formula. The AAAs work with their local communities to assess and develop a menu of services that meet the needs of older adults in their planning and service area. Subsequently, the AAA submits an Area Plan to the State describing the delivery of OAA services in their communities; this is basis for the funding agreement between the AAA and DHS/APD.

Program Justification and Link to Focus Areas

OAA program services contribute to the Safer, Healthier Communities goal. The OAA, in partnership with providers and clients, provides vital support for older adults who are at significant risk of losing their independence by providing food, job training/opportunities, social support, transportation, chronic disease self-management and fall prevention.

Annual State Program reports are submitted to the Administration on Community Living, consisting of service unit data and client demographics. Evidence-based programs supported by the preventive health services funding under Title III have provided an opportunity to demonstrate health care cost-saving based on the research supporting the programs. The Senior Community Service Employment Program tracks six performance measures each year including employment and retention. Performance standards and measures have recently been established for

the Aging and Disability Resource Connections Program and will be tracked appropriately.

Program Performance

- **Number of people served/items produced**
  OAA data reporting requires AAAs to capture identifiable unduplicated clients who receive "registered services" and an estimated number of clients receiving "non-registered services." Registered services include personal care, home care, chore, meals, day care, case management, assisted transportation, caregiver, and nutrition counseling. Non-registered services include but are not limited to information and assistance, health promotion programs, group education, etc. The AAAs served approximately 213,000 distinct individuals in state fiscal year 2019.

- **Quality of the services provided**
  Program standards have been established for the major services and annual program monitoring is conducted.

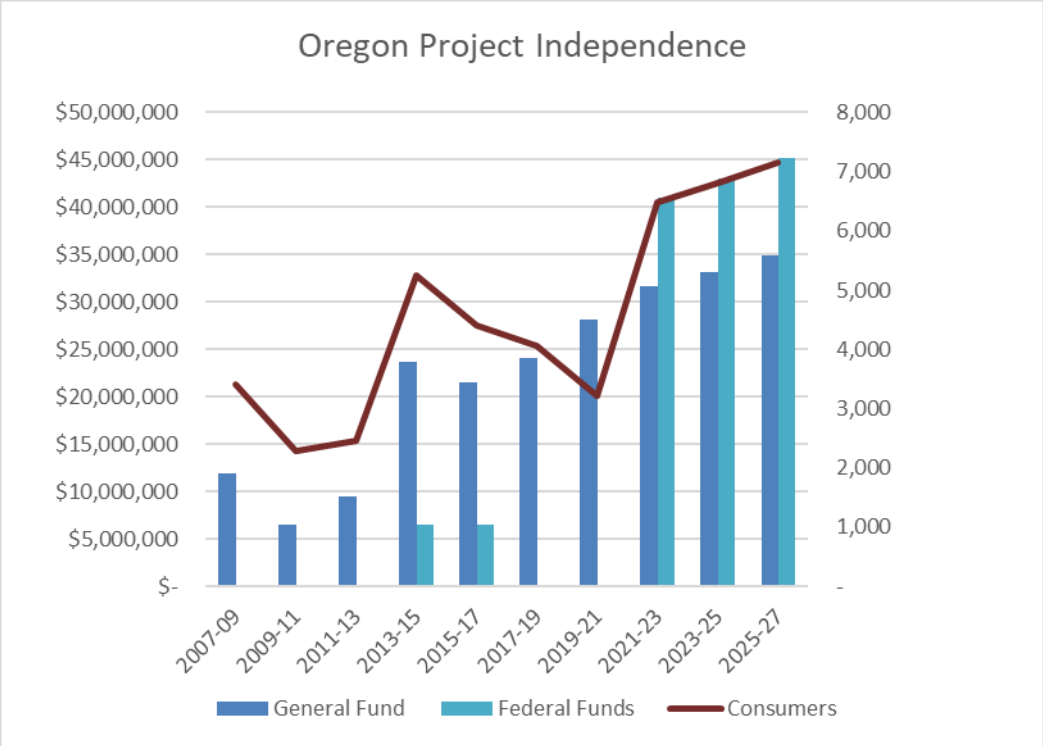
- **Timeliness of services provided**
  The Family Caregiver Support Program of the OAA is the only service area that consistently encounters wait lists.

- **Cost per service unit**
  Varies depending on the level of community support, the OAA funding on average supports about one-third of the cost of service. Further funding comes from local governments, donations, and fundraising.

Enabling Legislation/Program Authorization

Federal Law: 45 CFR, Part 1321.

Funding Streams



OAA funds are 100 percent federal. The law has a required Maintenance of Effort and state match of $5 million per biennium, which is met with state funding authorized for the Oregon Project Independence Program (ORS 410.410 to 410.480). OAA funding was never intended nor does it fully fund services. Each dollar of OAA funding is leveraged with $2 of state and local funds, participant donations, and community fundraising. Additionally, the services are enhanced with the in-kind support of volunteers, donated community space and equipment, etc.

Funding Justification and Significant Changes to CSL

Department of Human Services: Oregon Project Independence

Primary Long-Term Focus Area: Safer, Healthier Communities
Secondary Long-Term Focus Area:
Program Contact: Mike McCormick

Program Overview

Oregon Project Independence (OPI) provides preventive and in-home services and supports to a diverse population of eligible individuals to reduce the risk of out-of-home placement and promote self-determination. This program optimizes eligible individuals' personal and community support resources to prevent or delay spend down to Medicaid-funded long-term care.

% Diff.	12.49%			158.41%

Program Description

Oregon Project Independence (OPI) is a state-funded program offering in-home services and related supports to a diverse population of Oregonians. DHS/APD strives to deliver in-home services in a culturally and linguistically appropriate manner. OPI provides essential services such as personal care, homecare and chore assistance, adult day care, service coordination, registered nursing (teaching/delegation of nursing tasks to caregivers), case management and home-delivered meals. This program complements services provided under the Older Americans Act.

Traditionally, OPI has served individuals who are 60 years of age or older who are assessed as needing assistance with activities of daily living (eating, dressing/grooming, bathing/personal hygiene, mobility, elimination, and cognition) and/or instrumental activities of daily living (housekeeping, shopping, transportation, medication management and meal preparation) and are not receiving Medicaid. Also, individuals under age 60 who have been diagnosed with Alzheimer's disease or a related disorder are also eligible. The program was expanded by the 2005 Oregon Legislature to include younger adults with disabilities and recently $6 million to continue funding for a pilot program has been made available to support this limited expansion.

There are neither income nor resource requirements for eligibility; however, these factors are taken into consideration when assessing the individual's risk of needing Medicaid long-term care. OPI clients do not pay a charge for the service coordination they receive. Services other than service coordination are provided at no cost to families with net incomes at or below 150 percent of the federal poverty level (FPL). Families with net incomes from 150 percent to 400 percent FPL pay a

fee toward services using a sliding scale based on income. Families with net incomes at or above 400 percent FPL pay the full cost of the services provided (other than service coordination).

A 2018 study conducted by Portland State University found:

- Half of all traditional OPI consumers were 78 years and older and half of all OPI-Expansion (OPI-E) (serving younger people with disabilities) consumers were 54 years and older.
- The majority of consumers in both traditional OPI and OPI-E are women.
- 84% of traditional OPI consumers and 80% of OPI-E consumers were non-Hispanic White.
- OPI consumers assessed needs are similar to Medicaid consumers though approximately 26% would not meet Medicaid Service Priority Level eligibility.
- 71% of traditional OPI and 82% of OPI-E consumers have incomes that would qualify them for Medicaid.
- Most (at least 59%) have assets that disqualify them for Medicaid.

In a 2012 study of selected comparable clients, OPI clients used 24 percent of the hours that Medicaid clients used. The hourly rates are the same for homecare worker services in the two programs. Due to budget restrictions, the OPI program has capped the number of hours available to each client. In addition to meeting all assessed personal needs, Medicaid eligibility also provides individuals with comprehensive healthcare under the Oregon Health Plan (OHP). OPI clients do not access OHP so the state healthcare expenditures are $0.

Oregon Project Independence services are delivered statewide through the network of 16 designated Area Agencies on Aging (AAAs). Administrative cost efficiencies have been realized in one area of the state where neighboring AAAs collaborated to jointly secure contracted services of a single in-home care agency. AAAs share these types of innovations and strategies.

Program Justification and Link to Focus Areas

OPI contributes to the Safer, Healthier Communities focus area and has a desired outcome to "decrease the number of older Oregonians that access Medicaid-funded long-term care." AAAs are currently maintaining waiting lists of individuals who are eligible to be served by OPI. Annually, the "unable to serve" lists of

individuals will be evaluated to determine how many of these individuals accessed Medicaid-funded services while waiting to be served by OPI.

This program empowers individuals to direct their own services and make choices that enhance their quality of life, live with dignity, and remain as independent as possible. Health is maintained through the provision of necessary assistance with activities of daily living and instrumental activities of daily living.

Program Performance

APD recently conducted an analysis of the Return on Investment (ROI) for OPI. Nationally recognized researchers estimated that the estimate of OPI's ROI is 3.8 to 1. For fiscal year 2016-17, they estimated, at a minimum, benefits totaled $49.4 million and came at a cost of $13.0 million.

Data on number of individuals accessing OPI over the last 20 years:

Biennium	Number of unique consumers
2001 - 2003	4,415
2003 - 2005	2,939
2005 - 2007	3,637
2007 - 2009	3,414
2009 - 2011	2,278
2011 - 2013	2,455
2013 - 2015	5,250
2015 - 2017	4,403
2017 - 2019	4,055
2019 - 2021*	3,213

2019-2021 OPI unique consumers as of June 30, 2020

Quality of the services provided

Personal and home-care services are delivered via licensed in-home care agencies or registered home care workers. Quality of care standards for in-home care agencies are set forth in licensing rules found in OAR Chapter 333, Division 536; compliance with licensing standards is monitored by the Health Care Licensing and Certification unit of the Public Health Division. Home Care Workers who provide services to OPI clients are required to be registered with

the Home Care Commission and receive background checks and ongoing training.

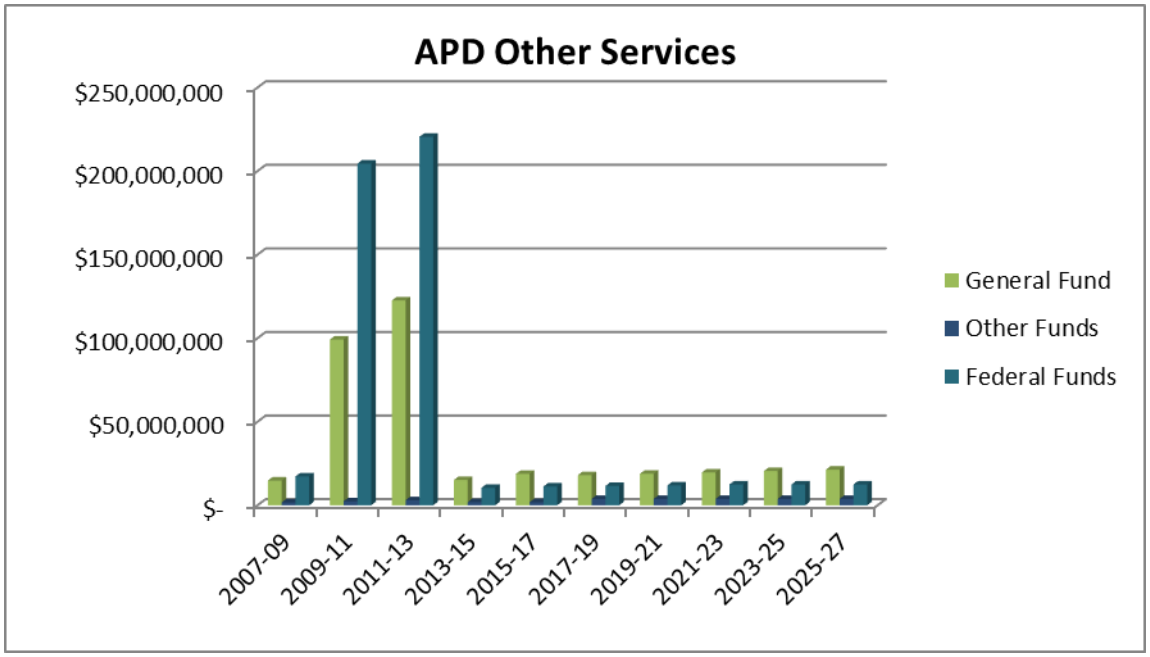
Enabling Legislation/Program Authorization

OPI is authorized under Oregon law at ORS 410.410 to 410.480.

Funding Streams

Currently, OPI is comprised of majority state General Funds with a small amount of federal match funding. Services are expanded through the utilization of program income generated from client cost sharing based on a sliding fee schedule.

OPI serves as the required Maintenance of Effort (45 CFR Sec. 1321.49) and state match (45 CFR Sec. 1321.47) to receive federal funding under the Older Americans Act. At least $5 million per biennium in state funds is needed to maintain the Maintenance of Effort and match requirements of the OAA.



Funding Justification, And Significant Changes

Aging and People with Disabilities - 2021-23 POP Request	GF	OF	FF	TF	Positions	FTE
103 - OPI Expansion and Family Caregiver Support	2,302,442	-	41,012,101	43,314,543	0	0.00

This policy package would create a stable and sustainable program to assist consumers who need a lighter amount of supports through an expanded Oregon Project Independence (OPI) program, as well as a program to support consumers receiving supports from unpaid or family caregivers, with the goal of helping these consumers remain independent while delaying or avoiding entry into the Medicaid long term services and supports system. APD proposes to obtain federal matching funds for these programs through an 1115 Medicaid Demonstration project with the federal Centers for Medicare and Medicaid Services (CMS). Requested positions and associated funding are noted on APD Delivery & Design Program Unit Form.

Department of Human Services: Other Services

Primary Long-Term Focus Area: Safer, Healthier Communities
Secondary Long-Term Focus Area:
Program Contact: Mike McCormick

Costs for 2009-2011 and 2011-2013 are higher due to the transfer of the funding for Medicare Part A and Medicare Part B buy-in programs from the Oregon Health Authority (OHA) to Aging and People with Disabilities (APD). These funding sources were transferred back to OHA in 2013-2015, but APD continues to administer the programs.

Program Overview

The other services category is dominated by federally mandated programs, such as the Medicare Buy-in and the Medicare Part D low-income subsidy programs, which help low-income Medicare beneficiaries meet their cost sharing requirements. This cost-effective investment ensures that Medicare remains in a first-payer position, thereby reducing or eliminating costs to the State's Medicaid health programs (Oregon Health Plan). Other services also include programs that support individuals living as independently as possible in the community. For example, home-delivered meals provide a critical support to many individuals who otherwise may not be able to remain independent in their own home.

Program Description

Federal law requires states to provide payments for Medicare beneficiaries who meet specific income guidelines. APD helps consumers access this benefit. Medicare beneficiaries include individuals aged 65 or older and people with disabilities who have been receiving Social Security Disability payments for at least two years. The passage of the Medicare Improvements for Patients and Providers Act (MIPPA) of 2008 expanded the asset allowance and eliminated the estate recovery component of Medicare Savings Programs. These changes eliminated many of the barriers to the Medicare buy-in programs for a significant number of Oregonians.

Oregon is expected to serve more than 150,000 seniors and people with disabilities in the following programs:

- **State Medicare buy-in:** By purchasing Medicare Part B (which has a federally required premium) for individuals eligible for both Medicare and Medicaid (dual-eligibles), the Medicaid program pays for medical services (such as physician, radiology and laboratory services) only after Medicare has paid as primary payer.

- **Medicare savings programs:** Clients in these programs receive federally mandated assistance with their Medicare Part B premiums. Specified low-income Medicare beneficiaries and qualified individuals are those individuals who have income between 100 percent and 135 percent of the federal poverty level.

- **Qualified Medicare Beneficiaries:** Beneficiaries receive state assistance for the costs associated with the Medicare hospital benefit, Part A, and physician services, Part B, that would otherwise be required of them, including premiums, deductibles and co-payments. These clients have income equal to or less than 100 percent of the federal poverty level.

- **Medicare Part D:** Medicare Part D is the Medicare pharmacy benefit. All clients in the Medicare buy-in programs receive assistance from CMS with their Medicare Part D premiums and co-insurance amounts. Oregon pays a per-person monthly premium to Medicare for eligible clients.

In addition to those mandated programs, APD works to provide services that support individuals in their own home. These supports reduce reliance on nursing facilities and licensed community-based care while simultaneously improving quality of life and saving taxpayers' money. These programs provide supplemental services as needed to in-home clients and are not tracked as a separate caseload. These programs include:

- **Medicaid Adult Day Services:** Adult day services provide supervision for adults with functional or cognitive impairments who cannot be left alone for significant periods of times. Services may be provided for half or full days in stand-alone centers, hospitals, senior centers, and licensed care facilities.

- **Medicaid Home-Delivered Meals**: Home-delivered meals are provided for Medicaid eligible clients receiving in-home services who are homebound and unable to go to the congregate meal sites, such as senior centers, for meals. These programs generally provide a daily hot mid-day meal and often frozen meals for days of the week beyond the provider's delivery schedule.

- **Cash payments:** APD makes special-needs payments to reduce the need for more expensive long-term care payments and to allow a client to retain independence and mobility in a safe environment. Special needs payments may be used for such things as adapting a home's stairs into a ramp or repairing a broken furnace. Clients can also receive cash payments to help pay Medicare Part D prescription drug copays, payments for non-medical transportation, and a one-time emergency payment for an unexpected loss (such as stolen cash, a car repair or a broken appliance). The budget

supporting these payments meets the federal requirement for APD's maintenance of effort (MOE).

Program Justification and Link to Focus Areas

Other services are targeted supports that help Oregonians remain in the least restrictive setting possible. The Department strives to provide services in a respectful, culturally and linguistically appropriate manner. These services tie to Strategy 1 on changing how health care is delivered in Oregon by supporting efforts to increase home- and community-based care to 90 percent of the total Medicaid long-term care caseload. The Safer, Healthier Communities focus area also envisions an integrated system that these community supports will help realize.

These services allow individuals to receive services at the right time and in the right place. They maximize expenditures by using the federal portion of Medicaid funding to provide person-centered services when the person needs them. It ties directly to the desired outcome of Ensuring Financial Stability for the Long-Term Care Service Systems and Supports.

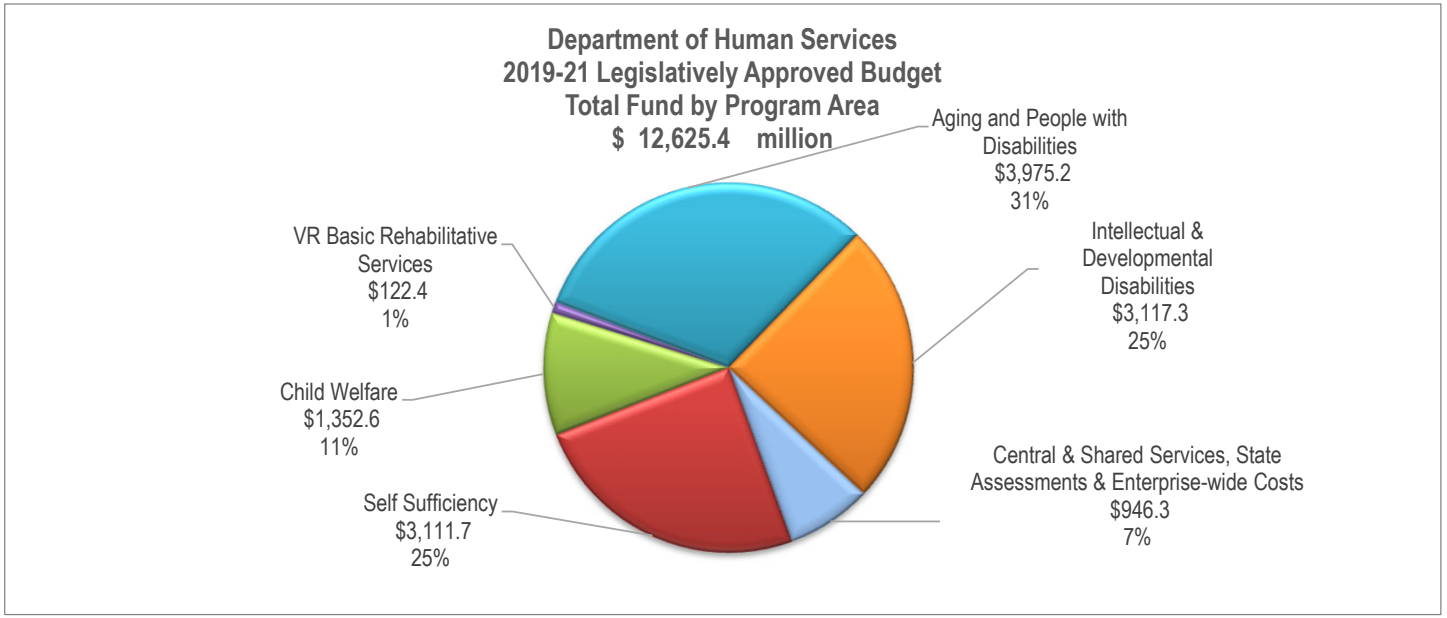
Other Services complement and enhance in-home service plans, contributing to overall cost-effectiveness and the sustainability of the plan. Other services not only have a positive impact on consumers, but also their natural support system (relatives/friends/neighbors), preventing burnout and the need for higher cost services.

Program Performance

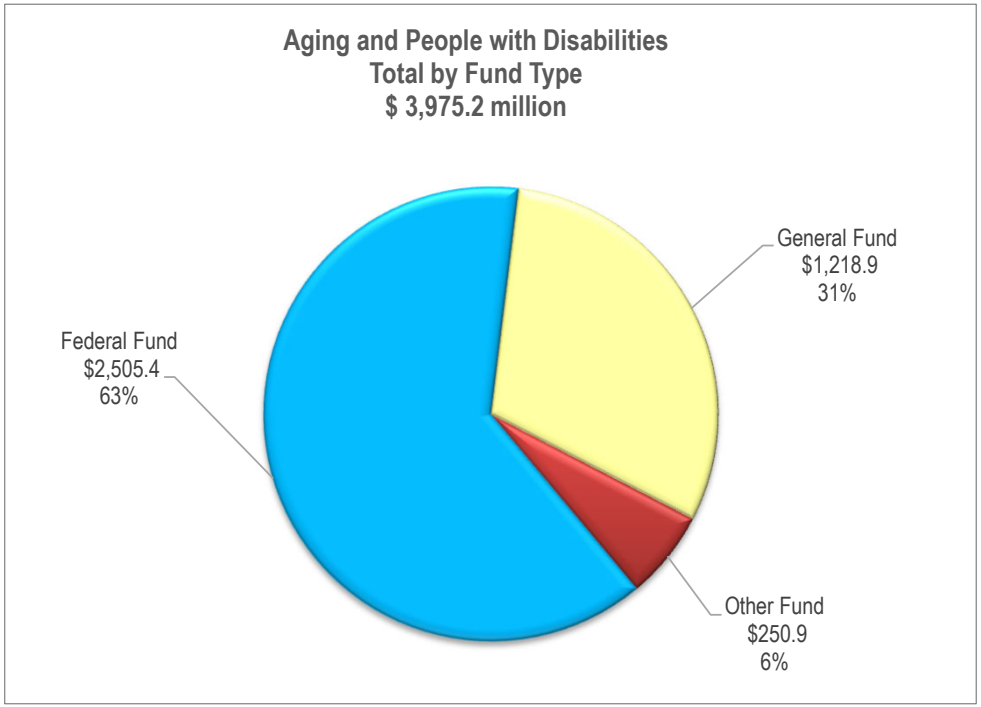
In an independent study conducted by AARP in 2017, Oregon received an overall ranking of 4th out of 50 states in terms of choice of settings and providers, quality of life, quality of care, and effective transitions from nursing facilities back into the community. With approximately 53 percent of the Medicaid caseload served in their own homes, Oregon continues to rank in the highest percentile.

Enabling Legislation/Program Authorization

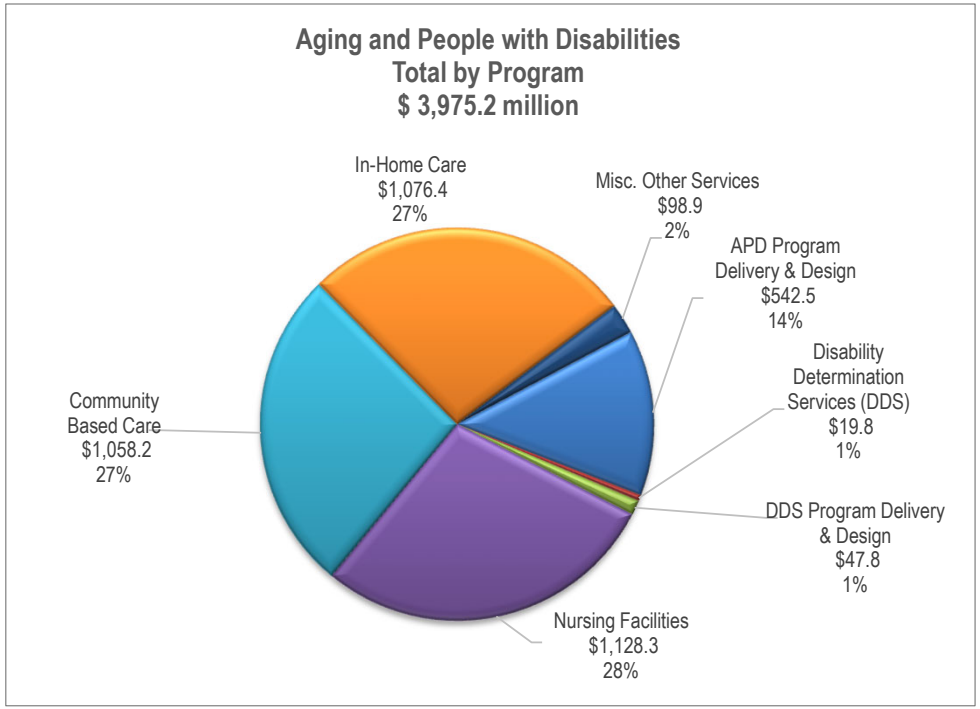
Services in this category are operated under both the Medicaid state plan options, including the "K plan" and Oregon's Home and Community Based Care 1915(c)



waiver. The state provides services that “waive” against nursing facility services, the mandated entitlement for Medicaid eligible individuals under Title XIX of the Social Security Act. Additionally, ORS 410 and ORS 443 provide statutory policy and structure to the services offered.



Funding Streams



Other services are mostly funded through the Medicaid program; therefore, the federal government pays approximately 67 percent and the state pays 33 percent. There is a small amount of funding that is state general fund only, which serves to meet the state’s maintenance of effort requirements. Finally, there is a small amount of funding from the estates of former recipients. When a Medicaid recipient passes away, the state is required by federal law to recover money spent for the individual's care from the recipient's estate. These funds are reinvested in services for other individuals, offsetting the need for general funds.

Department of Human Services
Intellectual and Developmental Disabilities Services Program

Mission

The Department of Human Services Intellectual and Developmental Disabilities (I/DD) Services program provides support across the lifespan to Oregonians. The Office of Developmental Disabilities Services (ODDS), stakeholders, and the developmental disabilities community come together to provide services, supports and advocacy to empower Oregonians with intellectual and developmental disabilities to live full lives in their communities.

Vision

People and families access quality supports that are simple to use and responsive to their strengths, needs and choices, while they live and thrive as valued members of their community.

Program

The I/DD program fulfills its mission and carries out its responsibilities while adhering to the following values:

- Choice, self-determination and person-centered practices
- Children and families together
- Health, safety and respect
- Community inclusion and community living
- Strong relationships
- Service equity and access

ODDS worked with a diverse group of stakeholders representing all areas of the I/DD service delivery system to develop a strategic plan that will guide its work for the next biennium and beyond. The Mission, Vision and Goals included here reflect that effort and the plan.

The strategic planning process resulted in a firm understanding that the person, their family and the goals they want to achieve remain at the core of our system. This process also committed the agency to develop a Service Equity Plan, to reach out to underserved populations and to remove barriers to access, providing services by staff with the appropriate cultural and linguistic capacities.

ODDS seek to achieve the following strategic goals**:**

- Create a system that is sustainable, easy to use, with effective communication and equitable access.
- Honor and support people to make their own choices about who they want to be and what they want to do in their life.
- Support equal opportunity for living options and meaningful employment in an integrated community setting.
- Provide families the amount and type of supports they need to raise their children at home, or when necessary, in another family home within their community.
- Support health and safety while people live rich, full lives.

People Served
The I/DD program serves people with intellectual disabilities (IQ 75 or below) or developmental disabilities such as autism, Down syndrome and cerebral palsy. These disabilities are lifelong and have a significant impact on the person's ability to function independently. Some people with I/DD may also have significant medical or mental health needs. Most people with I/DD meet Medicaid financial eligibility requirements.

Community First Choice Option Services
The I/DD service system is composed of three basic components: program design, program delivery and program services primarily offered through the Affordable Care Act's Community First Choice Option (CFCO).

Under CFCO, eligible persons must receive a functional needs assessment that informs the planning process. They also participate in a person-centered planning process that focuses on the person's strengths, community engagement, personal goals and outcomes. That planning process results in an annual plan, the Individual Support Plan (ISP), that documents the services the person will access in order to meet their goals. Together, the functional needs assessment and the ISP inform the amount and/or rate for services that are available to the person.

Program Services

I/DD offers a broad array of services to optimize choice and offers an array of cost-effective supports based on functional need.

Attendant Care

Attendant care provides support for people to perform activities of daily living and instrumental activities of daily living (ADL/IADL). With CFCO, this is the primary service available to people with I/DD. Attendant care services are generally categorized based on the setting where the person lives.

Services that now fall under attendant care include:

- In-home supports for children and adults
- Children's intensive in-home services
- 24-hour services:
  - Group home for children and adults
  - Adult and child foster care
  - Supported living (adults only)
- Day supports
- Stabilization and Crisis Unit (SACU)

In-home supports for children and adults

These services are designed to provide ADL/IADL supports in the home or in the community. Children who receive these supports live with family, and adults live either with family or in their own home. In-home services are provided to a majority of individuals served by the I/DD program.

When families are supported to provide the core care that also meets linguistic and cultural standards of service, even people with the most significant needs have active and engaged lives in their community. Without in-home services, many individuals would require much more expensive out-of-home services such as group or foster homes.

Persons who live in their own home or with their family can access other services that may be needed to successfully support these individuals in their own home. These services may include increased attendant care, professional behavior services, assistive technology or environmental modification.

For both children and adults, in-home services are provided by Personal Support

Workers (PSWs) or certified provider agency Direct Support Professionals (DSPs).

Personal Support Workers are directly hired by the person or their employer representative. Direct Support Professionals are employees of private organizations that contract with the state to provide services.

Children's Intensive In-Home Services (CIIS)

These services consist of three model waiver programs that provide intensive supports to children living in the family home. One of these programs is for children with intensive behavioral issues who, without supports, would require specialized out-of-home services. The second program is for children with medical conditions who, without supports, would require nursing home services. The third program is for children with intense medical needs. These children are dependent on life support technology such as ventilators that, without these in-home services, would require a hospital setting. With the implementation of the Community First Choice Option, children who do not have the intensive needs described above can access in-home support services through their local Community Developmental Disabilities Programs (CDDP) upon completion of a needs assessment and an Individualized Support Plan (ISP).

24-Hour Services

24-Hour services are for children and adults who can no longer remain at home or adults who choose to receive services in a 24-hour setting and include group homes, foster homes and supported living services. Under CFCO, these services are also categorized as attendant care. These services are primarily provided in settings outside the family home, with exception of Supported Living.

These important services provide an alternative to institutional care. Community-based care, as opposed to institutional care, remains a less restrictive and more cost-effective program. In this setting, diverse recruitment and the ability to provide linguistically and culturally appropriate services are fundamental to removing barriers to service access. Group home and supported living services are provided by private organizations that contract with the state. Adult foster care providers are represented by the Service Employees International Union (SEIU). Child foster care providers are private providers licensed through either Child Welfare or the local Developmental Disabilities office.

People usually receive 24-hour services when they are unable to stay at home on

their own or with their family. This may be due to a person's needs or the caregiver's ability to continue providing services.

Children with disabilities enter 24-hour comprehensive services as a voluntary placement because the intensive needs of the child cannot be met in the family home or may be involuntary through child welfare action. Child Welfare programs maintain responsibility for the court relationship, but I/DD provides the specific disability-related care.

Day Services

Day services are available for people who are over 18 and out of school. Many adults receiving 24-hour services also receive day services. These services are available for up to 25 hours a week for out-of-home activities, including employment-related activities. Adults receiving in-home supports are also able to receive day services as part of their attendant care. Day support activities that fall under the category of attendant care are provided through CFCO and provide supports promoting integration, independence and participation in the person's community.

Transportation

Non-medical transportation is also provided to help persons with I/DD in in-home and 24-hour services when public transportation is not available, or not feasible, to help them participate in employment or other services.

Stabilization and Crisis Unit (SACU)

SACU is a 24-hour service provided under the CFCO. SACU provides a safety net for Oregon's most vulnerable, intensive, medically and behaviorally challenged people with I/DD. SACU provides services when no other community-based option is available for a person. This includes persons with I/DD coming out of the Oregon State Hospital, corrections systems, and from crisis situations where counties and private providers cannot meet the needs of the person to ensure health and safety. SACU focuses on supporting people in community-based settings and enabling them to return to less intensive service levels as quickly as possible.

SACU provides 24-hour residential and day supports to people with I/DD from across the state who have significant medical or behavioral needs. The services are provided in licensed five-bed group homes.

SACU started in 1987 when Oregon began moving all persons with developmental disabilities living at the state institution (Fairview Training Center and Eastern Oregon Training Center) to private providers. There were a small number of people with complex medical or behavioral needs who could not yet be supported by private providers.

From the first homes that were opened by SACU to today, the profile of the people served has changed. As private agencies increase their skills to meet challenging needs and agree to provide services, the person who needs a safety net has changed. In the past, the numbers of people with intensive behaviors often had a diagnosis of autism. Today, intensive behaviors are more related to co-occurring mental health diagnosis and/or personality disorders.

Ancillary Services

In addition, people with I/DD served through I/DD are able to access vital ancillary services. Examples of these services include:

- Professional Behavioral Services
- Assistive devices
- Assistive technology
- Long-term care community nursing
- Environmental modifications
- Specialized nursing

Employment First Policy

This policy states that employment in fully integrated work settings will be the first and priority option explored in service planning for all working-age adults and students preparing to transition to the world of work. This policy is based on the general philosophy that persons with developmental disabilities have the ability, with the right supports, to be productive and contributing members of their communities through work. This philosophy also recognizes intrinsic and financial benefits of paid work to the persons with disabilities and their families.

To support the policy and philosophy of fully integrated work settings, since July 1, 2015 the department no longer funds services for new people to enter sheltered workshops. Employment services are also provided consistent with the provisions and expectations of Executive Order 15–01, “Providing Employment Services to

Individuals with Intellectual and Developmental Disabilities," reissued in January 2015.

Employment Services

These services have been strengthened and improved as part of the important Employment First initiative. I/DD has restructured employment services to encourage integrated, competitively paid employment for people with I/DD. Employment services are no longer bundled with attendant care services; they have been broken out into discrete services to support people as they learn about, find and maintain employment. Employment services are not offered through the CFCO; they remain available through the Medicaid waiver.

Employment services include:

- Employment path
- Job discovery
- Job development
- Job coaching
- Small group supported employment

Family Support Services

These services are available to any family with a child with I/DD and under the age of 18 that is not eligible for Medicaid. The program offers minimal support services with the most common request being for respite care.

All children in this program have case managers through their county CDDP and state-funded services are allocated based on need. Most children are also in school programs and the case manager coordinates between school and home. Family support services can be more cost effective by allowing the family to support the child with a small amount of funding, without accessing Medicaid.

Family-to-Family Networks

These family-driven networks provide training, information, referral and general support with families providing support among one another. Just having another family to connect with or problem solve with is often what it takes to be supported in the family home.

Program Design and Delivery

Staff and services support the administration of I/DD programs through a central

office providing strategic planning, program funding, policy development, general oversight and technical support to community services and support and leadership for various advisory councils.

The structure for service delivery and design includes a central program administration office within DHS and contracted services with community Developmental Disabilities Programs (CDDP) and Brokerages.

Contracted CDDPs, usually operated by county government, are responsible for eligibility determination and redeterminations, protective service investigations and foster care licensing and reviews. After eligibility is established through the CDDP, adults who live in in-home settings can choose to be served by the CDDP or a Brokerage.

Brokerages provide case management services, including assessment and service planning for adults in-home.

Case Management
These services are provided through certified entities called Brokerages or through Community Developmental Disabilities Programs (CDDPs). CDDPs support children and adults while Brokerages support adults in in-home settings.

A functional needs assessment is administered to determine the person's level of need and the amount or rate of services that will be available. The Services Coordinator (SC) or Personal Agent (PA) then works with the person, family and others important in the person's life to complete an Individual Support Plan (ISP) and a career development plan (CDP). They then work with the person to identify necessary supports required to meet the needs identified through the assessment and the goals identified in the ISP/CDP. SCs and PAs provide referrals to providers and other resources necessary to meet the person's needs. SCs and PAs continuously monitor the individual's ISP implementation, person's satisfaction with services and supports, and the plan and services in place, to ensure the person's health and safety.

Quality Improvement

In 2017, the I/DD program created a Quality Improvement unit. This unit is responsible for coordinating quality assurance and quality improvement activities for I/DD services. This includes performing regular quality reviews of Brokerages and Community Developmental Disabilities Programs; overseeing Licensing activities; coordinating with Abuse Investigator Specialists (AIS) and the Office

of Training, Investigations and Safety (OTIS); establishing quality metrics for I/DD; collecting and analyzing data to measure overall system performance and to inform policy decisions.

Brokerages and Community Developmental Disabilities Programs (CDDP) field reviews

The I/DD Quality Assurance unit conducts field reviews on a two-year cycle in each CDDP and Brokerage. The reviews are focused on ensuring Centers for Medicare and Medicaid Services (CMS) Assurances are met through performance measures approved by CMS. The reviews assist I/DD in identifying program-specific strengths and areas requiring improvement allowing for focused training and technical assistance. The reviews assist with identifying individual issues needing to be corrected as well as allow for analyzing common trends across the state that may suggest a need for system changes, improvements, best practices and training.

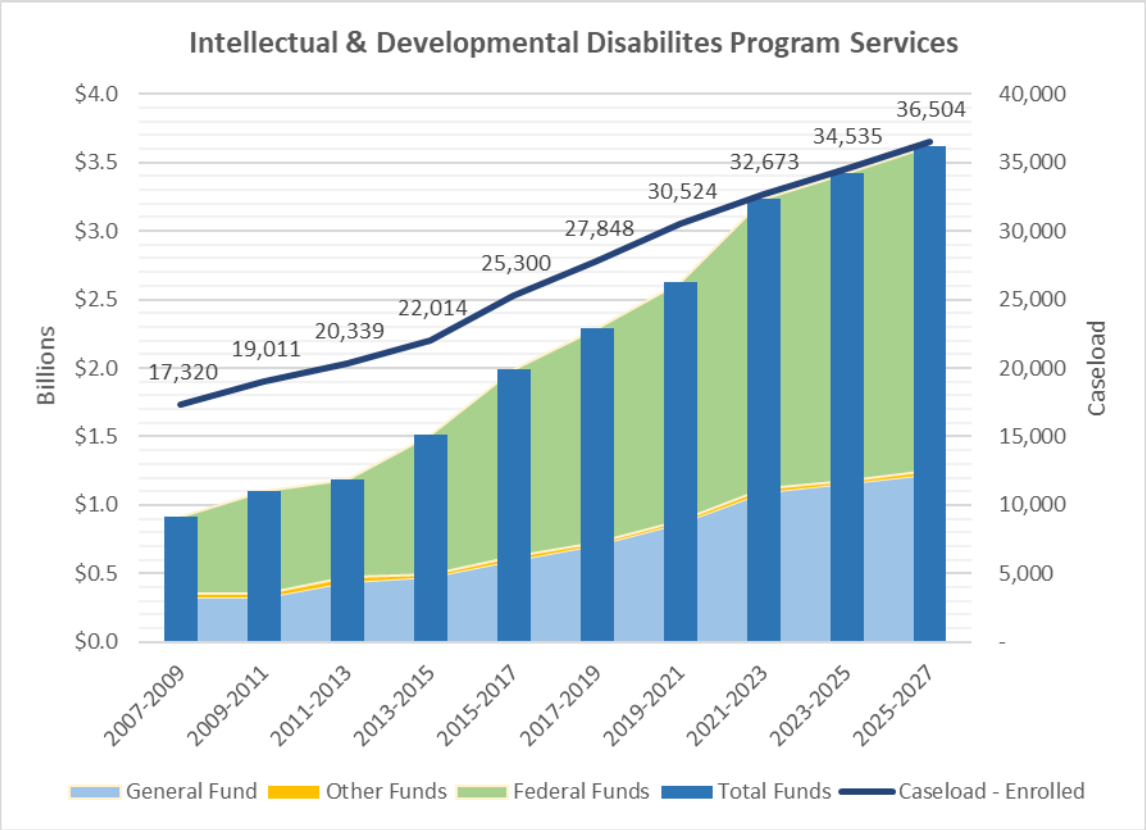
I/DD Licensing Unit

The Intellectual/Developmental Disabilities (I/DD) Licensing Unit oversees a statewide program responsible for licensing and the quality of care in programs serving persons with I/DD, including the licensing of adult foster homes and 24-hour residential facilities. It oversees, and is responsible for, the Medicaid-agency certification of agencies and the endorsement of 24-hour residential programs, supported living programs, and employment programs. It also certifies Support Service Brokerages and Child Foster Homes throughout the state. Through licensing and certification, the I/DD licensing team ensures that providers of services comply with requirements for federal and state reimbursement. The I/DD Licensing team conducts complaint investigations and determines necessary corrective action up to and including civil penalties or revocation of a license or certificate.

History — Future Trends

Oregon is recognized nationally as an innovative leader in developing community-based services for persons with I/DD. Oregon is one of the few states that have no state or privately operated institutional level services specifically for people with developmental disabilities. In fact, the majority of persons with developmental disabilities in Oregon are served in their own home or their family's home.

The work of ODDS and its partners and stakeholders aims to achieve a self-



directed, family-involved, individually focused, culturally appropriate and sustainable approach to service. People with I/DD and their families report a high level of satisfaction through increased control over services, the ability to more fully integrate in their home communities, and through the benefits of home and community life.

Nationally, and in Oregon, the number of people with intellectual and developmental disability-related needs is growing. There also is an increase in the number of people who need services that have co-occurring mental health needs or are coming from the corrections system. To reach underserved or underrepresented communities, more consistent and deliberate efforts are needed to build a diverse workforce capable of delivering linguistically and culturally agile services. However, to further advance the inclusion of people with I/DD in their communities of choice, and to serve the increasing number of people with I/DD accessing services, efforts to ensure the long-term sustainability of the system must continue.

Program Services – Caseload and Funding

Note: Effective 2013-2015, K Plan increased enrollment as well as lifted spending caps.

Program Overview

Oregon home- and community-based services for people with intellectual and developmental disabilities are provided under several Medicaid authorities including Community First Choice Option (CFCO), also known as K Plan; and five 1915(c) waiver programs. ODDS also operates a small Family Support program funded by state general funds providing limited flexible supports for individuals and families.

Currently, ODDS home- and community-based services support more than 30,000 adults and children with intellectual and developmental disabilities to live their lives in their communities. About 13,000 of them receive services in their own of family homes.

Program Funding Request

I/DD Program Services	GF	OF	FF	TF
19-21 LAB	$ 857,933,459	$ 19,954,739	$ 1,716,506,428	$ 2,594,394,626
21-23 ARB	$ 1,096,301,863	$ 20,997,832	$ 2,121,267,691	$ 3,238,567,386
Difference	$ 238,368,404	$ 1,043,093	$ 404,761,263	$ 644,172,760
Percent change	22%	5%	19%	20%

Program Description

Oregon home- and community-based services for people with intellectual and developmental disabilities are provided under several Medicaid authorities including Community First Choice Option (CFCO), also known as K Plan; and five 1915(c) waiver programs. Supports provided under K Plan are services such as attendant services that support individuals in accomplishing activities of daily living and instrumental activities of daily living (ADL/IADL), relief care, behavioral support services, transportation, environmental modifications, and assistive technology and devices.

The Adult and Children Waivers provide services such as case management, employment services, and other ancillary services (direct nursing services, specialized medical supplies, environmental safety and vehicle modifications, and family training). Services through the Children's Waiver are provided to children in all settings, including family homes, group homes, and foster care through Community Developmental Disabilities Programs (CDDPs). Services through the Adult Waiver are provided to adults, age 18 and older. Adults receiving service through CDDPs may reside in all settings including their own homes, family homes, supportive living, group homes, and foster care. Adults served through Support Services Brokerages receive services in their own or family home. Individuals receiving services through either waiver can access all K Plan services. Under CFCO, an individual can elect to live in any setting of their choice, but it may impact whether they receive case management support through CDDP or Brokerage.

Of the more than 30,000 individuals enrolled in services (May 2020 Variance Report), 3,078 live in 24-hour group homes, 3,438 in foster homes, 733 in supported living. 12,945 individuals, who receive I/DD services in addition to case management, reside in their own or family homes. 7,583 of the adults served at home receive case management support through Support Services Brokerages; 13,002 adults living in all settings receive case management through the CDDP system. In-home support services average approximately $2,195 per month per individual while out-of-home services average approximately $6,727 per month.

For both children and adults, the direct care services are provided through Personal Support Workers (PSWs), provider agencies, behavior consultants, and respite providers. Personal Support Workers were provided collective bargaining rights in 2010 through HB 3618.

Employment services

ODDS currently offers supported employment services, such as job development, job coaching, supported small-group employment, discovery, and Employment Path. Discovery and Employment Path help individuals explore and learn skills to help them gain competitive integrated employment. These services are currently provided though the all five waivers.

People who are employed in the community have the highest level of integration and have stronger social networks. The more people with developmental disabilities can achieve paid employment, the less dependence there is on public resources and the greater the state's flexibility in designing future services that respond to the need of this population.

Oregon has been very successful in developing community-based care to move away from institutions as a model of care. Individuals with developmental disabilities fully engaging with their communities brings positive outcomes while being fiscally beneficial. Based on federal requirements, community employment services will be the only employment services to receive federal funding as of September 1, 2020.

Model Waivers

ODDS administers three Model Waivers through the Children's Intensive In-Home Services (CIIS) unit: Medically Involved Children's Waiver, Medically Fragile Model Waiver, and Behavioral Model Waiver for children. Currently, these waivers serve about 388 kids. Children receiving service through Model Waivers are also able to access K Plan services. These services are substantially the same as individuals served through the Comprehensive and Support Services Waivers, including attendant services, relief care, behavioral support services, environmental modifications, and assistive technology and devices.

Family Support Program

Limited supports for children are offered by ODDS through the Family Support Program and are available to any family of a child under age 18 who is not receiving K plan or waiver services. The program is funded by general fund and offers flexible supports with the most common request being for attendant care and respite services. On average, during 2019-21 biennium, the program served 105 families per month at an average monthly cost of about $223 All children in these programs have case managers through their county Community Developmental Disabilities Program (CDDP).

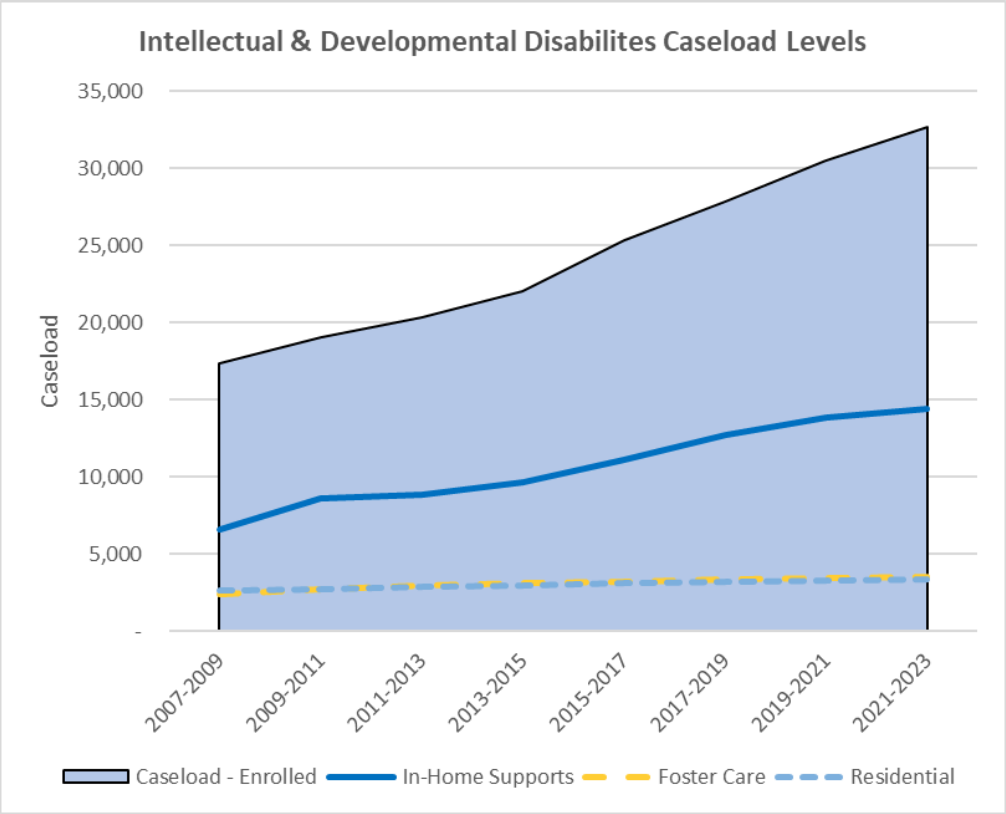
Family-to-Family Networks

ODDS also provide $1.33 million in funding to the Oregon Consortium of Family Networks (OCFN) with support and technical assistance through the Oregon Council on Developmental Disabilities (OCDD). OCFN collaborates with community partners and others to help families have an empowered vision of a full life for themselves and their children. They facilitate opportunities for families to support each other in accessing the information they need, navigating the many systems they encounter, and helping local community resources increase capacity to include and welcome families experiencing disability. OCFN believes that supporting families in this way will improve their quality of life and support greater sustainability of the formal support system over the long term.

Program Justification and Link to Focus Areas

ODDS service and supports for people with intellectual and developmental disabilities link to the Safer, Healthier Communities area through its focus on individuals with intellectual/developmental disabilities (I/DD) to ensure they are healthy and have the best possible quality of life in their communities among

families and friends and are working or attending school to achieve their greatest potential. Additionally, ODDS continuously works to ensure that services are provided in a linguistically and culturally competent manner.



When compared to the entire Medicaid population, adults in the Medicaid-funded home- and community-based services with I/DD are uniquely more reliant on the service system to make lifestyle changes and to adequately access health care. Funding I/DD programs to support the necessary lifestyle choices that reliably and consistently follow through with medical recommendations will result in significant cost savings to the state's medical programs. Families and case managers are critical to help with health care coordination in the communication and implementation of treatment.

I/DD services are critical to the financial stability of a family and to the person with intellectual/developmental disabilities. With supports, families are not forced to decide between working and supporting their family member. It is also important that working-age adults with developmental disabilities are supported to work. Oregon has implemented an Employment First policy. This prioritizes individuals in actively engaging in developing work skills and defining work interests, pursuing job development or being employed in the community, and receiving support to maintain employment. In addition to being happier and healthier, individuals with I/DD who are employed broaden their network of supports, contributing to the Thriving Oregon Economy focus area.

Executive Order 15-01 and the *Lane v. Brown* Settlement Agreement reached in 2016 directs state agencies to take numerous steps that will advance the State's Employment First policy in Oregon. The goal of this Order is to further improve Oregon's system of designing and delivering employment services to those with intellectual and developmental disabilities in achieving competitive integrated employment, including a significant reduction over time of state support of sheltered work and an increase in investment in employment services. The Order and Agreement cover the time of July 1, 2014 through July 1, 2022 and specifies certain benchmarks and metrics to be achieved each year.

Program Performance

Supporting individuals to live at home or live on their own is the most desirable outcome for people with I/DD and is most cost effective for the state. The number of people supported at home has been the largest area of growth in the I/DD system.

Spring 2020 Forecast

Enabling Legislation/Program Authorization

Oregon Revised Statutes 427.005, 427.007, and 430.610 through 430.695 enable the provision of family support for children with developmental disabilities. Oregon Revised Statutes 427.410 enables the provision of Support Services for adults through Support Services Brokerages.

At the federal level, in addition to all applicable Medicaid statutes and regulations, services must comply with the Title II of the Americans with Disabilities Act (ADA) of 1990 and Section 504 of the Rehabilitation Act of 1973. Compliance with these federal laws is subject to the U.S. Supreme Court's Olmstead Decision of 1999 and the U.S. Department of Justice's interpretation of that decision as it

relates to the ADA and Rehabilitation Act. The Olmstead ruling applies to ODDS services.

Funding Streams

The services are designed and approved using Medicaid 1915c Home and Community-Based Waivers, and primarily, the Community First Choice Option in the Medicaid State Plan. The program funding match rate is 63 percent Federal funds and 37 percent State General Funds for waiver services and 69 percent Federal funds and 31 percent State General Funds for State Plan services.

Funding Justification and Significant Changes to CSL

POP 119 Implementation of the New Rate Model:

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$34,414,903**	**$0**	**$66,874,523**	**$101,289,426**	**0**	**0.00**

POP 119 is requesting funds to cover the cost of transition to the new rate models for certain services. This funding will cover transition from the old rate structure and groupings of individuals according to their level of need based on the old assessment instruments to the new Service Groups based Oregon Needs Assessment (ONA) and new rate model Payment Categories.

POP 120 Additional Funding for the New Rate Models Towards Full Implementation:

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$36,612,999**	**$0**	**$69,940,223**	**$106,553,222**	**0**	**0.00**

POP 120 requests funds towards moving the new rate models closer to full implementation. This POP is contingent on POP 119 requesting funding to cover the cost of transition to the new rate models without additional rate increases. Funding in this POP will allow ODDS to implement the new rate models with an

additional rate increase to move new rates closer to full implementation. Additionally, this funding will help smooth the transition by reducing negative impact to providers due to fluctuation in rates per person due to new assessment groupings.

POP 123 Supported Living Rate Model Implementation:

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$5,905,836**	**$0**	**$11,798,579**	**$17,704,415**	**0**	**0.00**

POP 123 would fund implementation of the new rate model for Supported Living service to align with other new rate models and transition to the use of a single assessment instrument.

Secondary Long-Term Focus Area: N/A
Program Contact: Anna Lansky

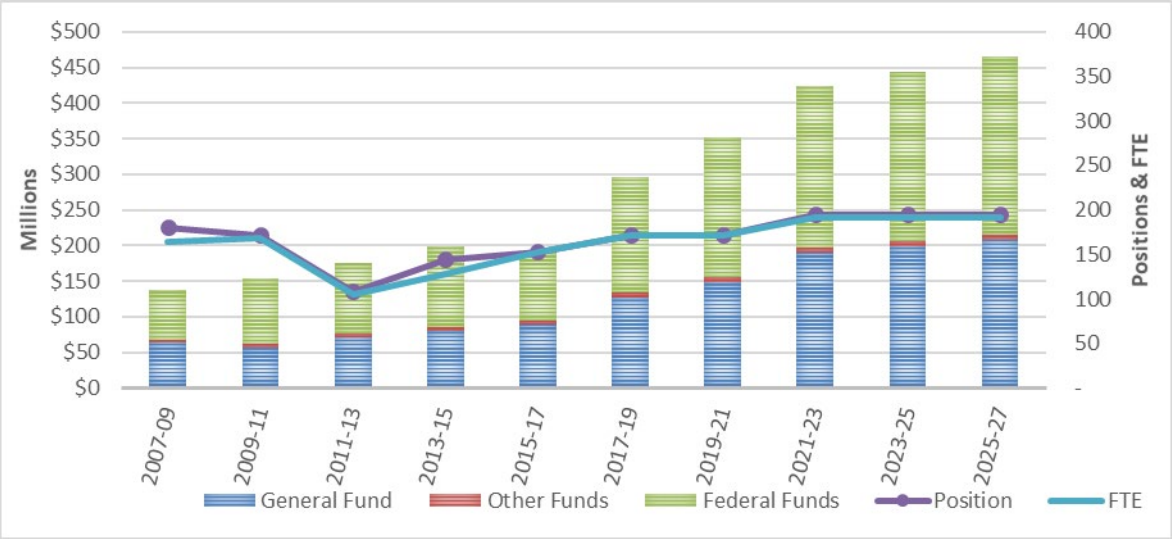

Figure I: Funding of I/DD Delivery and Design (not reflective of funding or FTE for the Stabilization and Crisis Unit (SACU)).

Program Overview The Office of Developmental Disabilities Services (ODDS) manages a lifespan program that provides support and funding to children and adults with intellectual and developmental disabilities (I/DD) to live fully engaged lives in their communities. Oregon has stopped using institutional models to care for people with I/DD and has focused all efforts on people living in their community. Programs are provided in the community in the person's own home, family home or in a foster care, group home or in supported living programs. Design and Delivery provides administrative and operational support to these programs.

Program Funding Request

Intellectual & Developmental Disabilities Delivery and Design	General Fund	Other Funds	Federal Funds	Total Funds	Positions	FTE
19-21 LAB	$148,490,757	$7,225,884	$196,192,469	$351,909,110	172	171.25
21-23 ARB	$189,237,470	$7,584,324	$227,796,096	$424,617,890	195	191.49
Difference	$40,746,713	$358,440	$31,603,627	$72,708,780	23	20.24
Percent Change	27.4%	5.0%	16.1%	20.7%	13.4%	11.8%

Program Description

More than 30,000 Oregonians with I/DD receiving case management and other supports through the ODDS program. Since implementation of Community First Choice Option (CFCO), also known as K Plan, in July 2013, the Oregon I/DD service delivery system has undergone significant changes. Due to CFCO implementation, ODDS now can provide services to all eligible children, while in the past families with children with I/DD had to reach crisis before being able to access services and supports. Additionally, the K Plan has expanded in-home services for adults as well, lifting budget caps previously imposed on the amount of services adults with I/DD were able to access in their own or family homes. Under CFCO, the amount of in-home services is determined based on functional needs assessment. As a result of these changes, the number of individuals served within I/DD system significantly increased.

The structure for service delivery and design includes a central program administration office, Children Intensive In-Home Services (CIIS) unit, and contracted services with Community Developmental Disabilities Programs (CDDPs) and Support Service Brokerages (Brokerages). Additionally, the ODDS central office provides strategic planning, program funding, policy development, provider licensure and certification, general oversight, and technical support to community services. Contracted Community Developmental Disability Programs (CDDPs) are responsible for eligibility determination, program enrollment, case management, abuse investigation, and quality assurance. Adults receiving in-home services can also choose to get case management through contracted Brokerages.

With CFCO, people can choose the setting in which they live, which increases the importance of supporting and strengthening the ability of families and communities to include and provide natural supports to those with I/DD.

ODDS delegates the responsibility for administration to local county government, Community Developmental Disabilities Programs (CDDPs), in accordance with state statutes (ORS 407). DHS has Intergovernmental Agreements with all but six counties. In those counties, the state contracts with a private agency. Local oversight responsibilities include determining eligibility for developmental disabilities, planning and resource development, developing and monitoring Individual Support Plans, documentation of service delivery to comply with state and federal requirements. CDDPs also are responsible for case management services, evaluation and coordination of services, abuse investigations of adults and quality assurance services. ODDS provides funding for the equivalent of nearly 1,097 full-time employees of CDDPs through contracts. CDDPs provide case management for all individuals, except adults choosing to be served by a Support Service Brokerage. Adults living in their own or family home have a choice of case management providers, between the local CDDP and a Brokerage. Children are all served by the CDDPs, except those case managed by ODDS staff through the Children's Intensive In-Home Services or Children's Residential Services programs.

There are 14 Support Service Brokerages statewide. Brokerages vary in size and support from 251 to 720 people. People with I/DD are enrolled in Brokerages from the county when they select Brokerage case management services. Once in a Brokerage, the Brokerage Personal Agent (PA) completes a needs assessment, develops the Individual Support Plan, and assists the person in determining services needed, amount of service and possible workers or agencies. PA's help the individual to design plans that meet their needs as determined by the needs assessment. ODDS provides funding for 319 full-time employees to the Brokerages. In order to not duplicate services, once a person is in a Brokerage, they do not also get case management from the CDDP.

The majority of individuals receiving services are eligible for Medicaid. Oregon no longer uses institutional models of care for people with I/DD. Instead, the state uses Medicaid Home and Community-Based Services (HCBS) that allow for shared funding from the federal government. Through the CFCO State Plan Option, the states receive FMAP plus an additional 6 percent in federal match.

ODDS staff provide policy and program design, technical support, provider licensure and certification, quality assurance, and field support of CDDPs, Brokerages, and direct service providers. There are more than 3,900 private service

provider agencies, including 1,418 foster care providers and more than 16,000 Personal Support Workers. Regulatory oversight for licensed settings is provided by the ODDS Licensing Unit.

Central office staff provides programmatic and budget analysis support to Department of Administrative Services Labor Management, collective bargaining, for the Adult Foster Homes, Home Care Workers, and Personal Support Workers.

The Delivery system also includes the Children's Intensive In-Home Services (CIIS) and the Children's Residential Services comprised of state staff under ODDS' umbrella. These units operate and provide case management services to the three Model Waivers for children and provide case management support to children in residential services.

Program Justification and Link to Focus Areas

This program links to the Safer, Healthier Communities focus area. The program delivery system, designed and monitored by central staff and implemented through either the CDDP or Brokerage, is designed to ensure supports are provided so the individual is healthy and safe, and fully engaged in their community. The goal is to help them have the best possible quality of life at any age. Person-centered strategies are used to maximize the person's outcomes and use of natural supports. The CDDP and Brokerage report on critical incidents and the data are used to track trends and determine strategies to improve healthy living outcomes.

Program Performance

Adequate personnel resources are necessary to ensure delivery of programs and provision of services within Developmental Disabilities in a linguistically and culturally competent manner. The chart below provides a comparison of the caseload growth to the equivalent contracted CDDP and Brokerage personnel: CDDP Service Coordinators and the Brokerage Personal Agents.

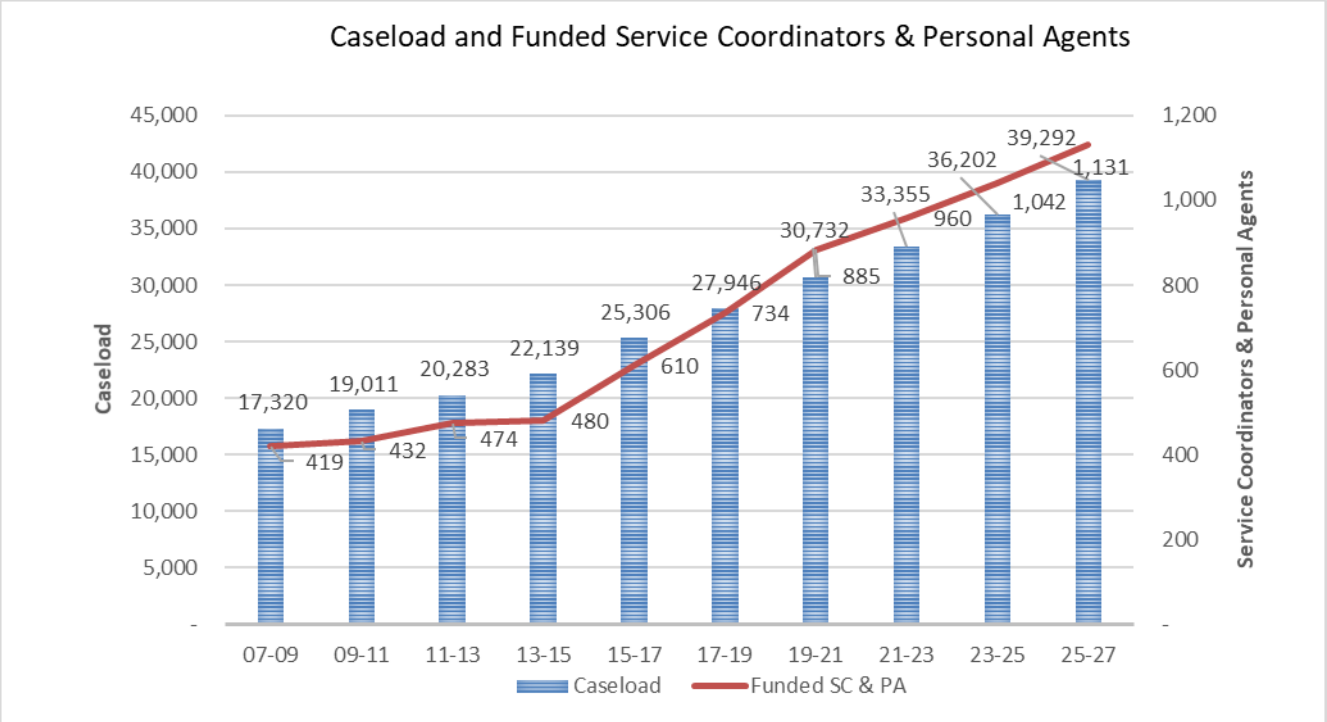

Figure II: Growth of I/DD Caseload and CDDP Service Coordinators and Brokerage Personal Agents.

Enabling Legislation/Program Authorization

The services are designed and approved using Medicaid 1915c Home and Community-Based Waivers and the CFCO Medicaid State Plan. Without the waivers and state plan, individuals would be entitled to Institutional Care for Individuals with Intellectual and Developmental Disabilities (ICF/IDD). Individuals can also be court committed to the state care and custody under ORS 427. Case Management is authorized under the Medicaid State Plan. Federal authorization for all services is at 42 C.F.R. 441 and Section 1915(c) of the Social Security Act. Authorization to provide the services in Oregon is in ORS 410.070, 409.050.

At the federal level, in addition to all applicable Medicaid statutes and regulations, services must comply with the Title II of the Americans with Disabilities Act (ADA) of 1990 and Section 504 of the Rehabilitation Act of 1973. Compliance with these federal laws are subject to the U.S. Supreme Court's Olmstead Decision of 1999 and the U.S. Department of Justice's interpretation of that decision as it relates to the ADA and Rehabilitation Act. The Olmstead Decision requires states to provide services and supports in non-segregated settings.

Funding Streams

The services are designed and approved using the Community First Choice Option in the Medicaid State Plan and Home and Community-Based Waivers, which provide a federal match to the program's General Fund. The program funding match rate for waivered services is 63 percent Federal Funds and 37 percent state General Fund and for CFCO services is 70 percent Federal Funds and 30 percent state General Fund.

The administration of CDDP, Brokerage, and Central Office staff are funded at the Medicaid administrative match of 50/50. Authorization to provide the services in Oregon is in ORS 410.070, 409.050.

Funding Justification and Significant Changes to CSL

107 - Diversity, Equity and Inclusion

General Fund	Other Funds	Federal Funds	Total Funds	Positions	FTE
$590,000	-	$475,000	$1,065,000	-	-

In order to provide the necessary level of language access, an intentional resource investment is needed. Within existing capacity, ODDS is unable to provide sufficient language access supports and services to meet minimum requirements. Further, ODDS is unable to reach its vision for service equity and eliminating language barriers.

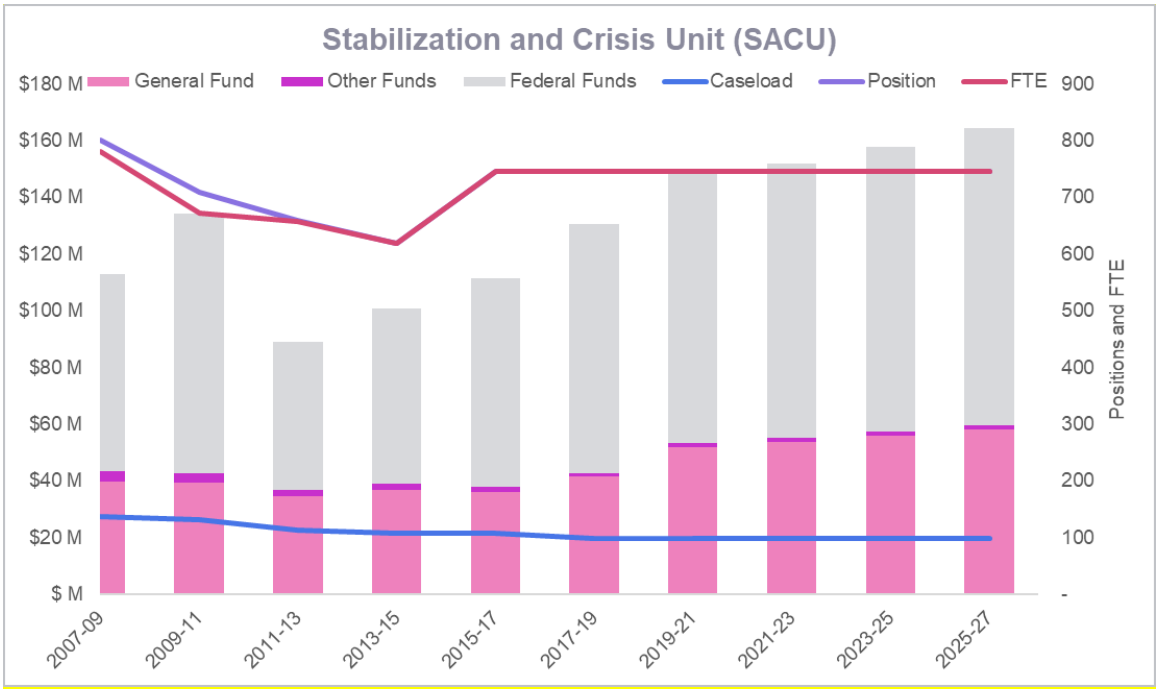
ODDS is committed to its obligations under law, rule, and policy, in addition to its vision for an equitable system that is easy to use and navigate.

121 - ODDS Health Management Unit (HMU)

General Fund	Other Funds	Federal Funds	Total Funds	Positions	FTE
$443,748	-	$443,724	$887,472	4	3.52

Creating a Health Management Unit to provide policy analysis, technical assistance, training and program management to DD providers, CMEs, individuals and families. ODDS has seen an increase of children and adults with medical support needs including those with very medically complex health conditions. This has been evidenced by the rise in referrals for all three categories (community

nursing, Private Duty Nursing (PDN) and Direct Nursing Services (DNS)) of nursing as well as the medical/nursing technical and programmatic assistance requested from case management entities and providers. The central office does not currently have the positions and subject matter expertise needed to support the field.



124 - Licensure and Quality Improvement Staffing

General Fund	Other Funds	Federal Funds	Total Funds	Positions	FTE
$1,991,047	-	$1,990,933	$3,981,980	19	16.72

The number of providers requiring a licensing visit or follow up has increased 200% with no new staff. These homes are across the state and require visits occur within timelines identified by CMS. Without additional staff we cannot meet these timelines and risk over 68% federal funding.

Department of Human Services: Stabilization and Crisis Unit (SACU)

Primary Long-Term Focus Area: Safer, Healthier Communities
Secondary Long-Term Focus Area: N/A
Program Contact: Sierra Rawson

**A 7 percent overall budget reduction occurred in 2011.*

Program Overview

The Stabilization and Crisis Unit (SACU) is a safety net resource for Oregonians with intellectual and developmental disabilities (I/DD) with no other option for a residential bed due to significant I/DD and mental health challenges. SACU serves the most vulnerable, intensive, behaviorally and medically challenged individuals with I/DD. This includes people with developmental disabilities coming out of crisis situations, including hospitals, correctional systems, and private providers who cannot meet the needs of the individual to ensure their health and safety. Almost all individuals served by SACU present with dual diagnosis of mental health and I/DD issues. This program is an integral part of the overall intellectual/developmental disabilities continuum of services. SACU focuses on supporting people in

community-based settings and preparing them to return to less intensive service levels once stabilized.

Percent Change	11.92%	4.56%	8.14%	9.41%		

Program Description

SACU provides 24-hour residential services to individuals with intellectual/developmental disabilities who have significant behavioral, mental health/medical care needs. The services are provided in licensed 5-bed group homes located across six counties from the Portland metropolitan area south to Eugene.

As individuals enter SACU, staff work with each person to modify behaviors and increase individual skills. Many of the individuals supported have frequent and intense behaviors and staff may provide physical interventions as trained through the Oregon Intervention System (OIS). All individuals have focused behavioral protocols that require frequent staff training and a high level of data collection and review. The program utilizes a person-centered approach and complies with all state and federal regulations.

There is an active referral list of adults and children waiting to enter SACU. Before entry into SACU, individuals are first referred by the local Community Developmental Disabilities Program to community-based providers across the state. When a person is denied or terminated from a current provider program, they move to a SACU placement. Nearly all individuals served have co-morbid (co-occurring) disorders of mental illness and intellectual/developmental disability and mental illness. The acuity level of challenging behaviors requires intensive 24-hour supervision and behavioral support services to ensure safety to themselves and the community. Challenging behaviors range from aggression toward people or property, including self-injurious behaviors. SACU also supports up to 10 individuals with medically fragile conditions that require 24-hour nursing care and support services.

More than 50 percent of these individuals have a history of criminal charges and/or current or pending legal sanctions. The convictions range from such crimes as assault, criminal mischief, theft, harassment, public indecency, possession, rape, sex abuse, and murder. A number have legal sanctions as a result such as parole, probation, Psychiatric Security Review Board (PRSB), or are registered sex offenders. Some are civilly committed as they have been found to be a danger to themselves or others. The majority of individuals referred to SACU have an identified need for a secured facility due to their risk of flight and/or offensive behavior. In addition, a large percentage of individuals require a secure placement where housing modifications are implemented to avoid injury to self and others.

SACU serves 75 adults who need acute stabilization and crisis services. These individuals have been identified due to extreme behavioral and psychiatric needs that have not been successfully provided in the community.

SACU has 15 beds available for children (up to 18 years old) who are in acute crisis situations and require stabilization. These children come from a variety of settings including the family home, foster care, 24-hour group home care, and institutional care.

SACU serves up to 10 individuals in specialized medical facilities due to their fragile medical conditions and I/DD needs.

In all the homes, SACU staff provide services that ensure health and safety needs are met and that the individual has the ability to participate in the community. As the goal of the program is to have the individual live in the most independent, least restrictive community setting, it is important to ensure the individual can be supported in the same type of setting.

All of the individuals in SACU qualify for Medicaid, currently use the Oregon Health Plan and are served by Coordinated Care Organizations, to meet their medical needs. Since there are high medical, behavioral and mental health needs, the program treatment plans are critical for individual stabilization and coordination of health services.

From the initial homes established in 1987 through today, the profile of the individuals served by SACU has dramatically changed. As private agencies increased their skills to meet challenging needs and were able to provide services, the individual who needs safety net services has changed. In 2000, SACU had six

homes serving 30 people with high medical needs. Today these medical homes serve only up to 10 individuals. These individuals now receive care in community and nursing facilities.

In the past, the numbers of people with intensive behaviors were people who had a diagnosis of autism. Today, intensive behaviors are related to co-occurring mental health diagnosis and/or criminal convictions.

With the 2015-2017 budget, SACU completely transformed the organizational structure to increase efficiencies and lower injuries and overtime. The agency formed seven island structures within the existing three regions and created a staffing float pool, which allows for more flexibility in direct care staffing. SACU also created the Crisis Outreach Assessment Team (COAT), a rapid-response team that responds to an individual's crisis as it is occurring. COAT also completes mental health assessments allowing SACU to better support the individuals served. In addition, SACU contracted with a national consultant, Benchmark, to review SACU as a whole and make recommendations for improved services as well as individual and staff safety.

Program Justification and Link to Focus Areas

SACU links to the Safer, Healthier Communities focus area. SACU helps individuals with intellectual/developmental disabilities be healthy and have the best possible quality of life by helping them live in their communities and to work or attend school to achieve their potential. Stabilization and training are provided for adults and children who have entered the program in crisis. SACU helps individuals transition back into community settings with support from their families, caregivers, or private providers.

Individuals enrolled have no other alternatives for a residential placement. They are in crisis due to a family breakdown; discharge from a hospital, psychiatric or correctional setting, or discharge from a private provider who can no longer support them due to the intensity of their behavioral or medical needs. SACU provides a critical alternative to assist the person to return to a healthy and productive life through a high quality residential program, including community-based housing, appropriate nutritional and medical care, and interventions.

In addition, the safety net provided by SACU allows for targeted, community-based support to individuals in crisis or with otherwise unmet intensive needs,

individuals receive the services they need for the time they need them, and are then assisted to transition back to families or private providers.

Program Performance

Staff ratios are quite high; at minimum all require a 1:1 staffing level. Many require a greater staffing level while in the community. The goal is to stabilize behaviors and health issues in a residential setting so that transition to a private provider is successful. Average length of stay for SACU adults overall (in both medical and behavioral beds) is 6.4 years.

SACU is focusing on placement of these long-term individuals in private care. These types of individuals, who can now be served by private providers due to improvements in community service skills and capacity, are no longer prioritized for this program.

SACU continues to build strong data tracking, including clinical data (individuals' incidents, medication errors, safety records, restraints, and a number of other elements), staffing data (ratios, overtime), and programmatic data (admissions, transfers, exits, length of stay). SACU uses this data to make programmatic changes.

Enabling Legislation/Program Authorization

Virtually all individuals served by SACU are funded through Medicaid Home and Community-Based Waivers and the 1915(k) Medicaid State Plan. The individuals served by SACU would be entitled to nursing home or intermediate care facilities for persons with intellectual and developmental disabilities (ICF/IDD) institutional services. Oregon no longer uses institutional care but the service would be required if we could not meet the need in the community.

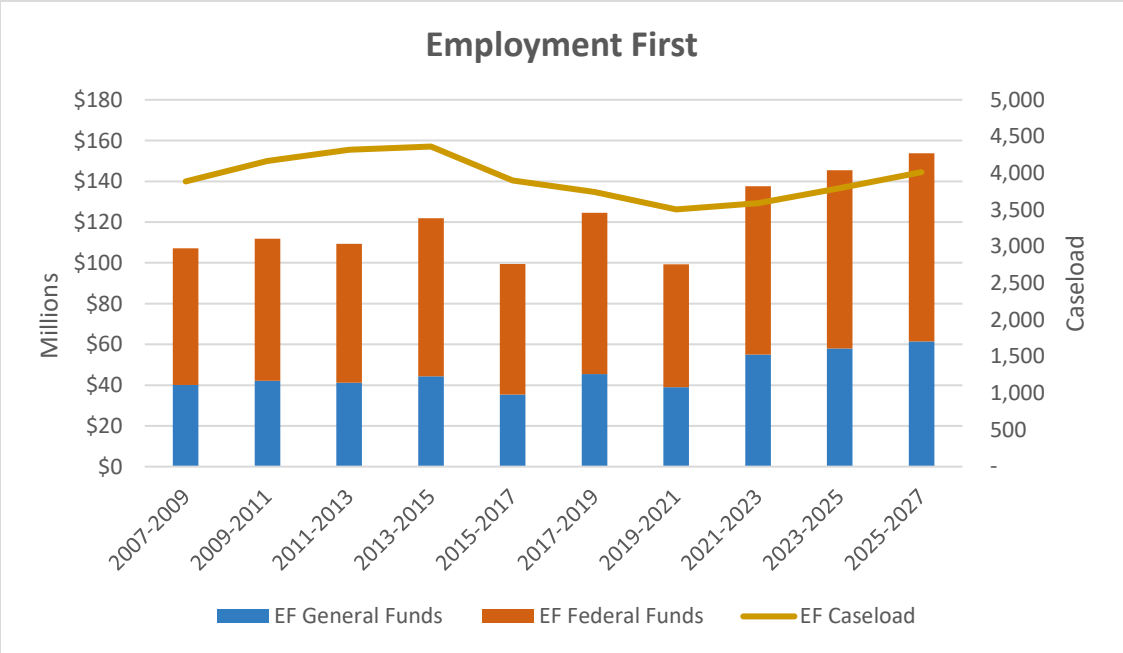
Other federal laws and rulings that impact services delivered through SACU are the Americans with Disabilities Act and the Supreme Court Ruling on Olmstead, which generally require individuals to be served in least restrictive, non-institutional settings. Oregon commitment statutes in ORS 427 also require the State to provide care and custody to a person who presents harm to themselves or others, and SACU's status as the safety net is integral to accomplishing this.

Additional statutes that guide the delivery and program are found in ORS 412, 430, 409 and 410. The Oregon Administrative Rules (OARs) that govern the operations

of SACU require that individuals be supported in the community and in pursuit of educational and vocational activities.

At the Federal level, in addition to all applicable Medicaid statutes and regulations, services must comply with the Title II of the Americans with Disabilities Act (ADA) of 1990 and Section 504 of the Rehabilitation Act of 1973. Compliance with these Federal laws is subject to the U.S. Supreme Court's Olmstead Decision of 1999 and the U.S. Department of Justice's interpretation of that decision as it relates to the ADA and Rehabilitation Act. The Olmstead ruling is relevant to SACU in that it requires all services allowed in the waiver, including SACU, are ones that create inclusion in the community equitably across the state.

Funding Streams



The services are designed and approved using a Medicaid 1915(c) Home and Community-Based Waiver and a 1915(k) Medicaid State Plan which provides a Federal match to the program's General Funds. The program funding match rate is 63 percent Federal funds and 37 percent state general funds for waiver services and 69 percent Federal funds and 31 percent state general funds for 1915(k) State Plan services. Based on their income level, some individuals also pay an other funds contribution toward their room and board costs.

Adjustments and Reductions for Agency Requested Budget

N/A

Department of Human Services: Employment First
Intellectual and Developmental Disabilities Services

Primary Outcome Area:	Thriving Oregon Economy
Secondary Outcome Area:	Safer Healthier Communities
Program Contact:	Acacia McGuire Anderson, 503-884-4910

Program Overview

Employment First is a nationwide initiative which helps individuals with I/DD reach and maintain competitive integrated employment by ensuring that employment is the first and priority option in each state. Research has shown that people who are employed in the community have the highest level of integration and have stronger social networks. The more people with developmental disabilities that achieve paid employment, the less dependence there is on public resources and the greater the state's flexibility in designing future services that respond to the need of this population. For these reasons and many more, in 2008 Oregon was an early adopter of the Employment First initiative. Employment First is both a national initiative and a state policy. In Oregon, Employment First includes the Office of Developmental Disabilities Services (ODDS), Vocational Rehabilitation (VR), and the Oregon

Department of Education (ODE). Employment First is working to increase employment opportunities for individuals with intellectual and developmental disabilities (I/DD). New federal regulations, as well as the Lane v. Brown settlement agreement, place even greater emphasis on the state's need to provide community-based employment services to people with I/DD. The state is also working to help providers that currently provide facility-based services (also known as sheltered workshops) to transform their services to community-based.

Program Funding Request

Employment First	*GF*	*OF*	*FF*	*TF*
19-21 LAB	$38,934,805	$-	$60,326,355	$ 99,261,160
21-23 ARB	$54,924,847	$-	$82,654,432	$137,579,279
Difference	$15,990,042	$-	$22,328,077	$ 38,318,119
Percent Change	41.1%	0.0%	37.0%	38.6%

Program Description

Employment First is based on the general philosophy that individuals with intellectual and developmental disabilities have the ability to be productive and contributing members of their communities through work. This philosophy also recognizes intrinsic and financial benefits of paid work to the individuals with disabilities and their families. This improved economic self-sufficiency has shown to also reduce reliance on government services. Oregon has been very successful in developing community-based care to move away from institutions as a model of care. Having individuals with developmental disabilities fully engaged in their communities is highly desirable as an outcome and fiscally efficient. The Employment First initiative is designed to ensure that employment supports are provided in the community.

All people with developmental disabilities who are eligible to receive services through either the Comprehensive or Support Services waiver and the Community First Choice (K Plan) may choose to receive residential support through in-home services, foster care, group homes, or supported living services, as well as employment and/or day services. Employment supports include:

- Employment Path services — individuals learn employment skills
- Supported Small Group services —supports for individuals to work in the

community with up to seven other individuals who have disabilities and make minimum wage or better
- Job coaching —support to work independently in a community-based job making minimum wage or better
- Discovery — a time-limited service designed to help an individual learn more about their employment strengths and potential job interests

The Employment First policy states that work in integrated jobs is the first and priority option in planning employment services for working-age adults and youth. Services should be planned using person-centered practices that identify an individual's talents, skills, and interests. This information can then help inform employment options and career opportunities.

In 2014, CMS issued additional guidance regarding their Home and Community Based Services (HCBS) regulation requiring that employment supports be community-based by March 2019. Further, DHS reached a settlement in the Lane v. Brown case in January 2016 which requires that ODDS, VR, and the ODE work together to ensure that individuals who are currently in a sheltered workshop (or who have been in a sheltered workshop as of 2012) or individuals eligible for ODDS services transitioning out of high school receive supported employment services to help them obtain competitive integrated employment. Additionally, the Rehabilitation Act was amended formally as of June 30, 2016 via the Workforce Innovation and Opportunity Act, which requires competitive integrated employment as the outcome to be considered a successful placement through VR.

These federal and state changes, as well as implementing Employment First policies, require some fundamental systems transformation. Many providers needed support to change business practices to support individuals in jobs throughout their communities. Due to this technical assistance and other support, the last Sheltered Workshop in the state of Oregon will close August 31, 2020 and alternatively, focus on delivering integrated employment supports.

It continues to be critical for business partners to embrace the benefits of hiring people with developmental disabilities. Employment First partners with the Oregon Council on Developmental Disabilities and other stakeholder and advocacy organizations to develop policies and communications that strengthen employment outcomes.

As part of the department's strategic planning to integrate those with developmental disabilities into their communities, as well as new federal regulations which require that all employment supports be community-based, efforts are being made to move away from the sheltered workshop model in favor of jobs in the community. For people with developmental disabilities, the goal is that their time in career exploration and hours working in the community will increase and time spent in sheltered workshops decreases. This goal aligns with federal regulations, as well as the Lane v. Brown settlement agreement.

Program Justification and Link to Focus Areas

Employment First links to the Thriving Oregon Economy focus area. Individuals with developmental disabilities are healthier, safer, and happiest when they are engaged in meaningful work. Individuals are more likely to be able to live with their family longer when they have their own daily schedule that is similar to working parents. As with all other citizens, for individuals with I/DD, employment has many positive impacts. These impacts include increasing self-worth, building relationships, and access to community resources. Employment improves economic well-being as well as physical and mental health. Employment supports are key in moving people with developmental disabilities away from 24-hour support services, which results in less public funds being spent.

Employment First also links to other economic development strategies to increase workforce diversity while meeting business needs in ways that result in jobs and prosperity for all Oregonians. Hiring people with disabilities is not only of benefit to those individuals, but also to businesses. Businesses report that their employees with disabilities help with overall retention, contribute to a positive workplace culture, are dedicated and hard workers, etc. Some information from Oregon employers can be found here: Employer Testimonial.

Program Performance

Employment trends have been tracked since 2007. Since Employment First began in 2008, there has been growth in community employment. Additionally, according to the March 2019 Employment Outcome Survey data 1,509 people received individual supported employment services. This is a 23% increase in people working in individual supported employment services from March 2018. From July 2018 to July 2019 (SFY 2019), Vocational Rehabilitation (VR) had 853 closures that led to competitive integrated employment for those people also receiving ODDS services.

For more information, please visit the Employment First Outcomes and Successes Report.

Employment First and its partners have reached the goals outlined in the 2015-2017 Bid ensuring that by 2016, no transition age youth may enter a sheltered workshop when leaving school as there were no new entries into a sheltered workshop setting allowed by Oregon Administrative Rule as of 7-1-2015. Although there were over 4,200 individuals in a Sheltered Workshop setting (totaling more than 45 Sheltered Workshops) in 2012, as of July 1, 2020 there are only 45 people remaining in a single Sheltered Workshop setting.

For more details regarding process, please visit our bi-annual data reports: http://www.oregon.gov/DHS/EMPLOYMENT/EMPLOYMENT-FIRST/Pages/data-reports.aspx

Employment First Goals:

By June 30, 2022, based on the Lane v. Brown Settlement, Employment First (through ODDS and Vocational Rehabilitation) must place 1,115 individuals currently or recently in a sheltered workshop in competitive integrated employment; and

By June 30, 2022, based on the Lane v. Brown Settlement and Executive Order 15-01, Employment First must provide supported employment services to 4,600 transition age youth or individuals currently or recently in a sheltered workshop. This is required by the Lane v. Brown Settlement Agreement and DHS along with ODE is progressing toward system change to ensure these outcomes are reached.

To date, Oregon is in substantial compliance with the Lane v. Brown Settlement Agreement.

Enabling Legislation/Program Authorization

The provisions of employment-related services for individuals with developmental disabilities are in ORS 430.610, .650, and .670. The enabling statutes are in ORS 409.050 and ORS 410.070.

At the federal level, in addition to all applicable Medicaid statutes and regulations

such as the Home and Community Based Services regulation and Workforce Innovation and Opportunity Act mentioned above, services must comply with the Title II of the Americans with Disabilities Act (ADA) of 1990. Compliance with these federal laws are subject to the U.S. Supreme Court's Olmstead Decision of 1999 and the U.S. Department of Justice's interpretation of that decision as it relates to the ADA and Rehabilitation Act. ADA and Olmstead are relevant to Employment First since the program must assure statewide access in the least restrictive environment.

As of January 2016, the Lane vs. Brown case has been formally settled and Oregon via DHS and ODE are mandated to effectively implement policies to achieve the required outcomes of the Settlement Agreement, which is mandated under federal jurisdiction.

Funding Streams

All funding for Employment First through ODDS is matched through the Medicaid 1915(c) Home and Community-Based Waiver. When a person is getting job development from Vocational Rehabilitation (VR), OVRS Title 1 case service funding is used.

Funding Justification and Significant Changes to CSL

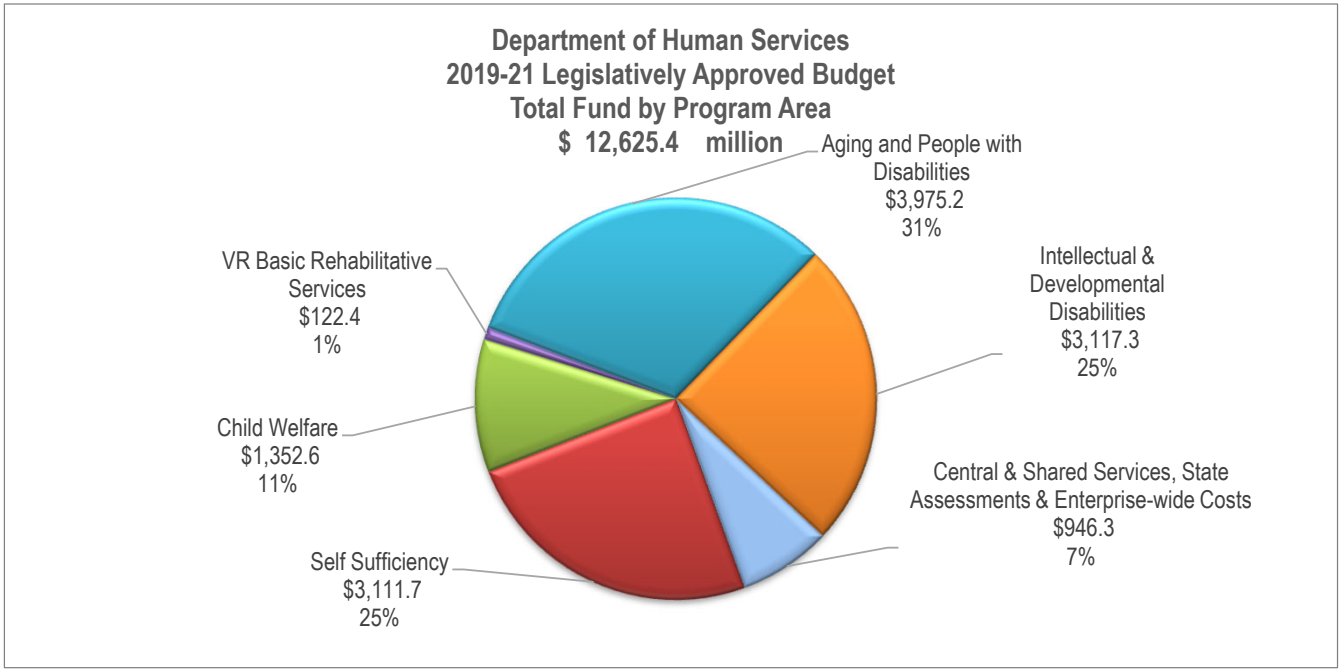
POP 119 Implementation of the New Rate Model:

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	$34,414,903	$0	$66,874,523	$101,289,426	0	0.00
Employment Share of POP	$4,111,562	$0	$6,335,014	$10,446,576	0	0.00

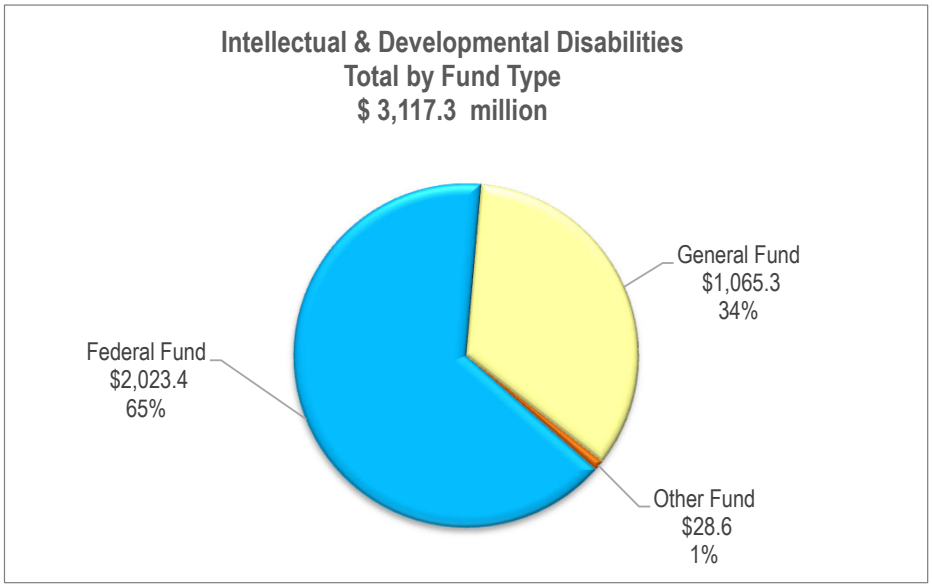
POP 119 will allow for implementation of the single assessment tool for all children and adults, ODDS contracted with a third-party entity to build provider rate models for the service groupings the assessment will provide. The contractor worked with stakeholders and performed market analysis to develop rates.

POP 120 Additional Funding for the New Rate Models Towards Full Implementation:

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	$36,612,999	$0	$69,940,223	$106,553,222	0	0.00
Employment Share of POP	$34,179	0	$52,662	$86,841	0	0.00

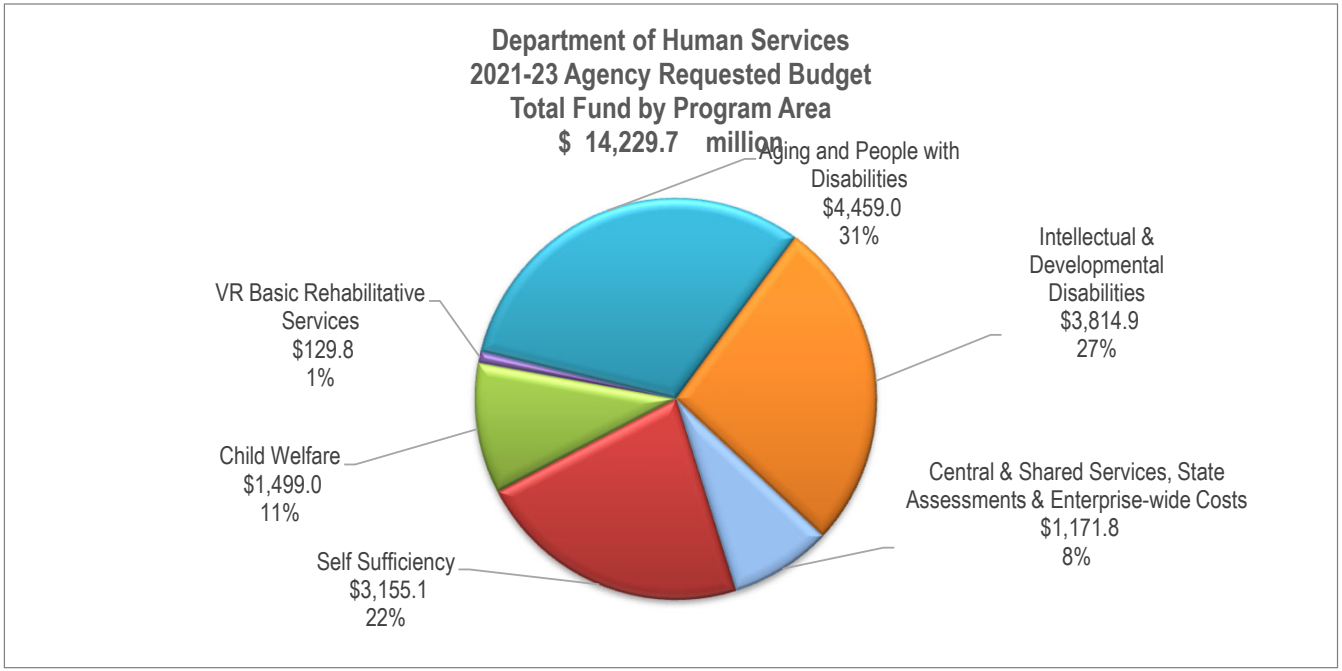


POP 120 will allow for implementation of the single assessment tool for all children and adults, ODDS contracted with a third-party entity to build provider rate models for the service groupings the assessment will provide. The contractor worked with stakeholders and performed market analysis to develop rates. This POP is requested to provide additional funding towards new rate models to move them closer to full implementation.

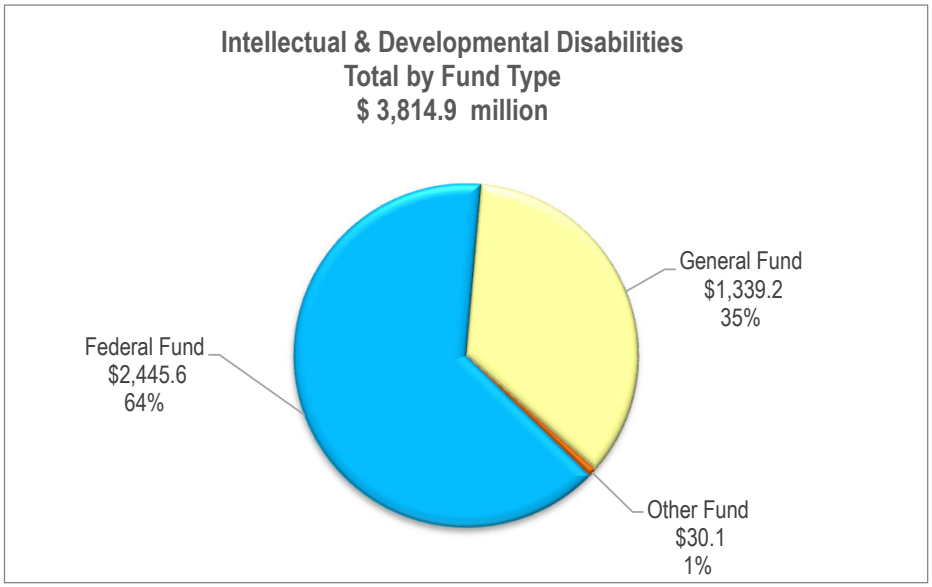


POP 132 Additional Funding for Benefits Counseling Services (WIN):

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	$2,618,651	$0	$2,228,659	$4,847,310	0	0.00
Employment Share of POP	$1,447,931	0	$2,228,659	$3,676,590	0	0.00



POP 132 is a partnership with Vocational Rehabilitation. Vocational Rehabilitation, WIN, is able to provide services to approximately 1,100 participants per year, but over 1,500 are referred to WIN for benefits counseling, leaving unserved over 400 per year who are not employed, but are on the employment path. Currently 1,450 individuals are awaiting benefits counseling services in Oregon. Benefits counseling



will also help people with I/DD get and maintain employment in their communities by supporting them to understand the impact of wages and increases in minimum wage on their benefits and by supporting them to develop a plan for managing benefits while working. The Lane v. Brown Settlement Agreement, Governor's Executive Orders 13-04 and 15-01, Oregon's Employment First policy, and new federal and state regulations regarding ODDS services require that integrated community employment be the first and priority service option for individuals with I/DD. These initiatives, paired with the new increase to minimum wage, will require support for individuals with I/DD to understand the impact of integrated community employment on their benefits. This need has only increased due to COVID-19, given unprecedented job loss, and unemployment benefits. For all of these reasons, benefits counseling is a critical service now, more than ever before.

2021-23 DHS — Agency Request Budget Policy Packages (POPs)

POP #	All Program Areas	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Other Funds	Federal Funds	Total Funds	POS	FTE
101	APD	**Oregon Deaf and Hard of Hearing (ODHHS) Staffing and Accommodations Scheduling Resource Tool**	ODHHS Staffing Accommodations Sched Tool	The current budget does not equip ODHHS to: Accurately assess the number of Deaf and hard of hearing people in Oregon and their need. Additionally, we do not have the ability to gather demographic information within these communities (e.g., age, race/ethnicity, language preferences, cultural self-identification, additional disabilities). •Address the needs of Deaf and hard of hearing people with additional disabilities including Deaf/Blind individuals. •Provide better scheduling of ASL/CART resources for agencies or consumers in a timely and efficient manner.	$ 327,880	$ -	$ 294,662	$ 622,542	3	2.64
102	APD	**Community Abuse Determination Project**	Community Abuse Determination Project	Significant legislative changes to increase safety of vulnerable Oregonians served by DHS Aging & People with Disabilities (APD) have been signed into law over the last ten years. In addition, internal audits and a DOJ memo outlined draft recommendations for DHS/APD procedural due process for persons substantiated in abuse investigations. DOJ and Internal Audits have highlighted critical weaknesses in APD's safety and protection system for Oregon's ever-growing vulnerable populations of older adults and adults with physical disabilities. Thousands of cases of substantiated abuse every year are not currently considered by the Department when determining an applicant's fitness for employment as a care provider. This is largely due to a lack of notification to substantiated perpetrators in APD's community APS cases, and the lack of opportunities for perpetrators to appeal substantiations before they are used in fitness determinations. APD must develop the infrastructure for the notification of substantiated perpetrators of findings and the provision of due process to perpetrators prior to the required sharing of their abuse information.	$ 2,549,127	$ -	$ -	$ 2,549,127	12	10.56
103	APD	**OPI Expansion and Family Caregiver Support**	OPI Expansion and Family Caregiver Support	This policy package would create a stable and sustainable program to assist consumers who need a lighter amount of supports through an expanded Oregon Project Independence (OPI) program, as well as a program to support consumers receiving supports from unpaid or family caregivers, with the goal of helping these consumers remain independent while delaying or avoiding entry into the Medicaid long term services and supports system.	$ 5,125,392	$ -	$ 43,834,709	$ 48,960,101	38	28.50
104	APD	**Improving Health and Well-being by Reducing Loneliness and Social Isolation**	Improv Health by Reduc Social Isolation	The negative effects of loneliness and social isolation are well documented. Loneliness and Social isolation and have been linked to a range of detrimental effects including, depression, anxiety, early onset of dementia/Alzheimer's, increased chronic disease (including increased risk of cardiovascular disease), premature death, and lower quality of life. According to one study Holt-lundstad PLoS 2010), lacking social connectedness carries a risk equivalent to smoking up to 15 cigarettes per day, and is greater than alcohol abuse, physical inactivity (sedentary lifestyle), obesity and air pollution. The UK has recognized the negative effects and has established a Commission On Loneliness and Minister of Loneliness. According to Oregon's National Core Indicator Survey between 6-14% of APD in-home consumers feel isolated or alone. A larger percentage, 16-20% report not being able to see family and friends when they want. While APD residential setting rules require this issue to be addressed in care planning and services by the provider, there is not an equitable equivalent expectation and service for APD in-home consumers. This Policy Option Package proposes to correct this inequity	$ 2,879,587	$ -	$ 5,533,080	$ 8,412,667	2	1.92

2021-23 DHS — Agency Request Budget Policy Packages (POPs)

POP #	All Program Areas	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Other Funds	Federal Funds	Total Funds	POS	FTE
105	CTL - HR	**Human Resources Staffing Policy Option Proposal**	HR Staffing Policy Option Proposal	The Office of Human Resources provides a broad range of workforce management services to support the operation of all DHS programs serving to 1.5 million vulnerable Oregonians. The size and complexity (approximately 10,000 employees, nearly 1/3 of state government) requires multiple specialized divisions within the Office of Human Resources to ensure that all DHS program areas can recruit, select, retain and appropriately manage their human resources. The Office of Human Resources provides the following services to DHS: Training and Legal Compliance: The Office of Human Resources establishes, maintains and provides crucial workforce trainings regarding Harassment Free Workplace, Violence Free Workplace, Respectful Workplace, Human Resources Essentials, Workday Support, Interviewing, Selection and Hiring, and other human resource topics. The Office of Human Resources collaborates with multiple labor unions, with other State Agencies- DAS, DAS-Risk, BOLI, ERB, DOJ Labor & Employment, Trial and Appellate Divisions to assess and mitigate risk for the Agency. The Office of Human Resources administers State and Federal Leave Laws (FMLA, OFLA, Extended FMLA), the American with Disabilities Act, State and Federal Labor Laws as defined by the Equal Employment Opportunities Commission (EEOC) and the Oregon Bureau of Labor and Industries (BOLI). Workforce Management: The Office of Human Resources manages approximately 300-350 workforce management issues which includes conducting investigations, drafting non-disciplinary and disciplinary documents, investigating and responding to union grievances, managing TORT responses, and lawsuits against the organization. Program Staffing: Annually DHS also has approximately a 14% turnover rate. The Office of Human Resources opens more than 2,000 job recruitments, receives over 120,000 applications and assesses applications to identify top candidates to hiring managers. HR works closely with managers to develop their recruitment and selection strategies and management's ongoing performance management and supervision priorities. Classification & Compensation: DHS completes 3,500 Pay Equity Assessments, approximately 300 position allocation reviews and	$ 10,992,974	$ -	$ -	$ 10,992,974	40	39.50
070 / 106	CTL	**Revenue Shortfall / Buy back central positions @ revised funding split**	Buy Back Central Pos at Revised Fund Split	Several federal block/capped grants are used to fund positions and Services and Supplies in Central Services offices through cost allocation. These grants include TANF, SSBG, OCAN and VR Basic 110. The budget building process inflates the underlying costs for Personal Services each biennium due to step increases, COLAs, etc. This creates FF limitation without an actual revenue source for the portion related to block grants. To address this, there needs to be an adjustment of the budgeted fund split for positions in Central Services. Central Services Offices included in this POP proposal include: DHS Director's Office, BPA, HR, OEMS, Public Affairs, ORRAI, and Program Integrity. What has been done to solve the problem? What are the risks/issues if not solved? (applied LEAN performance management strategies, reprioritized existing resources) A package 050 GF backfill for inflation on block/capped grants was requested through the exception process with DAS. This was denied. Therefore, a revenue shortfall has been created (package 070). If this buy-back POP is not approved, Central Services will be short actual revenue to fund positions. This would mean that positions would need to be held vacant longer or positions abolished, both of which would reduce the already limited supports that these offices could provide to programs, clients, providers and stakeholders. Central Offices are already woefully understaffed.	$ 662,964	$ -	$ (651,505)	$ 11,459	-	-

2021-23 DHS — Agency Request Budget Policy Packages (POPs)

POP #	All Program Areas	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Other Funds	Federal Funds	Total Funds	POS	FTE
107	CTL - OEMS	**Diversity, Equity and Inclusion**	Diversity, Equity and Inclusion	As Oregon's demographics continue to change (i.e. one in four school children are foreign born) and the state becomes a more culturally and linguistically diverse place, services and staffing need to become more representative of those communities who now call Oregon home. DHS has an opportunity to engage in transformative work to eliminate long standing inequities and realize its mission of becoming a more equitable organization. Some of these disparities include a disproportionate number of African American and Native American children in the foster care system; Disproportionate under-representation of employees of color and those with disabilities at all levels of the organization; A workforce which is not linguistically nor culturally agile and an absence of structures and systems which can ensure service equity for all the clients we serve. Disparities shown in DHS's data reflect systemic racism, historical injustice, and the inequitable distribution of power and resources in Oregon communities. DHS has a responsibility to continue improving the state's responsiveness to communities of color and, by engaging and understanding need, to lead the creation of a clear plan of action that addresses the root causes of disparities. We acknowledge that this conversation and a plan of action should have occurred sooner, and that we have not done enough to address Black, African American, African immigrant, African Refugee, and LatinX communities' health inequities and disparities thus far. These legacy inequities are compounded by an historic undervaluing and underinvestment in equity efforts across DHS programs and services. As a result, DHS is unable to meaningfully address the systemic inequities built into its systems and programs. This creates risk for the children and families we serve and legal exposure for the agency. Currently the Office of Equity and Multicultural Services has a team of seven staff to serve 9,400 DHS staff and ensure equitable services for well over one million clients.	$ 4,376,753	$ 18,371	$ 1,203,434	$ 5,598,558	7	6.16
109	CTL	**Volunteer Program**	Volunteer Program	The Volunteer Program engages individuals in our communities who want to donate their time to improve the lives of others. The Volunteer Program also provides on-the-job skills, training, and experience to individuals seeing to further their self-development and careers. Staff in the field lack the capacity to effectively work with volunteers. This POP would fund 16 Volunteer Coordinators and 1 Program Manager. If the POP is not funded, the outcomes for clients would be reduced because volunteers would not be available to supplement the work of staff, freeing them up to work with clients.	$ 3,139,462			$ 3,139,462	16	12.64
110	CW	**BRS Rate Model OWI Update**	BRS OWI Update Package	Update Child Welfare BRS rate model with the most current salary information available from the Oregon Employment Department prior to 2021 Legislative Session. Because the Employment Department Oregon wage information (OWI) becomes available in June each year, the agency proposes to use currently available June 2019 wage information in this option package, with an additional 7% to account for anticipated OWI increases between June 2019 and June 2021.	$ 3,102,604	$ -	$ 3,049,627	$ 6,152,231	-	-
111	CW	**Increase Child Welfare Training Capacity**	Increase Child Welfare Training Capacity	Increase Child Welfare Internal Training and Workforce Development Capacity in accordance with recommendations made by Alvarez Marsal under Executive Order 19-03. Recommendations included increased staff and resources to provide improved in-field supports, transfer of learning, advanced supervisor training, and accountability for training and workforce development. Capacity would take the form of additional positions and fiscal resources necessary to enhance Instructional Design, Training Delivery, Quality Assurance, Data Analysis, and Performance Evaluation of our workforce as they navigate their respective training paths. In addition, a comprehensive framework will be developed to inform clear paths to proficiency, competency, and expertise through formal instruction, field training, ongoing professional development, and promotional opportunities. These combined efforts will increase retention and the skills of our workforce	$ 992,940	$ -	$ 2,978,570	$ 3,971,510	19	16.72
112	CW	**Independent Living Program**	Independent Living Program	This POP seeks to expand the Independent Living Program (ILP) and youth transition services through a tiered level of ILP services, and an expanded age range of youth to be served, to improve outcomes for youth in their young adulthood. This will be achieved by: •Implement a tiered level of ILP service provision, providing monthly service rates based on the youth's identified needs (four tiers). •Expanding services to begin serving 14 – 15-year-olds and 21 – 22-year-olds (currently, contracted ILP services are limited to 16 – 20-year-olds)	$ 8,162,103	$ -	$ -	$ 8,162,103	2	1.76

2021-23 DHS — Agency Request Budget Policy Packages (POPs)

POP #	All Program Areas	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Other Funds	Federal Funds	Total Funds	POS	FTE
113	CW	**Oregon Child Abuse Hotline (ORCAH)**	Oregon Child Abuse Hotline (ORCAH)	Centralized screening of child abuse currently exists in half of all child welfare programs in the U.S. Research has proven its effectiveness in improving consistency in screening decisions and increased training opportunities for screeners to build a specialized expertise. Screening is the front door of the Child Welfare system for all mandated and non-mandated reporters of child abuse in Oregon. It is imperative that screeners apply Oregon Revised Statute 419B.005 accurately to each allegation of abuse and determine when the department is required to investigate. In the last two years, Oregon Child Welfare transitioned from fifteen regional child abuse hotlines to one centralized system known as the Oregon Child Abuse Hotline (ORCAH). With full implementation underway and the intent to further stabilize our workforce by a solid understanding of the workload, this POP would support the ongoing operation of a single, stand-alone, 24 hours a day, 7 days a week child abuse hotline and an evolving screening program. Enhanced training, decision-making and data-informed tools, a single leadership structure that includes training and continuous quality assurance processes all support increased accuracy and reduced bias in screening decisions. In addition, it affords opportunities for quality assurance measures which increase the ability of the Department to provide consistent practice and customer service while reporting data internally and externally	$ 4,557,048	$ -	$ -	$ 4,557,048	18	17.52
114	CW	**Family Preservation and Preservation Services**	Family Preservation and Preservation Servs	Families that are at high risk or with specific needs can be connected to Community based resources to support the family without a higher level of Child Welfare intervention. Child Welfare must develop a Continuous Quality Improvement program to ensure effective and quality services are provided.	$ 4,607,137	$ -	$ 1,535,672	$ 6,142,809	29	25.52
115	CW	**Governor's Child Foster Care Advisory Commission**	Governor's Child Foster Care Adv Commission	This policy options proposal accompanies a legislative concept that is effectively a re-introduction of HB 2332 – A of 2019. HB2332 – A of increased the membership of the commission from 11 to 13 makes modifications to appointments and membership requirements. Appropriates money to the commission for compensation and expense reimbursement of members. As well as directs the Department of Human Services(DHS) to provide staff and support including a full-time equivalent policy analyst.	$ 166,400	$ -	$ 55,466	$ 221,866	1	0.88
116	CW	**Respite Care Program Foster Family Recruit Team**	Respite Care Prog Foster Family Recruit Team	Summary Statement:Oregon does not currently have a formalized respite care program that would certify pay and monitor respite providers. Respite care is short-term child care services that offer temporary relief, improve family stability, and have been shown to reduce the risk of abuse or neglect. This Policy Option Package is derived from the recommendation from the assessment conducted by the consulting firm Alvarez & Marsal. Respite care provides foster parents and other caregivers with short-term childcare services that offer temporary relief, improve family stability, and reduce the risk of abuse or neglect. Respite can be planned or offered during emergencies or times of crisis. This Policy Option Package requests a Respite Business Plan which is seeking to overlay Behavioral Rehabilitative Services (BRS) infrastructure with combined Coordinated Care Organization (CCO) funding. This respite plan relies on the BRS infrastructure, primarily the Proctor Care system, to diversify their placement services by adding respite supports through two funding models, Child Welfare or CCO reimbursed. Current BRS rules note that Proctor homes are capable of serving 1 or 2 youth whom are not BRS clients, depending on the adult to child ratios natural to the home. Further, Oregon's Medicaid program allows for a lenient definition of respite care and the services associated with said respite service. Currently CCO's determine what a respite service is and whom can provide the services.	$ 19,443,093	$ -	$ 1,165,112	$ 20,608,205	1	0.88
117	CW	**School of Origin Transportation**	School of Origin Transportation	This policy package asks for a funding increase to School of Origin transportation , which is a contracted service through an IGA with Oregon Department of Education (ODE). School of Origin transportation allows foster students to remain in their school of origin, even if there foster care placement, is not within the school boundaries. This transportation service promotes school stability, which should increase educational outcomes for the foster student.	$ 927,925	$ 32,881	$ 894,375	$ 1,855,181	-	-
118	CW	**CW Stabilization**	CW Stabilization		$ 15,859,656	$ 1,007,800	$ 9,473,622	$ 26,341,078	99	87.12
119	IDD	**Implementation of the New Rate Models**	Implementation of the New Rate Models	POP 119 is requesting funds to cover the cost of transition to the new rate models for certain services. This funding will cover transition from the old rate structure and groupings of individuals according to their level of need based on the old assessment instruments to the new Service Groups based Oregon Needs Assessment (ONA) and new rate model Payment Categories.	$ 34,414,903	$ -	$ 66,874,523	$ 101,289,426		

2021-23 DHS — Agency Request Budget Policy Packages (POPs)

POP #	All Program Areas	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Other Funds	Federal Funds	Total Funds	POS	FTE
120	IDD	**Additional Funding for the New Rate Models towards full implementation**	Addtl Fund for New Rate Model Full Implement	POP 120 requests funds towards moving the new rate models closer to full implementation. This POP is contingent on POP 119 requesting funding to cover the cost of transition to the new rate models without additional rate increases. Funding in this POP will allow ODDS to implement the new rate models with an additional rate increase to move new rates closer to full implementation. Additionally, this funding will help smooth the transition by reducing negative impact to providers due to fluctuation in rates per person due to new assessment groupings.	$ 36,612,999	$ -	$ 69,940,223	$ 106,553,222		
121	IDD	**ODDS Health Management Unit (HMU)**	ODDS Health Management Unit (HMU)	ODDS has seen an increase of children and adults with medical support needs including those with very medically complex health conditions. This has been evidenced by the rise in referrals for all three categories (community nursing, Private Duty Nursing (PDN) and Direct Nursing Services (DNS)) of nursing as well as the medical/nursing technical and programmatic assistance requested from case management entities and providers. The central office does not currently have the positions and subject matter expertise needed to support the field.	$ 443,748	$ -	$ 443,724	$ 887,472	4	3.52
123	IDD	**Supported Living Rate Model Implementation**	Supported Living Rate Model Implementation	People with intellectual and developmental disabilities (I/DD) rely on Direct Support Professionals (DSPs) for daily support that enables them to live full lives in their communities. Challenges in finding, training and retaining this workforce persist and have reached crisis levels in the long-term services and supports (LTSS) industry. Additionally, ODDS' current rate models were developed in 2007 and no longer reflect the service delivery and contain outdated assumptions and data. In order to make intentional investment in the direct care workforce to support children and adults with I/DD, ODDS worked with stakeholders and experienced contractor to develop new rate models for services delivered by provider agencies. New rate models have been recently developed that reflect updated service requirements for providers, current Bureau of Labor Statistics and Consumer Price Index information and updated provider cost survey data. One of the services that still needs a new rate model is Supported Living, it was not part of the initial rate development effort. New rate model for this service is necessary to ensure that all ODDS provider rates are set based on consistent assumptions around DSP wages and benefits and reflect most current service requirements and market data. Additionally, all services and rates for those services must be transitioned to the use of the new Oregon Needs Assessment (ONA). Implementation of the new rate model for Supported Living would allow to accomplish that. Supported Living Services consist of individual support, delivered in a personalized manner, to adults with Developmental Disabilities based on the Individual's needs and preferences. These Services include attendant care, training, and support that promote opportunities for Individuals to live in their own home or apartment or in their family home and to be part of and participate in the communities in which they live. Such services may include up to 24 hours per day of paid supports that are provided in a manner that protects the dignity of the individual. Supported Living served over 700 adults with I/DD.	$ 5,905,836	$ -	$ 11,798,579	$ 17,704,415		
124	IDD	**Licensure and Quality Improvement Staffing**	Licensure and Quality Improvement Staffing	The POP will add additional staff to ODDS Licensure and Quality Improvement Office to meet the growing workload needs associated with an increase of 750 licensed/certified providers since 2014 with no new staff, new Federal Rule changes and Centers for Medicaid and Medicare Services (CMS) requirements and achieve and sustain timely inspection intervals. ODDS staff not only issues licenses and certifications for providers but also plays a huge part in investigations of neglect and abuse. With the large volume of new providers this important task is growing and there is not enough staff to sufficiently address this issue.	$ 1,991,047	$ -	$ 1,990,933	$ 3,981,980	19	16.72

2021-23 DHS — Agency Request Budget Policy Packages (POPs)

POP #	All Program Areas	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Other Funds	Federal Funds	Total Funds	POS	FTE
125	SHS - OPAR	**Estate Administration Unit (EAU) Business Process Change/Program Integrity**	EAU Business Process Change/Prog Integrity	The primary objective of the policy package is to increase estate recovery efforts for reinvestment in DHS programs and to improve integrity to DHS programs through increased communication, recovery, productivity, accuracy and efficiency. Additional revenue for DHS will be provided to the Adults and People with Disabilities (APD) Programs. The Estate Administration Unit has a body of work (Surviving Spouse & Pending cases) that we currently are not actively working due to the lack of resources. With a new business process change in July 2019, we are required to notify and process any new Surviving spouse and Pending cases timely moving forward. Additionally, there are 15,000-25,000 cases that are not being worked timely and notifications are not being sent to the consumer in a timely manner. These cases have historically been a lower priority due to resource limits. However, with the change in business practice and additional staffing, we would like to work these cases as part of our normal operations. With the large number of cases sitting untouched, we are losing revenue. To be able to work the cases and sustain the ongoing new business process change with reviewing Surviving Spouse and Pending cases, we would like to add: (2) Compliance Specialist 2s (CS2s) (1) Administrative Specialist (AS1) (1) Compliance Specialist 3 (CS3). With the additional staff, and the work they will be producing, the expected result would be a minimum of $14,000,000 in additional recovery dollars each biennium.	$ 748,860	$ 643,241	$ -	$ 1,392,101	4	3.52
126	SHS - OTIS	**Child Abuse Investigations – Third Party (non-familial)**	Child Abuse Investigations – Third Party	SB 155 requires the department to investigate all reports of child abuse. Historically, the department would not complete an abuse investigation where the alleged perpetrator was a third party (non-familial), when the parents were protective, and the allegation was referred to law enforcement. This was consistent with the statutory scheme prior to 2017. In 2017, the legislature enacted a new statute (ORS 419B.026) which provided that every child abuse investigation must conclude with a disposition of founded, unfounded or unable to determine. This applies to the department or any law enforcement agency conducting an investigation. One intended consequence of the new statute was to restrict the department's use of its Differential Response practice which did not require a disposition in every investigation. SB 155 changed the landscape in two significant ways: first, by putting the ultimate responsibility to complete an investigation on the department should law enforcement decide not to investigate; and second, by defining what constitutes an investigation and ensuring that it is a detailed inquiry. As of January 2020, all allegations of this nature are to be sent to OTIS for disposition. OTIS will be triaging and investigating the highest priority allegations as we build capability. Ultimately, the office requires additional resources to both address the increase in the number of investigations and to update the Child Abuse Management (CAM) System to track this data. These resources are necessary to address the almost 5,000 allegations per year now estimated to be forwarded to OTIS for investigation. This is new work and therefore new resources will be required to avoid service level reduction in other Child Welfare program areas	$ 8,245,863	$ 7,152,193	$ -	$ 15,398,056	46	33.39
127	SHS - OPAR	**National Directory of New Hires**	National Directory of New Hires	This POP seeks to permanently fund three positions in the Office of Payment Accuracy and Recovery (OPAR) Overpayment Writing Unit (OWU) to process the National Directory of New Hires (NDNH) report. Two Human Services Specialists 2 (HSS2) positions and One Compliance Specialist 2 (CS2) position. The 2014 Farm Bill directs states to work the NDNH report which is a monthly data match that is a useful tool which aids in the identification of recently opened or recertified SNAP cases where customers may not be eligible to receive benefits due to unreported employment. OWU has one staff in a job rotation processing the report. The report supports program integrity efforts and OPARs goal of prevention, early detection, and quicker recovery of improperly paid benefits	$ 497,908	$ 419,000	$ -	$ 916,908	3	2.64

2021-23 DHS — Agency Request Budget Policy Packages (POPs)

POP #	All Program Areas	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Other Funds	Federal Funds	Total Funds	POS	FTE
128	SHS-DO	**Emergency Management**	Emergency Management	Under ORS 401, Emergency Management Services, the Department of Human Services (DHS) is tasked with assisting in statewide emergency response activities during natural and man-made disasters. The DHS assigned responsibilities are to provide life sustaining care for all citizens that survive a disaster, commonly known as Mass Care. This includes the protection of children, families, the elderly, and individuals with access and functional needs. DHS is also responsible for facilitating statewide activities to deliver shelter, food, immediate medical care, behavioral health services, medications and many other critical disaster relief necessities. Accomplishing this mission includes the development of state emergency operations and recovery plans, developing and implementing agency specific plans, working as a member of the Oregon Emergency Response Council (OERS Council), coordinating statewide response operations with other state agencies and non-governmental organizations (NGO), developing and conducting internal and external training, tracking and vetting legislation tied to emergency response operations, and responding to Governor declared disasters which can require a 24 hour operations cycle.	$ 471,209	$ 417,936	$ -	$ 889,145	2	1.76
129	SHS-DO	**Continuity of Operations**	Continuity of Operations	The Department of Human Services (DHS) is required to develop and maintain a comprehensive continuity of operations plan (COOP). Policy requirements include DAS Policy 107-001-010 and DHS|OHA Policy 010-006. Funds received from the Federal Government to carry out many state led programs will also list COOP and disaster recovery plans as requirement in the funding stream. Currently the DHS has dedicated 0.75 FTE to develop and implement a comprehensive business continuity program that covers nearly 10,000 employees and 200 locations statewide. Business continuity management is a required business practice of ensuring that DHS|OHA can execute its mission critical functions through all circumstances, and it is a fundamental responsibility to our clients and stakeholders. DHS|OHA is not adequately prepared to respond to an unplanned business interruption such as a major disaster, power outage, loss of a facility, or significant geographical weather event. Many of the mission critical functions required to be carried out during an unplanned business interruption have not been defined and do not have plans for reengaging the essential infrastructure (building, IT systems) nor resourcing (employees) in the event of a crisis. Without strong business continuity plans the agency potentially exposes our clients to unacceptable hazards and a reduced standard of living. The agency's ability to provide critical services will be severely limited at best.	$ 471,209	$ 417,936	$ -	$ 889,145	2	1.76
130	SSP	**Survivor Investment Partnership**	Survivor Investment Partnership	In partnership with the Governor's Office, DHS Self-Sufficiency is proposing the Survivor Investment Partnership (SIP) Program to increase accessibility of advocacy services and meaningful financial support to survivors of domestic violence and sexual assault including Tribal members, individuals without children, and vulnerable populations. Domestic Violence is disproportionally prevalent in vulnerable populations: •Prevalence rates for Tribal members experiencing domestic violence is at 44% nationally. •2017 Adult Protective Services reports show out of 3,672 founded community allegations investigated for abuse, 85% of those cases were individuals that may have experienced some form of domestic violence •In Federal Fiscal Year 2018, 21.5% of children in Child Welfare that were victims of Child Abuse were children of color. Survivors of domestic violence and sexual assault need access to culturally responsive advocacy services and meaningful financial support. There are high rates of domestic and sexual violence in Oregon and services to support survivors are underfunded. There are current gaps in services, where culturally specific services are not available across the state, there is a need for additional services in Tribal Communities, and survivors of domestic violence and sexual assault (DVSA) need access to funding that both supports underserved and vulnerable populations and that is accessible and meaningful. The intention is to expand services in a meaningful way and to reach underserved populations. This proposal will focus on increasing partnerships and access to meaningful financial supports by contracting with these partners to increase capacity and advocacy in their agencies and open resources for survivors through the survivor investment dollars. This program will focus on providing culturally responsive advocacy and financial support to survivors. This proposal is still in development with ongoing workgroups, partners, Tribes, and the Governor's Office.	$ 23,729,676	$ -	$ -	$ 23,729,676	4	3.52

2021-23 DHS — Agency Request Budget Policy Packages (POPs)

POP #	All Program Areas	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Other Funds	Federal Funds	Total Funds	POS	FTE
131	VR	**Social Security Cost Reimbursement**	Social Security Cost Reimbursement	Currently Vocational Rehabilitation (VR) is not fully capturing all of the available Social Security reimbursement available to its consumers who received Social Security Insurance (SSI) and/or Social Security Disability Insurance (SSDI) benefits and who become employed as a consequence of VR services. Historically these revenues have approached $10M per biennium. Proposed changes in the Ticket to Work program would create a revenue stream to fund ongoing supports for individuals with the most severe disabilities.	$ -	$ -	$ 170,746	$ 170,746	1	1.00
132	VR/IDD	**Benefits Counseling Services (WIN)**	Benefits Counseling Services (WIN)	This POP is designed to provide benefits counseling to people with disabilities. WIN is able to provide services to approximately 1,100 participants per year, but over 1,500 are referred to WIN for benefits counseling, leaving unserved over 400 per year who are not employed, but are on the employment path. Currently 1,450 individuals are awaiting benefits counseling services in Oregon. Many more who are not currently employed but are on the employment path are encouraged to contact the WIN Help desk for answers to general questions instead of being referred for specific and comprehensive benefits planning services. This can cause individuals with disabilities working towards independence to no longer seek employment or lose their jobs due to benefit loss or fear of benefit loss. A minimal increase in benefits counselors can significantly increase jobs and independence for individuals with disabilities. Benefits counseling is a complicated service, and requires significant training. For that reason, WIN, which is responsible for certifying and maintaining quality across the state, will require more training and administrative staff in order to support additional benefits counselors. Specifically, WIN is seeking funding for 4 FTE contract Work Incentive Specialists and 4 FTE contract for the Work Incentive Network. Benefits counseling will also help people with I/DD get and maintain employment in their communities by supporting them to understand the impact of wages and increases in minimum wage on their benefits and by supporting them to develop a plan for managing benefits while working. The Lane v. Brown Settlement Agreement, Governor's Executive Orders 13-04 and 15-01, Oregon's Employment First policy, and new federal and state regulations regarding ODDS services require that integrated community employment be the first and priority service option for individuals with I/DD. These initiatives, paired with the new increase to minimum wage, will require support for individuals with I/DD to understand the impact of integrated community employment on their benefits. Additionally, new employment service rates were developed with Employment Provider Organizations which would ensure adequate funding for the cost of benefits counseling	$ 2,618,651	$ -	$ 2,228,659	$ 4,847,310	-	
133	VR	**Workload Model Equity Staffing**	Workload Model Equity Staffing	Implementation of WIOA 2014 requires a fundamental change in service delivery for the VR programs, especially in the area of disabled youth in schools and the continuing alignment and integration of the VR program into the statewide Workforce system. In order to meet these requirements additional staff are required to lead and manage the VR program in order that the Program can meet its Federal mandate and not incur any penalty to the State for not doing so. Oregon VR must expend at least 15 percent of the federal funds to provide or arrange for the provision of these new pre-employment transition services for students with disabilities. VR is also required to coordinated with the 197 local school districts throughout Oregon in the delivery of these services. The requested positions in VR were made to address the changes resulting from WIOA. The double fills support the new programmatic requirements for the program and for the increased level of field management needs	$ -	$ -	$ 3,306,740	$ 3,306,740	11	11.00

2021-23 DHS — Agency Request Budget Policy Packages (POPs)

POP #	All Program Areas	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Other Funds	Federal Funds	Total Funds	POS	FTE
201	CTL - OBIS	**Improving Data Integrity and Compliance**	Improving Data Integrity and Compliance	The foundation of all decision making, and the singular purpose of all information systems is data. Data is an organization's most valuable asset, after its people. All services provided by DHS and OHA depend on data and the ability to access, manipulate and integrate information. Accurate, accessible data is essential to providing the critical services DHS and OHA provide on the front line in Oregon. No cohesive approach or plan exists across the agencies for the management, governance and support of data. – that must change. This POP requests funding and positions for OHA, DHS and OIS to establish a data strategy which will improve data analysis, data quality, data governance, data classification, data integrity, data management and meet legislatively mandated criteria defined by the 2013 HB 2134 and the open data standards criteria required by 2017 HB 3361. Outcomes will improve data quality, increase the ability to share and analyze data resulting in more informed decision-making. This effort will benefit not only DHS and OHA, but other entities across the State such as the health care system, schools and other State Agencies. DHS and OHA are hampered by lack of standardization of data structures and classification, by the challenges of securing data across hundreds of systems, by risks associated with access to data by internal and external resources, by a fundamental lack of knowledge about how to manage and govern data. As an example of the lack of standardization between OHA and DHS, there are six different client indexes for identifying who received services. This makes it extremely difficult to get a complete picture of the services any one Oregonian receives. This problem is compounded as systems continue to be implemented without addressing the indexing/standardization problem. Periodically, resources are shifted temporarily to attempt developing a strategy and approach. These have occurred in pockets and have not sustained. For DHS and OHA to address this situation, they must commit to a real and sustained investment in resources, consulting support and tools.	$ 712,700	$ -	$ 712,637	$ 1,425,337	7	5.25
202	CTL	**Statewide Community Information Exchange**	Statewide CIE	This POP supports a Statewide Community Information Exchange (CIE) that will electronically connect health care and social services to support Oregon Health Plan and DHS clients in need. This statewide initiative leverages CIEs implemented by CCOs and provides OHA and DHS with CIE platforms to screen Oregonians in need, locate community resources, and make referrals. It integrates local CIE networks, creates a centralized resource directory, and coordinates tools and standardizes data and measures. Without funds OHA and DHS staff will lack the tools to respond to the increased needs of OHP members and DHS clients after the enormous disruptions of COVID-19. Without funds to connect local CIE networks and standardize tools, the result will be an increased burden on community-based organizations, fragmented services, and gaps in service delivery. Without meaningful coordination and follow-up on social service referrals, health disparities will persist, the system will perpetuate inequities, and ultimately our most vulnerable Oregonians will be left behind	$ 115,944	$ -	$ 347,816	$ 463,760	2	1.84

2021-23 DHS — Agency Request Budget Policy Packages (POPs)

POP #	All Program Areas	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Other Funds	Federal Funds	Total Funds	POS	FTE
203	SHS - SAEC	**Critical Systems**	Critical Systems	The average lifespan for business applications is 6-8 years. Larger, more complex systems have a bit more longevity but maintaining and supporting these applications increases significantly over time. This results in more and more investment going to keeping the system operational rather than delivering innovative business outcomes. DHS & OHA have 70 mission critical applications. The oldest, Client Maintenance System (CMS) was created in 1977. For perspective, VHS or Video Home System was introduced in the US the summer of 1977. By 1997, DVDs were the new technology and by 2002 VHS was relegated to the history books. Not so for the outdated technology still used to support DHS and OHA's fundamental business practices. Consider the challenges today of trying to connect a TV, VCR or stereo system from the 1970s to modern technology like smart TVs, blue tooth wireless and streaming. Even where possible, transmission integrity and the ability to use peripherals like remotes is limited or impossible. Now apply those limiting factors to the legacy environment consisting of pre-2000 applications developed using technology no longer viable today. Hampered by these technology limitations, DHS and OHA are unable to take full advantage of modern capabilities to achieve business goals. Interfacing legacy systems with modern technology is extremely challenging and often impossible. Security vulnerabilities are significant – today's security risks simply did not exist when these systems were built. Movement to modern technologies is not a nice to have, it is essential. A key step in this process is establishing a solid understanding of the health and fitness of the application portfolio. Work is actively underway with Gartner to document this information to provide DHS & OHA data for investment and prioritization decisions. Data accrued to date shows a bleak picture of aging systems developed prior to the start of the 21th century. This includes the majority of the Mainframe mission critical systems, along with myriad PowerBuilder and Java systems past end-of-life. Additionally, there are over 200 Microsoft business applications built on unsupported and not secure versions of Microsoft which must be migrated to current technology. These systems have become unmanageable, bottlenecks to faster delivery and represent increased cost, risk	$ 2,500,428	$ 96,826	$ 1,558,002	$ 4,155,256	-	-
204	SHS - OFS	**Modernization: Financial Systems**	Modernization: Financial Systems	The Department of Human Services and the Oregon Health Authority rely heavily on a conglomeration of end-of-life systems to support agency financial functions. These 20+ systems are built with multiple technologies including obsolete Cobol Mainframe solutions with duplicative and redundant functionality. DHS and OHA are the two largest state agencies in Oregon, yet spreadsheets are used to build budgets and monitor budget-to-actual activities. The lack of a Financial Management System compromises the multi-billion-dollar budgeting and expenditure tracking required by the DHS and OHA. A cohesive financial system can help the organization identify potential savings and support budget reduction exercises by helping identify fragmented spending across different entities to enable consolidated purchasing, spending and achieve cost savings. The agencies are burdened with continually increasing maintenance costs and inefficiency interfacing multiple systems into the official state systems. Some of the issues include: • No common system platform; consequently, data between systems is inconsistent, reconciliations are extremely challenging, and the disparate environments are difficult to maintain. • Providing comprehensive data to State and Federal Funding Partners and responding to legislative and agency questions is challenging, inefficient and complex. • Providers receive payments and 1099s from multiple agency systems creating confusion and inconsistency. • Systems are not all built on the same set of financial business rules. • Reconciliation is challenged by situations where payments to providers are made from one system while simultaneously establishing accounts receivable to the same provider in another system. • Information contained in Oregon Budget Information Tracking System (ORBITS) is not available readily to staff outside of agency budget units and may not be at the level of granularity needed by program areas to support everyday management. Other challenges include:	$ 883,459	$ 771,823	$ 565,564	$ 2,220,846	3	3.00

2021-23 DHS — Agency Request Budget Policy Packages (POPs)

POP #	All Program Areas	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Other Funds	Federal Funds	Total Funds	POS	FTE
206	CTL - IE	**IE Supporting the Post-Implementation Sys**	Integrated Eligibility	This POP requests resources and funding to provide stability and continued support for the Integrated Eligibility (IE) program. The Integrated Eligibility initiative is a multi-biennium effort to develop a comprehensive unified system called ONE that integrates eligibility determination for Non-MAGI Medicaid, Sup+P2plemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF) and Employment Related Day Care (ERDC) benefits. This system represents an essential lifeline to vulnerable Oregonians in need. The IE program is an umbrella under which multiple inter-dependent yet disparate bodies of work fall. o The core system will be implemented statewide before July of 2021. Following implementation there will be a substantial stabilization period to resolve defects, add minor enhancements and help staff adjust to the new system. o Major enhancements to the system will be needed to add functionality that was not included in the original system requirements. These include functionality such as: o Mandated changes for Asset Verification Services o Updates to Medicare information o Mandated and/or required reports for all programs o Additional federal reporting or federal changes that have been passed nationally regarding the SNAP program o Increased functionality for operational efficiency to ensure Oregonians receive the services they need in the most efficient method possible o User Acceptance Tools need to be upgraded to support further enhancements. For example, Team Foundation Server must be upgraded to the latest version (Azure DevOps Server) before it reaches end-of-life. All UAT activities are currently supported by the State and are not provided by Deloitte. o The Eligibility Transformation team which provides trainers, subject matter experts and leadership will need to continue to provide support services into the 2021-23 biennium.	$ 54,114,124	$ -	$ 79,310,358	$ 133,424,482	24	24.00
207	APD	**Maintenance & Operations of Provider Time Capture**	Provider Time Capture M&O	The Department of Human Services (DHS) and Oregon Health Authority (OHA) in-home care programs need a system that will increase program integrity and comply with the federal 21st Century CURES Act for Electronic Visit Verification (EVV) System and the U.S. Department of Labor Fair Labor Standards Act (FLSA). This would be done with the implementation of a time, attendance and payment system for the program's Home Care Workers and Personal Support Workers (HCW/PSW). The drivers for this work include a need for: 1.Improved timeliness and accuracy of data 2.Improved compliance with federal, state, and bargaining requirements 3.Increased efficiency and internal controls 4.Decreased duplication of efforts across agencies 5.HCW/PSW to accurately and timely report services provided across programs 6.Decrease dependency on outdated legacy systems This POP requests General Fund to implement ongoing maintenance and enhancements that build upon a base system implemented in the 2021-23 biennium that would result in an integrated solution that meets the 21st Century Cures Act criteria and helps protect vulnerable Oregonians. Not funding this POP would limit Oregon's ability support the system	$ 2,561,753	$ -	$ 1,747,642	$ 4,309,395	7	7.00
208	CTL - OBIS	**Centralized Abuse Management Op and Maint**	Centralized Abuse Management O&M	The CAM system supports abuse investigators, licensers, background checks, and decision makers by capturing data and managing workflow for investigations and incident reporting for vulnerable Adult and children subject to abuse and neglect. This system recently came on-line and is now transitioning to regular operations and maintenance and the normal work related to system improvements and enhancements. This POP anticipates the normal O&M expenditures and the system improvements and enhancements expected for the 2021-23 biennium.	$ 2,894,725	$ -	$ 2,894,708	$ 5,789,433	2	1.50

2021-23 DHS — Agency Request Budget Policy Packages (POPs)

POP #	All Program Areas	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Other Funds	Federal Funds	Total Funds	POS	FTE
209	SHS - CJIS	**Criminal Justice Information Services (CJIS) Security**	CJIS Security	CJIS Security: FBI CJIS Security Policy includes many intensive physical and data security requirements for any DHS or OHA staff or contractors, and systems accessing and/or using CJI. DHS and OHA programs use criminal justice information (CJI) for over 200,000 background and safety checks per year. These checks are completed for: DHS and OHA employees, volunteers, and contractors; child protective services; care providers for children, home care and personal support workers; foster and adoptive parents; traditional health worker certification; fraud investigations; licensing of service providers; emergency medical and trauma services, and others. Complying with these requirements requires substantial worksite infrastructure, personnel, and IT solutions across DHS and OHA offices. Security and Privacy Services Office (SPSO): The Security and Privacy Services Office provides awareness and solutions to achieve compliance with Federal and Oregon privacy and security laws, rules and policies while supporting DHS|OHA programs to develop and improve business systems, provide key services, communicate and collaborate with partners and stakeholders, and insure the public trust. SPSO staff acquire in-depth understanding of key program services and systems in order to achieve more customized solutions for collaborating services even as they achieve current privacy and security postures. As the majority of DHS|OHA CJIS services, systems and staff reside with DHS, SPSO would also include the CJIS Local Agency Security Officer (LASO) role for DHS|OHA. The CJIS LASO is a role designated in the FBI CJIS Security Policy responsible for implementing and maintaining CJIS compliance across also CJIS services for both agencies.	$ 4,294,411	$ 7,928,405	$ 3,009,733	$ 15,232,549	8	7.04
210	SHS - SAEC	**Risk Audit Remediation**	Risk Audit Remediation	The Office of Information Services' Information Security and Privacy Office (ISPO) provides risk management, incident coordination, e-discovery coordination, and audit tracking services for DHS and OHA. ISPO works closely with the state Cybersecurity Services (CSS) office within the DAS's Enterprise Information Services (EIS) to coordinate the implementation of security and privacy best practices and requirements from the EIS, Federal government and the National Institute of Standards and Technology. DHS and OHA have a large amount of protected and regulated data, requiring a high level of diligence to ensure appropriate protections. CSS has asked all state agencies to focus on compliance with implementation of the first six (6) Center for Internet Security (CIS) Security Controls as we all work to improve our security posture and practices. This POP seeks to build on the current work of OIS and CSS and provides additional resources to expand capacity and increase the maturity of our security and privacy practices. OIS continues to coordinate with the EIS CSS to ensure appropriate allocation of responsibilities between the enterprise efforts and those required of the agencies. The FTE and tools requested as a part of this policy package are in alignment with agreed upon agency responsibilities.	$ 824,827	$ 31,919	$ 513,948	$ 1,370,694	-	-
211	SHS - SAEC	**Remote Access**	Remote Access	Oregon and the world are dealing with a crisis of epic proportions. Risk to health and life is high. This current situation highlights the critical need to improve emergency preparedness for DHS and OHA in order to reach vulnerable populations more easily and deliver services under any condition without risking the health and well-being of staff or clients. DHS and OHA require the ability for staff and clients to access systems and services from any location, including their home. Access must be dependable, secure and available 24/7. Systems must be increasingly available outside of regular business hours. Technical staff to support expanded system availability is required. This is the new normal and these capabilities must be embedded in the technologies supporting the day-to-day workforce.	$ 1,744,452	$ 67,575	$ 1,086,951	$ 2,898,978	-	-

2021-23 DHS — Agency Request Budget Policy Packages (POPs)

POP #	All Program Areas	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Other Funds	Federal Funds	Total Funds	POS	FTE
212	SHS - SAEC	**Increase IT Project Capacity**	Increase IT Project Capacity	Over the past few biennia DHS and OHA have averaged 20 active technology projects over $1M occurring simultaneously, to meet business demands and federal/state mandates for major enhancements to existing systems, replacement of legacy systems and needs of the business for mobile and modern solutions. But, current project support is not enough to meet the needs of these two large agencies, and we often find that projects are vying for the same resources from business analysts to technical experts. Increased business demands and the need to accelerate the modernization of our existing systems has led the leadership of both agencies to ask that we increase technology project capacity and continue to find ways to reduce the time from project inception to completion, while also reducing risk to project success. Ability to meet the needs for additional technology projects was one of the top "dis-satisfiers" in a recent Business Leaders survey. This POP seeks permanent FTE and funding that will increase support for large technology projects. These resources will support the OIS Project Solutions team and Project Management Office, utilizing a standard project management methodology and working closely with the DAS's Enterprise information services oversight team to ensure adherence to state stage gate processes and principles for the successful delivery of technology projects.	$ 1,853,945	$ 71,783	$ 1,155,185	$ 3,080,913	-	-
213	CTL	**IE Modernization**	IE Modernization	This policy package requests permanent resources for DHS and OHA/OIS for modernization and enhancement services for the integrated ONE program, which includes the initial creation of the OregonEligibility ONE system for Modified Adjusted Gross Income (MAGI) Medicaid in 2015 and the Integrated Eligibility System, through the 2021-23 biennium and into the future biennia. The requested resources and funding will support enhancements, automation and system consolidation that will drive the integrated ONE program to a more sustainable and future focused solution.	$ 8,461,030	$ -	$ 16,859,178	$ 25,320,208	42	31.50
070	CW	**Revenue Shortfall Excess Limitation**	Revenue Shortfall		$ -	$ (6,531,059)	$ (17,065,610)	$ (23,596,669)	-	-

Department of Human Services
2021-23 Policy Option Package

Division:	Aging and People with Disabilities
Program:	Oregon Deaf and Hard of Hearing Services
Policy package title:	Oregon Deaf and Hard of Hearing Services (ODHHS) Staffing and Accommodations Scheduling Resource Tool
Policy package number:	POP 101
Related legislation:	N/A

Summary statement: This Policy Package would significantly improve ODHHS' ability to address underserved Deaf and hard of hearing Oregonians and their families in a data-informed way, and to cultivate stronger ASL and captioning services statewide, bringing our Deaf and hard of hearing services closer to national standards.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$327,881**	**$0**	**$294,662**	**$622,542**	**3**	**2.64**

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

The current budget and staffing level of ODHHS doesn't equip us to:

- Coordinate ASL and captioning services for agencies and consumers in a timely, efficient manner due to lack of a scheduling tool

- Address the needs of Deaf and hard of hearing people with additional disabilities
- Accurately assess the number of Deaf and hard of hearing people in Oregon, let alone demographic information within these communities (e.g., age, race/ethnicity, language preferences, cultural self-identification, additional disabilities)

2. What would this policy package buy and how and when would it be implemented?

ODHHS would add staff and resources to:

- Allow agencies, consumers, and interpreters the ability to coordinate accommodation needs in a more efficient and timely manner through use of a scheduling tool. The scheduling tool would be set up to allow rapid scheduling, confirmation, and billing for language accommodation services.
- Provide, and develop capacity for, information, referral, and improvements in programs and services for Deaf and hard of hearing people with additional disabilities (OPA 2).
- Support all external ODHHS outreach, support for Advisory Committee functions, and logistical support for procurement of assistive technology and scheduling systems for communication access services (AS 2).
- Bring research and report writing expertise (RA 4) to assist in service equity planning and implementation.

3. How does this policy package further DHS's mission and align with its strategic plan?

This policy package aligns with the following:

- In the Office of Aging and People with Disabilities' Strategic Plan, short-term goal #4 under Service Equity;
- DHS' RiSE initiative of Meaningful Participation and Community Engagement to increase the capacity of services and deepen the Department's relationships with Oregon's Deaf and hard of hearing communities;

- The Governor's priority of Safe and Healthy Communities: building an infrastructure of services and supports for Oregonians who are Deaf and hard of hearing so they can live independently and with dignity, and opportunities exist to overcome barriers to full participation in social, economic, and civic life.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No

Quantifying results

5. How will DHS measure the success of this policy package?

DHS will measure the success of this policy package in the following ways:

- Increase in ODHHS' statewide pool of contracted ASL interpreters and real-time captioners due to time freed by the scheduling tool that will then be available for recruitment, retention, and contract development
- More accurate and reliable – and richer – information regarding the demographics of Oregon's Deaf and hard of hearing communities
- Increase in available contacts, information, and referral to better serve Deaf and hard of hearing people with additional disabilities
- Increased outreach with external partners and with our Advisory Committee to support more and larger projects and initiatives

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

It is not tied to any KPM, but it aligns with the vision and goals described in Question 3.

7. What are the long-term desired outcomes?

The long-term desired outcomes include:

- Greater ability to provide ASL and captioning accommodations to our consumers through more efficient scheduling and an expanded pool of providers. This may also have the virtue of encouraging more providers to come to Oregon to work and expand our ability to provide accommodations in underserved areas of the state.
- Greater capacity and resources to address the needs of Deaf and hard of hearing people who have additional disabilities. We would be better able to provide information and referral regarding Deaf-Blind services, or the needs of a Deaf person experiencing mental health issues, for example.
- Better understanding of the Deaf and hard of hearing populations in Oregon so we could better address unmet needs we do not yet know about, and to better document the extent of need for different services and programs. This would allow us to direct our attention more effectively to the greatest needs of our consumers.
- Greater ability to mount larger initiatives and projects in partnership with external advocates and organizations. By developing and leveraging these relationships, we could expand our impact more effectively and efficiently.

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded:

- We would continue to underserve State agencies that need ASL interpreters and real-time captioning to serve Deaf and hard of hearing people consumers, given the significant time required to coordinate accommodations without a scheduling tool

- The numbers and demographic characteristics of Deaf and hard of hearing people in Oregon would continue to be poorly understood, limiting our effectiveness to serve them
- We would continue to lack the capacity to serve Deaf and hard of hearing people who have additional disabilities
- We would remain limited in our ability to leverage potential partnerships with external advocates and organizations that could increase our capacity to serve Deaf and hard of hearing Oregonians

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Current staff rely on a 2016 Community Needs Assessment with significantly limited data collection, limiting its utility.
Research was completed on potential scheduling tools, but the process of choosing and implementing one was stalled by a set of hurdles and administrative/staff changes.

10. What alternatives were considered and what were the reasons for rejecting them?

The “alternative” to having a scheduling tool has been the current procedure. The reasons for rejecting the current procedure is that it is requires significant staff time for even the most straightforward scheduling assignment, doesn’t provide immediate and transparent access for consumers and providers in the scheduling process, and lends itself to staff error without careful coordination and training. A scheduling tool would significantly reduce staff time in scheduling, give consumers and providers the ability to update their own information and track assignments, and free our Accommodations Coordinator to increase our pool of providers and tend to other administrative aspects of accommodations.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

This POP will help state and local governments meet the needs of Deaf and hard or hearing citizens.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

No other agencies, programs, or stakeholders are collaborating on this policy package.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

This policy package will only help us address inequities in Deaf and hard of hearing Oregonians' efforts to achieve health, well-being and independence. It will help ODHHS better address the disparities in language access that affect Deaf and hard of hearing in all aspects of services and programs we offer. With a better understanding of the population we serve, we would be better equipped to address service gaps or impacts of the intersection of race/ethnicity, language and culture preferences about which we currently lack information. We would be better able to form the kinds of external partnerships that could significantly enhance our value as a resource for Deaf and hard of hearing Oregonians and their families to support them in achieving their goals.

Staffing and fiscal impact

Implementation date(s): _____

End date (if applicable): _____

15. What assumptions affect the pricing of this policy package?

The costs of ASL and captioning services that drive the overall cost of the scheduling tool will remain stable, and extensive, ongoing IT support won't be needed for the scheduling tool.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

This policy package would not create new responsibilities for DHS.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

There will be additional costs in shared services associated with the hiring of new staff (facilities, technology, HR, training, etc.), as well as IT support needed to set up the scheduling tool.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

This policy package will not make changes to client caseloads. It will result in long-term policy and program changes to make DHS services more responsive to Deaf and hard of hearing people with additional disabilities.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Existing positions would not be modified. New staff would include:

(1) An OPA2 – Deaf and Hard of Hearing with Additional Disabilities Specialist

(2) An RA4 – ODHHS Research Analyst

(3) An AS2 – ODHHS Administrative Specialist

20. What are the start-up and one-time costs?

Start-up costs would include the staff hours involved in developing the contract for the scheduling tool, and the costs of hiring and training the new staff.

21. What are the ongoing costs?

Ongoing costs would be mostly the salaries of the new staff that would be rolled into the APD budget.

22. What are the potential savings?

The potential cost savings include:

- The capacity to do research in-house to help inform and guide our work
- Significantly fewer hours of staff time devoted to complex and repetitive scheduling tasks
- Reduced need to rely on third-party interpreting agencies to fill gaps in our coverage of language accommodation needs

23. What are the sources of funding and the funding split for each one?

Response.

2021-23 Policy Option Package

Division:	APD
Program:	Design (APS)
Policy package title:	Community Abuse Determination Project
Policy package number:	POP 102
Related legislation:	HB2175 (2009), HB2442 (2009), HB 4084(2012), HB 4151 (2014)

Summary statement:

Significant legislative changes to increase safety of vulnerable Oregonians served by DHS Aging & People with Disabilities (APD) have been signed into law over the last ten years. In addition, internal audits and a DOJ memo outlined draft recommendations for DHS/APD procedural due process for persons substantiated in abuse investigations. DOJ and Internal Audits have highlighted critical weaknesses in APD's safety and protection system for Oregon's ever-growing vulnerable populations of older adults and adults with physical disabilities.

The investment of the resources necessary for APD to respond to these changes has not occurred. As a result, APD is currently not in compliance with multiple statutory requirements, DOJ and audit recommendations related to safety; and are not providing statutorily mandated levels of oversight to APS Specialists.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

Significant legislative changes intended to increase safety of the vulnerable Oregonians served by the Aging & People with Disabilities (APD) program have been signed into law over the last ten years, including HB 2175, HB 2442, HB 4084 and HB 4151. Internal audits have also highlighted critical weaknesses in APD's safety and protection system for Oregon's ever-growing vulnerable populations of older adults and adults with physical disabilities.

Unfortunately, the investment of the resources necessary to build the infrastructure required to address these changes has not occurred. As a result, the Department and APD are currently not in compliance with multiple statutory requirements and audit recommendations related to safety; are not keeping up with the rate of growth in protected populations; and are not providing statutorily mandated levels of training and oversight to a growing cohort of abuse investigators and protective service workers.

This gap has been recognized by many observers, including the Adult Safety Protection Team convened in 2011 by the former DHS Director, which contracted with national experts who determined the APD's central support services for APS were critically under-staffed and therefore unable to provide essential oversight services and technical assistance to workers serving vulnerable adults.

Specifically, this POP will provide staffing to partially meet the requirements of the following statutes and audit recommendations that affect the APD program.

HB 2175 and HB 2442 (2009 Session)

House Bills 2175 and 2442 created new authority, requirements and expectations for the Department's use of abuse history. Among other things, HB 2175 provided clear statutory authority for the Department to consider a person's abuse history when conducting a determination of their fitness for employment. HB 2442, among other things, required that the Department – when it has a record of substantiated abuse committed by an employee of a home health agency, in-home care agency, adult foster home or residential facility – notify the employer and the employee or potential employee of the substantiation, in writing.

Full implementation of these laws would have required APD to develop new infrastructure for the notification of substantiated perpetrators of findings and the provision of due process to perpetrators prior to the required sharing of their abuse information. Unfortunately, the resources necessary to complete the work required to comply with HB 2175 and 2442 were not allocated at passage, leaving the Department unable, to the present day, to complete the work required by law.

HB 4084 (2012 Session)

House Bill 4084 created new requirements and expectations for the investigation of abuse of vulnerable adults served by APD, including increased reporting to legislative groups studying elder abuse and the development of new training and continuing education curricula for persons who investigate reported abuse of older adults and adults with physical disabilities. Required areas of additional training included risk assessment, investigatory techniques, evidence gathering and report writing.

Full implementation of this law would have required additional investment in training and development resources, but unfortunately, the resources necessary to complete the work required to comply fully with HB 4084 were not allocated at passage, leaving the Department unable to fully complete the work required by law.

HB 4151 (2014 Session)

House Bill 4151 created additional new requirements and expectations for the investigation of abuse of vulnerable adults served by APD. Among other things it called for the creation of a statewide database of reports of abuse and required the Department to work toward standardization of procedures and protocols for receiving reports of abuse and investigating them. It also set new statutory timeframes for the completion of APD investigation reports.

The (2014) estimate for APD was a minimum requirement of 8 FTE to complete the work necessary to comply with HB 4151. Unfortunately, one position was provided at the passage of HB 4151, leaving APD unable to complete the work required by law.

DHS Internal Audit #12-013

Thousands of cases of substantiated abuse every year are not currently considered by the Department when determining an applicant's fitness for employment as a care provider. This is largely due to a lack of notification to substantiated perpetrators in APD's community APS cases, and the lack of opportunities for perpetrators to appeal substantiations before they are used in fitness determinations.

For this reason, DHS's Internal Audit #12-013 report dated April 7, 2014, recommended that APD notify substantiated perpetrators in Community APS cases formally of a substantiation and provide an opportunity to

contest the finding. Doing so would remove the barrier to considering that abuse history in fitness determinations and sharing it with others as required by law.

To meet this requirement, APD needs additional staff to review an estimated 2,300 substantiated abuse allegations from the estimated 10,250 APD community APS cases annually, excluding self-neglect. These cases are not currently reviewed by APD central office staff, therefore there are no notification and administrative review opportunities to perpetrators. An estimated 1,500 substantiated Community APS abuse investigations completed annually, are considered "Potentially Disqualifying" by the DHS/OHA Background Check Unit when conducting employment and provider screening.

To date, no additional staff have been allocated for this work, and it remains undone.

DOJ Memo August 2016

In August of 2016, DOJ issued an internal memo with draft recommendations for improving DHS procedural due process for persons substantiated in abuse investigations. The memo outlined (5) key areas that impact APD:

- Ensuring that APS rules clearly reflect the proper standard of proof, and investigators are trained on applying it properly;
- Ensuring that substantial, documented efforts are made to interview the alleged perpetrator;
- Providing adequate and timely notification of substantiations to alleged perpetrators, and offering opportunities to request administrative review;
- Delaying the use of substantiations in licensing or employment decisions until notice was provided and any review process was completed; and

• In the interim, allowing collateral attack of abuse substantiations in contested case hearings for SOQ sanctions if separate notice and review has not been provided initially for the underlying abuse finding.

From February to May 2017, a DHS cross-program workgroup met and developed a generic model for ensuring procedural due process to persons substantiated in DHS adult abuse investigations, including Aging & People with Disabilities (APD), Office of Developmental Disabilities Services (ODDS) and the Office of Training, Investigations & Safety (OTIS). APD the only program unable to implement this procedural model to-date.

Growth in Vulnerable Populations – and APD Program Staff that Serve Them

The demographic growth in populations considered 'at-risk' in statute is well-known, especially in the case of older adults eligible for protection by APD programs. In 2019, local APS offices received a total of 50,832 calls. APS Specialists are on trend to complete more than 10,000 investigations covering over 12,700 allegations of abuse in private homes and unregulated settings in 2019. In addition, they completed 35,000 intakes that did not result in formal investigations in private homes and unregulated settings in 2019.

2. What would this policy package buy and how and when would it be implemented?

This POP addresses a critical lack of compliance and capacity that will serve APS by:

- Providing the level of review and oversight of APD-related abuse screenings and investigations statewide that is required by statute but not occurring today;

- Ensuring that the Department's and APD's response to abuse is consistent and standardized as required by statute, rather than subject to wide variations across programs and populations as it is currently;
- Providing consistent, transparent and legally sufficient due process to Oregonians substantiated for abuse by APD, as required by statute but not provided today, to ensure that APD-related abuse history can be considered when the Department determines fitness for employment;
- Developing policy and protocols to ensure that APD-related abuse information is used and shared as required by statute within the Department and with state partners, providers and the public;
- Providing advanced training needed to ensure that program staff conduct objective, unbiased and legally sufficient investigations as required by statute;
- Ensuring quality assurance of the work conducted by program staff as required by statute, including development and analysis of performance metrics to ensure safety and the provision of sufficient internal controls to identify areas of risk before they become systemic or impact client safety;
- Providing the full range of policy development, technical assistance and operational support that is required by statute to APD program staff and contractors as they respond to ever-growing service needs.

As a step forward, the following (12) positions will enable APD to initiate this important work, improve the ability to address and support APD's core value of safety and ensure the Legislature's expectations are met.

In order to ensure that we meet basic level. legislative, audit and safety requirements, this request would support the following:

- Full compliance with Elder Abuse Audit #12-013.

- 100% central office review of <u>all substantiated</u> (non-self-neglect) Community APS investigations.
- Align with DOJ Recommendations and other Program areas to ensure Notification, Administrative Review and a final Order is provided to all substantiated AP's advising of outcome, rationale, next steps. Currently, APD is the <u>only program</u> in DHS out of compliance with this specific area of safety related business.
- Increase the ability for the state to use C-APS substantiations for employment screening, reduce the use of this system gap as a mitigating factor for AP's.
- Provide enhanced support to the delivery system (APD/AAA supervisors) who have limited time/expertise by providing a central review of substantiated abuse allegations and assuming responsibility for notification and due process for substantiated AP's.

    - All *substantiated-non self-neglect* C-APS abuse allegations (2,300 /year) receive central review.
    - All substantiated APs (2,300) receive preliminary notice of substantiation and offer of Central Office administrative review including telephone interview.
    - Final Orders Issued to all substantiated APs (2,300) explaining APS finding and judicial review available under ORS 183.484.

APD is respectfully requesting the following (12) permanent positions to accomplish this critical safety work:

(1) Principle Executive Manager (PEM-E) position-Supervisory

(2) Operations & Policy Analyst 3 Positions-MMN/Lead

These positions are needed to perform the statewide coordination and oversight necessary to ensure that over 12,700 allegations of abuse investigated by APD and AAA staff annually meet the requirements of HB 2175, HB 2442, HB 4084, HB 4151 and the recommendations of Audit #12-013, and to manage due process procedures (including petitions for reconsideration) for substantiated perpetrators.

These duties include the provision of advanced policy/legal analysis skills necessary to coordinate the formal notification, review process and administrative review of substantiated abuse findings for Community APS investigations. Lastly, these positions will address long overdue gaps in policy, procedure and administrative rule for APD programs and guide the process of revising and aligning them to meet the needs for consistency and sufficiency called for in HB 2175, HB 2442, HB 4084, HB 4151 and the recommendations of Audit #12-013.

Six (6) Program Analyst 2-Positions-MMN

Six full-time PA2 positions are needed to perform the individual review of substantiated APD community abuse investigations annually to ensure that the abuse investigations conducted and documented by APD and AAA staff meet the requirements of HB 2175, HB 2442, HB 4084, HB 4151 and the recommendations of Audit #12-013. This will involve extensive case-by-case review and follow-up with field staff to make necessary adjustments for compliance and legal sufficiency, as well as assisting with due process reviews and issues. Estimates include a review caseload of 375 cases per year.

Two (2) Administrative Specialist 2 Positions-MMN/Confidential

Two full-time AS2 positions are needed to provide the operational and administrative support needed to ensure that the required notifications and due process procedures for substantiated abuse findings are provided for

substantiated community abuse investigations conducted annually by APD and AAA staff, in accordance with the requirements of HB 2175, HB 2442, HB 4084, HB 4151 and the recommendations of Audit #12-013.

One (1) Training and Development Specialist (2) Position

One full-time TDS2 position is needed to provide training to ensure adequate notifications and due process procedures are followed and to meet the requirements of HB 2175, HB 2442, HB 4084, HB 4151 and the recommendations of Audit #12-013, and due process procedures (including petitions for reconsideration) for substantiated perpetrators. This includes the full range of advanced training needed to ensure that program staff conduct objective, unbiased and legally sufficient investigations as required by statute; and ensuring quality assurance of the work conducted by program staff as required by statute, including development and analysis of performance metrics to ensure safety and the provision of sufficient internal controls to identify areas of risk before they become systemic or impact client safety.

Total: 12 positions that will enable APD to initiate this important work, improve the ability to address and support APD's core value of safety and ensure the Legislature's expectations are met.

3. How does this policy package further DHS's mission and align with its strategic plan?

Doing so will directly address and support the Department and APD's core value of safety and ensure that the Legislature's expectations regarding the safety of Oregon's older adults and adults with physical disabilities are met. In addition, this POP is a direct link to the DHS/APD Fundamentals Map including key process and outcome measures that ensure our services are measurable and impactful.

DHS/APD Fundamental Map: Outcome measure O1 "Consumers are Safe."
DHS/APD Fundamentals Map: Key goals for Well-Being, Service Quality, Service Equity and Engagement.

DHS/APD Fundamentals Map: Core process OP4 “Providing Services & Protection.”

APD Strategic Plan:

APD Vision, Goals for well-being, accessibility, quality outcomes, service equity, engagement.
APD Strategic Goal #1: “Older adults and people with disabilities feel safe and experience their best quality of life.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

Yes, DHS Internal Audit #12-013. Thousands of Community APS cases of substantiated abuse every year are not currently considered by the Department when determining an applicant’s fitness for employment as a care provider. This is largely due to a lack of notification to substantiated perpetrators in APD’s community APS cases, and the lack of opportunities for perpetrators to appeal substantiations before they are used in fitness determinations.

To date, no additional staff have been allocated for this work, and it remains undone, even as the DHS/OHA Background Check Unit and other entities continue to use the APS findings as the basis for Fitness Determinations. This includes the Office of Child Care who is statutorily required to use C-APS findings to determine fitness for childcare providers.

Quantifying results

5. How will DHS measure the success of this policy package?

- Full compliance with Elder Abuse Audit #12-013.
- 100% central office review of <u>all substantiated</u> (non-self-neglect) Community APS investigations.

- Align with DOJ Recommendations and other Program areas to ensure Notification, Administrative Review and a final Order is provided to all substantiated AP's advising of outcome, rationale, next steps.
- Increase the ability for the state to use C-APS substantiations for employment screening, reduce the use of this system gap as a mitigating factor for AP's.
- Provide enhanced support to the delivery system (APD/AAA supervisors) who have limited time/expertise by providing a central review of substantiated abuse allegations and assuming responsibility for notification and due process for substantiated AP's.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

DHS/APD Fundamental Map: Outcome measure O1 "Consumers are Safe."
DHS/APD Fundamentals Map: Key goals for Well-Being, Service Quality, Service Equity and Engagement.
DHS/APD Fundamentals Map: Core process OP4 "Providing Services & Protection."

7. What are the long-term desired outcomes?

The long-term desired outcomes associated with this POP are to enable APD to initiate this important work, improve the ability to address and support APD's core value of safety and ensure the Legislature's expectations are met by:

- Providing the level of review and oversight of APD-related abuse screenings and investigations statewide that is required by statute but not occurring today;
- Ensuring that the Department's and APD's response to abuse is consistent and standardized as required by statute, rather than subject to wide variations across programs and populations as it is currently;

- Providing consistent, transparent and legally sufficient due process to Oregonians substantiated for abuse by APD, as required by statute but not provided today, to ensure that APD-related abuse history can be considered when the Department determines fitness for employment;
- Developing policy and protocols to ensure that APD-related abuse information is used and shared as required by statute within the Department and with state partners, providers and the public;
- Providing the full range of core competency and advanced training needed to ensure that program staff conduct objective, unbiased and legally sufficient investigations as required by statute;
- Ensuring quality assurance of the work conducted by program staff as required by statute, including development and analysis of performance metrics to ensure safety and the provision of sufficient internal controls to identify areas of risk before they become systemic or impact client safety;
- Providing the full range of policy development, technical assistance and operational support that is required by statute to APD program staff and contractors as they respond to ever-growing service needs.

In addition, long-term desired outcomes include a measurable improvement in Outcome and Process Measures as identified in the APD Fundamentals Map and Scorecard.

This policy package promotes the vision of "Safety, Health and Independence for all Oregonians" by increasing the visibility of this group of DHS consumers who experience abuse. With visibility, we create awareness and with awareness, we create prevention.

Lastly, there is a Cost of Abuse for this specific cohort of vulnerable adults:

• Elders who suffer even moderate abuse have a 300% higher risk of death when compared to elders who have not experienced any abuse (National Center on Elder Abuse).

• The annual cost of financial abuse or exploitation of older adults is more than $2.9 billion nationally (MetLife Study).

- Elder abuse victims are three times more likely to be admitted to a hospital for their injuries (Journal of American Medical Association).

- Elder abuse injuries are estimated to contribute more than $5.3 billion to the nation's annual health expenditures (Journal of American Medical Association).

- Freedom from abuse is critical to benefiting from services.

Without this policy package in place:

We lose the ability to fully measure how many Oregonians are at risk and/or being abused. This means we also lose the opportunity to intervene prior to crisis-level episodes of abuse and help victims and their families develop strategies to respond in a healthy way to the warning signs/risk factors of abuse and prevent the escalation/duration of abuse episodes.

8. What would be the adverse effects of not funding this policy package?

Overall, the risks are legislative/legal/safety/consumer based; all impacting our ability to keep vulnerable consumers safe, prevent mobility of perpetrator's in systems by sharing legally sufficient information with others who need it. In addition, APD is at risk by not being aware of the content of investigation reports in non-licensed settings. This is critical given the continued movement by APD to create more community based, non-licensed service delivery settings. A strong protection framework must be built for this system to remain viable, safe.

Specific risks:

- We have been out of compliance with multiple legislative mandates for more than a decade.
- We have been out of compliance with Audit 12-013 for more than 6 years.
- We are currently involved in a lawsuit and working with DOJ Trial Division involving a C-APS investigation and findings, filed in circuit court.
- We received a 2016 DOJ recommendation notifying us that our current process is risky and should consider not using C-APS abuse investigation findings for employment decisions until a process is in place.
- We currently have no system or process in place to review more than 10,073 C-APS investigation reports completed each year by field offices, by both state and AAA offices. The inability to review and determine the quality of investigations, findings and use of this information is an area of risk exposure for APD.
- Other entities such as Child Care Licensing are expanding the use of adult abuse reports for employee or Provider fitness determinations and are unaware this gap in our system exists.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Short-term mitigations have been to use limited types of abuse findings for employment screening purposes and applying the lack of due process as a mitigating factor. It was recommended that we discontinue this process that has been in place since the passage of HB2175 in the (2009) session when the law passed.

Other actions that have been taken to resolve this issue include training focused on investigation practice such as ensuring APS Specialists make multiple attempts to contact alleged perpetrators – in-person, by phone and by mail;

interview the alleged perpetrator in person, unless a deviation has been approved; be clear about the purpose of the interview with the alleged perpetrator, allowing them to respond to each specific abuse allegation and provide evidence in their support; explaining the investigative process and associated timeframes to alleged perpetrators and ensuring they provide contact information so the alleged perpetrator can ask questions or provide additional information.

APD advanced a Policy Option Package (#130) in 2018 to begin funding the work of centralized review, notification and administrative review of APS findings, but the requested funds were not included in the Governor's 2019-2021 budget.

Subsequently, in September of 2019, APD advanced a double-fill authorization within DHS, which was ultimately not approved due to budget constraints.

10. What alternatives were considered and what were the reasons for rejecting them?

- Delaying the use of abuse substantiations in licensing and employment decisions until a notice and a formal review process can be provided for substantiated abuse findings related to Community APS investigation reports.

This alternative is not feasible as it will not address the critical weaknesses in APD's safety and protection system highlighted by DOJ and the Internal Audits Division. As a result, without this POP, APD will continue to be out of compliance with multiple statutory requirements, DOJ and audit recommendations related to safety; and statutorily mandated levels of oversight to APS Specialists and their work.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No statute change or LC.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

This POP mainly affects APD Central and APD/AAA Field offices.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

From February to May 2017, a DHS cross-program workgroup met and developed a generic model for ensuring procedural due process to persons substantiated in DHS adult abuse investigations, including APD, DD and OTIS. In addition, a courtesy notification regarding this POP was provided to the Background Check Unit as they process abuse findings for DHS/APD.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

This POP will allow the Department to fully implement laws requiring standardization of practices across the state and across populations, leading to increased equity in the response to the abuse of different at-risk populations.

Staffing and fiscal impact

Implementation date(s): 10/01/2021

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

Assumptions such as a dramatic increase in the number of C-APS allegations of abuse that are substantiated, the impact of the pandemic (COVID-19) and enhancements to the Centralized Abuse Management (CAM) system may impact the pricing of this policy package.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

These responsibilities were previously required by legislation enacted over the last 10 years or per audit findings. The new responsibilities primarily impact the APD program and Background Check Unit.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Equipment, OIS and HR support will be needed for the positions associated with this POP. This includes an enhancement to the Centralized Abuse Management System (CAM) and CAM licenses for each employee.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Yes, this POP will require new staff as follows:

(1) Principle Executive Manager-E position, Supervisory, Permanent, 21 months
(2) Operations & Policy Analyst 3 positions, MMN/Lead, Permanent, 21 months
(1) Training & Development Specialist 2 position, Permanent, 21 months
(2) Administrative Specialist 2 position, MMN-Confidential, Permanent, 21 months
(6) Program Analyst 2 positions, MMN-Permanent, 21 months

Total: (12) additional staff to initiate compliance with legislative requirements and audit recommendations related to Safety of vulnerable adults.

20. What are the start-up and one-time costs?

Modification will be needed to the Centralized Abuse Management System to expand due process and coordinator review functionality for Community APS investigations; new materials and outreach and training will be covered by the positions that are requested as part of this POP.

21. What are the ongoing costs?

Budget to support the permanent costs of these positions. CAM licenses for each employee, increased costs for DOJ (review process/written materials, due process proceedings).

22. What are the potential savings?

Reduced risk to vulnerable adults by allowing APD to fully implement legislative expectations and audit findings related to safety of vulnerable adults.

23. What are the sources of funding and the funding split for each one?

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Department of Human Services
2021-23 Policy Option Package

Division:	The Office of Aging and People with Disabilities
Program:	Long Term Services and Supports
Policy package title:	Oregon Project Independence (OPI) Expansion and Family Caregiver Support
Policy package number:	POP 103
Related legislation:	N/A

Summary statement:

This policy package would create a stable and sustainable program to assist consumers who need a lighter amount of supports through an expanded Oregon Project Independence (OPI) program, as well as a program to support consumers receiving supports from unpaid or family caregivers, with the goal of helping these consumers remain independent while delaying or avoiding entry into the Medicaid long term services and supports system.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$5,125,392**	**$0**	**$43,834,709**	**$48,960,101**	**38**	**28.50**

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

While Oregon serves thousands of older adults and people with disabilities in its Medicaid long term services and supports program, there are fewer supports for consumers who need assistance with activities of daily living and who are not accessing Medicaid services. The proportion of Oregonians needing supports for activities of daily living will grow over the next 25 years. This policy package would create a stable and sustainable program to assist consumers who need a lighter amount of supports through an expanded Oregon Project Independence (OPI) program, as well as a program to support consumers receiving supports from unpaid or family caregivers. APD proposes to obtain federal matching funds for these programs through an 1115 Medicaid Demonstration project with the federal Centers for Medicare and Medicaid Services (CMS).

2. What would this policy package buy and how and when would it be implemented?

This policy package would enable the department to draw federal funds to expand the current OPI program to serve more consumers, as well as to create a new caregiver respite program to assist individuals who currently receive supports from family or other unpaid caregivers. Program elements include:

OPI:

Eligibility:

- Adults, aged 18 or over;
- Assessed as meeting Service Priority Level 1 through 18;
- Have income no greater than 400 percent of Federal Poverty Level, and assets no greater than the average cost of six months in a nursing facility;

- Reside in their own home;
- Do not receive Medicaid; and
- Are not subject to estate recovery.

Services:

The service package would reflect the current services offered in statute and rule for OPI, including case management, in home support and personal care services, adult day services, home delivered meals, assisted transportation, assistive technology, and other supports.
Additionally, approximately $5 million of OPI's current budget would be carved out and kept in its current form. The intent of this program would be as "Maintenance of Effort" funding with which to draw down federal Older Americans Act funds, and the program would serve individuals who might otherwise be ineligible (based on income, immigration status, or other criteria) from receiving services funded by federal matching dollars.

Family Caregiver Support:

Eligibility:

- Adults, aged 18 or over;
- Assessed as meeting Service Priority Level 1 through 18;
- Have income no greater than 400 percent of Federal Poverty Level, and assets no greater than the average cost of six months in a nursing facility;
- Reside in their own home;
- Do not receive Medicaid; and
- Are not subject to estate recovery.

Services:

Consumers would be eligible to receive services and supports totaling no more than $500 per month, and these services may include:

- In home support services or personal care services;
- Adult day services;
- Caregiver respite services;
- Emergency response systems;
- Special medical equipment and supplies;
- Supports for consumer direction;
- Assistive technology;
- Minor home modifications related to activities of daily living;
- Home delivered meals;
- Assisted transportation;
- Education and training for unpaid caregivers; and
- Supportive services, such as counseling, for consumers and their caregivers.

Once the department obtains federal approval of matching funds for this policy package, these programs would be administered jointly with the Office of Aging and People with Disabilities and the local Area Agencies on Aging (AAAs). APD would provide policy and administrative supports, as well as financial and service eligibility. Case management would be provided by the local AAAs.

3. How does this policy package further DHS's mission and align with its strategic plan?

This policy package aligns with the statutory mission for the Office of Aging and People with Disabilities in Oregon Revised Statutes, Chapter 410: that older adults and people with disabilities live with independence, choice, and dignity. Additionally, this policy package is aligned with:

- The Governor's policy priority of Healthy and Safe Communities: older adults and people with disabilities can live independently and with dignity, and where consumers have opportunities to overcome hardship and live their lives as they choose.
- The Office of Aging and People with Disabilities' Strategic Plan: this policy package is guided by two strategic goals of the Plan: Well-being (older adults and people with disabilities feel safe and experience their best quality of life) and Accessibility (Oregonians can readily and consistently access services and supports to meet their needs).

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS measure the success of this policy package?

DHS will measure the success of this policy package through internal and federal reporting that demonstrates consumers delaying or avoiding entry into Medicaid services. Measures include:

- Analysis of the cost per case of consumers in OPI and Family Caregiver Supports (FCS);
- Comparison of Medicaid caseload projections to actual Medicaid utilization after these programs are implemented;

- Consumer and caregiver satisfaction with the quality, timeliness, and individualized services received in the programs; and
- The slower growth of cost and utilization of Medicaid long term services over the period of these programs' operation.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

The policy package is tied to the following KPMs:

- KPM #10: The need for LTC services; and
- More indirectly, KPM #11: LTC recipients living outside of nursing facilities. This KPM is listed as an indirect tie under the assumption that for those consumers utilizing OPI and family caregiver services who may enter the Medicaid system, it would be highly likely that they would enter the system by getting services in their own home or in a community setting, and less likely in a nursing facility.

7. What are the long-term desired outcomes?

The long-term desired outcomes include:

- More older adults and people with disabilities having access to a limited package of services to maintain independence;
- Lower than projected growth of the utilization of Medicaid long term services and supports;
- Higher satisfaction with person-centered supports and services;
- More accessible and responsive services for historically underrepresented communities; and
- Overall lower than projected costs for the entire services and supports system for older adults and people with disabilities, as demand for these services will increase over the next 25 years.

8. What would be the adverse effects of not funding this policy package?

The adverse effects of not funding this policy package include:

- More consumers not getting light, preventative and limited services;
- Consumers accessing Medicaid at a point when they have the highest level of need;
- A higher number of consumers accessing Medicaid; and
- With a higher number of consumers and a higher than anticipated cost per case for services, a less sustainable system to serve the growing number of older adults and people with disabilities needing services over the next 25 years.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

In 1975, Oregon implemented the original OPI program to assist older adults age 60 and older, as well as individuals with dementia, with in-home services and case management so that these individuals would remain in their homes and avoid entering the Medicaid system. Over time, this program has faced instability because it is funded only by General Fund and is vulnerable to budget reductions. The resources for family caregivers are very limited and only available in limited quantity in Older Americans Act programs.

10. What alternatives were considered and what were the reasons for rejecting them?

The two alternatives to this policy package are to maintain the current level and system of services, or to reduce existing services. The latter alternative would be detrimental in having a system of services and supports in place to assist people at risk of entry into the Medicaid system. Maintaining the existing service level is inadequate to meet current needs (there are wait lists for OPI, for example), and the existing funding structure is highly vulnerable to budget cuts in the absence of federal matching funds. Further, without an

investment in preventative services as proposed in this policy package, Oregon will face much greater challenges in supporting older adults and people with disabilities over the next 25 years, and these consumers will be at risk of not receiving services until their need for support is at its highest level.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No. This policy package anticipates that the original OPI program will continue under its existing statute, with a level of funding sufficient to draw federal funds for Older Americans Act programs and to serve individuals otherwise not eligible for programs with federal matching funds.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

DHS will work with the Oregon Health Authority to obtain federal approval through CMS for matching funds for these two programs. Before Oregon applies for this federal match and throughout the 1115 Demonstration Waiver approval process, DHS will engage with its tribal partners on how these programs and services can serve tribal members across the state of Oregon. DHS will work with and co-administer the programs with the local AAAs.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

There is an advisory committee working with DHS and OHA on the proposal for the 1115 Demonstration Waiver to CMS. Advisory committee members include AAAs, providers, advocacy organizations for older adults and people with disabilities, and members of state commissions and local advisory committees for older adults and people with disabilities.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

This policy package helps populations impacted by inequities and disproportionalities. Communities of color, immigrant communities, and other historically underrepresented groups disproportionately access services in their own homes and with family caregivers in comparison to other demographic groups of older adults and people with disabilities. This policy package offers two programs that serve individuals in their own homes and supports people who have family and unpaid caregivers in their lives; it would be a set of programs that can be culturally responsive to the services that historically underrepresented groups are accessing, and perhaps increase accessibility to these services within these communities.

Staffing and fiscal impact

Implementation date(s): OPI – 1/1/2022; FCS – 7/1/2022

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

This policy packages assumes that there will be approximately 2,250 more consumers accessing OPI, and approximately 1,800 consumers accessing FCS. It assumes hiring 38 positions, or 28.50 FTE, consisting of central office staff, case managers, and eligibility workers.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

Yes, there will be new responsibilities to administer the work, and new workload for DHS eligibility staff to determine financial and service eligibility for the program. There will be new responsibilities of case

management for DHS's AAA partners, and these responsibilities are priced into the policy package for the staffing cost.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Yes, there will be responsibilities that include system changes to implement the new program and benefit, new costs associated with hiring new staff (HR, facilities, IT supports, etc.), and these are accounted for in the pricing of the policy package.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Not for existing programs. The estimates for caseloads in the new programs are provided in number 15, above.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

The pricing for the policy package assumed the following new staff:

- 26 Human Services Case Managers
- 9 Human Service Specialists 3
- 2 Operations and Policy Analysts 3
- 1 Training and Development Specialist 2

20. What are the start-up and one-time costs?

The startup and one-time costs include systems changes to implement and administer the eligibility for the program, adaptation of case management tools, if any, to meet the program requirements, and costs associated with hiring and training new staff in the positions.

21. What are the ongoing costs?

The ongoing costs include maintenance of current service level and staff and administrative support to keep the program running sustainably.

22. What are the potential savings?

In order to apply for an 1115 Medicaid Demonstration Waiver, the state needs to show that its proposed programs will save federal and state Medicaid dollars over a period of three to five years. This policy package assumes that by offering a lighter and limited package of services to individuals with some need for assistance, these individuals will avoid or delay entry into the Medicaid system. If the Demonstration is successful in its results, the cost of the policy package will be much less than the costs that the Medicaid program would bear in absence of these programs.

23. What are the sources of funding and the funding split for each one?

The sources of funding or General Fund and Federal Funds, and the funding split for each one is shown in the table below:

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$2,175,569	$0	$2,175,569	$4,351,138	38	28.50
Services & Supplies	$647,381		$647,039	$1,294,420

Department of Human Services
2021-23 Policy Option Package

Division:	Aging and People with Disabilities
Program:	Medicaid Long-Term Care Policy
Policy package title:	Reducing Loneliness and Social Isolation
Policy package number:	POP 104
Related legislation:	N/A

Summary statement:

Loneliness and isolation can be as harmful than smoking 15 cigarettes as day and lead to increased chronic disease and premature death. APD Medicaid in-home consumers are at disproportionate risk of isolation with between 6-14% reporting feeling isolated or alone. APD is seeking funding to provide new services to combat loneliness/isolation among APD in-home consumers and improve health.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$2,879,587**	**$0**	**$5,533,080**	**$8,412,667**	**2**	**1.92**

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

According to one study (Holt-Lundstad PLoS 2010), lacking social connectedness carries a risk equivalent to smoking up to 15 cigarettes per day, and is greater than alcohol abuse, physical inactivity (sedentary lifestyle), obesity and air pollution.

The UK has recognized the negative effects and has established a *Commission On Loneliness* and *Minister of Loneliness*.

Seniors and people with disabilities are at a disproportionally high risk of being lonely and socially isolated. In Oregon, according to the two 2016-2017 National Core Indicator Aging and People with disabilities survey between 34-43% of individuals receiving Medicaid live alone. Of all in home consumers 6%-14% report the "feel isolated from friends/family or feel lonely. Between 16% and 20% report they are not always able to see or talk to friends or family when they want. Loneliness and Social isolation and has been linked to a range of detrimental effects including**, depression, anxiety, early onset of dementia/Alzheimer's, increased chronic disease (including increased risk of cardiovascular disease), premature death, and lower quality of life.** Risk factors for social isolation include: Poor Health or Disability, gender (women), loss of spouse, living alone, reduced social networks, aging, transportation issues, and place (location) of residence. Costs to Medicare are estimated to be $134 more per person monthly ($1608) annually) when compared to people not socially isolated.

The Medicaid population served by APD typically has one or more of the risk factors for social isolation putting them at a higher risk than the general population. Since loneliness and social isolation disproportionately report lower incomes and having a debilitating health and/or mental health condition, communities of color are likely disproportionally affected leading to further inequities for those communities.

APD residential setting rules require meaningful activities, For example:

- Assisted Living Facilities and Residential Care Facilities the rules require:
  "A daily program of social and recreational activities that are based upon individual and group interests, physical, mental, and psychosocial needs, and creates opportunities for active participation in the community at large"

- Adult Foster homes require 6 hours a week of meaningful activities**.**

- Nursing Facilities require*, "Activities Program" means services offered to each resident that encourage the resident to participate in physical and mental exercises that are designed to maintain or improve physical and mental well-being and social skills.*

APD In-home program that serves 53% of consumers has no equivalent service or expectation leaving a majority of service recipients vulnerable to the negative effects of loneliness and isolation.

2. What would this policy package buy and how and when would it be implemented?

This policy package would purchase up to 3 additional hours a week for services such as transportation and cognitive support for accessing the broader community and decreasing isolation and loneliness. Eligibility for the services and actual numbers served would be determined by conducting the UCLA Loneliness Scale and individuals scoring 6-9 would be eligible for the 3 additional hours a week. 3 hours of allowed services would be combined for a total of 6 hours a week available for the targeted activities. This amount equals the activity amount available to APD consumers living in adult Foster Homes.

This policy would improve the quality of life of Medicaid in-home population, prevent the negative effects of social isolation and loneliness, and potentially reduce costs. Training would be developed and incorporated into APD practice. Current systems would be minimally modified to assess a document eligibility for services. It is anticipated that program training and system readiness for implementation of service could be achieved within 6-months to one year of approval.

3. How does this policy package further DHS's mission and align with its strategic plan?

Assisting lonely and socially isolated individuals become more integrated into their communities is at the heart of the APD Mission: Help Oregonians in their own communities achieve well-being and independence through opportunities that protect, empower, respect choice, and preserve dignity.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS measure the success of this policy package?

APD will use the annual NCI-AD survey to measure the effectiveness of this program.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

This POP I tied to all APD goals of Safety, Accessibility, Equity, Innovation, and Collaboration.

7. What are the long-term desired outcomes?

Equity of services for in-home consumers, lowered rates of loneliness and increased access to community, lowered incidence of depression, anxiety, early onset of dementia/Alzheimer's, increased chronic disease (including increased risk of cardiovascular disease), premature death, and increased quality of life. Greater independence maintained through better overall health and less cost shifting to medical system.

8. What would be the adverse effects of not funding this policy package?

Predicted adverse effects include the negative outcomes of increased depression and anxiety, early onset of dementia/Alzheimer's, increased chronic disease, premature death, and lower quality of life for Medicaid aging and people with disabilities. Continued suffering which could be prevented. Higher Medical and Service costs. Possible loss of Federal HCBS funding and risk of violating Omstead ruling (vulnerability to lawsuits). Continued increased costs shifted to Medicare.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Utilizing available community services such as telephone reassurance programs are not adequate and not available consistently statewide.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives within Medicaid are limited to approved services under this program.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Better health if achieved could lower need for other services.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

The Oregon Disability Commission, the Governor's Commission on Senior Services and the APD Tribal Navigators have been appraised of this initiative and are supportive.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

These populations are likely to experience one or more of the following risk factors; Poor Health or Disability, gender (women), loss of spouse, living alone, reduced social networks, aging, transportation issues, and place (location) of residence, potentially contributing to a disproportionate need for the proposed services.

Staffing and fiscal impact

Implementation date(s):	Positions effective 7/1/21 and 9/1/21 with direct services effective 7/1/22
End date (if applicable):	N/A

15. What assumptions affect the pricing of this policy package?

The department projects initial need of 14% of in-home population or 2,720 individuals. 12.9 hours a month x @ $18.94 (Wage and OPE) an hour x 12 months = $2,931 x 2,720 eligible individuals = $7,972,320 per year or $15,944,640 a biennium. The first biennium, 21-23, would cost $7,972,320 total funds for direct services due to 12-month implementation period in which there would be no direct service costs. This would be a $2,659,405 General fund cost and draw $5,312,915 federal funds at 33.36/66.64 match rate. In addition, staffing costs of $440,345 for 21-23 at a 50/50 match rate.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

APD Case Managers would have new assessment, planning, payment and monitoring responsibilities. Central office policy staff would have a new program to support and manage.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Shared services are projected to be minimally impacted.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No, this would be an additional service within existing caseloads.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

In order to support this program, APD is requesting an Operations & Policy Analyst 2, effective 7/1/21 and Training & Development Spec 2, effective 9/1/21.

What are the start-up and one-time costs?

Start-up cost is covered with the hiring of requested staff and will be ongoing with supporting the direct service operations. There are no one-time costs.

20. What are the ongoing costs?

Ongoing direct service costs with the current 21-23 caseload forecast is $15,944,640 per biennium. This will vary biennium to biennium as the In-Home caseload changes. $460,000 a biennium for staffing Policy/training

21. What are the potential savings?

Future service and medical savings are anticipated and could be realized by planned interventions but cannot be guaranteed. Due to new program not projecting cost savings that may not materialize.

22. What are the sources of funding and the funding split for each one?

Direct Services: General fund 33.36% Federal Medicaid Match 66.64%
Personal and S&S: General fund 50% Federal Admin Match 50%

Department of Human Services
2021-23 Policy Option Package

Division:	DHS Shared/Central Services
Program:	DHS Human Resources
Policy package title:	DHS Human Resources Staffing Stabilization
Policy package number:	POP 105
Related legislation:	N/A

Summary statement:

The purpose of this request is to create permanent positions for current staff working within the DHS HR Department in unfunded positions. As DHS is the largest state agency providing critical services to 1.5 million vulnerable Oregonians, DHS Programs must be able to recruit, select, retain and appropriately manage their human resources.

If this POP is not approved, DHS will be at significant risk for employment litigation, lack of staffing resources for DHS Programs and impacted services for Oregon's most vulnerable citizens.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$ 10,992,974**	**$0**	**$0**	**$10,992,974**	**40**	**39.50**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

- The DHS Office of Human Resources is only budgeted at about 50% of the level necessary to meet the minimum service requirements of the Agency. The use of double-fills, job rotations and temporary employees have been used to provide necessary human resource management support to critical DHS programs including Child Welfare, Self-Sufficiency Program, Adults and Persons with Disabilities, Vocational Rehabilitation and Individuals with Developmental Disabilities.
- HR industry standards generally support a ratio of one HR staff per 100 employees. (1:100). Currently, DHS HR, with its double-fills and job rotations is understaffed at a level of one HR staff member to 122 employees (1:122). The permanently budgeted resources of DHS HR only provide for one HR position for every 182 employees (1:182). Clearly this is not acceptable.
- this policy option package is a request for 43 FTE.

2. What would this policy package buy and how and when would it be implemented?

- The FTE provided in this policy package would allow DHS Human Resources to stabilize their Human Resources department to continue to provide services to DHS programs who serve 1.5 vulnerable Oregonians. The cost of this package is $10,992,322.

3. How does this policy package further DHS's mission and align with its strategic plan?

This policy option package is essential for DHS and will ensure stability within the agency and aligns with the DHS mission to continue to support the following:

- Support Governor Brown's policy priority on Healthy and Safe Communities are directly supported by the services the Office of Human Resources provides to staff who work with Oregon's most vulnerable populations. Specifically, when the clients we support can live independently and with dignity, have access to health care and the opportunity to overcome hardship.
- Supports Governor Brown's Office of Diversity, Equity and Inclusion /Affirmative Action by promoting the need and creating the opportunity for DHS to have a workforce that mirrors the communities they live in and that employee retention is improved.
- Supports the DHS Strategic Plan by providing the infrastructure for managers to hire, train and retain a diverse and qualified workforce. They are also fundamental elements related to HR in RiSE and other DHS initiatives.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No, this policy option package is not related to an audit.

Quantifying results

5. How will DHS measure the success of this policy package?

- HR will focus on the outcomes of performance measures outlined in question#6 on a quarterly basis.
- DHS will have a diverse workforce, that is hired in an expedient manner, onboarded appropriately and is retained in the agency.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

- DHS Office of Human Resources has a strategic plan to meet the Agency's operational and program priorities. DHS HR's priorities this biennium include:
    - Improving operational efficiency and effectiveness of recruitment, hiring and onboarding processes.
    - Design a performance management system that includes feedback, mentoring and coaching system to maximize retention and improve employee performance.
    - Develop meaningful workforce analytics to inform and support operational priorities across the agency and also evaluates HR services.
- DHS Performance metrics to report the percentage of DHS employees who: (1) identified in a "Minority Class", and (2) identified as "Disabled".
- DHS Performance metrics to report the percentage of employees that left DHS (voluntary or involuntary).
- DHS Performance metrics to report the percentage of DHS employees who promoted within DHS: (1) identified in a minority class and (2) identified as "Disabled".
- Each of these measures' ties to DHS's key goals as the DHS workforce is responsible to perform their jobs to protect Oregon's most vulnerable populations.

7. What are the long-term desired outcomes?

- Stabilization of Human Resources services and staff to serve the agency programs

- DHS relies on the Office of Human Resources to recruit, hire, train, and effectively manage workforce management issues.
- Effectively addresses employment litigation and labor disputes resulting from program operations.

8. What would be the adverse effects of not funding this policy package?

- The DHS Office of Human Resources has a critical role to provide multi-faceted services and support to vital agency programs. This POP will allow DHS to have a minimally staffed Human Resources Office to support DHS Programs. Each of these positions are vital. Without these positions the agency is exposed to significant enterprise risk and compromises the Agency's ability to deliver critical program services to Oregonians. Without these services DHS Program areas will be unable to recruit, retain and adequately manage its workforce

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

- The DHS Office of Human Resources has relied on job rotations, temporary employees and double-filling positions to meet the significant workload of an agency of 9,200 employees.

10. What alternatives were considered and what were the reasons for rejecting them?

- The alternative to this package is a larger package which would increase positions requests by 20%. This proposal meets minimum operating requirements for an agency.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

None

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Without approval, other state, tribal and/or local government agencies will be impacted as DHS HR will be unable to provide critical services, due to lack of staff, slowed recruitments, employment litigation and other service issues where program will be unable to partner and assist in providing services to Oregon's most vulnerable citizens.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

The office of Equity and Multi-Cultural Services collaborates with DHS Human Resources through technical assistance and planning.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

The DHS Office of Human Resources assists agency staff and programs addressing disproportionalities through:

- HR Classification and Compensation Unit establishes and maintain equitable compensation practices in accordance with Oregon law.

- HR Recruitment Unit facilitates and ensures equitable and non-discriminatory hiring practices throughout the agency.
- HR Labor and Employment unit supports managers to provide a non-discriminatory work environment and investigates cases of harassment and discrimination.
- HR Family and Medical Leave Unit ensures employees are provided legally entitled protected leave.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

The majority of these positions are currently on staff and have necessary equipment, supplies and facilities to perform their duties.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

This policy option package will provide the continuation of the current service level of human resources services to DHS Programs.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

The requested FTE already have equipment, supplies and facilities- there is no additional impact to Shared Services.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No direct impact

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

1 FTE	PEM H	HR Director	24 months	Permanent
1 FTE	PEM E	Recruitment Manager	24 months	Permanent

43 FTE				

20. What are the start-up and one-time costs?

Not Applicable

21. What are the ongoing costs?

None

22. What are the potential savings?

This policy option package will potentially save:

- Costs associated with decreasing turnover and strong retention with good human resources practices.
- Costs associated with managing disruptions in the workplace and mitigating associated losses in Program productivity.
- Costs associated with expensive employment litigation.
- Costs associated with fees paid to DOJ Labor & Employment for consultation.

23. What are the sources of funding and the funding split for each one?

Total for this policy package

Department of Human Services
2021-23 Policy Option Package

Division:	Central
Program:	Various
Policy package title:	Buy back Central Positions at Revised Funding Split
Policy package number:	POP 106
Related legislation:	N/A

Summary statement:

Several federal block/capped grants are used to fund positions and Services and Supplies in Central Services offices through cost allocation. These grants include TANF, SSBG, OCAN and VR Basic 110. The budget building process inflates the underlying costs for Personal Services each biennium due to step increases, COLAs, etc. This creates FF limitation without an actual revenue source for the portion related to block grants. To address this, there needs to be an adjustment of the budgeted fund split for positions in Central Services. Central Services Offices included in this POP proposal include DHS Director's Office, BPA, HR, OEMS, Public Affairs, ORRAI, and Program Integrity.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$662,964**	**$0**	**$0**	**$662,964**	**156**	**155.12**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

The budget building process inflates the underlying costs for Personal Services each biennium due to step increases, COLAs, etc. This creates FF limitation without an actual revenue source for the portion related to block grants. To address this, there needs to be an adjustment of the budgeted fund split for positions in Central Services.

2. What would this policy package buy and how and when would it be implemented?

This package would buy back and adjust the fund mix on 156 positions within Central Services Offices to account for empty federal fund limitation created through the budget build process.

3. How does this policy package further DHS's mission and align with its strategic plan?

This package would maintain CSL level positions to maintain Central office support for all DHS program areas. These positions are within the offices of DHS Director's Office, BPA, HR, OEMS, Public Affairs, ORRAI, and Program Integrity. These support DHS's equity work, staff recruitment and development, data analytics, program quality reviews, communication and public records response, budgeting and overall Department strategic leadership. Maintaining current service level in Central Office staff allows us to maintain our current ability to focus on maximizing the efficient delivery of services to support all Oregonians, particularly our most vulnerable.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS measure the success of this policy package?

Central Offices will be able to maintain current performance and service levels.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

7. What are the long-term desired outcomes?

8. What would be the adverse effects of not funding this policy package?

Positions will be eliminated and/or left vacant reducing work that can be done or increasing response timelines.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

A package 050 GF backfill for inflation on block/capped grants was requested through the exception process with DAS. This was denied. Therefore, a revenue shortfall has been created (package 070). If this buy-back POP is not approved, Central Services will be short actual revenue to fund positions. This would mean that positions would need to be held vacant longer or positions abolished, both of which would reduce the already limited supports that these offices could provide to programs, clients, providers and stakeholders. Central Offices are already woefully understaffed.

10. What alternatives were considered and what were the reasons for rejecting them?

None. If this buy-back POP is not approved, Central Services will be short actual revenue to fund positions. This would mean that positions would need to be held vacant longer or positions abolished, both of which would reduce the already limited supports that these offices could provide to programs, clients, providers and stakeholders. This was rejected because Central Offices are already woefully understaffed.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

They would be indirectly affected because if not funded, response timelines, etc. would be affected.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

This package would allow Central Offices to maintain staffing levels at CSL. This would maintain the status quo.

Staffing and fiscal impact

Implementation date(s): 7/1/2021

End date (if applicable): n/a

15. What assumptions affect the pricing of this policy package?

The revenue shortfall was calculated in Central Office package 070. This package buys back the affected positions with GF replacing the empty FF limitation.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

156 Positions (155.12 FTE) would be bought back at a revised fund mix.

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

Personal Services.

22. What are the potential savings?

None.

23. What are the sources of funding and the funding split for each one?

General Fund is needed to backfill revenue shortfall.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Division:	Director's Office and Self-Sufficiency
Program:	DHS Communications, Self-Sufficiency and Office of Equity and Multicultural Services
Policy package title:	Diversity, Equity and Inclusion
Policy package number:	POP 107
Related legislation:	N/A

Summary statement:

The purpose of this request is to advance equity initiatives that will result in more equitable, accessible service delivery to communities of color and historically disadvantaged groups. The four initiatives contained within this POP include: 1) Rebranding the agency to align the agency's image with our values, 2) Rebranding the Oregon Trail card (Electronic Benefit Transfer card) to achieve greater cultural sensitivity and mitigate stigma experienced by SNAP participants, 3) Investment in the Office of Development Disabilities Services to provide greater language access, and 4) Investment in the agency's Office of Equity and Multicultural Services to increase capacity for equity expertise and implementation of strategies.

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

At the core of its mission and values, the Department of Human Services believes that every human being deserves equitable access to health, safety, economic stability and participation in their communities. We are aware, now more than ever, that an individual's ability to experience these things is significantly influenced by the neighborhood they grew up in, their family's socioeconomic status, the color of their skin and other elements of systemic bias and inequity. Disparities shown in our data reflect systemic racism, historic injustice, and inequitable distribution of power and resources in Oregon communities. DHS has a responsibility to continue improving the state's responsiveness to communities of color and, by engaging and understanding the need will lead the creation of a clear action plan that addresses the root causes of disparities. The Department can positively influence these factors for millions of Oregonians, and this package seeks to make change in four concrete ways:

- Rebrand the agency to more closely align with mission and values and establish an inclusive name and acronym. Since its inception, the Department of Human Services has been known by Oregonians by the acronym DHS. However, in recent years, there has been increasing confusion among those we serve because the federal Department of Homeland Security is also known as DHS. This has become problematic as the federal agency has taken steps to make it more difficult for some residents, particularly immigrants, to access services (for example, the public charge rule). More recently, the Department of Homeland Security has had a strong presence in Portland, which has exacerbated the confusion. As a result, the Department of Human Services seeks to rebrand the agency, with the goal of developing a name and brand that more accurately reflects the department's values and gives Oregonians more comfort in coming to us for services. This Policy Option Package will fund that work and ensure we have the resources to conduct this work with equity at the center and to fully engage the community in the process.

- Rebrand the Oregon Trail Card. The current Oregon Trail Card features imagery that fails to uphold the dignity of Oregon's native people. Additionally, the distinctive graphics on the Oregon Trail Card set it visually apart from mainstream credit and debit cards, contributing to stigma experienced by persons on the SNAP program. The rebrand effort would achieve greater respect for native culture and would make the SNAP program more accessible for families in poverty.
- Office of Developmental Disabilities Services (ODDS) Language Access. Within existing capacity, ODDS is unable to provide enough language access supports and services to meet minimum requirements. ODDS is committed to its obligations under law, rule, and policy, in addition to its vision for an equitable system that is easy to use and navigate. In order to provide the necessary level of language access, an intentional resource investment is needed. This POP would advance service equity by reducing or eliminating language access barriers and increase communications that are designed specifically to reach people with intellectual and developmental disabilities.
- Invest in the Office of Equity and Multicultural Services (OEMS). As an agency of over 9,400 employees, the current Office of Equity and Multicultural Services (OEMS) holds only seven positions to support equitable service delivery across all our programs throughout the state. While the agency has an opportunity to engage in transformative work to eliminate long standing inequities and realize its mission of becoming a more equitable organization, the current capacity of OEMS is not enough to accomplish this. Investing in OEMS would equip us to address disparities with specific actions such as addressing:
    - Disproportionate over-representation of African American and Native American children in the foster care system
    - Disproportionate under-representation of employees of color and those with disabilities at all levels of the organization
    - A workforce which is not linguistically nor culturally agile
    - An absence of structures and systems which can ensure service equity for all the clients we serve

2. What would this policy package buy and how and when would it be implemented?

- **Agency and Oregon Trail Card Rebrand: $615,000 GF**
  - **Project Research and Rebranding: $350,000 GF**
    Project research would include both qualitative and quantitative research, including interviews, focus groups, and surveys with internal and external stakeholders. Rebranding work will include brand strategy, messaging, copywriting, and transcreation for diverse audiences. We will seek a contractor to work on both projects for efficiency.

  - **Collateral: $150,000**
    Once a new agency brand is established, the agency will need to change electronic and print materials, distribute materials to field offices throughout the state, and provide new signage for buildings.

  - **Community outreach: $100,000 GF**
    Once a new EBT brand is established, there will need to be updated Retailer signage and extensive community outreach to introduce the new identity for both the EBT card and the agency.

  - **EBT Card Vendor: $15,000 GF**

    There will be specific production costs associated with the EBT card vendor and there are specific costs associated with destroying the old cards for privacy and security reasons.

- **ODDS Language Access: $475,000 GF and $475,000 FF**
  - **Document and Content review and complete translations.** Complete inventory of ODDS forms, documents and web content that must be made available in required major languages. Complete translation of those materials using DHS and Program specific language glossaries. This work would include revision of existing translations to align with new glossaries.
  - **Reverse translations of case documents.** Provide reverse translation services of documents developed in languages other than English to Case Management Entities (CMEs) to ensure that those documents are also available in English for the purposes of continuity of supports, quality assurance, audit, and other administrative uses.
  - **Verbal interpretation.** Provide verbal interpretation supports for services delivered by CMEs to individuals with I/DD and their families.
  - **Alternate tools and materials.** Develop tools and materials for individuals who do not communicate using written or spoken language, who may not read and may require alternative and flexible means of receiving information in order to fully participate in all parts of the service system.
  - **Training.** Develop and deliver training for ODDS staff and contracted case management entities and service providers on requirements, timelines, and best practices in language access that align with state and federal law, rule, and policy, and the values of ODDS.

- **OEMS Investment:**
  - **OEMS Staff: $836,757 GF $18,370 OF and $728,439 FF or 1,583,566 TF**
    DHS proposes to double the staff dedicated to Diversity, Equity and inclusion work by adding 7 new positions (6.16 FTE) into OEMS:
    - 6 Service Equity Managers (OPA3) for each DHS program which includes, (Office of Developmental Disabilities, Office of Vocational Rehabilitation, Office of Self

Sufficiency Programs, Office of Aging and Peoples with Disabilities and Human Resources and Shared Services) to provide more capacity to implement a more holistic Diversity, Equity and Inclusion plan and provide a more definitive connection to DHS programs.

- 1 PEM E lead worker position to both assist the Director in the operations of OEMS but also to act as a lead over the analysts to ensure a coordinated approach to implementation of the plan. This will ensure that programs receive the support needed to understand the disparities within their program and build strategies to address them through equity plans, equity councils and tracking of data.

- **Employee Resource Groups: $450,000 GF**
  Employee Resource Groups (ERGs) are officially chartered groups that are organized around shared cultural identity(ies) to support historically underrepresented employees and/or underserved client populations. ERGs are employed as a diversity and inclusion best practice to leverage collective experiences, skills, and backgrounds that our most valuable resource, our employees, bring to work every day. Currently, DHS has nine active employee resources groups and this policy option page will allow for additional support toward their functions
- **Investment in Community Based Organizations: $1,500,000 GF**
  This investment into an Equitable Communities Fund would resource community-based organizations to do outreach, education and service navigation for communities of color, people with disabilities, LGBTQ+ communities, and other marginalized groups. DHS must engage differently than it currently does with these communities and their leaders. This Community Fund would meaningfully improve the agency's ability to provide culturally appropriate services and community events for outreach, listening, sharing and the diverse recruitment of staff. The Fund will also foster conversations and engagement with community through joint convenings with OHA/DHS leadership, engagement through the Governor's Office and correspondence with Urban League of Portland, the Communities of Color Coalition and many

other DHS stakeholders. This investment will also allow for development of community advisory councils and meaningful partnership between DHS and community to ensure a collaborative approach to our service delivery.

- **Training & Development: $500,000 GF**
  The ability of OEMS to provide training and development opportunities to its staff is imperative to advancement of equity and inclusion work. Access to State Equity Conferences and Equity, Diversity, Inclusion and Access (EDIA) related training is also critical to our mission of transformation. In addition, these funds will allow for delivery of training and development to our internal workforce and advance knowledge and expertise related to equity.

3. How does this policy package further DHS's mission and align with its strategic plan?

- Rebranding the agency will ensure the image we put out to the public aligns with our mission and values. It will also make the agency more approachable and accessible to communities of color, immigrant and refugee populations, and other historically disadvantaged groups.
- Rebranding the Oregon Trail Card will result in greater access to the SNAP program, decreased stigma for families in poverty, and greater respect for the dignity of Oregon's native people.
- Investing in OEMS will result in increased service equity for the individuals we serve by mitigating the impacts of systemic and structural inequity. Additional capacity within OEMS will allow for increased knowledge and expertise within agency programs, technical support in the development of service equity strategic plans, and capacity to invest in culturally responsive Community Based Organizations.
- Investing in Language Access within ODDS will ensure equal access and ability to engage in services for individuals who speak languages other than English, aligning with the agency's service equity goals.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

A 2018 internal assessment of DHS' efforts related to diversity, equity and inclusion found "DHS has not invested sufficiently in equity, diversity and inclusion efforts at every level of the organization… Underinvestment has created system-wide frustration due to the fact that need for support promoting and ensuring diversity and inclusion, as well as equitable access and outcomes, far outweigh the resources available to address those needs. Further, insufficient funding and staffing perpetuates a widespread conception of equity, diversity and inclusion work as 'extra' and not essential to daily human services work." This package directly addresses the historically insufficient investment in equity work and lays a foundation for systematic, strategic and coordinated work moving forward.

Quantifying results

5. How will DHS measure the success of this policy package?

DHS will measure the success of this policy package by:

- Consistently reviewing programmatic data both quantitative and qualitative.
- Reviewing Key Performance Measures to ensure that equity is foundational to program service delivery.
- Tracking community engagement efforts and participatory patterns to improve participation from partners.
- Tracking the deployment of Community Investment dollars and related outcomes.
- Measuring engagement of DHS staff in training and development opportunities relating to EDIA.
- Tracking ODDS data including:

  - Increase in number of individuals accessing interpretation services compared to baseline and in relation to individuals indicating language other than English as preferred option
  - Number of files where English is not the preferred language included in QA reviews
  - Completion of translation for ODDS forms and documents
  - Completion of tools for individuals who do not communicate using written or spoken language, who may not read and may require alternative and flexible means of receiving information
  - Representatives from all CMEs trained on language access requirements and process
- Monitoring race and ethnicity in DHS data sets over time to see if previously under-served populations are reached differently after rebranding is complete.
- Conduct a brand sentiment analysis among participants and stakeholders to evaluate any changes in brand resonance, particularly as it applies to a sense of inclusiveness.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

This package is tied to several Program Key Performance Measures. Through implementation of the DHS Management System, more measures are being reported by race and ethnicity to help uncover disparities that may exist.
These include:
#4 – Absence of repeat maltreatment of abused/neglected children (CW)
#5 – Timely reunification of foster children (CW)
#6 – Timely adoption once children are legally free (CW)
#7 – Disparity of foster youth achieving permanency (CW)
#8 – Children served by Child Welfare residing in parental home (CW)

#14 – Housing stability (SSP)
#15 – Food security (SSP)
#16 – Self-Efficacy (SSP)
#21 – DHS customer satisfaction

Two additional Child Welfare KPMs are being proposed for the 2021-23 biennium: reduction of race/ethnicity disparities in length of stay and reduction in disproportionality of children at entry into substitute care. In addition to KPMs, we have started reporting at DHS Quarterly Target Reviews on workforce diversity as well as promotions and turnover by race, ethnicity and disability status. The DHS management system and the measures on the scorecard will identify barriers and opportunities, inform action, and ultimately ensure we are being intentional and proactive about equity and inclusion.

7. What are the long-term desired outcomes?

The agency's vision is for every individual and community to have dignity, respect and the full measure of human rights. Long-term, accomplishing service equity means that an individual or family's group affiliation no longer determines their life outcomes, meaning all children, individuals and families experience economic stability, health, safety, and participation in their communities to an equal extent. Each of the initiatives in this package moves the agency closer to this goal.

The rebranding of key elements of the department like the EBT card and the agency's name will reduce the stigma currently attached to over 700,000 Oregonians who utilize program services through this card. Overall, the long-term outcome is to increase usage and participation of programs and services with low-income Oregonians to support their success. Currently there are many programs that use the DHS EBT card to deliver

program benefits, this includes programs like SNAP, TANF and most recently the Pandemic-EBT benefits for children.

8. What would be the adverse effects of not funding this policy package?

Continued under-investment in equity and inclusion work, particularly the initiatives included in this package, may result in:

- Barriers will persist connecting DHS' services and benefits to individuals who need them due to associations with the agency's branding.
- Individuals struggling with food insecurity will face continued barriers in accessing the SNAP program due to stigma. SNAP currently serves over 700,000 Oregonians with food benefits every month. Currently there are over 350,000 active SNAP EBT cards used every month.
- There are seasonal increases in the EBT usage when other programs like Summer EBT for Children and Pandemic-EBT programs are in action. Having a more generic card will allow greater flexibility of use for participants of these programs.
- Imagery on the Oregon Trail Card will cause continued damage to relationships with tribes and Native Americans in Oregon.
- Agency programs and staff will continue to have limited training, access to expertise and resources related to equity and inclusion work.
- OEMS will continue to be constrained in its ability to coordinate effective, cross-program equity and inclusion strategies.
- The agency may lose equity and inclusion expertise due to over-taxing staff and burnout.
- The agency will continue to lack resources to appropriately invest in culturally specific Community Based Organizations.

- ODDS will continue to be constrained in its ability to provide language access to all consumers, resulting in inequitable access and outcomes for non-English speakers.
- Consumers of agency services and benefits will continue to experience inequitable outcomes, further compounding the structural and systemic disadvantage they experience.
- The agency may face legal action for non-compliance with requirements and inequitable service delivery
- Potential loss of federal ODDS funding due to non-compliance with language access requirements

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OEMS Investments:

- The agency has used temporary stopgap measures such as rotations and Limited Duration positions to address equity expertise needs within OEMS. This is not a sustainable strategy, nor has it sufficiently addressed the need. Additionally, in the short term, limited funding has been allocated from OEMS' budget for ERGs and Training & Development functions, which is both limited and unsustainable.

ODDS Investments:

- State government and DHS has made strides towards improving language access:
  - Department of Administrative (DAS) services has engaged in bringing on-board translation and interpretation contracts with qualified vendors and making them available to state government agencies and some non-profit agencies that are registered with Oregon Cooperative Procurement Program (OrCPP). However, the ability for ODDS to fund access these contracts for all of our case management entities is limited by resources available and some CMEs do not have access to the DAS contracts since they are not a government entity or registered with OrCPP. Moreover,

current contracts with CMEs and the workload-based reimbursement structure does not include funding and clear requirements around verbal interpretation supports and reverse translation.
- DHS is currently in the process of developing glossaries of terms for the Department and each Program area, including ODDS. These glossaries will be translated into major languages to ensure that when translations are done, vendors use accurate and consistent terminology.

Oregon Trail Card Rebrand and Agency Rebrand:

- These are new initiatives. The Agency has taken steps to perform minimal rebranding free-of-cost, such as changing social media handles and releasing internal messaging.
- DHS has ensured that all rules with reference to the Oregon Trail Card have been altered to the more generic term of EBT card. This will ensure a smooth transition to any newly branded card.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives to Agency Rebrand:

- Continue forward with current agency branding. This option would promote continued misconceptions about the agency's work and challenges forming positive relationships with marginalized communities.

Alternatives to Oregon Trail Card Rebrand:

- Continue using current Oregon Trail Card branding. This option would result in continued negative impact on the agency's relationship with Oregon's tribes, negative perception of the SNAP program

among Native Oregonians, and experiences of stigma among all SNAP participants which acts as a barrier to SNAP access.

Alternatives to ODDS Language Access:

- See Question 9

Alternatives to OEMS Investments:

- Continue using non-budgeted positions to address staffing needs. This is an unsustainable practice that results in a lack of transparency in the agency's budget. Continuing to under-fund ERGs may result in lack of employee engagement, lack of feelings of support, and ultimately staff turnover.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Maybe. If the rebranding of the department results in a new name, statutes with the existing agency name would need to be updated.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Tribal governments will be positively impacted by the Oregon Trail Card rebranding. The current imagery depicted on the card does not uphold dignity and respect for Oregon's native people. Changing this imaging will allow for more positive relationship between the agency and the tribes and will aid positive perception of the SNAP program among Native Oregonians.

The rebranding of the Oregon Trail Card will also allow for greater flexibility in the usage of the card to meet the diverse program needs of participants in services that use the EBT card as the mechanism to receive benefits. This includes other programs like TANF, Summer EBT for Children (SEBTC) and Pandemic-EBT. This card is also used by the Department of Corrections (DOC) to connect prisoners back to services prior to release, including SNAP and any wages earned while they were incarcerated.

Rebranding of the Department of Human Services (DHS) would lessen confusion with the Department of Homeland Security, providing clarity to tribal governments and other government agencies that we partner with on programs and policies.

Increasing OEMS staff, along with staffing from the Office of Tribal Affairs in the Directors office, will have a positive impact on the cultural competency of DHS to serve tribal and other communities of color.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

This package entirely revolves around helping populations impacted by inequities and disproportionalities by supporting their health, well-being and independence. This will be accomplished by:

- Staff becoming more skilled and knowledgeable about equity and inclusion
- Staff having the tools they need to provide equitable, unbiased service delivery

- Programs having strategies in place to address structural inequity and technical support to implement them
- Staff feeling supported and engaged through participation in ERGs, including increased ability to effect change for marginalized groups within the agency.
- Consumers having access to information, forms, resources, and services in their native languages
- Oregonians using their SNAP benefits to address food insecurity without stigma
- Tribal members and Native Oregonians having their dignity upheld through the elimination of disrespectful imagery
- Community-Based Organizations and stakeholders having meaningful ways to create institutional accountability and create change in their communities
- Analysis of data through consistent incorporation of REAL+D (Race, Ethnicity, and Language + Disability) data at the forefront of our practice
- Oregonians perceiving the agency as a compassionate, supportive resource where they can receive equitable services

Staffing and fiscal impact

Implementation date(s):	July 1,2020
	One-time costs for Agency Rebrand: $500,000 GF and Oregon Trail Card Rebrand: $500,000
End date (if applicable):	GF – rest ongoing

15. What assumptions affect the pricing of this policy package?

- Staffing costs of 7 new staff
- Assumption that DHS will contract out the one-time funding for rebranding of EBT and Agency
- Employee Resource Groups (ERGs) are officially chartered groups that are organized around shared cultural identity(ies) to support historically underrepresented employees and/or underserved client populations. Funding to support the efforts of these Employee Equity groups is key in sustaining them.
- Investment in Community Based Organizations: This investment into an Equitable Communities Fund would resource community-based organizations to do outreach, education and service navigation for communities of color, people with disabilities, LGBTQ+ communities, and other marginalized groups.
- Training & Development: The ability of OEMS to provide training and development opportunities to its staff is imperative to advancement of equity and inclusion work.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No new responsibilities, however, this pop will help increase the OEMS presence and with the addition of the RiSE initiative keep racial inequities and other issues regarding marginalized populations at the forefront of DHS work. The goal is to imbed Diversity, Equity and Inclusion best practices within each position's duty, so Equity is not an "add on" but part of how DHS does business.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

May have some impact on Publications and Design Services a shared service housed in DHS and serving both DHS and OHA.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

OEMS and RiSE work will help address and remove disparities within the DHS systems and practices.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

DHS proposes to double the staff dedicated to Diversity, Equity and inclusion work by adding 7 new positions (6.16 FTE) into OEMS:

- 6 Service Equity Managers (OPA3) for each DHS program which includes, (Office of Child Welfare, Office of Developmental Disabilities, Office of Vocational Rehabilitation, Office of Self Sufficiency Programs, Office of Aging and Peoples with Disabilities and Human Resources and Shared Services) to provide more capacity to implement a more holistic Diversity, Equity and Inclusion plan and provide a more definitive connection to DHS programs.
- 1 PEM E lead worker position to both assist the manager in the operations of OEMS but also to act as a lead over the analysts to ensure a coordinated approach to implementation of the plan. This will ensure that programs receive the support needed to understand the disparities within their program and build strategies to address them through equity plans, equity councils and tracking of data.

Current OEMS staffing levels are not sufficient for an organization the size of DHS. Adding capacity will help improve DHS equity outcomes both internally and externally.

20. What are the start-up and one-time costs?

One-time costs for branding of EBT card and Agency.

21. What are the ongoing costs?

Staff
Training and development,
ERG investment,
Community investment

22. What are the potential savings?

Staff – if DHS can retain employees at a greater number there will be less downtime training new people.
Clients – if DHS can address disproportionality in CW the overall caseload is likely to drop leading to savings.
Other program may see savings, though if there are underserved populations that can be identified there may be increases in some programs.

23. What are the sources of funding and the funding split for each one?

OEMS is cost allocated to all appropriate funding sources within DHS. This involves GF, OF and a variety of FF grants.

Total for this policy package

Department of Human Services
2021-23 Policy Option Package

Division:	Director's Office
Program:	Volunteer Program
Policy package title:	Volunteer Program
Policy package number:	POP 109
Related legislation:	N/A

Summary statement:

The Volunteer Program engages individuals in our communities who want to donate their time to improve the lives of others. The Volunteer Program also provides on-the-job skills, training, and experience to individuals seeing to further their self-development and careers. Staff in the field lack the capacity to effectively work with volunteers. This POP would fund 16 Volunteer Coordinators and 1 Program Manager. If the POP is not funded, the outcomes for clients would be reduced because volunteers would not be available to supplement the work of staff, freeing them up to work with clients.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$3,139,462**	**$0**	**$0**	**$3,139,462**	**16**	**12.64**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

The Volunteer Program engages individuals in our communities who want to donate their time to improve the lives of others. The Volunteer Program also provides on-the-job skills, training, and experience to individuals seeing to further their self-development and careers. Staff in the field lack the capacity to effectively work with volunteers. Staff have many competing demands that become priority over volunteer coordination. The work of volunteer coordinators is determined and assigned at the local level by the District Manager. Volunteer coordination is primarily for Self-Sufficiency Programs and Child Welfare because those are the programs currently paying for the positions. Fully staffing the program would bring significant benefits to Oregonians. Benefits include an increase in the number of volunteer applicants, active volunteers, hours contributed, miles driven, volunteer coordination across program areas, and overall client service delivery.

2. What would this policy package buy and how and when would it be implemented?

This policy package would buy 16 volunteer coordinator positions (OPA2), reclassifying current Statewide Volunteer Coordinator to PEM E, and financial support for program activities including marketing, recruitment, and retention. These new positions would provide volunteer management, coordinate donations for the district, some events, and participate in strategic partnerships. Volunteer coordination would be for all five program areas.

In addition to funding for staff positions, we request:

- Marketing: $16,000
- Volunteer appreciation events: $16,000
- Database Management: $165,110

The program changes would be implemented in January 2022.

3. How does this policy package further DHS's mission and align with its strategic plan?

The mission of the Volunteer Program is to help achieve the goals and outcomes of DHS through integrating the work of state and community partners. The Volunteer Program reduces employee workload while improving client outcomes. The Volunteer Program supports the agency's strategic goals of community engagement and improving organizational image. As we welcome volunteers in our offices, we are engaging the community in the work of DHS and achieving greater outcomes together. Volunteers are goodwill ambassadors for the agency.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS measure the success of this policy package?

Outcome measures include tracking the number of volunteers, volunteer hours, miles driven, the total value of volunteer time, and the number of volunteers that have transitioned into part and full time DHS workers.

Specific measures include:

- Number of active volunteers statewide by district
- Number of volunteer hours contributed per month to DHS by district
- Number of miles being driven by volunteers

- Number of DHS staff assigned to volunteer programs by district
- Dollar value of volunteer labor
- Volunteer satisfaction
- Retention data
- Workload reduction as reported by staff
- Timeliness to onboard volunteers

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

No.

7. What are the long-term desired outcomes?

The program provides on-the-job skills, training and experience to individuals seeking to further career development opportunities, often culminating in employment with the agency. In many cases, volunteering has been the first step to a fulfilling career. In addition, volunteers reduce recruitment costs and increase employee retention.

Organizational image and community engagement can be enhanced through the inclusion of volunteers and community partners. Volunteers serve as good-will ambassadors for the agency. Utilizing volunteers increases staff capacity and are a valuable asset to organizational image and culture.

Investing in the Volunteer Program increases positive outcomes for DHS clients. The program offers an opportunity for local experts to be partners with DHS in the communities they live, providing a valued and irreplaceable resource for the children and families we serve.

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, the use of volunteers will dwindle as staff has little capacity to onboard and work with volunteers. Volunteer coordination is not a primary duty and other tasks take priority. The outcomes for clients would be reduced because volunteers would not be available to supplement the work of staff, freeing them up to work with clients.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

In 2008, DHS piloted a Volunteer Program expansion in six counties, resulting in a sharp increase in volunteer applicants, active volunteers and community partnerships. Data from the McKinsey organization identified a 180% net return on investment, leading to a volunteer initiative in 2009.

The 2009 investment in the Volunteer Program showed direct results, including an immediate gain of $2.55 million dollars in labor value. Data clearly shows an increase in total number of volunteers, volunteer hours, miles driven by volunteers, and the dollar value of volunteer time after agency investment in the program. The following year, volunteer service value rose to $6,589,351. In just two years, the value of volunteer labor had increased by $3.27 million dollars. Over the next several years, the value of volunteer labor continued to exceed $6 million dollars annually.

Year	Number of Volunteers	Hours	Miles	Hourly Value of Volunteers	Total Value of Volunteer Time
2008	711	186,043	2,177,356	$17.84	$3,319,010
2009	1219	317,855	2,391,999	$18.47	$5,870,784
2010	1252	349,567	2,971,836	$18.85	$6,589,351
2011	1277	323,464	3,373,603	$19.33	$6,252,562
2012	1137	305,490	3,547,026	$21.14	$6,458,068
2013	1024	289,676	3,295,742	$21.35	$6,184,590
2014	828	232,420	3,659,834	$21.99	$5,110,927
2015	725	196,757	3,148,830	$22.75	$4,476,235
2016	643	165,867	3,005,655	$24.15	$4,005,691
2017	590	175,398	3,101,975	$24.89	$4,365,675
2018	511	130,748	2,424,762	$25.40	$3,321,011

The initiative languished over the next decade due to a lack of investment and support. As agency support decreased, so did the number of volunteers, volunteer hours and the value of volunteer time, eventually returning to former levels.

Recently, the volunteer program participated in process mapping to review and streamline our processes.

10. What alternatives were considered and what were the reasons for rejecting them?

We have tried using volunteers to supplement staff for managing the volunteer program in the field. This is untenable as volunteers cannot perform the same functions as staff and volunteers are typically only serving part-time.

We considered creating the positions, but that would require double fills.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

No other state, tribal, and/or local government agencies would be affected by this policy package.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

No other agencies, programs or stakeholders are collaborating on this policy package.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

Volunteer coordinators are gatekeepers at DHS and as such have the responsibility to ensure policies and practices support populations impacted by inequities or disproportionalities. If this policy package is funded, efforts will be made to recruit volunteers from these populations. This will provide work experience for those that need it, as well as provide new perspectives for the agency. By recruiting a diverse group of volunteers, the agency will be able to provide more culturally responsive services.

Staffing and fiscal impact

Implementation date(s): January 1, 2022

End date (if applicable): _____

15. What assumptions affect the pricing of this policy package?

Positions will be Central Office positions stationed in the field.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

This work is being performed already, though in a diminished capacity. This policy package provides for dedicated volunteer coordinators to fully support the Volunteer Program. This policy package asks for 16 OPA2 Volunteer Coordinators to perform volunteer management and other duties; reclassifying the OPA3 Statewide Volunteer Coordinator to a PEM E Program Manager, and a budget for the database, marketing, recruitment, and retention.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

These will be Central Office positions stationed in the field. Support from Shared Services includes OIS support for computers and phones. No additional funding should be necessary to support these new positions.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

If the policy package is funded, staff will have more time to focus on client caseloads as we will have more volunteers. Services provided to population groups will be improved.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

- Reclassify OPA3 Statewide Volunteer Coordinator to PEM E Program Manager; permanent position; 24 months
- Hire 16 OPA2 Volunteer Coordinators; permanent positions; 24 months

20. What are the start-up and one-time costs?

Not applicable.

21. What are the ongoing costs?

- Permanent Positions (1 PEM E, 16 OPA2)
- Volunteer Database $165,110/biennium
- Marketing $16,000/biennium
- Appreciation Events/Retention $16,000/biennium

22. What are the potential savings?

It's anticipated that program investment in 16 districts will initially and conservatively realize 20% higher returns than the 2009 initiative piloted in 6 districts. The projected volunteer value over five years is $40,749,617. Breakdown per year is:

- 2022 -$7,044,940 – 20% increase from 2009
- 2023-$7,819,884 – 11% increase from 2022
- 2024-$8,210,878 – 5% increase from 2023

- 2025-$8,621,422 – 5% increase from 2024
- 2026-$9,052,493 - 5% increase from 2025

23. What are the sources of funding and the funding split for each one?

100% General Fund.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Department of Human Services
2021-23 Policy Option Package

Division:	Child Welfare
Program:	Treatment Services
Policy package title:	BRS OWI Update Package
Policy package number:	POP 110
Related legislation:	N/A

Summary statement:

Update Child Welfare BRS rate model with the most current salary information available from the Oregon Employment Department as part of regular budget build processes. Because the Employment Department Oregon wage information (OWI) becomes available in June each year, the agency proposes to use the average annual growth rate to account for anticipated OWI increases in the 21-23 biennium.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	$3,102,604	$0	$3,049,627	$6,152,231	0	0.00

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

DHS (and OYA) are proposing to address a timing issue with the updating of Oregon wage information (OWI) in the building of rates in the BRS rate model. The rates paid to BRS providers part of CSL is based upon 2020 OWI information; when the 2021-23 biennium begins in July 2021, the wage data used to build rates will already be out-of-date. With average salaries increasing by approximately 3.25% per year over the last several years, it is easy to see how the budget cycle can quickly become out of alignment with the current job market. The result of this is that the providers (often not-for-profit organizations) may be forced to pay the staff working with Oregon's most traumatized and behaviorally difficult youth at rates below industry and local standards. This also means that BRS service providers can become reliant on additional sources of income to support their operational costs, placing the services themselves in jeopardy when those other funding sources are withdrawn. While all providers find it difficult to hire and retain staff when the BRS rates are based on wages that do not reflect the current reality, new entrants into service provision become essentially blocked when the rates do not support competitive salaries. Established providers can supplement BRS payments with other community support, but we cannot expect new providers to be able to generate such support for services that have no track record, regardless how well-intentioned they may be.

For the 2021-23 biennium, this policy option package intends to use the most current data available, determine the annual average growth rate over a biennium and use that growth rate to determine the 21-23 BRS rates. This leads to a 6.5% increase in wages for classifications within the BRS Rate model for 21-23 and more accurately reflect wages actually paid to BRS staff in the 21-23 biennium.

2. What would this policy package buy and how and when would it be implemented?

This package would update the BRS rate model with current wage data and estimated future wage data, allowing providers to recruit and retain qualified staff. Implementation date is July 2021.

3. How does this policy package further DHS's mission and align with its strategic plan?

An array of residential and proctor-care BRS services is critical to meet the needs of children/youth committed to the Department. Without appropriate levels of compensation, providers will increasingly become unable to recruit, train, and retain a workforce needed to treat and supervise these children.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

5. How will DHS measure the success of this policy package?

Ample supply of residential treatment capacity to meet the needs of children/youth within the state of Oregon.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

No.

7. What are the long-term desired outcomes?

Stable BRS residential/proctor care system that has capacity to match youth treatment need with available resources.

8. What would be the adverse effects of not funding this policy package?

Providers being unable to recruit staff in BRS programs. In many cases, BRS providers would not be able to remain in business, dramatically reducing capacity for DHS children. The Department will find it necessary to try to locate service providers out of state.

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Legislators in the 2020 short session were supportive of re-timing of how OWI information is incorporated into the BRS rate model, but the session ended without final action.

10. What alternatives were considered and what were the reasons for rejecting them?

None.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Oregon Youth Authority and county juvenile departments that participate in the BRS program.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Oregon Youth Authority, Oregon Alliance of Children's Programs, Oregon Health Authority, Oregon juvenile departments.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

Staffing and fiscal impact

Implementation date(s): July 2021

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

The weighted 11-year average annual growth rate, using the Employment Department Oregon Wage Information (OWI) reports, shows an overall biennial 6.5% increase in salaries of pertinent position classifications. These estimate wages were used to calculate the rate increases for each level of care within residential treatment program.

The pricing is for 24-months.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

None.

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

This package assumes the increase will become part of continuing service level.

22. What are the potential savings?

Maintaining and expanding in-state capacity may have a positive impact on the number (and costs) of children placed in out-of-state programs.

23. What are the sources of funding and the funding split for each one?

General Fund, Federal Funds (Title IV-E, Title XIX).

Department of Human Services
2021-23 Policy Option Package

Division:	Child Welfare
Program:	Training
Policy package title:	Increase Child Welfare Training Capacity
Policy package number:	POP 111
Related legislation:	N/A

Summary statement:

Increase Child Welfare Internal Training and Workforce Development Capacity in accordance with recommendations made by Alvarez Marsal under Executive Order 19-03. Recommendations included increased staff and resources to provide improved in-field supports, transfer of learning, advanced supervisor training, and accountability for training and workforce development. Capacity would take the form of additional positions and fiscal resources necessary to enhance Instructional Design, Training Delivery, Quality Assurance, Data Analysis, and Performance Evaluation of our workforce as they navigate their respective training paths. In addition, a comprehensive framework will be developed to inform clear paths to proficiency, competency, and expertise through formal instruction, field training, ongoing professional development, and promotional opportunities. These combined efforts will increase retention and the skills of our workforce.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$992,924**	**$-**	**$2,978,570**	**$3,971,510**	**19**	**16.72**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

DHS is proposing to enhance the current Child Welfare Training Unit to provide additional staff to address a deficit in Child Welfare's internal organic capacity in design, deliver, evaluation, and oversight of training received by Child Welfare Staff. The training unit is currently made up of 7 staff, 3 of which are limited duration positions that end June 30th, 2020. In its current state, the Training Unit only has the capacity for budget, contract, and training administration, with limited ability to provide direct training support. This has resulted in a reliance on external contract or fee-for-service providers to deliver training for Child Welfare staff. Staff and Managers at Central Office and in the Field have routinely reported that these training offerings are not sufficient in effectively preparing Child Welfare Staff for their conducting the work, as is evidenced by Internal Fidelity Reviews, Child & Family Services Reviews(CFSR), Secretary of State(SOS) Audit, and other practice evaluations.

2. What would this policy package buy and how and when would it be implemented?

This package would build out the Child Welfare Training Unit to include the following staff: Training & Workforce Development Manager(PEM-E), Training Program Assistant Manager(PEM-D), Curriculum Lead(OPA3), Instructional Technologist(OPA3), Instructional Designer x2 (OPA3), Budget & Contracts Specialist(OPA3), Training Administration & Operations Specialist(OPA3), Child Welfare Trainers x12 (TDS2), Communications Specialist (OPA2), and Training Support Specialist (AS2), as well as the requisite operational budget to support ongoing training.

Due to the high priority need of increased training and retention, this package would be implemented immediately. Additional staff would be hired, trained on existing curricula, and begin work on developing enhancements to initial, basic, and advanced training offerings for all Child Welfare Staff.

3. How does this policy package further DHS's mission and align with its strategic plan?

This enhanced training capability will provide an additional tool to Child Welfare Staff and Leadership in effectively engaging with and meeting the needs of Oregon Families. This increased competency will lead to a higher rate of confidence in the Child Welfare Workforce, which will result in increased retention.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

This package supports recommendations made by the Alvarez & Marsal in accordance with Executive Order 19-03 delivered by Governor Kate Brown. In addition, fidelity reviews and needs assessments conducted by DHS/Child Welfare, Secretary of State of Oregon, and the Children's Bureau have concluded that many of the deficiencies observed in audited casework are the result of inadequate training and workforce support.

Quantifying results

5. How will DHS measure the success of this policy package?

The success of this policy package will be measured through Staff Retention, Fidelity Reviews, and Customer Engagement reviews. Evaluative tools will be developed to assess knowledge and skills, as well as customer surveys to identify additional training needs.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

No.

7. What are the long-term desired outcomes?

Long-term desired outcomes of an enhanced Training Unit would include: A comprehensive training experience for Child Welfare staff in any classification, delivered in a multi-layered training system. A confident and competent workforce who receive regular ongoing trainings designed to provide them with the mastery necessary to effectively execute their duties. An increase in staff retention, customer approval, and staff advancement through promotion or rotational opportunities.

8. What would be the adverse effects of not funding this policy package?

Fidelity reviews and audits will continue to receive negative reports. Child Welfare would be reliant on external organizations to provide the initial and ongoing training to staff. Outcomes for children in the care of DHS/Child Welfare would not improve.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Legislators met in 2020 during short session and were supportive of increased resourcing to Child Welfare Training, but the session ended without final action.

10. What alternatives were considered and what were the reasons for rejecting them?

None.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Tribal Child Welfare Organizations, Oregon Youth Authority, OTIS, and other State, County, and City organizations with ties to Child Safety would be welcome to attend trainings developed by DHS/Child Welfare.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

One of the key tenets of the Training Unit strategic plan is to infuse Diversity, Equity, Inclusion, and Ability into all learning experiences. Enhancement of the Child Welfare Training Unit will increase the number of these learning opportunities offered to Child Welfare Staff, further supporting populations impacted by these inequities including clients, communities, and coworkers.

Staffing and fiscal impact

Implementation date(s): July 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

None.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

19 total new positions would be needed to implement this policy package. 1 Principal Executive/Manager D(PEM-D), 5 additional Operations and Policy Analyst 3(OPA3), 12 additional Training and Development Specialist 2(TDS2), 1 additional Operations and Policy Analyst 2(OPA2).

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

Staff and operating expenses for the Child Welfare Training Unit would be ongoing.

22. What are the potential savings?

Direct savings could be identified in the reduction of contract training provided by fee-for-service and contract providers. Indirect savings would be experienced as retention increases and the reduced costs of hiring and initial training.

23. What are the sources of funding and the funding split for each one?

General Fund(25%), Federal Funds(75%).

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Department of Human Services
2021-23 Policy Option Package

Division:	Child Welfare
Program:	Foster Care & Youth Transitions
Policy package title:	Independent Living Program
Policy package number:	POP 112
Related legislation:	N/A

Summary statement:

This POP seeks to expand the Independent Living Program (ILP) and youth transition services through a tiered level of ILP services, and an expanded age range of youth to be served, to improve outcomes for youth in their young adulthood. This will be achieved by:

- Implement a tiered level of ILP service provision, providing monthly service rates based on the youth's identified needs (four tiers).
- Expanding services to begin serving 14 – 15-year-olds and 21 – 22-year-olds (currently, contracted ILP services are limited to 16 – 20-year-olds).

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$8,162,104**	**$0**	**$0**	**$8,162,104**	**2**	**1.76**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

The State lacks the funding to fully implement the Chafee Independent Living Program (ILP) services and adequately compensate contracted providers for services. Several of the community providers/contractors have informed the Department that the costs associated with offering ILP services are greater than the contracted budget amount provided. Often these organizations are underwriting the true costs of ILP services with private fund-raising or other means within their larger organization, this is no longer sustainable. Recently, organizations have decided to stop providing ILP Services due to the low contract amount. Additional Contractors are letting us know that they, too, may close their programs due to insufficient funding. The following factors are impacting the contractors' ability to continue as a service provider at the current rates:

- Community organizations have been underwriting ILP contracts for a long time, and the private donation community is not as stable as it once was, particularly in light of COVID-19.
- State Minimum wage increases directly impact these programs as most of the frontline staff earn just above the minimum wage and programs must increase their pay as well.
- Increased program requirements by DHS and program changes in ILP over the past five years with minimal increase in compensation.
    - Youth Engagement Services – ongoing re-assessments of youth progress and service plans
    - Increased documentation and reporting due to increased contract expectations.

It should be noted that federal funding has decrease over the last few years because it is a capped grant based on a national methodology of the number of youths in foster care. As the foster care population increases in other states, Oregon receives a smaller share.

2. What would this policy package buy and how and when would it be implemented?

1. Stability of Community Contracted Providers: By providing adequate funding and allowing Child Welfare to provide payment based on the youth's identified needs, ILP resources could be better targeted. Four (4) tiers have been identified as listed below and are based on level of need and intensity of services. Several providers have been able to demonstrate their costs are closer to $300 per month for traditional ILP services (Tier 2); DHS currently provides $200 per month per youth for traditional ILP services. Using the Tiered system, funds would be targeted as follows:

a) Tier 1 ages 14 – 15/16: skills training provided primarily in a group setting, focusing on Stage I awareness and social development, with introduction to goal setting and planning),
b) Tier 2 ages 16 – 20: traditional ILP services focusing on Stage II life skills development and comprehensive transition planning,
c) Tier 3 ages 16 – 20: more intensive services targeting youth with high needs and multiple system involvement, focusing on Stage II life skills development and comprehensive transition planning with an emphasis on developing internal assets,
d) Tier 4 ages 21 – 22: Stage III transition support as needed; supporting youth with transition to adult system services and supports (education, employment maintenance/career planning, health care, etc.).
e) Increase community contractor staff recruitment and retention with higher salaries.
f) **Calculations** to provide adequate funding to community service providers:
    a. Tier 1 ILP Life Skills Services (618 youth eligible in a given month, anticipate serving 60%):
        i. Current Rate: service doesn't currently exist
        ii. New Rate: $200 X 370 youth = $74,000 per month X 12 = $888,000
        iii. Difference: $888,000 increase needed per year, **or $1,776,000 for the biennium**
    b. Tier 2 ILP Life Skills Services (2,268 eligible in a given month, current & former foster youth):
        i. Current Rate: $200/mo. X 890 youth = $178,000 per month X 12 = $2,136,000
        ii. New Rate: $300 X 890 youth = $267,000 per month X 12 = $3,204,000

iii. Difference: $1,068,000 increase needed per year, **or $2,136,000 for the biennium**

c. Tier 3 ILP Life Skills Services: (15% of eligible current foster youth in a given month):
   i. Current Rate: service doesn't currently exist
   ii. New Rate: $500 X 205 youth = $102,500 per month X 12 = $1,230,000
   iii. Difference: $1,230,000 increase needed per year, **or $2,460,000 for the biennium**
d. Tier 4 ILP Life Skills Services:
   i. Current Rate: service doesn't currently exist (anticipate serving 20% of eligible population)
   ii. New Rate: $200 X 156 youth = $31,200 per month X 12 = $374,400
e. Difference: $374,400 increase needed per year, **or $748,800 for the biennium**
f. Youth Engagement Services Calculation:
   i. Tier 1: Current rates: not currently served (initial + 50% updated every 6 months)
   ii. New Rate: $100 X 526 youth X 1.5 = $78,900
   iii. Difference: $78,900 increase per year, **or $157,800 per biennium**.
g. ILP Discretionary Funds:
   i. Current Rate: $100,000 per year
   ii. New Rate: $200,000 per year
   iii. Difference: $100,000 increase needed per year, **or $200,000 for the biennium**
h. Chafee Housing:
   i. Current Rate: $75,000 per year
   ii. New Rate: $250,000 per year
   iii. Difference: $175,000 increase needed per year, **or $350,000 for the biennium**

Overall service increase request: $3,914,300 per year **or $7,828,600 per biennium**.

3. How does this policy package further DHS's mission and align with its strategic plan?

The support requested will assist young adults transitioning out of foster care to live as independently as possible and minimize the need to access the adult welfare system.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS measure the success of this policy package?

DHS partners with PSU to track and report outcomes achieved as reported by the National Youth in Transition Database. Success will be measured by the number of youths completing secondary education, enrolling in postsecondary education and obtaining employment as outlined in the performance measures indicated in question 6 below.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

The above requests are tied to the DHS Performance Measures as follows:

- Item 12A: Needs assessment and services to children.
  - Chafee ILP Key Activity/Intervention 1: Improve youth engagement in the life skills assessment process.
  - Chafee ILP Key Activity/Intervention 2: Ensure appropriate services are available.

- Item 13: Child involvement in case planning.
  - Chafee ILP Key Activity/Intervention: Improve youth engagement in the transition planning process.
- Item 16: Education needs of the child.
  - Chafee ILP Key Activity/Intervention: Improve foster youth preparation for high school completion and pre-college/career readiness.
- Item 31: Agency Responsiveness to the Community

7. What are the long-term desired outcomes?

8. Stabilize funding available to assist current and eligible former foster youth with a successful transition to adulthood. Minimize the need of former foster youth to rely on the adult welfare system, lower incarceration rates among former foster youth, increase completion rates for both secondary and postsecondary education, and increase wages for former foster youth. Minimize the number of former foster youth who become homeless following foster care. Minimize the number of young adults in foster care who become coded as "Missing/Runaway" in OR-Kids following their 18th birthday. Minimize the number of individuals in youth and adult homelessness programs whom have foster care history.

9. What would be the adverse effects of not funding this policy package?

DHS may not be able to find community partners willing to contract for needed independent living services. Current and former foster youth will not have access to culturally and linguistically appropriate needed life skills and comprehensive transition planning. Former foster youth will have increased need for resources and supports from the adult welfare system or adult corrections system. In order to maintain community providers, the DHS must move to increase the rate of pay to for ILP services as indicated above. To stabilize the ILP

Provider community, the Department will need to increase ILP Provider rates for traditional ILP services (tier 2) to $300. With no increase in state funds, this rate increase will result in 297 current and former foster youth (ages 16 through 20) having their ILP life skills training service closed. DHS will not have assistance needed for crafting federally required transition plans with those 325 youths, or any new teens entering foster care, further exacerbating the Department's lack of compliance in this area.

How achieved

10. What actions have occurred to resolve the issue prior to requesting a policy package?

In 2014, due to high demand and limited funding, DHS adjusted the minimum age of youth to be served from 14 to 16 years. This adjustment was made to ensure youth most in need of services received services. This eliminated the wait lists that existed. However, it did not provide the funding needed to meet the service provision costs incurred by community service providers. The elimination of 14- and 15-year-olds from the ILP service population has also resulted in a decline in compliance with state and federal requirements to assist 14- and 15-year-olds craft a comprehensive transition plan. The Department has increased the contracted amounts as much as possible given the Federal Grant and State General Funds available per year. The last increase for Independent Life Skills Training was in November 2015, when the rate increased from $155 per youth to $200 per youth. This was prior to the minimum wage increases passed into law. Youth Engagement Services were added to the contracts in January 2016 in an effort to incentivize timely completion of life skills assessments and transition planning. This has increased the number of transition plans completed for youth ages 16 and older; however, comprehensive transition plans for youth ages 14 – 15 have significantly declined since the minimum age of contracted life skills services was raised to age 16 (in 2014). Assisting foster youth to craft a transition plan, beginning at age 14, if a federal requirement and best practice for assisting youth to be prepared for a successful transition to adulthood.

11. What alternatives were considered and what were the reasons for rejecting them?

The Department conducted several pilots to determine the best model for serving the younger teen population. A tiered model for ILP services was created. However, due to lack of funding, the Department was not able to implement the tiered model. However, the model called for a lower rate of pay for the Youth Engagement Services, in anticipation of an increase in the overall monthly ILP service rate. While the increase did not occur, the decrease for Youth Engagement Services was implemented.

12. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

13. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

The nine federally recognized Tribes in Oregon have few older teens in foster care. Tribal foster youth would have increased access to ILP services if the age was lowered to 14 for contracted ILP life skills services. Allowing younger youth (ages 14 – 15) to access culturally and linguistically appropriate and LGBTQ affirming Independent Living Program (ILP) services enables providers to improve youth engagement. Younger youth are more willing to engage in services. This will allow providers to help teens fill in gaps in basic life skills and be better prepared for the more intensive training needed at ages 16 and older. If Independent Living Program services can be extended through age 22 (services end on 23rd birthday), youth and young adults will have access to a resource for assistance with problem solving and funding to assist with emergency needs, which can often derail a young adult's efforts to be self-sufficient. This should result in less young adults needing to access the adult welfare supports through the Self

Sufficiency Program Office (SNAP, TANF, etc.). Post-secondary completion rates would increase, allowing young adults to find a career providing a living wage.

14. What other agencies, programs or stakeholders are collaborating on this policy package?

Our Children Oregon/Oregon Foster Youth Connection (OFYC)
New Avenues for Youth
Institute for Youth Success
Inn Home for Boys
Neighborhood Economic Development Corporation (NEDCO)
Polk Youth Services
Independent Living Program Contractors (18 across the state)
FosterClub, Inc.

15. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

Funding is needed to stabilize and increase the number of culturally-agile, linguistically appropriate, and LGBTQ+ affirming Independent Living Programs available to foster youth between the ages of 14 and 23. Increasing the congruency of community providers with populations served will increase the likelihood that all foster youth in Oregon, including youth in Tribal foster care, will experience a successful transition to adulthood.

Staffing and fiscal impact

Implementation date(s): July 1, 2020

End date (if applicable): n/a

16. What assumptions affect the pricing of this policy package?

The ILP assumes 60 percent of eligible 14 – 20-year-olds will be served in a given month. This would result in approximately 80 percent of eligible youth receiving ILP services over time. The ILP also assumes 3.5 percent of former foster youth ages 21 – 22 would return for ILP assistance as young adults.

17. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

New responsibilities would fall on the Foster Care and Youth Transitions Unit at Central Office. The young adults returning for voluntary ILP services would be served as "Admin Only" cases and assigned to the Youth Transitions team staff at Central office. These staff will connect with youth and make a referral for ILP services. It is also anticipated the workload for validating invoices would increase. This would be an added workload for the Central Office youth Transitions team. It is also anticipated that more young adults would access Chafee housing. Resulting in a workload increase to the Youth Transitions team, who review monthly budgets and enter the housing payments in OR-Kids.

18. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

There will be minimal impact. ILP services would need to have the service age ranges updated in OR-Kids, the case management system.

19. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Yes. New service populations: Approximately 60 percent of 14 – 15-year-olds in foster care (370 youth) will receive life skills training services and approximately 15 percent of the former foster youth ages 21 - 22 (156 young adults) will receive life skills training and emergency financial support (if necessary). No increase in caseload to the field is anticipated as the model for serving the 21 – 22-year-olds will be considered "after care services," which will not require a DHS caseworker be assigned the case. The ILP contracts will be adjusted to include "after care services."

20. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

The community providers will need to increase staffing to accommodate the new populations to be served. DHS will need to receive two additional FTE (AS1 and PA1). Increased service entries, invoice validation lines, and Monthly Service and Progress Report entry, as well as increased Chafee Housing services and budget processing will require additional staff.

21. What are the start-up and one-time costs?

None. A model is already created and ILP Providers have already created plans for implementation.

22. What are the ongoing costs?

The increase rates and additional staff will be on-going costs to the state and program.

23. What are the potential savings?

This is difficult to calculate. The cost savings comes from eliminating the need for young adults who leave the foster care system to rely on the adult welfare system for supports. By expanding the age range for ILP and youth transitions services, you are investing in a successful, tax paying, and contributing member of society.

24. What are the sources of funding and the funding split for each one?

The services noted here can be paid for using the IV-E Chafee Independent Living Federal Grant, but this is a capped grant and all funding is currently utilized. Therefore, this policy option package is priced at 100% General Fund.

Total for this policy package

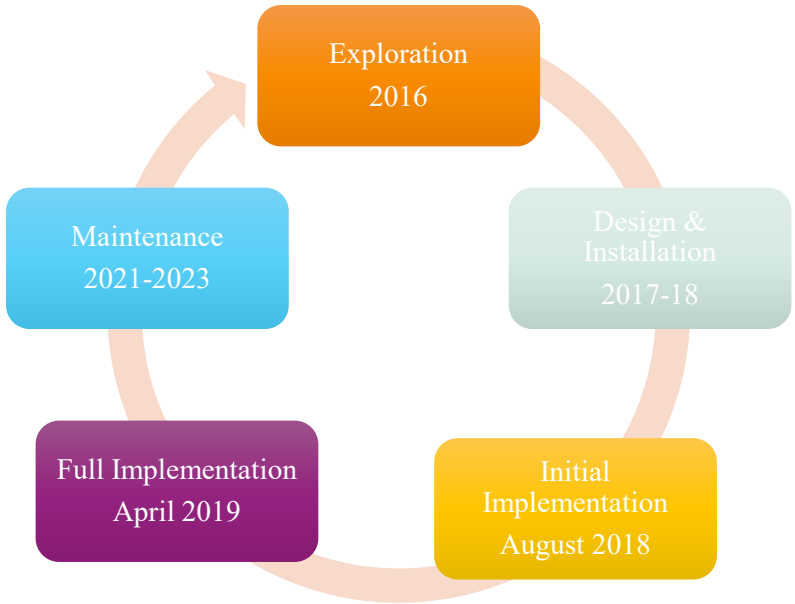
Department of Human Services
2021-23 Policy Option Package

Division:	Department of Human Services
Program:	Office of Child Welfare Programs
Policy package title:	Oregon Child Abuse Hotline (ORCAH)
Policy package number:	POP 113
Related legislation:	N/A

Summary statement:



Centralized screening of child abuse currently exists in half of all child welfare programs in the U.S. Research has proven its effectiveness in improving consistency in screening decisions and increased training opportunities for screeners to build a specialized expertise.

Screening is the front door of the Child Welfare system for all mandated and non-mandated reporters of child abuse in Oregon. It is imperative that screeners apply Oregon Revised Statute 419B.005 accurately to each allegation of abuse and determine when the department is required to investigate.

In the last two years, Oregon Child Welfare transitioned from fifteen regional child abuse hotlines to one centralized system known as the Oregon Child Abuse Hotline (ORCAH). With full implementation underway and the

intent to further stabilize our workforce by a solid understanding of the workload, this POP would support the ongoing operation of a single, stand-alone, 24 hours a day, 7 days a week child abuse hotline and an evolving screening program.

Oregon's timeline for implementation of centralized screening and ORCAH includes:

Enhanced training, decision-making and data-informed tools, a single leadership structure that includes training and continuous quality assurance processes all support increased accuracy and reduced bias in screening

decisions. In addition, it affords opportunities for performance management and quality assurance which increase the ability of the Department to provide consistent practice and customer service while reporting data internally and externally.

Department of Human Services
21-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

Prior to centralization, Oregon Child Welfare did not have statewide data available to understand the volume of calls and police reports received by the fifteen regional child abuse hotlines across the state. With initial implementation to full implementation, ORCAH has been tracking all calls and police reports received and on average, Child Welfare receives 15,000 contacts (calls and police reports) a month from mandated and non-mandated reporters. These contacts generate approximately 7000 screening reports documented by screeners monthly. Statute requires all 7000 reports be cross reported to the appropriate Law Enforcement Agency (LEA) jurisdiction. This POP would provide for the additional Hotline staff needed to operate 24 hours a day, 7 days a week, both operationally and programmatically. This POP requests funding for necessary positions within our operation and adequate training and continuous quality improvement infrastructure for the screening program.

Although ORCAH has made significant progress in building a centralized hotline and are seeing improvements each month, ORCAH continues to face challenges that hinder our ability to be responsive to the reporters and families ORCAH serves. Some of which include:

- Over 1,500 (16%) callers per month hang up waiting for us to answer their calls. Each of these calls represents a child at risk. While ORCAH staff are unable to compare this volume to pre-centralization call volume due to the lack of call data, CW does know that this represents an increase in documented reports of abuse or children at risk by 13% since prior to centralization. ORCAH had anticipated up to 10% increase. The program expects this number to increase 3-5% each year as has been the case since 2012.
- ORCAH has hired over 70% new workforce since July of 2018. Many of ORCAH staff come from other DHS divisions or outside the organization, each with their way of working. There has not been an easy way to identify best practices and share them broadly within the ORCAH team.

- CW Program has heard that ORCAH staff need to know how they are doing and how to make the best screening decisions for optimal outcomes. Adequate ongoing training and continuous quality improvement programs are needed to provide leaders the ability to provide strategic and objective feedback.

Staffing:

ORCAH requires adequate staffing to ensure management of an unknown volume of contacts on any given day. The goal with a centralized system was to serve Oregonians 24/7/365 in their efforts to keep children safe by reporting child abuse.

The screening program is operationalized by ORCAH and requires a leadership structure that includes a manager, program managers, supervisors, SSS1s, office specialists, office managers, consultants/analysts and an OR-Kids trainer to support the sustainability of the centralized hotline. These positions focus on statewide change management strategies regarding rules, procedures, engagement with community partners and full integration in Child Welfare across all programs.

There have been significant challenges with the implementation of a centralized hotline and understanding the workload associated. As ORCAH built the operation from the ground up, ORCAH transitioned vacant positions from fifteen regional hotlines, all of which were allocated positions based on a Monday-Friday, 8 am to 5 pm structure. ORCAH experienced delays in hiring and onboarding additional positions allocated in the 19-21 session and experienced an increase in volume that was not anticipated. The program found a significant imbalance of incoming reports to staff resources, resulting in long wait times for callers and callers abandoning their call.

Department of Human Services
21-23 Policy Option Package

SCREENING WORKLOAD MODEL

In 2019, the workload model was adjusted to account for the significant body of work associated with screening reports however was not updated to account for a 24/7 operation, all calls received at the hotline, case notes generated when a screening report is not required on an open case or assessment or reports that are duplicative/ deleted. We are working with OARRI to have a Workload Model specific to the screening work. Our work is unique from other positions within Child Welfare and our staffing allocation needs to be directly associated to the work that we are doing. Performance management, CQI and Openscape status will assist is data reporting. This has stalled due to other priorities. ORRAI is partnering with ORCAH to update the model for 21-23 however is not available to date.

The screening workload model states that 100% staffing includes 155.53 FTE for screening reports generated, not all calls and police reports received. Current allocation has ORCAH at 129.5 FTE, which is 83% of current workload model.

- Application in Oregon: Continue to utilize the current model standard of 561 completed screenings per year per SSS1/Screener. **Currently, screeners are averaging 20 contacts a week, which is double the standard.**
- Data based on a time study completed many years ago resulted in a workload model that assumes it takes, on average, 137 minutes to complete one report - Assign/Closed at Screening (CAS). **With centralization, this has decreased to an average of 33 minutes to complete a case note, 80 for a CAS and 84 for an assigned report to CPS.**

This POP provides for additional screening positions to increase the staffing level during high peak hours, 2-9pm that are within the earned positions identified above and are within the 19-21 workload model.

Training:

Screening is a discreet function that is independent of the CPS assessment and requires autonomy in decision making. Prior to centralization, training for screeners and supervisors, decision-making tools and CQI processes were inadequate and inconsistently applied across the state. There was little specific training available for screeners or their supervisors. A more robust, formalized training, for business staff, screeners and supervisors, has emerged as a critical need. Screeners, screening supervisors, and program managers of the Hotline will receive a comprehensive training, that includes application of Oregon Safety Model at screening, screening procedure, guidelines and various tools including the adoption of an equity lens to assist with decision-making.

The Screening Training Academy was developed in partnership with Action for Child Protection, Portland State University and multiple Child Welfare programs through a subcommittee process as a part of implementation. Consultants were trained by Action for Child Protection in the delivery of the curriculum. The academy includes both classroom training and technology training. The goal of the academy is to train all screeners and screening supervisors to the same practice standards regardless of their experience in order to provide safety, consistency and customer service.

Classroom training focuses on customer service, types of calls, selecting accurate allegations of abuse, trauma-informed practice, use of data analytics, use of information collection across the six domains of family functioning, decision making that is consistently based upon the same criteria for every report, and documentation. Technology Training focuses on the use of multiple systems to include Oregon's State-Automated-Child-Welfare-Information-System, OR-Kids. Additionally, screeners are introduced to relevant web-based sites and business protocols. The training focuses on enhancing the screener's use of diligent search practice and transitions to how and what to narrate in a screening report.

Department of Human Services
21-23 Policy Option Package

Screening Training Academy replaces Essential Elements for newly hired screeners and supplements it for experienced screeners and experienced Child Welfare caseworkers who transferred to screening. It consists of 12 modules of classroom training plus the technology training for a full ten days of training. Screeners and supervisors were trained in cohorts of 8 to 25. Screening supervisors were introduced to the curriculum in January of 2019 and Screening Training Academy began in in February of 2019 and requires an ongoing, sustainable training plan for all new staff hired.

The Training and Retention Unit is responsible for the orientation, onboarding, coaching, training and retention of all Oregon Child Abuse Hotline Screeners, as well as, training in the community. This will involve high performance team coordination, staff development, decision making, and customer service. Duties include:

- Support screeners in achieving tasks and screening work efficiently and provide direction to procedures
- Support screeners by reviewing work and providing feedback
- Provide informal assessment of workers' performance to the supervisor
- Provides mandatory reporter trainings in the community
- Assist Training Supervisor with ongoing educational trainings provided to hotline staff
- Provide and/or participate in onboarding and orientation of new staff describing policies and office procedures and introducing new staff to ORCAH staff.
- Provides ongoing coaching, training, and mentoring to experienced Screeners
- Trains Screeners through creating and documenting screening reports from police reports
- Models calls for Screeners to enhance training
- Observe and listen to Screeners taking calls to provide coaching
- Monitor Screeners written work and workload to independence
- Serve as conduit for communication between Child Welfare field staff and the Oregon Child Abuse Hotline

- Observe, document and communicate new Screener proficiencies to the Lead Screener's Supervisor and the new Screener's Supervisor
- Continue to receive, evaluate, and screen reports of child abuse
- At times the Lead Screener will need to be flexible with their work schedule to train Screeners in a 24/7 facility
- At times the Lead Screener will be required to travel, work varied hours and may have occasional overnight stays to complete community trainings
- Develop or assist in office programs or events to enhance employee retention
- Maintain a high level of technical knowledge around ORKIDS, DHR, Accurint, OVERS and other systems to provide training
- Maintain a high level of knowledge around the Oregon Safety Model, the 6 domains, Present and Impending Danger, and report formatting to provide training
- Maintain a high level of knowledge around engagement skills and customer service to provide training
- Maintain a high level of knowledge around Child Welfare policy and procedure to provide training
- Articulate knowledge of screening while working as a team to enhance training
- Attend and engage regular Training and Retention Unit meetings
- Partner with Continuous Quality Assurance Unit

This POP would fund the Training and Retention Unit and will also allowing opportunities for advanced training, ongoing training and coaching that supports the foundational training of Academy that includes a variety of topics that assist with assessing child abuse at the screening stage of the child abuse intervention process.

Continuous Quality Improvement & Data Analysis:

Screening program and ORCAH require a formalized Continuous Quality Improvement program, based on National research and models, that is unique to Oregon and creates a workplace culture that encourages ongoing

learning and development. Use of call center software (Openscape) helps capture data in real time for management of call volume and flow. Utilization of a screening predictive analytics tool that will assist in decision making and ensures that Oregon is serving the right families.

The development of a Continuous Quality Improvement (CQI)/Quality Assurance (QA) process began during the design stage of centralization. One of the seven sub-committees was tasked with development of CQI/QA framework, metrics and tools. In December 2018, the ORCAH Feedback email box was put into use and managed to understand challenges, barriers and trends. Data reporting began also in December. It quickly became apparent that a robust CQI/QA program would require permanent support. ORCAH leadership determined at that time to create a small CQI/QA unit.

The Continuous Quality Improvement unit is responsible for creating and maintaining processes that strive to create constantly improving quality at ORCAH. It involves data-informed decision making and improvement strategies. The following activities are the responsibilities of the CQI Unit and include whom within the unit is responsible for them:

- Performance Management
    - Maintain and update CARE Cards using Excel workbooks
    - Conduct calibration and validation of the data for CARE cards
    - Provide monthly CARE cards to Supervisors and Leadership
    - Analyze data and results from CARE cards and provide recommendations to ORCAH Leadership regarding goals
    - Engage in change management communication regarding performance management
- QA reviews
    - Develop and maintain Report Quality Assurance Review Tools

  - Review of a statistically significant sample of written screening reports every week using interpretation of law, rule/procedure and protocol.
  - Develop and update Call Quality Assurance review tools
  - Review of a sample of live calls for customer service, time management, interviewing skills, adherence to rule/procedure/protocol and accurate report writing
  - Review and respond to feedback from community and internal stakeholders
  - Provide feedback to supervisors and/or screeners, consultants as appropriate
  - Fix technical errors found in screening reports as result of feedback
  - Review requests from CPS to overturn screening decisions and determine whether to uphold ORCAH screening decision or overturn. This includes overturning decisions made by PEM C supervisors.
  - Track trends and provide monthly reporting to ORCAH leadership
- Participate in Group Decision Making
  - Disputed Referrals
- CFSR
  - QA Review of screening reports of cases pulled, looking for timeliness
  - Participate in Debrief
  - Include trends in quarterly reporting
- Predictive Analytics
  - Partner with ORRAI in the tracking and analysis of how the PA tool is being used and impacting outcomes, including rate of assignment, rate of dispositions, rate of safety determinations and rate of high-to-moderate need determinations in comparison to PA scores
  - Use analysis of the trends to help inform practice and procedure when applicable.
- Data analysis and reporting
  - Workload metrics for ORCAH (call volume, police report volume, staffing)

  - Practice Metrics (assignment rates, correct assignment rates, response timeline rates, timeliness of screening decisions and assignments to field offices, allegations, long term outcomes)
  - Efficiency metrics (Schedule adherence and impact on abandonment rates, average handle time, shift schedules)
  - Human resource metrics
  - Customer Service metrics (Rate at which service levels met, wait times)
- Reports
  - Daily Internal Dashboards
  - Weekly Internal Dashboards
  - External weekly and monthly dashboards
  - Monthly QA and Feedback data report
  - Quarterly data and QA report
  - Annual data, QA, and ORCAH updates Report

ORRAI has developed data analytics tools for several Child Welfare programs. Screening was the first to receive and put its tool to use. In December of 2018, a small group of screeners and supervisors were trained to use the tool and test it. When Screening Training Academy began, additional screeners were trained and given access to use the tool to use in their screening assessment process. New screening procedure went into effect on April 8, 2019 that includes the use of data analytics in screening decisions. Screeners use the information gathering across the six domains, history search, Child Welfare rule, and criteria in addition to data analytics to make screening decisions. The impacts of the use of the tool are not yet known. ORRAI monitors and tracks tool usage. ORCAH anticipates being able to include Data Analytics data in next year's annual report.

This POP would fund the CQI Unit and would allow for ongoing Continuous Quality Improvement for the application of screening procedures, sustainability planning, operation and program review. It would also provide a budget to support CQI Program Review & Data Analysis.

2. What would this policy package buy and how and when would it be implemented?

Oregonians deserve a system that can provide efficient, effective, equitable, and consistent screening practice, as defined by statute. As custodian of Oregon's most vulnerable children, Child Welfare is requesting funding to support 24 hours a day, 7 days a week screening hotline that utilizes real-time data and quality assurance tools to improve safety outcomes for children. Nationally, about 50% of all states operate centralized screening units. A national study of Statewide [Intake] Screening (Morningside, 2014) found that states utilizing a centralized child abuse reporting hotline are safer, call volume is higher, and timeliness of response is longer. This POP addresses timeliness of response through improved staffing allocation, adequate training and ongoing quality assurance.

We know from prior file reviews and Critical Incident Response Team (CIRT) findings that errors in screening processes and practices have contributed to bad outcomes for children. Staff cite inadequate training, inadequate staffing and coverage for calls during high peak hours of the weekday as significant barriers to developing and sustaining the specialized skill set screening requires. Unit meetings, group supervision, peer reviews, rule and procedure review, and updates are prioritized and delivered in a comprehensive and uniform way. It is imperative that we continue the systemic changes to screening.

This POP provides for the remaining screening positions to obtain 100% of the staffing level earned by the workload model and to increase staffing for the training and continuous quality improvement teams. Of these positions, the Department proposes to fully fund the positions that are currently classified as 'unbudgeted positions' from prior biennium.

A) Staffing

- 2 - PEMC, Screening Supervisors: (current unbudgeted position)
- 11 - Social Service Specialist 1, Screeners: (current unbudgeted positions))
- 1-AS2, Administrative Specialist: (new/permanent/full time) to provide the administrative support to ensure Hotline Manager and Program Managers are not spending time with administrative tasks.

The future state may require a realignment of existing or added positions to the structure of staff once the screening workload model is updated by ORRAI. ORCAH does not have enough data to fully understand the workload of a statewide 24/7/365 operation that just started full implementation a year ago. Once the infrastructure is in place and stabilized, data is analyzed and the model is updated, staffing capacity will be re-assessed.

B) Training and Continuous Quality Improvement program development

ORCAH has created a focus on Continuous Quality Improvement (CQI) including quality assurance reviews, feedback analysis and management, performance management and data analysis. Nationally, centralized hotlines have well-established CQI and Data Reporting systems within their program and operation that are specialized and separate from the day to day screening activities. What we created thus far is from what we have learned from our peer to peer site visit with Florida and in partnering with Casey Family Programs

- 1-OPA4, Screening Program Coordinator: (new/permanent/full time) for training curriculum development, rule and procedure writer and coordinates implementation of new Legislation, process improvement, and change strategies based on trends from CQI team.
- 1- OPA3, Screening Program Consultant: (current unbudgeted position)

- 1 PA-3 Program Analyst: (new/permanent/full time) to partner with ORRAI that includes dashboards, data analysis and coordination across programs, provide training and oversite to field staff who may be doing continuous review or data technician (Data Warehouse)
- 1 – AS2 Administrative Specialist: (new/permanent/full time) to provide the administrative support to ensure Program Manager and Training and CQI staff are not spending time with administrative tasks.
- **$52,500** for CQI Program Review & Data Analysis - Funding approved for 19-21 budget however has not been utilized.
- **10% Contingency Fund** – Cover staff, facilities and training costs unaccounted for which includes supplies and delivery

Training and Continuous Quality Improvement program will use research and data to drive informed decision making to ensure that children and families receive the most effective services. The Training and Continuous Quality Improvement model for ORCAH will be led by a team of staff that partners with the Child Welfare Program's Workforce Development and Training team as well as cross program continuous quality assurance systems that are evolving. These staff will primarily be internal facing to screening program, Oregon Child Abuse Hotline, Child Welfare leadership and other state and tribal entities.

3. How does this policy package further DHS's mission and align with its strategic plan?

The Oregon Child Abuse Hotline fully supports DHS mission: *To help Oregonians in their own communities achieve wellbeing and independence through opportunities that protect, empower, respect choice and preserve dignity.*

Vision for Oregon Child Abuse Hotline: *Our vision of the Oregon Child Abuse Hotline is to engage our communities, including mandatory reporters, and respond to reports of abuse, in a transparent way. Our*

vision is to do so, while ensuring that our children and youth, in their own communities, are safe. We are currently working on the best plan to strengthen our level of service to make sure children are safe and families thrive.

It is essential that allegations of abuse are handled accurately. A single administrative structure and quality assurance practices can occur in a single location with maximum impact, equity, benefit, and accountability. This data driven system aligns with DHS' vision of a world-class organization and seeks to serve all Oregonians by responding to reports of child abuse and in ensuring child safety.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

DHS has directly responded to the 2016 Public Knowledge Report (pg.28) and the 2018 Secretary of State's Audit (pg.19-20). Recommendations were to ensure coordinated and timely response to reports of abuse. This included:

a. Centralize hotline operations to improve efficiency and coordination in child abuse reporting.
b. Addressing inconsistencies by improving and standardizing screening rules, procedure, protocols and training.
c. Redesigning process of responding to allegations of abuse in substitute care

Public audits, internal work review, stakeholder input and staff collaboration assisted in building upon existing best screening practices. The Secretary of State Audit (2018), and the subsequent Governor Brown Executive Order 19-03, which utilized the technical assistance from Alvarez & Marsal (2019) both speak to the need to build an efficient operation that is adequately resourced, utilizing performance management. Additionally, the Secretary of State Audit (2018) speaks to the need for a Centralized Hotline for consistency

within Oregon in who is served by the Child Welfare system. Several citations within various audits, reports and evaluation have noted the lack of accurate data, limited use of data in making informed decisions and the lack of Continuous Quality Improvement.

Quantifying results

5. How will DHS measure the success of this policy package?

With our increasing use of Data Analytics and performance management at ORCAH via Balanced Scorecards known as the Criteria to Achieve Response Excellence (CARE) cards, we will have sufficient ways to measure success.

CARE cards are a standard set of metrics that align with what is most important, provide feedback, share best practices, and provide information for coaching roadmaps with staff. The feedback will empower staff and leaders to tailor coaching to specific needs as well as recognize top performers. Ultimately, we are trying to better support screeners and improve outcomes for the families we serve.

What does it mean?

- ORCAH: Better address customer demand, improve outcomes through best practice sharing, and identification of top performers.
- Children / Families: Reduce wait times and improve outcomes for each caller that contacts the hotline.
- Screeners: Ability to provide feedback with individualized coaching plans, recognize top performers, and develop a common understanding of what is most important.

What the Balanced Scorecard IS

- IS a monthly summary of individual, unit and agency performance, balancing quality with efficiency. Balance is essential as if we focus too heavily on quality, we risk not getting to all who need our help.

Conversely, concentrating too much on efficiency can degrade our decision quality. Only when balancing the two, will we be at our best.

- IS a tool to provide objective feedback, recognize top performers, and share best practices.
- IS a manageable number of measures (5-7) with reasonable goal ranges that align with our current targets.
- IS a tool to help breakdown substantial problems into manageable pieces and recognize where you perform well and where there are opportunities for growth.

Scorecard Measures: A manageable number of measures with reasonable goal ranges that align with our current targets

- Individual Screener:
    - Efficiency Measures: Schedule Adherence, Availability, Average After Call Work
    - Quality Measures: Call Quality and Report Quality
    - Team Component: ORCAH Service Level and ORCAH Abandonment Rate

- Team Component/Unit:
    - Efficiency Measures: Schedule Adherence, % of Reports Assigned within 3 hours, % of Reports Older than 24 hours, and Average After Call Work
    - Quality Measures: Report Quality and # of Coaching Sessions
    - Team Component: ORCAH Service Level and ORCAH Abandonment Rate

- ORCAH:
    - Efficiency Measures: Schedule Adherence, % of Reports Assigned within 3 hours, % of Reports Older than 24 hours, and Average After Call Work, Service Level
    - Quality Measures: Report Quality, % of Reversal Upon Supervisory Review, and % of Assigned Reversal via Feedback box, Abandonment Rate

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

KPM #4 Absence of repeat maltreatment of abused/neglected children.

CFSR: #1, Timeliness to Initial Contact

PIP PLAN:

Strategy A: Ensure a consistent statewide response to allegations of abuse

A.1 Supervisors, program managers and consultants will coach screening staff to accurately identify and document date and time of screening reports received outside of business hours. Activities started January 2017 and will continue through full implementation of Centralized Screening, as part of Oregon's continuous quality improvement effort.

(A.5) A.5.1 Develop and implement a centralized hotline operation supported by consistent policies and on-site leadership. Develop project implementation plan with the assistance for ACTION for Child Protection.

7. What are the long-term desired outcomes?

- Improved child safety
- Improved customer service
- Consistent decision-making
- Improved data informed decision-making
- Continuous Quality Assurance & Improvement
- Reduced biases in screening decisions

- Improved continuity of operations
- Improved service equity for non-dominant cultures and non-English speaking communities
- Increase staff availability to respond to reports of child abuse.
- Reduction in call wait times and abandoned calls during high peak hours of the day/week.
- Reduction in assigned reports to Child Protective Services.
- Increase family access to community services and supports of families to prevent child abuse.

8. What would be the adverse effects of not funding this policy package?

The Oregon Department of Human Services Child Welfare will continue to explain to the Legislature, Secretary of State, Federal Office, Media, communities, parents and children that waiting to report child abuse is acceptable. Since full implementation (April 2019), ORCAH has had significant challenges in managing incoming call volume and unaccounted for workload in the model. This has resulted in callers waiting to make reports of children abuse. During this period, wait times have varied from four minutes, up to three hours. This is unacceptable and is directly related to inadequate staffing to workload.
Our ability to respond relies on ensuring that we have adequate resources to provide this much needed resource to Oregonians.

Inconsistency amongst staff in their decision making would continue. Coverage for screening absence would continue to leave holes in units that are already struggling to manage the workload.

Statewide quality assurance measures will be difficult to implement. Consumers will experience inconsistent responses, and inequities and disproportionalities impacting youth from non-dominant cultures and non-English speaking communities will continue. Systemic issues, identified in critical case reviews, will also continue.

Staff Surveys, CFSRs, Case Reviews, External Audits and Fidelity reviews will continue to surface deficiencies in training and workforce development. DHS-Child Welfare will continue to experience retention, promotion and succession issues that inhibit the Program's ability to adequately assess and service maltreated children in state. Child Welfare who has historically been solely reliant on external organizations to provide the initial and ongoing training to staff will be unable to supplement the lost training resources from budgetary cuts to contracted providers. Outcomes for children in the care of DHS/Child Welfare would not improve.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

The Department has attempted to build out the overall system through the transfer of positions from the fifteen regional Hotlines and the additional positions allocated last session. The department has been able to increase the number of staff working in Child Welfare. ORCAH will continue to have to carve out these positions from day to day screening activities to ensure the duties and responsibilities are continued and ORCAH will continue to have long wait times during the high peak call volume time without the necessary resources.

While these activities and strategies have been critically important due to the vast deficit the department has faced, it is also well understood that building more in this same direction will not necessarily meet the needs of Oregonians as the call volume by reporters is significant.

Multiple efforts have been made over the last decade at developing a Quality Continuous Improvement program with limited success. Most often it has been created with limited capacity and a much larger scope of

responsibility, all of DHS. A CQI program within Child Welfare and targeted directly at screening/ORCAH ensures that staff are making the right decisions for families served by the Child Welfare system.

10. What alternatives were considered and what were the reasons for rejecting them?

The department has assessed that while staffing has increased in the last year, resource capacity is not available given the high workload. Training and continuous quality improvement must be value added and not something that is merely added to the already overflowing workload.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Centralization of the hotline has changed how calls of child abuse are received, processed, and disseminated. This impacted all of CW staff, mandatory reporters, and agencies who cross report to screening units statewide. Calls are no longer accepted in the county of origin. Although callers will continue to able to come to local field offices, they will be required to call the hotline and engage with screeners who may not be familiar with their local community resources. There is a risk that non-dominant and non-English speakers will not know about the child abuse reporting changes, the required information needed to make a child abuse report, or what to expect. The mechanism by which cross reports are made will change primarily to electronic communication. There will be an absence of screening leadership and expertise at the local offices; it will require community

partners to collaborate with staff at the central hotline rather than their local offices. The community will have access to the central hotline 24 hours a day, 7 days a week, 365 days a year.

Tribal communities have informed the development and ongoing training of the centralized hotline. The department will continue to engage in targeted outreach to communities of color (with special emphasis on African American and Native American communities) and other non-dominant cultures to ensure future staffing is more reflective of the communities we serve. This will increase congruency between screeners and the individuals being reported and will ultimately contribute to a reduction in disproportionality across the Child Welfare system.

Other state and local agencies have been involved in the development and have provided extensive feedback. Intentionality and connection with other state, tribal and local governments will be important in the success of a CQI approach. Many of the community prevention services may be found at the local level or within other state agencies such as Law Enforcement, Oregon Health Authority and Department of Education.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

The efforts to centralize were overseen by the Centralized Hotline Steering committee. Other agency representation includes law enforcement, medical professionals, educators, Tribal governments, legislators, Service Employees International Union, District Attorney offices, Action for Child Protection, Casey Family Programs, and Office of Training Investigations and Safety, Office of Continuous Improvement. Office of Business Engagement Services, Office of Reporting, Research, Analytics and Implementation, Unified Child Safety provide support technical assistance and project management to the project. Screeners, screening supervisors, safety consultants, program managers and district managers were represented on the steering committee and/or subcommittees who are responsible for the project deliverables. Statewide listening tours, outreach to supervisory groups, and screening units continue throughout the project.

ORCAH will partner and collaborate with ORRAI, the Child Welfare Project Management Office (PMO), and the Child Welfare Workforce Development and Training Unit.

The department will continue to request consultation with the Child Welfare Advisory Committee, Indian Child Welfare Advisory, Governors Children's Cabinet and Parent Advisory committees. This request is also building on much information that has been gathered over the last several years by audits, consulting firms, community conversations, survey's, etc.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

Through this POP the Agency seeks to make accessible skilled screening staff who can serve the diverse needs of the community, 24 hours a day, 7 days a week. In Oregon, the U.S. Census data shows that while Spanish, Vietnamese, Chinese and Russian are the most common languages spoken by people at home after English, about 172,000 people in the state speak one of 120 other languages. Currently, Child Welfare employs 105 Social Service Specialists and 11 supervisors who receive the bilingual differential, but they are thinly spread at multiple sites across the state. Having our bilingual screeners in a central location will enable the agency to more consistently staff screening and take reports in the caller's preferred language. When live bilingual staff are not available, contracted Language Services will continue to provide language support to ensure every report of child abuse and neglect is handled appropriately.

In addition, a centralized screening model will enable Child Welfare to have more consistent screening standards that will limit bias to ensure equitable outcomes for children of color, as research demonstrates that disproportionality occurs at every step of the child welfare process nationally. For these reasons, CW Program believes that this POP is essential for the health and safety of all children.

Efforts addressing the negative disproportionality impact currently found within the foster care system. Serving children within their communities with local providers who may share in the cultural context will provided greater results. Utilizing the data analytics, the department will be better equipped with identifying and building resources earlier on with communities.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable):

15. What assumptions affect the pricing of this policy package?

Staffing model has not been updated since centralization and a move from Monday through Friday screening, to 24/7/365.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

There will be a requirement for the department to develop, implement and modify a comprehensive and coordinated training and continuous quality improvement program across all of Child Welfare that ORCAH partners with.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Not currently.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

The overall caseload capacity is not anticipating growth.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No existing positions would be modified. Some of our new positions and some are clearing double fills that already exist.

- 1-OPA4, Screening Program Coordinator (new/permanent/full time)
- 1- OPA3, Screening Program Consultant (to fund non-budgeted position)
- 1 PA-3 Program Analyst (new/permanent/full time)
- 2 - PEMC, Screening Supervisors (to fund non-budgeted positions)
- 11 - Social Service Specialist 1, Screeners (to fund non-budgeted positions)
- 2-AS2, Administrative Specialists (new/permanent/full time)
- $52,500 for CQI Program Review & Data Analysis - Funding approved for 19-21 budget however has not been utilized.
- 10% Contingency Fund – Cover staff, facilities, technical tools and training costs unaccounted for which includes services, supplies and delivery

20. What are the start-up and one-time costs?

No

21. What are the ongoing costs?

Positions and biennium training budget

22. What are the potential savings?

No significant cost savings identified however adequate staffing reduces turnover. Indirect savings would be experienced as retention increases and the reduced costs of hiring and initial training.

23. What are the sources of funding and the funding split for each one?

100% General Fund

Department of Human Services
2021-23 Policy Option Package

Division: Child Welfare
Program: Safety Program
Policy package title: Family Preservation and Prevention Services
Policy package number: POP 114
Related legislation: N/A

Summary statement: Families that are at high risk or with specific needs can be connected to Community based resources to support the family without a higher level of Child Welfare intervention. Child Welfare must develop a Continuous Quality Improvement program to ensure effective and quality services are provided.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

The State of Oregon is does not have a strong infrastructure to focus on Family Preservation, to include Prevention of Foster Care for children and families. Children who have been maltreated have a higher risk of experiencing a range of negative well-being outcomes, with significant direct and indirect societal costs, and children who are removed from their home may experience additional trauma that can compound the effects of maltreatment (Kolko et al., 2010). Trauma occurs when children experience or perceive one or more negative events or circumstances that cause them emotional pain and impair their ability to cope (Bartlett & Steber, 2019).

A comprehensive and coordinated approach to serve children and families without a higher level of Child Welfare intervention does not currently exist in Oregon. Through a Family Preservation and Prevention model children and families may receive services and supports within their family and community which decreases deeper involvement with the Child Welfare agency.

Many reports to the Oregon Child Abuse Hotline do not meet statutory criteria for a Child Protective Services assessment; however, many of these families have identified risk factors and needs for services and support. Creating a Family Preservation and Prevention model would allow for a family who is identified as needing some level of support, a less intrusive, less intensive and a more cost-effective intervention to be obtained. This may include intensive family preservation efforts and additional services to prevent maltreatment and foster care. Many services and supports may be available within the community but the state is lacking a coordinated process of identification, resource development and service modification as the needs of children and families change.

Currently, there is no state entity who is creating a comprehensive and coordinated approach to serve families who may need require a higher level of Child Welfare intervention. Oregon Child Abuse Hotline staff are responsible for screening reports of child abuse for the entire state. They often refer callers and families to 211 or the local DHS offices for resources and services. They do not have information regarding local, county or regional community resources or services that could be offered to children and families when a need is identified.

Through the development and implementation of a Family Preservation and Prevention model the department believes that there will be a reduction in the numbers of children being separated from families and entering foster care system, and a reduction in families being referred to the Oregon Child Abuse Hotline due to reoccurrence of child abuse.

In addition, Oregon is lacking a Continuous Quality Improvement program to ensure that effective and quality services are provided. The Family First Prevention Services Act of 2018 (Family First Act) has changed the landscape of federal child welfare funding in significant ways to support children to remain safely in their homes and encourage family-based placement when foster care placement is necessary. With specific requirements around evidence-based programs and tools, the legislation expands opportunities to use research and data to drive decision making and direct funding to ensure that children and families receive the most effective services.

The research and evaluation provisions of the Family First Act require that (1) prevention and kinship programs be evidence-based, (2) states rigorously evaluate and support implementation of prevention programs through data-driven continuous quality improvement efforts, and (3) assessment tools used to determine the appropriateness of residential treatment programs be evidence-based. In order to realize these requirements, the Department must create a robust Continuous Quality Improvement program.

2. What would this policy package buy and how and when would it be implemented?

The Department proposes to create a Family Preservation and Prevention program that will be charged with the development of internal infrastructure to provide supports and coordination of community-based prevention services for children and families. This body of work will incorporate the needs arising from the federal legislation of Family First Prevention Service Act as well as the needs for comprehensive and coordinated services within communities.

A) Family Preservation and Prevention model for Oregon will be led by a centralized team of staff (not necessarily all housed in the same place) who will develop and assist in the delivery of the model.

- 1 PEM-F Family First Preservation Manager will build a Family Preservation program model, provide leadership to the Preservation team, develop and monitor budgets and represent DHS in cross system engagement with other departments, state, federal and community partners.
- 2 - OPA3 will be charged with the development of building community partnerships and capacity for closed at screening referrals. They will be responsible for rule, procedure, and practice changes that are necessary to ensure efficiency and consistency within Oregon.
- 2- OPA3 Contract coordinator with a primary focus on Family Preservation contract management, solicitation, gap analysis and budget monitoring. – (FFPSA, ISRS, SPRF, SOC)
- 1 - OPA3 Kinship Care Navigator Program Coordinator; cross systems coordination within DHS to build preventive support services and approaches for relatives caring for kin with CW, SSP, I/DD, APD.
- 8 – SSS2 Family Advocates/Navigators that can be used for Peer to Peer / advocacy /mentoring as well as staff training and support to caseworkers for practice change. This would be the area to include staff with prior CW lived experience and used as Peer to Peer mentoring of parents.

- 1 – AS2 Administrative Specialist to provide the administrative support to ensure Program Manager and program staff are not spending time with administrative tasks.

The future state may require a realignment of existing or added positions to the field structure for Family Preservation and Prevention staff. Staff will be required to have a unique skill set that can engage and team with families and their communities in a culturally responsive and supportive manner. Once the infrastructure is in place and the model development is underway a better understanding of the necessary skill sets, and staffing capacity will be assessed.

B) Continuous Quality Improvement program will use research and data to drive informed decision making to ensure that children and families receive the most effective services. The Continuous Quality Improvement model for Oregon will be led by a centralized team of staff (not necessarily all housed in the same place) who will develop and assist in the delivery of the model.
   - 1 PEM-F Continuous Quality Improvement- CQI Manager will build a CQI model, provide leadership to the CQI team, develop and monitor budgets, work closely with Child Welfare program managers and represent DHS in cross system engagement with other departments, state, federal and community partners.
   - 2 PA-3 Program Analyst to work on dash boards, data collection and coordination across programs, provide training and oversite to field staff who may be doing continuous review or data technician. These staff will primarily be internal facing to branch offices, Child Welfare leadership and other state and tribal entities.
   - 2 PA-3 Program Analyst to provide program integrity and oversight of the evidence-based program service array. FFPSA requires the state to evaluate and continually monitor the EBP services. These staff will primarily be external facing to service providers, contractors and community.

- 8 OPA 2's to conduct monthly case review across internal child welfare programs (CPS, Well-being, Permanency), their primary functions will include making sure data entry is done correctly, case plans and assessments are completed timely, and children and families are provide effective services.
- 1 – AS2 Administrative Specialist to provide the administrative support to ensure Program Manager and program staff are not spending time with administrative tasks.

C) The Strengthening, Preserving and Reunifying Families budget is restored to be 75% of the 17-19 Total Fund budget.

3. How does this policy package further DHS's mission and align with its strategic plan?

Family Preservation and Prevention full supports DHS mission:

To help Oregonians in their own communities achieve wellbeing and independence through opportunities that protect, empower, respect choice and preserve dignity.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

In part yes, the Secretary of State Audit (2018), and the subsequent Governor Brown Executive Order 19-03, which utilized the technical assistance from Alvarez & Marsal (2019) both speak to the need to build a more robust and adequate foster care system in Oregon. Part of the adequacy of a foster care system in Oregon is to ensure only those children who have no other resource but foster care, enter foster care. Oregon cannot build its way out of the influx of children entering foster care by merely creating more foster care placements.

Additionally, the Secretary of State Audit (2018) speaks to the need for a Centralized Hotline for efficiency and consistency within Oregon. The statewide Hotline is fully operational, 24/7/365. To have other options

available in referring and serving families without a screened in report of child abuse, allows a tool such as Family Preservation and Prevention model to provide a level of support for families statewide.

Several citations within various audits, reports and evaluation have noted the lack of accurate data, limited use of data in making informed decisions and the lack of Continuous Quality Improvement.

Quantifying results

5. How will DHS measure the success of this policy package?

The Department has been moving toward Data Analytics and with a Family Preservation and Prevention model, analytics will be highly effective in determining the level of needs within communities across the state. Knowing the needs of the community and the capacity of the community to provide the necessary supports and services will be critical.

- Success will be measured when the rate of children entering foster care in Oregon is reduced through these efforts.
- Success will be measured when a Hotline screener has a family with identified needs and the resources to offer families in all communities in Oregon to prevent child abuse.
- Success will be measured by a reduction in the length of stay for children entering foster care who are able to return home sooner as a result of community services and supports to the family.
- Success will be achieved when the rate of reoccurrence of child maltreatment is reduced.
- Success will be achieved by increasing the number of services in Oregon which meet the criteria for Evidence Based Program.
- Success will be achieved by increasing the number of families who have access to Evidence Based Program within their communities.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

KPM #4 Absence of repeat maltreatment of abused/neglected children
KPM #5 Timely reunification of foster children
KPM #8 Children served by Child Welfare residing in Parental Home.

7. What are the long-term desired outcomes?

Family Preservation model that is applied statewide will;

- Increase family access to community services and supports of families to prevent child abuse.
- Reduction in assigned reports to Child Protective Services.
- Reduction of children entering foster care system.
- Child Welfare system that is more cost effective by utilization of Prevention rather than full system intervention.

Continuous Quality Improvement model that is applied statewide will;

- Assist in the development of a comprehensive and coordinated continuum of child and family services in all communities statewide.
- Assist the Department to ensure only services that have a level of evidence of success are used for children and families in Oregon.
- Increase the availability of community based, culturally responsive services by continually evaluating programs and services, increase those that add value and decrease those who are not producing positive outcomes.

8. What would be the adverse effects of not funding this policy package?

The Oregon Department of Human Services Child Welfare will continue to be caught in a cycle of only being able to offer foster care as a resource for vulnerable families struggling to ensure the safety of their children (*If the only tool available is a hammer, everything starts looking like a nail*). Oregon will miss out on the

opportunity to further develop the Family Preservation and Prevention services array afforded to the state through the federal Family First Prevention Services Act, matching funds.

The Department will continue to explain to the Legislature, Secretary of State, Federal Office, Media, communities, parents and children that Prevention services and resources in Oregon are limited and not available in all communities or to all residents.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

The Department has attempted to build out the overall system through increased foster care capacity, investing in recruitment of more foster families, and investing in resources for more residential care services. The department has consolidated 15 regional child abuse hotlines into one statewide, centralized system. The department has been able to increase the number of staff working in Child Welfare.

While these activities and strategies have been critically important due to the vast deficit the department has faced, it is also well understood that building more in this same direction will not necessarily meet the needs of children and families. Many can be served with less intensive, less intrusive and more community-based services at an earlier phase of prevention.

Multiple efforts have been made over the last decade at developing a Quality Continuous Improvement with limited success. Most often it has been created with limited capacity and a much larger scope of responsibility, all of DHS. A CQI program within Child Welfare and targeted directly at service array and efficiency in case management has a high rate of success.

10. What alternatives were considered and what were the reasons for rejecting them?

The department has assessed that while expertise can be found within the department, resource capacity is not available. This must be value added and not something that is merely added to the already overflowing workload. It will take some intentionality and focus to bring this shift in practice forward.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Tribal communities can help inform the department on a path forward considering several of the tribes provide a level of family preservation and prevention practices that DHS can learn from.

Other state and local agencies will be involved in the development of the comprehensive and coordinate Preservation and Prevention approach considering there is an array of community resource interwoven through governments, local resources and within the community.

Intentionality and connection with other state, tribal and local governments will be important in the success of a CQI approach. Many of the community prevention services may be found at the local level or within other state agencies such as Oregon health Authority and Department of Education.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

The department will be requesting consultation with the Child Welfare Advisory Committee, Indian Child Welfare Advisory, Governors Children's Cabinet and Parent Advisory committees. This request is also building on much information that has been gathered over the last several years by audits, consulting firms, community conversations, survey's, etc.…

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

Taking a Family Preservation and Prevention approach as well as utilization of community-based resources aligns well with addressing the negative disproportionality impact currently found within the foster care system. Serving children within their communities with local providers who may share in the cultural context will provided greater results.

Utilizing the data analytics, the department will be better equipped with identifying and building resources earlier on with communities.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable):

15. What assumptions affect the pricing of this policy package?

Staffing model. Unable to determine impact of Evidence Based Programs at this time.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

Yes. The department will move toward preservation and prevention services for families. While many families served within the communities may not require Child Welfare intervention, many will need a level of services that currently does not exist within the current Child Welfare structure for service provision. There will be a requirement for the department to develop, implement and modify a comprehensive and coordinated preservation and prevention services array.

In addition, to achieve the level of Evidence Based Programs required by the Family First Prevention Services Act, due diligence is required of the department to provide oversight, monitoring of program fidelity of service providers.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Office of Contracts and Procurement will be required to increase scrutiny of service provider contracts to ensure the department has corrective action steps for services providers who are not meeting the level of evidence required for federal funding.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

The overall caseload capacity is not anticipating growth but there may be realignment within Child Welfare as to "who" is carrying the case.

The service array the department will provide will be realigned though current services of ISRS, SPRF, SOC and foster care prevention and build on community's resources.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

A) Family Preservation and Prevention model for Oregon will be led by a centralized team of staff (not necessarily all housed in the same place) who will develop and assist in the delivery of the model.

- 1 PEM-F Family First Preservation Manager will build a Family Preservation program model, provide leadership to the Preservation team, develop and monitor budgets and represent DHS in cross system engagement with other departments, state, federal and community partners.
- 2 - OPA3 will be charged with the development of building community partnerships and capacity for closed at screening referrals. They will be responsible for rule, procedure, and practice changes that are necessary to ensure efficiency and consistency within Oregon.
- 2- OPA3 Contract coordinator with a primary focus on Family Preservation contract management, solicitation, gap analysis and budget monitoring. – (FFPSA, ISRS, SPRF,)
- 1 - OPA3 Kinship Care Navigator Program Coordinator; cross systems coordination within DHS to build preventive support services and approaches for relatives caring for kin with CW, SSP, I/DD, APD.
- 8 – SSS2 Family Advocates/Navigators that can be used for Peer to Peer / advocacy /mentoring as well as staff training and support to caseworkers for practice change. This would be the area to include staff with prior CW lived experience and used as Peer to Peer mentoring of parents.

- 1 – AS2 Administrative Specialist to provide the administrative support to ensure Program Manager and program staff are not spending time with administrative tasks.

The future state may require a realignment of existing or added positions to the field structure for Family Preservation and Prevention staff. Staff will be required to have a unique skill set that can engage and team with families and their communities in a culturally responsive and supportive manner. Once the infrastructure is in place and the model development is underway a better understanding of the necessary skill sets, and staffing capacity will be assessed.

B) Continuous Quality Improvement program will use research and data to drive informed decision making to ensure that children and families receive the most effective services. The Continuous Quality Improvement model for Oregon will be led by a centralized team of staff (not necessarily all housed in the same place) who will develop and assist in the delivery of the model.

- 1 PEM-F Continuous Quality Improvement- CQI Manager will build a CQI model, provide leadership to the CQI team, develop and monitor budgets, work closely with Child Welfare program managers and represent DHS in cross system engagement with other departments, state, federal and community partners.
- 2 PA-3 Program Analyst to work on dash boards, data collection and coordination across programs, provide training and oversite to field staff who may be doing continuous review or data technician. These staff will primarily be internal facing to branch offices, Child Welfare leadership and other state and tribal entities.
- 2 PA-3 Program Analyst to provide program integrity and oversight of the evidence-based program service array. FFPSA requires the state to evaluate and continually monitor the EBP services. These staff will primarily be external facing to service providers, contractors and community.
- 8 OPA 2's to conduct monthly case review across internal child welfare programs (CPS, Well-being, Permanency), their primary functions will include making sure data entry is done correctly, case plans and assessments are completed timely, and children and families are provide effective services.

- 1 – AS2 Administrative Specialist to provide the administrative support to ensure Program Manager and program staff are not spending time with administrative tasks.

20. What are the start-up and one-time costs?

Evidence Based Programs are known to be more costly. While it is not clear what those costs are at this time it is necessary to note that when other state agencies; Oregon Youth Authority, Oregon Health Authority moved services toward Evidence Based Programs there was an increase in the cost of delivering and monitoring those services.

21. What are the ongoing costs?

Undetermined. Evidence Based Programs are known to be more costly. While it is not clear what those costs are at this time it is necessary to note that when other state agencies; Oregon Youth Authority, Oregon Health Authority moved services toward Evidence based Programs there was an increase in the cost of delivering and monitoring those services.

22. What are the potential savings?

None realized in the first 12-months. Reassess for reduction in foster care caseload 12-24 months. Cost savings associated with reducing services not effective will be re-invested in services deemed effective.

23. What are the sources of funding and the funding split for each one?

Child Welfare will access current funding resources available; Title IV-E, IV-E, SSBG,

Total for this policy package

Department of Human Services
2021-2023 Policy Option Package

Agency Name: Department of Human Services
Program Area Name: Office of Child Welfare Programs
Program Name: Foster Care
Policy Package Title: Governor's Child Foster Care Advisory Commission
Policy Package Number: POP 115
Related Legislation: HB 2332- A of 2019

Summary Statement:

This policy options proposal accompanies a legislative concept that is effectively a re-introduction of HB 2332 – A of 2019.

HB2332 – A of increased the membership of the commission from 11 to 13 makes modifications to appointments and membership requirements. Appropriates money to the commission for compensation and expense reimbursement of members. As well as directs the Department of Human Services(DHS) to provide staff and support including a full-time equivalent policy analyst.

This proposal accounts for the

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy Package Pricing:	**$166,400**	**$0**	**$55,466**	**$221,866**	**1**	**.88**

PURPOSE

1. WHY DOES DHS PROPOSE THIS POP (WHAT ISSUE ARE YOU TRYING TO FIX/SOLVE)?

The Commission, created in 2016 by the passage of HB4080, is tasked with monitoring accountability in the foster care system by measuring a comprehensive list of outcomes that includes, but is not limited to, promotion of responsible statewide advocacy for children in foster care, decreasing demographic disproportionality of children in foster care, and decreasing the number of placements in substitute care. Despite the Commission's broad duties, HB 4080 did not appropriate any funding for the Commission to do its work in compiling relevant information or a dedicated staff person. This lack of funding has made it difficult for the Commission to fulfill its full mandate of monitoring and ensuring accountability in the foster care system.

2. WHAT WOULD THIS POLICY OPTION PACKAGE (POP) DO AND HOW WOULD IT BE IMPLEMENTED?

The legislative concept that accompanies this proposal directs DHS to provide the commission with clerical and administrative staff support, including one full-time equivalent policy analyst position (OPA3). The concept increases the commission's membership from 11 to 13 and appropriates funds to compensate and reimburse members of the commission.

3. HOW DOES THIS FURTHER THE AGENCY'S MISSION OR GOALS?

The mandate of the commission aligns with the agency's goal of actively engaging the community in a variety of collaborative and meaningful ways to influence and shape the Child Welfare system. The currently mandated responsibility of providing monitoring and accountability in the foster care system by measuring outcomes aligns with Child Welfare's commitment to continuous improvement that is data informed.

QUANTIFYING RESULTS

4. IS THIS POP TIED TO A DHS PERFORMANCE MEASURE? IF YES, IDENTIFY THE PERFORMANCE MEASURE. IF NO, HOW WILL DHS MEASURE THE SUCCESS OF THIS POP?

This is not tied to a specific DHS performance measure as it concerns a legislatively mandated commission. However, several data and performance measures are required to be shared with the commission which informs their legislative agenda.

5. WHAT WOULD BE THE ADVERSE EFFECTS OF NOT FUNDING THIS POP?

If unfunded the commission will continue to struggle to fulfill its full mandate of monitoring and ensuring accountability in the foster care system. The lack of funding will also continue to hinder the Commission's ability to make those who have lived experiences in the foster care system foster care children and youth, parents and families, and foster parents. The reason given for the lack of representation has been the lack of reimbursement for the members.

HOW ACHIEVED

6. DOES THIS POP REQUIRE ANY CHANGE(S) TO EXISTING STATUTE(S) OR REQUIRE A NEW STATUTE? IF YES, IDENTIFY THE STATUTE AND THE LEGISLATIVE CONCEPT.

Yes. ORS 418.041 and 418.043. Additionally this is DHS L/C 10000-007

7. WHAT ALTERNATIVES WERE CONSIDERED AND WHAT WERE THE REASONS FOR REJECTING THEM?

It is the departments understanding that this request was born from the Commission itself and was a recommendation of the commission but was preempted as a privately sponsored HB 2332 of 2019. The legislature did not pass that legislation at that time.

8. WHAT ACTIONS HAVE OCCURRED TO RESOLVE THE ISSUE PRIOR TO REQUESTING A POLICY PACKAGE?

The Commission has attempted to conduct its work and mandate without appropriations currently but has struggled to meet its mandate without dedicated staff.

9. WHAT OTHER AGENCIES (STATE, TRIBAL AND/OR LOCAL GOVERNMENT) WOULD BE AFFECTED BY THIS POP? HOW WOULD THEY BE AFFECTED?

The legislative concept directs Chief Justice of Supreme Court to appoint any member of commission who is representative of Judicial Department however as this is only an appointing requirement the impact on the Oregon Judicial Department is anticipated to be minimal.

10. WHAT OTHER AGENCIES, PROGRAMS or STAKEHOLDERS ARE COLLABORATING ON THIS POP?

This proposal is a direct request from the Governors office on behalf of the Governor's Child Foster Care Advisory Commission. This commission is currently made of up members representing foster care alumni, caregivers, service providers, foster parents, child and parent attorneys, CASA, and tribal representatives.

11. WHAT IS YOUR EQUITY ANALYSIS?

This commission sits outside of the department and is mandated to study legal and policy issues pertaining to the foster care system in Oregon and monitor accountability in the foster care system by measuring outcomes that reduce demographic disproportionality in substitute care. Therefore, it is expected that further supports

to fulfill that mandate would enhance our ability to provide equitable services and reduce existing disparities, with the aim of eliminating disproportionality within Oregon's Child Welfare program.

12. WHAT ARE THE LONG-TERM DESIRED OUTCOMES (LONGER THAN THE UPCOMING BIENNIUM)?

The long-term outcomes are specifically outlined by the commission and are:

- Increasing the number of children committed to the custody of the Department of Human Services who are placed with family members, relatives or next of kin;
- Decreasing the number of placements in, and removals from, substitute care for individual children committed to the custody of the department;
- Decreasing the length of time children spend in substitute care;
- Decreasing incidences of abuse, neglect and maltreatment for children in substitute care;
- Increasing the number of children who receive permanent placements within 24 months of entering substitute care;
- Decreasing the number of children who, upon becoming ineligible for substitute care, have not achieved independent living status;
- Increasing the number of children who are placed with adoptive parents within 12 months of termination of the parental rights of a child's biological parents;
- Reducing demographic disproportionality in substitute care;
- Increasing the number of families involved in the foster care system receiving services and assistance to make it possible for children in substitute care to safely return home; and
- Increasing the number of families involved in the foster care system having access to culturally relevant services;

STAFFING AND/OR FISCAL IMPACT

13. WHAT ASSUMPTIONS AFFECT THE PRICING OF THIS POP?

Implementation Date(s): _____

End Date (if applicable): Ongoing

a. Based on these answers, is there a fiscal impact?
Yes.

b. Will there be new responsibilities for DHS/OHA? Specify which Program Area(s) and describe their new responsibilities.

☒ DHS Office of Child Welfare Programs	☐
☐	☐
☐	☐
☐	☐
☐	☐
☐	☐

Responsible for providing staffing and support to the commission.

c. Will there be new Shared Services impacts sufficient to require additional funding? Specify which office(s) (i.e., facilities, computer services, etc.) and describe how it will be affected.
Yes, a single (OPA3) is proposed to provide the support to the commission and would be housed at 500 Summer St NE, Salem OR 97301.

d. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.
No.

e. Will it take new staff or will existing positions be modified? For each classification, list the number of positions and the number of months the positions will work in each biennium. Specify if the positions are permanent, limited duration or temporary.
1 OPA3, Permanent, 24 Months

f. What are the start-up costs, such as new or significant modifications to computer systems, new materials, outreach and training?
none

g. What are the ongoing costs?
Staff cost

h. What are the potential savings?
It is not anticipated that there will be savings.

Summary Statement:

Oregon does not currently have a formalized respite care program that would certify pay and monitor respite providers. Respite care is short-term childcare services that offer temporary relief, improve family stability, and have been shown to reduce the risk of abuse or neglect. This Policy Option Package is derived from the recommendation from the assessment conducted by the consulting firm Alvarez & Marsal. Respite care provides foster parents and other caregivers with short-term childcare services that offer temporary relief, improve family stability, and reduce the risk of abuse or neglect. Respite can be planned or offered during emergencies or times of crisis.

This Policy Option Package requests a Respite Business Plan which is seeking to overlay with the Behavioral Rehabilitative Services (BRS) infrastructure. This respite plan relies on the BRS infrastructure, primarily the Proctor Care system, to diversify their placement services by adding respite supports through two funding models, Child Welfare or CCO reimbursed. Current BRS rules note that Proctor homes can serve 1 or 2 youth whom are not BRS clients, depending on the adult to child ratios natural to the home. Further, Oregon's Medicaid program allows for a lenient definition of respite care and the services associated with said respite service. Currently CCO's determine what a respite service is and whom can provide the services.

Department of Human Services
2021-2023 Policy Option Package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy Package Pricing:	**$19,443,093**	**$0**	**$1,165,112**	**$20,608,205**	**1**	**.88**

Purpose

1. WHY DOES DHS PROPOSE THIS POP (WHAT ISSUE ARE YOU TRYING TO FIX/SOLVE)?

In April 2019, Governor Kate Brown contracted the services of consulting firm Alvarez & Marsal to assess the Oregon foster care system. Alvarez and Marshal alongside program management determined Oregon Child Welfare would benefit from a standardized, formal statewide respite program.

This recommendation echoes a consistent theme voiced by foster parents Statewide which is a lack of support/breaks from the considerable demands of foster parenting. Foster parents often do not have the identified resources to provide respite. A formalized, consistent, structured statewide respite program would provide a needed service for DHS certified families. This program would bolster foster family supports for those with limited resources, increase retention of foster families and increase placement stability.

2. WHAT WOULD THIS POLICY OPTION PACKAGE (POP) DO AND HOW WOULD IT BE IMPLEMENTED?

This proposal would allow DHS to conduct certification of respite providers and enter contracts with Licensed Foster Care Agencies. This proposal would additionally allow for DHS to provide foster parents with a respite payment of $55.00/day and accounts for an average of 48 hours per foster parent per month per child (for an average of of 5,176 children in foster care as of the Spring 2020 21-23 Forecast) with

additional statewide contracts estimated to serve 474 foster youth per month in crisis or emergency respite at various rates (see pricing section 15).
This respite plan relies on the BRS infrastructure, primarily the Proctor Care system, to diversify their placement services by adding respite supports through two funding models, Child Welfare or CCO reimbursed. Current BRS rules note that Proctor homes can serve 1 or 2 youth whom are not BRS clients, depending on the adult to child ratios natural to the home.

This would require a respite coordinator and one operations and policy Analyst 3 that would serve as a respite coordinator located in the DHS central office and managed by the Child Welfare Permanency program.

District offices would be responsible for assigning existing Certification Staff to certification of respite providers.

3. HOW DOES THIS FURTHER THE AGENCY'S MISSION OR GOALS?

A core goal of DHS Oregon is to ensure that children and youth are safe, well and connected to their families, communities and cultural identities. To accomplish this the Child Welfare system needs a robust network of quality foster parents that can support the needs of the youth in their care while balancing their needs to ensure they remain willing to be resources for the department. Providing respite care as proposed would provide foster parents with short-term childcare services that offer temporary relief, improve family stability, and reduce the risk of abuse or neglect.

QUANTIFYING RESULTS

4. IS THIS POP TIED TO A DHS PERFORMANCE MEASURE? IF YES, IDENTIFY THE PERFORMANCE MEASURE. IF NO, HOW WILL DHS MEASURE THE SUCCESS OF THIS POP?

5. WHAT WOULD BE THE ADVERSE EFFECTS OF NOT FUNDING THIS POP?
Child Welfare will continue to struggle to prioritize respite care for foster parents. As this continues to be shared as a barrier for foster parent recruitment and retention it will continue to impact the state's ability to recruit and retain qualified foster parents. If we do not improve in this area, we risk the continued difficulties in retention of current foster parents and continued difficulties in recruitment.

HOW ACHIEVED

6. DOES THIS POP REQUIRE ANY CHANGE(S) TO EXISTING STATUTE(S) OR REQUIRE A NEW STATUTE? IF YES, IDENTIFY THE STATUTE AND THE LEGISLATIVE CONCEPT.
No.

7. WHAT ALTERNATIVES WERE CONSIDERED AND WHAT WERE THE REASONS FOR REJECTING THEM?
Child Welfare conducted an analysis in partnership with the Casey Foundation to inform the development of this proposal.

To inform this business plan the following steps were taken:

- Researched other states' approach to respite care by the Casey Foundation
- Compiled what districts are currently doing to support foster parents with respite
- Obtained legal guidance regarding DHS authority to certify respite providers

This proposal was selected as it could quickly establish respite options, would rely on contracting to maintain the respite networks and because proctor care agencies have more capability to define certification standards for respite care.

8. WHAT ACTIONS HAVE OCCURRED TO RESOLVE THE ISSUE PRIOR TO REQUESTING A POLICY PACKAGE?

Up until recently there were no funds available outside of the monthly maintenance payment that could be used for regular respite. In 2018, the department was given some financial resources, allocated to the districts, to reimburse foster parents when respite is used. However, that funding is very limited and does not support all foster parents. Additionally, the process still relies on foster parents to identify the respite resource. Due to limited funding, each District was instructed to prioritize placement stability and other specific factors in utilizing respite funds.

9. WHAT OTHER AGENCIES (STATE, TRIBAL AND/OR LOCAL GOVERNMENT) WOULD BE AFFECTED BY THIS POP? HOW WOULD THEY BE AFFECTED?

Further elements of exploration would be an agreement between OHA and Child Welfare to request pass through rights for Medicaid reimbursements for said respite network, although this may require more General Fund capability in the Policy Option Package, if further explored.

10. WHAT OTHER AGENCIES, PROGRAMS or STAKEHOLDERS ARE COLLABORATING ON THIS POP?

This proposal is a result of the recommendations from the consulting firm Alvarez & Marsal which was further expanded upon by the Casey foundation. While not directly worked on for this proposal this aligns with previous requests from Oregon foster parent organizations.

11. WHAT IS YOUR EQUITY ANALYSIS?

We currently not have enough cultural or linguistically appropriate placement options for children experiencing foster care. This investment will increase our ability to recruit and retain foster parents and therefore could provide more equitable services and reduce existing disparities.

12. WHAT ARE THE LONG-TERM DESIRED OUTCOMES (LONGER THAN THE UPCOMING BIENNIUM)?

Having a formalized respite program would increase number of appropriate and available placement options to improve placement matching, reduce the number of placements for children and improve the overall well-being of children experiencing foster care. Foster Parents would spend less time identifying appropriate respite placements and therefore be more willing to remain a resource for a longer period-of-time for the department.

STAFFING AND/OR FISCAL IMPACT

13. WHAT ASSUMPTIONS AFFECT THE PRICING OF THIS POP?

Implementation Date(s): 7/1/21

End Date (if applicable): Ongoing

a. Based on these answers, is there a fiscal impact?

Yes.

b. Will there be new responsibilities for DHS/OHA? Specify which Program Area(s) and describe their new responsibilities.

☒ DHS Office of Child Welfare Programs	☐
☐	☐
☐	☐
☐	☐
☐	☐
☐	☐

Responsible for developing a targeted Statewide Foster Care Recruitment and Retention practice model and implementing it statewide.

c. Will there be new Shared Services impacts sufficient to require additional funding? Specify which office(s) (i.e., facilities, computer services, etc.) and describe how it will be affected.
No.

d. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.
Yes, this proposal accounts for the availability of respite care for all foster parents statewide. For an average of 48 hours per foster parent per month per child. It is assumed that there will be a 75% utilization rate of foster parents (Biennial population is 5,176 and 75% of this would be 3,882 children in foster care will receive respite care per month).

e. Will it take new staff or will existing positions be modified? For each classification, list the number of positions and the number of months the positions will work in each biennium. Specify if the positions are permanent, limited duration or temporary.

1 OPA3, Permanent, 24 Months

f. What are the start-up costs, such as new or significant modifications to computer systems, new materials, outreach and training?

These start-up costs are to assist the provider community in starting-up new programming that meets DHS requirements. The funds would need to be used for marketing, events, training new homes with incentive-based training to cover cost of childcare etc., cash incentives for signing on, and potentially part-time positions for recruitment.

Description	GF	OF	FF	TF
Startup and Recruitment of Emergency/Crisis Respite Providers of 15%	$ 695,880	$ -	$ -	$ 695,880

g. What are the ongoing costs?

The ongoing program costs are for Certified Family Respite Care for and Emergency and Crisis Respite, which is a higher level of respite care. Medicaid funds can be used for some of these respite care services.

Description	GF	OF	FF	TF
Certified Family Respite Care	$ 15,372,720	$ -	$ -	$ 15,372,720
Emergency/Crisis Respite				
In-home	$ 622,080	$ -	$ -	$ 622,080
Day Respite	$ 1,252,800	$ -	$ -	$ 1,252,800
Planned Overnight	$ 397,440	$ -	$ -	$ 397,440
Crisis Respite	$ 432,480	$ -	$ -	$ 432,480
(MH) In-home	$ 198,923	$ -	$ 267,637	$ 466,560
(MH) Day Respite	$ 316,804	$ -	$ 426,236	$ 743,040
(MH) Planned Overnight	$ 160,039	$ -	$ 215,321	$ 375,360
(MH) Crisis Respite	$ 148,988	$ -	$ 200,452	$ 349,440
Emergency/Crisis Subtotal	*$ 3,529,554*	*$ -*	*$ 1,109,646*	*$ 4,639,200*
Ongoing Costs	$ 18,902,274	$ -	$ 1,109,646	$ 20,011,920

Other ongoing costs are for a staff person that are requested as part of this Policy Option Package.

h. What are the potential savings?

The savings are in human capital. Better and more consistent foster care services to children and reducing trauma. Better supported foster families, reducing burnout and increasing their capacity to provide care to children. Better outcomes for children and families. Less staff burnout as they are able to provide the services and supports necessary to provide excellent customer service.

What are the sources of funding and the funding split for each one?

Most of the respite services do not qualify for federal funds. The funding split varies for each level of respite. The mental health respite services qualify for using Medicaid at the current FMAP rate for Medicaid eligible children (over 95% of foster children are Medicaid eligible).

Department of Human Services
2021-23 Policy Option Package

Division: OCWP

Program: Health and Wellbeing

Policy package title: CW16 School of Origin Transportation

Policy package number: POP 117

Related legislation: N/A

Summary statement:

This policy package asks for a funding increase to School of Origin transportation which is a contracted service through an IGA with Oregon Department of Education (ODE). School of Origin transportation allows foster students to remain in their school of origin, even if there foster care placement, is not within the school boundaries. This transportation service promotes school stability, which should increase educational outcomes for the foster student.
School of Origin is mandated through federal and state laws, and require, that transportation should not come as a cost to the student. These laws went into effect in Oregon, in 2017, and costs have been rising, since implementation. If the package is not funded, Oregon would be out of compliance with federal and state mandates.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	$927,925	$32,881	$894,375	$1,855,181	0	0.00

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

In 2015, congress passed the Every Student Success Act (ESSA), which replaced No Child Left Behind, federal education law. ESSA included a set of education protections for students in foster care. ODE introduced these changes, in SB 20, during the 2017 legislative session. The legislative changes that impacted students in foster care were:

- ORS 339.133 was re-written to allow students in foster care, the ability to automatically remain in their school of origin (the school they were attending when placed in foster care). The school of origin can only be changed by the juvenile court.
- ORS 339.133 (4)(B) states that students in foster care: be provided, free of charge, transportation between the individual's home and the individual's school district of origin or, if applicable, the individual's school of origin.

DHS and ODE worked together to create a cost-sharing school of origin transportation plan. Oregon's 197 school districts would be responsible for providing the transportation, which would be reimbursed 100%. ODE would reimburse 70-90% from the state school fund, and DHS would pay for the remainder. The 70-90% varies by school district and is set by ODE reimbursement practices.

Local school districts send a quarterly invoice to ODE, who bills DHS for the 10-30% of the cost. DHS invoices each child separately, so IV-E federal funds can be used when a child is eligible. The invoices are paid to ODE, and the school districts can draw down their funds through an electronic system.

The fiscal for SB 20 (2017), included many unknown variables, which made calculating potential costs very difficult. There were funds from a transportation pilot program, in District 2, where DHS was paying 100% of transportation costs. The decision was to use those funds and IV-E, for the statewide transportation plan.

There would be a cost savings from the Multnomah transportations (-70%), which would allow for statewide implementation. There was also a lot of staff time (caseworkers and SSA's) providing school transportation, on a regular basis. The fiscal was based upon the total statewide education transportation costs, from the 2015-2016 school year, and the District 2 pilot program combined. This is taken directly from the bill analysis:

These costs are pulled from the following services codes: Transport for School Contracted; Transportation School Conferences; Transport for School Non-Contracted; and Contracted Travel - Per Trip Cost - SOC. The total fund costs for the 2015/2016 school year is $969,194.42.

The unknown variables of the fiscal were:

- The law allowed foster students to automatically stay in their school of origin, and OR-Kids does not allow for a way to pull aggregate data on those decisions.
- There was not a data set to determine how many foster students are placed outside of their school districts.
- There was no way to pull from OR-Kids, the number of students who currently had Best Interest Findings.
- There was no way to predict increases in children entering foster care or children needing more moves within foster care.

Costs of transportation and the number of foster students using this school of origin transportation, have increased significantly, thus the need for the Policy Option Package. Several factors have increased the usage of this transportation service:

- DHS and ODE have done extensive regional trainings, making school and DHS staff aware of the school of origin laws and procedures to obtain transportation.
- Now that transportation is no longer a barrier, more students are staying in their school of origin. Juvenile Courts are less inclined to make Best Interest Findings to change schools.

- The temporary lodging agreement was executed around the same time of this bill. Children who are moving from shelter placement to shelter placement, are often remaining in their school (and being transported long distances), since a long-term foster care placement is not available.
- DHS and ODE added to the 2019-2021 IGA the ability to do transportation for children on trial reunification. During the first two years of invoicing, caseworkers were adding this into transportation plans, due to the difference in foster care definitions. ESSA defined foster care as "away from the parents," yet in child welfare, "foster care" generally includes trial reunification. Many states have also added Trial Reunification to their agreements, so children can finish the school year, as long as DHS has custody.
- Transportation can be expensive, when a school district develops a single bus route for one student. Students are also transported by: taxi's; medical transportation; and foster parent mileage reimbursement.
- School districts have reported that Oregon's good economy (prior to COVID-19), made it increasingly difficult to fully staff bus drivers. This meant school districts had to rely on taxi's and other types of transportation, to accommodate the law.

2. What would this policy package buy and how and when would it be implemented?

This policy package would fully fund foster student, school of origin transportation, as costs have been increasing. DHS would implement this 2021-2023 transportation budget in accordance with an updated Inter-governmental agreement with Oregon Department of Education. Further this Policy Option Package requests that costs related to School of Origin Transportation with the Department of Education be considered an Exception in the Current Service Level budget build process. In this way costs for this service can be covered in a normal budget process.

School of Origin transportation is needed for foster students to be able to remain in their school of origin, in accordance with federal and state laws. The money will purchase a contracted service, in which the funding is paid to ODE, but the service is done by the local school district. Transportation is the responsibility of the local school district, and DHS does not have input into the transportation type, unless there are safety concerns. Foster students are transported by busses, taxis, medical transportation, and foster parent mileage reimbursement.

The transportation rates vary, by transportation type and mileage. Some school districts work with a neighboring school district, and each claim half of the transport (ex: school buses from different districts, meet at the district line, and hand the student off to another bus). In the most recent set of invoices, the transportation distance (one way), ranged from .5 miles to 89.4 miles. Additionally, if medical transportation is used, those rates tend to be higher.

3. How does this policy package further DHS's mission and align with its strategic plan?

This policy package contributes towards DHS's mission and strategic plan, in the following ways:

- Giving foster students the opportunity to have increased educational outcomes fits into the DHS mission. Education provides wellbeing, independence through opportunities, and empowerment.
- One of the federal wellbeing measures for child welfare is: children receive appropriate services to meet their education needs. This has been an area of our Child and Family Services Review (CFSR)/Program Improvement Plan (PIP)/Annual Progress and Services Report (APSR), where Oregon has consistently scored well. Our last review PIP review showed that 87.4% of cases were rated a strength.
- This service is necessary to remain in compliance with federal law, The Every Student Succeeds Act.
- School stability and access to achievement is an equity service.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No, this package, is not as a result of state or internal audits.

Quantifying results

5. How will DHS measure the success of this policy package?

DHS will develop a quality assurance plan to better understand the transportation cost and effectiveness of plans.

DHS will continue to monitor foster student, education outcome data, to determine the effectiveness of school stability on outcomes.

DHS will be monitored through the federal, Child and Family Services Review (CFSR) process, which measures child wellbeing and whether DHS provides appropriate services to meet the child's education needs.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

No.

7. What are the long-term desired outcomes?

The long-term goal is for students experiencing foster care, to have better education outcomes. Education outcomes are measured by graduation rates and performance measures in reading/language and math/science.

These are measured by ODE, through a data sharing agreement with DHS. Annual reporting is required, although a federal waiver is currently in place, due to the impacts of COVID-19.

School stability also helps students, socially and emotionally, by creating stable relationships with peers, teachers, school counselors, and other school connections. Foster students with special education needs, have a more continuous services plan, when they are not moving schools with every foster care placement change.

8. What would be the adverse effects of not funding this policy package?

If the policy package is not accepted, compliance with federal and state statutes, could be in jeopardy. DHS will have to make some decisions about which school of origin transportations will not be funded. This could be difficult, as foster students have the automatic right to remain in their school of origin. A student in foster care, can only attend their school of residence (if different from school of origin), if the juvenile court, makes a finding, which includes input from the child's team. Federal guidance has been very clear, that Best Interest decisions are made solely around the needs of the child and are not to be made around resource issues.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

An original budget of $700,000 GF, with related inflation growth, was identified to cover school transportation costs with the Department of Education. However, the costs in 19-21 increased to the extent that additional GF budget is required, with 21-23 cost estimated to be higher still.

10. What alternatives were considered and what were the reasons for rejecting them?

The agency has not considered other options. While the trajectory of the increasing transportation invoices, was not surprising, the amount increased significantly in Q2 of 2019, which arrived early in 2020.

One option would be to discontinue school of origin transportation on trial reunification foster cases. This would need to be amended in the 2021-2023 Inter-governmental agreement. This could be changed, due to the ESSA Foster Care definition, which says the child is "placed away from their parent." The cost of trial reunification cannot be easily extrapolated from OR-Kids, to know what that would reduce total cost by. It was also difficult for caseworkers, because child welfare is used to the term foster care, encompassing trial reunification.

Any other cost saving options would likely require statutory changes. There would likely be push-back from child advocates and community partners.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No, this policy package does not require any statute changes and is not connected to a legislative concept.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

The Oregon Department of Education (ODE), has primary responsibility of ensuring federal laws are followed. It is unclear what impact violations would cause. Federal and state audits are a part of The Every Student Succeeds Act, oversight. It is unclear whether ODE would suffer fiscal or budget impacts.

ODE has been working with Tribes to establish individual agreements with Tribes who have their own court systems and foster parents. This agreement would not impact DHS.

The juvenile court system is a vital partner to the school of origin process. Oregon is the only state that has the juvenile court make these findings. Oregon was one of the few states to have school of origin laws, many years, prior to ESSA. The previous state law had the juvenile courts make the Best Interest Findings, so that remained the same, when the law changed in 2017. This would be an operational impact.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

School of Origin Transportation costs are shared with Oregon Department of Education (ODE). ODE pays 70-90% of the cost, through the State School Fund, and DHS pays the remainder. The 70-90% rate is determined by ODE and varies per school district. ODE does not appear to be requesting funding.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

ODE posted its first graduation rate data for foster students, in December 2018. The graduation rate was 35%, compared to 77% for non-foster care students. Additionally, foster students are identified as having a disability and needing special education services at a higher rate than non-foster care students. The Every Student Succeeds Act (ESSA) created school of origin laws to help create school stability for students in foster care. The laws included no cost (to the student) transportation for foster students to continue in their school of origin.

School of Origin Transportation allows students in foster care, to remain in their school of origin, despite placement moves into and within foster care. The overall goal is for students in foster care, to have better educational outcomes and graduation rates due to school stability. National research has determined that each time a student moves schools, education achievement is set back, and foster care moves tend to increase that school disruption.

Staffing and fiscal impact

Implementation date(s): Ongoing

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

In the 09-11 Legislative session a total of $700,000 General Fund was set aside for the School of Origin Department of Education transportation. With biennial inflation and any budget reductions considered, the 21-23 General fund amount for this program is $827,194. DHS CW can draw down IV-E Federal Funds for IV-E eligibility children. In addition, Child Welfare can utilize Child Trust amounts for Other Funds. The Funding split is:

	GF	OF	FF	TF
Actual Split	50%	2%	48%	100%

The total revenue currently available in the 21-23 CW budget is:

	GF	OF	FF	TF
Actual Revenue 21-23	$827,194	$29,311	$797,285	$1,653,790

The 21-23 billed costs are expected to be $3.5 million Total Fund. Between 17-19 and 19-21 the services provided grew in cost by 272%. This level of growth is not assumed to continue. The 19-21 estimated costs compared to the 19-21 actual cost showed a difference of +23%. This percent is assumed to be the growth between 19-21 and 21-23 for actual billed services.

With the current budget and the projected 21-23 costs, DHS CW is requesting via this Policy Option Package TF of $1,855,181 (GF $927,925).

	GF	OF	FF	TF
Total Cost for 21-23	$ 1,755,119.00	$ 62,192.00	$ 1,691,660.00	$ 3,508,971.00
Current Budget	$ 827,194.00	$ 29,311.00	$ 797,285.00	$ 1,653,790.00
New Funding Needed	$ 927,925.00	$ 32,881.00	$ 894,375.00	$ 1,855,181.00

Further for future biennia CW is requesting that this area be considered for Exception pricing in the normal Current Service Level budget build.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

This policy package would not incur new responsibilities for DHS.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

There are no impacts to shared services.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant programs.

Funding this POP will assure that all foster children will continue to receive the school transportation.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

There is no staff or positions with this policy package.

20. What are the start-up and one-time costs?

Not applicable.

21. What are the ongoing costs?

The 21-23 TF cost is $3.5 million. With the current budget and the projected 21-23 costs, DHS CW is requesting via this Policy Option Package TF of $1,855,181 (GF $927,925).

	GF	OF	FF	TF
Total Cost for 21-23	$ 1,755,119.00	$ 62,192.00	$ 1,691,660.00	$ 3,508,971.00
Current Budget	$ 827,194.00	$ 29,311.00	$ 797,285.00	$ 1,653,790.00
New Funding Needed	$ 927,925.00	$ 32,881.00	$ 894,375.00	$ 1,855,181.00

Further for future biennia CW is requesting that this area be considered for Exception pricing in the normal Current Service Level budget build.

22. What are the potential savings?

Prior to the DHS and ODE cost sharing agreement, many school of origin transports were done by child welfare staff. Caseworkers and SSA's were used in some districts, to pick-up and drop-off children at school, when there were no other options. This plan saves valuable staff time.

23. What are the sources of funding and the funding split for each one?

DHS CW can draw down IV-E Federal Funds for IV-E eligibility children. In addition, Child Welfare can utilize Child Trust amounts for Other Funds. The Funding split is:

	GF	OF	FF	TF
Actual Split	50%	2%	48%	100%

Department of Human Services
2021-23 Policy Option Package

Division:	Child Welfare
Program:	Child Welfare
Policy package title:	Child Welfare Stability
Policy package number:	POP 118
Related legislation:	N/A

Summary statement:

The purpose of this request is to stabilize the Child Welfare program by attaining position authority for currently non-budgeted double-filled positions that are critical to Child Welfare operations and services. The agency and the Child Welfare program have historically used double fills to address workload needs that could not be met by budgeted positions. This package requests position authority for 99 positions (87.12 FTE) throughout various Child Welfare units as well as some Central office units that are critical to Child Welfare's stability.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	$15,859,656	$1,007,800	$9,359,622	26,350,078	99	87.12

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

When DHS and the Oregon Health Authority split in 2009, DHS was left without many key positions and resources to support its mission. In addition, DHS has adapted to changing needs mid-Legislative sessions to minimize disruptions in service and respond to various crisis situations. To continue serving Oregon's children and families as smoothly and efficiently as possible, DHS had to hire people when there were not available budgeted positions. To meet workload demands and gaps in services, two or more people have been hired on the same position number, resulting in "double fills" or non-budgeted positions.

While the use of double fills has allowed the agency to address immediate needs, it has complicated the budget for DHS programs. In order to finance these double fills, the agency has left authorized positions vacant, which means important work is not getting done. Attaining position authority will improve transparency around the budget, make effective position management more feasible, and ensure the stability of essential positions and functions that are critical to ongoing functionality of the Child Welfare program.

2. What would this policy package buy and how and when would it be implemented?

This package buys 99 positions, all of which are currently filled as non-budgeted positions at the time this POP was written (August 2020):

The agency will move the positions from non-budgeted to budgeted positions once the positions are available in the system.

3. How does this policy package further DHS's mission and align with its strategic plan?

In order to maintain the mission-critical work of keeping children safe and families stable, the agency must have a stable workforce. The work performed by Child Welfare's central office design team is essential to daily operations. Some functions these positions provide include creating and delivering trainings to ensure work is performed competently, analyzing and implementing federal funding requirements to maintain compliance, ensuring access to treatment services for children with behavioral health needs, and guiding the Child Welfare program toward racially equitable service delivery. The work performed by these positions ensures that Oregon's children and youth are safe and well and connected to their families, communities and cultural identities.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

The Oregon Secretary of State's 2016 audit of the foster care system resulted in several recommendations to improve the wellbeing of children and youth. Of those, the positions in this package are either directly or indirectly responsible for the implementation or maintenance of the following:

- Increasing staffing resources for Child Protective Services
- Increasing data-informed decision-making
- Cultivate a culture of transparency, responsibility, respectful communication, and professionalism using an array of leadership tools and measurable through an independent work environment survey
- Review the structure and organization of key child welfare programs to identify and understand long-standing issues and system weaknesses; set policy and communicate expectations to ensure appropriate implementation of changes; and ensure changes are not simply reorganizations or movement of employees, but help management to address root problems
- Review the Oregon Safety Model to ensure that staff fully understand and can apply key concepts and more effectively safeguard child safety

- Collect and use data to improve the foster care system
- Design a robust internal policy to reduce the risks of hoteling children by providing district caseworkers and office staff with clear protocols and operational support
- Commit to building foster placement capacity across the whole system for children with a range of behavioral, health-related, and cultural needs
- Develop a strategy for ending the practice of placing children in hotels
- Monitor caseworker caseloads, district staffing allocations, and the impact of turnover, overtime use, lack of experience, and FMLA use on caseloads to support equitable staffing allocations across the state
- Take actions to improve caseworker and staff training
- Work with the Department of Justice and the Legislature to improve caseworker access to legal representation and legal case management support
- Ensure that the central and district offices are in regular communication with field offices throughout the state and provide the necessary support and resources to field offices when requested

The audit also included clear recommendations for the agency to understand, clearly communicate, and advocate for program and staffing needs to the Legislature, to ensure the budget foundation necessary for stable program operations.

Finally, the positions in this package are responsive to the Governor's 2019 Executive Order related to the Child Welfare system, and the findings and recommendations of Alvarez and Marsal (A&M) consulting firm.

Quantifying results

5. How will DHS measure the success of this policy package?

The success of this policy package will be measured by the ability of the Child Welfare program to effectively manage their budget and position authority to meet their workload demands.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

Child Welfare KPM 4: Absence of repeat maltreatment of abused/neglected children
Child Welfare KPM 5: Timely reunification of foster children
Child Welfare KMP 6: Timely adoption once children are legally free
Child Welfare KPM 7: Disparity of foster youth achieving permanency
Child Welfare KPM 8: Children served by child welfare residing in parental home

7. What are the long-term desired outcomes?

The long-term desired outcomes are:

- Child Welfare program reduces its use of non-budgeted double-fills and exercises a rigorous process for reviewing new double-fill justifications.
- Child Welfare program has the necessary position authority to stabilize their budget and effectively allocate positions according to workload need
- The agency has the necessary support positions so that Child Welfare can focus on their core work.
- The agency increases transparency and clarity in the budget process

8. What would be the adverse effects of not funding this policy package?

Not funding this position package would result in:

- Continued use of double fills to meet workload demands
- Lack of stability and transparency in the Child Welfare budget
- Lack of stability in Central services to predictably support Child Welfare
- Holding positions vacant to fund double fills, resulting in less productivity in other areas of the agency

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

The Child Welfare program has used rigorous position management practices to steadily reduce the number of double fills. Whenever possible, vacant positions have been used to clear double fills. A strict review process has been implemented for justifying the creation of new double-fills and the practice has significantly decreased. The agency also worked closely with CFO, LFO and the Governor's office over the course of the past year to craft a position package that would be most effective in achieving the agency's key goals.

10. What alternatives were considered and what were the reasons for rejecting them?

Continue carrying double-fills and attempt to reduce them through attrition over time. This process would take several years to accomplish and would result in continued unstable and unsustainable position management practices as well as a lack of transparency in budgeting. Additionally, this option does not provide the agency the position authority and stable, trained staff needed to meet true workload demands.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

The agency has worked closely with the Chief Fiscal Office, Legislative Fiscal Office and Governor's Office over the course of the past year to identify agency and Governor's office priorities in shaping this package.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

The positions included in this package aid the Child Welfare program to provide competent, culturally responsive and appropriate services to children and families of color, as well as other historically marginalized communities across the state. Children of color have historically been overrepresented in the Child Welfare system and the outcomes of children of color, children with disabilities, and LGBTQ+ children have historically been poorer upon exiting the child welfare system. Several of the strategies the Child Welfare system is employing, and will continue to pursue with the support of these positions include:

- Collecting, analyzing, and disaggregating data to assess the well-being of children of color in the child welfare system
- Providing culturally responsive and appropriate supports and services to children and families, including treatment placements for children with behavioral health needs
- Contracting with culturally responsive providers for services such as foster parent recruitment and support and parent education

- Increase the understanding and skill level of Child Welfare employees to promote and work toward service equity
- Ensure proper implementation and maintenance of the tenets of the Indian Child Welfare Act (ICWA)
- Moving the Child Welfare system toward a system of prevention and family stability, preventing the need for removal whenever possible

Staffing and fiscal impact

Implementation date(s): October 1, 2021

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

This request is strictly for critical positions. The current cost of filled positions was used based on the current compensation plan. Positions were priced at 21 months to account for likely attrition. Normal S&S was added to the total as well as benefits and other "OPE".

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No these are all filled positions at the time of this POP was written doing current duties.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

An increased number of human resource transactions will further stress the DHS HR system. In addition, payroll and facilities will be impacted.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Total Position Count	99

20. What are the start-up and one-time costs?

Normal staffing costs.

21. What are the ongoing costs?

Staffing costs.

22. What are the potential savings?

There is the potential that through a review of structure with funded positions efficiencies may be found.

23. What are the sources of funding and the funding split for each one?

Varies depending on cost allocation. Hits all grants in CW and all grants in DHS for central.
Note on Shared Services: *Because of how shared services are budgeted there is also a cost of the same amount of Other Fund expenditure limitation in shared services less the assessment cost. This is simply the nature of Shared Services operations and does not cause a 'double-count' when netted against the request.*

Department of Human Services
2021-23 Policy Option Package

Division:	DHS
Program:	ODDS
Policy package title:	Implementation of the New Rate Models
Policy package number:	POP 119
Related legislation:	N/A

Summary statement:

To implement the single assessment tool for all children and adults, ODDS contracted with a third party entity to build provider rate models for the service groupings the assessment will provide. The contractor worked with stakeholders and performed market analysis to develop rates.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$34,414,903**	**$0**	**$66,874,523**	**$101,289,426**	**0**	**0.00**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

People with intellectual and developmental disabilities (I/DD) rely on Direct Support Professionals (DSPs) for daily support that enables them to live full lives in their communities. Challenges in finding, training and retaining this workforce persist and have reached crisis levels in the long-term services and supports (LTSS) industry.

In order to make intentional investment in the direct care workforce to support children and adults with I/DD, ODDS worked with stakeholders and an experienced contractor to develop new rate models for services delivered by provider agencies. New rate models have been developed that reflect updated service requirements for providers, current Bureau of Labor Statistics and Consumer Price Index information and updated provider cost survey data. Rates were developed for the following services:

- Children's 24-hour Residential Services
- Adult 24-Hour Residential Services
- Agency Attendant Care
- Day Support Activities, Community and Facility
- Employment Path, Community and Facility
- Small Group Employment
- Non-medical transportation

This POP is to requesting funding to transition to the new rate models on July 1, 2021.

2. What would this policy package buy and how and when would it be implemented?

ODDS is requesting $34,414,903 General Fund/$101,289,426 Total Fund to cover the cost of transition to the new rate models. This funding will cover transition from the old rate structure and groupings of individuals according to their level of need based on the old assessment instruments to the new Service Groups based Oregon Needs Assessment (ONA) and new rate model Payment Categories. The implementation will result in the weighted average DSP wage of 14.24/Hour.

3. How does this policy package further DHS's mission and align with its strategic plan?

This POP directly addresses issues around Agency Vision ("Safety, health and independence for all Oregonians") and multiple Agency goals, including:

1. People are safe and living as independently as possible – POP ensures that I/DD Provider agencies have stable and qualified workforce to ensure quality and continuity of services, individuals' health and safety, and maximum independence and integration into the community.

2. Culturally specific and responsive services are provided by highly qualified and diverse staff – POP provides ability to recruit, train and retain qualified workers, with the appropriate cultural and linguistic capacities, who are adequately compensated and incentivized to continuously advance their skills.

The direct support workforce is critical to ensuring that people with I/DD can live, work and contribute to their communities and be healthy and safe. This POP takes a series of actions to strengthen this workforce and promote I/DD as an in-demand field of work.

Department of Human Services
2021-23 Policy Option Package

ODDS Vision: People and families access quality supports that are simple to use and responsive to their strengths, needs and choices, while they live and thrive as valued members of their community.
ODDS Mission: ODDS, stakeholders, and the developmental disabilities community come together to provide services, supports, and advocacy to empower Oregonians with intellectual and developmental disabilities to live full lives in their communities.

Strategic goals:
1. Create a system that is sustainable and easy to use, with effective communication and equitable access.
2. Honor and support people to make their own choices about who they want to be and what they want to do in their life.
3. Support equal opportunity for living options and meaningful employment in an integrated community setting.
4. Provide families the amount and type of supports they need to raise their children at home, or when necessary, in another family home within their community.
5. Support people to live rich, full lives while providing for their health and safety.
Two-year actions:

1. Expand capacity and increase the quality of the long-term services and supports workforce that provides direct care to individuals with I/DD by advocating for funding of the new rate models that support better wages for workers and by making available options for workers to pursue career advancement opportunities within the field.
The direct support workforce is critical to ensuring that people with I/DD can live, work and contribute to their communities and be healthy and safe. This POP develops a process to ensure providers are able to keep up with growing costs.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No

Quantifying results

5. How will DHS measure the success of this policy package?

NCI Oregon Staff Stability Survey: average DSP wage increase over time, average turnover rate decrease over time.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

N/A

7. What are the long-term desired outcomes?

This POP would increase provider capacity to recruit and retain diverse workforce to provide quality culturally and linguistically appropriate services to individuals with I/DD and ensure adequate wages and benefits to those workers.

Implementation of the new rate models and transition to the use of the new Oregon Needs Assessment (ONA) will allow the I/DD service delivery system to move to an updated and transparent rate model and use of a single validated assessment instrument.

8. What would be the adverse effects of not funding this policy package?

Risks of not implementing the new rate models and assessment:

1. Continuation of high turnover rates and vacancy rates for DSPs, workforce shortage leading to health and safety risks for individuals receiving supports.

2. Misalignment with new assessment and rate models causing disparities in funding for the workforce and quality of services provided to people with I/DD.

3. Need to continue to administer multiple assessments for participants across different settings to meet federal requirements and to set rates, creating inefficiencies and unnecessary workload for CDDPs and Brokerages and imposing unnecessary burdens on individuals receiving services

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

During the 2019 Legislative Session, the Legislature granted ODDS $30 million General Fund to move into the new rate models. ODDS worked closely with stakeholders to identify a strategy to distribute the limited funding across all rates and services.

In response to the crisis in placement capacity for children with high needs, ODDS moved to fully implement new rate models for children's 24-hour residential services starting September 1, 2019, with the expectation that it will help providers grow capacity.

Since implementation of the new rate model, the number of provider agencies supporting children in 24-hour residential has increased from 10 to 14. A gain of 4 new providers, adding 18 new beds. In addition, 3 provider agencies are currently planning to open new group homes in June of 2020, which will increase total capacity to 192 (an increase of 8). The 15 bed capacity at SACU is not included in this data. Additionally, average DSP wage increased from $13.95/hour on July 2019 to $16.41/hour in January 2020.

All other services listed above received a 4% increase in August 2019. ODDS was planning to implement additional increase of 7% in July 2020, and transition to the new rate models and use of new service groups based on ONA in January 2021. Due to a contractor error that resulted in an underestimate of the cost to transition, ODDS requested additional $12.2 million in General Fund during 2020 Legislative Session in order to honor our commitment to move into the new rate models and fully fund the 7% increase we had committed to with stakeholders. That session ended unexpectedly.

Due to the COVID-19 pandemic and need to redirect efforts toward equipping the service delivery system to operate during the crisis and safeguard the individuals receiving services and the workforce, implementation of the new rate models has been delayed to July 1, 2021.

As of May 2020, $10.5 GF of the original $30 million GF investment for the 19-21 biennia has not been used. The plan for this funding changed when the contractor error was identified. As of July 1, 2020 this funding was used to support a 5% rate increase in the current rate models.

10. What alternatives were considered and what were the reasons for rejecting them?

Risks of not receiving additional fund for transition to the new rate models:

ODDS is able to transition to the new rate models and use the ONA assessment to determine level of reimbursement in a budget neutral way, however, that would create reductions in the funding level for several of the new rates. This is due to the costs that result from transitioning to new assessment and new rate model.

Part of that cost comes from transitioning from 6 Tier system under the previous rate model and assessment structure to 4 Payment Categories structure under the new rate model and assessment. Some Tiers are being consolidated to one Payment Category, resulting in a cost increase to some individuals in those Tiers. Additionally, transition to the use of new assessment will result in some individuals moving up, some individuals moving down, and some individuals staying in the same service level, compared to the previous assessment grouping structure. The cost of individuals moving up exceeds reductions from individuals moving down, resulting in additional cost to transition to the new assessment and Payment Categories.

To avoid the need to implement the new rate models in a way that results in reductions in the funding level for several of the new rates, ODDS is proposing this POP to support a move into the new rate models without any funding cut .

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

N/A

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

N/A

13. What other agencies, programs or stakeholders are collaborating on this policy package?

ODDS is collaborating with I/DD stakeholders including providers and provider organizations such as Oregon Resource Association (ORA), Community Providers Association of Oregon (SPAO), and Small Providers Association.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

POP supports providers resources to recruit, train and retain diverse workforce to provide quality, culturally agile supports to individuals with I/DD

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): On-going

15. What assumptions affect the pricing of this policy package?

Any rate increases leading up to new rate model implementation
Since this POP is not asking for full funding for new rate model implementation, assumptions around at what level ODDS will be able to implement the new rate models.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No impact

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No impact

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No change

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No new positions are needed.

20. What are the start-up and one-time costs?

None

21. What are the ongoing costs?

None

22. What are the potential savings?

N/A

23. What are the sources of funding and the funding split for each one?

Medicaid program and state general fund at the appropriate FMAP for specific service/rate.

Department of Human Services
2021-23 Policy Option Package

Division:	DHS
Program:	ODDS
Policy package title:	Additional Funding for the New Rate Models towards full implementation
Policy package number:	POP 120
Related legislation:	N/A

Summary statement:

To implement the single assessment tool for all children and adults, ODDS contracted with a third party entity to build provider rate models for the service groupings the assessment will provide. The contractor worked with stakeholders and performed market analysis to develop rates. This pop is requested to provide additional funding towards new rate models to move them closer to full implementation

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$36,612,999**	**$0**	**$69,940,223**	**$106,553,222**	**0**	**0.00**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

People with intellectual and developmental disabilities (I/DD) rely on Direct Support Professionals (DSPs) for daily support that enables them to live full lives in their communities. Challenges in finding, training and retaining this workforce persist and have reached crisis levels in the long-term services and supports (LTSS) industry.

In order to make intentional investment in the direct care workforce to support children and adults with I/DD, ODDS worked with stakeholders and an experienced contractor to develop new rate models for services delivered by provider agencies. New rate models have been developed that reflect updated service requirements for providers, current Bureau of Labor Statistics and Consumer Price Index information and updated provider cost survey data. Rates were developed for the following services:

- Children's 24-hour Residential Services
- Adult 24-Hour Residential Services
- Agency Attendant Care
- Day Support Activities, Community and Facility
- Employment Path, Community and Facility
- Small Group Employment
- Non-medical transportation

This POP is to requesting funding to transition to the new rate models on July 1, 2021.

2. What would this policy package buy and how and when would it be implemented?

ODDS is requesting $36,612,999 General Fund/$106,553,222 Total Fund towards moving the new rate models closer to full implementation. This POP is contingent on Policy Option Package #IDD01a requesting funding to cover the cost of transition to the new rate models without additional rate increases. POP #IDD01a will cover transition from the old rate structure and groupings of individuals according to their level of need based on the old assessment instruments to the new Service Groups based Oregon Needs Assessment (ONA) and new rate model Payment Categories. Funding in this POP will allow ODDS to implement the new rate models with an additional rate increase to move new rates closer to full implementation. Additionally, this funding will help smooth the transition by reducing negative impact to providers due to fluctuation in rates per person due to new assessment groupings. The implementation will result in the weighted average DSP wage of $15.31/Hour.

3. How does this policy package further DHS's mission and align with its strategic plan?

This POP directly addresses issues around Agency Vision ("Safety, health and independence for all Oregonians") and multiple Agency goals, including:

1. People are safe and living as independently as possible – POP ensures that I/DD Provider agencies have stable and qualified workforce to ensure quality and continuity of services, individuals' health and safety, and maximum independence and integration into the community.

2. Culturally specific and responsive services are provided by highly qualified and diverse staff – POP provides ability to recruit, train and retain qualified workers, with the appropriate cultural and linguistic capacities, who are adequately compensated and incentivized to continuously advance their skills.

Department of Human Services
2021-23 Policy Option Package

The direct support workforce is critical to ensuring that people with I/DD can live, work and contribute to their communities and be healthy and safe. This POP takes a series of actions to strengthen this workforce and promote I/DD as an in-demand field of work.

ODDS Vision: People and families access quality supports that are simple to use and responsive to their strengths, needs and choices, while they live and thrive as valued members of their community.
ODDS Mission: ODDS, stakeholders, and the developmental disabilities community come together to provide services, supports, and advocacy to empower Oregonians with intellectual and developmental disabilities to live full lives in their communities.

Strategic goals:
1. Create a system that is sustainable and easy to use, with effective communication and equitable access.
2. Honor and support people to make their own choices about who they want to be and what they want to do in their life.
3. Support equal opportunity for living options and meaningful employment in an integrated community setting.
4. Provide families the amount and type of supports they need to raise their children at home, or when necessary, in another family home within their community.
5. Support people to live rich, full lives while providing for their health and safety.
Two-year actions:

1. Expand capacity and increase the quality of the long-term services and supports workforce that provides direct care to individuals with I/DD by advocating for funding of the new rate models that support better wages for workers and by making available options for workers to pursue career advancement opportunities within the field.

The direct support workforce is critical to ensuring that people with I/DD can live, work and contribute to their communities and be healthy and safe. This POP develops a process to ensure providers are able to keep up with growing costs.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No

Quantifying results

5. How will DHS measure the success of this policy package?

NCI Oregon Staff Stability Survey: average DSP wage increase over time, average turnover rate decrease over time.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

N/A

7. What are the long-term desired outcomes?

This POP would increase provider capacity to recruit and retain diverse workforce to provide quality culturally and linguistically appropriate services to individuals with I/DD and ensure adequate wages and benefits to those workers.

Implementation of the new rate models and transition to the use of the new Oregon Needs Assessment (ONA) will allow the I/DD service delivery system to move to an updated and transparent rate model and use of a single validated assessment instrument.

8. What would be the adverse effects of not funding this policy package?

Risks of not implementing the new rate models and assessment:

1. Continuation of high turnover rates and vacancy rates for DSPs, workforce shortage leading to health and safety risks for individuals receiving supports.

2. Misalignment with new assessment and rate models causing disparities in funding for the workforce and quality of services provided to people with I/DD.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

During the 2019 Legislative Session, the Legislature granted ODDS $30 million General Fund to move into the new rate models. ODDS worked closely with stakeholders to identify a strategy to distribute the limited funding across all rates and services.

In response to the crisis in placement capacity for children with high needs, ODDS moved to fully implement new rate models for children's 24-hour residential services starting September 1, 2019, with the expectation that it will help providers grow capacity.

Since implementation of the new rate model, the number of provider agencies supporting children in 24-hour residential has increased from 10 to 14. A gain of 4 new providers, adding 18 new beds. In addition, 3 provider agencies are currently planning to open new group homes in June of 2020, which will increase total capacity to 192 (an increase of 8). The 15 bed capacity at SACU is not included in this data. Additionally, average DSP wage increased from $13.95/hour on July 2019 to $16.41/hour in January 2020.

All other services listed above received a 4% increase in August 2019. ODDS was planning to implement additional increase of 7% in July 2020, and transition to the new rate models and use of new service groups based on ONA in January 2021. Due to a contractor error that resulted in an underestimate of the cost to transition, ODDS requested additional $12.2 million in General Fund during 2020 Legislative Session in order to honor our commitment to move into the new rate models and fully fund the 7% increase we had committed to with stakeholders. That session ended unexpectedly.

Due to the COVID-19 pandemic and need to redirect efforts toward equipping the service delivery system to operate during the crisis and safeguard the individuals receiving services and the workforce, implementation of the new rate models has been delayed to July 1, 2021.

As of May 2020, $10.5 GF of the original $30 million GF investment for the 19-21 biennia has not been used. The plan for this funding changed when the contractor error was identified. As of July 1, 2020 this funding was used to support a 5% rate increase in the current rate models.

POP #IDD01a requests funding to cover the cost of transition to the new rate models without additional rate increases. This POP is contingent on that funding.

10. What alternatives were considered and what were the reasons for rejecting them?

Risks of not receiving additional fund for the new rate models:

ODDS is able to transition to the new rate models and use the ONA assessment to determine level of reimbursement in a budget neutral way, however, that would create reductions in the funding level for several of the new rates. This is due to the costs that result from transitioning to new assessment and new rate model.

Part of that cost comes from transitioning from 6 Tier system under the previous rate model and assessment structure to 4 Payment Categories structure under the new rate model and assessment. Some Tiers are being consolidated to one Payment Category, resulting in a cost increase to some individuals in those Tiers. Additionally, transition to the use of new assessment will result in some individuals moving up, some individuals moving down, and some individuals staying in the same service level, compared to the previous assessment grouping structure. The cost of individuals moving up exceeds reductions from individuals moving down, resulting in additional cost to transition to the new assessment and Payment Categories.

To avoid the need to implement the new rate models in a way that results in reductions in the funding level for several of the new rates, ODDS is proposing POP #IDD01a to support a move into the new rate models without any funding cut. This POP is contingent on that funding.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

N/A

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

N/A

13. What other agencies, programs or stakeholders are collaborating on this policy package?

ODDS is collaborating with I/DD stakeholders including providers and provider organizations such as Oregon Resource Association (ORA), Community Providers Association of Oregon (SPAO), and Small Providers Association.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

POP supports providers resources to recruit, train and retain diverse workforce to provide quality, culturally agile supports to individuals with I/DD

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): On-going

15. What assumptions affect the pricing of this policy package?

Any rate increases leading up to new rate model implementation
This POP is contingent on funding from POP #IDD01a
Since this POP is not asking for full funding for new rate model implementation, assumptions around at what level ODDS will be able to implement the new rate models.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No impact

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No impact

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No change

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No new positions are needed.

20. What are the start-up and one-time costs?

None

21. What are the ongoing costs?

None

22. What are the potential savings?

N/A

23. What are the sources of funding and the funding split for each one?

Medicaid program and state general fund at the appropriate FMAP for specific service/rate.

Total for this policy package

Department of Human Services
2021-23 Policy Option Package

Division:	DHS
Program:	ODDS
Policy package title:	ODDS Health Management Unit (HMU)
Policy package number:	POP 121
Related legislation:	N/A

Summary statement:

Creating a Health Management Unit to provide policy analysis, technical assistance, training and program management to DD providers, CMEs, individuals and families. ODDS has seen an increase of children and adults with medical support needs including those with very medically complex health conditions. This has been evidenced by the rise in referrals for all three categories (community nursing, Private Duty Nursing (PDN) and Direct Nursing Services (DNS)) of nursing as well as the medical/nursing technical and programmatic assistance requested from case management entities and providers. The central office does not currently have the positions and subject matter expertise needed to support the field.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$443,748**	**$0**	**$443,724**	**$887,472**	**4**	**3.52**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

ODDS has seen an increase of children and adults with medical support needs including those with very medically complex health conditions. This has been evidenced by the rise in referrals for all three categories (community nursing, Private Duty Nursing (PDN) and Direct Nursing Services (DNS)) of nursing as well as the medical/nursing technical and programmatic assistance requested from case management entities and providers. The central office does not currently have the positions and subject matter expertise needed to support the field.

2. What would this policy package buy and how and when would it be implemented?

The Policy Option Package proposes authorization and funding for four new positions for a Health Management Unit (HMU) within the Office of Developmental Disabilities Services for the purpose of providing policy analysis, technical assistance, training and program management to DD licensed and certified foster home providers, residential training home providers, supported living providers, self-advocates, families, and case managers supporting individuals with intellectual and developmental disabilities and complex medical support needs.

The central office does not currently have the positions needed to support the field. ODDS is requesting to staff four OPA 3 FTE positions with medical experience, ideally with Registered Nurses. With the positions the HMU would be able to:

- Give more immediate technical assistance to the field

- Act as the policy, research and liaison unit with ODDS Licensing & Certification Office, Children's Intensive In-Home Services Unit, Oregon State Board of Nursing, Oregon Health Authority Policy Office, and Oregon Health Plan/Coordinated Care Organization for better care coordination
- Work with the Pre-manage care system and quality assurance to proactively identify and assist with medical trends and coordinate training.

3. How does this policy package further DHS's mission and align with its strategic plan?

This POP directly addresses issues around Agency Vision ("Safety, health and independence for all Oregonians") and multiple Agency goals, including:

People are safe and living as independently as possible – POP ensures that case management entities, and providers have access to resources in order to meet the needs of individuals who have complex medical needs and ensure quality and continuity of services, individuals' health and safety, and maximum independence and integration into the community.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No

Quantifying results

5. How will DHS measure the success of this policy package?

1. ODDS will increase the number of technical assistance contacts from residential providers(24hr,FH&SL), CMEs and Self Advocates, families and guardian.
2. ODDS will be able to participate more fully to measure and increase OEMS health related equity measures and comply with REALD.
3. The ODDS nursing unit will help track hospitalizations for its population to better serve and advocate for children and adults and assist OHA and CCO to meet any measure for vulnerable populations.
4. A nursing unit will be able to provide analysis for health- related quality assurance measures and benchmarks.
5. The Nurses will help in completing medical criteria/assessments for medically complex children and adults being served in state plan (Private Duty Nursing) and waivered (Direct Nursing Services) programs.
6. A nursing unit would be able to analyze and assist in addressing Nursing recruitment for Nursing programs that support individuals with Intellectual and Developmental Disabilities.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS

N/A

7. What are the long-term desired outcomes?

The expected results include:

- The creation of a liaison position to work with OHA for the coordination of medical/nursing information and response during a significant medical or natural emergency/disaster. This may mitigate some of the negative impacts to those affected.
- More immediate medical technical assistance to residential and in-home providers (including their medical staff) to help assure the health and well-being of children and adults with medical support needs.
- Improved support (timely responses, health expertise, training, communication) to case management entities for the monitoring of Individual Support Plans, more healthy outcomes for those we support and to meet federal quality assurance requirements.
- The positions would allow ODDS to evaluate hospitalization outcomes/ trends, and better coordinate care with CCO's to help the overall health of the population of individuals with Intellectual and Developmental Disabilities and reduce costs.
- Program support for three types of specialized nursing services provided to individuals and children. The support would include technical assistance, training, policy guidance, recruitment, and coordination with OHA or APD services. This would help to increase utilization of nursing services and help reduce medical complications.

8. What would be the adverse effects of not funding this policy package?

Lack of training, technical assistance, and subject matter expertise can negatively impact outcomes for individuals receiving services, especially those with complex medical needs. This can lead to unnecessary risks to health and safety of individuals where needs are not being adequately met, individuals with complex medical needs not being able to reach highest level of community integration, employment goals, or other life goals captured in their Individual Support Plans. Lack of support to case managers can lead to poor planning and monitoring due to lack of technical assistance around complex medical needs, inability to creatively support individuals. Lack of training

and technical assistance support to providers may lead to inadequate quality of supports, risks to health and safety of individuals served.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

ODDS has increased contacts with APD assigned RN/OSBN Liaison to assist with Nursing issues. It has expanded duties of Health Management Specialist and Policy Program Analyst to cover medical and nursing issues. ODDS has attempted to contract out for Nurses to complete Nursing Criteria to alleviate Health Management Specialist workload.

10. What alternatives were considered and what were the reasons for rejecting them?

Consideration was given to contracting an RFQ for a recruitment agency to increase nurses for programs that directly serve adults and children within ODDS programs. While the request was not rejected the request came in just prior to the onset of Covid-19 and is not likely to be approved.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

N/A

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

N/A

13. What other agencies, programs or stakeholders are collaborating on this policy package?

ODDS is collaborating with I/DD stakeholders including providers and provider organizations such as Oregon Resource Association (ORA), Community Providers Association of Oregon (SPAO), and Small Providers Association, and Case Management Entities (CMEs)

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

This POP will provide resources to deliver technical assistance in a culturally agile way and will increase equitable access to services needed for individuals with complex medical needs.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): On-going

15. What assumptions affect the pricing of this policy package?

Four (4) OPA 3 FTE positions

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No impact

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No impact

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No change

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

N/A

20. What are the start-up and one-time costs?

None

21. What are the ongoing costs?

Ongoing costs of new positions

22. What are the potential savings?

N/A

23. What are the sources of funding and the funding split for each one?

Medicaid program and state general fund

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

People with intellectual and developmental disabilities (I/DD) rely on Direct Support Professionals (DSPs) for daily support that enables them to live full lives in their communities. Challenges in finding, training and retaining this workforce persist and have reached crisis levels in the long-term services and supports (LTSS) industry. Additionally, ODDS' current rate models were developed in 2007 and no longer reflect the service delivery and contain outdated assumptions and data.

In order to make intentional investment in the direct care workforce to support children and adults with I/DD, ODDS worked with stakeholders and experienced contractor to develop new rate models for services delivered by provider agencies. New rate models have been recently developed that reflect updated service requirements for providers, current Bureau of Labor Statistics and Consumer Price Index information and updated provider cost survey data.

One of the services that still needs a new rate model is Supported Living, it was not part of the initial rate development effort. New rate model for this service is necessary to ensure that all ODDS provider rates are set based on consistent assumptions around DSP wages and benefits and reflect most current service requirements and market data. Additionally, all services and rates for those services must be transitioned to the use of the new Oregon Needs Assessment (ONA). Implementation of the new rate model for Supported Living would allow to accomplish that.

Supported Living Services consist of individual support, delivered in a personalized manner, to adults with Developmental Disabilities based on the Individual's needs and preferences. These Services include attendant care, training, and support that promote opportunities for Individuals to live in their own home or apartment or

in their family home and to be part of and participate in the communities in which they live. Such services may include up to 24 hours per day of paid supports that are provided in a manner that protects the dignity of the individual. Supported Living served over 700 adults with I/DD.

Development of the Supported Living rate model was scheduled at a later date because it was contingent on finalization of service group framework and in-home hour ranges based on ONA. This work was completed early in 2020. Following that, ODDS moved forward with development of the new rate model for this service. This POP is to request funds to implement the new rate model for Supported Living.

Fully funding the new rate for Supported Living will assist with achieving a living wage for this critical workforce and ensure provider rates are aligned with appropriate status, value, respect and benefits for DSPs who provide vital services for people with I/DD. As a result of HB2684 passed in the 2017 session, providers are required to pass legislatively approved increases on to their DSP workforce.

2. What would this policy package buy and how and when would it be implemented?

This POP would fund implementation of the new rate model for Supported Living service to align with other new rate models and transition to the use of a single assessment instrument.

3. How does this policy package further DHS's mission and align with its strategic plan?

This POP directly addresses issues around Agency Vision ("Safety, health and independence for all Oregonians") and multiple Agency goals, including:

Department of Human Services
2021-23 Policy Option Package

1. People are safe and living as independently as possible – POP ensures that I/DD Provider agencies have stable and qualified workforce to ensure quality and continuity of services, individuals' health and safety, and maximum independence and integration into the community.

2. Culturally specific and responsive services are provided by highly qualified and diverse staff – POP provides ability to recruit, train and retain qualified workers, with the appropriate cultural and linguistic capacities, who are adequately compensated and incentivized to continuously advance their skills.

The direct support workforce is critical to ensuring that people with I/DD can live, work and contribute to their communities and be healthy and safe. This POP takes a series of actions to strengthen this workforce and promote I/DD as an in-demand field of work.

ODDS Vision: People and families access quality supports that are simple to use and responsive to their strengths, needs and choices, while they live and thrive as valued members of their community.
ODDS Mission: ODDS, stakeholders, and the developmental disabilities community come together to provide services, supports, and advocacy to empower Oregonians with intellectual and developmental disabilities to live full lives in their communities.

Strategic goals:
1. Create a system that is sustainable and easy to use, with effective communication and equitable access.
2. Honor and support people to make their own choices about who they want to be and what they want to do in their life.
3. Support equal opportunity for living options and meaningful employment in an integrated community setting.

4. Provide families the amount and type of supports they need to raise their children at home, or when necessary, in another family home within their community.
5. Support people to live rich, full lives while providing for their health and safety.
Two-year actions:

1. Expand capacity and increase the quality of the long-term services and supports workforce that provides direct care to individuals with I/DD by advocating for funding of the new rate models that support better wages for workers and by making available options for workers to pursue career advancement opportunities within the field.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No

Quantifying results

5. How will DHS measure the success of this policy package?

NCI Oregon Staff Stability Survey: average DSP wage increase over time; average turnover rate decreases over time.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS?

N/A

7. What are the long-term desired outcomes?

The new Supported Living rate model will:

1. Align Supported Living Rate model with DSP wage, benefits and other assumptions within other, already implemented rate models to ensure consistency and fairness.
2. Will transition Supported Living rate to the new Oregon Needs Assessment in order to comply with legislative directive to move the I.DD system to the single valid assessment instrument.
3. Reduce workload on Case Management Entities (CMEs) by removing the need to conduct multiple assessments and will reduce burden and respect the time and dignity of the individuals receiving services and their families.

8. What would be the adverse effects of not funding this policy package?

Risks:

1. Continuation of high turnover rates and vacancy rates for DSPs, workforce shortage leading to health and safety risks for individuals receiving supports

2. Misalignment with new assessment and rate models for other services causing disparities in workforce and quality of services provided to people with I/DD

3. Need to continue to administer multiple assessments for participants of this service to meet federal requirements and to set rates creating inefficiencies and unnecessary workload for case management entities and imposing unnecessary burdens on individuals receiving services

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Supported Living was part of the provider rate increases packages, most recent one implemented August 1, 2019 which provided 4% rate increase. However, that only marginally began to address DSW wage component.

4% increase got DSP wage in the current SL "rate model" to $12.35/hour
Additional 7% increase in July 2020 will get that DSP wage to $13.37/hour

10. What alternatives were considered and what were the reasons for rejecting them?

See #9

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

N/A

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

N/A

13. What other agencies, programs or stakeholders are collaborating on this policy package?

ODDS is collaborating with I/DD stakeholders including providers and provider organizations such as Oregon Resource Association (ORA), Community Providers Association of Oregon (SPAO), and Small Providers Association.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

POP supports providers resources to recruit, train and retain diverse workforce to provide quality, culturally agile supports to individuals with I/DD

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): On-going

15. What assumptions affect the pricing of this policy package?

Any rate increases leading up to new rate model implementation
Since this POP is not asking for full funding for new rate model implementation, assumptions around at what level ODDS will be able to implement the new rate models.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No impact

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No impact

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No change

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No new positions are needed.

20. What are the start-up and one-time costs?

None

21. What are the ongoing costs?

None

22. What are the potential savings?

N/A

23. What are the sources of funding and the funding split for each one?

Medicaid program and state general fund at the appropriate FMAP for specific service/rate.

Department of Human Services
2021-23 Policy Option Package

Division:	Department of Human Services
Program:	Office of Developmental Disability Services
Policy package title:	ODDS Licensing Staff to Provider Workload Model FTE Request
Policy package number:	POP 124
Related legislation:	N/A

Summary statement:

The number of providers requiring a licensing visit or follow up has increased 200% with no new staff. These homes are across the state and require visits occur within timelines identified by CMS. Without additional staff we cannot meet these timelines and risk over 68% federal funding

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$1,991,047**	**$0**	**$1,990,993**	**$3,981,980**	**19**	**16.72**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

The POP will add additional staff to ODDS Licensure and Quality Improvement Office to meet the growing workload needs associated with an increase of 750 licensed/certified providers since 2014 with no new staff, new Federal Rule changes and Centers for Medicaid and Medicare Services (CMS) requirements and achieve and sustain timely inspection intervals.

ODDS staff not only issues licenses and certifications for providers but also plays a huge part in investigations of neglect and abuse. With the large volume of new providers this important task is growing and there is not enough staff to sufficiently address this issue.

2. What would this policy package buy and how and when would it be implemented?

Staff and hiring will take three – six months so implementation will begin upon approval with recruitment.

3. How does this policy package further DHS's mission and align with its strategic plan?

Licensing staff are responsible to insure providers of individuals with IDD are qualified and when placed in a group home or foster home that the home is safe and meets the applicable rules. Without this check by the licensing unit we would not be able to sufficiently insure health and safety of individuals in our program. These staff also are charged with responding to complaints from family members or the individuals in the home to assess the issues. Staff may also be involved in closing down a home and assisting in relocation of the individuals when it is an imminent threat to health and safety.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

Internal reviews have determined that there are not sufficient staff to cover the state and the vast number of providers that require an onsite visit. *From August 2019 – March 2020, ODDS went through a workload model exercise with the DHS Workload Model Unit. The model is based on the Random Moment Sampling, number of license/certified providers we must visit and/or work on certifying or licensing. The model indicates that based on the number of providers and the current licensing staff we are only about to do less than 50% of the required work.*

Quantifying results

5. How will DHS measure the success of this policy package?

% of licensed providers who receive their site visits within the timeline identified in our 1915 K State plan.
% of abuse or neglect in these homes decrease with more timely visits.
% of providers who require a follow up visit declining
% of individuals happy in the homes they are living; customer satisfaction reports

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

Reducing abuse in licensed settings.

7. What are the long-term desired outcomes?

There are several critical needs and federal mandates that are increasing the workload on ODDS Licensing and Quality Improvement staff that necessitates additional personnel resources to ensure that health, safety and rights of the individuals are being protected in licensed and certified settings where services are provided to individuals with intellectual and developmental disabilities:

- CMS Home and Community Based HCBS Settings (HCBS) rules require the State to assure that all settings where Medicaid funded services are provided meet federal definition of home and community. In

order to comply, licensure and certification process of DD residential settings must be modified to incorporate review of compliance with HCBS rule, adding substantial workload to licensing staff.

- Per CMS guidance and to continually assure quality of services and assure health and safety of individuals served, ODDS increased frequency of licensure/certification reviews for Supportive Living providers and Day services providers to every two years, rather than every 5 years. Increased frequency of licensure/certification renewals and on-site reviews, as well, as the increase of these providers types require additional staff to implement.
- Additional workload pressures come with increasing demand for providers due to growing number of individuals served by I/DD system.

8. What would be the adverse effects of not funding this policy package?

Currently we are not able to maintain licensing visits at the level to meet the federal requirements. This leaves DHS at risk of losing federal funding for the licensed services which is ODDS' largest funded service. This potentially impacts the quality of services vulnerable Oregonians are receiving in two ways; 1) the ability to respond timely to client concerns about the services provided by providers while attempting to cover all scheduled reviews and 2) having enough staff time to work with new providers, impacting the number of providers available for individuals seeking services. ODDS is at risk of losing federal match funds which include FMAP and the additional 6% k match.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Staff are working to do as many visits as possible but there is not solution without additional staff. The number of providers has grown over 200% with no new staff. These homes are located all across the state and require eyes on site visits.

10. What alternatives were considered and what were the reasons for rejecting them?

Staff are working to do as many visits as possible but there is not solution without additional staff. The number of providers has grown over 200% with no new staff. These homes are located all across the state and require eyes on site visits.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

Individuals of IDD that live in licensed homes are either intellectually or developmentally disabled or both. This population is very vulnerable and leaving their homes without timely inspections may put them at significant risk.

Staffing and fiscal impact

Implementation date(s): _____

End date (if applicable): _____

15. What assumptions affect the pricing of this policy package?

The number of FTE indicated in the Workload Model and the number of FTE approved, any salary adjustments in the CBA.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

NO

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Possibly for the initial set up of the new staff.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

There will be changes to the number of homes each staff will be responsible to inspect and timelines. These inspections could have an impact on the providers or case management entities if the inspections bring negative findings.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

- *1 FTE PEMC to provide guidance and oversight*
- *9. FTE Client Care Surveyors for onsite reviews*
- *1 FTE Policy Analyst 3 - rule development, policy and processes, develop the training for individuals/agencies wishing to become providers, additional training for the existing providers and provide regular monitoring/implementation reports*
- *1 FTE Research Analyst 3 to develop and maintain data.*
- *1 FTE OPA2 to assist with the additional work of foster care certifications and monitoring of CME staff.*
- *3.26 Compliance Specialist 3's to perform the necessary work on all corrective actions, follow up and fee collection.*
- *2.42 FTE Office Specialist 2's*

What are the start-up and one-time costs?

Costs associated to a new employee, including a laptop.

1 What are the ongoing costs?

Payroll, mileage, travel expenses

2 What are the potential savings?

Saving the federal match for licensed homes which is the largest % of the IDD funds and more staff to handle the corrective action fees applied to providers.

3 What are the sources of funding and the funding split for each one?

General Fund and Federal Administration match. 50/50

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Department of Human Services
2021-23 Policy Option Package

Division:	DHS-Shared Services
Program:	Office of Payment Accuracy and Recovery (OPAR)
Policy package title:	Estate Administration Unit (EAU) Business Process Change/Program Integrity
Policy package number:	POP 125
Related legislation:	N/A

Summary statement:

The primary objective of the policy package is to increase estate recovery efforts for reinvestment in DHS programs and to improve integrity to DHS programs through increased communication, recovery, productivity, accuracy and efficiency. Additional revenue for DHS will be provided to the Adults and People with Disabilities (APD) Programs.

The Estate Administration Unit has a body of work (Surviving Spouse & Pending cases) that we currently are not actively working due to the lack of resources. With a new business process change in July 2019, we are required to notify and process any new Surviving spouse and Pending cases timely moving forward. Additionally, there are 15,000-25,000 cases that are not being worked timely and notifications are not being sent to the consumer in a timely manner. These cases have historically been a lower priority due to resource limits. However, with the change in business practice and additional staffing, we would like to work these cases as part of our normal operations.

With the large number of cases sitting untouched, we are losing revenue. To be able to

work the cases and sustain the ongoing new business process change with reviewing Surviving Spouse and Pending cases, we would like to add:
(2) Compliance Specialist 2s (CS2s)
(1) Administrative Specialist (AS1)
(1) Compliance Specialist 3 (CS3).
With the additional staff, and the work they will be producing, the expected result would be a minimum of $14,000,000 in additional recovery dollars each biennium.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$748,860**	**$643,241**	**$0**	**$1,392,101**	**4**	**3.52**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

As we move to implement a new business process change initiated by Rep. Stark, by way of constituent concerns, and working with APD leadership, the volume of letters written, research needed, claims calculated, calls received and ongoing work required on Surviving Spouse cases and Pending cases in EAU, we would minimally need (2) CS2s, (1) AS1 and (1) CS3.

As the CS2s research recovery efforts, they will require the AS1s to calculate thousands of additional claim work ups which will generate an increase in correspondence to family members which will in turn generate hundreds, if not thousands, of phone calls from family members, attorneys, personal representatives and other partners. The CS3 team will see a minimum of a 10% increase in caseloads as well. This increase in workload will not be manageable with our current staffing levels. EAU is currently closing hundreds of cases each month and has placed thresholds on what cases we can work within our critical timeframes and with the number of resources we have.

With an increase in staffing, EAU should expect to see ***over*** $14,000,000 in additional recovery each biennium. The personnel ***costs***, per biennium are as follows:

- (1) AS1 $174,270
- (2) CS2s $431,057
- (1) CS3 $243,887

The total biennium cost would be just over $800,000. These additional staff should help us maintain more timely responses to our families while increasing estate recovery for APD programs.

2. What would this policy package buy and how and when would it be implemented?

This POP would allow EAU to work the Surviving Spouse and Pending caseload that is currently deferred due to lack of resources. In addition, we would be able to better meet the demands of our consumers, attorneys, branch personnel and various other partners. To maintain program integrity, EAU needs to be working these cases, securing our recovery opportunities and notifying the family members in a timely manner. EAU would train up the new employees and immediately have them working the Surviving Spouse and Pending caseload. The employees would be able to identify and pursue current recovery options as well as secure future recovery by way of any real property assets.

3. How does this policy package further DHS' mission and align with its strategic plan?

Assuring timely processing of Surviving Spouse and Pending cases, ensuring we have secured assets for current and future recovery, and maintain program integrity with the recycling of our recovery dollars to assist those benefitting from APD programs.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

N/A

Quantifying results

5. How will DHS measure the success of this policy package?

OPAR has performance measures reported monthly for dollars recovered in EAU.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

The representatives work with us on this body of work.

7. What are the long-term desired outcomes?

New staffing levels would be maintained and unit operations, program integrity along with consumer satisfaction, will continue to improve. Recovery dollars will increase, especially over time due to the way in which EAU's cases stay open for months and years during the recovery process. Long term, EAU would have sufficient staffing resources to work all bodies of work to optimize estate recovery to reinvest into our APD programs. Minimize revenue loss due to lack of staffing.

8. What would be the adverse effects of not funding this policy package?

EAU will not be able to work and maintain the Surviving Spouse and Pending cases due to the need to prioritize the "current" cases to optimize recovery. Currently the Surviving Spouse and Pending cases are not being reviewed or worked, they are just sitting and waiting for review and potential action.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Process improvement activities have been undertaken and performance measures have been implemented. We continue to review these activities to improve upon our current business practices and to optimize recovery.

10. What alternatives were considered and what were the reasons for rejecting them?

We have already done process improvement, performance measures and allocated what resources we have in the most cost-effective way to address the "new" cases coming in the door. There are just not enough employees to get to the other bodies of work, hence revenue loss and untimely contact with our consumers and partners.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None

14. What is your equity analysis?

Status quo as this POP would not influence equity

Staffing and fiscal impact

Implementation date(s): 07/01/2021

End date (if applicable):

15. What assumptions affect the pricing of this policy package?

This work will continue to require a certain level of staff expertise, Compliance Specialist 2's and 3's. We might assume that this expert level staff may start at higher than step one on the salary range.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

New Staff:

(2) – Permanent, full time, Compliance Specialist 2 (24 months)
(1) – Permanent, full time, Compliance Specialist 3 (24 months)
(1) – Permanent, full time, Administrative Specialist 1 (24 months)

20. What are the start-up and one-time costs?

Nothing extraordinary: just hiring, onboarding, training, tracking results

21. What are the ongoing costs?

Standard PS and SS expenses

22. What are the potential savings?

Projected $14 million in additional recovery for the biennium if allotted all (4) staff.

23. What are the sources of funding and the funding split for each one?

General Fund (GF)

Categories:	PS	S & S	Total Cost
Compliance Specialist 3	176,834	38,016	214,850
Compliance Specialist 2	304,279	75,796	380,075

Total	**$748,860**	**$643,241**	**$0**	**$1,392,101**	**4**	**3.52**

Fiscal impact by program

	OPAR	Shared Svc Fund	SAEC	Program 4	Total
General Fund		$643,241	$105,617		**$748,860**
Other Funds	$643,241				**$643,241**
Federal Funds					**$0**
Total Funds	$643,241	$643,241	$105,617		**$1,392,101**
Positions	4				**4**
FTE	3.52				**3.52**

Because of how shared services are budgeted there is also a cost of the same amount of Other Fund expenditure limitation in shared services less the assessment cost. This is simply the nature of Shared Services operations and does not cause a 'double-count' when netted against the request.

Department of Human Services
2021-23 Policy Option Package

Division:	DHS Shared and Central Services
Program:	Office of Training, Investigation and Safety (OTIS)
Policy package title:	Third Party Investigations
Policy package number:	POP 126
Related legislation:	SB 155

Summary statement:

SB 155 requires the department to investigate all reports of child abuse. Historically, the department would not complete an abuse investigation where the alleged perpetrator was a third party (non-familial), when the parents were protective, and the allegation was referred to law enforcement.
SB 155 changed the landscape by putting the ultimate responsibility to complete an investigation on the department should law enforcement decide not to investigate and defining an investigation ensuring a detailed inquiry.
This POP anticipates all allegations of this nature will be sent to OTIS for disposition. Ultimately, the office requires additional resources to both address the new body of investigative work and to update the Child Abuse Management (CAM) System to track this data. These resources are necessary to address the estimated 5,000 allegations per year to be forwarded to OTIS for investigation. This is new work and therefore new resources will be required to avoid service level reduction in other Child Welfare program areas.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$8,245,863**	**$7,152,193**	**$0**	**$15,398,056**	**46**	**33.39**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

SB 155 requires the department to investigate all reports of child abuse. Historically, the department would not complete an abuse investigation where the alleged perpetrator was a third party (non-familial), when the parents were protective, and the allegation was referred to law enforcement. This was consistent with the statutory scheme prior to 2017. In 2017, the legislature enacted a new statute (ORS 419B.026) which provided that every child abuse investigation must conclude with a disposition of founded, unfounded or unable to determine. This applies to the department or any law enforcement agency conducting an investigation. One intended consequence of the new statute was to restrict the department's use of its Differential Response practice which did not require a disposition in every investigation. SB 155 changed the landscape in two significant ways: first, by putting the ultimate responsibility to complete an investigation on the department should law enforcement decide not to investigate; and second, by defining what constitutes an investigation and ensuring that it is a detailed inquiry.

Going forward, allegations of this nature are to be sent to OTIS for disposition. OTIS will be triaging and investigating the highest priority allegations as we build capability. Ultimately, the office requires additional resources to both address this increase in the number of investigations and to update the Child Abuse Management (CAM) System to track this data. These resources are necessary to address the almost 5,000 allegations per year now estimated to be forwarded to OTIS for investigation. This is new work and therefore new resources will be required to avoid service level reduction in other Child Welfare program areas.

2. What would this policy package buy and how and when would it be implemented?

This POP would provide the Office of Training, Investigations, and Safety (OTIS) with the resources needed to conduct child abuse investigations for this new body of work. Once positions and funding are provided, OTIS

will start hiring investigators, managers, hearings representatives, and other staff necessary to support this effort. It is anticipated a 4 phased approach will be needed for bringing on a staff of this size and would be completed with cohorted quarterly phase-ins over a 12-month period. Specifically, the POP would fund:

35 Investigator 3's
3 PEM C's Investigation Managers
3 AS-1s Investigator Support staff
1 AS-2 Hearings Support staff
3 CS-2 Hearings Representatives
1 OPA 3 Policy Analysts and Rules Coordinator
46 Total Staff

If approved, we would anticipate hiring to start in August 2021. As cohorts are trained, we would begin the process of triaging referrals and would begin investigating those of most serious concern first. Full phase in would be anticipate as of December 2022.

Funding also includes estimates for enhancing the Central Abuse Management (CAM) application to provide for inclusion of these investigations in the system.

3. How does this policy package further DHS's mission and align with its strategic plan?

Safety from abuse would be extended to those children and families where the alleged perpetrator is non-familial (nanny, athletics coach, neighbor, etc.) and to help prevent future occurrences by the perpetrator by founding a civil abuse and thereby barring the perpetrator from positions working with children where a background check is required.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No

Quantifying results

5. How will DHS measure the success of this policy package?

The ability to complete screening and abuse investigations timely and completely for this population of referrals.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

KPM 15—Abuse of people with developmental disabilities.

DHS Performance System fundamentals include “Timely abuse investigations”.

7. What are the long-term desired outcomes?

Reducing the amount of child abuse and holding perpetrators to account thereby limiting their opportunities to commit future child abuse.

8. What would be the adverse effects of not funding this policy package?

We would be out of compliance with statue requiring the investigation of Third Party in the situations described and perpetrators would not be held to account for child abuses they have committed. They would also be free to perpetrate abuse on other children directly impacting the health and safety of vulnerable Oregon children.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

This is a legislative mandate which requires very specific action by the agency. An evaluation of reallocating current resources from both CW and OTIS was conducted but was not ultimately a reasonable alternative.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives considered involved who would do the work. This is new work and regardless of who, additional resources would be needed.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

Provides more resources for child abuse investigations to be completed throughout the state including those effected by inequities or disproportionalities.

Staffing and fiscal impact

Implementation date(s): August 2021

End date (if applicable): NA

15. What assumptions affect the pricing of this policy package?

Assumes the ability to hire needed staff in 4 quarterly cohorts starting in August 2021.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

This is investigative work we currently perform for children in other environments including Child Caring Agencies, School settings, and Day Care. The referral of Third-Party offenders when the parent in not protective would be new work for the agency and OTIS.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

The addition of 46 staff would affect facilities and IT and other shared services functions supporting employees such as HR, Payroll, etc.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Each position is Permanent Fulltime and 24 months each biennium. The 46 positions consist of:

35 Investigator 3's (MMN X5233 AP) PF 24 mo
3 PEM C's Investigation Managers (MMS X7004 AP) PF 24 mo
3 AS-1s Investigator Support staff (OAH C0107 AP) PF 24 mo
1 AS-2 Hearings Support staff (OAH C0108 AP) PF 24 mo
3 CS-2 Hearings Representatives (MMN X5247 AP) PF 24 mo
1 OPA 3 Policy Analysts and Rules Coordinator (OAH C0872 AP) PF 24 mo
46 Total Staff

These positions are adding to those position types already servicing other client groups and programs. PD's are readily available upon request.

20. What are the start-up and one-time costs?

Startup cost for modifying the CAM system. Otherwise all cost would carry forward to subsequent biennia.

21. What are the ongoing costs?

Permanent positions

22. What are the potential savings?

None noted at this time

23. What are the sources of funding and the funding split for each one?

General Fund (GF) 100%

Because of how shared services are budgeted there is also a cost of the same amount of Other Fund expenditure limitation in shared services less the assessment cost. This is simply the nature of Shared Services operations and does not cause a 'double-count' when netted against the request.

24. What are the sources of funding and the funding split for each one?

Ultimately, these shared services expenditures would be cost allocated 100% to Child Welfare as these investigations serve this program area.

Department of Human Services
2021-23 Policy Option Package

Division:	Shared Service
Program:	Office of Payment Accuracy and Recovery, Overpayment Writing Unit
Policy package title:	National Directory of New Hires
Policy package number:	POP 127
Related legislation:	N/A

Summary statement:

This POP seeks to permanently fund three positions in the Office of Payment Accuracy and Recovery (OPAR) Overpayment Writing Unit (OWU) to process the National Directory of New Hires (NDNH) report. Two Human Services Specialists 2 (HSS2) positions and One Compliance Specialist 2 (CS2) position. The 2014 Farm Bill directs states to work the NDNH report which is a monthly data match that is a useful tool which aids in the identification of recently opened or recertified SNAP cases where customers may not be eligible to receive benefits due to unreported employment. OWU has one staff in a job rotation processing the report. The report supports program integrity efforts and OPARs goal of prevention, early detection, and quicker recovery of improperly paid benefits.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$497,908**	**$419,000**	**$0**	**$916,908**	**3**	**2.64**

Purpose

Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

The uncertainty of using an HSS2 Job Rotation to process the NDNH report needs to be alleviated by creating a permanent position. A second permanent HSS2 position will increase early detection and cost avoidance as well as allowing staff to fully work the report each month. A CS2 overpayment writer is needed to process the additional overpayment referrals generated and aid in recovery of overpaid benefits. OPAR seeks to maximize the NDNH report which generated $750,000 over the last biennium in cost avoidance and recovery.

1. What would this policy package buy and how and when would it be implemented?

This POP would allow for increased staff levels to process the NDNH data, supports prevention and earlier detection of improper payments which in turn will positively impact Oregon's payment error rate and increase cost avoidance and recovery of overpaid benefits.
Implementation will begin January 1, 2022 by following hiring protocols and filling the newly created positions.

2. How does this policy package further DHS's mission and align with its strategic plan?

Assuring timely review and processing of the NDNH report supports cost avoidance, overpayments and associated recovery which help to ensure the integrity of the SNAP program and reconstitute recoveries into the program.

3. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

N/A

Quantifying results

4. How will DHS measure the success of this policy package?

The additional cost avoidance and recovery for the biennium is projected at 1.4 million.

5. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

N/A

6. What are the long-term desired outcomes?

New staffing level would be maintained resulting in an increase to cost avoidance and recovery.

7. What would be the adverse effects of not funding this policy package?

The current process of using one HSS2 job rotation to review the NDNH report allows the worker to process a limited amount of data match hits which will leave the majority of the report untouched.

How achieved

8. What actions have occurred to resolve the issue prior to requesting a policy package?

Current practice is for one staff person on job rotation to process the report.

9. What alternatives were considered and what were the reasons for rejecting them?

None. At this point this body of work must be performed by workers. It was determined by Program that they do not wish this body of work to occur at the eligibility determination stage. We continue to use efficient best practices in accordance with LEAN.

10. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No

11. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

N/A

12. What other agencies, programs or stakeholders are collaborating on this policy package?

N/A

13. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

This policy package would allow additional review of ongoing SNAP cases and increased recoupment of funds returned to the agency to allow redistribution of resources which benefit populations in need.

Staffing and fiscal impact

Implementation date(s): 1/1/2022

End date (if applicable): N/A

14. What assumptions affect the pricing of this policy package?

Assuming that Oregon will need to maintain conformity to federal guidance that requires the continued use of NDNH.

15. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No

16. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No

17. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No change.

18. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

3 Additional FT Permanent staff: One = Compliance Specialist2 (24 months) and Two = Human Service Specialist2 (24 months)

19. What are the start-up and one-time costs?

Nothing extraordinary

20. What are the ongoing costs?

Standard PS add S&S expenses

21. What are the potential savings?

Projected 1.4 million in additional cost avoidance and recovery for the biennium

22. What are the sources of funding and the funding split for each one?

General Fund (GF)

Department of Human Services
2021-23 Policy Option Package

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services		$384,559	$0	**$384,559**	**3**	**2.64**
Services & Supplies	$78,908	$34,441		**$113,349**		
Capital Outlay						
Special Payments	$4**19,000**			**$419,000**		
Other						
Total	**$497,908**	**$419,000**	**$0**	**$916,908**	**3**	**2.64**

Fiscal impact by program

	OPAR	Shared Svc Fund	SAEC	Program 4	**Total**
General Fund		$419,000	$79,908		**$497,908**
Other Funds	$419,000				**$419,000**
Federal Funds					**$0**
Total Funds	**$419,000**	**$419,000**	**$79,908**		**$916,908**
Positions	**3**				**3**
FTE	**2.64**				**2.64**

Because of how shared services are budgeted there is also a cost of the same amount of Other Fund expenditure limitation in shared services less the assessment cost. This is simply the nature of Shared Services operations and does not cause a 'double-count' when netted against the request.

Department of Human Services
2021-23 Policy Option Package

Division:	DHS Shared Services
Program:	Occupational Health, Safety & Emergency Management
Policy package title:	Emergency Management
Policy package number:	128
Related legislation:	N/A

Summary statement:

Under ORS 401, Emergency Management Services, the Department of Human Services (DHS) is tasked with assisting in statewide emergency response activities during natural and man-made disasters. The DHS assigned responsibilities are to provide life sustaining care for all citizens that survive a disaster, commonly known as Mass Care. This includes the protection of children, families, the elderly, and individuals with access and functional needs. DHS is also responsible for facilitating statewide activities to deliver shelter, food, immediate medical care, behavioral health services, medications and many other critical disaster relief necessities. Accomplishing this mission includes the development of state emergency operations and recovery plans, developing and implementing agency specific plans, working as a member of the Oregon Emergency Response Council (OERS Council), coordinating statewide response operations with other state agencies and non-governmental organizations (NGO), developing and conducting internal and external training, tracking and vetting legislation tied to emergency response operations, and responding to Governor declared disasters which can require a 24 hour operations cycle.

Department of Human Services
2021-23 Policy Option Package

Currently the Department of Human Services has dedicated 0.75 FTE to these critical emergency response operations.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$471,209**	**$417,936**	**$0**	**$889,145**	**2**	**1.76**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

Historically agencies throughout Oregon have dedicated minimal resources to emergency management operations, however, in the last several years this concept of operations has changed significantly.

Each year Oregon is impacted by potentially devastating weather-related events such as ice storms, flooding, high winds and wildfires. The most notable response includes the COVID 19 pandemic and the Umatilla flash flooding in 2020, Winter storms that forced 10 counties to declare disasters in 2019 and Chetco Bar and Eagle Creek Fires in 2017, which required multiple evacuations. Each year wild land fires devastated multiple communities throughout Oregon affecting children, families and their community's economic capabilities. In early December of 2015 storms flooded several counties throughout NW Oregon and lead to a Presidentially declared disaster which is now providing public assistance to those communities. Oregon also experiences several human created tragedies that include industrial accidents and random acts of violence, most recently the tragedy at Umpqua Community College. All of these events tax the already underfunded resources in DHS. Currently the agency is not capable of responding to any disaster that would require immediate deployment for 24-hour response operations leaving survivors of disasters in harm's way and potentially increases further loss of life.

Devastating events on the Gulf Coast and Eastern Seaboard of the United States and the massive earthquakes and resultant tsunamis' in Indonesia and Japan have changed Oregon's view related to emergency planning, response and recovery operations at all levels of government, to include the Governor and the Legislature. Geologically, Oregon is exposed to the same earthquake and tsunami hazards that impacted Japan in 2011 and Indonesia in 2004. California, Oregon, Washington Oregon, Alaska and British Columbia Canada are all

evaluating the lessons learned from those devastating events and strengthening emergency response capabilities. As an OERS Council member, DHS will need to expand emergency management capabilities to ensure the agency can meet the ever-growing demands of a robust emergency management system for Oregon.

2. What would this policy package buy and how and when would it be implemented?

Oregon's emergency planning and operations continues to grow throughout all state agencies. The Governor, Legislative Representatives, and Emergency Management Officials recognize the need for Oregon's government to be prepared for disasters and to act quickly to protect its citizens. With that comes a growing expectation that all state agencies commit resources to developing, implementing and exercising emergency operations plans.

The state's most notable planning related to the Cascadia Subduction Zone has significantly expanded over the last three to four years. New statewide operational and recovery plans are in development, existing plans are being revised and the Oregon Legislature continues to receive and pass into law legislative bills specific to Oregon's emergency response operations. Most recently the Governor signed Executive Order 16-07, Governor's Disaster Management Framework, which directs the formation of the Governor's Disaster Cabinet and the Governor's Economic Recovery Council. These committees will require additional DHS resources on top of the responsibilities and obligations the agency already has.

Other emergency management changes within Oregon and nationally include:

- The COVID19 Pandemic has emphasized the need for additional staffing in this area. DHS has struggled to maintain mass care operations at the state enterprise level.
- In 2022 the State will participate in a National Level Exercise (NLE) with local jurisdictions, neighboring states and federal partners. This exercise is focused on the Cascadia Subduction Zone. She Oregon need to

respond to an actual 9.2 earthquake and resultant tsunami an estimated 1.5 million people will need mass care services.

- The Legislature has committed millions of dollars towards the seismic retrofitting of Oregon Public Schools to protect our children and educators.
- At the national level the US Military's Defense Support of Civil Authorities has identified the Cascadia Subduction Zone as a top ten national concern.

The outcome of adding 2 additional emergency management positions in the Occupational Health, Safety and Emergency Management Program will be to develop the agency's ability to adequately prepare for disasters, collaborate with other state agencies and NGOs to coordinate disaster response operations, meet the requirements outlined by the Governor, monitor legislative activity, train all stake holders, and, most importantly protect and serve the citizens that survive disasters in Oregon. Implementation to begin working towards meeting the minimum requirements would involve the following staff.

- +2 FTE Operations Policy Analysts 3
- Assist with the development and implementation of DHS emergency operations and recovery plans and collaborate with other state agencies during planning operations and emergency response exercises.
- Work with DHS Legislative Liaisons and the DHS Emergency Preparedness and Business Continuity Program Manager to track and monitor proposed legislative activity that may impact DHS operations
- Respond to the Oregon Emergency Coordination Center during Presidential or Governor declared disasters. Large scale disasters will require 24/7 operational support.
- Maintain situational awareness and communicate with the DHS Director and the DHS|OHA Emergency Preparedness and Business Continuity Program Manager during emergency response activities that impact DHS operations.

- Assist Oregon County Emergency Managers in the development of statewide emergency response operations and Support Oregon County Emergency Managers emergency response operations when disasters negatively impact county resources.
- Design, develop, and operate a DHS Agency Operations Center for disaster response operations.
- Develop testing and exercise programs for DHS|OHA operations
- Develop, coordinate and deliver emergency management training
- Provide family emergency preparedness training to all employees of DHS|OHA

*Note: Emergency management, and family preparedness training will cover approximately 11,000 employees and 200 locations statewide and will also include external stakeholders

This POP creates and provide resources for DHS to begin to meet its minimum obligations to protect and serve Oregonians and would provide much needed resources to allow for work with other state, local and county governments to adequately respond to disasters of all sizes, and serve the requests of the Governor in times of crisis. This POP also provides DHS with the capabilities to prepare, plan, and train its employees and external stakeholders on emergency response operations which will reduce loss of life, restore DHS client safety and benefits more quickly, and aid in a more efficient economic recovery for state and local governments and business, large and small.

3. How does this policy package further DHS's mission and align with its strategic plan?

As federal and state governmental expectations regarding emergency management operations change, so must the expectations of leadership in DHS. DHS' vision, mission and goals all focus on the safety, health and independence for all Oregonians. It is critical that DHS is positioned to meet the agency's vision, mission and goals during the good times and in times of crisis when the citizens of Oregon need assistance the most.

Properly funding the DHS Occupational Health Safety and Emergency Management Program will further our capabilities and allow us to better serve and protect children, families, the elderly, persons with access and functional needs, and others who depend on us today and adjust our operations to provide services for those who may depend on us after a disaster. We must remain accountable to the people we are here to serve at all times.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS measure the success of this policy package?

Implementation plans and timelines will be established to ensure the agency is developing capabilities to meet its current and future responsibilities. Ultimately the success of this POP will be measured by the progress of emergency planning development and implementation, exercise and testing and our capabilities increase.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

Although this POP is not directly tied to a particular performance measure, whether it be a Key Performance Measure or QBR Performance Measures, having an organized management structure to respond during emergencies is critical.

7. What are the long-term desired outcomes?

Properly funding the DHS Occupational Health Safety and Emergency Management Program will further our capabilities and allow us to better serve and protect children, families, the elderly, persons with access and functional needs, and others who depend on us today and adjust our operations to provide services for those who may depend on us after a disaster. We must remain accountable to the people we are here to serve at all times.

8. What would be the adverse effects of not funding this policy package?

Failure to fund this POP will generate several negative impacts which include:

- Citizens impacted by disasters will be less likely to receive life sustaining disaster relief necessities in times of crisis.
- Children and the elderly who survive a disaster will be at a heighten risk of neglect and abuse.
- The potential for post disaster harm or additional loss of life will increase.
- DHS will be unable to adequately respond to requests from the Governor, other collaborating agencies and NGOs during a disaster.
- DHS will continue to lack the resources to meet its current responsibilities outlined in ORS 401, Emergency Management Services, Governor's Executive Order 16-07, Governor's Disaster Management Framework, Oregon's Emergency Operations Plan, the Cascadia Playbook, and the Oregon Recovery Plan.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

More recently attempted alternatives were to use existing internal resources and rely on the voluntary efforts of other state agencies and NGO's. Although partners such as the Department of Administrative Services, the

Oregon Health Authority, Oregon Housing and Community Services and the American Red Cross are interesting in helping they have their own emergency management programs to attend to. Although some progress has been made this alternative is unreliable and unsustainable.

10. What alternatives were considered and what were the reasons for rejecting them?

Historically the alternative has been to develop ad hoc responses to disasters as they arose. This is a high-risk solution that invites error and poor judgment. Decision-making is made with little or no information and usually without coordination with other organizations. An example of this arose from the Vernonia floods of 2007. DHS stood up its D-SNAP program during the same time the Oregon Food Bank was distributing food to those in need. Since funding for both programs comes from the same source at the USDA only DHS was allowed to have expenses reimbursed. Preplanning and collaboration prior to the floods would have established systems so that both DHS and the Oregon Food Bank could work collectively, and both be reimbursed for their services.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

(State level) Office of Emergency Management and Oregon Health Authority would benefit from the addition of these permanently funded resources in DHS.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This POP results in a positive impact. State, County, Tribal and local governmental agencies will be positively impacted by this POP. The ability for DHS to meet its minimum obligations by developing, implementing and executing statewide mass care strategies will reduce disaster response times, increase protections and services to survivors of disasters and accelerate individual, community, and state economic recovery.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

Individuals with Access and Functional Needs are an underserved population in emergency management operations. External resources that aided DHS in protecting this population were voluntarily provided through the Oregon Office on Disability and Health via a CDC grant. The grant funding expired June 30, 2016 and left a significant gap in Oregon's capabilities to address these concerns.

In emergency management persons with Access and Functional Needs include individuals whose pre-disaster circumstances create barriers to obtaining or understanding information, or the ability to react as the general population in order to respond to public safety instructions, and access to services. Circumstances that may create barriers include, but are not limited to age, physical, mental, emotional or cognitive status, cultural, ethnic, religion, language, citizenship or socio-economic status.

This POP would include development of statewide plans and implementation of those plans, provide assistance and outreach to local and county governments, and collaborate with other stakeholders and organizations in an effort to reduce the risk to Access and Functional Needs Communities.

Staffing and fiscal impact

Implementation date(s): October 1, 2021 for all positions

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

The policy package is requesting standard position, services & supplies funding for 21 months in 2021-23.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No. This POP is to meet existing DHS obligations.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No, it should be a minimal impact which can be absorbed into current Shared Services Human Resources operations.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

2 permanent full-time Operations Policy Analyst 3 positions will be added for 21 months in 2021-23.

20. What are the start-up and one-time costs?

No additional start-up costs beyond standard position-related costs.

21. What are the ongoing costs?

Just standard position-related costs.

22. What are the potential savings?

None.

23. What are the sources of funding and the funding split for each one?

General Funds and non-add Other Funds limitation to support the Shared Services limitation need.

Total for this policy package

Department of Human Services
2021-23 Policy Option Package

Division:	DHS Shared Services
Program:	Occupational Health, Safety & Emergency Management
Policy package title:	Continuity of Operations
Policy package number:	129
Related legislation:	N/A

Summary statement:

The Department of Human Services (DHS) is required to develop and maintain a comprehensive continuity of operations plan (COOP). Policy requirements include DAS Policy 107-001-010 and DHS|OHA Policy 010-006. Funds received from the Federal Government to carry out many state-led programs will also list COOP and disaster recovery plans as requirement in the funding stream.

Currently the DHS has dedicated 0.75 FTE to develop and implement a comprehensive business continuity program that covers nearly 10,000 employees and 200 locations statewide.

Business continuity management is a required business practice of ensuring that DHS|OHA can execute its mission critical functions through all circumstances, and it is a fundamental responsibility to our clients and stakeholders. DHS|OHA is not adequately prepared to respond to an unplanned business interruption such as a major disaster, power outage, loss of a facility, or significant geographical weather event. Many of the mission critical functions required to be carried out during an unplanned business interruption have not been defined and do not have

plans for reengaging the essential infrastructure (building, IT systems) nor resourcing (employees) in the event of a crisis.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$471,209**	**$417,936**	**$0**	**$889,145**	**2**	**1.76**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

Historically minimal resources have been committed to Business Continuity Management. In 2009 DAS policy set forth requirements for all state agencies to develop, implement, test and maintain COOPs. Meeting the DAS Policy and other Federal requirements for a comprehensive COOP has been a struggle for DHS|OHA due to the size of the organizations and the lack of resources committed to the program. Today 0.75 FTE is dedicated to developing and implementing Business Continuity Plans for nearly 10,000 employees and 200 hundred locations throughout Oregon. This minimal support for business continuity management is not uncommon in government, however, due to numerous events over the last several years this concept of operations is beginning to change.

Disasters throughout the United States and the world have brought into focus the importance of government's necessity to survive a disaster or unplanned interruption of services, quickly recover from the event and return to normal operations. The Federal government requires all Federal agencies to develop and maintain and Business Continuity Plans, referred to as a Continuity of Operations Plan (COOP), and continues to emphasize to State governments and Tribal Nations the necessity to develop continuity of operations plans that align with the federal government. Today most federal funding that is received by state and local governments and federal contractors requires the development and implement a COOP. DHS is also required to work in conjunction with other state agencies to develop, implement, test and maintain COOPs.

DHS Executive management has renewed commitment to the business continuity planning process in the last two years. DHS|OHA has adopted an agency specific policy, an enterprise COOP charter, and organized an Enterprise Business Continuity Governance Council. Although these are positive steps in securing our

capabilities to provide critical services, the agency is beginning to realize that more resources are necessary to achieve success with business continuity management.

2. What would this policy package buy and how and when would it be implemented?

DHS needs to look to the future and plan for the unexpected. Comprehensive Business Continuity Plans effectively prepare employees to respond to unplanned business interruptions, maintain critical business services and keep our clients stable and out of harm's way. Each year over 1 million Oregonians depend on the services provided through DHS. These services must continue regardless of circumstances that might negatively impact DHS operations and services.

A snapshot of services provided to Oregonians was presented to the Legislature in early 2015. DHS services at that time included:

- 5,437 adults and 10,630 children are under Protective Services to keep them safe
- 6,831 domestic violence victims were provided safety services
- 1 in 5 Oregonians receive food benefits to prevent hunger
- 52,990 low income families receive TANF cash assistance
- 387,318 seniors receive meals and health services
- 36,858 seniors and people with disabilities are assisted with daily living activities
- 22,441 people with developmental disabilities were provided assistance to help them live safely and independently

In addition to the 1 million people depending on our services, a significant statewide or regional disaster will create a surge of new clients that may have not required are services previously. Every year Oregonians who do not normally rely on DHS for services are displace or negatively impacted by disasters. DHS needs to be

prepared to not only deal with its current clients but provide the same services and care to the potential surge from disaster survivors.

The outcome of the POP will ensure that DHS can begin to develop a strong, comprehensive business continuity program. This will safeguard Oregonians who depend on the agency for their safety and wellbeing and who are protected and continue to receive critical services during times when DHS capabilities have been limited from a negative unforeseeable event. This POP creates a Business Continuity Management Unit housed within the DHS Emergency Management Program

Implementation to meet the minimum requirements would involve the following staff:

- +2 FTE Operations Policy Analyst 3 (permanent)
  - Assist with the development and implementation of COOP for field offices and DHS|OHA business functional areas that support field activities.
  - Work with OIS to ensure that COOPs align with the DHS|OHA IT disaster recovery plans.
  - Provide leadership and guidance to all levels of management regarding COOP operations.
  - Provide leadership and guidance to the executive leadership during a continuity of operations event.
  - Evaluate business continuity management goals and objectives and make recommendations for changes when necessary.
  - Ensure that comprehensive continuity of operations planning at the enterprise level remains consistent.
  - Assist with the coordination of the DHS|OHA Enterprise Business Continuity Management Governance Council
  - Evaluate DHS|OHA COOP policies and protocols and make recommendations when necessary.

- Develop, implement and maintain an ongoing COOP Testing and Training Program
- Provide technical support for the implementation of DHS|OHA comprehensive business continuity plans
- Assist with the COOP implementation and training for all 16 business continuity planning Districts throughout the state and with other business functional areas. This implementation and training will cover all 10,000 employees and 200 locations managed by DHS|OHA throughout Oregon.
- Advise the Emergency Preparedness and Business Continuity Program Manager on COOP implementation progress

3. How does this policy package further DHS's mission and align with its strategic plan?

Without an adequately developed COOP, DHS will not be capable of effectively meeting the agency's mission and goals during times of crisis. DHS' vision, mission and goals all focus on the safety, health and independence for all Oregonians. It is critical that DHS is positioned to meet the agency's vision, mission and goals during the good times and also in times of crisis when the citizens of Oregon need assistance the most. Properly funding business continuity programs for DHS ensures that the agency will be able to provide uninterrupted critical safety, wellness, and life safety services regardless of circumstances.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS measure the success of this policy package?

Implementation plans and timelines have been established to ensure the agency is developing capabilities to meet its current and future responsibilities. Ultimately the success of this POP will be measured by the implementation and testing of business continuity plans and our increased capabilities to protect Oregonians in times of crisis.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

Although this POP is not directly tied to a particular performance measure, whether it be a Key Performance Measure or, having an organized management structure to respond during emergencies is crucial. Failure to develop, implement and maintain business continuity plans will ensure that DHS is unable to meet any of its performance measures in times of crisis.

7. What are the long-term desired outcomes?

A desire to move COOP from development and initial implementation to a sustainable program.

8. What would be the adverse effects of not funding this policy package?

Without strong Business Continuity Plans, we potentially expose our clients to unacceptable hazards and a reduced standard of living and will not be able to effectively provide critical services to clients during an unplanned business interruption or major disaster. Some of these services include:

- Supplemental Nutritional Assistance Program (SNAP) Benefits
- Newborn screening
- Temporary Assistance for Needy Families (TANF)
- Immediate Trauma and Crisis Assistance
- Response to Elderly or Child Abuse Claims
- Core Function Public Health Laboratory Testing
    - Infectious, communicable, genetic, and chronic diseases
- Protective services for adults and children
- Safety services for victims of domestic violence
- Adult and Child Protective Services

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Although there have been many successes for short term operations the current resource of 0.75 FTE is not capable of moving COOP from development and initial implementation to a sustainable program. COOP training alone for 10,000 employees in 200 locations throughout the state significantly overwhelms exiting resources.

10. What alternatives were considered and what were the reasons for rejecting them?

DHS has struggled with the development and implementation of business continuity programs. This struggle was partially due to the complexity of creating a comprehensive plan, the size of the organization and the recognition at the enterprise level that more resources were necessary. The limited resources that are committed to the process result in a few individuals leading both COOP events and emergency management operations concurrently without adequate depth of personnel to lead long term operations. This became most evident during the COVID19 response when untrained personnel filled operation rolls with little or no understanding of COOP and emergency management operations. in a few small successes and no clear path to an enterprise plan

Although there have been many successes for short term operations the current resources of 0.75 FTE are not capable of moving COOP from development and initial implementation to a sustainable program. COOP training alone for 10,000 employees in 200 locations throughout the state significantly overwhelms exiting resources.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

DHS|OHA continuity of operations management will also play a significant role in Oregon's overall continuity of government operations during regional and statewide disasters. DHS is responsible for statewide mass care strategies and Oregon Public Health is responsible for facilitating health and medical resources under Oregon's

Emergency Operations Plan and State Recovery Plan. DHS and OHA are also required by statute to be an active member with the Oregon Emergency Response System which is activated for disasters and will be required to serve on the Governor's Disaster Cabinet and Economic Recovery Council at the request of the Governor. Without effective business continuity plans DHS|OHA will be unable to fully meet these obligations.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

N/A

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

DHS serves over one million Oregonians annually. A large majority of those services are provided to under privileged children and adults, low income families, people with access and functional needs, and persons with disabilities.

This POP provides the necessary resources to develop programs, training, and implementation strategies to protect and serve the populations that rely on our critical services.

Staffing and fiscal impact

Implementation date(s): October 1, 2021 for all positions

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

The policy package is requesting standard position, services & supplies funding for 21 months in 2021-23.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No. This POP is to meet existing DHS obligations.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No, it should be a minimal impact which can be absorbed into current Shared Services Human Resources operations.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

2 permanent full-time Operations Policy Analyst 3 positions will be added for 21 months in 2021-23.

20. What are the start-up and one-time costs?

No additional start-up costs beyond standard position-related costs.

21. What are the ongoing costs?

Just standard position-related costs.

22. What are the potential savings?

None.

23. What are the sources of funding and the funding split for each one?

General Funds and non-add Other Funds limitation to support the Shared Services limitation need.

Total for this policy package

Department of Human Services
2021-23 Policy Option Package

Division:	Department of Human Services
Program:	Self-Sufficiency
Policy package title:	Survivor Investment Partnership
Policy package number:	POP 130
Related legislation:	N/A

Summary statement:

In partnership with the Governor's Office, DHS Self-Sufficiency is proposing the Survivor Investment Partnership (SIP) Program to increase accessibility of advocacy services and meaningful financial support to survivors of domestic violence and sexual assault including Tribal members, individuals without children, and vulnerable populations. Domestic violence is prevalent nationally and in Oregon. Domestic Violence is disproportionally prevalent in vulnerable populations:

- Prevalence rates for Tribal members experiencing domestic violence is at 44%[1] nationally.
- In Federal Fiscal Year 2018, 21.5%[2] of children in Child Welfare that were victims of Child Abuse were children of color.

Survivors of domestic violence and sexual assault need access to culturally responsive advocacy services and meaningful financial support. There are high rates of domestic and sexual violence in Oregon and services to support survivors are underfunded. There are current gaps in services, where culturally specific

[1] https://www.cdc.gov/violenceprevention/pdf/NISVS-StateReportBook.pdf
[2] https://www.oregon.gov/DHS/CHILDREN/CHILD-ABUSE/Documents/2018-Child-Welfare-Data-Book.pdf

services are not available across the state, there is a need for additional services in Tribal Communities, and survivors of domestic violence and sexual assault (DVSA) need access to funding that both supports underserved and vulnerable populations and that is accessible and meaningful.

Maintaining the current funding structure has already proven ineffective and left survivors without adequate financial support to address their safety needs, such as finding safe and stable housing or gaining access to culturally responsive DVSA services. The current structure is not culturally responsive across the state and does not include the valuable partnerships with Oregon Tribes and Culturally Specific DVSA providers.

DHS clients, DVSA survivors will continue to face safety challenges that present a barrier to creating self-sufficiency without access to meaningful advocacy resources coupled with financial support. Furthermore, DVSA survivors that are disproportionately affected will be affected at an even higher risk.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$23,729,676**	**$0**	**$0**	**$0**	**4**	**3.52**

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

In partnership with the Governor's Office, DHS Self-Sufficiency is proposing the Survivor Investment Partnership (SIP) Program to increase accessibility of advocacy services and meaningful financial support to survivors of domestic violence and sexual assault including Tribal members, individuals without children, and vulnerable populations.

Domestic violence is prevalent nationally and in Oregon. Domestic Violence is disproportionally prevalent in vulnerable populations:

- Prevalence rates for Tribal members experiencing domestic violence is at 44%[3] nationally.
- 2017 Adult Protective Services reports show out of 3,672[4] founded community allegations investigated for abuse, 85% of those cases were individuals that may have experienced some form of domestic violence
- In Federal Fiscal Year 2018, 21.5%[5] of children in Child Welfare that were victims of Child Abuse were children of color.

Survivors of domestic violence and sexual assault need access to culturally responsive advocacy services and meaningful financial support. There are high rates of domestic and sexual violence in Oregon and services to support survivors are underfunded. There are current gaps in services, where culturally specific services are not available across the state, there is a need for additional services in Tribal Communities, and survivors of domestic

[3] https://www.cdc.gov/violenceprevention/pdf/NISVS-StateReportBook.pdf
[4] Internal APS Fast Facts 2017 Report
[5] https://www.oregon.gov/DHS/CHILDREN/CHILD-ABUSE/Documents/2018-Child-Welfare-Data-Book.pdf

violence and sexual assault (DVSA) need access to funding that both supports underserved and vulnerable populations and that is accessible and meaningful.

According to the Hotline (National Domestic Violence Hotline), 1 in 4 women and 1 in 7 men have experienced severe physical violence by an intimate partner in their lifetime[6]. These individuals are accessing services, requesting help, and looking for an avenue for support.

According to the CDC Violence Prevention State by State report from 2010-2012, released in 2017, Lifetime prevalence of sexual violence, physical violence, and/or stalking by an intimate partner woman has a National average of 37.3%. In the state of Oregon that prevalence is 39.8%. For men, the national average is 30.9% and in Oregon the average is 36.2%[7]. Furthermore, domestic violence greatly impacts the Oregonians accessing Self-Sufficiency Programs or engaged with the Child Welfare Program. National prevalence of domestic violence of women receiving welfare is reported at 22.9%[8]. When looking at the Oregon Child Welfare, 29.7% of Child Protective Services family stressors were domestic violence[9].

Reviewing the statewide crisis response provided by Oregon Domestic and Sexual Violence Assault (DVSA) non-profit programs, in 2018 out of 128,786 calls for help received, 84% of those calls were related to domestic violence[10]. In the state of Oregon, domestic violence is a prevalent factor in many family's lives.

2. What would this policy package buy and how and when would it be implemented?

Department of Human Services
2021-23 Policy Option Package

This policy package would start the Survivor Investment Partnership program and further invest in the working Co-Located Domestic Violence Advocacy Program. This policy package would (1) buy intergovernmental agreements with Oregon Confederated Tribes for domestic violence services for Tribes, (2) contracts with domestic violence sexual assault (DVSA) non-profit agencies for advocacy services in DHS Self-Sufficiency and Child Welfare offices, (3) contracts with Culturally Specific DVSA non-profit agencies for advocacy services and contracts to build a statewide culturally responsive network by offering technical support statewide to DVSA providers, and (4) establish a contract for a technical assistance position to support statewide capacity and collaborations for culturally specific service providers to enhance and support culturally specific services. This policy package includes flexible funding for survivors of domestic violence and sexual assault, in the form of direct financial support to survivors from the partners listed above. This also purchases three new positions at DHS for program implementation, ongoing program integrity and sustainability.

(1) Tribal Domestic Violence Position Funding

- Intergovernmental Agreements with Oregon Nine Confederated Tribes to support domestic violence and sexual assault services in Tribal communities, with Survivor Investment Funds to serve survivors

(2) **Co-Located DV Advocate Program Expansion**

Increase access to confidential advocacy services for survivors in DHS Self-Sufficiency and Child Welfare offices in all Oregon counties

(3) **Culturally Specific DVSA Agency Advocacy Funding**

- Contracted advocacy positions to increase culturally responsive domestic violence response statewide and utilize Survivor Investment funding

(4) Statewide Network Support Position

- Contract for statewide provider to build support and network for Culturally Specific DVSA Programs.

Survivor Investment Dollars

- Financial assistance offered by DVSA organizations and Tribes to address needs of survivors in their communities. Funding enhances meaningful financial support with connection to culturally specific and confidential advocacy services.
- Includes flexibility to offer financial assistance to all vulnerable populations for resources including but not limited to housing, legal fees, immigration fees, penalties, lock changes, cameras, rental assistance, moving costs, plane tickets, license fees, housing application, emergency hotel, etc.
- Funds usage to be determined by Tribal Nations, Culturally Specific DVSA Providers, and Co-Located DVSA Providers for the needs of domestic violence and sexual assault survivors in their communities.
- These funds are issued through contract and intergovernmental agreements and specific to services for survivors – implemented in partnership with DVSA programs to meet the needs in a trauma-informed, culturally responsive system.

The intention is to expand domestic violence services in a meaningful way and to create funding to reach underserved populations. This policy package will focus on increasing and building partnerships and creating meaningful financial supports. This will be done by contracting with these partners to increase or build agency capacity to start or further serve underserved populations, offer their agencies the flexible funding they need to meet the financial needs of survivors while providing culturally and linguistically appropriate advocacy services. This program will focus on providing culturally responsive advocacy and financial support to survivors. This policy package was jointly developed by the Oregon Tribes, Culturally Specific domestic violence sexual assault (DVSA) providers, Co-Located DV Providers, and a workgroup made of DVSA providers, DHS staff, the Governor's Office, and other domestic violence and sexual assault providers.

This policy package would be effective 07/01/2021 or upon passage, whichever is later.

3. How does this policy package further DHS's mission and align with its strategic plan?

This policy package aligns with the Governor's Vision for 2021-2023 to enhances culturally responsive domestic violence services across the state with a focus on underserved populations, including Tribal Nations and culturally specific populations. This aligns with DHS strategic plan to enhance services to underserved populations and expand on services that are nationally recognized. Policy package addresses systematic weaknesses in service implementation and applies an equity lens to ensure DHS clients and community members have access to meaningful, trauma-informed, and culturally responsive services and financial support.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

This package is not being requested because of an Oregon Secretary of State or internal audit.

Quantifying results

5. How will DHS measure the success of this policy package?

SSP will collect aggregate data from all providers to determine how funds were used, how many people were served, and is working on outcome measures for data. In addition, Tribes and DVSA agencies will be provided additional FTE to support their work. We can measure the increased number of people served with these positions.

SSP plans to work in collaboration with our providers to develop a series of optional survivor surveys that can be used to gather data from survivors of how the program helped them. With domestic violence and sexual assault (DVSA), the needs of survivors are completely different and therefore their success measures are dependent on

resources they were able to access, versus outcomes they have made. DVSA survivors are trying to gain safety from an individual(s) that is causing them harm. Outcomes are dependent on if the survivor gained more safety tips from the services they received and if they were able to receive the financial assistance needed.

SSP will also work with staff to determine if relationships with our contracted partners have increased or improved and what additional knowledge DHS staff gained regarding the Oregon Tribes and/or how to be culturally specific and responsive.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

The policy package's focus is on building safer, healthier communities by promoting the goal of increasing meaningful access and support for families experiencing violence to get the resources they need. This also relates to overall family stability and child safety. Self-Sufficiency Programs have key performance measures that include:

- *Self-Efficacy and Hope* – The percentage of Self-Sufficiency participants who report their involvement with SSP and the services SSP connected them to helped them feel (1) more confident about improving their current circumstances and (2) more hopeful about their future.
- *Housing Stability* – the percentage of Self-Sufficiency Program participants who report their housing needs are met.

The mission for the Child Welfare Program: Every child and family are empowered to live independent, safe and healthy lives. By investing in broadening the effective domestic violence programs that support survivors of domestic violence, DHS is committing to offer more financial stability and promoting self-efficacy and hope. DHS is committed to giving supports to families that include financial and advocacy supports to empower survivors and children to live healthy and safe lives.

7. What are the long-term desired outcomes?

The long-term desired outcomes include more access to confidential advocacy services, increased capacity for Oregon Tribes and culturally specific DVSA providers to provide more culturally specific domestic violence services, access to flexible funds for survivors of domestic violence and sexual assault, more program support for advocates engaging in DHS offices, access to more training and expertise for advocates and DHS staff. This will expand culturally responsive services for survivors of DVSA statewide. Historically underserved populations that experience violence at a disproportionate rate will be positively impacted by this program, both the financial supports and additional advocacy service and resources this policy package builds. These services will help survivors to attain self-sufficiency and prevent the need to return to an abusive situation. This will help children to maintain safety. The results would also include building capacity in the Oregon Tribes to provide services to their communities for DVSA survivors, outreach, and/or prevention. This will also build culturally responsive DVSA services throughout the state of Oregon by increasing capacity at culturally specific DVSA organizations and building a network of support statewide.

The SIP Program provides funding to meet survivors needs in connection with advocacy services through DVSA organizations and the Oregon Tribes. These dollars invest in safety for survivors by giving meaningful funds for needed safety items, administered in a culturally specific way and meeting survivors in the communities they are already seeking services. Contracts/Intergovernmental Agreements ensures infrastructure of consistent statewide program implementation and allows for SSP to gather aggregate data for analysis and ongoing program development.

8. What would be the adverse effects of not funding this policy package?

Maintaining the current funding structure has already proven ineffective and left survivors without adequate financial support to address their safety needs, such as finding safe and stable housing or gaining access to

culturally responsive DVSA services. The current structure is not culturally responsive across the state and does not include the valuable partnerships with Oregon Tribes and Culturally Specific DVSA providers.

DHS clients, DVSA survivors will continue to face safety challenges that present a barrier to creating self-sufficiency without access to meaningful advocacy resources coupled with financial support. Furthermore, DVSA survivors that are disproportionately affected will be affected at an even higher risk. Throughout workgroup conversations, it was identified that the current structure of needing to be at a DHS Office to get financial assistance is not the safest place for underserved populations. Without changing the funding structure, DHS will continue to inadequately support these individuals.

In addition, relationships with Oregon Tribes and Culturally Specific DVSA providers will be negatively impacted, as we have engaged their services and support. A lack of capacity in their organizations has been identified, which leaves them with a hole.

For the survivors that can come to DHS offices, currently there are not enough resources to effectively support survivors engaging in Child Welfare and Self-Sufficiency services. The use of Co-Located DV Advocates build a trauma-informed space at DHS offices to help survivors navigate these situations. Without funding, there is an inability to effectively provide culturally responsive services and inability to serve all those DVSA clients at DHS offices. DHS Child Welfare and Self-Sufficiency employees need expertise and training in domestic violence and will be without access to this valuable resource and partnership.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

SSP completed a budget reallocation to distribute funds in an equitable way and based on prevalence of domestic violence in county populations. This resulted in shifting of funding and changing of access to services for survivors in the community. It also expressed a significant gap in services in urban areas and a gap in culturally specific response statewide.

SSP considered what it would mean to ask local domestic violence point persons, workers in Child Welfare, Aging and Persons with Disabilities, and Self-Sufficiency offices, to create relationships and provide the culturally specific resources. This takes the expertise away from our providers and requires in depth training and resources that do not exist. DHS offers different services than advocacy agencies as well that cannot fill the gap of what support is needed.

Historically, the needs for training and culturally responsive services for domestic violence have relied on partnering agencies that volunteer to provide this service. This greatly impacts our relationships with providers, the capacity of those agencies, and the quality of work providers would be asked to work in, given they would

be volunteering their staff and time. Using any of these models internally removes the expertise and trauma informed lens provided by our partners. It also increases the risk for vicarious trauma and burnout.

10. What alternatives were considered and what were the reasons for rejecting them?

SSP considered relying on our current structures. We learned from current DHS staff, current contracted DVSA providers, and for our workgroup and Oregon Tribes and Culturally Specific providers that the current

system does not meet all the needs of providers or domestic violence and sexual assault survivors in a meaningful way or a culturally specific way.

SSP explored existing supports and services for domestic violence survivors in the state of Oregon. As it stands now, relying on local domestic violence sexual assault (DVSA) providers and community action agencies to distribute funding sources for financial support to survivors of domestic violence will not be sufficient. DVSA providers have limited funding, that is not as flexible as even the TA-DVS program. Action agencies funding is otherwise allocated and not dedicated specifically to domestic violence.

With the Governor's Office, the Workgroup, and Oregon Tribes and culturally specific DVSA providers, we explored expanding co-location as it currently exists. Underserved populations do not always feel comfortable starting their request for domestic violence help in this setting. SSP explored expanding our Temporary Assistance for Domestic Violence Survivors (TA-DVS) program however the program has federal funding that restricts both the eligibility for the funds and the usage of the funding, which hinders survivors from applying and/or accessing funds once approved for the program.

Current co-located DV providers have attempted to survivors and DHS at their own cost. This resulted in under staffing in advocacy agencies, lack of effective training and support for advocates, unequitable treatment and expected response from providers. It also results in less access for survivors to well supported DVSA co-located advocates.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No, this policy package does not require any changes or establishment of statute.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Each of the nine federally recognized Oregon Tribes are to be affected by this policy package. Each tribe will receive funding to increase their capacity in providing domestic violence services in their Tribe. The funding is specific to each Tribe to meet their needs. The Tribes were involved in the discussions to build this policy package. The fiscal impact is funding that increases their current service allotment for domestic violence and sexual assault. This is new funding with DHS, which means we are building relationships and cultivating strong partnerships. The Tribes performance will be dependent on how they build their programs around this funding, some wanting to increase advocacy, work with children, provide additional training, have support for consultation and training conversations amongst other agencies, outreach services, and/or a combination of the above.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

We worked in collaboration with the following partners: Governor's Office, Oregon Confederated Tribes, Culturally Specific domestic violence sexual assault (DVSA) providers, current Co-Located DV Advocate providers, Oregon Attorney General's Sexual Assault Task Force (SATF), Oregon Coalition Against Domestic and Sexual Violence (OCADSV), DHS Domestic and Sexual Violence Council, and other interested parties. These parties all functioned by supporting us through various workgroup efforts to build the policy package in total, including having discussions on how to maintain flexibility in funding, increase, create or enhance

services that are culturally responsive, build support and capacity for DVSA agencies and Tribes to complete this work, and what survivors of domestic violence and sexual assault need in their access to funding.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

This package has worked in partnership with the Oregon Tribes and culturally specific DVSA providers to create meaningful access to services for populations impacted by inequities. As mentioned above, domestic violence and sexual assault affect all populations, but disproportionately affects vulnerable populations. This policy package aims to provide funding to agencies and partners that serve vulnerable populations. The policy package works in collaboration with providers serving vulnerable populations to increase capacity at their organization to serve more DVSA survivors or to serve DVSA survivors in ways each program has identified as an existing gap in their services. This policy package also invests in flexibility of funding to allow programs the ability to meet the needs of the individuals they are working with in ways we have been unable to before, both within DHS and within their organizations.

Throughout workgroup conversations, we have identified inequities and injustices within funding structures, support and resources for survivors, and within DHS operations. This policy package continues collaboration with commitment from DHS to further engage our Tribal partners and Culturally Specific partners to enhance DHS services and provide further services to vulnerable populations.

The component to build a statewide network of support allows us to create more resource in all areas of the state for culturally responsive services. This further builds DHS collaboration with partners and enhances the ability for partners to connect across the state, building more network and support for DVSA survivors.

Staffing and fiscal impact

Implementation date(s): 07/01/2021

End date (if applicable):

The implementation date should be the earliest date included in response to question #2. Provide an ending date if the policy change in this POP has a specific termination date or indicate that it's ongoing.

15. What assumptions affect the pricing of this policy package?

This policy package is priced based on a two-year biennium contract schedule. Contracts/intergovernmental agreements would be signed for two years with amendments for ongoing service level.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

Yes, Self-Sufficiency will be responsible for program development, implementation, evaluation, and program maintenance for the SIP Program and Co-Located DV Advocate program. This includes building program infrastructure, continued conversations and relationship building with Oregon Tribes, Culturally Specific DVSA Providers, Co-Located DVSA Providers, and Child Welfare.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Yes. This will require access to facilities, including computer, phone, and email for all Co-Located DV Advocates.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

This policy package has the potential to be a domestic violence caseload increase or reduction. Due to safety purposes, there is no data to identify why survivors have reached out, if their needs were met, or why they did or did not access services with DHS. There is also no current data on use of culturally responsive services to determine the increase in that caseload size.

Potential reasons we anticipate an *increase* in domestic violence cases:

- More individuals will have access to culturally responsive services, advocacy services, and financial support. The connection to advocates could lead to more referrals to domestic violence services at DHS in both Child Welfare and Self-Sufficiency.
- Based on our average TA-DVS caseload size in SFY 2019, 1,057 out of 1,439 TA-DVS cases were approved but did not utilize payment. Providers have shared anecdotally this is because the funding is not enough. If the TA-DVS funding is combined with SIP funding, we anticipate the caseload could increase and use of the funding may increase.

Potential reasons we anticipate a *decrease* in domestic violence cases:

- More individuals will have access to culturally responsive services, advocacy services, and financial support. The connection to advocates and financial support might mean survivors will not need DHS services or receive preventative services instead of entering into the Child Welfare system.
- Based on our average TA-DVS caseload size in SFY 2019, 1,057 out of 1,439 TA-DVS cases were approved but did not utilize payment. Providers have shared anecdotally this is because the funding is not enough or not adequate. If funding is available through another source that is more flexible, TA-DVS funds may not be utilized at the same rate.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Policy Option package requests the following permanent positions.
All positions will work 24 months in the biennium.

Operations and Policy Analyst 4 – For program development, relationship building, and outcome measurement. This position is responsible for program oversight of SIP Program. This position is responsible for ongoing collaboration with Child Welfare.
Operations and Policy Analyst 3 – For ongoing contract administration, including but not limited to site visits, contract compliance, contract/Intergovernmental Agreement drafting and submission, planning and offering training and technical support to contracted providers.
Operations and Policy Analyst 2 – For invoice processing, data tracking, day to day maintenance of SIP program.
Office Specialist 2 – For meeting scheduling, coordination, meeting minutes, invoice processing, and support for the additional office positions.

20. What are the start-up and one-time costs?

Not applicable.

21. What are the ongoing costs?

This policy package is to be incorporated into ongoing service level. Cost estimates around $40,000,000 (policy package pricing and potential COLA increases) expanding beyond the 2021-23 biennium.

22. What are the potential savings?

By funding more supports for domestic violence and sexual assault survivors, the workgroup anticipates there will be a cost savings through the following impacts:

- Prevention of children entering the foster care system due to domestic violence
- Stabilization of survivors, meaning less need for other SSP program benefits for ongoing stability
- Less burnout and turnover of DHS staff regarding DVSA cases due to increase in collaborative support from providers
- Decrease in staff time spent supporting DVSA clients and navigating DVSA challenges, due to ongoing collaborative efforts.

23. What are the sources of funding and the funding split for each one?

This policy package is 100% general fund.

Department of Human Services
2021-23 Policy Option Package

Division:	Vocational Rehabilitation
Program:	Youth and Workforce
Policy package title:	Social Security Cost Reimbursement
Policy package number:	POP 131
Related legislation:	N/A

Summary statement:

Currently Vocational Rehabilitation (VR) is not fully capturing all of the available Social Security reimbursement available to its consumers who received Social Security Insurance (SSI) and/or Social Security Disability Insurance (SSDI) benefits and who become employed as a consequence of VR services. Historically these revenues have approached $10M per biennium. Proposed changes in the Ticket to Work program would create a revenue stream to fund ongoing supports for individuals with the most severe disabilities.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$0**	**$170,746**	**$170,746**	**1**	**1.00**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

This will be a self-funding position that will also be revenue generating. This will bring in additional federal finds that do not need to be matched. This will help the VR program keep out of the Order of Selection and increase client service dollars.

2. What would this policy package buy and how and when would it be implemented?

VR is requesting one position to revamp our current reimbursement system, submit and manage timely reimbursements from the Social Security Administration. Additionally this position will work in collaboration with Senior and People with Disabilities (SPD) and Office of Mental Health and Addiction Services (OMHAS) to explore and potentially develop a reimbursement system in collaboration with community partners that would generate an additional revenue stream for those individuals who required ongoing supports in order to maintain employment. Without the self-funding position, OVRS will not be able to recoup the full amount of Social Security reimbursements available and will not be able to pursue the Ticket to Work Program as a potential revenue stream.

3. How does this policy package further DHS's mission and align with its strategic plan?

This funding stream would enhance VR financial ability to assist eligible Oregonians with disabilities to secure, maintain and advance in employment.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS measure the success of this policy package?

DHS and VR will measure the success of this package by tracking the number of claims that are submitting=

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

No.

7. What are the long-term desired outcomes?

Increase revenue into the program. There is potential for this program to expand beyond VR clients to other Oregonians served by DHS. This could dramatically increase the revenue for the agency.

8. What would be the adverse effects of not funding this policy package?

There are unclaimed federal funds that are not being claimed by the state. By not providing resources to this program we are losing funds by not claiming them.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

We currently have one FTE working in this const reimbursement program. Last biennium the were able to draw down nearly $10M in unmatched funds. We are projecting that we could draw down at least another $500,000 to $1M if we could have more support in this program area. (See attachment below for income over the past several biennia).

10. What alternatives were considered and what were the reasons for rejecting them?

Status quo. This was rejected because this position would pay for itself and with additional income to support the program.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

There is the possibility that we could draw down additional funds from clients served by other DHS programs. This would further increase the revenue generated by this POP.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

Indirectly this POP will provide additional support to the VR program because it will bring in funds that can be used for client service delivery.

Staffing and fiscal impact

Implementation date(s): 7/1/2021

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

FTE calculation.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No. This would expand an existing program.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No. This position would work to recoup funds expended on individuals that have already exited the VR program.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

The staff requested would be a Human Services Assistant 2. This would be a new position

20. What are the start-up and one-time costs?

N/A or negligible. There would be general recruitment and onboarding expenses.

21. What are the ongoing costs?

The biennial cost will be $170,746 for the 1 FTE.

22. What are the potential savings?

This position will support VR program activities that generate revenue. It is estimated that the position could potentially generate an additional $200,000 to $500,000 extra funds in cost reimbursement funds per biennium.

23. What are the sources of funding and the funding split for each one?

This is a self-funding position and it would be paid out of the cost reimbursement fund that we receive from the Social Security Administration under the Ticket to Work and Cost Reimbursement programs.

Department of Human Services
2021-23 Policy Option Package

Last updated 4/28/2020

Department of Human Services
2021-23 Policy Option Package

Division:	**Vocational Rehabilitation / Office of Developmental Disability**
Program:	**Work Incentives Network**
Policy package title:	**Benefits Counseling Services**
Policy package number:	**POP 132**
Related legislation:	**N/A**

Summary statement:

This POP is designed to provide benefits counseling to people with disabilities. WIN is able to provide services to approximately 1,100 participants per year, but over 1,500 are referred to WIN for benefits counseling, leaving unserved over 400 per year who are not employed, but are on the employment path. Currently 1,450 individuals are awaiting benefits counseling services in Oregon. Many more who are not currently employed but are on the employment path are encouraged to contact the WIN Help desk for answers to general questions instead of being referred for specific and comprehensive benefits planning services. This can cause individuals with disabilities working towards independence to no longer seek employment or lose their jobs due to benefit loss or fear of benefit loss. A minimal increase in benefits counselors can significantly increase jobs and independence for individuals with disabilities.

Benefits counseling is a complicated service and requires significant training. For that reason, WIN, which is responsible for certifying and maintaining quality across the state, will require more training and administrative staff in order to support additional benefits counselors. Specifically, WIN is seeking funding for 4

FTE contract Work Incentive Specialists and 4 FTE contract for the Work Incentive Network.

Benefits counseling will also help people with I/DD get and maintain employment in their communities by supporting them to understand the impact of wages and increases in minimum wage on their benefits and by supporting them to develop a plan for managing benefits while working. The Lane v. Brown Settlement Agreement, Governor's Executive Orders 13-04 and 15-01, Oregon's Employment First policy, and new federal and state regulations regarding ODDS services require that integrated community employment be the first and priority service option for individuals with I/DD. These initiatives, paired with the new increase to minimum wage, will require support for individuals with I/DD to understand the impact of integrated community employment on their benefits. This need has only increased due to COVID-19, given unprecedented job loss, and unemployment benefits. For all of these reasons, benefits counseling is a critical service now, more than ever before.

Additionally, new employment service rates were developed with Employment Provider Organizations which would ensure adequate funding for the cost of benefits counseling services for people with I/DD; however, in order to fully fund these rates some additional funding is required. Without this POP, many of those who would otherwise work in integrated community jobs may not receive the necessary support to do so, and it will be difficult to meet the requirements of the Settlement Agreement and new federal regulations.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:						
Policy package pricing (contract staff – WIN)	**$1,170,720**			**$1,170,720**		
Benefit Counseling for individuals with IDD	**$1,447,931**			**$1,447,931**		

4 WICS = $23,580/month, $565,920/biennium ($5,895 each per month) – currently budgeted at $5,695/month if exemplary fidelity, $5,500 base rate otherwise
4 WIS = $25,200/month, $604,800/biennium ($6,300 each per month) – significant travel costs will increase need

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

Currently ODDS, Vocational Rehabilitation, Employment First and Oregon Department of Education are working collaboratively in response to the Lane v. Brown Settlement Agreement which commits DHS to increase jobs for 1,115 working age Oregonians with Intellectual and Developmental Disabilities by June 30, 2022. Additionally, the Settlement Agreement commits DHS to provide employment services to 7,000 individuals. In order to achieve these goals, as well as goals related to new federal regulations regarding these services, ODDS must be able to offer benefits planning services and be able to fund the actual cost of supported employment services.

This POP would increase the DHS' Work Incentives Network (WIN) through the 2021-2023 biennium adding 4 Work Incentive Specialists (WIS) who would provide training and technical assistance as well as maintain a small caseload and add 4 Work Incentive Coordinators to the 10.75 existing contracted benefits

counselors for a total of 15.75. Each WIS and the four additional WICs would be distributed throughout the state based on demographic needs. The two OPA2 positions would be maintained at WIN Central.

Over the ensuing biennium, VR and allied DHS, OHA and workforce programs would develop a pilot project for reaching out to children with disabilities from 5th grade to middle school students, teachers, counselors and families, debunking myths about the inability of people with disabilities being competitively employed as they reach adulthood.

VR's WIN has created a successful benefits counseling program as well as a successful certification program for ODDS providers. The benefits counseling program and WIN certification incorporate best practices and quality assurance, including requiring that its contracted and certified benefits planners undergo intensive training, and meet the same proficiency standards as Social Security Administration's certified work incentive coordinators. Because of WIN's reputation, VR, Employment First Network, OHA's Mental Health Supported Employment Programs, Youth Transition Programs, and other employment providers around the state refer their participants to WIN for benefits and work incentives counseling services. It's because of WIN's success that we need to expand the program. WIN's reputation for quality assurance also has supported employment providers seeking benefits and work incentives counseling and training from WIN. Research shows that individuals who receive both vocational rehabilitation and benefits counseling have better employment outcomes than individuals receiving benefits counseling services or vocational rehabilitation alone.

Upon review of information regarding barriers to work for individuals with Intellectual and Developmental Disabilities, the number one reason people report they do not choose to work is inadequate or inaccurate information regarding the impact of wages on benefits and the fear of losing these benefits, including Social Security benefits, healthcare, and critical long-term care medical supports needed to live independently in

the community. This has been compounded due to job loss during COVID-19, CARES funding and unemployment benefits. With proper benefits planning, and the right information, people can go to work while effectively managing needed benefits. By offering benefits planning in the waiver, ODDS can receive federal match of 64%. This significantly reduces the overall cost to the state of Oregon.

Offering benefits planning in the waiver will also significantly increase provider capacity to provide this service. There are several providers in the state of Oregon who are certified to provide benefits counseling but are not currently able to do so under the waiver because it is not an approved ODDS waiver service. As a result, these providers offer the service on a very limited basis. Making this service reimbursable under the waiver program, will significantly expand already existing provider capacity to provide this service for both individuals with I/DD as well as other Oregonians with disabilities who also need to utilize benefits planning services to develop a plan for managing benefits while going to work.

The following include a few more reasons why VR proposes this POP:

- As individuals use benefits planning, go to work, increase their hours, and accept raises, they may reduce their reliance on state benefits. However, it is critical that individuals have a plan for managing critical benefits when they go to work.

- Oregon recently committed to increase minimum wage so more Oregonians can earn a living wage. Benefits counseling will help people with I/DD understand the impact of increased wages on their

income and benefits and support them with a plan for managing benefits while accepting increased wages and work hours.

- The ABLE Act allows people who qualify to save money for important disability related expenses beyond the $2,000 Social Security resource limit. Benefits counseling will support implementation of the ABLE Act, authorized under Oregon law with broad constituent and legislative support during the 2015 legislative session. Benefit planners will be able to give accurate information and guidance to individuals going to work and looking to utilize the ABLE Act.

2. What would this policy package buy and how and when would it be implemented?

This POP would expand WIN's capacity to provide certification, training and on-going technical assistance to 8 more benefits counselors a year. Housed in Vocational Rehabilitation (VR) and implemented through contracts with Oregon's Centers for Independent Living (CILS), WIN addresses barriers to employment and the reduction of benefits for Oregonians with disabilities by individualized counseling that supports self-sufficiency in employment. Research shows that persons receiving these services are more likely to obtain employment, increase their incomes and decrease use of benefit programs.

WIN currently is providing benefits planning services to Oregonians with disabilities who are employed but are unable to meet the demand by those who are at the beginning stages of the employment path and have concerns about how employment will affect their benefits. Often individuals will not seek employment because they are afraid that they will lose their health care or other vital supports once they become employed. WIN is able to provide services to approximately 1,100 participants per year, but over 1,500 are referred to WIN for benefits counseling, leaving unserved over 400 per year who are not employed, but are on the employment path. Many more who are not currently employed but are on the employment path are encouraged to contact the WIN Help Desk for answers to general questions instead of even being referred for specific and

comprehensive benefits planning services. The Lane v. Brown settlement data reported 1,163 people with I/DD working in competitive integrated employment. Each of these people are receiving significant federal and state benefits and many needs supported employment services in order to maintain their employment. They each require benefits counseling services at some point in their employment path to ensure they don't lose needed benefits, but also that they maximize their earning potential.

Additionally, there are many individuals with disabilities who are either seeking employment or are unsure about whether to seek employment because they are worried about the impact on necessary benefits. Increased capacity for benefits counseling is needed to support these individuals with disabilities to develop a plan.

With increased benefits counselors at the provider agency level, there is an increased need for certification, training and on-going technical assistance at the state administrative level. The increase of 4 new WIS would address this need.

This POP would also provide the general funds required to include benefits counseling as part of the Office of Developmental Disabilities Services (ODDS) Title XIX waiver and employment service system.

The Benefits Counseling Service and new supported employment service rates would be matched with federal funds at a rate of 36% general fund and 64% federal fund. Leveraging federal funds for benefits counseling for those with I/DD, who most frequently utilize benefits counseling, is a good use of state fund dollars.

This POP will enable WIN to help Oregon meet the new standards established by the Workforce Innovation and Opportunity Act (WIOA) for Youth in Transition and people with disabilities by providing financial literacy through benefits planning and work incentives counseling as mentioned in Part 681.500(g).

During the 2017-2019 biennium, there were 2,186 youth in 61 contracted Youth Transition Programs. Each of these youth may need benefits counseling services to help maximize their earning potential.

In response to the Lane Settlement Agreement, data shows that 2,702 Transition-age individuals received an IPE from VR between 2013 and 2018, an average of 450 per year. Each of these individuals should have a benefits plan to help determine possible work incentives, including PASS options, so they can achieve their employment goals.

Finally, this will help individuals with disabilities who lost their jobs due to COVID-19 navigate CARES funding, unemployment benefits and re-employment, which is critical at this time.

3. How does this policy package further DHS's mission and align with its strategic plan?

Vocational Rehabilitation and the Office of Developmental Disability Services (ODDS) is designed to provide integrated community services to all individuals who qualify for services. This includes employment services. Additional federal requirements mandate that there are integrated community employment options and the Lane v. Brown Settlement Agreement places specific requirements around this. In order to help individuals with Intellectual and Developmental Disabilities work in the community they need to understand how work will affect their Social Security, healthcare, and other public benefits, applicable work incentives available to their individual situation and needs, particularly with the new minimum wage proposals. Thus, this package would allow VR and ODDS to provide better information to individuals who want to go to work which would open the door for more individuals to increase their existing work hours or pursue employment in their communities. Additionally, fully funding supported employment services will ensure that employment service providers receive adequate funding for the service provided which will help maintain and build capacity.

Benefits Counseling is also being used to increase employment of persons with mental illness, through delivery of evidence-based supported employment and OHA/AMH and VR's efforts to expand the availability of these services throughout Oregon.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS measure the success of this policy package?

See below in the answer to question #6.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

Yes. This is linked to the Lane v. Brown Settlement Agreement which is designed to help individuals with Intellectual and Developmental Disabilities go to work in competitive, integrated employment. Oregon's Employment First Executive Order Policy Stakeholder Group, ODDS, VR, and the Department of Education, are tracking these outcomes in Oregon's Integrated Employment Plan. These performance measures will also be tracked by an independent reviewer appointed for purposes of the Lane v. Brown Settlement Agreement. The success of this POP will also be measured by whether Oregon maintains compliance with the new federal regulations regarding ODDS and Medicaid-funded Home and Community-Based Services, and Oregon's successful implementation of the its Statewide HCBS Transition Plan.

7. What are the long-term desired outcomes?

Individuals with disabilities will have greater access to benefits counseling and be able to enter employment at a higher rate. This will reduce the impact on the state and federal benefits system and will leader to greater community integration, independence and the employment rate for some of the most vulnerable populations in Oregon who experience disabilities.

8. What would be the adverse effects of not funding this policy package?

Currently there is a wait list or prioritization for accessing benefits counseling. Due to new federal regulations and the Lane v. Brown settlement agreement, Oregon is set to increase the number of integrated jobs and subsequently decrease the number of individuals currently in a Sheltered Workshops. To successfully transition people to community employment opportunities, there is a significant need for individuals who are working to understand how their income will impact their benefits and develop a plan for managing benefits while working. Additionally, as Oregon increases minimum wage this need will be amplified. Not understanding benefits and fear of losing benefits is reported to be one of the primary reasons that individuals with Intellectual and Developmental Disabilities do not participate in integrated employment.

Specifically, not funding this POP could:

- Limit the availability of benefits counseling to I/DD participants on their Employment Path who may reduce the number of hours they seek to work because of fear of losing needed employment supports and health benefits

- Limit the availability of benefits counseling services statewide and thereby reduce the success of the Governor's Workforce Strategies for Work-ready Communities in increasing employment of Oregonians.

- Hinder VR's ability to meet its federal outcomes and other performance measures, as result of lack of available benefits counseling services, Hinder the IPS Mental Health providers' ability to meet their Fidelity requirements and employment goals for their participants

- The WIOA while not providing specific funding for benefits counseling does require it for people with disabilities who are receiving federal benefits, they included in it 681.500 "Support activities that address the particular financial literacy needs of youth with disabilities, including connecting them to benefits planning and work incentives counseling."

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Currently there is a benefit planning program administered by Vocational Rehabilitation, but the capacity of his program cannot keep up with the demand for services.

10. What alternatives were considered and what were the reasons for rejecting them?

Seeking grant funding and other federal, non-state funding.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Oregonians with Disabilities and Intellectual and Developmental Disabilities, the Oregon Council on Developmental Disabilities and the Oregon Intellectual and Developmental Disabilities Coalition and Disabilities Rights Oregon have been advocating to expand benefits planning services through the ODDS waivers for multiple years as a way of increasing opportunities for people to work in their communities.

Employment First efforts would benefit, and it would help implement the Lane v. Brown Settlement. Vocational Rehabilitation would benefit as the existing wait list for benefits counseling services delays vocational rehabilitation clients with all types of disabilities (not just I/DD) from receiving this service in a timely manner, and may impact clients already being employed who are at risk for losing benefits as well as individuals with Intellectual and Developmental Disabilities seeking work. The Oregon Department of Education would benefit when working with transition age students, as benefits counseling is not a service they can currently offer. Making benefits counseling a waivered service for Intellectual and Developmental Disabilities would provide an increase in the availability of the service and decrease the wait time for all programs and clients needing this service.

Local government would benefit, as counties currently refer individuals to providers who may not necessarily meet the standards of a benefits planner. False information and poor planning can lead to an unplanned loss of benefits when an individual goes to work. This only exacerbates the fears and concerns regarding going to work.

Additionally, when these services are not available through the waiver, county case managers often give informal guidance regarding the impact of work on benefits. When their degree of knowledge is low, they error on the side of discouraging individuals to work. This has had a negative impact on Oregon's

Employment First efforts and will highly detrimental to implementation of the Lane v. Brown settlement agreement. Furthermore, case managers typically do not have the skills, expertise, or time needed to provide what is a highly complicated and technical benefits analysis and develop an individualized plan for effectively managing benefits.

These agencies will similarly benefit from maintained and expanded capacity to provide supported employment services.

Some additional specifics include:

In 2017, WIN conducted a Pilot Project to train and certify 8 benefits counselors for the Mental Health IPS program and did another one in July 2018 for 15 ODDS supported employment providers. Another cohort comprised of 11 ODDS supported employment providers and 3 Mental Health IPS program providers was trained in October 2019. While this is increasing the number of certified benefits counselors in Oregon, maintaining quality assurance has been difficult. With past cohorts, many did not become fully certified benefits counselors due in part to inadequate cost reimbursement for this service through Medicaid. With the 2019 cohort, only around 50% achieved provisional certification. Lower paid staff have been selected to become certified and there has been significant turnover. Best practices have proven that it takes at least two years of providing benefits counseling services before a benefits counselor is fully competent. Because of the constant turnover, few will reach the level of competency needed to provide quality benefits counseling services.

- Because there are so many individuals with disability now working, WIN has had to prioritize its caseload and is currently only providing comprehensive level services to those who are employed. Those in early stages of employment have been put in a queue that grew to 1,450 February 2020, with the queue continuing to grow by 30-40 per month. These individuals have access to WIN Help Desk

services, but WIN is unable to provide comprehensive services. There is a significant concern that the individuals in queue are not receiving services on a timely basis and thus deciding not to move forward with employment.

- WIN created a Help Desk toll free number for those who are contemplating employment and to help answer general questions for individuals who are in the queue in an effort to try to keep these individuals on the employment path. The Help Desk is a valuable service, but it is not a sufficient service to reduce the number of people waiting in the WIN Queue.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

The Oregon Council on Developmental Disabilities, the Oregon Intellectual and Developmental Disabilities Coalition, Employment First, Vocational Rehabilitation, the Work Incentives Network, Disability Rights Oregon/WIPA (Plan for Work), and the Oregon Department of Education.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

This POP is an equity initiative. Through it, state agencies and programs and their partners will increase the integrated and competitive employment of people with disabilities, with a focus on persons with intellectual and developmental disabilities.

People with disabilities remain one of the most underemployed and unemployed groups in the nation and in Oregon. As of 2018, the national unemployment rate for people with disabilities was 8.0% compared to 3.7% for able-bodied persons. Other data suggests a much greater inequity. In its most recent report on disability and work, the 2017 Disability Statistics Annual Report estimated that 35.9% of people with disabilities were employed compared with 76.6% of people without a disability. Unemployment of individuals with significant disabilities is much higher, including those with intellectual and developmental disabilities, is perhaps as much as 70%. The

negative effects of underemployment and unemployment on persons with disabilities go well beyond low incomes and lost wages. For many, it may also include stigma, social exclusion, the loss of dignity and self-worth, and dreams deferred and denied.

Oregonians with disabilities experience unemployment and underemployment at significantly higher rates than other Oregonians; and those with significant disabilities experience unemployment and underemployment at yet higher rates. In addition, the incidence of disability is greater among a number of other historically disadvantaged populations, including Latinos and African Americans.

Staffing and fiscal impact

Implementation date(s): 7/1/2021

End date (if applicable): on-going

15. What assumptions affect the pricing of this policy package?

Best practice would allow all individuals with I/DD who go to Vocational Rehabilitation to seek competitive, integrated employment could get the basic level of benefits counseling. On average this would take 4 hours to complete.

Of those who get a job, 60% will require more intensive benefits counseling. On average that would be roughly 8 additional hours.

Below are how many individuals going to VR from ODDS in previous years:

Year of Application Month/Year	Distinct count of Prime
2017	1,970
2018	1,907
2019	1,853

The last 6 months of complete data show an average monthly caseload of 144, averaging 2.3% growth in caseload per month. From this we can estimate our starting caseload at 144 with a 2.3% growth throughout the 2021-2023 biennium.

In order to look at the cost of fully funding the proposed supported employment rates, ODDS/Employment First reviewed current funding levels as compared with implementation of the proposed rates.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

No. These will be contacted services that will increase capacity of the existing program.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

N/A.

20. What are the start-up and one-time costs?

There will be outreach and training requirements. The training already exists from programs in other areas. So, the expense will be offering the training more during the first year to training providers. These include travel for training, software upgrades (specifically Adobe Captivate is required), materials for the training, and in-service costs.

21. What are the ongoing costs?

Training and technical assistance as well as monitoring and auditing to ensure the service is being provided as outlined in the waiver and credentials are maintained.

22. What are the potential savings?

When individuals with Disabilities in general, and Intellectual and Developmental Disabilities are able to go to work their cost per case often goes down. Additionally, with federal match on this service it saves Oregon Revenue.

23. What are the sources of funding and the funding split for each one?

If Other Funds, source and amount: If Federal Funds, source (grant name, Medicaid, etc.) and amount:

Department of Human Services
2021-23 Policy Option Package

Division: DHS
Program: VR
Policy package title: VR Staffing
Policy package number: POP 133
Related legislation: Workforce Innovation and Opportunity Act (WIOA)

Summary statement: To implement the federal Workforce Innovation and Opportunity Act

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$0**	**$3,306,735**	**$3,306,740**	**11**	**11.00**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

Implementation of WIOA requires a fundamental change in service delivery for the VR programs, especially in the area of disabled youth in schools and the continuing alignment and integration of the VR program into the statewide Workforce system. In order to meet these requirements additional staff are required to lead and manage the VR program so the Program can meet its new Federal mandate and Common Performance Measures and not incur any penalty to the State for not doing so. Oregon VR must expend at least 15 percent of the federal funds to provide or arrange for the provision of these new pre-employment transition services for students with disabilities in collaboration with the Oregon Department of Education. VR is also required to coordinated with the 197 local school districts throughout Oregon in the delivery of these services. Additionally, each local VR Branch Office has the federal expectation to coordinate services with the local WorkSource office, the Local Workforce Development Board, and the Local Leadership Teams that implement title 1B funds. The requested positions in VR are made to address the changes resulting from WIOA. The double fills support the new programmatic requirements for the program and for the increased level of field management needs.

2. What would this policy package buy and how and when would it be implemented?

This POP consolidates the Field and Administrative operations of the VR Program by making the current 10 DF positions permanent. These positions range across all aspects of Program delivery and include administrative field support as well as managerial support for the Field. It also includes Central office positions to meet the administrative management requirements due to the increased requirements on the Program as a result of the WIOA legislation, specifically in the area of Workforce and Youth, two areas where the Program is required by Federal Law to increase its activity, visibility, partnership with schools and local workforce delivery programs outside of DHS and subsequently meet a higher level of outcomes.

3. How does this policy package further DHS's mission and align with its strategic plan?

This POP will further DHS's mission to help Oregonians in their own communities achieve safety, well-being and independence through VR employment service that will empower them through independence in employment with informed choice. This action also supports Governor Brown's priority that Oregonians are healthy and safe when all can live independently. By working with students with disabilities earlier in their academic career and preparing them for a seamless transition to a life of independence is the goal of WIOA and Governor Brown. This action supports the DHS Strategic plan in addressing the added need to develop implement and oversee the various DHS initiatives regarding as Equity and Multi-cultural awareness processes, Trauma Informed care activities. This will lead to continued alignment within DHS and a coordinated service delivery model where Programs can work more effectively together regarding mutual clients within the DHS system at those points where it is most effective and appropriate to do so. This expansion requires additional Programmatic expertise and positions in order to meet the mandate of the Program itself but also do this work in addition to the Core Program work of DHS.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS measure the success of this policy package?

VR now has Six Primary Indicators of Performance that are federally mandated and are considered Common Performance Measures for our program. These measures will be the baseline for our improved program performance and for the effectiveness of this policy package.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

Yes. Each KPM for VR is one of the Six Primary Indicators of Performance that are federally mandated.

7. What are the long-term desired outcomes?

The expected results will be a more effective delivery system that will result in increased successful employment of Oregonians with Disabilities and in the case of youth, a more efficient and informed process for students with disabilities to go from secondary educational to either higher education or competitive employment. Education and employment are both key factors in addressing many of the issues that DHS clients face and will impact poverty, family stability, and independence.

8. What would be the adverse effects of not funding this policy package?

Not being able to meet the federally mandated Common Performance Measures for our program.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

In order to meet additional requirements and outcomes, the VR Program has increased its training to current staff at all levels. VR Leadership is working with the levels of management to see that the skill set is appropriate to meet the needs of the current environment. The roles of certain managers and administrative staff have been expanded but this may result in a dilution of specific expertise. A risk factor is not being able to effectively move to the level of knowledge and skill set in order to meet the expectations of current Federal legislative mandate and if this is the case there is the possibility of future financial sanction to the State.
Additionally, inter-programmatic relationships to DHS, especially with ODDS may be negatively impacted and the effective and good work regarding competitive employment of the I/DD population in Oregon. As this relationship and the development of this work was a result of the Governors Executive Order 15-01, the VR Program wishes to continue the positive trajectory that has been established.

10. What alternatives were considered and what were the reasons for rejecting them?

Response.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No. These changes would support existing federal legislation.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

These changes would support internal DHS collaboration with SSP and ODDS. Additionally, this would support VR's relationship with five if of the tribes in Oregon that also have VR programs and all nine of the Tribes in the delivery of disability specific employment services. This policy package would also increase the ability of VR to

collaborate with the Oregon Commission for the Blind in the dual customer model of providing services to Oregonians with disabilities and to employers in Oregon that would like to hire people with disabilities.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

N/A.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

This policy package will directly help Oregonians with disabilities, a population that historically has been dealt with inequality and disproportionalities in achieving health, well-being and independence. This policy package will empower Oregonians who experience disabilities by providing them with person centered services that can lead to competitive integrated employment, great independence and community engagement.

Staffing and fiscal impact

Implementation date(s): 7/1/2021

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

The Pricing for this package is using the current pricing for the positions.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

There will be no new responsibilities for DHS shared services, but this package will address new responsibilities that VR has related to WIOA and our new Common Performance Measures.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

The impact will be nominal relating to recruitment and other general personnel services related in an increase of 11 FTE.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Yes. The new WIOA mandate is that VR, in collaboration with the local educational agencies involved, shall provide, or arrange for the provision of, pre-employment transition services for all students with disabilities in need of such services who are eligible or potentially eligible for services under this title. This means that there is an increase of over 6,000 students served by the program each year.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package would clear the 10 current double fills and allow for a single recruitment (11 Positions) that are needed to implement the new federal requirements of the program.

20. What are the start-up and one-time costs?

These posts are currently established; start-up is minimal related to foreseen vacancy recruitment

21. What are the ongoing costs?

Ongoing costs associated with payroll and Agency's shared services support are incorporated in overall POP pricing of $3,306,735.

22. What are the potential savings?

VR now has Six Primary Indicators of Performance that are federally mandated and are considered Common Performance Measures for our program; savings will result from compliance and not being penalized for falling short of these mandates.

23. What are the sources of funding and the funding split for each one?

The federal share is 78.7%, with the state providing the remaining 21.3%.

Department of Human Services
2021-23 Policy Option Package

Division:	Oregon Health Authority / Department of Human Services (OHA/DHS)
Program:	Health Systems Division, Health Policy & Analytics, Office of Business Information Systems, Office of Reporting, Research, Analytics & Implementation, Office of Information Services
Policy package title:	Improving Data Integrity and Compliance
Policy package number:	POP 201
Related legislation:	N/A

Summary statement:

Data is an organization's most valuable asset, after its people. All services provided by the Oregon Health Authority (OHA) and Department of Human Services (DHS) depend on data and the ability to access, manipulate and integrate information. OHA and DHS lack a cohesive plan to secure, protect, manage, govern and support data - this must change. The difficulties faced by the Children's Health Complexity project are good examples of the difficulties faced trying to analyze current OHA and DHS data. A data strategy to improve data security and protection, and to perform data analysis, quality, governance, classification, integrity and management and meet legislatively mandated criteria defined by the 2013 HB 2134 and the open data standards criteria required by 2017 HB 3361 is required. To address this situation, a sustained effort with the right resources, professional support and tools is essential.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

This is a collaborative POP between DHS and OHA. OHA and DHS are hampered by lack of standardization of data structures and classification. They deal with major challenges securing data across hundreds of systems; by risks associated with access to data by internal and external resources and by a fundamental lack of knowledge about how to manage and govern data. For example, there are at least six (6) different client indexes for identifying who received services between OHA and DHS. This makes getting a complete picture of the services any one Oregonian receives extremely difficult to ascertain. There are also legacy systems and a number of data structures that need additional tools and linkages in order to be compliant with REALD requirements. These problems are compounded as systems continue to be implemented without addressing the indexing/standardization problem. Periodically, resources are shifted temporarily to attempt developing a strategy and approach. These have occurred in pockets and have not sustained. For OHA and DHS to address this situation, they must commit to a real and sustained investment in resources supported by consulting expertise and tools.

Management of data is a foundational component for improving reporting and obtaining a 360-degree view of the Oregonians we serve. The work in this POP will also benefit work in a number of areas including Medicaid Modularity, financial systems, critical mainframe systems, and others. The development of standard data structures, consistent with the principles of master data management, will provide future systems with a solid foundation from which further development can take place.

2. What would this policy package buy and how and when would it be implemented?

This policy package includes three major areas of focus:

Department of Human Services
2021-23 Policy Option Package

1. **Planning, assessment, strategic direction:** OHA and DHS need a plan to successfully improve management of their data. This requires external expertise plus dedicated program and OIS resources. Vendors with data expertise will provide guidance, knowledge and perspective supporting development of a data strategy. This work requires the undivided attention and time of program participants who understand the Agencies' data.

   A committed team of OHA, DHS and OIS resources must be invested in and sustained to support these efforts long-term. Funding for consulting services, permanent FTE representing each major program area in OHA and DHS and permanent FTE in OIS who understand where data is warehoused, accessed and secured are required. These resources will be fully engaged in the planning effort and will then lead and work on implementation efforts. Future biennia will require additional funds and resources to execute on the strategies and road maps developed by this cross-agency work group. Direct connection to the Governor's data initiative will be essential Efforts include:

   A. Create a plan for establishing common indexes for identification across programs (e.g. client and provider identification).
   B. Create a data inventory using manual &/or automated systems for data cataloguing in compliance with the goals of HB 3361.
   C. Build awareness by communicating agency gaps in and availability of data
   D. Target list of data sets to pursue. This is highly resource-intensive with a high value outcome and involves systematically exploring available data sets throughout the organization. This work requires a deep understanding of the agency and its market, the capacity to methodically break down large sets of data into more manageable segments and the ability to focus singularly on this activity.
   E. Invest in data valuation: evaluate internal and external data sources and processes to identify, prioritize and acquire new data sources.
   F. Educate/Communicate: understand & communicate available data assets
   G. Optimize: extract maximum value from data including new or underutilized data

H. Comply: include REALD in strategic and tactical planning activities to ensure a viable approach for compliance with HB 2134 is achieved by OHA and DHS
I. Protect: develop a cohesive plan to eliminate or mitigate risks related to data privacy and protection and acquisition of tools and resources to monitor and protect data

2. Address current gaps now:

A. Plan and implement standardized client identification in a modular manner. Procure and pilot master client identifier software that can be deployed modularly and scaled across the enterprise. This provides the capability to build new systems with standardized client identification and develop a plan for incorporating into existing systems.
B. Procure enterprise data modeling and management tools and professional services. Fund 2 permanent OIS FTE to create and store master data definitions during application/database design, reverse-engineer existing databases to identify discrepancies, track data flows between applications to pinpoint their origin. These tools enable data comparisons between separate databases, allow for merging and updates across disparate databases and can be used to create and store master data definitions and apply those definitions during application/database design. This is a technical set of tools supporting a fundamental business purpose to enable, manage and enforce the use of meaningful, consistent data standards across the enterprise.
C. Support business partners on current, specific operational dashboard and reporting needs by funding 2 permanent OIS FTE positions. OIS has staffing capability to only provide the infrastructure support for tools such as Microsoft Business Intelligence and Tableau Data Visualization. Larger programs have resources to leverage those tools, smaller programs have the same need for dashboards and reporting but lack resources to support. These FTE will be dedicated to help fill that gap with the work prioritized through Agency Governance.

3. **Pilot new capabilities:** Pilot an industry standard knowledge management system (Stack Overflow) to early adopter program areas in DHS and OHA. This product provides a self-service environment for business users to access information and mine questions and answers without reliance on OIS resources to research and provide this data across multiple programs and multiple requests. Piloting and rolling out this product require funding the position request to have staff to establish, configure and support implementation of the tool and end-users. This pilot enables technical information sharing between various groups and programs providing an easy way to access answers or ask technical questions and see other's responses. This pilot can be available within 6 months of receiving funding approval and filling the requested positions.

3. How does this policy package further DHS's mission and align with its strategic plan?

This policy package aligns to and supports the Governor's Goal and Priority to "Modernize and standardize critical statewide systems..." It will "[optimize] service delivery to the public and internally by modernizing agency-specific and cross-agency systems..." and is an integral part of state efforts to "[create] and manage a statewide data strategy to improve data analysis, data quality, information sharing and overall decision making." It does so by building upon and improving the capacity of agencies to effectively use data and turn that data into meaningful information for agencies and stakeholders. It furthers DHS's mission to "help Oregonians in their own communities achieve well-being and independence through opportunities that protect, empower, respect choice and preserve dignity," by improving the Agency's ability to connect data sources to deliver meaningful measurements of outcomes. Existing fundamental outcomes and measures which stand to benefit from the activities of this policy package include Safety, Fiscal Responsibility, Service Equity and Community/Business Partnerships.

This policy package aligns with OHA draft Strategic Health Improvement Plan for 2020 - 2024. The draft plan focuses heavily on ensuring equitable access; improving behavioral health outcomes; mitigating the barriers of

institutional bias; preventing trauma, toxic stress and adversity; and addressing economic drivers of health. To accomplish these goals in a data driven manner significant work will need to be completed. OHA and DHS will need to assemble member information for analysis across internal and external systems to inform decision making and track progress. This will require investment in data valuation, identification of target data sources, coordinated procurement of data.

Related policy packages being discussed and presented at this time seek to make use of standardized data to improve agency functions and decision making. As an example, the CCO 2.0 Quality and Data Collection policy package seeks to address the mechanism and manner of contract deliverable evaluations to ensure that contracted organizations are successful in delivering outcomes to Oregonians. Frequently that evaluative process involves reflection on CCO performance against key indicators at a member level. The type of data standardization proposed in this policy package will significantly benefit related packages such as the CCO 2.0 Quality and Data Collection package.

By treating data as an asset this policy package is also supportive of the data-driven decision making implicit in DHS's core values of Integrity, Stewardship, Responsibility, Respect and Professionalism. Supported decisions ensure that outcomes are maximized against expenditures and produce intended results with minimal unforeseen surprises.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

Data quality, integrity, availability and documentation have been cited in 16 audit findings from 2015 – 2019. This includes Statewide audits issued by the Secretary of State's office, as well as targeted audits of Behavioral Health Integration, and MMIS/ONE. As one example, audit findings and recommendations from 19-002 (OHA

Behavioral Health Integration Audit) identify opportunity to "improve the quality of [REALD data]" to identify whether outcome disparities are present within the behavioral health delivery system.

The above finding notes that limited data and limited opportunity to incorporate new data sources on behavioral health residential patients' race and language constrains OHA and DHS's ability to identify and mitigate disparity within that environment. The activities described in this policy package will expedite, improve or otherwise strengthen the ability of both OHA and DHS to make and retain gains achieved in their remediation of audit findings such as the example provided above.

Quantifying results

5. How will DHS measure the success of this policy package?

- A comprehensive strategic direction is defined and documented supporting improvements in data management for OHA and DHS
- A roadmap is defined charting a course of action for OHA and DHS to follow for ongoing investment in data management
- Enterprise data modeling and management tools are implemented and leveraged
- Business partners have improved access to Business Intelligence tools for dashboards and reporting
- New knowledge management capabilities are piloted providing a self-service environment for business users to access information and mine questions and answer without reliance on OIS

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

Though not directly tied to a specific legislative KPM this policy package is supportive of OHA and DHS's ability to accurately report on all KPMs. As a result, all KPMs stand to gain from the activities of this policy package.

This policy package does tie to a number of OHA performance system outcomes by providing improved and connected data in the following areas:

- Increase Partner Satisfaction
- Measure Improvement
- Reduce Health Disparity
- Improve Population Health
- Improve Quality of Care
- Improve Care Experience
- Lower Health Care Cost

7. What are the long-term desired outcomes?

This initiative is anticipated to provide multiple beneficial outcomes including:

- More efficient and accurate reporting of required information to federal and state partners
- Reduced storage of unnecessary data
- Improved view of client information
- Enhanced agency credibility
- Improved customer service
- Increased efficiency and productivity
- Accurate reporting and informed decision making
- Improved adherence to data retention schedules

- Increased understanding of available data and data 'blind-spots'

Improved strategies for identification and incorporation of new data sources

8. What would be the adverse effects of not funding this policy package?

Not funding this policy package compromises OHA and DHS in their ability to manage their programs and services effectively. The lack of a congruent data environment, massive duplication of data across myriad systems and services, the level of manual effort required to produce accurate, meaningful data in response to federal and state requests for information is untenable. Without the actions outlined in this policy package, the agencies will continue a downward spiral in their efforts to manage and maintain the vast level of data housed and managed by the organizations and will be increasingly unable to meet the growing need for data. This will impact not only administrative or reporting capabilities of agency business but also the overall quality of decision making the result of which will negatively impact the delivery and receipt of human services statewide.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Multiple efforts have occurred over the past 10 years to try to manage data across both agencies more effectively, but these have been done in isolated ways related to single projects or in individual program area. None have been done in a holistic way nor has a cohesive plan been established. As examples:

- OHA and DHS are required to review and update the standards for collecting and reporting REALD data at least once every two years to ensure efficiency, uniformity and consistency with best practices and to report on "uniform standards for data collection and…implementation of standards across all data systems". To date, isolated efforts have been made such as: a 2015 high level assessment which determined that no systems or intake forms reviewed adhere to the REALD standards; a compliance gap analysis performed in 2016 with limited action in response; MMIS and VR's ORCA systems made required REALD updates in 2017/18; Public Health began work on an evaluation of processes and systems for compliance in 2019. There is an Agency level plan for addressing remediation of identified REALD gaps in compliance with applicable laws, but this is made more difficult due to technological gaps and the lack of a standard client identifier[1].
- Analysts working as part of OHA's Office of Equity and Inclusion have identified a remaining 68 databases which must achieve compliance with REALD. Of these, 10 are currently in an 'on track' status and are making progress toward compliance with REALD, 5 have already achieved compliance. Many of the databases yet to achieve compliance could benefit from linking to centralized or otherwise related REALD data. Achieving compliance through linking data, rather than maintaining data would provide an expeditious

[1] A 2015 assessment determined no reviewed systems or intake forms adhere to REALD standards. MMIS and ORCA made REALD updates in 2017/18. Public Health began work on a process/system compliance evaluation in 2019.

pathway toward meeting REALD requirements. This strategy is difficult to implement due to technological gaps such as the lack of a standard client identifier.

- Some ad-hoc work, centered around projects has been done or is planned: OR-Kids data model is being re-architected; MOTS/Compass project is incorporating data planning; IE/ME project is implementing an integrated eligibility legacy data warehouse

Over the same period of time gap analyses and reports have been completed which point to many of the same issues and offer recommendations for remediation aligned with those described by this policy package. A September 2016 report on SB440 completed by Q Corp, for example, notes that development of data standards, exploration of funding enhanced data governance functions, and improving transparency and connectivity as key areas for improvement in support of REALD.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives include:

1. Do nothing.
   This is not a viable option as the current situation is unsustainable. Manual data analysis, manipulation and presentation is extremely time-consuming, reliant on highly skilled individuals who retain the undocumented knowledge of how to mine and access the data. As these individuals retire, changes jobs or leave the agency, knowledge is lost. The level of data duplication throughout agency systems is rampant and debilitating to the agencies. Reconciling disparate information and providing credible information is costly and fraught with challenge.
2. Continue relying on project-centric work efforts to pursue a patchwork of data information.

This is a losing proposition on many levels. This approach inappropriately and unnecessarily burdens these initiatives adding to their schedule, cost and risk. It also persists the very problem that needs to be resolved by producing additional sources of duplicate data.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

- This policy package is in alignment with the Tribal Behavioral Health Strategic Plan for 2019 – 2024 which includes assembling an inventory of Tribal BH data sources, identifying gaps and redundancies, and mitigating those gaps where possible. This policy package will benefit Tribal partners by increasing available resources for data inventorying and acquisition.
- This policy package would support the efforts of the REALD Data Governance Committee by providing additional tools to help attain REALD compliance across OHA, DHS, and OIS.
- DHS and OIS will have new responsibilities similar to those outlined for OHA in question16.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This is a collaborative effort between OHA and DHS and includes engagement and involvement of OIS. This effort will also leverage and align with any related efforts occurring at the state level.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

- The inability to accurately record and report longitudinal data for recipients of OHA and DHS services is liable to disproportionally impact historically underserved populations.
- Improvements to OHA and DHS' ability to manage their data will have a direct positive impact on people's health, health care and the health care system. Accurate information will enable health systems to develop holistic views of patients, health trends, and treatment methods. Accurate information improves communication between health care providers and their patients enhancing health outcomes.
- Improved access to accurate health data and the ability to analyze it is essential for tracking disease trends (such as Covid-19) and risk factors. This information will help inform public health determinations, patterns of care and other crucial monitoring and projections.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): This will be an on-going, multi-biennia effort resulting in a new way to manage and de-duplicate data for OHA and DHS

15. What assumptions affect the pricing of this policy package?

- Cost of professional services is assumed to be in alignment with other comparable efforts.
- Cost of staffing is assumed to be relatively constant.
- Federal enhanced funding will be available and leveraged for all Medicaid related efforts.
- Resources with the necessary skills will be available.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

While new responsibilities will not be specifically assigned to OHA or DHS as the result of this policy package, OHA and DHS will be called upon to commit resources and attention to the maintenance of existing responsibilities such as those outlined in the Governor's plan to modernize state information technology systems. As noted above these responsibilities include

- Modernization and standardization of critical systems, agency-specific and cross-agency systems
- Creating and managing a data strategy to improve data analysis, data quality, information sharing and overall decision making. This includes the broad functions necessary when implementing data governance and master data management.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

In the same way OHA and DHS will not be specifically assigned new responsibilities, no new responsibilities will be specifically assigned to Shared Services. Shared Services will continue to maintain their supportive roles of both agencies.

As this work matures Shared Services will benefit from a reduced demand for ad hoc reporting or research. As described above these gains will help measure the success of this policy package. Furthermore, piloting of a knowledge management system will limit the need for Shared Services to respond to redundant questions by allowing users to self-serve answers to common and uncommon questions alike.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests funding for 25.5 permanent positions to support this long-term effort. Positions are new and include:

- Planning, assessment, strategic direction – 15 positions
  - 9 OPA 4 (4 OHA, 4 DHS, 1 OIS)
  - 4 OPA 3 (2 OHA, 2 DHS)
  - 1 ISS8 (OIS)
  - 1 ISS7 (OIS)
- Address current gaps now – 4 positions
  - 2 ISS8, 2 ISS7 (OIS) for database tool specialists and data visualization report writers
- Pilot new capabilities – 6.5 positions
  - 1 ISS8 (OIS)
  - 2 OPA4 (1 OHA, 1 DHS)
  - 3 ISS7 (OIS)
  - .5 PEM D (OIS)

20. What are the start-up and one-time costs?

$6 M in professional services for a data vendor to guide and support strategic planning, business case development, assessment, market research, solution identification, and piloting.

$400,000 for IT professional Services and $420,000 for software licensing.

21. What are the ongoing costs?

Additional licensing and other costs may be needed and will be defined as an outcome of the work outlined for the 2021-23 biennium.

22. What are the potential savings?

Increased staff efficiency from not having to search through multiple systems to find needed data.
Reduced storage costs from de-duplication of data.
Faster response time to ad-hoc requests for information from public entities, federal and state partners.

23. What are the sources of funding and the funding split for each one?

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Oregon Health Authority & Department of Human Services
2021-23 Policy Option Package

Division:	Health Policy and Analytics (HPA)
Program:	Office of Health IT
Policy package title:	Statewide Community Information Exchange
Policy package number:	POP 202
Related legislation:	N/A

Summary statement:

This POP supports a Statewide Community Information Exchange (CIE) that will electronically connect health care and social services to support Oregon Health Plan and DHS clients in need. This statewide initiative leverages CIEs implemented by CCOs and provides OHA and DHS with CIE platforms to screen Oregonians in need, locate community resources, and make referrals. It integrates local CIE networks, creates a centralized resource directory, and coordinates tools and standardizes data and measures. Without funds OHA and DHS staff will lack the tools to respond to the increased needs of OHP members and DHS clients after the enormous disruptions of COVID-19. Without funds to connect local CIE networks and standardize tools, the result will be an increased burden on community-based organizations, fragmented services, and gaps in service delivery. Without meaningful coordination and follow-up on social service referrals, health disparities will persist, the system will perpetuate inequities, and ultimately our most vulnerable Oregonians will be left behind.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$115,944**	**$0**	**$347,816**	**$463,760**	**2**	**1.84**

Oregon Health Authority & Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Over the next two years, the Oregon Health Authority (OHA) expects to be responding to the enormous disruption of COVID-19 by adopting targeted policy and program changes that stabilize the health system and coverage and allow us to rebuild a more sustainable and equitable system for the longer term. A statewide Community Information Exchange (CIE) network is a foundational element of rebuilding a more equitable system in Oregon. A statewide CIE network connects Oregon's health care sector (providers, health plans, CCOs) with social service providers across Oregon and supports meaningful efforts to address social determinants of health (SDOH) in communities hard hit by historical and structural disparities. A statewide CIE bring more effective and efficient identification of appropriate social services resources, closed loop referrals to social services, and better data on social service needs and gaps across Oregon.

Addressing these SDOH needs is a top priority for Oregon's health system transformation and the importance has only grown with the COVID-19 crisis. With the health and economic effects of the pandemic disproportionately affecting Oregon's most vulnerable populations, the need for public programs will increase caseload for the Oregon Health Plan and Department of Human Services (DHS) programs. Many Oregonians needing to quarantine to recover from COVID, or those with underlying conditions needing to self-isolate, will also need supports for housing, food, childcare, safe transportation or other services to keep themselves, their families, and their communities safe from COVID. For families and individuals facing inequities in access to care and health outcomes, ensuring social supports are in place will be even more critical. Hospitals and health care providers, as well as Coordinated Care Organizations (CCO) and health plans, will need better avenues to connect their patients and members to the social services they need, and will need better tools to track whether those services have been received. Community based organizations (CBOs) delivering and supporting social services, including 211info and

others, will need better tools to manage referrals and provide the safety net we are all relying on during this economic and public health crisis.

Oregon stakeholders – including leaders across all major health care institutions - have been leading the charge to address social needs through partnerships between health care and community-based organizations. The Oregon Health Leadership Council (OHLC) and Health Information Technology (HIT) Commons have played a coordinating role, but it has been the hospital, CCO, health plan, provider, and health system leadership that have led to conversations about establishing CIEs.[1] The goal of these stakeholders is to help their clients, patients, and members by making electronic referrals to appropriate social services resources to address these needs through the implementation of CIEs throughout the state.

- Community Information Exchanges are enabled through CIE platforms that provide the technology to electronically connect health care, human and social services partners to provide many functions, including a statewide social services directory, shared risk assessment capabilities, real-time closed loop referral management, collaborative care plans, standardized outcomes, and data analysis.
- Nearly all CCOs are in some phase of planning or implementing CIE platforms for their communities along with Kaiser and others.
- Having shared platforms that "close the loop" on referrals, means that a CCO or provider can often hear back whether their patient or member received social supports. This is a critical component that helps health care partners target their care management resources to those that are falling through the cracks.

While the move toward CIEs is driven by our stakeholders, the state must be involved to meet two needs.

[1] For more information on Oregon's Community Information Exchange landscape and HIT Commons/OHLC coordinated efforts, see http://www.orhealthleadershipcouncil.org/oregon-community-information-exchange-ocie//

- First, as our stakeholders press forward with CIE solutions, OHA and DHS staff lack similar technology to assess for needs, identify resources, and track referral status and outcomes in one place. Although our agencies seek to refer and connect clients and OHP members to social services, our current systems and abilities to do so are disjointed. Providing OHA and DHS access to CIE would improve service coordination and efficiency.
- Second, as external stakeholders stand up local CIE solutions, there is a considerable risk of duplication, inefficiencies and added burden to CBOs that would detract from the impact of CIE systems. OHA and state of Oregon leadership and state-funded work is needed to support the implementation of Oregon's CIE Roadmap – which is in development and would lead to statewide integration, coordination and governance, and support for CBOs and health care users in efficiently using CIE solutions.

2. What would this policy package buy and how and when would it be implemented?

Community Information Exchanges are enabled through CIE platforms that provide the technology to electronically connect health care, human and social services partners to provide many functions, including a statewide social services directory, shared risk assessment capabilities, real-time closed loop referral management, collaborative care plans, standardized outcomes, and data analysis. This POP seeks funding to meet two needs:

First, provide OHA and DHS with CIE platforms, leveraging CIEs being implemented by CCOs and others across Oregon. OHA and DHS programs would use CIE platforms to locate community resources and refer them to appropriate service providers all in shared CIE platforms, see if the individual obtained services, and provide the capability to pull data for analysis to inform decision making.

- An OHA/DHS agency CIE subscription to cover state programs supporting the Medicaid population for:
    - DHS and OHA state agency staff

- Potentially other contracted orgs like CCOs, Area Agencies on Aging (AAA), Developmental Disability (DD) Brokerages, tribal clinics, and Fee For Service care coordination entities (Kepro and CareOregon). Although CCOs are currently investing in CIE, a statewide subscription would bring better federal matching funds and potentially a better discounted price.

Second, prevent network fragmentation by supporting integration between CIE networks, interoperability of systems, a centralized resource directory, coordination of screening and assessment tools and the standardization of data definitions, and outcome measures. OHA work supported by this POP would

- Connect all major CIE platforms used throughout the state into a larger referral network, in turn connecting OHA/DHS users more effectively
- Enhance the Oregon Provider Directory to act as a central community resource directory for the major CIE platforms as well as meeting 211info's directory needs

To support this implementation and operations the following policy and implementation resources are included in this POP:

- DHS and OHA staff,
- a Quality Assurance contractor,
- CIE consultant,
- HIT Commons (governance, technical assistance), and project support

Planning efforts for a statewide CIE network will begin in 2021 with the anticipation of necessary contracts starting in 2022 and into 2023. For the OHA/DHS CIE platform, procurement would include DAS/OIS/QA oversight processes. For efforts to connect across Oregon CIEs including enhancements to the Oregon Provider

Directory, amendments to existing contracts with HIT Commons and the Oregon Provider Directory vendor would be necessary. The HIT Commons and CIE consultant would assist in the implementation.

3. How does this policy package further OHA's mission and align with its strategic plan?

This effort aligns with Governor Brown's 2019 Healthcare for All Plan as well as supports the Oregon Coordinated Care vision to achieve the triple aim of better health, higher quality, and better use of resources. It also directly aligns with the implementation of HB 3076 Community Benefits spending floor, and CCO 2.0 policy recommendations to focus on SDOH (like housing) and the social determinants of equity towards improving health equity.

The importance of addressing the SDOH is outlined in:

- The Oregon Health Policy Board's Action Plan for Health: 2017-2019 Refresh https://sharedsystems.dhsoha.state.or.us/DHSForms/Served/le9963.pdf
- State Health Improvement Plan https://www.oregon.gov/oha/PH/ABOUT/Pages/ship-process.aspx
    - Specific Strategy: "Create a statewide community information exchange to facilitate referrals between health care and social services" (under Access to equitable preventive health care - Goal 3: Implement systemic and cross-collaborative changes to clinical and community-based health related service delivery to improve quality, equity, efficiency and effectiveness of services and intervention:[2]
- OHA's Health Information Technology Oversight Council's (HITOC) Strategic Plan for 2017-2020 update.

[2] https://www.oregon.gov/oha/PH/ABOUT/Documents/ship/2020-2024_SHIP_Strategies.pdf

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

OHA will know if the policy package was successful by monitoring impact on process and outcome measures, including measures below. HIT Commons would play a major role in reporting to all stakeholders on the progress and success of this work. Considerable data analysis on referrals made and needs met are available within CIE platforms, enabling nimble monitoring of the success of these efforts. Measures of success with implementation of statewide CIE would be:

- Reduced time from social service referral to service delivery
- CIE participants (including DHS/OHA staff and contractors) report spending less time referring clients to services and managing referral status and service outcomes
- CBOs report reduced time managing referral lists and reduced wait time
- Services received by individuals reflect the social needs identified in screenings
- Clients report increase in social needs being addressed and better health, and improved patient experience
- Improved health outcomes via CCO metrics
- SDOH screening after services received show increase in positive health outcomes
- Measure showing narrowing of the equity gap by reducing health disparities
- Satisfaction of CIE participants and increased community collaboration

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Statewide CIE would contribute to all off OHA's key goals. It would provide a tool that engages staff to participate in operational excellence. The network would facilitate effective partnerships while addressing inequities, lowering costs, improve health, and provide better care. It would address the following measures:

OHA's Key Performance Measure:

- Member Health Status

OHA's Performance System Outcome Measures:

- 1AOM2. Increase Partner Satisfaction
- 1AOM6. Reduce Health Disparity
- 1AOM7. Improve Population Health
- 1AOM8. Improve Quality of Care
- 1AOM9. Improve Care Experience

7. What are the long-term desired outcomes?

The long-term outcome of implementing a statewide CIE network would be an efficient social services referral system that results in better health of Oregonians and decrease health disparities. Additional outcomes would be:

- The disparate and often homegrown lists of social services resources will be eliminated, and stakeholders have a clear picture of services available in communities.
- Health care providers, CCOs and OHA/DHS programs will have transparency into an individual's social services received and outcomes and improve effectiveness and efficiency for managing OHP and DHS caseloads.

- Oregon leadership and policy makers will have data on resource needs, services provided, and outcomes that are comparable across the state. This information will be critical in decision making about appropriating funds to different needs in communities.
- The health care delivery system and OHA/DHS programs will have information on how to better address the health of their patients/members, where to invest funds into local social services, and improve health outcomes.

Supporting a statewide CIE network also directly responds to the COVID-19 crisis. A CIE helps stabilize the health care system by allowing providers to build in the social supports needed for better clinical outcomes, easing discharge bottlenecks for care facilities, and enhancing the ability of OHA/DHS to manage case load increases and addressing health inequities seen by the COVID impact to vulnerable communities. Social services are critical to support vulnerable Oregonians needing to quarantine to recover from COVID, or those with underlying conditions needing to self-isolate, including supports with housing, food, childcare, safe transportation or other services to keep themselves, their families, and their communities safe from COVID.

8. What would be the adverse effects of not funding this policy package?

The state needs to be involved. Putting more burden on social services that are already overtaxed puts Oregon's most vulnerable at greater risk and if OHA does not engage in these activities we risk the following:

- Failure to join our external partners will leave OHA and DHS staff without the tools in responding to the increased the strain on the Oregon Health Plan and DHS.
- Failure to coordinate local CIE networks will lead to increased burden to CBOs, fragmentation of services and data leading to gaps in delivery, under or overestimated needs, and ultimately leaving our most vulnerable Oregonians with the responsibility of navigating the navigators.

- Our vulnerable populations will not have access to more efficiently managed program referrals and perpetuate inequity.
- It would leave the opportunity to access a large portion of federal matching funds which would offset efforts by CCOs, tribes, payers, providers, and health systems.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Oregon stakeholders have been leading the charge to address this problem and many are beginning to adopt local CIE platforms at CCO, health plan, and community levels. Oregon Health Leadership Council has engaged several systems and payers in a coordinated implementation of the UniteUs CIE platform and HIT Commons has launched a CIE Advisory Group (supported by OHA). Nearly all CCOs have adopted or are in process of adopting a CIE.

OHA has assisted in coordination and planning within the emerging CIE landscape. Efforts include:

- Supporting the development of a CIE Roadmap through HIT Commons to identify recommendations statewide.
- Coordinating an internal OHA/DHS CIE workgroup to track and inform CIE Roadmap and other efforts
- Coordination of screening and assessment tools and the standardization of data definitions
- Exploring the use of the Oregon Provider Directory as a central resource directory for social service providers, 211info, as well as healthcare providers.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternative One: Do Nothing

- OHA/DHS allows the market to continue as is and not obtain a subscription for state agencies or directly support integration of networks nor provide policy support or other coordination. This would leave our own agencies without the tools to assist our most vulnerable populations and allow uncoordinated and fragmented networks to grow with only local resources and support leaving sections of the state without any tools available. It would also leave a significant portion of federal match dollars untapped to support CCOs, tribal clinics, and partner agencies to pay 100% of their own funds not at a reduced rate.

Alternative Two: Coordination Only

- OHA/DHS allows the market to continue as is and not obtain a subscription for state agencies or directly support integration of networks. However, OHA and DHS provide policy and analytical support through the HIT Commons CIE Roadmap, bring stakeholders together and make statewide recommendations. This would still leave our own agencies without the tools to assist our most vulnerable populations. Networks may be somewhat less fragmented if statewide recommendations were voluntarily adopted. However, networks would still be limited by local resources and support leaving sections of the state without any tools available. It would also still leave a significant portion of federal match dollars untapped to support CCOs, tribal clinics, and partner agencies – many of whom would be unable to participate financially or would need to pay 100% of their own funds not at a reduced rate.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

DHS field staff, tribal clinics, and other contracted organizations like CCOs, AAA, Developmental Disability Brokerages, and Fee For Service care coordination entities (Kepro and CareOregon) would be offered a Medicaid subscription of CIE platforms to locate community resources, refer them to appropriate service providers, see if individuals obtained services, track outcomes, and pull data for analysis to inform decision making. The network would offer a centralized resource directory, coordination of screening and assessment tools and the standardization of data definitions, and outcome measures. This would greatly serve these organizations with case management programs to help streamline the screening, referral, and delivery of services process. It will require staff training, change management, and a transition from their current processes to utilize the new platform.

There are additional state and local governmental agencies (e.g., corrections, education, housing services) who do not serve Medicaid that may want to participate in a statewide CIE network and would benefit from reduced bundled pricing.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

OHA has assisted in coordination and planning within the emerging CIE landscape. Efforts include:

- An OHA/DHS Internal CIE Advisory Group launched in 2020 to help coordinate and educate around future efforts. This includes representation by each division in DHS, Health Systems Division (Medicaid and Behavioral Health), Public Health, and Health Policy and Analytics.
- Supporting the development of a CIE Roadmap through HIT Commons to identify recommendations statewide.
- Exploring the use of the Oregon Provider Directory as a central resource directory for social service providers, 211info, as well as healthcare providers.

Oregon health care stakeholders – including leaders across all major health care institutions - have been leading the charge to address social needs through partnerships between health care and community-based organizations. The OHLC and HIT Commons have played a coordinating role, but it has been the hospital, CCOs, health plan, provider and health system leadership that have led to conversations about establishing CIEs. The goal of these stakeholders is to help their clients, patients, and members by making electronic referrals to appropriate social services resources to address these needs through the implementation of CIEs throughout the state.

Oregon social services stakeholders are also engaged, including 211info, Continuum of Care agencies, Oregon Food Bank, and other agencies participating in the HIT Commons CIE Advisory Group.[3]

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[4] or equitable health outcomes?

Health starts in the community. However, historical and present-day injustices and institutional bias cause marginalized populations to live in less healthy environments with fewer social and economic opportunities and resources. While clinical care accounts for 20% of a person's health, 80% is influenced by these environment and socioeconomic inequities outside of a doctor's office (County Health Rankings). The 2018 State Health Assessment shows that 1 in 4 children experience food insecurity and over 15,000 adults experienced homelessness as of January 2019. CIEs allow healthcare provider and social service providers to come together to address these social determinants of health and ameliorate the effects of health inequities.

Staffing and fiscal impact

[3] See members here: http://www.orhealthleadershipcouncil.org/oregon-cie-advisory-group/
[4] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Implementation date(s): July 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

The following assumptions drive the pricing listed in this package:

- That OHA/DHS uses can be met through CIE solutions that are being implemented by CCOs and others across Oregon
- That federal Medicaid matching funds will be available for CIE investments. OHA has engaged CMS to ensure support for Medicaid-related costs related to CIE.
- Pricing assumptions are conservative and based on initial market analysis, but actual pricing may vary
- That integrations between different CIE platforms will be $75,000 per integration and that we will need up to ten integrations

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

OHA, in partnership with DHS, will be responsible for managing the Medicaid CIE subscription contract, manage the integration of CIE networks, onboarding and offboarding agencies' staff and network partners, and stewarding social service data in the Oregon Provider Directory.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Temporary project support from OIS will be necessary and is included in the staffing requested. After implementation we anticipate the solution will be provided as Software as a Service (SaaS) and not require

significant ongoing support from Shared Services. Procurement and contracting support will be needed to implement this work.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Agency	FTE	Classification	Duration	Position Type
OHA	1.0	OPA4	Start 2021 and ongoing	Permanent
OHA	1.0	OPA3	Start 2021 and ongoing	Permanent
DHS	2.0	OPA3	Start 2021 and ongoing	Permanent
Shared Service	1.0	PM3	Start 2021 and end in 2023 or 2024	Limited Duration
Shared Service	1.0	ISS7	Start 2021 and end in 2023 or 2024	Limited Duration

20. What are the start-up and one-time costs?

Cost estimates are preliminary and based on initial market research. Actual costs may vary.

- CIE Integrations with state IT systems & other CIEs: $750,000 DDI
- Oregon Provider Directory Enhancements and Integration with CIEs and 211info: $1,800,000 DDI
- Quality Assurance Vendor for DDI: $300,000 across two years
- CIE consultant: $40,000 across two years
- DOJ costs: $100,000 across two years
- Shared Service limited duration staff positions

- OHA and DHS permanent staff positions

21. What are the ongoing costs?

Cost estimates are preliminary and based on initial market research. Actual costs may vary.

- CIE Subscription and Licenses Costs: $800,000 - $1,000,000 per year
- Maintenance of CIE Integrations with state IT systems & other CIEs: $100,000 per year
- Oregon Provider Directory: $250,000 per year
- HIT Commons: $300,000 per year
- All OHA and DHS staff positions

22. What are the potential savings?

The potential fiscal savings as a result of this POP are unknown but potentially significant. There are anticipated cost savings for case managers' time as this will create a more efficient means to conduct and track referrals. It will also provide the state with data on population needs and resources which may assist policy makers in appropriate budget allocation.

23. What are the sources of funding and the funding split for each one?

Planning and implementation costs (including contractor and staffing) at 90/10
Ongoing maintenance and operations costs (including contractor and staffing) at 75/25

Oregon Health Authority and Department of Human Services
2021-23 Policy Option Package

Division: Oregon Health Authority
Program: Office of Information Services
Policy package title: Critical Systems
Policy package number: 203
Related legislation: N/A

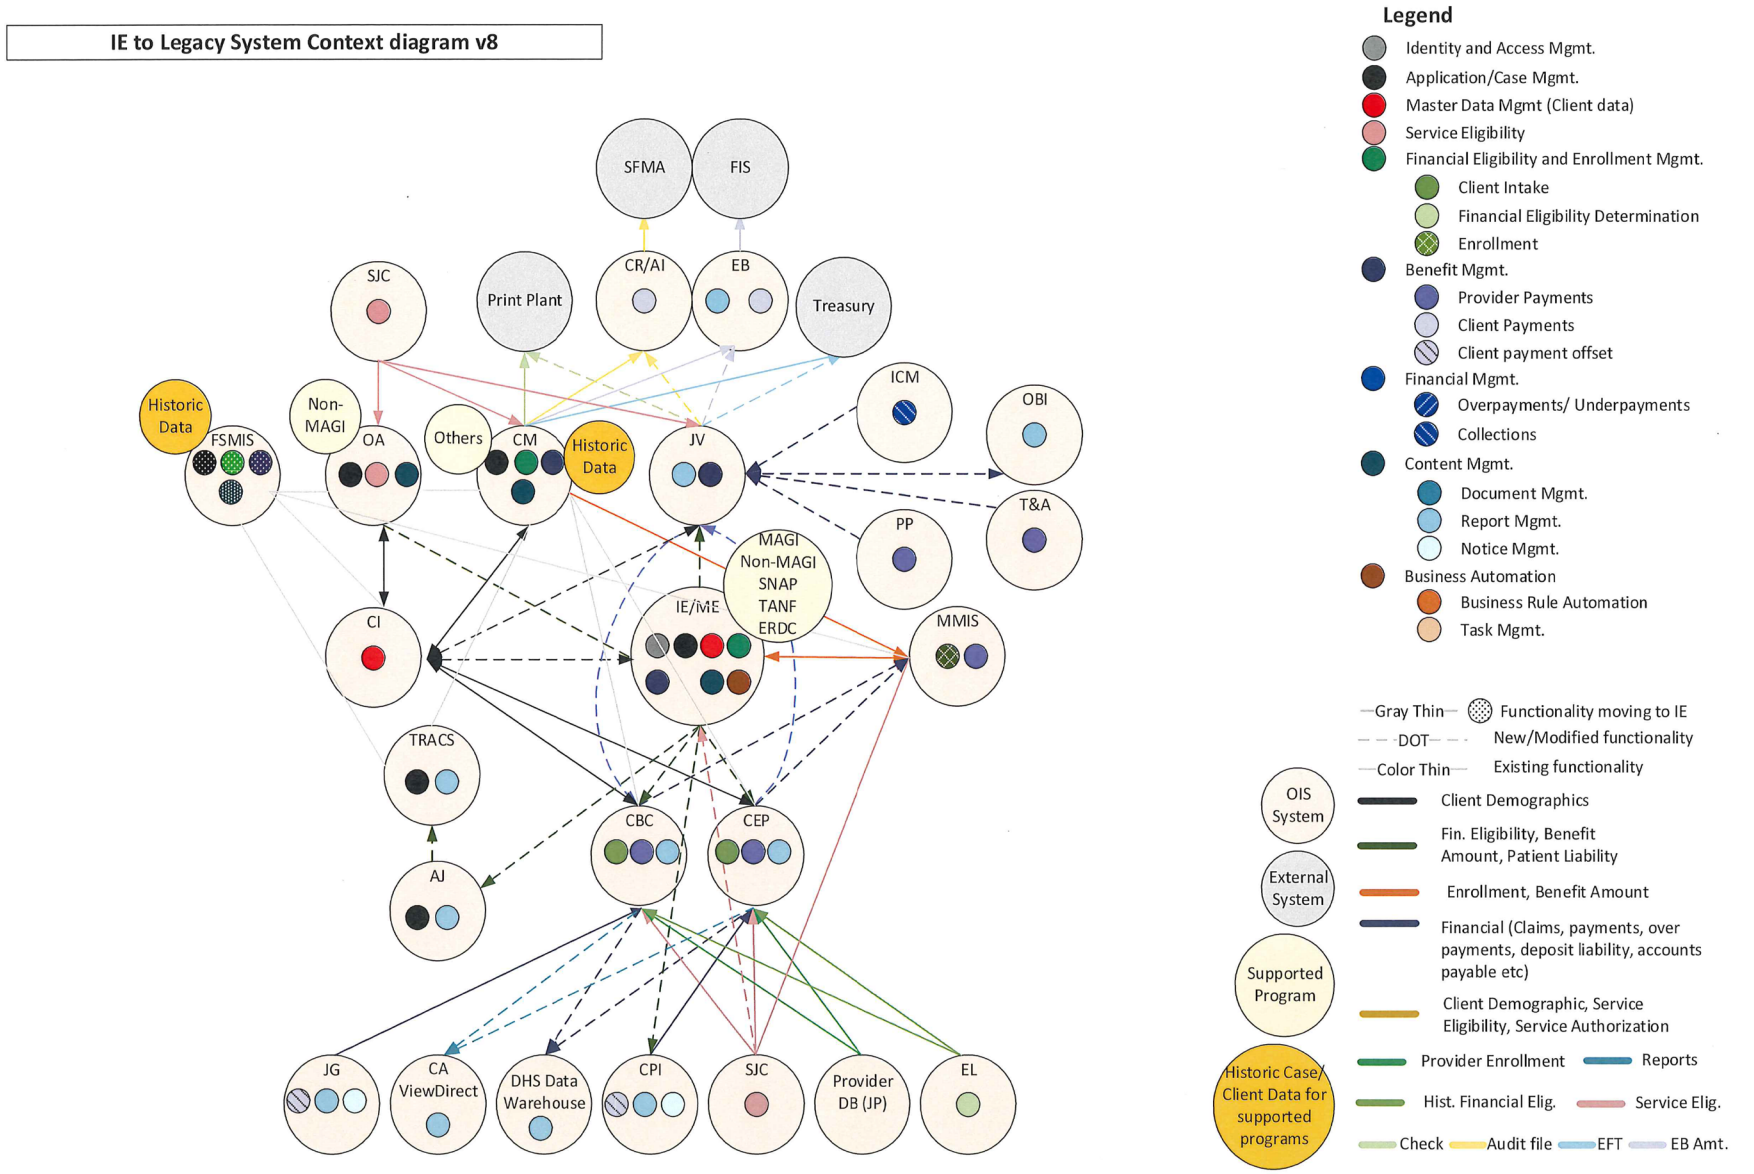
Summary statement:

The current state of the Department of Human Services (DHS) and the Oregon Health Authority (OHA)'s legacy systems are a serious risk to the agencies' service delivery. Many of the mission critical applications are 20-40 years old. These foundational, hub systems are relied on by many other systems within DHS and OHA and by other agencies. The systems are rapidly reaching an unsustainable state due to their outdated technology and inability to obtain people with the programming skills necessary to support them. DHS and OHA have implemented major solutions under the Modernization umbrella including the ONE MAGI system and the pending Integrated Eligibility system. Now attention must be paid to modernizing the legacy systems with an emphasis on the Mainframe. This policy package continues modernization efforts to improve access to services, automate processes and modernize aging systems.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$5,125,892**	**$8,036,611** (OIS limitation $7,488,109)	**$2,368,140**	**$15,530,643** (including OIS limitation double count)	**19**	**19.00**

Purpose

1. Why does DHS/OHA propose this policy package and what issue is DHS/OHA trying to fix or solve?



Technology system modernization includes migrating legacy systems to modern, more secure platforms. Since modernization efforts began in 2009 for DHS and 2011 for OHA, primary focus has been responding to federal and state legislation. Outcomes to date include delivery of major solutions such as the ONE MAGI system and a clear path to automated eligibility determination through the Integrated Eligibility Project. Now the legacy systems must be modernized with an emphasis on the Mainframe. These systems are aging and fragile, with many custom-built, non-standard interfaces between systems. The result is a technical environment fraught with challenges to maintain with rampant data duplication and challenges in data sharing. Modernization of these systems will establish a revitalized environment that is architecturally sound, adherent to industry best practices with an emphasis on leveraging SaaS, Cloud and solution configuration over custom development. Duplicate data will be reduced, and data will be maintained in a secure systems environment scalable to business needs.

The age of the 70 mission critical legacy applications supporting DHS and OHA predates many of today's technology innovations. Consider the challenge of connecting a 1970s era TV, VCR or stereo system to a smart TV, blue tooth wireless or streaming. Transmission integrity and the ability to use peripherals like remotes is limited or impossible. Comparable limiting factors affect the maintainability of legacy systems like Client Maintenance (1977), Client Index (1992), Oregon Access (1996), Service Authorization (1992), TRACS (1993) and EBT (1997). Systems such as Client Maintenance (CM) and Client Index (CI) are relied on by hundreds of other systems and services. Their failure will cause major disruption in DHS and OHA and hamper virtually all services to clients. These are representative of the 30 mission critical Mainframe systems. Multiple PowerBuilder and Java systems are also past end-of-life. Over 200 Microsoft business applications built on unsupported and not secure Microsoft versions must also be migrated to current technology. These systems

have become unmanageable bottlenecks to faster delivery and represent increased cost, risk, liability and very real danger of failure for the agencies.

The legacy systems utilize outdated programming languages, primarily COBOL. There are major challenges acquiring skilled COBOL programmers who can understand and support the Mainframe Legacy systems. These staff spend the majority of their time providing maintenance (break-fix). Any system modifications or changes, whether to repair an existing problem or respond to legislative mandates, require extensive testing due to system complexity and interfaces. Changes to any system has a very high probability of impacting others. Resolving system problems is challenging, time consuming and expensive. Support is further complicated by the multitude of platforms and languages used in the various systems requiring staff to be well-versed in a broad variety of computing disciplines. The risk profile for systems support is very high due to difficulties replacing departing staff, the low ratio of staff to systems and the lack of system documentation. It is also extremely difficult to acquire skilled PowerBuilder programmers. Interfacing legacy systems with modern technology is extremely challenging and often not possible. Security vulnerabilities are significant since today's security risks did not exist when the systems were built. Achieving business goals is encumbered by outdated, costly to maintain, complex applications. OIS proposes a multi-faceted approach to address these challenges including a commitment to sustain legacy applications for the next 6-10 years while strengthening Business Intelligence capabilities, preparing for migration to modern, more sustainable solutions such as Cloud and automating testing capabilities.

Oregon Health Authority and Department of Human Services
2021-23 Policy Option Package

2. What would this policy package buy and how and when would it be implemented?

This POP provides funding for professional services and 19 permanent positions to:

Plan

- Secure professional services with expertise in legacy system assessment and migration to guide and support cross-agency planning and assessment efforts.
- Perform an Application Assessment including an inventory of legacy applications and data and identification of systems as viable candidates for migration to modern platforms including Cloud, versus re-engineering versus retirement.
- Stakeholder identification and engagement including identification of probable participants from developers to end-users
- Development of a solid business case outlining the decision processes, approaches and alternatives
- Documentation of various application's content and design
- Development of a Modernization Strategy to define the transformation process including the ability to accommodate changes during the modernization process and a technical plan for migration of target systems
- Strategy alignment of the Modernization Strategy with stakeholder needs

Migrate

- Provide technical expertise for modernization efforts
- Outline a detailed roadmap for system remediation of Mainframe, PowerBuilder, Java and Microsoft applications
- Create dedicated teams of permanent[1] resources to migrate vulnerable Mainframe, PowerBuilder, Microsoft and Java outdated/end-of-life applications to modern platforms
- Establish expertise and capabilities to leverage cloud computing

[1] It is nearly impossible to recruit technical staff with the necessary skills into LD positions.

- Begin migration/conversion efforts focused on systems of highest risk with goal of piloting transition of 1-2 systems by end of the biennium

Leverage Tools
- Leverage automated Testing Tools
- Keep Software Development tools current and supported
- Establish a source code repository

Integrate
- Identify opportunities for alignment and leveraging of other modernization efforts including Modernization of Financial Systems and Medicaid Modularity
- Write Application Programming Interfaces (APIs) where needed

Archive/Decommission
- Secure data not regularly used but necessary for referential or historical purposes or because retention is required

Mainframe, Microsoft, PowerBuilder, Java Modernization and Cloud Capabilities:

- $1.5M – IT professional services for planning, technical analysis, design recommendations and reviews, best practices guidance, cloud computing expertise and capabilities
- $800k - test automation, technical analysis, inventory tools, MS Azure licensing
- $50k - new technology training for staff
- 19 positions - dedicated to legacy system migration to modern technologies and to establish cloud software development architecture expertise including work with DHS and OHA for efficiently utilizing cloud services. (9 ISS8, 8 ISS7, 1 PEM E, 1 PEM G)

3. How does this policy package further DHS/OHA's mission and align with its strategic plan?

Moderation of the legacy systems enables DHS and OHA to continue to serve Oregon citizens by ensuring the resident capabilities continue to be available and accessible.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

Success will be measured by:

1. Completion of an inventory/assessment of the current suite of legacy systems and development of a plan for remediation of each system. Remediation may entail conversion to a newer version of the same platform, re-engineering the solution into other existing more modern solutions (e.g. Integrated Eligibility), migration to a new platform (e.g. Cloud) or retirement of the system and plan for warehousing of the relevant data.
2. Hiring of appropriately skilled resources to support the various remediation efforts
3. All mainframe source code will be stored in a source control system which will enable the ability for multiple mainframe projects to be updated in parallel. Lack of a central control system has impacted the mainframe team's ability to work on multiple large projects simultaneously. In the current environment, the mainframe team relies on memory for what code changes have been made in which environments. It is a manual effort to copy and paste programming code into different environments. This also has created multiple single-points-of success and a heavy reliance on a few key team members. When one of them is unavailable (e.g. unexpected out of office) it has been impactful to projects to find and/or redo this work.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or a DHS/OHA performance measure? If yes, identify the performance measure(s).

This policy package ties to a number of key performance measures for OIS including:

- OP4 – Develop Solutions. Includes acquiring, designing, architecting, enhancing products and services to meet business requirements, managing the lifecycle of products and services.
- OP5 – Deliver Solutions. Includes transition new or modified products to operations & maintenance, managing change, configuration and releases, managing IT services and the acquisition & delivery of hardware and software.
- OP6 – Manage and Mitigate Risk. Includes managing information security & privacy incidents, facilitating compliant data use and system access agreements, producing actionable IT risk assessments.
- SP1 – Continuous Improvement. Includes defining & documenting key processes, evaluating and improving established processes, managing performance metrics and reporting, assessing outcomes, maintaining security standards and practices.

7. What are the long-term desired outcomes?

Long term desired outcomes are remediation of all core legacy systems to sustainable solutions without loss of required capabilities or compromises to other systems reliant upon the core system(s). This modernization effort is expected to yield increased mobility and improve citizen experiences by ensuring back-end systems are reliable, available and sustainable. Leveraging modern capabilities will improve response times for legislative or policy driven changes. Lower risks will be achieved by reduced reliance on obsolete skills representative of retiring Baby Boomer programmers. Cybersecurity risks associated with current use of decades old code will be mitigated and the technical deficits currently in place will be reduced significantly. Operational efficiency will improve and turnaround time for addressing internal system change requests will be reduced.

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, core mission critical systems supporting DHS and OHA service delivery will become static, changes even to meet legislative needs will not be possible and the systems are likely to fail as the programming skills necessary to keep them functioning will no longer be available and cannot be acquired.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

- Modernization has been an on-going effort within DHS/OHA for over 10 years. Significant progress has been made in responding to Federal and State legislation.
- Major initiatives have resulted in the successful implementation of the ONE MAGI system used for low-income Oregonians to apply for health insurance.
- The Integrated Eligibility project delivers automation of eligibility determination for major benefits programs including Medicaid, Temporary Aid to Needy Families (TANF), Supplemental Nutrition Assistance Program (SNAP) and Employment Related Day Care (ERDC).
- Work is nearing completion on the successful implementation of Salesforce for the Centralized Abuse Management System.
- The agencies successfully implemented Sharepoint for use broadly across both agencies as a collaboration and document management environment.
- More recently, the agencies converted to Office 365 using Cloud capabilities.
- Several at-risk financial systems have been migrated to an interim (JV) solution, but this cannot be maintained long-term.

- Outsourcing of system support has been explored, but no bids were received due to the obsolescence of the environment and lack of system documentation.
- Contracted resources have been leveraged and currently provide 25% of the Mainframe support. This comes at a significant cost; one COBOL contracted resources costs over $600,000 per year.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives include:

1. Do nothing.
   This is not a viable option as certain failure of mission critical systems will occur without remediation. These are core systems upon which multiple other systems and services, including the new solutions outlined above (e.g. ONE MAGI, Integrated Eligibility) and the State's largest service facing system, the Medicaid Management Information System (MMIS) are critically dependent. If the core systems fail, DHS and OHA's ability to serve their constituents will be severely compromised.
2. Continue relying on contracted resources to fill gaps in COBOL programmer availability as existing COBOL programmers retire or leave the agency.
   This is a cost-prohibitive solution on several levels. The overt cost is unsustainable and the contract mechanisms available for securing resources limits the duration of their work. This results in continual loss of knowledge and skill and is a losing proposition.
3. Outsource fully the support of the legacy systems.
   This approach has been attempted but failed as no viable consulting firms even bid due to the obsolescence of the systems and the lack of system documentation.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Other agencies including AAA Community Partners, Oregon Employment Department, Oregon Department of Justice, Commission for the Blind, Children and Families Commission, Department of Education, Oregon Youth Authority, Department of Corrections, State Police and Department of Motor Vehicles will be impacted if these systems fail. Each of these agencies interfaces with or relies on data from these core legacy systems. Additionally, these systems interface various critical federal systems for information such as Social Security Number (SSN) validation. Oregon Employment Department relies on the DHS/OHA mainframe interface for their access to this information rather than building their own.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Although the Office of Information Services is leading this effort, it is doing so in close collaboration with DHS and OHA. Opportunities for alignment and leveraging of other modernization efforts within the agencies including Medicaid Modularity and pending Financial Systems modernization will be pursued.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[2] or equitable health outcomes?

This policy package ensures that access to key information housed in the legacy systems including key client information will continue to be available to myriad programs and systems across DHS and OHA. Examples include Medicaid, Child Welfare, DHS eligibility programs. Furthermore, many demographically sensitive

[2] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

requests such as citizenship and SSN validation are sent to Federal hubs via the mainframe legacy systems. It is essential to providing equitable services that these requests are processed accurately, reliably and rapidly.

Staffing and fiscal impact

Implementation date(s):	July 1, 2021 start date
End date (if applicable):	This effort is anticipated to take 6-10 years to fully complete.

15. What assumptions affect the pricing of this policy package?

Cost of professional services is assumed to be in alignment with other comparable efforts.
Cost of staffing is assumed to be relatively constant.
Federal enhanced funding will be available and leveraged for all Medicaid related efforts.
Resources with the necessary skills will be available.
Business partners will have adequate capacity to engage in work efforts particularly around requirements definition, design review and user acceptance testing.

16. Will there be new responsibilities for DHS/OHA? Specify which programs and describe their new responsibilities.

OHA and DHS will need to provide subject matter experts (SMEs) to support analysis, design and testing efforts throughout the lifecycle of this initiative.
OIS will have additional maintenance and support during the modernization and replacement efforts.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Impact on Shared Services is expected to be limited to providing SMEs to support analysis, testing and design efforts. Entities such as OPAR and Financial Services are likely SME contributors.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests funding for 19 permanent positions in OIS. Positions are new and include 9 ISS8s, 8 ISS7s, 1 PEM E, 1 PEM G.

20. What are the start-up and one-time costs?

$8,042,534 million are the start-up costs which includes cost of the 19 permanent positions plus $1.5 million for professional services.

21. What are the ongoing costs?

An outcome of this effort will yield a business case and roadmap for system remediation. Those work products will also identify expected ongoing costs which are indeterminate at this time.

22. What are the potential savings?

- Reduced staffing risks – increased system stability
- Better tools providing faster delivery of reliable, scalable, secure solutions to meet business needs with

enhanced protection of highly confidential data.

- Greater resiliency for DHS /OHA in times of crisis; ability to access services without geographic barriers anywhere, anytime on any network ensures business continuity and access to critical information, including health related.
- Health care, health care systems and OHA operations benefit from improved system/data access, reduced security and support risks; quicker time to market for system changes.

23. What are the sources of funding and the funding split for each one?

Office of Information Services is requesting 100% Other Funds limitation. Shared Services Funding allocates to 55.49% DHS and 44.51% OHA, with a blended rate of 63.30% General Fund, 0.06 Lottery Fund, 6.50% Other Fund, and 30.14% Federal Fund.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services		$5,476,140		$5,476,140	19	19.00
Services & Supplies	$380,842	$2,074,104	$111,448	$2,566,394		
Capital Outlay

Oregon Health Authority & Department of Human Services
2021-23 Policy Option Package

Division:	Shared Services
Program:	Office of Financial Services
Policy package title:	Modernization: Financial Systems
Policy package number:	204
Related legislation:	N/A
Summary statement:	The Department of Human Services (DHS) and Oregon Health Authority (OHA) comprise the largest Oregon state agencies disbursing ***billions*** of dollars of state and federal support services to Oregonians. The agencies need an integrated, federally compliant financial management system for budgeting, payments, allocations and reconciliations. The current financial environment is extremely limited. No budget system exists. Spreadsheets are used to develop and manage budgets and track funding. Financial payments use over 20 systems and interfaces pre-dating the turn of the century. Payment and reconciliation systems are end-of-life COBOL Mainframe with duplicative functionality, augmented by spreadsheets and paper processes. Data uniformity between systems is lacking, reconciliation is difficult and expensive, financial business rules are inconsistent, error tracing is manual. Re-keyed financial data results in increased errors. Financial complexity has grown commensurately with agency growth yielding the untenable environment of today. The lack of modern financial management capabilities must be addressed to mitigate financial and data risk for the agencies.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
DHS	$883,459	$771,823	$565,564	$2,220,846	3	3.00
OHA	$1,181,367	$1,853,234	$291,786	$3,326,387	4	4.00
Total policy package:	**$2,064,826**	**$2,625,057**	**$857,350**	**$ 5,547,233**	**7**	**7.00**

Oregon Health Authority and Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS/OHA propose this policy package and what issue is DHS/OHA trying to fix or solve?

The lack of a Financial Management System compromises the multi-billion-dollar budgeting and expenditure tracking required by the Department of Human Services (DHS) and the Oregon Health Authority (OHA). A cohesive financial system can help the organization identify potential savings and support budget reduction exercises by helping identify fragmented spending across different entities to enable consolidated purchasing, spending and achieve cost savings. The agencies are burdened with continually increasing maintenance costs and inefficiency interfacing multiple systems into the official state systems. Some of the issues include:

- No common system platform; consequently, data between systems are inconsistent, reconciliations are extremely challenging, and the disparate environments are difficult to maintain.
- Providing comprehensive data to state and federal funding partners and responding to legislative and agency questions is challenging, inefficient and complex.
- Providers receive payments and 1099s from multiple agency systems creating confusion and inconsistency.
- Systems are not all built on the same set of financial business rules.
- Reconciliation is challenged by situations where payments to providers are made from one system while simultaneously establishing accounts receivable to the same provider in another system.
- Information contained in Oregon Budget Information Tracking System (ORBITS) is not available readily to staff outside of agency budget units and may not be at the level of granularity needed by program areas to support everyday management.

Other challenges include:

- Lack of electronic document workflow. Payment and other requests are paper-based and routed with multiple handoffs. Paperless processing of routine, low-dollar spending (e.g. travel, office expenses) enables

cost efficiencies as the current manual processing often represents a higher cost than the value of the transactions.

- Lack of automated reporting to link expenditure information with budget authority used to support operational and planning decision-making. Currently spreadsheets are used to support this activity.
- Multiple complex spreadsheets are used daily to support multiple program areas. Each represent high risk because they have been created by individual analysts without the benefit of standardized programming, formulas, functions or the documentation typically found in a robust financial system.
- Multiple paper processes and re-keying of information results in increased risk of errors. Tracing of errors and performing reconciliation is highly manual and inefficient requiring analysis across multiple disparate systems

2. What would this policy package buy and how and when would it be implemented?

This request is for a planning effort to develop a cross-agency financial system and modernize the underlying technology supporting DHS and OHA budgeting and financial management. Costs include professional consulting resources to guide and support planning, identification and evaluation of potential long-term solutions. Activities include identification of the business strategy, conducting market research, creating a business case, roadmap, and acquisition/procurement plan.

The goal is to establish a sustainable modular financial system that integrates with existing legacy systems and aligns to and leverages the State accounting (SFMA) and budget (ORBITS) systems and any future state-level financial systems modernization. This would not replace but rather integrate with existing state enterprise systems. Alignment to and leveraging of other agency and state-level modernization efforts would be incorporated. Activities include:

- Solicitation for and procurement of expert public sector financial subject matter consulting services to guide and support the efforts outlined in this package.

- Market research to identify other state's financial systems and identification of products aligned to DHS and OHA's needs.
- A Business Case defining high level requirements, alternatives, approach and estimated costs.
- A procurement approach, roadmap and detailed plan for procurement and implementation of a modern financial planning, budgeting and financial execution solution. The roadmap would set timelines for implementation of solutions supporting financial planning and execution needs across DHS and OHA, provide a plan for integration with existing systems and guidelines for implementation of new solutions into the shared agency framework.
- Identification of and alignment with modernization efforts including OIS' efforts to modernize mission and critical systems that are at (or beyond) end-of-life.
- An RFP to solicit for solutions meeting DHS and OHA financial system requirements for a Financial Management System the agencies can incrementally grow into.
- A Proof of Concept and/or implementation of 1+ modules within the new system.

3. How does this policy package further DHS/OHA's mission and align with its strategic plan?

Timely, accurate and consistent data and information are key to meeting the OHA mission and overall 10-year strategic plan to eliminate health inequities in Oregon in 10 years. Budget data and financial information is part of helping link how OHA and DHS are spending funds and how that links to the mission, vision, and strategic plan of both agencies. This policy package provides the building blocks toward how the agencies can track budget to meeting our strategic plan goals. The proposed new system would increase DHS and OHA's stewardship of resources, streamline the financial and budgeting processes and automate financial and budget related systems. These systems are used to provide management information on budget and financial related issues to support informed decision making.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No, this package is not being requested due to an audit. However, issues related to the complexity of the current systems and processes has consistently been highlighted in agency risk assessments.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

Success would be measured by:

- Near term identification and procurement of a viable solution meeting agency requirements and a successful Proof of Concept and/or implementation of 1+ modules within the new systems.
- Long term implementation of an integrated, federally compliant financial management system, reduction or elimination of duplicate payments systems, comprehensive integrated budgeting and financial planning capabilities replacing disparate spreadsheets, manual and paper processes and other side-systems.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or a DHS/OHA performance measure? If yes, identify the performance measure(s).

This policy package aligns with and directly supports two of the Governor's policy:

1. "Modernize and standardize critical statewide systems"
2. "Optimize service delivery to the public and internally by modernizing agency-specific and cross-agency systems"

7. What are the long-term desired outcomes?

The long-term vision is implementation of a comprehensive financial system for DHS and OHA performing financial functions from budget entry through payment processing, accounts receivable, cash receipting, client

payroll, accounts payable, tax reporting, trust accounting, grant accounting, budget to actuals, etc. This roadmap sets timelines for a new solution and a plan for integrating existing capabilities and new solutions into the agency's framework.

The goal is to leverage and align with state level and other agency modernization efforts and yield a single, seamless, integrated agency financial system for all DHS and OHA financial transactions that is flexible, compliant, market-tested, easily supported and user friendly.

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, the existing compromises, error-potential, inefficiencies, duplication of work efforts and data, difficulties aligning budget to actual will persist and continue to hamper and compromise the agencies. Risks of financial errors will continue to grow as funding becomes ever-more complex. Gaps in knowledge are certain as staff retire, change jobs or leave the agencies.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Several efforts have been undertaken to improve the current situation including:

- Created business rules to standardize financial subsystem development. Newer systems have been developed with these rules and use a set of "common tables" reducing the amount of accounting coding configuration required in each system. This has improved the efficiency of the systems but, it has not reduced data and system duplication.
- Developed macros to reduce re-keying and improve accuracy.
- Developed reports/queries to detect errors for correction after the fact.

- Started use of Excel PowerQuery and PowerPivot to reduce manual entry and manipulation in spreadsheets to streamline the monthly Financial position reports it produces. These are one-off approaches dependent on individual knowledge and skills of analysts and thereby not feasible to automate or establish as broad, repeatable solutions.
- Moved several at-risk financial systems (e.g. Check Reconciliation and Accounting Interface) into an interim Mainframe solution. This helped stabilize those systems but is not a long-term sustainable solution.
- Work has begun collaboratively between the Office of Financial Services and the Office of Information Services to develop a technology roadmap supporting an enterprise approach to financial functionality.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives include:

1. Do nothing.
   This is not a viable option as the current situation has become untenable and is costing the agencies time, credibility and money. Error handling and reconciliations are convoluted and complex leaving ample opportunities for persisting or exacerbating the situation.
2. Wait until the state develops and implements a comprehensive enterprise level financial management solution that can be tailored to meet agency's needs.
   Timing for a state solution is indeterminate. It is unknown if or what will be developed at a state level and questionable if it could meet the specific financial management needs of DHS and OHA which are very specific to their service delivery and funding sources.
3. Outsource all financial management functions to an external entity.
   This approach is untested and uncertain with a low probability of success as it is unlikely a private sector entity would have the requisite tools and experience managing the myriad funding streams, allocations,

reconciliations and error tracking required by federal and state funding partners and able to understand the complex financial functions managed within the agencies.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

OHA and DHS are the primary stakeholders and beneficiaries of the improvements outlined in the policy package. Federal and state funding partners would also benefit as agency timeliness and accuracy will be improved by implementing a financial management solution.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This is a collaborative effort between OHA and DHS. Department of Administrative Services (DAS) manages the statewide budget system (ORBITS) and the data warehouse (SFMA) would need to be involved as a stakeholder in the process to mitigate non-conformity issues between systems.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

This policy package reduces financial risks by lowering errors in payments, reduced reconciliation issues, and timely and accurate allocation of federal and state grants and other funds to the appropriate programs, thus ensuring continuity of funding for critical programs supporting health and health care.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): This is anticipated to be a multi-biennia effort completing in 4-6 years from commencement.

15. What assumptions affect the pricing of this policy package?

Cost of professional services is assumed to be in alignment with other comparable efforts.
Cost of staffing is assumed to be relatively constant.
Federal enhanced funding will be available and leveraged for all Medicaid-related efforts.
Resources with the necessary skills will be available.
Viable cloud-based SaaS Financial Management systems will be available and aligned to agency requirements.
Estimated monthly licensing costs for a cloud-based SaaS solution will be within 10 percent of the estimates identified in this policy package.

16. Will there be new responsibilities for DHS/OHA? Specify which programs and describe their new responsibilities.

There would be no new responsibilities for this shared service. The intent is to set up more streamlined and modern finance and budget systems that can be integrated with long-term DAS solutions and lessen the volume of manual entries. The agencies also anticipate gaining reporting functionality not currently available and a potential increase in requests looking deeply at how budgets are put together and tracked. The OHA budget office would help lead this effort.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

This is a Shared Services system supporting both DHS and OHA through the shared Office of Financial Services and Central Budget Unit in addition to the central budget shops for each agency. Key experts from these areas and the Office of Information Services (OIS) for technical expertise and support would be heavily involved in this process.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests funding for 7 permanent, full-time positions. Positions would be new and would work collaboratively as a small team to represent DHS and OHA financial needs and ensure the consultant's work and roadmap efforts align to agency priorities.

- Senior level leadership providing strategic and operational direction for this work effort – **one Principle Executive Manager E position (DHS/OHA – Shared Services, Office of Financial Services)**
- Develop RFPs, document requirements, perform analysis, support market research, oversee product testing – **two Operations and Policy Analyst 4 positions (one in DHS OFS and one OHA COO)**
- Provide subject matter expertise, participate in analysis, market research, product testing – **two Operations and Policy Analyst 3 (one in DHS OFS, one in OHA COO)**

- Provide technical expertise, programming support, technical requirements, product testing – **one Information Systems Specialist 8 position and one Information Systems Specialist 7 position (OIS)**

20. What are the start-up and one-time costs?

- $1.0 million for professional services including market research, tool analysis, planning, business case development, technical analysis, design recommendations and reviews, guidance on best practices.
- $90,000 for one year of monthly licensing costs for a cloud-based financial management system Proof of Concept (estimated at $250 per user per month for up to 30 users).

21. What are the ongoing costs?

It is too early in the process to accurately estimate ongoing costs but expected costs would include licensing fees assuming a cloud-based financial management system is the preferred solution choice. Ongoing costs would be identified in subsequent policy package requests in future biennia.

22. What are the potential savings?

- Reduced financial errors
- Reduced overpayments and need for reconciliation
- Increased efficiency in budget planning and management
- Reduced duplication of data and efforts
- Increased data and information consistency and availability
- Enhanced ease knowledge transfer
- Greater financial planning capabilities for DHS and OHA

23. What are the sources of funding and the funding split for each one?

Federal (enhanced) funding has yet to be negotiated with federal partners. DHS/OHA plan to request enhanced funding where applicable. Funding would be a combination of state and federal funding. The splits and level of participation would specifically come from Medicaid, IV-E, SSBG, IV-B part 1 and 2, SNAP, TANF, CCDF and others. A rate of participation for entitlement grants would be negotiated; block grants may be general fund only.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Department of Human Services and Oregon Health Authority
2021-23 Policy Option Package

Division: DHS & OHA

Program: Integrated Eligibility (IE) / integrated ONE

Policy package title: IE Maintenance and Operations Post-Implementation

Policy package number: POP 206

Related legislation: N/A

Summary statement:

This POP requests permanent resources for DHS and OHA/OIS to support the transition from the IE project to the integrated ONE program through the 2021-23 biennium and into the future biennia. The requested resources and funding will provide stability and continued support for the Integrated Eligibility (IE) program. The Integrated Eligibility initiative is a multi-biennium effort to develop a comprehensive unified system called integrated ONE that integrates eligibility determination for MAGI and Non-MAGI Medicaid, Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF) and Employment Related Day Care (ERDC) benefits. The IE program represents an essential lifeline to vulnerable Oregonians in need.

It should be noted that the integrated ONE system will be implemented statewide before July of 2021. Following implementation there will be a substantial stabilization period to resolve defects and to help staff adjust to the new system. As the project transitions to Maintenance and Operations (M&O), the resource gaps must be addressed to sustain this substantial investment. This POP is meant to address three critical areas:

Resource Gaps and Staffing Challenges
To sustain this substantial investment, this POP is addressing the resource gaps not recognized in the 2019-21 biennium for M&O.

Stabilization and Post-Implementation Support
This POP requests permanent resources for DHS and OHA/OIS to support the transition from the IE project to the integrated ONE program through the 2021-23 biennium and into future biennia.

Funding to Support M&O
M&O is key to making sure that the system support Oregonians and that DHS/OHA can continue to receive funds under the maintenance and operational federal match.

Department of Human Services and Oregon Health Authority
2021-23 Policy Option Package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$54,114,124**	**$** (including OIS limitation)	**$79,310,358**	**$133,424,482** (including OIS limitation)	**24**	**24.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

This POP requests permanent resources to fill resource gaps and funding for DHS and OHA/OIS to support the transition from the IE project to the integrated ONE program through the 2021-23 biennium and into the future biennia. The requested resources and funding will provide stability and continued support for the Integrated Eligibility (IE) program. The Integrated Eligibility initiative is a multi-biennium effort to develop a comprehensive unified system called integrated ONE that integrates eligibility determination for Non-MAGI Medicaid, Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF) and Employment Related Day Care (ERDC) benefits. The IE program is an umbrella under which multiple complex inter-dependent, yet disparate, bodies of work fall, and it represents an essential lifeline to vulnerable Oregonians in need.

Funding and position authority were received in the 2019-2021 session for some M&O activities; however, after two years and the system close to go-live, more is known as to what the required ongoing support needs are. It is important to note that M&O activities that are currently being filled by limited duration resources, rotational staff or contracted staff need to be filled by permanent staff to reduce expenses, high turnover and lost productivity.

The integrated ONE system will be implemented statewide before July of 2021. Following implementation there will be a substantial stabilization period. As a result, the following permanent resources and funding will be needed to support the IE program:

- Subject matter experts, testers, analysts, test case writers, site support, coordinators and leadership will need to continue to provide support services into the 2021-23 biennium
- Defect resolution experts and coordinators to manage the code releases in multiple environments
- Site support resources to help staff adjust to the new system
- Ongoing support of the Legacy systems relied upon by IE such as:

  - Changes made to the IE core system typically require changes to the legacy systems, which ultimately pays out benefits for Oregonians
  - Test environments created to support user acceptance testing (UAT) and ongoing support and maintenance for the existing automated test suite were not included in previous funding requests
  - Additional resources will be needed to ensure the environment and tools can support system changes, system enhancements and testing
  - Disaster Recovery functionality for the IE core needs to remain intact and tested annually
- Duties that have been transitioned to OHA/OIS from DHS that the IE program is dependent upon:
  - Ongoing support of the ONE VEC call center, which is relied upon by the IE Program
  - PMO administrative services, such as, calendar management, receiving and sending correspondence, and providing reports
- Program Office resources to manage and support a program office versus a project office. The program will need resources to manage cost, scope, schedules, risks and issues, system change requests, deliverable management, testing, site support, reporting needs, governance, administrative support, quality control, and complex communications across several domains.
- On-going M&O support will be provided by Deloitte for the core system. Funding is requested through this POP for those M&O expenses.

The IE program must meet the needs of the Oregonians in which it serves and as the project transitions to Maintenance and Operations (M&O), the resource gaps must be addressed to sustain this substantial investment.

In summary, this POP is meant to address three critical areas:

Resource Gaps and Staffing Challenges

To sustain this substantial investment, this POP is addressing the resource gaps not recognized in the 2019-21 biennium for M&O.

Stabilization and Post-Implementation Support

This POP requests permanent resources for DHS and OHA/OIS to support the transition from the IE project to the integrated ONE program through the 2021-23 biennium and into future biennia.

Funding to Support the M&O Contract

M&O is key to making sure that the system support Oregonians and that DHS/OHA can continue to receive funds under the maintenance and operational federal match.

2. What would this policy package buy and how and when would it be implemented?

This policy package seeks a total of 63 permanent FTE (DHS-24, OIS-39) and funding for M&O for the IE program.

Permanent Positions to support the Program by filling resource gaps and to provide post-implementation support

The 2019-21 policy package provided limited duration positions and contractors to fill key positions during the design, development and implementation phase. Using limited duration and contractors for a large multi-year project, created significant staffing challenges. In general contractors are three times more expensive than permanent employees and some staffing contracts only allowed contractors to work 1,040 hours per year. Staff in limited-duration positions continue to look for permanent employment creating instability in the workforce supporting this program. These challenges impact the business in the following ways: 1) High turnover rate 2) Loss of unique knowledge that is specific to DHS / OHA 3) Project team members had to train new contractor's continuously 4) Additional workload is assigned to already over-loaded staff.

Investing in permanent staff for the IE Program will help the organization achieve its strategic goals by providing resources that will be invested in stabilizing a critical system that delivers critical services to Oregonians, which are required by our Federal Partners (e.g., Centers for Medicaid and Medicare, Food and Nutrition Services, etc.).

High-Level Implementation Plan:

- Prioritize needed positions and begin hiring permanent staff immediately upon approval
- Establish the IE Program Management Office and transition from a project office to a program office, based on the M&O transition plan
- Execute the M&O program support and transition plan
- Issue the approved funding to the M&O contractor that supports the core system
- Stabilize the ONE system and provide post-implementation support

3. How does this policy package further DHS's and/or OHA's mission and align with its strategic plan?

The Integrated ONE solution will assist Oregonians achieve well-being and independence by providing timely and efficient eligibility determinations. It will allow a self-service option for Oregonians to apply through the applicant portal at times that are

convenient for them, which in turn, would minimize the amount of time needed in DHS field offices to complete the application process. The system will generate notices in seven languages and five alternate formats, helping to reduce barriers for traditionally underserved populations. Integrate ONE solution improves access to program eligibilities and program benefits to some of Oregon's most vulnerable populations. Reducing any wrong doors and consolidating access to services, providing individuals and households with greater opportunity to access benefits and services though the venue of their choice, online, by phone or within a single office space. Integrated ONE brings the disparate IT systems together, provides previously unavailable opportunities for service delivery improvements and moves the agency closer towards a no-wrong-door approach.

Operations of the Integrated ONE solution will require complex coordination systems, data and processes at an Enterprise level across multiple key program areas and agencies. Permanent resources will assist Oregonians from start to finish in providing timely and efficient eligibility determinations for the IE Program from a field office or a virtual eligibility center. Staff resources are required to support the technology enhancements, maintain the existing 150 system interfaces and support the system. The Applicant Portal is self-service for end-users, but backend work is required to ensure availability.

Performing this level of coordination improves access to care, safety, security and stability to Oregonians and moves us closer to sustaining a no-wrong-door approach.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

Success will be measured by using the following*:

- Customer Satisfaction: Through the use of surveys, the majority of Oregon citizens using the integrated ONE system will respond with a positive reply of good or excellent.
- Employee Engagement: Through the use of surveys, the majority of staff report medium or high levels of positive engagement with customers
- Accuracy: The integrated ONE programs, Non-MAGI Medicaid, SNAP, TANF, and ERDC show a 95% or better-quality control review rating
- Availability: The integrated ONE system has an uptime of 99.99% or better and any potential issues can be forecasted and addressed before they impact Oregon citizens
- Reporting: Through the use of several reporting methods that include ad hoc and federally required reporting.

* This policy package lays the foundation of the people and tools to be able to collect and analyze the data used for measuring success.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or a DHS/OHA performance measure? If yes, identify the performance measure(s).

This policy package aligns with and directly supports three areas of the Governor's policy:

1. "Modernize and standardize critical statewide systems"
2. "Optimize service delivery to the public and internally by modernizing agency-specific and cross-agency systems" by providing a modern, accessible system enabling clients broader access to services and quantifiable measurements around outreach and quality of services.
3. Create better health through good jobs

7. What are the long-term desired outcomes?

Continue to enhance the integrated ONE system that enables Oregonians to self-serve by accessing their benefits through a web portal. Oregonians will continue to be able to access their benefits by phone, by mail, by fax, or in person.

The new system will provide self-service to Oregonians by enabling applications through the applicant portal at times that are convenient to them. It provides a more dignified and private option to apply and minimizes wait times in DHS field offices to complete the process. Currently, in person engagement requires staff to use three different agencies using seven different systems to determine eligibility for Oregonians.

The Integrated ONE system will improve efficiency and access to eligibility-based services for Oregonians who will no longer have to visit multiple locations and for staff who will not have to enter information into multiple systems for multiple programs. This solution will increase accuracy in our benefit determinations as program information, notification of changes, Federal and State interfaces, automation logic and a rules engine will standardize practices across multiple programs. The system also generates notices in multiple languages and formats, helping reduce barriers for traditionally underserved populations. It also gathers and stores applicants preferred race and ethnicity values allowing for culturally competent care.

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, support for one of Oregon's largest IT investments will not be at a level required to make sure that Oregonians relying on the IE program for critical services can be met, which might directly affect eligibility and/or benefit accuracy and customer satisfaction. In addition, lack of support increases the likelihood of staff overloads, longer than expected delays in responding to issues, inability to provide federally mandated reports, lack of predictive mitigation of issues as staff will be too busy just keeping the system running versus being able to address potential issues before they become a reality and impact Oregonians.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Funding and position authority were received in the 2019-2021 session for some M&O, ongoing project management and support activities. This is a new environment and one of the largest, most complex IT systems Oregon has ever implemented. Now, with the system close to go-live, more is known as to what the ongoing support needs will be. This policy package is the result of what has been learned and what is needed to support what will be Oregon's largest IT system going forward.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives include:

1. Do nothing.
   This is not a viable option. With what is known today, the previous M&O support estimate will only keep the IE program at minimal levels at best, at worst, it will negatively impact both Oregonians and staff. Oregonians may suffer through delays and availability, while staff deal with negative experiences with customers and work overloads.
2. Hire Contracted or Limited Duration Resources and Continue to With Current Staff.
   This is not a viable option. Over the last five years, the two agencies have used contracted staff and limited duration resources to fill its resource gaps. This strategy is not the most effective or efficient method for IT services. Hiring contractors using the IT Professional Services contract can be up to three times more expensive than permanent employees and some staffing contracts limit contractors to 1,040 hours per year. Staff in limited-duration positions continue to look for permanent employment creating instability in the workforce supporting the IE program. These challenges result in the following impacts:
   - Contracted staff can cost up to three times more; thus, impacting Oregonians bottom line
   - High turnover rate
   - Additional workload is assigned to already over-loaded staff
   - Permanent staff must continuously train new hires
   - Loss of unique knowledge that is specific to the IE program and/or OIS
   - Reduced productivity

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

OHA and DHS are the primary stakeholders and beneficiaries outlined in this policy package. In addition to OHA and DHS, the following agencies are affected:

- DAS - Equipment and services at ETS are required to support this policy package
- DOJ - The IE program will need to interface with the Child Support system

- OED - The IE program will have interfaces with the Employment Department
- ODE - The IE program will interface with systems that make payments to Early Learning Division Child Care Providers

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This is a collaborative effort between DHS and OHA.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package, if approved, will ensure that Oregonians can continue to achieve wellbeing and independence by providing timely and efficient eligibility determinations for the IE programs that are relied upon. In addition, it continues support for the following:

- Allow Oregonians to self-service by applying through the applicant portal at times that are convenient for them, minimizing time needed in field offices to complete the process
- Generate notices in seven languages and in five alternate formats, helping to reduce barriers for traditionally underserved populations
- Gather, and store applicants preferred race and ethnicity values allowing for culturally competent care

Staffing and fiscal impact

Implementation date(s): July 1, 2021 start date

End date (if applicable): This will be an on-going effort anticipated for each biennium to ensure that both DHS and OHA have the resources to support the IE program and Oregonians.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

15. What assumptions affect the pricing of this policy package?

- Cost of professional services is assumed to be in alignment with other comparable efforts
- Cost of staffing is assumed to be relatively constant
- Federal funding will be available and leveraged for all DHS & OHA efforts where available
- Resources with the necessary skills will be available

16. Will there be new responsibilities for DHS or OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

The following duties have been transitioned to OHA/OIS from DHS that the IE program is dependent upon:

- Ongoing support of the ONE VEC call center, which is relied upon by the IE Program
- Administrative services, such as, calendar management, administrative support, receiving and sending correspondence, and/or providing reports

Additional scope was added over the last two years:

- Maintenance of Legacy test environments
- Disaster Recovery support

Additional permanent resources are needed to support the above work efforts for OHA/OIS.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests funding for 63 permanent positions. The positions are new and will work collaboratively within DHS and OIS to support M&O for the IE program.

DHS - Funding for 24 permanent positions to provide support in various key roles:

- SSP Program Support: Funding and permanent position authority for 4 FTE (4-OPA4) to support Virtual Eligibility Center operations
- OBIS Support: This package reclasses 1-PEMD to PEME (1018540), and provides funding and permanent position authority for 19 FTE (2-OPA4 MMN, 1-OPA3, 8-OPA2, 8-OPA1) for resources to support testers and test case writers, to ensure system functionality remains synchronized and in-tact, IE program infrastructure including data dictionary management, report writing, release management, and the ONE Helpdesk
- Administrative staff: Funding and permanent position authority for 1 FTE (1-AS2)

OIS Technical - Funding for 26 permanent positions to address technical expertise gaps not requested previously. These include:

- Business Intelligence Developer: Funding and permanent position authority for 1 FTE (1-ISS8) to develop, deploy, and maintain BI interfaces for data visualization, interactive dashboards, ad hoc reporting, and data modeling
- AD / Express Route System Architect: Funding and permanent position authority for 1 FTE (1-ISS8) to support complex infrastructure that crosses multiple domains
- Database Administrator: Funding and permanent position authority for 1 FTE (1-ISS8) to provide expertise in-house for a complex and large database that consists of 1,700 tables
- Senior Privacy / Risk Coordinator: Funding and permanent position authority for 1 FTE (1-ISS8) to coordinate between the vendor and EIS CSS on applications for privacy, risk and compliance
- Test Environments / Batch scheduler support: Funding and permanent position authority for 2 FTE (1-ISS7, 1-ISS6) to provide ongoing support and maintenance of the new infrastructure created during the project to support testing and training
- JV Support: Funding and permanent position authority for 1 FTE (1-ISS7) to join the JV financial system support team
- Operations Support: Funding and permanent position authority for 3 FTE (3-ISS7) to coordinate change requests and triage activities for legacy system changes
- Legacy Mainframe Team: Funding and permanent position authority for 3 FTE (PEME, 1-ISS8 mainframe architect, 1-ISS8 Interface Architect) to support ongoing IE M&O to the legacy systems

- Compliance Specialist: Funding and permanent position authority for 1 FTE (ISS8) to manage compliance and audit activities with SOS, federal partners and oversight analysts
- Increased coverage for test environment: Funding and permanent position authority for 3 FTE (1-ISS7, 2-ISS6) to increase support of the test environment to 6pm-10pm plus 8am-8pm Saturday / Sunday
- Legacy Integrated Test Environment Manager: Funding and permanent position authority for 1 FTE (1-PEMD) to manage complex environments that crosses multiple domains
- Call Center Support: Funding and permanent position authority for 8 FTE (8-ISS4) to support the integrated call center

OIS Program Office - Funding for 13 permanent positions to transition from a project office to a program office, while also supporting an ongoing administrative function and backfilling modernization positions, limited duration positions and contractors:

- Program Management support is needed to backfill two positions that are on rotation: Program Management Office (PMO) Director (1-PEMF) and PMO Manager (1-PEMD)
- Senior Project Manager (1-PM3) and Project Coordinators (2-PM2) are needed to backfill staff who are on rotation or who are in Limited Duration positions that manage cost, scope, schedules, risks and issues, system change requests, deliverable management, testing, site support, reporting needs, governance, quality control, IE TEAMS site, IE SharePoint and help manage complex domains across several domains.
- Business System Analysts (3-ISS7) provide a critical function and are needed to fill a resource gap by helping gather technical requirements, deliver technical documentation and implement technical reports
- PMO Administration (4-PM1) and an Executive Assistant (1-ESS2) are needed to provide program management support that includes: administrative support, calendar management and complex communications across several domains.

20. What are the start-up and one-time costs?

N/A

21. What are the ongoing costs?

IT Professional Services: $63.6M
Software: $8M
Hosting: $18M
Hardware: $4M
ESS Costs: $9M *(28,000 hours)*

22. What are the potential savings?

- N/A

23. What are the sources of funding and the funding split for each one?

TBD.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$2,496,240	$	$2,165,899	$4,662,139	24	24.00

Department of Human Services
2021-23 Policy Option Package

Division:	**Department of Human Services and Oregon Health Authority**
Program:	**DHS Aging & People with Disabilities**
Policy package title:	**Maintenance & Operations of Provider Time Capture**
Policy package number:	**207**
Related legislation:	**N/A**

Summary statement:

The Department of Human Services (DHS) and Oregon Health Authority (OHA) in-home care programs need a system that will increase program integrity and comply with the federal 21st Century CURES Act for Electronic Visit Verification (EVV) System and the U.S. Department of Labor Fair Labor Standards Act (FLSA). This would be done with the implementation of a time, attendance and payment system for the program's Home Care Workers and Personal Support Workers (HCW/PSW). The drivers for this work include a need for:

1. Improved timeliness and accuracy of data
2. Improved compliance with federal, state, and bargaining requirements
3. Increased efficiency and internal controls
4. Decreased duplication of efforts across agencies
5. HCW/PSW to accurately and timely report services provided across programs
6. Decrease dependency on outdated legacy systems

This POP requests General Fund to implement ongoing maintenance and enhancements that build upon a base system implemented in the 2021-23 biennium that would result in an integrated solution that meets the 21st Century Cures Act criteria and helps protect vulnerable Oregonians. Not funding this POP would limit Oregon's ability support the system.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

The Department of Human Services (DHS) and Oregon Health Authority (OHA) programs utilize Home Care Workers (HCWs) and Personal Support Workers (PSWs) to provide in-home care for patients across Oregon and must keep certain records for each HCW or PSW. The requirements apply to HCWs and PSWs who provide personal and home care assistance to older adults and people with disabilities. The Fair Labor Standards Act (FLSA) requires the records include certain identifying information about the HCW or PSW and data on hours worked. The law requires this information be accurate and attested to by both service recipients and providers.

Currently, these records are being captured through manual processes. Paper timesheets are completed by HCWs and PSWs and data is entered manually into state systems by employees at state field offices. These processes are time-intensive, have many manual steps and do not meet federal guidelines for Electronic Visit Verification (EVV) tracking.

2. What would this policy package buy and how and when would it be implemented?

This POP supports multiple DHS and OHA programs by funding the implementation, operations and maintenance of an integrated solution for tracking, reporting and payroll for in-home services provided by HCWs and PSWs to support individuals receiving services. Program areas include Aging and People with Disabilities (APD) in DHS and the Health Systems Division (HSD) in OHA.

Funding would support system operations and maintenance, which would realize efficiencies by training to Provider Time Capture (PTC), maintaining a robust change management process, and providing a continuous review and revision of business process and policies.

This POP would fund operations and maintenance costs for the PTC system including staffing related to program and support areas (HSD, APD, & OIS) as well as software, platform, and hosting licensing costs for the 2021-2023 biennium.

3. How does this policy package further DHS's mission and align with its strategic plan?

DHS and OHA programs utilize HCWs and PSWs to provide in-home care for patients across Oregon. DHS and OHA must keep certain records for each HCW/PSW. The requirements apply to HCW/PSW's who provide personal and home care assistance to older adults and people with disabilities. The FLSA requires that the records include certain identifying information about the HCW/PSW and data about the hours worked. The law requires this information to be accurate and attested to by both service recipients and providers. Currently, these records are being captured through manual processes. Paper timesheets are completed by HCW/PSW, and data is entered manually into State systems through employees at State field offices. These processes are time-intensive, have many manual steps, and do not meet Federal guidelines for EVV tracking.

The full implementation of such a system would directly contribute to the DHS Policy Outcome of "Improving our Human Services Systems" by addressing a long-standing gap in data collection and analysis and leading to a more efficient and effective state response to the reported problems with the Consumer Employed Provider program.

The PTC solution would also align with the framework and maturity assessment from Medicaid Information Technology Architecture (MITA), which will assist project decision makers in considering an appropriate path

and metrics for success for this IT investment. The PTC project would focus on the maturity of the MITA process: Manage Invoice Payment. The capability maturity measure will move Oregon toward the "To Be" assessment level. The State is currently at Level 1 which is "The process is primarily manual". PTC will strive to move the State to level 2 which specifies "The State uses a mix of manual and automated processes to accomplish tasks".

By implementing a service across both APD and HSD, this solution will create a common time reporting process across State agencies. Implementing a single time capture and payment process among agencies will align these agencies for potential future enhancements.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

This is part of the response to the Oregon Secretary of State audit in 2019. This report was titled, "Consumer-Employer Provider Program Needs Immediate Action to Ensure In-Home Care Consumers Receive Required Care and Services" completed in February 2019 and numbered Report 2019-05.

Quantifying results

5. How will DHS measure the success of this policy package?

DHS has identified a series of goals and objectives we will perform initial baselines and final metrics collection and analysis to confirm our expected outcomes.

Goal #1:	1.1 **Objective:** Establish use of Electronic Visit Verification (EVV) compliant recording mechanism(s).

Comply with Federal requirements, including 21st Century Cures Act.	1.2 **Objective:** Establish electronic approval of time entries by individuals.
	1.3 **Objective:** Capture the six required data elements for Electronic Visit Verification (EVV).
Goal #2: Improve program integrity.	2.1 **Objective:** Decrease number of time entry/reporting errors.
	2.2 **Objective:** Decrease number of over/under payments.
	2.3 **Objective:** Decrease number of incidents of potential fraud.
	2.4 **Objective:** Decrease number of errors in reporting travel time.
	2.5 **Objective**: Improve reports and tracking of issues with time capture processes available for staff to leverage as part of program integrity operations/processes.
Goal #3: Decrease workload on identified impacted groups.	3.1 **Objective:** Decrease workload for Voucher Clerks (Field Offices) and Provider Relations Unit (PRU) (Central Office) in voucher issuance and reprint processes.
	3.2 **Objective:** Decrease workload for Travel Time Clerks (Central Office) and PRU staff in processing travel time.

	3.3 **Objective:** Decrease workload for field staff in time entry and correction processes (time entry corrections and over/under adjustments).
	3.4 **Objective:** Decrease workload for staff in the payment correction processes (adjustments, exceptions, and corrections). (PRU and BOTS)
	3.5 **Objective:** Decrease workload for providers in submitting time worked.
	3.6 **Objective:** Decrease workload for individuals in approving time entries.
	*3.7 **Objective:** Decrease workload for staff in collecting, updating, and issuing payroll related documentation (W-2, W-4, DD, etc.).
	*3.8 **Objective:** Decrease workload for staff in garnishment and recoupment processes.
Goal #4: Decrease processes within legacy systems functions and/or data.	4.1 **Objective:** Decrease number of functions performed by the existing state systems in the time entry, calculation, and payment processes.
	4.2 **Objective:** Decrease number of validations performed by the existing state systems in the time entry, calculation, and payment processes.
	4.3 **Objective:** Decrease number of business processes that require legacy systems.
Goal #5:	5.1 **Objective:** Decrease paper voucher storage costs and physical location needs.

Reduce costs associated with manual processes.	5.2 **Objective:** Decrease number of time entry claims that are paid solely out of the General Fund.
	5.3 **Objective:** Decrease printing and mailing costs for printed paper vouchers.
	5.4 **Objective:** Decrease Mainframe processing and storage costs.
Goal #6: Maximize user adoption through identified, organized, and prioritized change management, communications, and trainings.	6.1 **Objective:** Decrease stakeholder barriers to adoption.
	6.2 **Objective:** Increased accessibility for successful time entry and approval.
	6.3 **Objective:** Increase user satisfaction for all impacted groups.
Goal #7: Ensure system and processes are clear and understandable for identified impact groups (Individuals, Providers, and Staff)	7.1 **Objective:** Increase number of readily accessible training materials and online documentation.
	7.2 **Objective:** Decrease time for staff in describing/explaining the time entry and approval processes.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

Yes, this aligns with the 2015-17 approved Key Performance Measure below:

11 – LTC Recipients Living Outside Nursing Facilities
13 – People with Disabilities Living at Home
14 – Supported Employment

7. What are the long-term desired outcomes?

By removing workload from field administrative support of the Consumer Employed Provider program it will allow APD and HSD to shift other work to this body of workers freeing up Case Managers to spend more time on case management and more critical issues for vulnerable Oregonians.

8. What would be the adverse effects of not funding this policy package?

Options were considered for inclusion in current process or expansion of the Legacy systems to capture this information, but it is not considered sustainable nor would it be supported by current staffing levels. Staffing for the project have been sourced from numerous sources including pulling in employees from the Field on limited duration double fill positions. Given the nature of staffing in the field this creates additional strain and does not account for the long-term operations and maintenance required.

Failure to support and successfully implement PTC will have two main areas of impact. The current Collective Bargaining Agreement (CBA) with SEIU that covers the HCWs and PSWs requires implementation by the end of calendar year 2020 for Phase 1 and the end of 2021 for Phase 2.

Additionally, Compliance with the standards required by the 21st Century CURES Act would allow the state to continue to receive federal funding match. Failure to comply will result in a reduction of this funding, along with potential penalties. The percentage of an individual reduction on FMAP for Consumer-based Care and In-

Home Care expenditures begins with 0.25 percent on January 1, 2021. Subsequent six-month percentage reductions increase to 0.50 percent by 2022, 0.75 percent by 2023 and 1 percent after 2023.

EVV Penalty pricing In Home Supports

	In Home Projected Expenditures at 21-23 CSL (TF)	% FMAP Reduction Per schedule	Federal Fund Penalty Reduction Estimate (GF Cost)	
1/1/21-6/30/21	$ 275,898,626	0.50%	$1,379,493	19-21
7/1/21-12/31/21	$294,195,880	0.50%	$1,470,979	21-23
1/1/22-6/30/22	$295,127,270	0.75%	$2,213,455	21-23
7/1/22-12/31/22	$297,532,442	0.75%	$2,231,493	21-23
1/1/23-6/30/23	$298,207,326	1.00%	$2,982,073	21-23
21-23 General Fund Cost			$8,898,000	21-23

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Options were considered for inclusion in current process or expansion of the Legacy systems to capture this information, but it is not considered sustainable nor would it be supported by current staffing levels. Staffing for the project have been sourced from numerous sources including pulling in employees from the Field on limited duration double fill positions. Given the nature of staffing in the field this creates additional strain and does not account for the long-term operations and maintenance required.

10. What alternatives were considered and what were the reasons for rejecting them?

All the PTC alternative approaches were evaluated to determine if they have the ability to solve the business problem defined by the product requirements. The updated business case completed in July of 2019 analyzed 10 options which included a variety of in-house options, custom build, use of existing contracts or Statewide agreements, no action, or a new procurement. Ultimately, a recommendation of a Software as a Service procurement was adopted by Agency leadership based on the reasons identified below.

1. Implement a Software as a Service (SaaS) solution.
   - This option has the benefit of requiring the burden of the development and design activities and long-term operations and maintenance of code on the vendor compared to an in-house or other commercial solution. Additionally, selecting a vendor who has performed this work in other states increases Oregon's chances of capitalizing on lessons learned and efficiencies of scale based on the work already put into the system.

The recommended approach for the PTC Project is to utilize a SaaS solution for the following reasons:

- Ability for advanced configuration, integration with other applications, and possible customization

- Aligns with the direction the software industry is going
- Possibility to expand to other solutions in the future for FMAS, Case Management, Provider Management, etc.
- Fewer technical resources would be required from the State and there would be no dependency on the State Data center
- Possibility of faster implementation
- Workload reduction in the State field offices and Type A and Type B AAA offices
- Moves the Agency away from having sole responsibility for supporting an increasing number of systems
- Ability to access data for reporting
- Several vendors are now offering EVV solutions that are incorporated into their system

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

It does not require statutory changes.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Other agencies affected by this POP include APD and HSD's Program Partners and those with a business need for payroll or service time worked data, such as:

- Area Agencies on Aging (AAAs)
- County Mental Health Programs
- The Oregon Health Authority / Health Systems Division

These agencies would experience a change in how they receive data and reports from APD/HSD. Access to data would be based on business need and enforced using a role-based security protocol.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Oregon Home Care Commission, OHA – Office of Information Services, & Health Systems Division.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

Depending on the selected vendor the need for providers or individuals to access the solution via the internet or a personal data enabled device could present barriers to some populations. Additionally, depending on the language capacities of the vendor and solution this could pose inequities for individuals and providers whose first language is not English. The Agency is working to ensure the system, training, and support are available in multiple languages to try and mitigate these concerns.

Staffing and fiscal impact

Implementation date(s): Phase 1 12/31/20, Phase 2 12/31/21, Phase 3 TBD

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

These are based on staffing and vendor onboarding assumptions and compliance with the planned phase deadlines.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

DHS will add the PTC Operations and Maintenance team to their existing support organization., including long-term enhancement and troubleshooting support. Additionally, APD will be responsible for the creation and delivery of training for the long-term solution.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

There is expected to be some maintenance, support, and coordination between developers to troubleshoot and make changes to the various interfaces and systems to support long term success. Additionally, to coordinate and manage contract administration across IT initiatives and services we are requesting a position for contract administration to be housed with OIS. We have coordinated with the Office of Information Services (OIS) to request 3.00 FTE of resources for this support.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No changes anticipated.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

In order to support the long-term operations and maintenance of the system, coordination with the vendor, and training of all impacted stakeholders and staff over the life of the contract with the vendor.

OAH C0870 AP	Operations & Policy Analyst 1	060-08-03-00000
OAH C0870 AP	Operations & Policy Analyst 1	060-08-03-00000
OAH C1339 AP	Training & Development Spec 2	060-08-03-00000
OAH C1338 AP	Training & Development Spec 1	060-08-03-00000
OAH C0107 AP	Administrative Specialist 1	060-08-03-00000

20. What are the start-up and one-time costs?

The initial project implementation estimates for phase 1 and 2 is approximately $600,000.

21. What are the ongoing costs?

On-going costs outside of staffing are licensing and support costs for the system, which is currently estimated to be $840,000 annually.

22. What are the potential savings?

The use of a mobile app to track time and, potentially, location using location services, would reduce potential fraud in time reporting. While the current amount of fraud in time reporting is difficult to quantify, data provided by the Office of Payment Accuracy and Recovery (OPAR) report a total amount of HCW debt related to potential fraud or client error was $1 million of which $676,000 has yet to be recovered over a five-year period. By using a technology-based product the state could track specific time worked and the geolocation of services provided.

Compliance with the standards required by the 21st Century CURES Act would allow the state to continue to receive federal funding match. Failure to comply will result in a reduction of this funding, along with potential penalties.

23. What are the sources of funding and the funding split for each one?

DHS
The Federal Funds are Medicaid with CMS providing 90/10 split for the project phase of this work and DHS is seeking 50/50 match during Operations and Maintenance. The remainder is paid via General Funds.

OHA
Other Funds via direct charge to DHS.

Department of Human Services

Department of Human Services
2021-23 Policy Option Package

Division:	Department of Human Services (DHS)
Program:	DHS Central Services | Office of Business Information Services (OBIS)
Policy package title:	Maintenance & Operations of Central Abuse Management (CAM) System
Policy package number:	POP 208
Related legislation:	House Bill 4151

Summary statement:

House Bill 4151 required the state of Oregon and DHS as its agent, to standardize its processes and technology related to abuse of vulnerable adults.

Oregon's previous environment for tracking, reporting, analyzing, and investigating incidents of adult abuse relies on accessing information from nine distinct systems or data sources. Additionally, local offices created their own one-off mechanisms for supporting the abuse investigation processes, further complicating, and decentralizing information. Existing systems limitations included the *inability* to search across program populations, inhibiting the ability to track perpetrators and/or victims over time and between populations. This heightened the risk of not capturing all abuse allegations.

During the 19-21 biennium basic capabilities of the Central Abuse Management system (CAM), previously implemented during the 2017-19 biennium, were expanded for an integrated solution, to meet HB 4151 criteria and helps protect vulnerable Oregonians.

Department of Human Services
2021-23 Policy Option Package

Today, CAM system supports abuse investigators, licensers, background checks, and decision makers by capturing data and managing workflow for investigations and incident reporting for vulnerable Adult and children subject to abuse and neglect. This system recently came on-line and is now transitioning to regular operations and maintenance and the normal work related to system improvements and enhancements. This POP anticipates the normal O&M expenditures for the 2021-23 biennium and provides for the annual licensing costs for regular business use of the CAM solution.

This system is now a critical part of ensuring the health and safety of some of Oregon's most vulnerable adults and children. The expenditures related to this POP are a normal part of supporting a system of this nature.

Not funding this POP will limit Oregon's ability to effectively use, operate and maintain the CAM solution as a tool to ensure the protection and safety of some of Oregon's most vulnerable populations.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$2,894,725**	**$0**	**$2,894,708**	**$5,789,433**	**2**	**1.50**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

This POP anticipates the normal O&M expenditures for the 2021-23 biennium and provides for the annual licensing costs for regular business use of the CAM solution. Not funding this POP will limit Oregon's ability to effectively use, operate and maintain the CAM solution as a tool to ensure the protection and safety of some of Oregon's most vulnerable populations.

2. What would this policy package buy and how and when would it be implemented?

This POP supports multiple DHS programs by funding the Operations and Maintenance of an integrated solution for tracking, reporting and supporting investigations of adult abuse. Program areas include: Aging and People with Disabilities (APD), Developmental Disabilities (DD), and Mental Health (OHA/MH).

Funding will support the Operations and Maintenance of the system, and program licensing costs for the continued use and operational reliance on the CAM solution. This package also funds the IT vendor for monthly operational support of the CAM solution, including defect resolutions and system refinement to meet business expectations.

Activities this POP will fund include:

- Operations and Maintenance costs for the CAM system including all program and support areas (DD, DDI, OHA, APD, OIS, OBIS, OTIS) for the full 2021-2023 biennium
- Software/platform/hosting licensing costs for the full 2021-2023 biennium

- Establishes 2 positions for a total of 1.5 FTE: 1.0 PEME for oversight of the O&M team other business information services analysts and related resources, and .5 FTE PCS3 for Contract Administration of CAM IT vendor contract and related services.
- IT Professional Support Services
- Critical One-time "Encryption-at-Rest" Security Enhancement

3. How does this policy package further DHS's mission and align with its strategic plan?

In 2014, almost 750,000 Oregonians belonged to one of the nine Oregon populations supported by OAAPI, now known as the Office of Training Investigation & Safety (OTIS), and its program partners that receive and process reports of abuse. During that same year OAAPI and its program partners received more than 38,000[1] allegations of abuse of these individuals, resulting in 18,185[1] investigations.

According to the 2014 OAAPI Annual Report dated July 2015, "In 2014, there was a 10% overall increase in the number of investigations conducted (compared to 2013)." During the next 10 years the number of allegations received and screened by OTIS and its program partners is expected to increase nearly 60%. This assessment increases the projected 50,414 allegations in 2015 to more than 78,500 allegations in 2024, based on current and predicted growth of vulnerable populations. OTIS is projecting 30,800 investigations by 2024, a nearly 63% increase from the 2015 level of 19,000 investigations. This growth in the number of abuse referrals and investigations, typical of previous years, is one of the reasons that OTIS was formed, to ensure a coordinated and consistent response to an increasing number of abuse referrals across all vulnerable populations. Abuse can't be undone. Abuse carries with its lifelong impacts to a person's life in regard to health, emotional well-being and a person's ability to benefit from available services.

During the 19-21 biennium basic capabilities of the Central Abuse Management system (CAM), previously

[1] OAAPI Annual Report 2014 – Published July 2015.

implemented during the 2017-19 biennium, were expanded for an integrated solution, to meet HB 4151 criteria and helps protect vulnerable Oregonians.

Today, CAM system supports abuse investigators, licensers, background checks, and decision makers by capturing data and managing workflow for investigations and incident reporting for vulnerable Adult and children subject to abuse and neglect. This system recently came on-line and is now transitioning to regular operations and maintenance and the normal work related to system improvements and enhancements. This POP anticipates the normal O&M expenditures for the 2021-23 biennium and provides for the annual licensing costs for regular business use of the CAM solution.

This system is now a critical part of ensuring the health and safety of some of Oregon's most vulnerable adults and children. Additionally, the Central Abuse Management System is in alignment with the DHS/OHA Strategic Technology Plan (STP) including progress in pursuit of automating business workflows, decision-making, and business rules while reducing manual, paper-based processes. A Central Management System moves the state closer to providing a comprehensive view of a client and makes progress towards the goal of a "360-degree view of a person." The project will provide workers connectivity to a real-time system to perform their work anytime and anywhere. Through the reduction of data duplications and entry into multiple systems, CAM has made advancements in providing a trusted source for abuse and investigation data. The implementation of a SaaS (software as a service) solution affords improved responsiveness to quickly evolving business needs.

Appropriate ongoing funding of O&M licensing and IT Professional support services is necessary to ensure effective operations and use of the Oregon's investment in this solution.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No

5. How will DHS measure the success of this policy package?

CAM System is able to be used, operated, supported and maintenance as an effective tool to ensure ongoing safety and security including some of Oregon's most vulnerable populations from within APD, ODDS, IDD, OTIS and OHA Behavioral Health.
In order to ensure this outcome, the following budgetary measurements must be met:

- Appropriate funding is established to provision adequate annual user licensing for the CAM solution
- Funding of ongoing O&M IT Professional Services, hosting, hardware and other related licenses
- Establishes 2 positions for a total of 1.5 FTE: 1.0 PEME for oversight of the O&M team other business information services analysts and related resources, and .5 FTE PCS3 for Contract Administration of CAM IT vendor contract and related services.
- Critical One-time "Encryption-at-Rest" Security Enhancement

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

Yes, this POP is directly tied to the following process measures and outcome measures outlined on the DHS Fundamentals Map:

"Protection and Intervention" (OP1) Process Measures:

- % of completed investigations coded "unable to determine" or "inconclusive"
- % of calls assigned for field contact that meet policy timelines

- % of investigation reports completed within policy timelines

"Safety" (O1) Outcome Measures:

- Re-abuse rate
- Abuse rate

As of the fourth quarter of 2015, DHS and OHA were not meeting most of the Adult Abuse Quarterly Business Review (QBR) – Key Performance Metrics (KPMs) for Adult Abuse.

7. What are the long-term desired outcomes?

Measurable increases will be observed in the following area:

- % of calls assigned for field contact that meet policy timelines
- % of investigation reports completed within policy timelines

Measurable decreases will be observed in the following areas:

- % of completed investigations coded "unable to determine" or "inconclusive"
- Re-abuse rate
- Abuse rate

8. What would be the adverse effects of not funding this policy package?

- Unpaid, licensing costs would deprive the State of its investment in CAM.
- Unstaffed, poor operations and maintenance of the system would curtail the benefits of the system and increase workloads.

- Unfunded IT Vendor contract costs would leave the existing CAM solution without Maintenance, Defect Management, Data Fixes or any general IT Professional Support
- Lack of Management resources, would leave the State O&M resources unsupervised, difficult to manage or provide vision, direction and guidance, or structured professional development, leading to an unmanaged system
- DHS would be out of compliance with HB 4151 and SB 155

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

19-21 Biennium has marked the onset of the O&M operations

- The O&M team has been hired and is working to establish operational policies, procedures and protocols
- Annual software licensing for CAM has been purchased through 19-21 funding plus additional funds provided by APD and ODDS
- IT Professional services have been contracted

10. What alternatives were considered and what were the reasons for rejecting them?

Two options exist, but are non-viable, due to their impact on critical DHS Mission and Values and Program objectives:

1. Reduce user licenses
   System licensing is the single most expensive component of the O&M budget. The CAM solution is an essential system in ensuring protection, safety and security to vulnerable populations, logging allegations, documenting investigatory findings, recording, reporting and prevention of re-abuse. The solution is used

by Aging People with Disabilities, Oregon Intellectual and Developmental Services, the Office of Training Investigation & Safety and the Oregon Health Authority's Behavioral Health.
Reduction of licensing would cut projected costs but would also reduce access and therefore also reduce outcomes and benefits to Oregon's and would likely result in lack of compliance of HB 4151 and SB 155.

2. Self-funding of O&M Projected Budget by the core Program areas
   This would cut into funds established for other business responsibilities and mission critical funds, appropriated for other support services, protections and benefits to Oregonians.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No, this POP provides continued supports to HB 4151 and SB 155.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Other agencies affected by this POP include OTIS Program Partners and those with a business need for abuse data or investigation reports, such as:

- Background Check Unit (BCU)
- DHS Abuse Case Management (APD & DD)
- Safety, Oversight and Quality (SOQ)
- The Oregon Health Authority / Mental Health

These agencies have experienced change in how they receive abuse data and reports from OTIS and from community programs. Agencies access to abuse data has been established using role-based security protocols.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

The Office of Training Investigation & Safety, on behalf of the Department of Human Services, Aging and People with Disabilities, Developmental Disabilities, and OHA's Behavioral Health program and multiple county partners including Multnomah County, champion this POP. All of these entities are stakeholders in protecting vulnerable Oregonians and will benefit from full implementation of an integrated tracking and reporting solution for adult abuse.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

The CAM solution will incorporate racial and ethnic identifiers supporting for analysis of service equity in the delivery of abuse investigations and protective services.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

This package uses known established license costs and volumes and IT Professional services contract; and projects minor annual cost increases on license packages, and reasonable market costs on vulnerability tool; and presumes no major unforeseen changes in technology or professional service needs to maintain stable Maintenance and Operations of the CAM system.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

DHS has established a CAM Operations and Maintenance team to the Office of Business Information Services. This POP establishes a manager for this team and other business information services analysts and related resources. This package also establishes .5 FTE in Oregon Developmental Disability Services (ODDS) for Contract Administration of CAM IT vendor contract and related services.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No changes anticipated.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

New Positions	Months in 21-23 Biennium	Type of Position
1 FTE – PEME (OBIS)	24	Permanent
.5 FTE – PCS3 (ODDS)	24	Permanent

Existing Positions	Months in 21-23 Biennium	Type of Position
OPA-3 (OBIS)	24	Permanent
OPA-3 (OBIS)	24	Permanent

OPA-4 (OBIS)	24	Permanent
ISS6 (OIS)	24	Permanent
ISS3 (OIS)	24	Permanent

20. What are the start-up and one-time costs?

$226,000 is a required one-time security enhancement for encryption of data at rest. This has been a finding on the regular CAM security POAM (Plan of Action and Milestones) assessments, in order to provide appropriate protection against data breach or incidents related to personal, confidential and protected information.

21. What are the ongoing costs?

Ongoing costs include:

IT Professional Services – O&M Contract Fees	$1,457,700 (biennium costs)
Hosting Costs	$25,200 (biennium costs)
SSO Server Hardware Costs	$240,000 (biennium costs)
SalesForce License Costs	$3,160,097 (biennium costs)
Other related License costs (S-Docs, Azure, Vulnerability Testing Tool)	$491,800 (biennium costs)

22. What are the potential savings?

A Central Abuse Management system not only provides an increase in access to accurate, realtime, consolidated data to serve the safety and protection of vulnerable populations, but access to this data will improve investigatory services, accuracy in filing, assessing, recording allegations and recovering, reporting and acting on this information in accurate and meaningful ways. This will yield time and cost savings in general process, and reduction of research, analysis and rework. This will also yield potential reduction in investigation of repeat

offenses or allegations. While this is a benefit and savings in investment of resources, the actual benefit here is in safety, security and protection to Oregonians.

23. What are the sources of funding and the funding split for each one?

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$172,914	$0	$172,914	$345,828	2	1.50
Services & Supplies	$2,721,811		$2,721,794	$5,443,605		
Capital Outlay						
Special Payments						
Other

Department of Human Services
2021-23 Policy Option Package

Division:	DHS Shared Services
Program:	Security and Privacy Services Office (SPSO)
Policy package title:	Criminal Justice Information Services (CJIS) Security
Policy package number:	POP 209
Related legislation:	N/A

Summary statement:

Critical problems to be addressed:
CJIS Security: FBI CJIS Security Policy includes many intensive physical and data security requirements for any DHS or OHA staff or contractors, and systems accessing and/or using CJI. DHS and OHA programs use criminal justice information (CJI) for over 200,000 background and safety checks per year. These checks are completed for: DHS and OHA employees, volunteers, and contractors; child protective services; care providers for children, home care and personal support workers; foster and adoptive parents; traditional health worker certification; fraud investigations; licensing of service providers; emergency medical and trauma services, and others.
Complying with these requirements requires substantial worksite infrastructure, personnel, and IT solutions across DHS and OHA offices.
Security and Privacy Services Office (SPSO): The Security and Privacy Services Office provides awareness and solutions to achieve compliance with Federal and Oregon privacy and security laws, rules and policies while supporting DHS|OHA programs to develop and improve business systems, provide key services, communicate and collaborate with partners and stakeholders, and insure the public trust. SPSO staff acquire in-depth understanding of key program services

and systems in order to achieve more customized solutions for collaborating services even as they achieve current privacy and security postures.
As the majority of DHS|OHA CJIS services, systems and staff reside with DHS, SPSO would also include the CJIS Local Agency Security Officer (LASO) role for DHS|OHA. The CJIS LASO is a role designated in the FBI CJIS Security Policy responsible for implementing and maintaining CJIS compliance across also CJIS services for both agencies.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
DHS	$ 4,294,411	$ 7,928,405	$ 3,009,733	$ 15,232,549	8	7.04
OHA	$ 250,337	$ 38,513	$ 96,284	$ 385,134		
Total Policy package pricing:	**$ 4,544,748**	**$ 7,966,922**	**$ 3,106,017**	**$ 15,617,687**	**8**	**7.04**

Department of Human Services
2021-23 Policy Option Package

Purpose

1. Why does DHS propose this policy package and what issue is DHS trying to fix or solve?

There are two items to resolve via this policy option package (POP):

1. FBI Criminal Justice Information Services (CJIS) Security Policy is the federal guidance from the FBI to all agencies using criminal justice information (CJI) for any business. The security requirements include considerable lifts for both physical and data security. The 2018 FBI audit identified the physical security compliance as a core finding against DHS. If DHS and OHA fail to meet these requirements, DHS and OHA programs using CJI for safety, investigative, employment, licensing and certification background checks on over 200,000 individuals per year may have their access to FBI criminal history records removed. Access to CJI for patient purposes in the Oregon State Hospital may also be removed. This would compromise health, safety and/or employment for hundreds of thousands of Oregonians per year.
2. The second item creates the Security and Privacy Services Office (SPSO). SPSO provides awareness and solutions to achieve compliance with Federal and Oregon privacy and security laws, rules and policies. The CJIS LASO would reside within the SPSO.

   Core programs (ex., Child Welfare, Self Sufficiency, Aging and People with Disabilities, Developmental Disabilities, and Vocational Rehabilitation) are not as easily able to maintain awareness of federal and state program privacy and security requirements while also maintaining real-time knowledge of changes to non-program specific federal and state security and privacy laws and policies. Some of those changes can be highly technical or nuanced and require understanding of both program business systems and processes and the security or privacy protocols involved with federal and state requirements. This creates confusion for program staff on when and how best to share information (if it can be shared) with families, partners and stakeholders. This confusion leads

not only to unnecessary delays in sharing key information, but also potentially to avoidable privacy incidents and security breaches. Delays in sharing crucial information can affect the health and welfare of individuals and families. Incidents and breaches can erode the public trust in DHS and OHA programs and come with federal penalties and/or compliance action plans that cost millions, further reducing stretched program budgets. SPSO staff would help translate business and technical requirements between IT staff and those responsible for program services in order to improve program outcomes while reducing privacy/security incidents.

2. What would this policy package buy and how and when would it be implemented?

The CJIS portion of the POP provides necessary funding for physical security refits in approximately 60 Child Welfare and Central and Shared Services offices around the state to comply with federal CJIS requirements. It also provides an additional facilities coordinator to project-manage the construction and funds a CJIS Local Agency Security Officer (LASO) position for DHS and OHA. CJIS Security Policy requires that each federal, state, local government, or tribal agency using criminal justice information (CJI) have a CJIS LASO to work on CJIS-related physical and IT security and privacy compliance for their agency. The CJIS LASO would assist the facilities coordinator with CJIS-related project management, as well as work with DHS and OHA programs using CJI in maintaining CJIS compliance in present business processes and systems, and those being developed.

The POP also creates the Security and Privacy Services Office (SPSO) within DHS|OHA Shared Services. SPSO positions would provide compliance awareness combined with an imbedded knowledge of each specific DHS|OHA programs' business processes and systems, key services, and partners and stakeholders to tailor and streamline guidance and consultation on compliance work at all program levels in the most efficient manner. SPSO staff would remain aware of coming changes in privacy and security requirements from federal and state legislation and help guide programs in preparing accurate and proactive timelines for

changes to business processes and data management systems to achieve timely compliance. In addition, SPSO staff would create guides, trainings, workshops and other privacy and security awareness and education resources to DHS and OHA programs, partners and stakeholders as needed. The overall SPSO goal is to maximize compliance while supporting business needs, reducing roadblocks, waste, and penalties for privacy incidents and security breaches to better serve the public trust. The CJIS LASO would be part of the SPSO.

Funding for the CJIS-related changes is required as soon as possible, preferably July 1, 2021 to immediately commence facility and other compliance work in coordination with the next FBI audit cycle of Oregon in summer 2021. Funding of the non-CJIS SPSO positions is also recommended for July 1, 2021 to maximize efficiencies from the work of those positions.

3. How does this policy package further DHS's mission and align with its strategic plan?

Privacy and security requirements help protect and preserve dignity for clients, consumer-employers, and others served by DHS and OHA from release of information that could cause physical, mental, reputational, and/or financial harm. Incidents may detrimentally affect anywhere from one person to hundreds of thousands of individuals or families. Whether the information be CJI, Social Security Administration (SSA) data, Federal Tax Information (FTI), Protect Health Information (PHI), Food and Nutrition Service (FNS) data, or Administration for Child and Families (ACF) data, streamlining info-sharing and business processes, and providing improvements and innovations in data systems while improving security all support DHS values of stewardship, integrity, respect, accountability, and service equity.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

The CJIS portions are being requested as part of a compliance action plan resulting from the 2018 FBI audit, and ongoing changes in CJIS security policy requirements that will affect the 2021 FBI audit.

Quantifying results

5. How will DHS measure the success of this policy package?

DHS would measure the success of the Facilities investment by the following annual assessments:

- # of CJIS-related physical security projects across the state completed timely;
- # of resolved physical security CJIS compliance issues.

DHS would measure the success of the SPSO and CJIS LASO by the following annual assessments:

- % of audit risks assessed and resolved prior to next audit cycle;
- # of open findings resolved;
- # of program engagements completed;
- # of privacy/security projects completed.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

Improving privacy and security awareness in business services and systems will accelerate and improve secure communications, case coordination, and support systems between partners, community services, and providers for older adults needing long term care services (KPM 1 and 2), children in foster care (KPM 5-8), individuals with developmental disabilities (KPM 9 and 11), families in crisis (KPM 14-16), and Vocational Rehabilitation consumers seeking employment (KPM 17-20). More agile secure communication and coordination of partners and services will also assist in prevention services for children, people with physical and cognitive disabilities, and the elderly being abused, and the speed of delivery for trauma-informed services when abuse cannot be prevented (KPM 3, 4, and 12). Lastly, eligibility determination will be timelier for all programs due to improved, privacy-informed sharing agreements and business processes between partners in eligibility processes (KPM 9).

7. What are the long-term desired outcomes?

Assess and resolve audit findings prior to subsequent audit cycles. Assist programs in improving business operations, service delivery, and service equity while increasing compliance to federal and state security and privacy laws and policies. Assist in the project management and successful completion of privacy and security projects that improve compliance. Reduce privacy incidents and security breaches.

8. What would be the adverse effects of not funding this policy package?

If DHS and OHA fail to meet FBI CJIS Security Policy requirements, DHS and OHA programs using CJI for safety, investigative, employment, licensing and certification background checks on over 200,000 individuals per year may have their access to FBI criminal history records removed. Access to CJI for patient purposes in

the Oregon State Hospital and by Behavioral Health may also be removed. This loss would compromise health, safety and/or employment, licensing, and certification processes for hundreds of thousands of Oregonians per year.

Lack of certainty or confusion on privacy and security policies will continue to create unnecessary delays in sharing key information, privacy incidents, and potentially security breaches. Delays in sharing crucial information can affect the health and welfare of individuals and families. Incidents and breaches can erode the public trust in DHS and OHA programs and come with federal penalties and/or compliance action plans that cost millions, further reducing stretched program budgets.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Within the current facility budget, some CJIS physical security projects have been completed where minimal changes were made or could be incorporated into already scheduled moves or builds. However, the majority of CJIS sites require additional significant construction to bring DHS and OHA sites into compliance. Current Facilities staffing are insufficient to cover CJIS-related project management workload over the next two biennia.

Projects and business processes requiring privacy and security guidance, research, risk assessment, and policy and procedure development exceed current staffing and program familiarity of current staffing resources. A project managed CJIS compliance workgroup assisted in moving forward certain audit requirements but workload to staffing was insufficient to maintain movement. Within the last 9 months a CJIS LASO and privacy/security services position has been carved out from existing FTE to provide more consistent direction. However additional staffing is necessary to keep all privacy and security business

(including CJIS) timely and compliant for current needs, and current staffing levels prevent proactive planning and development.

10. What alternatives were considered and what were the reasons for rejecting them?

As related in question 9, workgroups utilizing fractions of FTE from different programs staff assisted in assessing CJIS compliance requirements and moving forward some work related to CJIS audit findings. However, CJIS-related workload for membership exceeded what could be apportioned out amidst the core workload of the members. Some CJIS-related facilities work was completed within existing budgets at limited sites where CJIS compliance could be incorporated as part of already planned site moves, builds, or renovations. The majority of remaining site remodels were not funded nor sufficiently staffed to workload.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Data-sharing and service delivery interagency agreements would be brought into better compliance with federal requirements. Better compliance will improve audit measures, thereby reducing negative audit effects (penalties, compliance action plans, etc.) to partner governments. The SPSO would also be able to support partners by supplying them with any curriculums or materials that have been developed for staff privacy and security awareness and training.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

DHS and OHA are collaborating on CJIS compliance projects both in facilities remodels and IT security requirements. DHS and OHA are also collaborating with Oregon State Police (OSP) and the Department of Administrative Services (DAS) in achieving CJIS compliance.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

By improving awareness of proper information sharing, access controls, and business processes, partnership with local and tribal governments is maximized, and services to and collaborations with all communities around the state are improved in timeliness and service equity.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

The core assumptions are as follow:

- CJIS Security Policy and other federal requirements guided by the National Institute of Standards and Technology (NIST) will continue to expand over the next decade as they have over the last decade.
- Core CJIS facility compliance work will continue out over the 2021-2025 biennia. Changes to NIST physical security guidance will result in ongoing remodel requirements over coming biennia as other federal agencies increase their security requirements.
- Privacy and security requirements will continue to broaden with greater nuances between federal data types resulting in increasing value of privacy and security subject matter experts simultaneously knowledgeable in program services and needs that can assist programs to stay within security and privacy guidelines without compromising service delivery and equity.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

There are consistently expanding CJIS-related responsibilities for all OR-Kids using groups including but not limited to Child Welfare, Office of Training, Investigations, and Safety, and specific teams within Budget, Finance Services, and the Office of Payment Accuracy and Recovery. Other DHS units affected by increasing CJIS requirements are the Background Check Unit, the Fraud Investigations Unit, Human Resources, and Public Records. Depending on the nature of an audit, an appeal to an employment or licensing process, or other decision involving criminal justice information, other Central and Shared Services teams may also be affected. As other federal programs continue to add more National Institute of Standards and Technology (NIST) requirements, privacy and security policies could begin to affect non-CJIS programs and functions in Aging and People with Disabilities, Central and Shared Services, Developmental Disabilities, Self Sufficiency, and Vocational Rehabilitation.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Please see question 16 for certain responsibilities. Facilities and the SPSO are currently structured within Shared Services, so all budget and staffing funding from this POP will directly affect Shared Services.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No, unless dictated by new federal security or privacy requirements.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Facilities additions:

- [new] 1.0 FTE permanent Facility Operations Specialist 2 position as of July 1, 2021 to manage CJIS-related facility changes throughout DHS|OHA offices over the 2021-2023 biennium and onward.

Security and Privacy Services Office (SPSO) additions:

- [new] 1.0 FTE permanent Operations and Policy Analyst 4 position as of July 1, 2021 to serve as DHS|OHA CJIS LASO and provide targeted awareness and education, and privacy and security consultation and project management to Child Welfare.
- [new] 4.0 FTE permanent Operations and Policy Analyst 3 positions as of July 1, 2021 to provide targeted awareness and education, and privacy and security consultation and project management to the Self Sufficiency, Aging and People with

Disabilities, Office of Developmental Disability Services, Vocational Rehabilitation, Shared Services and Central Services programs.

- [new] 1.0 FTE permanent Executive Support Specialist 1 as of July 1, 2021 to provide administrative support, and meeting, training, and event coordination for the SPSO team.
- [existing] Move permanent 1.0 FTE Principle/Executive Manager E from Background Check Unit to SPSO to serve as manager of the SPSO.

20. What are the start-up and one-time costs?

N/A. All costs are ongoing beyond the 2021-23 biennium.

21. What are the ongoing costs?

In addition to the staff-related funding, ongoing costs include:

- **$6,000,000** for Services and Supplies (SS) costs covering facility changes necessary to bring DHS|OHA into compliance with CJIS Security Policy.
- **$37,975** per biennium for CJIS clearance fees. This includes $12.50 for fingerprinting, $28 for OSP fees and $13.75 for FBI fees per person based on 700 clearances per biennium due to a 10% annual attrition in DHS|OHA CJIS-cleared staff from retirement, promotion, and other factors.
- **$150,000** for site visits and inspections, training and awareness/education materials, and providing trainings, workshops, and other related costs including site, services, lodging, and transportation costs.

22. What are the potential savings?

Short-term savings will be primarily around increasing security and compliance to federal requirements, thereby avoiding federal compliance plans and/or penalties that may be costly. Long-term benefits will not only include avoiding federal penalties, but reducing potential costs dealing with privacy incidents and security breaches and providing services to those affected thereafter (which can reach millions of dollars). In addition, through SPSO services, privacy and security requirements will be inculcated in broader business processes and systems at all levels of the agency. This will include incorporation of better privacy and security process development in Requests for Proposals and the business processes that surround both service and IT contracts. The net result will be a reduction in costly incidents and breaches.

23. What are the sources of funding and the funding split for each one?

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$0	$1,422,863	$0	$1,422,863	8	7.04
Services & Supplies	$123,411	$6,286,019	$82,716	$6,492,146		
Capital Outlay						
Special Payments	$4,421,337	$258,040	$3,023,301	$7,702,678		
Other						
Total	**$4,544,748**	**$7,966,922**	**$3,106,017**	**$15,617,687**	**8**	**7.04**

Fiscal impact by program

	DHS SPSO	DHS SSF	DHS SAEC	OHA SSF	**Total**

Oregon Health Authority and Department of Human Services
2021-23 Policy Option Package

Division:	Oregon Health Authority: Office of Information Services
Program:	Privacy and Security
Policy package title:	Risk Audit Remediation
Policy package number:	210
Related legislation:	N/A

Summary statement:

In 2017, SB90 was approved. This bill's intent was to enable the Department of Administrative Services Enterprise Security Office to provide broader security support across more agencies. However, the responsibility for all system level security, data privacy compliance and addressing risks and audit findings remain with the agencies. For the Department of Human Services (DHS) and Oregon Health Authority (OHA) the impact of SB90 impact was significant. The Information Security and Privacy Office was cut by 40%, leaving inadequate resources to support agency information risk and privacy management. DHS and OHA remain responsible for the protection of their regulated data. The breadth, volume and scope, and associated compliance, risk, information and privacy standards are much greater than most other state agencies. Vendor supported systems also fall under agency responsibility. DHS and OHA must invest in resources and tools to strengthen this essential area, address Secretary of State audit gaps and mitigate breaches.

Oregon Health Authority and Department of Human Services
2021-23 Policy Option Package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$1,646,217**	**$2,643,599** (includes $2,470,102 OIS limitation)	**$767,886**	**$5,057,702** (including OIS limitation)	**4**	**4.00**

Purpose

1. Why does DHS/OHA propose this policy package and what issue is DHS/OHA trying to fix or solve?

This policy package enables DHS and OHA to have the staff and tools necessary to address remediation of risk and audit findings by closing some of the staffing gaps caused by SB90's impact. The volume of highly private data, complexity of the systems environments that house the data and the compliance criteria that must be met in protecting the data remain the responsibility of DHS and OHA. More effective mechanisms to protect and secure the environment are essential to mitigate future breaches of agency data.

The consolidation of data into solutions like Oregon Eligibility allows for greater access to services for consumers, but also greater risks from bad actors. Data integration can translate into more severe data compromise in the event of a breach. Preventing, detecting and mitigating privacy and security incidents will become even more critical as the integration of systems and data continues.

The aggressiveness and proficiency of "bad actors" intent on phishing, scamming and compromising organizations has increased and will continue to do so. The recent dramatic increase in remote access and expansive use of mobile devices to support telecommuting by DHS and OHA employees heightens the need for rigorous controls and oversight. Over 70% of cybersecurity threats originate at endpoints, like email and mobile applications.

2. What would this policy package buy and how and when would it be implemented?

This policy package provides a small number of permanent positions to stabilize support for agency level Information Risk and Privacy Management. The additional staff will address several critical staffing gaps including a senior level leadership role. These positions are essential for the agencies to have capacity to respond to Audit and Risk management findings and enhance protection of data and systems for the agencies.

3. How does this policy package further DHS/OHA's mission and align with its strategic plan?

This policy package directly supports two of the Governor's priorities by:

1. Ensuring DHS/OHA's data is secure, private and uncorrupted, the agencies support *"Create and manage a statewide data strategy to improve data analysis, data quality, information sharing and overall decision making to be done by the …Chief Data Officer for the State."*
2. Proactively managing system and data access, implementing automated tools to help track access and increasing foundational security support such as proactive reviews of audit logs, the agencies support *"Increase IT security by adding enhancements to the State's Enterprise Security Office, including improvements in intrusion and detection."*

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

Yes. Oregon Secretary of State is currently auditing DHS/OHA for compliance with implementation of six (6) Center for Internet Security (CIS) Security Controls[1]. Many of these have known existing gaps and will likely be identified as issues requiring remediation through this Audit.

[1] These include Inventory Control of Hardware and Software Assets, continuous Vulnerability Management, Controlled use of Administrative Privileges, Secure Configuration of Hardware & Software on mobile devices, laptops, workstations and servers, and Maintenance Monitoring & Analysis of Audit Logs.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

The increase in risk and privacy management from more staff and tools will improve the remediation of audit findings, decreasing the number and duration of open findings. This will enable the team to focus not just on critical risk findings, but also high and medium risk findings.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or a DHS/OHA performance measure? If yes, identify the performance measure(s).

Yes, the OHA performance measures under 1ASP1 - Managing Risk and OIS performance measures under OP6 - Manage and Mitigate Risk are tied directly to this policy package.

7. What are the long-term desired outcomes?

- Improved and more proactive focus on protecting agency data increases the ability to maintain confidentiality of information. This leads to increased trust by Oregonians to provide accurate health information, leading to more reliable and comprehensive population-based health information.
- Increased compliance with CIS Security Controls, which will provide increased functionality, protection and capabilities.
- Utilizing tools and staff resources to provide more proactive information protection and privacy of agency data reduces the risk of data breaches. Data breaches not only carry significant financial penalties, but they deteriorate public trust in the agencies. If DHS and OHA cannot safeguard our client's data, it will be significantly more difficult to acquire the data we need from them in order to provide services to Oregonians.

- Every dollar spent on data breaches takes away from other spending on service delivery. In the past year, breaches have cost DHS/OHA over $2 M. The March 2020 breach will cost an additional $300,000-500,000 in the next few months.

8. What would be the adverse effects of not funding this policy package?

Not funding this policy package puts DHS and OHA's data and systems at significant risk. It also compromises the agencies' ability to respond to and remediate Oregon Secretary of State Audit findings. Enhanced federal funding could be at risk if the agencies are non-compliant with federal security requirements.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

- ISPO performs audit logging and vulnerability management reactively when a problem with information protection or risk occurs but they lack staffing to provide proactive management.
- One of the current goals from the state CIO's office is the implementation of the CIS first 6 security controls. Control #1 is the implementation of Inventory and Control of Hardware Assets. ISPO is actively working in collaboration with OIS IT Asset Management and Customer Service and Support on implementation of a Hardware Asset Management solution. Target for implementation is late 2020 as part of the existing CA tools used in OIS. This will be followed by a project to implement the Software Asset Management solution.
- The original PEM F ISPO Director position was shifted to the Enterprise Security Office to satisfy Senate Bill 90 (SB90) during the 2017-19 biennium. However, after the positions was moved, the work that remained within the agencies was more than originally anticipated. OIS and the Office of the State CIO (OSCIO) validated that the position was still needed to support DHS and OHA. A permanent double fill was

created using another peer level position with the intent that the agencies would ask for a PEM F Director position in a future policy package to resolve the double fill. That request is reflected in this policy package.

- The Interim Chief Information Risk Officer has requested and received a log of all users with administrator privileges and is assessing ways to manage access risk, but this effort is limited by the lack of industry tools.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives include:

1. Do nothing.
   This is not a viable option as the responsibility for managing data privacy and maintaining system level protections remains the responsibility of DHS and OHA. Without additional staff, breaches, particularly in these troubled times where phishing has increased even more, represent an enormous risk to the agencies and the state.
2. Rely on contracted resources to fill gaps.
   This is periodically used on a selective basis to augment analysis. Long term, this is a cost-prohibitive solution and problematic several levels. The Privacy and Risk Management team requires a permanent, dedicated senior level leader to support their work. This role cannot be filled by a contracted resource. The minimal staffing request of four additional positions represents a far lower cost than trying to fill those roles with contracted resources. Contract mechanisms available for securing resources limits the duration of their work which results in continual loss of knowledge and skill and is a losing proposition.
3. Outsource the Privacy and Risk Management function.
   This approach was partially pursued with the transfer of multiple OIS positions to the Enterprise Information Security Office. Full outsourcing is problematic as intimacy with DHS and OHA's business and computing environment are critical to supporting this key function.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

The amount of data, types of data and protection requirements of DHS and OHA require significant resources, time and tools to maintain. The more demands that DHS and OHA put on the state CyberSecurity Services group, the less those resources are available to other state agencies. This policy package enables DHS and OHA to be more self-sufficient in maintaining data protection and managing risk.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Although OIS is sponsoring this policy package, it benefits both DHs and OHA as well as community partners such as AAAs.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[2] or equitable health outcomes?

Enhancing agency information protection and ensuring highly confidential health data is protected is incumbent on DHS and OHA. This policy package helps improve protection of this data and thereby provides positive support for populations impacted by health inequities.

[2] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

- Cost of professional services is assumed to be in alignment with other comparable efforts
- Cost of staffing is assumed to be relatively constant
- Federal enhanced funding will be available and leveraged for all Medicaid related efforts
- Resources with the necessary skills will be available
- Estimated costs for a risk management system are accurate
- Estimated costs for additional modules/licensing of SolarWinds tool are accurate

16. Will there be new responsibilities for DHS/OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests four (4) permanent positions:

- Chief Information Risk Officer – **1 PEM F**
- Information Risk & Privacy Incident Leader – **1 ISS8**
- Coding Practices Compliance Analyst – **1 ISS8**
- Information Risk Management Advisor - **1 ISS8**

20. What are the start-up and one-time costs?

- Funding to procure and implement a risk management system - **$75,000**
- Funding for additional modules/licensing of SolarWinds administrator privileges tool - **$300,000**
- Funding for professional services to provide contracted analysts - **$400,000**
- Funding for security software to automate security code reviews **- $300,000**

21. What are the ongoing costs?

Ongoing costs include annual licensing fees for tools and any SaaS risk management solutions.

22. What are the potential savings?

Significant cost avoidance by reducing risks of data breaches. Avoiding one breach like the 2019 incident protects highly confidential client data from exposure, sustains trust in agency and state security practices and avoids substantial penalties, fines and other costs.

23. What are the sources of funding and the funding split for each one?

Office of Information Services is requesting 100% Other Funds limitation. Shared Services Funding allocates to 55.49% DHS and 44.51% OHA, with a blended rate of 63.36% General Fund, 6.50% Other Fund, and 30.14% Federal Fund.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services		$1,314,621		$1,314,621	4	4.00
Services & Supplies	$80,957	$1,168,560	$23,462	$1,272,979		
Capital Outlay						
Special Payments	$1,565,260	$160,418	$744,424	$2,470,102		
Other						
Total	**$1,646,217**	**$2,643,599**	**$767,886**	**$5,057,702**	**4**	**4.00**

Fiscal impact by program

	OHA Shared	OHA SAEC	OHA SSF	DHS SSF	**Total**
General Fund		$80,957	$740,433	$824,827	**$1,646,217**
Other Funds	$2,470,102	$13,079	$128,499	$31,919	**$2,643,599**
Federal Funds		$23,462	$230,476	$513,948	**$767,886**
Total Funds	$2,470,102	$117,498	$1,099,408	$1,370,694	**$5,057,702**
Positions	4				**4**
FTE	4.00				**4.00**

Oregon Health Authority and Department of Human Services
2021-23 Policy Option Package

Division:	Oregon Health Authority
Program:	Office of Information Services
Policy package title:	Remote Access
Policy package number:	211
Related legislation:	N/A

Summary statement:

The Covid-19 pandemic Oregon and the world are dealing with highlights the critical need to improve emergency preparedness for the Department of Human Services (DHS) and Oregon Health Authority (OHA) to be able to reach vulnerable populations more easily and deliver services under any conditions without risking the health and well-being of staff or clients.

DHS and OHA require the ability for staff and clients to access systems and services from any location, including their home. Access must be dependable, secure and available 24/7. Systems must be increasingly available outside of regular business hours. Technical staff to support expanded system availability is required. This is the new normal and these capabilities must be embedded in the technologies supporting the day-to-day workforce.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$3,705,709**	**$5,628,947** (including $5,224,197 OIS limitation)	**$1,691,712**	**$11,026,368** (including OIS limitation)	**20**	**20.00**

Purpose

1. Why does DHS/OHA propose this policy package and what issue is DHS/OHA trying to fix or solve?

Currently, significant gaps exist in multiple areas that are essential to supporting remote access capabilities and ensuring critical systems services are available on-demand. These gaps include:

1. **Inadequate support for broad remote access for the DHS/OHA workforce** – additional leadership and staffing is needed to address significant increases in diversity of workforce access and continued increasing complexity of tools and the infrastructure environment.
2. **Lack of adequate staffing to meet customer support needs** – weekly analysis of Microsoft updates is required to assess impact to business and systems. The current team size is inadequate to meet this demand. Nearly 10,500 smart phones are deployed across the agency. 13,000 Citrix licenses are available for teleworking. As the agencies invest in remote working options for emergencies and for increased efficiency, OIS must provide threat and information protection. Additional permanent positions are needed to support this.
3. **Inadequate support for mobile computing** – demand has increased considerably for email/Teams/Skype/Video Conferencing administration support as well as for Intune support (replacing Maas 360) for managing/administering all Desktop, Laptops, Tablets, Smart Phones and Applications for security, deployment, management maintenance and enhanced threat/information protection management for desktop/laptops/tablets/phones.
4. **Remote/Virtual Access Support** – additional resources are needed to support remote access capabilities and increased demand. OIS has only one staff person with the expertise to support the secure connection port into the network for anyone working remotely. This represents a significant risk to large-scale teleworking. Teleworking will be significantly impaired or disabled if this resource is unable to do their job. Adding staff supports agency needs and lowers risk.

5. **Azure (Cloud) Support & Subscription** – staffing and funding for training and professional support are required to setup and use the Azure environment and manage the billing structure. DAS Enterprise Information Services (EIS) is driving movement of services to the cloud, but significant work will be delegated back to agencies. These new capabilities are not supportable by current staffing. Azure provides new capabilities but does not decommission existing infrastructure or OIS work.
6. **Software Tool Support** – current staffing levels are inadequate to keep software development tools updated and secure. Additional positions will close existing gaps in maintaining these tools. Broader remote access increases security risks and amplifies the need to keep tools current.
7. **Lack of Disaster Recovery Support** – mission critical systems are in dire need of disaster recovery support but staffing is inadequate to support infrastructure disaster recovery needs.
8. **Improve customer support** – coordination, education and communication of technology changes requires increased staffing to support, facilitate and manage these efforts. Policies, processes, system upgrades and other work OIS does may impact program areas. OIS lacks adequate staffing to help connect with internal business partners to educate and collaborate on these impacts. These positions will provide information for end-users to adapt and leverage new capabilities and improve response times to stay abreast of increased volume of business requests.

2. What would this policy package buy and how and when would it be implemented?

Funding this policy package enables OIS to:
Expand and Strengthen Technical Support

- Add staff to expand and strengthen remote support for a mobilized workforce and ensure access to systems is reliable
- Leverage professional services to enhance knowledge and expertise to leverage cloud capabilities and staff to setup and use the Azure environment and manage the billing structure

- Support increased service demand, stabilize Service Desk support, and enhance Office 365 support

Mitigate Risk to Technology Environment

- Reduce single points of failure for key areas such as supporting the secure connection port into the network for remote access
- Close gaps in maintaining Software Development tools
- Reduce Disaster Recovery risks by adding resources to ensure every business and mission critical application has a formal recovery plan and it is tested on an annual basis through table-top exercises
- Support customers more effectively with business-centric education and communication about technology changes impacting business use

3. How does this policy package further DHS/OHA's mission and align with its strategic plan?

Ensures access to core services regardless of location enables OHA and DHS to continue to serve Oregon citizens.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

As OHA and DHS adopts more Microsoft 365 features and tools, this policy package will provide security enhancements that will be implemented to ensure communication and collaboration is secure and reliable for remote workforce. These security enhancements such as Advanced Threat Protection, Azure Information Protection and FIPS 140-2 will comply to any current and future Oregon Secretary of State as well as federal and internal audits.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

Success will be measured by:

- Leadership capacity to maintain focus and continue to enhance and innovate in the areas of mobile computing, remote access, desktop services to meet business needs.
- Remote access for mobile workforce is dependable 24/7 from all locations
- Microsoft 365 is adequately supported
- Service Desk support is stable enough to meet demand
- Remote/Virtual access is dependably available
- Azure Cloud services are available to meet agency demands
- Software tools are updated and secure
- Disaster Recovery infrastructure needs are supported
- Customer support is improved

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or a DHS/OHA performance measure? If yes, identify the performance measure(s).

This policy package ties to a number of key performance measures for OIS including:

- OP4 – Develop Solutions. Includes acquiring, designing, architecting, enhancing products and services to meet business requirements, managing the lifecycle of products and services.
- OP5 – Deliver Solutions. Includes transition new or modified products to operations & maintenance, managing change, configuration and releases, managing IT services and the acquisition & delivery of hardware and software.

- OP6 – Manage and Mitigate Risk. Includes managing information security & privacy incidents, facilitating compliant data use and system access agreements, producing actionable IT risk assessments.
- SP1 – Continuous Improvement. Includes defining & documenting key processes, evaluating and improving established processes, managing performance metrics and reporting, assessing outcomes, maintaining security standards and practices.
- SP2 – Manage Operations. Includes management of finances, procurement, contracts, responses to legislative requests, management of hardware & software IT assets.

7. What are the long-term desired outcomes?

- Access to expanded Cloud capabilities
- Secure and reliable network access
- Ability to monitor, control and maintain devices connected to the network
- Ability to quickly troubleshoot using remote access
- Ability to define access rights to files and folders for different categories of users entering the network remotely
- Support business continuity by providing access to systems and data anytime, from anywhere

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, remote access to systems and services essential to DHS and OHA service delivery will be compromised. Progress leveraging Cloud capabilities will be static. Disaster Recovery will continue to represent a major gap for the agencies. Mobile computing will not be adequately supported and the existing single point of failure will persist. Service Desk support will be inadequate leading to longer wait times for internal customers impacting service to clients. DAS Enterprise Information Services (EIS) is driving

movement of services to the cloud and Microsoft 365, but significant work will be delegated back to agencies. These new capabilities are not supportable by current staffing.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OIS has taken a number of steps to improve in the areas outlined above:

- Existing resources are leveraged to their maximum capacity (and beyond). People work overtime. Service desk schedules have been adjusted to expand hours and provide more expansive system coverage. Contractors fill gaps and staff are cross trained as much as possible. Critical functions are diversified across multiple resources where possible to reduce single points of failure.
- OIS is trying to standardize tools and keep tools and software current but is understaffed in this area and unable to keep up.
- OIS introduced Service Desk Chat service in 2019 providing additional ways customers can get help: online chat, online submission of problems, call back, etc. Demand through that channel has grown over 500% in just over a year.
- CSS implemented Microsoft Office 365, providing much more robust security and reliability and developed a roadmap of actions to improve the technical environment. Moving from Microsoft Exchange to Microsoft Exchange Online in the Cloud yielded significant reliability gains and reduced on-site server maintenance. Other benefits include increased security, built in redundancy, and the ability to keep systems current. All data produced using desktop productivity applications: Email, Word, Excel, Visio, SharePoint saved to the network remains available even if something catastrophic happens.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives include:

1. Do nothing.
   This is not a viable option as it represents profound risk to sustaining remote access for a mobilized workforce. Doing nothing leaves the agencies at risk that a new Microsoft release may inadvertently corrupt or compromise existing capabilities; that Remote Access availability may be compromised; software tools will continue to represent a security vulnerability, Disaster Recovery will continue to be a major gap, Customer Support will be negatively impacted and knowledge and ability to leverage Azure (Cloud) capabilities will be postponed.
2. Use contracted resources to fill gaps in technical positions.
   This is a very expensive alternative and is not sustainable. The cost of hiring contractors to perform staff work is extremely expensive and the contract mechanisms available for securing resources limits the duration of their work. This results in continual loss of knowledge and skill and is a losing proposition.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

OHA and DHS has partnership with other states, tribal and local governments. There is a need for continuous collaboration and information sharing between different levels of the organizations allowing essential services to be delivered to Oregonians in a timely fashion. If this policy package is not funded, remote access to

systems and services essential to other states, tribal and local government service delivery will be compromised. Progress leveraging Cloud capabilities will be static. Collaboration tools capabilities will be limited.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Although OIS is sponsoring this policy package; DHS and OHA are the primary stakeholders and beneficiaries of the improvements outlined here. Additionally, AAA Community Partners as well as agencies which rely on access to DHS and OHA systems benefit from the strengthening of remote access capabilities.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package reduces significant risk to remote access of systems thereby ensuring access to key information housed in agency systems continues to be available to the programs and services across DHS and OHA. This includes Public Health systems, the Medicaid Management Information System, Child Welfare, Adult Protective Services, etc.

Staffing and fiscal impact

Implementation date(s): July 1, 2021 start date

End date (if applicable): Providing dependable remote access to a mobile workforce is expected to be an enduring service

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

15. What assumptions affect the pricing of this policy package?

Cost of professional services is assumed to be in alignment with other comparable efforts.
Cost of staffing is assumed to be relatively constant.
Federal enhanced funding will be available and leveraged for all Medicaid related efforts.
Resources with the necessary skills will be available.

16. Will there be new responsibilities for DHS/OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No,

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package request funding for 20 permanent positions in OIS. Positions are new and include:

- Provide senior level leadership to address significant increase in diversity of workforce access and complexity of tools and infrastructure environment – **1 PEM F**

- Enhanced Microsoft 365 support for modern desktop and mobile administration, threat analysis and information protection of agency data and devices – **3 ISS7, 1 ISS6**
- Stabilize support for increased use of agency Email/Teams/Skype/Video Conferencing for collaboration and communication – **2 ISS5**
- Support remote access capabilities and increased demand – **1 ISS8, 1 ISS6**
- Setup and use the Azure environment and manage the billing structure – **1 ISS8, 2 ISS7, 1 FA2**
- Close gaps in maintaining Software Development tools – **1 ISS7, 1 ISS6**
- Support DR infrastructure needs – **1 ISS6, 1 ISS5**
- Improve internal customer education, communication, coordination about technology changes – **2 OPA3**
- Support infrastructure project efforts – **1 PM3**

20. What are the start-up and one-time costs?

$250,000 for training and professional services to setup and use the Azure environment and Microsoft 365.

21. What are the ongoing costs?

Ongoing costs include licensing for software development tools, Azure provisioning of licensing and subscriptions and on-going training for staff to maintain core competency. Actual costs will depend on usage and the number of licenses required.

22. What are the potential savings?

- Reduced staffing risks – increased system security and availability
- Increased software development tool security

- Greater resiliency for DHS and OHA in times of crisis; ability to access services without geographic barriers anywhere, anytime on any network ensures business continuity and access to critical information including health related.
- Health care, health care systems and OHA/DHS operations benefit from improved system/data access, reduced security and support risks.

23. What are the sources of funding and the funding split for each one?

Office of Information Services is requesting 100% Other Funds limitation. Shared Services Funding allocates to 55.49% DHS and 44.51% OHA, with a blended rate of 63.36% General Fund, 6.50% Other Fund, and 30.14% Federal Fund.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services		$4,594,709		$4,594,709	20	20.00
Services & Supplies	$395,260	$694,892	$117,309	$1,207,461		
Capital Outlay						
Special Payments	$3,310,449	$339,346	$1,574,403	$5,224,198

Oregon Health Authority and Department of Human Services
2021-23 Policy Option Package

Division:	OHA & DHS
Program:	All Programs within DHS and OHA
Policy package title:	Increase IT Project Capacity
Policy package number:	POP 212
Related legislation:	N/A

Summary statement:

Current project support is not enough to meet the needs for DHS & OHA and we often find that projects are vying for the same resources, such as, project managers, business analysts and technical experts. Increased business requests and the need to accelerate the modernization of our existing systems has led the leadership of both agencies to ask for increased technology project capacity and to continue to find ways to reduce the time from project inception to completion, while also reducing risk to project success.

The ability to meet the needs of the business for additional technology projects is one of the top "dis-satisfiers" in a recent Business Leaders survey. In addition, an internal audit has been set forth to analyze the roadblocks for IT projects.

OIS listened and heard the top three project dis-satisfiers. This POP has been established to provide real results quickly and to fix three of the top project dis-satisfiers for the agencies we serve:

1. **Improve IT Project Capacity** by adding 19 additional permanent resources, which will allow the business to add 5 additional IT projects that are under $1M to its overall project portfolio.
2. **Improve timeliness for projects** by adding business system analysts and contract administrators to reduce resource conflicts. In addition, business system analysts can tackle critical roadblocks that are causing project delays.
3. **Improve operational efficiency** by automating reports and adding additional staff to provide effective and accurate testing.

Oregon Health Authority and Department of Human Services
2021-23 Policy Option Package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$3,896,724**	**$5,974,796** (including $5,552,054 OIS limitation)	**$1,784,672**	**$11,656,192** (including OIS limitation)	**19**	**19.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Over the past few biennia, DHS and OHA have averaged 20 active technology projects over $1M occurring simultaneously, to meet the business demands and federal/state mandates to enhance existing systems, replacement of legacy systems and mobile and modern solutions. The Department of Human Services (DHS) and Oregon Health Authority (OHA) are two of the largest Oregon state agencies with a $500M+ portfolio. The agencies are in need of additional resources to provide the support needed for upcoming critical business initiatives (e.g., emergency preparedness initiatives due to the pandemic; small IT projects that are required to be implemented quickly for child safety, healthcare, etc.; increased reporting for public transparency).

Current project support is not enough to meet the needs of these two large agencies, and we often find that projects are vying for the same resources, such as, business system analysts, project managers, testers, and technical experts. Increased business requests and the need to accelerate the modernization of our existing systems has led the leadership of both agencies to ask for increased technology project capacity and to continue to find ways to reduce the time from project inception to completion, while also reducing risk to project success. The ability to meet the needs of the business for additional technology projects is one of the top "dis-satisfiers" in a recent Business Leaders survey. In addition, an internal audit has been set forth to analyze the roadblocks for IT projects.

OIS listened and heard the top three project dis-satisfiers. This POP has been established to provide real results quickly and to fix three of the top project dis-satisfiers for the agencies we serve:

1. **Improve IT Project Capacity** by adding 19 additional permanent resources, which will allow the business to add 5 additional IT projects that are under $1M to its overall project portfolio.

2. **Improve timeliness for projects** by adding business system analysts and contract administrators to reduce resource conflicts. In addition, business system analysts can tackle critical roadblocks that are causing project delays.
3. **Improve operational efficiency** by automating reports and adding additional staff to provide effective and accurate testing.

2. What would this policy package buy and how and when would it be implemented?

This POP seeks permanent FTE and funding that will increase support IMMEDIATELY upon hire for critical business initiatives. These resources will support the OIS Project Solutions team and Project Management Office, utilizing a standard project management methodology and working closely with the Department of Administrative Services' Enterprise information services oversight team to ensure adherence to state stage gate processes and principles for the successful delivery of technology projects.

Permanent staff would immediately, upon hire, reduce contracting risks, increase project stability, increase project success, support 5 additional small project, improve testing efficiency and increase the project delivery rate. In addition, automated reporting would increase the operational efficiency for DHS & OHA, which ensures that Oregonians receive the services they need in the most efficient method possible.

This POP enables OIS to add permanent staff to IMMEDIATELY upon hire:

- Support additional business initiatives and technical projects for DHS and OHA
- Reduce the time from project inception to completion (timeliness)
- Continuously improve practices and processes
- Expand and strengthen its technical project support pool (e.g., contract administrators, business system analysts, project managers)
- Improve operational efficiency by automating reports and adding additional staff to provide effective and accurate testing

High-Level Implementation Plan:

- Hire permanent staff immediately upon approval
- Establish a dedicated project solutions team that will oversee and implement small IT projects
  - Add 5 small IT projects to the IT project portfolio within the first three months of the POP being approved
- Establish a dedicated test team
  - Purchase testing software and tools
  - Train staff
  - Develop a proof-of-concept using an existing project to demonstrate the added value for future growth of this proposed service strategy

3. How does this policy package further OHA's mission and align with its strategic plan?

Empowers DHS & OHA to continue to serve Oregon citizens by ensuring that their large business/technical initiatives are supported, resourced, delivered timely and are successful.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

Yes, in parallel with the feedback we received from surveying our business partners, an agency risk assessment included concerns about the timeliness of their business initiatives/projects. An internal audit has started and will include reviewing the project processes from inception to completion. The key areas that will be evaluated are:

- Resource Capacity / Resource Conflict
- Timeliness
- Quality
- Effectiveness
- Project Prioritization

Quantifying results

5. How will OHA measure the success of this policy package?

Success will be measured by using KPIs to measure the following:

- Timeliness:
  - Improved project delivery rate/cycle time. Establish a baseline and compare each year to evaluate timeliness
  - Ensure that resources are properly allocated and resource conflicts have been reduced or eliminated
  - Projects are not waiting for more than 4 months to start
- Quality:
  - Improve stakeholder satisfaction by using a Poll to gather the required data after every project (Customer Satisfaction)
- Effectiveness:
  - Tally the number of project milestones completed on-time that receive sign-off vs. the number of project milestones that have not been completed on-time (Milestones Completed On-Time)

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package aligns with and directly supports two of the Governor's policy:

1. *Prioritize price when evaluating contractors*
2. *"Modernize and standardize critical statewide systems"*
3. *"Optimize service delivery to the public and internally by modernizing agency-specific and cross-agency systems"*
4. *Improve overall software system development transparency by posting project health status summaries online*
5. *Create better health through good jobs*

7. What are the long-term desired outcomes?

Deliver projects rapidly, improve the number of projects completed during a biennia, establish a sustainable enterprise resource management system for the multiple IT modernization efforts that are reforming the mission critical systems

across the agencies, reduce the turnover, retain the technical knowledge within OIS by providing good jobs, and to automate reporting to improve the transparency for the Oregonians we serve.

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, it will negatively affect the number of business initiatives that OIS can support for DHS and OHA. The business will need to prioritize which projects can move forward and which projects will have to remain in the queue or not get done.

Some additional adverse effects:

- The business will continue to be dis-satisfied with the IT Project Capacity
- Resource conflict will continue, which results in project delays. Common resource needs or dependencies will disrupt other projects that are waiting for the same resources
- Delays will ultimately increase the bottom line for Oregonians
- Resources will continue to be spread thin over the OHA & DHS IT portfolio, which will cause projects to miss deadlines and possibly lead to federal fines

In summary, OIS will not be able to quickly deliver value for critical initiatives and, unfortunately, would not be as responsive to its customers as the organization would like.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Several efforts have been undertaken to improve the current situation. The following actions have taken place:

- OIS has partnered with DHS and OHA to establish governance and prioritization of technology initiatives. Requests by each program area are tracked and triaged. Governance ensures that the resources are focused on the priorities set by the business
- OIS has created a dedicated Project Solutions team which oversees and implements all major (>$1M) technology projects
- OIS has created an Enterprise Project Management Office that ensures all projects follow a standard project management methodology based on industry best practices
- OIS project support capacity has increased significantly since 2014. In 2014 there were 10 active projects, 7 starting, 0 completed. By 2019, the numbers increased dramatically to 31 active projects, 10 started, 11 completed. This is due to adding more PMs, reducing project length, applying agile methodologies that improve the overall delivery speed and piloting a "quick hit" team to work on smaller projects

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives include:

1. Do nothing.
   This is not a viable option. Project delays and manual reporting increase the bottom line for Oregonians and continue to be a dis-satisfier for the businesses we serve. In addition, manual reporting is an inefficient use of resource utilization and extends project delivery dates.

2. Hire Contracted or Limited Duration Resources and Continue to Conduct Manual Reporting.
   This is not a viable option as the current situation has become unsustainable and is costing the agencies time, credibility and money. DHS and OHA do not have the funding to pay for high dollar resources that can cost up to three times more than permanent positions.

Hiring contracted or limited duration resources: Over the last five years, the two agencies have used contracted staff and limited duration resources to fill its resource gaps. This strategy is not the most effective or efficient method for IT services. Hiring contractors using the IT Professional Services contract can be up to three times more expensive than permanent employees and some staffing contracts limit contractors to 1040 hours per year. Staff in limited-duration positions continue to look for permanent employment creating instability in the workforce supporting the critical business initiatives. These challenges impact the business in the following ways:

- *Contracted staff can cost up to three times more; thus, impacting Oregonians bottom line*
- *High turnover rate*
  - *Additional workload is assigned to already over-loaded staff*
  - *Permanent staff must continuously train new hires*
- *Loss of unique knowledge that is specific to the program and/or OIS*
- *Reduced productivity*

Manual Reporting: Additional contracted resources will be needed to provide manual reports for any new systems that will be implemented over the next biennia.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

OHA and DHS are the primary stakeholders and beneficiaries outlined in the policy package. Federal and state funding partners will also benefit as agency timeliness, automated reporting and increased project stability are improved to reduce the limited critical technology resource pool to meet the demands of the business.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This is a collaborative effort between OHA and DHS.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package, if approved, will reduce project delays, thus improving the bottom line for Oregonians. Moreover, DHS and OHA will be able to deliver its services to Oregonians in a more efficient, effective and timely manner by improving its resource utilization and providing advanced reporting.

DHS and OHA have a $500M IT project portfolio that ensures continuity of funding for critical programs supporting health and health care including Public Health systems, the Medicaid Management Information System, Child Welfare, etc.

Staffing and fiscal impact

Implementation date(s): July 1, 2021 start date

End date (if applicable): This will be an on-going effort to ensure that both DHS and OHA have the resources to support the critical business initiatives anticipated for each biennium.

15. What assumptions affect the pricing of this policy package?

Cost of professional services is assumed to be in alignment with other comparable efforts
Cost of staffing is assumed to be relatively constant

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Federal enhanced funding will be available and leveraged for all DHS & OHA project efforts
Resources with the necessary skills will be available

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests funding for 19 permanent positions. The positions are new and will work collaboratively within OIS to represent the critical business initiatives across DHS and OHA.

- Contract Administration: Funding and permanent position authority for 2 FTE OPA3 Contract Administrators to providing contract and vendor management oversight (2 OPA3)
- Project Stability: Funding and permanent position authority for 5 FTE project managers; this would allow 5 additional IT projects to start and eliminate the use of 6 current LD positions that are either managing or supporting existing projects (2 PM3, 3 ISS8)

- Business Systems Analysts: Funding and permanent position authority for 5 FTE to support data quality, requirements gathering, process modeling and testing, tackle project roadblocks and/or critical business initiatives – (1 PEM E, 2 ISS7, 2 OPA4)
- Business Intelligence: Funding and permanent position authority for 4 FTE to develop Business Intelligence (BI) reports for report automation – (1 PEM E, 1 ISS8, 2 ISS7)
- Automated Testing: Funding and permanent position authority for 3 FTE testers (1 ISS8, 2 ISS7) plus $90,000 for software automation tools, $70,000 for 2 years of infrastructure costs to support automated testing on projects

20. What are the start-up and one-time costs?

- $90,000 for best practice software automation tools
- $70,000 for two years of infrastructure costs to support the automation software

21. What are the ongoing costs?

It is too early in the process to accurately estimate ongoing costs. However, estimated costs are provide below that include licensing fees.

- $26,400 per year ($22/per user on a monthly basis) for a pilot group that will consist of 100 users

22. What are the potential savings?

- Reduce project delays by improving the limited resource pool with permanent staff vs. hiring contracted staff that can be three times more expensive
- Deliver small projects timely by assigning technical Project Managers to initiatives under $1,000,000, which need planning, tracking and reporting

- Reduce contracting risks by providing full-time Contract Administrators to manage DDI and iQMS contracts. Each Contract Administrator can manage 1 DDI or 2+ iQMS contracts
- Increase project stability by replacing limited duration project management positions with permanent FTE leading to reduced project risk through lower PM turnover
- Increase success by funding Business Systems Analyst positions to support technology projects by ensuring analytic knowledge continuity through the life of the project
- Support the increased volume of business requests and provide expedited response times
- Improve efficiency, accuracy and speed by using Project Online to plan work across the project portfolio, so that informed decisions can be made around resources and when it is the best time to initiate a project
- Improve testing accuracy by using testers that understand the businesses needs and rules. Contractors are inefficient for the first few months of a project, costly, require huge learning curves and, overall, do not provide accurate results
- Improve reporting for project trends, project workflows and overall project reports. Automated reporting will increase data consistency and transparency

23. What are the sources of funding and the funding split for each one?

Office of Information Services is requesting 100% Other Funds limitation. Shared Services Funding allocates to 55.49% DHS and 44.51% OHA, with a blended rate of 63.36% General Fund, 6.50% Other Fund, and 30.14% Federal Fund.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services		$4,990,963		$4,990,963	19	19.00

Department of Human Services / Oregon Health Authority
2021-23 Policy Option Package

Division: DHS & OHA

Program: Integrated Eligibility (IE) / ONE program

Policy package title: IE Modernization

Policy package number: POP 213

Related legislation: N/A

Summary statement:

This policy package requests permanent resources for DHS and OHA/OIS for modernization and enhancement services for the integrated ONE program, which includes the initial creation of the OregonEligibility ONE system for Modified Adjusted Gross Income (MAGI) Medicaid in 2015 and the Integrated Eligibility System, through the 2021-23 biennium and into the future biennia. The requested resources and funding will support enhancements, automation and system consolidation that will drive the integrated ONE program to a more sustainable and future focused solution.

The Integrated Eligibility initiative was a multi-biennium effort to develop a comprehensive unified system called integrated ONE that integrates eligibility determination for Non-MAGI Medicaid, Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF) and Employment Related Day Care (ERDC) benefits. The ONE program represents an essential lifeline to vulnerable Oregonians in need.

It should be noted that the integrated ONE system will be implemented statewide before July of 2021. This policy package is to address resources, procurements and tools for major enhancements to the system that will be needed to add functionality that was not included in the original system requirements set in 2016.

Modernization and Post-Implementation Enhancements

This policy package requests permanent resources, procurements and tools for DHS and OHA/OIS to modernize and support post-implementation enhancements, which will be key to making sure that the system provides Oregonians the right services in the most efficient way while leveraging Oregon's largest IT investment.

Department of Human Services & Oregon Health Authority
2021-23 Policy Package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$8,461,033**	**$0** (including OIS limitation)	**$16,859,199**	**$25,320,232** (including OIS limitation)	**42**	**42.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

This policy package requests permanent resources for DHS and OHA/OIS through the 2021-23 biennium and into future biennia to address modernization and major enhancements to the ONE system that will be needed to add functionality that was not included in the original system requirements or scope. The intent of these changes is to continue to focus on the key main goals of the initial ONE implementation and IE project, which are Integrity and Stewardship for Oregonians, efficiency and standardization and serving the citizens of Oregon. These key goals will be addressed through updates which include:

- Programmatic updates requested by the Oregon State Legislature, Federal Government, or various work groups, which have been not carried forward, due to the pandemic and policy freezes set by the department(s)
- Increased functionality for operational efficiency to ensure Oregonians receive the services they need in the most efficient method possible
  - Report creation and automation to reduce cost efficiencies for DHS/OHA. The agencies are relying on manual work to provide reports for government bodies (e.g., Federal, State, Legislature), auditors and operations
  - Mandated federal changes for Asset Verification Services, which will shorten verification response times for Oregonians and provide the ability to expedite application processing timeframes for eligibility determinations
  - Mandated changes that have been passed nationally regarding the SNAP or Medicare program
  - Integration of the Federal Public Assistance Reporting Information System (PARIS) to allow Oregon to share eligibility information and identify improper payments to minimize fraud and abuse
  - Creation of automated workflow systems, utilized by other States, to answer questions and assist individuals in applying for benefits without worker intervention

- Modernize systems to improve organizational agility, performance and efficiency
  - Building new interfaces that integrate with the ONE system that will improve and streamline processes for overburdened staff that have to currently utilize external systems for verification; such as, Oregon DMV and OregonSaves. Integration provides opportunities to sunset legacy applications, automate workflows for workers and boost knowledge worker productivity

- Training, organizational change and communication personnel to address the changes for all programs. For example:
  - Cross program training
  - Transition plans and change management (e.g., change guides, schedules, targeted support, etc.)
  - Development of new processes and structures
  - Community and partner communications
  - News advisory and public service announcements
- User Acceptance Tools need to be upgraded to support further enhancements. For example, Microsoft's Team Foundation Server must be upgraded to the latest version before it reaches end-of-life. All UAT activities are currently supported by the State and are not provided by Deloitte
- Tools for improving productivity for a remote workforce

It is important to note that a lot of the resources on the IE project were limited duration resources, rotational staff and contracted staff. The resources that are needed to modernize and enhance the ONE system will have already left the project by July of 2021. The result of continuing to hire limited duration and contracted resources is high turnover, because resources of this type continue to look for permanent and stable employment. This causes the State to be in a continuous loop of hiring and training throughout the project; thus, reducing productivity in other workstreams.

2. What would this policy package buy and how and when would it be implemented?

Funding this policy package enables the IE Program to add permanent staff and the ability to expand and strengthen the integrated ONE program by:

- Modernizing and enhancing the ONE integrated eligibility system
- Addressing service needs for APD, DD, SSP, OHA, etc.
- Enhancing and improving eligibility determinations
- Enhancing the system to support increased service demands
- System and tool modernization to improve productivity and efficiency
- Tools for improving productivity for a remote workforce

Investing in permanent staff for the integrated ONE Program will help the organization achieve its strategic goals, deliver critical services to the business and develop new capabilities that are required by our Federal Partners (e.g., Centers for Medicaid and Medicare, Food and Nutrition Services, etc.).

Over the next year, DHS will be engaging in a competitive procurement for the ongoing maintenance and operation of the ONE system. This approach will allow DHS and OHA to determine the work, cost and responsibility for each vendor across the biennia. In partnership, both agencies will form a governance model that will support the prioritization efforts tied to metrics and key outcomes, as well as the items that are either mandated or requested by the Legislature and Federal partners.

Funding for the enhancements and/or modernization efforts will either be through the Advanced Planning Process and Cost Allocated or charged directly to a funding group based on the programs involved. The funding model will be determined based on the program (e.g., APD, SSP, OHA, etc.), type of enhancement and/or modernization effort. Due to the blended program structure, participating federal agencies may need to be involved. Moreover, the updated MITA framework and definitions from the Centers for Medicare and Medicaid Services (CMS) will allow Oregon to potentially leverage 90% federal funding for Medicaid related items that impact health outcomes and, of which, can be measured by the State.

DHS and OHA will treat the prioritized enhancements as modular updates to continuously improve the system(s) functionality. Like building and other assets, the State owns, the IT systems also need to be consistently supported and modernized to ensure that it meets the strategic goals for both DHS and OHA, and not creating avenues of deficiency or vulnerability.

It is important to note that some work, depending upon the M&O procurement model that is chosen over the next year, the enhancements or modernization efforts may require additional procurements. The procurement efforts will be competitive to create cost savings and transparency throughout each endeavor.

High-Level Implementation Plan:

- Prioritize needed positions and begin hiring permanent staff upon approval
- Complete procurement for the ongoing M&O of the ONE system and onboard a vendor
- Establish DHS/OHA Enterprise Governance for modernization and enhancement efforts
- Develop a Business Case which includes analysis, requirements, alternatives, approach, estimated costs, return on investment and success metrics
- Acquire buy-in and approval from all programs
- Secure funding and approval for the enhancement and modernization efforts that are prioritized for the 21-23 biennium
- Develop a detailed plan for implementation, which includes scope, timeline and budget
- Execute to the plan

3. How does this policy package further OHA's mission and align with its strategic plan?

Empowers DHS & OHA to continue to serve Oregon citizens by enhancing and modernizing key programs used by some of Oregon's most vulnerable populations.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

Success will be measured by using the following:

- Customer Satisfaction: Through the use of surveys to determine the satisfaction level of the Oregon citizens we serve
- Accuracy: The integrated ONE programs, Non-MAGI Medicaid, SNAP, TANF, and ERDC show a 95% or better-quality control review rating

- Availability: The integrated ONE system continues to meet the service level agreements that are in place with each vendor the vendor
- Reporting: Through the use of several reporting methods that include ad hoc and Federally required reporting

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or a DHS/OHA performance measure? If yes, identify the performance measure(s).

This policy package aligns with and directly supports three of the Governor's policy:

1. "Modernize and standardize critical statewide systems"
2. "Optimize service delivery to the public and internally by modernizing agency-specific and cross-agency systems" by providing a modern, accessible system enabling clients broader access to services and quantifiable measurements around outreach and quality of services
3. Create better health through good jobs

7. What are the long-term desired outcomes?

- Secure permanent resources who will assist Oregonians from start to finish in providing timely and efficient eligibility determinations
- Ability to modernize and enhance the system to serve Oregonians
- Establish an Enterprise Governance model between two agencies that is responsive, can easily adapt, scale and move in new directions quickly
- Adopt a multi-vendor model, as Gartner recommended, to modernize integrated ONE, while also reducing the reliance of a single vendor which could gain the competitive procurement advantage over-time
- Enhancing the system to support increased services for Oregon citizens
- Modernize tools to improve productivity and efficiency

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, modernization and enhancements for Oregon's largest IT investment will not be at a level required to make sure that Oregonians relying on the integrate ONE program for critical services can be met, which directly effects potential loss of customer satisfaction.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

There was no funding and position authority received in the 2019-2021 session for future modernization and enhancements for the integrated ONE program. This is a new environment and one of the largest, most complex IT systems Oregon has ever implemented. Now, with the system close to go-live, enhancements have already started to be gathered.

This policy package, upon approval, will help modernize Oregon's largest IT system and continue to invest into the future for Oregonians.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives include:

1. Do nothing.
   This is not a viable option. With what is known today, there will be several enhancements required, some Federally mandated, that will need to be implemented during the 21-23 biennium for the integrated ONE program. By not providing enhancements or modernizing outdated technology, we will negatively impact both Oregonians and staff. Oregonians may suffer through delays and availability of new required services or lost efficiencies that could have been implemented while staff deal with negative experiences with customers and work overloads.
2. Hire Contracted or Limited Duration Resources and Continue to With Current Staff.

This is not a viable option. Over the last five years, the two agencies have used contracted staff, limited duration resources, and staff on rotation to fill its resource gaps. By July 2021, the contracted staff and limited duration staff will have reached the end of their contract and will have found employment elsewhere. Additionally, staff on rotation will also have completed their rotational duties and have gone back to their permanent jobs that they were hired for. This strategy is not the most effective or efficient method for work efforts, such as, modernization projects, IT services or User Acceptance Testing.

Moreover, hiring contractors using the IT Professional Services contract can be up to three times more expensive than permanent employees and some staffing contracts limit contractors to 1,040 hours per year. Staff in limited-duration positions continue to look for permanent employment creating instability in the workforce. These challenges result in the following impacts:

- Contracted staff can cost up to three times more; thus, impacting Oregonians bottom line
- High turnover rate
- Additional workload is assigned to already over-loaded staff
- Permanent staff must continuously train new hires
- Loss of unique knowledge that is specific to the integrated ONE program and/or OIS
- Reduced productivity

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

OHA and DHS are the primary stakeholders and beneficiaries outlined in this policy package. Other entities that may be affected will depend on the type of enhancements that would be implemented. It is likely that DAS - Equipment and services at DCS will be required to support this policy package.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This is a collaborative effort between DHS and OHA.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package, if approved, will ensure that Oregonians can continue to achieve wellbeing and independence by providing timely and efficient services that are relied upon by Oregonians in need.

Staffing and fiscal impact

Implementation date(s): July 1, 2021 start date

End date (if applicable): This will be an on-going effort anticipated for each biennium to ensure that both DHS and OHA have the resources and tools to modernize and enhance the integrated ONE program in support of Oregonians.

15. What assumptions affect the pricing of this policy package?

- Cost of professional services is assumed to be in alignment with other comparable efforts
- Cost of staffing is assumed to be relatively constant
- Federal funding will be available and leveraged for all DHS & OHA efforts where available

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

- Resources with the necessary skills will be available
- Ability to procure multiple vendors to remove the competitive advantage of a single vendor; thus, reducing the costs for modernization efforts

16. Will there be new responsibilities for DHS or OHA? Specify which programs and describe their new responsibilities.

Unknown at this time, as it depends on the enhancement.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Unknown at this time, as it depends on the enhancement.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Unknown at this time, as it depends on the enhancement; however, it would only be in a positive direction.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package seeks a total of 59 permanent FTE (DHS-42, OIS-17) positions and funding for modernization and enhancements for the IE program. The positions are new and will work collaboratively within DHS and OIS to prioritize and implement needed enhancements for the integrated ONE program.

<u>DHS - Funding for 42 permanent positions to provide enhancement services and support in various key roles:</u>

- Eligibility Transformation (ET) Team: 38 FTE
  - Administrative staff and Managers: 3 FTE (1-PEMF, 1-PEMD, 1 ESS2) to manage and oversee the additional personnel required for enhancement efforts

- Eligibility Policy Analyst: 4 FTE (4-OPA4) to ensure new functionality meets the program needs. These efforts will continue across multiple biennia
- Support Staff: 1 FTE (1-OS2) to assist in areas where work efforts peak in demand
- Business Analyst: 2 FTE (2-OPA1) to provide subject matter expertise and business analysis for major enhancements, which will continue across multiple biennia
- Change Leaders: 19 FTE (19-OPA3 MMN) to replace the staff that are on rotation to ensure that a solid platform is in place to support the vision and change within the organization
- Statewide Change Manager / Data Analyst: 1 FTE (1-OPA4 MMN) to manage and lead the change agents within the integrated ONE program
- Public Affairs Specialist: 1 FTE (1-PAS3) is needed to handle campaigns, relief efforts and promotional outreach
- Trainers: 7 FTE (1- OPA3, 5-TSD1, 1-TDS2) to lead and assist in training. 1 lead worker and 6 trainers are needed to create training documentation and to deliver training for new and pending enhancements

- APD Program Support: 4 FTE (2-TDS1, 1-OS1, 1-AS1) to lead and support enhancements related to the Aging People and Disabilities program

OIS Technical - Funding and permanent position authority for 7 FTE that include:

- Test Automation: 2 FTE (1-ISS8, 1-ISS7) to research and prototype automated testing for the mainframe
- Business Systems Analyst: 1 FTE (1-ISS7) to create and maintain enhancement related technical documentation and associated change requests
- ONE Call Center Support: Funding and permanent position authority for enhancing the integrated ONE call center (4-ISS4)

OIS Program Management Office - Funding and permanent position authority for 10 FTE that include:

- Azure DevOps: 1 FTE (1-ISS7) for the 2021 Microsoft Team Foundation Server upgrade and to provide on-site expertise/training for the complex test suite
- Technical Report Team: 3 FTE, Technical Report Lead (1-ISS8) and Report Developers (2-ISS7) to create and maintain business intelligence reporting
- Senior Project Manager: 2 FTE (2-PM3) to manage data conversion cleanup, enhancements, infrastructure enhancements, and reporting needs
- Contract Administrator: 1 FTE (1-OPA4) to manage related enhancement service contracts and deliverables

- Business Systems Analyst: 3 FTE (3-ISS7) to create and maintain enhancement related technical documentation, write design specs for change requests and enhancement efforts

20. What are the start-up and one-time costs?

N/A

21. What are the ongoing costs?

IT Professional Services: $2M
Hardware/Software: $1M
Contractor Costs: $10M

22. What are the potential savings?

Unknown at this time, but there are savings as Legacy systems expire.

23. What are the sources of funding and the funding split for each one?

Funding for the enhancements and/or modernization efforts will either be through the Advanced Planning Process and Cost Allocated or charged directly to a funding group based on the programs involved. The funding model will be determined based on the program (e.g., APD, SSP, OHA, etc.), type of enhancement and/or modernization effort. Due to the blended program structure, participating federal agencies may need to be involved. Moreover, the updated MITA framework and definitions from the Centers for Medicare and Medicaid Services (CMS) will allow Oregon to potentially leverage 90% federal funding for Medicaid related items that impact health outcomes and, of which, can be measured by the State.

Department of Human Services & Oregon Health Authority
2021-23 Policy Package

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$3,911,033	$	$8,409,199	$12,320,232	59	59.00

Department of Human Services
AFFIRMATIVE ACTION REPORT

This report summarizes the progress the Oregon Department of Human Services (DHS) has made in accomplishing its affirmative action goals for the 2019 - 2021 biennium and identifies some of the strategies for 2021 - 2023.

July 1, 2019, to June 30, 2021

Accomplishments and progress toward Affirmative Action Goals

DHS recognizes and appreciates the importance of creating an environment in which all employees feel valued, included, and empowered to do their best work and bring new ideas for improvement. We recognize that each employee's unique experiences, perspectives, and viewpoints add value to the ability to create and deliver the best possible services to our clients. Outreach, recruitment and retention efforts have resulted in incremental gains in people of color and women, and efforts continue to improve the number of veterans and people with disabilities within the workforce. Five-year trend charts include statistics for the workforce for the quarter ending June 30, for 2016 through 2020. The State of Oregon transitioned in early 2019 to a new recruitment and workforce accounting system, Workday.

Accomplishments

The agency will continue to build upon our successes to achieve a more culturally competent work force, create culturally appropriate and effective programs and service delivery systems, develop quality improvement strategies with a focus on diversity and creating welcoming environments for our diverse client base and staff. DHS programs like RISE help build a culture where safety and well-being, supportive relationships, high expectations and accountability, equitable treatment, meaningful participation and community engagement are key. Active Employee Resource Groups (ERGs) include eight official groups including:

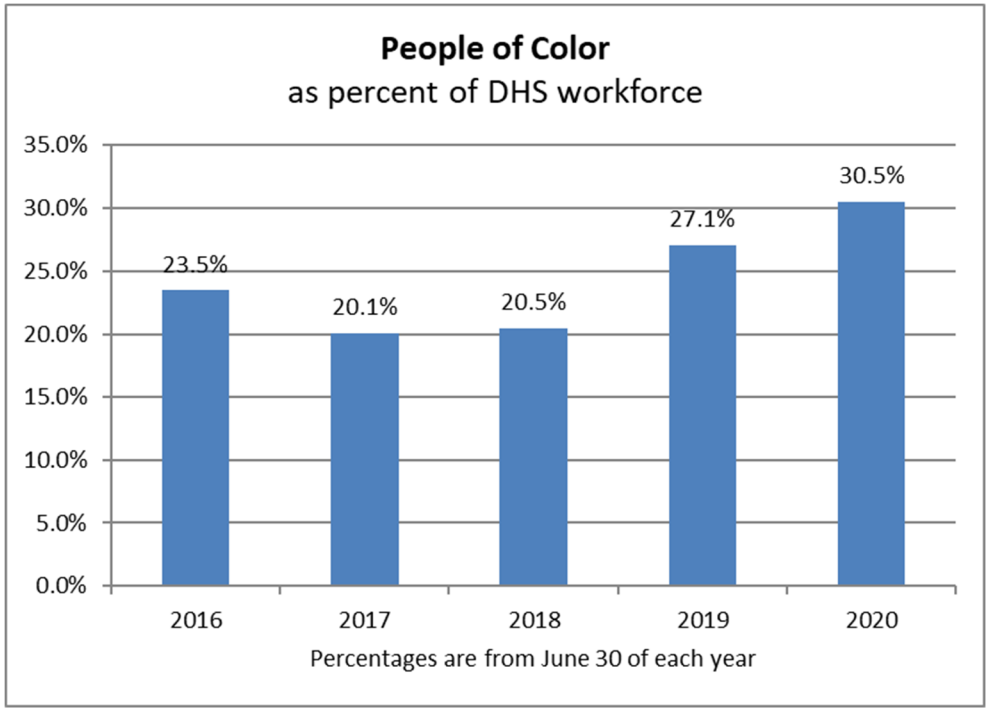
WAHONE (We are Here Oregon Native Employees)
BEST (Black Employee Support Team)
P.R.I.D.E (People Respecting Individual Differences Everywhere)
VERG (Veteran's ERG)

APINET (Asian/Pacific Islander Employee Network)
AbleNet (acts as a forum to provide information, resources, and other assistance to employees with disabilities);
HispNet (Hispanic Network)
AAMC (African American Management Council)

DHS has been increasing their outreach efforts and has successfully built partnerships with over 200 diverse and non-profit organizations, Veteran organizations, organizations to assist people with disabilities with their job search, university alumni associations, and job boards and social media sites.

It is the goal of DHS for each District to have an active Diversity Council. District 5's mission is: "to expand an understanding and acceptance of equity and inclusion in every facet of our lives. We will seek to enhance awareness of our differences and similarities through exposure and education thereby, identifying our commonalities and developing a sense of community." The activities on their calendar on the website include virtual training and events such as Queer Representation in the Media Panel, a showing of the film, "I am not Your Negro" and a showing of the film, "Love, Simon."

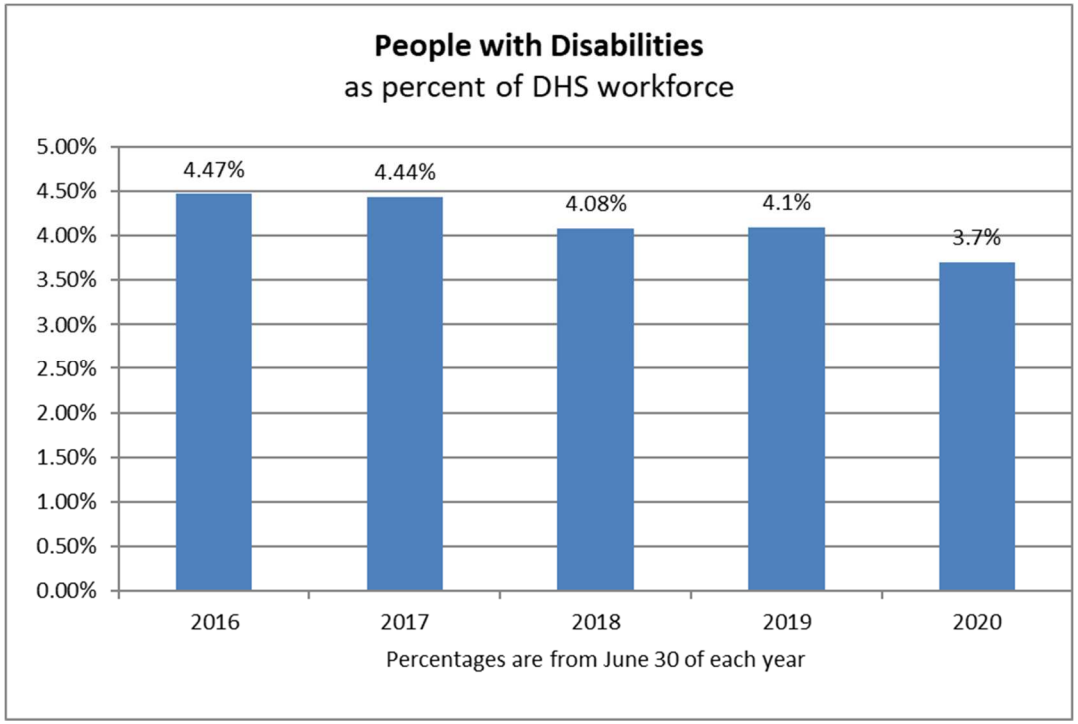
DHS takes responsibility for systemic change to advance Service Equity. One way by which this goal is achieved is through engaging communities. Strengthening relationships with community partners and advocates allows us to see and access our diverse populations through their lens. True partnership with our local communities means listening to the client voice with humility and respect while integrating it into agency decisions.



Progress Made or Lost

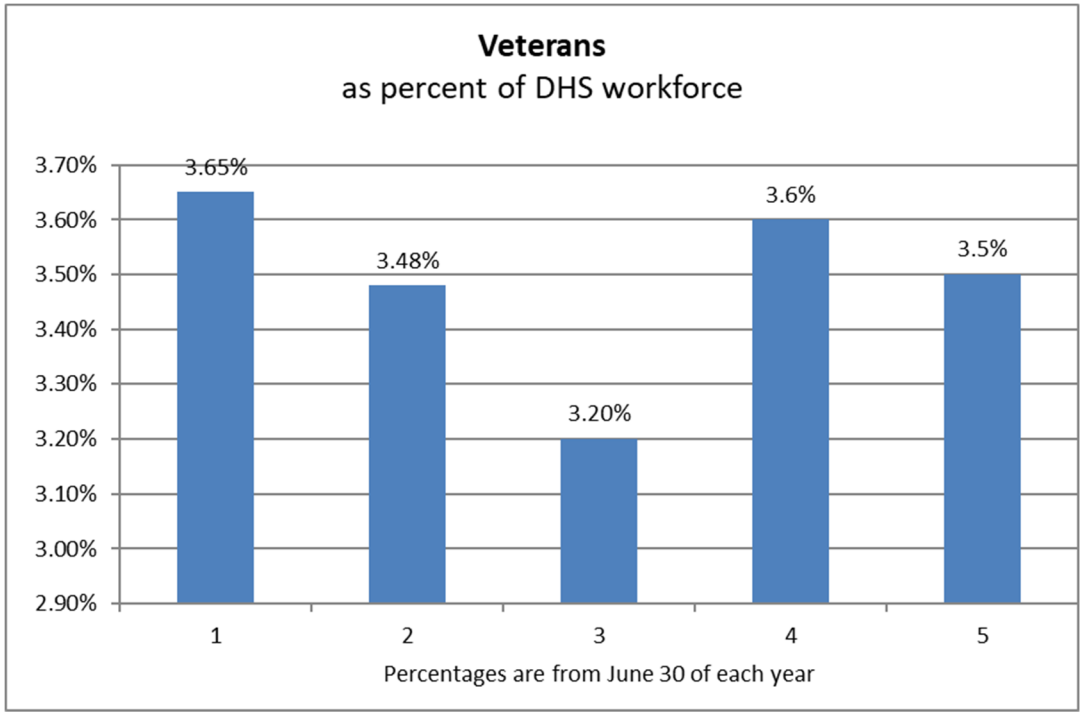
The following charts reflect the DHS actual FTE as of June 30, 2016, 2017, 2018, 2019 and 2020 as a comparison. These numbers show the percentage of People of Color, People with Disabilities, Veterans, and Women within the DHS workforce. No parity information has been used. The new system, Workday, uses different job categories than the previous system, so the State of Oregon is working on updating the parity figures used in the past, in order for all agencies to compare their workforce and protected class composition to that in the relevant available labor force.

People of Color



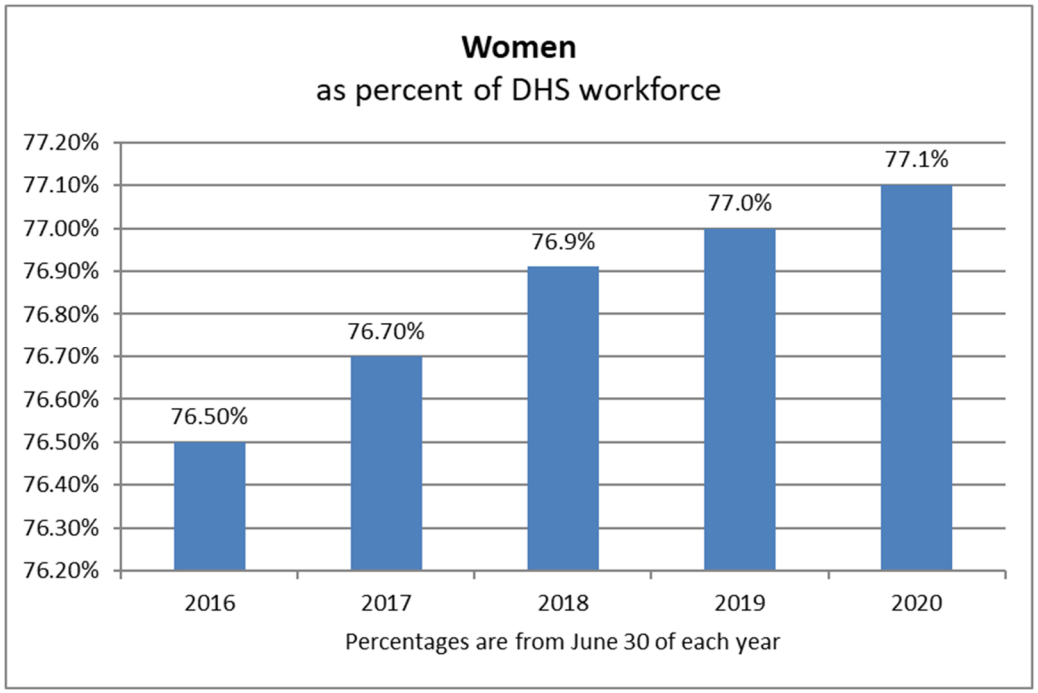
Between June 2016 and June 2020, the DHS workforce representation of people of color was between 23.5 and 30.5 percent. DHS continues to conduct targeted recruiting efforts, as well as outreach and training on diversity topics. The agency works with and builds relationships with many other diverse organizations. The agency's goal is to continue to move toward diversifying our workforce to be a representation of the population we serve.

DHS is continuing to focus on increasing and retaining the representation of people of color in all salary ranges, but especially in salary range 24 and above. New employees sometimes do not disclose their race and those totals are not included in the table below. (In 2019, 2.01 percent did not report, or left the information blank; in 2020, 2.24 percent did not report or left the information blank). A plan is being developed to work with managers to ask new employees for this information so a more accurate reflection of people of color is achieved.



People with Disabilities

Disclosure of disabilities is voluntary for employees, so the data is historically underreported. The reported percentage is 3.7% as of June 30, 2020, and the agency will continue to strengthen its outreach efforts and asking employees to disclose disability to more accurately report this population at DHS.



Veterans

With the implementation of Workday in mid-2019, more accurate numbers may be reported for Veteran's data. Some veterans do not wish to use Veteran's preference during the recruitment process and if they do not update their personal information in Workday when they are hired, their veteran's status is not correct.

Women

DHS has historically had representation of women in most job categories well above 50 percent, for June 30, 2020 it is 77.1 percent.

July 1, 2021, to June 30, 2023

Strategies for the DHS Affirmative Action Plan

The DHS vision “safety, health and independence for all Oregonians” is why we continue to pursue goals that help us increase our representation of people of color, people with disabilities, veterans, and women within the DHS workforce.

With constantly changing economic conditions, DHS must develop new and creative ways to attract, retain and develop talent, and create a more inclusive environment. New goals and strategies are being developed for the 2021 – 2023 Affirmative Action Plan. Below are just some of the strategies that will be used to continue the efforts and successes made in the past.

- Focus on retaining employees and creating an environment that is inclusive, accepting, and respectful of differences, including ethnic, cultural, generational and life experience. The RISE program using the six elements, and work and activities with ERGs will be instrumental in changing the culture.
- Work with managers to ensure all employees report racial designation and veteran status. Employees will also be encouraged to self-disclose disability in order to more accurately reflect this population at DHS.
- Strengthen on-boarding procedures at DHS and include diversity, equity and inclusion information, RISE program information and resources and ERGs that are available to employees.
- Continue training managers on strong recruiting and interviewing practices to ensure equity and inclusion in hiring.
- Continue to introduce DHS divisions and the important work they do to diverse organizations and provide their membership with information about employment opportunities and job search assistance, including application material review, informational and mock interviews, and information about the state’s online application process in Workday.

Overall, the emphasis for the Department of Human Services is to achieve a more culturally competent workforce and welcoming environment to increase our retention of employees of color, veterans, people with disabilities and women. Achieving these things helps us achieve our mission “to help Oregonians in their own communities achieve well-being and independence through opportunities that protect, empower, respect choice and preserve dignity.

Oregon Health Authority

AUDIT RESPONSE REPORT

1. DHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2016, audit #2017-08 (dated March 2017)

- Recommend management review the coding that points transactions to rebates and recoveries and other revenues to ensure proper classification of these transactions.

  The agency has updated its year-end close procedure to ensure the Rebate & Recovery revenue is appropriately coded for proper classification. The close procedure now includes a review of Other Revenue account transactions.

- Recommend authority management strengthen its methodology to ensure a more accurate estimate of the collectability of drug rebates for the current period.

  The Office of Financial Services is using a new set of reports that we believe will provide more accurate information than the ones used in prior years. Our procedures have been updated for these new reports.

- Recommend department management ensure the proper application of established accrual methodologies and that accrual efforts are not resulting in duplicate expenditures or revenues.

  The agency updated its close procedures to include additional reviews in an effort to avoid duplication of estimated accrual amounts.

- Recommend management strengthen controls to verify applications exist upon client eligibility redeterminations, perform eligibility redeterminations timely, identify any other clients that may have been impacted due to the override of system controls, and reimburse the program for unallowable costs.

  The department is committed to providing timely benefits to only those individuals who are appropriately determined eligible. The department has taken positive steps since the fall of 2016 to improve its business reporting capabilities for tracking and remediating untimely Medicaid redeterminations. The department expects that the technological advancements and improved functionality of the new Integrated Eligibility (IE) system will provide greater operational opportunities to strengthen its client eligibility controls specifically related to the timeliness of determinations, correct enrollment and the electronic retention of required eligibility data elements such as signed applications. In addition, the department is engaged in efforts to restructure existing caseworker training to support and align with the new Integrated Eligibility system, which will reduce the risk of administrative errors.

  All unallowed costs have been repaid.

- Recommend management strengthen controls to ensure database searches are documented and enrollment agreements are maintained. For the specific items noted above, we recommend the authority obtain updated provider agreement forms and document that database checks were completed.

  In 2018, the state required ownership disclosure and enrollment agreements for organizations during revalidation. In 2019, the state required all providers to submit enrollment agreements at enrollment, reactivation and revalidation. The state conducted quarterly database reviews to ensure all providers were appropriately screened and reviewed a technical solution to ensure database checks were completed. The Provider Enrollment manager has produced guidance for the enrollment staff defining the moderate and high-risk provider types and responsibilities for each. The state will continue to run quarterly reports to ensure high-risk providers are identified and appropriately screen following each quarterly report.

- Recommend management finalize its plan for other Medicaid systems and then perform risk analyses and security reviews of those system in accordance with the plan.

  The Information Security & Privacy Office (ISPO) has embarked on a multi-tiered process that will result in an information security plan for the Department of Human Services (DHS) and the Oregon Health Authority (OHA). In alignment with the state's Enterprise Security Office, ISPO is using the Center for Internet Security's (CIS) Top 20 Critical Security Controls as our roadmap to identify and mitigate risks and compliance findings.

  We are using Tenable Nessus to perform vulnerability assessments of our enterprise to identify vulnerabilities and develop an asset inventory. The vulnerability management process, including regularly scheduled scanning and patching, has been implemented. The asset inventory will inform the information security plan.
  We have developed our information security risk assessment policy and process and have initiated an aggressive risk assessment schedule. Seven risk assessments have been accomplished in 2017 and more are scheduled. The risks (vulnerabilities and threats) and gaps identified from these assessments will inform the information security plan.

  The aforementioned are the CIS Critical Security Controls prerequisites for accomplishing an information security plan. ISPO recruited a Senior Information Security Advisor in May 2017 and have assigned the information security plan to him to complete no later than December 2017.

  The Information Security and Privacy Office (ISPO) is continuing to develop a plan to implement a framework for conducting the required security assessments on the Automatic Data Processing (ADP) systems which support the Medicaid program in Oregon. Vulnerability assessment scans of the MMIS system software are now performed monthly or whenever major changes are made to the system.

  A Vulnerability Management policy has been developed, approved and was published in September 2017. In support of this policy, ISPO already began scanning in excess of 15,000 devices utilizing the state's vulnerability assessment solution,

Tenable Security Center (TSC). ISPO is concurrently working with OSCIO to determine how TSC will access and scans the remaining Medicaid systems residing on the mainframe.
The Information Security & Privacy Office (ISPO) is in the process of developing a risk analysis process that will establish the roles and responsibilities of the different parties for contracting all required types of independent assessments, as required by Federal Regulations.

Revisions to parent policy DHS/OHA 090-006 Risk Assessment to be submitted for review to Office of Information Services (OIS) Policy, Standards and Processes (PSP) Committee by September 1, 2017. Revisions to widen the scope to encompass all security assessments required by 45 CFR 95.621 (iii) Periodic risk analyses and (3) ADP System Security Reviews. Policy revisions and process will be based on CMS Risk Management Handbook (RMH) Chapter 12: Security and Privacy Planning, Version 1.0, January 31, 2017; Appendix E. ARS Standards – Planning (PL); Control PL-01.

The ISPO Risk Assessment Analyst is a member of a chartered advisory group within the Enterprise Security Office which acts in an advisory capacity to the ESO Risk Program Committee. In the course of that work, tools are under development to ensure that risk mitigation plans are established with state agencies. These tools will be leveraged to develop the "Risk Triage" process to establish and implement a plan of action, "Develop a Plan of Action (POA)" (see Attachment A). The Risk Triage process will be a sub-process of the DRAFT ISPO Independent Security Risk Assessment (ISRA) Process and will be submitted to the PSP Committee by September 1, 2017 with the policy revisions and parent process. The ISPO Risk Assessment Analyst meets on a monthly basis with OIS ISPO Audit Coordinator to coordinate risk mitigation efforts throughout DHS/OHA.

The OR-Kids system underwent an independent security risk assessment from March 2017 to May 2017. Tests included:

- *Information Security Web Application Penetration Test*
- *Application and Server Infrastructure Penetration Test Internal Technical Test (workstations)*
- *NIST Cybersecurity Framework Assessment*
- *OWASP Secure Coding Practices Assessment*

The final report was received at the end of June 2017. Agreement has been reached between ISPO and the Director of Development Disability Services to commence with an independent security risk assessment of the eXPRS system in the third quarter of 2017.

- Recommend department management strengthen its controls over the reviews of monthly employee cell phone invoices.

  In March of 2017, The Office of Information Services (OIS) Collaborative Communications generated a communication to all coordinators to remind them of their responsibility to review/acknowledge the monthly billing data and that their acknowledgement is recorded and audited.

  Further, OIS Collaborative Communications has developed a process and automated email notification system to alert the coordinator(s) and the manager if the monthly review is not completed timely. The first distribution of this message was sent out automatically beginning on June 28, 2017 to all MCD Coordinators that have un-acknowledged billing records. This notice will continue monthly.

- Recommend department management strengthen its controls over the reviews of monthly employee timesheets and cell phone invoices.

  Corrective action for the above findings has been broken down into four steps:

  - *Ensuring proper training of current staff members in the use of work charge codes.*
  - *Ensuring the work charge code training is a part of our onboarding process to ensure that all new employees are trained going forward.*
  - *Establish a process for signing and archiving timesheets that were not approved in the ePayroll system.*
  - *Return of unallowable funds to federal partners related to misuse of work charge codes.*

Training for the use of work charge codes was provided on two separate occasions to staff members in the Health Policy and Analytics division. Those trainings occurred in January of 2017. The participants included all staff members and managers whose positions and workload require the use of work charge codes. Training for the use of work charge codes by future employees and managers will be ensured by the onboarding process. This is now a documented step in the permanent process used for all employees.

The Payroll department now sends an automated reminder to all managers who have not approved timesheets for their employees. In addition, it has now been written into the duties of the staffing manager in HPA to review monthly the timesheets for approval. Any that have not been approved will be delivered to the owning manager for physical written signature. These signed timesheets will be archived on site in a locked filing cabinet.

Adjustments to federal expenditures of $12,530 were made to address the questioned costs.

- Recommend management review expenditures to ensure sub-awards were used for authorized purposes.

In April 2018, the division initiated desk reviews of ACA expenditures within the three counties that received these funds. These reviews aimed to achieve the following objectives:

- *Ensure the subrecipient obligated, expended, and used grant funds in accordance with the rules and terms of the agreement.*
- *Verify that grant expenditures were properly authorized and supported by the subrecipient's source documentation and that costs were allowable and allocable to the grant program.*
- *Validate the subrecipient's reporting of periodic income and expenses matched with their general ledger.*

These desk reviews were conducted by the Office of Financial Services between May and June. Two of the reports were finalized in July 2018, the third was finalized August 2018.

- Recommend department management strengthen controls to ensure verification of suspension and debarment is performed for all contracts, evidence is retained, and contracts are complete.

  The Office of Contracts & Procurement has implemented internal contract processing standards beginning November 1, 2016. These new standards require a two-pronged approach to verify whether vendors can receive federal funding. Beginning with support staff searching the System for Award Management (SAM) for each vendor to verify that the vendor is neither suspended nor debarred from receiving funds and then saving the findings in the central electronic contract folder. Further, contract staff, once they have taken assignment of the contract action, are required to verify that the reports are correct and proper and if not, run a new report and address concerns if evident.

- Recommend management develop a formal tracking mechanism to ensure all changes to the plans are tracked for the inclusion in future updates communicated to the federal oversight agency. We also recommend management strengthen controls to ensure the cost allocation process follows the plans submitted for approval and interim changes, and all costs entering the cost pools are reviewed for allowability.

  The agency currently submits the cost allocation plans on an annual basis to the federal DHHS Cost Allocation Services (CAS), formerly DCA. A formal change log was created in March of 2017 to ensure all updates are included in each subsequent submission. The most recent cost allocation plan was submitted on June 30, 2017.

2. OHA: Medicaid Management Information System (MMIS) /Oregon Eligibility System (ONE) Information Technology (IT) Review, audit #2017-09 (dated May 2017)

- Recommend management continue to develop strategies to evaluate and improve caseworker input accuracy. In particular, we recommend management consider implementing a review process for portions of input identified as having higher error rates and that negatively affect eligibility determination.

In early 2016, OHA took initial steps to develop a quality control (QC) process for data entry, which included a statistical sampling plan, data entry standards, auditing methods, quality metrics and data reporting. In mid-2017, DHS assumed the operational responsibility for the Oregon Health Plan eligibility processing and for the continuing development and deployment of the QC process.

DHS will expand this process beyond the main processing center and include SSP field offices. Because of this change of the scope, DHS/OHA will need to reassess the implementation progress in December 2018.

To address other factors that negatively affect eligibility determination, OHA generates a monthly MMIS validation report for all individuals who have crossed an age threshold without redetermination of eligibility in a defined period. DHS Operations meet on a bi-monthly basis with DHS and OHA subject matter experts to review accuracy and decide what corrective actions will be necessary.

- Recommend management develop procedures to monitor overrides to ensure they are performed only for approved reasons and that needed subsequent actions on these cases are timely.

  The use for the override function in the ONE System is necessary. DHS operations has documented the override procedures and trained staff for proper use of the override feature. DHS operations recognizes that there is risk of error. To mitigate this risk, DHS operations has assigned the PEMB and PEMD managers to manually monitor the override tasks to assure that these are being created for the appropriate reason and that follow up action is occurring timely.

- Recommend management ensure system documentation is available to facilitate a granular review of permissions granted for each role.

  In July 2017, OHA began review of all current MMIS roles and successfully completed an assessment of OHP eligibility processing staff. OHA will continue a broad assessment throughout OHA and DHS in 2018 and 2019. OHA will also

coordinate with DHS to update the names of current MMIS roles to better reflect their represented programs. This change will help managers better determine appropriate roles for the programs they administer.

Another part of this effort will be to revamp an intranet site on the HSD page that allows managers to see a more detailed definition of roles, along with screen shots showing the panels and fields that a worker can see or update in MMIS. This work also involves changing the naming conventions of the roles to more logically call out who should have that role.

- Recommend management perform effective periodic reviews of access granted to their personnel.

OHA has been meeting with managers to conduct an annual review of the MMIS roles of those they manage. This work continues and the initial run at these annual reviews will take some time, but once completed for the first time, the process should move more quickly in the future.

There has been a concerted effort in cooperation with the OIS Service Desk management, the Internet Security & Privacy Office (ISPO) to address this area. OHA has worked with their contractor over the past two years to develop and refine a new Active Directory Web-based MMIS Security Tool. The new Web AD Tool will allow site administrators to run reports on user interaction with the MMIS. Once the reporting features are fully developed in the new Web AD Tool, we will be able to more easily conduct annual reviews with managers around worker access roles in MMIS.

3. OHA: Improve Efforts to Detect and Prevent Improper Medicaid Payments, audit #2017-25 (dated November 2017)

- Develop a comprehensive inventory of MMIS system controls and proactively test the effectiveness and completeness of those controls.

OHA signed a two-year contract to test the top 20% financial claims edits and audits in MMIS each year. The contractor will produce quarterly results that show the testing that has been done. A monitoring plan has been put in place to monitor a

sample of the remaining 80% of edits and audits each quarter. There is a new process for putting new claims edits and audits in MMIS to ensure they are thoroughly tested before being put into the MMIS production environment. In addition, no change can go into MMIS without three signatures and all documents are stored in both written and electronic form.

- Adopt leading practices highlighted in the report, such as setting clear standards for acceptable program integrity efforts and including clear expectations in CCO contracts about when a sanction will occur and the automatic penalty that will be imposed for non-compliance.

  OHA has updated Coordinated Care Organizations (CCO) contracts with more clarity around program integrity requirements. The CCO 2.0 contract has robust sanction and program integrity sections each clearly outlining compliance expectations and automatic penalties for non-compliance. Furthermore, OHA has developed mandatory joint Program Integrity and Medicaid Fraud Control Unit education and training.

- Increase oversight of CCO program integrity efforts, such as approving CCO's fraud, waste, and abuse policies and reviewing how CCO's prevent, detect, and recover improper payments.

  Annually, the Office of Program Integrity (OPI) reviews and comments on the CCO Fraud, Waste and Abuse Policies and Procedures, and the CCO Compliance Plans. OPI staff was heavily invested in the writing of program integrity, compliance and sanction sections of the CCO contract 2.0. OPI continues investment in the subsequent reviews and contract maturation process. OPI is auditing network providers and recoveries, providing training on program integrity topics to CCO's upon their request, and has hired a GA 3 financial auditor for CCO and other financial-based audits.

- Develop robust efforts to validate the accuracy and completeness of encounter data, which may include hiring an External Quality Reviewer or developing internal monitoring efforts by the Office of Program Integrity.

  OHA has contracted with an External Quality Reviewer to validate encounter data and to evaluate access, timeliness, and quality of care provided by CCOs. CCO contracts include responsibilities to demonstrate accuracy, completeness, and

truthfulness of information through encounter data certification and validation. OHA also intends to conduct periodic encounter data validation studies. Although some efforts have been made to ensure that the data used to set CCO rates is complete and accurate, additional controls are needed given that most Medicaid payments (approximately 75%) are issued through monthly rate payments to CCOs.

Auditors have been hired and audits of network provider medical chart notes is ongoing. Amendments to the program integrity and compliance sections of the managed care contract have been completed, with subsequent improvements being submitted by OPI. OPI hired a GA3 with a CPA to audit Exhibit L reported recoveries to further validate information impacting encounter data calculations.

- Review and clarify Oregon Administrative Rules so Medicaid providers can be held accountable for improper payments.

  Office of Program Integrity (OPI) hired the OPA-4 and is working through specific OAR's on a systematic basis. The OPA-4 will work with HSD and with CCOs to strengthen the program integrity and accountability constructs. This position will also review Medicaid administrative rules and work with stakeholders to update them for clarity and to enhance program integrity.

- Work with U.S. Treasury Do Not Pay center on utilizing free, sophisticated data mining techniques and explore other internal opportunities for data matching.

  The Office of Program Integrity and the Office of Payment Accuracy and Recovery have completed the review of the "Do Not Pay" center information. The Office of Program Integrity has engaged in additional discussions with the U.S. Treasury, and are considering the opportunities to utilize the program. In January 2018, the U.S. Treasury received permission to work with Washington, Oregon and Tennessee.

- Work with CMS to explore pilot incentive programs to increase efforts to prevent, detect, and recover improper payments.

  Although the agency obtained Medicare data, management believe that no opportunities existed for pilot incentive programs when the agency explored opportunities with CMS staff.

- Ensure there is an annual reconciliation process for all individuals in the agency's various computer systems to verify their eligibility is appropriately re-determined.

  The agency has developed a monthly reconciliation process to identify individuals who need their eligibility re-determined.

4. DHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2017, audit #2018-11 (dated April 2018)

- Recommend management ensure the transaction review process includes examination of proper coding and accounting periods.

  The procedures that affected the fiscal year 2018 audit were updated and no additional errors were present in the fiscal year 2019 audit.

- Recommend department management review OR-Kids transaction processing and make system modifications as appropriate to ensure proper financial reporting of program expenditures. We also recommend department management review prior year and current year transactions and reimburse the federal agency for grant expenditures claimed inappropriately.

This audit finding was partially mitigated by OR-Kids JIRA# 25911 – as the system not allowing placement corrections on service types with age bracketed services. This system correction will now calculate the Placement Begin Date against the participant's DOB, allowing retroactive placement corrections for all age bracketed service types.

A report has been developed to identify adjustments that impact a state grant rather than the federal grant and is in the final validation stage. Once the report is validated, the report will be used to accurately report federal expenditures. The new report will be used for the reporting period ending June 30, 2020.

- *Questioned costs in this finding were repaid for both IV-E and Medicaid and reported March 31, 2019 as follows:*
- *IV-E amount of $92,487 was adjusted on the March 31, 2019 CB-496.*
- *Medicaid questioned costs were adjusted on the March 31, 2019 CMS-64 report in the amount of $45,339.*

- Recommend management strengthen controls to verify applications exist during client eligibility redeterminations, perform timely eligibility redeterminations and verification of client resources, close benefits for clients no longer eligible, and ensure eligible clients are enrolled in both Medicare and Medicaid. We also recommend management correct all identified issues and reimburse the federal agency for unallowable costs.

  The department has taken positive steps since the fall of 2016 to improve its business reporting capabilities for tracking and remediating untimely Medicaid redeterminations. The department expects that the technological advancements and improved functionality of the new Integrated Eligibility (IE) system will provide greater operational opportunities to strengthen its client eligibility controls specifically related to the timeliness of determinations, correct enrollment and the electronic retention of required eligibility data elements such as signed applications. In addition, the department is engaged in efforts to restructure existing caseworker training to support and align with the new Integrated Eligibility system, which will reduce the risk of administrative errors. Similarly, the department expects that the statewide implementation of the Centers for Medicare & Medicaid Services (CMS) approved electronic Asset Verification System (AVS) will provide client resource information in a more timely, robust and comprehensive manner. All unallowed costs have been repaid.

- Recommend management strengthen controls to ensure documentation supporting a provider's eligibility determination is retained. For current providers with missing documentation, we recommend the department verify they are eligible to provide services and obtain the necessary documentation.

  The Office of Developmental Disability Services (ODDS) finalized the process of amending the contract with PPL, the Fiscal Intermediary, to validate the I9's prior to paying providers. In addition, questioned cost of $5,573 has been reimbursed as of September 30, 2018.

  The Provider Enrollment unit has implemented the quarterly data pull for missed checks. Initially how the data was pulled from MMIS and the content of the data caused delays due to the volume and sorting through the provider file. Those issues are being worked through and as additional reports are pulled the process will become more streamlined. The next data pull is on track and scheduled for July 2019.

  For the one provider that was the responsibility of the Aging and People with Disabilities program (APD), the Department obtained a current completed I-9 form and confirmed the provider's eligibility; therefore, there are no questionable costs remaining for the APD program.

5. OHA: Constraints on Oregon's Prescription Drug Monitoring Program Limit the State's Ability to Help Address Opioid Misuse and Abuse, audit #2018-40 (dated December 2018)

- Maintain an ongoing partnership with health licensing boards to target outreach efforts to get all required prescribers registered with the PDMP.

  OHA has an established relationship with licensing boards and has collaborated to increase enrollment. Since there will always be new licensees moving into the state or obtaining a first-time license this collaboration will be on-going with annual lists being provided to licensing boards to allow for targeted outreach.

- Provide guidance, including examples, to prescribers on ways to integrate accessing the PDMP database into their daily workflow.

    1. *OHA will review and update the PDMP website to ensure the broadest possible reach of these resources. In process, to be completed by June 1, 2019.*

       <u>Clinical tools available to educate and support prescriber workflows for integrated PDMP:</u>
       Oregon Public Health Prescription Drug Monitoring Program (PDMP) is committed to providing the right guidance and tools to support prescribers. Opioid Prescribing Guidelines Taskforce members, in collaboration with the Public Health PDMP, developed opioid prescribing guideline implementation tools in 2017, which include: example work flows, a PDMP electronic health record integration guide, a quality improvement reporting guide, a PDMP training video, and guidance on medical director access to the PDMP.

       Materials are available on the Oregon Pain Guidance website at https://www.oregonpainguidance.org, which currently receives more than 30,000 unique visitors per month. These materials are being made available on the PDMP page as of June 1, 2019. The PDMP program website (currently orpdmp.com) is migrating to a new platform to increase visibility and transparency. These tools will be part of the new PDMP page when live.

    2. *OHA will continue its collaboration with the Oregon Medical Board and the Pain Management Improvement Team to identify and support clinics in need of assistance with PDMP/electronic health record integration.*
       <u>Training and technical assistance on PDMP use in clinical workflows</u>:
       The Public Health Division's Prescription Drug Overdose prevention project supports training and in-person assistance on PDMP clinical use and workflows through contracts with members of the Pain Management Improvement Team. This team is an expert interdisciplinary group of Oregon clinicians that assists health systems and clinics to improve opioid prescribing and treatment of pain and substance use disorder. Clinics in need of assistance are identified in collaboration with the Oregon Medical Board. Prescribers, through this opportunity, learn how to integrate into their workflows

PDMP access and use. This work has been nationally recognized as a model for a team-based primary care approach to address the opioid epidemic.

3. *In response to this recommendation, this (PDMP Integration initiative) work will continue. Statewide PDMP Integration Initiative:*

   The PDMP Integration initiative enables prescriber and pharmacist to integrate health IT systems with the PDMP for improved access to the data at the point of care. This initiative launched in August 2018 by the Oregon Health Leadership Council, OHA, and other stakeholders under a public/private partnership called the HIT Commons. It aligns with broader state and federal efforts to increase the use of PDMPs to reduce inappropriate prescriptions, improve patient outcomes, and promote more informed prescribing practices. The initiative provides guidance on how prescribers can integrate PDMP into their health IT to enable one-click or instant access to the data within their workflow. As of March 30, 2019:

   - *100 entities, representing 6,040 prescribers, are LIVE with PDMP integrated in their electronic health record (EHR), Emergency Department Information Exchange (EDie), or health information exchange (HIE);*
   - *3 pharmacy chains (570 pharmacists) are LIVE with PDMP integrated into their pharmacy management systems;*
   - *19 entities, representing 6,727 prescribers are scheduling go-live dates; and*
   - *93 entities, representing 2,930 providers, have started applications.*

- Verify practitioner specialty information with the respective health licensing board and update the PDMP database with this information.

  In October 2018, the PDMP team pulled a comprehensive list of all PDMP profiles with missing prescriber specialty. The list was then organized by licensing board and divided among 5 PDMP staff to manually look up each licensee on their respective licensing board databases and obtain missing information.

Between November 1, 2018 and December 31, 2018, the PDMP team added specialty of practice to all PDMP user profiles. Totaling approximately 1,350 updates. A final review was performed on January 3, 2019 to ensure no profiles were overlooked; after which this project was closed.

Specialty of practice is now listed for every PDMP profile and since the new PDMP platform requires that it be entered when creating an account, it is captured for all new users.

- Develop a process for, and facilitate the sharing of, data between PDMP and Medicaid to help ensure completeness of PDMP prescription history and to allow Medicaid to better monitor the prescription behavior of its clients.

  Provide best practices to legislators when requested to justify or deny sharing data between the PDMP and Medicaid for quality assurance and benefit of clients.

  The Oregon Health Authority leadership and Oregon Health Authority policy advisors have developed a close working relationship with the Oregon legislature and the many stakeholders invested in Oregon's response to the opioid epidemic. If requested the Oregon Health Authority is prepared to provide information and evidence to the legislature to support altering the Oregon law to allow Medicaid access to PDMP data.

- Identify and propose drugs of concern, such as gabapentin, to the Board of Pharmacy and Legislature that should be added to the state's-controlled substance schedule and collected by the PDMP.

  In the 2019 legislative session, OHA supported and collaborated on multiple legislative changes allowing for new drugs to be collected in the PDMP.

  House bill 2257 is supported by OHA and would require gabapentin to be collected and displayed in the PDMP. OHA has collaborated to modify Senate bill 910 to include provisions that would allow OHA to determine which drugs to collect in the PDMP by administrative rule rather than through statute.

OHA has facilitated and participated on the Governor's Opioid Epidemic Task Force since 2017. The Task Force consists of medical experts, drug treatment specialists, and government officials. Their mission is to identify and implement efforts to address the growing opioid misuse and abuse across the state. This task force was instrumental in prioritizing legislative changes to effectively combat the epidemic, House Bill 2257 contains its recommended changes.

OHA is actively utilizing the appropriate channels to makes legislative changes to combat the opioid epidemic and recommend additional drugs be collected in the PDMP.

- Work with the PDMP vendor and the Board of Pharmacy to make sure prescriptions made by X-waivered prescribers are included in the PDMP database.

  In December 2018, PDMP staff worked with SAMHSA and obtained a list of Oregon providers with x-DEA numbers. This list is not guaranteed to be comprehensive but did allow PDMP staff to update 800 provider PDMP profiles. SAMHSA will provide Oregon with supplementary lists periodically to allow PDMP staff to update profiles. The first of these supplementary lists was received in April 2019.

  Between December 2018 and April 2019, PDMP compliance staff reviewed data submitted by pharmacies where an x-DEA was listed to proactively identify discrepancies between pharmacy submitted X-DEA numbers and X-DEA numbers listed in PDMP user profiles. This allowed PDMP staff to identify providers not listed in the SAMHSA provided list and add X-DEA numbers to an additional 400 providers. PDMP staff will routinely use pharmacy data to identify X-DEA numbers and add them to PDMP profiles on an ongoing basis.

  Between December 2018 and April 2019 PDMP staff added approximately 1200 X-DEA numbers to user profiles. Identifying X-DEA numbers not captured in the SAMHSA lists will be an on-going project for PDMP staff to ensure providers are able to see all of the prescriptions written under their DEA and X-DEA numbers.

- Expand statutes to allow the PDMP to conduct and share analyses on prescription data, including:
    - analyzing prescriber, pharmacy, and patient prescription practices;
    - making prescriber report cards available; and
    - preparing and issuing unsolicited reports to licensing boards and law enforcement

  OHA has provided best practices to legislators when requested to justify or deny preparing and issuing unsolicited reports to licensing boards and law enforcement.

  HB 4143 passed during the 2019 legislative session allowing for the PDMP Advisory Commission Subcommittee to evaluate Oregon providers prescribing history and determine who ought to receive a prescribing report card. Report cards were available to prescribers 2nd quarter 2020.

  Providing unsolicited reports to licensing boards and law enforcement is not allowed under the Oregon statute governing use of PDMP data. The Oregon Health Authority leadership and Oregon Health Authority policy advisors have developed a close working relationship with the Oregon legislature and the many stakeholders invested in Oregon's response to the opioid epidemic. If requested, the Oregon Health Authority is prepared to provide information and evidence to the legislature to support altering the Oregon law to allow these groups access.

- Seek legislative action to address the issue of prescribers not registering with the PDMP as required and pharmacies not submitting corrected data within statutory requirements.

  OHA will provide best practices to legislators when requested to justify or deny stronger enforcement of mandate to register with the PDMP.

The Oregon Health Authority leadership and Oregon Health Authority policy advisors have developed a close working relationship with the Oregon legislature and the healthcare licensing boards. The OHA is invested in improving compliance with the existing statute requiring licensees to register with the PDMP and requiring pharmacies to submit corrected data. If requested the Oregon Health Authority is prepared to provide information and evidence to the legislature to support altering the Oregon law to improve enforcement.

- Provide further authority to the Clinical Review Subcommittee to require the justification of practices deemed concerning and allow the collaboration with licensing boards and law enforcement for concerning practices.

  The Oregon Health Authority leadership and Oregon Health Authority policy advisors have developed a close working relationship with the Oregon legislature and the many stakeholders invested in Oregon's response to the opioid epidemic. If requested, the Oregon Health Authority is prepared to provide information and evidence to the legislature to support strengthening the authority of the subcommittee.

- Expand authority for other professional and state entities authorized access to PDMP information.

  The Oregon Health Authority leadership and Oregon Health Authority policy advisors have developed a close working relationship with the Oregon legislature and the many stakeholders invested in Oregon's response to the opioid epidemic. If requested the Oregon Health Authority is prepared to provide information and evidence to the legislature to support altering the Oregon law to allow expanding access to addition professional and state entities.

- Require and set parameters for when prescribers must query the PDMP database to review a patient's prescription history. This should include, at a minimum, requiring the querying of the PDMP database prior to prescribing controlled substances and substances of concern, and for dispensers to query the database prior to issuing a medication and periodically while the patient is taking those medications.

  The Oregon Health Authority leadership and Oregon Health Authority policy advisors have developed a close working relationship with the Oregon legislature and the many stakeholders invested in Oregon's response to the opioid epidemic. If

requested the Oregon Health Authority is prepared to provide information and evidence to the legislature to support altering the Oregon law to require mandatory use of the PDMP under certain circumstances.

- Allow for additional information to be collected by the PDMP. This should include:
  - prescriptions for Schedule V controlled substances and other drugs of concern;
  - applicable prescriptions from other types of pharmacies, not solely retail pharmacies;
  - applicable prescriptions prescribed by veterinarians;
  - method of payment used to pay for the prescription;
  - patients who are restricted or have a "lock-in" to a single prescriber and a single pharmacy for obtaining controlled substances; and diagnosis code related to the prescription

OHA provided best practices to legislators when requested to justify or deny altering the statute governing the PDMP to allow for the above practices to be implemented.

HB 4143 passed during the 2019 legislative session requiring the pharmacy to report diagnosis code to the PDMP when provided, this began January 1st, 2020.

The Oregon Health Authority leadership and Oregon Health Authority policy advisors have developed a close working relationship with the Oregon legislature and the many stakeholders invested in Oregon's response to the opioid epidemic. If requested, the Oregon Health Authority is prepared to provide information and evidence to the legislature to support altering the Oregon law to require reporting of schedule V drugs, collection of prescriptions from other types of pharmacies, collections or veterinarian prescriptions, and collection of method of payment and lock-in contracts in the PDMP.

6. Oregon's Framework for Regulating Marijuana Should be Strengthened to Better Mitigate Diversion Risk and Improve Laboratory Testing, Audit #2019-04 (dated January 2019)

- (OHA-OMMP) Recommend OHA enforce existing data reporting requirements for medical marijuana growers.

  Enforcement of non-reporting for those using OMMOS began with the program issuing a bulletin on 4/2/2019 to all interested parties advising of the upcoming enforcement actions. Targeted warning notices were then sent on 4/15/2019 to growers who were in violation for not reporting. The warning provided them 15 days to login and comply with reporting requirements or they could make changes to their registration and not be required to report. On 6/4/2019 the program began to issue notices of intent to impose civil penalties. The program started to enter into settlement agreements with some growers, others requested hearings, some did not reply. By 6/24/2019 the program issued final orders imposing $200 civil penalties. Those who did not respond or pay the penalty were referred to Accounts Receivable and can be referred to Department of Revenue for collection if Accounts Receivable does not receive payment. This is now an ongoing process and procedures where notices are issued regularly, civil penalties are issued, revocations issued for non-compliance, the program enters and tracks settlement agreements, and works with Department of Justice on contested case hearings and appeals.

- (OHA-OMMP) Recommend OHA establish inspection frequency goals and metrics and determine how many inspectors are needed to meet those goals.

  There were no changes made to the program's position authority from Oregon Legislature during the 2019 session. The Compliance Unit continues to be short staffed to handle a significant and time-consuming workload. Currently, the unit has four permanent Compliance Specialist 3's (CS3) and one limited duration CS3. One of the four has been on a job rotation, and the employee in a limited-duration position is leaving the program in July. This will leave only three to manage the workload. The Compliance Unit also has a limited duration Compliance Manager position and limited duration Compliance Specialist 1 position that terminated on June 30, 2019 but have both been extended until the end of 2019 due to the workload.

  The work of the Compliance Specialist 3's consists of conducting inspections of grow sites, dispensaries, and processing sites, completing post inspection reports, investigating complaints, and issuing enforcement actions from OLCC medical

marijuana grow site inspections. This work takes time and requires a lot of travel, follow up with OMMP registrants, OLCC, DOJ, and writing various enforcement actions and civil penalties.

The program is working on completing a monthly report to measure our success. There have been substantial barriers in creating this report as information is stored in various locations and excel sheets. The program is working with OIS to revise our current database to help track inspections and enforcement actions. Initial indications show that the Compliance Unit is not meeting the goal of four grow site inspections a week per position. Without more positions, the program will continue to be challenged in meeting this goal. Management will continue to work with and coach staff, to improve the reporting features to have easily reliable data and continue to coordinate inspections and process improvements with OLCC.

- Under the guidance of the Governor's office and the Legislature, review the level of authority OMMP needs to improve its regulatory framework for security, product tracking, and bolster resources for inspections, or consider placing the medical marijuana compliance program within the existing OLCC authority and control framework. #7

  There were no changes made to OMMP's authority regarding regulatory framework during the 2019 Oregon legislative session.

- Recommend OHA Evaluate the reasons behind high inspection staff turnover and implement management strategies to reduce turnover.

  The program had Cascade Center interview all employees in the Compliance Unit, as well as the Manager and Section Manager. It was recommended to hold a burnout training for staff which was conducted in November of 2018. Coaching session was provided to the manager in November and October of 2018.

- Recommend OHA perform a thorough study on the potential impacts and presence of microbiological and heavy metal contaminants in marijuana products to make an informed decision on adding them to testing requirements, potentially in consultation with a reference lab.

While OHA agrees with this recommendation, there are currently no resources to conduct such a study. Resources would need to be allocated for this study to occur. In the absence of dedicated resources to conduct a thorough study, OHA will reach out to other states with legalized marijuana to request their data related to testing for specific microbiological and heavy metal contaminants. OHA can also convene a rules advisory committee to seek guidance on testing for microbiological and heavy metal contaminants in marijuana products.

- If microbiological and heavy metal testing are added to testing requirements, work with testing labs and LAP to accredit labs for microbiological and heavy metal testing.

  Depending on the study and the findings received on the potential impacts and presence of microbiological and heavy metal contaminants in marijuana products, OHA will work with ORELAP, and testing labs to accredit them for these additional tests in the same manner as done for pesticides, solvents and potency.

- Recommend OHA, in consultation with the Legislature, review options for medical marijuana testing and take action to better ensure product safety for medical marijuana patients. Potential actions could include:

  a. Implementing a public health campaign with assistance from other state agencies to educate medical growers and patients on ways to avoid, reduce, or eliminate marijuana product contamination;

  b. Requiring testing for all medical marijuana to ensure it is free of contaminants that may impact patient health.

  There was no input or discussion on this recommendation during the 2019 Oregon Legislative session. Funds and resources continue to be a barrier to implement this recommendation. OHA will continue to wait for direction from the Oregon Legislature regarding this recommendation and will support decision making with data and evidence-based practice.

- Consider developing a reference lab focused on standards and methodology setting, additional compliance testing and random testing of marijuana products, and assessing the overall risk of marijuana product contamination. #12

During the 2019 legislative session, the A-Engrossed version of House Bill 2098 included a State Cannabis Reference Lab, but that section was removed with the senate amendments. The bill did pass which directs OLCC to establish an advisory committee to advise OLCC, OHA, and ODA on establishing and maintaining standards for testing the potency of marijuana and marijuana items. Members of OHA will be on this advisory committee. This bill becomes operative January 1, 2020.

- In consultation with OLCC, perform random compliance testing, or shelf audits, to independently validate test results and assure product safety.

  There was no input or discussion on this recommendation during the 2019 Oregon Legislative session. Funds and resources continue to be a barrier to implement this recommendation. OHA will continue to wait for direction from the Oregon legislature regarding this recommendation and will support decision making with data and evidence-based practice.

- Continue transitioning alternate matrix solvent proficiency tests in Oregon to real matrix solvent proficiency tests.

  This requirement has been fulfilled as of March 11, 2019. As part of PT Provider Phenova's contract agreement with ORELAP, the provider developed additional in-matrix samples to support the OHA lab accreditation program. The PT sample for residual solvents now uses Hemp Oil as the base matrix and contains Total Butanes and Propane. Additionally, PT samples in cannabis matrix are now available for microbiology analytes and metals.

- Complete all provisional accreditation assessments to ensure that sampling procedures taken by labs are appropriate.

  ORELAP completed the provisional accreditation assessments for sampling procedures on June 28, 2019. At this moment, only one laboratory out of the 21 Cannabis labs did not respond to ORELAP's call for the sampling onsite assessments and will be removed from the official ORELAP Cannabis list for this field of accreditation. ORELAP no longer offers provisional sampling accreditation.

- Streamline the proficiency test tracking process for marijuana labs.

ORELAP is working on this process in collaboration with the PT Provider and OHA IT specialists. ORELAP has developed a summary document to keep track of laboratory's participation in PT studies and PT performance. It is ORELAP's intent to transition the PT evaluation to ORELAP's database in order to streamline the proficiency test tracking process for cannabis labs. We are working closely with Phenova PT provider in order to receive PT final reports in a timely manner to ensure appropriate corrective actions are addressed in accordance with the TNI standards.

- Review its level of authority to address lab issues related to upholding accreditation standards to determine what level is needed, and work with the Legislature to make necessary adjustments.

  OHA awaits direction from the Oregon legislature regarding implementation of this recommendation. ORELAP will support the recommendation with time capture data staff is currently compiling for evidence-based practice.

- Work with OLCC and the Legislature to ensure appropriate and sufficient staff coverage to better monitor lab practices and review test result data.

  OHA awaits direction from the Oregon legislature regarding implementation of this recommendation. ORELAP will support the recommendation with time capture data staff is currently compiling for evidence-based practice.

- Develop a strategy to meet established response timelines for addressing proficiency test failures and other lab accreditation deficiencies.

  ORELAP is working on this strategy in collaboration with the PT provider to receive the final reports in a timely manner and to ensure the appropriate corrective actions are addressed in accordance to the TNI standards and ORELAP Program policies. Once the PT results are received from the PT provider, PT results will be evaluated for conformance to the TNI standard to determine the accreditation status of a laboratory within 60 days of the receipt of the final report from the PT provider.

ORELAP is currently developing a summary document that contains historical information about the cannabis labs PT results to meet the established timeline for the evaluation of proficiency test failures and to address cannabis labs PT failures in a timely manner and according to ORELAP Program policies.

The accreditation status is based on a laboratory maintaining a history of at least two successful performances out of the most recent three PT samples analyzed for the same accreditation FoPT. Upon any desk review, ORELAP sends a letter requesting information regarding the unacceptable performances. The ORELAP manager will notify the laboratory's director by registered mail, return receipt, of suspension of accreditation. The notification shall include the beginning date of the suspension, which elements are suspended and the reasons for the suspension. If the cause of suspension has not been corrected within six months or the period of accreditation, whichever is shorter, the status of the affected fields of testing will change to revoked.

7. DHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2018, audit #2019-14 (dated March 2019)

- Recommend management ensure year-end reporting methodologies reflect a complete understanding of transaction relationships as well as proper application of amounts provided by other entities.

  The year-end task list shows the annual meetings with each unit, including the Management Reporting Unit (MRU) of the Office of Financial Services, to provide information and inquire of changes. The fiscal year 2019 year-end list, Office of Financial Services MRU, is the actual agenda for items discussed with each unit. The MRU specific items include inquiring of new program revenues and expenditures.

- Recommend management implement monitoring processes to provide assurance over the accuracy of the MMIS claims edits and audits, as well as implement processes to understand the edits and audits controls and test their effectiveness and completeness. Additionally, management should continue to work with their service provider to maintain a comprehensive inventory of current MMIS edits and audits.

The claims edit and audit testing plan was reviewed internally and approved by both the MMIS Business Support Unit and the Office of Financial Services. The plan was put into effect on April 1, 2019 and two quarterly deliverables have been provided to demonstrate the testing that has occurred so far in 2019. The MMIS Claims Edits and Audits testing is being conducted by the MMIS contractor, DXC.

An MMIS Claims Edits and Audits Monitoring plan was developed and implemented on November 1, 2019. The monitoring plan involves the following approaches:

- *Utilize the weekly Flush Claims report*
- *Work with the Claims analysts in MMIS BSU to identify areas that need to be monitored*
- *Monitor new edits and audits to be certain they are functioning properly*
- *Research and monitor edits and audits when Provider Services identifies a provider whose claims are denying*
- *Research and monitor edits and audits when the HSD Claims unit identifies any anomaly with a claim edit issue*
- *Work with the MMIS BSU Financial team to do research on an edit they see as inconsistent with what they would normally see when fixing flushed claims*
- *Monitor edits and audits around issues identified by the Program Integrity Unit in OHA*
- *Monitor claims identified during the bi-weekly interaction with DXC*
- *Pulling of random edits and audits from the comprehensive list*
- *Monitor edits and audits through the MMIS User Acceptance Testing site when claims changes are being tested for promotion to the Production site.*

Two quarterly deliverables are being produced. One for testing activities and one for monitoring activities. OHA maintains a comprehensive electronic inventory of current MMIS edits and audits. The revised and updated list is provided quarterly by the MMIS contractor, DXC.

All new edits for MMIS are first tested and validated through the MMIS User Acceptance Testing site. They are tested by three different groups: DXC, MMIS BSU and an analyst from the Medicaid Policy team in Health Systems Division. Once all three have validated the accuracy of the edit or audit is correct, the change is promoted to the MMIS Production site. Those new edits and audits are then part of the ongoing monitoring plan.

- Recommend management strengthen the review of contracts to ensure the correct funding sources are included and that contracts and the subsidiary system agree.

*The Contracts Unit of HSD is responsible for contracting the majority of the Behavioral Health Services. These services are identified by service element name and number; each service element describes a specific mental health or substance use disorder services to be provided. The funding associated with each service element is found in a contract's financial pages. All funding is classified under one of four primary sources: general funds, federal funds, other funds, and lottery funds. However, the financial pages provide line-item detail that includes the name and number of the fund, corresponding to the revenue source, from which payments are to be made. The Contracts Unit enters the detailed financial information for each contract into R*BASE, a financial system also used by Office of Financial Services (OFS) for contract payments.*

The Contracts Unit was notified of the audit finding regarding a discrepancy between the fund name and number identified in a contract's financial pages and the actual fund name and number from which OFS made payment. We discovered that the language in the County Financial Assistance Agreements (CFAA) limited payment by OFS to the specific fund identified in the financial pages. The intent is to adhere to the funds and funding sources listed but there are times when funding is insufficient—a frequent occurrence—to cover payments due. Therefore, to make the payments, the Contracts Unit had to issue an amendment just to change the fund number so OFS could make the payment.

After meeting with OFS, it was agreed that transferring between funds within the same primary category (GF, FF, OF, LF) would allow OFS to meet its statutory requirement for prompt contractor payments when revenue was insufficient under another fund number. This would also eliminate the need to issue frequent amendments for simple administrative fund movements. It also reduced the cost to the contractor as a result of fewer amendments being required. The corrective action taken was to modify the terms in the CFAA, by adding a short disclaimer at the end of the fund number listing in the "Explanation of Financial Pages" exhibit.

During this process, an error was discovered in the "Explanation of Financial Pages" exhibit, errantly identifying fund "888 Gambling Treatment" as general funds. The correct identification should have been lottery funds. That was corrected, along with the language change mentioned above. The CFAA was amended once both issues were addressed.

- Recommend department management implement procedures to gain an understanding of controls over transactions processed by service organizations and follow established procedures to ensure all revenue due to the department is received.

  By implementing the items below the Program can more easily monitor claims activity and follow up quickly with our Pharmacy Benefit Manager (PBM) and contract pharmacies relating to contract compliance, when necessary. We include this analysis in our bi-weekly operational meetings with the PBM and it is reviewed at our monthly 340B Oversight Committee and Financial Review meetings. We can be confident that the revenue numbers reporting on both federal grant and state fiscal year reports are reconciled to SFMA and to the PBM's external accounting system as well.

  - ***Developing and updating policies and procedure documents pertaining to the collection, process and summarization and analysis of program income***

    Department management immediately implemented procedures for the receipt and reconciliation of pharmaceutical cost recoveries, known as "Program Income for Insurance Claims Reimbursements Revenue" (AOBJ 2653). Policy documents to formalize the newly refined processes are under review awaiting final approval.

- ***Creating an accounts receivable (AR) model in Excel to track amounts owed to the Program by the seven contract pharmacies for insurance claim reimbursements***

  The Program audited all program income transactions, both billing and payments, back to July 1, 2015. An excel tracking sheet was created to download and record contract pharmacy accounts receivable invoices directly from the Program's Pharmacy Benefits Manager's (PBM) database. Payment tracking is included on the accounts receivable tracking sheet to ensure reconciliation to PBM's portal as well as to OFS daily cash reports received from the state's receipting office in Salem.

  Enhancements to the tracking sheet were added to expand reporting periods for both federal and state fiscal years. This allows the Program to track amounts carried forward from year to year, as well as to generate predictives for budgeting and program income activity. This information supported requests for limitations reporting, and the Legislative Fiscal Officer to understand and learn about our program's activities. These predictives are actively used by program management to better understand and detect changes in program income activities by the PBM, acting as fiscal intermediary, as well as contract pharmacy transactions claims activity in general.

- ***Downloading all invoiced claims into a secured portal to add to the AR model***

  Program income insurance claims reimbursement invoices are generated by the PBM's accounting system and posted to their secure portal semi-monthly. The Program downloads the information and imports these directly into the program income/accounts receivable tracking sheet in excel format on the 1st and 16th of each month. The new entries are compared to the prior download to observe all changes to the PBM Portal since the last download.

- ***Evaluating amounts due from each PBM on a biweekly basis and following up using collection procedures for any that are past due***

Program management reviews our program income's accounts receivable position and contract pharmacies' contract performance on a monthly basis at our 340B compliance committee meeting and follows up with contractors accordingly. At our request, our PBM is also including an accounts receivable summary semi-monthly to show the outstanding (unpaid) invoices currently owed to the program.

- ***Posting payments daily into the AR mode***

  Daily, the Program posts cash receipts sent by the PBM, who directly receives contract pharmacies' insurance claim reimbursement billings payments as part of their fiscal intermediary services provided for in their contract. Each month, these cash receipts are recorded and compared to both the OFS Receipting Unit's monthly cash receipt report for both amount and AOBJ coding and then reconciled to SFMA accounting system.

- ***Evaluating, reconciling and summarizing revenue to determine budget versus actual on a weekly basis***

  Program income invoices are recorded and summarized on a biweekly basis when PBM generates contract pharmacy billings. Payments are applied to the specific invoice numbers as they are received by the Program on a daily basis. Reports are generated from the excel model and reviewed by program management and the 340 Monitoring Committee. Contract pharmacy performance is discussed, including billing and payment practices.

- Recommend management implement monitoring processes to provide assurance over the accuracy of MMIS claims edits and audits, as well as implement processes to understand the edits and audits controls and test their effectiveness and completeness. Additionally, management should continue to work with their service provider to maintain a comprehensive inventory of current MMIS edits and audits.

  The plan around the response to this original audit is itself fully implemented, and annual reviews of the process will continue for an unspecified period by the SOS auditors. There was a verbal finding in 2019 determined by the SOS Auditor that has to do with the mitigation against an authorized user in MMIS, who is permitted to add edits and audits to the MMIS, from entering incorrect edits or audits, either by mistake or intentionally. There are only four users in MMIS who can add

edits and audits to the system, but there is no objective process for monitoring the changes those four make in the system as an "upstream process." Downstream, the edits and audits will catch an error, but the idea is to mitigate against a potential error at the start of the edit and audit entry into MMIS. We are exploring options to have a process that would ensure we can monitor those changes more closely and put controls in place that would keep someone from entering an edit or an audit either incorrectly or without authorization. Along those lines, we have implemented annual manager reviews of employees to be certain that proper access is given to each MMIS user. Additionally, new reporting structures are currently being built into the Security tool where roles are granted. One of those reports will give us a "thumb print" of any user in MMIS as to where in the system they have been and actions taken by that individual.

The entire process for getting a new edit or audit into MMIS is quite extensive and has a number of checks and balances within the change request process for MMIS. Regarding MMIS claims edits and audits, not only is the detailed change request process used, but no edits or audits, after having been extensively tested, can be put into MMIS without three signatures. There is also extensive documentation around this process that has been previously provided to the SOS auditors.

With regard to the "actual" finding, the claims edits and audits testing and monitoring plans were implemented in 2019. The testing of the top 20% of edits and audits with the greatest financial impact started being tested by DXC in April 2019. In November 2019 the plan for monitoring of other edits and audits was started and quarterly deliverables are sent to the SOS Auditor's office, as well as the posting of deliverables on the Team Central site with an update.

The claims edit and audit testing plan was reviewed internally and approved by both the MMIS Business Support Unit and the Office of Financial Services and put into effect on April 1, 2019. Two quarterly deliverables have been provided to demonstrate the testing that has occurred so far in 2019. The MMIS Claims Edits and Audits testing is being conducted by the MMIS contractor, DXC. An MMIS Claims Edits and Audits Monitoring plan was developed and implemented on November 1, 2019. This activity will be conducted by the MMIS Business Support Unit. A quarterly deliverable will also be completed to represent this activity as well.

Two quarterly deliverables are being produced. One for testing activities and one for monitoring activities.

OHA maintains a comprehensive inventory of current MMIS edits and audits, electronically. Both the Medicaid Policy Unit and the MMIS Business Support Unit maintain a current list. The revised and updated list is provided quarterly by the MMIS contractor, DXC.

- Recommend department management investigate and identify the extent to which client income was verified. Also recommend department management provide appropriate notification and training to staff to ensure that data is entered in a manner that would ensure the ONE system appropriately accesses the hub to verify income eligibility.

  The department has provided additional guidance by way of an all-staff transmittal issued in March of 2019, has updated the staff eligibility manual in April 2019, and made an update to the ONE eligibility system on April 11, 2019 to default the question about verification to trigger the Federal Data Services Hub. This update was done to ensure the Hub is pinged, regardless of the avenue in which the application is entered, when no one on the case has income. After the system update, guidance regarding the update was put in an agency-wide newsletter in May of 2019 and an all-staff transmittal was sent in August 2019. Staff training was also held.

- Recommend management strengthen controls to perform timely eligibility redeterminations and verification of client income, and ensure eligible clients are appropriately enrolled in both Medicare and Medicaid. Additionally**,** we recommend management provide periodic training to caseworkers to reduce the risk of administrative errors. We also recommend management correct all identified issues and reimburse the federal agency for unallowable costs.

  Approximately 90% of APD rule changes required for the implementation of the integrated ONE system on July 6, 2020 are complete and training materials have been updated to reflect these changes. The remaining 10% of rule changes will be effective on July 6, 2020. Cross program training, which covers, MAGI, OSIPM and Medicare Savings Programs, is in process and will be delivered prior to the new system's rollout in each area. This will ensure that staff across Aging and People with Disabilities and Self-Sufficiency programs are knowledgeable in all Medicaid programs, and that eligibility is determined timely, accurately, and with the required verifications.

An adjustment for $35,153 FF (100% FF) was processed and reported on CMS-64 FFY20Q2.

- Recommend department and authority management strengthen controls to ensure documentation supporting a provider's eligibility determination is retained. We also recommend department management reimburse the federal agency for cost paid related to the ineligible provider.

  Questioned costs of $8,518 were adjusted through the JH system with document BTJHCQAP. The effective date of the adjustment is January 19, 2020.

  A missed data base verification has been added to the enrollment staff self-reporting spreadsheets. The state is reviewing a report to complete any missed required validations every three months.

  The automated solution is still a work in progress and will not begin to replace staff database checks until March 2020. We are also reviewing an automated missed check tool or a daily query to ensure missed checks are fixed within one business day.

- Recommend management ensure changes to the cost allocation process are included in its change log to ensure all changes are incorporated in subsequent plan submissions. Further, the department should ensure the discrepancies identified are corrected in the next plan submission.

  Our new procedure is to document all correspondence in a log with a number, brief description and which plan year it applies to. Additionally, with each update requested, the plans are being produced in their entirety where each version builds on the prior so that the most recent plan or update is always the most current and inclusive of all changes and or updates. Regarding the Random Moment Sampling, most of those activity codes required narrative updates only to ensure the description of the calculation was accurate.

  There were two activity codes that resulted in claiming differences:

Activity Code 4.A.8 – Pre-Finalized Adoption Assistance Case Management – The penetration rate used in activity code 4.A.8 is based on IV-E Foster Care. This rate should have instead been based on IV-Adoptions. The funding source charged for this activity, however, was in fact "TITLE IV-E ADOPTION ASSISTANCE". Because the Federal Funding source is correct, there is no adverse impact to reporting. Because the Foster Care penetration rate is lower (57.07%) than the Adoptions rate (86.24%), the resulting impact on claiming is that Oregon under-claimed to IV-E. Since the amount that is not funded by IV-E is charged to State Funds (GF), as such no correcting entry is necessary.

Activity Code 4.A.2 Transportation for Medical, Dental, And Mental Health Services – The penetration rate used in this activity is XIX Foster Care (XIX FC) eligible children. The rate should have instead been XIX weighted / blended (based on Foster Care and In-Home). The approximate difference in rates is 2.5% less when using a blended rate. As a result, the agency over-claimed to title XIX. Activity code 4.A.2 accounts for approximately 1.77% of Child Welfare Survey results. The overall impact to Child Welfare RMSS results is 0.043% (or a 2.5% XIX reduction in the 1.77% of survey responses in activity code 4.A.2), the Federal Fund impact and correcting entry is estimated at approximately $63,000.

The entry for 4.A.2 was made with document numbers BTCC2130 through BTCC2136. Total Federal Fund impact was $36,204. The initial estimate was based on averages versus a month by month calculation. This was reported on the CMS-64 FFY19Q4.

- Recommend management strengthen internal controls to ensure all costs entering the cost pools are allowed and for the correct amount. Further, the department should identify any additional mileage rate errors and correct all known issues.

  The agency has a regular process to review for duplicate payments; however, the questioned payment was missed. It was corrected October 30, 2018 on document AR075480 for $2,201.

  Also, the agency will be working with program staff to ensure they understand that submissions for court witness mileage reimbursements are paid a different IRS per diem rate. The agency reviewed court witness mileage reimbursements and

found an additional 27 transactions paid at the inappropriate rate, resulting in $535.33 in overpayments. This amount was adjusted March 15, 2019 on BTCL1177. The questioned cost of $18.20 was also adjusted March 13, 2019, on BTCL1176.

8. Oregon's Framework for Regulating Marijuana Should Be Strengthened to Better Mitigate Diversion Risk and Improve Laboratory Testing, audit #2019-04 (dated January 2019)

- Recommend OHA enforce existing data reporting requirements for medical marijuana growers.

  OMMP created a plan to address non-compliance with reporting for growers and grow sites using the monthly Oregon Medical Marijuana Online System (OMMOS) as well as grow sites with 3 or more patients that were required to track using the Cannabis Tracking System (CTS).The program's enforcement priority was to target those registrants not complying with the CTS tracking requirements first as statute provided that OHA must revoke or not renew grow sites that did not comply with the law by July 1, 2018. At that time. there were 365 grow sites that were out of compliance with the law. Enforcing this tracking requirement was a time-consuming process and the program is still addressing many enforcement actions through appeals, hearing, settlement agreements and follow-up to ensure the settlement agreements are being adhered to.

  Enforcement of non-reporting for those using OMMOS will begin with warning letters sent to all growers at grow sites who do not report for the month. They will have 15 days to report or be charged a civil penalty. Notices of Intent to Impose Civil Penalties will be sent to those who do not comply. For those who still do not comply OMMP will issue a Notice of Intent to Revoke, followed by issuing a Final Order of Revocation if a hearing is not requested.

  It is important to note the volume of citations needed to address non-reporters will strain OMMP's staff resources and also impact the Department of Justice's resources to assist with thousands of potential contested administrative hearings.

- Recommend OHA establish inspection frequency goals and metrics and determine how many inspectors are needed to meet those goals.

There were no changes made to the program's position authority from Oregon Legislature during the 2019 session. The Compliance Unit continues to be short staffed to handle a significant and time-consuming work- load. Currently, the unit has four permanent Compliance Specialist 3's (CS3) and one limited duration CS3. One of the four has been on a job rotation and the employee in a limited duration position is leaving the program in July. This will leave only three to manage the workload. The Compliance Unit also has a limited duration Compliance Manager position and limited duration Compliance Specialist 1 position that terminated on June 30, 2019 but have both been extended until the end of 2019 due to the workload.

The work of the Compliance Specialist 3's consists of conducting inspections of grow sites, dispensaries, and processing sites, completing post inspection reports, investigating complaints, and issuing enforcement actions from OLCC medical marijuana grow site inspections. This work takes time and requires a lot of travel, follow up with OMMP registrants, OLCC, DOJ, and writing various enforcement actions and civil penalties.

The program is working on completing a monthly report to measure our success. There have been substantial barriers in creating this report as information is stored in various locations and excel sheets. The program is working with OIS to revise our current database to help track inspections and enforcement actions. Initial indications show that the Compliance Unit is not meeting the goal of 4 grow site inspection a week per position. Without more positions, the program will continue to be challenged in meeting this goal. Management will continue to work with and coach staff, to improve the reporting features to have easily reliable data and continue to coordinate inspections and process improvements with OLCC.

- Recommend OHA, under the guidance of the Governor's office and the Legislature, review the level of authority OMMP needs to improve its regulatory framework for security, product tracking, and bolster resources for inspections, or consider placing the medical marijuana compliance program within the existing Oregon Liquor Control Commission (OLCC) authority and control framework.

In our Operations and Compliance Assessment, submitted to the Oregon Cannabis Commission in May 2018, we acknowledge the shortcomings OHA has in regulation and that policy makers are working towards determining which agency is and should be responsible for specific components of the law.

OHA awaits direction from the Oregon legislature regarding this recommendation and will support decision making with data and evidence-based practice.

There were no changes made to OMMP's authority regarding regulatory framework during the 2019 Oregon legislative session.

- Recommend OHA evaluate the reasons behind high inspection staff turnover and implement management strategies to reduce turnover.

  The migration of registrants from OMMP to OLCC and the decline in patients and registered medical dispensaries and processors resulted in decreased revenue to support compliance operations and led staff to feel insecure about the stability of the program. SB 1057, passed during the 2017 legislative session, removed the entire compliance unit position authority effective July 1, 2018. OHA was able to request and receive permanent position authority for four compliance specialists, and limited duration authority for the manager, a compliance specialist 1 and an operations and policy analyst 1.

  The limited duration positions end July 2019. As a result, staff are concerned about their employment status. Overall, without a stable program with permanent positions, we may continue to see staff turnover.

  Management has also acknowledged staff morale and is beginning to address staff concerns. OMMP partnered with an Employee Assistance Program to provide employees an opportunity to bring forward their concerns and has implemented actions to address them. Management has taken classes and employees have received burnout prevention classes. Management is continuing to work with the staff to address their concerns and is implementing a performance system agency wide. Staff turnover is an important element of the performance measures.

- Recommend OHA perform a thorough study on the potential impacts and presence of microbiological and heavy metal contaminants in marijuana products, to make an informed decision on adding them to testing requirements, potentially in consultation with a reference lab.

  While OHA agrees with this recommendation, there are currently no resources to conduct such a study. Resources would need to be allocated for this study to occur. In the absence of dedicated resources to conduct a thorough study, OHA will reach out to other states with legalized marijuana to request their data related to testing for specific microbiological and heavy metal contaminants. OHA can also convene a rules advisory committee to seek guidance on testing for microbiological and heavy metal contaminants in marijuana products.

- In consultation with the Legislature, review options for medical marijuana testing and take action to better ensure product safety for medical marijuana patients. Potential actions could include:
    a. Implementing a public health campaign with assistance from other state agencies to educate medical growers and patients on ways to avoid, reduce, or eliminate marijuana product contamination;
    b. Requiring testing for all medical marijuana to ensure it is free of contaminants that may impact patient health.

  OHA acknowledges the importance of public safety and implementing a public health campaign would be important. While OHA agrees with this recommendation, there are no resources to conduct a campaign. Funds would need to be allocated for the campaign to occur.

  OHA awaits direction from the Oregon legislature regarding this recommendation and will support decision making with data and evidence-based practice.

  There was no input or discussion on this recommendation during the 2019 Oregon Legislative session. Funds and resources continue to be a barrier to implement this recommendation. OHA will continue to wait for direction from the Oregon legislature regarding this recommendation and will support decision making with data and evidence-based practice.

- Recommend OHA consider developing a reference lab focused on standards and methodology setting, additional compliance testing and random testing of marijuana products, and assessing the overall risk of marijuana product contamination.

  The need for a reference lab has been acknowledged in the report to the Oregon Cannabis Commission in May 2018 as a necessary component to ensure the safety of marijuana in the market and accuracy of cannabis testing labs. The Oregon Cannabis Commission included a recommendation to create a reference lab in the report to the interim committees of the Legislative Assembly related to Health and Judiciary. Funds would need to be allocated for this to be implemented.

  During the 2019 legislative session, the A-Engrossed version of House Bill 2098 included a State Cannabis Reference Lab, but that section was removed with the senate amendments. The bill did pass which directs OLCC to establish an advisory committee to advise OLCC, OHA, and ODA on establishing and maintaining standards for testing the potency of marijuana and marijuana items. Members of OHA will be on this advisory committee. This bill becomes operative January 1, 2020.

- Recommend OHA in consultation with OLCC perform random compliance testing, or shelf audits, to independently validate test results and assure product safety.

  OHA will work with OLCC to implement this recommendation. In the absence of a reference lab, OHA and OLCC will partner with the Department of Agriculture to conduct the audit tests. In order to accomplish this recommendation, additional staff resources and funding for the tests will be needed.

  There was no input or discussion on this recommendation during the 2019 Oregon Legislative session. Funds and resources continue to be a barrier to implement this recommendation. OHA will continue to wait for direction from the Oregon legislature regarding this recommendation and will support decision making with data and evidence-based practice.

- Recommend OHA-ORELAP continue transitioning alternate matrix solvent proficiency tests in Oregon to real matrix solvent proficiency tests.

  This requirement has been fulfilled as of March 11, 2019. As part of proficiency test (PT) Provider Phenova's contract agreement with ORELAP, the provider developed additional in-matrix samples to support the OHA lab accreditation program. The PT sample for residual solvents now uses Hemp Oil as the base matrix and contains Total Butanes and Propane. Additionally, PT samples in cannabis matrix are now available for microbiology analytes and metals

- Recommend OHA-ORELAP complete all provisional accreditation assessments to ensure that sampling procedures taken by labs are appropriate.

  Currently, ORELAP is working towards this goal in collaboration with OLCC. In November of 2018, ORELAP requested through OLCC video footage of a selected day and time of sampling events. These dates were selected based on the laboratory's sampling plans and chain of custody documents to evaluate and assess sampling protocols and practices from19 cannabis labs. As of January 23, 2019, ORELAP received confirmation of three video recordings. Based on the cannabis laboratories' failure to provide the requested video recordings, ORELAP is currently scheduling on-site assessments of the remaining ten laboratories with provisional sampling accreditation. Upon completion of the ten laboratories' observation assessments of sampling, there will be no provisional accreditation sampling thereafter.

  ORELAP completed the provisional accreditation assessments for sampling procedures on June 28, 2019. At this moment, only one laboratory out of the 21 Cannabis labs did not respond to ORELAP's call for the sampling onsite assessments and will be removed from the official ORELAP Cannabis list for this field of accreditation. ORELAP no longer offers provisional sampling accreditation.

- Recommend OHA-OIRELAP streamline the proficiency test tracking process for marijuana labs.

Currently, ORELAP is working on this process in collaboration with the PT Provider and OHA IT specialists. ORELAP has developed a summary document to keep track of laboratory's participation in PT studies and PT performance. It is ORELAP's intent to transition the PT evaluation to ORELAP's database in order to streamline the proficiency test tracking process for cannabis labs. Additionally, we are working closely with Phenova PT provider in order to receive PT final reports in a timely manner to ensure appropriate corrective actions are addressed in accordance with the TNI standards.

- Recommend OHA-ORELAP review its level of authority to address lab issues related to upholding accreditation standards to determine what level is needed, and work with the Legislature to make necessary adjustments.

  OHA awaits direction from the Oregon legislature regarding implementation of this recommendation. ORELAP will support the recommendation *with time capture data staff is currently compiling for evidence-based practice.*

- Recommend OHA-ORELAP work with OLCC and the Legislature to ensure appropriate and sufficient staff coverage to better monitor lab practices and review test result data.

  OHA awaits direction from the Oregon legislature regarding implementation of this recommendation. ORELAP will support the recommendation with time capture data staff is currently compiling for evidence-based practice.

- Recommend OHA-ORELAP develop a strategy to meet established response timelines for addressing proficiency test failures and other lab accreditation deficiencies.

  PT reports have been evaluated for conformance to the TNI standard within 60 days of the receipt of the final report from the PT provider. ORELAP is currently tracking PT studies by using a spreadsheet-like user interface where relevant information is recorded in order to meet the 60-day requirement for the evaluation of PT studies. The document is used to record laboratory's PT receipt date, due dates, review dates, PT study information and PT report status.

ORELAP is currently developing a summary document that contains historical information about the cannabis labs PT results to meet the established timeline for the evaluation of proficiency test failures and to address cannabis labs PT failures in a timely manner and according to ORELAP Program policies.

The accreditation status is based on a laboratory maintaining a history of at least two successful performances out of the most recent three PT samples analyzed for the same accreditation FoPT. Upon any desk review, ORELAP sends a letter requesting information regarding the unacceptable performances. The ORELAP manager will notify the laboratory's director by registered mail, return receipt, of suspension of accreditation. The notification shall include the beginning date of the suspension, which elements are suspended and the reasons for the suspension. If the cause of suspension has not been corrected within six months or the period of accreditation, whichever is shorter, the status of the affected fields of testing will change to revoked.

9. OHA: Integrated Eligibility Project Has Generally Followed Industry Standards to Help Ensure Data is Converted Completely and Accurately, Fiscal Year 2019, audit #2019-37 (dated October 2019)

- Recommend compare data extracts to legacy systems to ensure completeness and accuracy and document the results.

After the audit, the Integrated Eligibility, Data Conversion team reached out to the Legacy extract team to better understand steps taken to ensure the mainframe extracts correctly represented the data from the online systems.

Each Legacy team providing an extract (FSMIS, CM, CI, OA and AJ) was interviewed and design/test artifacts were reviewed

In summary, the team determined the following:

1. The Legacy teams have varying processes to manage and track extract requests - some using ticketing systems that track and manage requests, while other teams manage requests via email

2. In all cases, the Legacy teams were working from defined specifications, either uploaded to the ticketing system or managed via email
3. *In all cases, the Legacy teams confirmed the accuracy of the extract with the Legacy BA's, who confirmed against the online system.*
4. Test evidence/confirmation was exchanged via email, and either uploaded to the ticketing system or preserved in email.

Based on this follow-up review of the process, there is now sufficient evidence that the mainframe data extracts have been adequately tested against a defined design, and accurately represent that data in the mainframe.

- Recommend management develop a staffing plan that reflects the potential volume of work that will need to be completed after data conversion along with existing eligibility processing workloads and staff availability.

  The state has developed a plan to minimize the amount of impacts created for eligibility workers by data conversion. This plan includes creation of a team to perform duties necessary to align the data within the multiple systems and automating some of the functions necessary to align the data within the multiple systems. These two strategies will decrease the impact to eligibility workers and allow for better service to Oregonians. There is a workplan that has been developed for the cases that will continue in conversion mode after go-live. This plan includes appropriate necessary time for every point of contact. This time correlates to our current recertification timelines.

- Recommend management eliminate the use of shared accounts to transmit PII and PHI.

  The Audit Team observed server administrators using a shared account to manage file transfer of sensitive data. This practice was stopped upon notification to Project leadership and did not expose sensitive data outside of the system boundaries. Additionally, the server in question is being replaced and decommissioned.

- Recommend management improve monitoring of the transmission of PII and PHI.

While the Audit Team did not assess specific security risks for the IE system, there was recognition by the Project Team that controls were needed to address Project-identified risks related to the protection of PII and PHI during UAT. A team called the Security Controls Workgroup was formed to identify and put into place controls necessary to protect this data. This workgroup was made up of security professionals from the Project Team, SI, Enterprise Security Office (ESO), Enterprise Technology Services (ETS), Office of Information Services (OIS), Public Knowledge, and oversight agency representatives. These controls included:

- *Ensuring there was no mechanism to allow offshore resources to access the UAT environment.*
- *Ensuring processes were in place to validate no PII or PHI was copied into Team Foundation Server or other environments in which offshore personnel had access.*
- *Requiring all testers to use test ID's during testing.*
- *In the mainframe environment, specifically placing "deniers" into access scripts to ensure testers could not access production environments and, conversely, production users could not access the test environment.*
- *User profiles for testers were created to change the background color of screens such that it was easy for users to differentiate between production and test environments.*
- *Ensuring processes were in place to quickly provide testing credentials (authentication and access) to new testers.*

In addition to the above controls, security-related plans are followed and are regularly updated and reviewed by the ESO and federal partners. These plans include:

- *System Security Plan (SSP)*
- *Information Security Risk Assessment (ISRA)*
- *Privacy Impact Assessment (PIA)*
- *Plan of Action and Milestones (POAM)*

- Recommend management update existing Business Associate Agreements to include clauses required under HIPAA.

  According to a message from the Department of Justice (DOJ) dated November 14, 2019, the Business Associate Agreement (BAA) template used by OIS was found legally sufficient and is not out of compliance with federal requirements. No further action will be taken on this finding by the IE Project Team leadership.

10. DHS and OHA: Using the U.S. Treasury's Do Not Pay System for Health and Human Services Program Will Save Taxpayers Money, audit #2020-05, (dated February 2020)

- Work with U.S. Treasury to gain access to Do Not Pay's worker portal to perform on-demand searches.

  The implementation date for DHS/OHA to gain access to the DNP portal is contingent upon the execution of a data use agreement (DUA) and other data security measures needed per data source. The data sources cross both the DHS and OHA, and data sources contain protected health information, personally identifiable information, and other protected information. The protection and security strategies for sharing each data source will need to be clarified, and separate DUA's for DHS and OHA may need to be executed.

  Communications with U.S. Treasury are ongoing, and the initial questionnaire has been submitted to U.S. Treasury.

- Work with U.S. Treasury to develop annual death matching that covers all clients and all providers in the SNAP, TANF, ERDC, and Medicaid programs. Based on research of those matches, terminate ineligible clients and provides, and correct erroneous data in information systems.

  DHS and OHA request this recommendation incorporate the rationale and goal of Recommendation 7, rather than having two separate timeframes for matching purposes. Monthly matches would be the most efficient and provide DHS and OHA the opportunity to correct records in a timely manner.

- Develop internal policies and procedures for using Do Not Pay and taking the appropriate actions to close cases.

Policies and procedures already exist for the current Date of Death work being conducted by OHA and DHS. Once the DUA and other data security measures are executed, and portal access is approved, DHS and OHA will know the specific aspects of the portal and data matching needing to be addressed in policy and procedures and will finalize prior to full utilization of DNP.

- Send letters to all clients and providers who are identified as potentially deceased, but whose records could not be independently verified by DHS or OHA staff.

  DHS and OHA staff will check all internal databases and perform internal research to verify the data that has been received by DNP. If DNP identifies someone as deceased, we are concerned that it would not be an effective approach to submit letters to clients and providers who, through the use of DNP, have been identified as deceased. We would clearly take the DNP data seriously and would do all necessary validation, but sending letters to potential surviving family members does not seem the most effective approach.

- Work with appropriate authorities to correct erroneous death reports found as a result of Do Not Pay data matching.

  In the development of Recommendation 3, policies and procedures will be developed to address Recommendation 5. DHS and OHA will include in those policies and procedures methods and strategies for communicating with the data source of any potentially erroneous record.

- Work with U.S. Treasury to develop annual data analytics to identify potential data quality issues in information systems serving SNAP, TANF, ERDC, and Medicaid clients and providers.

  DHS and OHA will use the matching process to identify the source, structure and prevalence of the data issue. DHS and OHA will use the findings to identify corrective actions within data sets over which DHS and OHA have control.

- Work with U.S. Treasury's Do Not Pay services to develop monthly matches against required datasets for all providers. Based on research of those matches, terminate ineligible providers, and correct erroneous data in information systems.

DHS and OHA recommend incorporating this recommendation with another recommendation thereby streamlining the operational aspects of the two recommendations.

- After the Integrated Eligibility system is implemented, research cases that lack Social Security numbers and valid exemptions. Based on research of those cases, address any eligibility, compliance, and/or system issues.

  This recommendation will be addressed post implementation of the Integrated Eligibility System. It will be addressed per applicable federal regulation for each program utilizing the Integrated Eligibility system.

11. DHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2019, audit #2020-14 (dated March 2020)

- Recommend management ensure year-end accrual methodologies are complete and include consideration of all relevant expenditures.

  The Office of Financial Services has updated its accrual methodology instructions to review all estimates to ensure they are calculated correctly and include consideration of all relevant expenditures. OFS will engage more closely with budget staff on projections of biennium-end expenditures to ensure alignment of expenditures and accrual estimates.

- Recommend management ensure the cost allocations are processed according to the federally approved cost allocation plans.

  The Medicaid impact of $36,234 was corrected with document numbers BTCC2130 through BTCC2136 with an effective date of July 14, 2019. The refund was reported to CMS on the CMS-64 FFY19 Q4. The TANF impact of $1,824,260 was corrected with document numbers BTCC3054 through BTCC3137 with an effective date of September 8, 2019. The refund was reported to ACF on the ACF-196R Part 1 report, line 22B FFY19 Q4.

Internal controls have been strengthened and the Public Assistance Cost Allocation Plan Change Log for both DHS and OHA are reviewed on a monthly basis notating any change, the reason for the change, and the plan part and section reference. The changes accumulated over the year are reviewed prior to the annual state fiscal year submission to the Federal Department of Health and Human Services Cost Allocation Services unit to ensure alignment between the Cost Allocation System and the federally approved plans.

- Recommend authority management implement procedures to monitor user access and potential unauthorized changes to the application, as well as continue to implement processes to verify the effectiveness and completeness of the claims edits and audits function.

  At the initial review of which employees had the ability to modify claims edits and audits, it was difficult to determine how many and who exactly had the access to do such work. We were looking at the incorrect role and it appeared that more employees had that access than it was originally thought to be the case.

  A process was not in place to capture upstream whether unauthorized changes are being made in the adding of edits and audits into MMIS. There is a healthy downstream process through testing and validation that captures any anomaly regarding edits and audits after they are entered into MMIS. The addition of new claims edits and audits goes through a robust process for testing and validation, but that process does not mitigate against someone, either intentionally or accidentally making a change in MMIS outside of that robust testing process.

  It is true that the contractor had only tested 11 of the 116 edits and audits in MMIS as of June 30, 2019. The approved testing plan and contract did not go into effect until April 1, 2019, so it is not surprising that only 11 edits and audits had been tested. Deliverables received since then will show a greater number have been tested, but it is true that only 11 had been tested as of June 30, 2019.

  It is also true that an HSD monitoring of the remaining 80% of the edits and audits plan had not been delivered as of June 30, 2019. The HSD plan was implemented on October 1, 2019.

A further review of the roles was conducted following the audit visit and it was determined that we were looking at an incorrect role. The role unique to that type of work in MMIS is, in fact, in place with only four employees able to modify claims edits and audits in MMIS. That has since been verified and confirmed that only four OHA employees can indeed modify claims edits and audits.

The testing of claims edits and audits continues both with the MMIS contractor and with the MMIS Business Support Unit and a quarterly deliverable is produced and sent to the Secretary of State Auditors office, along with a copy provided to HSD leadership for addition to the Team Central site.

We are exploring a way to have a "checks and balances" approach to the claims edits and audits modification process that would require any proposed new edit or audit be monitored by allowing only one person to set up the edit or audit and the another person be able to activate the edit and audit. We are working on a way to have a process that would capture upstream impact. No plan has yet been created, but we have worked on some scenarios to put a plan into place.

The claims edits and audits testing plans have been implemented as of April 1, 2019 and October 1, 2019 and are currently active with quarterly deliverables required both for the MMIS contractor and the MMIS Business Support Unit.

- Recommend authority management continue their analysis and correct all incorrect provider payments. It is also recommended that authority management ensure tables are updated timely and accurately when CMS provides updates.

It was discovered that an incorrect table put into MMIS that adjudicates claims and that table contained rates that did not agree with those established by CMS. This oversight, it was discovered, was due to HSD not being aware of a new table and rates that had been sent in one of CMS' regularly sent transmittals. This led to the incorrect table being in MMIS through 2019 and not allowing for the processing of certain claims containing a specific code at the appropriate rate.

Once the error was discovered by an analyst in the Medicaid Policy Unit, immediate action was taken to calculate the extent of the incorrect payment on those claims. The claims data was gathered and an assessment of the total amount of the

inaccurate amounts is being calculated. Furthermore, the correct table was put into MMIS so that as of today, those claims are paying appropriately and at the correct rate. Furthermore, an effort is underway to reprocess the claims from 2019 to determine the amount of underpayment.

Additionally, we are determining the course of action that should happen to see what can be done in the future to mitigate against the incorrect rates being loaded into MMIS tables for claims processing. While a final plan awaits development and HSD leadership approval, one possibility is to be sure more individuals are receiving CMS transmittals where guidance is given, including changes to rates for certain claims coding.

A conversation was held with the Medicaid Policy Unit and it was agreed that it would be beneficial for the MMIS Business Support Unit to have someone who can receive the CMS Transmittals so that others can see when a change in guidance has occurred. There will be two analysts in the MMIS BSU who will be added to the transmittal email list.

The claims data is first being run through the MMIS User Acceptance Testing site to reprocess the claims to determine the amount still owed these providers. An analyst from the Medicaid Policy Unit and two analysts from the MMIS Business Support Unit have set up 6 System Mass Adjusted Process (SMAP's) segments and three of have been completed so far. Once the six SMAP's are completed the accurate amounts will be known and a determination made to reprocess those claims to make the provider whole.

- Recommend authority management strengthen controls to ensure documentation supporting a provider's eligibility determination is retained.

  During the 2019 Revalidation cycle the state began requiring updated Provider Enrollment Agreements (PEAs) for all revalidating organizations. Revalidation is required every 5 years for Medicaid providers. By the end of 2020, the state will require PEAs from all newly enrolling and revalidating organization and individual providers. By the end of 2020, full implementation, enrollment applications and revalidations without attached PEA's will no longer be accepted. These requirements will ensure all providers have a current PEA.

Provider validations may be missed due to manual processes. In 2019, the state began pulling missed validation reports on a quarterly basis and completing a new set of validations for providers missing any validations. Beginning in February 2020, the state implemented to process to pull the missed validation reports no less frequently than monthly to ensure missed validations are corrected at the earliest opportunity. The state is currently exploring automated processes to ensure provider validations are completed at the time of enrollment, revalidation and reactivation. The state continues to check all providers against OIG, SAM and Death Master databases monthly as required.

- Recommend department and authority management strengthen controls to perform timely eligibility redeterminations and verification of client income and ensure eligible clients are appropriately enrolled in both Medicare and Medicaid. Additionally, we recommend management provide periodic training to caseworkers to reduce the risk of administrative errors. We also recommend management correct all identified issues and reimburse the federal agency for unallowable costs.

  The department is committed to providing timely benefits to only those individuals who are appropriately determined eligible.

  One of the five individuals identified who did not have their eligibility verified within 12 months was receiving MAGI Medicaid benefits. The MAGI redetermination was initiated timely, but the information returned to the agency, by the individual, was not processed timely. Since the time of this individual's redetermination, the department has taken the following steps:

  - *Implemented a more thorough process for workload management with increased reporting and data analysis to better resource ongoing work*
  - *Hired staff to monitor workload*
  - *Expanded capacity and locations of the SSP/OHP Processing Center, hiring additional eligibility staff in the process*

- *Continuously analyzing resource allocation, making adjustments when needed.*

For the remaining findings, the department expects that with the implementation of the new Integrated Eligibility (IE) System statewide during 2020, there will be greater operational opportunities to strengthen our client eligibility controls, specifically related to the timeliness and accuracy of eligibility initial determinations and redeterminations along with improved electronic retention of required data elements such as signed applications. Additionally, the IE system implementation includes cross policy, system and advanced policy training to support staff, eligibility workers and case managers statewide. We believe this training will also assist in ensuring we are building and developing an informed workforce with consistent knowledge of federal and state eligibility policies.

The department will correct all identified issues and recoup the funds by February 2021, from the provider who was overpaid and will reimburse the federal agency for unallowable costs.

- Recommend authority management comply with subrecipient monitoring requirements, develop and implement internal controls to ensure risk assessments are performed and documented for each subrecipient, and monitoring activities are completed and documented in conformance with risk assessment results.

  The Health Systems Division will implement the use of a risk assessment tool for each subrecipient of federal grant funds for all future SAMHSA grants administered by HSD. HSD will also develop a tool to document post award monitoring for subrecipients based on their respective risk assessments.

- Recommend authority management develop and implement controls to ensure performance progress report are complete and accurate prior to report submission.

  The Health Systems Division (HSD) will develop a tool to track internal control processes to ensure progress reports are complete and accurate prior to submission for future SAMHSA grants. This tool will include each step for the internal control and will identify the responsible entity.

Department of Human Services
Audit Response Report

1. DHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2016, audit #2017-08 (dated March 2017)

- Recommend management review the coding that points transactions to rebates and recoveries and other revenues to ensure proper classification of these transactions.

  The agency has updated its year-end close procedure to ensure the Rebate & Recovery revenue is appropriately coded for proper classification. The close procedure now includes a review of Other Revenue account transactions.

- Recommend department management ensure the proper application of established accrual methodologies and that accrual efforts are not resulting in duplicate expenditures or revenues.

  The agency updated its close procedures to include additional reviews to avoid duplication of estimated accrual amounts.

- Recommend department management establish controls to ensure program activity is eliminated from the internal service fund for financial reporting purposes.

  The agency has updated the year-end close procedures to ensure that only shared service funding will be contained in the D23 fund 3470. The new D23 fund 3478 has been set up for the start of the new biennium. Going forward, the only activity in D23 fund 3470 will be shared service activity.

- Recommend department management correct the payroll system coding for identified employees and reimburse the federal agency for unallowable costs.

Federal Policy, Planning and Resources (FPPR) and the Office of Financial Services (OFS) corrected the payroll system coding to reimburse federal dollars for the employees that were being reported as direct-funded by Title IV-E in error. A manual adjustment was completed in SFMA on June 21, 2017 for a total shift of approximately $1 million Title IV-E funds to general funds.

FPPR and OFS developed a methodology to monitor employee payroll to ensure accurate funding reimbursement. The Office of Child Welfare Program hired a Program Analyst specific for tracking Child Welfare positions and the funding. This position will be significant for the methodology being developed.

The Office of Child Welfare Programs Position Management Coordinator and Cost Allocation administrative assistant created a new labor cost code specifically for Title IV-E specialists. The Position Management Coordinator will provide a report quarterly to FPPR to review to ensure only IV-E specialists are using the new labor cost code. The new labor cost code will also eliminate the need for the Cost Allocation administrative assistance from having to manually exclude the Title IV-E specialists from the Random Moment Time Study. The quarterly report provided to FPPR will include all employees that are direct charged to Title IV-E (i.e., OR-Kids trainers and IV-E waiver LIFE positions).

- Recommend department management review OR-Kids transaction processing and make system modifications as appropriate to ensure proper financial reporting of program expenditures. We also recommend department management review prior year and current year transactions and reimburse the federal agency for grant expenditures claimed inappropriately.

  A report has been developed to identify adjustments that impacted a state grant rather than the federal grant and is in the final validation stage. Once the report is validated, the report will be used going forward to accurately report federal expenditures. The report will first be used for the reporting period ending September 30, 2018. In addition, questioned costs of $103,130 were adjusted on the CB-496 report for June 30, 2018. A change request for a system fix has been written. However, the date for the system fix is not yet determined.

- Recommend department management ensure all required documentation is completed timely, reviewed, and maintained and ensure eligibility is determined appropriately. We also recommend department management reimburse the federal agency for costs paid related to the ineligible providers.

  Federal Policy, Planning and Resources (FPPR) completed all the following corrections:

  - *Questioned costs of $10,700 resulted in actual costs adjusted on July 7, 2017 of $15,117.54. The final adjustment was reported on Qtr. 4 FFY2017 CB 496.*
  - *Questioned costs of $1,500 resulted in actual costs adjusted on August 4, 2017 of $950.58. The final adjustment was reported on Qtr. 4 FFY2017 CB496.*
  - *Questioned costs $1,900 resulted in actual costs adjusted on July 20, 2017 of $5,234.89. The final adjustment was report on Qtr. 4 FFY 2017 CB496.*

  FPPR and the Foster Care Unit have completed the one-page reference guide. The final transmittal was sent to the field on June 4, 2018.

- Recommend department management ensure its methodology for allocating administrative costs to the Title IV-E Foster Care program is documented and adequately supported.

  In June 2016, the department changed the funding structure for all Adoptions Unit contracts including Foster Care administrative services to be consistent. All of the contracts now report to the Child Welfare design cost allocation funding structure. In June 2017, total adjustments of $25,648.82 were made to the funding methodology for the period June 1, 2013 through June 30, 2016.

- Recommend department management document the methodology used to review maintenance payment rates for continuing appropriateness, including a specific, time-limited schedule for review.

The department filed a new Oregon Administrative Rule (413-090-005) in June 30, 2017, which was officially adopted on July 5, 2017.

"The department shall review the established foster care payment rates every two years in conjunction with the department budget preparation processes for submission of the Agency Request Budget to the Governor. The purpose of this review is to consider the rates the state is providing in comparison to the USDA Cost of Raising a Child or similar reports."

- Recommend department management ensure a client's monthly copay is correctly calculated, hours are correctly calculated, income support is retained, and a client's special needs rate documentation is maintained. We also recommend department management reimburse the federal agency for unallowable costs.

  A business change request was submitted on April 25, 2016 relating to audit finding on the co-pay not met report and multiple providers. An "Uncollected Copay Report" is currently on hold due to the One/Integrated Eligibility project. To ensure the successful delivery and implementation of this new system, prior work being conducted by programmers in the Legacy system has been suspended. The report will be re-evaluated once the ONE/IE system has been successfully rolled out in 2020.

  Tools were developed and shared with field staff during the year in efforts to improve co-pay calculations and documentation. An Employment Related Day Care (ERDC) mini training was held in June 2018 to address such topics as ERDC copays and ERDC coding. On June 15, 2018, Child Care Policy reissued a transmittal to department staff as a reminder to reinforce the importance of increased accuracy in the ERDC program.

  Quality Assurance also in collaboration with the policy team published another edition of an "Accuracy in Action" newsletter focusing on ERDC budgeting and childcare hours. This issue which was sent to field staff on March 15, 2018, included information referring to verifying income and hours, ERDC hours, marginal income, two parent working families, child support and ERDC, prospective eligibility and budgeting and transitioning TANF to ERDC.

- Recommend management strengthen controls to verify applications exist upon client eligibility redeterminations, perform eligibility redeterminations timely, identify any other clients that may have been impacted due to the override of system controls, and reimburse the program for unallowable costs.

  On March 21, 2017, federal funds in the amount of $1,329 that the department was unable to locate to support the costs charged to Medicaid, were returned. The department's Aging and People with Disabilities Office discussed with managers and staff the policies, appropriate documentation, and retention of applications needed to determine eligibility for our program. These reminders were included in the March 2017 "In the Loop" newsletter article and will be included as agenda items in future quarterly meetings. The department has returned the federal funds for the client whose determination was not completed timely.

  In addition, beginning in January 2016 and concluding August 31, 2017, OHA has worked to process redeterminations for the entire MAGI population and for those individuals who were part of an ACA–related deferred renewal population.

- Recommend department management strengthen its controls over the reviews of monthly employee cell phone invoices.

  In March of 2017, The Office of Information Services (OIS) Collaborative Communications generated a communication to all coordinators to remind them of their responsibility to review/acknowledge the monthly billing data and that their acknowledgement is recorded and audited.

  Further, OIS Collaborative Communications has developed a process and automated email notification system to alert the coordinator(s) and the manager if the monthly review is not completed timely. The first distribution of this message was sent out automatically beginning on June 28, 2017 to all MCD Coordinators that have unacknowledged billing records. This notice will continue monthly.

- Recommend department management correct the identified cases in the child welfare system and reimburse the federal agency for costs paid on behalf of the ineligible children.

  The department has corrected the eligibility of the two cases identified in the audit, which resulted in a total adjustment of $32,830 for one child and $33,637 for the sibling. The adjustment resulted in a title IV-E federal reimbursement of $44,107 in May 2017. This adjustment was reported on the 3rd quarter 496 report.

- Recommend department management ensure all required documentation is completed timely, reviewed, and maintained. We also recommend department management reimburse the federal agency for costs paid related to the ineligible provider.

  The child abuse and neglect registry checks were completed and uploaded to OR-Kids on May 15, 2017 and the adjustment of title IV-E federal reimbursement was completed in March of 2018.

- Recommend department management continue to correct known applicable child eligibility data issues in OR-Kids to ensure data used to estimate the savings in state expenditures is complete and accurate.

  Federal Policy and Resources (FPR) received confirmation from the OR-Kids business team on January 8, 2019, that all adoption assistance determinations were corrected and that the bug fix had prevented any additional errors. Subsequently, on February 19, 2019, a new adoption assistance determination that improves the Department's ability to accurately track and report Title IV-E/Applicable Child eligibility was put in place.

- Recommend management develop a formal tracking mechanism to ensure all changes to the plans are tracked for the inclusion in future updates communicated to the federal oversight agency. We also recommend management strengthen controls to ensure the cost allocation process follows the plans submitted for approval and interim changes, and all costs entering the cost pools are reviewed for allowability.

The agency currently submits the cost allocation plans on an annual basis to the federal DHHS Cost Allocation Services (CAS), formerly DCA. A formal change log was created in March of 2017 to ensure all updates are included in each subsequent submission. The most recent cost allocation plan was submitted on June 30, 2017.

2. DHS: Consumer-Employed Provider Program Needs Immediate Action to Ensure In-Home Care Consumers Receive Required Care and Services, audit #2017-23 (dated October 2017)

- Train case managers to recognize when consumers need additional assistance in completing employer responsibilities.

  The Adults and People with Disabilities (APD) Division of DHS has developed and implemented a training for case managers. In January 2018, APD offered the training to all case managers. Moving forward, the training will be presented on a quarterly basis to all new case managers.

- Develop and implement procedures for taking action when consumers are no longer able or willing to perform necessary employer duties.

  APD revised OAR 411-030-0040(8) (In home service rule) and OAR 411-034-0040(4) (State Plan Personal Care or SPPC) to add procedures for taking action when consumers are no longer able or willing to perform employer duties. These procedures have been in place since December 28, 2017.

- Monitor consumer care to ensure direct and indirect contacts are occurring according to the Center for Medicare and Medicaid Services requirements and Oregon Administrative Rules.

  APD has developed a corrective action process to ensure direct and indirect contacts are being made. Central office staff monitor monthly consumer contact data and communicate with local field offices when they are out of compliance. Local field offices must respond and make corrections to ensure contacts occur.

- Utilize APD's current risk assessment tool to identify clients most at risk for fraud, neglect, and abuse.

  Case managers currently use APD's risk assessment tool and must document that an assessment was completed in the OR ACCESS database before a service plan is created for a consumer. A refresher course on current policy was presented by APD to case managers in November 2018. ADP plans to revise its risk assessment policy so that it aligns with a new risk-based monitoring and tracking system.

- Track compliance with risk-based monitoring in accordance with current APD policies.

  APD has developed a risk-based monitoring IT system. The system links direct & indirect contacts with a consumer's risk assessment.

- In coordination with the Oregon Home Care Commission and SEIU, establish minimum homecare worker training requirements and develop refresher courses for topics covered in orientation.

  On November 27, 2019, a training curriculum was submitted for review. Orientation curriculum will be approved in December unless revisions are needed. Core training and the incumbent seminar was submitted in December and approved in January. The pilot plans to launch in early 2020.

- In coordination with the Oregon Home Care Commission and SEIU, implement a new model for managing the Homecare Worker program that lessens the workload of APD staff working in the CEP program.

  On August 20, 2019, APD and SEIU jointly determined that the 2019-2021 biennium needs to be focused on successful implementation of the training partnership and the Electronic Visit Verification System. Both parties agree that we need to revisit this issue for the 2021-2023 biennium.

- Establish a skills assessment for homecare workers to assure that they have the skills, knowledge, and abilities to provide consumer care.

Senate Bill 1534 (2018) required DHS to "establish procedures for testing home care workers and personal support workers on their mastery of the skills and knowledge to be acquired through the minimum training." APD plans to hire a consultant to develop both core training curriculum and a corresponding skills assessment.

The Oregon Home Care Commission is also developing a pre-employment assessment to help individuals determine if joining the homecare workforce is the best fit for them and whether they have the behavioral skills necessary to be successful.

- Take steps to ensure that case managers have the time to perform all necessary person-centered planning activities, including reassign financial eligibility determinations for medical programs and SNAP to other staff.

  APD is working to remove financial eligibility determinations from case manager duties.

  Local offices will implement this change in combination with the implementation of the Integrated Eligibility system which is anticipated to be available fall 2020.

  The Integrated Eligibility system will serve as a single application for multiple programs, including Medicaid, Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF), and Employment Related Day Care (ERDC).

  APD is also reevaluating its Workload Model tool. Currently, the Work Model measures tasks the case manager can do. APD is identifying ways to include activities that case managers are required to do but are unable due to time constraints. The division believes this change may result in future time-saving measures. Per SOS Audit Follow-up Report 2019-05, this recommendation is considered partially implemented.

- Work with the Legislature to ensure case managers are staffed at the level funded.

For the 2019-2021 biennium, DHS-APD proposed to the Governor a request for additional funding to ensure case managers are fully staffed. APD received funding for additional Case Manager positions in 2019-2021.

- Track and use data to improve the CEP program and inform decision making, including:
    - CEP abuse and neglect data separately from other settings,
    - CEP consumer direct and indirect monitoring frequency separately from all other care settings, and
    - CEP consumers who are considered high risk and whether or not they are getting the required risk-based monitoring

In 2016, APD initiated a process to procure a new adult protective services system referred to as the Centralized Abuse Management (CAM) system. The CAM system is scheduled to be active in mid-2018 in that we will have better APS data across all systems.

We have analyzed the costs/benefits of modifying our methods for monitoring direct and indirect monitoring. Ultimately, while there are some potential benefits, we have decided not to pursue this recommendation at this time. The purpose of the tracking report is to monitor compliance with critical federal regulations. The existing reports accomplish that requirement effectively. Additionally, we maintain the option to order ad-hoc reports to track this if determined necessary.

Because of the additional risk associated with these consumers, we are going to build new tracking reports that will facilitate enhanced monitoring of the high-risk population which will require system changes.

- *DHS has adopted a new Centralized Abuse Management (CAM) system that will allow APD to analyze abuse across different settings, including abuse committed by Homecare workers. At the end of 2018, all APD districts had implemented the system.*

- *A process for tracking risk-based monitoring, linking direct and indirect contact with the risk assessment has recently been developed. APD has delayed the rollout of this tracking system to update policies and train case managers.*

3. DHS: Foster Care in Oregon: Chronic Management Failures and High Caseload Jeopardize the Safety of Some of the State's Most Vulnerable Children, audit #2018-05 (dated January 2018)

- Review and address the four foundational recommendations outlined in the Public Knowledge report:
    - Improve the DHS culture
    - Focus the whole DHS Agency and Child Welfare on Safety
    - Adopt data-driven decision making; and
    - Increase staffing resources for Child Protective Services and other DHS entities.

a) Improve the DHS culture

DHS leadership has engaged in an intentional organizational culture effort agency-wide under the development of the RiSE initiative led by the Office of Reporting, Research, Analytics, and Implementation (ORRAI). As an agency we believe in an inclusive culture that is rooted in the agency's mission and cultivated by our employees. All individuals deserve to feel safe, valued, supported, strengthened, and engaged in their personal growth and the agency's growth.

Creating environments and interactions that honor individual and collective experience and knowledge can transform DHS to RiSE to be better tomorrow than we are today.

RiSE is a positive and intentional organizational culture of Oregon's Department of Human Services. It will build a better DHS through the collective commitment of employees, leadership, stakeholders, and clients. The purpose of this culture change is to begin creating environments and interactions that are supportive to all staff and

clients of the organization. The culture includes five primary elements including safety and well-being, caring and supportive relationships, high expectations and accountability, meaningful participation, and community engagement.

Several educational presentations were delivered in the fall of 2018. Groups have included the Office of Human Resources, the Office of Equity and Multicultural Services, Office of Child Welfare leadership, Self Sufficiency Programs leadership, Office of Vocational Rehabilitation leadership and SEIU.

Building sessions that involve staff from all DHS program areas including Child Welfare will begin in February 2019. These half day sessions will target staff and supervisors. Child Welfare field leadership and Central Office leadership will also participate in a building session. The purpose of the groups is to facilitate inclusive discussion that introduces staff to RiSE, develops a clear understanding of the current working environment, identifies culture gaps and indicators of success, informs training curriculum, and allows staff to give direct input into RiSE development and implementation.

Training will be developed and delivered to all staff within the agency. Training will be tailored to meet the needs of program areas and shared/central services. Leadership training will begin in June 2019 and will support leadership and management to become leaders for change. These trainings will equip managers with skills to support staff, navigate difficult conversations, create community engagement within a team and develop skills in leading from an equity and trauma informed approach.

b) Focus the whole DHS Agency and Child Welfare on Safety

The Unified Child and Youth Safety Implementation Plan was developed to address identified gaps in Child Welfare and the child caring systems throughout the state. This implementation plan responded to the independent review of child and youth safety conducted by Public Knowledge between February and September 2016. Because implementation project work crosses DHS programs, the Director's Office took the lead on moving the portfolio of projects forward through the work of the Executive Projects Team. The

projects were built upon trauma informed and culturally informed principles with youth and families at the center of the work.

In September 2018 the ten priority projects identified in March 2017 by the steering committee transferred from the Director's Office Executive Projects Team to Child Welfare Program for continuation of work and implementation. The work engaged, and continues to engage, a broad range of partners, including foster youth and foster care families, in an inclusive and transparent way.

In December 2018 Child Welfare successfully closed two completed projects, Centralized Hotline and Certification and Well-Being Review Process.

The Centralized Screening project is now known as the Oregon Child Abuse Hotline (ORCAH). A year ago, Oregon had 15 decentralized hotlines across the state with significant various screening practices. Today, the hotline is currently taking reports for 12 districts and the remaining local hotlines will be fully transitioned by April 2019. Calls will be received from across the state 24 hours a day, 7 days a week, 365 days a year. It will serve as the central reporting center for allegations of child abuse and neglect in Oregon. The benefits of this project are improved safety for children with constant and consistent training for staff, technology to capture real-time data and reliable customer service.

The Certification Safety and Well-Being Review project was formed to identify and establish oversight authority and develop a quality assurance process for an existing Child Welfare protocol. The protocol requires staffing for allegations of abuse or neglect involving foster parents that are closed at screening. Project workgroup members observed the process across the state and considered data collected from the staffing observations. Recommendations were developed and provided to the Child Welfare Program. Implementation of those recommendations will be integrated into the Coordinated Response to Abuse project.

c) Adopt data-driven decision making

DHS opened a new office, the Office of Reporting, Research, Analytics and Implementation (ORRAI), to spearhead using data for decision making.

ORRAI is beginning to introduce four predictive analytics tools to Child Welfare services, with the long-term goal of better focusing child safety services on children most at risk of abuse and cutting caseworker response and workload on low-risk cases.

In December 2018, Child Welfare began to pilot a Screening Predictive Analytics tool. The tool is designed to predict the likelihood of children being removed from their homes, and the likelihood that the child will be the subject of an abuse report in the next two years. If successful, this could help hotline call screeners and caseworkers better assess reports of abuse and neglect.

Three additional predictive analytics tools are tentatively scheduled for staff training or pilot projects in 2019 and early 2020, including a project that helps identify the best placement for each child entering care outside the family home.

d) Increase staffing resources for Child Protective Services and other DHS entities

The department's workload modeling has been recently moved under ORRAI. Out Office of Child Welfare Programs commits to working closely with this team to develop a workload model that accurately reflects the tasks and time required to do the work. We will present our findings to the Legislature and will seek their consideration in aligning resources and staffing with workload.

- Cultivate a culture of transparency, responsibility, respectful communication, and professionalism using an array of leadership tools and measurable through an independent work environment survey.

The Oregon Executive Leadership Team has championed clinical supervision as another initiative to move forward as a statewide best practice. Allowing our supervisors to spend dedicated time with our caseworkers will improve their skills, approach to the work, and provide much needed support. Our supervisors statewide developed the

foundation for a definition of clinical supervision. The definition for clinical supervision was developed to assist in identifying the primary skills necessary for a supervisor to effectively lead and support caseworkers.

The expectation is new caseworkers who have been with Child Welfare for less than two years will receive one hour of clinical supervision weekly with their supervisor. Caseworkers who have been with Child Welfare for two years or longer will receive clinical supervision with their supervisor at least one hour a month.

Child Welfare received a legislative gift to enhance the skills of supervisors. Supervisor trainers were hired to develop and provide training for supervisors in the field. Training outlines and curriculum were developed and delivered at statewide Supervisor Conferences in 2018. On-going supervisor training geared towards clinical supervision is being delivered at quarterly meetings, monthly webinars and through a supervisor newsletter. The newsletters contain articles about policy, practice, leadership, resources, self-care, announcements, technology tips, staff recognition, and follow-up communications for recent events. Content of the newsletter was developed almost exclusively with the feedback and requests of Supervisors in the field. A communities of practice structure is currently building designed and developed. Supervisor Training Redesign is a project within the Child Project and Implementation Plan (previously the Unified Child and Youth Safety Implementation Plan). The agency recognizes the need for updated training that aligns with best practices. Supervisors have indicated they desire enhanced training on issues relating to management, administration, human resources, and clinical supervision.

Five Supervisor competencies were developed to provide the foundation for the necessary enhancements or redesign of supervisor training: Clinical Supervision, Leadership, Partnership, Social-Systemic, and Rule. These competencies will provide the Supervisor Training Redesign workgroup with the foundation to analyze on-hand and future curriculums, as well as provide potential vendors with expectations in anticipation of a request for proposal. A Supervisor Training Workgroup is currently researching a leadership model, existing training curriculums, and clinical supervision practice conducted by child welfare agencies outside of the state of Oregon to identify the key components of a curriculum and training program that will result in competent, confident leaders in Child Welfare. Child Welfare requested assistance from Casey Family Programs with a curriculum analysis for

supervisor training from the State of Connecticut, Los Angeles County, Northern California – Bay Area, and the State of Tennessee. This analysis was completed and provided to Child Welfare.

Director Jones has built the Oregon Executive Leadership Team with the assistance of Casey Family Programs. This team is comprised of statewide District Managers and Central Office Senior Program Managers who are committed to moving the Child Welfare Action Plan forward with one voice. This team works closely to develop strategies and goals to set the bar high for accountability

and outcomes. This team recognizes the passion in each one of our staff and accepts responsibility to develop their potential through best practices such as clinical supervision, trauma informed care, overtime reduction and data informed decision making.

One of the outcomes we are working on is retention of staff. We are implementing weekly confers with all caseworkers who have been with Child Welfare for less than two years. For caseworkers who have been with us over two years supervisors will have a confer with those staff at a minimum of once a month. These confers are one hour and in a private setting, so that they conversation can focus on excellent practice, difficult cases, and support for the new workers, so they do not become overwhelmed and leave the agency. All supervisors across the state are receiving clinical supervision training during their quarterly meetings which will ensure consistency of practice.

The Oregon Executive Leadership Team has committed to the development of a statewide trauma response plan to help us lead through trauma, support our staff, and embrace and support our clients who are living in trauma. This project is broken into three main bodies of work: 1. How do we lead through trauma; 2. How we care for ourselves and staff through trauma and creating a resilient workforce, and 3. How do we take care of our children and families through trauma informed practice.

In Summer 2018 our Senior Program Managers, District Managers, and Field Program Managers received training provided by Dr. Christopher Wilson, a nationally known expert in the field. Following the training the Oregon

Executive Leadership Team began developing a plan to implement trauma informed care training for staff statewide. Delivery of training will begin with a 90-minute training that will give each worker three tools to cope with trauma. This training will be delivered to our casework staff statewide during Regional Training Days beginning in April 2019.

Our caseloads may never reduce unless we recruit more staff. As we continue to work on stabilization, we will offer the four-hour training, and then an annual training that may consist of 8 to 16 hours. These trainings will enhance our staff's skill level, so they can care for themselves and for the families they serve.

- Review the structure and organization of key child welfare programs to identify and understand long-standing issues and system weaknesses; set policy and communicate expectations to ensure appropriate implementation of changes; and ensure that changes are not simply reorganizations or movement of employees but help management to address root problems.

  The Central Office Senior Managers combined with the District Managers bring skills and energy and are making significant strides in reshaping the Leadership Team. The past twelve months has offered a robust development and formation of the Oregon Executive Team which offers leadership development and support for senior managers across the state. In partnership with the Casey Foundation, the first few months of work with this group allowed for the launching of a new way of approaching team and partnerships, setting expectations, and holding each other accountable in our program oversight and leadership. Priorities were set that included clinical supervision, data-driven decision making and trauma informed care. Continued development of this strong team will support cohort experiences for new managers, partnerships and relationship building and shared problem solving on challenges all managers face.

  Director Jones has hired a team of six new senior managers that are focused and engaged in the transformative work for culture change, are engaged in respectful communication with staff and clients, leadership, and accountability through the work. Her vision of Central Office working in partnership with the Field Offices, both in practice

improvements as well as shared communication, has been instrumental in making the culture shift we all are working so hard on.

Weekly Central Office senior management meetings are now an expectation of all mangers, supporting strategic planning efforts, reviewing and determining agency wide budget priorities and IT project priorities, and truly thinking as one leadership team to support the agency's work and the work in the field through a lens of partnership and collaboration.

The purpose of the Central Office Policymaking and Communications Protocol is to document the requirements that Central Office staff must follow when engaged in policymaking and related communication.

The Central Office Policymaking and Communications Protocol is intended to:

- *Increase consistency, accountability, and transparency in how policies are created and communicated;*
- *Ensure policy changes are fully communicated across the Department and implemented by field staff with sufficient support from Central Office staff;*
- *Ensure collaboration externally with children and families served by the Department, providers, and other stakeholders so that all consequences of policy are considered; and,*
- *Ensure consideration of workload, resources, cost, and other impacts on staff and stakeholders.*

- To advocate more effectively for program and staffing needs to the Legislature, use clear and accurate data to support budget requests and show the effects of under budgeting on program stability.

The 2019-21 Department of Human Services' Agency Recommended Budget (ARB) included a policy option package (POP) which would increase Child Welfare staffing. The program is underperforming in most areas because of the gap between staff and expectations. The current staffing levels, coupled with a turnover rate, prevents the Child Welfare Program from being able to perform to expectations. This POP would bring the Child Welfare staffing up to 100% of what the Workload Model calculates as needed to accomplish the work. Adequate staffing would allow caseworkers to provide support and attention to the needs of foster families resulting in preservation of

placements and increased retention of foster parents. In addition, with staffing at 100%, the Child Welfare Program will be able to provide better outcomes for Oregon's children and families, decrease disproportionality of children entering our system, better retain and recruit foster parents, and support a currently overburdened workforce, resulting in staff retention and satisfaction.

In the February 2018 session, the Department of Human Services defined the size of the gap in current Child Welfare field staffing. The Legislature provided 186 field positions to help close the gap. The hiring of these positions started in April 2018 and continued through January 2019.

In April 2018, 25 Case Aide positions were released for hiring with 25 more released in July 2018. These Case Aide positions are focused on taking on tasks that relieve caseworker workload and stress and reduce unpaid overtime. Those offices that received these positions would tell you they have reduced workload for our caseworkers.

The 2019-21 Governor's Recommended Budget includes 224 new positions to address caseload growth. The break-down of the positions are 150 Caseworkers (SSS1), 24 Supervisors, 6 Office Managers and 44 Business Support Staff. Case Aides provide direct assistance with administrative tasks to relieve some of the caseworker workload – things like narration of notes, filling out paperwork for placements, uploading documents, and taking notes during home visits. Case Aides were not included in the workload model allocation and to best support our Caseworkers, 19 Case Aide positions would be needed. In addition, to meet the legal workload and requirements, 11 Paralegal positions would be needed to support the number of caseworkers.

Child Welfare continues to monitor the total number of caseworkers hired, promoted, and separated monthly. The number of caseworkers separated continues to trend downwards, while the number of caseworkers hired is trending upwards. We have partnered with Human Resources to identify the number of true vacancies within Child Welfare. As of January 29, 2019, there are 73 current vacancies out of 3118 total positions. Our field supervisors are working diligently to move through the hiring process to fill vacancies as the need for full staffing is a priority.

- Implement a thorough and ongoing evaluation process for agency programs and initiatives, including the following actions:

    a. Consider overhauling or replacing the OR-Kids case management system and continue to apply lessons learned from this and other projects to future information systems projects;

    b. Review the Oregon Safety Model to ensure that staff fully understand and can apply key concepts and more effectively safeguard child safety;

    c. Assess the true impact of the move to centralized screening on statewide staffing resources and the consistency of the screening function; and

    d. Assess the two-track investigative model used by CPS and OAPPI to ensure all identified gaps are addressed and consistency of response to reports of child abuse and neglect.

a) Recently, federal rules changed child welfare data systems from statewide automated child welfare information systems (SACWIS) to comprehensive child welfare information systems (CCWIS). Under the new CCWIS rules, states are required to share their system 'code' with other states. We feel strongly that waiting to review other state's CCWIS systems, seeing how successful they are and benefiting from their lessons learned, will inform Oregon's decision on whether to overhaul or replace OR-Kids. Our OR-Kids business analyst team will work closely with the Department's Office of Information Systems (OIS) technical team to establish a shared team that includes OR-Kids business analysts, OIS technicians, and field end users to prioritize changes that will improve the end-user experience with OR-Kids. This team will conduct branch visits and interviews with end users to help guide decisions to make OR-Kids more user friendly and to help improve data quality. Continue to apply lessons learned from this and other projects to future information systems projects.

b) Our Child Safety Program team is responsible for development of Oregon Administrative Rules, procedures and training as well as implementation of state and federal legislation impacting the child protective services program. They provide consultation, coaching, training, technical assistance, and guidance to District Managers, Child

Welfare Managers, Child Welfare Supervisors, Child Welfare caseworkers specific to the Oregon Safety Model (OSM).

This team is working hard to partner with our field around overdue assessments as they travel to one district at a time to engage in "blitzes" across the state. The consultants focus on OSM practice. As we are closing overdue assessments, we are teaching practice and creating a sustainability plan with the branches with the leadership team. Overdue assessments were reduced from 9,364 to 5,170 - a reduction of 4,194 - between August 2018 and February 7, 2019. One critical part of sustainability is the weekly clinical supervision with supervisors and caseworkers during which time they discuss OSM practice.

Child Safety and Permanency Consultants provide advanced training to the field. Forty-six OSM mini trainings to cover elements of the practice model, documenting to safety, etc., were conducted. OSM Computer Based Trainings are a pre-requisite for new caseworkers before they attend Essential Elements training through Portland State University.

ACTION Center for Child Protection and Casey Family Programs analyzed the consistency of the existing screening function and a new training is being planned around the Oregon Safety Model. The training development and curriculum was completed in December 2018. A full training plan has been developed and a training program began in January 2019. This training will work to apply the Oregon Safety Model to screening functions within Child Welfare.

c) *Management implemented a "Discovery Team" process, facilitated by John Bernard, a contractor with the Governing Institute. Initial assessment identified a staffing/workload imbalance; as original workload model for screening was based on the number of OR-Kids reports, not the actual number of calls/LEA reports received. Based on these findings, a new workload model for screening will be developed and is anticipated by June 2020.*

d) *The Child Welfare Safety Program, OR-Kids and OTIS (Office of Training, Investigations, and Safety) continue to meet to identify the most efficient business processes between CW and OIT to support consistent and thorough safety*

assessments for children. OIT staff are currently reviewing OR-Kids functionality to provide feedback and inform the level of effort to implement system changes to facilitate OIT use of the OR-Kids system. Any requested system changes will take time to prioritize and implement. The implementation of this recommendation is revised to June 30, 2020.

- Establish safe mechanisms for staff to provide input, and develop a transparent process for reporting concerns, tracking them, and ensuring top management takes action to resolve them.

  The new Child Welfare Spotlight newsletter launched in September 2018. The newsletter is a tool that Child Welfare Program has been utilizing to consistently communicate with staff. The newsletter aims to reconnect Central Office and Field, promote program efforts, spotlight staff, identify resources and share success stories.

  To increase staff engagement and feedback, a variety of tools have been implemented including email boxes, field newsletters, engagement surveys and organizational assessments.

  Child Welfare Director Jones encourages staff to express their concerns, struggles and successes in any forum our staff feel most comfortable. She feels it is important for staff to feel empowered to share their voice with our legislature as well.

  A goal of DHS and Child Welfare leadership is to retain committed, high-performing staff who reflect the diversity of Oregon communities and the families we serve. We know how important it is to positive outcomes for families and our work environment.

  In an effort to provide this crucial information, Child Welfare is partnering with the Office of Research, Reporting, Analytics, and Implementation (ORRAI). ORRAI has developed an engagement survey for Social Service Specialist 1 (SSS1) positions that focuses on helping us determine when and why they choose to leave their positions. Surveys are sent to staff with three years or less of experience on a quarterly basis, and those with three years or more experience on a yearly basis. By surveying those in the SSS1 classification repeatedly over their early employment, the

agency hopes to identify when and why engagement begins to decline. Data gathered from this survey will be analyzed along with Human Resources data. This analysis will help inform the following:

- *Statistical models that identify when SSS1's are likely to leave Child Welfare,*
- *Interventions that will address early engagement deficiencies and increase SSS1 retention, and*
- *A typology of successful and unsuccessful SSS1's that can be used to inform recruiting efforts*

- Develop and implement a statewide strategic plan to increase foster care capacity that includes using data analytics and tracking to target the recruitment of foster care placements for every district in the state. The strategy should include targeted recruitment of specific types of placements (career foster parents, therapeutic foster beds and culturally appropriate placements).

  The Foster Family Recruitment Team was included in the 2019-2021 Governor's Recommended Budget. This team will be comprised of Family Retention and Community Engagement Champion positions. This position will improve retention and recruitment outcomes for foster families in local communities. They will be responsible for managing, planning organizing and leading assigned projects, programs and activities to enhance the recruitment, retention, support and engagement of resource families and Community Program development. This position will also lead efforts to research, develop, train, and establish a customer service approach, culture and framework for DHS Child Welfare staff and achieve the overall mission of the Department.

  This position is responsible to serve as liaison and leader between DHS and Foster Families as well as various public, private, and non-profit organizations locally and statewide. This includes collaborating, coordinating, and communicating with Foster Families and District Management leadership teams to assure necessary information, data and program policies and rules are being shared, as well as participating in group efforts and committees with community partners and other key stakeholders.

  This position will be responsible for monitoring performance, evaluating findings and data, and preparing comprehensive reports and recommendations for the Central Office Foster Care Program

and District Management teams. They will be responsible for facilitating and coordinating the development of local Oregon Foster Family Retention Recruitment and Support Diligent Recruitment plans which are a driven by data with a customer service approach to the recruitment and retention and support of resource families. The reports created, managed, and tracked through this model will go to inform DHS Child Welfare Annual reports.

With the assistance of the Office of Research, Reporting, Analytics, and Implementation (ORRAI) the Foster Family Retention and Community Engagement Champion will also utilize, collect information for data reports and GIS maps.

The Office of Reporting, Research, Analytics, and Implementation (ORRAI) is utilizing research to estimate the number of placement beds (e.g. foster care, proctor care, residential treatment, etc.) necessary to optimally serve the substitute care population. The project team completed 1,000 case reviews detailing child factors, environmental factors, family factors and other critical pieces of information at the time of removal. Researchers are now in the process of reviewing the data from case reviews as the project team moves forward with the next steps of conducting a full system inventory of available resources. The project goal is to utilize predictive analytics to understand capacity needs across the system so capacity gaps can be identified and closed.

- Collect and use data to improve the foster care system, including:

    a. the availability of foster home and the true capacity of available beds in the system;
    b. the rate of foster parent turnover and the number of foster parents trained per year; and
    c. a statewide dashboard to compare district performance on key metrics.

The Office of Reporting, Research, Analytics, and Implementation (ORRAI) is utilizing research to estimate the number of placement beds (e.g. foster care, proctor care, residential treatment, etc.) necessary to optimally serve the substitute care population. The project team completed 1,000 case reviews detailing child factors, environmental factors, family factors and other critical pieces of information at the time of removal. Researchers are now in the

process of reviewing the data from case reviews as the project team moves forward with the next steps of conducting a full system inventory of available resources. The project goal is to utilize predictive analytics to understand capacity needs across the system so capacity gaps can be identified and closed.

The Office of Reporting, Research, Analytics, and Implementation (ORRAI) is conducting a historic turnover rate analysis of foster parents. The results will create a baseline turnover rate for foster parents in Oregon and inform the Statewide Strategic Plan for Recruitment, Retention and Support at the district level.

Every Child Oregon has developed a statewide dashboard that is used by all its affiliates to capture information on all inquiries through its system. In 2018, Every Child partnered with Microsoft Philanthropies to build a Customer Relationship Management (CRM) system that will track community members who engage as a volunteer, attend an event, and/or donate a tangible or in-kind gift, through to their inquiry about foster parenting and support needs once certified. Their community engagement model from which the CRM system is created, tracks individuals to identify their pathway to engagement.

Through the data sharing agreement with DHS, Every Child and the agency will now be able to compare district performance on certification metrics and identify the rate of foster parent turnover for the individuals coming through their portal.

ORRAI is currently using geographic information systems (GIS) technology to create mapping statewide. The mapping will provide real-time data on how many children are in care by county/community, including demographic information. It will also show how many current foster homes are certified by county/community, identifying which are kith/kin and which are general applicants. The final deadline for this work is yet to be determined but expected in mid-2019.

- Remove unnecessary barriers that impede timely recruitment of foster families. Track certification of career foster parents from inquiry through certification and keep foster parents engaged during the entire process to increase the likelihood of certification.

  The Mobile Certification and Training Team created in May 2018 and continues to focus on processing foster parent applicants and provide on-site foster parent training to expedite the process for areas with a backlog. The team consists of three certifiers and two trainers.

  Improved staffing in the certification units has reduced workloads allowing certifiers to spend more time focusing on processing the applications of those seeking to become certified foster parents.

- Build a robust support system to retain career foster parents and reduce placement instability. This should include a foster care payment that fully covers the cost of caring for a foster child options for respite care providers and encouraging foster families to use respite care, and ongoing training and support to foster parents so they can continue to meet the challenges of fostering.

  A child-care reimbursement of $375 per child/per month was developed to assist with the cost of child-care for children through the age of five. The Department is evaluating the possibility of expanding the reimbursement to apply to foster providers caring for children up to age 12. The payment is being provided to foster parents who work. Training has been developed and offered as a webinar to Child Welfare office managers and business staff in April 2018. This webinar was recorded and is now accessible to staff. Child Welfare will continue to use data to monitor this program to ensure it is being utilized and providing adequate support.

  The legislature provided funding to support foster parents caring for foster children and young adults. This funding included respite care reimbursement for foster parents and flexible funds for tangible goods for foster parents to support placements.

The respite funds are child specific and are intended to be used for retaining the foster parent, providing placement stability, and meeting the individual needs of children and young adults placed in foster care. The limitation is up to three days of respite per month. The reimbursement rate is $55 per day per child; however, a program manager may approve respite longer than 3 days per month.

In 2018, DHS partnered with Every Child to build infrastructure and expand Foster Parents' Night Out (FPNO), a monthly four-hour respite care event currently at 19 sites across Oregon.

- Create and maintain a culture of respectful communication between foster parents and DHS caseworkers and allow staff time for caseworkers to build relationships with foster parents. Use foster parent satisfaction and exit surveys to measure the quality of the program over time to understand and address foster parents' concerns.

  The foster parent survey was developed and has been deployed. Results gathered have been reviewed and themes have emerged showing what foster parents were most and least satisfied with in their experience.

  Foster parents were most satisfied with:

  - *Respectful and supporting relationship with certifier*
  - *Fair treatment regarding race, religion, sex, gender identity, gender expression, sexual orientation, national origin, age, or disability*
  - *Treated with dignity, respect and trust*

  Foster parents were least satisfied with:

  - *Support from DHS dealing with the loss and separation when a foster child leaves my home*
  - *Ability to receive services needed to care for foster children from DHS 24/7*
  - *Receiving services to care for a foster child outside of regular working hours*

DHS is developing a more comprehensive, ongoing survey for foster parents. The survey will cover the range of foster parent experience from initial contact with the agency through the entirety of their time as foster parents.

The agency has also finalized a new exit survey for foster families and made it available online. DHS will use this tool to measure the quality of program and inform change. Different exit surveys have been available historically, but a formal policy and procedure is being drafted that will require all districts to utilize a standard exit survey.

DHS is working with the Governor's Advocacy Office and the Governor's Commission on Foster Care to gain better understand of foster family needs.

- Design a robust internal policy to reduce the risks of hoteling children by providing district caseworkers and office staff with clear protocols and operational support.

  A training was developed to familiarize DHS Child Welfare staff with the Temporary Lodging Settlement Agreement. This training is required on an annual basis for all SSS1s, Mentoring, Assisting, Promoting Success (MAPS) positions, Supervisors, Program Managers, and District Managers.

  At the end of the training, staff will be able to:

  - *Describe the importance of why children and young adults in the custody of DHS should be in appropriate placements and placement matching to the proper level of care;*
  - *Explain how the settlement connects to the overall well-being and safety of children;*
  - *Describe the requirements of DHS regarding the settlement agreement, including the reporting requirements of children or young adults who are in temporary lodging;*
  - *Locate where to access supports and resources and decide what to do if you're considering a temporary lodging.*

DHS Child Welfare developed a statewide protocol in 2017 to reduce the risk of placing children in temporary lodging. This protocol was distributed to all district caseworkers and office staff to provide clear direction and support for children who ended up in temporary lodging. An online training and classroom trainings were developed and provided to further educate and support all staff who were involved in cases where temporary lodging was needed. Furthermore, staff who provided supervision to a child or young adult in a hotel were required to read the protocol and complete the training.

After the final settlement agreement (FSA) was established in 2018, a new mandatory training was created to educate and support all staff related to the terms of the FSA. Moreover, this training includes explanations around appropriate levels of care, accessing education services, and lists ways to proactively support foster parents and providers. Finally, the training provides a list of resources to help staff reduce the risks of placing children in temporary lodging.

Most notably on the list of resources, is the DHS Child Welfare Director's temporary lodging placement approval protocol that was implemented in July 2018. This protocol outlines a centralized process through which staff could access support when a child is at risk of temporary lodging, it provides local branches a checklist of placement ideas, and a grid of afterhours placement resources. Additionally, there is a team dedicated to assist and brainstorm solutions with caseworkers, supervisors, program managers, and district managers. This team works with other government agencies, community partners, district leadership, the Department of Justice, and a technical advisor to help reduce any risks of temporary lodging.

Other efforts also include the following:

- *All staff has access to resources, protocols, updates, frequently asked questions (FAQs), past email announcements, and the like, on a website which is dedicated to temporary lodging.*

- *There are internal email boxes accessible by all staff with questions/concerns regarding temporary lodging or potential temporary lodging situations. DHS Field Services staff respond to provide information and support.*
- *A statewide communication team has been assembled and provides consistent updates, FAQs, and information to all district staff to assist with remediating temporary lodging.*
- *A new data tracking system and data collection protocols were developed.*
- *Numerous data walks were held with critical statewide stakeholders to review data related to temporary lodging, identifying root cause issues, and developing sustainable strategies to mitigate placement in hotels.*

There were also weekly meetings with the District Manager, Program Managers, Supervisors, and caseworkers from Multnomah County to strategize solutions for children and youth adult who were "hard to place" in this district.

Multi-system experts are now continuing this work through weekly staffing for children and young adults with challenging placement needs from across the state.

All above efforts and lessons learned further inform our capacity building efforts, ability to triage crisis more effectively and prevent crisis as an establish feedback loop is utilized and rendered in data.

- Commit to building foster placement capacity across the whole system for children with a range of behavioral, health-related, and cultural needs.

The Office of Reporting, Research, Analytics, and Implementation is utilizing research to estimate the number of placement beds (e.g. foster care, proctor care, residential treatment, etc.) necessary to optimally serve the substitute care population. The project team completed 1,000 case reviews detailing child factors, environmental factors, family factors and other critical pieces of information at the time of removal. Researchers are now in the process of reviewing the data from case reviews as the project team moves forward with the next steps of conducting a full

system inventory of available resources. The project goal is to utilize predictive analytics to understand capacity needs across the system so capacity gaps can be identified and closed.

The state, DHS, and partner agencies such as the Oregon Health Authority have taken some initial steps. Their actions include:

- *Expanding the River Rock enhanced supervision facility and opened a Regional Crisis Center, a secure psychiatric treatment program, in February 2019 with a planned 14-bed capacity.*
- *Forming new partnerships with mental health providers, adding residential beds and treatment for younger youth.*
- *Beginning work with the Foster-PLUS program in October 2018 to connect children, teenagers, and young adults who need extra support with care that's a step up from traditional foster care.*

Child Welfare is currently running a focused project plan to build a continuum of care that is effective and flexible to meet the needs of clients and the state in both the short term and long term. Both short-term and long-term strategies are being employed to build more capacity. Both strategies rely on data analytics to confirm and direct capacity-building decisions to ensure the system is right-sized and fiscally responsible.

Short-term strategies are focused around meeting the opportunities, regarding capacity building, and revolve around specific cohorts such as youth currently placed out-of-state, Temporary Lodging youth (i.e. youth in a hotel), and administrative partnering with cross-system involved youth (Delinquency, Office of Developmental Disabilities Services, and youth needing mental health treatment beds) to ensure our systems are responsive to placement needs.

Child Welfare has built a Temporary Lodging data system that, in conjunction with the OR-Kids system, allows us to identify and analyze placement needs. Short-term strategies are focused on expansion of existing providers' property, onboarding newly established Child Caring Agencies (CCAs), Proctor Care provider (formerly Therapeutic Foster Care) recruitment efforts, reducing the administrative burden for providers and agency partners, and providing supportive services for Proctor and Foster Care homes.

Long-term goals have a varied timeline from six months to five years. The goal is to build capacity that identifies cross-system needs for clients and builds targeted capacity to serve these needs. We know cross-system youth move more frequently and have extended stays while waiting for the most appropriate placement match in the Child Welfare system or other systems such as the I/DD or Oregon Health Authority systems of care.

Opportunities to build capacity have been identified such as younger youth who need Mental Health Treatment Beds, but who may be on a waitlist for three to six months. Child Welfare has been partnering with OHA and I/DD to find solutions. These projects are large, and it will take significant time to initiate and open facilities.

These long-term goals focus on residential levels of care and continued efforts toward building partnerships in support of onboarding new agencies. The Family First Act will also impact the pace of reaching these long-term goals as Qualified Residential Treatment Providers (QRTP) standards result in a greater administrative burden, increases in staffing expenses and more extensive regulations for new and existing partners to grapple with.

- Develop a strategy for ending the practice of placing children in hotels.

A Settlement Agreement Implementation Strategic Plan to capture current activities and identify future strategies has been built. The goal is to review the impact of strategies regularly and adjust as needed. To put these strategies to work will require engaging state agency partners, community partners and key stakeholders to help us address long-term, sustainable solutions to temporary lodging.

Internal efforts include:

- *Immediately responsive: Provide ideas, concepts, support, and services in real time to ensure children and young adults are not placed in temporary lodging. It is also important to provide a timely transition to an appropriate placement for those children or young adults in temporary lodging.*
- *Placement: Increase placement capacity and build a culturally responsive continuum of placements with private and public partners.*

- *Fidelity to Oregon Practice Model: Work with Districts to identify where there are gaps in fidelity to practice and address those by developing solutions to address case planning efforts.*
- *Prevention: Identify flexible funding to maintain current placements that prevent temporary lodging.*
- *Data and research: Use data analytics to inform, develop and revise strategies.*
- *Policy: Review policy issues ranging from partner and agency payment obligations to regulatory policies that have impacted capacity and identify potential solutions to address barriers.*

External efforts include:

- *Prevention: Identify community partnerships and innovative solutions to prevent the need for emergency placements.*
- *Equity-driven strategies: Recognize disproportionality of youth needing temporary lodging and engage staff and partners to build targeted solutions.*
- *Develop community capacity and increase engagement: Activate and align community partners to assist in addressing crisis.*

- Understand and clearly communicate child welfare field staffing needs to the legislature.

  The 2019-21 Department of Human Services' Agency Recommended Budget (ARB) included a policy option package which would increase the number of program design staff within Child Welfare's central office. During the past two biennia, the Legislature has provided additional frontline positions due to increased workload in the Districts. Since Central Office Program Design is not part of the current workload model, design has not received complimentary increases.

  Positions are needed to support the work of the field through policy and procedural development, rule and regulation implementation, and mandatory federal and state reporting. These additional positions will assist in addressing

Secretary of State audit findings and improve outcomes to Oregon's children and families by providing necessary services and supports to field staff.

The 2019-21 Governor's Recommended Budget (GRB) includes funding for a policy option package that would allow for the creation of a single call center by consolidating the 15 hotlines currently scattered around the state into a single location. It would provide for the additional Hotline staff needed to operate 24 hours a day, 7 days a week. It would also allow for the maintenance of advanced phone technology and other equipment such as desk-side scanners to support the work. The Child Abuse Hotline would be the point of receipt for all new allegations of child abuse and neglect. Child Welfare generates 7,000 reports of child abuse monthly. Statute requires all 7,000 reports be cross reported to the appropriate Law Enforcement Agency (LEA) jurisdiction. This policy option package requests funding for the facility, positions, and enhancement of technology to help bridge the communication gap with the field offices and our law enforcement partners, especially.

The 2019-21 Department of Human Services' Agency Recommended Budget (ARB) included a policy option package for permanent funding of 28 current Case Aide positions that are hired but have not been funded. Case Aides provide direct assistance with administrative tasks to relieve some of the caseworker workload – things like narration of notes, filling out paperwork for placements, uploading documents, and taking notes during home visits. This support has the potential to reduce caseworker burnout and attrition, maximizing approximately $28,000 in training cost and 18 months required to bring each new caseworker up to full capacity. Child Welfare has piloted these positions to determine if they are successful in relieving caseworker workload. Early caseworker feedback indicates that these positions are having the desired impact.

- Review, revise, and update the current workload model to reflect recent policy and procedure changes and field staffing needs.

  To update the current Child Welfare Workload model and more accurately predict full-time employee (FTE) needs within Child Welfare, ORRAI launched Random Moment Sampling (RMS) surveys to collect data. Previously, this data was collected through shadowing field staff and manually tracking activities. Using the RMS survey method,

we will more accurately predict full time employment needs within Child Welfare. Earnings through the workload model provide the basis for position acquisition and funding. The RMS method will provide a more accurate picture of current workload for the SSS1 position, and the staff needed to ensure the work is done.

- Work with the legislature to increase child welfare field staffing according to the revised workload model and reduce the number of field positions held vacant to balance the budget, in order to reduce child welfare caseloads to manageable levels.

  Efforts are being made to adequately measure and describe the staffing gaps using data driven tools, tracking measures and analysis. In the February 2018 legislative session, Department of Human Services defined the size of the gap in current Child Welfare field staffing. The legislature provided 186 field positions to move toward closing the gap. The hiring of these positions was staggered from April 2018 through January 2019.

  As of January 2019, Child Welfare has 173 double fill positions throughout Central Office and the Field, with an additional 49 temporary positions to support the work. Even with those 222 additional staff, the work continues to be more than is manageable.

- Monitor caseworker caseloads, district staffing allocations, and the impact of turnover, overtime use, lack of experience, and FMLA use on caseloads to support equitable staffing allocations across the state.

  Efforts are being made to adequately measure and describe the staffing gaps. In the February 2018 legislative session, DHS defined the size of the gap in current Child Welfare field staffing. The legislature provided 186 field positions to help close the gap. The hiring of these positions is staggered from April 2018 and continues through January 2019.

  The 2019-2021 budget was submitted with Policy Option Packages for each program area asking for 100% staffing levels to support the workload.

Working directly with Human Resources, Child Welfare has been able to improve the tracking positions in the requisition process and is greatly improving the recruitment and hiring data as related to actual vacancies and filled positions. The program is focusing on the hiring of case aides who can take some of the workload and stress off caseworkers and reduce unpaid overtime, which will help reduce staff turnover.

The creation of a Business Manager position occurred and was hired in early 2018. This allowed Child Welfare to focus on budget oversight, analysis and communication with position management expertise for all positions, vacancy tracking and staffing allocation. The development of organizational charts for each office has proven to be beneficial in position management and vacancy tracking.

The Oregon Executive Leadership Team has made a commitment to the reduction of overtime within the 16 statewide districts. The Child Welfare Director's expectation is each District Manager will manage their overtime and do so in a way that ensures child safety while honoring the work-life balance that our staff need and deserve.

We have seen a significant drop in overtime from both better management of the reasons for overtime with the clear expectation of asking District leadership to hold employees accountable for their usage of overtime. Additionally, the reduction of youth in hotels has also contributed to less staff hours needed to support these youths.

- Develop and implement strategies to reduce and mitigate workload stress factors, reduce staff turnover, and reduce the use of paid and unpaid overtime by child welfare field staff.

In the 2018 legislative session, HB 5201 established a new $2.5 million Special Purpose Appropriation (SPA) for the Department of Human Services Child Welfare program as the agency continues to develop and implement our action plan to improve child safety, stabilize the workforce and help foster families.

Over the past year Child Welfare has engaged in several initiatives to improve safety, stabilize the workforce, and support foster families through modification of existing practices, enhancement of accountability and investments with our current budget capacity. This SPA gives Child Welfare the opportunity to request funds to expand our ability

to view the Child Welfare system from a different perspective and implement ideas that are not only out of the box, but also have not been carried out in our system before.

Child Welfare is creating a pilot of a "floating pool" of retired Social Service Specialist 1s (SSS1), Social Service Specialists (SSA) and Supervisors in good standing, to be a relief pool for current staff. It is no surprise that Child Welfare caseworkers are over worked, carrying cases more than double what the workload model would suggest is manageable and dealing with cases that are physically and emotionally demanding.

These will not be temporary positions rather when a current caseworker in a District submits a request for vacation/FMLA/OFLA or resigns, we can retrieve the list of available retirees and call an individual from the pool to preplan and account for needed coverage. This pool of relief workers will have CJIS clearance, an OR number and security access so that they can hit the ground running. This idea is similar to how school systems utilize substitute teachers.

The Office of Reporting, Research, Analytics, and Implementation developed a staff engagement survey for all staff in an SSS1 position. Surveys are sent to staff with three years or less of experience on a quarterly basis, and those with three years or more experience on a yearly basis. By surveying those in the SSS1 classification repeatedly over their early employment, the agency hopes to identify when and why engagement begins to decline. Data gathered from this survey will be analyzed along with Human Resources data. This analysis will help inform the following:

- *Statistical models that identify when SSS1s are likely to leave Child Welfare*
- *Interventions that will address early engagement deficiencies and increase SSS1 retention*
- *A typology of successful and unsuccessful SSS1's that can be used to inform recruiting efforts.*

To understand the reasons why staff leave, the Workforce Recruitment and Retention Workgroup partnered with the Office of Reporting, Research, Analytics, and Implementation to create an exit interview survey for use statewide. We believe exiting staff offer a unique perspective on the strengths and weaknesses of the of our agency, including

information about their work experiences and why they have chosen to leave. The survey will be sent to all staff voluntarily exiting the agency. The data gathered from this survey will be used as part of our continuing efforts to improve policies, practices and programs as well as to develop training opportunities that will create a more favorable workplace and work experience for our staff.

- Take the following actions to improve caseworker staffing and training:

    a. Work with DAS to review the Social Service Specialist 1 classification and consider separating casework positions into separate classes;

    b. Consider developing a career ladder for skilled caseworkers, supervisors, and support staff.

    c. Continue to develop and review training and professional development of casework staff and supervisors in conjunction with community partners.

a) DHS Human Resources has been working with DAS classification and compensation unit to initiate classification reviews specific to SSS1s. While the reviews will be beginning, the timeline for working to implementation has been moved to July 1, 2019 given the collective bargaining timelines. The addition of the MAPS position provides a step in the career ladder between a Child Welfare Caseworker and a Supervisor.

b) The MAPS position provides coaching, mentoring, training, and subject matter expertise to the branch. In addition, MAPS need to develop their skills of influence, providing feedback, and having difficult conversations as they move into a leadership role that does not come with authority. This skillset is necessary to move into a Program Consultant or Supervisor position. The Case Aide position was developed utilizing the Social Service Assistant (SSA) classification to provide assistance to caseworkers in duties that could be completed by an SSA. Due to the responsibilities of the case aide being shared between administrative support and casework, it provides a unique opportunity for business support staff to promote and gain more experience in casework.

House Bill 2033 removes education requirements from statute for case workers. Child Welfare caseworkers are one of the few professions that have their educational requirements defined in statute. This has restricted our ability to hire quality individuals who may have entered this line of work on a different path. Child Welfare staff are some of the most dedicated state workers. There are many instances where we could recruit staff who have worked in the field and would be a tremendous asset to casework but would not qualify due to the formal educational requirements. In order to build a more culturally and linguistically responsive workforce DHS needs the appropriate discretion to value and recruit individuals with lived life experience. This may include commensurate valuing of lived experiences, cultural and linguistic expertise and standing in community. This will allow us to recruit recognized and trusted community leaders and brokers more effectively, making it possible to leverage community strengths, familial supports, and cultural resiliency factors.

While this bill requests removal of the requirement in statute and will allow us to define minimum qualifications necessary for the position, we take the responsibility of hiring and ensuring we have the right people in the right jobs. We would expect that this flexibility would not only complement our current workforce but help us to continue to move towards excellence.

c) *Monthly conference calls are hosted via Skype for MAPS to remain connected to one another across the state, inquire to central office for direction or clarification, share successes and ask for assistance in managing new challenges.*

Child Safety Consultants in partnership with the Butler Institute will be providing train the trainer coursework on Chronic Neglect to Consultants, Managers, and MAPS for further training to the field.

Caseworkers, Managers, Consultants, and MAPS are being sent to the annual Child Abuse & Family Violence Summit. It is a three-and-a-half day, multi-disciplinary conference for professionals working in the areas of investigations, interviewing, assessment, prosecution, and treatment of child abuse, neglect, and domestic violence. It is hosted by the Clackamas County Sheriff's Office Child Abuse Team and the Domestic Violence Enhanced Response Team (DVERT).

Supervisors are attending Kinship Traditions of Caring and Collaborating: A Trauma-Informed Model of Practice. This is a specially designed training for public and private agency Supervisors and Child Welfare Workers.

- Ensure adequate facility space and technological support throughout the state to absorb needed child welfare staffing increases and support quality casework.

  The Office of Child Welfare Programs commits to working closely with the Office of Information Systems (OIS) and Facilities to assure adequate facility space and technological support to support quality casework. This is contingent upon receiving additional staffing allocation from the Legislature. Anticipated completion date is January 1, 2019 and ongoing.

- Work with the department of Justice and the Legislature to improve caseworker access to legal representation and legal case management support.

  DHS, through the Oregon Department of Justice, has taken substantial steps to increase the depth of legal representation for caseworkers, crucial since appearing in court is a major part of a caseworker's job.

  Implementation of full legal representation of caseworkers by the Department of Justice is occurring in three phases covering caseworkers in different counties. The first two phases have been completed, with the third phase scheduled for July 2019. Initial reports from 127 caseworkers affected in phase one found 55% agreed that their overall experience of the court process has been more positive since this representation began.

- Consider implementing casework teams for responding to potentially dangerous calls and managing unusually complex or difficult cases.

  Caseworkers are strongly encouraged to partner with law enforcement when responding to calls and especially with potential safety issues. In some circumstances and depending on staffing levels, CPS workers can go out in pairs, partner with a consultant, MAPS or a supervisor.

Portland State University has been contracted to develop a worker safety training for Child Welfare staff. Our Human Resources Safety, Health and Wellness Team engages with our local branches to conduct environmental assessments and provide assistance with safety training.

Legislation was passed in 2015 which allows for the Attorney General's Office to bring an action for a citation or stalking protective order on behalf of an employee of DHS who is the subject of repeated and unwanted contact by another person that causes alarm or coercion to the employee.

DHS employees may obtain a Protective Stalking Order if they the conduct a Child Protective Service (CPS) assessment, removed a child, prevented return of a child, or involved in developing a case plan or making a placement decision.

Communication during and after an incident is vital to ensuring a situation is responded to properly, has been fully resolved, and any improvements to processes have been made. Entries into the Threat Incident Notification System (TINS) shall be made as soon as possible after an incident has occurred and will be updated continuously until the threat is considered no longer viable. It is important that the responsible manager ensure that the information is entered into TINS and remains current as the situation evolves.

- Ensure that the central and district offices are in regular communication with field offices throughout the state and provide the necessary support and resources to field offices when requested.

  The Oregon Executive Leadership Team is comprised of statewide District Managers and Central Office Senior Program Managers who are committed to moving the Child Welfare Action Plan and works closely to develop strategies and goals to set the bar high for commitment and outcomes. This team has developed clear and consistent communication through monthly meetings, workgroup opportunities and joint projects.

  The new Child Welfare Spotlight newsletter launched in September 2018. The newsletter is a tool that Child

Welfare Program has been utilizing to consistently communicate with staff. The newsletter aims to reconnect Central Office and Field, promote program efforts, spotlight staff, identify resources and share success stories.

The Child Welfare Director asked that a suggestion email box be created and publicized to Child Welfare staff, so they had a ready means of offering ideas about how to improve the work of Child Welfare. While the box was being created and made available, a protocol was developed to ensure there would be a response to each suggestion and establishing timeframes for that response.

Once received, suggestions are directed to offices and units within Child Welfare, other agencies within DHS and entities external to DHS. Since the CW-Staff Suggestions email box was made available in February 2018, 132 staff ideas for improvement have been received.

The field offices have asked for a directory with contact information for those in central office that they need to work with to complete duties or contact for support, consultation and approvals. "Who Does What at Central Office" provides a unit-by-unit list of central office staff, their contact information and their field-facing duties. It also includes a list of the dedicated email boxes that field staff need to use to gain information, submit questions, submit forms, and seek approvals. A statewide organizational chart and a contact list for field-based management staff were incorporated at the request of field staff.

4. DHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2017, audit #2018-11 (dated April 2018)

- Recommend management ensure the transaction review process includes examination of proper coding and accounting periods.

  The procedures that affected the fiscal year 2018 audit were updated and no additional errors were present in the fiscal year 2019 audit.

- Recommend department management continue to pursue system changes to OR-Kids to prevent transactions from reimbursing outside the period of performance. In the meantime, the department should develop a process to better identify transactions that are appropriate to net and transactions that should not be netted to ensure adjustments are reported appropriately.

  A report has been developed that allows DHS to analyze increasing and decreasing adjustments, isolating increasing adjustments that fall outside the period of performance. DHS is no longer netting increases and decreases beginning with the filing of the June 30, 2018 CB-496 report.

  The analysis of reviewing all activity back to September 30, 2011 (27 quarters), to evaluate if any federal funds were improperly claimed beyond the two-year limit has been completed. Repayment from this analysis was reported on the March 31, 2019 CB-496 report in the amount of $6,477,561.66. Additional information is attached detailing the repayment by program and correlating the CB-496 decreasing reporting lines with each repayment quarter.

- Recommend department management ensure adequate contract monitoring processes are in place to provide assurance that the department is receiving the services provided for in these waiver-based contracts. We also recommend department management seek clarification regarding allocation of equal monthly payments among clients served and verify that startup costs, camp services, and pre-paid flexible funds are appropriate waiver expenditures.

  These findings are connected to the use of Title IV-E federal funds. For these specific services and contracts, the IV-E funds were only allowed under the Title IV-E waiver, which ended September 30, 2019. Therefore, there are no longer concerns about inappropriate federal fund claiming because these contracts are only using the General fund. No new contracts were entered into during State fiscal year 2019 that would use Title IV-E funds.

- Recommend department management ensure all required documentation is completed timely, reviewed, and maintained, and that eligibility is determined appropriately. We also recommend department management reimburse the federal agency for costs paid related to ineligible providers.

The error cases identified, leading to this finding, have been corrected. Both of these errors happened prior to OR-Kids enhancements that prevent full certificates of approval unless all required pieces of work have been completed and entered into the record. We see improved documentation and accuracy since the implementation of those enhancements.

Because the Department has had other findings related to IV-E claiming during a temporary certificate of approval, a report was designed and implemented. The EL-3026-D Foster Care IV-E Eligibility & Certification Status Detail allows the user to identify cases I which children are placed with temporarily certified providers and are IV-E eligible/reimbursable. The EL-3026 was implemented in June 2019.

- Recommend department management review OR-Kids transaction processing and make system modifications as appropriate to ensure proper financial reporting of program expenditures. We also recommend department management review prior year and current year transactions and reimburse the federal agency for grant expenditures claimed inappropriately.

  This audit finding was partially mitigated by OR-Kids JIRA# 25911. The system is not allowing placement corrections on service types with age bracketed services. This system correction will now calculate the Placement Begin Date against the participant's DOB, allowing retroactive placement corrections for all age bracketed service types. This change was put into production on January 23, 2019.

  A report has been developed to identify adjustments that impact a state grant rather than the federal grant and is the validation stage. Once the report is completed, the report will be used to accurately report federal expenditures. The new report will be used for the reporting period ending June 30, 2020.

- Recommend management strengthen controls to verify applications exist during client eligibility redeterminations, perform timely eligibility redeterminations and verification of client resources, close benefits for clients no longer eligible, and ensure eligible clients are enrolled in both Medicare and Medicaid.

We also recommend management correct all identified issues and reimburse the federal agency for unallowable costs.

The department is committed to providing timely benefits to only those individuals who are appropriately determined eligible. The department has taken positive steps since the fall of 2016 to improve its business reporting capabilities for tracking and remediating untimely Medicaid redeterminations. The department expects that the technological advancements and improved functionality of the new Integrated Eligibility (IE) system will provide greater operational opportunities to strengthen its client eligibility controls specifically related to the timeliness of determinations, correct enrollment and the electronic retention of required eligibility data elements such as signed applications. In addition, the department is engaged in efforts to restructure existing caseworker training to support and align with the new Integrated Eligibility system, which will reduce the risk of administrative errors. Similarly, the department expects that the statewide implementation of the Centers for Medicare & Medicaid Services (CMS) approved electronic Asset Verification System (AVS) will provide client resource information in a more timely, robust and comprehensive manner. All unallowed costs have been repaid.

- Recommend management strengthen controls to ensure documentation supporting a provider's eligibility determination is retained. For current providers with missing documentation, we recommend the department verify they are eligible to provide services and obtain the necessary documentation.

  The Provider Enrollment unit has implemented the quarterly data pull for missed checks. Initially how the data was pulled from MMIS and the content of the data caused delays due to the volume and sorting through the provider file. Those issues are being worked through and as additional reports are pulled the process will become more streamlined. The next data pull is on track and scheduled for July 2019.

  The Office of Developmental Disability Services (ODDS) has begun the process of amending the contract with PPL, the Fiscal Intermediary, to validate the I9's prior to paying providers. We anticipate the completion of this amendment by December 31, 2018. In addition, questioned cost of $5,573 has been reimbursed as of September 30, 2018.

The management of the Oregon Health Authority (OHA) Provider Support Services conducted specific database check training for enrollment staff between December 2017 and February 2018. The state will provide additional database check training beginning July 2018 as part of a second enrollment quality improvement plan and continues to pull quarterly, a missing database check report, to ensure all missing database checks are completed.

For the one provider that was the responsibility of the Aging and People with Disabilities program (APD), the Department obtained a current completed I-9 form and confirmed the provider's eligibility; therefore, there are no questionable costs remaining for the APD program.

- Recommend department management ensure a client's monthly copay is correctly calculated and applications are retained. We also recommend department management reimburse the federal agency for unallowable costs.

  DHS completed the reimbursement to the federal agency for the known questioned costs of $1,939 on June 21, 2018.

  Child Care Policy reissued a transmittal (SS-IM-18-016) on June 15, 2018 to department staff as a reminder to reinforce the importance of increased accuracy in the Employment Related Day Care (ERDC) Program.

  Quality Assurance in collaboration with Quality Control and Policy Analysts completed a focused review of ERDC cases the first week of August 2018. Quality Assurance, also in collaboration with the policy team, published another specific edition of an Accuracy in Action newsletter focusing on ERDC budgeting and childcare hours published March 2018 Volume 3 Issue 1. Issue included information referring to verifying income and hours, ERDC hours, marginal income, tow parent working families, child support and ERDC prospective eligibility and budgeting and transitioning TANF to ERDC.

  In August of 2018, tools were developed and shared with filed staff during the year in efforts to improve co-pay calculations and documentation. An ERDC mini training was offered and a Child Care Policy transmittal was

reissued to department staff as an important reminder of increased accuracy in the ERDC program. Another Edition of an "Accuracy in Action" newsletter was issued focusing on ERDC budgeting and childcare hours.

- Recommend department management strengthen its controls to ensure appropriate expenditures are charged to the federal program and that timely reviews of client payments, monthly employee timesheets, and cell phone invoices are performed.

  Client expenditures are being reviewed by the Business Integrity Coordinators with all office completing the first in a series of audits by September 2019. Additionally, VR field staff have been trained on and instructed in the OC&P Buy Decision process and are required to follow this process for all administrative purchases. Client purchases are in the process of implementing the Buy Decision process. Employee timesheets are now done thru the new Workday system. This system requires the manager to approve time off when the employee requests it. At the end of the pay period the manager is required to audit the Workday approvals against the payroll system before locking time. Payroll then reviews it early the next month and contacts anyone who is out of compliance. Cell phone reports are being audited on a monthly basis by the Business Integrity Coordinators and one of the administrative staff in central office. Each of those employees forward their review to a coordinator once they have completed it. We have had a couple of issues where phones were moved and not put on the correct auditor's list. Once identified, they were corrected, and we went back and reviewed all of the months this occurred.

  Known questioned costs in the amount of $60 were included in warrant 125356450 with VP757147 that was issued and reimbursed to the awarding agency on March 6, 2019.

- Recommend department management submit accurate RSA-2 reports and strengthen its controls over RSA-2 reports to ensure the reports are properly prepared, adequately supported, and properly reviewed.

  The Grant Accounting unit in the Office of Financial Services has adopted a new methodology for reporting hours and dollars based on payroll actuals. This was approved by the federal oversite agency, Rehabilitation Services Administration (RSA, in July 2017. Additionally, the query used for the report has been adjusted to exclude the

second payroll run for the prior fiscal year and include the second payroll run for the current fiscal year (10/16/15 to 10/15/16). Grant Accounting will retain the data queries used to construct the report and review these with the Business Operations Manager for Vocational Rehabilitation prior to submission.

The Grant Unit revised the FFY2016 RSA 2 report in June 2017. The RSA 2 report was corrected June 2017, and new payroll reporting methodology implemented in July 2017.

- Recommend department management strengthen controls to ensure all procurement procedures are followed, including the verification of suspension and debarment for all contracts, and maintain supporting evidence for procedures performed. We further recommend department management create and implement review procedures over its new CSTAT system to ensure controls over procurement procedures are operating effectively.

  The Office of Contracts and Procurement (OC&P) began with the month of December 2018, pulling a query of all executed contracts from each month as recorded in the CSTAT database. A formula is used to perform a random selection process of 25% of all contracts or amendments executed within that month that meet the criteria of any dollar value not to exceed (NTE) amount, inclusive of increases to NTE on amendments. In May 2019, OCP made an executive decision to reduce the random monthly pull from 25% to 10% based on industry standards and workload. The entire electronic contract file is reviewed for completeness, including CSTAT entries related to the contract. If an error or omission is discovered in the documentation, the compliance manager informs the contract specialist's manager by email of the nature of the error. Errors are recorded with the review of the contract file, as well as documentation from the contract specialist once the correction has been made. Managers review the contract errors and corrections with staff during employee development meetings. All documentation is maintained in an excel spreadsheet by month for each month audited.

5. DHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2018, audit #2019-14 (dated March 2019)

- Recommend management ensure year-end reporting methodologies reflect a complete understanding of transaction relationships as well as proper application of amounts provided by other entities.

  The year-end task list shows the annual meetings with each unit, including the Management Reporting Unit (MRU), to provide information and inquire of changes. The FY19 year-end list OFS MRU is the actual agenda for items discussed with each unit. The MRU specific items include inquiring of new program revenues and expenditures.

- Recommend department management implement processes and procedures to ensure data reports accurately reflect case status and activity of the reporting period.

  The department is aware that the data reports out of the Legacy system are incorrect. With IE ONE rolling out this year a decision was made to not put resources into fixing the business requirements in the current Legacy system, it is anticipated ONE will provide more accurate data reports. ONE implementation across the state is scheduled to be completed by the end of calendar year 2020. Any system changes within ONE will require a change request. Prioritization and work on change requests would begin in calendar year 2021.

- Recommend department management implement monitoring of eligibility re-determinations to ensure they are completed timely. We also recommend department management correct the identified cases and reimburse the federal agency for amounts claimed for ineligible cases.

  In February 2020 it was discovered that two cases, that did not previously incur any charges, did not accurately end eligibility as expected when the corrections were entered in June 2019. This was because the corrections were made to the pre-adopt cases. In coordination with OR-Kids, the eligibility was appropriately ended on the bio-cases on February 11, 2020. One of the cases incurred charges after the original finding was made, so this correction in February resulted in an additional reimbursement of $9,836.13.

- Recommend department management ensure timely and consistent monitoring of OR-Kids reports, including adequate communication, to ensure the cases exceeding the benefit threshold of $25,350 are

corrected timely. We also recommend department management reimburse the federal agency for costs exceeding the limit.

Report EL-3008 was designed to identify any children's TANF claiming exceeds $20,000. This finding occurred due to staffing changes, we have provided training and updated procedures to support business integrity and this addresses the audit finding. The Policy Analyst reviews this report each month and it has resulted in a resolution to this finding. The request to OR-Kids for a system enhancement will remain on the list of future OR-Kids changes.

- Recommend department management ensure adequate processes are in place to ensure federal TANF payments are not made beyond the 60-month time limit. We also recommend department management correct the identified case and reimburse the federal agency for amounts claimed.

  Effective May 1, 2019, SSP TANF has designated a point person to review the over 60-month Time Limit data report. This report is generated monthly and the TANF point will review every month for accuracy. If the point determines a case needs updating. The TANF point will email the local branch office lead with instructions on how to update the case Time Limit issue.

  Adjusting entry BT178490 in the amount of $953.10 was completed on February 22, 2019 to reclass these costs from FF to GF as they were outside the federal time limit.

- Recommend department management continue to work with DHHS to obtain approval of the department's plan for "Indian country" time limit exemptions. We also recommend department management correct cases that had been improperly exempted prior to January 1, 2017, and review and reimburse the federal agency as appropriate for payments made beyond the allowable time limit.

  The departments plan for 'Indian Country' is outlined in the state plan which has been accepted. The cases were reviewed, and it was determined that they were not improperly exempted and therefore no reimbursement needed. The system is functioning correctly, the business requirements in the fed report were incorrectly reporting. With IE

ONE rolling out this year a decision was made to not put resources into fixing the business requirements within the current Legacy system, it has been confirmed reporting out of ONE is correct for "Indian Country" time limit exemptions. ONE implementation across the state is scheduled to be completed by the end of calendar year 2020.

- Recommend department management investigate and identify the extent to which client income was not verified. We also recommend department management provide appropriate notification and training to staff to ensure that data is entered in a manner that would ensure the ONE system appropriately accesses the hub to verify income eligibility.

  The department has provided additional guidance by way of an all-staff transmittal issued in March of 2019, has updated the staff eligibility manual in April 2019, and made an update to the ONE eligibility system on April 11, 2019 to default the question about verification to trigger the Federal Data Services Hub. This update was done to ensure the Hub is pinged, regardless of the avenue in which the application is entered, when no one on the case has income. After the system update, guidance regarding the update was put in an agency-wide newsletter in May of 2019 and an all-staff transmittal was sent in August 2019.

- Recommend management strengthen controls to perform timely eligibility redeterminations and verification of client income, and ensure eligible clients are appropriately enrolled in both Medicare and Medicaid. Additionally, we recommend management provide periodic training to caseworkers to reduce the risk of administrative errors. We also recommend management correct all identified issues and reimburse the federal agency for unallowable costs.

  Approximately 90% of APD rule changes required for the implementation of the integrated ONE system on July 6, 2020 are complete and training materials have been updated to reflect these changes. The remaining 10% of rule changes will be effective on July 6, 2020. Cross program training, which covers, MAGI, OSIPM and Medicare Savings Programs, is in process and will be delivered prior to the new system's rollout in each area. This will ensure that staff across Aging and People with Disabilities and Self-Sufficiency programs are knowledgeable in all Medicaid programs, and that eligibility is determined timely, accurately, and with the required verifications.

- Recommend department and authority management strengthen controls to ensure documentation supporting a provider's eligibility determination is retained. We also recommend department management reimburse the federal agency for cost paid related to the ineligible provider.

  Questioned costs of $8,518 were adjusted through the JH system with document BTJHCQAP. The effective date of the adjustment was January 19, 2020.

  A missed data base verification has been added to the enrollment staff self-reporting spreadsheets. The state is reviewing a report to complete any missed required validations every three months.

  The automated solution is still a work in progress and will not begin to replace staff database checks until March 2020. We are also reviewing an automated missed check tool or a daily query to ensure missed checks are fixed within one business day

- Recommend department management ensure all required documentation is completed timely, reviewed, and maintained. We also recommend department management reimburse the federal agency for costs paid related to the exceptions identified above.

  A new OR-Kids report, EL-3026-D Foster Care IV-E Eligibility and Certification Status Detail was implemented on June 20, 2019. This report allows the user to pull a list of all children who are eligible for Title IV-E while placed with a provider who has a temporary certificate of approval, so that claiming corrections can be made in a timely manner.

  CW eligibility staff were provided training regarding the IV-E age requirements for young adults 18 years or older during the March 2019 Statewide Eligibility Summit. This information was recently reiterated through email correspondence and the August 2019 Eligibility Newsletter.

  An adjustment of $24,565 was entered into ORKIDS and reported on the 2019 third quarter CB-496 (04/01/2019 – 06/30/2019) report.

- Recommend department management review OR-Kids transaction processing and complete system modifications as appropriate to ensure proper financial reporting of program expenditures. We also recommend department management review prior year and current year transactions and reimburse the federal agency for grant expenditures claimed inappropriately.

  A portion of this audit finding was mitigated by OR-Kids JIRA# 25911 - System not allowing placement corrections on service types with age bracketed services. This system correction will now calculate the Placement Begin Date against the participant's DOB, allowing retroactive placement corrections for all age bracketed service types. This change was put into production in Build 3.7.1.0 – Maintenance Release 9, on January 23, 2019.

  A report has been developed to identify adjustments that impacted a state grant rather than the federal grant and remains in the validation stage. Once the report is completed and accurate, the agency will use it to report accurately and will begin to make appropriate adjustments to all incorrect claims. The new report will be used for the reporting period ending June 30, 2020.

  For IV-E, an adjustment was made with document BT183513, and $277,004 was repaid and reported on the September 30, 2019 CB-496. For Medicaid, an adjustment was made with document BT186519 on February 10, 2020, and $5,949 was repaid and entered into the CMS for FFY20Q2.

- Recommend department management ensure payments are adequately reviewed to verify payments are for the correct federal financial participation rate and calculated correctly. We also recommend department management reimburse the federal agency for unallowable costs.

  The OR-Kids team continues to work on changes to the database to resolve this finding. The most recent update from the OR-Kids team was in June 2020, in which they said that automatic rate calculation is on the list for a future maintenance release. The current estimated implementation date is December 31, 2020. While waiting for this change to go into effect, Child Welfare continues to use a workaround process by sending out a transmittal at the beginning of

each calendar year with the newest mileage rate information and by conducting spot checks for accuracy. The current mileage transmittal, CW-IM-20-001, went out to all of Child Welfare in January 2020.

- Recommend department management ensure adequate contract monitoring processes are in place to provide assurance that the department is receiving the services provided for in these waiver-based contracts.

  These findings are connected to the use of Title IV-E federal funds. For these specific services and contracts the IV-E funds were only allowed under the Title IV-E waiver, which ended September 30, 2019. Therefore, there is no longer concerns about inappropriate federal fund claiming because these contracts are only using general fund. Due to that change no further action is warranted.

- Recommend management ensure changes to the cost allocation process are included in its change log to ensure all changes are incorporated in subsequent plan submissions. Further, the department should ensure the discrepancies identified are corrected in the next plan submission.

  Going forward, we are documenting all of our correspondence in a log with a number, brief description and which plan year it applies to. Additionally, with each update requested, the plans are being produced in their entirety where each version builds on the prior so that the most recent plan or update is always the most current and inclusive of all changes and or updates. Regarding the Random Moment Sampling, the majority of those activity codes required narrative updates only to ensure the description of the calculation was accurate.

  There were two activity codes that resulted in claiming differences:

  Activity Code 4.A.8 – Pre-Finalized Adoption Assistance Case Management – The penetration rate used in activity code 4.A.8 is based on IV-E Foster Care. This rate should have instead been based on IV-Adoptions. The funding source charged for this activity, however, was in fact "TITLE IV-E ADOPTION ASSISTANCE". Because the Federal Funding source is correct, there is no adverse impact to reporting. Because the Foster Care penetration rate is lower (57.07%) than the Adoptions rate (86.24%), the resulting impact on claiming is that Oregon under-claimed

to IV-E. Since the amount that is not funded by IV-E is charged to State Funds (GF), as such no correcting entry is necessary.

Activity Code 4.A.2 Transportation for Medical, Dental, And Mental Health Services – The penetration rate used in this activity is XIX Foster Care (XIX FC) eligible children. The rate should have instead been XIX weighted / blended (based on Foster Care and In-Home). The approximate difference in rates is 2.5% less when using a blended rate. As a result, the agency over-claimed to title XIX. Activity code 4.A.2 accounts for approximately 1.77% of Child Welfare Survey results. The overall impact to Child Welfare RMSS results is 0.043% (or a 2.5% XIX reduction in the 1.77% of survey responses in activity code 4.A.2), *the Federal Fund impact and correcting entry is estimated at approximately $63k.*

The entry for 4.A.2 was made with document numbers BTCC2130 through BTCC2136. Total Federal Fund impact was $36,204. The initial estimate was based on averages versus a month by month calculation. This will be reported on the CMS-64 FFY19Q4.

- Recommend management strengthen internal controls to ensure all costs entering the cost pools are allowed and for the correct amount. Further, the department should identify any additional mileage rate errors and correct all known issues.

  The agency has a regular process to review for duplicate payments; however, the questioned payment was missed. It was corrected on October 30, 2018 with document AR075480 for $2,201.

  Also, the agency will be working with program staff to ensure they understand that submissions for court witness mileage reimbursements are paid a different IRS per diem rate. The agency reviewed court witness mileage reimbursements and found an additional 27 transactions paid at the inappropriate rate, resulting in $535 in overpayments. This amount was adjusted on March 15, 2019 with BTCL1177. The questioned cost of $18 was also adjusted on March 13, 2019, with BTCL1176.

- Recommend department management implement a consistent process to verify branch offices are conducting required inventory and accurately completing stock control logs.

  A plan has been developed and implemented to conduct quarterly inventory reviews for EBT stock control logs in Self Sufficiency offices and this will be expanded to include APD/AAA offices by October 1, 2019. The reviews are conducted by local business experts and the information is then tracked in a Central office database. The information will be reviewed during the quarterly business review to identify strategies to improve accuracy.

6. OHA: Integrated Eligibility Project Has Generally Followed Industry Standards to Help Ensure Data is Converted Completely and Accurately, Fiscal Year 2019, audit #2019-37 (dated October 2019)

- Recommend compare data extracts to legacy systems to ensure completeness and accuracy and document the results.

  After the audit, the Integrated Eligibility, Data Conversion team reached out to the Legacy extract team to better understand steps taken to ensure the mainframe extracts correctly represented the data from the online systems.

  Each Legacy team providing an extract (FSMIS, CM, CI, OA and AJ) was interviewed and design/test artifacts were reviewed

  In summary, the team determined the following:
  - *The Legacy teams have varying processes to manage and track extract requests - some using ticketing systems that track and manage requests, while other teams manage requests via email*
  - *In all cases, the Legacy teams were working from defined specifications, either uploaded to the ticketing system or managed via email*
  - *In all cases, the Legacy teams confirmed the accuracy of the extract with the Legacy BA's, who confirmed against the online system.*

- *Test evidence/confirmation was exchanged via email, and either uploaded to the ticketing system or preserved in email.*

Based on this follow up review of the process, there is now sufficient evidence that the mainframe data extracts have been adequately tested against a defined design, and accurately represent that data in the mainframe.

- Recommend management develop a staffing plan that reflects the potential volume of work that will need to be completed after data conversion along with existing eligibility processing workloads and staff availability.

  The state has developed a plan to minimize the amount of impacts created for eligibility workers by data conversion. This plan includes creation of a team to perform duties necessary to align the data within the multiple systems and automating some of the functions necessary to align the data within the multiple systems. These two strategies will decrease the impact to eligibility workers and allow for better service to Oregonians. There is a workplan that has been developed for the cases that will continue in conversion mode after go-live. This plan includes appropriate necessary time for every point of contact. This time correlates to our current recertification timelines.

- Recommend management eliminate the use of shared accounts to transmit PII and PHI.

  The Audit Team observed server administrators using a shared account to manage file transfer of sensitive data. This practice was stopped upon notification to Project leadership and did not expose sensitive data outside of the system boundaries. Additionally, the server in question is being replaced and decommissioned.

- Recommend management improve monitoring of the transmission of PII and PHI.

  While the Audit Team did not assess specific security risks for the IE system, there was recognition by the Project Team that controls were needed to address Project-identified risks related to the protection of PII and PHI during UAT. A team called the Security Controls Workgroup was formed to identify and put into place controls necessary to protect this data. This workgroup was made up of security professionals from the Project Team, SI, Enterprise

Security Office (ESO), Enterprise Technology Services (ETS), Office of Information Services (OIS), Public Knowledge, and oversight agency representatives. These controls included:

- *Ensuring there was no mechanism to allow offshore resources to access the UAT environment.*
- *Ensuring processes were in place to validate no PII or PHI was copied into Team Foundation Server or other environments in which offshore personnel had access.*
- *Requiring all testers to use test ID's during testing.*
- *In the mainframe environment, specifically placing "deniers" into access scripts to ensure testers could not access production environments and, conversely, production users could not access the test environment.*
- *User profiles for testers were created to change the background color of screens such that it was easy for users to differentiate between production and test environments.*
- *Ensuring processes were in place to quickly provide testing credentials (authentication and access) to new testers.*

In addition to the above controls, security-related plans are followed and are regularly updated and reviewed by the ESO and federal partners. These plans include:

- *System Security Plan (SSP)*
- *Information Security Risk Assessment (ISRA)*
- *Privacy Impact Assessment (PIA)*
- *Plan of Action and Milestones (POAM)*

- Recommend management update existing Business Associate Agreements to include clauses required under HIPAA.

According to a message from DOJ dated November 14, 2019, the BAA template used by OIS was found legally sufficient and is not out of compliance with federal requirements. No further action will be taken on this finding by the IE Project Team leadership.

7. DHS and OHA: Using the U.S. Treasury's Do Not Pay System for Health and Human Services Program Will Save Taxpayers Money, audit #2020-05, (dated February 2020)

- Work with U.S. Treasury to gain access to Do Not Pay's worker portal to perform on-demand searches.

  The implementation date for DHS/OHA to gain access to the DNP portal is contingent upon the execution of a data use agreement (DUA) and other data security measures needed per data source. The data sources cross both the DHS and OHA, and data sources contain protected health information, personally identifiable information, and other protected information. The protection and security strategies for sharing each data source will need to be clarified, and separate DUA's for DHS and OHA may need to be executed.

  Communications with U.S. Treasury are ongoing, and the initial questionnaire has been submitted to U.S. Treasury.

- Work with U.S. Treasury to develop annual death matching that covers all clients and all providers in the SNAP, TANF, ERDC, and Medicaid programs. Based on research of those matches, terminate ineligible clients and provides, and correct erroneous data in information systems.

  DHS and OHA request this recommendation incorporate the rationale and goal of Recommendation 7, rather than having two separate timeframes for matching purposes. Monthly matches would be the most efficient and provide DHS and OHA the opportunity to correct records in a timely manner.

- Develop internal policies and procedures for using Do Not Pay and taking the appropriate actions to close cases.

  Policies and procedures already exist for the current Date of Death work being conducted by OHA and DHS. Once the DUA and other data security measures are executed, and portal access is approved, DHS and OHA will know the

specific aspects of the portal and data matching needing to be addressed in policy and procedures and will finalize prior to full utilization of DNP.

- Send letters to all clients and providers who are identified as potentially deceased, but whose records could not be independently verified by DHS or OHA staff.

  DHS and OHA staff will check all internal databases and perform internal research to verify the data that has been received by DNP. If DNP identifies someone as deceased, we are concerned that it would not be an effective approach to submit letters to clients and providers who, through the use of DNP, have been identified as deceased. We would clearly take the DNP data seriously and would do all necessary validation, but sending letters to potential surviving family members does not seem the most effective approach.

- Work with appropriate authorities to correct erroneous death reports found as a result of Do Not Pay data matching.

  In the development of Recommendation 3, policies and procedures will be developed to address Recommendation 5. DHS and OHA will include in those policies and procedures methods and strategies for communicating with the data source of any potentially erroneous record.

- Work with U.S. Treasury to develop annual data analytics to identify potential data quality issues in information systems serving SNAP, TANF, ERDC, and Medicaid clients and providers.

  DHS and OHA will use the matching process to identify the source, structure and prevalence of the data issue. DHS and OHA will use the findings to identify corrective actions within data sets DHS and OHA have control over.

- Work with U.S. Treasury's Do Not Pay services to develop monthly matches against required datasets for all providers. Based on research of those matches, terminate ineligible providers, and correct erroneous data in information systems.

DHS and OHA recommend incorporating this recommendation with Recommendation 2, thereby streamlining the operational aspects of the two recommendations.

- After the Integrated Eligibility system is implemented, research cases that lack Social Security numbers and valid exemptions. Based on research of those cases, address any eligibility, compliance, and/or system issues.

  This recommendation will be addressed post implementation of the Integrated Eligibility System. It will be addressed per applicable federal regulation for each program utilizing the Integrated Eligibility system.

8. DHS: Oregon's Child Welfare Information System is Adequate for Case Management, but Enhancements are Needed to Improve Usability, audit #2020-01 (dated February 2020)

- Recommend DHS continue to engage with program staff and end users to identify and document key usability issues and the potential risks associated with those issues. Based on this assessment, prioritize fixes to address high risk usability issues.

  In October 2019 DHS established an OR-Kids User Group that brings together technical staff, program staff and end users. Requested enhancements and feedback on OR-Kids usability issues and potential risks are discussed at this forum. Input from the User Group feeds into decisions on priorities for OR-Kids fixes and enhancements which are currently discussed and determined by the Child Welfare Leadership Team in their monthly meeting. To ensure sustained, appropriate governance of OR Kids, discussions are underway between Child Welfare and the Office of Information Services on ways to improve governance. Consideration will be given to adopting the Information Systems Management Committee (ISMC) governance model and associated processes used by other DHS program areas.

- Implement a data governance function that is responsible for creating a data quality strategy that aligns with the Child Welfare business strategy.

In response to the Comprehensive Child Welfare Information System (CCWIS) requirements, DHS has included in the 2020 Annual Planning Document Update (APDU) a plan for a data quality plan that includes data governance. The APDU was submitted on January 9, 2020 to the Administration for Children and Families (ACF) and is pending approval. Assuming approval by ACF, the Department anticipates full implementation no later than December 31, 2020.

- In conjunction with fully defining critical data and planning for data quality, fully identify and document associated automated and manual application controls and analyze whether additional controls are necessary to ensure data are complete, accurate, and reliable.

  The OR-Kids business and technical teams will review the control gaps identified as a part of this audit and will present recommendations to the OR-Kids governance body for additional automated and manual controls to ensure data are complete, accurate and reliable.

- Define the skills users are expected to possess in order to enter and retrieve information in OR-Kids based on their duties, develop procedures to evaluate user knowledge, and design training approaches to ensure users possess these skills.

  Currently, users are assigned a user-role that provides access to system functionality based on job classification. DHS will use these existing roles as a basis for identifying and categorizing training materials to support respective user-roles and will assess the options available for assessing user knowledge and comprehension.

- Develop procedures to adjust training content and materials as needed to reflect changes to OR-Kids functionality or changes to Child Welfare practices that require changes to the use of OR-Kids.

  DHS is planning to hire an analyst/technical writer to coordinate changes to training content to reflect OR-Kids and Child Welfare practice changes.

- Acquire a qualified project manager and maintain ongoing engagement with the Administration of Children and Families and Enterprise Information Services to ensure the CCWIS project remains in compliance with federal requirements and the state's IT investment oversight process.

  DHS/OIS is working to assign a Project Manager. The Project Manager will be a member of the Office of Information Service's Project Solutions team and will be required to follow the standard OIS project management methodology and to stay in compliance with the state's IT investment oversight process.

9. DHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2019, audit #2020-14 (dated March 2020)

- Recommend management ensure year-end accrual methodologies are complete and include consideration of all relevant expenditures.

  The Office of Financial Services has updated its accrual methodology instructions to review all estimates to ensure they are calculated correctly and include consideration of all relevant expenditures. OFS will engage more closely with budget staff on projections of biennium-end expenditures to ensure alignment of expenditures and accrual estimates.

- Recommend department management provide additional coding elements related to expenditure data to allow for identification of federal expenditures within the dataset, and implement processes and procedures to ensure data reports accurately reflect case status and activity of the reporting period.

  The Department will submit a business change request to the Integrated Eligibility project requesting additional coding elements be added to the dataset out of the current eligibility system, Legacy. The Department has been in communication with the state's federal contact to discuss the accuracy of the federal report and the changes to Oregon's eligibility system. The department will continue technical assistance with the appropriate contacts at Federal Administration for Children and Families. This process will ensure the Department has a clear

understanding of the instructions for each federal field. Change requests will be submitted to the Integrated Eligibility project to correct business requirements as necessary.

- Recommend department management strengthen controls to ensure adherence to the department's work verification plan documentation of participation and projection of hours of participation, and to ensure data entered into the automated data processing system is accurate and complete.

  The Department's TANF policy team, in partnership with the training unit, will create training materials for field staff specifically addressing attendance documentation requirements and projection of work hours. The policy team will then conduct technical assistance with contactors who capture and maintain attendance records, as well as targeted communication to field staff specific to attendance documentation and retention. Quality Assurance (QA), in partnership with TANF policy, will conduct targeted reviews over the course of a few months following technical assistance and communication. QA and policy will work with a research analyst to ensure a statistical sample is pulled and reviewed. Targeted reviews will identify areas where additional technical assistance and communication is necessary.

- Recommend department management strengthen controls to ensure clients benefit payments are appropriately determined.

  The Department's TANF policy team will create protocols for both JOBS Disqualifications (DQ) and Child Support sanctions (CS) to provide clear guidance to field staff regarding the effective date of benefit restoration once requirements have been met. The training unit, in partnership with TANF policy, will create a quick reference guide (QRG) based on the protocols which will be made available on the training unit website. Policy and training unit will provide communication and training to field staff regarding protocols and QRG.

- Recommend department management coordinate resources to better maintain and more readily provide sufficient eligibility documentation.

The TANF policy team, in partnership with the training unit, will provide communication and training to field staff regarding the eligibility requirements for the employability screening (415A) and child support cooperation (428A) forms. The policy team will provide targeted communication to the Business Operations Specialists team who are responsible for managing the local processes to ensure documents are properly scanned into the Electronic Document Management System (EDMS). Quality Assurance (QA), in partnership with policy, will conduct targeted reviews monthly to ensure the 415A and 428A are completed at eligibility determination and document scanning processes are being adhered to. QA and policy will work with a research analyst to ensure a statistical sample is pulled and reviewed. Targeted reviews will identify areas where additional technical assistance and communication is necessary.

Oregon will be piloting a new eligibility system, ONE, beginning May 2020 with full rollout scheduled by end of calendar year 2020. It is anticipated ONE will resolve some of the errors based on system functionality.

- Recommend management ensure the cost allocations are processed according to the federally approved cost allocation plans.

  The Medicaid impact of $36,234 was corrected with document numbers BTCC2130 through BTCC2136 with an effective date of July 14, 2019. The refund was reported to CMS on the CMS-64 FFY19 Q4. The TANF impact of $1,824,260 was corrected with document numbers BTCC3054 through BTCC3137 with an effective date of September 8, 2019. The refund was reported to ACF on the ACF-196R Part 1 report, line 22B FFY19 Q4.

  Internal controls have been strengthened and the Public Assistance Cost Allocation Plan Change Log for both DHS and OHA are reviewed on a monthly basis notating any change, the reason for the change, and the plan part and section reference. The changes accumulated over the year are reviewed prior to the annual state fiscal year submission to the Federal Department of Health and Human Services Cost Allocation Services unit to ensure alignment between the Cost Allocation System and the federally approved plans.

- Recommend department and authority management strengthen controls to perform timely eligibility redeterminations and verification of client income and ensure eligible clients are appropriately enrolled in both Medicare and Medicaid. Additionally, we recommend management provide periodic training to caseworkers to reduce the risk of administrative errors. We also recommend management correct all identified issues and reimburse the federal agency for unallowable costs.

  The department is committed to providing timely benefits to only those individuals who are appropriately determined eligible.

  One of the five individuals identified who did not have their eligibility verified within 12 months was receiving MAGI Medicaid benefits. The MAGI redetermination was initiated timely, but the information returned to the agency, by the individual, was not processed timely. Since the time of this individual's redetermination, the department has taken the following steps:

  - *Implemented a more thorough process for workload management with increased reporting and data analysis to better resource ongoing work*
  - *Hired staff to monitor workload*
  - *Expanded capacity and locations of the SSP/OHP Processing Center, hiring additional eligibility staff in the process*
  - *Continuously analyzing resource allocation, making adjustments when needed.*

  For the remaining findings, the department expects that with the implementation of the new Integrated Eligibility (IE) System statewide during 2020, there will be greater operational opportunities to strengthen our client eligibility controls, specifically related to the timeliness and accuracy of eligibility initial determinations and redeterminations along with improved electronic retention of required data elements such as signed applications. Additionally, the IE system implementation includes cross policy, system and advanced policy training to support staff, eligibility workers

and case managers statewide. We believe this training will also assist in ensuring we are building and developing an informed workforce with consistent knowledge of federal and state eligibility policies.

The department will correct all identified issues and recoup the funds by February 2021, from the provider who was overpaid and will reimburse the federal agency for unallowable costs.

- Recommend department management review OR-Kids transaction processing and complete system modifications as appropriate to ensure proper financial reporting of program expenditures. We also recommend department management review prior year and current year transactions and reimburse the federal agency for grant expenditures claimed inappropriately.

  A report has been developed to identify adjustments that impacted a state grant rather than the federal grant and remains in the validation stage. Once the report is completed and accurate, the agency will use it to report accurately and will begin to make appropriate adjustments to all incorrect claims. Known costs in this finding will be reimbursed on the 6/30/2020 CB-496.

- Recommend department management continue to correct known applicable child eligibility data issues in OR-Kids to ensure data used to estimate the savings in state expenditures is complete and accurate.

  Federal Policy and Resources identified the issues related to the first finding due to a question from Office of Financial Services (OFS). The Department has already updated procedure/process to ensure testing and monitoring occurs when changes to OR-Kids are implemented into production until assured the system and reports are working appropriately. OR-Kids Business analysts and Office of Information Services will analyze and fix the bugs identified from the implementation of this change. Once all fixes are completed Federal Policy and Resources will work with Office of Financial Services to ensure all adoptions assistance title IV-E eligibility is being reported accurately.

The second finding where the three cases were incorrect, will be corrected and removed from the applicable child savings calculation. Federal Policy and Resource will submit a change request to require OR-Kids to improve the batch process for the final adoption assistance case. In the interim the Department will create an exception.

- Recommend department management review adequate support for administrative charges and revise the monitoring checklist to demonstrate that on-site monitoring of invoices is done.

  TEFAP – The Department is currently working with Food and Nutrition Services (FNS) partners to update three required monitoring tools for TEFAP and CSFP. Per federal requirements the monitoring schedule for TEFAP is one annual storage facility review and one quadrennial comprehensive review of the sub-recipient agency, OFB. The Department will make corrections and updates to the current annual storage facility review tool per FNS and SOS guidance to meet the recommendation for documenting specific records reviewed during on site monitoring. The department will create and implement a quadrennial comprehensive review tool with FNS guidance and partnership. The Department will receive FNS approval on the finalized monitoring tools.

  TEFAP – The Department plans to have these monitoring tools completed by April 2020 for implementation this FFY2020. The Department plans to conduct its on-site annual storage facility review by the end of June 2020.

  CSFP – Per federal requirements the monitoring schedule for CSFP is to complete a biennial inventory and compliance review of the sub-recipient agency, OFB. The department will continue to work with FNS to update and correct the biennial monitoring tool to reflect FNS and SOS guidance to meet the recommendation for documenting specific records reviewed during on site monitoring. The Department will receive FNS approval on the finalized monitoring tools.

10. DHS: Oregon Should Improve Child Safety by Strengthening Child Care Background Checks and the State's Sex Offender Registry, audit #2020-21 (dated June 2020)

- To ensure consistency and standardization, OCC and BCU propose legislation to have all childcare background checks performed by a single agency that conducts childcare provider background checks.

  Implementation will require submission of a Policy Option Package (POP) for the 2021 Legislative Session. As OCC is the lead agency for Child Care in Oregon, OCC will be responsible for submitting the POP.

  The target date assumes that the POP is passed in the 2021 Session. If the POP was not approved, the target date would need to be extended as needed until legislative authority to centralize background checks was provided.

- In consultation with the Oregon Department of Justice, OCC and BCU should create a consistent list of automatic disqualifying crimes to use in background check determinations for state licensed and regulated childcare providers, and periodically evaluate that list as criminal laws change. Agencies should seek clarification from the U.S. Department of Health and Human Services Office of Child Care, as needed, for act requirements.

  Implementation will require collaboration between the DHS Background Check Unit (BCU), DHS Child Care Unit (CCU) and the Oregon Office of Child Care (OCC), and Oregon Department of Justice (DOJ) before proceeding to a Rules Advisory Committee (RAC) to publish permanent rules. Crime lists will be reviewed annually thereafter.

- OCC and BCU should work together to set the same background check requirements for all childcare providers that are at a high enough standard to protect the welfare of children. At a minimum, this should happen on a regular basis due to law changes and include determining other concerning crimes to consider, looking at trends or patterns of concerning behavior, timing of renewal and interim background checks, setting minimum age requirements, and reporting requirements.
  Implementation will require collaboration between BCU, CCU and OCC, and DOJ before proceeding to RCA to publish permanent rules. Thereafter procedural and other documents will need to be updated and training on new

processes provided to all pertinent BCU and OCC staff. Synchronization of practice and requirements will be reviewed annually thereafter to maintain quality control.

- Recommend OCC and BCU advocate to the U.S. Dept. of Health and Human Services Office of Child Care the need for interstate sharing of information critical in assessing childcare providers.

  Conversations and advocacy for interstate data-sharing tools and processes between BCU, OCC, and the US Office of Child Care have been ongoing since early 2017. Oregon has participated in a variety of Region X teleconferences with US Office of Child Care and other states' licensing and background check agencies, as well as state police departments working toward acquiring Federal statutory data-sharing authority, as well as Federally provided tools and applications.

- Recommend OCC and BCU establish policies and procedures to share updated, pertinent information resulting from background checks on related individuals.

  BCU and OCC will collaborate with DOJ and Oregon State Police (OSP) to identify what information can be shared, and what processes for that sharing are legally sufficient. BCU and OCC will enact those recommendations for data-sharing as applicable.

- Recommend OCC and BCU check the provider's address with Oregon's sex offender registry when conducting background check procedures on a provider whose home is where childcare is provided.

  BCU and OCC will collaborate with OSP's Sex Offender Unit to identify and implement the specific procedures necessary to request address-based checks of the Oregon Sex Offender Registry.
  BCU, CCU and OCC will thereafter jointly formulate procedures for how to apply such checks when a positive hit on a provider address occurs.

- Recommend DHS work with OCC to regularly provide OCC with adult protective services reports.

  The Office of Child Care (OCC) received statutory authority per (HB4054/2018 session) ORS 329A.030(4)(a)(A) to access state adult abuse history when individuals apply to be listed on OCC's Central Background Registry. Upon receipt of this information, Aging & People with Disabilities (APD) coordinated with OCC in October of 2018 to create the following initial process for sharing adult protective services reports for investigations in both licensed (referred to as Facility APS investigations) and unlicensed settings (referred to as Community APS investigations):

  1. *OCC will request abuse history from APD whenever an applicant self-discloses abuse history on their application.*
  2. *APD established a central APD-APS Unit email address to send requests and created a specific contact person/gatekeeper, so OCC can send the request to one APD entity. Part of the contact person/gatekeeper's role is obtaining information from the Office of Safety, Oversight and Quality (SOQ) for information related to Facility APS investigations and combining it with any information contained in Community APS investigations for a consolidated APD response.*
  3. *The request from OCC is sent via a secure e-mail from the Oregon Department of Education (ODE) helpdesk to the APD-APS Unit mailbox with a subject line identifier "OCC Request for Adult Abuse History." The OCC request includes a cover letter requesting "Adult Abuse History" and provides an APS case number, type of abuse, date the record was closed. APD is asked to return confirmation of all substantiated cases and any details. The applicant's name, DOB and SSN are included in the cover letter as verification points.*

  It is important to note that APD (in coordination with other DHS/OHA programs) implemented a new Centralized Abuse Management (CAM) System. All APD or Area Agency on Aging (AAA) offices were operational in CAM as of Jan. 1, 2019. Our gatekeeper coordinates with respective contacts in SOQ and APD to ensure all relevant systems (legacy, CAM) are queried for pertinent information to ensure a comprehensive review is completed.

DHS (including APD-APS, SOQ and the OTIS) will continue working with OCC to develop a process for sharing information necessary for OCC to perform their background checks.

- Recommend DHS have common identifiers within its abuse and neglect registries that are reliable and can be used to readily identify a person involved in a protective service allegation. DHS should collect and work with OCC to also collect those identifiers for all childcare providers. This will allow a more complete check of abuse and neglect registries.

  DHS Aging and People with Disabilities (APD), in coordination with other DHS/OHA programs, implemented a new Centralized Abuse Management (CAM) System for Adult Protective Services (APS). All APD or Area Agency on Aging (AAA) offices were operational in CAM as of January 1, 2019. In addition, the Safety Oversight and Quality Office (SOQ) implemented a new Corrective Action and Licensing Management System (CALMS) as of February 18, 2020. CALMS imports information/records from CAM to SOQ that enables them to perform Licensing and Corrective Action tasks. In each system, several common identifiers exist to identify a person involved in an APS investigations and SOQ corrective action.

  Examples include:
  1. *Each intake or investigation is assigned a CAM/CALMS identification number as a unique identifier.*

  2. *CAM has a global search feature that allows a user to search for an individual and any role they had in an APS intake or investigation. The roles include: alleged victim, alleged perpetrator, reporter, witness, collateral contact, etc. This is another identification source that can be utilized.*

  3. *Each individual involved in an APS intake or investigation has a unique person record created in CAM that contains identifiers such as name, alias, date of birth (DOB), address, Social Security Number (SSN), as available. A person record must be created before an intake or investigation can be assigned or closed.*
  APD and OTIS recognize that DOB or SSN information is not always available. It is important to note, APS is not an eligibility-based program that requires this type of identification. Investigation parties have the right to decline APS

interventions and asking for this type of identification during a case of familial type abuse could create a safety risk for a vulnerable adult.

Whenever possible, this information is included in the CAM/CALMS system or provided via other sources such as through SOQ for licensed providers. Currently, a data analysis query is being conducted by the APS Unit, QA/QI Coordinator to determine data trends for SSN and DOB numbers for both Community and Facility APS settings. The data analysis will be shared with Field Administration and respective offices for a quality improvement plan. Early results from the data query show a modest improvement in this area of data collection.

OTIS investigations similarly are using CAM and will review data capture for these common identifiers.

Child Welfare (CW) consistently requests identifying information, such as: name, DOB, address and SSN numbers. Like APS, child protective services (CPS) is not an eligibility-based program that requires this type of identification. Case participants have the right to decline providing this type of information during the investigation phase and even when a case is opened for services. When the information is available, it is added to the CW case record and is searchable.

CW and OTIS have developed business processes that facilitate the entry of OTIS investigations into the OR-Kids system for enhanced tracking of perpetrators and individuals involved in investigations.

In terms of working with OCC to collect common identifiers, there are notable privacy and security issues with gathering and storing sensitive information such as SSNs. Establishing data-sharing with DHS protective services for OCC-collected Employment Identification Numbers (EINs) or Social Security Numbers (SSNs), and other common identifiers would require review by DOJ to establish what could be requested and shared between parties while remaining legally sufficient.

Secure methods of sharing the information would need to be implemented. Data-sharing would also need to include data integrity procedures to ensure that fraudulent or incorrect information (ex., incorrect SSNs) was not being added

to protective service records. Likewise, even correct information would need to be cross matched accurately to the correct APS or CPS files. Erroneous or incorrectly matched information could create false negatives or false positives that would erode the integrity of the background check process as well as protective service records.

- Recommend DHS regularly check department employees for criminal convictions and involvement in founded abuse and neglect allegations.

  Currently OAR 407-007-0020 (3) requires DHS employees to report to DHS Human Resources (HR) any new arrest, charge or conviction of any crime within 5 days of occurrence. HR is immediately notified by Child Welfare or Adult Protective Services if protective service investigations involve a DHS employee. When an employee is determined to have new criminal or abuse history, progressive discipline may be applied in such situations, or HR may request that a new background check is completed.

  BCU and CW are both CJIS programs, consequently BCU and CW employees are all subject to the CJIS background check requirements. If an employee commits a crime that does not meet CJIS clearance thresholds, DHS will currently be notified by OSP, and are required to take action to remove CJIS-related duties. These requirements may circumvent progressive discipline and could make a new background check superfluous.

  DHS has previously advocated unsuccessfully (HB 2228 in 2015) for statutory language that would have provided Oregon access to the FBI's Rap Back Program. This program provides employers with immediate updates when enrolled employees acquire new criminal history anywhere within the United States. Such a program could bring efficiencies to both provider and state employee background checks, especially for larger organizations like DHS. Without such an efficiency, ongoing rechecks of employees may lead to increased workload and fiscal impacts without proportional increases to safety.

  Per BCU and HR records during the audit, a total of eight employees were found to have not complied explicitly with OAR 407-007-0020 (3); two of the eight reported the history to their supervisor.

DHS currently has 10,084 employees resulting in 0.0008% non-compliance. Due to the extremely low rate of non-compliance, DHS HR will continue to recheck employees under current procedures.

It should be noted that DHS adheres in its employment practices to EEOC guidelines, including those requirements delineated at the beginning of this response. In addition, due to the variety of populations that DHS serves, in most circumstances it is best practice to have staff with lived experience who have successfully overcome issues such as addiction disorders, mental health issues, domestic violence, and other crisis to work with families with similar challenges. Experience has shown that a person-centered approach that takes into consideration individual circumnutates always works better than a one size fits all approach.

DHS Program Eligibility Requirements 2021

	Child Welfare (CW)	Intellectual and/or Developmental Disabilities (I/DD)*	Aging and People with Disabilities (APD) - Medicare Savings Programs	Aging and People with Disabilities - OSIPM - No Long-Term Care (LTC) Services	Aging and People with Disabilities - OSIPM - Employed Persons with Disabilities	Aging and People with Disabilities - OSIPM - 1915(i) MH Services	Aging and People with Disabilities - Long-Term Care (LTC)	Adult Protective Services (APS within APD)	Vocational Rehab Services (VR)	Employment Related Day Care (ERDC)	Temporary Assistance for Needy Families (TANF)	Temporary Assistance for Domestic Violence Survivors (TA-DVS)	Supplemental Nutrition Assistance Program (SNAP)
Age	0-18, 18 - 21st birthday if in Foster Care prior to age 18.	All Ages	Any age with Medicare	65 or older, or any age if disabled or blind	18 or older	21 or older	65 or older or disabled over age 18 N/A- (ACA Expansion Population) ACA Population that meet NF LOC Criteria (below in other)	65 or older, 18-64 with a physical disability, or any age if a resident in an APD-licensed facility.	16 and older (can be down to age 14 if appropriate)	Children 0 - 12 years at certification. Once certified a child remains age eligible through the end of their certification. Children with documented special needs are served through the age of 17.	Serves families with children up to age 17 and through age 18 if the child is in secondary school or an equivalent program full time.	Serves families with children up to age 17 and through age 18 if the child is in secondary school or an equivalent program full time.	All ages. Certain groups must apply together if in same household including: those who purchase and prepare together, spouses, adults who have children in common, children under the age of 22 living with parents, and children under 18 who are under parental control within household.
Disability	If child is eligible for SSI, the child is categorically eligible for Title IV-E Foster Care.	Age 0-7: 1) standardized testing verifying significant impairment; or 2) medical stmt w/diagnosis of neurological condition that will likely cause significant impairment in two or more areas of adaptive behavior. School-age children and adults: Significant impairment in adaptive behavior caused by: 1) intellectual disability present prior to age 18 (IQ 75 or below); or a neurological condition, prior to age 22 requiring supports similar to ID, and expected to last indefinitely, that originates in and directly affects the brain. All age groups: significant impairment in adaptive behavior and condition must be expected to be indefinite, and cannot be primarily related to an excluded condition, including, but not limited to, a mental or emotional disorder, sensory impairment, substance abuse, personality disorder, learning disability or attention deficit hyperactivity disorder.	N/A	If under 65, SSA determination of blindness or disability or State determination of blindness or disability via the Presumptive Medicaid Disability Determination Team	SSA determination of blindness or disability or State determination of blindness or disability via the Presumptive Medicaid Disability Determination Team	SSA determination of blindness or disability or State determination of blindness or disability via the Presumptive Medicaid Disability Determination Team	SSA determination of blindness or disability or State determination of blindness or disability via the Presumptive Medicaid Disability Determination Team	Eligible for initial APS response with reported or declared physical disability	Must have a physical or mental impairment that constitutes a substantial impediment to work that requires vocational rehabilitation services to obtain, maintain, regain and advance in employment. The presumption is that employment is the applicants objective.	Higher child care reimbursement rates may be available for children with documented special needs.	N/A	N/A	SSA determination of blindness or disability. Disability exempts ABAWDs from having to meet work requirements, makes students of higher education SNAP eligible, qualifies household for medical deductions and removes shelter cap on cases.
Citizenship	Must be a citizen or meet non-citizen requirements.	Must be a citizen or meet non-citizen requirements.	Must be a citizen or meet non-citizen status requirements.	Must be a citizen or meet non-citizen status requirements.	Must be a citizen or meet non-citizen status requirements.	Must be a citizen or meet non-citizen status requirements.	Must be a citizen or meet non-citizen status requirements.	N/A	Must meet I-9 Federal Requirements to work in the United States.	Must be a citizen or meet non-citizen requirements.	Must be a citizen, qualified non-citizen, or other specific unqualified non-citizen.	Must be a citizen, qualified non-citizen, or other specific unqualified non-citizen. Can apply a waiver for non-citizens or undocumented.	Must be a citizen or meet non-citizen requirements.
Residency	Must be a in the care and custody of Oregon DHS and the child is considered a resident of Oregon.	Must be a resident of Oregon. For applicants under 18, legal guardian must be resident of Oregon. Children out of state must have been considered an Oregon resident, and be expected to return to Oregon. (this is in line with practice, not in rule)	Must be resident of Oregon	Must be resident of Oregon	Must be resident of Oregon	Must be resident of Oregon	Must be a resident of Oregon	N/A	Must meet I-9 Federal Requirements to work in the United States.	Must be a resident of Oregon.	Must be a resident of Oregon	Must be a resident of Oregon.	Must be a resident of Oregon
Income	Title IV-E Foster Care - Family must meed the AFDC financial need standards in place in July 1996 for the initial determination. Not required at annual redetermination.	In-home waiver services: Oregon Supplemental Income Program – Medical (OSIPM) income limits; generally, the countable income limit is 300% of the full SSI standard for a single individual. In-home k-plan services: OHP MAGI-based income methodologies are used; up to 133% FPL. Case mgmt only: N/A.	100% FPL, 120% FPL. 135% FPL - updated each March	SSI payment standard for individual or couple - updated in January unless no SSA COLA	250% FPL - updated each March	150% FPL - updated each March	1915(c) waiver services: Oregon Supplemental Income Program – Medical (OSIPM) income limits; generally, the countable income limit is 300% of the full SSI standard for a single individual. Individuals over the limit can qualify with an Income Cap Trust K-Plan only services: OHP MAGI-based income	N/A	N/A	Income at certification must meet initial limit at 185% FPL. Cases after approval can have income up to the existing and ongoing exit limit of 250% FPL or 85% SMI, whichever is greater.	Income must meet income and payment standards. Income limits vary by family size, but in general current income must be no more than 34% of the federal poverty level for initial certifications for a family of three. To meet ongoing, the same family must be no more than 60% of the federal poverty level.	Net income, after deductions must meet income and payment standards for TANF Program.	Most households must have gross income below 185% of the federal poverty level to be eligible for SNAP. Services are based upon income received in past 30 days.
Asset/Resource Limits	Title IV-E Foster Care - $10,000 per family for initial eligibility determination. Not required at annual redetermation.	OSIPM: $2000 (1-person need group) - $3,000 (2-person need group).	N/A	$2,000 individual $3,000 couple	$5,000 plus funds in an Approved Account	$2,000	OSIPM: $2,000* *married individuals are subject to spousal impoverishment resource provisions OHP MAGI-based: N/A but subject to disqualifing transfer of asset provisions	N/A	N/A	Cannot exceed $1,000,000.	Applicant resource limit $2,500. Recipient's resource limit $10,000. Allows a motor vehicle exclusion up to $10,000.	N/A	There is a $25,000 liquid asset test for households to meet categorical eligibility. All households that do not meet categorical eligibility must meet a $2250 resource limit unless an elderly or disabled member is in the household—then the resource limit is $3250.
Other	Title IV-E Foster Care - Child must reside in fully certified foster home or a licensded facility. Court must make the following findings: A) Initial Removal - That it is in the best interest of the child to be placed in foster care and that reasonable were made to prevent the removal of the child; B) Permanency Hearing - that DHS has made reasonable efforts to achieve the permanency plan.	Needs assessment (includes Level of Care) and authorized individual support plan.	N/A	N/A	Must be employed or meet definition of self-employment. Recipients must pay monthly Participant Fee up to maximum of $150 (sliding scale)	Must meet 1915(i) MH LOC requirements as determined by county MH offices	Must meet Nursing Facility Level of Care criteria. Service Priority Levels from 1 - 13: Individuals with the most impairments are assessed at a higher priority level. For example, individuals at level 1 have a higher level of need than an individual at level 13.	N/A	Youth age 14 can be eligible for VR services while participating in Transition activities coordinated by school districts.	N/A	Family must include one child or pregnant individual. Child only case must be under the age of 18 or under the age of 19 and in secondary school or equivalent program full time.	Family must include one child or pregnant individual. Child only case must be under the age of 18 or under the age of 19 and in secondary school or equivalent program full time.	Able-Bodied Adults Without Dependents (ABAWDs) are adults ages 18-49 who don't have children in the home and must meet work requirements to be eligible for SNAP in non-waived counties, unless they meet an exemption. Qualified non-citizens are only eligible when additional criteria is met or when a special status such as Refugee or Trafficking is applicable.

***Intellectual/Developmental Disabilities**
In order to access DHS I/DD Services, individuals must meet *one* of the assessment/diagnosis requirements. For all other programs, *all* requirements must be met.

Office of Facilities Management

Facilities Proposal Impact on Workspace for 2021 - 2023

Department of Human Services Major Projects Summary

		2021 – 2023 BIENNIUM	
Priority	**Project (Programs)**	**Estimate**	**Closing/Comments**
	Lane County – Multi-Service Building (CW, SSP, VR)	$1,500,000	Close 3 current Eugene office locations at: • 1899 Willamette St • 2101 W 11th Ave • 2885 Chad Dr Consolidate into a single multi-service building.
	Gresham Multi-Service Building (CW, SSP)	$1,700,000	Closing building at 355 NW Division, purchase of systems furniture and moving costs.
	Klamath Falls Multi-Service Building (CW, SSP, APD	$1,800,000	Closing 4 buildings at: • 509 Commercial St. • 710 Klamath Ave. • 714 Main St. • 801 Oak St. Purchase of systems furniture and moving costs.
	North Clackamas Expansion (CW, SSP)	$500,000	Close 1 current building at 16440 SE 82nd and relocate to larger facility. Purchase of systems furniture and moving costs.
	Field Offices Carpet Replacement	$750,000	Includes furniture lifts, moving costs, carpet costs.
	Total:	**$ 6,250,000**	

Note: Lane County (Eugene) Business Case approved by the DHS Facilities Committee prior to Dept. of Administrative Services proposal to consolidate into a multi-agency, state property.
Clackamas County expansion Business Case approved by the DHS Facilities Committee.
Klamath Falls and Gresham Build-to-Suit locations are currently *estimated* to be ready for agency move in/commencement: *February 2022*.

Department of Human Services
Gender Equity Report

The Department of Human Services (DHS) submits this report as required by ORS 417.270 (Equal Access to Appropriate Services for Girls and Boys) to report on our progress and plans in achieving equal access to appropriate services for males and females under age 18.

The Department of Human Services supports equal access to appropriate services for females and males under 18 years of age.

Budgetary information supporting this program is provided below:

Gender Equity Report
19-21 Child Welfare Budget

	2019 CW Databook		19-21 LAB Budget		
	Male	Female	Total Fund	Male	Female
Foster Care	48.5%	51.5%	$45,971,704	$22,276,474	$23,695,230
Adoptions Finalized	50.7%	49.3%	$395,604,078	$200,618,179	$194,985,899
Child Abuse/Neglect Safety	49.8%	50.2%	$182,093,401	$90,667,655	$91,425,746
Child Welfare Average	**49.5%**	**50.5%**	**$623,669,183**	**$308,542,184**	**$315,126,999**

During the last biennium, Programs worked to implement the policy by taking the following steps:

- Office of Contracts and Procurement (OC&P) gender equity within DHS contracts, including, when applicable, DHS requests for proposals:
- Nondiscrimination.
- a. The Contractor must provide services to DHS clients without regard to race, religion, national origin, sex, age, marital status, sexual orientation or disability (as defined under the Americans with Disabilities Act). Contracted services must reasonably accommodate the cultural, language, and other special needs of clients.

  b. Contractor certifies that Contractor has a written policy and practice that meets the requirements described in ORS 279A.112 for preventing sexual harassment, sexual assault, and discrimination against employees who are members of a protected class. Contractor agrees, as a material term of this Contract, to maintain such policy and practice in force during the entire Contract term.

  c. As required by ORS 279B.235, Contractor must comply with ORS 652.220 and shall not unlawfully discriminate against any of Contractor's employees in the payment of wages or other compensation for work of comparable character based on an employee's membership in a protected class. "Protected class" means a group of persons distinguished by race, color, religion, sex, sexual orientation, national origin, marital status, veteran status, disability, or age. Contractor's compliance with this Section constitutes a material element of this Contract and a failure to comply constitutes a breach that entitles DHS to terminate this Contract for cause.

  d. Contractor may not prohibit any of Contractor's employees from discussing the employee's rate of wage, salary, benefits, or other compensation with another employee or another person. Contractor may not retaliate against an employee who discusses the employee's rate of wage, salary, benefits, or other compensation with another employee or another person.

- The standard language in DHS personal services contracts has been updated to read: “Contractor shall provide equal access to covered services for both males and females under18 years of age, including access to appropriate facilities, services and treatment to achieve the policy in ORS 417.270.”
- Providing training to new contracts’ staff and updating the rest of the staff on contracts and solicitations into which gender-specific services provisions were incorporated.
- Continuing to review and provide feedback to contracted Behavioral Rehabilitation Services (BRS) shelter or residential treatment programs regarding their ability to provide services that are gender specific.
- Continuing to raise awareness with staff and providers through meetings to discuss and understand what gender-specific services mean.
- Tracking current male/female ratios in all licensed child facilities and encouraging providers to participate in the Licensed Child Placing Agencies program review for assessment and monitoring.
- Program participation in the National Youth in Transition Database tracking program.

- Child Welfare continues to be engaged with the Coalition of Advocates for Equal Access for Girls by:
    - Refer staff, community programs and inquiries to explore the website for Coalition of Advocates for Equal Access for Girls http://equalaccessforgirls.org.

Child Permanency Program

In compliance with ORS 417.270, the Child Permanency Program in the Office of Child Welfare Programs includes in all service contracts the requirement that the contractor shall provide equal access to covered services for both males and females under18 years of age, including access to appropriate facilities, services and treatment. In addition, all contracts include a nondiscrimination clause that states the Contractor must provide services to DHS clients without regard to race, religion, national origin, sex, age, marital status, sexual orientation, or

disability. The Child Permanency Program has, on occasion, denied a contract based on the inability of the contractor to agree to these terms.

In addition, program staff is committed to providing gender-equal services on how to support LGBTQ youth in foster care or who is entering into adoption or guardianship by identifying and addressing their specific needs with a prospective family. Furthermore, the Child Permanency Program embraces placement of children with prospective adoptive parents regardless of sexual orientation.

Post Adoption Services

In compliance with ORS 417.270, the Post Adoption Services Program provides equal access to services and supports for both male and female children and youth. Monthly subsidies and medical coverage are provided on behalf of the children to their adoptive parents and guardians. The purpose is to promote the achievement of permanency for special needs children and the ongoing stability of the children in their adoptive and guardian homes.

By contract, Oregon Post Adoptive Resource Center OPARC is required to provide equal access to serve both males and females under age 18, including access to appropriate facilities, services, and treatment. OPARC is also required to abide by a non-discrimination clause regarding race, religion, national origin, sex, age, marital status, sexual orientation, or disability, and must provide reasonable accommodations to meet the cultural, language, and other special needs of clients.

ORPARC also operates a lending library which offers a wealth of literature and resource packets, free of charge, to adoptive parents, guardians, and other professionals serving special needs adopted and guardian children. The materials cover a breadth of topics and include books specific to gender-specific development and identity formation of children and youth. The goal being to ensure children of all genders have informed adults parenting and providing them support to meet their unique needs.

Child Welfare Training Opportunities

During the 2015-17 biennium, the following trainings were offered to child welfare staff:

- Classroom Training: Positively Impacting Child and Youth Well-Being: Sexual Orientation, Gender Identity and Expression
- Netlink Training: Working with Sexual and Gender Minority Youth in the Child Welfare System
- Netlink Training: Caring for Sexual and Gender Minority Youth
- Classroom Training: Ask Diversity: An Introduction to P.A.U.S.E

Child Well-Being Program

The services provided to children who are in Child Welfare programs remains fairly consistent over time in terms of gender equity. The population of children in out-of-home care during the past five federal fiscal years remains consistent.

FFY 2012-2016 Gender of Children Served in Foster Care					
Gender	**2014**	**2015**	**2016**	**2017**	**2018**
Girls	49.3%	48.3%	47.8%	48.3%	48.3%
Boys	50.7%	51.7%	51.7%	51.7%	51.7%
Total	**11,443**	**11,238**	**11,191**	**11,645**	**11,445**

Value Based Practice:

- Gender-responsive approach integrates those things that intentionally allow gender identity and development to affect and guide services and service delivery, create an environment (physical, social, emotional) that reflects and understands the reality of youth lives, and is responsive to the issues and needs of the youth being served.

- Gender-responsive approach integrates those things that intentionally allow gender identity and development to affect and guide services and service delivery, create an environment (physical, social, emotional) that reflects and understand the reality youth lives, and is responsive to the issues and needs of the youth being served. It values the individual gender identity perspective, celebrates and honors their experiences, respects and takes into account gender development and empowers youth to reach their full potential. A gender-responsive approach also clearly recognizes that there are unique differences between genders and includes an understanding and knowledge of these differences including sociological, biological and brain differences that are specifically reflected in how services are provided, how staff interact with the individual youth, in staff training, programming, service planning and behavioral management.

Strategies in place to continue a focus on gender equity:

- DHS - Office of Child Welfare Program has and will continue to encourage the Residential Services Programs in Oregon to utilize the Gender-Responsive Standards and Assessment Tool for Girls Programs and Services (G-SAT). The G-SAT is a great resource for enhancing a program's gender-responsive approach and by integrating these empirically based standards. This should improve the outcomes for girls.
- The department ensures staff access to the training conference in Oregon, which is sponsored by the Coalition of Advocates for Equal Access for Girls http://equalaccessforgirls.org.
- The department will continue to recruit private agencies to develop programs for higher levels of care for girls in Oregon.

- DHS Equity and Inclusion Statewide Collaboration Team: The team engages in advocacy, not only for clients, but for workers in order to ensure a safe, supportive and respectful workplace for all. This group focuses on gender equity with a special emphasis on LGBTQ individuals.
- The Champions Academy is a six-week summer program designed to support the year-long investments of teachers, coaches and mentors by holistically preparing student athletes for academic promotion and post-high school transitions. Because this program was a big attraction to male student/athletes the department provided additional scholarships for 15 female and 5 male children in foster care to ensure female access.

2021-23 Intellectual & Developmental Disabilities (I/DD)
Community Housing
Fund Report

The I/DD Community Housing Program assists persons with developmental disabilities to live successfully in community housing that is affordable and safe and contributes to their independence and quality of life. I/DD Community Housing supports services to persons with developmental disabilities in the following ways:

- Oversees the property management of homes developed for the former Fairview State Training Center residents.
- Develops and manages and funds eligible home modification projects for In-Home and Crisis Services for children and adults with developmental disabilities.
- Per SB 491 passed in the 2019 Legislative session, remaining funds from the Fairview Community Housing Trust (two of those accounts contain the proceeds from the sale of the Fairview State Training Center) were transferred to Oregon Community Foundation for management and distribution to support housing grants and projects for Oregonians with developmental disabilities.
- Provides technical assistance to individuals, families, brokerages, and counties regarding housing issues faced by persons with developmental disabilities and best practices to implement solutions.

Funding for the program is maintained through the operating fund for maintenance, development, technical assistance, etc.

Fairview Community Housing Trust Accounts

Effective January 2, 2020, per SB 491 passed in the 2019 Legislative session, remaining funds from the Fairview Community Housing Trust (two of those accounts contain the proceeds from the sale of the Fairview State Training Center) were transferred to Oregon Community Foundation.
Background:
The two accounts containing proceeds from the sale of the Fairview State Training Center were designated in statute as follows:

> *** Per ORS 427.340 "The Department of Human Services may expend, for the purposes of ORS 427.330 to 427.345, any earnings credited to the account, including any income from the lease of surplus property and any interest earned on monies deposited in the account, and up to five percent of any sale or transfer proceeds initially credited to the account by the Oregon Department of Administrative Services. At least 95 percent of all sale or transfer proceeds shall remain in the account in perpetuity."*

Historically the funding from the five percent of sale proceeds account as well as the accrued interest on both accounts has been used to provide grant funding to children and adults with developmental disabilities to allow for them to continue living in their own home or family home. There is a Fairview Trust Advisory Committee which oversees the grant awards and other policies governing the operation of the Trust. The committee membership includes former Fairview clients, family member of former Fairview clients, client advocates and others. Clients submit grant applications which are reviewed for eligibility and funding.

As part of the budget development process for 2011-2013 a reduction action was put forward to expend the balances out of the two Fairview Community Housing Trust Accounts. The action that was taken was to leave $6,000,000 in the corpus or 95% sale proceeds account and to use $5,970,375 from that account combined with the projected remaining balance in the 5% Fairview Grant account of $979,759 for a total of $6,950,134. This action was taken in year two of the biennium and the grant fund program suspended.

A Policy Option Package for 2013-15 would have restored the corpus account to pre 2011-2013 balance, adding back $6,950,134 GF; however, the Policy Option package was not selected as part of the Legislatively Adopted Budget.

In 2015-17, a legislative action added $92,500, EOTC sale proceeds, to the Trust. This action resulted in a combined account balance of $6,079,941 as of April 30, 2016.

After 2016 Legislative Session, a Fairview Housing Trust Workgroup was formed to develop and propose strategies for the use of the Fairview Housing Trust funds. Per recommendation of the group, 95% of the funds ($5,112,741) were invested in the state's intermediate term fund on September 1, 2016.

With recommendation of the Fairview Housing Trust Workgroup and advocacy from member of the I/DD stakeholder community, SB 491 transferred remaining balance of the Fairview Trust, both 95% and 5%, to Oregon Community Foundation. Total remaining balance transferred was: $6,590,595

I/DD Community Housing Operating Account

When Fairview was downsized and eventually closed, the I/DD Community Housing Section in partnership with private non-profit housing developers constructed or remodeled 200 homes to provide housing for those residents and persons misplaced in nursing homes. It was called the Community Integration Project (CIP). The homes were funded by general obligation bonds sold by Oregon Housing and Community Service Department (OHCDSD) and incorporate many specialized features. Per an agreement with OHCDSD a reserve amount of $500,000 is required for this account to assure maintenance of an asset purchased with GO bonds.

The I/DD Community Housing Section allocates funds and provides oversight and technical assistance in order to develop, adapt and maintain safe and appropriate housing for children and adults with developmental disabilities that receive services funded and/or licensed by the Department of Human Services. The persons receiving services in Oregon live in a variety of settings. These include, among others, services to children living in family homes, adults and children in 24-hour licensed out of home services, foster care, and adults in apartments or private homes. Often, providing these services requires that housing be constructed, modified or adapted in order to meet the needs of persons and to assure that homes are safe and adapted to the unique needs of the persons who live there. In carrying out its responsibilities, the I/DD Community Housing Section:

- Manages the maintenance and repair program for 200 bond funded homes that provide housing for persons with developmental disabilities receiving 24 hour support;
- ;
- Manages and allocates funding for CIP homes in need of housing adaptations for adults and children with developmental disabilities receiving funded services;
    - Provides fiscal oversight of expenditures from the Housing Fund.,

Executive Summary

The mission of the DHS Child Welfare Department is to improve family capacity to provide safe and permanent living environments for children. It is a goal to reduce the number of children who experience foster care and to promote children's safety in their homes or other family environments. Some of the other goals of the department are:

- Help children who are unable to live safely in their homes live in settings that provide safety, stability and continuity with their families and begin the healing process.
- Secure safe, nurturing and legally permanent families for children who cannot be raised by their families.
- Expand program partnerships and increase the cultural competency of DHS staff and partners to better serve Oregon's diverse communities

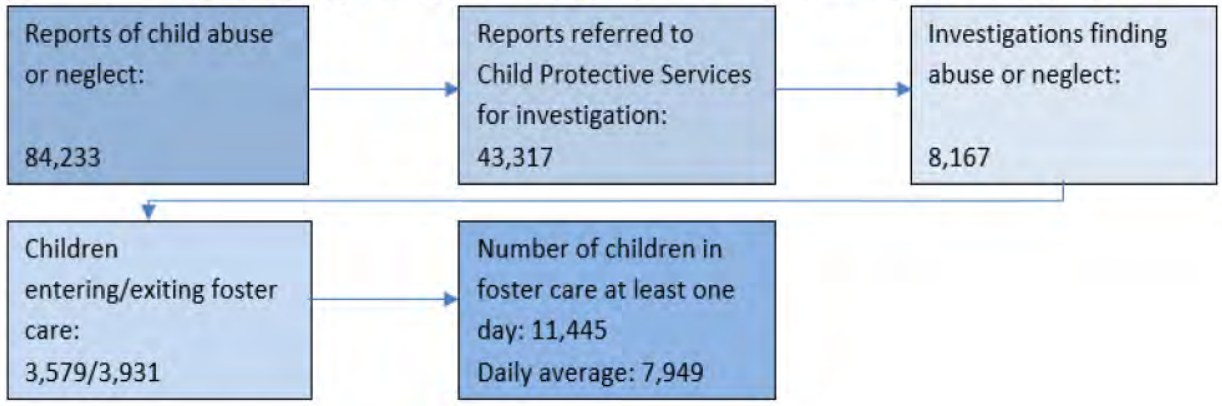
The DHS Child Welfare Department has been under scrutiny in recent years for being disorganized, inconsistent, and representing a high risk for children in the system's care. An audit released by the Secretary of State's office in 2018 found that DHS and Child Welfare struggled with chronic and systemic management shortcomings, lacked sufficient placement options to meet the needs of at-risk children, and faced staffing challenges that compromised the program's ability to perform essential Child Welfare functions. In April 2019, the Governor issued Executive Order 19-03, *ESTABLISHING AN OVERSIGHT BOARD TO ADDRESS THE CRISIS IN OREGON'S CHILD WELFARE SYSTEM.* This Executive Order established a Governor's Oversight Board and crisis team to make and implement recommendations at DHS Child Welfare Department related to:

- Out-of-state foster child placements;
- Compliance with the Oregon Public Records Law;
- Implementation of laws prescribing the Critical Incident Response Team ("CIRT");
- Hiring and human resources practices generally;
- Building capacity for therapeutic and general foster care, as well as for a continuum of care in behavioral health services for foster children and youth that is accessible, trauma-informed and family and child-focused;
- Development of adequate in-home capacity for children and youth of color, youth with intellectual and developmental disabilities, and LGBTQ+ youth;
- Development of recommendations to address workforce challenges in provision of services to foster youth;
- Ensuring that accurate and timely data is available to improve operations and processes; and
- Other operational challenges.

OR-Kids is the State of Oregon's legacy child welfare information system, which was originally implemented to comply with the SACWIS (State Automated Child Welfare Information System) Federal framework. SACWIS systems were single centralized systems designed to help case workers manage their caseloads through automation and to comply with federal reporting requirements. Oregon will be transitioning OR-Kids into a new Federal framework known as CCWIS (Comprehensive Child Welfare Information System) that considers new child welfare practices and technologies. The CCWIS framework has been adopted by the Administration of Children and Families (ACF). ACF is the major federal partner of Child Welfare Services and provides a 60% funding match for all software development following the CCWIS guidelines. The gradual modernization and replacement of specific modules will not be a rapid process, likely requiring 4-5 years being completed in June 2023, based on the current and expected resource commitments and the scope of the work.

In addition to the change in recommended software design framework from our Federal partner, the Secretary of State's office completed an audit of the Child Welfare Information Systems (OR-Kids) and the enhancements needed to improve usability. Some of the findings from the audit to improve OR-Kids usability and data quality for Case Mangers and other Child Welfare staff include:

- continue to engage with program staff and other users to address usability concerns;
- implement a data governance function;
- fully identify critical data;
- improve the OR-Kids training programs; and
- to ensure processes and controls are in place to successfully transition OR-Kids to a Comprehensive Child Welfare Information System, the department should acquire a qualified program manager and maintain engagement with project oversight entities.



CCWIS transition and modernization will provide Oregon the opportunity to redesign the life cycle of child welfare and ultimately improve outcomes for children and families through better data interoperability, modularity, and data quality. The transition to the CCWIS framework will make OR-Kids in compliance with the guidelines of the Administration of Children and Families (ACF). ACF is a division of the Department of Health and Human Services and promotes the economic and social well-being of children, families, and communities with leadership and resources for effective delivery of human services. ACF is our federal partner and provides funding to build software that meets the CCWIS framework.

The Child Welfare Department did consider other options before embarking on this course of action. Child Welfare looked at purchasing a new OR-Kids system, but availability of commercial products was limited, the funding options available were limited, and the perceived desire for another large system implementation by the department was very low. Retaining the OR-Kids system as it was also considered. The issues identified were that it would not be CCWIS compliant, federal funds would only be available at a lower matching rate for new development and O&M, and we would not be able to meet business and reporting needs on an older technology platform. Due to these reasons it was decided that transitioning the existing OR-Kids information systems to the newer CCWIS framework provided the best option and greatest chance for success.

Current State

In the federal fiscal year ending September 30, 2018, Child Welfare served 11,445 children who spent at least one day in foster care. During that same time period, DHS received and reviewed 84,233 reports of abuse and neglect and referred 43,317 reports to Child Protective Services (CPS) workers for investigation.

Figure 1: Of the 84,233 reports, investigators in Oregon found over 8,100 instances of abuse or neglect

Source: 2018 Child Welfare Data Book

When investigators determine abuse or neglect occurred, a CPS caseworker may decide to close the investigation because the child is safe, open the case and implement an in-home safety plan, or remove the child from the home. If removed, the child enters state custody and is assigned a permanency caseworker to manage and monitor their case. After removal, the caseworker may return the child to the home with a period of monitoring, though most are placed with foster families or relatives. High-needs children and teens may be placed in more restrictive institutional settings or behavior rehabilitative programs.

A local court decides whether and for how long the child stays in state custody. Upon leaving state custody, the child may be returned to their home, become available for adoption through foster care, or enter long-term foster care or guardianship.

In addition to ensuring children are in safe and positive environments, caseworkers must also maintain voluminous documentation to satisfy state and federal requirements. The agency must comply with federal program standards, including those governing Child and Family Services; Child Support; Foster Care, Adoption Assistance and Guardian Assistance; Medicaid; Social Services Block Grant; and Emergency Assistance programs. The DHS Child Welfare program also must adhere to state laws and regulations, such as the Strengthening, Preserving and Reunifying Families law and the Interstate Compact on the Placement of Children. These laws and standards are ever-changing; for example, the Governor's recent Executive Order 19-03 established a Child Welfare Oversight Board to make and implement recommendations related to out-of-state foster child placements, building capacity for foster care, and availability of data.

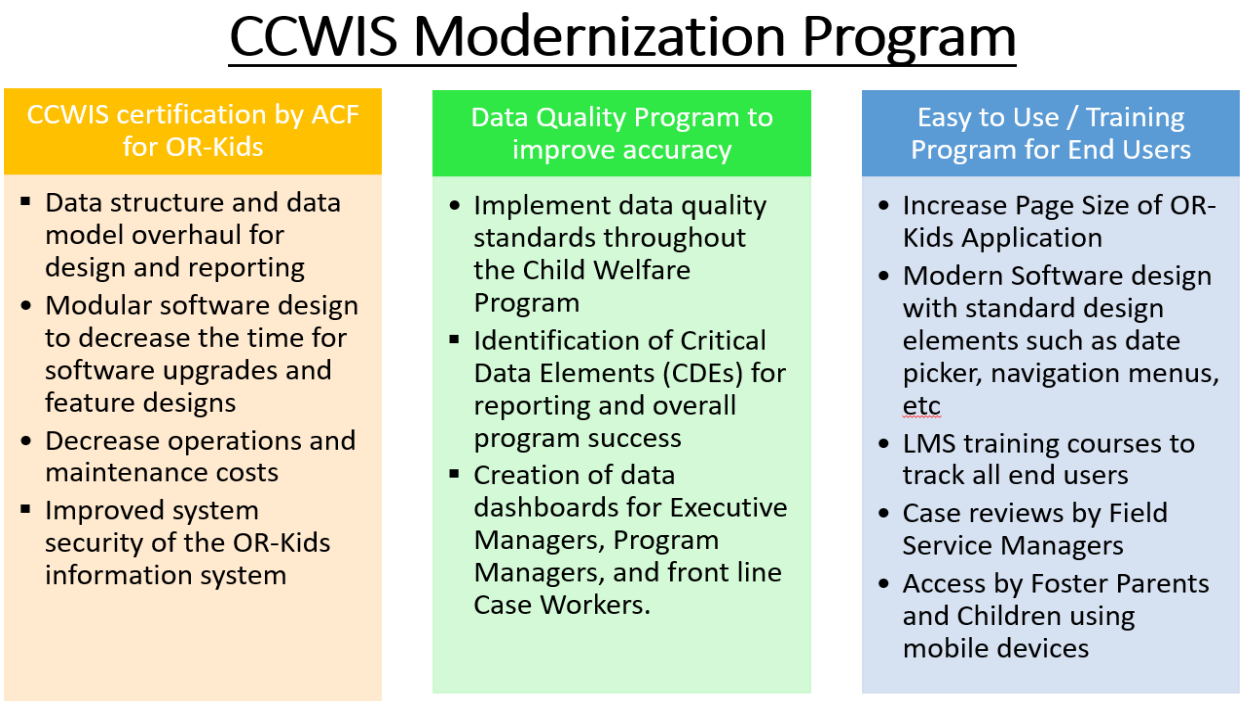
DHS Child Welfare has been under scrutiny in recent years for being disorganized, inconsistent, and representing a high risk for children in the system's care. DHS and Child Welfare has struggled with chronic and systemic management shortcomings, lacked sufficient placement options to meet the needs of at-risk children, and faced staffing challenges that compromised the program's ability to perform essential Child Welfare functions. In 2018, an audit by the Secretary of State Office found that poorly planned and implemented initiatives, including the 2011 implementation of OR-Kids, undermined caseworkers' and managers' efforts to improve child safety. In addition, the ability by Child Welfare Managers to extract data for status reports and performance metrics was hampered by the convoluted software design of OR-Kids as well as the aging technology. For example, the screen size of the OR-Kids application is only two-thirds the normal size of a modern software application and the application does not have responsive design for various screen sizes and devices. Status reporting is extremely difficult because there was no data validation tools available in the older software design and critical data elements were never defined by the Program Managers. Due to the audit findings, the Governor issued Executive Order 19-03, *ESTABLISHING AN OVERSIGHT BOARD TO ADDRESS THE CRISIS IN OREGON'S CHILD WELFARE SYSTEM.*

In short, the OR-Kids information system is functional for basic case management, in that it facilitates the storage and retrieval of case information. However, it is difficult to use, which decreases caseworker efficiency and puts Child Welfare data quality at risk.

Overview and Background

Program Scope

DHS needs a robust computer system to track and manage thousands of Child Welfare cases, reports of abuse and neglect, and subsequent investigations; the agency's computer system, OR-Kids, serves this purpose. Some of the dozens of Child Welfare program functions supported by the system include provider certification, adoption work, eligibility determinations, case planning and tracking, payment processing, and federal reporting. The system's database currently contains over 400 tables containing more than 10,000 fields, which collectively contain over 600 million records, including approximately 1.8 million people associated with over 448,000 closed and 31,000 open cases.



OR-Kids is the primary application for all case workers and other staff working for the Child Welfare program. With the transition to the newly recommended software design framework, OR-Kids needs to transition to a CCWIS design architecture to still be eligible for funding from ACF. This will be a multi-year effort to design OR-Kids in a more modular architecture than the current system. While there will be an opportunity to implement new features in the software, the primary concern is to transition existing features and capabilities into a CCWIS certified architecture.

The Federal Administration for Children and Families (ACF) has recently recommended a new software architecture. The new CCWIS model recommends software applications be more modular in design to allow for more flexibility of new technologies and updates/modifications to existing systems. By using the new CCWIS architecture model improvements to the OR-Kids system should lead to:

- Improved Data Quality
- Data Driven Decisions
- Reduced system overhead
- Improved User Interfaces
- Modular Components
- Public interfaces
- Reduction of Data Fixes
- Higher usability by field staff

All of these goals can be categorized into three basic areas of emphasis – data governance, user training and usability, and modern software design. OR-Kids software application should be built in such a way that the operation and maintenance cost of supporting the software is reduced, that the software use public interfaces and data standards to exchange with other information systems, and to provide high quality data trusted by all stakeholders to make data driven decisions. While these efforts may be independent efforts, they must work together to achieve a successful transition to a CCWIS compliant system.

The scope of the program is shown in the diagram below and includes the following activities:

- Data Quality Plan and implement data quality standards throughout the Child Welfare Program
- Data structure and data model overhaul for design and reporting
- Implementing a modular software design to decrease the time necessary for software upgrades and feature designs, as well as decrease operations and maintenance costs of the software application.
- Improved system security of the OR-Kids information system
- Phased replacement of OR-Kids functions with newer functionality and modular design
- Identification of Critical Data Elements (CDEs) for reporting and overall program success
- Creation of data dashboards for Executive Managers, Program Managers, and front-line Case Workers.

The program will oversee projects and work efforts to complete the transition of OR-Kids to an easy to use, fully CCWIS compliant information system. These projects will have little cross over and may not relate to each other directly, but they should work to improve the OR-Kids application. For example, one of these projects is for the Data Quality team and Executive Steering to define the Critical Data Elements (CDEs) that are used to measure success of the Child Welfare Program. Once these CDEs have been identified, then data dashboards will be built so executives and managers can review overall performance areas. A Workforce Development and Training Program Manager position were recently added to standardize business processes and to create a user training program to ensure data is entered accurately. This position will also create a standard process to implement new technology throughout the Child Welfare Department. As end users report problems where the application is too complex or difficult to record the CDEs, then the Business Analysts team can work with the end user to improve software function and design. At the same time, the software development projects such as "Family Reports" and “Foster Family Recruitment" are new modules built within OR-Kids and incorporate these features and functionality to make the new OR-Kids systems CCWIS compliant and easier for all people to use – Case Workers, Field Service Managers, Providers, Foster Families, etc.

All these projects will be approved by the Executive Steering Committee at the Program level and be coordinated throughout the Child Welfare division instead of independent data silos. The Program will provide the oversight and implementation of each of these projects coordinating each team so the new OR-Kids application is a seamless information system that captures data to be used to evaluate performance and drive policy and operational decisions.

The scope of the program does not include:

- Software maintenance releases
- System enhancements that do not support CCWIS accreditation

The following areas of scope are uncertain or have not been fully defined. More details for these projects are included in the Appendix

- Mobile solution for staff to work out of field offices while meeting clients
- Data exchange standards to facilitate sharing of structured data across multiple State systems outside of Child Welfare.
- Other projects not yet defined, that are required to achieve CCWIS accreditation.

Measurable Benefits

The CCWIS Modernization program plans will focus in the near-term on achieving CCWIS compliance, improving data structure and quality issues, and making continued enhancements for end users. Longer term, OR-Kids begins to transform into a more modern application that can meet program requirements. The team envisions a 3-year period to achieve CCWIS transition and compliance, followed by a slow process to upgrade in a modular fashion over a period of 3-4 years. Some of the benefits the program will measure are:

- Transform OR-Kids into an application about which end users consistently feel confident in completing their daily work.
- OR-Kids data is viewed as a reliable and valid basis for decision making around child safety and strategic planning for involved stakeholders.
- Business and program needs are met in weeks and months, not months and years, as OR-Kids is developed in a more modular fashion.
- Receive CCWIS accreditation and therefore still be eligible for federal matching funds for ongoing support of the OR-Kids Systems.

Identify Critical Data Elements

The Data Quality Team will work with the Child Welfare Program managers and the CCWIS Executive Steering Committee to identify a set of critical data elements to measure the success of the Child welfare program. Once these data elements are identified, a Data Dashboard showing business managers the current status of the Child Welfare system will be developed as part of the CCWIS Program. These data elements will be reviewed on an annual basis and may change as the Child Welfare requirements change over time and area of emphasis.

Training and Usability of OR-Kids Software

The Child welfare department and CCWIS program will contain training records of all Child Welfare staff and Child Welfare providers. These records will ensure that training requirements of staff members are tracked and kept current. It will also provide a training resource for new providers and provide reminders to providers when annual or new types of training are required.

Future State

The OR-Kids Business and Technical teams ("The Team") have begun to coalesce around a vision to move the application forward. Over the past 11 months, the OR-Kids Team, along with support from Oregon DHS leadership and central management, have sought to plan for the future of the application while simultaneously sharpening focus on the day to day needs of the application's 2500+ daily users. The OR-Kids staff have been successful in more deeply aligning and integrating system enhancement and planning efforts into weekly division-wide executive meetings. Going forward, a goal will be to continue to work to align improvement efforts with agency-wide goals, both internal and external, including the CFSR, APSR, and AFCARS 2.0 enhancements.

As part of a nascent agency-wide effort to focus on becoming more data-informed, and in keeping with CCWIS requirements, the Child Welfare Division has created our initial Data Quality Plan, which will inform efforts over the next biennium to address issues of validity, consistency, and timeliness with regard to critical data elements and measures important to the operation of Child Welfare and the agency's efforts to plan for the future.

Assumptions & Constraints

The project assumptions identified for this program would include the following:

- More than 60% of the program funding will be provided by ACF
- Match funding will be secured
- Establishment of a Program-level Executive Steering Committee including all Child welfare program Managers
- Establishment of a “Data Steward” program with key persons identified in each Field Service office
- Identifying and hiring the right technical resources to transition OR-Kids to modularity
- Add 9 additional positions to the Business Analyst Team
- Add 6 additional positions to the Technical Development Team

Alternatives Analysis

Options Considered:

Option	Pros	Cons
Replace OR-Kids with new CCWIS system	Not Applicable	- Commercial availability of product options is very low. - Federal match funding is not available. - Perceived low organizational appetite for another large system implementation effort.
Invest in a gradual transition of OR-Kids into a CCWIS-compliant system	- Builds on the success of a recent server modernization effort - Retains investment in the base SACWIS system - Enables leverage of the .Net investments already made in other OIS development teams - Bi-directional skill transition from Java to .Net is proven in our current staffing model	- Frequent compliance overhead, constant shifting of resources to meet new laws, regulations, and policies - The high cost of technology investment is significant to meet deadlines. - Requires dual development maintaining the current system and develop a new system simultaneously
Retain OR-Kids with no transition to CCWIS compliance	- Little compliance overhead	- Would only be able to match Federal funds at the lowest maintenance and operations level - Would not address business needs for usability, reporting and data quality. - Retains a stale technology platform.

Conclusions:

Moving into 2020, the Team intends to continue on the course of enhancing the existing the OR-Kids application in ways that are aggressively targeted at improving daily life for field end users, reducing duplicate and redundant data entry, and eliminating work-arounds that involve external tracking and systems. Simultaneously, the Team is engaged in the work of reformatting and structuring the application's data model, including bedrock Person and Case data, and starting to initiate a program to deliver the first modules, including Recruitment/Home Inquiry, Financial Processing, and a "BA" module intended to allow faster, simpler corrections to alleviate end user waits.

The 2019-20 APD outlined a number of planned initiatives to be pursued as part of initial efforts to move toward CCWIS compliance, along with long-awaited and sorely needed foundational and end-user specific enhancements.

Table 1 - Activity and Current Status

Activity	Current Status
a. CCWIS Transition Efforts are prioritized by DHS executive stakeholders	The OR-Kids modernization effort has received the strong support of Child Welfare's executive stakeholders, including the new Child Welfare Interim Director Rebecca Jones-Gaston, Child Welfare Deputy Director Jana Mclellan and DHS Director Fariborz Pakseresht. The executive team has received matching funds for

Activity	Current Status
	the 2019-21 biennium to support continued efforts toward system improvement and modularization. *A prioritized list needs to be completed by the Executive Steering Committee.*
b. Program Manager retained to lead CCWIS Transition Effort	A program manager to shepherd the many disparate parts of the CCWIS effort was completed in March 2020
c. Data Quality Plan complete and data stewardship activities underway	The Data Quality Plan was completed in January 2020 and a Data Quality Team has been established *A data stewardship program still needs to be implemented at each Field Office*
d. Role Based Dashboards for Line Managers and Staff	This effort is in process. Currently working with Data Quality Team to define Critical Data Elements and working with ORRAI to determine reporting responsibility
e. New Data Models for Person Foster Recruitment/Home Inquiry	*Expected to be completed in Q3 2020*
f. Family Report Module (Including Court Document): The Family Report represents the largest change in OR-Kids functionality around case planning and documentation since the application was implemented in 2011. A new OR-Kids Page, built in Angular JS, will allow the replacement of three existing modules (Case Plan, Child Specific Case Plan, and Court Report) and coalesce all the functions into a single workflow and document. The new function is being developed following significant staff outreach and engagement, and reflects a modern view of what stakeholders need.	This is the first module in the new CCWIS framework. The planned "Go Live" date is May 4, 2020 *Expected to be completed in Q2 2020*
g. Feasibility Study: A contracted resource will be brought in to review, assess, and provide direction around The Team's efforts to move OR-Kids towards modularity and CCWIS compliance.	Contract was awarded in March 2020. Currently, we are working with contractor to determine statement of work and start date. *Expected to be completed in Q4 2020*
h. Recruitment/Home Inquiry Module (Phase 1): A top priority for Child Welfare and the Governor, this effort will seek to improve the current workflow for staff charged with engaging and developing potential foster parents from first contact through to application and certification. i. Current OR-Kids functions do not provide a seamless view of the recruitment/ inquiry process and do not allow for all necessary data to be recorded. This enhancement will provide front-line staff with a new module/function, built in .NET, that supports their work, provides feedback on progress, nudges them to complete tasks, and supports Oregon's goal of adding and retaining new foster parents.	*Expected to be completed in Q3 2020*

Estimated Scope / Description:

Summary:

OR-Kids is the State of Oregon's legacy child welfare information system, which was originally implemented to comply with the SACWIS (State Automated Child Welfare Information System) Federal framework. SACWIS systems were single centralized systems designed to help case workers manage their caseloads through automation and to comply with federal reporting requirements. Oregon will be transitioning OR-Kids into a new Federal software framework known as CCWIS (Comprehensive Child Welfare Information System) that considers new child welfare practices and technologies. CCWIS will provide Oregon the opportunity to redesign the life cycle of child welfare and ultimately improve outcomes for children and families through better data interoperability, modularity, and data quality

OR-Kids is the primary application for all case workers and other staff working for the Child Welfare program. With the transition to the newly recommended software design framework, OR-Kids needs to transition to a CCWIS design architecture to still be eligible for funding from ACF. This will be a multi-year effort to design OR-Kids in a more modular architecture than the current system. While there will be an opportunity to implement new features in the software, the primary concern is to transition existing features and capabilities into a CCWIS certified architecture.

The Federal Administration for Children and Families (ACF) has recently recommended a new software architecture. The new CCWIS model recommends software applications be more modular in design to allow for more flexibility of new technologies and updates/modifications to existing systems. By using the new CCWIS architecture model improvements to the OR-Kids system should lead to:

- Improved Data Quality
- Data Driven Decisions
- Reduced system overhead
- Improved User Interfaces
- Modular Components
- Public interfaces
- Reduction of Data Fixes
- Higher usability by field staff

All these goals can be categorized into three basic areas of emphasis – data governance, user training and usability, and modern software design. OR-Kids software application should be built in such a way that the operation and maintenance cost of supporting the software is reduced, that the software use public interfaces and data standards to exchange with other information systems, and to provide high quality data trusted by all stakeholders to make data driven decisions. While these efforts may be independent efforts, they must work together to achieve a successful transition to a CCWIS compliant system.

Problem Definition:

An audit released by our office in 2018 found that DHS and Child Welfare struggled with chronic and systemic management shortcomings, lacked sufficient placement options to meet the needs of at-risk children, and faced staffing challenges that compromised the program's ability to perform essential Child Welfare functions. In April 2019, the Governor issued Executive Order 19-03, ESTABLISHING AN OVERSIGHT BOARD TO ADDRESS THE CRISIS IN OREGON'S CHILD WELFARE SYSTEM. This Executive Order established a Governor's Oversight Board and crisis team to make and implement recommendations at DHS Child welfare Department related to:

- Out-of-state foster child placements;
- Compliance with the Oregon Public Records Law;
- Implementation of laws prescribing the Critical Incident Response Team ("CIRT");
- Hiring and human resources practices generally;
- Building capacity for therapeutic and general foster care, as well as for a continuum of care in behavioral health services for foster children and youth that is accessible, trauma-informed and family and child-focused;
- Development of adequate in-home capacity for children and youth of color, youth with intellectual and developmental disabilities, and LGBTQ+ youth;
- Development of recommendations to address workforce challenges in provision of services to foster youth;
- Ensuring that accurate and timely data is available to improve operations and processes; and
- Other operational challenges.

Opportunity Definition:

Modernizing the OR-Kids Information System makes DHS eligible to receive Federal match funding for software development costs for the life of this program.

Alternatives:

The Child Welfare Department did consider other options before initiating this program.

- Child Welfare looked at purchasing a new OR-Kids system, but availability of commercial products was limited, the funding options available were limited, and the perceived desire for another large system implementation by the department was very low.
- Retaining the OR-Kids system as it was also considered. The issues identified were that it would not be CCWIS compliant, federal funds would only be available at a lower matching

rate for new development and O&M, and we would not be able to meet business and reporting needs on an older technology platform.

Due to these reasons it was decided that transitioning the existing OR-Kids information systems to the newer CCWIS framework provided the best option and greatest chance for success.

Program Approach:

The CCWIS Modernization Program will be managed to align with the goals of the two main stakeholders. The State of Oregon Child Welfare Department is the first stakeholder with the goal of building an easier to use information system that helps with business workflow, identification of key data elements that can be used by senior managers for program reviews, data driven policy decisions, and to meet state and federal reporting requirements. The Administration of Children and Families (ACF) is the second stakeholder with their goal being to create an information system that meets CCWIS guidelines. ACF is requiring the OR-KIDS information system to transition from a large complex system to a smaller system of inter-related modules that share data elements between them and across modules. The goals of ACF are to allow states to build systems that meet their business needs, foster innovation, to allow for data to be shared between related systems (child welfare, health courts, financial, etc.), and to reduce the overall maintenance costs to support the software and information system. Each of these stakeholders have a defined process for project prioritization, oversight and review of on-going work for the CCWIS Modernization.

ACF has key requirements and an annual planning process that combine for the overall program review. ACF required that a Technology Road Map be created showing the various projects that are part of the CCWIS modernization effort and a high-level plan of how Child welfare plans to transition from the current OR-Kids software architecture to the CCWIS software architecture. ACF also required Child Welfare to create a Data Quality Plan to identify critical data that can be measured for reports and to determine success of the new system as we build it. Lastly, ACF requires Child Welfare to submit an Annual Planning Document (APD) detailing the work that was created in the past 12 months and identifying the work that is planned to occur in the next 12 months. Any modifications that occur in between the APD submission are approved as an addendum. In addition, there are monthly conference calls to review Child Welfare progress on current projects.

Child Welfare has an ISMC that meets monthly to prioritize all IT projects within the child welfare. The CCWIS Modernization program is part of this prioritization effort and several the other projects are related to OR-Kids and/or required data integration with OR-Kids. There are 3rd party interfaces that are included in the CCWIS Modernization program that are also needed with other Child Welfare projects. The ISMC reviews the CCWIS Modernization Road map and will prioritize different modules that are required by the CCWIS Modernization as well as other projects that Child Welfare is working on. For example, Child Welfare is creating an Electronic Records Management System (ERMS) to store all active case files and archive closed case files instead of storing paper files in warehouses. The ERMS project requires a data interface with OR-Kids and the same interface is required by CCWIS Modernization. This is something that the ISMC will consider when they prioritize projects. The ISMC will also consider project funding when prioritizing projects. ACF will provide 60% project funding for any project that meets Tile-IV E requirements.

EIS *IT Investment form*

The overall CCWIS Modernization Program will be comprised of several smaller projects as each module or data interface is built. The CCWIS Program will maintain oversight at the program level with a Program Management Plan, Governance Plan, Communications Plan, etc. Each of the projects will have an ITI completed and submitted to EIS for oversight. Depending on the scope and complexity of each project will determine the level of oversight required by EIS.

Assumptions:

The program assumptions identified would include the following:

- The time required to adequately research, document, design, plan and implement the program will be available.
- The Business understands and can articulate the outcome measures they require.
- Legislative mandate changes will not significantly affect the program deliverables.
- The program will be able to deliver a system that will meet all CCWIS software framework design requirements.

Estimated Schedule: Start Date: 7/1/2019 End Date: 6/30/2024

Estimated Budget:

Implementation Cost		5 –Year Operating Cost	
Hardware:	$ 57,000	Hardware:	$ 65,000
Software:	$ 255,500	Software:	$ 25,000
Contracts/Services:	$1,752,000	Contracts/Services:	$1,000,000
Personnel:	$2,555,000	Personnel:	$ 60,000
Total:	$4,619,500	Total:	$1,150,000
Funding Source:	ACF (60%) / Gen Fund 40%)	Total Cost*:	$5,769,500
Contract NTE:			

* Total cost includes implementation plus 5 years of operating cost

Security Considerations:

The data within OR-Kids is Level 3 data. Most of the data is sensitive in nature as it deals with children throughout the State of Oregon, however in certain case files there may be HIPAA protected data or CJIS information. The CCWIS Modernization Program will follow the same security guidelines as the OR-Kids Information System.

Applicable Oversight Threshold(s): (DAS Policies 107-004-130 and 107-004-150)

- ☒ ≥$150k Total Cost*
- ☒ ≥$1m Total Cost*, Internal Development
- ☒ ≥Level 3 Information Classification
- ☐ Cloud / Hosted and High Remediation Cost
- ☐ Cloud / Hosted and System of Record
- ☐ EIS Required

Instructions:

This form should be filled out early in the governance process. The information in this form helps the agency and Enterprise Information Services (EIS) appropriately resource the investment for planning and oversight purposes.

EIS *IT Investment form*

The ITI form is predominantly an on-boarding form for Senior IT Portfolio Manager (SIPM) and Business Information Security Officer (BISO) engagement.

For Project and Program investments, the information in the ITI form may be high-level or preliminary. It is expected that agency certainty regarding details will increase over time. That certainty should be reflected in additional documentation (i.e. Project Management Plan) as the project or program progresses. This document does not need to be updated unless specifically indicated by EIS.

For Non-Projects, the information in the ITI should be more thorough as the agency will likely have greater certainty about investment details. In some cases, this ITI may be the single scope/justification related artifact required for EIS endorsement, consequently it is expected that the form provide sufficient detail for future readers to understand the justification, scope, and benefit from the proposed investment.

Field	**Definition**
Investment Name	A unique name for the IT Investment.
Agency	The name of the agency.
Agency Division	The name of the department of division of the agency requesting the investment.
Related Program	If applicable, reference any related EIS approved program (defined as a group of related projects).
Policy Option Package	If applicable, reference any related Policy Option Package (POP).
Date	The date of initial ITI submission.
Owner / Sponsor	The primary owner of the IT Investment, often the Sponsor, and approving authority.
Business Contact	The primary business contact for investment questions.
IT Contact	The primary IT contact for investment questions. Typically, an IT Manager.
Mandate	If applicable, indicate the appropriate investment mandate (Federal, Legislative, Governor, etc.). If needed, use the Estimated Scope / Description space for additional mandates or supporting information.
Non-Project	An IT investment which may include purchases, subscriptions, contracts, contract amendments, contract renewals, etc. Some activities such as development of an implementation or communication plan may be required; it is expected that these activities represent a minority of non-project investment work. Typically, this work involves a limited resource commitment (i.e. fewer than 80 hours of staff time or similar threshold established by agency governance).
Project	A “temporary endeavor undertaken to create a unique product, service, or result.” (PMBOK Guide, 6th edition, p.715) Typically, projects have project

	managers assigned, are approved by agency governance, and are officially chartered.
Program Initiation	Indicate if this ITI is an initial submission for a new Program. A Program is "defined as a group of related projects, subsidiary programs, and program activities managed in a coordinated manner to obtain benefits not available from managing them individually." (PMBOK Guide, 6th edition, p.11) Programs may include any number of project and non-project investments. Typically, individual program investments will share a program-level Business Case.
Estimated Scope / Description	Provide a brief description of the investment. This should detail, at a high level, the estimated scope of the investment and provide a brief justification for the investment. A more thorough justification should be included when a corresponding Business Case is not expected, for example when an investment is part of a program or when infrastructure/lifecycle level 1 oversight is likely.
Start Date	For Projects this represents the estimated date of Project Charter. For Non-Projects this represents the estimated date of contract signature, purchase, subscription start, etc. For Programs this represents the estimated date of Program Charter.
End Date	For Projects this represents the estimated date of Project close-out. For Non-Projects this represents the estimated date of contract signature, purchase, subscription start, etc. For Programs this represents the estimated date of Program close-out.
Hardware	The cost, either initial or 5-year operating, for estimated hardware purchases. *
Software	The cost, either initial or 5-year operating, for estimated software purchases. *
Contract/Service	The cost, either initial or 5-year operating, for estimated contracting costs. This cost should include maintenance contracts, subscriptions, development contracts, etc. *
Personnel	The cost, either initial or 5-year operating, for estimated personnel costs. *
Total	The total cost, either initial or 5-year operating, for all estimated expenses. *
Funding Source	Indicate the primary funding source for the investment.
Total Cost	The total of initial and 5-years operating cost estimates. Do not include potential revenue or savings. *

EIS *IT Investment form*

Contract NTE	For Non-Project Investments related to a contract (contract, contract amendment, contract renewal, etc.), include the Not-To-Exceed amount of the current contract and amendments.

Security Considerations	Briefly describe the following: ▪ Expected security controls required to protect state data against unauthorized access (Confidentiality, Integrity, and Availability) ▪ Any known business requirements for availability (e.g. acceptable downtime) ▪ Cloud / Hosted environment: hosted inside or outside the United States ▪ Highest level of data classification (Reference Policy 107-004-050) o Level 1 – Published: Information that is not protected from disclosure, that if disclosed will not jeopardize the privacy or security of the agency employees, clients, and partners. o Level 2 – Limited: Information that may be protected from public disclosure, but if made easily and readily available, may jeopardize the privacy or security of agency employees, clients or partners. o Level 3 – Restricted: Information intended for limited business use that may be exempt from public disclosure because, among other reasons, such disclosure will jeopardize the privacy or security of agency employees, clients, partners, or individuals who otherwise qualify for an exemption. Information may be accessed and used by internal parties only when specifically authorized to do so in the performance of their duties. External parties requesting this information for authorized agency business may be under contractual obligation of confidentiality with the agency prior to receiving it. o Level 4 – Critical: Information that is deemed extremely sensitive and Is intended for use by named individual(s) only. This information is typically exempt from public disclosure because, among other reasons, such disclosure would potentially cause major damage or injury up to and including death to the named individual(s), agency employees, clients, partners, or cause major harm to the agency. ▪ Restricted data types: o HIPAA (Protected Health Information) o CJIS (Criminal Justice Information) o IRS Publication 1075 (Federal Tax Information) o FERPA (certain education records) o PCI DSS (Payment Card Industry Data Security Standard) o SSA (Social Security Administration) o FISMA (Federal Information Security Modernization Act) o MARS-E (Minimum Acceptable Risk Standards for Exchanges) o OCIPA (Oregon Consumer Information Protection Act) o Other (identify the specific rule or standard)

EIS *IT Investment form*

≥$150k Total Cost	Investments exceeding a cost of $150,000, unless the investment is an agency-staffed application development project. **
≥$1m Total Cost, Internal Development	IT Investments exceeding a cost of $1,000,000 for agency-staffed application development projects. **
≥Level 3 Information Classification	It will store, process, or transmit data of Information Asset Classification Level 3 (Restricted; reference Policy 107-004-050) or higher, or information for which special protection standards apply by law or contract. ***
Cloud / Hosted and System of Record	It will be the authoritative source for information that is difficult, expensive, or infeasible to replace or recreate. ***
Cloud / Hosted and High Remediation Cost	A sustained interruption of the Service would have a significant impact on agency operations and/or those served by the agency. ***
EIS Required	Any IT Investments where EIS determines that oversight, review, or approvals is in the best interest of state government. **

* IT Investment is the planned or actual commitment of funds for IT-related expenditures including, but not limited to personnel, contractors associated with projects, products, services, or contracts and contract renewals and other amendments. **Cost of an IT Investment includes the cost of any services and/or supplies purchased and five years of anticipated operational costs** (e.g., licensing costs, and hardware/software maintenance).

** For more detail on oversight thresholds see DAS Policy 107-004-130

*** For more detail on Cloud and Hosted thresholds see DAS Policy 107-004-150

1. Business Case Summary

1.1. Executive Summary

COMPASS (Community Outcome Management and Performance Accountability Support System) is a collaborative information technology approach to the administration, planning and monitoring of Substance Use Disorder and Mental Health treatment programs. The purpose of COMPASS is to collect data from a variety of internal and external data systems and electronic health records systems and provides multi-functional reporting to support OHA, treatment providers and state and federal stakeholders. By aligning business processes and data, the system will facilitate cooperation and collaboration between stakeholders and improve reporting of, and access to contract and client encounter information in compliance with HIPAA and 42CFR regulations.

The current COMPASS software applications are running on a mixture of platforms and languages. Most are outdated and in need of upgrading or decommissioning. The underlying data storage for the applications is incomplete, insular, outdated, and expensive to maintain. The current database design contains some gaps in which referential integrity has been compromised, creating data quality issues. These data design issues have been masked by their current applications, creating a heavy reliance on these applications to provide the necessary context for the data. This makes integration and reporting from the data difficult, inaccurate, and time consuming.

Modernization of the COMPASS universe would significantly improve interoperability of OHA's data systems and could be leveraged across numerous program areas. The current lack of integration with other state data systems creates barriers and challenges for service providers to report data to OHA. In addition, OHA personnel have additional workload and must manually perform required tasks to meet agency, state, and federal reporting requirements.

The COMPASS modernization project supports the following initiatives, missions and strategic technology plans by ensuring efficient data collection, management, system integration, and data reporting on behavioral health service outcomes for Oregonians.

1. Governor's Executive Order 18-01: Building Oregon's commitment to addiction prevention, treatment, and recovery priorities, and setting deadlines for statutory requirements, and declaring a public health crisis.

2. Health and Human Services Agencies Information Resource Management 2017-2019, Governor Brown's Strategic Initiatives for Healthy, Safe Oregonians:
    a) Ensure that every Oregonian who needs alcohol and other drug treatment or mental health services can easily get it.
    b) Ensure all Oregonians have equitable and appropriate access to affordable, high quality health care.
    c) Keep communities safe through mindful law enforcement and using data and analytics to balance accountability, reformation and treatment in order to reduce recidivism and prevent future victimization.

3. OHA Mission: Helping people and communities achieve optimum physical, mental, and social well-being through partnerships, prevention and access to quality, affordable health care.

4. DHS/OHA Strategic Technology Plan:
    a) Provide Trusted Services for accurate health care outcomes data by effectively collecting, maintaining, and organizing information to enable informed decision-making and support internal and external data sharing.
    b) Enable Business Automation via workflows and business rules, reducing manual, paper-based processes while increasing effectiveness.
    c) Enable Connectivity Anytime, Anywhere, in Multiple Ways by providing self-service, role-based capabilities with remote access to information meeting the diverse needs of staff and partners.
    d) Use Dynamic Services Supporting Dynamic Needs by supporting provider modular, common services and capabilities, which promote agility, reuse, and best practices leveraging enterprise capabilities.

Improved data collection and integration of the COMPASS software applications would allow the agency to improve reporting on outcomes, expenditures and contract compliance as well as collaborate with providers to track the implementation and effectiveness of services, identify service gaps, predict the specific timing of service needs, and better request and allocate funding to facilitate individual's progress through the system.

2. Background

COMPASS is a collaborative information technology approach to the administration, planning and monitoring of Substance Use Disorder and Mental Health treatment programs. The purpose of COMPASS is to collect data from a variety of internal and external data systems and electronic health records systems and provides multi-functional reporting to support OHA, treatment providers and state and federal stakeholders. By aligning business processes and data, the system will facilitate cooperation and collaboration between stakeholders and improving reporting of, and access to contract and encounter information securely and in compliance with HIPAA and 42CFR regulations.

The Oregon Health Authority (OHA) requires complete and accurate data to meet mandatory reporting requirements at the federal and state level. The agency is required to make available information related to:

1. Substance Abuse and Mental Health Services Administration (SAMHSA) Block Grant.
2. U.S. Department of Justice (USDOJ) Performance Plan.
3. Oregon State Police reporting to the NICS database for background checks.
4. Treatment Episode Data Set (TEDS), including National Outcome Measures (NOMs)

OHA has been unable to comply with the monthly data submissions required by SAMHSA. Continued noncompliance with this requirement places millions of dollars for mental health and addictions services at risk.

The behavioral health care delivery system in Oregon has changed dramatically with the integration of new partners into a comprehensive care model. Additionally, recent legislative changes require that the agency find a solution for real time tracking of the availability of some behavioral health services. The emphasis on Coordinated Care Organization (CCO) metrics and the ability to track both quality of care and service outcomes makes the ability to gather and analyze data across systems an integral need for OHA programs.

The COMPASS constellation is comprised of many data systems used internally by OHA and externally by contracted partners. See *Appendix A – Current Business System Areas Supported* for a complete list of systems and their respective area of focus. The COMPASS applications are intended to be an essential behavioral health data collection system for the Health Systems Division (HSD). Originally designed to improve data collection for Medicaid and non-Medicaid behavioral health care provided by programs licensed by the Health Systems Division, the stand-alone systems are aging and exist on platforms that are outdated, expensive to service or modify, and difficult to acquire technical support.

A new solution is required to collect necessary data from multiple sources, consolidate data systems, interface with external systems, and integrate into the enterprise environment. Existing data systems need to be retired and a new solution implemented with the agency's long-term enterprise technology strategy.

2.1. Stakeholders

Primary stakeholders include, but are not limited to:

1. OHA, Health Systems Division
2. OHA, Health Policy & Analytics
3. OHA, Oregon State Hospital
4. OHA, Office of Information Services
5. OHA, Office of Budget and Forecasting
6. OHA, Office of Contracts and Procurement
7. Federal partners: Substance Abuse and Mental Health Services Administration (SAMHSA) and U.S. Department of Justice (USDOJ)
8. Oregon State Police
9. Electronic Health Record (EHR) and other software providers
10. Providers of behavioral health services
11. Clients receiving behavioral health services
12. Providers of substance use treatment services
13. Clients receiving substance use treatment services

2.2. Other Considerations/Drivers

The agency is at risk of losing grant funds, including the State Targeted Response grant, the Medication Assisted Treatment – Prescription Drug and Opioid grant (both dealing with opioid addiction), and not being able to forecast general fund need accurately and in a timely manner. The agency is currently behind or using complicated and time-consuming workarounds to meet mandatory federal reporting of behavioral health data for SAMHSA, both the mental health substance abuse block grants (NOMs/TEDS) and the USDOJ Oregon Performance Plan.

Recent reviews and process changes at OHA determined that COMPASS systems are not receiving and maintaining sufficient documentation to support data being provided to Oregon State Police (OSP) for the National Instant Criminal Background Check System (NICS). A scheduled audit in June 2018 by the Federal Bureau of Investigation (FBI) could result in penalties or sanctions against the agency for failing to address the flawed data systems.

3. Problem and Opportunity Definition

3.1. Problem Definition

With Oregon's Health Care Transformation, the introduction of Coordinated Care Organizations (CCOs), and investments in Electronic Health Record (EHR) systems, the current data environment does not allow for data integration to meet the need for reporting on treatment outcomes and investment efficiency. Many of the COMPASS systems were designed to measure outcomes based on a different funding model from the service element model currently in use. In addition, the system requirements and data elements were not fully defined in the original build.

In 2017, the OHA COMPASS Task Force identified issues with disjointed and siloed data from systems for HSD Contracting, Licensing and Certification, and Client Outcomes. Additional operational deficiencies were noted in the following areas of the COMPASS universe:

1. Contract deliverables are not met and/or enforced and data is not validated as accurate;
2. Subcontractors cannot be identified in collected data;
3. Provider licensing and certification is not integrated with current data systems;
4. Data systems lack defined relationship and correlation between data elements;
5. Missing data elements in collection and reporting process;
6. Difficulty assessing if contracted services are provided in compliance with contract.

OHA is unable to conduct mandated state and federal reporting. OHA and our partners at DHS continue to fall short of the expectations of advocates by failing to meet the needs of transitioning clients; this leaves the agency with continuing risk of additional investigation and potential litigation. OHA remains unable to adequately forecast service need or coordinate treatment for individuals entering and leaving the state hospital. *Olmstead v. LC*, a US Supreme Court ruling, requiring states to ensure that persons with disabilities receive services in the most integrated setting appropriate to their needs. Inability to appropriately forecast need for state

hospital resources puts the agency at risk of losing needed budget and Oregonians at risk of inadequate care.

The COMPASS data systems lag behind OHA business partners who are further down the integrated systems path. The file structure and business process are a couple of generations behind the EHR industry and has proven challenging for some partners to provide data to OHA for that reason. Separate work flows are required for COMPASS data applications as they do not compliment or integrate with normal EHR operations.

The current Health Systems Framework applications are running on ColdFusion. The underlying data storage for the COMPASS applications resides in several DB2 databases running on AIX servers, which are outdated and expensive to maintain. The current database design contains gaps in which referential integrity has been compromised, creating data quality issues. These design problems have been masked by the application, creating heavy reliance on the application to provide necessary context for the data.

The tightly-coupled relationship between the database and the application makes improvement and integration projects more difficult because it restricts the developer within the confines of both an aging toolset and a flawed data model. This data model makes integration with other systems and utilization of the data for reporting by Business Objects and other reporting engines more problematic. As new projects are undertaken using the tightly-coupled architecture in COMPASS, they will become riskier as the number of records and users increase, while the toolset falls further out of support.

Over time, the IT system-related risks will increase as the number of developers knowledgeable in older Cold Fusion/DB2 development projects dwindles, and it becomes a specialty realm for contract support. Add to this the growing number of retiring mainframe, Rbase and other legacy applications that will need to be integrated into the Health Systems Framework, and the question of available qualified in-house resources becomes critical going forward.

3.2. Opportunity Definition

Alignment with client need, the ability to track available resources, CCO reporting requirements and the analysis and tracking of behavioral health data across systems will be critical to the successful integration of behavioral health treatment into the CCO environment.

Modernization of the COMPASS universe of systems will:

1. Increase the agency's ability to measure and report on behavioral health outcomes.
2. Increase the agency's ability to tie reporting deliverables to payment.
3. Improve the standardization of data in the agency.
4. Increase the agency's ability to track outcomes by client, demographic group, or location of clients.
5. Permit the agency to meet required reporting responsibilities.
6. Develop a standardized reporting system for behavioral health services.
7. Support the provision of more timely, appropriate, cost-effective services for Oregonians.
8. Reduce the administrative burden on contracting providers.

9. Streamline and update business processes
10. Improve the standardization of data in the agency.
11. Collect data to increase the agency's ability to measure and report on behavioral health outcomes.
12. Implement a solution that includes data elements necessary for tracking outcomes and providing non-Medicaid data for a 360 view of the client.
13. Permit the agency to meet required reporting responsibilities.
14. Build a data warehouse that allows interfaces from a variety of systems to meet data quality standards, to create a 360 view of the client, and to include data necessary for accurate cross-agency reporting.

The 2017 COMPASS Task Force report provided opportunities including:

1. Replace COMPASS systems to reflect the present continuity of care model and reexamine old business processes.
2. Improve and update business processes to better align with COMPASS systems.
3. Align siloed systems to integrate CCO data into the service delivery environment.

OHA envisions a data management and processing system for behavioral health service outcomes that can hold millions of individual records, directly interface with a variety of internal and external data systems, and electronic health records systems, and provide multi-functional reporting to support state and federal requirements. Additionally, the work is expected to support improved treatment outcomes for Oregonians through the exchange, analysis and reporting of data; support improved business practices and reduced administrative burden for OHA through the ability to better analyze and forecast outcomes and need; and support improved customer service and reduced administrative burden to providers.

The project and resulting system should provide a variety of business support functions including the following:

1. Compliance with Personally Identifiable Information (PII) Privacy Act;
2. Compliance with Health Insurance Portability and Accountability Act (HIPAA);
3. Compliance with Health Information Technology for Economic and Clinical Health (HITECH) Act;
4. Reduce silos around system maintenance in OHA's OIS team;
5. Increase the agency's ability to tie contract deliverables / reporting responsibilities to payment;
6. Improve the standardization of data in the agency;
7. Increase the agency's ability to measure behavioral health outcomes for individual clients and groups;
8. Reduce the administrative workload on contracting providers and staff;
9. Create integrated and adjustable reports that meet federal reporting requirements;
10. Upgrade requirements for federal and state legislation, rules, and business needs;

11. Migrate data from or interface with multiple data collection systems including, but not limited to: Consolidated Database (CDB), Acute Care Reporting (ACR), Medicaid Management Information System (MMIS);
12. Streamline and update business processes;
13. Provide ongoing maintenance and support; and
14. Support required functionality for 5 – 10 years.

The redesign of the COMPASS constellation provides OHA with an opportunity to examine and update business process and better align to the agency's current vision and the continuity of care model. Part of this business process alignment will include the interface of provider reporting and contracting requirements, ensuring that the agency is better tracking the services it is paying for and that Oregonians are receiving the benefit of service dollars contracted through the agency. OHA has the opportunity to reduce silos and begin the process of integrating CCO's into the behavioral health service delivery model.

The COMPASS modernization project supports the following missions and strategic technology plan by ensuring efficient data collection, management, system integration, and data reporting on behavioral health service outcomes for Oregonians.

1. Governor's Executive Order 18-01: Building Oregon's commitment to addiction prevention, treatment, and recovery priorities, and setting deadlines for statutory requirements, and declaring a public health crisis.

2. Health and Human Services Agencies Information Resource Management 2017-2019, Governor Brown's Strategic Initiatives for Healthy, Safe Oregonians:
    a) Ensure that every Oregonian who needs alcohol and other drug treatment or mental health services can easily get it.
    b) Ensure all Oregonians have equitable and appropriate access to affordable, high quality health care.
    c) Keep communities safe through mindful law enforcement and using data and analytics to balance accountability, reformation and treatment in order to reduce recidivism and prevent future victimization.

3. OHA Mission: Helping people and communities achieve optimum physical, mental, and social well-being through partnerships, prevention and access to quality, affordable health care.

4. DHS/OHA Strategic Technology Plan:
    a) Provide Trusted Services for accurate health care outcomes data by effectively collecting, maintaining, and organizing information to enable informed decision-making and support internal and external data sharing.
    b) Enable Business Automation via workflows and business rules, reducing manual, paper-based processes while increasing effectiveness.

c) Enable Connectivity Anytime, Anywhere, in Multiple Ways by providing self-service, role-based capabilities with remote access to information meeting the diverse needs of staff and partners.
d) Use Dynamic Services Supporting Dynamic Needs by supporting provider modular, common services and capabilities, which promote agility, reuse, and best practices leveraging enterprise capabilities.

4. Alternatives Analysis

4.1. Assumptions

The Project assumptions identified would include the following:

1. There is more than one qualified vendor.
2. Total cost of project and 5-year maintenance and operations will be within available funding.
3. Only purchase a solution using OIS supported technology or include funding to for contracted O&M by vendor for operations and maintenance support for the selected technology support.
4. Modular solution with major components as individual modules.
5. Agile approach is preferred in order to receive functionality throughout the system development.
6. The time required to adequately research, document, design, plan and implement the projects as described will be available.
7. The Business understands and can articulate the outcome measures they require.
8. Legislative mandate changes will not significantly affect the project deliverables.

4.2. Constraints

Below is a list of known constraints:

- Internal resources have limited availability (Program Support, Program) to support implementation.
- No funding to support implementation in biennium 2019/2021

4.3. Selection Criteria and Alternatives Ranking

The core criteria that we are using to compare alternatives are:

- Time to implement (duration)
- Cost (both project costs and ongoing annual costs)
- Benefits
- Risks

4.4. Solution Requirements

OHA requires the following system functionality:

- Secure data intake, storage, and output
- Data quality and validation processes that does not let providers enter inaccurate information
- Data gathering processing functions like versioning, creating crosswalks, data dictionary, de-duplication of data submissions.
- Secure, unobstructed, and quick access to data warehouse by role-based credentials
- Multi-functional reporting ability to create accurate reports with reliable data.: scheduled and ad hoc reporting
- Cloud based solution providing the ability to support future program data collecting and behavioral health reporting needs.
- Application Programing Interface (API) for any other data systems to send the data to the BH data warehouse.
- Behavioral Health (BH) data warehouse with the ability to accept data from other data systems.
- Provide training and training material to OHA staff and Providers
- Bi-Directional interface to obtain master client unique ID
- One-way interface with the following existing internal and external data systems:
    - Electronic Health Records (EHR) systems and health information data exchanges (ex. OWITS)
    - AMHI/Choice Model – Community Mental Health
    - Avatar the Oregon State Hospital's Electronic Health Record system.
    - Justice or State Patrol for Criminal History
    - Medicaid Management Information System (MMIS)
- 5 years of on-going operations and maintenance (O&M) support

**For more detailed solution requirements see Behavioral Health Data Warehouse Project Solution requirements and MOTS Replacement solution requirements.*

4.5. Vendor Requirements

OHA seeks to obtain the services of a data vendor with the capacity and technical expertise to perform all Behavioral Health data collection, aggregation, enhancement, and quality assurance functions. This includes but is not limited to: design, development and implementation of the vendor's solution, migrating the existing data hosted at the state Data Center Services (DCS) to the new solution; secure and streamline data collection and aggregation; processing and validating data submissions; providing data access and reports to approved users; and optimizing data for mandated reports. Mandatory tasks include:

Project Planning and Implementation
The Contractor chosen by OHA will be required to provide detailed documentation to OHA including a project plan that includes standard technical documentation covering Design Development and Implementation (DDI) of the proposed solution, a comprehensive transition-in plan and an extensive Data Quality and Business Rules document that details all methodologies used to enhance and validate data submissions. As part of this task, a new Contractor must

securely transfer all data from the DCS and in doing so, retain processed historic data, but also reprocess raw historic data. Finally, the Contractor must provide expert project management and technical support across all activities throughout the contract term.

Data Management
The Contractor will be responsible for all Behavioral Health front-end data collection and aggregation. As part of this task, the contractor must implement and manage data intake processes; perform regular extract, transfer, load (ETL) processes; actively manage data collection; implement pre-load quality assurance checks; and participate in data submitter relations and engagement. After data collection, the contractor must perform data enhancement tasks like creating member, provider, and facility crosswalks; claims processing and de-duplicating; as well as other value-added components like creating benchmarks. Finally, the Contractor must warehouse the processed data and perform post-load quality assurance on the data.

Data Access and Reporting
The Contractor must provide to OHA complete access to all levels of the data warehouse in a secure, unobstructed, and efficient manner. Part of this will be to provide role-based credentials and access to a shared work area within the data environment for users to develop and save tables, cubes, program code, etc. The Contractor must also provide detailed data warehouse documentation, training, and technical support as well as furnish prescribed data sets on a quarterly basis and produce additional data extracts as needed.

Data for Public Mandated Reports
The Contractor must work closely with OHA to optimize the Behavioral Health data for creating and standardizing Mandated reports (SAMHSA) based on stakeholder feedback, content development, and ongoing operations.

4.6. Alternatives Identification

OHA has considered the following alternatives:

- Alternative 1: Status Quo
- Alternative 2: Build - Integrate Existing System
- Alternative 3: Buy - RFP COTS SaaS
- Alternative 4: Build – OIS Development Build
- Alternative 5: Build – Basecamp Development
- Alternative 6: Build – Transfer Technology State

**The Alternatives captured in this analysis is for the Behavioral Health Data Warehouse and MOTS Replacement projects. Alternative Analysis will be completed for each project under the Compass Modernization Portfolio.*

4.7. Alternatives Analysis

Alternative 1: Status Quo (Not Selected)

- Description: Continue to use existing systems and tools to support programs.
- Implementation Duration: 0 months
- Total Cost: $8,432,178
    - Implementation Cost: $0
    - 5 Years of O&M: $8,432,178
- Benefits:
    - No changes needed.
    - Lower cost in short term.
    - Funding can be re-assigned to other Behavioral health needs
- Risks:
    - Unable to achieve all solution requirements
    - Continue to experience pain points:
        - Not meeting reporting needs
        - Not meeting operational needs
        - Receiving incomplete and inaccurate data
        - Complex manual data submissions
        - Missed grant funding (Fed, State, Foundation) opportunities because unable to provide reports and outcomes

Alternative 2: Build - Integrate Existing System (Not Selected)

- Description: Gathering the business requirements and building (writing code) an interface between existing systems using OIS Resources
- Implementation Duration: 48 months
- Total Cost: $17,853,047
    - Implementation Cost: $ $9,131,386
    - 5 Years of O&M: $8,721,661
- Benefits:
    - Lower cost
    - Lower implementation duration
    - Improves the ability to provide data needed for “telling a story” or any future reporting needs.
- Risks:
    - Existing systems are too old to support APIs or integration and will need extensive re-work to be accomplished.
    - Unable to meet all reporting requirements (data elements missing)
    - Unable to support scalability for future technology needs (mis. Paper is one of the systems).

Alternative 3: Buy - RFP COTS SaaS (Selected)

- Description: Utilize Request for Proposal (RFP) to procure and execute a new contract for development and implementation of a Commercial off the Shelf (COTS)/Software As A Service (SAAS) and modify using OIS Resources
- Planning Duration: 21 months
    - *Note: Implementation duration will be determined through RFP. According to the market analysis research implementation duration provided by a vendor ranges between 12-18 months.*

- Total Cost: TBD
  - Planning Cost: $1,979,606
  - Implementation Cost: To Be Determined through RFP
  - 5 Years of Maintenance and Operations: To Be Determined through RFP
  - *Note: According to the market analysis research implementation cost provided by a vendor ranges between $1M - $2.5M and 5 years of O&M ranges between $2.5M-$4M.*
- Benefits:
  - Possibility for lower cost
  - Possibility for better support
  - Implementation duration is less
  - Use of most up to date technology
  - Supports scalability for enterprise needs:
    - Expansion within BH domain
    - Expansion within external agencies (DHS)
    - Supporting BH Technology Roadmap
- Risks:
  - Project takes an additional 6-12 months for RFP effort.
  - Customizations increase implementation & O&M costs
  - Technology solution and data is owned by the vendor and changes to the system must be made by the vendor which increases costs.

Alternative 4: Build – OIS Development Build (Not Selected)

- Description: Build new system using OIS Resources
- Implementation Duration: 54 months
- Total Cost: $27,364,225
  - Implementation Cost: $15,286,399
  - 5 Years of O&M: $12,077,826
- Benefits:
  - Allocated resources used to support O&M and enhancements resulting in lower long-term costs
  - Address new regularity requirements faster (no amendments required)
- Risks:
  - High degree of customization needed which drives up cost and timeline to implement.
  - Time to complete the project may increase because same resources provide operations support for these specific State software applications
  - Other higher priority project may affect the resource availability to support the project and extend project timeline.

Alternative 5: Build – Basecamp Development (Not Selected)

- Description: Using external contracting resources to build (writing code) a system that would meet all your requirements to do work, run reports and track clients.
- Implementation Duration: 54 months
- Total Cost: $29,101,831
  - Implementation Cost: $17,024,005

    - 5 Years of O&M: $12,077,826
- Benefits:
    - Allocated resources used to support O&M and enhancements resulting in lower long-term costs
    - Address new regularity requirements faster (no amendments required)
- Risks:
    - The following activities increase cost and duration:
        - High Customizations
        - Contract resource turnover
        - Contract administrative support
    - Same resources used to support project and O&M which may result in project delays.

Alternative 6: Build – Transfer Technology State (Not Selected)

- Description: Acquire other state solution and have OIS customize solution
- Implementation Duration: 66 months
- Total Cost: $29,703,015
    - Implementation Cost: $17,625,189
    - 5 Years of O&M: $12,077,826
- Benefits:
    - Solution already built and in production with “lessons learned”
    - Ability to share knowledge and compare reports with other state organizations
- Risks:
    - Longer duration and higher cost
    - May have to customize software because of state laws, process differences
    - May require State to purchase other integrated software not currently owned.

4.8. Cost

The below implementation cost analysis and 5 years of O&M includes a breakdown for each alternative by the following categories:

- **Program Resources** are the Behavioral Health program subject matter experts
- **Program Support Resources** are the Business Analysts working with the program subject matter experts. Resources are from the Compass Support team within Oregon Health Authority and Covendis Contractors.
- **State Resources** are the technical resources such as technical manager, project managers, project coordinator, security analyst, DAS procurement services, and OIS Business Operations.
- **Vendor Resource** is for a Quality Assurance vendor.
- **Software** for developing the technology solution (W) MSDN Visual Studio, (W) Visio x 5, (W) Password Agent, (W) Toad, (W) Beyond Compare (W) XML Tool,
- **Hardware** are servers that are currently hosted at the Data Center Services (DCS)
- **DCS Operations** is the service cost for hosting the technology solution.

Implementation Cost and Duration Summary:

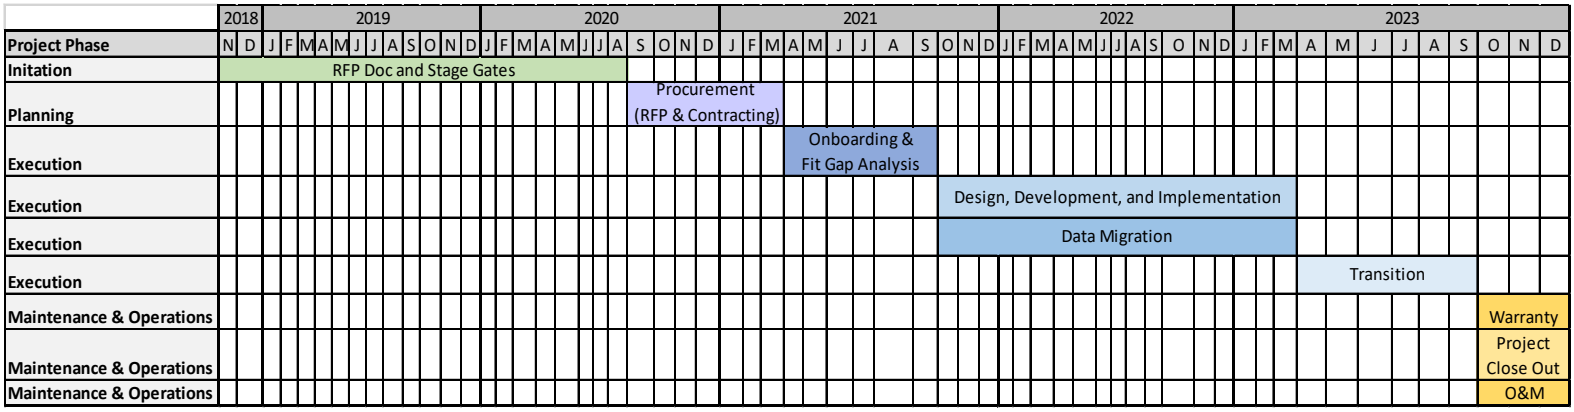
COMPASS Modernization Alternatives High Level Cost and Duration Estimates Summary (50%+/-)

	Implementation								
Alternatives	**Program Resource Cost**	**Program Support Resource Cost**	**State Resources Cost** (OIS, DAS, ESO, OC&P)	**Vendor Resources Cost**	**Purchased Software Cost (Original Fee)**	**Hardware Cost**	**DCS Operations Cost**	**Total Implementation Cost**	**Implentation Duration (Months) *RFP only**
1 Status Quo	$ -	$ -	$ -			$ -	-	$ -	0
2 Integrate Existing System (Build)	$ 742,020	$ 2,035,922	$ 5,148,589	$ 570,710	$ 128,348	$ 346,522	$ 159,274	$ 9,131,386	48
*3 COTS/SaaS - Buy - (RFP)	$ 171,935	$ 611,701	$ 1,195,970	TBD	TBD	TBD	TBD	$ 1,979,606	21
4 OIS Development Build	$ 2,626,608	$ 4,303,176	$ 6,660,915	$ 978,530	$ 128,348	$ 429,547	$ 159,274	$ 15,286,399	54
5 BaseCamp Development (Build)	$ 2,047,607	$ 4,286,214	$ 8,823,376	$ 1,091,318	$ 186,669	$ 429,547	$ 159,274	$ 17,024,005	54
6 Transfer Techology from another State	$ 2,688,589	$ 5,033,274	$ 8,050,544	$ 1,135,613	$ 128,348	$ 429,547	$ 159,274	$ 17,625,189	66

*Please note alternative *3 COTS/SaaS – Buy (RFP) only includes Total Implementation cost estimates through planning.*

5 Years of Operations and Maintenance Summary:

	5 Years of Operations & Maintenance (O&M)							
Alternatives	**Program Resource Cost**	**Program Support Resource Cost**	**State Resources Cost**	**Vendor Resources Cost**	**Purchased Software Cost (Annual Fee)**	**Hardware Cost**	**DCS Operations Cost**	**5 Years Total O&M Cost**
1 Status Quo	$ 55,178	$ 3,152,958	$ 4,590,131		$ 128,348	$ 346,289	$ 159,274	$ 8,432,178
2 Integrate Existing System (Build)	$ 1,714,992	$ 409,567	$ 5,962,957		$ 128,348	$ 346,522	$ 159,274	$ 8,721,661
*3 COTS/SaaS - Buy - (RFP)	TBD	TBD	TBD	TBD	TBD	TBD	TBD	TBD
4 OIS Development Build	$ 1,452,553	$ 4,980,947	$ 4,927,156		$ 128,348	$ 429,547	$ 159,274	$ 12,077,826
5 BaseCamp Development (Build)	$ 1,452,553	$ 4,980,947	$ 4,927,156		$ 128,348	$ 429,547	$ 159,274	$ 12,077,826
6 Transfer Techology from another State	$ 1,452,553	$ 4,980,947	$ 4,927,156		$ 128,348	$ 429,547	$ 159,274	$ 12,077,826



Implementation and 5 Years of Operations and Maintenance Cost Summary:

Alternatives	Total Implementation Cost	Implentation Duration (Months) *RFP only	5 Years Total O&M Cost	Grand Total
1 Status Quo	$ -	0	$ 8,432,178	$ 8,432,178
2 Integrate Existing System (Build)	$ 9,131,386	48	$ 8,721,661	$ 17,853,047
*3 COTS/SaaS - Buy - (RFP)	$ 1,979,606	21	TBD	TBD
4 OIS Development Build	$ 15,286,399	54	$ 12,077,826	$ 27,364,225
5 BaseCamp Development (Build)	$ 17,024,005	54	$ 12,077,826	$ 29,101,831
6 Transfer Techology from another State	$ 17,625,189	66	$ 12,077,826	$ 29,703,015

*Please note alternative *3 COTS/SaaS – Buy (RFP) Total Implementation only includes cost estimates through planning.*

4.1. Timeline

Below is a high-level estimate of the project schedule, and a narrative description of the key activities in each phase.

Stage/Phase	Key Tasks	Description	Timeline
Initiation	• Set up Project • Secure Planning Funds • Create current state process maps and reports • Create solution requirements • Create business case • Market research and alternatives analysis • Develop RFP and secure approvals • Secure Stage Gate endorsement	OHA is required to provide complete and accurate data to meet mandatory reporting requirements at the federal and state level. The agency is required to make available information related to Substance Abuse and Mental Health Services Administration (SAMHSA) Block Grant, U.S. Department of Justice (USDOJ) Performance Plan, Oregon State Police reporting to the NICS database for background checks OHA's main goal with this project is to choose a data vendor that ensures the best overall return on investment. OHA is developing an RFP that outlines the minimum necessary requirements and will help staff evaluate proposals.	November 2018 —August 2020
Planning	• Post RFP • Review proposals • Select vendor • Execute new contract • Finalize Budget and Schedule • Secure Implementation Funding	This phase will see the review and selection of a data vendor based on the proposals received. A new contract will be executed that outlines tasks and deliverables to be supplied to OHA.	September 2020 – March 2021
Execution	• Onboard Vendor to access Project Site • Complete Fit Gap Analysis	Starting in April 2021 the new data vendor will start delivering tasks and products outlined in the new contract.	April 2021 – September 2023

Stage/Phase	Key Tasks	Description	Timeline
	• Transition data from DCS to new data vendor • Monitor kick-off tasks and receive deliverables from new vendor • Quality test new data vendor and its processed data • Monitor transition activities and artifacts such as Finalize Implementation Plan, Transition Plan, User Manuals, Disaster Recovery Plan, Training Plan, etc.	Starting in October 2021 vendor will work with DCS to transfer historic data and processing it using data vendor's methodology. MOTS will continue to collect, load, and process current data submissions until March 2023 which will also eventually be transferred to the new data vendor. During this phase, OHA will be working with the new data vendor to ensure that historic and current data are being transitioned and processed appropriately.	
Project Close	• 90 Day Warranty Period • Lessons learned • Project closeout activities • Start O&M phase of new contract	OHA will embark on evaluation of the project and document successes, failures, and lessons learned and transition to O&M support.	October 2023 – December 2023

4.2. Funding

The project has secured $1.8 million of funding for the Compass Modernization project already; however there are still some decisions that will be made by Legislative in February 2021 short session to obtain the balance of the funds needed for biennium 2019/2021.

Funding sources include:

- General funds - $1.5M

Implementation funds for the project will be requested in a new POP for session 2021/2023.

4.3. Critical Success Factors

For Initiation, success will be measured by:

- Approval of the business case and risk assessment
- Obtain necessary program approvals
- Secure funding
- Completion of RFP
- DAS OSCIO Stage Gate 1 and 2 endorsement

For Project Planning, success will be measured by:

- Release of RFP and selection of vendor
- DAS OSCIO Stage Gate 3 endorsement
- Execution of new contract for implementation and 5 years M&O

For Project Execution, success will be measured by:

- Transfer of data from DCS is completed with minimal disruption of service to data submitters, OHA, and data users
- All functionality and other requirements described in contract Statement of Work are delivered and approved by OHA in timeframe outlined
- All test exit criteria have been met
- Data submitters are able to submit data with the new technology solution, as necessary.
- OHA has full access to data as outlined in the requirements

For Overall Project Phases:

- Project scope met, within 15% +/- approved budget and schedule.

Long term project benefits will be measured by:

- 95% of the time completing SAMHSA reports on time.
- 100% of the time completing OHA dashboards and standardized reports on time.
- 100% of existing manual reports will be automated or eliminated and also meeting the "Must have" requirements.
- More reliable data – measured by number of data issues identified from current MOTS quality assurance reports.

5. Conclusions and Recommendations

5.1. Conclusions

OHA is currently attempting to aggregate data from seven behavioral health reporting systems, including at least three legacy systems and one system designed for reporting on a different funding mechanism than the one currently in use by the agency. The disparate systems further complicate data validation. It is impossible to correlate provider licensing and contracting requirements with treatment outcomes thereby ensuring value for the payment of contracted services. The current administrative burden for providers and OHA staff creates inefficiencies and puts the agency at risk of providing inadequate services to clients and providers, risks losing providers and staff, and risks the agency's image and funding.

A comprehensive analysis of the agency's business need is required with the expectation of creating and implementing a system designed to be flexible and aligned with the enterprise technology vision. This work will create efficiencies for providers and agency program staff; free the agency from committing OIS staff to the maintenance and operations of expensive and outdated systems; allow the agency to meet state and federal requirements to maintain funding; and improve both service delivery and budget forecasting.

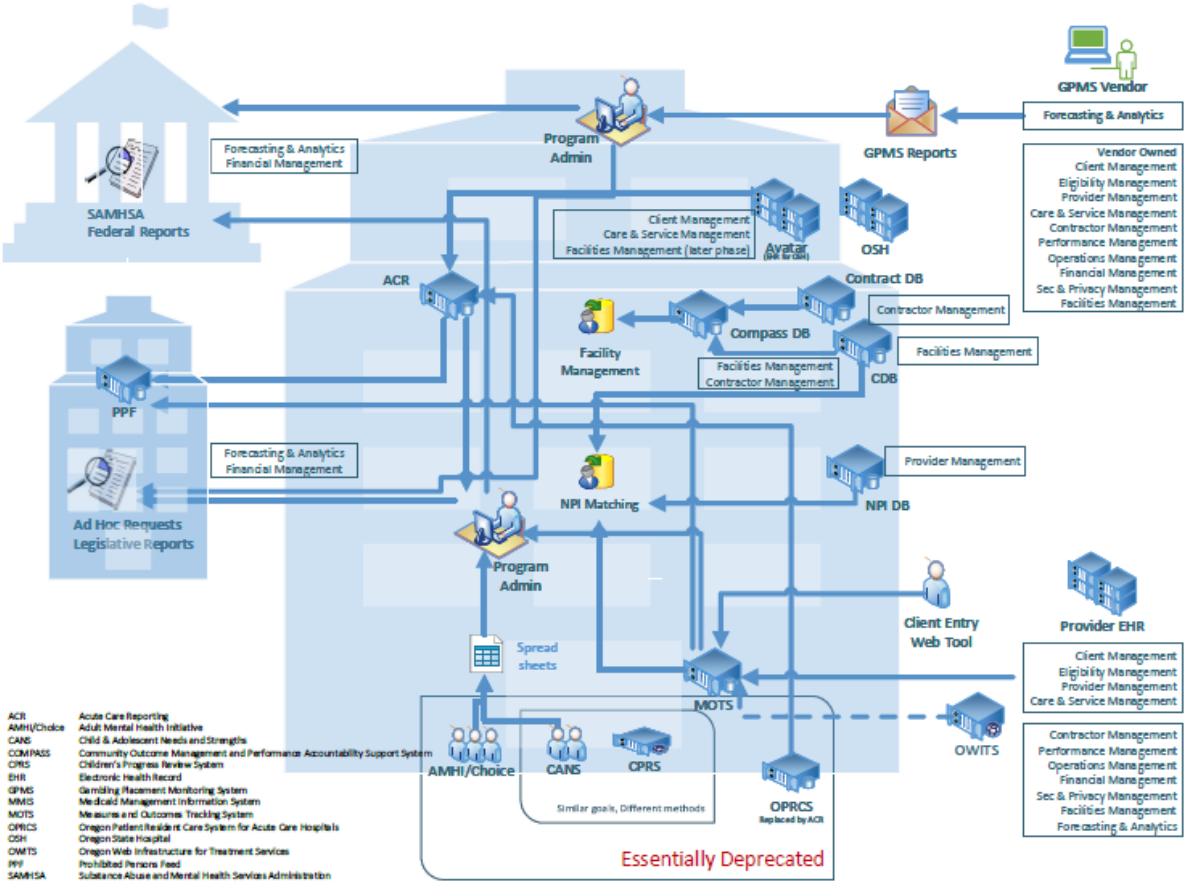
5.2. Recommendations

Acquire or construct a technology solution for behavioral health reporting that allows the agency to interface with multiple systems currently in place. This would include:

1. Meeting with Behavioral Health leadership to understand the future vision for behavioral health services in order to promote and align systems work with business vision.
2. Collaborating with business teams on business process improvement and documentation of processes related to contracting and reporting.
3. Collaborating with Behavioral Health teams to define required reporting data for evaluation of contract fulfillment and agency metrics around successful service recipient outcomes.
4. Collaborating with HPA and HSD teams to define reporting requirements for SAMHSA.
5. Collaborating with teams in HPA and HSD to standardize data field definition for entry into the data warehouse and aligning those with contract specifications.
6. Assessing existing “out-of-the-box” systems for suitability for agency use and making recommendations.
7. Assisting with the creation of RFP and scoring model or project plan for procurement of resources if custom build.
8. Assisting with procurement of goods or services to complete project.
9. Assisting with the development of internal and external training resources for successful launch of the new system and business processes.

5.3. Consequences of Failure to Act

Failure to conduct a wide-ranging upgrade of the COMPASS systems and related business processes will result in devastating impacts to Oregon’s most vulnerable population including:



1. Poor coordination of care between facilities and providers
2. Delay or failure to receive treatment or services
3. Increased length of hospital commitment
4. Potential for civil rights violations

Without a change to the current behavioral health data systems, challenges to the State and its external partners will continue to compound in the following areas:

1. Increased administrative burden for CCO’s and other behavioral health providers
2. Lack of compliance with legal and federal requirements
3. Lack of IT staff resources to support outdated and ineffective data systems
4. Loss of state and federal funding
5. Loss of public trust

6. Appendixes and References

Appendix A – Current Business System Areas Supported

Appendix B – COMPASS Task Force Report

The 2017 COMPASS Task Force report is provided externally to this business case.

Information Technology Investment Description (What is being proposed and why):

Summary:

COMPASS (Community Outcome Management and Performance Accountability Support System) is a collaborative information technology approach to the administration, planning and monitoring of Substance Use Disorder and Mental Health treatment programs. The purpose of COMPASS is to provide software that directly interfaces with a variety of internal and external data systems and electronic health records systems and provides multi-functional reporting to support OHA, treatment providers and state and federal stakeholders. By aligning business processes and data, the system will facilitate cooperation and collaboration between stakeholders and improving reporting of, and access to contract and encounter information securely and in compliance with HIPAA and 42CFR regulations.

The current COMPASS applications are running on a mixture of platforms and languages. All are outdated and in need of upgrading or decommissioning. The underlying data storage for the applications is insular, outdated, and expensive to maintain. The current database design contains some gaps in which referential integrity has been compromised, creating data quality issues. These data design issues have been masked by their current applications, creating a heavy reliance on these applications to provide the necessary context for the data. This makes integration and reporting from the data difficult, inaccurate, and time consuming.

Modernization of the COMPASS universe would significantly improve interoperability of OHA's data systems and could be leveraged across numerous program areas. The current lack of integration with other state data systems creates additional workload for service providers and OHA personnel who must manually perform required tasks outside of those systems to meet agency, state, and federal reporting requirements.

The COMPASS modernization project supports the following initiatives, missions and strategic technology plans by ensuring efficient data collection, management, system integration, and data reporting on behavioral health service outcomes for Oregonians.

1. Governor's Executive Order 18-01: Building Oregon's commitment to addiction prevention, treatment, and recovery priorities, and setting deadlines for statutory requirements, and declaring a public health crisis.

2. Health and Human Services Agencies Information Resource Management 2017-2019, Governor Brown's Strategic Initiatives for Healthy, Safe Oregonians:
    a) Ensure that every Oregonian who needs alcohol and other drug treatment or mental health services can easily get it.
    b) Ensure all Oregonians have equitable and appropriate access to affordable, high quality health care.
    c) Keep communities safe through mindful law enforcement and using data and analytics to balance accountability, reformation and treatment in order to reduce recidivism and prevent future victimization.

3. OHA Mission: Helping people and communities achieve optimum physical, mental, and social well-being through partnerships, prevention and access to quality, affordable health care.

4. DHS/OHA Strategic Technology Plan:
    a) Provide Trusted Services for accurate health care outcomes data by effectively collecting, maintaining, and organizing information to enable informed decision-making and support internal and external data sharing.
    b) Enable Business Automation via workflows and business rules, reducing manual, paper-based processes while increasing effectiveness.
    c) Enable Connectivity Anytime, Anywhere, in Multiple Ways by providing self-service, role-based capabilities with remote access to information meeting the diverse needs of staff and partners.
    d) Use Dynamic Services Supporting Dynamic Needs by supporting provider modular, common services and capabilities, which promote agility, reuse, and best practices leveraging enterprise capabilities.

Improved data collection and standardization in the COMPASS systems would allow the agency to improve reporting on outcomes, expenditures and contract compliance as well as collaborate with providers to track the implementation and effectiveness of services, identify service gaps, predict the specific timing of service needs, and better request and allocate funding to facilitate individual's progress through the system.

Problem Definition:
With Oregon's Health Care Transformation, the introduction of Coordinated Care Organizations (CCOs), and investments in Electronic Health Record (EHR) systems, the current data environment does not allow for data integration to meet the need for reporting on treatment outcomes and investment efficiency. Many of the COMPASS systems were designed to measure outcomes based on a different funding model from the model currently in use. In addition, the system requirements and data elements were not fully defined in the original build.

In 2017, the OHA COMPASS Task Force identified issues with disjointed and siloed data from systems for HSD Contracting, Licensing and Certification, and Client Outcomes. Additional operational deficiencies were noted in the following areas of the COMPASS universe:

1. Contracting process, tracking, and enforcement are not integrated with data systems;
2. Subcontractors cannot be identified in collected data;
3. Provider licensing and certification is not integrated with current data systems;
4. Data systems lack defined relationship and correlation between data elements;
5. Missing data elements in collection and reporting process;
6. Difficulty assessing if contracted services are provided in compliance with contract.

The lack of integrated behavioral health treatment data exposes the State to potential federal litigation related to violation of an individual's second amendment rights. Recent reviews and process changes at OHA determined that COMPASS systems are not receiving and maintaining sufficient documentation to support data being provided to Oregon State Police (OSP) for the National Instant Criminal Background Check System (NICS). A scheduled audit in June 2018 by the Federal Bureau of Investigation (FBI) could result in penalties or sanctions against the agency for failing to address the flawed data systems.

Further, OHA is unable to conduct mandated state and federal reporting. OHA and our partners at DHS continue to fall short of the expectations of advocates by failing to meet the needs of transitioning clients; this leaves the agency with continuing risk of additional investigation and potential litigation. OHA remains unable to adequately forecast service need or coordinate treatment for individuals entering and leaving the state hospital. *Olmstead v. LC*, a US Supreme Court ruling, requiring states to ensure that persons with disabilities receive services in the most integrated setting appropriate to their needs. Inability to appropriately forecast need for state hospital resources puts the agency at risk of losing needed budget and Oregonians at risk of inadequate care.

The COMPASS data systems lag behind OHA business partners who are further down the integrated systems path. The file structure and business process is a couple of generations behind the EHR industry and has proven challenging for some partners to provide data to OHA for that reason. Separate work flows are required for COMPASS data applications as they do not compliment or integrate with normal EHR operations.

The current Health Systems Framework applications are running on ColdFusion, which is no longer supported by the vendor. The underlying data storage for the COMPASS applications resides in several DB2 databases running on AIX servers, which are outdated and expensive to maintain. The current database design contains gaps in which referential integrity has been compromised, creating data quality issues. These design problems have been masked by the application, creating heavy reliance on the application to provide necessary context for the data.

The tightly-coupled relationship between the database and the application makes improvement and integration projects more difficult because it restricts the developer within the confines of both an aging toolset and a flawed data model. This data model makes integration with other systems and utilization of the data for reporting by Business Objects and other reporting engines more problematic. As new projects are undertaken using the tightly-coupled architecture in COMPASS, they will become riskier as the number of records and users increase, while the toolset falls further out of support.

Over time, the IT system-related risks will increase as the number of developers knowledgeable in older Cold Fusion/DB2 development projects dwindles, and it becomes a specialty realm for contract support. Add to this the growing number of retiring mainframe, Rbase and other legacy applications that will need

to be integrated into the Health Systems Framework, and the question of available qualified in-house resources becomes critical going forward.

Opportunity Definition:
Alignment with client need, the ability to track available resources, CCO reporting requirements and the analysis and tracking of behavioral health data across systems will be critical to the successful integration of behavioral health treatment into the CCO environment.

Modernization of the COMPASS universe of systems will:

1. Support the provision of more timely, appropriate, cost-effective services for Oregonians.
2. Reduce the administrative burden on contracting providers.
3. Increase the agency's ability to tie reporting responsibilities to payment.
4. Improve the standardization of data in the agency.
5. Increase the agency's ability to track outcomes.
6. Permit the agency to meet required reporting responsibilities.
7. Develop a standardized reporting system for behavioral health services.
8. Eliminate the use of four to five outdated systems, reducing silos around system maintenance in OHA's OIS team.

The 2017 COMPASS Task Force report provided opportunities including:

1. Replace COMPASS systems to reflect the present continuity of care model and reexamine old business processes.
2. Improve and update business processes to better align with COMPASS systems.
3. Align siloed systems to integrate CCO data into the service delivery environment.

OHA envisions a data management and processing system for behavioral health service outcomes that can hold millions of individual records, directly interface with a variety of internal and external data systems, and electronic health records systems, and provide multi-functional reporting to support state and federal requirements. Additionally, the work is expected to support improved treatment outcomes for Oregonians through the exchange, analysis and reporting of data; support improved business practices and reduced administrative burden for OHA through the ability to better analyze and forecast outcomes and need; and support improved customer service and reduced administrative burden to providers.

The project and resulting system should provide a variety of business support functions including the following:

1. Compliance with Personally Identifiable Information (PII) Privacy Act;
2. Compliance with Health Insurance Portability and Accountability Act (HIPAA);
3. Compliance with Health Information Technology for Economic and Clinical Health (HITECH) Act;
4. Reduce silos around system maintenance in OHA's OIS team;
5. Increase the agency's ability to tie reporting responsibilities to payment;
6. Improve the standardization of data in the agency;
7. Increase the agency's ability to measure behavioral health outcomes;

8. Reduce the administrative burden on contracting providers and staff;
9. Create integrated and adjustable reports that meet federal reporting requirements;
10. Upgrade requirements for federal and state legislation, rules, and business needs;
11. Migrate data from multiple data collection systems;
12. Streamline and update business processes;
13. Provide ongoing maintenance and support; and
14. Support required functionality for 5 – 10 years.

The redesign of the COMPASS constellation provides OHA with an opportunity to examine and update business process and better align to the agency's current vision and the continuity of care model. Part of this business process alignment will include the interface of provider reporting and contracting requirements, ensuring that the agency is better tracking the services it is paying for and that Oregonians are receiving the benefit of service dollars contracted through the agency. OHA has the opportunity to reduce silos and begin the process of integrating CCO's into the behavioral health service delivery model.

Alternatives:
A complete alternatives analysis has not been conducted for this project.

Assumptions

The Project assumptions identified would include the following:

1. The time required to adequately research, document, design, plan and implement the projects described will be available.
2. The Business understands and can articulate the outcome measures they require.
3. Legislative mandate changes will not significantly affect the Project deliverables.

Solution Requirements

Solution requirements have not been fully defined at this time.

Alternatives Identification

Alternative 1: No Replacement of Existing COMPASS systems

Alternative 2a: Replace COMPASS with solution developed in house

Alternative 2b: Replace COMPASS with solution procured from third party vendor

Alternatives Analysis

No alternatives analysis completed at this time.

Cost

Initial estimates of cost for the COMPASS modernization project is between $4 and $7 million. Work is ongoing to finalize the project scope, after which we will analyze alternatives. Better cost estimates will be available at that time.

OSCIO IT Investment form

POP 414 has been submitted as part of the Governor's budget for the 2019-2021 State of Oregon Budget. The POP requested amount is $6,739,793.

DHS Oregon Department of Human Services

Oregon Health Authority

DHS/OHA Office of Information Services Issue Brief

Enterprise Collection Management System

DHS/OHA – Shared Services: Shawn Jacobsen OFS, Nicky Jeffreys OPAR

Overview

The Office of Financial Services (OFS) is a Shared Service that provides full financial cycle accounting to the Department of Human Services (DHS) and the Oregon Health Authority (OHA). This work is accomplished through a combination of agency-supported program-specific data systems and the Oregon Statewide Financial Management Application (SFMA). OFS supports programs throughout both agencies to identify, invoice, and manage accounts owed to the agencies. Revenue generated from these activities is essential to meeting outcomes for various services and programs throughout the agency.

The Office of Payment Accuracy and Recovery (OPAR) is a Shared Service that provides recovery and collection services to both the Department of Human Services and the Oregon Health Authority. OPAR ensures program integrity by improving payment accuracy and recovering overpayments of both clients and service providers. Funds recovered by OPAR are returned to the various DHS/OHA programs, allowing these funds to be available for current and future clients.

Both OFS and OPAR are working towards a shared goal of identifying an Enterprise Collection Management solution to replace the Integrated Collection Management System (ICM) currently in use by OPAR. This new Enterprise solution would provide the integration needed for both groups to reduce redundant system updates and manual workarounds to optimize their business deliverables and workload.

OFS requests ISMC approval for a solution that will enable the Enterprise Collection Management System to be the primary source system for accounts receivable transactions generated in the new OFS Enterprise Financial system (as identified in the OFS Policy Option Package) for interfacing with SFMA.

OPAR requests ISMC approval for an Enterprise Collection Mangement System that meets regulatory needs, provides improved automation in order to lower costs, and utilizes state of the art technology to assist in settling collections.

Background

OFS: OFS invoices for agency services such as newborn screening, background checks, licensing and overpayments. The billing and account management requests are received through a variety of methods, such as Excel documents, emails, and the use of payment subsystems. Many DHS/OHA programs manage a portion of the receivables process before referring the account to OFS. These requests can be initiated for at any time during the receivables process. The receivables process is as follows:

- Identification of amount owed, notification to debtor (invoice)
- Management of account notices and repayment options
- Adjusting existing receivables
- Referral for collections to the Department of Revenue – Private Collections

Most of these requests are then entered in SFMA manually or through a macro and then invoices, if needed, are manually generated using a template in Excel. Direct payments are received through a lockbox, meaning

checks sent to bank, or credit card transaction. Transfers from other agencies, including the Department of Revenue, are also received. Posting these payments to accounts in SFMA is a manual process.
Ease of payment is challenging at best. Only two options exist to make payments: checks and credit cards. For credit cards, reaching the portal is outdated and does not retrieve current account information. Requests for account balances for those with payment plans must be created manually.

Many DHS/OHA programs extract information from program databases and send it to OFS, creating unnecessary reentry of data. For programs that require updated payment information to manage their business relationships, read-only access is granted in SFMA and account information is relayed back to the program so the account can be viewed. Otherwise, data reports are generated for the program on demand.

The financial accounting of receivables in our agencies' business environment is complicated due to the federal and state regulations, federal matching rates, and required statewide accounting practices.

OPAR: In 2013 when the FICO system contract was created, the Office of Information Services (OIS) team assisted in developing an in-house application that would support OPAR's needs.
The current FICO system is a robust application for which OPAR only requires a portion of the functionality to execute its program deliverables. The system does not effectively support OPAR business needs and some features of the system are more focused towards an agent debt collection system. FICO does not offer auditing or compliance functionality, critical components of OPAR business flow.
The support received from FICO is very limited and is not meeting OPAR business needs. The OIS Solution Development and Delivery team has had to build around the current FICO system to incorporate smaller in-house applications to meet business needs. The FICO system is used by multiple units within OPAR and causes some of these teams having to manage two different systems to complete their work. Workflow duplications within OPAR would include these systems:

- Personal Injury Liens- MMIS
- Estate Administration Unit - MMIS, DSURS
- Overpayment Writing Unit - PIPS

Future Vision and Scope

OFS: An agency receivables system should meet the needs of our business partners, allowing ease of upload and retrieval of information.

The system should enable:

- Single data entry of account information that can be used to generate invoices
- Manage account balances
- Generate reports
- Research history
- The system must allow for entry of account at any point in the receivables process
- Generate reports, documents and templates, as well as management reports either from the system or from a query tool

- Needs to meet all current OFS business rules
- System must interface with SFMA
- System must be compatible with any future agency-wide financial application
- Must meet all statewide reporting needs including counts and reason codes
- Have the flexibility for modification as data needs change
- The accounting rules for the system will be similar, if not identical, for client and provider billings (OPAR and OFS).

OPAR: In partnership with the OIS Solution Development and Delivery team, a new system could be built to meet all the business needs, incorporate all the smaller add ons that were needed due to FICO not meeting 100% of business needs.

The new solution would include these capabilities:

- Amount owed
- Payments
- Sends notices, automatic, OnDemand
- Day to day activities
- Narration – TRACS
- Maintain workload

Other Considerations/Drivers

OFS: DHS and OHA are currently preparing a Policy Option Package request for a planning effort defining the criteria to develop a cross-agency financial system and modernize the underlying technology.

In developing a receivables system, many agency business partners may be interested in interfacing with other regulatory systems to exchange data and meet their strategic objectives.

OPAR: The current contract with FICO has approximately two years remaining is identified as a two-year project. We may possibly need to amend the current contract again to extend the time, which will add additional costs.

The FICO production site is an issue for the following reasons:

- Written in Java J2EE – This is not a good fit for the team to support as they are not versed in this technology and it no longer aligns with current technology strategy of the organization.
- The system is supported in Windows using technologies that do not support Windows as their primary platform, often requiring installation of custom versions/builds into the computing environment.
- We don't use the same technologies in other supported systems – this is a "one off" in our current environment.
- We were required to purchase and maintain a costly RedHat subscription for the last and all future upgrades.

DHS/OHA Office of Information Services Issue Brief

Enterprise Collection Management System

DHS/OHA – Shared Services: Shawn Jacobsen OFS, Nicky Jeffreys OPAR

- Additional Java licensing will be required for any future upgrades.
- We currently use less than 30% of the existing functionality.
- The Debt Manager product is geared towards private collections. It is moving further away from programming that adheres to governmental needs. Each new upgrade brings with it features that, while useful to other companies, cause additional complications to our agency.
- The older versions of software required for FICO Debt Manager creates technical debt for Shared Services necessitating expensive rework as versions are deprecated.
- The system has poor data entry edits, necessitating OIS to create compensating software outside FICO Debt Manager to help monitor data quality and integrity
- The vendor only provides full support for the current version of Debt Manager. Updates released multiple times a year, OIS staff must constantly rebuild and reinstall FICO Debt Manager in order to upgrade the system and take full advantage of our support agreements.
- Upgrade packages for FICO Debt Manager often contain incomplete, out-of-date, or missing documentation, making updates very risky and error prone.
- Upgrades for FICO Debt Manager have a high degree of complexity, since FICO Debt Manager bundles over two dozen 3rd-party software products (both commercial and open-source) that are needed to operate the system.
- FICO only provides bug fixes for previous versions of FICO Debt Manager in extraordinary circumstances.
- FICO introduced a new, vendor-owned rules engine (Blaze) into the product with our most recent upgrade replacing a previous, 3rd party rules engine. This required the agency business rules to be rewritten to the new product.
- FICO had issues providing training on the new rules engine to agency staff. The agency had to pay FICO for conversion of the rules to the new engine since training could not be provided.
- FICO has not been able to provide bug fixes or mitigations for all issues that have been discovered in FICO Debt Manager. As a result, some issues have remained open with FICO for multiple years, with currently very little expectation of resolution.
- FICO does not have a normal practice of communicating known bugs and issues to customers. When the agency discovers a bug or other issue, some of these are only communicated as previously known issues after a support ticket has been opened and potentially charged to the agency.
- The agency currently has 5 outstanding product modification requests for FICO Debt Manager that date back to 2013.

Proposed Approach, Actions and Outcomes

The proposed approach for this request is to develop a new Enterprise Collection Management System that supports an updated and integrated modular solution to address the needs of OFS and OPAR, to meet regulatory needs, and adhere to business rules. If ISMC approval is reached, this request would be reviewed for approval at the DHS Technology Council for prioritization for OIS resource assignment.

DHS/OHA Office of Information Services Issue Brief

Enterprise Collection Management System

DHS/OHA – Shared Services: Shawn Jacobsen OFS, Nicky Jeffreys OPAR

Estimate for Proposed Action

Estimating this project to span over a two-year timeframe, utilizing the resources below +/- 100%:

Technical Resources:

- ISS8 Architect, fully loaded – 10% Team Lead and COLA included for 24 months = $342,502 Hourly = $82.33
- ISS8 Developer, fully loaded – top step with COLA included for 24 months = $308,256 Hourly = $74.10
- ISS7 Developer, fully loaded – top step with COLA included for 24 months = $291,393 Hourly = $70.04
- ISS7 BA/Developer, fully loaded – top step with COLA included for 24 months = $291,393 Hourly = $70.04
- PM3 at 90%, fully loaded – top step with COLA included for 24 months = $267,387.00 Hourly = $71.42
- PM1 at 50%, fully loaded – step 2 with COLA included for 24 months = $91,684.00 Hourly = $44.08
- **Total = $1,592,615.00**

OPAR Business Resources:

- Revenue Agent 2 – Tester
- Operation & Policy Analyst 2/ICM SME – 85%
- Operation & Policy Analyst 2/ICM SME – 75%

Estate Administration Unit:

- Administrative Specialist 1 LW – 15%
- Compliance Specialist 2 LW – 15%
- Compliance Specialist 3 LW – 15%

Personal Injury Liens Unit:

- Compliance Specialist 2 – 15%
- Administrative Specialist 1 – 15

OFS Business Resources:
Systems

- Operations and Policy Analyst 3/Systems SME – 85%
- Accountant 2/Systems SME – 85%

Accounts Receivable

- Accountant 3/AR SME – 75%
- Accountant 2, tester
- Accountant 1, tester

Receipting

- Accountant 3/Receipting SME – 75%

DRAFT

1 Business Case Executive Summary

1.1 Overview

The purpose of the Oregon Department of Human Services (DHS) OregONEligibility Integrated Eligibility & Medicaid Eligibility (ONE IE & ME) Project or, the "Project," is to extend the Modified Adjusted Gross Income (MAGI) Medicaid enrollment and eligibility determination functionality to include Non-MAGI Medicaid, Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF), and Employment-Related Day Care (ERDC). Combining these disparate systems into a single, integrated solution, will create a seamless end-to-end service offering with multiple access methods for eligible enrollees. This new system will also provide checks and balances to ensure that Oregonians who qualify for benefits receive accurate and timely payments, and to ensure that those who don't qualify for services do not receive benefits.

This business case update is intended to articulate changes in Project scope, schedule, and budget to inform the Project Team, governing bodies, stakeholders, and decision-makers of changes that deviate from prior versions of this document.

The last iteration of the Project schedule indicated completion of design, development, and implementation (DDI) on Non-MAGI Medicaid, SNAP, TANF, and ERDC in June 2019. This update describes an extension of this timeline to commence Pilot implementation in late August 2019. The Pilot implementation will be deployment of the new system to both Jackson and Josephine Counties, followed by a statewide roll-out in three waves that will be completed in late July 2020. This added duration of the Project was the combined result of extending System Integration Testing (SIT) from two months to five months, extending User Acceptance Testing from four months to six months, extending the Pilot phase from three months to five months, adding a one-month stabilization period after each of the three roll-out waves, and increasing the number of data conversion mock runs from three to five.

As many of the System Integrator (SI) Deliverables were shifted from the 17-19 biennium to the 19-21 biennium, the Project Team is estimating an ending balance for this biennium to be approximately $30 million, with a Project spend of approximately $165 million vice the budgeted $195 million. The Project Team is estimating the need for $144 million in the 19-21 biennium for data conversion, testing, and implementation, and an additional $44 million for Maintenance and Operations (M&O) and enhancements after Project close.

With the expiration of the OMB A-87 cost allocation exception in December 2018, the Team is projecting the Federal portion of this $188 million for the 19-21 biennium to be approximately $134.8 million. If approved, the State funding will consist of approximately $39.2 million in bond sales and approximately $15.6 million General Fund.

1.2 Background

In January 2015, a project was initiated to modernize MAGI Medicaid eligibility determinations and enrollment. This was called OregONEligibility, or simply the "ONE" system. This system development was approached by utilizing code similar in desired functionality from the State of Kentucky, which they call *kynect*.

In June 2015 during the ONE system Design, Development, and Implementation (DDI), House Bill (HB) 2219 was signed into law. This bill directed DHS to convene a work group with staff

DRAFT

from human service agencies, including: The Housing and Community Services Department, the Oregon Health Authority, the Department of Education, the Employment Department, the Office of Child Care (inside the Early Learning Division), and the Higher Education Coordinating Commission, as well as, the State Chief Information Officer and other individuals who the department deemed necessary. The work group was to study how to create a consolidated application process for residents of the state to apply for and obtain assistance in accessing food, housing, medical care, education, employment services, child care and other social services. The work group was tasked with developing and submitting a recommendation to the Legislative Assembly by September 15, 2016.

In December 2015, the ONE system was placed into production. Also in December 2015, version 1.1 of this business case was submitted to the Office of the State CIO (OSCIO) and to the Legislative Fiscal Office (LFO). It was this version of the business case that received Stage Gate 2 endorsement to continue planning to extend the functionality of the ONE system to include Non-MAGI Medicaid, SNAP, TANF, and ERDC programs. A copy of business case v1.1 is attached as Appendix D.

In August 2016, an update to this business case, version 2.0, was submitted to the OSCIO and LFO, and was used to obtain Stage Gate 3 approval to commence execution of the new ONE IE & ME Project. Again, the software development methodology was to capitalize on additional code from the State of Kentucky they had used to assimilate similar programs. Kentucky called this integrated eligibility system *benefind*, which they have shared with the State of Oregon. A copy of business case v2.0 is attached as Appendix E.

Also in August 2016, the Project Team reported back to the Legislative Assembly on HB 2219 with recommendations including the development of a single application for financial eligibility for the Department of Human Services (DHS) and Oregon Health Authority (OHA) programs. Consolidating the application process for multiple programs among two large state agencies was an incremental step in the vision towards a single application for all health and human service programs. A copy of this report is attached as Appendix F.

In late 2016 and early 2017, the pace of the Project slowed while there were leadership changes at the Director level in both DHS and OHA, and with the Independent Project Director (IPD). In March 2017, a Memorandum of Understanding (MOU) was signed by Agency Directors and by the State CIO to jointly govern the Project as the Joint Governance Board (JGB). In May 2017, the Project Team received go-forward authorization from the Executive Steering Committee (ESC) and the JGB. It was soon thereafter that negotiations commenced to update SI and QA contracts. These Amendments are now complete (pending federal approval of the QA Amendment) and the Team has re-baselined the Project's scope, schedule, and budget accordingly. These Amendments effectively pushed the Production Pilot and roll-out to September 2019, completing implementation across the State in July 2020.

1.3 Problem Definition

This Project is about serving the most vulnerable of Oregonians in their times of need. Oregon, like most of the nation, has continued to work through the cyclical nature of recessions and budgetary uncertainty. Most of the financial benefits DHS and OHA provide to Oregonians is off-cycle. When the State is in a recession and budgets are tight, DHS and OHA often require more funding to provide safety net and stabilization services for Oregonians. This balancing can place strain on any system.

DRAFT

Oregon is also continuing to grow both in age and in the general population served. Since 2010, Oregon has experienced a 3% per year growth rate over the national average in the population over the age of 65. Oregon's total population has grown by 1.6%. Like previous years, the majority of this growth (88%) is coming from people moving or migrating to Oregon.

DHS and OHA have seen policy shifts with the implementation of MAGI Medicaid, Cover All Kids, and other program policy changes which continue to provide opportunities for more individuals to receive services. In parallel with this population growth, the complexity of the rules and those served continues to grow. DHS and OHA serves over a million Oregonians through Medicaid, which has multiple programs with different rules about how to determine income, what sources to use, what to include, what to look at, and when to look at it. Family dynamics continue to change, with more and more multi-generational family groups and cases where parents and children can be in multiple households and geographic locations.

DHS and OHA staff currently use multiple systems for eligibility determination for Medicaid, SNAP, TANF and ERDC benefits. Eligibility data are often duplicated within multiple, disparate systems and are not easily shared between these systems. As such, eligibility determinations are not made in a standardized and timely manner and, in some cases, an individual's data needs to be manually entered in more than one system. There are currently few checks and balances across systems to ensure those who are eligible for benefits receive them and, conversely, those who are not eligible don't receive benefits. Some of the systems were designed and implemented in the 1970s and early 1980s. Many have been repeatedly modified from their original format to address the vast number of eligibility, service authorization and payment changes that have occurred over the decades following initial release. Business process improvements have been stifled because of keeping these antiquated systems operational and in compliance with policy changes.

These factors lead to issues with accuracy and access. Oregonians today must go to multiple offices to apply for the same benefits. They provide verifications to multiple sources and are often confused about who needs what, who has shared what, and what their next steps are. While Oregon has continued to remain below the national average for errors in traditional Medicaid systems and the SNAP program, there have been increasing quality control issues causing public discussions on the accuracy of Medicaid determinations. The latter has been an issue of trying to coordinate between IT systems and various agencies to solve who is providing which services and where an individual is being served, causing issues around capitation and reimbursement.

Over the last two years, DHS leadership have heard from staff, advocates, and community members the words, "I don't know". This includes families in crisis looking for services, who cannot answer a question about who they are working with. They receive letters from multiple local offices and messaging from various systems, all directing them to either call, come in, or go on-line. This leaves Oregonians confused, unsure of benefits, afraid of failing or taking the necessary steps to become more self-reliant, or to leave an abusive situation because they don't know what is available, who to talk to, or where to go for help. Staff have also complained about having to say, "I don't know." During the roll-out of MAGI Medicaid, over 1,000 Oregonians a month would come into DHS offices to ask about their MAGI benefits. Some Workers couldn't see into the ONE system, and many of them had their access to MMIS removed because they were not considered a covered entity. This created a system where

DRAFT

workers would have to say, “I don’t know,” and place the Oregonian on hold for long periods of time, or needing to fax information to the branch processing MAGI Medicaid.

1.4 Opportunity Definition

The ONE system is currently being used to process eligibility determinations for MAGI Medicaid. Oregon has taken the opportunity to extend ONE for eligibility determinations of additional programs by utilizing updated code from the State of Kentucky called *benefind*. Additionally, the Office of Management and Budget (OMB) circular A-87 exception to cost allocation rules was extended by CMS from December 2015 to December 2018. This provides the State of Oregon the opportunity to provide enrollment and eligibility determination services with a single, integrated system utilizing enhanced federal funding for much of the Project cost.

ONE IE & ME SYSTEM	6-Year TCO			Funding Sources		
	DDI	M&O	Total	Federal	State GF	Bonds
15-17 Actuals	33.6	0.0	33.6	28.5	0.5	4.6
17-19 Projected Actuals	164.7	0.0	164.7	148.0	2.3	14.4
19-21 Budgeted	146.0	43.6	189.6	134.8	15.6	39.2
Total Project Cost	**344.3**	**43.6**	**387.9**	**311.3**	**18.4**	**58.2**

DHS and OHA serves over 1 million Oregonians through the Medicaid program. These agencies also serve over 308,000 kids, over 81,000 Children’s Health Insurance Program (CHIP) kids, over 20,000 Foster Medical kids, over 128,000 aged, blind, or disabled Oregonians through traditional Medicaid, and an additional 420,000 adults or parent-caretaker relatives through MAGI Medicaid. On top of this is an additional 41,000 Citizen/Alien-Waved Emergency Medical (CAWEM) individuals, and over 150,000 Oregonians receiving assistance with their Medicare through a Medicare Savings Program, including Dual Eligible individuals. Each of these systems are requiring more complex logic to determine what information to accept and when. This requires worker intervention at an increasing rate.

Beyond Medicaid, there is SNAP, TANF, and ERDC which serve approximately 400,000 Oregonians. In a calendar year, DHS and OHA will serve approximately 1.6 million Oregonians, with individuals coming on and off programs, processing around 2.1 million applications each year. Over 65% of these individuals are applying for multiple programs.

Applicants must apply to multiple offices with multiple workers through various channels, and must provide the same information over and over, which is then stored in different systems that don’t interoperate well. By integrating our systems and service delivery model, Oregon has an opportunity to coordinate benefits. These benefits are currently calculated manually. Workers take information and put it into various systems. There are over 30 Legacy systems needed to complete the work related to these programs, followed by manually determining which exclusions to apply, what benefits should be associated, what the outcome is, and what notices to be sent.

While Oregon has had relatively high accuracy rates in contrast to national averages, moving into a system with automated rules provides opportunities for DHS to work on standardization and coordination to limit the risks identified.

The greatest opportunity is that DHS will be able to better serve Oregonians. Any integration of systems is difficult but with the integration of enrollment and eligibility systems, there will exist standardized processes to apply for Medicaid, SNAP, TANF, and ERDC. Oregonians will be able to apply online or in an office, provide changes and updates from their homes, and see a single coordinated output of what benefits they are eligible for. They will be able to talk to workers who will be cross-trained on programs and able to view information from a single system for most of the financial eligibility benefits individuals are applying for. DHS and OHA will have an updated platform that can conform to federal and State expectations, and allow for opportunities over the next decade to increase automation and access for Oregonians in ways that cannot be offered today. Ultimately this solves the greatest problem and provides the greatest opportunity for eliminating an answer of, “I don’t know.” A single system, a coordinated approach to eligibility, and a stable platform of care for Oregonians that is about serving them in the way they want to be served, will allow us to focus on accurate and effective customer service for some of the most vulnerable Oregonians.

1.5 Alternatives Analysis

Both business case versions 1.1 and 2.0 explored the four Alternatives identified below:

1. Implement Non-MAGI Medicaid Eligibility Determination into the ONE System
2. Implement Integrated Eligibility Determination into the ONE System
3. Acquire External Eligibility Determination Services from another State
4. Do Nothing

Alternative #1 was originally estimated to cost $80.3 million and conclude in December 2018. Additional costs would be incurred now because the *benefind* code would have to be reworked to eliminate the functionality associated with SNAP, TANF, and ERDC. There would be the loss of a significant investment already made in terms of fit-gap, design, development, and human resource to incorporate these additional programs into an integrated system.

Alternative #2 was selected in both cases and the Project Team proceeded accordingly. Given that this Project is now approximately 35% complete, with initial system design nearly complete, and with code development in progress, there is significant risk and cost associated with each option that deviates from the current course, or Alternative #2.

Alternative #3 is not a viable option as there are no service models across the nation that support Oregon acquiring services from another State.

Alternative #4 would require continued spending for Project shutdown activities and vendor contract resolution but the cost of system design and development would be stopped. This Alternative would likely prompt several federal audits that would jeopardize current program funding streams until complete. Oregon would likely be required to pay back federal funds expended to date. Overall, this is the least desirable Alternative of those identified.

DRAFT

1.6 Conclusions and Recommendations

Continuing with Alternative #2 DDI is the best option at this stage of the Project. It is supported by agency leadership and Project governance. Given the ONE system as a stable base to build from and the shared code from Kentucky (*benefind)*, the methodology employed has been proven successful, using the ONE System as an example. With continued availability of enhanced federal funding, timing is right to offset significant Project cost ($282.1 million federal funding of the estimated $342.1 million total Project cost). The Project Team can now also manage the Project against a solid and actionable scope, schedule, and budget. Failure to act now on this opportunity would have significant adverse effects, such as:

- Service delivery would continue in the current model, meaning the same frustration with the system from end-users and clients would persist, as well as error rates and lack of checks and balances.
- There would be a loss of federal funding and it is likely audits would be triggered.
- There would be a loss of confidence in the State's ability to execute a modernization program.
- There would be damage to the reputation of the State of Oregon.
- There may be accompanying increases in operational costs because of lost federal funding and continuing to operate antiquated systems.
- There would be a loss of the investment already made in delivering intended functionality to Oregonians.

The Project Team is highly recommending continuation of Project execution in alignment with Alternative #2. Cost detail for this Alternative can be found in the Project Budget attached as Appendix C.

DRAFT

2 Background

2.1 Current State of DHS Eligibility Work

Most of the systems supporting DHS eligibility determination processes were designed and built in the 1970s and early 1980s. Many of these systems have been modified repeatedly to address the vast number of eligibility, service authorization, and payment rule and policy changes that have occurred since then.

2.2 MAGI Medicaid Eligibility Operations

2.2.1 Kentucky Transfer System (*kynect*)

In 2013, Kentucky's Cabinet for Health & Family Services (CHFS) embarked on an ambitious information technology (IT) modernization program to replace a collection of legacy systems that supported Health and Human Services programs. The cabinet's goal was to modernize IT solutions to improve delivery of services and increase worker productivity while maximizing the funding opportunities available from the Affordable Care Act and CMS 90/10 funding. The modernization program, called Kentucky Connect (kynect) included implementation of a state-based Health Insurance Market Place, an eligibility and enrollment system for MAGI Medicaid applicants, and several other enterprise IT capabilities. Kentucky will realize the following outcomes as a direct result of the modernization program:

- *Streamlined Field Operations*– Increased worker productivity, simplified process steps, reduced case processing cycle times, and reduction in total administrative costs of delivering benefits.
- *Transformed Service Delivery* – Transformed service delivery, providing multiple channels of access (walk-in, online, mail, call centers, fax, mobile, imaging, etc.), and interactive processing across geographic units.
- *Program Compliance and Monitoring of Fraud and Error* – Flexibility for worker performance while maintaining strict adherence to program mandated compliance through checkpoints and controls for measurement and proactive response.

As Oregon's designated Medicaid agency, OHA recently implemented a new system for MAGI Medicaid eligibility determinations. That system is called OregONEligibility, or ONE, and is the result of the State of Kentucky sharing the *kynect* code base with the State of Oregon. Originally built by Deloitte Consulting, *kynect* operated as the MAGI Medicaid eligibility determination system of record for more than a year before OHA signed an agreement with the Kentucky Cabinet for Health & Family Services to share their code and associated documentation with the State of Oregon. Oregon then performed a Fit-Gap analysis on Kentucky's code in relation to Oregon's needs. The transferred code was modified as necessary and is now operating as a production system in Oregon's State Data Center. The ONE system will be used by OHA to make approximately 900,000 individual MAGI Medicaid eligibility determinations and redeterminations each year.

OHA accepted the *kynect* production system as meeting the bulk of its business needs and therefore made very few technical changes to the system, instead focusing on making policy and process changes to its business wherever feasible to minimize the risk with the initial system implementation in Oregon.

DRAFT

2.2.2 Phased Implementation

OHA implemented the ONE system in phases. First, in December 2015, it enabled the Worker Portal for use by eligibility workers to determine MAGI Medicaid eligibility for applicants who apply by mail, fax, phone, or through the Federally Facilitated Marketplace (FFM) at Healthcare.gov.

In February 2016, it implemented a customer facing Applicant Portal, initially limiting access to certain community partners that help Oregonians with MAGI Medicaid benefits and to report changes. The Applicant Portal went live to all Oregonians in December 2016. The Applicant Portal allows Oregonians and community partner assistors to enter and update income, family composition, address and other eligibility-related information, upload documents, communicate with workers assigned to their cases, and participate in re-certification activities, all without having to fill out paper forms, visit a field office, or contact a call center. Over 850,000 Oregonians are now receiving benefits through the ONE system.

2.3 *kynect* becomes *benefind*

The Kentucky state-based marketplace preferred *kynect* to have the look and feel of searching for private insurance rather than state programs, so they developed a separate applicant portal for other human service programs and called it *benefind*. The *benefind* system code was also shared with the State of Oregon as the basis for extending eligibility and enrollment determinations to include Non-MAGI Medicaid, SNAP, TANF, and ERDC. See Appendix G for functionality included in the *kynect/benefind* system. Appendix H, comparing Oregon's needs to Kentucky's *benefind* system, was used to determine if there were enough similarities between the two state's programs to justify obtaining this code as a transfer solution and performing the subsequent Fit-Gap Analysis.

2.4 Non-MAGI Medicaid Eligibility Operations

DHS and AAA staff make more than 150,000 Non-MAGI Medicaid eligibility determinations every year. DHS and OHA's Forecast for the 2017-2019 Biennium estimates the following caseloads:

- Clients of Aged, Blind, and Disabled programs (84,533 cases as of December 2017)
- Clients of the Old Age Assistance program (44,418 cases as of December 2017)
- Clients of the Qualified Medicare Beneficiaries program (27,469 cases as of December 2017)
- Medicare Part A and Medicare Part B supplemental payments (103,461 cases as of December 2017)

Roughly half of those determinations are made by DHS staff in local offices of the department's Aging and People with Disabilities (APD) program. The remainder are made by Area Agency on Aging (AAA) staff in Marion, Polk, Yamhill, Tillamook, Clatsop, Multnomah, Lane, Linn, Lincoln and Benton counties. (Area Agencies on Aging are typically county-chartered organizations that provide assistance and services for people over the age of 65 and people with disabilities who need assistance. In the Oregon counties listed above, AAA deliver DHS's APD Medicaid program under contract with the department, including making initial and ongoing financial eligibility determinations.)

DRAFT

The Non-MAGI Medicaid eligibility caseload is projected to grow about nine percent over the next four years. Without any improved efficiency in making eligibility determinations, the added case load could require 25 or more eligibility workers at a cost of over $2 million annually to be hired, trained, and deployed across the state to come into standard with the current workload model.

The process of taking applications, reviewing them, and making Non-MAGI Medicaid eligibility determinations is often expensive, slow, and error-prone. For example, recent measures of Non-MAGI Medicaid cases found workers spend an average of 28 minutes screening each application and taking another 110 minutes to make the eligibility determinations. This is for a case that doesn't take coordination. If the case has a connection to a MAGI or medical case, then there is an average of 5 touches back and forth between different workers before a decision to move forward is completed. After the coordination is completed there is, according to a program integrity review, at least a 15% chance that the change won't take effect because of system issues in attempting to integrate across multiple systems (ONE, IE, CM, ORKids, and MMIS).

2.5 Integrated Eligibility (SNAP, TANF, ERDC) Operations

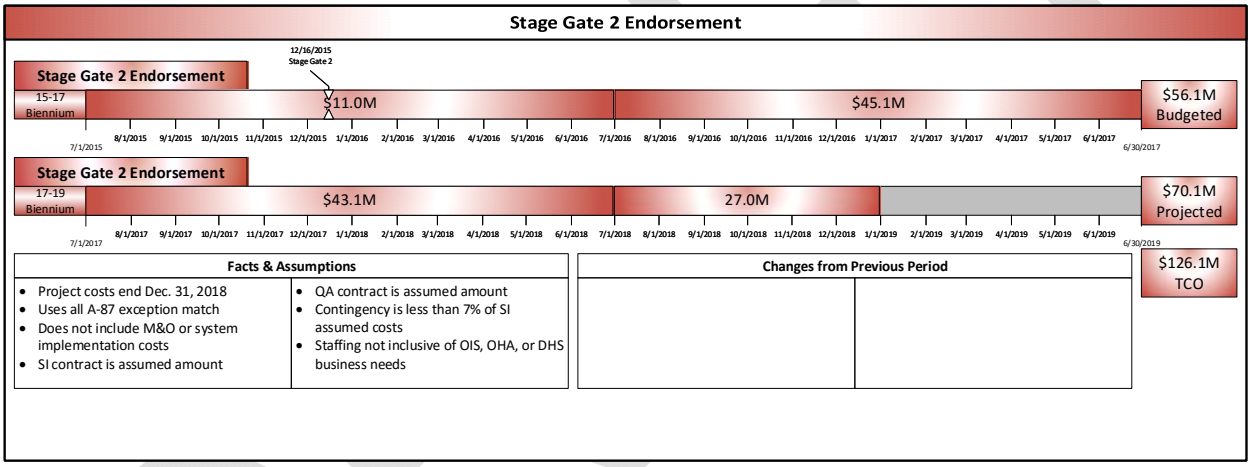
DHS and AAA staff make approximately 130,000 SNAP eligibility determinations every year for APD program clients. (Those 130,000 households include roughly 155,000 individuals.)

Self-Sufficiency Program (SSP) staff make the remainder of the eligibility determinations for SNAP, and make eligibility determinations for the TANF and ERDC programs. The SSP caseload is approximately:

- SNAP: ~285,000 cases (~580,000 individuals)
- TANF: ~23,800 cases (62,800 individuals)
- ERDC: ~7,700 cases (23,545 individuals)

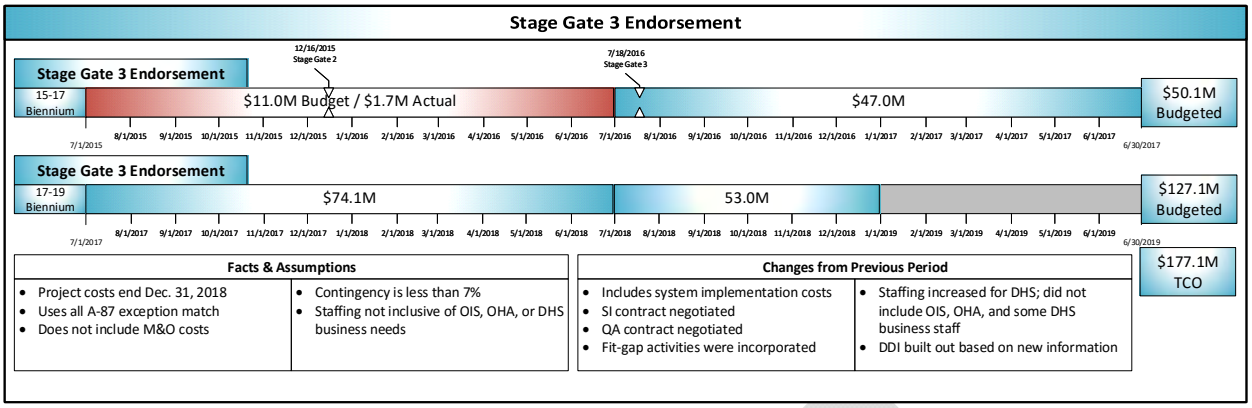
The Spring 2016 DHS/OHA Caseload Forecast predicts a decline in the average number of SNAP cases between the 2015-2017 biennium and the 2017-2019 biennium (from roughly 406,000 households to approximately 371,000 households). The proportion of SNAP cases that are managed in APD/AAA offices is expected to continue to grow. The forecast projects a decline in the number of TANF cases from roughly 23,500 to 20,600 over the same period.

Errors occur in these programs as well. Recent internal quality control review data for the SNAP program found that in a sample of cases where applicants were determined to be ineligible, that decision was inaccurate more than 19 percent of the time. In a sample of SNAP-eligible cases, the difference between the benefit amount awarded and the correct amount averaged a little less than 3 percent of the benefit amount. (Some errors were overpayments. Others were underpayments.) In the TANF program, the difference between the amount awarded and the correct amount exceeded 28 percent of the benefit amount.



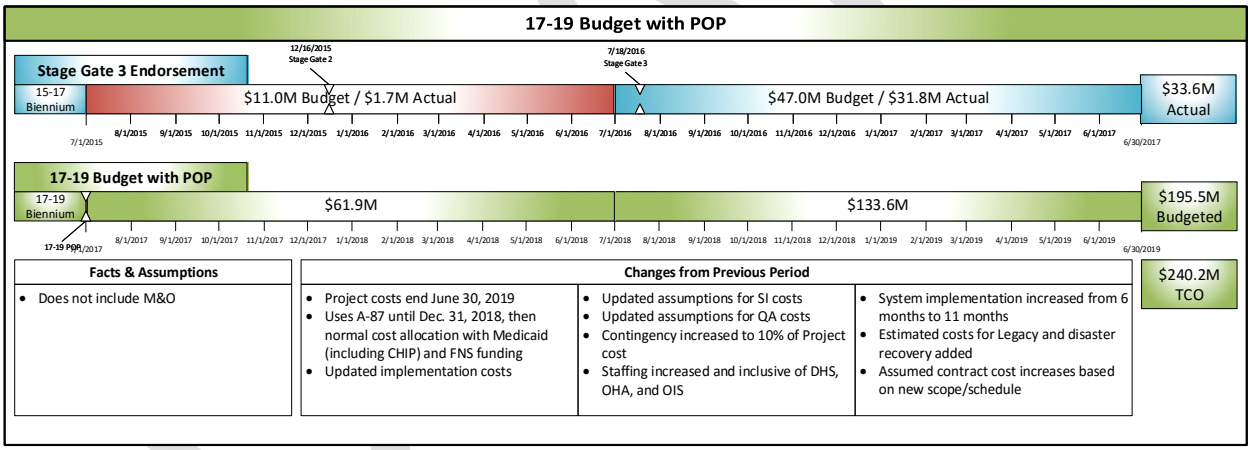
2.6 Schedule Changes Since Last Update

The project timeline has been updated from previous submissions. As Oregon explored work through the iterative design sessions, it became apparent that we needed a shift in our operational model. A decision was made to delegate all Medicaid eligibility determination work



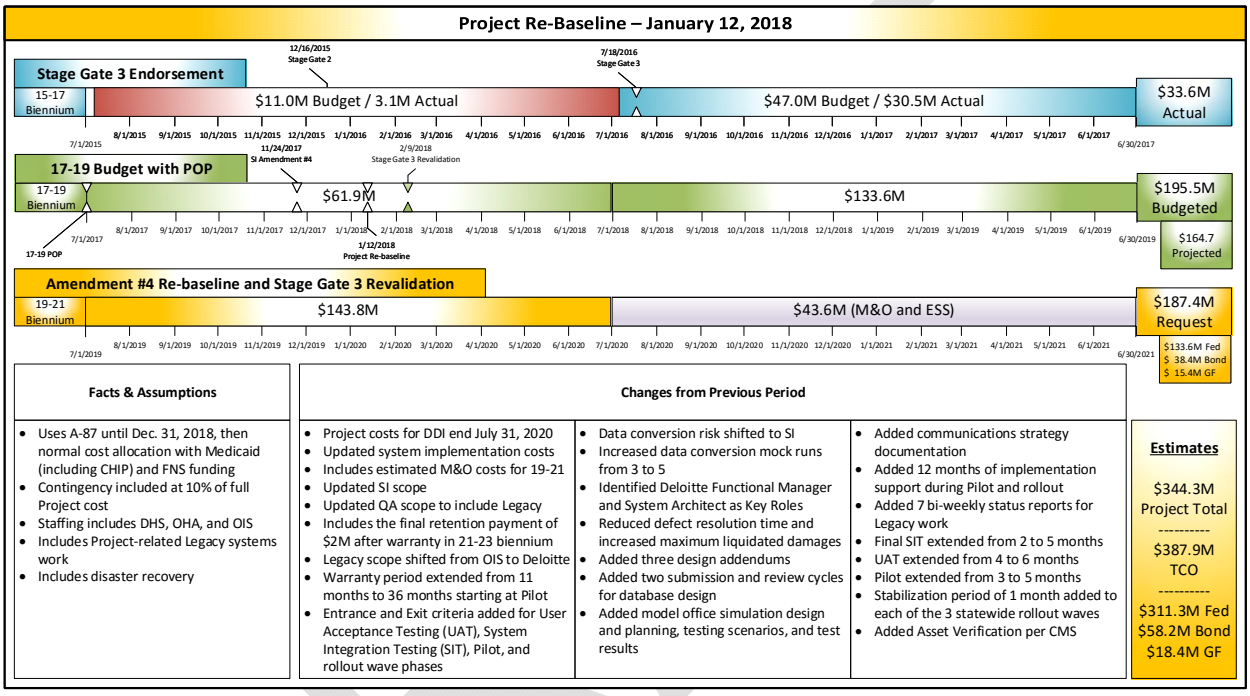
to DHS. As OHA and DHS further engaged with the design and explored opportunities and lessons learned from the initial ONE implementation and other States' experience, Oregon updated the schedule. Additional time for pilot, testing, and the wave roll-outs were added to the schedule. Oregon also contracted with Deloitte to assist with the Legacy Design work with the intent of insuring that Oregon's Office of Information Services (OIS) understands the total scope of work needed and to avoid issues that other States experienced with their projects. As this work continues, Oregon may adjust the Project schedule to ensure that we are accounting for all the opportunities we need to consider in ensuring a quality product is delivered and ultimate accountability to our federal partners and Oregonians is met.

2.7 Project Changes Since Initiation



Business Case version 1.1, dated December 16, 2015, was utilized for Stage Gate 2 endorsement. As indicated in the graphic below, there was an estimated Project cost of $126 million with a plan for product availability in December 2018. Product implementation and people readiness activities were not incorporated in this version.

Business Case version 2.0, dated July 18, 2016, was an update for Stage Gate 3 endorsement. The graphic below estimates Project cost to be $177.1 million with a plan for implementation through December 2018. This plan refined SI and QA contract costs and incorporated fit/gap activities. In this estimate were increased staffing for DHS but did not include many needed OIS or business resources from OHA and some of DHS.



In the 17-19 budget development process, the Project Team received go-forward approval from Project governance after an impact analysis and risk assessment were conducted to validate the viability of a go-forward option. There was an additional $63 million cost identified to extend the Project duration to June 2019, and to incorporate additional staffing needed for an implementation that was increased from 6 months to 11 months. Additionally, Legacy systems design and development were added for both the State and the SI, as well as funding needed for disaster recovery. The SI contract Amendment amount was approximated. Contingency funds were also added to the budget to reflect a 10% prudent person reserve. The total Project cost was estimated to be $240.2 million with $195 million needed for the 17-19 biennium.

The SI contract Amendment was completed in November 2017. The duration of the Project was again extended such that Pilot implementation will begin in September 2019, followed by 3 one-month waves of roll-out and one month stabilization period between each wave. This schedule indicates a complete state-wide deployment by the end of July 2020. There were also extensions of time by adding two extra data conversion mock runs (from 3 to 5), adding 3 design addendums, increasing final System Integration Testing (SIT) from 2 months to 5 months, Pilot implementation from 3 months to 5 months, and User Acceptance Testing (UAT) from 4 months to 6 months. Other additions to scope included the addition of Model office simulation design and planning, communications strategy documentation, updates to QA scope to include ONE/ESS and Legacy design and development, warranty period extension from 11

months to 36 months, and other items identified in the graphic below. These changes increased the Project cost from $240.2 million to an estimated $344.3 million, but with the schedule extension, some of the SI and QA deliverable costs were shifted from the 17-19 biennium to the 19-21 biennium. As such, the Project Team is estimating an ending balance of approximately $30 million at the end of the 17-19 biennium. The 19-21 budget request will be further refined prior to the budget development process but acknowledges there will be funding needed to complete testing and implementation, as well as for Maintenance and Operations (M&O) and Enhancement Support Services (ESS).

3 Problems and Opportunity Definition

3.1 Problems

One of the most common complaints from both clients and workers is the lack of integration between and across DHS and OHA systems, resulting in the need for the same information to be provided and entered into multiple systems. Clients are frequently frustrated with having to provide the same demographic and financial information over and over when applying for different program benefits. Caseworkers are frustrated by the lack of client and case visibility across programs. That forces them to open many systems and juggle many views into those systems simultaneously as they interview clients and process cases. Oftentimes, they don't have access to systems or parts of systems that are needed to support clients effectively.

A good example of this is cases where a worker in an APD/AAA office evaluates a client's eligibility for medical assistance and SNAP and determines the client is SNAP-eligible only. This case will be referred from the APD/AAA office to an SSP office for ongoing case management. The information system used in the APD office (OregonAccess) does not have an interface to the system used in the SSP office (TRACS) so data must either be transferred with a cut-and-paste operation, re-entered from a paper application, or collected from the client again.

Case transfers in the opposite direction (from an SSP office to an APD or AAA office) are also problematic. Anecdotal reports include times where these transferred cases went unnoticed for three to six months. This problem should be resolved by integrating the systems such that handoffs to other agency processing centers is no longer required. Additionally, the new system is tasked based vice case based, meaning workers will monitor a queue that is shared by all. Other reports noted that the likelihood of fraud increases when a household is split between an SSP branch and an APD/AAA branch due to the absence of connections between the systems.

Similar, and often more complicated, coordination problems arise for clients of the Intellectual and Developmental Disabilities (IDD) program. The case managers who provide case coordination for long term care or support in the IDD program are predominantly employees of local county-run Community Developmental Disabilities Programs (CDDP) and Adult Support Service Brokerages. While these offices are under contract with DHS to provide case coordination for IDD services, they do not manage the Medicaid financial eligibility case for their clients. This leaves clients and their families in the position of having to contact and work with the APD or AAA branch closest to their home location. Because service cases are managed in multiple legacy systems, which differ from the systems in which the medical eligibility cases are managed, complex and time-consuming human intervention is required to assure both medical and long-term service benefits are maintained and managed correctly.

3.2 Opportunities

In an integrated solution, the problems described above no longer exist because caseworkers will enter client data once for all in-scope eligibility determinations and they will be cross-trained on these DHS and OHA eligibility-based systems such that clients do not need to be redirected to a different field office. There are other factors identified below that make now the right time to continue expanding the ONE system to include eligibility and enrollment functionality for Non-MAGI Medicaid, SNAP, TANF, and ERDC systems, at a minimum.

DRAFT

3.2.1 MAGI Medicaid Eligibility System

The ONE system has been in production since December 2015 and has undergone many enhancements and upgrades since that time. There is now opportunity to extend this system to align with the intended outcomes of the IE & ME Project. Examples include:

- Oregonians can set-up an account, apply for and receive real-time eligibility determinations for Medicaid (both MAGI and Non-MAGI), SNAP, TANF, and ERDC using a single application via the Applicant Portal
- Coordination of eligibility determination work between DHS and OHA for mixed households
- Electronic verification information sources minimize documentation that the client will be required to provide
- Operational reports that will allow for workload management across eligibility determination caseloads
- Single system for eligibility determination data for accurate reporting to federal partners
- Centralized and verified enrollment data available for Coordinated Care Organizations for MAGI & Non-MAGI clients
- Consistent high-quality data source for reporting CMS-mandated operational statistics
- Automating manual processes in order to:
    - Reducing the elapsed time between completing an application and making an eligibility determination
    - Reducing staff time spent creating, reviewing, and acting on each application
    - Reducing error rates in making eligibility determinations

3.2.2 Federal Partnership

3.2.2.1 A-87 Cost Allocation Exception

On August 10, 2011, three federal agencies, CMS, FNS, and ACF announced a time-limited, specific exception to the cost allocation requirements set forth in Office of Management and Budget (OMB) Circular A-87 (Section C.3) and Section 200.405 of the superseding “Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards” (2 CFR 200 issued December 19, 2014). These provisions generally require the costs associated with building shared state-based information technology systems to be allocated across all benefitting programs. The exception reflected a federal focus on streamlining enrollment and eligibility determinations in health and human services programs while leveraging funding efficiencies at the state-level.

3.2.2.2 Timeline Extension

The original timeline allowed human services programs to benefit from investments in the design and development of state eligibility-determination systems for state-operated Marketplaces, Medicaid, and the Children’s Health Insurance Program (CHIP), through December 31, 2015. On July 20, 2015, the three agencies extended that timeline for an additional 3 years, through December 31, 2018.

The A-87 exception extension, along with an indefinite extension of enhanced Federal funding for Medicaid systems, will enable states to fund the initial development costs needed to retire their legacy eligibility determination systems and to integrate this functionality into new and improved systems. Moreover, the extension will provide states more time to develop, refine, or test integrated systems to fully comply with Affordable Care Act requirements.

DRAFT

In support of DHS' integrated ONE IE & ME Project, CMS will fund all system components necessary for Medicaid eligibility determinations, including those components that also serve other programs, at its 90/10 match rate. FNS will fund SNAP-only components at its 50/50 match rate, and ACF will allow the state to utilize TANF and ERDC funds to support the development of components that were confined to those programs. After December 2018, CMS will continue to fund Medicaid components at the 90/10 match rate but functionality benefitting all enrollment and eligibility determination programs will need to be allocated at 90/10 Medicaid and 50/50 for SNAP, TANF, and ERDC.

CMS and FNS approved federal fiscal year 2017 funding for project design and development work. The Project Team has regular monthly status reports and status meetings with these federal partners.

3.2.3 System Design

IE & ME Core Design, Conversion Design, and Legacy Design is approximately 90% complete with scheduled completion at the end of March 2018. There is now a greater understanding of system functionality, requirements, and outcomes.

3.2.4 Contract Amendments

3.2.4.1 System Integrator Contract Amendment #4 with Deloitte Consulting.

The SI Amendment #4 to Statement of Work (SOW) #2 for design, development, and implementation (DDI) of the ONE IE & ME system was crafted to capture changes that had been presented to the Legislature during the 17-19 biennium budget process in the form of a Policy Option Package (POP) that extended the duration of the Project and associated costs. This Amendment effectively shifted design scope of the larger and/or more complex Legacy systems from State staff to the SI. Additionally, this Amendment provided the following benefits:

- Contract language position improvements:
    - Warranty Period extended from 11 months to 36 months starting at Pilot.
    - Entrance and Exit criteria added for User Acceptance Testing (UAT), System Integration Testing (SIT), Pilot, and rollout wave phases.
    - Data conversion risk reduction:
        - If the data conversion approach fails to deliver results in accordance with the design or the mock run targets, then the SI will bear its own costs relating to revisions in the data conversion design and the data conversion source code.
        - Increased the number of data conversion mock runs from three to five.
        - Resolved differing opinions regarding the scope of the SI's data conversion extraction and transformation services for Other Related Individuals.
    - Identified two additional SI roles (Functional Mnaager and System Architect) as Key Persons.
    - Service Level Agreements (SLAs): Reduced resolution time for Severity Level 3 Defects and increased the maximu liquidated ddamages per incident form some metrics.
- Deliverable adjustments:

  - Added three design addenda to incorporate limited functional modifications, as prioritized by the State, to meet business requirements and complete system implementation.
  - Added two submission and review cycles for the Database Design – Data Dictionary, Logical Design, and Physical Design.
  - Added Model Office Simulation design and planning, testing scenarios, and test results.
  - Added communications strategy documentation.
  - Added twelve months of implementation support services during the Pilot and statewide rollout.
  - Added seven bi-weekly status reports to the legacy documentation and design work (SOW #3).
- Increase to Other Support Services:
  - Added $6 million to the Other Support Services funds.
- Schedule adjustments:
  - Final SIT duration extended from two months to five months and aligned with legacy system availability to enable end-to-end testing.
  - UAT duration extended from four months to six months.
  - Pilot duration extended from three months to five months.
  - A one-month stabilization period has been added to each of the threed statewide rollout waves.

The cost for SI services with this Amendment increased from $100 million to $166 million.

Responsibilities between the State and Deloitte in the execution of this Amendment are included as Appendix J.

3.2.4.2 Quality Assurance Contract Amendment #3 with Public Knowledge, LLC.

The QA Amendment #3 to SOW #2 expanded the scope of QA services provided by Public Knowledge, LLC to include modifications to impacted legacy systems, the incorporation of the ONE System Enhancements, and other changes to align with the revised scope and schedule of the Project. ONE System Enhancements means enhancements made to the ONE System through either maintenance and operations (M&O) releases or enhancement support services (ESS) releases. This Amendment has been approved by CMS. FNS approval is pending.

The cost for QA services with this Amendment increased from $4 million to $8.6 million.

DRAFT

3.2.5 Re-Baselined Scope, Schedule, and Budget.

With the Amendments above, the scope, schedule, and budget were re-baselined. These Project artifacts are attached as Appendices A, B, and C respectively.

3.2.6 *benefind* Code Availability.

As the State of Kentucky expanded their enrollment and eligibility services from their *kynect* product, new functionality they called *benefind* became available for State of Oregon use. This transfer solution is being put in place to the maximum extent practicable in the build of Oregon's new integrated system.

3.2.7 House Bill 2219 (2015) – Single Streamlined Application for Human Service Programs

HB 2219, effective June 2, 2015, required DHS to convene a work group consisting of "human service agencies" to study consolidation of application processes for human and social services and to report recommendation to the Legislative Assembly. This report was submitted to the Legislature on August 15, 2016. In this report, four recommendations were identified and are summarized below:

> Recommendation 1: Develop a single application for financial eligibility for DHS and OHA programs. Convene a cross organization recommending body to develop criteria for the sequence and addition of other agency programs.
>
> Recommendation 2: Take the opportunity with the IE & ME Project to review and revise the application language. Application assistors have provided feedback that current application language can be confusing and potentially trigger trauma for applicants.
>
> Recommendation 3: Utilize the HB2219 work group to research the health and human services program screening tool(s) currently being used in Oregon and explore their functionality, accuracy, maintenance and usage.
>
> Recommendation 4: Continue the HB2219 work group to research and explore the possibility of sharing basic applicant information across programs/agencies, when applicable, to reduce duplication and enhance services to Oregonians.

The consolidated application will allow people to apply for and obtain assistance in accessing food, housing, medical care, education, employment services, child care and other social services. A consolidated application process is expected to: 1) decrease the time an applicant spends filling out similar paperwork for different programs, 2) decrease the time agency staff spend processing paperwork, 3) reduce the burden on applicants to navigate their own way through a complex system of programs, and 4) correctly and appropriately determine eligibility through a common, standards-based process. Eligible Oregonians would get a quick and accurate determination, and those who are not eligible would be promptly notified.

DRAFT

3.2.8 Meeting Citizen Expectations

Today's consumers increasingly communicate in real time via web-based services accessed from virtually anywhere. Technological advances and experiences in consumer marketplaces have resulted in DHS customer expectations that are much higher than they were just a few years ago. Citizens expect to be able to access information about government programs simply and quickly. They expect to be able to find information and connect with programs without needing to first figure out which programs and benefits are administered by which agencies and levels of government. Some people are beginning to demand virtual "one stop shops" where they can connect with government programs from all agencies that serve people in circumstances like theirs. They expect to access benefits and services without having to report physically to a field office or having to fill out paper forms. They expect online government services to set and meet the highest possible standards for security, confidentiality, and data privacy.

With the new integrated system and associated Applicant Portal, Oregonians will be able to apply for benefits, update case information, upload documents, and determine eligibility across multiple systems from anywhere in the world that they can obtain Internet connectivity.

3.2.9 Field Operations Efficiencies

Eligibility decisions will occur in a timelier fashion with the delivery of an integrated eligibility system. Workers will not be downloading paper applications, manually entering information into multiple screens, or performing manual verification checks in multiple systems. This will result in fewer processing errors and greater integrity of the data in the system. Accuracy of eligibility decisions and benefit amounts will also increase with automation of these activities.

DHS and OHA will be updating the service delivery model to include two levels of office interaction. Virtual Eligibility Centers (VEC) will be established in rural communities where workers will process information coming through the phone or an online application. This creates rural jobs and will build an infrastructure to support the growing movement away from brick-and-mortar offices. Oregonians will continue to have access to offices where services are currently provided. They will also have 24-hour access to information about the status of their eligibility cases. The ability for customers to update their own personal information, with automated processing of those updates, will save worker time in the DHS offices. It will also allow for more efficient communications between workers and their assigned customers, with the ability for customers to email their worker at any time of the day with information or questions about their case.

Staff in DHS and AAA offices will be able to spend more time with people, assisting them with their needs, and less time with paper processes and files. Additionally, DHS staff who are serving customer needs in their own homes, or places of residence, will be able to access information from those locations and update information. This allows for the worker to save time once they are back in the office, as the updates will already be complete. They will no longer have to upload and update information upon return to the office.

While we expect these efficiencies and opportunities, the majority of these will not be seen for at least 18 months, post implementation. In order to automate eligibility and allow Oregonians to be able to provide information, additional questions and functionality is required. These additional fields, which don't exist today and therefore cannot be data converted into the ONE

DRAFT

system, along with change management have been correlated nationwide with longer eligibility determination times for the first year and a half.

3.2.10 Alignment with Strategic Technology Plan

The DHS/OHA Strategic Technology Plan (STP) includes many strategies that the ONE IE & ME Project will support. Strategy #1 in that plan is titled Business Automation and calls for the automation of workflows, decision-making, and business rules while reducing manual, paper-based processes. This project will automate workflows and the application of business rules in each of the programs within its scope. Strategy #2, Dynamic Needs Supported by Seamless Services, is evident in that this project includes many programs in its “one stop shop” for citizens. Similarly, an integrated eligibility system will provide advances in pursuit of Strategy #5, which calls for assembling a “comprehensive view of clients.” The STP also calls for enabling connectivity “anytime, anywhere,” encouraging the development of on-line self-service capabilities for clients and mobile virtual workplaces for agency staff. An integrated eligibility determination system will provide that functionality. More information related to Project alignment with the STP is attached as Appendix I.

DRAFT

4 Alternatives

In version 1.1 of this business case, which was utilized for Stage Gate 2 endorsement, four alternatives for the Project were identified and analyzed. They were:

- Implement Non-MAGI Medicaid Eligibility Determination into the ONE system
- Implement Integrated Eligibility Determination into the ONE system
- Acquire External Eligibility Services from Another State
- Do Nothing

The second option was selected, meaning the intent was to extend the functionality and derived benefits of the ONE system to include Non-MAGI Medicaid, SNAP, TANF, and ERDC. Business case v1.1 is included in this document for reference as Appendix D.

In version 2.0 of this business case, which was utilized for Stage Gate 3 endorsement, these same four alternatives were recognized but only options #2 and #4 above were compared further. Business case v2.0 is included for reference as Appendix E.

This version of the business case contains updated information about changes to scope, schedule, budget, and risks. Assumptions and constraints have been updated, validated, and utilized to determine the best course of action (Alternative) going forward.

4.1 Assumptions and Constraints

Below are assumptions considered in the Alternatives Analysis (Section 4.4).

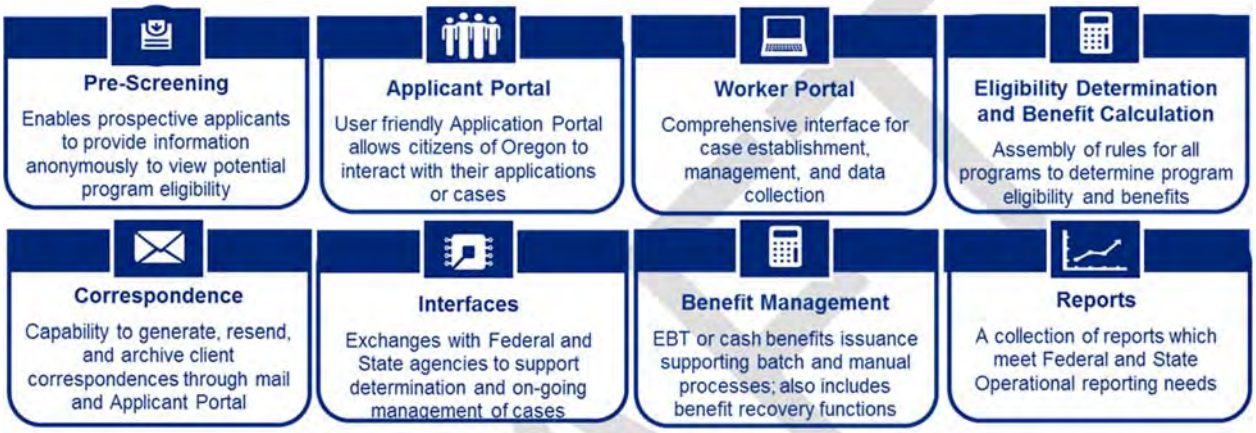
- DHS and OHA leaders support a strategy of minimizing the amount of customization when transferring Kentucky's solution to Oregon. This requires a willingness to change policies and procedures rather than changing the system whenever practicable.
- The Project Team will sufficiently orchestrate the ONE operations and maintenance work, the ONE MAGI enhancement efforts, and the IE & ME system development such that none prevent the others from being successful.
- CMS and FNS will provide timely approval plans for the IE & ME system development throughout the duration of the Project. The approval process is at least 60 days, with the review cycle restarting if there are document revisions.
- The legislature will continue to financially support the IE & ME Project, including providing necessary funding for the maintenance and operations of the new system.
- Per the MOU between OHA and DHS signed in April 2017, OHA will delegate Medicaid eligibility determination to DHS. This transition will occur before the new system goes live.
- A separate open and competitive RFP will be issued for the long-term Maintenance and Operations (M & O) of the new system after Project completion. Deloitte Consulting will provide these services by way of a contract Amendment until a new contract is awarded.
- MAGI Medicaid-related enhancements to the ONE System will be performed by Deloitte Consulting.

DRAFT

- The Legacy systems documentation will be updated in a timely manner to support the design of the IE & ME system and its interfaces.
- Case management will still be performed in Legacy systems such as TRACS and ORACCESS and will be shared with the new system with interfaces, as appropriate.
- Deloitte will assist in documenting the design of key Legacy system changes and interfaces to support their use with the Integrated ONE System.
- Appropriate modifications to the existing service delivery model and business processes will enable Oregonians to access benefits via Storefronts, the Applicant Portal, or through Virtual Eligibility Centers (VECs).
- Training will be holistic. It will encompass enrollment, eligibility, and benefit issuances in both the new ONE system and the modified Legacy systems.
- The existing ONE system will be merged into the new IE & ME system.
- The roll-out will be conducted in a phased approach. There will be a five-month Pilot period, implementing the new system in both Jackson and Josephine Counties. Following the Pilot, implementation in the remainder of the State will be accomplished in three one-month waves with a one-month stabilization period following each wave.
- Key staff (business leaders, program and policy experts, field/operations representatives, technical experts, clients and potential clients, community partners, counties, and tribes) will be made available in sufficient numbers to the Project when they are needed.
- Changes to the MMIS system will be completed in a timeframe consistent with the IE & ME schedule.
- People readiness for field/operations representatives and other stakeholders will be achieved throughout the IE & ME Project, and will be completed prior to “go-live.”
- DHS and OHA will continue to receive authority to connect, and to utilize the Federal Marketplace.
- ETS will provide timely and consistent services throughout the life of the IE & ME Project and will provide necessary services for the implementation, operation, and maintenance of the new Integrated ONE system.
- There will be continued gubernatorial, OSCIO, and legislative support for the Project.
- All parties to the MOU will continue to abide by the agreement.

The project is subject to these constraints:

- CMS will not provide enhanced funding for a Non-MAGI Medicaid solution that is separate from ONE.
- The exception to the OMB Circular A-87 cost allocation requirements to support integration of other human service programs into the ONE system will expire at the end of December 2018.
- The IE & ME System Integration Testing #2 cannot be performed until ONE, Legacy, and MMIS development and testing is complete.



DRAFT

- State and Federal mandates that require changes will need to be implemented during the Project if they cannot be deferred.

4.2 Solution Requirements

4.2.1 High Level Functional Requirements

The following represents the IE & ME Project high-level business functionality:

Pre-Screening – The Pre-Screening module in the Applicant Portal enables prospective applicants to provide a minimal set of information to the system anonymously to see the programs for which they may qualify. The module will include assessment capabilities for all programs offered by Integrated ONE, including Medicaid (MAGI & Non-MAGI), SNAP, TANF, and ERDC. It is important to note that the pre-screening process is not an official eligibility determination and individuals must formally apply in the Applicant Portal or by contacting a DHS or an OHA office. The data collected during Pre-Screening will be saved.

Applicant Portal (AP) – The Applicant Portal enables the registered users' access to the system to apply for benefits as well as to enable them to take action on their ongoing benefits. The applicant portal allows users to apply for Medicaid (MAGI & Non-MAGI), SNAP, TANF, and ERDC as a part of an Integrated ONE application. The citizens will be able to take actions on their ongoing applications or cases including to report a change, to recertify, to withdraw an application, to discontinue an ongoing program, to upload documents, to view Request for Information (RFI) notices, and/or to start a new application. It will also include additional functionality such as the ability to request an appeal or hearing, to request an EBT or Medicaid Card, to view claims or facts regarding disqualification, to view a TANF summary, and/or to submit a SNAP application. The applicant portal will provide role-based dashboards and will incorporate the user account creation process that is currently established in the MAGI Medicaid ONE system Applicant Portal.

Worker Portal (WP) – Worker Portal allows case workers to manage the lifecycle of an application or case by providing functionality to perform intake on new applications, to determine eligibility and benefit amounts based on the data provided during intake, and/or to disburse benefits and process case changes. It also contains modules for support-functions like

appointments, task management, hearings and appeals, and complaints to help the workers perform daily activities.

Eligibility Determination and Benefit Calculation (EDBC) – As the central repository for business rules defined by policy and administrative procedure, EDBC is the module where the Integrated ONE system determines each person's eligibility and benefit level based on the information collected through the worker or applicant portal and verification status of key data elements that affect eligibility (income, resources, citizenship, etc.) For Medicaid programs, eligibility determination is limited to financial eligibility for Medicaid. Service eligibility determination and authorization for Medicaid and other SSP case management services are not in scope for the initial implementation. For the purposes of determining financial eligibility, the eligibility rules engine will evaluate individuals and households through multiple modules to confirm their compliance with both state and federal program rules. All eligible individuals will be included in the benefit group which will be used to determine the benefit amount or ERDC days of care the individual may receive.

Correspondence – The correspondence module generates the notices required to support a case life cycle. Integrated ONE system generates the notices, which are automatically forwarded to the State's centralized print center for printing and mailing. Case Workers will have the ability to review the notices and determine the accuracy before these notices are mailed out as part of the nightly batch processing cycle.

Interfaces – Interfaces are a critical component of the Integrated ONE system. Interfaces are required to share data with federal agencies, other State agencies and systems, and Trusted Data Sources (TDS) to support critical business processes such as verification, fraud detection, federal reporting, benefit issuance, and recovery. The system will use both batch and real-time interfaces to meet the business needs.

Benefit Management – The Benefit Management module supports two key functions – benefit issuance and benefit recovery. The benefit issuance function allows for automatic benefit issuance through Electronic Benefit Transfer (EBT) cards, checks and direct deposit through Electronic Fund Transfer (EFT). The function also allows authorized users to issue benefits manually outside the constraints of eligibility, if necessary.

The Benefit Recovery function determines overpayments against issued benefits because of case changes. Overpayments are referred to the ICM (Claims Management) System for establishing and maintaining claims. A certain portion of the benefit amount is recouped from future benefits based on the outstanding claims amount received from ICM.

Reports – This module focuses on generating Operational, federal and State reports necessary for the administration of the APD and SSP programs. The operational reports are generated from key business processes that include:

- New Applications
- Reporting a Change
- Redeterminations
- Task Management
- Reports required for audits and quality assurance
- Interface Activity Reports

DRAFT

The above functionality will be provided in the new system by integrating components of several disparate systems identified below.

- Modified Adjusted Gross Income (MAGI) Medicaid. This program helps low-income people in Oregon with health insurance. MAGI medical benefits can cover working families, children, pregnant women, single adults, and more. This functionality is currently in the ONE system.
- Non-MAGI Medicaid. This includes Oregon Supplemental Income Program (OSIP) Medical, also known as the Aged, Blind, Disabled Medical or SSI based Medical programs, Medicare Savings Programs, and Refugee Medical. These services are currently processed in ORAccess, CM, and MMIS. Scope does not include Hospital Presumptive, Extended Medical, and the Breast and Cervical Cancer Program.
- Supplemental Nutrition Assistance Program (SNAP). This is a federally funded program which offers nutrition assistance to millions of eligible, low-income individuals and families. SNAP is the largest program in the domestic hunger safety net. Scope includes all services provided by SNAP other than the Summer Meals program.
- Temporary Assistance for Needy Families (TANF). This program provides cash assistance to low-income families with children while they strive to become self-sufficient. Cash assistance is intended to meet a family's basic needs such as food, shelter and utilities. Most cash benefits in Oregon are issued via an Electronic Benefit Transfer (EBT) card. This is also known as an Oregon Trail card. Scope does not include case management.
- Employment Related Day Care (ERDC). This is a child care subsidy program for working families.
- Temporary Assistance to Domestic Violence Survivors (TA-DVS). This program provides temporary financial help to support families whose safety is at risk due to domestic violence. Most often, this is when the domestic violence survivor and the children are fleeing domestic violence or at risk of retuning to an abusive situation.

4.2.2 High Level Non-Functional Requirements

High level non-functional requirements include the following:

Security – Provisioning of a secure system with corresponding authority to connect to the federal market place.

Reliability and Availability – The system must meet service level requirements for accessibility and up-time. Maintenance windows must be clearly communicated and be strictly adhered to.

Scalability – The system must scale to meet demand. As demographics change, it is anticipated that the preferred method of accessing services will also change. The system must accommodate this shift.

Performance – The system must meet performance specifications such that the user experience is acceptable with any method of interaction with the system.

DRAFT

Capacity – System design must accommodate the anticipated volume of cases end-to-end, including interactions with Legacy systems case management functionality.

Recoverability – The system must be recoverable within a reasonable Recovery Time Objective (RTO) with tolerable data loss specified with a Recovery Point Objective (RPO). RTO and RPO will be articulated as part of the Disaster Recovery and Business Continuity business case.

Serviceability – The system must be developed utilizing industry best practices and standard tools and methodologies to be easily maintained, including the application of patches, upgrades, and enhancements.

4.3 Alternatives Identification

In each iteration of this business case, the Project Team explored four alternative courses of action. With more than two years of activity and approximately $57 million invested to date on this Project, it is now approximately 35% complete, including over 90% of design completion. As such, not all the previously developed Alternatives make sense or are even possible. Current state Alternatives are now identified as follows:

Alternative #1: Implement Non-MAGI Medicaid Eligibility Determination into the ONE System
This Alternative is unchanged from prior business case versions and extends the current ONE system to support Non-MAGI Medicaid eligibility determinations and service authorization to community-based care programs only. This approach limits the scope of DHS and OHA programs that would be affected. It requires transfer of the Kentucky system, removal or disabling of the functionality in that system supporting programs like SNAP, TANF, and ERDC, and customization for Oregon's Non-MAGI Medicaid program.

Alternative #2: Implement Integrated Eligibility Determination into the ONE System

This Alternative is also unchanged from prior business case versions and represents the current course of action on this Project. This Alternative extends the current ONE system to support Non-MAGI Medicaid eligibility and SNAP, TANF, and ERDC determinations, as well as providing service authorizations for community-based care programs. This approach involves a wider range of DHS and OHA programs. It avoids the risk and expense of removing functionality for these programs from the Kentucky system. It requires potential customization of a larger number of Oregon programs than Alternative #1.

Alternative #3: Acquire External Eligibility Determination Services from another State

This is not a viable Alternative as there are no service models across the nation that support Oregon acquiring services in this manner.

Alternative #4: Do Nothing

This Alternative requires no additional investment in further development of the ONE system. However, resources with skills needed to deal with contract issues and federal audits would be needed. Improvements to current processes would be limited to those that arise naturally through DHS's continuous improvement program.

DRAFT

4.4 Alternatives Analysis

In each prior version of this business case, Alternative #2 - Implement Integrated Eligibility Determination into the ONE system, was selected as the best go-forward option. In this business case, Alternatives #1 and #4 are revisited and reviewed against the foundational assumptions and constraints. Consideration is given to the work performed to date in the realization of expected outcomes and factors such as cost, benefit, and risk identified with each alternative.

Alternative #1: Implement Non-MAGI Medicaid Eligibility Determination and Service Automation Only

Cost – The estimated total cost of implementing this Alternative was $80.3 million. (See estimate details in Business Case v1.1, Appendix D.) Compared to the Integrated Eligibility Alternative #2, this Alternative would have minimized the overall costs of Fit-Gap analysis, design, configuration, customization, testing, and training by removing scope for all components other than Non-MAGI Medicaid. Savings would be reduced by the cost of removing or disabling SNAP, TANF, and ERDC from the Kentucky system code. Nearly $60 million invested to-date for enhanced eligibility determination functionality would produce little or no value.

Benefits – This Alternative will achieve the high-level requirements associated with the Medicaid program. Clients seeking Non-MAGI Medicaid eligibility will be able to apply online and they will receive faster eligibility determinations. Non-MAGI Medicaid eligibility workers in APD and AAA offices will be more productive and make fewer eligibility determination errors. Problems associated with the handoff of cases between DHS and OHA will be reduced, if not eliminated.

Risk – This Alternative has the risks associated with large information technology projects involving complex requirements and a lengthy schedule. This Alternative will impose substantial policy and procedure changes on Non-MAGI Medicaid eligibility workers. The need to remove substantial components from an existing application adds some technical risk that is not present in the other alternatives. DHS workers will need to use two or more systems to provide some clients with basic case management. There is also significant risk in splitting APD cases from SNAP cases.

Alternative #2: Implement Integrated Eligibility Determination

Cost – The five-year total cost of ownership between August 2015 and June 2020 is estimated to be $334 million. (See Appendix C, Project Budget). This alternative includes the full cost of Fit-Gap analysis, design, configuration, customization, testing, and training for the SNAP, TANF, and ERDC programs. Also Non-MAGI Medicaid all modifications to 35 Legacy systems, and disaster recovery.

Benefits -

- Clients seeking Medicaid eligibility (either MAGI or Non-MAGI) and/or SNAP, TANF, and ERDC eligibility will be able to apply on-line.
- Clients applying for medical assistance and for one or more of SNAP, TANF, and ERDC will make a single application regardless of programs they are applying for.
- There will be fewer eligibility determination errors in and between the programs due to the single shared data source and integration between systems.
- Problems associated with the handoff of cases between OHA and DHS will be reduced or eliminated, as will problems with handoffs among APD/AAA offices and SSP offices.

DRAFT

- This approach allows for the retirement of the Caseworker Application Processing Interface (CAPI), and the Food Stamp Management Information System (FSMIS).

Risk - This project has the risks associated with large information technology projects involving complex requirements and a lengthy schedule. There are many stakeholders involved or impacted. New business processes will impose substantial policy and procedure changes on Non-MAGI Medicaid eligibility workers in APD/AAA offices and on SNAP, TANF, and ERDC eligibility workers in SSP offices. By eliminating antiquated information systems and reducing the scope of others, this approach reduces long-term risks that system failures will interrupt the delivery of DHS programs.

Project leadership is tracking several high probability/impact risks. They are summarized here:

- Focus on preferring policy and process change before technology change reduces technical risk but substantially increases the amount of process change that must be undertaken.
- Legacy subproject that includes modifications to 35 subsystems is still in design so is not yet fully understood.
- Data conversion mock runs have not yet begun so data quality is not yet fully understood.
- Data quality in Legacy systems might make it difficult to cleanse and populate data from Legacy into the new system.
- The Office of Information Services (OIS), which supports many affected Legacy information systems, may not have capacity to simultaneously participate in this Project, and support on-going operations, maintenance, and enhancement of Legacy systems that will remain after the ONE IE & ME project.
- The project's Technology Management Plan would impose security requirements on DHS and OHA's directory services that may not yet be supportable.
- There may be a lack of capacity for business leaders, track leads, and other Project staff to accommodate the volume of action items, change requests, and decisions required for the Project.

Alternative #3: Acquire External Eligibility Determination Services from another State

Cost, benefit, and risk are difficult to quantify given there is no existing model for obtaining services in this manner.

Alternative #4: Do Nothing

Cost – Spending for additional system functionality would stop but additional costs to shut down the Project would continue until all vendor contracts were terminated and all audits were conducted. There would be no value derived from the investment of approximately $300 million already made.

Benefits – There is no beneficial by-product from this Alternative.

Risk – It is estimated federal audits would take years and that federal program subsidization would come to a stop until audit findings were satisfactorily addressed by the State. There would also likely be significant dissatisfaction from all Project stakeholders, potentially resulting in not having another opportunity to fix current state problems into the foreseeable future.

DRAFT

5 Conclusions and Recommendations

5.1 Conclusions

Development of an Integrated Eligibility Determination system continues to be the leadership vision for Oregonians, DHS, OHA, and for eligibility workers and the prudent course of action, given the investment of time and resources to date. With the continuation of the OMB Circular A-87 cost allocation exception and the active support of our CMS and FNS partners, any action contrary to continuing with the Project will have significant negative consequences, as identified below.

The State of Oregon has an opportunity to continue expansion of the MAGI Medicaid eligibility system (ONE) as a stable base, utilizing code from the State of Kentucky system called *benefind*.

Much of the design of the new system, including Legacy design is complete. Given new contract Amendments with our SI and QA vendors, there is a solid scope, schedule, and budget to manage the Project to. There is also current work with Gartner to validate this schedule and budget against anticipated Project outcomes, scheduled for completion in February 2018.

The efficiencies gained in the field offices in serving Oregonians enrollment and eligibility needs for Medicaid, SNAP, TANF, and ERDC is undetermined during the first year of deployment. Factors such as the quality of data conversion and the readiness of eligibility workers will impact operations. However, data will be more reliable and checks and balances are being built into the system for accuracy and error reduction. It is in the best interest of the State of Oregon to continue the ONE IE & ME Project on its current course on behalf of all Oregonians.

5.2 Consequences of Failure to Act

There has been ongoing effort to modernize enrollment and eligibility programs. Both agencies in cooperation are dedicated to removing obstacles, incorporating lessons learned, and finding success for this project. DHS and OHA signed an MOU to solidify that understanding and to provide a foundation for success. All parties clearly understand that there is significant negative impact in failure or in doing nothing. This section lists those consequences.

1. Oregonians lose. We have a current system that doesn't serve Oregonians well. Medicaid financial eligibility is divided in delivery methodologies and access for Oregonians, SNAP, TANF, and ERDC benefits are not coordinated with Medicaid benefits. Oregonians expect better service from their State government.
2. CMS is continuing to fund the majority of the DDI work through December 31, 2018 for the ONE IE & ME project because non-MAGI is being added to the system that contains MAGI eligibility. Without non-MAGI eligibility CMS will not pay for the shared components and the State's portion would increase for SNAP, TANF, and ERDC functionality.
3. It is possible that the State of Oregon would not risk another project to provide this functionality into the foreseeable future. Changes at the federal level, and differing priorities amongst agencies and programs provide substantial risk in the future.
4. Continued reliance on dated Legacy systems and manual processes. Currently eligibility outside of ONE requires the workers to access seven different subsystems.
5. Loss of CMS/FNS confidence in the State of Oregon (potential impact on future funding).

DRAFT

6. Further loss of Oregon's reputation for being able to implement successful IT projects.
7. Potential contractual termination issues with current contracted entities including Deloitte, and Public Knowledge.
8. Negative impact to service delivery to Oregonians who rely on DHS and OHA for services;
    a. Service delivery times;
    b. Redundant processing requirements for customers and state staff;
    c. No decline in error rates;
    d. Possibility of overpayments or not getting timely benefits;
    e. No enhanced checks and balances between programs.
9. Impacts on the One system. Without bringing in the additional programs, there will continue to be data for individuals that doesn't match. This could result in a worker not acting on the most recent information for an individual, and not performing appropriate due process.
10. Loss of employment to both state and vendor staff.
11. Possible increased DHS and OHA operational costs.
12. There would be a loss of the investment already made in system development.

DRAFT

6 Appendixes and References

6.1 Appendix A – Project Scope

6.1.1 Design sessions revealed additional scope for this Project, such as Non-Citizen, other income types, Real+D, Mass Update triggers, and task management. Scope also includes financial eligibility determination for the following DHS and OHA programs:

DHS Self-Sufficiency Programs	**Type of Assistance (TOA)**	**Description**
Supplemental Nutrition Assistance Program (SNAP)	CTCE	Categorical Eligibility
	EXCE	Expanded Categorical Eligibility
	BBCE	Broad Based Categorical Eligibility
	SNAP	Supplemental Nutrition Assistance Program
	ESNP	Expedited SNAP
	DSNP	Disaster SNAP
	ABAWD	Able Bodied Adults without Dependents Requirements
	OFSET	Oregon Food Stamp Employment Transition Program
Temporary Assistance for Needy Families (TANF)	TANF	TANF
	EPPT	Employment Payments
	TDVS	TANF Domestic Violence
	TJPI	Jobs Participation Incentive
	PSSI	State Family Pre-SSI
	JOBS	Jobs Opportunities and Basic Skills Note - Only determination of JOBS mandatory individuals and assessment status, not ongoing case management
Child Care Program (CCPG)	ERDC	Employment-Related Day Care
	CCTN	Child Care Supportive Service for TANF Recipients
REF	REFG	Refugee program for individuals seeking Assistance and otherwise ineligible
Summer Meals	SEBTC	Summer Electronic Benefit Transfer for Children

DHS Aging and People with Disabilities (APD) Programs	**Type of Assistance (TOA)**	**Program Description**
Non-Modified Adjusted Gross Income (Non-MAGI) Medicaid	QMB-BAS	Qualified Medicare Beneficiaries – Basic
	QMB-SMB	Qualified Medicare Beneficiaries - Special Limited Medicare Beneficiaries
	OSIPM-SSI	Oregon Supplemental Income Program Medical - Supplemental Security Income

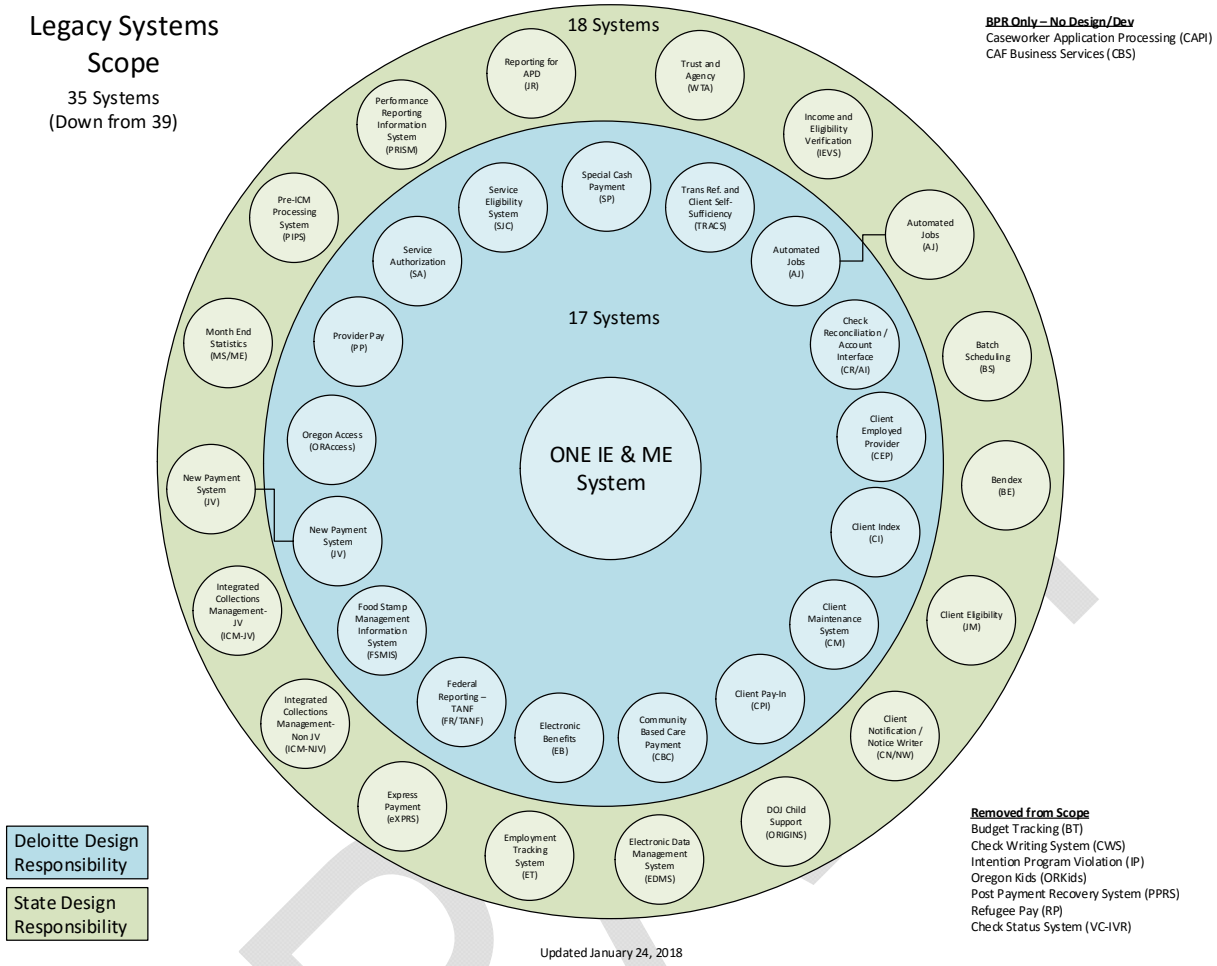
DRAFT

	OSIPM-1619B	Oregon Supplemental Income Program Medical - 1619B
	OSIPM-Survivor Widows	Oregon Supplemental Income Program Medical - Survivor Widows
	DAC	Disabled Adult Children
	Pickle	Pickle Amendment Clients
	OSIPM-AB	Oregon Supplemental Income Program Medical - Aid to the Blind
	OSIPM-OAA	Oregon Supplemental Income Program Medical - Old Age Assistance
	OSIPM-AD	Oregon Supplemental Income Program Medical - Aid to the Disabled
	OSIPM-Acute Care	Oregon Supplemental Income Program Medical - Acute Care
	OSIPM-EPD without Services	Oregon Supplemental Income Program Medical - Employed Persons with Disabilities not receiving services
	OSIPM-EPD with Services	Oregon Supplemental Income Program Medical - Employed Persons with Disabilities receiving services
	QMB-DW	Qualified Medicare Beneficiaries - Disabled Worker
	Special Needs	Special Needs
	QMB-SMF	Qualified Medicare Beneficiaries - Qualified Individuals
	Services - LTC/Waiver	Services – Long Term Care or Waiver
	OSIPM-IC	Oregon Supplemental Income Program Medical - Independent Choices program
	REF	Refugee Medical Program

OHA Programs	**Type of Assistance (TOA)**	**Program Description**
Modified Adjusted Gross Income (MAGI) Medicaid	ADLT	Oregon Health Plan (OHP) Plus Adult
	CHIP	OHP Plus CHIP
	CHL1	OHP Plus Child under age 1, under 185%
	CHL4	OHP Plus Child, age 1 through 18, under 133%
	EMAD	Citizen Alien Waived Emergent Medical (CAWEM) Adult
	EMC1	CAWEM Child under age 1, under 185%
	EMC4	CAWEM Child age 1 through 18
	EMPC	CAWEM Parent or other Caretaker Relative

	EMPP	CAWEM Plus Pregnant Parent or other Caretaker Relative
	EMPR	CAWEM Plus Pregnant Woman
	EMPW	CAWEM Pregnant Woman
	FFCC	OHP Plus Former Foster Care Youth
	HIA1	Hospitalized Adult inmate
	HIA2	Hospitalized Pregnant Woman inmate
	PACA	OHP Plus Parent or Other Caretaker Relative
	PCPR	OHP Plus Pregnant Parent or Other Caretaker Relative
	PREG	OHP Plus Pregnant Woman
	TP45	OHP Plus Assumed Eligible Newborn

6.1.2 **Legacy Systems Scope**



There are 35 of the original 39 systems remaining as in scope for the Legacy subproject. 17 of these systems are now in scope for the SI to document the design, with the state to conduct all development, testing, and deployment. These 17 systems are identified in the following table.

1. Automated Jobs (AJ)
2. Community Based Payment (CBC)
3. Client Employed Provider (CEP)
4. Client Index (CI)
5. Client Maintenance System (CM)
6. Client Pay-in (CPI)
7. Check Reconcile/Acct. Interface (CR/AI)
8. Electronic Benefits (EB)
9. Food Stamps (FSMIS)
10. JV (New Payment Systems)
11. ORAccess (OA)
12. Provider Pay (PP)
13. Service Authorization (SA)
14. Service Eligibility System (SJC)
15. Special Cash Payment (SP)
16. Federal Reporting-TANF (FR/TANF)
17. Trans. Ref. & Client Self-Sufficiency (TRACS)

18 Systems are in-scope that the state is responsible for design documentation, development, testing, and deployment.

1. Bendex (BE)
2. Batch Scheduling (BS)
3. Client Notice Writer (CN/NW)
4. Dept. of Justice (DOJ) Child Support (ORIGINS)
5. Electronic Data Management System (EDMS)
6. Express Payment and Reporting System (eXPRS)
7. Integrated Collections Management (ICM)--INBOUND/OUTBOUND FROM IE (NON-JV)
8. Integrated Collections Management (ICM)--INBOUND FROM JV
9. Unearned Income Verification (IEVS/SX/SSA)
10. Client Eligibility (JM)
11. Month-End Statistics (MS/ME)
12. Pre ICM Processing System (PIPS)
13. Trust and Agency (WTA)
14. Reporting for APD (JR)
15. Performance Reporting Information System (PRISM)
16. Employment Tracking System (ET)
17. Automated Jobs (AJ)
18. New Payment System (JV)

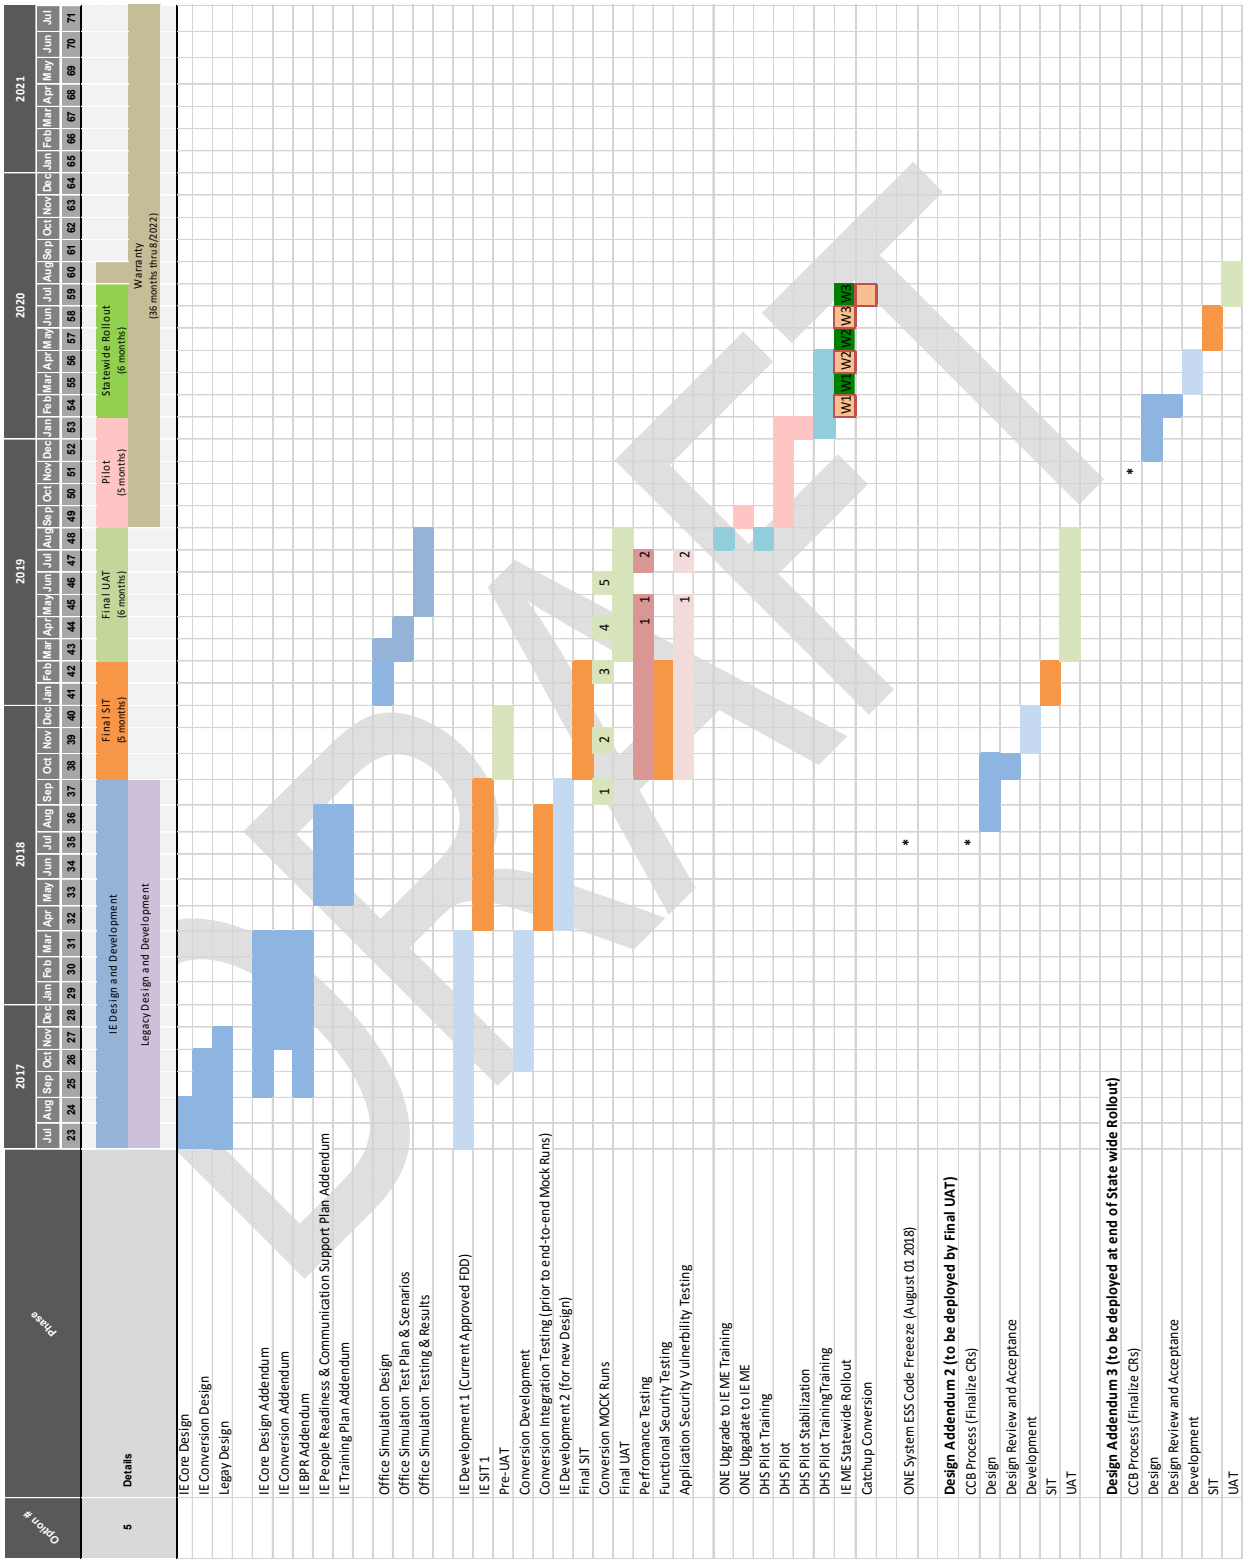
Appendix B – Project Schedule

The project timeline has been updated from previous submissions. As Oregon explored work through the iterative design sessions, it became apparent that we needed a shift in our operational model. A decision was made to delegate all Medicaid eligibility determination work to DHS. As OHA and DHS further engaged with the design and explored opportunities and lessons learned from the initial ONE implementation and other States' experience, Oregon updated the schedule. Additional time for pilot, testing, and the wave roll-outs were added to the schedule. Oregon also procured Deloitte to assist with the Legacy Design work with the intent of insuring that Oregon's OIS understands the total scope of work needed and to avoid issues that other States experienced with their projects. As this work continues, Oregon may adjust our project schedule to ensure that we are accounting for all of the opportunities we need to consider in ensuring a quality product is delivered and ultimate accountability to our federal partners and Oregonians is met. As you can see, the Design phase will be followed by two iterative development phases, and then system implementation supporting a ONE System upgrade to an integrated ONE System, a DHS production pilot (Production Pilot) and three implementation waves.

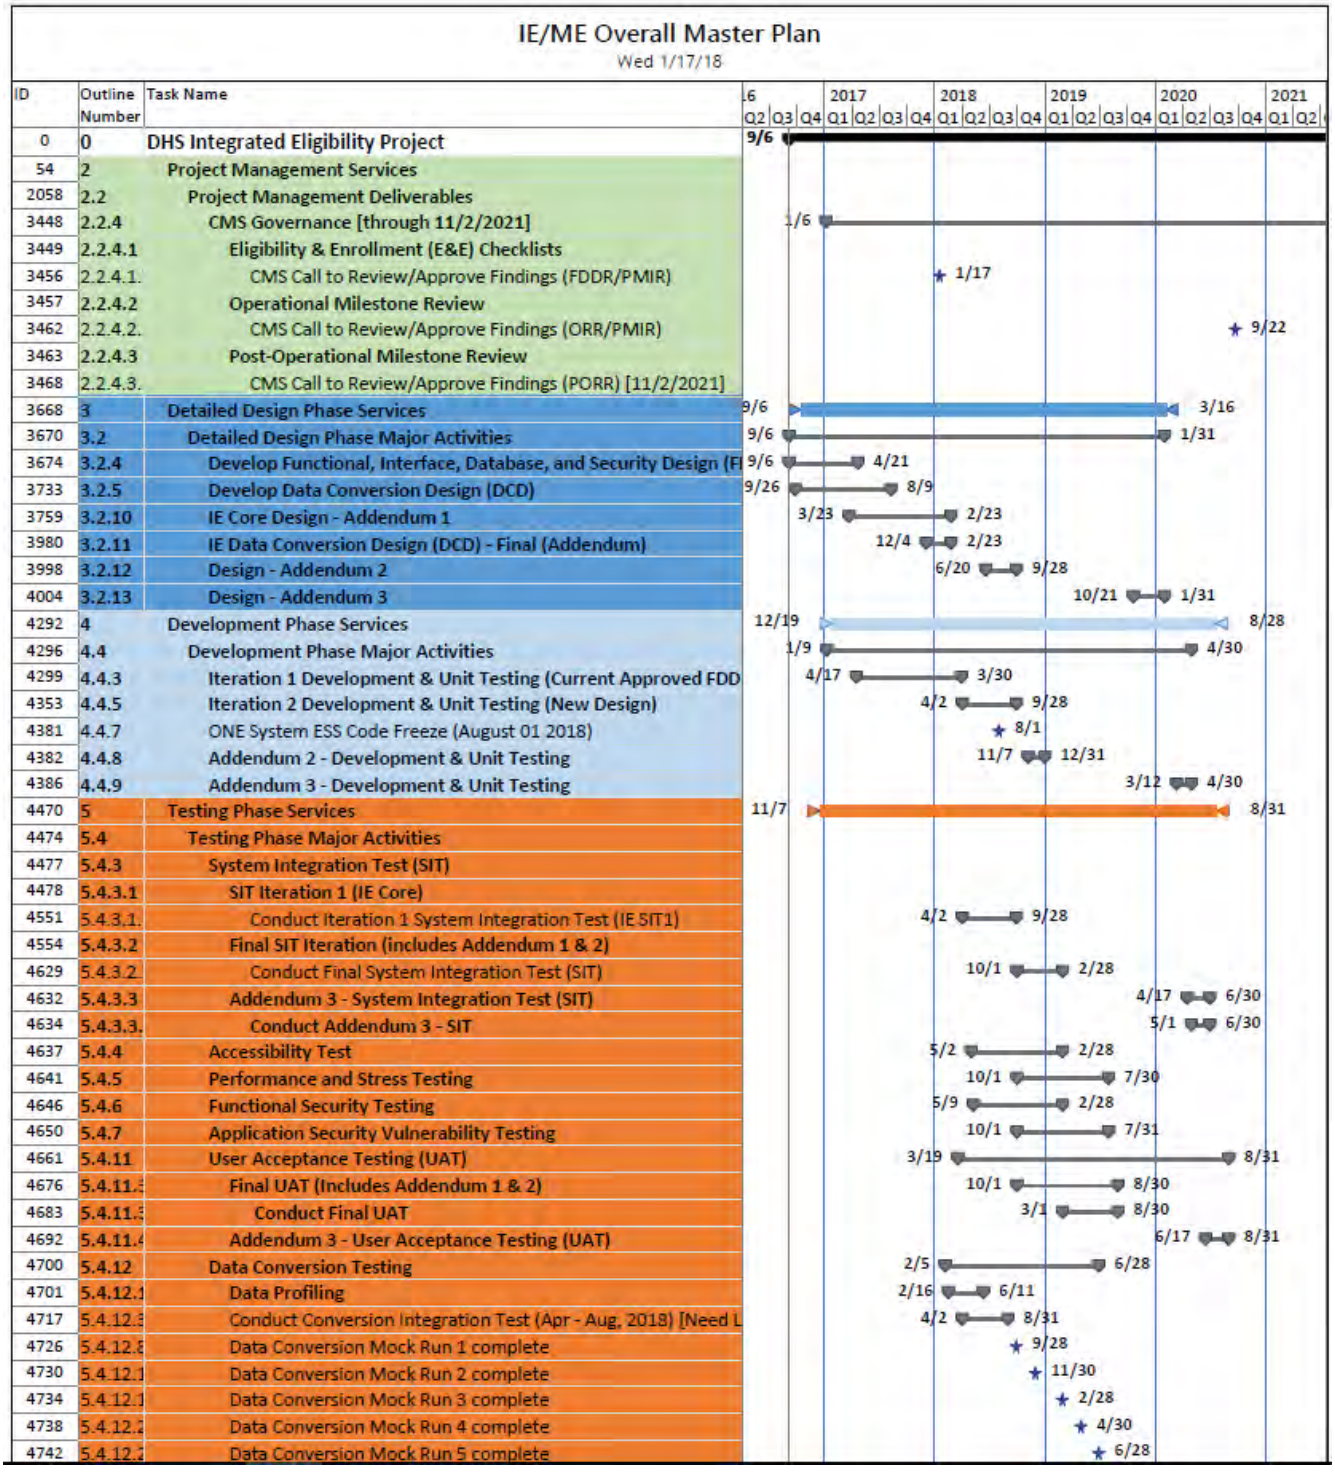
The Project's two iterations will enable:

- Oregon's business needs to be met by changes to the application,
- Underlying COTS software components to be upgraded to State approved versions, and
- ONE functionality to be preserved to avoid service disruption to Oregonian's receiving services for MAGI Medicaid.

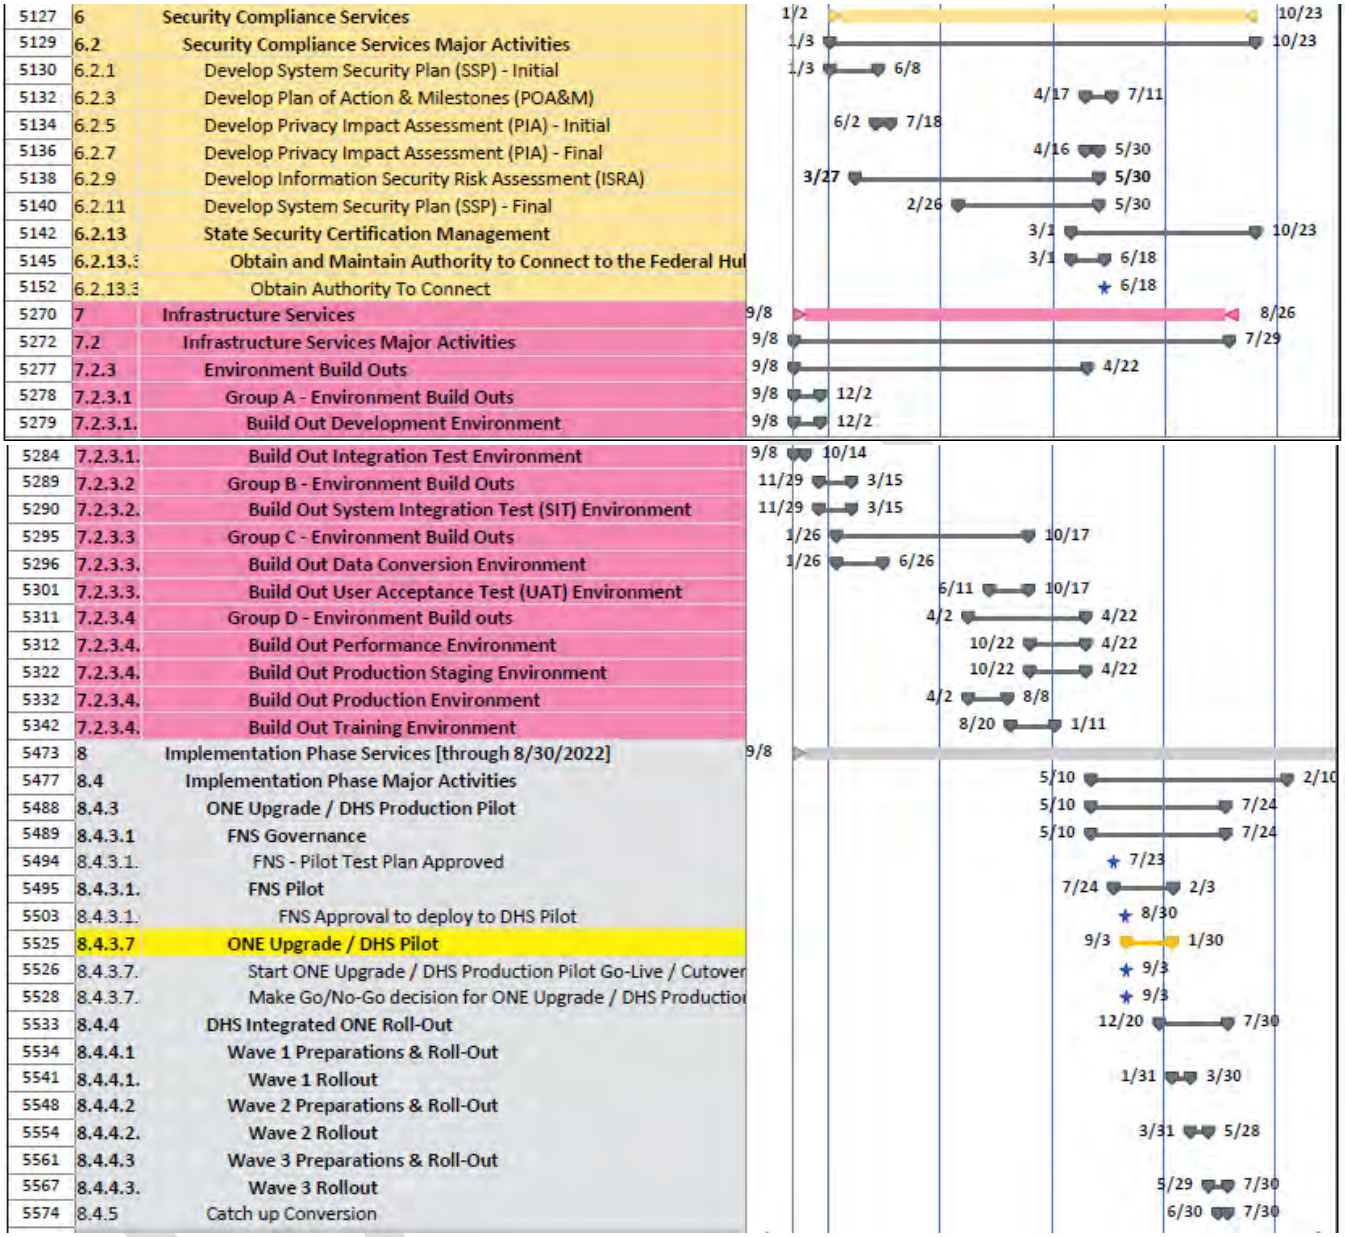


Each iteration will be followed by Contractor testing and validation testing by the State. At the completion of the development phase, the State will have at least six months dedicated to User Acceptance Testing (UAT) (increased from four months with Amendment #4).

Once DHS issues a notice-to-proceed the Project will then transition to the implementation phase which includes:



- Upgrading the current OHA MAGI Medicaid ONE System with integrated ONE System
- A minimum of five-month Production Pilot (increased from three months with Amendment #4), and
- Three geographically appropriate waves (for the 150 field offices)



DRAFT

The following chart lays out a high-level schedule for the project.

Legacy High Level Design Timeline

* Timeline is intended as high-level overview only. Schedule detail including specific start and end dates for each activity is in the Integrated Project Schedule (IPS).

DRAFT

6.2 Appendix C – Project Budget

This budget reflects changes to scope and schedule reflected in the SI and QA contract Amendments. Approximately 1 year was added to the schedule to provide a more realistic timeline for completion of activities such as data conversion, SIT and UAT testing, wave roll-outs with corresponding stabilization periods, design addendums, and Model Office simulation. Approximately one-half of the Legacy design work was shifted from internal State staff to the SI, increasing these costs by $66 million. The QA contract also increased approximately $4 million to accommodate the longer project duration and to incorporate ONE ESS and Legacy design and development into their QA work.

6.6 Appendix G – Kentucky System Components

Key application components in the *kynect/benefind* system for integrated eligibility determination are described in the following table.

Title	Description
Worker Portal	Module used by the State Agency workers to collect individual/family information to process SNAP, TANF, and/or Medicaid applications. Individuals can apply for one or more programs in a single application, and the module has a capability to interactively ask questions during the interview process based on the programs applied. Throughout the interview process, the modules call interfaces to verify information, as needed.
Eligibility Determination (Rules engine)	Rules base eligibility determination module to determine eligibility for main program and the sub programs to provide best possible benefits for the applicants. For example, when an individual applies for Medicaid, the rules engine cascade down through the Medicaid program hierarchy to provide best Medicaid coverage for the individual.
Benefit Issuance	This module manages daily or monthly issuances for SNAP/TANF/ERDC programs that are issued to individuals/vendors to support initial, monthly or supplemental payments.
Benefit Recovery	This module provides end to end management of SNAP, TANF, ERDC claims. It computes discrepancy, establish claim and start recoupment either through the benefit reduction process or other processes such as tax intercept.
Correspondence	This module manages generation of consolidated correspondences that are issued to the applicants and other stakeholders like vendors.
Task Management	A comprehensive task management module that supports key business processes. The module allows management of human services case management functions as a coordinated set of tasks.
Quality Assurance and Quality Control (QA/QC)	Module to create Random/Targeted sample universes for worker to review SNAP, TANF and Medicaid cases
Hearing/Appeals	Implements end-to-end work flows to support the hearings and appeal process. This module is also integrated with task management module.
Business Intelligence/Management Reports	This module implements operational reports, analytical reports and provides the framework and infrastructure required for several adhoc reporting needs.
Authentication and Identity proofing service	System for authorization and authentication services for users requesting access to various modules of the system.

DRAFT

Title	Description
Document Management Services	Implements electronic case files functionalities where all documents submitted to the agency are indexed and filed for easy access.
Mobile and Tablet Application	Mobile app with full application features for citizens, community partners (application assisters) to apply for health coverage
Self Service Portal for Human Service programs	Self Service Portal for citizens to apply for SNAP, TANF and Medicaid programs.
Medicaid Waiver Management Application (MWMA)	A complete waiver workflow management module to determine eligibility for Medicaid waiver programs and enrollment into waiver services.
Master Client Index module (MCI)	Master client index module which uniquely identifies citizens. It also provides a 360-degree view of citizen enrolled in public assistance program(s).
Interfaces	Implements all required State & Federal Interfaces. Interfaces module also implements an integration framework that supports several integration patterns.
Medicaid Managed Care Enrollment Management	Module for auto assignment and management of Medicaid enrollees in managed care plans (MCOs)

DRAFT

6.7 Appendix H – Kentucky to Oregon Functionality Comparison

As evident in the tables below, the programs are similar in their overall business requirements.

Supplemental Nutrition Assistance Program

Program Eligibility Comparison for Supplemental Nutrition Assistance Program

Eligibility Criterion	Kentucky Supplemental Nutrition Assistance Program	Oregon Supplemental Nutrition Assistance Program
Family Composition and Residency	• Recipients must live in Kentucky • Recipients must be U.S. citizens or certain legal foreign residents of the United States • A household is any person, family or group of people who live and buy and eat food together • The following people must be included in one household account, regardless of whether they purchase and prepare meals separately: o A spouse of any household member o Parents living with their natural, adopted or stepchildren who are age 21 or younger o Children younger than 18 who are dependents of an adult household member	• Recipients must live in Oregon; does not require intent to remain to establish residency • Recipients must be U.S. citizens or certain legal foreign residents of the United States • Filing group consists of members of a household group who choose to apply together or customarily purchase and prepare meals together • The following people must be included in one household account, regardless of whether they purchase and prepare meals separately: o A spouse of any household member o Parents living with their children who are under the age of 22 o Children younger than 18 who are financially dependent of an adult household member
Income	• Less than 130% of FPL for most households; 165% for elderly/disabled	• Less than 185% of 2015 FPL
Resources	• A household may have no more than $2,000 in assets OR $3,250 if a member of the household is 60 or older • Cash and bank accounts are counted; the dwelling, its contents and personal belongings, and vehicles are excluded	**Non-Categorically eligible households** • Have a resource limit of no more than $2,250 in resources OR $3,250 if a member of the household is 60 or older or disabled • Checking accounts, saving accounts, cash on hand, stocks and bonds, equity in vehicles, real property, etc., are counted. **Categorically eligible households** • Have a resource limit of $25,000 in liquid assets (checking accounts, savings accounts, cash on hand)
Employment	• Anyone in a household who is 16 to 60 years old and can work must register for, look for, and accept work. There are some exceptions to this requirement.	**OFSET (Employment and Training)** • Clients deemed mandatory because they do not meet an exemption must participate in a jobs activity for an eight week period every 12 months • Must accept bona fide offers of employment, even if it's part-time

DRAFT

Eligibility Criterion	Kentucky Supplemental Nutrition Assistance Program	Oregon Supplemental Nutrition Assistance Program
		ABAWDS (Abled Bodied Adults without Dependents) • Only applicable in Multnomah and Washington counties, as the rest of the state is under a waiver • Requires those aged 18-49 without a filing group member under the age of 18, who do not meet an exemption, to participate a minimum of 20 hours a week, an average of 80 hours a month of special work requirements
Benefits	• Benefits are issued on an Electronic Benefit Transfer (EBT) card • The benefit amount depends on income and household size. • Benefits may be used to purchase almost any food item, except ready-to-eat hot foods • Benefits may be used to buy seeds and plants to grow fruits and vegetables • Benefits may not be used to buy tobacco, alcohol, pet food, soap and other household products, medicines, and other non-food items	• Benefits are issued on an Electronic Benefit Transfer (EBT) card • The benefit amount depends on income, household size and minus any applicable deductions • Benefits may be used to purchase almost any food item with a nutrition label, except ready-to-eat hot foods • Benefits may be used to buy seeds and plants to grow fruits and vegetables • Benefits may not be used to buy tobacco, alcohol, pet food, soap and other household products, medicines, and other non-food items • There is a cash out program in Multnomah, Washington, Columbia and Clackamas Counties for seniors and people with disabilities
Certification Periods	• Varying lengths of certification periods depending on household characteristics • Periodic reports required at least once every six months, except for elderly or disabled (12 months)	• Varying lengths of certification periods depending on household characteristics • Periodic reports required at least once every six months, except for elderly or disabled (12 months)
Deductions	• Utilizes Standard Utility Allowance (SUA) instead of actual utility costs. • Students are ineligible unless working 20 or more hours per week or have a child under age 6 or are a single parent of a child under age 12 and going to school full time • Must meet with a worker or do interview over the phone. Must be able to provide identification, social security numbers for everyone applying, proof of who lives in your home (can be written statement), proof that you live in Kentucky, proof of child care costs or child support paid, proof of living expenses, and proof of money you have received in the past 60 days, including pay stubs.	• Utilizes Standard Utility Allowance (SUA) instead of actual utility costs • Students aged 18 to 49 attending a higher education program that requires a diploma or GED at least half time must meet additional special criteria • Must meet with a worker or do interview over the phone. Must be able to provide identification, social security numbers for everyone applying, verification of income for recent representative month, and for non-citizens proof of lawful immigrant status of each household member seeking benefits

DRAFT

Eligibility Criterion	Kentucky Supplemental Nutrition Assistance Program	Oregon Supplemental Nutrition Assistance Program
Other	• For ineligible non-citizens, income and deductions are prorated for both groups, which includes counting all income and deductions, or a prorated share. As well as, counting none of the income and deductions (with the allotment capped at the level that an all-eligible household would get), or a prorated share. • May disqualify applicants or recipients who fail to perform actions required by other means-tested program, primarily TANF.	• For ineligible non-citizens, income and deductions are prorated for both groups, which includes counting all income and deductions, or a prorated share. As well as, counting none of the income and deductions (with the allotment capped at the level that an all-eligible household would get), or a prorated share. • May disqualify applicants or recipients who fail to perform actions required by other means-tested program, primarily TANF.

Temporary Assistance for Needy Families

Program Eligibility Comparison for Temporary Assistance for Needy Families

Eligibility Criterion	Kentucky Temporary Assistance for Needy Families	Oregon Temporary Assistance for Needy Families
Family Composition and Residency	• Recipient must be a US citizen • Family must have a child under 18 living in the home OR Pregnant woman must be within one month of her due date • Children must be citizens or have eligible alien status • Children must be 18 years old or younger OR Children must be full time student with expected graduation date before age 20	• Recipient must be a US citizen or have qualified non-citizen status (may be waived temporarily if domestic violence is a factor) • Family must reside in Oregon • Family must have a caretaker relative and a child under 18 living in the home OR Pregnant woman must be within one month of her due date (may be earlier if domestic violence is a factor) • Caretaker relative must meet certain blood, adoption, marriage relationship requirements • Children must be citizens or have qualified non-citizen status • Children must be under 18 years old OR 18 years old and a full-time student in HS or GED • Until March 2016, a child must be deprived of parental support due to continued absence, incapacity, or under/unemployment
Income	• Your family must earn less than a certain amount of money per month	• To qualify for TANF, families must have very few assets and little or no income. • Your family must earn less than a certain amount of money per month
Resources	• Countable assets must be $2,000 or less and licensed vehicles needed for individual's subject to the work requirement may not exceed $8,500	• Countable assets must be $2,500 or less for applicants, for individuals in sanction status, and for families with no caretaker relative in the need group • Countable assets must be $10,000 or less for all other recipients • Exclude up to $10,000 equity value of all motor vehicles; remaining equity counts toward asset limit • Applicants and recipients must pursue alternative assets available to them • Applicants and recipients must assign their support rights to, and cooperate with, child support

DRAFT

Eligibility Criterion	Kentucky Temporary Assistance for Needy Families	Oregon Temporary Assistance for Needy Families
Employment	• Adults in families receiving cash assistance must work or participate in work related activities for a specified number of hours per week depending on the number of work-eligible adults in the family and the age of children	• Adults in families receiving cash assistance must work or participate in work-related activities for a specified number of hours per week depending on the number of work-eligible adults in the family, the age of children, and the family situation • Caretaker relatives must not be separated from their most recent employment due to discharge without good cause, or due to voluntarily quitting without good cause • Needy caretaker relatives must complete an employability screening
Benefits	• The current maximum monthly benefit for a family of 3 with a monthly gross income of $974, is $262	• The current maximum monthly benefit for a family of three is $506.
Certification Limits	• A family may receive benefits for no more than 60 total months. The 60 months needs not be consecutive	• Eligibility must be recertified every 6 months for families who have an open JOBS plan and are not participating or an active JOBS disqualification OR Eligibility must be recertified every 12 months • Recertification may be done earlier if deemed necessary by the case manager or to align with SNAP benefits • Heads of household may receive benefits for no more than 60 total months. The 60 months need not be consecutive. There are hardship exemptions that can stop the clock or extend benefits beyond 60 months. Children are not subject to the time limit.
Other	• Recipient must have a social security number	• Recipient must have a social security number

DRAFT

Employment-Related Day Care

Program Eligibility Comparison for Employment-Related Day Care

Eligibility Criterion	Kentucky Child Care Assistance Program	Oregon Employment-Related Day Care Program
Family Composition and Residency	• Recipient must be resident of KY • Child must be a U.S. citizen or a qualified alien • Child must be under 13 or be 13-19 and physically or mentally incapable of self-care • Recipient must be parent by blood, by marriage, or by adoption, or recipient must be the legal guardian or standing *in loco parentis* in relationship to child	• Recipient must be a resident of OR • Child must be a U.S. citizen or qualified non-citizen (includes non-citizens who are at risk for, or currently the victim of domestic violence, and victims of severe trafficking) • Child must be under 12 or be 12-17 and receiving care due to special circumstances and needs • Recipient must be a parent or caretaker who has care, control, and supervision of the dependent child (not required to be a relative)
Income	• Less than 150% of 2011 FPL (On-line calculator considers earned income, net child support, social security, TANF, and "other sources")	• (At initial certification) Less than 185% of 2015 FPL (Application asks for all sources) • (On-going and at recertification) Less than 250% of FPL and less than 85% of the state median income
Resources	• No requirement	• No requirement
Employment	• Must be employed and average at least 20 hours per week for a single parent or average 40 total hours per week for a couple OR A teen parent attending high school or pursuing a GED OR Participating in the Kentucky Works Program OR Have a child protective or preventive services authorization	• Must be employed (no minimum number of hours) and if a couple, both must work and schedules must overlap (unless one parent cannot provide care due to a verified medical condition) Oregon does not cover teen parents attending high school or pursuing a GED, participants in an Oregon employment program, or parents who have children in protective or preventive services authorizations.
Benefit	• The program pays the provider's bill—less a copay—up to a maximum rate that depends on the age(s) of the child and the provider type • Recipient pays a copay that depends on income plus any part of the provider's rate that exceeds the maximum rate	• The program pays the provider's bill—less a copay--up to a maximum rate that depends on the age(s) of the child, provider type, location, and special care needs • Recipient pays a copay that depends on family size and income plus any part of the provider's rate that exceeds the maximum rate
Other	• Must use a provider that is licensed, certified, and registered	• Must use a provider that meets DHS requirements (includes licensed and licensed exempt providers)

DRAFT

6.8 Appendix I – Alignment with Strategic Technology Plan

The table below summarizes the various components of the STP that an integrated eligibility system will satisfy.

Comprehensive View of Clients	o Supports use of a master client record o Single location for verified client data (e.g. financial, eligibility, benefit etc.) o Facilitate future view of an integrated case and payments through integration with legacy case management and payment systems
Trusted Sources for Health & Human Service Data	o Reduce data duplication and entry into multiple systems through single application for various programs. o Reduce data inconsistencies and inaccuracies through workflow automation o Trusted source for verified client data (e.g. financial, eligibility, benefit etc.) o Improve data access and data share across programs through integration with other DHS systems. o Role based data access and security improves data protection and compliance. o Consistent and accurate data reporting and analysis o Field-level audit and reporting capabilities
Business Automation	o Automated workflows using task queues inside the Worker Portal o Automated decision making and business rules using the business rules engine o Reduced manual and paper based processes o Real time determination of eligibility and benefit amount o Automated verification of client information o Interface with legacy systems
Connectivity Anytime, Anywhere, in Multiple Ways	o Applicant and worker portal allows real-time, 24/7 access to application, eligibility, and benefit information. o Clients can apply, update information, report change in circumstances, and communicate with their assigned case workers through multiple channels. o Multiple device and browser agnostic capability supports connectivity from anywhere
Dynamic Needs Supported by Seamless Services	o Industry best practices and standards based modular architecture and design (e.g., Service Oriented Architecture (SOA), Enterprise Service Bus (ESB) etc.) enables to leverage existing functionality and also expose functionality through web services

DRAFT

6.10 Appendix J – Responsibilities

Agency and Contractor responsibilities as identified in the SI SOW #2, Amendment #4, are grouped by category below.

Project Area	Agency Responsibilities	Contractor Responsibilities
Planning & Project Management	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.1 of this SOW #2 • State-designated Project Director, in consultation with DHS leadership and the Contractor's Engagement Manager, will have overall responsibility and authority for driving all Project decisions; reviewing and approving all Deliverables; facilitating discussion and communication among the parties as needed; and securing any required State or third-party resources • Manage Joint Agency Governance Structure for ONE/Integrated ONE system (including vendor management structure)	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.1 of this SOW #2 • Engagement Manager, in consultation with Contractor leadership and State Project Director, will have overall responsibility and authority for driving all Contractor decisions; facilitating discussion and communication among the parties as needed; and securing any required Contractor resources. Meet on an agreed upon frequency with key stakeholders to review project performance and resolve issues between the Contractor and the State

Amendment 4
DASPS-1439-16

Page 95 of 122

Project Area	Agency Responsibilities	Contractor Responsibilities
	• Subject matter specialists assigned to the Project will have the necessary time commitments to attend meetings, workshops and other Tasks. DHS and OHA personnel will have the role and authority to represent their various functions, and they will also be responsible to speak for, approve on behalf of, and communicate to and from their respective business units for the Tasks defined in SOW #2 • Allocate State resources based on work streams, as defined in the IPS, to allow multiple concurrent sessions to occur during SOW#2. Based on the current high-level timeline outlined in Appendix A, up to three concurrent work streams may be actively engaged at a point in time during the SOW #2 • Contribute to development and management of the IPS: o Identify State-owned tasks and work with the PMO to finalize relevant attributes required for each task o Collaborate with Contractor on understanding Contractor tasks and their attributes in the IPS, integrate timing between State-owned and Contractor tasks o Report progress on State-owned tasks weekly per the processes and cadence in the IMPF o Work collaboratively to identify corrective actions for slippages while reducing impact upon go-live dates • Manage and share schedule for work with implementation dependencies (i.e. legacy design and development). • Complete assigned tasks in the approved IPS in accordance with the baseline finish dates • Analyze Project risks and issues and work with the Contractor to approve issue resolutions and risk mitigations. Communicate risk and issue status discussed at the Executive Steering Committee meetings in consultation with the Contractor • Review and approve the proposed Deliverable Expectation Documents (DEDs) and Deliverable documents, consistent with the Project Management Plan	• Participate as requested in Joint Agency Governance Structure for ONE/Integrated ONE system • Contractor personnel assigned to the Project will have the appropriate experience, availability and skills to perform their function(s) • Follow established onboarding and off boarding processes, complete required privacy and security training; comply with building and server access and use rules • Allocate Contractor resources based on work streams to allow multiple (up to three) concurrent sessions to occur during SOW#2. Propose meeting schedule that takes into consideration the number of concurrent meetings due to State resource availability during the preparation period of the SOW #2 • Develop the IPS by: o Identify Contractor-owned tasks and work with the PMO to finalize relevant attributes required for each task o Collaborate with State on understanding State tasks, managed by the State and their finalization in the IPS; integrate timing between Contractor and State-owned tasks o Reporting progress on Contractor-owned tasks weekly per the processes and cadence in the IMPF o Work collaboratively to identify corrective actions for slippages while reducing impact upon go-live dates • Complete assigned tasks in the approved IPS in accordance with the baseline finish dates • Identify and help mitigate risks and issues related to the Project (scope, schedule, resources), using the agreed-upon Project processes • Prepare a Deliverable Expectation Document (DED) and submit for

Project Area	Agency Responsibilities	Contractor Responsibilities
	• For each deliverable, participate in working sessions to provide input on deliverable content, provide direction, and vet content as it is being development • Analyze and approve proposed Project scope of work changes. Approve Change Orders and operational procedure changes • Coordinate the necessary State and federal reviews and assessments • If there is a conflict among the governing regulations regarding a specific standard, State will provide the statutory interpretation to resolve the perceived conflict to Contractor • Provide 24/7 access to facilities, servers, and environments for Contractor's Project team. This is subject to the planned maintenance and downtime necessary for servers and environments. Sufficient system and network access will be provided for a minimum number (##) Contractor resources • Maintain Project SharePoint as central document repository • Use PMC in accordance with processes documented in the approved PMFP • Follow Project management and quality management processes as defined in PMFP • Consult with the Contractor on quality improvement measures and determination of areas to be reviewed • Provide notice to the Contractor of inadequate performance; request, review, approve, and monitor proposed corrective actions taken by the Contractor • Protect any Confidential Information, including that of citizens and employees (e.g. limit the amount of data provided to Contractor, use secure channels or ways of sharing data, protect data that resides within the State's operating and IT environments). DHS/OHA will provide Contractor with access to conversion data on a State-provided network device. The State will not knowingly provide PHI, PII or FTI data, except as provided for data conversion activities at Contractor's request and as requested in writing by the Contractor's Project Manager	Acceptance from the State for the content and format of each Deliverable at least two weeks before beginning significant work on the Deliverable as per the dates in the approved IPS (or Section 3 until the IPS Acceptance occurs). • Prepare proposed Project scope of work changes, initiate Change Orders, and recommend operational procedure changes • Participate in State and federal reviews and assessments, as necessary • If there is a conflict among the governing regulations regarding a specific standard, Contractor shall identify perceived conflict and will seek guidance from Agency • Contractor is also responsible for ensuring that personnel use reasonable efforts to maintain property • Submit formal Project documentation to the State SharePoint domain, with access provided to Contractor and State staff. Access restrictions may apply to some documentation such as folders containing security, financial or contract information. All documentation restrictions shall be approved by the State Project Director prior to loading of documents on the SharePoint • Maintain PMC for Project • Implement and maintain Project management and quality management processes as defined in PMFP • Consult with the State on quality improvement measures and determination of areas to be reviewed • When provided notice by Agency of inadequate performance, Contractor will identify, submit for Acceptance, and implement proposed corrective actions to be taken by the Contractor • Handle any Confidential Information to which Contractor has access, in

Project Area	Agency Responsibilities	Contractor Responsibilities
		accordance with the terms of the Contract
Detailed Design Phase	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.2 of this SOW #2 • Actively participate in functional and technical design sessions based upon detailed schedules • Support development of design specifications with functional and technical SMEs that are familiar with legacy systems • Based upon approved design specifications, develop technical design for legacy side of interfaces, legacy application changes, and conversion extract routines	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.2 of this SOW #2 • Schedule and lead functional and technical design sessions with State SMEs • Develop design specifications that describe interfaces (including file formats) and conversions (including file formats) • Support State technical resources in developing technical designs for legacy side of interfaces, legacy application changes, and conversion extract routines
Development	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.3 of this SOW #2 • Review and provide inputs to the Application Development Plan • Provide inputs to functional clarifications and decisions raised during the course of Application Development • Develop interface components per design specified in the Interface Design Control Document (ICD) associated with connecting legacy systems and coordinate with interfacing agencies as defined in Appendix B of this SOW #2. • Provide files generated per the specifications of the interface components in accordance with Accepted design, for integration during development phase. • Provide data extraction files based upon Accepted Data Conversion Plan. • State will provide sample legacy data extracts with confidential information removed or masked for data quality assessment purposes • State SMEs will confirm data models, data definitions and provide available data dictionary documentation for source systems • Perform purification/cleansing of data required for conversion in legacy systems	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.3 of this SOW #2 • Develop the Application Development Plan • Develop the System in accordance with the Accepted Functional Design Document and proactively raise necessary clarifications to the State business and technology teams as applicable. • Recommend specifications for interfaces between the Integrated ONE system and in-scope legacy systems • Execute validation routines against conversion extracts and provide reports of data that fails validations • Advise State in defining data extract criteria for each legacy system • Assist with obfuscation protocols if needed • Advise State in conducting purification/cleansing of data in legacy systems required for conversion • Assist State by implementing Accepted conversion software (Deliverable 2.3.3) to support legacy data conversion and cleansing

Project Area	Agency Responsibilities	Contractor Responsibilities
	• Develop daily extracts to support interim conversion process based on the Accepted Data Conversion Design or addendum. • Process the flagging files generated post conversion to update information in the legacy source systems per the Accepted Legacy Data Conversion Design Deliverable or addendum.	• Generate flagging files post conversion run to indicate successful conversion • Develop conversion routines to support the interim conversion process • Perform calculations, modifications, or sorting required to further identify and extract data from the State-provided data files to support phased rollout, including 'other related individuals' tied to converted data.
Testing	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.4 of this SOW #2 • Participate in mock conversions by providing extracts, reviewing error reports, and validating converted data • Participate in security testing of IAM COTS products and support determination of recommendations and execution of corrective actions resulting from security tests • Coordinate with stakeholders that are participating in test activities to connect their system test and User Acceptance test environments with the Integrated ONE system test and User Acceptance Test Environments, respectively. • Document its test plan, including tests cases based upon the Accepted design and execute Pre- and User Acceptance Testing per the current Accepted schedule in IPS • Plan review sessions, conduct review of test plans SIT test plans, and test cases in accordance to the timeline defined in the current Accepted IPS • Participate in performance, stress/load, security, and end-to-end system integration test activities as defined in the applicable Accepted test plans • Review System Integration Test results and prioritize items for remediation or determine risk acceptance • Review in accordance with the Acceptance provisions the Test Plan(s) and other Testing Phase Deliverables • Schedule, coordinate, and manage IV&V independent testing to support alignment with	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.4 of this SOW #2 • Conduct security testing of IAM COTS products • Provide Agency and Agency partners that are participating in System test activities with access to relevant Test Environment(s) and coordinate testing schedule in support of data exchange. Test Plan and Test Cases as documented in relevant Deliverables will also be made available as additional references • Conduct and complete, in accordance with Agency accepted Test Plans, the performance, stress/load, security, and end-to-end system Integration Tests • Conduct test plan review sessions and finalize the test cases • Conduct testing activities defined in the Accepted test plans and report Test results for QA review • Update the RTM Deliverable to reflect refinements identified during system integration Testing that are mutually determined by the parties to be necessary to exit system integration test • Provide Defect triage, reporting, and the necessary application development support to the State in Pre-UAT and User Acceptance Testing as specified in Section 2.4 of the SOW • Participate in IV&V independent testing by preparing the system, provisioning tester access, and reviewing test results

Project Area	Agency Responsibilities	Contractor Responsibilities
	the approved design and adherence to approved IPS go-live dates	
Security	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.5 of this SOW #2 • State, DHS and supporting agencies will participate in work sessions and review sessions for the system Security Plan (SSP), Privacy Impact Assessment (PIA), Plan of Action & Milestones (POA&M) and Information Security Risk Assessment (ISRA) documents and assign owners, develop work plans, and resource estimates to address gaps that are identified. DHS will review and approve final CMS SSP and POA&M to CMS • Obtain required training on the Security related COTS products (CA IAM suite, QRadar, DataPower and Optim) from product vendor or another Vendor • Hardening server and desktop operating systems and network devices for the Integrated ONE system including patch management and perform penetration testing of the hosted infrastructure according to standards that align with those listed in NIST Vulnerability Security Configuration Standards as required for CMS security requirements • Lead the communication with CMS related to the review of security artifacts as part of the ATC process • Obtain and configure Secure Socket Layer (SSL) certificates on the Integrated ONE system infrastructure • Provide input to the Application Configuration Management Plan and Technology Management Plan deliverables for infrastructure security components of the DHS solution (e.g. Firewalls, Intrusion Detection/Intrusion Prevention systems, Anti-Virus, etc.) • Develop agreements with Federal Data Services Hub (FDSH) including the Interconnection Security Agreement (ISA), Business Associate Agreements (BAA's), Memorandums of Understanding (MoU's), Data Exchange Agreement (DEA), and Computer Matching Agreement (CMA) • Create or modify security and privacy policies and/or procedures for the State, with the	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.5 of this SOW #2 • Develop the system Security Plan, Plan of Action & Milestones), Privacy Impact Assessment, and Information Security Risk Assessment in accordance with CMS MARS-E 2.0 requirements. Prepare an initial SSP and a Final SSP and POA&M (which includes the input from SAR, ISRA, and PIA) in preparation of sending to State Acceptance for CMS submission • Provide suggestions for potential vendors, if required • Provide compliance requirements for operating systems and standards for infrastructure hardening components based upon CMS/NIST configuration standards • Provide security support for the artifacts as required • Provide server information for supporting the request for SSL certificates • Develop the Application Configuration Management Plan and Technology Management Plan • Provide input as required from the SSP documentation for the ISA and data agreements for the Integrated ONE system • Address questions related to the security requirements as required • Participate in the security sessions to review questions and direction from CMS and the State that impact the CMS SSP and security related artifacts as required for ATC • Collaborate with independent vendor hired to conduct independent security testing by preparing for and supporting test execution

Project Area	Agency Responsibilities	Contractor Responsibilities
	exception of operational procedures for security products installed by Contractor • Conduct review sessions with CMS and State Security Information Security Officer (CISO) • Hire an independent vendor to conduct independent security testing per relevant federal and State requirements • Hire an Independent third-party vendor to be responsible for completing the Security Assessment Report (SAR) • Maintain and operate DHS security products other than the CA IAM products and associated supporting components • Submit quarterly updates of the POAM, and annual updates of the ISRA and PIA, following obtainment of Authority to Connect for the Integrated ONE system	• Provide information needed to support the third party security assessments as required by CMS and FNS. • Maintain and operate CA IAM • Provide information for security gaps assigned to the Contractor for responsibility for remediation identified on the POAM • Perform design, configuration, testing and integration of security COTS products (e.g., CA IAM, QRadar, DataPower, Optim) with the Integrated ONE system components • Design, build test and deploy in-scope application security roles • Perform application vulnerability and application security code testing for the Integrated ONE system and provide support for tracking of open application vulnerabilities and support for remediation
Infrastructure	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.6 of this SOW #2 • State will be responsible for acquisition and configuration of servers and operating software needed to stand-up new environments for the Integrated ONE system based upon the approved Technology Management Plan and Contractor Specifications • The State will coordinate the timing of hardware acquisition and environment preparation with the Contractor • Provide access to Contractor in order to enable the hardware and software necessary to use the Integrated ONE systems environments • Implement firewall rules and network access control list modifications to accommodate the flow of network traffic for the security products to function to address business and regulatory requirements • Maintain the Hardware and Software at the SDC including OS-level, and software licensing, and patches for such as maintained by State (for example, Active Directory, DataPower, etc.) • Plan, install and verify OS patches, security system patches, and hardware related upgrades	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.6 of this SOW #2 • Contractor will be responsible for installation and configuration of database, application, and COTS software into new environments • The contractor will participate with State in the coordination of the timing and availability of new environments • Contractor will send State requests for access to the Integrated ONE system environments with reasonable prior notice • Document infrastructure gaps to be addressed to support the flow of network traffic for the security products based upon business and regulatory requirements • Maintain the COTS products and patches in collaboration with State for products identified in the Accepted Technology Management Plan • Plan, install and verify COTS mutually agreed upon patches and upgrades

Project Area	Agency Responsibilities	Contractor Responsibilities
	required to maintain ETS standards including existing ONE system environments, VDI infrastructure, and end user desktops • Agency will work with Contractor to reasonably schedule downtime for system maintenance and will provide prompt notification of emergency unplanned maintenance • Provision compute and network capacity for development machines (VDI) as defined in the Accepted Technology Management Plan to enable onsite and offsite team members' daily activities with reasonable hardware/virtual machine performance • Collaborate with State ETS and Contractor to configure and monitor server backups and conduct server recovery tests	required to maintain vendor support without impacting the approved IPS • Work with Agency to reasonably accommodate requested downtime for scheduled maintenance • Create and submit Deliverables as per approved timeline and DEDs • Collaborate with State and provide inputs regarding performance of development machines (VDI) and document the finalized capacity requirements in Technology Management Plan. • Conduct application and COTS validation after successful recovery of servers
Business Operations Implementation	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.7.1 of this SOW #2 • Provide leadership direction, input and session participants necessary to support the development, execution, evaluation, and Acceptance of the Business Operations Implementation Services plans • Make cross-program operational and policy SMEs available for to-be process model working sessions. SMEs will have detailed knowledge of current business processes and preferences for the proposed business processes for the Integrated ONE system • State leadership will be closely involved to confirm key decisions made and help assess and accept their impact on the current system and business operations • Revise and publish policy changes as required to align with approved system and process designs • Leadership will communicate any modifications to future DHS vision, including timing and schedule modifications • Identify resources for business operations implementation services deliverables so that they align with the on-going work of the DHS Business Transition Team responsible for integration of OHA to DHS operations • Responsible for communicating in a timely manner any decisions regarding integration of	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.7.1 of this SOW #2 • Lead business transition planning tasks • Discuss Integrated ONE program policies and operational practices, and help document key transition items • Review and notify the state of any inconsistencies on Policy draft alignment with System design • Coordinate with functional team to communicate potential design impacts as a result of business process redesign

Project Area	Agency Responsibilities	Contractor Responsibilities
	OHA operations into DHS operations including timing of activities • Responsible for integrating current OHA eligibility center operations to DHS operations • Provide operational performance data including baseline data for SSP, APD/AAA offices to support Business Operations Implementation services activities	
People Readiness	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.7.2 of this SOW #2 • Collaborate with the Contractor People Readiness team to plan the people transition to Integrated ONE by providing input into and approval of the People Readiness and Communications Support Plan (PR&CSP) deliverable. • Collaborate with the Contractor People Readiness team to provide input into the ongoing quarterly updates of the PR&CSP • Lead the people readiness activities, per the strategy defined in the People Readiness and Communications Support Plan • Identify stakeholders with knowledge and availability to execute the people readiness activities, per the strategy defined in the People Readiness and Communication Support Plan • Develop and maintain primary responsibility for executing an Integrated ONE system Communications Plan • Provide guidance and requested information (demographics, facilities, technical, current skills) as input to Training Plan • Support development of training material based upon the approved Training Plan and identify resources for any review or dry-runs of content under development • Provide support for determination of training data • Identify and staff sufficient trainers to receive train-the-trainer training • Conduct sufficient instructor lead training deliveries to support the approved IPS • Provide Learning Management System (LMS) or other training materials storage and delivery	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.7.2 of this SOW #2 • Lead development of the People Readiness and Communications Support plan deliverable • Collaborate with the State People Readiness team to provide quarterly updates of the PR&CSP • Collaborate with the State by attending events and meetings where People Readiness activities are occurring • Collaborate with the State People Readiness Team on the execution of the people readiness activities, such as providing feedback on State People Readiness materials • Develop Training Plan, describing the approach, the curriculum (including description, durations, delivery method, audience, and learning objectives of each course); includes train-the-trainer approach and roles and responsibilities for training material development and training delivery; materials to be provided from the Integrated ONE perspective and designed to be incorporated into State's comprehensive training that combines information technology, policy, and practice • Develop training material based upon the approved Training Plan and schedule reviews or dry-runs of content under development o Coordinate the identification and population of training data • Leverage State designated storage and delivery mechanisms for training

Project Area	Agency Responsibilities	Contractor Responsibilities
	mechanism and any system requirements needed for coordinated development • Provide Train-the-trainer and End User Training scheduling tools; manage registration for TTT and End User Training class delivery; train Contractor resources on provided tools; and monitor and confirm WBT training compliance • Participate in a pilot of the Training program prior to Train-the-trainer launch • Provide the necessary facilities, network access, printed materials and tools to support Train-the-trainer and End User Training sessions • Deliver end user training based upon the approved IPS and communicate feedback on training results and issues • Provide and prepare 1 business process and policy SME for each class during Train-the-trainer and end user training sessions • Collaborate with the Contractor People Readiness team in the development of the Phased Rollout Support Plan deliverable • Provide access to accurate and timely data on headcount in each of the on-site support offices for planning and deployment • Deploy State resources to support the delivery of on-site support 4 weeks after Pilot and for each go-live, per Contractor and State agreed upon support resources and timeframes • Collaborate and Coordinate with the Contractor People Readiness Team to prepare resources to provide onsite support	materials and web-based training content • Leverage provided Train-the-trainer scheduling tool to schedule Train-the-trainer sessions • Deliver a pilot of the train-the-trainer program to designated State trainers, prior to UAT as per the Accepted Training Plan Deliverable. • Deliver Train-the-trainer training to designated State trainers, prior to Pilot go live as per the Accepted Training Plan Deliverable. • Provide feedback to the State regarding document training delivery logistics checklist, which defines requirements on facilities, printed materials, and tools • Collaborate with State to address issues related to the training environment and questions about the training materials during End User Training • Provide TTT reference materials and conduct a review session to prepare State business process and policy SMEs who will participate in training delivery • Lead the development of the Phased Rollout Support Plan deliverable. Collaborate with the State Business Transition Team to plan on-site support needs prior to, during and immediately after go-live • Deploy Contractor resources to support the delivery of on-site support for the duration of the Pilot and 4 weeks after go-live for each wave, per Contractor and State agreed upon support resources and timeframes. The following number of contractors will be deployed: o Pilot + ONE Upgrade: up to 11 o Wave 1: up to 31 o Wave 2: up to 33 o Wave 3: up to 26

Project Area	Agency Responsibilities	Contractor Responsibilities
		• Prepare State and Contractor resources in the activities to be performed at each site
System Implementation	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.7.3 of this SOW #2 • Establish criteria for go/no-go implementation decisions and make go/no-go implementation decisions as appropriate • Provide resources to support the development of cutover plan • Provide resource to support the approved cutover plan • Provide a Command Center Manager with the authority to make decision while the Command Center is effective	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.7.3 of this SOW #2 • Participate in and make recommendations as input into go/no-go decisions • Develop cutover plan in collaboration with State • Lead execution of cutover based upon approved cutover plan • Provide leadership presence onsite for command center meetings.

Table 4: Responsibilities

Parking Lot

Integrated ONE System Functionality includes:

- Workflow automation inside the Worker Portal
- Automated business rules using Corticon Rules Engine – including real time eligibility determination to support the Applicant Portal
- Automated notice generation using HP ExStream
- Address validation service using Melissa Data
- Automated verification interfaces with the Federal Data Services Hub, the state Medicaid Enrollment System (MMIS), and the Oregon Employment Department
- Automated Bi-Directional Account Transfer with the FFM & Minimum Essential Coverage check for Medicaid benefits
- Integration with the existing document management service provided by DHS Imaging and Records Management System
- Integration of Computer Associates Identity & Access Management Solution to provide single sign-on integration with OHA's Active Directory

3.6.2 Key Performance Indicators: Measures of Business Success

The following Key Performance Measures are routinely collected by DHS's Performance Excellence Office. Implementation of a new Integrated Eligibility system is expected to "move the needle" on these indicators in the desirable direction:

- Customer Satisfaction: % of DHS Customers that rank the quality of DHS Service as good or excellent
- Employee Engagement: % of DHS staff that report medium-high or high level of engagement
- Accuracy:
    - % of SNAP PER QC reviews for SSP branch offices where accuracy measures 95% or better
    - % of TANF QC reviews for SSP branch offices where accuracy measures 95% or better
    - % of ERDC QC reviews for SSP branch offices where accuracy measures 95% or better
    - % of APD QC and QA reviews for APD branch offices where accuracy measures 95% or better
- Timeliness:
    - % of new SNAP Expedited and Non-Expedited applications meeting processing timelines
    - % of new SNAP Benefits issued within 0-1 days
    - % of APD cases with a redetermination date that is current or less than 1 month overdue compared to the total cases with a review date

3.6.3 Measures of Project Success and Completion

Project Success Measures:

•

• Project is completed on time in comparison to the latest approved baseline schedule.
• The last approved baseline schedule does not deviate by more than 10% from the schedule projected at Stage Gate 3.

DRAFT

• Project is completed within budget in comparison to the latest approved baseline budget.
• The latest approved baseline budget does not deviate by more than 10% from the budget projected at Stage Gate 3.
• The system satisfies all of the requirements in the Requirements Traceability Matrix at Stage Gate 3 as subsequently modified through the project's change management criteria.
• At the close of the warranty period, there are no Critical or Major defects remaining and the ratio of Minor defects remaining to the size of the system is below industry averages.

Project Completion Criteria
The project will be complete when all of the following are true:
• System has been in production through a six-month warranty period
• All contracted work has been completed and accepted, and final payments have been made to all vendors
• The Office of the State Chief Information Officer and the Legislative Fiscal Office have approved the project's Stage Gate 4 submission
• A steward for Operations and Maintenance is identified and has formally accepted handoff of the system
• The position responsible for post-project monitoring and reporting on measures of success has been identified and its occupant has formally accepted the handoff
• Final reports required by funders of the system, if any, have been delivered and accepted
• Project documentation has been assembled and archived consistent with agency and state records retention policies

PROBLEM STATEMENT ***(Identify problem, opportunity, or mandate [legislative, Federal, etc.]. Include summary statement of business process(es) and stakeholders affected.)***

Background

Oregonians do not currently have the ability to apply for Non-Modified Adjusted Gross Income (Non-MAGI) Medicaid through a self-service portal via an on-line application. Additionally, while individuals currently may utilize an on-line application for Oregon's Supplemental Nutritional Assistance Program (SNAP) or with manual process supplementation for Temporary Assistance to Needy Families (TANF) or Employment Related Day Care (ERDC), the systems supporting the application does not link to a benefit authorization system. Department of Human Services (DHS) eligibility workers must engage in manual application processing activities, with little to no automation. Changes to regulations from federal agencies present challenges for eligibility workers when applying those regulations to each applicant's unique situation.

Oregon Department of Human Services seeks to reduce manual processing and reduce the reliance on legacy systems in support of Non-MAGI Medicaid, SNAP,TANF and ERDC eligibility determinations. The purpose of this project is to assess possible alternatives for the automation of eligibility processing, determine and develop the legacy system interface requirements to reduce or eliminate manual input, and provide a web-based front-end applicant portal to support customer self-service for at-minimum, Non-MAGI Medicaid, and potentially other human service programs (i.e., SNAP, TANF, Employment Related Day Care).

Opportunity Definition

The Oregon Health Authority (OHA), the state's designated Medicaid agency, has recently implemented a new system for MAGI Medicaid eligibility determinations. That system is called Oreg**one**ligibility, or ONE, and is the result of transferring the State of Kentucky's Affordable Care Act compliant state-based marketplace solution (*kynect*) for use in Oregon.

In late 2015, Kentucky rolled out an extension to the system that OHA has transferred to Oregon. That extension supports eligibility determinations for the following programs:

- Supplemental Nutrition Assistance Program (SNAP)
- Temporary Assistance to Need Families (TANF)
- Medicaid Waiver Management Applications
- Child Care

Given CMS direction that it will only provide enhanced funding match for extending the ONE system, the time is clearly right to consider extending ONE to support Non-MAGI Medicaid eligibility determinations and eligibility determinations for other DHS Human Service programs too.

The high-level business objectives driving this effort are:

- Allowing applicants to apply for benefits on-line, reducing the need to travel to local offices and reducing the need to provide duplicate information when applying for benefits from more than one program
- Automating manual processes in order to:
    - Reduce the amount of time that elapses between completing an application and making an eligibility determination
    - Reduce the amount of time that staff must spend creating, reviewing, and acting on each application
    - Reduce the rates of errors in making eligibility determinations
- Allowing for seamless sharing of information and transfer of cases among program staff

On August 10, 2011, three federal agencies (Centers for Medicare and Medicaid Services (CMS), Food and Nutrition Services (FNS) and the Administration for Children & Families (ACF)) announced a time-limited, specific exception to the cost allocation requirements set forth in Office of Management and Budget (OMB) Circular A-87. These provisions generally require the costs associated with building shared state-based information technology systems to be allocated across all benefitting programs. The exception reflected a federal focus on streamlining enrollment in health and human services programs while leveraging funding efficiencies at the state-level. On July 20, 2015, the three agencies extended the exception for an additional 3 years, through December 31, 2018, and provided additional guidance on how states may take advantage of it to leverage these investments to better serve consumers' multiple programs and needs.

AGENCY ANALYSIS ***(Identify alternatives considered and significant reasons for the alternative chosen. Include summary of agency analysis related to cost/benefit, feasibility, risk assessment, impacts on current environment, and other relevant business factors.)***

The CMS policy to fund only a single financial eligibility system per state and the fact that Medicaid Title XIX will provide 90 percent of the funds needed for the system means that Oregon's only viable alternative to the status quo must include enhancement of the ONE system to support Non-MAGI Medicaid eligibility determinations. DHS has explored four possible courses of action, including continuing in the current state. These are the alternatives:

Alternative #1: Implement Non-MAGI Medicaid Eligibility Determination into the ONE System
Under this alternative, the ONE system would be extended to support Non-MAGI Medicaid eligibility determinations and service authorization to community-based care programs only. This approach limits the scope of DHS programs that would be affected. It requires transfer of the Kentucky system, removal or disabling of the functionality in that system supporting

programs like SNAP and TANF, and customization for Oregon's Non-MAGI Medicaid program. This approach would use 90/10 federal funding.

Alternative #2: Implement Integrated Eligibility Determination into the ONE System
Under this alternative, the ONE system would be extended to support Non-MAGI Medicaid eligibility determinations and SNAP, TANF, and ERDC determinations, as well as service authorizations for community-based care programs. This approach involves a wider range of DHS programs. It avoids the risk and expense of removing functionality for these programs from the Kentucky system. It requires potential customization for a larger number of Oregon programs. This alternative could be rolled out all at once or it could be phased-in program-by-program. This approach would use Medicaid 90/10 federal funding to the benefit of other programs, which would only have to fund parts of the solution that were benefitting those programs exclusively.

Alternative #3: Acquire External Eligibility Determination Services from another State
Just like Alternative #1, this alternative would extend ONE to support Non-MAGI Medicaid eligibility determinations only. Like Alternative #2, it would support eligibility determinations for the SNAP, TANF, and ERDC programs. However unlike Alternative #2, that support would be outside of ONE. In this alternative, DHS would contract with another state to support SNAP, TANF, and ERDC eligibility decisions. At a minimum, that would involve modifying the partner state's system for those programs to accept applications from Oregonians and make eligibility determinations based on Oregon's rules. Limiting factors include lack of integration of Non-MAGI Medicaid program eligibility with MAGI program eligibility and recording of Oregon-specific MAGI, CHIP, and CAWEM rules. The project team was unable to identify a state where this approach is being used. Therefore, cost estimates for this alternative were unattainable.

Alternative #4: Do Nothing
Under this alternative, there would be no additional investment in the ONE system and no acquisition of eligibility services from another state. Improvements to current processes would be limited to those that arise naturally through the DHS's continuous improvement program. This alternative means losing the opportunity for enhanced federal funding to improve IT systems and thus results in greater cost in state funding for future enhancements.

Section 4 of the attached business case describes the costs, benefits, and risks of each of the alternatives. They are summarized here:

Cost, Benefits, and Risks Summary

Alternative	Project Cost	Program Benefits from Project	Overall Risk
1. Implement Non-MAGI Medicaid Eligibility Determinations	~$80.3M	Medicaid	Low
2. Implement Integrated Eligibility Determinations	~$126.1M	Medicaid, SNAP, TANF, ERDC	Medium
3. Acquire Eligibility Determination Services from Another State	Unknown	Medicaid, SNAP, TANF, ERDC	High
4. Do nothing	~$4.0M		High

Based on that analysis, DHS intends to pursue Alternative #2, Implement Integrated Eligibility Determination. This means extending the ONE system by transferring, configuring, and customizing Kentucky's Non-MAGI Medicaid, SNAP, TANF, and ERDC eligibility system to Oregon.

PROJECT SUMMARY ***(Provide summary narrative of the current project. Include summary statement of work, community/stakeholder impact, enterprise implications and opportunities, and alignment with the*** **State of Oregon Enterprise Information Technology Strategy** ***and published enterprise architecture and standards.)***

Section 5 of the business case sets out a tentative schedule that would implement the expanded, integrated eligibility determination system in mid-2018. These are the key project milestones.

Schedule Milestone v1.2	**Expected Date**
Stage Gate 2 Approval	December 2015
Independent Quality Assurance Vendor Under Contract	December 2015
Stage Gate 3 Approval	February 2016
System Integrator Under Contract/Fit-Gap Analysis Begins	March 2016
Fit-Gap Analysis Complete; Design/Development Begins	July 2016
Re-Baseline Based on Fit-Gap Findings	August 2016
Design and Development Iteration #1 Complete	April 2017
Design and Development Iteration #2 Complete	July 2017
Design and Development Iteration #3 Complete	November 2017
End-to-End User Acceptance and Regression Testing Complete	May 2018
Pilot Implementation Begins	July 2018
Roll Out Begins	September 2018
Stage Gate 4 Approval	June 2019
Project Complete	June 2019

Schedule Milestone v2.0 Re-Baseline	Expected Date
Project Planning Begins	July 2015
Stage Gate 1 & 2 Submission	December 2015
Stage Gates 1 & 2 Approval; Federal Advance Planning Document Approval	February 2016
System Integrator under Contract; Fit-Gap Analysis Begins	April 2016
Stage Gate 3 Submission	July 2016
Stage Gate 3 Approval, LFO Approval, Federal Approval of DDI SOW	September, 2016
Design Phase (Core)	September 2016 - March 2018
Iteration #1 Development & SIT Phase	April 2017 – September 2018
Iteration #2 Development & SIT Phase	April 2018- March 2019
End-to-End User Acceptance Testing Prep & Execution	October 2018- August 2019
OHA Upgrade & Production Pilot Period	September 2019-December 2019
Phase Implementation (3 waves)	February 2020 - July 2020
Roll Out Complete	August 2020
Stage Gate 4 Approval; Project Complete	January 2021
Warranty Complete	August 2022

These are the principal stakeholders:

- ***Oregonians applying for Non-MAGI Medicaid, SNAP, TANF and ERDC benefits***
- ***DHS Aging and People with Disabilities (APD) Field Offices*** statewide & ***Area Agencies on Aging (AAA)*** which are typically county-chartered organizations and under contract with the department. Collectively they deliver DHS's Non-MAGI Medicaid program including making initial and ongoing financial eligibility determinations for people over the age of 65 and people with disabilities who need assistance.
- ***DHS Self-Sufficiency Program (SSP) Field Offices*** which deliver DHS' SNAP/TANF/ERDC eligibility determinations
- ***Federal Partners, including Centers for Medicare and Medicaid Services, Food and Nutrition Services, Administration for Children and Families***

The proposed solution will be fully consistent with state and department IT architecture and standards.

Does this project conform to program and information technology related statutes, administrative rules, executive orders, and statewide policies? ✓ Yes ☐ No ☐ Don't Know
If not, please provide justification: _____

BUDGET IMPACT ***(Provide summary narrative of the budget and resource implications of this project, as well as its relevance to the core mission of the agency.)***

The preliminary estimate of the cost to implement the system in mid-2018 and operate it through June of 2019 is $126.1 million. Details and assumptions behind that estimate can be found in the attached business case.

Most of the cost will be eligible for a 90 percent federal match. Other portions will be eligible for a 50 percent match. The total state share will not exceed 20 percent.

A more detailed budget estimate will be developed as part of preparing for Stage Gate 3 review. That work will include establishing a precise expectation about the state share of the total cost.

Update February, 2018 v2.0 Re-Baseline:
The total Project one-time costs are estimated to be $344.3 million (July 2015-July 2020). This estimate includes the design, development, and implementation of the ONE IE & ME systems, the legacy systems work, the disaster recovery sub-project, all personal services (salary and benefits), IT professional services, hardware and software costs, hosting services, and training. Stage Gate 3 foundational documents have been updated and uploaded to OSCIO's enterprise Project and Portfolio Management (PPM) system such as an updated Business Case, v 3.0.

IRR COMPLETION PROCESS

At the commencement of an information technology-related project, agency prepares form, business case and any supporting documentation required.

Agency obtains Agency Business Owner and Agency Technology Manager signatures or e-mail approvals.

Agency sends IRR, business case and any supporting documentation to:

Department of Administrative Services
Chief Information Office
155 Cottage Street NE (4th Floor)
Salem, OR 97301

or by e-mail to: **IT_Investment.Review@das.state.or.us**

DAS will review and provide analysis related to completeness of the IRR and business case based on the context of the Information Technology Review/Approval Policy and potential enterprise applications and impact on enterprise programs.

If form is complete, IRR and accompanying analysis is forwarded to the State CIO for approval

OR

If form is not complete, documentation is returned to Agency with explanation.

After documentation is approved, the IRR is returned to the Agency with DAS Control Number.

Agency forwards approved IRR with procurement documents to Dept. of Justice and DAS State Procurement Office

Total Project Cost or Purchase Price:	Agency-Provided Supporting Documentation	Approval required
≥ $150,000	**Conform with Information Technology Investment Review/Approval Policy** **Information Resource Request** **Business Case** **Any additional supporting documentation**	State CIO
NOTE:	**Some projects may require Independent Quality Assurance Reviews as per the Technology Investment Strategy Development And Quality Assurance Reviews Policy Circumstances may include the following:** **Those projects that are required by legislative action or executive mandate to have independent reviews, and information technology projects that meet three of the following criteria, shall provide for an independent quality assurance review.** **The system, application or infrastructure affected by the project is considered mission critical by the affected agency or DAS.** **The project schedule exceeds one year in duration.** **The project scope includes changes or enhancements to systems, applications or infrastructure managed or maintained by more than one state agency or government entity.** **The complexity of the project is deemed medium or higher using the Department of Human Services, Business and Technical Assessment (Exhibit A) or similar tool that has been approved by DAS.** **The total project costs are estimated to be greater than $1,000,000.**	State CIO

Business Case for Medicaid Modularity Planning

Executive Summary

The OHA Office of Information Services (OIS) is a shared-service information technology organization supporting Oregon's two largest state agencies: the Oregon Health Authority (OHA) and the Department of Human Services (DHS). OHA is Oregon's single State Medicaid agency responsible for ensuring access to health services is available to Oregonians, while DHS is the agency responsible for providing access to all other public assistance benefits. The partnership between OHA and DHS and their alignment with business operations and technology services unites these two agencies in their common goal to establish streamlined Medicaid eligibility, improve access to care and service delivery, and expand coverage to more Oregonians.

Current Oregon MMIS is a monolithic system implemented in 2008. CMS has indicated that eligibility for continued federal funding is dependent on compliance with CMS mandates and evidence that states are committed to a thorough planning effort supporting a modular future state. The goal of the Oregon Medicaid modularity program is to move from a monolithic system to a modular Medicaid environment that facilitates efficient administration of Oregon's Medicaid program. Since Oregon does not need to replace its current MMIS in the immediate (near term) future, the focus of the Oregon Medicaid modularity program is to evaluate Oregon Medicaid enterprise architecture for possible improvements; and develop a strategy and plan for the Medicaid modularity activities. The Modularity program planning effort provides a long term roadmap for modernization of Medicaid related systems.

The goal of the proposed program is to support DHS and OHA in crucial planning activities to achieve compliance with CMS requirements and improve interoperability and sustainability of the technology solutions supporting Medicaid service delivery. Federal government will support funding of modularity planning activities at an enhanced 90/10 match rate. This level of federal support translates into substantial financial savings for Oregon to transform its existing Medicaid system to provide sustainable foundation into the future. Access to enhanced funding will allow Oregon to incrementally implement modular solutions over the next 5-7 years while shouldering only 10% of the primary costs.

Purpose and Background

Oregon's current MMIS is based on the DXC Technology Services LLC interChange Healthcare platform implemented in 2008. The MMIS was designed to support a fee-for-service model; there were extensive modifications implemented later to support Oregon's Coordinated Care Organization (CCO) capitation-based model. OHA intends to create an enterprise vision for transforming the way services and programs are delivered to Oregon citizens, going beyond technology. This encompasses a re-evaluation of processes and organization structures used to manage and deliver program services, efforts to work across organizational boundaries to more effectively manage and deliver health and human services (HHS) in Oregon, and transition from current operating models to an outcomes-based focus. This program supports core value of Innovation for both OHA (https://www.oregon.gov/oha/Pages/Portal-About-OHA.aspx) & DHS (https://www.oregon.gov/DHS/ABOUTDHS/Pages/index.aspx)

In 2016, the federal Centers for Medicare & Medicaid Services (CMS) issued regulations which represent a fundamental shift in the approach states must use to procure, implement, and obtain certification for their MMIS. The new modular approach championed by CMS involves packaging a business process or group of processes into a distinct "module" with open interfaces which can easily be integrated with other modules to

create a flexible, service-oriented architecture. Because the modules are independent components, they can be replaced in the future more easily and with lower risk and duration than a traditional "big-bang" MMIS replacement or the modernization overhaul.

The underlying rationale for Medicaid Modularity planning effort supports the fundamental principles of the OHA & DHS Strategic Plan to: 1) "*provide the agencies with tools & capabilities to automate workflows, decision making & business rules, while reducing manual, paper-based processes & increasing efficiency & effectiveness*" (https://teams.dhsoha.state.or.us/sites/ois/SiteCollectionDocuments/DHS_OHA%20Strategic%20Technology%20Plan%202013.pdf p 15) : 2) "*provide modular, common services & capabilities which promote agility, re-use, & capitalize on best practices leveraging enterprise capabilities*" https://teams.dhsoha.state.or.us/sites/ois/SiteCollectionDocuments/DHS_OHA%20Strategic%20Technology%20Plan%202013.pdf, p 15).

The modular approach also enables Agency to design and conduct a sequenced procurement and deployment of an end-to-end MMIS solution, prioritizing the implementation of modules based on business needs. Modularity offers many benefits to Agency, such as the ability to adapt to changes in state and federal policy, new programs and initiatives, and technological advancements in a timely and cost-effective manner and to increase innovation and potentially lower costs through new market entrants and greater competition. It allows Agency to focus on "best-of-breed", interoperable solutions.

Problem or Opportunity Definition

Oregon made numerous enhancements to its current MMIS. These changes impact 1,800 state users, 17,000 provider users, and over 1 million Oregonians receiving healthcare services. Despite various improvements, large sections of Medicaid enterprise system are from legacy technologies. In order to continue supporting its business mission, OHA needs to transform its business operations and modernize its IT ecosystem to align to rapid changes in healthcare delivery system.

Medicaid Modularity planning is highlighted in Healthy People IRM 2019-2021 (Sec 4.3.1, p 29) as this program responds to several key drivers of the Strategic Information Management Framework, identified in the Healthy People IRM 2019-2021. These drivers include: Federal mandates (sec 2.1.3 p 12), Modernization (Sec 2.1.5 p 13), Health System Transformation (Sec 2.1.7 p 14) and the Overall Driver of Aligning Strategy, Priorities & Plans (Sec 2.2 pp 14-15). The program aligns with the overall Agency vision of investing for sustainability & agility (Sec 2.4 p 17). Planning effort will comply with all relevant federal, state, and agency requirements, including OHA 2019-21 Affirmative Action Plan, DHS office of Equity & Multiculturalism Policy & Processes and DHS-OHA Reasonable Accommodation policy.

OHA completed its first MITA SS-A in 2013 to review existing capabilities and determine future needs. In the early stages of the MITA SS-A, it was determined that even the current MMIS implemented in 2008 is unlikely to meet future business needs of OHA. An update to MITA SS-A will identify the current level of maturity of a broad range of organizational processes and include organizational change management recommendations to improve its level of maturity across a broad spectrum of Organizational Change Management practices.

The move to modularize Oregon Medicaid Enterprise Systems (MES) is federally mandated through a letter issued to State Medicaid Directors on Aug 16, 2016. CMS requires all states to plan for and implement modular technology solutions in support of Medicaid programs. Oregon MES needs to be updated with modular functionality to eliminate redundancy, duplication of effort and waste of IT assets. Modularity planning effort will be led by vendor resources and agency FTEs that will be dedicated to this effort. The planning activities have been scheduled considering other large agency-wide strategic initiatives to ensure critical business resources will be available to support the planning effort. Agency has an established appropriate governance structures to adequately oversee this investment, as outlined here: https://dhsoha.sharepoint.com/teams/Hub-SS-OIS/SitePages/IT-Governance.aspx Additional processes will include the following elements: engaged executive sponsorship, steering committee, vendor and contract management, change control and stakeholder representation processes.

OHA is soliciting for planning consulting services around Medicaid modularity. Consultant will be tasked with several critical activities: 1) update of the current MITA State Self-Assessment (SS-A), 2) create of the strategic modernization roadmap and 3) prepare for procurement activities to solicit for and acquire services of SI & PMO vendors for Medicaid Modularity along with individual module acquisition strategy that meets Agency needs.

Medicaid Modularity planning will take a holistic approach, looking at a broad range of technological, budgetary and business process challenges OHA will face as it moves from a single MMIS into the modular environment to address the wide variety of business needs. The consultant will produce a roadmap of modernization projects that span multiple biennia, which will allow for long term budget planning, using the approach that considers:

- Agency's short- and long-term goals and priority initiatives and the vision and expected outcomes of the Medicaid modularity.
- The ability of the market to support Agency's vision for the Medicaid modularity with modular offerings versus custom development.
- The grouping and sequencing of modules for federal funding requests, procurement, and implementation to support the Medicaid modularity.

Alternatives Analysis

Two other (*less desirable*) alternatives include:

Do Nothing – continue to extend the existing support contract with DXC (that, per CMS guidelines, cannot be continued *indefinitely*). The current MMIS was implemented 12 years ago with optional M&O contract that will expire in 2022. Maintaining the current state will cause Oregon to miss a unique opportunity to streamline Medicaid related systems while taking advantage of enhanced FFP. CMS expects Oregon to demonstrate a strong commitment to plan and execute a modular Medicaid Enterprise environment in compliance with CMS mandates. Non-compliance with CMS mandates will lead to significant negative financial ramifications for Oregon – loss of enhanced funding for enhancements or renewal of the system and doubling of state fund requirements for M&O expenditures.

Implement another State's planning approach

Oregon could choose to bypass its own planning efforts and implement the planning approach of another state, leveraging its planning outcomes and RFPs to procure new modular solutions. This approach will likely result in a lack of a cohesive roadmap and executable plan to meet Oregon-specific needs and increase the overall risk of this crucial program. It is also likely, that the solutions adopted by another state either would require significant modifications to address Oregon-specfic requirements or would require significant business process and operational workflow reengineering.

Consequences of Failure to Act

- Lost opportunity to develop a modern, sustainable and scalable solution environment supporting Oregon Medicaid service delivery.
- Lost opportunity to leverage CMS enhanced 90% funding for future replacement of existing aging Medicaid supporting technology. In just 5 more years, the current MMIS solution will be 17 years old and will be approaching its end of life. The typical cost to replace MMIS systems is over $150 million. Without enhanced funding, the general fund share of a replacement would be over $75 million, compared to $15 million.
- Lost opportunity to negotiate competitive maintenance and operations vendor support as a result of increased competition. The current contract with DXC for maintenance and operations increases by 2% annually.
- Potential significant financial impact due to loss of CMS enhanced funding support for maintenance and operations. The current annual maintenance and operations cost is approximately $20 million per year. CMS funds 75% or approximately $15 million. If Oregon lost CMS enhanced funding, the federal funding level will drop from 75% to 50%. This will increase Oregon's need for GF for annual maintenance and operations from $5 million to $10 million per year.
- Potential significant financial impact due to loss of CMS enhanced funding support for system change requests and for major enhancement projects. System change requests average $10 million annually. Major enhancement projects range between $5-20 million. CMS currently pays 75% of the cost of system change requests and 90% of the cost of major enhancements. If Oregon lost CMS enhanced funding, the federal funding level will drop to

50%. This will increase Oregon's typical annual general fund change request and enhancement projects cost from under $4 million to over $11 million.

Conclusions and Recommendations

It is essential for OIS to engage in this federally funded effort to transform business and technical architecture of the Medicaid Enterprise Systems. The Strategic Advisor consultant is expected to provide experience and technical expertise and successfully develop Medicaid modularity roadmap for OHA. The underlying rationale for this planning effort supports the fundamental principles of the OHA & DHS Strategic Plan to: 1) "provide the agencies with tools & capabilities to automate workflows, decision making & business rules, while reducing manual, paper-based processes & increasing efficiency & effectiveness" (https://teams.dhsoha.state.or.us/sites/ois/SiteCollectionDocuments/DHS_OHA%20Strategic%20Technology%20Plan%202013.pdf, p 15) : 2) "provide modular, common services & capabilities which promote agility, re-use, & capitalize on best practices leveraging enterprise capabilities" https://teams.dhsoha.state.or.us/sites/ois/SiteCollectionDocuments/DHS_OHA%20Strategic%20Technology%20Plan%202013.pdf, p 15).

Medicaid Modularity planning will facilitate search for solutions that leverage investments to avoid silos and redundant expenditures and maximize the return on investment, while improving interoperability and sustainability of technology solutions that support Medicaid service delivery.

Business Case for *OEBB & PEBB New Benefit Management System*

Oregon Health Authority, Health Policy & Analytics, OEBB/PEBB

Executive Summary

The Oregon Educators Benefit Board (OEBB) and Public Employees' Benefit Board (PEBB) are the divisions of the Oregon Health Authority (OHA) charged with providing certain employee benefits to educators, state, and local government employees, respectively[1]. Over 283,000 Oregonians annually use the OEBB and PEBB Benefit Management Systems (BMS) to access benefit selections and enroll in benefits during their respective open enrollment periods. Members also use the BMSs throughout the year to select benefit plans and coverage levels upon hire, or update selections in response to qualifying events.

OEBB and PEBB's current BMS were developed ten (10) and fifteen (15) years ago respectively, and have undergone continuous development and enhancements over those periods. Maintenance and operational support, as well as annual updates to support benefit enrollment is currently provided by Perspecta (formerly DXC). Due to the number of changes made to the systems since their implementation, as well as custom written code, the systems have become costly to continuously update and maintain to provide the needed functionality.

The extension through June 30, 2021 of the existing Maintenance and Operation (M&O)/enhancements contract with Perspecta secured continued stability and support of the systems while alternatives could be assessed. OEBB and PEBB can now turn their focus to the long-term goal of replacing the existing systems with a robust, centralized, sustainable, and scalable benefits management solution, supporting the unified PEBB and OEBB business practice.

OEBB and PEBB are evaluating a longer-term strategy for a BMS replacement solution through the following objectives:

- Conduct preliminary market research – identify potential Benefits Management Solutions options and assess whether COTS, SaaS, Transfer System, or other alternatives provide the capabilities needed by OEBB and PEBB in administration of benefits.
- Evaluate the impact of State legislation – in the 2017 legislative session, Senate Bill 1067 directed OEBB and PEBB to merge administrative functions effective immediately; OEBB and PEBB are determining how the merger will inform future OEBB and PEBB benefits management contracts, and potential Request for Proposals (RFPs).
- Determine funding needs – the agency must assess the budget required to support planning and implementation of a new solution supporting benefits management and enrollment for PEBB and OEBB (including resources required), determine the source of funding, and secure such funding for the duration of the project.
- Issue a competitive solicitation (RFP) – the solicitation will be inclusive of fully detailed technical documentation of the solution (including any enhancements over the life of the contract), comprehensive Business Continuity/Disaster Recovery planning and services, and will consider the capabilities available in best-of-breed benefits management solutions. The outcome of this process will provide a secure foundation to procure and implement a new BMS solution, and resources to support implementation and ongoing maintenance and operations.

[1] See ORS 243.135 and 243.866

Purpose and Background

Purpose

OHA's Health Policy and Analytics (HP&A) Division is submitting this Business Case on behalf of its OEBB and PEBB programs in support of comprehensive planning analysis, for the purpose of developing a request for proposal (RFP) for a benefit management system replacement project. The system project would be jointly administered by both programs.

Background

OEBB and PEBB are the divisions of OHA charged with providing certain employee benefits to educators, state, and local government employees, and handle benefits administration for these members through separate benefits management solutions. OEBB and PEBB incorporate utility-like fees for members and entities/agencies in rates charged for benefits administration, including use of these systems - see ORS 243.061-243.302, and OAR Chapter 101 and Chapter 111. In August 2002, PEBB contracted with Saber Software, Inc. (Saber) to design, develop, and implement an integrated BMS called pebb.benefits (or PDB) for the Public Employees Benefit Board. In April 2008, OEBB contracted with Saber to design, develop, and implement an equivalent BMS called MyOEBB based upon the PBD system. These systems provide benefits selection and management for more than 283,000 Oregonians representing most state agencies and education districts. After several acquisitions and company mergers, Perspecta is now the contracted service provider of maintenance, support, and enhancements for both OEBB and PEBB's Benefit Management Systems.

OEBB and PEBB benefit management systems have been in service over ten years and are highly customized with nearly all code tailored for each program's customer based needs. Over the years, the systems have become more and more complex, resulting in an increased likelihood for security vulnerabilities, further reliance on contracted developers who are familiar with these specific systems, and increasing costs for ongoing operations and maintenance.

An analysis of the two systems and a resulting "Technical Assessment Report of the Benefit Management System" was produced in early 2015. The report notes that both systems are supported with obsolete technologies lacking significant historical documentation, and candidates for transitioning to a more modern and stable solution. The continued reliance upon the older base code and architecture of these systems further constrains OEBB/PEBB to dependence on Perspecta for technical expertise, while remaining responsible for managing the tendency for accruing technical debt inherent to a custom solution. Other recommendations were followed, including implementing hardware and software system upgrades to remedy issues identified in the report, and to allow OEBB and PEBB to continue meeting their statutory responsibilities until the replacement solution would be implemented.

To ensure system support stability and enable OEBB/PEBB to focus on planning for the necessary and eventual replacement of their systems, OHA has extended its existing contracts with DXC for 3.5 years until 2021, which will also end the special procurement period granted by DAS. In the 2017 legislative session, Senate Bill 1067[2] directed OEBB and PEBB to merge administrative functions and operations of the programs. The "pebb.benefits" and "MyOEBB" legacy Benefit Management Systems (BMS) are

[2] See Appendix B – Enrolled SB 1067

becoming increasingly costly and challenging to support, additional gains in efficiency which would be supported through technology automation would be difficult at best to realize. The primary goals of this business case and supporting Policy Option Package are the same: provide a modernized, centralized, standardized, supportable, and scalable solution to replace both benefit management systems for educators and public employees, with the ability to accommodate the administrative and organizational changes subsequent to SB 1067, while implementing and maintaining more rigorous security best practices.

The near and longer-term plans set forth in this Business Case align with the DHS/OHA Strategic Technology Plan (STP) Initiatives:

- **Business Automation**
  While the current BMS solutions have provided significant efficiency gains, the multitude of options now available provide greater functionality and capability to further automate and streamline essential business processes, including support of dependent eligibility verification

- **Dynamic Needs Supported by Seamless Technology Services**
  OEBB and PEBB's existing systems have been continuously enhanced to meet the needs of the member populations served, and the program staff responsible for overseeing benefits administration; replacement solutions will be reviewed and assessed for additional capabilities including modularity, agility, reusability, and incorporation of best practices in benefit administration

- **Enables Connectivity Anytime, Anywhere, in Multiple Ways**
  The current solutions provide connection capability via multiple interfaces, but alternatives solutions offer expand capabilities to better meet member, staff, and partner needs through inclusion of mobile devices

- **Trusted Source for Health & Human Service Data**
  The member information collected in the existing systems is organized in such a way as to allow searching and reporting capabilities, but lacks the capacity to provide predictive analytics, which may be available with more modern solutions

Problem or Opportunity Definition

Problems

Several issues currently exist with the OEBB and PEBB BMS solutions:

Technology and Integration Issues

- Dated software code and architecture lacking proper documentation
- Lack of integration of business functions, such as financial management and dependent eligibility verification, into a single system has resulted in multiple one-off systems; this has resulted in maintaining sensitive data across multiple systems
- Contact Management System in BMS doesn't link with all OEBB and PEBB processes
- Lack of user notification capabilities

- Communications based on exports from criteria in BMS, then OEBB / PEBB staff send to OHA communications for printing and mailing (e.g. 12-month wait letters, Health Assessment reminders, etc.)
- Maintenance and enhancements performed on BMS' often result in new bugs or errors
- Applications developed using older, more difficult to support coding language

Vendor Issues

- Lack of complete, current system and technical documentation
- High rate of turnover for vendor developers and technical staff, as well as project management and account staff due to frequent organizational changes
- No provisions or enforcement mechanisms in existing vendor contracts to enforce regulations, standards, best practices, or methodologies
- Service Level Obligations do not specify penalties for vendor's failure to perform
- Business continuity and disaster recovery services not included in current contracts

Processes done outside of both OEBB and PEBB BMS

- Financial management including invoicing to entity-customers, individual subscribers, Consolidated Omnibus Budget Reconciliation Act (COBRA) benefits administrators, and other third parties, which then OEBB and PEBB must reconcile back to carrier payments (currently handled in Microsoft Access)
- COBRA is managed by a 3rd party vendor (currently Benefit Help Solutions for OEBB and PEBB)
- Open Enrollment Plan comparisons, training and reference pricing handled in other tools
- Notifications (e.g. COBRA, reminders for those who haven't enrolled during open enrollment, and other required notices)
- Dependent eligibility verifications (e.g. birth certificates, marriage certificates, etc.); validation of eligibility currently documented in Microsoft Access
- Wellness programs owned and managed by carriers (e.g. Health Assessments, Tobacco, Diabetes, Weight Watchers, etc.)
- Appeals Process (managed using Word, Excel, Outlook, faxes, and shared drive)
- Manual entry of plans / carriers (2 OEBB), Qualified Status Changes (QSCs), rates (5 OEBB), member changes, and corrections (700+ plans entered for OEBB in 2016; PEBB 3-4 staff perform manual data entry)
- Reporting is currently performed using Business Objects which uses Crystal Reports, which must be maintained separately

Opportunities

OEBB and PEBB share the goal of implementing a centralized, standardized, supportable, and scalable solution to replace both OEBB and PEBB's systems, which will provide easier enrollment, better coordination of benefits management, improved access to plan information, and enhanced integration with other tools that improve the overall experience for all customers and users. Additionally, this presents the opportunity to accommodate the administrative and organizational changes subsequent to SB 1067, while implementing and maintaining more rigorous security best practices. The Manadatory and Value Added solution requirements identified in the Alternatives Analysis section below further detail potential gains anticipated through implementing a replacement solution.

The objective of this initial phase will be to outline a plan for system replacement including:

- Conduct preliminary market research to identify potential Benefits Management Solutions options
- Identify HP&As strategy for procuring a unified system supporting OEBB and PEBB
- Determine funding options and procurement approaches
- Issuance of an RFP to procure a replacement solution, and if needed, secure the services of a systems integrator
- Develop a written Transition Plan through partnership between OEBB/PEBB, OHA's Office of Information Services (OIS), ETS, and Perspecta

Alternatives Analysis

OEBB, PEBB, and OIS are committed to moving forward with the initiation and planning process for a new system, including prioritizing resources, documenting detailed requirements, and performing a full alternatives analysis. As the replacement of the OEBB and PEBB BMS solutions will require significant OIS and business resources, the estimates provided herein cover a significant workload in preparation of the expected project to implement the yet to be determined solution. To lay the groundwork for such a project, OIS intends to aid OEBB and PEBB at this point of the project's concept origination phase with fully identifying functional and non-functional requirements, and detailing a comparative analysis of the alternatives. This effort will include the development of a high-level business case (this document), preliminary risk assessment, an overall project plan, and potentially initiating a Request For Information (RFI) process to support both internal and external (DAS OSCIO) approval.

Assumptions

- OEBB and PEBB resources will be dedicated for requirements gathering, initiation, and planning phases
- Funding will be available to cover the cost of continued vendor support of the systems
- OHA and DAS agree that aggressively pursuing transition to a new, sustainable replacement benefits management solution is preferable to continued reliance on the existing solutions with the current system vendor, or transitioning the maintenance and support work to a new vendor

Solution Requirements

Viable solutions should include, but are not limited to the following requirements:

Mandatory

- Role-based access for internal OEBB and PEBB access, as well as for external groups including:
    - Plan carriers
    - Members
    - Entity admins
    - Wellness vendors
    - Other state and local government agencies
- Compliance with federal and state security and privacy requirements

- Reporting (e.g. canned, ad hoc, and self-service for carriers, entities, school districts, and other state agencies)
- Contact management (e.g. comments, chat, integration with phone system, member profile, appeals, dependent eligibility verification, tracking of communications, help desk ticketing, etc.)
- Online Help for OEBB and PEBB staff, members, carriers, and other vendors
- Self-service administrative capabilities (e.g. OEBB and PEBB would have the ability to manage history of changes to qualifying events, etc.)
- Expanded automated error checking / data validation
- Compatibility with commonly used browsers, devices, mobile applications, and operating systems
- Ability to import data into, and export data from solution, in multiple formats
- Financial management including invoicing to entity-customers, individual subscribers, COBRA benefits administrator, and other third parties
    - Solution allows OEBB and PEBB to reconcile back to carrier payments
- Notifications (e.g. COBRA, reminders for those who haven't enrolled during open enrollment, and other required notices, etc.)
- Dependent eligibility verifications among, and between OEBB and PEBB member groups
- Integrated appeals process

Value Added

- Single sign-on for members to access carrier accounts
- COBRA managed as part of the integrated solution for OEBB and PEBB instead of in a third-party vendor's solution
- Wellness programs managed in integrated solution for OEBB and PEBB (e.g. Health Assessments, Tobacco, Diabetes, Weight Watchers, etc.)
- Open Enrollment support tools
    - Plan comparison tool integrated into solution for OEBB and PEBB to show premium amounts, plan benefits, and other items required for Open Enrollment
    - Provider searches
    - Medical home searches
    - Health assessments
    - Premium quotes
- Trainings and webinars integrated into solution for OEBB and PEBB
- Integrated reference pricing (information based on plan for services)

Alternatives

For this high-level business case, a detailed view of alternative solutions has not been prepared. During the planning phase, the RFI and/or RFP will uncover requirements, as well as performing a formal alternatives analysis, and initiation/planning preparations for commencing with a major project initiative.

Note: Analysis, planning, and initiation will require dedicated OEBB and PEBB staff time to aid with documenting and validating requirements.

Cost

OIS estimates a duration of 8 to 12 months to adequately cover this initial phase of project preparation prior to vendor solicitation, solution identification, implementation and transition. Detailed estimates will need to be developed to forecast the time and budget required for project execution, solution implementation, close out, and transitioning to operations & maintenance. The following high-level cost estimates have been gathered for Phase 1 Planning:

OEBB / PEBB Positions	**Duration**	**Cost**
Operations & Policy Analyst 3 position "Program Business Analyst"	12 months	$140,028
Operations & Policy Analyst 4 position "Program Project Manager"	12 months	$173,465
Estimate:		$313,493
OHA OIS Positions		
Information Services Specialist 8 "Technical Project Manager"	12 months	$157,533
Information Services Specialist 7 "Business Systems Analyst"	12 months	$147,679
Estimate:		$305,212
Professional Services		
"IT Strategic Advisor"	12 months	$375,000
Total 1st year package estimate (4 FTE + 1 Contracted Resource)		**$993,705**

This information is identified in a Policy Option Package, currently under development[3]. Funding would be through Other Funds category, provided by OEBB and PEBB Administrative Fees attached to plan premiums.

Benefits

OEBB and PEBB will expect to realize cost efficiencies with lower maintenance and operations costs for a new combined system. Program efficiencies anticipate full integration with finance and budgeting, COBRA administration, wellness program administration, and other business functions that are not currently integrated. A new system will also reduce duplication between programs and the use of "one-off" systems. Soliciting for a new, consolidated system will enable OEBB and PEBB to establish a strong on-going support contract with terms favorable to the State, and position the agency to better manage the technical debt associated with a benefits solution.

As stated in the Background section above, this initiative also aligns with the following DHS / OHA Strategic Technology Plan (STP) Initiatives:

- Business Automation
- Dynamic Needs Supported by Seamless Technology Services
- Enable Connectivity Anytime, Anywhere, in Multiple Ways
- Trusted Source for Health & Human Service Data

Risk

The current OEBB and PEBB benefit management systems were built on antiquated legacy technology that now presents significant risks to properly maintain. The systems are costly and cumbersome to support due to the age and custom nature of the code upon which they were built. High turnover with contractor and account management staff compounds this problem, as it takes new staff a much longer period of time to understand the systems well enough to address identified issues.

[3] See anticipated costs in Appendix A (POP overview)

Though it has undergone a series of acquisitions and mergers, OEBB and PEBB have continued contracting with the same vendor from initial build to current maintenance and operations. This continued contractual relationship results in increased dependence on the contractor due to the age, high degree of customization, and complexity of the systems, without sufficient technical or architectural documentation. It is also cumbersome and costly to transition to a new vendor to support its maintenance and operations. Special procurement authority for the current contract ends in 2021.

Conclusions and Recommendations

Conclusions

Once DAS approval is achieved, OIS resources will work in partnership with OEBB/PEBB staff to create the detailed business case, project charter, detailed risk assessment, and fully developed project plans communicating how the project's intended scope, schedule, and budget will be managed. Business, functional, technical, security, and other requirements will need to be documented, that will establish the foundation for a Request for Proposals (RFP) to solicit potential solution providers. Project management resources will also be identified and assigned in this timeframe, as well as other necessary project team members to support initiation.

Recommendations

The project to replace OEBB and PEBB's BMS is expected to exceed $1 million. As a result, the initiation and planning processes need to begin as soon as possible. OEBB and PEBB need prioritization of OIS resources to support the effort required for commencing with a major project initiative. Additionally, OEBB, PEBB, and OIS will continue supporting development of the POP for consideration by the 2019 legislature, which will authorize additional funding of positions to support planning, coordination, project management, and implementation.

Consequences of Failure to Act

Not prioritizing the necessary resources supporting a replacement effort means OEBB and PEBB will continue using technology that is fragmented, non-standard, difficult to support, and is not scalable. OEBB and PEBB members would be at risk for benefits interruption if a replacement system is not implemented prior to existing vendor support expiration in 2021. OEBB and PEBB's BMS are not meeting all current business needs, which have grown since their original implementations in 2008 and 2003 respectively. OEBB and PEBB both seek to have more processes integrated into a new solution that improves communication and care for all member and user experiences.

OSCIO IT Investment Form

Approving Technology Manager — Date: 8/27/2019

Information Technology Investment Type(s):

☒ New Investment ☐ Renew/Life Cycle Replacement ☐ Other:

Information Technology Investment Description (What is being proposed and why):

Background:

OEBB and PEBB are the divisions of OHA charged with providing certain employee benefits to educators, state, and local government employees, and handle benefits administration for these members through separate benefits management solutions. Over 283,000 Oregonians annually use the OEBB and PEBB Benefit Management Systems (BMS) to access benefit selections and enroll in benefits during their respective open enrollment periods. Members also use the BMSs throughout the year to select benefit plans and coverage levels upon hire, or update selections in response to qualifying events.

OEBB and PEBB's current BMS were developed ten (10) and fifteen (15) years ago respectively, and have undergone continuous development and enhancements, with almost all of the software code custom tailored for each program's customer-based needs. Consequently, the systems have become increasingly complex, resulting in an increased likelihood for security vulnerabilities, further reliance on contracted developers who are familiar with these specific systems, and increasing costs for ongoing operations and maintenance.

Systems maintenance and operational support, as well as annual updates to support benefit enrollment, are currently being provided by Perspecta (formerly DXC) under an existing Maintenance and Operation (M&O)/enhancements contract now extended through June 30, 2021.

A technical assessment conducted in 2015 notes both systems are supported with obsolete technologies, lack significant historical documentation (some of which was addressed in the subsequent 2018 study requested by OSCIO) and are therefore candidates for transitioning to a more

modern and stable solution. The continued reliance upon the older base code and architecture of these systems further constrains OEBB/PEBB to dependence on Perspecta for technical expertise, while remaining responsible for managing the tendency for accruing technical debt inherent to a custom solution.

Finally, State of Oregon procurement standards require all vendors to periodically re-bid their services in order to ensure the best possible support and pricing. Given the current system technologies and business processes are outdated/unsupported, thereby restricting the addition of new, desirable functions and processes, this opportunity to better serve our fellow Oregonians comes well timed.

Problem Identification:

Several significant issues exist with the current OEBB and PEBB BMS solutions:

Technology and Integration Issues

- Dated software code and architecture lacking proper documentation.
- Lack of integration of business functions into a single system has resulted in maintaining sensitive data across multiple one-off systems.
- Contact Management System in BMS does not link with all OEBB and PEBB processes and also lacks user notification capabilities.
- OEBB/PEBB BMS staff must first manually create and export communications material before sending it to OHA communications for printing and mailing (e.g. 12-month wait letters, Health Assessment reminders, etc.)
- Maintenance and enhancements performed on BMS' often result in new bugs or errors.
- Applications developed using older, more difficult to support coding language.

Vendor Issues

- High rate of turnover for vendor developers and technical staff, as well as project management and account staff, due to frequent organizational changes.
- Existing vendor contracts have no provisions or mechanisms to enforce regulations, standards, best practices, or methodologies.
- Service Level Agreement Obligations do not specify penalties for vendor's failure to perform.
- Current contracts do not include business continuity and disaster recovery services.

Processes done outside of both OEBB and PEBB BMS

- Financial management including invoicing to entity-customers, individual subscribers, Consolidated Omnibus Budget Reconciliation Act (COBRA) benefits administrators, and other third parties, which then OEBB and PEBB must reconcile back to carrier payments (currently handled in Microsoft Access)
- COBRA is managed by a 3rd party vendor (currently Benefit Help Solutions for OEBB and PEBB)
- Open Enrollment Plan comparisons, training and reference pricing handled in other tools.
- Notifications (e.g. COBRA, reminders for those who haven't enrolled during open enrollment, and other required notices).
- Dependent eligibility verifications (e.g. birth certificates, marriage certificates, etc.); validation of eligibility currently documented in Microsoft Access.

- Wellness programs owned and managed by carriers (e.g. Health Assessments, Tobacco, Diabetes, Weight Watchers, etc.)
- Appeals Process (managed using Word, Excel, Outlook, faxes, and shared drive)
- Manual entry of plans / carriers (2 OEBB), Qualified Status Changes (QSCs), rates (5 OEBB), member changes, and corrections (700+ plans entered for OEBB in 2016; PEBB 3-4 staff perform manual data entry)
- Reporting (both customer-based and regulatory – i.e. ACA, IRS, etc.) is currently performed using Business Objects which uses Crystal Reports, which must be maintained separately

High-Level Business Opportunity:

OEBB and PEBB share the goal of implementing a centralized, standardized, supportable, and scalable solution to replace both OEBB and PEBB's systems. It is anticipated this shall provide easier enrollment, better coordination of benefits management, improved access to plan information, and enhanced integration with other tools that improve the overall experience for all customers and users. Additionally, this presents the opportunity to accommodate the administrative and organizational changes subsequent to SB 1067, while implementing and maintaining more rigorous security best practices.

Alternatives to be considered:

The assessment and recommendation of a solution will be based on current and projected operational requirements, business and technical process management, long-term support, and security, with a focus on customer services, commonality of functions, communications, training, security and overall product sustainability.

At this still early point of the project a detailed analysis of alternative solutions has not been developed. An initial baseline analysis of the present system will be conducted to properly identify areas which may lend themselves to improvement or replacement including, but not necessarily limited to, the following replacement alternatives:

- Upgrade/enhance current OEBB/PEBB systems (including consolidation of core processes and reporting methods) by current support vendor.
- Incorporation of BMS reporting and management into the current WorkDay HR platform.
- Outsourcing of operations and support to a third-party entity (e.g., IaaS, SaaS, Business Processes as a Service (BPaaS), External Service Provider/Integrator (ESP, ESI).
- Internal custom development and support of a state-funded, self-maintained software package and hardware platform (an "in-house" product).
- Development and release of a Request for Proposal (RFP) for competitive bidding by third party entities able to fulfill business, technical and sustainability requirements of the State.
- Transfer/leverage solution already being used by another public sector organization in Oregon or another state

OSCIO IT Investment Form

	Yes	No
1) Is the investment a project?	☒	☐
2) Will the investment have a Project Manager?	☒	☐
3) Will the investment include other agencies?	☒	☐
4) Will the investment include Information Asset Classification Level 3 or 4 data? (see DAS Policy 107-004-050)	☒	☐
5) Will the investment be for Cloud Services (as defined in Policy #107-004-150)	☒	☐

IT Investment Estimated Cost Summary

Hardware:	**$0**	**Software:**	**$6,300,000**
Services/Maintenance (projected over five years):	**$14,500,000**	**Personnel (Project) Adjusted for five years:**	**$4,500,000**
Source of Funding:	Other Funds	**Deadline for fund use:**	07/2021
Anticipated Start Date:	07/2019	**Anticipated End Date:**	07/2024
		TOTAL:	**$25,300,000**

NOTES:

1 - The initially approved POP amount of $1,993,396 by the legislature allows for work to be completed through the project planning phase. An added POP request will be made in CY2020 to obtain funding for the 21-23 biennium to enable final delivery.

2 – Personnel costs are based on 5 FTE project resources (2 each Project Managers and Business Analysts) from OIS and the business) plus a Strategic Advisor. Additionally, another 7 SMEs will be assigned as project resources with 10% each of their work time allocated to the project.

3 - Maintenance costs reflect anticipated 20% reduced expenses for the five-year period following implementation and delivery of the new system, on the assumption that the new system will replace some manual processes, newer technology is less expensive to maintain, and one system is cheaper to maintain than two. (Cost estimates based on costs for O&M related activity for the current systems).

Purpose

The primary need for the Provider Time Capture (PTC) Project is to meet the Electronic Visit Verification (EVV) requirements of the 21st Century CURES Act. The CURES act was designed to improve the quality of care provided to individuals through furthered research, enhanced quality control, and strengthened mental health parity. The following data elements are required to be captured electronically at the time of service: Date of Service, Person Providing the Service, Person Receiving the Service, Time the Service Begins and Ends, Location of Service, and Type of Service Performed.

This document will help establish the scope of the project and contains an analysis of available options including the associated benefits and risks to identify a viable solution for a successful outcome. In addition, the solution will ensure continuity of care for critical community services provided to individuals and their families by Homecare Workers (HCWs) and Personal Support Workers (PSWs).

***See Appendix A for Acronym List.*

Background

The Department of Human Services (DHS) and the Oregon Health Authority (OHA) programs utilize approximately 24,000 HCWs and PSWs to provide in-home care for approximately 19,000 individuals across Oregon. DHS and OHA have documentation requirements which apply to HCWs/PSWs who provide personal care assistance to older adults and people with disabilities. As of October 2013, the Fair Labor Standards Act (FLSA) required the records to include certain identifying information about the HCW/PSW and data about the hours worked. The law requires individuals and service providers attest services rendered are accurate. Due to the compliance deadline of January 2016 set by the Department of Labor (DOL), the State completed the implementation of a short-term solution to pay providers for time worked for Aging and People with Disabilities (APD) and Health Systems Division (HSD) in the Client Employed Provider (CEP) system using a paper process for services beginning October 2015. The Office of Developmental Disabilities Services (ODDS) instituted upgrades to their current Express Payroll Reporting System (eXPRS) platform to meet their needs. The State then completed the cross-system payroll components (overtime and travel time) by the end of October 2016.

For APD and HSD, these records are being captured through manual processes. Paper timesheets are completed by HCWs/PSWs, and the data is entered manually into State systems by employees at State field offices and Type A and Type B Area Agency on Aging (AAA) offices. These manual processes are time intensive. In June 2015, the PTC Project was authorized to continue with the Request for Proposal (RFP) process for the long-term solution for APD, ODDS, and HSD. In November 2015, the RFP was posted for responses due by January 2016. Public Partnerships, LLC (PPL) was selected as the solution vendor for the project. In November 2016, stakeholders from across DHS and OHA gathered with PPL to discuss the possibility of combining the Financial Management Agent Services (FMAS) component with time capture. It was thought at the time the work to align the programs and modernize the approach taken would be more readily achievable. In conjunction with this, ODDS began using PPL for their FMAS needs in January 2017. The RFP outlined the desire for a provider payment option as an added value to the State. This was a direct need identified as a component of moving the State forward in the maturity models as defined by Centers for Medicare and Medicaid Services (CMS). The goal is to provide data that is timely, accurate, usable, and easily accessible to support analysis and decision making for healthcare management and program administration.

In mid-2017, ODDS officially withdrew participation in the design efforts of the PTC Project and have begun work on an enhancement for eXPRS to meet the EVV requirements. One of the key drivers for ODDS joining the project initially was the mobile application offered by PPL. Over time as the required system, policy, and

resourcing concerns were uncovered, using the same solution proved to be too significant a hurdle for ODDS. In November 2017, Stage Gate 3 was rescinded due to significant scope change and the continued struggles with PPL. Amendment 2 was executed in June 2018, to bring the State and PPL to an agreement to move forward based on the changes to the project scope from November 2017.

Due to delays, previously allocated technical resources from the Office of Information Services Solution Development and Delivery (OIS SDD) had been reassigned to the higher-priority Integrated Eligibility (IE) Project. In February 2018, OIS management notified Mike McCormick, the PTC Project Sponsor, that technical resources would not be available to the PTC Project until April 2019. This timing was contingent on the IE Project remaining on schedule, which has been extended by multiple months. The lack of dedicated technical resources caused a delay in progress on development tasks. This caused an additional complication with PTC Project scope, cost, and schedule.

The PTC Project reached a stage in which a re-evaluation of the project scope was necessary. The PTC Project Team worked closely with APD and HSD business and leadership, as well as OIS Project Solutions and OIS SDD, to create options to continue work on the project. Many options were considered, and it was decided to pursue an expanded scope to include FMAS with PPL in April 2018.

As the FMAS option was explored, PPL was presented with updated requirements to review for a cost proposal. PPL's cost proposal to include FMAS amounted to a 236% increase in the five-year cost. The PPL leadership changes and PPL's lack of knowledge of the out of box solution made it difficult for the PTC Project to understand configuration verses customization, which increased the risk in continuing the contract further. In January 2019, it was determined the cost increase was not in alignment with our responsibility around fiscal stewardship and it was decided to expire the contract via Amendment 3 with PPL and explore other options. As the Project continues to explore other options as it relates to EVV, Mike McCormick remains the PTC Project Sponsor supporting APD and HSD programs.

Estimated Project Expenditures

In the third quarter of 2016, the PTC Project began contracted work with the Design, Development, and Implementation (DDI) vendor. As of the Advanced Planning Document Update (APDU) in October 2018, the total CMS approved budget for the PTC Project was $9,569,050. As of May 2019, the cumulative budget spent for the PTC Project was $7,048,075. This included $3,407,622 for State staffing costs plus $3,640,453 for IT Vendor Services, which includes PPL and NTT DATA State Health Consulting, LLC (formerly Cognosante Consulting, LLC). Below are the breakdown tables for reference.

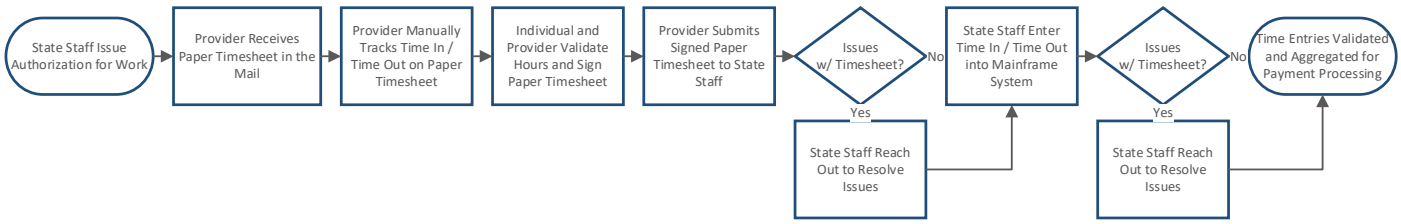
The below projections were compiled by federal fiscal year, based on a SaaS solution, and a completion date of September 30, 2021.

Project Expenditures	Total FFY19*	Total FFY20	Total FFY21	Total
State Staffing / Personal Services 90/10	226,909	1,755,101	2,894,015	**4,876,025**
Cost Allocation on Personal Services 90/10	6,123	263,265	421,862	**691,250**
IT Contractors - Professional Services 90/10	57,475	3,449,061	3,449,064	**6,955,600**
HW/SW Initial Purchase 90/10	0	548,208	548,208	**1,096,416**
Projected Yearly Spend	**290,507**	**6,015,635**	**7,313,149**	**13,619,291**

*This accounts for the remainder of FFY 2019, June – September

The total projected cost for Operations and Maintenance staffing and licensing for three years is $4,684,349. The breakdown of these costs is located in the Alternative Analysis section, under Option 6 – SaaS.
Below is the table for the total projected project expenditures:

Total Cost of Ownership for Five Years	
Cumulative Budget Spent to Date	$ 7,048,075.00
Budget Forecast through September 2021	$ 13,619,291.00
Three Year Operations and Maintenance Costs	$ 4,684,349.00
Total	**$ 25,351,715.00**



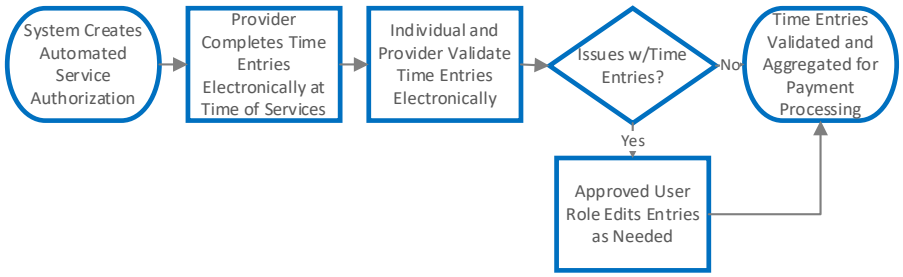
CMS has advised only one EVV solution will be funded per state, which has potential cost impacts and requires an inclusive solution. The Project is aware the APDU will need to go to CMS for review and approval for any updated costs. CMS will also be required to review any RFP or DDI contract.

**See Appendix B for the May 2019 Budget Update for more detailed information.

Current State Process

Currently, State Staff issue an authorization for the Provider to work for a specified Individual. HCWs/PSWs are then mailed a paper timesheet for a two-week service period. As they work, they are required to physically write the date, their time in, and their time out for each shift on the timesheet. A signature from the Individual or their representative is necessary when work has been completed to validate services were performed for the two-week period. The signed timesheet is then submitted to State Staff for additional verification to identify any issues i.e., start and end dates are filled out and legible, the timesheet is signed by the HCW and individual, etc. If there are no issues identified, State Staff enter the date, the time in, and the time out into the mainframe system for each shift the Provider reports. If State Staff identify any issues, they contact the Case Manager, Individual, or Provider to resolve the issues prior to entering the data. The time entries entered into the mainframe are run through additional system validations and aggregated for payment processing. If any issues are identified with the additional system validations, State Staff resolve these issues prior to the system aggregating the data for payment processing. The mainframe captures the Date of Service, Person Providing the Service, Person Receiving the Service, Time the Service Begins and Ends, and Type of Service Performed, but doesn't capture the Location of the Service. The mainframe system currently does not have the ability to capture these data elements in a real-time manner which is required for EVV.

See below for high-level current state process flow:



**See Appendix C for comprehensive Current State Process Flows.*

Future State Process

In the ideal future state, HCWs/PSWs will complete the enrollment process to receive an automated service authorization. HCWs/PSWs will electronically capture the required EVV data elements at time of service (Date of Service, Person Providing the Service, Person Receiving the Service, Time the Service Begins and Ends, Location of Service, and Type of Service Performed). If HCWs/PSWs are traveling directly from one individual to another to perform applicable services, departure and arrival time between individuals will be captured electronically. HCWs/PSWs will validate time entries and fix any issues they identify. The Individual or their representative will then validate entries to ensure services were performed as indicated on the timesheet. Specific user roles will have the ability to edit time entries as needed. Once time entries are validated, they will be aggregated for payment processing.

See below for high-level future state process flow:

***See Appendix D for comprehensive Future State Process Flow.*

EVV Solutions in Other States

After researching other state solutions, it was determined the most commonly used solution is Santrax by Sandata. According to the available data, 19 states are still in process of determining the solution or the information was unavailable. Based on the data compiled, most states with solutions identified have selected single vendor solutions. With many states already EVV compliant and more states in the implementation phase, the State has a lot of accessible information to draw from to make our solution work for our stakeholders.

***See Appendix E for detailed information on Alternative Analysis Out of State Solutions.*

Problem Examples

The implementation of the short-term solution to meet the FLSA requirements created a workload which was not accounted for in any workload model by DHS. The current manual process of State Staff keying information into the system from a paper timesheet is very time intensive and causes replication of existing data. Timesheets are stored locally, often in paper and electronic format, as well as being stored in the mainframe system. Additionally, this increases the risk of data entry errors which can result in inaccurate payments to providers. State Staff spend a significant amount of time communicating back and forth with providers due to timesheets being filled out incorrectly or time entries not being legible. This can potentially delay payments to providers. An estimated 70 full-time employees (FTEs) spend their time dedicated to manually entering provider time in and time out from a paper timesheet submitted by the HCWs/PSWs.

FMAS has been a topic throughout the life of the project and reflects the long-term vision of APD and HSD. The decision was made not to include FMAS in the initial phase of the project. With the exclusion of FMAS in the initial phase, there will still be a need to process payroll and claims through legacy systems. The Office of Financial Services (OFS) recommends claims processing stay in legacy systems to interface with Accounting Interface (AI) and State Financial Management Application (SFMA) for funding and reporting to CMS.

Opportunity Examples

Section 1903(l)(5)(A) of the 21st Century CURES Act provides that the system must be able to electronically verify, with respect to visits conducted as part of personal care services, the following:

1) the type of service performed;
2) the individual receiving the service;
3) the date of the service;
4) the location of service delivery;
5) the individual providing the service; and
6) the time the service begins and ends

Section 1903(l)(2) also requires states to provide a stakeholder process to allow input into the state's implementation of the EVV requirement from providers of Personal Care Services (PCS) and home health services, beneficiaries, family caregivers, and other stakeholders.

An EVV solution must be in place for personal care services starting January 1, 2020. If a state demonstrates to the Secretary that: (1) that the state has made a good faith effort to comply with the EVV requirements (including taking steps to adopt the technology used for an electronic visit verification system); and (2) that the state, in implementing such a system, has encountered unavoidable system delays, then the FMAP reductions shall not apply for calendar quarters in 2020 (for personal care services).

Compliance with the 21st Century CURES Act within the required implementation timeline will allow the State to avoid penalties. The good faith effort exception will allow for a January 1, 2021 implementation due date. The resulting penalties for non-compliance include a reduction of Federal Medical Assistance Percentages (FMAP) for Consumer-Based Care and In-Home Care expenditures beginning with a 0.25% on January 1, 2021. The percentage will increase to 0.50% by 2022, 0.75% by 2023, and 1% from 2024 going forward. See *'Option 10 - Cost of Doing Nothing'* in the *'Alternative Analysis'* section for cost estimates.

Being compliant with the 21st Century CURES act gives the State the opportunity to remove a significant burden from Providers, Field Staff, and System Teams. The savings in staff time will allow those staff to take on other responsibilities and allow case managers more time for person-centered planning and engagement.
It will also help improve the safety and security of vulnerable Oregonians by ensuring services are actually provided to the individual through monitoring location and real-time activity. By moving away from a manual process, it will save staff time and decrease the risk of data entry errors and erroneous payments to providers.

Lessons Learned Evaluation

The State requested the Quality Assurance (QA) vendor, Cognosante, prepare a Lessons Learned report to document project successes, challenges, and recommendations through collaborative information gathering sessions. This information will be used to identify areas of reinforcement and areas where mitigations are needed as the project reboots. The results of these sessions are comprehensive of the early stages of the project until the contract was expired with PPL.

***See Appendix F for Lessons Learned Report with mitigations added addressing recommendations.*

Goals, Objectives, and Measurements

Below is the list of Goals, Objectives, and Measurements (GOM) for the PTC Project, formulated utilizing the PTC Project Guiding Principles. The PTC Project Guiding Principles were drafted collaboratively and approved by APD and HSD program leadership, OIS management, and other impacted stakeholders.

Goals	Objectives	Baseline Measurements	Post Go-Live Measurement	Means and Frequency of Measurement (Report, Survey, Time Study, Process Mapping)
Goal #1: Comply with Federal requirements, including 21st Century Cures Act.	1.1 **Objective:** Establish use of Electronic Visit Verification (EVV) compliant recording mechanism(s).	N/A	Percentage of provider compliance.	Report – 30- and 90-days post pilot and statewide.
	1.2 **Objective:** Establish electronic approval of time entries by individuals.	N/A	Percentage of electronic approvals.	Report – 30- and 90-days post pilot and statewide.
	1.3 **Objective:** Capture the six required data elements for Electronic Visit Verification (EVV).	N/A	Percentage of data elements captured electronically.	Report – 30- and 90-days post pilot and statewide.
Goal #2: Improve program integrity.	2.1 **Objective:** Decrease number of time entry/reporting errors.	Total number of adjustments to paid claims both positive and negative 30 days prior to pilot for two pay cycles.	Compare total number of adjustments in the adjustments queue for reduction in errors.	Report – 30 days prior to pilot, and 45 days post pilot and statewide (adjustment reason codes used in post go-live reports).
	2.2 **Objective:** Decrease number of over/under payments.	Total number of over/under payments reported 30 days prior to pilot for two pay cycles.	Total number of timesheet adjustments in the adjustments queue that result in a change in pay.	Report – 30 days prior to pilot, and 45 days post pilot and statewide out of legacy system.

Goals	Objectives	Baseline Measurements	Post Go-Live Measurement	Means and Frequency of Measurement (Report, Survey, Time Study, Process Mapping)
	2.3 **Objective:** Decrease number of incidents of potential fraud.	Total number of potential incidents of fraud reported 30 days prior to pilot for the previous 6 months.	Total number of potential incidents of fraud reported post pilot and statewide.	Report – via Fraud Unit every 30 days prior and post pilot, through 90 days post statewide.
	2.4 **Objective:** Decrease number of errors in reporting travel time.	Total number of adjustments to paid claims positive or negative 30 days prior to pilot for two pay cycles.	Total number of adjustments in the adjustments queue post pilot and statewide.	Report – 30 days prior to pilot, and 45 days post pilot and statewide (adjustment reason codes used in post go-live reports).
	2.5 **Objective:** Increase reporting traceability processes and capabilities.	Record time between process steps pre-pilot.	Record time between process steps post-pilot.	Process Mapping – compare baseline durations with those 30 days post pilot.
Goal #3: Decrease workload on identified impacted groups.	3.1 **Objective:** Decrease workload for Voucher Clerks (Field Offices) and Provider Relations Unit (PRU) (Central Office) in voucher issuance and reprint processes.	Determine current workload for Voucher Clerks (Survey), and for PRU Staff (Time Study).	Establish workload for Voucher Clerks and PRU Staff 90 days post pilot and statewide.	Survey – send 90 days prior to pilot with 60-day deadline. Time Study – conduct visits 60 days prior to pilot, and 90 days post pilot and statewide.
	3.2 **Objective:** Decrease workload for Travel Time Clerks (Field Offices) and PRU staff in processing travel time.	Determine current workload for Travel Time Clerks (Survey), and for PRU Staff (Time Study).	Establish workload for Travel Time Clerks and PRU Staff 90 days post pilot and statewide.	Survey – send 90 days prior to pilot with 60-day deadline. Time Study – conduct visits 60 days prior to pilot, and 90 days post pilot and statewide.

Goals	Objectives	Baseline Measurements	Post Go-Live Measurement	Means and Frequency of Measurement (Report, Survey, Time Study, Process Mapping)
	3.3 **Objective:** Decrease workload for field staff in time entry and correction processes (time entry corrections and over/under adjustments).	Determine current workload for Field Staff (Survey), and PRU Staff (Time Study).	Establish workload for Field and PRU Staff post pilot and statewide.	Survey – send 90 days prior to pilot with 60-day deadline. Time Study – conduct visits 60 days prior to pilot, and 90 days post pilot and statewide.
	3.4 **Objective:** Decrease workload for staff in the payment correction processes (adjustments, exceptions, and corrections). (PRU and ITBS)	Determine current workload for staff to process all payment corrections via baseline from Objectives 2.1, 2.2, and 2.4.	Establish workload for staff post pilot and statewide via measurement from Objectives 2.1, 2.2, and 2.4.	Report – 30 days prior to pilot, and 45 days post pilot and statewide. Survey – send 90 days prior to pilot with 60-day deadline. Time Study – conduct visits 60 days prior to pilot, and 90 days post pilot and statewide.
	3.5 **Objective:** Decrease workload for providers in submitting time worked.	Determine current workload for providers.	Establish workload for providers post pilot.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
	3.6 **Objective:** Decrease workload for individuals in approving time entries.	Determine current workload for individuals.	Establish workload for individuals post pilot.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.

Goals	Objectives	Baseline Measurements	Post Go-Live Measurement	Means and Frequency of Measurement (Report, Survey, Time Study, Process Mapping)
	*3.7 **Objective:** Decrease workload for staff in collecting, updating, and issuing payroll related documentation (W-2, W-4, DD, etc.).	Determine current workload for State Staff.	Establish workload for State Staff post pilot.	Time Study – conduct visits 60 days prior to pilot, and 90 days post pilot and statewide.
	*3.8 **Objective:** Decrease workload for staff in garnishment and recoupment processes.	Determine current workload for State Staff.	Establish workload for State Staff post pilot.	Time Study – conduct visits 60 days prior to pilot, and 90 days post pilot and statewide.
Goal #4: Decrease processes within legacy systems functions and/or data.	4.1 **Objective:** Decrease number of functions performed by the existing state systems in the time entry, calculation, and payment processes.	Determine current workload 30 days prior to pilot.	Establish workload post pilot.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
	4.2 **Objective:** Decrease number of validations performed by the existing state systems in the time entry, calculation, and payment processes.	Determine current workload 30 days prior to pilot.	Determine workload post pilot.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
	4.3 **Objective:** Decrease number of business processes that require legacy systems.	Determine current workload 30 days prior to pilot.	Determine workload post pilot.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
Goal #5: Reduce costs associated with manual processes.	5.1 **Objective:** Decrease paper voucher storage costs and physical location needs.	Determine storage costs and location needs at pre-determined go-live locations 30 days prior to pilot.	Establish storage costs and location needs at pre-determined go-live locations 30 post pilot.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.

Goals	Objectives	Baseline Measurements	Post Go-Live Measurement	Means and Frequency of Measurement (Report, Survey, Time Study, Process Mapping)
	5.2 **Objective:** Decrease number of time entry claims that are paid solely out of the General Fund.	Determine provider payments that are paid out of General Fund 30 days prior to pilot for 90 days data timeframes.	Establish provider payments that are paid out of the general fund post pilot.	Report – 30 days prior to pilot, and 90 days post pilot and statewide (determine average for 90-day data timeframes).
	5.3 **Objective:** Decrease printing and mailing costs for printed paper vouchers.	Determine printing and mailing costs for vouchers 30 days prior to pilot.	Establish printing and mailing costs for vouchers post pilot.	Report – 30 days prior to pilot, and 90 days post statewide (compare previous voucher costs and mailing of Welcome packets and paper timesheets).
	5.4 **Objective:** Decrease Mainframe processing and storage costs.	Determine processing and storage costs.	Establish processing and storage costs post pilot.	Report – 30 days prior to pilot, and 90 days post pilot and statewide.
Goal #6: Maximize user adoption through identified, organized, and prioritized change management, communications, and trainings.	6.1 **Objective:** Decrease stakeholder barriers to adoption.	Gather barriers as well as communication or training needs to tailor outreach efforts to best meet the stakeholders' needs.	User experience survey results.	Survey – Collect barriers to adoption 90 days prior to pilot; satisfaction survey 90 days post pilot and statewide.
	6.2 **Objective:** Increased accessibility for successful time entry and approval.	N/A	User experience survey results.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
	6.3 **Objective:** Ensure stakeholders rely on appropriate resources for project information updates.	N/A	User experience survey results.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.

Goals	Objectives	Baseline Measurements	Post Go-Live Measurement	Means and Frequency of Measurement (Report, Survey, Time Study, Process Mapping)
	6.4 **Objective:** Increase user satisfaction for all impacted groups.	N/A	User experience survey results.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
Goal #7: Ensure system and processes are clear and understandable for identified impact groups (Individuals, Providers, and Staff)	7.1 **Objective:** Increase number of readily accessible training materials and online documentation.	Determine current training materials available.	User experience survey results.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
	7.2 **Objective:** Decrease time for staff in describing/explaining the time entry and approval processes.	Determine time needs for staff in describing /explaining the time entry and approval process.	Establish time needs for staff in describing /explaining the time entry and approval process.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.

**These objectives are related to payroll and may be considered in the future projects.*

Functional Alignment and Scope Information

The Project conducted research to determine what would be involved for functional alignment, as some of the programs have the same need to meet EVV requirements. The aging technology systems and the business processes they support have been siloed and customized within programs and counties, limiting access to and preventing the sharing of key data. Processes have evolved from exclusively paper-based processes to a mix of paper and technology, enhanced occasionally as technology changes have been available and policy requirements have dictated. Research included the solutions APD in-home agencies are utilizing for EVV requirements and whether they are meeting the requirements. The results of this research are outlined below.

1. **Functional Alignment -** The Project met with APD, HSD, ODDS, SSP, and OHA to see where there could be alignment between all the programs for appropriate Medicaid populations.

    a. APD In-Home Agencies are required to become EVV compliant by January 1, 2020. The Project did research and determined that 61% of in-home agencies in Oregon reported being EVV compliant, with the most commonly applied solutions to meet requirements being ClearCare and Generations (which support the needs of larger agencies). Both ClearCare and Generations have EVV compliant options via a mobile application and telephony system, with extensive training, self-help features, and tutorials available on their website. End users have reported positive experiences and the systems include nice to have features like care notes and real-time messages and notifications to users. Needs of in-home agencies may be different than the needs of the State but the State has a responsibility to aggregate this data for reporting.

***See Appendix G for more detailed In-Home Agency EVV Information.*

b. Office of Developmental Disabilities Services (ODDS) is currently planning a redesign of eXPRS with their stakeholder groups to align with their strategic vision. ODDS provides services to the developmental disabilities population and shares the same needs as APD and HSD for meeting EVV requirements. Currently ODDS issues yearly authorizations for the individuals/authorized representatives to manage the hours the providers can work. ODDS serves approximately 12,000 individuals (which includes both children and adults) in their homes with PSWs providing the care. The PSWs are enrolled in the eXPRS system. They also enter their time in and time out in the eXPRS system and once time is entered for the pay period, they print the timesheet and the individuals sign for approval. ODDS issues hours and rate to an FMAS vendor for payment and tax calculations for their PSWs. APD, HSD, and ODDS programs are not in alignment for policy/program and ODDS is in the process of separating out Oregon Administrative Rules (OAR) which could potentially divide the programs even more. In the early planning of the project, the goal was to align policy/program between the programs, but it was determined this was not achievable due differing policies/programs.

c. Self Sufficiency Program (SSP) may have time capture needs for their Temporary Assistance for Needy Families (TANF) and Employment-Related Day Care (ERDC) programs. The Project gathered information on the SSP population to identify if these programs have time capture needs. The SSP programs TANF and ERDC may be interested in integrating with an EVV solution in the long-term. TANF is interested in tracking the attendance of participants in the Job Opportunity and Basic Skills (JOBS) program receiving funding through the TANF block grant. SSP is interested in the tracking of day care recipients paid by SSP on behalf of the Individual enrolled in the ERDC program. SSP is working on the IE Project and will be maintaining legacy systems upon the completion of IE to support these populations.

   ERDC previously attempted a project called Child Care Billing and Attendance Tracking (CCBAT) which was designed around capturing attendance and authorizations. This project did not successfully roll out, and SSP may be interested in rolling the EVV project into this. In 2017, ERDC funding was reduced by $9.3 million due to a reduction in federal funds while serving 16,323 children across 8,658 cases. As of October 2017, there were 1,691 licensed child care providers actively providing child care across the state for DHS families.

   TANF works with recipients to identify a path to self-reliance. TANF has tools that may need to be integrated into the system, including a data tracking tool used to track family progression. TANF, combined with Pre-Supplemental Security Income (Pre-SSI) and Social Security Disability Insurance (SSDI) programs, served 21,664 families, including 38,821 children and 18,571 adults in 2018. Most parents/caretakers in TANF are required to participate in the JOBS program, which requires them to attend education and training opportunities. Currently, there are no active efforts to automate the attendance on either the TANF, JOBS, or ERDC programs.

d. OHA 1915i and Home Health Services (HHS) programs are currently outside of scope for PTC. OHA is interested in integrating into an EVV solution with APD and HSD. Currently, the 1915i program serves 400 individuals and the providers that serve these individuals are a variety of mental health and peer support specialists. They are currently enrolled and managed in the

Medicaid Management Information System (MMIS). Billing is through Prior Authorizations (PA) and has a set rate per hourly unit authorized. The providers submit units through MMIS for reimbursement. There are validations in place that check all eligibility and won't allow billing over the PA. These providers are 1099 contractors.

There are 40 provider agencies (nursing, physical therapy, occupational therapy, medical supplies, durable medical equipment, etc.) for Home Health Services (HHS). These providers are prior authorized through plan of care (fee-for-service). They bill at an agency level through revenue codes. The revenue codes used to bill home health services can be found at the following link: https://www.oregon.gov/oha/HSD/OHP/Tools/Home%20Health%20Rates%20-%20January%201,%202019.pdf. Time in and time out is captured by the agencies but not provided to OHA. The location is assumed as the Individual's home but is not actively captured.

e. IE (Deloitte) was in review for a potential EVV solution. There was consideration and research done into the option of either pursuing integration/enhancement to IE or utilizing the master services agreement with Deloitte. Deloitte does offer a module for time capture, but it was determined to be out of scope of the special procurement for IE. Department of Administrative Services (DAS) Procurement Services advised the type and level of work required to complete the project was not supported under the master services agreement. At this time, any procurement that might benefit the State to align with existing technologies and vendors would have to be managed through a separate procurement process.

f. Workday has experienced ongoing delays with the implementation including work on phase two. Workday is continuing to clarify what will be in/out of scope for the time capture and payroll solution and how/what options exist for differing needs. Based on the information received, planning efforts are still being researched for the scope, and the goal is to do the State payroll system before involving other partners.

g. MMIS Modularity Project is in the process of hiring a planning vendor to assist with modularization of MMIS. This may suggest any EVV related module would be later in the 10-year plan of modularization of MMIS.

2. **COTS Basic + COTS Plus Customization (Galaxux) -** There is not a COTS specific solution for scoring. The Project has updated the COTS information from Galaxux.

   ***See Appendix H for more detailed information on COTS Basic + COTS Plus Customization.*

Solution Requirements

The solution requirements are organized into the following categories:

- **Business Rules** - Describes the specifics about each rule for validating time entries, authorizations (service matrix), and relationships for Individual/Provider.

- **Data Management** - Describes EVV components such as how time and location are captured including travel time.

- **Data Processing** - Describes the specifics about how time entries and adjustments are processed (what triggers are for adjustments) and determines what will happen with failed validations.

- **Security and Privacy** – Describes user role-based security (detail on each role and what access they have), user profiles, and any privacy rules.

- **User Experience** - Describes what users (Individuals, Providers, State Staff, etc.) will see and related functionality. Also, describes performance, languages, accessibility, etc.

- **Reporting** - Describes basic and detailed reporting functionality including custom reports.

- ****Payroll** - Describes the payroll process i.e., taxes, union dues, garnishments, quarterly and yearly reporting, etc. Also describes the rules and flow for calculating overtime.

The requirements are prioritized by Critical, High, Medium, and Low. The goal of the critical requirements is to set the minimally viable product for initial release. High, medium, and low requirements will be used for planning future releases depending on the status of the project. Please see below for the definitions.

- **Critical** - "Shall"- Critical Impact - required to achieve strategic outcomes.
- **High** - "Should"- Considerable Impact - highly recommended but not required.
- **Medium** - "Could"- Some Impact - preferred but not required.
- **Low**- "Would" - Low Impact - considered for future enhancement.

***See Appendix I for comprehensive Project Requirements.*

***See Appendix J for Payroll Requirements (for reference for future projects)*

Project Assumptions

The following are project assumptions:

- The agreed upon option will continue to support the final rule set forth by DOL in the FSLA to Domestic Service, 78 FR 60454 (Oct. 1, 2013).
- The agreed upon option will ensure compliance with the 21st Century CURES Act.
- Federal and State funding will be made available as needed for the life of the project.
- Key project members will possess the skills needed to complete project tasks as assigned.
- Planning activities will be based on the availability of expected resources (Technical, Business, SME's and Stakeholders)
- There will be an increase in required resources for security administration and management for internal and external users.
- The level of risk between alternatives is not equal, but an average risk score was the most objective way to compare alternatives.
- Through real-time tracking, it will help improve the safety and security of vulnerable individuals by ensuring services are being provided and give the State a better understanding of individuals who may be at risk of not receiving their services.
- Claims processing will remain in existing legacy system to ensure correct funding allocation.
- Through the life of the project there will continue to be IE related policy and code freeze processes the project will need to accommodate in schedule planning.

- The IE Project will continue to be the priority project above PTC.

Alternative Analysis Options

Below are the alternative options the Project Team researched for mobile application and web functionality to determine which would be viable options for the project to move forward. See below for high level summary of each option:

1. **In-House Build**
    - A front end to CEP for time capture capability meeting EVV requirements.

2. **eXPRS Time Entry option**
    - APD and HSD to transition to eXPRS for all time capture related needs and pass the information to the mainframe for processing.

3. **All in-eXPRS Mobile-EVV with Mainframe**
    - APD and HSD to transition to eXPRS for all time capture related needs as well as inclusion of FMAS.

4. **All in-eXPRS Mobile-EVV without Mainframe**
    - APD and HSD to transition to eXPRS for all (policy/rules/business process/system) needs.

5. **MMIS Current Contract**
    - Utilizing the current MMIS vendor and contract to support an EVV solution.

6. **SaaS**
    - Utilizing SaaS would eliminate the need to install new servers and software at the State Data Center and data would be stored with the vendor solution.

7. **Other Agency Solutions-Oregon Department of Transportation (ODOT)**
    - Integrating into the State instance of KRONOS, a time keeping software being piloted by ODOT.

8. **Free and Open Source Software (FOSS)**
    - FOSS that may be utilized for EVV with our current systems.

9. **Salesforce**
    - A cloud-based platform solution that would require a separate procurement for system integration services.
    - Given the State's licensing contract for Salesforce, the State could independently develop on the Salesforce platform.

10. **Cost of Doing Nothing**
    - The cost the Agency would incur if an EVV option is not implemented.

Alternative Analysis

Below are the alternatives the Project analyzed which describe the option with the associated benefits, risks, and estimated cost for each alternative. For more information regarding the methodology used to calculate "Staffing Costs/Professional Services Costs" for each of the alternatives, see the 'Selection Criteria and Ranking' section.

Option 1 – In-House Build

This option proposes a mobile application and a web front-end user interface that allows HCWs and PSWs to enter time electronically. HCWs and PSWs will use the online web interface and mobile application to record their service time and mileage entries. The scope of work for this option will only include the system modifications to the Mainframe systems, new development for a web front-end UI (user interface), and new development for a mobile application. Ongoing maintenance and enhancement work will remain in house.

Benefits to implementing In-House Build:

- Providers have access to both mobile application (with offline capability) and online functionality
- Individuals and their Authorized Representatives (AREPs) have access to electronic approval of time entries
- Least impact to mainframe applications and mainframe development resources by utilizing existing mainframe functionality for authorizations and payments
- Real-time provider eligibility validation
- Real-time individual eligibility validation
- Individual and provider demographic information is accurate/up to date
- Continue to allow last day worked and emergency payments/off cycles processing
- EVV compliant

Risks or negative outcomes associated with implementing In-House Build:

- Resourcing issues may still be a risk with prioritization of OIS resources
- Additional resourcing needed for ongoing Operations and Maintenance for the online/web application

Estimated Cost:

In-House Approach – 12-18 Months	**Total**
State Data Center Costs	$158,270
Software Costs	$0
Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$3,803,800
Implementation Total	**$3,962,070**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190

Software Licensing, Hosting or User/Transaction Based Fees	$0
State Data Center	$324,870
Maintenance Total	**$697,060**
TOTAL	**$4,659,130**

Option 2 – eXPRS – Providers enter time via eXPRS System

This option will utilize the existing technology, with eXPRS desktop and eXPRS Mobile-EVV, for time entry currently done by ODDS PSWs. This option will require modifications to both eXPRS and Mainframe to allow HCWs and PSWs to log into eXPRS and enter time entries via an online web interface. This will allow for a consolidated environment across all applications, individual populations, and provider populations. Time entries will be sent to CEP to process payroll. Ongoing maintenance and enhancement work will remain in house.

Benefits to implementing eXPRS - Providers enter time via eXPRS System:

- eXPRS can access the authorization information in real-time
- Basic time entry validations exist in eXPRS
- eXPRS, in the upcoming release, will have the ability to capture last day worked and emergency payments/off-cycles in an automated manner (manual functionality is currently available)
- Pended time entries: Queue already exists in eXPRS to work pends (by Field Office and Central Office – depending on the reason for the pend)
- Real-time provider eligibility validations
- Real-time individual eligibility validations
- Would allow for individual notifications to be sent
- Individual and provider demographic information is accurate/up to date

Risks or negative outcomes associated with implementing eXPRS - Providers enter time via eXPRS System:

- Estimated number of OIS hours would likely exceed 3,000 actual effort hours (could be more during design sessions) (OIS performs estimation based on the combination of size/risk/complexity along with the expert judgement of their system developers.)
- Expected risk of change to existing legacy application would be medium to high
- Policy and business processes are not in alignment
- Potentially not EVV compliant due to limited current CMS guidance (lack of offline functionality would be non-compliant) (Offline functionality is being pursued by ODDS)
- Resourcing issues may still be a risk for ODDS and APD with prioritization of OIS resources.
- Limitations to include OHA Home Health program
- Limitations to include OHA 1915i program

Estimated Cost:

eXPRS Time Entry End Approach – 18-24 Months	**Total**
State Data Center Costs	$158,270
Software Costs	$0

Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$6,738,959
Implementation Total	**$6,897,229**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees	$0
State Data Center	$324,870
Maintenance Total	**$697,060**
TOTAL	**$7,594,289**

Option 3 – All in-eXPRS Mobile-EVV with Mainframe – Provider Time Capture and FMAS in eXPRS

This option will utilize the existing technology with eXPRS desktop and eXPRS Mobile-EVV for time entry currently done by ODDS PSWs, including FMAS for payroll processing. This option will require modifications to both eXPRS and Mainframe to allow HCWs and PSWs to log into eXPRS and enter time entries via an online web interface. This will allow for a consolidated environment across all applications, individual populations, and provider populations. This option would require some policy and business process alignment. Ongoing maintenance and enhancement work will remain in house.

Benefits to implementing All in-eXPRS Mobile-EVV with Mainframe:

- Basic time entry validations already exist in eXPRS
- Would have the ability to capture last day worked and emergency payments/off cycles in an automated manner
- Pend queue already exists in eXPRS to work pends (by Field Office and Central Office depending on the reason for the pend)
- Real-time provider eligibility validations
- Real-time individual eligibility validations
- Individual and provider demographic information is accurate/up to date
- OT and Travel time would be calculated accurately with cross program providers in the same solution (same payment system for programs)
- Would allow for individual notifications to be sent
- Single source payment system

Risks or negative outcomes associated with implementing the All in-eXPRS Mobile-EVV with Mainframe:

- Expected risk of change to existing legacy application would be medium to high
- Additional development on the mainframe for claim financing for funding sources
- Policy and business processes are not in alignment
- Pay cycles are not in alignment

- Resourcing issues may still be a risk for ODDS and APD with prioritization of OIS resources
- Updating/changing coding could cause some unforeseen system issues
- Potentially not EVV compliant due to limited current CMS guidance (lack of offline functionality would be non-compliant) (Offline functionality is being pursued by ODDS)
- Limitations to include OHA Home Health program
- Limitations to include OHA 1915i program

Estimated Cost:

eXPRS All-in w/MF Approach – 24 Months	**Total**
State Data Center Costs	$158,270
Software Costs	$0
Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$7,701,667
Implementation Total	**$7,859,937**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees (This includes payroll services through existing contract held by ODDS)	$47,684,712
State Data Center	$324,870
Maintenance Total	**$48,381,772**
TOTAL	**$56,241,709**

Option 4 - All in eXPRS Mobile-EVV without Mainframe

This option will utilize the existing technology and bring APD, HSD, and ODDS into alignment for rules/policy/business process/system. This option will require modifications to eXPRS to allow HCWs and PSWs to log into eXPRS and enter time entries via an online web interface. This will allow for a consolidated system application across individual and provider populations. Ongoing maintenance and enhancement work will remain in house.

Benefits to implementing All in eXPRS Mobile-EVV without Mainframe:

- Utilization of existing technology
- Basic time entry validations already exist in eXPRS
- Would have the ability to capture last day worked and emergency payments/off cycles in an automated manner
- Pend queue already exists in eXPRS to work pends (by Field Office and Central Office depending on the reason for the pend)
- Real-time provider eligibility validations
- Real-time individual eligibility validations

- Individual and provider demographic information is accurate/up to date
- OT and Travel time would be calculated accurately with cross program providers in the same solution (same payment system for programs)
- Would allow for individual notifications to be sent
- Single source payment system

Risks or negative outcomes associated with implementing the All in eXPRS Mobile-EVV without Mainframe:

- Expected risk of change to existing legacy application would be high
- Policy and business processes are not in alignment
- Pay cycles are not in alignment
- Resourcing issues may still be a risk for ODDS and APD with prioritization of OIS resources
- By updating/changing coding could cause some unforeseen system issues
- Potentially not EVV compliant due to limited current CMS guidance (lack of offline functionality would be non-compliant) (Offline functionality is being pursued by ODDS)
- Additional resources may be needed for Operations and Maintenance
- MMIS resourcing needs for modifications to the eligibility interface with eXPRS to include APD and HSD eligibility
    - *Note: Oregon Project Independence (OPI) and Extended Waiver Eligible (EWE) individuals are not in MMIS and/or Oregon ACCESS*
- Limitations to include OHA Home Health program
- Limitations to include OHA 1915i program

Estimated Cost:

eXPRS All-in w/out MF Approach – 24 Months	**Total**
State Data Center Costs	$158,270
Software Costs	$0
Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$7,701,667
Implementation Total	**$7,859,937**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees (This includes payroll services through existing contract held by ODDS)	$47,684,712
State Data Center	$324,870
Maintenance Total	**$**48,381,772
TOTAL	**$56,241,709**

Option 5 – MMIS Current Contract

This option would entail using current MMIS vendor and contract to support an EVV solution. If the timeline for modularity is far enough in the future, it would be equivalent to the "Do Nothing" option.

Benefits to implementing MMIS Current Contract:

- Potential to coordinate efforts with OHA and utilization of existing resources, contract and technology
- DXC is aware EVV compliance requirements and is the vendor for MMIS for Oregon
- Some staff are already familiar with using the MMIS system
- In-Home Agency and Home Health providers currently use the system for the MMIS Web portal
- HSD providers are currently stored and maintained in MMIS system
- Alignment on enterprise solution for MMIS

Risks or negative outcomes associated with implementing MMIS Current Contract:

- Potential risk if need to change legacy/mainframe
- Prioritization of other MMIS work including IE interfacing
- System and/or vendor limitations that prevented CEP inclusion in initial MMIS implementation
- Cross program travel time hours/OT hours calculation
- Movement of information into MMIS could have downstream impacts to other systems
- New mainframe interface needed for non-financial eligible OPI and EWE not stored in MMIS and IE ONE
- MMIS does not always apply Service Eligibility date ranges (segments) in Recipient module
- Long-term Operations and Maintenance are unclear past the 2-year contract extension option
- Sub-contracting with Sandata via MMIS would add an additional vendor to the project
- An amendment for the special procurement would be required due to added cost
- Sub-contracting could also mean a separate license agreement could be required when transitioning away from DXC
- If we include PTC in the MMIS scope, DAS Procurement Services would have to be involved at some level and it's possible there is risk of losing delegation for MMIS in trying to force this body of work under the MMIS RFP from 2004
- CMS will only pay for one EVV solution for the State
- Additional resources may be needed for Operations and Maintenance

Estimated Cost:

- For cost comparison purposes the Montana modularity pricing for a provider module is claims based and includes some degree of provider management. The cost is around $50 million total. DDI is $13 million and Operations and Maintenance is $37 million for 4 years.

Below is the estimated cost breakdown:

MMIS Approach – 18-24 Months	**Total**
State Data Center Costs	$0
Software Costs	$662,450
Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$5,843,514
Implementation Total	**$6,505,964**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees	$7,000,000
State Data Center	$0
Maintenance Total	**$7,372,190**
TOTAL	**$13,878,154**

Option 6 – SaaS

The SaaS approach involves implementing new software but does not require installing new servers and software at the State Data Center. Data for this approach is stored by the solution vendor in an environment that meets the agency security and privacy requirements.

Benefits to implementing a SaaS solution:

- With multiple EVV solutions having been implemented, the market place for vendor solutions is much larger than previously identified
- Since SaaS solution vendors have implemented solutions in other States for EVV, they are familiar with the EVV requirements
- Offers robust functionality with automated workflows, a variety of time capture methods, and electronic or telephonic notifications
- Several vendors in this space have deep experience providing time capture solutions to Direct Care Workers under the Medicaid program
- Most of the desired functionality is already existing; project efforts to implement are focused on configuration, integration, and training
- Requires fewer technical resources from the state
- Shorter implementation timeframe
- No hardware/software to install/maintain
- Provides necessary output to solve the business problem
- Many SaaS solutions are extensible to meet future business goals, such as payroll
- Most of the responses to the original PTC RFI proposed a SaaS solution, which is consistent with the direction of the software industry and market research into time capture solutions

- No dependency on State Data Center
- The solution will automate the time capture process and eliminate or greatly reduce manual processes associated with time capture

Risks or negative outcomes associated with implementing a SaaS solution:

- Lack of direct access to State owned data can result in the inability to analyze and report on the data and may preclude ad-hoc queries
- May be limited in the ability to incorporate agency requirements into a Service Level Agreement with the solution vendor, therefore changes in business process, policy, and potential workarounds will need to be considered.
- Agency specific customizations may be difficult or unattainable depending on the solution
- Solution may consist of technology involving unique hardware that must be in place at all service locations (Fixed Visit Verification/Electronic Visit Verification devices)
- Not all SaaS solutions can scale into additional case management and provider payment (payroll) functions that are envisioned in the long-term future state
- Additional resources may be needed for Operations and Maintenance

Estimated Cost:

This approach assumes an 18-24-month DDI period with the commencement of licensing or fees after implementation. It is assumed that the solution and all data is hosted by the SaaS vendor. Some vendors may require an up-front payment of a portion of the implementation and integration services.

SaaS Approach – 18-24 Months	**Total**
State Data Center Costs	$0
System Integration/Software Costs**	$7,542,540
Hardware Costs	$18,375
State Staffing Costs / Professional Services Cost	$5,026,884
Implementation Total	**$12,587,799**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees	$4,312,159
State Data Center	$0
Maintenance Total	**$4,684,349**
TOTAL	**$17,272,148**

** All associated cost Information is provided as captured in the Galaxux Alternative Analysis document, compiled in 2015, with updates made to account for inflation and an extended implementation timeline. Inflation costs were calculated at 2% for software licensing and impacted costs per Galaxux, and staffing costs were calculated at ~6% per COLA (2016 – 1.48%, 2017 – 2.75%, 2018 – 1.85%, 2019 – 0).*

**System Integration/Software Cost Breakdown:

System integration costs were calculated by compiling five current/recently executed State of Oregon SaaS solutions similar in size, scope, and complexity, and averaging the associated contracted system integration costs. Project information has been deidentified for confidentiality. See below for individual costs used for calculations.

Project A	$ 9,000,000.00
Project B	$ 6,543,300.00
Project C	$ 4,196,300.00
Project D	$ 6,286,900.00
Project E	$ 6,296,000.00
Average (System Integration)	**$ 6,464,500.00**

Software costs were calculated as 25% of the licensing costs (per Galaxux). See below for calculations.

$4,312,159 (Software Licensing) *25% = **$1,078,040 Software Costs**

These costs were then added together for a comprehensive system integration/software cost estimation.

$6,464,500 (System Integration)
+$1,078,040 (Software Costs)
= **$7,542,540 System Integration/Software Costs**

Note: These costs are for estimation purposes only - actual costs may vary.

Option 7 - Other Agency Solutions – ODOT

This option would require collaboration with DAS to integrate into the State instance of Kronos, a time keeping software currently in the process of being rolled out to replace multiple time and attendance systems. The key limitation is the completed implementation for currently prioritized agencies before expansion can occur. The Workday implementation delays have pushed back implementation dates for ODOT.

Benefits to implementing Kronos:

- Kronos is a highly-regarded and well-proven system for the tracking of time and attendance
- APD utilizing the ODOT contract could potentially lower the overall cost of integration
- Since ODOT's project is in the pilot phase, there are experienced state resources

Risks or negative outcomes associated with implementing Kronos:

- The Workday implementation delays have pushed back implementation dates for ODOT
- Would need to identify an additional component for cross program travel time and OT calculations

- Would need to identify an additional component for integration of data for reporting and payroll
- Additional conversations with the vendor to confirm EVV compliance scenarios
- Additional resources may be needed for Operations and Maintenance

Estimated Cost:

ODOT provided the Project with a fee schedule which outlines the annual fees and hosting costs plus per employee per month (PEPM) costs. With 24,000 providers, a rough estimate puts costs at $1.2 million per year. This number does not include costs for professional services, training, or hardware. Professional services and training are estimated to cost roughly $1.5 million for ODOT's project. Hardware costs could be optional.

The estimated cost breakdown below does not account for the optional hardware:

Kronos Approach – 18-24 Months	**Total**
State Data Center Costs	$0
Software Costs	$0
Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$5,446,884
Implementation Total	**$5,446,884**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees	$6,000,000
State Data Center	$0
Maintenance Total	**$6,372,190**
TOTAL	**11,819,074**

Option 8 – FOSS

This option would allow us to meet the minimum requirements for EVV Compliance, with less of a financial burden than procuring a vendor solution. The selection of open source software would provide the State with the opportunity to improve functionality and adapt the software to fit our needs. If this solution is chosen, an RFP will be required if the license fees exceed $150,000.

There are several FOSS solutions available to help meet the EVV data collection items. The solutions that were explored for the sake of this analysis are as follows:

- Axxess
- Alora
- AlayaCare
- MyGeoTracking – Solution offers Geofence Based visit verification, mobile time clock apps, and phone call and text-based visit recording

- Vesta EVV – Mainly used in Texas, currently serving Aetna, Accenture, Anthem, Blue Cross Blue Shield, Cigna-Healthspring, and United HealthGroup

Benefits to implementing FOSS:

- Decreased or free software costs
- Agency would have full control of using and customizing source code (also facilitates in discovering and fixing security/privacy vulnerabilities proactively)
- Agency could test against the OSS without committing to the solution
- No contracts required to secure the solution
- There are many FOSS vendors that the state could explore as options

Risks or negative outcomes associated with implementing FOSS:

- There is less guarantee of development with free software systems
- Support services generally rely on communities of other users as opposed to vendor support
- If vendor support exists, we will be limited to their support hours which are likely not 24/7
- Shifting project priorities may require OIS resource re-allocation that would be needed for this solution
- With open source code, potential security vulnerabilities are quantifiable and accessible for remediation vs closed source solutions where you have no tangible way to verify if the security meets our need

Estimated Cost:

Alora – Cost is based on either unlimited users or unlimited individuals. Pricing is tiered by size of Agency (tier details are not included). Medium sized agencies pay between $600-$1,200 a month, while large agencies may range from $1,200 to $6,000 per month. More specific pricing is available upon request.

AlayaCare – Cost is determined by the number of modules selected and the total number of service hours each month. More specific pricing is available upon request.

MyGeoTracking – Cost is based on modules selected per user/per month. At a non-enterprise level, Tracking costs $5/month/user, Manual Time Clock with GPS or IVR/SMS Time Clock costs $5/month/user, and Automatic Time clock with Geofencing costs $10/month/user. Field Data also starts at $5/month/user for mobile forms and includes notes/pictures and electronic signature. Each module includes add-ons for a fee.

State of Oregon Estimates:

Vendor	Number of Users (Role)	Cost / Provider	Total / Month	Total / Year	Total / 5 Year
Alora	N/A	N/A (flat rate)	$1,200 - $6,000	$14,400 - $72,000	$72,000 - $360,000
MyGeoTracking	24,000 (Provider) 1,000 (State Staff)	$5.00/month - $10.00/month $5.00/month	$120,000 - $240,000 $5,000	$1,440,000 - $2,880,000 $60,000	$7,200,000 - $14,400,000 $300,000 **Combined Total** $7,500,000 - $14,700,000

FOSS Approach – 12-18 Months	Total
State Data Center Costs	$158,270
Software Costs	$0
Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$3,232,172
Implementation Total	**$3,390,442**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees	$14,700,000
State Data Center	$324,870
Maintenance Total	**$15,397,060**
TOTAL	**$18,787,502**

Option 9 – Salesforce

This option is a cloud-based Customer Relationship Management (CRM) system - data for this approach is stored by Salesforce in an environment that meets the agency security and privacy requirements. *Note: Because the State will need to hire a system integrator to perform the work, an RFP will be required along with additional DDI costs, as the State lacks skilled Salesforce developers.*

Benefits to implementing Salesforce:

- Confirmed ability to work with Carahsoft to purchase licenses (without seeking competitive quotes for other CRM tools)

- Offers robust functionality with automated workflows, a variety of time capture methods, and automated notifications
- Most of the desired functionality is already existing; project efforts to implement are focused on configuration, integration, and training (faster deployment)
- Solution may allow State to utilize the Deliverables from PTC 1.0
- Requires fewer technical resources from the state
- Shorter implementation timeframe
- No hardware/software to install/maintain (automatic updates)
- Provides necessary output to solve the business problem
- Flexible and scalable to meet potential future needs
- Most of the responses to the original PTC RFI proposed a SaaS solution, which is consistent with the direction of the software industry and market research into time capture solutions
- Cloud-based system - no dependency on State Data Center
- Centralized data that is instantly accessible, including customized dashboards and notifications

Risks or negative outcomes associated with implementing Salesforce:

- May be limited in the ability to incorporate agency requirements into a Service Level Agreement (SLA) with Salesforce
- Agency specific customizations may be difficult or unattainable
- Additional resources will be needed for Operations and Maintenance

Estimated Cost:

Salesforce Approach – 12-18 Months	**Total**
State Data Center Costs	$0
System Integration*	$6,464,500
Software/Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$3,639,658
Implementation Total	**$10,104,158**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees**	$21,663,450
State Data Center	$0
Maintenance Total	**$22,035,640**
TOTAL	**$32,139,798**

*System Integration/Software Cost Breakdown:

System integration costs were calculated by compiling five current/recently executed State of Oregon SaaS solutions similar in size, scope, and complexity, and averaging the associated contracted system integration costs. Project information has been deidentified for confidentiality.

Project A	$ 9,000,000.00
Project B	$ 6,543,300.00
Project C	$ 4,196,300.00
Project D	$ 6,286,900.00
Project E	$ 6,296,000.00
Average	**$ 6,464,500.00**

Note: this cost is for estimation purposes only - actual cost may vary.

**License Cost Breakdown:

State Staff/Provider Licenses:

25,500 licenses (24,000 Providers + 1,500 State Staff users) x $125* = $3,187,500

**Actual current cost is $125 per year per license (this cost could be reduced based on volume)*

Individual Licenses:

20k logins a year for $60 x 365 = $21,900**

***Calculated using community licenses (No access to mobile app – access to website for approvals, etc.)*

*$3,187,500 + $21,900 = $3,209,400 x 1.35*** = 4,332,690 a year for licenses x 5 years =* ***$21,663,450***

****This number represents the associated support costs as quoted by Salesforce.*

Option 10 - Cost of Doing Nothing

This option would continue current process.

Benefits to Doing Nothing:

- The team would be dissolved, and no additional money or time would be invested in the project
- No time or money would be spent on procuring a product nor a vendor for the project

Risks or negative outcomes associated with Doing Nothing:

- Failure to comply with federal regulations will result in a loss of funds matched by the federal government
- Continued reliance upon an outdated computer system (Mainframe) means limited resources could be a problem further down the line

Estimated Cost:

- If the state fails to incorporate an EVV solution, it is subject to incremental reduction in Federal Medical Assistance Percentages (FMAP) up to 1%. The penalties enforced on the State and APD for non-compliance for the first year alone amounts to $874,314. When penalties reach 1%, penalties are to be nearly $6.7 million annually.
- This lack of a solution means the state continues to pay an estimated 70 Full-Time employees at APD offices to enter time (typical classification for this role is an Office Specialist 2), at an estimated current annual cost of $4.2 million. This annual cost is likely to increase over time.
- Doing nothing will also mean that the state continues with printing vouchers, a cost which annually is nearly $1.4 million. This number is likely to grow with the population.
- Total costs are shown below and assume the unlikely scenario that employment and printing/postage costs will stay stagnant. It is very likely these numbers will increase over time; however, it is not possible to accurately depict those numbers.

Fiscal Year	Penalties	Employment	Printing / Postage	Total
2020	$874,314	$4,200,000	$1,387,815	$6,462,129
2021	$3,202,812	$4,284,000	$1,415,571	$8,902,383
2022	$5,007,680	$4,369,680	$1,443,883	$10,821,243
2023	$6,676,906	$4,457,074	$1,472,760	$12,606,740
2024	$6,676,906	$4,546,215	$1,502,216	$12,725,337
5-year total	$22,438,618	$21,856,969	$7,222,245	$51,517,832

Alternative Scoring Guide

Each alternative was scored using the below criteria. Note: The percentage next to the ranking criteria represents the weighted score for each category totaling 100%.

Alternative Scoring Guide		
Ranking Criteria (100%)	**Definitions**	**Scoring Key (1 – 5)**
Requirements (30%)	The estimated requirements met by the solution.	1- 0-92% Requirement Alignment 2- 93-94% Requirement Alignment 3- 95-96% Requirement Alignment 4- 97-98% Requirement Alignment 5- 99-100% Requirement Alignment
Estimated Cost* (25%)	Comparative estimated cost for the solution.	1- Comparative High Cost 2- Comparative Middle-High Cost 3- Comparative Middle Cost 4- Comparative Low-Middle Cost 5- Comparative Lowest Cost
Resources (15%)	Estimated amount of resources identified to implement the solution on schedule.	1- 41+ FTE 2- 31-40 FTE 3- 21-30 FTE 4- 11-20 FTE 5- 0-10 FTE

Schedule (10%)	Estimated implementation timeline for the solution.	1- > 2 years 2- 1 ½ years – 2 years 3- 1 year – 1 ½ years 4- 6 months – 1 year 5- < 6 months
Risk (10%)	Likelihood and impact of associated risks.	1- Overall Risk Score = 4.1- 5 2- Overall Risk Score = 3.1- 4 3- Overall Risk Score = 2.1- 3 4- Overall Risk Score = 1.1- 2 5- Overall Risk Score = 0-1
Mission (5%)	Alignment with State and APD goals and objectives.	1- 0-19% Mission Alignment 2- 20-39% Mission Alignment 3- 40-59% Mission Alignment 4- 60-79% Mission Alignment 5- 80-100% Mission Alignment
Reusable Artifacts (5%)	Previous documentation utilization.	1- 0-19% Reusable Content 2- 20-39% Reusable Content 3- 40-59% Reusable Content 4- 60-79% Reusable Content 5- 80-100% Reusable Content

* These criteria will be a comparison with the other options, as opposed to evaluating as stand-alone elements.

Selection Criteria and Alternatives Ranking

The following criteria for scoring identify quantitative and qualitative project areas to evaluate the most viable alternatives. The criteria were selected based on prior project analysis and research into industry standards evaluating alternatives for the implementation of the best solution. See *'Alternative Scoring Guide'* section for scoring key.

Requirements: Requirements the solution must support are in the Hewlett Packard Application Lifecycle Management (HP ALM) requirements documentation. The Project Team recently reviewed, revised, and vetted the requirements with impacted stakeholders. The requirements were then prioritized as Critical, High, Medium, and Low and were evaluated to ensure the solution meets the critical business needs.

Out of the total number of business requirements scored (42), 31 were identified as Critical, six were identified as High, and five were identified as Medium. For the purposes of scoring, all business requirements determined to be Low were not included as they are all low impact and considered "nice to have" features. In addition, functional requirements were not scored as they directly support the identified business requirements. The selection of critical requirements will be essential for the viable product for the initial release. High and Medium will be considered during the RFP process for scoring purposes. Low requirements will be used for future planning.

Each requirement was scored for alignment individually against each alternative using the key below:

KEY	
0	**Does NOT Meet Requirement**
0.5	**Partially Meets Requirement**
1	**Meets Requirement**

These scores were then totaled for each alternative option, for a total percentage of alignment by priority. This alignment percentage was then used to calculate the weighted percentages as follows (for a total of 100% requirement alignment): Critical – 60%; High – 30%; Medium – 10%; Low – 0%

Below is a summary table outlining requirement alignment scoring results based on the weighted percentages. An overall score was assigned using the alignment criteria for the Total Percentage as defined in the '*Alternative Scoring Guide*.'

Alternative Options	Critical	High	Medium	Total Percentage	Overall Requirements Score
In-House Build	60%	30%	10%	100%	5.00
eXPRS Time Entry	57%	30%	10%	97%	5.00
eXPRS with Mainframe	57%	30%	10%	97%	5.00
eXPRS w/o Mainframe	57%	30%	10%	97%	5.00
MMIS	56%	30%	10%	96%	5.00
SaaS	60%	30%	10%	100%	5.00
Kronos	55%	30%	9%	94%	5.00
FOSS	58%	30%	10%	98%	5.00
Salesforce	58%	30%	10%	98%	5.00
Do Nothing	47%	25%	0%	72%	4.00

***See Appendix K for the Project Requirements Detailed Scoring*

Estimated Cost: An estimated cost has been collected in the Alternative Analysis, when available. The full life-cycle costs including Design, Development, Testing, Training, Migration, Implementation, and Operations and Maintenance (total and by fiscal year) will be used for comparison; see example below:

**Given the following estimated costs: $10 MM, $15 MM, $8 MM, $12 MM, $20 MM, $4 MM, $13 MM, $22 MM, $6 MM, $25 MM, $30 MM, $7 MM

The alternatives would be ranked in order of high to low: 4, 6, 7, 8, 10, 12, 13, 15, 20, 22, 25, 30
The median value would be determined (High-Low/2=Average): (30-4)/2=**13** – this value would be assigned a ranking of 3.

The median value of the high-middle would be determined [(High-Middle)/2] + Middle]: (30-13)/2=8.5 + 13 = **21.5** – this value would be assigned a ranking of 4.

The median value of the low-middle would be determined [(Middle-Low)/2] + Low]: (13-4)/2=4.5 + 4 = **8.5** – this value would be assigned a value of 2.

Once this is complete, the values would be assigned a ranking: 1 (4), 2 (8.5), 3 (13), 4 (21.5), 5 (30)
The example above would be ranked as follows: **1**- (4, 6), **2**- (7, 8, 10), **3**- (12, 13, 15), **4**- (20, 22), **5**- (25, 30)

Below is a summary table outlining the estimated cost scoring results.

Alternative Options	Total Estimated Cost	Overall Estimated Cost Score
In-House Build	$4,659,130	5.00
eXPRS - Time Entry	$7,594,289	4.75
eXPRS - All-in with MF	$56,241,709	1.00
eXPRS - All-in without MF	$56,241,709	1.00
MMIS	$13,878,154	4.25
SaaS	$17,272,148	4.00
Kronos	$11,819,074	4.50
FOSS	$18,787,502	4.00
Salesforce	$32,139,798	3.00
Do Nothing	$51,517,832	1.50

***See Appendix L Alternative Analysis Cost Comparison*

Mission: The mission includes an evaluation of qualitative factors important to the selection of a path forward. Factors include but are not limited to: project goals including the effects on business processes and functions; the effects on the organization such as culture and end user benefits; and other non-quantifiable aspects of the business environment.

The following elements were extracted directly from the APD Strategic Plan:

DHS Mission: To help Oregonians in their own communities achieve wellbeing and independence through opportunities that protect, empower, respect choice and preserve dignity.

APD Vision: Oregon's older adults, people with disabilities and their families experience person-centered services, supports and early interventions that are innovative and help maintain independence, promote safety, well-being, honor choice, respect cultural preferences and uphold dignity.

The following APD Goals will be assessed for alignment with each alternative:

- **Accessibility**: Oregonians can readily and consistently access services and supports to meet their needs.

  Actions - Design improvements to increase individual knowledge of access to services and case management. Continue developing platforms (such as Aging and Disability Resource Centers (ADRC) and IE platforms) and best practices for individuals who are technologically savvy, such as web sites, hotlines, and other self-serve mechanisms where individuals can access information and services while retaining the option for individuals to get information in one-on-one, in person contact with staff. Implement ongoing, sustainable supports for the direct care workforce in partnership with stakeholders.

- **Quality outcomes**: Oregonians engage in services and supports that are preventive, evidence-informed, and lead to quality outcomes.

  Actions - Continue modernizing data and information technology systems (CAM, IE, ADRC) to develop greater capacity for data collection and analysis. Work with DHS and other agencies to develop strategic data sharing agreements for policy planning in the areas of health, housing, transportation, and other services under other state agencies' purview, as well as potential partnerships with universities and community colleges.

Each identified element was scored for alignment individually against each alternative using the key below:

KEY	
0	**Does Not Align with Mission**
0.5	**Partially Aligns with Mission**
1	**Fully Aligns with Mission**

These scores were then totaled for each alternative option, for a total percentage of alignment.

Below is a summary table outlining the mission scoring results. An overall score was assigned using the alignment criteria for the Total Percentage as defined in the '*Alternative Scoring Guide*.' Please note: These overall mission scores are based on qualitative measures and are subjective. The team evaluated each option and assigned an overall score of how well it aligned to the Agency's mission, vision, and goals.

Alternative Options	Total Mission Alignment	Overall Mission Score
In-House Build	91%	5.00
eXPRS - Time Entry	82%	5.00
eXPRS - All-in with MF	73%	4.00
eXPRS - All-in without MF	77%	4.00
MMIS	86%	5.00
SaaS	95%	5.00
Kronos	86%	5.00
FOSS	95%	5.00
Salesforce	95%	5.00
Do Nothing	14%	1.00

See *'Goals, Objectives, and Measurements'* for more information on the project goals.

***See Appendix M for the Mission Detailed Scoring*

Estimated Schedule: An estimate for how long each option will take to implement was determined for each alternative based on the type of solution. Estimates were based on a combination of previously suggested timelines and expert judgement from experienced team members.

Below is a summary table outlining the estimated schedule scoring results In-house and eXPRS options were based on estimates from OIS as referenced in the *'Alternative Analysis'* section. The project team divided out what would be the longest effort and then broke it out into 6-month increments.

Alternative Options	5 (<6 mo)	4 (6 mo – 1 yr)	3 (1 yr – 1 ½ yrs)	2 (1 ½ yrs - 2 yrs)	1 (>2 yrs)	Overall Estimated Schedule Score
In-House Build			X			3.00
eXPRS Time Entry				X		2.00
eXPRS with Mainframe					X	1.00
eXPRS without Mainframe					X	1.00

MMIS				X		2.00
SaaS				X		2.00
Kronos				X		2.00
FOSS			X			3.00
Salesforce			X			3.00
Do Nothing	X					5.00

Risk: Risk items were captured for each alternative utilizing the Probability and Impact Matrix (included in appendix O). The Project used the methodology and tools defined in the PMP. The overall risk assessment includes the following factors: capability of the agency to manage the investment, overall risk of investment failure, organizational and change management, technology, strategic plan, and project resources.

Below is a summary table outlining the risk scoring results.

Alternative Options	Total Average Risk Score	Overall Risk Score
In-House Build	4.1	2.00
eXPRS - Time Entry	2.9	3.00
eXPRS - All-in with MF	3.0	3.00
eXPRS - All-in without MF	3.1	3.00
MMIS	3.4	2.00
SaaS	2.0	4.00
Kronos	3.9	2.00
FOSS	3.8	2.00
Salesforce	2.7	3.00
Do Nothing	4.3	1.00

***See Appendix N for complete Alternative Analysis Risk Log for each alternative.*

***See Appendix O Project Risk Narrative for the definitions of probability and impact by objective.*

Resources: The solution needs to have the required resources to be successful. Each solution was compared to the estimated resources needed to implement each option.

Staffing costs were estimated using existing policy option package data for personnel costs. Total number of staff needed is based on the staffing model developed to support the project approach.

Below is a summary table outlining the resources scoring results.

Alternative Options	Project Director	Project Mgrs.	Tech. Resources	Business Analysts	Org. Change Mgmt.	Training	Total Resources	Overall Resources Score
In-House Build	1	2	3	6	6	6	24	3.00
eXPRS Time Entry	1	2	6	8	6	6	29	3.00
eXPRS with Mainframe	1	2	6	8	6	6	29	3.00

eXPRS w/o Mainframe	1	2	6	8	6	6	29	3.00
MMIS	1	3	3	8	6	6	27	3.00
SaaS	1	3	2	6	6	6	24	3.00
Kronos	1	3	3	6	6	6	25	3.00
FOSS	1	1	2	6	6	6	22	3.00
Salesforce	1	3	2	6	6	6	24	3.00
Do Nothing	0	0	0	0	0	0	0	5.00

***See Appendix L Alternative Analysis Cost Comparison*

Reusable Artifacts: The Project completed an assessment of project artifacts to determine how much existing documentation could be leveraged based on each alternative option. The Project scored each alternative against each deliverable and associated state supporting documentation to determine an estimated percentage of reusable content for the future effort. There were deliverables not used in the scoring such as the Project Management Plan, PMP Monthly Reports, Development Checkpoints, System Testing, Test Cases Part 2, Test Results, and Implementation Plan as these were relevant to PPL's core system and would not be applicable for any other solutions. The Project was able to use the Requirements Traceability Matrix (RTM) as an input for re-baselining the reboot of the project.

Below is the summary table with the estimated percentages of reusable documentation for each alternative option. Please note these percentages are based on qualitative measures and are subjective.

Alternative Options	Total Percentage	Overall Reusable Artifacts Score
In-House Build	34%	2.00
eXPRS - Time Entry	28%	2.00
eXPRS - All-in with MF	28%	2.00
eXPRS - All-in without MF	38%	2.00
MMIS	30%	2.00
SaaS	44%	3.00
Kronos	40%	3.00
FOSS	44%	3.00
Salesforce	44%	3.00
Do Nothing	0%	1.00

***See Appendix P Approved PPL Deliverables for more information regarding scoring details.*

Alternative Option Comparison

Below are the Alternative Option Comparison final scores based on the scoring criteria using the Scoring Guide.

Alternative Options	Final Score
In-House Build	**4.05**
eXPRS - Time Entry	**3.99**
SaaS	**3.95**
Kronos	**3.88**
FOSS	**3.85**
MMIS	**3.76**
Salesforce	**3.70**
Do Nothing	**3.03**
eXPRS - All-in without MF	**2.90**
eXPRS - All-in with MF	**2.90**

There are some important points to keep in mind when looking at this list where no clear way existed to include specific factors into the scoring model. Much of the impact to resource availability and schedule duration depend greatly on when project reinitiating occurs and how long it would take to obtain the appropriate resources (internal or external). Should the project receive immediate approval to move forward key resources from DHS and OHA remain committed to other projects (IE and CAM) and the schedule will be adjusted to reflect the constraints. This greatly decreases the feasibility of success of the options that would rely more heavily on internal development options (In-House Build, eXPRS- all options, & FOSS).

The scores do represent we have the most ability to control outcomes, cost, and delivery of items that are managed in-house.

These scores are not representative of both DHS and OHA's desires to move to more modern technologies and begin to reduce the support workload of existing resources that are already overburdened in supporting more and more systems. The team who developed this Business Case has also engaged repeatedly with the OIS leadership who are working on a variety of strategic initiatives to help move the Agencies forward from a technology perspective.

***See Appendix Q for full Alternative Analysis Scoring Matrix for comparison details.*

Conclusions & Recommendation

The PTC Project is intended to capture the following required data elements electronically at the time of service: Date of Service, Person Providing the Service, Person Receiving the Service, Time the Service Begins and Ends, Location of Service, and Type of Service Performed. This planned workflow involves the transition from a paper-based data gathering method to a more modern, electronic time capture solution.

As part of this new process, the Provider will record EVV data elements in real-time via a mobile app/web portal interface. The processing of the data will involve data-integrity validations to ensure accuracy of services performed, the date/time of service, and the location of the service delivered to the Individual.

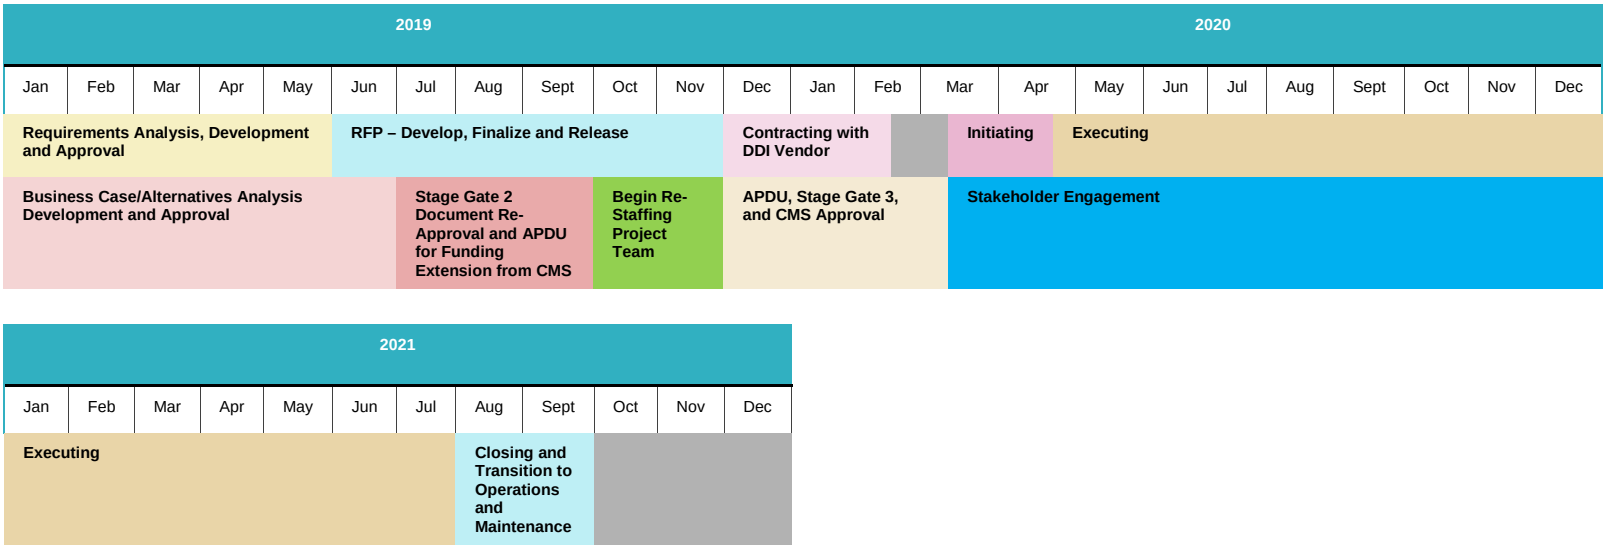
The Software as a Service (SaaS) option is the most realistic available option that balances the needs of the organization in the short to medium term for compliance with the longer-term goals of more modular systems. Through the RFP process we can prioritize those vendors able to deliver a compliant solution through a phased delivery model to support quicker time to value with a projected estimated cost total of $25,351,715.

Because Salesforce, Kronos, MMIS (Sandata), FOSS would require outside support from an integrator and an RFP would be required there is no recommendation for a specific SaaS solution. Any selection during the RFP process will reflect the appropriate criteria for scoring between any proposers, which could include any of the above mentioned.

SaaS Option:
The recommended approach for the PTC Project is to utilize a SaaS solution for the following reasons:

- Ability for advanced configuration, integration with other applications, and possible customization
- Aligns with the direction the software industry is going
- Possibility to expand to other solutions in the future for FMAS, Case Management, Provider Management, etc.
- Fewer technical resources would be required from the State and there would be no dependency on the State Data center
- Possibility of faster implementation
- Workload reduction in the State field offices and Type A and Type B AAA offices
- Moves the Agency away from having sole responsibility for supporting an increasing number of systems
- Ability to access data for reporting
- Several vendors are now offering EVV solutions that are incorporated into their system

To best support incremental delivery of this effort the following prioritization are put forth in conjunction with the recommendation for a SaaS solution:



<u>Iterative Phases which would include ongoing Operations and Maintenance once implemented:</u>

1) Required data element capture through EVV compliant tool which may require manual entry of initial provider demographic information, individual demographic information, and service authorization details such as service period, authorized hours, type of service, etc.
2) Interfaces
    a) Implementation of inbound interfaces for provider demographic information, individual demographic information, and service authorization details such as service period, authorized hours, type of service, etc.;
    b) Implementation of outbound interface by extracting data from new solution to map to existing tables for payment processing via CEP.
3) OHA inclusion & Data Aggregation
    a) Phasing in other programs (OHA 1915i) over a longer timeframe
    b) Phasing in data aggregation as CMS delivers updated guidance

<u>Future Phases or Efforts:</u>

1) Payroll processing and interface with accounting and/or system
2) Potential opening to other program/agency participants

See below for a high-level proposed timeline for the solution implementation (Phases 1 minimally, Phase 2 potentially):

8/23/18

Approving Business Owner Date

Approving Technology Manager Date

Information Technology Investment Type(s):

☒ New Investment ☐ Renew/Life Cycle Replacement ☐ Other:

Information Technology Investment Description (What is being proposed and why):

In Oregon, the Department of Human Services (DHS) and Oregon Health Authority (OHA) are considered joint employers. Their Home Care Workers (HCW) /Personal Service Workers (PSW) programs must be modified to comply with the federal mandates under 21st Century CURES Act for an Electronic Visit Verification (EVV) system and U.S. Department of Labor's (U.S. DOL) Fair Labor Standards Act (FLSA). DHS and OHA must keep certain records for each HCW/PSW. The requirements apply to HCW/PSW's who provide personal and home care assistance to older adults and people with disabilities. Both federal mandates require that records include certain identifying information about the HCW/PSW and data about the hours worked. The law requires this information to be accurate and attested to by both clients and providers. DHS and OHA do not have shared technology in place necessary to meet the regulations.

In addition, Electronic Visit Verification (EVV) was created to help cut down on fraud and ensure that people receive the documented care they need. EVV was designed to help verify that services billed for home healthcare are for actual visits made.

A final component of this project is to enable payment services to the care workers through a Financial Management Agent Services (FMAS) option. The inclusion of a payment services option allows for an "end-to-end" process of capturing time and services through to payment.

An Information Technology (IT) solution will help minimize the long-term costs associated with increased workload, increased dependency on manual paper process and fraudulent reporting of services being provided to Medicaid recipients.

This project offers an opportunity for the State to develop and implement technology that will assist case managers in meeting the workload associated with HCW/PSW management. The solution should also assist

OSCIO IT Investment form

HCW/PSW and the consumers they serve in streamlining the service management portion of their relationship. The solution will do this with the following solution enhancements:

- Worker Portal – a secure web-based portal which allows Agency staff and partners to view and edit information pertaining to service planning and provider management.
- Provider Portal – a secure web-based portal which allows providers to enter time, view information about the service recipient(s) they serve, manage voucher/payment information, and update personal contact information.
- Service Recipient Portal – a web-based portal which allows service recipients (or their authorized representatives) to view necessary information about their cases and service plans. Service recipients will be able to validate reported hours and services, send requests, and update personal contact information through the portal.
- Database – a single, well-designed database to support all three portals listed above.
- Optimized Reporting – optimized reporting functionality providing access to current and historical service recipient and provider data in real time.
- Document Management – track, manage and store documents. The Solution will auto-populate and generate specified paper and electronic notices.
- System and Data Integration – ability to integrate and interface with a variety of systems real-time and batch including, but not limited to Medicaid Management Information Systems (MMIS).
- Role-based Security – the Solution will utilize role-based security allowing usage of internal and external partners as determined by the business.
- Multiple Access Channels - real time accessibility and data entry through web, and mobile technology. The Agency will be able to capture location using geospatial data accessible online or offline.
- Automated Workflow - automatic routing, processing, and integration between different functional software applications. Including validations, alerts, and notifications.
- Secure Payment Processing – ability to process provider payments directly through Financial Management Agent Services.

1. Executive Summary

Oregon's Department of Human Services (DHS) and Oregon Health Authority (OHA) are committed to ensuring the safety of vulnerable Oregonians. This business case outlines the purpose and proposed approach to better serve this population, by implementing an integrated solution to investigate, track, and report on incidents of adult abuse

The Office of Adult Abuse Prevention & Investigations (OAAPI) is a DHS/OHA Shared Service that provides abuse-related services to the Aging & People with Physical Disabilities (APD), Intellectual/Developmental Disabilities Services (I/DD) and Child Welfare (CW) programs at DHS, and the Addictions & Mental Health (AMH) program at OHA.

Together with its program partners, OAAPI serves some of Oregon's most vulnerable residents, in their own homes or in licensed care facilities. The approximate numbers served include:

- 500,000 older adults and people with physical disabilities;
- 16,000 adults enrolled in Intellectual and Developmental Disabilities (I/DD) programs;
- 55,000 adults receiving Community Mental Health Services or residing in the Oregon State Hospital (OSH); and
- 3,600 children residing in licensed facilities that provide therapeutic treatment, or children enrolled in I/DD services.

Establishing a centralized abuse management system is of paramount importance to DHS and OHA (herein referred to as "The Agencies".) The Agencies seek to eliminate manual processes as well as the need to utilize legacy systems in order to standardize and centralize adult abuse data collection for The Agencies.

The objective of this effort is to develop and implement a comprehensive web-based multi-program abuse management system. This system will reduce or eliminate manual input/processes, replace legacy systems, standardize and centralize adult abuse data collection across Oregon, and provide a web-based tool for reporting and analyzing adult abuse. This system will capture abuse allegations and investigations from intake and screening through investigation, case closure and referrals, documentation, and will support abuse management oversight and inquiries. A centralized system will enhance DHS and OHA's ability to protect vulnerable Oregonians, by replacing existing manual and disparate processes and systems across the state with a fully integrated system that improves visibility.

1.1 Background

Oregonians will be better served with a centralized adult abuse management system replacing the existing collection of manual process and disparate systems currently used across the state. Currently, State Agencies, partner organizations and local office workers[1], interpret Oregon Administrative rules differently regarding which allegations of abuse to screen in. Most offices lack a consistent, automated mechanism to screen in, investigate, document and report or track the full life cycle of an abuse incident and the parties involved. Implementing a single stable, rules based solution will improve consistency, streamline workflow, increase efficiencies at local offices and reduce gaps in the availability of timely, pertinent information to support abuse investigations

[1] Local office workers include screeners, investigators and supervisors in the offices across the state that are performing the work for any of the programs included in the scope of this project.

throughout the state. The Agencies' goal is to increase awareness of patterns of abuse in licensed settings and in the community.

1.2 Opportunity Definition

The Agencies' are championing this initiative to improve services and support for vulnerable Oregonians through implementation of consistent processes and robust systems.

The outcomes this project will achieve are responsive to challenges identified by multiple studies and legislation including House Bill 4151 (HB4151) and Senate Bill 1515 (SB1515). HB4151 requires DHS to standardize resources and technologies related to abuse investigations. SB1515 requires DHS and OHA to improve communications about abuse investigations with certifying, licensing and authorizing organizations. A centralized abuse management system will also address DHS Elder Abuse Prevention Audit findings, Adult Safety and Protection Team Report recommendations and the Resident Safety Review Council Report from February 2013.

The high-level business objectives driving this effort are to:

- Better protect the individuals we serve.
- Increase productivity and efficiency through automation.
    - Document reports of abuse, screening decisions and investigations centrally and in real-time so local staff, local management, Central Office, OAAPI and others with a need to know have immediate access to information.
    - Reduce duplicate data entry and manual work.
    - Allow mandatory reporters and other reporters of abuse to submit their reports online via the Internet.
- Support program variation and frequent changes.
- Support the growing abuse management workload.
- Identify and track abuse across the lifespan of a person (victim and/or perpetrator).
- Identify and track abuse and abuse history at DHS-licensed facilities across programs.
- Produce standardized information for auditing and analysis.
- Implement an easy-to-use, web-based, system.

The Agencies' vision is to have at least a minimally viable solution of core functionality across all programs in scope implemented in a first release with a second release to follow with the remaining requirements and enhancements. Core functionality is currently defined as the functionality to support intake and screening through investigation, case closure and referrals, documentation and reporting processes. However, the Agencies intend to enlist the assistance of a System Integrator (SI), to propose implementation options for the Agencies' consideration that will include the suggested scope, functionality, programs included and release dates for the implementation of the CAM system. Therefore, success criteria for the project's planned releases will be determined in the execution phase in collaboration with the System Integrator.

1.3 Alternatives Analysis

After a preliminary business case proposed the development of a custom solution, the Agencies

Department invested significant efforts to assess other alternatives. A team comprised of program and technology members conducted in-depth market research. The market research included in-depth interviews with 18 states to discover their abuse management solutions. This market research yielded two viable solutions utilized by other states and two used in Oregon. The team did further in-depth analysis of capabilities of these four options against functional and technical requirements, and conducted customer demos and on-site visits. The Agencies concluded that building a custom Centralized Abuse Management System introduced much higher risk and cost compared to pursing a different alternative.. Detailed information from the in-depth analysis and site visits are in the Alternatives Analysis, Section 5.0, of this document and in the supplemental documents. Information gained during customer demos and site visits eliminated some alternatives under consideration identified from the project's initial market research. These eliminated options include Commercial off the Shelf (COTS) solutions and transfer solutions used by other entities resulting in the following remaining alternatives.

Alternative 1: Purchase Software as a Service Solution; leverage another state's use of that SaaS

Under this alternative, a Software as a Solution (SaaS) CRM solution would be purchased, configured and customized to meet the CAM Project's detailed requirements. This approach allows relatively quick design, build and implementation plus ongoing flexibility to meet the continuously changing business/regulatory environment at a reasonable cost.

Oregon has the opportunity to leverage requirements for Colorado's Adult Protective Services (CAPS) solution implemented in June 2015 as a starting point for a SaaS solution. Colorado implemented CAPS in June 2015 using Salesforce, a Customer Relationship Management (CRM) SaaS solution. Oregon can leverage CAPS' foundational capabilities, substantially reducing the time to deliver, the cost of implementation, and the exposure to risk for Oregon. DHS and OHA Executive Leadership believe this synthesized approach represents the best fit for Oregon's needs. More details regarding Colorado's solution and the proposed implementation approach are outlined later in sections 5.1.1 and 6.2 of this document.

Under this alternative, Oregon will leverage Colorado's solution as foundational requirements for Oregon's abuse management toolset, using the services of a Systems Integrator to configure and/or customize the software to meet Oregon's needs. The estimated cost of this alternative through implementation is ~4.7 million dollars with at total estimated cost through 2023 of approximately ~8.4 million dollars.

Alternative 2: Implement a Custom Build System

Under this alternative, the Agencies would design, develop, test and deploy a custom solution for The Agencies' Centralized Abuse Management needs. This alternative would allow a tailor-made solution that would meet all of the functional, technical, and organization requirements. The cost, risks, and timeline to implement are substantially higher than implementing a SaaS solution leveraging Colorado's foundational requirements. The total estimated cost for this alternative through implementation is ~11.9 million dollars with a total estimated cost through 2023 of approximately ~$17.0 million dollars.

Alternative 3: Maintain the Status Quo

Under this alternative Oregon would maintain the current status quo with disparate, disconnected systems and highly manual processes and there would be no additional investment in abuse tracking system automation. The requirements and recommendations made by HB4151, SB1515, and various reports and audits would not be met in the foreseeable future. The Agencies' fragmented approach would continue and improvements to current processes would be limited to

those that arise naturally through the Agencies' continuous improvement program. The Agencies would continue with ineffective, disconnected, automated and manual systems, which are increasingly difficult to oversee and analyze. The total estimated cost of this alternative through 2023 of approximately ~$5.2 million dollars.

In light of the settlement that was reached with Oracle in September of 2016, the Agencies were asked to evaluate the appropriateness and feasibility of implementing the CAM solution using Oracle products contained in the negotiated User License Agreement (ULA). The settlement offers Oracle's catalog of products free of charge for the next 5 years and 10 months. However, use of Oracle products would not allow the Agencies to leverage the foundational capabilities of the Colorado CAPS solution due to the fact that Colorado's code is specific to the Salesforce platform. The Colorado solution is the only proven implementation of an Abuse Management System on a CRM platform. An approach using Oracle products would substantially increase the time to deliver a solution, and expose Oregon to additional risk as the Agencies would be unable to leverage the work done in Colorado and would be required to develop a solution on an unproven platform from the ground up. Implementation costs would increase to support additional requirements, design and development efforts. A transfer approach of Colorado's solution will establish a collaborative relationship with Colorado and enable Oregon to continue to benefit from any new developments that Colorado makes to their solution. This continuous collaboration, allowing Oregon the option to use those enhancements free of charge, is dependent on the transfer and use of the CAPS code on the Salesforce platform and could not be utilized with an approach including Oracle products.

1.4 Conclusions and Recommendations

Based on the analysis of the alternatives, DHS and OHA intend to pursue Alternative 1: Implement a SaaS Solution and leverage another state's capabilities with that SaaS. This strategy will help accelerate Oregon's implementation efforts, while reducing risk and shortening the implementation timeline.

Section 6.2, Table 5 (5) of this document sets out a preliminary schedule to implement the Centralized Abuse Management system in two releases. To support the commitments made to the Legislature of an implemented solution within the 2015-2017 biennia and in response to HB4151 and SB1515, the project's scope will be implemented in two releases. Afirst release is projected to complete by June 2017 and the second release by December 2017. The high-level estimated cost of implementing the system and operating it through December 2017 for both releases is approximately $4.7 million. The project has been funded for a total of $5,632,037 which includes $1,437,494 of general funds, $3,300,000 of Q bonds and $894,543 for Qbond issue and debt service for a total of usable project funds of $4,737,494. Funds for issue and debt service will not be reported in the funding. Ongoing operating costs post-implementation through June 2023 are estimated at another $3.0 million, for a total 7-year investment of approximately $8.4 million. Actual costs may differ depending on per user licensing costs and vendor responses to the planned Request for Proposal (RFP) for System Integrator (SI) services.

2. Background & Purpose

2.1 Current State of Abuse Management Operations

The Office of Adult Abuse Prevention & Investigations (OAAPI) is a DHS/OHA Shared Service that provides abuse-related services to the populations served by The Agencies and provides services for some of Oregon's most vulnerable residents, in their own homes or in licensed care facilities.

Many different methods are used by The Agencies to support screening, investigations, referrals, and other abuse management processes. At their core, these processes have very similar steps. They vary depending on: 1) The population served; 2) If the intake/screening/investigating organization is a state organization or contracted party and; 3) Which computer applications and end user tools they have available for their use. There are seven (7) key systems, six (6) of which are state owned and one (1) owned by a local county, and more than 120 local databases and Microsoft (MS) Excel spreadsheets in use at this time. These systems are not integrated nor do they provide all the essential information required for local workers, local managers, and Central Office oversight.

In 2014, almost 750,000 Oregonians were in one of the nine populations supported by the Agencies. During that same year, the Agencies received over 38,000[2] allegations of abuse of these individuals, resulting in 18,185[1] investigations of which 4,544 were substantiated. This number does not account for an unknown number of allegations screened out at the local office level due to the lack of visibility caused by disconnected processes and systems.

According to the 2014 OAAPI Annual Report dated July 2015, "In 2014, there was a 10% overall increase in the number of investigations conducted (compared to 2013)." Over the next ten years, the number of allegations received and screened by The Agencies is expected to increase nearly 60%. This assessment increases the projected 50,414 allegations in 2015 to over 78,500 allegations in 2024, due to predicted growth of vulnerable populations. OAAPI is projecting 30,800 investigations by 2024, a nearly 63% increase from the 2015 level of 19,000 investigations.

In 2014, the Oregon State Legislature passed House Bill 4151 (HB4151). Section 4 of HB4151 mandates that for adults 65 and older and for residents of Office of Licensing and Regulatory Oversight (OLRO) licensed facilities, DHS "shall adopt policies and guidelines to plan for the development and standardization of resources and technologies" related to abuse. In summary it mandates the following: 1) Capture of key adult abuse incident and management data; 2) Standardization of procedures and protocols for making and responding to reports of abuse; 3) Standardization of procedures and protocols for investigations of reports of abuse and; 4) Promoting and coordinating communication and information sharing with law enforcement agencies regarding reports and investigations of abuse.

There are five main program areas involved in this project: 1) DHS' Aging & People with Disabilities (APD) Adult Protective Services (APS); 2) OHA's Health Systems (HS) Division; 3) DHS' Developmental Disabilities (DD); 4) DHS' Child Welfare (CW) and; 5) OHA's Oregon State Hospital (OSH) Division. For a comprehensive list of stakeholders, see the Business Case Supplemental Documents Package.

There is a long list of Oregon Revised Statutes (ORSs) and Oregon Administrative Rules (OARs)

[2] OAAPI Annual Report 2014 – Published July 2015.

for the program areas and populations served by this project.[3] Some overarching statutes drive consistent rules for multiple populations and program partners. However, there are also specialized rules depending on the population served. A full analysis of the similarities and differences in these rules has not been performed. It is important to note that many factors impact these ORSs/OARs resulting in frequent changes. In the future, there will be one standard process for all populations served. This standard process will allow for the nuances between the ORSs/OARs in place today.

Federal and State legislation, program rules, processes, terminology, reporting and coding requirements are evolving at a quick pace. The different agencies within the US Department of Health and Human Services (HHS) are working toward more standardization in the adult abuse discipline.[4,5] The disconnected tools in use by DHS and OHA are not modern, sophisticated, or flexible enough to evolve with the changing regulatory environment within the state or across the nation.

2.2 Current State of DHS Aging and People with Disabilities Abuse Management Operations

The DHS Aging & People with Disabilities APS program serves two Oregon population groups: APS Community and APS Facility.

- APS Community consists of approximately 620,000 adults age 65 and older and adults 18-24 with a physical disability who live in their own homes in the community.
- APS Facility consists of approximately 46,000 individuals living in DHS-licensed facilities.

Screening and investigation of these reports of abuse are performed by Aging and People with Disabilities (APD) Field Offices and certain Area Agencies on Aging (AAAs).

In 2014, there were approximately:

- 12,100 allegations of APS Community abuse resulting in approximately 3,300 substantiated abuse cases.
- 4,400 allegations of APS Facility abuse resulting in approximately 950 substantiated abuse cases.

[3] A complete list of ORSs and OARs by population served can be found in Business Case Supplemental Documents Package.

[4] In September 2013, recognizing the lack of consistent national data on adult maltreatment, HHS, the Administration for Community Living (ACL), in partnership with the Office of the Assistant Secretary for Planning and Evaluation (ASPE), began a 2-year effort to design and pilot test a national reporting system based on data from state adult protective services (APS) agency information systems. The project is currently designated as the National Adult Maltreatment Reporting System (NAMRS).

[5] The CDC's National Center for Injury Prevention and Control, Division of Violence Prevention has published "Elder Abuse Surveillance: Uniform Definitions and Recommended Core Data Elements" in January 2016. They indicate in their paper "Longstanding divergences in the definitions and data elements used to collect information on Elder Abuse (EA) make it difficult to measure EA nationally, compare the problem across states, counties, and cities, and establish trends and patterns in the occurrence and experience of EA."

The number of allegations supported is difficult to ascertain because the two APS systems in use lack screening capabilities.

The major computer systems used by APS are: 1) Oregon ACCESS, which is a case management system for APS Community Clients, and; 2) Web723, which is a tool for documenting an APS Facility abuse investigation report. These two systems have poor search capabilities making it difficult for workers to find historical abuse information. As a result, offices must resort to tracking key information on spreadsheets and in Microsoft (MS) Access databases.

Other than Oregon Access and Web 723 for Lane Council of Governments (LCOG), there is no key system screening functionality. This means local screeners and investigators are not able to see statewide abuse screening information, and central program management is unable to monitor local screening activity or track historical screening trends. Additionally, the search capability in these systems does not support the sophisticated and time-sensitive needs of the program to respond to queries about specific allegations or overall trends. All notices are manually created in MS Word resulting in considerable duplicate data entry and the potential for human error. LCOG has their own MS Access computer system, which allows for LCOG-wide documentation of intake, screening decisions, investigations and the generation of notices.

2.3 Current State of OHA Health Systems Abuse Management Operations

The OHA Health Systems Division serves two abuse population groups (within the scope of this project). They are: 1) Individuals in State Operated Secure Residential Treatment Facilities and; 2) Individuals receiving Community Mental Health services.

- State Operated Secure Residential Treatment Facilities serve approximately 120 people.
- Community Mental Health Programs (CMHP) are County based and serve approximately 57,200 people.

Screening and investigations involving adults receiving CMHP services are performed by County CMHP staff, with technical assistance and consultation provided by OAAPI. Exceptions include when the alleged abuse involves CMHP staff or occurs in a state-operated Secure Residential Treatment facility; in those cases, OAAPI staff perform the screening and investigation.

In 2014, there were approximately:

- 15 allegations of abuse for individuals in State Operated Secure Residential Treatment Facilities resulting in about seven substantiated abuse cases.
- 395 allegations of abuse for individuals receiving Community Mental Health services of which approximately 134 were substantiated.

Allegations and investigations for State Operated Secure Residential Treatment Facilities and Community Mental Health that are received by OAAPI, are entered into the OAAPI Abuse Database. Not all Community Mental Health allegations that are screened out (not needing investigation), are tracked as there is not a centralized database supporting these programs. Technology tools depend on what tools a particular County CMHP has in place. The key computer system used is the OAAPI Abuse Database, which is MS Access and is not accessible to the Oregon Counties. All data entered into the OAAPI Abuse Database is after the fact, duplicate data entry, and currently used to capture the investigation data electronically for future analysis.

Investigations for these populations are all performed manually and then typed into MS Word. All

notices are manually created in MS Word resulting in considerable duplicate data entry and the potential for human error.

2.4 Current State of DHS Office of Developmental Disabilities Services Abuse Management Operations

The DHS Office of Developmental Disabilities Services (DD) program serves two Oregon abuse population groups directly: Community DD Program individuals and In Home Program individuals.

- County-based Community DD Programs (CDDP) and the Stabilization and Crisis Unit (SACU) serve approximately 5,800 adults enrolled in (or previously eligible for) CDDP services. These adults live and receive services in either DHS-licensed settings such as provider group homes, state run group homes or private foster homes. CDDP (County) staff perform screenings and investigations of allegations involving CDDP clients. Screening and investigation of allegations in SACU facilities are performed by OAAPI investigators.

- The Community DD Programs (CDDP) and Brokerage Operations serve approximately 13,000 adult individuals with Intellectual/Developmental Disabilities (I/DD) living in their own homes or family homes, or DHS-licensed residential facilities. CDDP (County) staff perform screenings and investigations of allegations involving CDDP clients.

Allegations involving individuals with I/DD living in non-DD licensed facilities are screened by either DD or APS, and are generally investigated by APS as indicated above in APS Facility.

In 2014, there were approximately:

- 1,400 allegations of abuse for Community DD individuals resulting in about 675 substantiated abuse cases.

- 70 allegations of abuse for individuals in Stabilization and Crisis Unit facilities of which approximately 20 were substantiated.

Investigations for these populations are all performed manually and then typed into MS Word. Additionally, all notices are manually created in MS Word, resulting in considerable duplicate data entry. The number of reports of abuse that are reported and subsequently screened in for investigation can only be estimated as they are not all tracked in a key computer system. The key computer systems used are Serious Event Review Team (SERT), Combined On-call Intake (COIN) and the OAAPI Abuse Database. SERT is old and ineffective. COIN is used by OAAPI for tracking allegations, and the OAAPI Abuse Database is used by OAAPI for all SERT allegations referred to OAAPI for investigation. The number of reports that are screened out for further investigation are also unknown as these are tracked only at each individual CDDP.

2.5 Current State of DHS Child Welfare Abuse Management Operations with OAAPI Oversight

The Child Welfare (CW) program serves children with intellectual/developmental disabilities living in DHS-licensed 24-hour residential settings and children in DHS-licensed 24-hour residential facilities that are part of the Child Caring Agencies (CCAs). These Oregon abuse population groups are included within the scope of this project.

County Child Welfare staff at the various CW hotlines perform initial screening of all child abuse

referrals. When children identified in an allegation live in a licensed setting, the referral is sent to OAAPI (using OR-Kids) for additional screening. After screening, investigations for both of these populations are performed by OAAPI.

In 2014, there were approximately:

- 85 allegations of abuse for children with intellectual/developmental disabilities living in DHS-licensed 24-hour residential settings resulting in about 46 substantiated abuse cases.
- 131 allegations of abuse of children in DHS-licensed Children's Care Provider Programs with approximately 24 substantiated.

Investigations for these populations are all documented manually and then typed into MS Word. Key information is entered into OR-Kids when the investigation is completed. All notices are manually created in MS Word resulting in considerable duplicate data entry. The computer systems used to process these cases are OR-Kids and the OAAPI Abuse Database. All allegations for CW are initially captured in OR-Kids and then entered into the OAAPI Abuse Database after the fact. The OAAPI Abuse Database is MS Access, therefore it is not available to the County CW screeners across the state.

In 2016, the Oregon State Legislature passed Senate Bill 1515 (SB1515). SB1515 adds young adults aged 18 to 21 years old in Child-Caring Agencies (CCAs) to be included in the age definition of "child in care" and expands the definition of CCA. This additional young adult group is estimated to be less than 250 individuals at this time and are included in the CAM Project as part of the population of children in DHS-licensed Children's Care Provider Programs.

The requirements of SB1515 will also likely lead to a much higher percentage of allegations of abuse in CCAs resulting in an investigation, doubling or tripling the number of CCA-related investigations conducted and documented by OAAPI.

2.6 Current State of OHA's Oregon State Hospital Abuse Management Operations

The OHA Oregon State Hospital (OSH) serves one abuse population group (within the scope of this project). Approximately 1,220 individuals live at the Oregon State Hospital.

When alleged abuse occurs in the Oregon State Hospital, OAAPI staff perform the screening and investigation.

In 2014 there were approximately 78 allegations of abuse for individuals living at the Oregon State Hospital, of which approximately 19 were substantiated.

Allegations and investigation outcomes for the Oregon State Hospital are entered into the key computer system, OAAPI Abuse Database, which is an MS Access application. All data entered into the OAAPI Abuse Database is after the fact, duplicative data entry, used to capture the investigation data electronically for future analysis.

Investigations for this population are performed manually and then typed into MS Word. All notices are manually created in MS Word resulting in considerable duplicate data entry.

2.7 Current Business Process

In 2014, seven (7) abuse management process were documented. At a high level, all seven processes involve screening, investigating, referring, and closing allegations, with associated documentation and notifications. Each of these processes are based on a particular program or

group of programs, as well as the individual program OARs, which define and guide them. Detailed information about these current processes can be found in the Business Case Supplemental Documents Package, Document F.

Table 1 – Key Current Business Processes

Process	Process Description	Process #
OAAPI-Led Investigation	This process documents the intake, screening, investigation, report creation, report distribution, and closure of non-CCP investigations completed by OAAPI staff.	BP-100
CCA Investigation	This process documents the intake, screening, investigation, report creation, report distribution, and closure of investigations completed by OAAPI staff for the CCP Program.	BP-200
County DD Investigation	This process documents the intake, screening, investigation, report creation, report distribution, and closure of investigations completed by the county CDDP abuse investigator.	BP-300
County MH Investigation	This process documents the intake, screening, investigation, report creation, report distribution, and closure of investigations completed by the county Mental Health (MH) Program.	BP-400
APS Community Investigation	This process describes the intake, screening, investigation, report creation, report distribution, and closure by APD and AAA staff for the APS Community Program.	BP-500
APS Facility Investigation	This process describes the intake, screening, investigation, report creation, report distribution, and closure by APD and AAA staff for the APS Facility Program.	BP-600
Lane Council of Government (LCOG) APS Investigation	This process describes the intake, screening, investigation, report creation, report distribution, and closure for the Lane Council of Government Community and Facility APS investigations.	BP-700

The Agencies' have identified and drafted a standardized future state business process with the assistance of the user community across all in scope programs. This process will be used in the fit gap analysis performed by the SI during execution.

3. Problem or Opportunity Definition

3.1 The Business Problem

The lack of a centralized abuse system in place today creates obstacles and challenges for The Agencies' work efforts to support vulnerable Oregonians.

The Agencies are committed to the protection of vulnerable Oregonians and are hampered by abuse data that is often fragmented, incomplete, and/or inaccessible. Additionally staff are required

to utilize multiple disparate systems to make determinations about allegations of abuse slowing response and increasing risk of error. A centralized system that provides cross program abuse information and supports intake, screening, and investigation activities is critical to increase the efficiency and effectiveness of the staff performing those functions and to further protect Oregon citizens. The limitations of the current environment; lack of coordinated systems and data, gaps in visibility and the lack of a unified tracking and reporting process all lead to the imperative for The Agencies to address this situation by implementing a centralized abuse system to establish a clear and complete picture of abuse.

APS receives staff based on workload and the calculations to determine staff needs depend on forecasting future workload projections. The tools and information available today are challenging, requiring APS to use a workload calculation from four (4) years ago. This means the additional workload to support the increase in population over that time is not being reflected today's calculation. There was an increase in population of approximately 10% last year alone. Lack of up to date information and the inability to forecast have resulted in a lower than necessary staff count, negatively affecting the APS key performance metrics. Visibility in to the activity and movements of alleged and substantiated perpetrators across programs or counties is limited. This lack of information across the state opens the door for potential risk to persons served by the DHS and OHA.

Lack of unified processes has resulted in potential risk of clients falling "through the cracks" as local offices follow inconsistent screening practices and vary in their interpretation of Oregon rules and statues. Further complicating the challenges, for staff that are performing intake, screening, and investigations is that they lack systems to help them perform their jobs effectively and efficiently. Information such as addresses, screening and investigation data is cut and pasted into: 1) Multiple systems; 2) Multiple MS Word letters and; 3) MS Excel spreadsheets and; 4) MS Access databases.

The current intake process may be documented in one of many different systems around the state, and referrals that do not result in investigation are not always tracked with automated tools. As a result, it is difficult to review these referrals for quality control, screening related trends and workload trends. Law enforcement agencies send police reports to field offices in such a volume that staff find it hard to review and screen in/out all of the reports in a timely manner. When intakes and referrals are not all documented it's difficult to measure if there are sufficient staff to cover the workload and to measure the true quality of the work being performed including that all reports of abuse are being processed properly without falling "through the cracks".

Recent legislation has increased the number of mandatory reporters and hence the workload for intake and screening of reports of abuse. HB4151, passed in 2014, requires that DHS/OHA send a copy of its letter of determination and investigation report to the state agency responsible for certifying/licensing a substantiated perpetrator in a health occupation. The consistency with which this is done is not known since the processes and systems do not allow for tracking of this information. This increases the workload of the already overloaded investigators doing the work today.

As Oregon's population ages, DHS and OHA are seeing an increased interweaving of clients in community and facility settings. This means clients of one program are often placed in facilities licensed by other programs, or clients are transitioned from one system to another as they age and their health conditions or behavioral needs change. Establishing a centralized abuse management system enables DHS and OHA to integrate abuse data across programs, ensuring critical information in one system is retained helping keep clients safe by providing access to a client's history of abuse.

3.2 Current Technology Limitations

There are seven (7) primary data systems[6] used in Oregon today to collect reports of abuse and/or generate investigation reports. There are three (3) key data systems[7] used to analyze investigations and create data analysis reports related to protective services and abuse investigations with OAAPI oversight. These systems run on different software, collect different data points, and do not provide a comprehensive centralized data repository for abuse data. Investigation reports for seven of the nine populations are written using MS Word. In addition, more than 120 simple applications and spreadsheets are used in local offices to support abuse processes and manage workload, from receipt of an allegation through completion of an investigation.

The mix of old legacy systems and desktop software makes it difficult for employees and management to ensure all allegations are documented and processed appropriately. In most local offices, physical paper files are the only source of complete information about an investigation. This creates the potential for an allegation to go uninvestigated because there is no tool for unassigned referrals***.***

Following is a summary of the key systems used to collect, report or analyze abuse or generate investigative reports. Each system has limitations, which make them poor candidates for modifying to meet centralized abuse investigation or reporting. The limitations in many cases are due to the technology platforms lacking the robustness necessary to support large-scale use or they are an aging technology with limited ability to sustain and support. For example, MS Access lacks a robust structured query language, all information is saved into one file, which limits options, slows down reports, queries and forms and security controls are limited. As the volume of user's increases, performance degrades rapidly. Although technically, a MS Access system can support 255 concurrent users, the real world limit is 10-80 concurrent users.

The Oregon Access ***(OR Access)*** system's APS module for abuse tracking contains the largest number of investigations (~36,000) of all the systems listed above. ***It does not have intake or screening functionality and has poor search capabilities making it difficult or impossible to determine if a person has an in-progress or past investigation.*** This results in duplicate information as many allegations/investigations are entered multiple times. The system is capable of collecting information that helps support unique identification of people such as Social Security Number, birth date and client master identifier. Less than seven percent of alleged and substantiated perpetrators are uniquely identified with a Social Security Number or date of birth. None has a reference to a person or client master identifier. This makes it impossible to find repeat offenders of abuse. End-users cannot attach documents and/or evidence to the investigations in OR Access. Investigation reports cannot be sent electronically from the system and must be printed, scanned and attached to an email to send notices. The system does not provide statistics, trends, or other tracking data to local office management to help assess and manage to target quality outcomes. OR Access is not web-based, so it is not available away from the office unless it is downloaded to the investigator's computer or the investigator remotely accesses the system using emulation software (Citrix). OR Access is written in PowerBuilder and has a Sybase backend. PowerBuilder is an older development environment with a very small population of users. This makes it very difficult to find PowerBuilder developers, so supporting OR Access requires in-house training on the technology by OIS. Due to the aging nature of this

[6] Oregon Access (OR Access), Lane Council of Government (LCOG) Client Tracking System (CTS), Web723, SERT (Serious Event Response Team), COIN (Combined On Call and Intake), OR-Kids and the OAAPI Abuse Database.

[7] DHS Data Warehouse, COIN and the OAAPI Abuse Database.

technology and the current issues it carries, OR Access is not a good candidate for future central abuse management use or extensibility.

Web723 contains the next largest number of investigations (approximately 32,000). It ***does not have intake or screening functionality***. As with OR Access, DHS is not documenting all the reports of abuse in this system; only the reports of abuse assigned to investigate are entered. There is a high level of frustration by local office staff with this system as it frequently "crashes" or times out while documenting an investigation and all the data entered is lost. This system does not have the ability to locate past/historical information so all information has to be manually entered for each investigation. Many hours of re-entry of information are required due to the instability of this system. End-users cannot attach documents or evidence to the investigations. Only at the conclusion of an investigation, after a supervisor has reviewed the report and all notices have been sent out, an electronic notice is sent to the APD Central Office of Licensing and Regulatory Oversight (OLRO) in Salem confirming that the investigation is complete. Considerable time is spent manually preparing and mailing documents to all the appropriate parties. There are no statistics, trends, or other tracking data available to local office management to help ensure desired quality outcomes are achieved. This application is written in Cold Fusion, an aging technology, and has a DB2 backend. Due to Web723's instability issues, old technology and limited functionality, it is not a good candidate to extend.

Lane Council of Government's (LCOG) ***Client Tracking System (CTS)*** is used for all LCOG APS reports of abuse (~12,700) and investigations (~7,200). LCOG transfers files of information to DHS that are then loaded into the DHS Data Warehouse. Due to periodic issues with these imports, the DHS Data Warehouse does not contain a full set of LCOG data for analysis. LCOGs CTS has relatively good APS functionality but, being designed for a single AAA office, it ***does not provide for the statewide 360-degree view of a person needed by DHS and OHA***. It has an MS Access front end with a MS SQL Server backend and hence is not extensible or scalable.

Serious Event Review Team (SERT) is used by the DHS Office of Developmental Disabilities Services Community DD programs to notify OAAPI that an investigation is needed (approximately 57,000 serious events are stored in the system some of which are reports of abuse). CDDPs use this system to analyze trends such as type of abuse, providers and clients with high numbers of incidents. The County Investigator fills out the form and it is transferred to OAAPI. Data from this system is manually re-entered into the OAAPI Abuse Database. ***Known issues with this system include: It is not user friendly; not searchable or search criteria/results are inconsistent and; the database model is out of date, as it has not been updated in over three years.*** Because of the complexities of using this system, not all CDDPs are inputting data here. SERT is currently supported by the Office of Business Intelligence (OBI). It has a ColdFusion frontend and a MS SQL Server backend. It is not extensible or scalable.

OR-Kids is used by DHS Child Welfare to notify the OAAPI Investigations Unit of allegations of child abuse initially screened by Child Welfare workers that require OAAPI screening and investigation (~88 in 2014). This system has substantial functionality. It is a complex system that is not end-user friendly, partially due to the significant level of pop-ups, which frustrate the end-users. The search feature does not work well; standard searches for a person can return hundreds of names resulting in staff not finding the person they really need or want. ***The online user interface and data relationships between case, abuse report, people, assessments, allegations and associated notes are not intuitive from an abuse management perspective.*** The OAAPI investigation process for children in licensed settings is handled outside of OR-Kids and final information is posted back in OR-Kids upon completion of the investigation. The investigation itself is written independently in MS Word. The front-end application primarily uses JBoss, Java and COBOL. The backend uses MS SQL Server. This system architecture is

designed specifically to manage child protective services cases, it does an inadequate job displaying information about abuse incidents related to OAAPI investigations. This system is not a good candidate to extend for centralized abuse management. With a core focus on child protective services, modifications to accommodate the requirements of the Agencies would require significant and expensive modification and could negatively impact the core functionality and purpose of existing system.

Combined On-Call Intake (COIN) is used to track reports of abuse made directly to OAAPI (~5,000) and screening decisions for many of the populations investigated by the OAAPI Investigations Unit. It does not support the investigation process. This system was created internally with MS Access and is not extensible or scalable.

The ***OAAPI Abuse Database*** is used to track key information about investigations (~23,368) for Community DD, Community MH, and OAAPI investigators. These investigators use a separate MS Word template to write their investigation reports. Although OAAPI offers a recommended format, reports vary somewhat from county to county. CDDP and CMHP investigators send their reports to OAAPI via e-mail, where they are reviewed, approved and "data-mined" manually by OAAPI staff to populate by re-entering information into OAAPI's Abuse Database. All OAAPI-led investigations are also data-mined manually and entered into this database. ***This system is filled with duplicated data from other systems and tools (MS Word). This system does not have role-based security, allowing anyone to change any data in the system.*** The OAAPI Abuse Database is a Microsoft Access database developed internally in 2001. This system is not extensible or scalable for statewide use.

Currently, the Agencies rely on these disconnected data systems to store abuse-related data and to produce reports. Challenges and risks are pervasive because these systems are often unable to provide the critical information being asked for by internal and external partners, including: accurate metrics for Quarterly Business Reviews (QBR), requests for statewide abuse data from media, and sufficiently granulated data reports for the Legislature. The table below illustrates the distribution of the systems by the population served that are used to support abuse management by the Agencies.

Table 2 – Systems Used by Population Served[8]

		Screener / Investigator	
Nbr	**Population**	**Tools**	**OAAPI Tools**
1	I/DD Individuals Living in DHS-Licensed Stabilization & Crisis Units	SERT (notice of report), MS Word (Investigation Report)	COIN (doc screen in) OAAPI DB (doc from MS Word Report)

[8] Additional statistics by population type can be found in the Business Case Supplemental Documents Package.

Nbr	Population	Screener / Investigator Tools	OAAPI Tools
2	I/DD Children Living in in DHS-Licensed 24-Hr Residential Settings	OR-Kids (notice of report, outcomes), MS Word (Investigation Report)	OAAPI DB (doc from MS Word Report)
3	Children in DHS-Licensed Children's Care Provider Programs	OR-Kids (notice of report, outcomes), MS Word (Investigation Report)	OAAPI DB (doc from MS Word Report)
4	Adults at the Oregon State Hospital	MS Word (Investigation Report)	COIN (doc screen in), OAAPI DB (doc from MS Word Report)
5	Adults in State Operated Secure Residential Treatment Facilities	MS Word (Investigation Report)	COIN (doc screen in), OAAPI DB (doc from MS Word Report)
6	Adults Receiving Community Mental Health Services	MS Word (Investigation Report)	OAAPI DB (doc from MS Word Report)
7	Individuals Living in DHS-Licensed Facilities	Web723 (Investigation Report) or LCOG's CTS (Screen In/Out & Investigation Report)	Web723, DHS Data Warehouse
8	Adults 65+ & Adults 18-64 with a Physical Disability	OR Access (Investigation Report) or LCOG's CTS (Screen-In/Out & Investigation Report)	OR Access, DHS Data Warehouse
9	Adults Enrolled or Previously Eligible for a Community DD Program	SERT (notice of report), MS Word (Investigation Report)	COIN (doc screen in), OAAPI DB (doc from MS Word Report)

Consultants and Task Forces have looked numerous times at the abuse management technology issues for the populations served by The Agencies. The many challenges associated with the current systems are evident not only to individuals within DHS, OHA and OAAPI, but have been brought to the attention of the Agencies by external entities as well, most notably in the following instances:

- DHS Consultant Public Knowledge report dated 2005.
- McKinsey Study Recommendation dated 2008.
- Oregonian Article dated March 26, 2011.
- Adult Safety and Protection Team Report dated August 4, 2011.
- Resident Safety Review Council Report to Legislature dated February 2013.
- DHS Elder Abuse Prevention Audit (12-013).

3.3 The Opportunity

DHS and OHA share an imperative of keeping vulnerable adults safe by investigating allegations of abuse in a timely manner and remediating as needed. Implementing a centralized web-based data system to collect all reports of abuse; screen, refer and investigate those reports of abuse; and ensure all appropriate agencies/parties are notified of the investigation outcome directly supports DHS's commitment to "improve systems,

processes and culture to ensure that safety is our number one priority."[9] This will significantly improve DHS' ability to achieve its mission to assist Oregonians in achieving safety, health and independence.

3.3.1 Alignment with 2014's Oregon House Bill 4151 (HB4151)

Development of this system is in direct alignment with HB4151 which states "The Department of Human Services shall adopt policies and guidelines to plan for the development and standardization of resources and technologies" related to abuse of vulnerable adults age 65 and above or living in an DHS-licensed facility. The CAM Project will address HB4151 through the following capabilities:

1) Create a centralized system that standardizes data for the nine (9) population groups served by OAAPI and its program partners called out in HB4151.
2) Create a centralized database of reports of abuse.
3) Provide storage of photographs for purposes of preserving evidence of the condition of the resident at the time of the investigation.
4) Create a centralized method of notice management (sending and receiving notices) to improve communications with law enforcement.
5) Create a centralized and standardized method of sending notices to health care licensing/certifying agencies.
6) Create a centralized and standardized method for the DHS Background Check Unit (BCU) to augment their background checks by viewing information in the new system for persons who present a risk of harm to another person.
7) Create a centralized and standardized method for DHS and OHA organizations that do not utilize the Background Check Unit (BCU) to view information in the new system for persons who present a risk of harm to another person.

3.3.2 Alignment with 2016's Oregon Senate Bill 1515 (SB1515)

Development of this system is in direct alignment with SB1515. This Senate Bill specifies approximately 16 types of abuse related notices, some of which result in multiple notices depending on the situation. A robust notice management system will support generation, tracking, storage, management and quality control of notices. The planned system's flexibility will support screeners and investigators to comply with changing mandatory requirements more efficiently.

3.3.4 Alignment with the Strategic Technology Plan

The DHS/OHA Strategic Technology Plan (STP) includes a number of strategies that the Centralized Abuse Management Project will support.

The table below summarizes the various components of the STP that a centralized abuse system will satisfy.

[9] Clyde Saiki, DHS Director's email February 8, 2016.

Business Automation	• Work queues to improve work management at all levels in the organization. • Sophisticated searches to research abuse history. • Unification of processes and activities across programs by providing one tool to document reports of abuse, screening decisions, investigations and notices. • Allow for easy transfer/referring out of reports of abuse between programs and program partners. • Reducing dependency on paper processes by allowing for electronic document storage and electronic notices. • Electronic document storage. • Reduce duplication of work. • Capture data once and reuse it. • Provide real-time, statewide, centralized data for reporting.
Comprehensive View of our Clients	• Supports the use of a master person record.
Enable Connectivity Anytime, Anywhere, in Multiple Ways	• Provide workers a real-time portal to perform their work anytime, anywhere, 24/7. • Provide the public a portal to report abuse anytime, anywhere, 24/7.
Trusted Source for Health & Human Service Data	• Reduce data duplication and entry into multiple systems through the use of a single system for the Agencies for abuse management. • Trusted source for verified person data. • Trusted source for reports of abuse, screening decisions and abuse investigations. • Improve data access and sharing across programs. • Role based data access and security to improve data protection and compliance.
Dynamic Needs Supported by Seamless Technology Services	• Industry best practices and standards based modular architecture and design (e.g., Service Oriented Architecture (SOA), Enterprise Service Bus (ESB) etc.) to leverage existing functionality and also expose functionality through web services. • Highly configurable platform that is responsive to evolving business needs. • Extensible platform allows for standard interfaces with other modern enterprise applications.

3.4 Project Objectives

<u>High-Level Goals of the new system are to:</u>

1) **Reduce abuse risk to vulnerable Oregonians and reduce liability abuse exposure for the State:** Improve DHS, OHA, and OAAPI visibility into all cases for which they have oversight regardless of program, facility, population, policy or location thus reducing risk to Oregonians, who may have otherwise fallen through the cracks. Provide a 360-degree

view of a person so trends in victims and/or perpetrators can be found and uniquely identified statewide across programs. Improve victim safety by improving communications between stakeholders[10] including Oregon State health certification/licensing agencies.

2) **Increase abuse case investigations productivity and efficiency:** Increase staff productivity through improved processes that minimize duplication of data entry. Move away from the need for paper files to a new paperless system, which allows information sharing with the right people at the right time. Provide staff tools for proactive self-management of workload and outcomes by staff and management in local offices and each program's central office. Provide abuse reporters the ability to enter their allegations of abuse through the Internet.
3) **Support program variation and frequent changes:** Accommodate similarities and differences in programs and respond quickly to frequent legal and policy changes.
4) **Develop capacity for projected increases in abuse-related workload:** Improve the ability to handle and support the anticipated high volume of abuse allegations, referrals, investigations, notices and related data over the next ten years.
5) **Identify and track abuse across a person's lifespan:** Identify abuse statewide across programs, connect abuse across the lifespan of a person regardless of their role in the incident (victim, perpetrator, witness etc.), and ensure that protective services are informed by a client's past history of abuse.
6) **Implement a web based and easy-to-use technology system:** Implement a system that will: 1) Support and integrate the screening, investigation, review, reporting and notice processes regardless of the DHS/OHA program that is being administered and; 2) Function well regardless of the supported desktop browser technologies used by the state and their program partners (counties, AAAs, brokerages etc.).
7) **Produce standardized auditing and analysis information:** Standardize the collection of all abuse-related data for purposes of auditing, analysis, reporting and forecasting. This will be achieved through use of common terminology and definitions that will be determined through a cooperative effort of OAAPI and its partners and aligned with developing national abuse data collection methodologies.
8) **Provide accurate data and reporting:** Create the ability to report on core data and metrics in order to provide effective services and measurable outcomes to program partners, and to assure that abuse investigations are being conducted effectively and prevention efforts are being targeted appropriately.
9) **Enable mobile technology:** Enable the use of mobile technology in the investigation process to improve efficiencies, especially related to safety and response times when investigators are in the field.

3.4.1 Key Benefits of the Centralized Abuse Management System

Key benefits of the new system include:

- Provides The Agencies with one comprehensive multi-program system for abuse management documentation and inquiries so that risk to the safety of Oregonians and liability to the State are reduced.

[10] See Business Case Supplemental Documents Package for a comprehensive list of key stakeholders.

- Real-time, online documentation of initial reports of abuse and the resulting screening decisions to ensure all reports of abuse that need investigation are screened in and the rationale and other steps taken (such as referring to others) can be supervised and monitored.
- Real-time, online documentation of all investigations including notices, and storage for that information in a centralized database so that the information is safe and accessible by local office staff and management, program Central Office, OAAPI and the DHS Background Check Unit.
- Increases productivity and efficiency through reduction in duplicate data entry, manual work, and by allowing reporters of abuse the ability to submit reports online through the Internet 24 hours a day 7 days a week.
- Improves decision making and preventive actions because, over time there is one place to find a:
    - Perpetrator and their history of abuse for one or more programs across the entire state of Oregon.
    - Victim and their history of abuse for one or more programs across the entire state of Oregon.
    - DHS-Licensed Facility and the history of abuse at that facility for one or more programs across the entire state of Oregon.
- Standardizes methods and data allowing for improved oversight and analysis.

Key functionality of the new system includes:

- Dashboards for workers that enhance their ability to self-manage their work within mandated response times.
- A business rules engine that allows for easy modifications by The Agencies for specific needs and new mandates.
- Evidence, photos and other document attachments.
- Integration with the ONE's Master Client Index.
- Mailing address validation.
- Automated notice generation.
- Public online report of abuse submittal.
- Role based security.
- Single sign-on with OHA's Active Directory.

4. High Level Requirements and Key Assumptions

Following is a brief overview of the high-level requirements and some key assumptions for this initiative.

4.1 High Level Requirements

Following are the most critical requirements for a centralized abused management solution:

Online Abuse Complaint: Provide the public - including mandatory reporters - an Internet page to submit complaints 24 hours a day – seven (7) days a week.

Worker Dashboard: Provide screeners, investigators, supervisors and reviewers dashboards listing incidents and investigations that can be filtered and sorted to fit their needs. For example: to filter by the incidents needing response today or to sort for the last incident that the worker updated.

Comprehensive Search: Provide users of the system sophisticated, comprehensive search, filter and sort capability to assist in finding past victims, perpetrators and/or incidents. For example: searches for people across program by name and/or address and/or social security number.

Portals: for Screeners, Investigators, Supervisors and Reviewers. Provide screeners the ability to accept online abuse complaints and route them to the appropriate location, enter abuse complaints received in other manners (phone, email, mail…), update complaints, which could not be completed in a contiguous timeframe. Provide investigators the ability to enter and track required information for an investigation. Provide Supervisors and Reviewers the ability to review and comment on screening decisions and draft investigation reports.

Business Rules Maintenance: Provide System Administrator(s) the capability to maintain business rules separate from system code. For example: allow the System Administrator to update Oregon Administrative Rules and definitions viewed and selected by workers along with field selection values.

Interfaces: Integrate with the existing Master Client Index including inbound Interfaces from OLRO-licensed facilities; provider demographics from the APD provider database and a regularly scheduled data export to the DHS data warehouse and QMDB/Q2.

Historical Data: Load Historical Abuse Management Data into the new solution from multiple feeder systems including OR Access, Web723, LCOG CTS and OAAPI Abuse Database.

Data Warehouse: Provide a data warehouse for running queries, mandated reports, and performing data analysis without impacting performance of end users. Provide a full set of data for running extracts to be used by others systems such as QMDB for DHS.

Workload Management: Support for monitoring and projecting workload by worker, by program, by local office, and by program within an office. Support for assigning, pausing, and restarting work on individual and groups of reports of abuse and/or investigations.

Document Management: Support for capturing, storing and retrieving images and other electronic documents related to reports of abuse and investigations. Support for scanning paper documents. Support for uploading of documents through the online abuse complaint and the worker portals. Support the use of template documents for communications.

Notice Management: Support for worker-driven and system-driven notices to Complainants, Perpetrators, Providers, Various Law Enforcement Agencies, Oregon State Health Occupation

licensing/certifying/authorizing organizations, and referral partners. Support the use of templates for notices that can be sent via secure email, fax and/or the United States Postal Service.

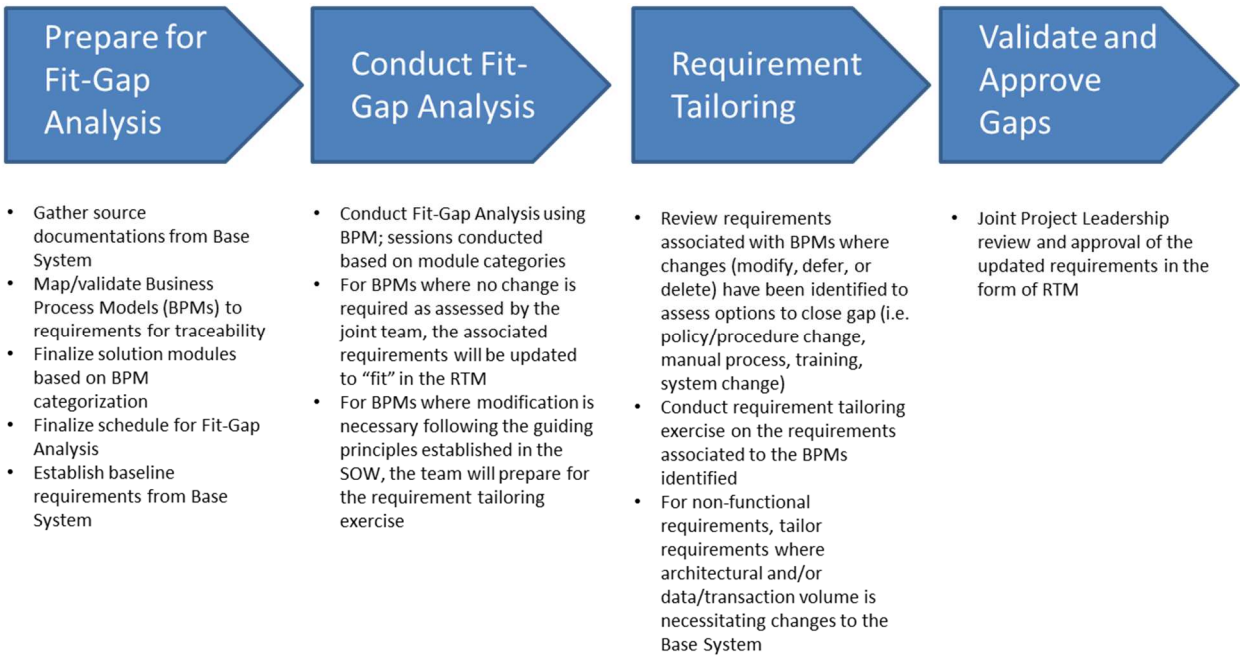
Reporting: Support for the creation of reports required for investigation reporting, protection and intervention process measures, and analysis of service equity in abuse investigations.

Identity and Access Management: Support for the integration with DHS's Active Directory for authenticating workers who are state employees or program partners such as Area Agency on Aging staff and Counties who access the system on the behalf of a DHS program.

Data Security: Protection of data, whether at rest, in transmission, in display, or in reports consistent with federal, state and agency data privacy, security and retention laws, rules and policies.

Disaster Recovery: Ensuring that no data is lost is critical to the safety of our clients. The Recovery Point Objective (RPO) for this project is zero data loss in the event of a disaster. The Recovery Time Objective (RTO) is a maximum of 24 hours that the system can be unavailable in the event of a disaster or system problem.

4.2 Detailed Requirements



The project team developed both high-level business requirements and detailed business requirements. These two requirements documents will provide a Systems Integrator (SI) sufficient context regarding Oregon's business needs to respond to Oregon's planned Request for Proposal (RFP) for a SI. The selected SI's expertise will be leveraged to help refine Oregon's preliminary detailed business requirements, which will increase the probability of project success. Oregon will align requirements as closely as possible to Colorado's design while still addressing Oregon's unique, mission-critical business needs. The detailed business requirements will be reviewed with subject matter experts including DHS/OHA field staff to ensure they are complete and correct.

The Systems Integrator will use Oregon's detailed requirements to conduct a Fit-Gap Assessment with the potential solution to establish additional functional and technical design specifications. This approach leverages the proven model implemented in Colorado to guide Oregon's efforts.

4.3 Fit-Gap Analysis

Fit-Gap analysis will compare Oregon's rules, policies and procedures to the Colorado System and identify how the Colorado System meets respective functionality for Oregon out of the box. The goal of analysis is to identify how the Colorado Solution meets the respective needs of the Agencies. Gaps where system functionality is not present and cannot be resolved through a change to process or policy will be prioritized along with a defined approach to address them. This fit-gap effort identifies the gaps that will identify the need for process changes, software configuration changes and/or customizations required.

The following diagram describes the activities to be conducted during the Fit-Gap Analysis. This information is more fully documented in the planned RFP.

4.4 Assumptions and Constraints

The following constraints are factors in the Alternatives Analysis:

- Project funding was approved in SB5507A Enrolled comprised of:
  - $1,437,494 in General Funds (GF);
  - $3.3 million in Q Bonds;
  - $894,543 for Q Bond issuance and debt service.
- Core functionality for adult abuse report intake, screening and investigation must be implemented by June 30, 2017. The initial release of the Centralized Abuse Management solution will not automate all tasks, so duplicate data entry will not be resolved until Release 2.
- HB4151 requires Oregon have one central statewide solution for APS.

The following assumptions are factors in the Alternatives Analysis below:

- The Oregon Legislature, which approved dollars in SB5507A for this project, will unschedule funds to proceed with this project.
- Population growth is expected to average 10% per year for the populations served in this project.
- The solution will meet 80% or more of agency functional requirements and 90% of non-functional (technical and security) requirements.
- The solution must be easily adaptable to satisfy ongoing process and requirement changes such as those driven by HB4151 and SB1515.
- The selected alternative must support the DHS/OHA Strategic Technology Plan.
- Historic abuse information will be accessible to the DHS data warehouse sometime after the core system is implemented.
- The project will issue a competitive bid Request for Proposal (RFP) for a Systems Integrator (SI) to plan, design, implement and maintain the new system.
- Training will be provided by the System Integrator (SI) to OAAPI Program area trainers who will then train staff statewide.

- Solution implementation and ongoing maintenance and operations will be provided by a 3rd party vendor with oversight from state employees.
- Risk tolerance for this project is moderate based on the timeline, volume of work, and funding available.
- The system can be used and supported in all required locations including but not limited to:
  - DHS and OHA programs, offices, county and local partners.
  - DHS's Background Check Unit.
  - Long-Term Care Ombudsman (LTCO).
  - The Public.

5. Alternatives Analysis

5.1 Alternatives Identification

After a preliminary business case proposed development of a customized solution, the Agencies invested significant efforts to assess other alternatives to compare against custom development. A team comprised of program and technology members conducted in-depth market research. The market research included detailed interviews with 18 states to discover their abuse management solutions. This market research yielded two potentially viable solutions utilized by other states and two used in Oregon. The team did further in-depth analysis of capabilities of these four options against functional and technical requirements, and conducted customer demos and on-site visits. Detailed information from the in-depth analysis and site visits can be found in the Business Case Supplemental Documents.

Information gained during customer demos and site visits eliminated some alternatives under early consideration identified from the project's initial market research including Commercial off the Shelf (COTS) solutions and transfer solutions used by other entities.

COTS solutions available in the marketplace such as Harmony, which could address Oregon's requirements primarily, accommodate only one program - Adult Protective Services. The relevant vendor supported COTS solutions require significant customization, including underlying architecture modification, in order to meet the Agencies' needs. A primary benefit of COTS solutions is that the licensing vendor provides regular regulatory and business functionality updates/upgrades to meet changing needs. The extent and complexity of Oregon's level of required modifications to a COTS negates those benefits, as each release would require re-customization for Oregon. The viable COTS solutions reviewed were only supported by the vendor that owns and licenses the software. In this situation, if the state were not satisfied with the licensing vendor, there would not be options to utilize an alternate vendor to support the system. Many states reported issues getting modifications made to their vendor-licensed software that involved many months of delay to get vendors to address their legal, regulatory and efficiency improvements. Oregon must be able to respond to effectively to the rapidly changing regulatory and business environment. This makes the use of the relevant COTS solutions high risk for Oregon.

Transfer solutions used by other states consist primarily of large, monolithic systems such as the Statewide Automated Child Welfare Information Systems (SACWIS), outdated home grown state systems used for Adult Protective Services over the last 10-20+ years, or small County/AAA applications that cannot accommodate the number of statewide users required by the CAM Project. SACWIS systems have high implementation costs - $50 million and up, with ongoing annual support costs of $20 million or more. Abuse tracking and management is a small piece of functionality in the SACWIS systems. Removing this functionality represents significant expense, leaving it in makes modifications and maintenance cost prohibitive. The general architecture of SACWIS reviewed by the team is old and focuses on the family rather than the abused person. For these reasons, SACWIS transfer solutions were removed from consideration.

Smaller, custom developed solutions such as the Lane County (LCOG) solution were determined not to be viable options for Oregon to consider transferring as a starting point for its statewide solution as they lacked the scalability and functionality necessary to meet Oregon's functional and technical requirements. Most are built using MS Access or other software that is not designed to support the level security or the number of concurrent users that Oregon requires.

As part of Oregon's due diligence, alternate CRM solutions, including MS Dynamics were considered at the request of the Agencies. MS Dynamics was a late emerging option brought forward after robust analysis of other solutions had already been completed. After consideration, the project team did not find MS Dynamics offered substantial capabilities beyond those in more thoroughly assessed alternatives and the cost model was not as viable as other options. Ultimately, The Agencies' Executive Leadership determined Salesforce to be the preferred CRM alternative over MS Dynamics as it enables Oregon to build upon existing foundational capabilities established by Colorado's adult protective services system.

The following alternatives emerged from the analysis completed by the project team and based off the recommendations of The Agencies' Executive Leadership.

1. Purchase a Software as a Service Solution; leverage another state's use of the SaaS.
2. Implement a Custom Build Solution.
3. Maintain the Status Quo.

Project analysis of these alternatives are as follows:

Alternative 1: Purchase Software as a Service Solution; leverage another state's use of that SaaS

Under this alternative, a SaaS CRM solution would be implemented, configured and customized to meet the CAM Project's detailed requirements. This approach allows relatively quick design, build and implementation plus ongoing flexibility to meet the continuously changing business/regulatory environment at a reasonable cost.

Oregon investigated two CRM options – Microsoft Dynamics and Salesforce. While each of these CRM solutions have capabilities that can meet Oregon's needs; Salesforce is considered the front-runner option as it provides Oregon the opportunity to leverage Colorado's proven Adult Protective Services (CAPS) which was configured using the Salesforce SaaS solution and implemented in June 2015. The Colorado capabilities can be utilized by Oregon as a foundational requirements reducing implementation time substantially. This strategy, in concert with procuring a SaaS and services of a Systems Integrator will help accelerate Oregon's implementation efforts, while reducing risk and shortening the implementation timeline. DHS and OHA Executive Leadership believe this synthesized approach represents the best fit for Oregon's needs. More details regarding Colorado's solution and the proposed implementation approach are outlined later in this document.

Alternative 2: Implement a Custom Build System

Under this alternative, the Agencies would design, develop, test and deploy a custom solution built from the ground up for APS, HS, DD, CW and OSH Centralized Abuse Management needs. This alternative would allow a tailor-made solution that would meet all the functional, technical and organization requirements. The costs to develop a custom system are substantially higher than procuring a SaaS solution and carry significantly higher risks and a much longer timeline to implement compared to Alternative 1.

Alternative 3: Maintain the Status Quo

Under this alternative Oregon would maintain the current status quo with disparate, disconnected systems and highly manual processes and there would be no additional investment in abuse tracking system automation. Improvements to current processes would be limited to those that arise naturally through the Agencies' continuous improvement program. The Agencies would continue with ineffective, disconnected automated and manual systems, which are difficult to oversee and analyze. The centralized abuse tracking needs of HB 4151 would not be met.

The chart below outlines the estimated Total Cost of Ownership for alternatives:

TOTAL·COST·OF·OWNERSHIP·ANALYSIS¶

Comprehensive·Cost·Model·for·all·Scenarios¶

5.1.1 Alternative 1 – Implement a Software as a Service Solution and leverage another state's proven capabilities with that SaaS

Cost

The total cost of implementing and supporting this alternative and operating it the proposed solution starting July 2016 through June 2023 is estimated to be ~$8.4 million. (See details of this estimate in Appendix A.) Compared to the Custom Build alternative, this alternative minimizes costs of Fit-Gap analysis, design, configuration, customization, testing, training, and rollout by using a Customer Relationship Management platform based on the successful Colorado APS abuse management solution. This alternative requires a per-person and/or per device Salesforce licensing cost over the life of the solution.

Alternative 1 - Salesforce CRM
Totals include FY 2016-17 through FY 2022-23

		Through Dec 2017 Project and Implementation	Jan 2018 through June 2023 Operations, Maintenance, Ongoing Support	Total	%
Personal Services	Salaries & Benefits	$1,554,538	$80,303	$1,634,840	19.4%
Services & Supplies & Capital Outlay	State Data Center	$0	$0	$0	0.0%
	Software	$1,157,814	$3,089,932	$4,247,746	50.5%
	Hardware	$20,000	$0	$20,000	0.2%
	IT Professional Services	$1,479,500	$614,499	$2,093,999	24.9%
	Contingency	$421,185	$0	$421,185	5.0%
	Total	$4,633,037	$3,784,733	$8,417,770	
	%	55.0%	45.0%		100.0%

Benefits

Alternative 1 supports the functional and non-functional requirements associated with Centralized Abuse Management for the Agencies. The system will implement much faster, with lower risk and less cost than building a custom solution. This is demonstrated Colorado, who implemented their

initial release of the Salesforce SaaS within 6 months. Colorado's current system provides a proven APS model for Oregon to leverage as a starting point for the centralized abuse management solution. Oregon's plan is to pursue procurement of Salesforce as the SaaS as its capabilities and the ability to leverage Colorado's requirements will accelerate Oregon's initiative.

Salesforce provides an easy-to-use capability for the business to administer templates, list values, and perform ad hoc reporting. This SaaS allows for program-specific uniqueness through configuration of program specific data integrity rules. Configuration capability of Salesforce will allow program variations when necessary and the ability to make frequent changes quickly to accommodate the rapidly changing regulatory environment. Configuration supports the use of templates and rules for distribution of notices making it easier to generate and distribute notices. Salesforce has interface/integration tools, which will quickly and easily interface the new system with legacy extracts and systems such as the Agencies' provider information and client master index.

All reports of abuse, response times and screening decisions will be entered in real-time into the system. Reporters of abuse will be able to submit their reports on-line via the Internet. Screeners, investigators and others with a need to know will be able to research past screenings and investigations (including historical system investigation data created prior to implementation) to assess if ongoing or past reports of abuse and investigation outcomes play a role in the current situation. Screeners, investigators, supervisors, reviewers and others will have dashboards to assist them in managing their work/workload. All data about an investigation will be kept online rather than in field office files making management, oversight and prevention planning more effective.

In "Magic Quadrant for the CRM Customer Engagement Center" May 2016, Gartner reports Salesforce to be the leader in both their Ability to Execute and Completeness of Vision for their CRM.[11] They also said that Salesforce "appeared as the leading vendor on shortlists for Business to Business (B2B) customer service and support solutions seen by Gartner six times as often as the nearest rival." "Salesforce's enormous influence in the market has attracted a global list of key system integrators and over 600 complementary software providers."

Risks

The top risks of this alternative are:

1) Implementing an enterprise information technology solution within a relatively short timeline that spans multiple programs and agencies located across the state.

2) Significant policy and procedure changes will be required for the Agencies as more standardization is put in place.

3) Integration may be more difficult between Salesforce and legacy systems than anticipated.

4) Acquisition of funding to ensure reductions in manual work arounds and duplicate data entry beyond the 2015-17 biennium may be a challenge.

5) System will need to adhere to security requirements for Level 3 data. Project will need to ensure that all these requirements are met utilizing a SaaS solution.

[11] Critical capabilities and features included: "Case management/problem/service resolution (and control of customer master data); A knowledge management solution; a full customer self-service suite, with support for Web and mobile channels; Real-time decision-making and predictive analytics support for agents; an adaptive business rule engine; Enterprise feedback management."

6) This alternative is dependent on the acquisition of the code/configuration of Colorado's system.

5.1.2 Alternative 2 – Implement a Custom Build Solution

Cost

The total cost of implementing this alternative and operating it through June 2023 is estimated to be ~$17 million. (See Appendix A for details.) This alternative incurs the full cost of analysis, design, development, testing, training, and rollout. The cost is unknown for Enterprise Technology Services/State Data Center (ETS/SDC) to develop and implement a process to ensure no data loss in the event of a disaster or event causing the production server/system to go down. This alternative will typically require only server-based software and developer tool licensing as opposed to user or end user device licensing costs.

Alternative 2 - Build
Totals include FY 2016-17 through FY 2022-23

		Through June 2019 Project and Implementation	July 2019 through June 2023 Operations, Maintenance, Ongoing Support	Total	%
Personal Services	Salaries & Benefits	$3,326,881	$258,998	$3,585,879	21.2%
Services & Supplies & Capital Outlay	State Data Center	$139,056	$86,400	$225,456	1.3%
	Software	$70,000	$10,000	$80,000	0.5%
	Hardware	$20,000	$0	$20,000	0.1%
	IT Professional Services	$5,056,789	$4,052,172	$9,108,961	53.7%
	Contingency	$1,722,545	$0	$1,722,545	10.2%
	Indirect	$1,550,291	$661,135	$2,211,426	13%
	Total	$11,885,562	$5,068,705	$16,954,267	
	%	70.1%	29.9%		100.0%

Benefits

This alternative could achieve all of the Agencies functional, technical and organizational requirements.

Risks

The top risks of Alternative 2 - Build are:

1) Implementing an enterprise information technology solution that spans multiple programs and agencies located across the state in a longer timeframe than suits the State's sense of urgency. This alternative is estimated to be designed and implemented in a 2 ¼ to 2 ½ year timeline.

2) Significant policy and procedure changes will be required for the Agencies as more standardization is put in place.

3) Availability of funding at the level required to support completion of the project.

4) Creation of a new ETS/SDC custom process/design/implementation to ensure there would not be any loss of data during a disaster or event causing the production server/system to go down. This is not a proven ETS/SDC capability for non-mainframe applications so the costs to establish are unknown and the desired results could take longer than expected.

5) Setup disaster recovery for zero data loss with an outside vendor, then test for potential cut over to should a disaster occur at ETS/SDC.

5.1.3 Alternative 3 – Maintain the Status Quo

Cost

Maintaining the status quo and not implementing an integrated solution will cause DHS and OHA to incur additional expenses over time. That estimated total cost through June 2023 is approximately ~$5.2 million (see Appendix A for details). This additional cost will be driven by increasing workloads due to aging populations and increased regulatory requirements leading to the need to add more staff to manage the demand in the field and meet key performance measure goals.

Alternative 3 - Do Nothing

		Through Dec 2017 Project and Implementation	Jan 2018 through June 2023 Operations, Maintenance, Ongoing Support	Total	%
Personal Services	Salaries & Benefits	$1,047,589	$4,136,675	$5,184,264	100.0%
Services & Supplies & Capital Outlay	State Data Center	$0	$0	$0	0.0%
	Software	$0	$0	$0	0.0%
	Hardware	$0	$0	$0	0.0%
	IT Professional Services	$0	$0	$0	0.0%
	Total	$1,047,589	$4,136,675	$5,184,264	
	%	20.2%	79.8%		100.0%

Benefits

There is no up-front investment required to continue maintaining the status quo.

Risks

The top risks of Alternative 4 – Maintain the Status Quo are the continuation of current state risks:

1) Safety risks to Oregonians that are reported as abused. The reports of abuse may be hand written (if documented at all) and stored in paper/personal computer files in 140 or more locations across the state. This fragmentation of data makes it difficult to oversee the quality of screening decisions regarding reports of abuse and hence leaves Oregonians at risk.
2) Safety risks to Oregonians when an alleged or substantiated perpetrator applies for certification, licensing or authorization from an Oregon state, DHS or OHA organization. Communications from investigators to the certification, licensing and authorization organizations are inconsistent so the certification, licensing or authorization organization may not be aware they are approving an alleged or substantiated perpetrator.
3) Safety risks to Oregonians when an alleged or substantiated perpetrator requests employment from a DHS, OHA, and program partner or provider organization. Communications from investigators to the Background Check Unit (BCU) are inconsistent across all the programs and program partners so BCU may not be aware they are approving an alleged or substantiated perpetrator to work with Oregonians.

4) Risks that field staff are unable to effectively manage their own workload and for staff/management to prevent cases from being lost or potentially left unresolved due to insufficient tools for tracking work.
5) Risk of increasing field staff frustration as they spend more time on duplicate data entry, manual creation and distribution of notices instead of performing actual investigations because both population sizes and requirements for additional notices increase the workload.
6) Risk of expensive lawsuits resulting from the risks to Oregonians.

5.2 Cost Comparison

The Oregon Legislature has approved the use of ~$1.4 million in General Funds and ~$3.3 million in Q Bonds (plus issuance and debt service) to be used during the 2015-17 biennium.

The following Table summarizes the cost information from the preceding section.

Table 3 – Cost Summary

Alternative	Cost
Alternative 1 – SaaS	~$ 8.4 Million
Alternative 2 – Build	~$17.0 Million
Alternative 3 – Maintain the Status Quo	~$ 5.2 Million

5.3 Benefit Comparison

The following table summarizes the benefits information from the preceding section.

Benefit Area	Alternative 1 Salesforce	Alternative 2 Build	Alternative 3 Status Quo
Comprehensive multi-program system	Good	Good	n/a
Proven Model	In Colorado	No	Yes
Meets functional and non-functional requirements	Good	Good	Poor
Speed to implement	Fast	Slow	n/a
Speed to integrate with legacy data	Fast-Moderate	Moderate	n/a
Up-front investment	Low	High	n/a
Maintenance & operations investment	Medium	Medium	n/a
End user ad hoc reporting	Easy	Somewhat Difficult	Very Difficult
Supports DHS/OHA Strategic Technology Plan	Yes	Yes	No
Reduce risk to Oregonians & liability for State	Good	Good	Poor
Increase productivity and efficiency	Good	Good	Declines over time as expectations increase
Support program variation & frequent changes	Good	Average	Poor
Support growing workload	Good	Good	Poor
Identify & track abuse across lifespan	Good	Good	Poor
Identify & track abuse at facilities	Good	Good	Poor
Produce standardized info for audit and analysis	Good	Good	Poor
Web-based & easy-to-use	Good	Good	Poor

Benefit Area	Alternative 1 Salesforce	Alternative 2 Build	Alternative 3 Status Quo
Supports HB4151	Good	Good	Poor
Supports SB1515	Good	Average	Poor
Decommissions Systems	COIN, LCOG CTS, OAAPI Abuse Database, SERT, Web723	COIN, LCOG CTS, OAAPI Abuse Database, SERT, Web723	None

5.4 Risk Comparison

Below is a high-level risk comparison table. Please see "CAM Project Risk Assessment – Stage Gate 2" for a more detailed description of the principal risks facing the project.

Risk Area	Alternative 1 Salesforce	Alternative 2 Build	Alternative 3 Status Quo
Technology	Low	High	Medium
Policy	Low	Medium	High
Operational	Low-Medium	High	High
People	Medium	Medium	High
Overall	Low-Medium	High	High

Each of the active alternatives has the risks associated with multi-Program (enterprise) information technology projects involving complex state program and partner relationships.

- Alternative 1 (SaaS) is the least risky because it leverages Colorado's APS system built using Salesforce, and utilizes a platform which allows for rapid configuration and customization as needed.
- Alternative 2 (Build) is a larger project with inherently higher risks than Alternative 1. Risk is driven in part by the significantly longer duration and the higher demand over that duration on Program participation than Alternative 1.
- Alternative 3 (Status Quo) has the highest risk of all the alternatives. It continues the current state where statewide centralized oversight is very difficult and workers continue with paper files and severely inadequate or no application system to support their needs.

6. Conclusions and Recommendations

6.1 Conclusions

Both Alternative 1 and 2 would address the opportunity described in Section 3.2 above and they fulfill the objectives listed in Section 3.3. The cost to implement Alternative 1 is less than half of Alternative 2 with significantly lower risks and a much shorter implementation timeline.

Table 4 – Cost, Benefits, Risks Summary

	Project Cost	Project Benefits	Overall Risk
Alternative 1 SaaS	~$ 8.4 Million	All requirements, quick to implement	Low - Medium
Alternative 2 Build	~$17.0 Million	All requirements	High
Alternative 3 Status Quo	~$ 5.2 Million		High

6.2 Recommended Action and Schedule

The Agencies recommend Alternative 1 – Purchase Software as a Service Solution; leverage another state's use of that SaaS. This approach will procure Salesforce, a SaaS CRM solution and leverage Colorado's APS solution's capabilities as the basis for Oregon's solution. Colorado's solution is built on the Salesforce platform.

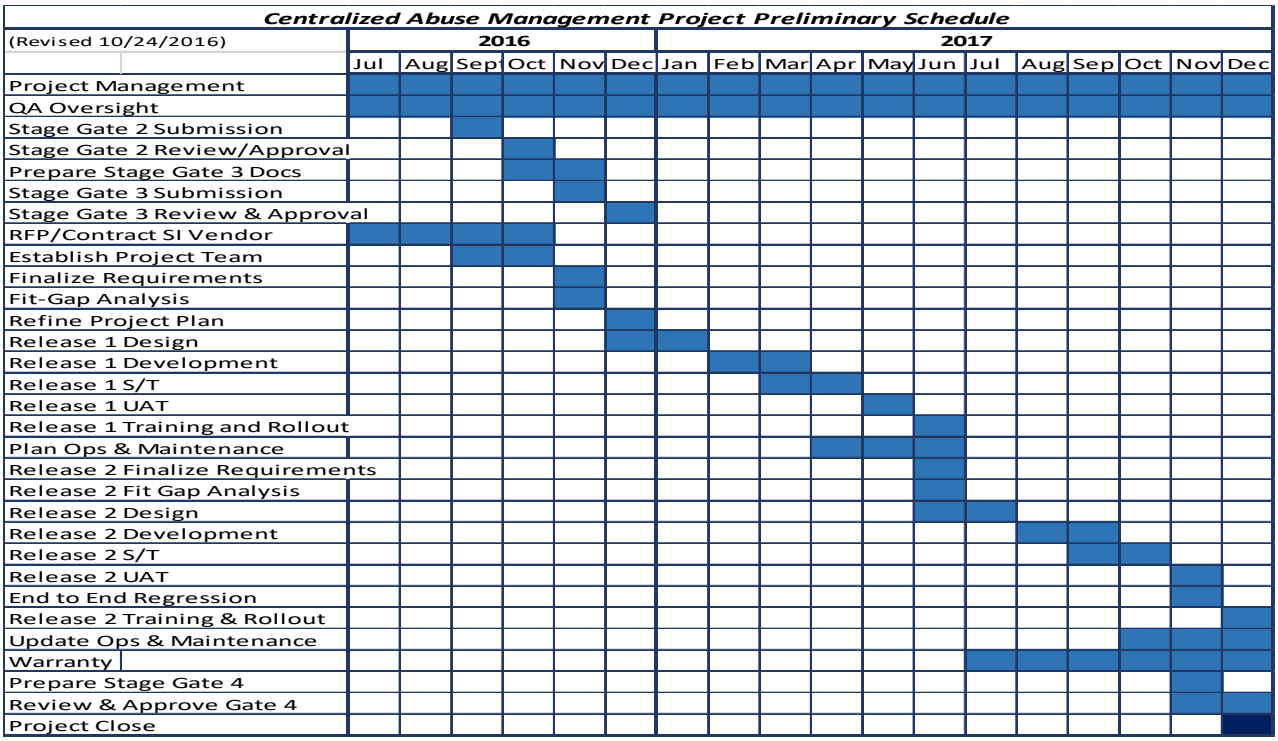
To support this approach, the state will need to ensure that security standards adhere to Oregon's SaaS Cloud Policy requirements and the terms and conditions contract will reflect those standards.

The recommended approach is significantly lower risk and approximately half the cost of Alternative 2 – Build, while still providing equivalent benefits.

The recommended alternative aligns well with the DHS/OHA Strategic Technology Plan including progress in pursuit of automating workflows, decision-making, and business rules while reducing manual, paper-based processes. It moves the state closer to the "360 degree view of a person" goal.

DHS requests Stage Gate 2 approval. Stage gate and legislative approval was received by DHS in 2014 for project initiation. In 2015, DHS received approval for additional research on solutions currently in use by other States for abuse management. DHS plans to seek approval to move to the detailed project planning phase (Stage Gate 3) in order to procure the Systems Integrator for implementation of the selected SaaS.

Funding for this initiative is provided by the legislatively approved use of ~$1.4 million in General Funds and ~$3.3 million in Q Bonds (plus issuance and debt service) to be used during the 2015-17 biennium. DHS is pursuing several funding options to close the financing gap between currently earmarked funds and the total expected cost. These include 1) Obtaining grant funding through ACL12; 2) Obtaining approval for a Policy Option Package (POP) for future



[12] APD has applied for but not received approval for grant funding. The US Department of Health and Human Services (HHS) Administration for Community Learning (ACL) released a Funding Opportunity Announcement for grants to states to strengthen their Adult Protective Services (APS) systems statewide. Due date for applications is 05/31/2016 and APD intends (pending approval) to

enhancements and to also cover the first two years of licensing for maintenance and operations of the new system.

The table below reflects the high level proposed project schedule for Alternative 1 – a SaaS including the reuse of Colorado's Salesforce code set and functionality. If Alternative #1 is approved, all core requirements are planned to implement by December 2017.

Table 5 – Tentative Project Schedule

The following chart lays out a preliminary schedule for the project. A more detailed project schedule will be prepared during the project planning phase and the project schedule will require re-baselining after the Fit/Gap Analysis. The chart is duplicated in Appendix B, where it is more legible.

6.3 Consequences of Failure to Act

Given the current degree of manual processing and the projected growth in work, failure to act will result in continued poor program performance with regard to key performance measures including timeliness of screening decisions and response times for investigations. Doing nothing will continue to grow the problems that impact the safety of Oregonians, including: 1) Workloads of screeners and investigators in the field; 2) Communications between investigators and certifying, licensing and authorizing organizations; 3) Client and other interested party discontent, and; 4) The potential for new lawsuits.

Failure to act on this effort means that the eventual satisfaction of the needs of the Programs and OAAPI will come at higher risk to Oregonians and liability to the State.

apply for the full amount of this grant to support the costs of this project. This grant opportunity is for approximately $412,000 over two years.

7. Business Case Checklist

7.1 Checklist for the Completed Business Case

☒ Has the case clearly defined what the case is about, the purpose for the proposed solution, what business problems the proposed solution attempts to solve, and the scope of the proposal?

☒ Has the cash flow, the flow expenditures, and the intake of financial benefits been presented over a common time period for the case, for each alternative action considered (including the “status quo”/current state alternative).

☒ Are the assumptions and methods for assessing the proposal’s impacts clearly defined, understandable, and acceptable? Do not forget risk impacts!

☒ Does the business case include the non-financial costs and benefits?

☒ Are the factors critical to the success of the proposal clearly defined?

☒ Are there critical success factors that can be managed? Is there a risk analysis that identifies and measures the relevant risks to the proposal?

☒ Are recommendations and conclusions based on a clear comparison of alternatives in terms of contributions to business objectives, problems solved, financial outcomes, and risks?

☒ Does the case clearly identify the estimated timeframes, costs, and implementation strategy required to successfully deliver the recommended solution?

☒ Does the case clearly express to consequences of failure to act on the recommended alternative?

1. Executive Summary

Oregon's Department of Human Services (DHS) and Oregon Health Authority (OHA) are committed to ensuring the safety of vulnerable Oregonians. This revised business case outlines the purpose and proposed approach to better serve this population by implementing an integrated solution to investigate, track, and report on incidents of adult abuse

The approach to this revision is to correct errors and update naming conventions within the original business case. Appendix C has been added to detail the schedule and budget changes that have been implemented since the original business case was approved. The goals and objectives are largely unchanged. The scope of the project has not changed. The system was successfully launched in July of 2018 starting with a pilot implementation with the Aging and People with Physical Disabilities (APD) program. Currently, there are over 300 APD users Statewide relying upon this system daily while we prepare to design and develop the next set of functionality to serve the needs of the Office of Developmental Disabilities (ODDS) and Mental Health programs.

The Office of Training, Investigations, and Safety (OTIS) formally known as the Office of Adult Abuse Prevention and Investigations is a DHS/OHA Shared Service that provides abuse-related services to the Aging & People with Physical Disabilities (APD), Office of Developmental Disabilities Services (ODDS), and Child Welfare (CW) programs at DHS, and the Mental Health program in the Human Services Division (HSD) at OHA.

Together with its program partners, OTIS serves some of Oregon's most vulnerable residents, in their own homes or in licensed care facilities. The approximate numbers served include:

- 500,000 older adults and people with physical disabilities;
- 16,000 adults enrolled in ODDS programs;
- 55,000 adults receiving Community Mental Health Services or residing in the Oregon State Hospital (OSH); and
- 3,600 children residing in licensed facilities that provide therapeutic treatment, or children enrolled in ODDS services.

Establishing a centralized abuse management system is of paramount importance to DHS and OHA (herein referred to as "The Agencies".) The Agencies seek to eliminate manual processes as well as the need to utilize legacy systems to standardize and centralize adult abuse data collection for The Agencies.

The objective of this effort is to develop and implement a comprehensive web-based multi-program abuse management system. This system will reduce or eliminate manual input/processes, replace or reduce functionality in legacy systems, standardize, and centralize adult abuse data collection across Oregon, and provide a web-based tool for reporting and analyzing adult abuse. This system will capture abuse allegations and investigations from intake and screening through investigation, case closure, and referrals documentation, and will support abuse management oversight and inquiries. A centralized system will enhance DHS and OHA's ability to protect vulnerable Oregonians, by replacing existing manual and disparate processes and systems across the state with a fully integrated system that improves visibility.

1.1 Background

Oregonians will be better served with a centralized adult abuse management system replacing the existing collection of manual processes and disparate systems currently used across the state. Currently, State Agencies, partner organizations, and local office workers[1] interpret Oregon Administrative rules differently regarding which allegations of abuse to screen in. Most offices lack a consistent, automated mechanism to screen in, investigate, document, and report or track the full life cycle of an abuse incident and the parties involved. Implementing a single, stable, rules-based solution will improve consistency, streamline workflow, increase efficiencies at local offices and reduce gaps in the availability of timely, pertinent information to support abuse investigations throughout the state. The Agencies' goal is to increase awareness of patterns of abuse in licensed settings and in the community.

1.2 Opportunity Definition

The Agencies' are championing this initiative to improve services and support for vulnerable Oregonians through implementation of consistent processes and robust systems.

The outcomes this project will achieve are responsive to challenges identified by multiple studies and legislation including House Bill 4151 (HB4151) and Senate Bill 1515 (SB1515). HB4151 requires DHS to standardize resources and technologies related to abuse investigations. SB1515 requires DHS and OHA to improve communications about abuse investigations with certifying, licensing, and authorizing organizations. A centralized abuse management system will also address DHS Elder Abuse Prevention Audit findings, Adult Safety and Protection Team Report recommendations and the Resident Safety Review Council Report from February 2013.

The high-level business objectives driving this effort are to:

- Better protect the individuals we serve.
- Increase productivity and efficiency through automation.
    - Document reports of abuse, screening decisions, and investigations centrally and in real-time so local staff, local management, Central Office, OTIS, and others with a need to know have immediate access to information.
    - Reduce duplicate data entry and manual work.
- Support program variation and frequent changes.
- Support the growing abuse management workload.
- Identify and track abuse across the lifespan of a person (victim and/or perpetrator).
- Identify and track abuse and abuse history at DHS-licensed facilities across programs.
- Produce standardized information for auditing and analysis.
- Implement an easy-to-use, web-based, system.

The Agencies' original vision was to have at least a minimally viable solution of core functionality across all programs in scope implemented in a first release with a second release to follow with

[1] Local office workers include screeners, investigators, and supervisors in the offices across the state that are performing the work for any of the programs included in the scope of this project.

the remaining requirements and enhancements. Core functionality was defined as the functionality to support intake and screening through investigation, case closure and referrals documentation, and reporting processes. However, the Agencies intended to enlist the assistance of a System Integrator (SI) to propose implementation options for the Agencies' consideration that included the suggested scope, functionality, programs included and release dates for the implementation of the CAM system, with the success criteria for the project's planned releases to be determined in the execution phase in collaboration with the System Integrator.

1.3 Alternatives Analysis

After a preliminary business case proposed the development of a custom solution, the Agencies invested significant efforts to assess other alternatives. A team comprised of program and technology members conducted in-depth market research. The market research included in-depth interviews with 18 states to discover their abuse management solutions. This market research yielded two viable solutions utilized by other states and two used in Oregon. The team did further in-depth analysis of the capabilities of these four options against functional and technical requirements and conducted customer demos and on-site visits. The Agencies concluded that building a custom Centralized Abuse Management System introduced much higher risk and cost compared to pursing a different alternative. Detailed information from the in-depth analysis and site visits are in the Alternatives Analysis, Section 5.0, of this document and in the supplemental documents. Information gained during customer demos and site visits eliminated some alternatives under consideration identified from the project's initial market research. These eliminated options included Commercial off the Shelf (COTS) solutions and transfer solutions used by other entities resulting in the following remaining alternatives.

Alternative 1: Purchase Software as a Service Solution; leverage another state's use of that SaaS

Under this alternative, a Software as a Solution (SaaS) CRM solution would be purchased, configured, and customized to meet the CAM Project's detailed requirements. This approach allows relatively quick design, build and implementation plus ongoing flexibility to meet the continuously changing business/regulatory environment at a reasonable cost.

Oregon has the opportunity to leverage requirements for Colorado's Adult Protective Services (CAPS) solution implemented in June 2015 as a starting point for a SaaS solution. Colorado implemented CAPS in June 2015 using Salesforce, a Customer Relationship Management (CRM) SaaS solution. Oregon can leverage CAPS' foundational capabilities, substantially reducing the time to deliver, the cost of implementation, and the exposure to risk for Oregon. DHS and OHA Executive Leadership believe this synthesized approach represents the best fit for Oregon's needs. More details regarding Colorado's solution and the proposed implementation approach are outlined later in sections 5.1.1 and 6.2 of this document.

Under this alternative, Oregon will leverage Colorado's solution as foundational requirements for Oregon's abuse management toolset, using the services of a Systems Integrator to configure and/or customize the software to meet Oregon's needs. The estimated cost of this alternative through implementation is ~4.7 million dollars with at total estimated cost through 2023 of approximately ~8.4 million dollars.

Alternative 2: Implement a Custom Build System

Under this alternative, the Agencies would design, develop, test, and deploy a custom solution for

The Agencies' Centralized Abuse Management needs. This alternative would allow a tailor-made solution that would meet all the functional, technical, and organization requirements. The cost, risks, and timeline to implement are substantially higher than implementing a SaaS solution leveraging Colorado's foundational requirements. The total estimated cost for this alternative through implementation is ~11.9 million dollars with a total estimated cost through 2023 of approximately ~$17.0 million dollars.

Alternative 3: Maintain the Status Quo

Under this alternative Oregon would maintain the current status quo with disparate, disconnected systems and highly manual processes and there would be no additional investment in abuse tracking system automation. The requirements and recommendations made by HB4151, SB1515, and various reports and audits would not be met in the foreseeable future. The Agencies' fragmented approach would continue and improvements to current processes would be limited to those that arise naturally through the Agencies' continuous improvement program. The Agencies would continue with ineffective, disconnected, automated and manual systems, which are increasingly difficult to oversee and analyze. The total estimated cost of this alternative through 2023 of approximately ~$5.2 million dollars.

In light of the settlement that was reached with Oracle in September of 2016, the Agencies were asked to evaluate the appropriateness and feasibility of implementing the CAM solution using Oracle products contained in the negotiated User License Agreement (ULA). The settlement offers Oracle's catalog of products free of charge for the next 5 years and 10 months. However, use of Oracle products would not allow the Agencies to leverage the foundational capabilities of the Colorado CAPS solution due to the fact that Colorado's code is specific to the Salesforce platform. The Colorado solution is the only proven implementation of an Abuse Management System on a CRM platform. An approach using Oracle products would substantially increase the time to deliver a solution and expose Oregon to additional risk as the Agencies would be unable to leverage the work done in Colorado and would be required to develop a solution on an unproven platform from the ground up. Implementation costs would increase to support additional requirements, design, and development efforts. A transfer approach of Colorado's solution will establish a collaborative relationship with Colorado and enable Oregon to continue to benefit from any new developments that Colorado makes to their solution. This continuous collaboration, allowing Oregon the option to use those enhancements free of charge, is dependent on the transfer and use of the CAPS code on the Salesforce platform and could not be utilized with an approach including Oracle products.

1.4 Conclusions and Recommendations

Based on the analysis of the alternatives, DHS and OHA intend to pursue Alternative 1: Implement a SaaS Solution and leverage another state's capabilities with that SaaS. This strategy will help accelerate Oregon's implementation efforts, while reducing risk and shortening the implementation timeline.

Section 6.2, Table 5 (5) of this document sets out a preliminary schedule to implement the Centralized Abuse Management system in two releases. To support the commitments made to the Legislature of an implemented solution within the 2015-2017 biennia and in response to HB4151 and SB1515, the project's scope will be implemented in two releases. A first release is projected to complete by June 2017 and the second release by December 2017. The high-level estimated cost of implementing the system and operating it through December 2017 for both releases is approximately $4.7 million. The project has been funded for a total of $5,632,037 which includes $1,437,494 of general funds, $3,300,000 of Q bonds and $894,543 for Qbond

issue and debt service for a total of usable project funds of $4,737,494. Funds for issue and debt service will not be reported in the funding. Ongoing operating costs post-implementation through June 2023 are estimated at another $3.0 million, for a total 7-year investment of approximately $8.4 million. Actual costs may differ depending on per user licensing costs and vendor responses to the planned Request for Proposal (RFP) for System Integrator (SI) services.

2. Background & Purpose

2.1 Current State of Abuse Management Operations

The Office of Training, Investigations, and Safety(OTIS) is a DHS/OHA Shared Service that provides abuse-related services to the populations served by The Agencies and provides services for some of Oregon's most vulnerable residents, in their own homes or in licensed care facilities.

The Agencies use many different methods to support screening, investigations, referrals, and other abuse management processes. At their core, these processes have very similar steps. They vary depending on: 1) The population served; 2) If the intake/screening/investigating organization is a state organization or contracted party and; 3) Which computer applications and end user tools they have available for their use. There are seven (7) key systems, six (6) of which are state owned and one (1) owned by a local county, and more than 120 local databases and Microsoft (MS) Excel spreadsheets in use at this time. These systems are not integrated, nor do they provide all the essential information required for local workers, local managers, and Central Office oversight.

In 2014, almost 750,000 Oregonians were in one of the nine populations supported by the Agencies. During that same year, the Agencies received over 38,000[2] allegations of abuse of these individuals, resulting in 18,185[1] investigations of which 4,544 were substantiated. This number does not account for an unknown number of allegations screened out at the local office level due to the lack of visibility caused by disconnected processes and systems.

According to the 2014 OTIS Annual Report dated July 2015, "In 2014, there was a 10% overall increase in the number of investigations conducted (compared to 2013)." Over the next ten years, the number of allegations received and screened by The Agencies is expected to increase nearly 60%. This assessment increases the projected 50,414 allegations in 2015 to over 78,500 allegations in 2024, due to predicted growth of vulnerable populations. OTIS is projecting 30,800 investigations by 2024, a nearly 63% increase from the 2015 level of 19,000 investigations.

In 2014, the Oregon State Legislature passed House Bill 4151 (HB4151). Section 4 of HB4151 mandates that for adults 65 and older and for residents of Office of Licensing and Regulatory Oversight (OLRO) licensed facilities, DHS "shall adopt policies and guidelines to plan for the development and standardization of resources and technologies" related to abuse. In summary it mandates the following: 1) Capture of key adult abuse incident and management data; 2) Standardization of procedures and protocols for making and responding to reports of abuse; 3) Standardization of procedures and protocols for investigations of reports of abuse and; 4) Promoting and coordinating communication and information sharing with law enforcement agencies regarding reports and investigations of abuse.

There are five main program areas involved in this project: 1) DHS' Aging & People with Disabilities (APD) Adult Protective Services (APS); 2) OHA's Health Systems (HS) Division; 3) DHS' Developmental Disabilities (DD); 4) DHS' Child Welfare (CW) and; 5) OHA's Oregon State Hospital (OSH) Division. For a comprehensive list of stakeholders, see the Business Case Supplemental Documents Package.

There is a long list of Oregon Revised Statutes (ORSs) and Oregon Administrative Rules (OARs) for the program areas and populations served by this project.[3] Some overarching statutes drive

[2] OAAPI Annual Report 2014 – Published July 2015.
[3] A complete list of ORSs and OARs by population served can be found in Business Case Supplemental Documents Package.

consistent rules for multiple populations and program partners. However, there are also specialized rules depending on the population served. A full analysis of the similarities and differences in these rules has not been performed. It is important to note that many factors impact these ORSs/OARs resulting in frequent changes. In the future, there will be one standard process for all populations served. This standard process will allow for the nuances between the ORSs/OARs in place today.

Federal and State legislation, program rules, processes, terminology, reporting and coding requirements are evolving at a quick pace. The different agencies within the US Department of Health and Human Services (HHS) are working toward more standardization in the adult abuse discipline.[4,5] The disconnected tools in use by DHS and OHA are not modern, sophisticated, or flexible enough to evolve with the changing regulatory environment within the state or across the nation.

2.2 Current State of DHS Aging and People with Disabilities Abuse Management Operations

The DHS Aging & People with Disabilities APS program serves two Oregon population groups: APS Community and APS Facility.

- APS Community consists of approximately 620,000 adults age 65 and older and adults 18-24 with a physical disability who live in their own homes in the community.
- APS Facility consists of approximately 46,000 individuals living in DHS-licensed facilities.

Screening and investigation of these reports of abuse are performed by Aging and People with Disabilities (APD) Field Offices and certain Area Agencies on Aging (AAAs).

In 2014, there were approximately:

- 12,100 allegations of APS Community abuse resulting in approximately 3,300 substantiated abuse cases.
- 4,400 allegations of APS Facility abuse resulting in approximately 950 substantiated abuse cases.

The number of allegations supported is difficult to ascertain because the two APS systems in use lack screening capabilities.

[4] In September 2013, recognizing the lack of consistent national data on adult maltreatment, HHS, the Administration for Community Living (ACL), in partnership with the Office of the Assistant Secretary for Planning and Evaluation (ASPE), began a 2-year effort to design and pilot test a national reporting system based on data from state adult protective services (APS) agency information systems. The project is currently designated as the National Adult Maltreatment Reporting System (NAMRS).

[5] The CDC's National Center for Injury Prevention and Control, Division of Violence Prevention has published "Elder Abuse Surveillance: Uniform Definitions and Recommended Core Data Elements" in January 2016. They indicate in their paper "Longstanding divergences in the definitions and data elements used to collect information on Elder Abuse (EA) make it difficult to measure EA nationally, compare the problem across states, counties, and cities, and establish trends and patterns in the occurrence and experience of EA."

The major computer systems used by APS are: 1) Oregon ACCESS, which is a case management system for APS Community Clients, and; 2) Web723, which is a tool for documenting an APS Facility abuse investigation report. These two systems have poor search capabilities making it difficult for workers to find historical abuse information. As a result, offices must resort to tracking key information on spreadsheets and in Microsoft (MS) Access databases.

Other than the Client Tracking System (CTS) for Lane Council of Governments (LCOG), key system screening functionality does not exist. This means local screeners and investigators are not able to see statewide abuse screening information, and central program management is unable to monitor local screening activity or track historical screening trends. Additionally, the search capability in these systems does not support the sophisticated and time-sensitive needs of the program to respond to queries about specific allegations or overall trends. All notices are manually created in MS Word resulting in considerable duplicate data entry and the potential for human error. LCOG has their own MS Access computer system, which allows for LCOG-wide documentation of intake, screening decisions, investigations, and the generation of notices.

2.3 Current State of OHA Health Systems Abuse Management Operations

The OHA Health Systems Division serves two abuse population groups (within the scope of this project). They are: 1) Individuals in State Operated Secure Residential Treatment Facilities and; 2) Individuals receiving Community Mental Health services.

- State Operated Secure Residential Treatment Facilities serve approximately 120 people.
- Community Mental Health Programs (CMHP) are County based and serve approximately 57,200 people.

Screening and investigations involving adults receiving CMHP services are performed by County CMHP staff, with technical assistance and consultation provided by OTIS. Exceptions include when the alleged abuse involves CMHP staff or occurs in a state-operated Secure Residential Treatment facility; in those cases, OTIS staff perform the screening and investigation.

In 2014, there were approximately:

- 15 allegations of abuse for individuals in State Operated Secure Residential Treatment Facilities resulting in about seven substantiated abuse cases.
- 395 allegations of abuse for individuals receiving Community Mental Health services of which approximately 134 were substantiated.

Allegations and investigations for State Operated Secure Residential Treatment Facilities and Community Mental Health that are received by OTIS, are entered into the OTIS Abuse Database. Not all Community Mental Health allegations that are screened out (not needing investigation), are tracked as there is not a centralized database supporting these programs. Technology tools depend on what tools a particular County CMHP has in place. The key computer system used is the OTIS Abuse Database, which is MS Access and is not accessible to the Oregon Counties. All data entered into the OTIS Abuse Database is after the fact, duplicate data entry, and currently used to capture the investigation data electronically for future analysis.

Investigations for these populations are all performed manually and then typed into MS Word. All notices are manually created in MS Word resulting in considerable duplicate data entry and the potential for human error.

2.4 Current State of DHS Office of Developmental Disabilities Services Abuse Management Operations

The DHS Office of Developmental Disabilities Services (ODDS) program serves two Oregon abuse population groups directly: Community DD Program individuals and In Home Program individuals.

- County-based Community DD Programs (CDDP) and the Stabilization and Crisis Unit (SACU) serve approximately 5,800 adults enrolled in (or previously eligible for) CDDP services. These adults live and receive services in either DHS-licensed settings such as provider group homes, state run group homes or private foster homes. CDDP (County) staff perform screenings and investigations of allegations involving CDDP clients. Screening and investigation of allegations in SACU facilities are performed by OTIS investigators.

- The Community DD Programs (CDDP) and Brokerage Operations serve approximately 13,000 adult individuals with Intellectual/Developmental Disabilities (ODDS) living in their own homes or family homes, or DHS-licensed residential facilities. CDDP (County) staff perform screenings and investigations of allegations involving CDDP clients.

Allegations involving individuals with ODDS living in non-DD licensed facilities are screened by either DD or APS, and are generally investigated by APS as indicated above in APS Facility.

In 2014, there were approximately:

- 1,400 allegations of abuse for Community DD individuals resulting in about 675 substantiated abuse cases.

- 70 allegations of abuse for individuals in Stabilization and Crisis Unit facilities of which approximately 20 were substantiated.

Investigations for these populations are all performed manually and then typed into MS Word. Additionally, all notices are manually created in MS Word, resulting in considerable duplicate data entry. The number of reports of abuse that are reported and subsequently screened in for investigation can only be estimated as they are not all tracked in a key computer system. The key computer systems used are Serious Event Review Team (SERT), Combined On-call Intake (COIN) and the OTIS Abuse Database. SERT is old and ineffective. COIN is used by OTIS for tracking allegations, and the OTIS Abuse Database is used by OTIS for all SERT allegations referred to OTIS for investigation. The number of reports that are screened out for further investigation are also unknown as these are tracked only at each individual CDDP.

2.5 Current State of DHS Child Welfare Abuse Management Operations with OTIS Oversight

The Child Welfare (CW) program serves children with intellectual/developmental disabilities living in DHS-licensed 24-hour residential settings and children in DHS-licensed 24-hour residential facilities that are part of the Child Caring Agencies (CCAs). These Oregon abuse population groups are included within the scope of this project.

County Child Welfare staff at the various CW hotlines perform initial screening of all child abuse referrals. When children identified in an allegation live in a licensed setting, the referral is sent to OTIS (using OR-Kids) for additional screening. After screening, investigations for both populations

are performed by OTIS.

In 2014, there were approximately:

- 85 allegations of abuse for children with intellectual/developmental disabilities living in DHS-licensed 24-hour residential settings resulting in about 46 substantiated abuse cases.
- 131 allegations of abuse of children in DHS-licensed Children's Care Provider Programs with approximately 24 substantiated.

Investigations for these populations are all documented manually and then typed into MS Word. Key information is entered into OR-Kids when the investigation is completed. All notices are manually created in MS Word resulting in considerable duplicate data entry. The computer systems used to process these cases are OR-Kids and the OTIS Abuse Database. All allegations for CW are initially captured in OR-Kids and then entered into the OTIS Abuse Database after the fact. The OTIS Abuse Database is MS Access, therefore it is not available to the County CW screeners across the state.

In 2016, the Oregon State Legislature passed Senate Bill 1515 (SB1515). SB1515 adds young adults aged 18 to 21 years old in Child-Caring Agencies (CCAs) to be included in the age definition of "child in care" and expands the definition of CCA. This additional young adult group is estimated to be less than 250 individuals at this time and are included in the CAM Project as part of the population of children in DHS-licensed Children's Care Provider Programs.

The requirements of SB1515 will also likely lead to a much higher percentage of allegations of abuse in CCAs resulting in an investigation, doubling or tripling the number of CCA-related investigations conducted and documented by OTIS.

2.6 Current State of OHA's Oregon State Hospital Abuse Management Operations

The OHA Oregon State Hospital (OSH) serves one abuse population group (within the scope of this project). Approximately 1,220 individuals live at the Oregon State Hospital.

When alleged abuse occurs in the Oregon State Hospital, OTIS staff perform the screening and investigation.

In 2014 there were approximately 78 allegations of abuse for individuals living at the Oregon State Hospital, of which approximately 19 were substantiated.

Allegations and investigation outcomes for the Oregon State Hospital are entered into the key computer system, OTIS Abuse Database, which is an MS Access application. All data entered into the OTIS Abuse Database is after the fact, duplicative data entry, used to capture the investigation data electronically for future analysis.

Investigations for this population are performed manually and then typed into MS Word. All notices are manually created in MS Word resulting in considerable duplicate data entry.

2.7 Current Business Process

In 2014, seven (7) abuse management processes were documented. At a high level, all seven processes involve screening, investigating, referring, and closing allegations, with associated documentation and notifications. Each of these processes are based on a particular program or group of programs, as well as the individual program OARs, which define and guide them. Detailed information about these current processes can be found in the Business Case

Supplemental Documents Package, Document F.

Table 1 – Key Current Business Processes

Process	Process Description	Process #
OTIS-Led Investigation	This process documents the intake, screening, investigation, report creation, report distribution, and closure of non-CCP investigations completed by OTIS staff.	BP-100
CCA Investigation	This process documents the intake, screening, investigation, report creation, report distribution, and closure of investigations completed by OTIS staff for the CCP Program.	BP-200
County DD Investigation	This process documents the intake, screening, investigation, report creation, report distribution, and closure of investigations completed by the county CDDP abuse investigator.	BP-300
County MH Investigation	This process documents the intake, screening, investigation, report creation, report distribution, and closure of investigations completed by the county Mental Health (MH) Program.	BP-400
APS Community Investigation	This process describes the intake, screening, investigation, report creation, report distribution, and closure by APD and AAA staff for the APS Community Program.	BP-500
APS Facility Investigation	This process describes the intake, screening, investigation, report creation, report distribution, and closure by APD and AAA staff for the APS Facility Program.	BP-600
Lane Council of Government (LCOG) APS Investigation	This process describes the intake, screening, investigation, report creation, report distribution, and closure for the Lane Council of Government Community and Facility APS investigations.	BP-700

The Agencies' have identified and drafted a standardized future state business process with the assistance of the user community across all in scope programs. This process will be used in the fit gap analysis performed by the SI during execution.

3. Problem or Opportunity Definition

3.1 The Business Problem

The lack of a centralized abuse system in place today creates obstacles and challenges for The Agencies' work efforts to support vulnerable Oregonians.
The Agencies are committed to the protection of vulnerable Oregonians and are hampered by abuse data that is often fragmented, incomplete, and/or inaccessible. Additionally, staff are required to utilize multiple disparate systems to make determinations about allegations of abuse slowing

response and increasing risk of error. A centralized system that provides cross program abuse information and supports intake, screening, and investigation activities is critical to increase the efficiency and effectiveness of the staff performing those functions and to further protect Oregon citizens. The limitations of the current environment; lack of coordinated systems and data, gaps in visibility and the lack of a unified tracking and reporting process all lead to the imperative for The Agencies to address this situation by implementing a centralized abuse system to establish a clear and complete picture of abuse.

APS receives staff based on workload and the calculations to determine staff needs depend on forecasting future workload projections. The tools and information available today are challenging, requiring APS to use a workload calculation from four (4) years ago. This means the additional workload to support the increase in population over that time is not being reflected today's calculation. There was an increase in population of approximately 10% last year alone. Lack of up to date information and the inability to forecast have resulted in a lower than necessary staff count, negatively affecting the APS key performance metrics. Visibility in to the activity and movements of alleged and substantiated perpetrators across programs or counties is limited. This lack of information across the state opens the door for potential risk to persons served by the DHS and OHA.

Lack of unified processes has resulted in potential risk of clients falling "through the cracks" as local offices follow inconsistent screening practices and vary in their interpretation of Oregon rules and statues. Further complicating the challenges, for staff that are performing intake, screening, and investigations is that they lack systems to help them perform their jobs effectively and efficiently. Information such as addresses, screening and investigation data is cut and pasted into: 1) Multiple systems; 2) Multiple MS Word letters and; 3) MS Excel spreadsheets and; 4) MS Access databases.

The current intake process may be documented in one of many different systems around the state, and referrals that do not result in investigation are not always tracked with automated tools. As a result, it is difficult to review these referrals for quality control, screening related trends and workload trends. Law enforcement agencies send police reports to field offices in such a volume that staff find it hard to review and screen in/out all the reports in a timely manner. When intakes and referrals are not all documented it's difficult to measure if there are sufficient staff to cover the workload and to measure the true quality of the work being performed including that all reports of abuse are being processed properly without falling "through the cracks".

Recent legislation has increased the number of mandatory reporters and hence the workload for intake and screening of reports of abuse. HB4151, passed in 2014, requires that DHS/OHA send a copy of its letter of determination and investigation report to the state agency responsible for certifying/licensing a substantiated perpetrator in a health occupation. The consistency with which this is done is not known since the processes and systems do not allow for tracking of this information. This increases the workload of the already overloaded investigators doing the work today.

As Oregon's population ages, DHS and OHA are seeing an increased interweaving of clients in community and facility settings. This means clients of one program are often placed in facilities licensed by other programs, or clients are transitioned from one system to another as they age and their health conditions or behavioral needs change. Establishing a centralized abuse management system enables DHS and OHA to integrate abuse data across programs, ensuring critical information in one system is retained helping keep clients safe by providing access to a client's history of abuse.

3.2 Current Technology Limitations

There are seven (7) primary data systems[6] used in Oregon today to collect reports of abuse and/or generate investigation reports. There are three (3) key data systems[7] used to analyze investigations and create data analysis reports related to protective services and abuse investigations with OTIS oversight. These systems run on different software, collect different data points, and do not provide a comprehensive centralized data repository for abuse data. Investigation reports for seven of the nine populations are written using MS Word. In addition, more than 120 simple applications and spreadsheets are used in local offices to support abuse processes and manage workload, from receipt of an allegation through completion of an investigation.

The mix of legacy systems and desktop software makes it difficult for employees and management to ensure all allegations are documented and processed appropriately. In most local offices, physical paper files are the only source of complete information about an investigation. This creates the potential for an allegation to go uninvestigated because there is no tool for unassigned referrals***.***

Following is a summary of the key systems used to collect, report, or analyze abuse or generate investigative reports. Each system has limitations, which make them poor candidates for modifying to meet centralized abuse investigation or reporting. The limitations in many cases are due to the technology platforms lacking the robustness necessary to support large-scale use or they are an aging technology with limited ability to sustain and support. For example, MS Access lacks a robust structured query language, all information is saved into one file, which limits options, slows down reports, queries and forms and security controls are limited. As the volume of user's increases, performance degrades rapidly. Although technically, a MS Access system can support 255 concurrent users, the real-world limit is 10-80 concurrent users.

The Oregon Access ***(OR Access)*** system's APS module for abuse tracking contains the largest number of investigations (~36,000) of all the systems listed above. ***It does not have intake or screening functionality and has poor search capabilities making it difficult or impossible to determine if a person has an in-progress or past investigation.*** This results in duplicate information as many allegations/investigations are entered multiple times. The system is capable of collecting information that helps support unique identification of people such as Social Security Number, birth date and client master identifier. Less than seven percent of alleged and substantiated perpetrators are uniquely identified with a Social Security Number or date of birth. None has a reference to a person or client master identifier. This makes it impossible to find repeat offenders of abuse. End-users cannot attach documents and/or evidence to the investigations in OR Access. Investigation reports cannot be sent electronically from the system and must be printed, scanned, and attached to an email to send notices. The system does not provide statistics, trends, or other tracking data to local office management to help assess and manage to target quality outcomes. OR Access is not web-based, so it is not available away from the office unless it is downloaded to the investigator's computer or the investigator remotely accesses the system using emulation software (Citrix). OR Access is written in PowerBuilder and has a Sybase backend. PowerBuilder is an older development environment with a very small population of users. This makes it very difficult to find PowerBuilder developers, so supporting OR Access requires in-house training on the technology by OIS. Due to the aging nature of this

[6] Oregon Access (OR Access), Lane Council of Government (LCOG) Client Tracking System (CTS), Web723, SERT (Serious Event Response Team), COIN (Combined On Call and Intake), OR-Kids and the OAAPI Abuse Database.

[7] DHS Data Warehouse, COIN and the OAAPI Abuse Database.

technology and the current issues it carries, OR Access is not a good candidate for future central abuse management use or extensibility.

Web723 contains the next largest number of investigations (approximately 32,000). It ***does not have intake or screening functionality***. As with OR Access, DHS is not documenting all the reports of abuse in this system; only the reports of abuse assigned to investigate are entered. There is a high level of frustration by local office staff with this system as it frequently "crashes" or times out while documenting an investigation and all the data entered is lost. This system does not have the ability to locate past/historical information so all information must be manually entered for each investigation. Many hours of re-entry of information are required due to the instability of this system. End-users cannot attach documents or evidence to the investigations. Only at the end of an investigation, after a supervisor has reviewed the report and all notices have been sent out, an electronic notice is sent to the APD Central Office of Licensing and Regulatory Oversight (OLRO) in Salem confirming that the investigation is complete. Considerable time is spent manually preparing and mailing documents to all the appropriate parties. There are no statistics, trends, or other tracking data available to local office management to help ensure desired quality outcomes are achieved. This application is written in Cold Fusion, an aging technology, and has a DB2 backend. Due to Web723's instability issues, old technology and limited functionality, it is not a good candidate to extend.

Lane Council of Government's (LCOG) ***Client Tracking System (CTS)*** is used for all LCOG APS reports of abuse (~12,700) and investigations (~7,200). LCOG transfers files of information to DHS that are then loaded into the DHS Data Warehouse. Due to periodic issues with these imports, the DHS Data Warehouse does not contain a full set of LCOG data for analysis. LCOGs CTS has relatively good APS functionality but, being designed for a single AAA office, it ***does not provide for the statewide 360-degree view of a person needed by DHS and OHA***. It has an MS Access front end with a MS SQL Server backend and hence is not extensible or scalable.

Serious Event Review Team (SERT) is used by the DHS Office of Developmental Disabilities Services Community DD programs to notify OTIS that an investigation is needed (approximately 57,000 serious events are stored in the system some of which are reports of abuse). CDDPs use this system to analyze trends such as type of abuse, providers and clients with high numbers of incidents. The County Investigator fills out the form and it is transferred to OTIS. Data from this system is manually re-entered into the OTIS Abuse Database. ***Known issues with this system include: It is not user friendly; not searchable or search criteria/results are inconsistent and; the database model is out of date, as it has not been updated in over three years.*** Because of the complexities of using this system, not all CDDPs are inputting data here. SERT is currently supported by the Office of Business Intelligence (OBI). It has a ColdFusion frontend and a MS SQL Server backend. It is not extensible or scalable.

DHS Child Welfare use OR-Kids to notify the OTIS Investigations Unit of allegations of child abuse initially screened by Child Welfare workers that require OTIS screening and investigation (~88 in 2014). This system has substantial functionality and is a complex system. ***The online user interface and data relationships between case, abuse report, people, assessments, allegations, and associated notes are not intuitive from an abuse management perspective.*** The OTIS investigation process for children in licensed settings is handled outside of OR-Kids and final information is posted back in OR-Kids upon completion of the investigation. The investigation itself is written independently in MS Word. The front-end application primarily uses JBoss, Java and COBOL. The backend uses MS SQL Server. This system architecture is designed specifically to manage child protective services cases, it does an inadequate job displaying information about abuse incidents related to OTIS investigations. This system is not a good candidate to extend for centralized abuse management. With a core focus on child protective services, modifications to

accommodate the requirements of the Agencies would require significant and expensive modification and could negatively impact the core functionality and purpose of existing system.

Combined On-Call Intake (COIN) is used to track reports of abuse made directly to OTIS (~5,000) and screening decisions for many of the populations investigated by the OTIS Investigations Unit. It does not support the investigation process. This system was created internally with MS Access and is not extensible or scalable.

The ***OTIS Abuse Database*** is used to track key information about investigations (~23,368) for Community DD, Community MH, and OTIS investigators. These investigators use a separate MS Word template to write their investigation reports. Although OTIS offers a recommended format, reports vary somewhat from county to county. CDDP and CMHP investigators send their reports to OTIS via e-mail, where they are reviewed, approved and "data-mined" manually by OTIS staff to populate by re-entering information into OTIS's Abuse Database. All OTIS-led investigations are also data-mined manually and entered into this database. ***This system is filled with duplicated data from other systems and tools (MS Word). This system does not have role-based security, allowing anyone to change any data in the system.*** The OTIS Abuse Database is a Microsoft Access database developed internally in 2001. This system is not extensible or scalable for statewide use.

Currently, the Agencies rely on these disconnected data systems to store abuse-related data and to produce reports. Challenges and risks are pervasive because these systems are often unable to provide the critical information being asked for by internal and external partners, including: accurate metrics for Quarterly Business Reviews (QBR), requests for statewide abuse data from media, and sufficiently granulated data reports for the Legislature. The table below illustrates the distribution of the systems by the population served that are used to support abuse management by the Agencies.

Table 2 – Systems Used by Population Served[8]

		Screener / Investigator	
Nbr	Population	Tools	OTIS Tools
1	ODDS Individuals Living in DHS-Licensed Stabilization & Crisis Units	SERT (notice of report), MS Word (Investigation Report)	COIN (doc screen in) OTIS DB (doc from MS Word Report)

[8] Additional statistics by population type can be found in the Business Case Supplemental Documents Package.

Nbr	Population	Screener / Investigator Tools	OTIS Tools
2	ODDS Children Living in in DHS-Licensed 24-Hr Residential Settings	OR-Kids (notice of report, outcomes), MS Word (Investigation Report)	OTIS DB (doc from MS Word Report)
3	Children in DHS-Licensed Children's Care Provider Programs	OR-Kids (notice of report, outcomes), MS Word (Investigation Report)	OTIS DB (doc from MS Word Report)
4	Adults at the Oregon State Hospital	MS Word (Investigation Report)	COIN (doc screen in), OTIS DB (doc from MS Word Report)
5	Adults in State Operated Secure Residential Treatment Facilities	MS Word (Investigation Report)	COIN (doc screen in), OTIS DB (doc from MS Word Report)
6	Adults Receiving Community Mental Health Services	MS Word (Investigation Report)	OTIS DB (doc from MS Word Report)
7	Individuals Living in DHS-Licensed Facilities	Web723 (Investigation Report) or LCOG's CTS (Screen In/Out & Investigation Report)	Web723, DHS Data Warehouse
8	Adults 65+ & Adults 18-64 with a Physical Disability	OR Access (Investigation Report) or LCOG's CTS (Screen-In/Out & Investigation Report)	OR Access, DHS Data Warehouse
9	Adults Enrolled or Previously Eligible for a Community DD Program	SERT (notice of report), MS Word (Investigation Report)	COIN (doc screen in), OTIS DB (doc from MS Word Report)

Consultants and Task Forces have looked numerous times at the abuse management technology issues for the populations served by The Agencies. The many challenges associated with the current systems are evident not only to individuals within DHS, OHA and OTIS, but have been brought to the attention of the Agencies by external entities as well, most notably in the following instances:

- DHS Consultant Public Knowledge report dated 2005.
- McKinsey Study Recommendation dated 2008.
- Oregonian Article dated March 26, 2011.
- Adult Safety and Protection Team Report dated August 4, 2011.
- Resident Safety Review Council Report to Legislature dated February 2013.
- DHS Elder Abuse Prevention Audit (12-013).

3.3 The Opportunity

DHS and OHA share an imperative of keeping vulnerable adults safe by investigating allegations of abuse in a timely manner and remediating as needed. Implementing a centralized web-based data system to collect all reports of abuse; screen, refer and investigate those reports of abuse; and ensure all appropriate agencies/parties are notified of the investigation outcome directly supports DHS's commitment to "improve systems,

processes and culture to ensure that safety is our number one priority."[9] This will significantly improve DHS' ability to achieve its mission to assist Oregonians in achieving safety, health and independence.

3.3.1 Alignment with 2014's Oregon House Bill 4151 (HB4151)

Development of this system is in direct alignment with HB4151 which states "The Department of Human Services shall adopt policies and guidelines to plan for the development and standardization of resources and technologies" related to abuse of vulnerable adults age 65 and above or living in an DHS-licensed facility. The CAM Project will address HB4151 through the following capabilities:

1) Create a centralized system that standardizes data for the nine (9) population groups served by OTIS and its program partners called out in HB4151.
2) Create a centralized database of reports of abuse.
3) Provide storage of photographs for purposes of preserving evidence of the condition of the resident at the time of the investigation.
4) Create a centralized method of notice management (sending and receiving notices) to improve communications with law enforcement.
5) Create a centralized and standardized method of sending notices to health care licensing/certifying agencies.
6) Create a centralized and standardized method for the DHS Background Check Unit (BCU) to augment their background checks by viewing information in the new system for persons who present a risk of harm to another person.
7) Create a centralized and standardized method for DHS and OHA organizations that do not utilize the Background Check Unit (BCU) to view information in the new system for persons who present a risk of harm to another person.

3.3.2 Alignment with 2016's Oregon Senate Bill 1515 (SB1515)

Development of this system is in direct alignment with SB1515. This Senate Bill specifies approximately 16 types of abuse related notices, some of which result in multiple notices depending on the situation. A robust notice management system will support generation, tracking, storage, management, and quality control of notices. The planned system's flexibility will support screeners and investigators to comply with changing mandatory requirements more efficiently.

3.3.4 Alignment with the Strategic Technology Plan

The DHS/OHA Strategic Technology Plan (STP) includes a number of strategies that the Centralized Abuse Management Project will support.

The table below summarizes the various components of the STP that a centralized abuse system will satisfy.

[9] Clyde Saiki, DHS Director's email February 8, 2016.

Business Automation	• Work queues to improve work management at all levels in the organization. • Sophisticated searches to research abuse history. • Unification of processes and activities across programs by providing one tool to document reports of abuse, screening decisions, investigations, and notices. • Allow for easy transfer/referring out of reports of abuse between programs and program partners. • Reducing dependency on paper processes by allowing for electronic document storage and electronic notices. • Electronic document storage. • Reduce duplication of work. • Capture data once and reuse it. • Provide real-time, statewide, centralized data for reporting.
Comprehensive View of our Clients	• Supports the use of a master person record.
Enable Connectivity Anytime, Anywhere, in Multiple Ways	• Provide workers a real-time portal to perform their work anytime, anywhere, 24/7. • Provide the public a portal to report abuse anytime, anywhere, 24/7.
Trusted Source for Health & Human Service Data	• Reduce data duplication and entry into multiple systems using a single system for the Agencies for abuse management. • Trusted source for verified person data. • Trusted source for reports of abuse, screening decisions and abuse investigations. • Improve data access and sharing across programs. • Role based data access and security to improve data protection and compliance.
Dynamic Needs Supported by Seamless Technology Services	• Industry best practices and standards based modular architecture and design (e.g., Service Oriented Architecture (SOA), Enterprise Service Bus (ESB) etc.) to leverage existing functionality and expose functionality through web services. • Highly configurable platform that is responsive to evolving business needs. • Extensible platform allows for standard interfaces with other modern enterprise applications.

3.4 Project Objectives

<u>High-Level Goals of the new system are to:</u>

1) **Reduce abuse risk to vulnerable Oregonians and reduce liability abuse exposure for the State:** Improve DHS, OHA, and OTIS visibility into all cases for which they have oversight regardless of program, facility, population, policy, or location thus reducing risk to Oregonians, who may have otherwise fallen through the cracks. Provide a 360-degree view of a person so trends in victims and/or perpetrators can be found and uniquely

identified statewide across programs. Improve victim safety by improving communications between stakeholders[10] including Oregon State health certification/licensing agencies.

2) **Increase abuse case investigations productivity and efficiency:** Increase staff productivity through improved processes that minimize duplication of data entry. Move away from the need for paper files to a new paperless system, which allows information sharing with the right people at the right time. Provide staff tools for proactive self-management of workload and outcomes by staff and management in local offices and each program's central office. Provide abuse reporters the ability to enter their allegations of abuse through the Internet.
3) **Support program variation and frequent changes:** Accommodate similarities and differences in programs and respond quickly to frequent legal and policy changes.
4) **Develop capacity for projected increases in abuse-related workload:** Improve the ability to handle and support the anticipated high volume of abuse allegations, referrals, investigations, notices, and related data over the next ten years.
5) **Identify and track abuse across a person's lifespan:** Identify abuse statewide across programs, connect abuse across the lifespan of a person regardless of their role in the incident (victim, perpetrator, witness etc.), and ensure that a client's history of abuse informs protective services.
6) **Implement a web based and easy-to-use technology system:** Implement a system that will: 1) Support and integrate the screening, investigation, review, reporting and notice processes regardless of the DHS/OHA program that is being administered and; 2) Function well regardless of the supported desktop browser technologies used by the state and their program partners (counties, AAAs, brokerages etc.).
7) **Produce standardized auditing and analysis information:** Standardize the collection of all abuse-related data for purposes of auditing, analysis, reporting and forecasting. This will be achieved through use of common terminology and definitions that will be determined through a cooperative effort of OTIS and its partners and aligned with developing national abuse data collection methodologies.
8) **Provide accurate data and reporting:** Create the ability to report on core data and metrics to provide effective services and measurable outcomes to program partners, and to assure that abuse investigations are being conducted effectively and prevention efforts are being targeted appropriately.
9) **Enable mobile technology:** Enable the use of mobile technology in the investigation process to improve efficiencies, especially related to safety and response times when investigators are in the field.

3.4.1 Key Benefits of the Centralized Abuse Management System

Key benefits of the new system include:

- Provides the Agencies with one comprehensive multi-program system for abuse management documentation and inquiries so that risk to the safety of Oregonians and liability to the State are reduced.
- Real-time, online documentation of initial reports of abuse and the resulting screening

[10] See Business Case Supplemental Documents Package for a comprehensive list of key stakeholders.

decisions to ensure all reports of abuse that need investigation are screened in and the rationale and other steps taken (such as referring to others) can be supervised and monitored.

- Real-time, online documentation of all investigations including notices, and storage for that information in a centralized database so that the information is safe and accessible by local office staff and management, program Central Office, OTIS, and the DHS Background Check Unit.
- Increases productivity and efficiency through reduction in duplicate data entry and manual work.
- Improves decision making and preventive actions because, over time there is one place to find a:
    - Perpetrator and their history of abuse for one or more programs across the entire state of Oregon.
    - Victim and their history of abuse for one or more programs across the entire state of Oregon.
    - DHS-Licensed Facility and the history of abuse at that facility for one or more programs across the entire state of Oregon.
- Standardizes methods and data allowing for improved oversight and analysis.

Key functionality of the new system includes:

- Dashboards for workers that enhance their ability to self-manage their work within mandated response times.
- A business rules engine that allows for easy modifications by The Agencies for specific needs and new mandates.
- Evidence, photos, and other document attachments.
- Mailing address validation.
- Automated notice generation.
- Role based security.
- Single sign-on with Agency Active Directory.

4. High Level Requirements and Key Assumptions

Following is a brief overview of the high-level requirements and some key assumptions for this initiative.

4.1 High Level Requirements

Following are the most critical requirements for a centralized abused management solution:

Worker Dashboard: Provide screeners, investigators, supervisors, and reviewers dashboards listing incidents and investigations that can be filtered and sorted to fit their needs. For example: to filter by the incidents needing response today or to sort for the last incident that the worker updated.

Comprehensive Search: Provide users of the system sophisticated, comprehensive search, filter, and sort capability to assist in finding past victims, perpetrators and/or incidents. For example: searches for people across program by name and/or address and/or social security number.

Portals: for Screeners, Investigators, Supervisors and Reviewers. Provide screeners the ability to enter abuse complaints received by phone, email, or mail, update complaints, which could not be completed in a contiguous timeframe. Provide investigators the ability to enter and track required information for an investigation. Provide Supervisors and Reviewers the ability to review and comment on screening decisions and draft investigation reports.

Business Rules Maintenance: Provide System Administrator(s) the capability to maintain business rules separate from system code. For example: allow the System Administrator to update Oregon Administrative Rules and definitions viewed and selected by workers along with field selection values.

Interfaces: Integrate with the existing Master Client Index including inbound Interfaces from the Aspen provider database and a regularly scheduled data export to the DHS data warehouse and QMDB/Q2.

Data Warehouse: Provide a data warehouse for running queries, mandated reports, and performing data analysis without impacting performance of end users. Provide a full set of data for running extracts to be used by other systems such as QMDB for DHS.

Workload Management: Support for monitoring and projecting workload by worker, by program, by local office, and by program within an office. Support for assigning, pausing, and restarting work on individual and groups of reports of abuse and/or investigations.

Document Management: Support for capturing, storing, and retrieving images and other electronic documents related to reports of abuse and investigations. Support for scanning paper documents. Support for uploading of documents through the online abuse complaint and the worker portals. Support the use of template documents for communications.

Notice Management: Support for worker-driven and system-driven notices to Complainants, Perpetrators, Providers, Various Law Enforcement Agencies, Oregon State Health Occupation licensing/certifying/authorizing organizations, and referral partners. Support the use of templates for notices that can be sent via secure email, fax, and/or the United States Postal Service.

Reporting: Support for the creation of reports required for investigation reporting, protection and intervention process measures, and analysis of service equity in abuse investigations.

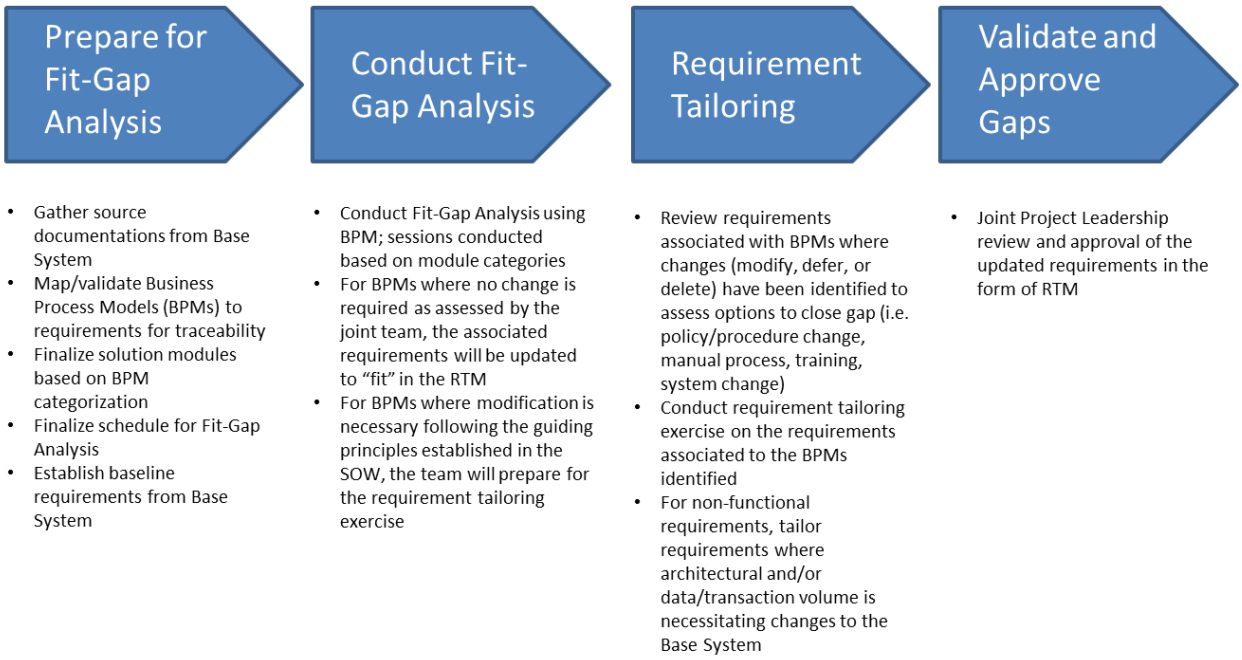
Identity and Access Management: Support for the integration with Active Directory for authenticating workers who are state employees or program partners such as Area Agency on

Aging staff and Counties who access the system on the behalf of a DHS program.

Data Security: Protection of data, whether at rest, in transmission, in display, or in reports consistent with federal, state and agency data privacy, security and retention laws, rules and policies.

Disaster Recovery: Ensuring that no data is lost is critical to the safety of our clients. The Recovery Point Objective (RPO) for this project is zero data loss in the event of a disaster. The Recovery Time Objective (RTO) is a maximum of 24 hours that the system can be unavailable in the event of a disaster or system problem.

4.2 Detailed Requirements



The project team developed both high-level business requirements and detailed business requirements. These two requirements documents will provide a Systems Integrator (SI) sufficient context regarding Oregon's business needs to respond to Oregon's planned Request for Proposal (RFP) for a SI. The selected SI's expertise will be leveraged to help refine Oregon's preliminary detailed business requirements, which will increase the probability of project success. Oregon will align requirements as closely as possible to Colorado's design while still addressing Oregon's unique, mission-critical business needs. The detailed business requirements will be reviewed with subject matter experts including DHS/OHA field staff to ensure they are complete and correct.

The Systems Integrator will use Oregon's detailed requirements to conduct a Fit-Gap Assessment with the potential solution to establish additional functional and technical design specifications. This approach leverages the proven model implemented in Colorado to guide Oregon's efforts.

4.3 Fit-Gap Analysis

Fit-Gap analysis will compare Oregon's rules, policies and procedures to the Colorado System and identify how the Colorado System meets respective functionality for Oregon out of the box. The goal of analysis is to identify how the Colorado Solution meets the respective needs of the Agencies. Gaps where system functionality is not present and cannot be resolved through a change to process or policy will be prioritized along with a defined approach to address them. This fit-gap effort identifies the gaps that will identify the need for process changes, software configuration changes and/or customizations required.

The following diagram describes the activities to be conducted during the Fit-Gap Analysis. This information is more fully documented in the planned RFP.

4.4 Assumptions and Constraints

The following constraints are factors in the Alternatives Analysis:

- Project funding was approved in SB5507A Enrolled comprised of:
  - $1,437,494 in General Funds (GF);
  - $3.3 million in Q Bonds;
  - $894,543 for Q Bond issuance and debt service.
- Core functionality for adult abuse report intake, screening and investigation must be implemented by June 30, 2017. The initial release of the Centralized Abuse Management solution will not automate all tasks, so duplicate data entry will not be resolved until Release 2.
- HB4151 requires Oregon have one central statewide solution for APS.

The following assumptions are factors in the Alternatives Analysis below:

- The Oregon Legislature, which approved dollars in SB5507A for this project, will unschedule funds to proceed with this project.
- Population growth is expected to average 10% per year for the populations served in this project.
- The solution will meet 80% or more of agency functional requirements and 90% of non-functional (technical and security) requirements.
- The solution must be easily adaptable to satisfy ongoing process and requirement changes such as those driven by HB4151 and SB1515.
- The selected alternative must support the DHS/OHA Strategic Technology Plan.
- Historic abuse information will be accessible to the DHS data warehouse sometime after the core system is implemented.
- The project will issue a competitive bid Request for Proposal (RFP) for a Systems Integrator (SI) to plan, design, implement and maintain the new system.
- Training will be provided by the System Integrator (SI) to OTIS Program area trainers who will then train staff statewide.

- Solution implementation and ongoing maintenance and operations will be provided by a 3rd party vendor with oversight from state employees.
- Risk tolerance for this project is moderate based on the timeline, volume of work, and funding available.
- The system can be used and supported in all required locations including but not limited to:
  - DHS and OHA programs, offices, county, and local partners.
  - DHS's Background Check Unit.
  - DHS's Public Relations Unit

5. Alternatives Analysis

5.1 Alternatives Identification

After a preliminary business case proposed development of a customized solution, the Agencies invested significant efforts to assess other alternatives to compare against custom development. A team comprised of program and technology members conducted in-depth market research. The market research included detailed interviews with 18 states to discover their abuse management solutions. This market research yielded two potentially viable solutions utilized by other states and two used in Oregon. The team did further in-depth analysis of capabilities of these four options against functional and technical requirements and conducted customer demos and on-site visits. Detailed information from the in-depth analysis and site visits can be found in the Business Case Supplemental Documents.

Information gained during customer demos and site visits eliminated some alternatives under early consideration identified from the project's initial market research including Commercial off the Shelf (COTS) solutions and transfer solutions used by other entities.

COTS solutions available in the marketplace such as Harmony, which could address Oregon's requirements primarily, accommodate only one program - Adult Protective Services. The relevant vendor supported COTS solutions require significant customization, including underlying architecture modification, to meet the Agencies' needs. A primary benefit of COTS solutions is that the licensing vendor provides regular regulatory and business functionality updates/upgrades to meet changing needs. The extent and complexity of Oregon's level of required modifications to a COTS negates those benefits, as each release would require re-customization for Oregon. The viable COTS solutions reviewed were only supported by the vendor that owns and licenses the software. In this situation, if the state were not satisfied with the licensing vendor, there would not be options to utilize an alternate vendor to support the system. Many states reported issues getting modifications made to their vendor-licensed software that involved many months of delay to get vendors to address their legal, regulatory and efficiency improvements. Oregon must be able to respond to effectively to the rapidly changing regulatory and business environment. This makes the use of the relevant COTS solutions high risk for Oregon.

Transfer solutions used by other states consist primarily of large, monolithic systems such as the Statewide Automated Child Welfare Information Systems (SACWIS), outdated home-grown state systems used for Adult Protective Services over the last 10-20+ years, or small County/AAA applications that cannot accommodate the number of statewide users required by the CAM Project. SACWIS systems have high implementation costs - $50 million and up, with ongoing annual support costs of $20 million or more. Abuse tracking and management is a small piece of functionality in the SACWIS systems. Removing this functionality represents significant expense, leaving it in makes modifications and maintenance cost prohibitive. The general architecture of SACWIS reviewed by the team is old and focuses on the family rather than the abused person. For these reasons, SACWIS transfer solutions were removed from consideration.

Smaller, custom developed solutions such as the Lane County (LCOG) solution were determined not to be viable options for Oregon to consider transferring as a starting point for its statewide solution as they lacked the scalability and functionality necessary to meet Oregon's functional and technical requirements. Most are built using MS Access or other software that is not designed to support the level security or the number of concurrent users that Oregon requires.

As part of Oregon's due diligence, alternate CRM solutions, including MS Dynamics were

considered at the request of the Agencies. MS Dynamics was a late emerging option brought forward after robust analysis of other solutions had already been completed. After consideration, the project team did not find MS Dynamics offered substantial capabilities beyond those in more thoroughly assessed alternatives and the cost model was not as viable as other options. Ultimately, The Agencies' Executive Leadership determined Salesforce to be the preferred CRM alternative over MS Dynamics as it enables Oregon to build upon existing foundational capabilities established by Colorado's adult protective services system.

The following alternatives emerged from the analysis completed by the project team and based off the recommendations of The Agencies' Executive Leadership.

1. Purchase a Software as a Service Solution; leverage another state's use of the SaaS.
2. Implement a Custom Build Solution.
3. Maintain the Status Quo.

Project analysis of these alternatives are as follows:

Alternative 1: Purchase Software as a Service Solution; leverage another state's use of that SaaS

Under this alternative, a SaaS CRM solution would be implemented, configured, and customized to meet the CAM Project's detailed requirements. This approach allows relatively quick design, build and implementation plus ongoing flexibility to meet the continuously changing business/regulatory environment at a reasonable cost.

Oregon investigated two CRM options – Microsoft Dynamics and Salesforce. While each of these CRM solutions have capabilities that can meet Oregon's needs; Salesforce is considered the front-runner option as it provides Oregon the opportunity to leverage Colorado's proven Adult Protective Services (CAPS) which was configured using the Salesforce SaaS solution and implemented in June 2015. The Colorado capabilities can be utilized by Oregon as foundational requirements reducing implementation time substantially. This strategy, in concert with procuring a SaaS and services of a Systems Integrator will help accelerate Oregon's implementation efforts, while reducing risk and shortening the implementation timeline. DHS and OHA Executive Leadership believe this synthesized approach represents the best fit for Oregon's needs. More details regarding Colorado's solution and the proposed implementation approach are outlined later in this document.

Alternative 2: Implement a Custom Build System

Under this alternative, the Agencies would design, develop, test, and deploy a custom solution built from the ground up for APS, HS, DD, CW, and OSH Centralized Abuse Management needs. This alternative would allow a tailor-made solution that would meet all the functional, technical and organization requirements. The costs to develop a custom system are substantially higher than procuring a SaaS solution and carry significantly higher risks and a much longer timeline to implement compared to Alternative 1.

Alternative 3: Maintain the Status Quo

Under this alternative Oregon would maintain the current status quo with disparate, disconnected systems and highly manual processes and there would be no additional investment in abuse tracking system automation. Improvements to current processes would be limited to those that arise naturally through the Agencies' continuous improvement program. The Agencies would continue with ineffective, disconnected automated and manual systems, which are difficult to oversee and analyze. The centralized abuse tracking needs of HB 4151 would not be met.

The chart below outlines the estimated Total Cost of Ownership for alternatives:

TOTAL·COST·OF·OWNERSHIP·ANALYSIS¶

Comprehensive·Cost·Model·for·all·Scenarios¶

¶

5.1.1 Alternative 1 – Implement a Software as a Service Solution and leverage another state's proven capabilities with that SaaS

Cost

The total cost of implementing and supporting this alternative and operating it the proposed solution starting July 2016 through June 2023 is estimated to be ~$8.4 million. (See details of this estimate in Appendix A.) Compared to the Custom Build alternative, this alternative minimizes costs of Fit-Gap analysis, design, configuration, customization, testing, training, and rollout by using a Customer Relationship Management platform based on the successful Colorado APS abuse management solution. This alternative requires a per-person and/or per device Salesforce licensing cost over the life of the solution.

Alternative 1 - Salesforce CRM
Totals include FY 2016-17 through FY 2022-23

		Through Dec 2017 Project and Implementation	Jan 2018 through June 2023 Operations, Maintenance, Ongoing Support	Total	%
Personal Services	Salaries & Benefits	$1,554,538	$80,303	$1,634,840	19.4%
Services & Supplies & Capital Outlay	State Data Center	$0	$0	$0	0.0%
	Software	$1,157,814	$3,089,932	$4,247,746	50.5%
	Hardware	$20,000	$0	$20,000	0.2%
	IT Professional Services	$1,479,500	$614,499	$2,093,999	24.9%
	Contingency	$421,185	$0	$421,185	5.0%
	Total	$4,633,037	$3,784,733	$8,417,770	
	%	55.0%	45.0%		100.0%

Benefits

Alternative 1 supports the functional and non-functional requirements associated with Centralized Abuse Management for the Agencies. The system will implement much faster, with lower risk and less cost than building a custom solution. This is demonstrated Colorado, who implemented their initial release of the Salesforce SaaS within 6 months. Colorado's current system provides a proven APS model for Oregon to leverage as a starting point for the centralized abuse

management solution. Oregon's plan is to pursue procurement of Salesforce as the SaaS as its capabilities and the ability to leverage Colorado's requirements will accelerate Oregon's initiative.

Salesforce provides an easy-to-use capability for the business to administer templates, list values, and perform ad hoc reporting. This SaaS allows for program-specific uniqueness through configuration of program specific data integrity rules. Configuration capability of Salesforce will allow program variations when necessary and the ability to make frequent changes quickly to accommodate the rapidly changing regulatory environment. Configuration supports the use of templates and rules for distribution of notices making it easier to generate and distribute notices. Salesforce has interface/integration tools, which will quickly and easily interface the new system with legacy extracts and systems such as the Agencies' provider information and client master index.

All reports of abuse, response times and screening decisions will be entered in real-time into the system. Reporters of abuse will be able to submit their reports on-line via the Internet. Screeners, investigators, and others with a need to know will be able to research past screenings and investigations (including historical system investigation data created prior to implementation) to assess if ongoing or past reports of abuse and investigation outcomes play a role in the current situation. Screeners, investigators, supervisors, reviewers, and others will have dashboards to assist them in managing their work/workload. All data about an investigation will be kept online rather than in field office files making management, oversight and prevention planning more effective.

In "Magic Quadrant for the CRM Customer Engagement Center" May 2016, Gartner reports Salesforce to be the leader in both their Ability to Execute and Completeness of Vision for their CRM.[11] They also said that Salesforce "appeared as the leading vendor on shortlists for Business to Business (B2B) customer service and support solutions seen by Gartner six times as often as the nearest rival." "Salesforce's enormous influence in the market has attracted a global list of key system integrators and over 600 complementary software providers."

Risks

The top risks of this alternative are:

1) Implementing an enterprise information technology solution within a relatively short timeline that spans multiple programs and agencies located across the state.

2) Significant policy and procedure changes will be required for the Agencies as more standardization is put in place.

3) Integration may be more difficult between Salesforce and legacy systems than anticipated.

4) Acquisition of funding to ensure reductions in manual work arounds and duplicate data entry beyond the 2015-17 biennium may be a challenge.

5) System will need to adhere to security requirements for Level 3 data. Project will need to ensure that all these requirements are met utilizing a SaaS solution.

6) This alternative is dependent on the acquisition of the code/configuration of Colorado's system.

[11] Critical capabilities and features included: "Case management/problem/service resolution (and control of customer master data); A knowledge management solution; a full customer self-service suite, with support for Web and mobile channels; Real-time decision-making and predictive analytics support for agents; an adaptive business rule engine; Enterprise feedback management."

5.1.2 Alternative 2 – Implement a Custom Build Solution

Cost

The total cost of implementing this alternative and operating it through June 2023 is estimated to be ~$17 million. (See Appendix A for details.) This alternative incurs the full cost of analysis, design, development, testing, training, and rollout. The cost is unknown for Enterprise Technology Services/State Data Center (ETS/SDC) to develop and implement a process to ensure no data loss in the event of a disaster or event causing the production server/system to go down. This alternative will typically require only server-based software and developer tool licensing as opposed to user or end user device licensing costs.

Alternative 2 - Build
Totals include FY 2016-17 through FY 2022-23

		Through June 2019 Project and Implementation	July 2019 through June 2023 Operations, Maintenance, Ongoing Support	Total	%
Personal Services	Salaries & Benefits	$3,326,881	$258,998	$3,585,879	21.2%
Services & Supplies & Capital Outlay	State Data Center	$139,056	$86,400	$225,456	1.3%
	Software	$70,000	$10,000	$80,000	0.5%
	Hardware	$20,000	$0	$20,000	0.1%
	IT Professional Services	$5,056,789	$4,052,172	$9,108,961	53.7%
	Contingency	$1,722,545	$0	$1,722,545	10.2%
	Indirect	$1,550,291	$661,135	$2,211,426	13%
	Total	$11,885,562	$5,068,705	$16,954,267	
	%	70.1%	29.9%		100.0%

Benefits

This alternative could achieve all the Agencies functional, technical, and organizational requirements.

Risks

The top risks of Alternative 2 - Build are:

1) Implementing an enterprise information technology solution that spans multiple programs and agencies located across the state in a longer timeframe than suits the State's sense of urgency. This alternative is estimated to be designed and implemented in a 2 ¼ to 2 ½ year timeline.

2) Significant policy and procedure changes will be required for the Agencies as more standardization is put in place.

3) Availability of funding at the level required to support completion of the project.

4) Creation of a new ETS/SDC custom process/design/implementation to ensure there would not be any loss of data during a disaster or event causing the production server/system to go down. This is not a proven ETS/SDC capability for non-mainframe applications so the costs to establish are unknown and the desired results could take longer than expected.

5) Setup disaster recovery for zero data loss with an outside vendor, then test for potential cut over to should a disaster occur at ETS/SDC.

5.1.3 Alternative 3 – Maintain the Status Quo

Cost

Maintaining the status quo and not implementing an integrated solution will cause DHS and OHA to incur additional expenses over time. That estimated total cost through June 2023 is approximately ~$5.2 million (see Appendix A for details). This additional cost will be driven by increasing workloads due to aging populations and increased regulatory requirements leading to the need to add more staff to manage the demand in the field and meet key performance measure goals.

Alternative 3 - Do Nothing

		Through Dec 2017 Project and Implementation	Jan 2018 through June 2023 Operations, Maintenance, Ongoing Support	Total	%
Personal Services	Salaries & Benefits	$1,047,589	$4,136,675	$5,184,264	100.0%
Services & Supplies & Capital Outlay	State Data Center	$0	$0	$0	0.0%
	Software	$0	$0	$0	0.0%
	Hardware	$0	$0	$0	0.0%
	IT Professional Services	$0	$0	$0	0.0%
	Total	$1,047,589	$4,136,675	$5,184,264	
	%	20.2%	79.8%		100.0%

Benefits

There is no up-front investment required to continue maintaining the status quo.

Risks

The top risks of Alternative 4 – Maintain the Status Quo are the continuation of current state risks:

1) Safety risks to Oregonians that are reported as abused. The reports of abuse may be hand written (if documented at all) and stored in paper/personal computer files in 140 or more locations across the state. This fragmentation of data makes it difficult to oversee the quality of screening decisions regarding reports of abuse and hence leaves Oregonians at risk.
2) Safety risks to Oregonians when an alleged or substantiated perpetrator applies for certification, licensing or authorization from an Oregon state, DHS or OHA organization. Communications from investigators to the certification, licensing and authorization organizations are inconsistent so the certification, licensing or authorization organization may not be aware they are approving an alleged or substantiated perpetrator.
3) Safety risks to Oregonians when an alleged or substantiated perpetrator requests employment from a DHS, OHA, and program partner or provider organization. Communications from investigators to the Background Check Unit (BCU) are inconsistent across all the programs and program partners so BCU may not be aware they are approving an alleged or substantiated perpetrator to work with Oregonians.
4) Risks that field staff are unable to effectively manage their own workload and for staff/management to prevent cases from being lost or potentially left unresolved due to

insufficient tools for tracking work.

5) Risk of increasing field staff frustration as they spend more time on duplicate data entry, manual creation, and distribution of notices instead of performing actual investigations because both population sizes and requirements for additional notices increase the workload.
6) Risk of expensive lawsuits resulting from the risks to Oregonians.

5.2 Cost Comparison

The Oregon Legislature has approved the use of ~$1.4 million in General Funds and ~$3.3 million in Q Bonds (plus issuance and debt service) to be used during the 2015-17 biennium.

The following Table summarizes the cost information from the preceding section.

Table 3 – Cost Summary

Alternative	Cost
Alternative 1 – SaaS	~$ 8.4 Million
Alternative 2 – Build	~$17.0 Million
Alternative 3 – Maintain the Status Quo	~$ 5.2 Million

5.3 Benefit Comparison

The following table summarizes the benefits information from the preceding section.

Benefit Area	Alternative 1 Salesforce	Alternative 2 Build	Alternative 3 Status Quo
Comprehensive multi-program system	Good	Good	n/a
Proven Model	In Colorado	No	Yes
Meets functional and non-functional requirements	Good	Good	Poor
Speed to implement	Fast	Slow	n/a
Speed to integrate with legacy data	Fast-Moderate	Moderate	n/a
Up-front investment	Low	High	n/a
Maintenance & operations investment	Medium	Medium	n/a
End user ad hoc reporting	Easy	Somewhat Difficult	Very Difficult
Supports DHS/OHA Strategic Technology Plan	Yes	Yes	No
Reduce risk to Oregonians & liability for State	Good	Good	Poor
Increase productivity and efficiency	Good	Good	Declines over time as expectations increase
Support program variation & frequent changes	Good	Average	Poor
Support growing workload	Good	Good	Poor
Identify & track abuse across lifespan	Good	Good	Poor
Identify & track abuse at facilities	Good	Good	Poor
Produce standardized info for audit and analysis	Good	Good	Poor
Web-based & easy-to-use	Good	Good	Poor

Benefit Area	Alternative 1 Salesforce	Alternative 2 Build	Alternative 3 Status Quo
Supports HB4151	Good	Good	Poor
Supports SB1515	Good	Average	Poor
Decommissions Systems	COIN, LCOG CTS, OTIS Abuse Database, SERT, Web723	COIN, LCOG CTS, OTIS Abuse Database, SERT, Web723	None

5.4 Risk Comparison

Below is a high-level risk comparison table. Please see "CAM Project Risk Assessment – Stage Gate 2" for a more detailed description of the principal risks facing the project.

Risk Area	Alternative 1 Salesforce	Alternative 2 Build	Alternative 3 Status Quo
Technology	Low	High	Medium
Policy	Low	Medium	High
Operational	Low-Medium	High	High
People	Medium	Medium	High
Overall	Low-Medium	High	High

Each of the active alternatives has the risks associated with multi-Program (enterprise) information technology projects involving complex state program and partner relationships.

- Alternative 1 (SaaS) is the least risky because it leverages Colorado's APS system built using Salesforce and utilizes a platform which allows for rapid configuration and customization as needed.
- Alternative 2 (Build) is a larger project with inherently higher risks than Alternative 1. Risk is driven in part by the significantly longer duration and the higher demand over that duration on Program participation than Alternative 1.
- Alternative 3 (Status Quo) has the highest risk of all the alternatives. It continues the current state where statewide centralized oversight is very difficult, and workers continue with paper files and severely inadequate or no application system to support their needs.

6. Conclusions and Recommendations

6.1 Conclusions

Both Alternative 1 and 2 would address the opportunity described in Section 3.2 above and they fulfill the objectives listed in Section 3.3. The cost to implement Alternative 1 is less than half of Alternative 2 with significantly lower risks and a much shorter implementation timeline.

Table 4 – Cost, Benefits, Risks Summary

	Project Cost	Project Benefits	Overall Risk
Alternative 1 SaaS	~$ 8.4 Million	All requirements, quick to implement	Low - Medium
Alternative 2 Build	~$17.0 Million	All requirements	High
Alternative 3 Status Quo	~$ 5.2 Million		High

6.2 Recommended Action and Schedule

The Agencies recommend Alternative 1 – Purchase Software as a Service Solution; leverage another state's use of that SaaS. This approach will procure Salesforce, a SaaS CRM solution and leverage Colorado's APS solution's capabilities as the basis for Oregon's solution. Colorado's solution is built on the Salesforce platform.

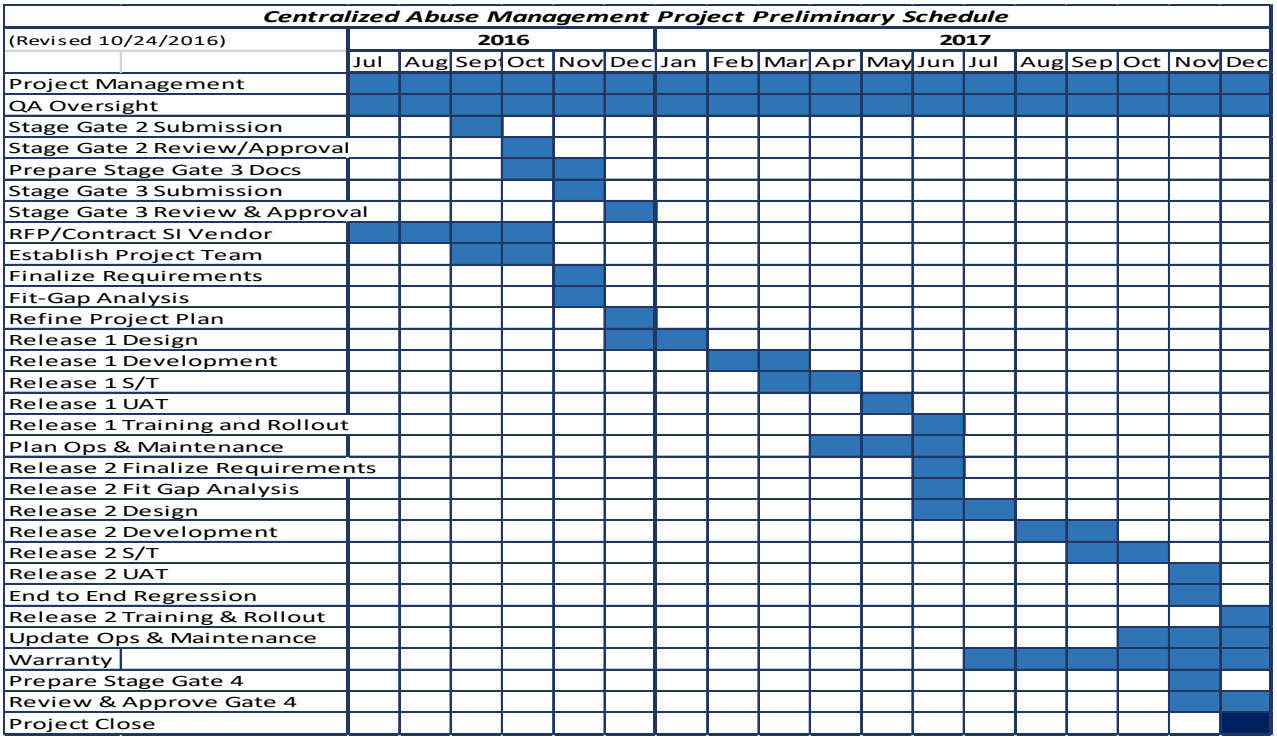
To support this approach, the state will need to ensure that security standards adhere to Oregon's SaaS Cloud Policy requirements and the terms and conditions contract will reflect those standards.

The recommended approach is significantly lower risk and approximately half the cost of Alternative 2 – Build, while still providing equivalent benefits.

The recommended alternative aligns well with the DHS/OHA Strategic Technology Plan including progress in pursuit of automating workflows, decision-making, and business rules while reducing manual, paper-based processes. It moves the state closer to the "360-degree view of a person" goal.

DHS requests Stage Gate 2 approval. Stage gate and legislative approval was received by DHS in 2014 for project initiation. In 2015, DHS received approval for additional research on solutions currently in use by other States for abuse management. DHS plans to seek approval to move to the detailed project planning phase (Stage Gate 3) to procure the Systems Integrator for implementation of the selected SaaS.

Funding for this initiative is provided by the legislatively approved use of ~$1.4 million in General Funds and ~$3.3 million in Q Bonds (plus issuance and debt service) to be used during the 2015-17 biennium. DHS is pursuing several funding options to close the financing gap between currently earmarked funds and the total expected cost. These include 1) Obtaining grant funding through ACL12; 2) Obtaining approval for a Policy Option Package (POP) for future



[12] APD has applied for but not received approval for grant funding. The US Department of Health and Human Services (HHS) Administration for Community Learning (ACL) released a Funding Opportunity Announcement for grants to states to strengthen their Adult Protective Services (APS) systems statewide. Due date for applications is 05/31/2016 and APD intends (pending approval) to

enhancements and to also cover the first two years of licensing for maintenance and operations of the new system.

The table below reflects the high level proposed project schedule for Alternative 1 – a SaaS including the reuse of Colorado's Salesforce code set and functionality. If Alternative #1 is approved, all core requirements are planned to implement by December 2017.

Table 5 – Tentative Project Schedule

The following chart lays out a preliminary schedule for the project. A more detailed project schedule will be prepared during the project planning phase and the project schedule will require re-baselining after the Fit/Gap Analysis. The chart is duplicated in Appendix B, where it is more legible.

6.3 Consequences of Failure to Act

Given the current degree of manual processing and the projected growth in work, failure to act will result in continued poor program performance regarding key performance measures including timeliness of screening decisions and response times for investigations. Doing nothing will continue to grow the problems that impact the safety of Oregonians, including: 1) Workloads of screeners and investigators in the field; 2) Communications between investigators and certifying, licensing and authorizing organizations; 3) Client and other interested party discontent, and; 4) The potential for new lawsuits.

Failure to act on this effort means that the eventual satisfaction of the needs of the Programs and OTIS will come at higher risk to Oregonians and liability to the State.

apply for the full amount of this grant to support the costs of this project. This grant opportunity is for approximately $412,000 over two years.

7. Business Case Checklist

7.1 Checklist for the Completed Business Case

☒ Has the case clearly defined what the case is about, the purpose for the proposed solution, what business problems the proposed solution attempts to solve, and the scope of the proposal?

☒ Has the cash flow, the flow expenditures, and the intake of financial benefits been presented over a common time period for the case, for each alternative action considered (including the “status quo”/current state alternative).

☒ Are the assumptions and methods for assessing the proposal’s impacts clearly defined, understandable, and acceptable? Do not forget risk impacts!

☒ Does the business case include the non-financial costs and benefits?

☒ Are the factors critical to the success of the proposal clearly defined?

☒ Are there critical success factors that can be managed? Is there a risk analysis that identifies and measures the relevant risks to the proposal?

☒ Are recommendations and conclusions based on a clear comparison of alternatives in terms of contributions to business objectives, problems solved, financial outcomes, and risks?

☒ Does the case clearly identify the estimated timeframes, costs, and implementation strategy required to successfully deliver the recommended solution?

☒ Does the case clearly express to consequences of failure to act on the recommended alternative?

8.2 Appendix B – Tentative Project Schedule

8.3 Appendix C – History and Future of the CAM Project

History of Project

Minimum Viable Product (Colorado Transfer Solution)

The original vision and contracted work was to use Colorado's solution with minimal alterations to provide a solution for APD and ODDs. In March 2017, the Executive Steering Committee approved a change to the underlying data model from a one to one relationship to a one to many relationship for victims in investigations and to associate Allegations/Abuse Types to victims and alleged perpetrators. The Contract value was increased by $318,000 to $1,875,200 through Amendment 1. The initial pilot date was moved to December of 2017 and the scheduled project closing date was extended from March of 2018 to August of 2018.
It was planned that this "Phase 1" product would be followed by a Phase 2 that met the needs of Mental Health. Child Welfare was removed from scope after a recognition the existing Child Welfare system was recognized as the system of record.

On June 16, 2017, Amendment 2 was executed allowing the DDI vendor to use off-shore resources from its parent company. The Contract value remained unchanged.

Build 2 for Go-Live

We quickly learned that the project team had not been adequately resourced for the size and complexity of the project, with shortages identified for full-time business subject matter experts, business analysts, and test leads.

In addition, the initial approach of using only high-level requirements resulted in insufficient deliverables and discrepancies between what the Vendor was delivering and what the State ultimately wanted.

The project also experienced a resource turn-over during this time with the departure of the Senior Project Manager, Project Director, and Business Transition Analyst. The project team had little visibility into the system until Build 2 was delivered in August, and it soon became clear that the system was missing key security features, key functionality did not work as expected, and very little progress had been made on organizational change management deliverables, due to the Vendor's relative inexperience in this area. In September 2017, The Executive Steering Committee decided a full re-boot of the project was required.

Build 3 and 3.1 for APD

A new (interim) Project Director was brought in and empowered to hire additional resources and solicit more participation by business partners. The project began a reassessment of the requirements in October of 2017.

In February of 2018 ODDS decided to delay implementation of the system for the ODDS program providing additional time for the program to work with their CDDP and Brokerage partners to prepare for the implementation of the system. This allowed APD to proceed with a greater focus on refining requirements and organizational change management activities.

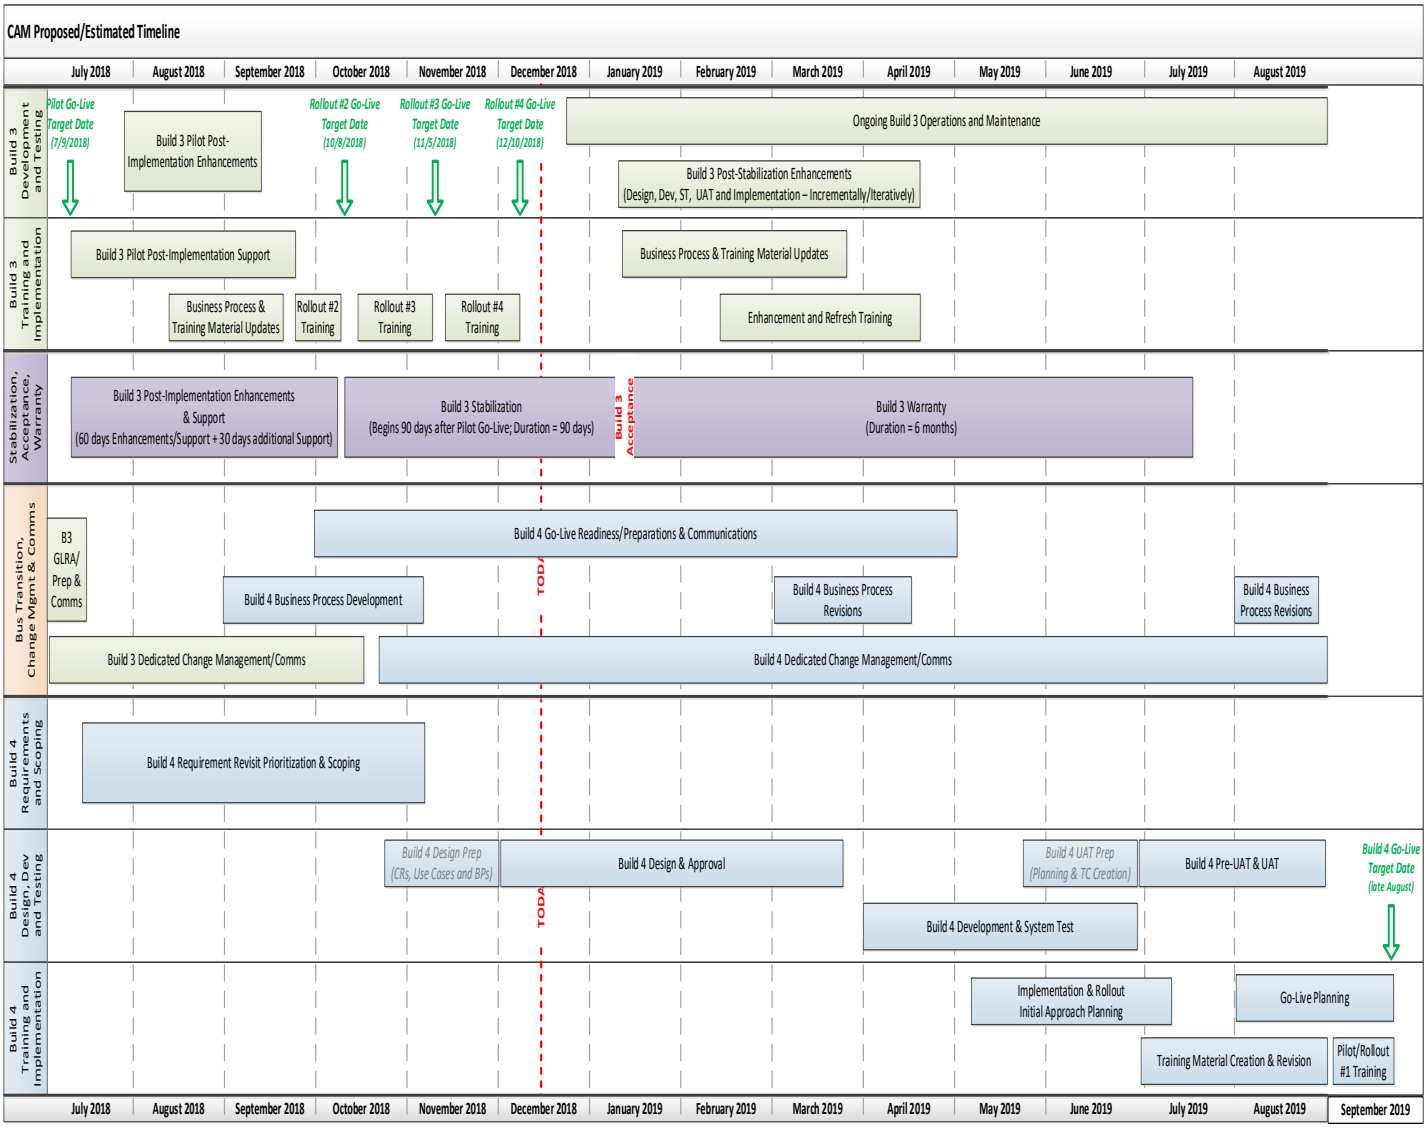
In April 2018 the schedule was re-baselined, calling for an initial Pilot in July followed by a set of enhancements based on the resulting learnings (called 3.1) and three additional rollouts to different regions in October, November, and December of 2018. Contract Amendment 3 was

executed to support the enhancements and schedule. The Contract value was increased by $1,123,800 to $2,999,000.

On July 3, 2018 Contract Amendment 4 was executed. This amendment revised contract terms and conditions (UAT, Stabilization and Acceptance), included a definition for minor system enhancements (refinements), added language to the Statement of Work to clarify Agency expectations and additional deliverables to accurately reflect contractor support requirements during system implementation. The Contract value was increased by $443,600 to $3,442,600.

Pilot for APD started in July 2018 and the subsequent roll-outs to complete statewide implementation in October, November, and December completed as scheduled. Feedback from the roll-outs was positive and the APD implementation has been very positive.

Builds 3.2 APD and 4 ODDS & MH



On September 10, 2018, the Executive Steering Committee approved the schedule for Build 3.2 for APD enhancements and Build 4 for functionality for ODDS and MH implementation. Build 3.2 enhancements are scheduled for the first quarter of 2019 and Build 4 Pilot in September 2019. Like the APD implementation, three subsequent roll-outs for statewide implementation are planned for January, February, and March of 2019 with project close out in the 2nd quarter of 2019.

On November 16, 2018, the ESC approved a new baseline budget which included full funding for Amendment 5, additional Covendis resources, and O&M for the 2017-19 biennium. On November 30, 2018, contract Amendment 5 was executed. The contract value was increased by $2,853,400 to $6,296,000. To support O&M in the 2019-21 biennium, a POP was developed and approved.

Key functionality intended for Build 4 includes

- Serious Incidents (SERT replacement)
- Death Review
- Role and Profile changes for DD/MH
- Intake/Investigation changes for DD/MH
- Support for Mental Health requirements

New Baseline Schedule

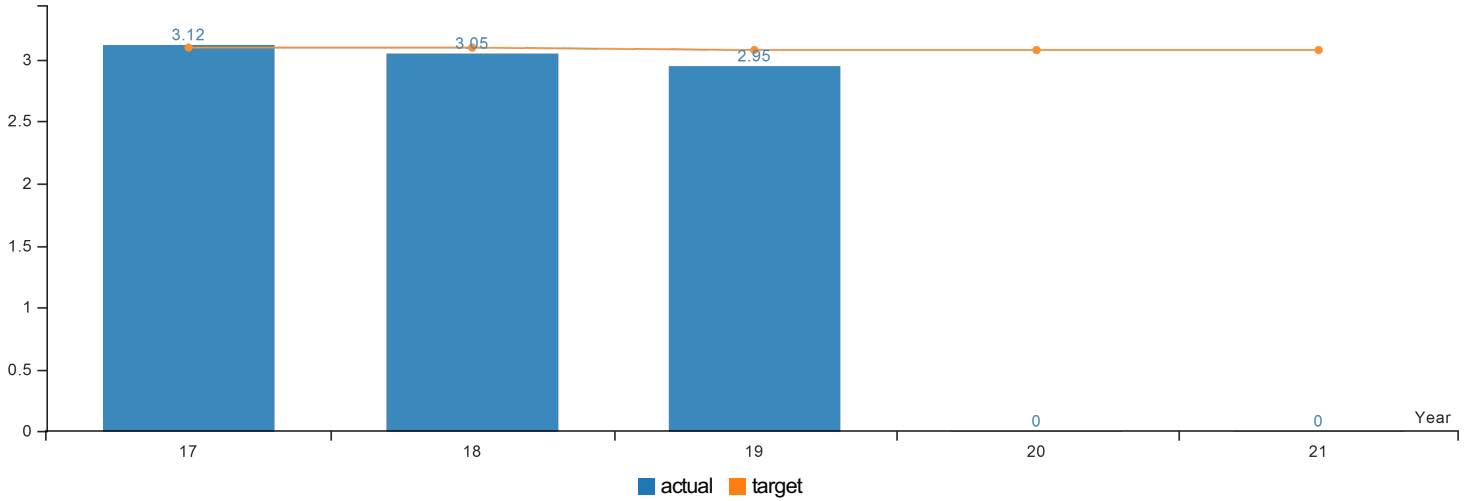
Annual Performance Progress Report

Reporting Year 2019

Published: 8/3/2020 3:52:09 PM

KPM #	Approved Key Performance Measures (KPMs)
1	OLDER ADULTS NEEDING LONG TERM CARE SERVICES (APD) - The percentage of older adults (65+) needing publicly-funded long term care services
2	LONG TERM CARE RECIPIENTS LIVING OUTSIDE OF NURSING FACILITIES (APD) - The percentage of Oregonians accessing publicly-funded long-term care services who are living outside of nursing facilities
3	TIMELY APD ABUSE INVESTIGATIONS - The percentage of abuse reports assigned for field contact that meet policy timelines
4	ABSENCE OF REPEAT MALTREATMENT OF ABUSED/NEGLECTED CHILDREN (CW) - The percentage of abused/neglected children who were not subsequently victimized within 6 months of prior victimization
5	TIMELY REUNIFICATION OF FOSTER CHILDREN (CW) - The percentage of foster children exiting to reunification within 12 months of foster care entry
6	TIMELY ADOPTION ONCE CHILDREN ARE LEGALLY FREE (CW) - The percentage of legally free children adopted in less than 12 months
7	DISPARITY OF FOSTER YOUTH ACHIEVING PERMANENCY (CW) - The disparity in foster youth achieving permanency with 2 years by race/ethnicity
8	CHILDREN SERVED BY CHILD WELFARE RESIDING IN PARENTAL HOME - The percentage of children served in Child Welfare on an average daily basis (in home and foster care) who were served while residing in their parent's home
9	TIMELY ELIGIBILITY DETERMINATION FOR ODDS SERVICES - The percentage of individuals who apply for ODDS services who are determined eligible within 90 days from application
10	ADULTS ENROLLED IN ODDS PROGRAM RECEIVING IN-HOME SERVICES - The percentage of adults enrolled in the Intellectual/Developmental Disabilities program who are receiving services in their own home, including family home
11	SUPPORTED EMPLOYMENT SERVICES TO OBTAIN COMPETITIVE INTEGRATED EMPLOYMENT - Number of individuals in sheltered workshop target population receiving supported and/or related employment services from ODDS and VR who obtain competitive integrated employment
12	ABUSE/NEGLECT OF ADULTS WITH DEVELOPMENTAL DISABILITIES (ODDS) - The percentage of substantiated abuse/neglect of adults in licensed and endorsed programs
13	HOUSEHOLDS AT, OR ABOVE, LIVING WAGE FOUR QUARTERS AFTER LEAVING SSP PROGRAM - The median percentage of households leaving Self Sufficiency who are at, or above, a living wage four quarters out
14	SSP PARTICIPANTS REPORTING HOUSING STABILITY - The percentage of Self Sufficiency participants who report their housing needs are fully met
15	SSP PARTICIPANTS REPORTING FOOD SECURITY - The percentage of Self Sufficiency participants who report they did not worry about having enough food, or actually run out of food, in the past 12 months
16	SSP PARTICIPANTS REPORTING GREATER SELF-EFFICACY - The percentage of Self Sufficiency participants who report they feel more confident in their ability to improve their current circumstances because of SSP and other services they were connected to
17	OVRS CONSUMERS WHO ARE SUCCESSFULLY EMPLOYED AT PROGRAM EXIT - The percentage of Office of Vocational Rehabilitation Services (OVRS) consumers with a goal of employment who are employed at program exit
18	OVRS CONSUMERS EMPLOYED IN SECOND QUARTER FOLLOWING PROGRAM EXIT - The percentage of OVRS clients closed from plan who are employed during second quarter following program exit
19	OVRS CONSUMERS EMPLOYED IN FOURTH QUARTER FOLLOWING PROGRAM EXIT - The percentage of OVRS clients closed from plan who are employed during fourth quarter following program exit
20	OVRS MEDIAN QUARTERLY WAGE AT SECOND QUARTER FOLLOWING PROGRAM EXIT - Median quarterly wage at second quarter following OVRS program exit
21	DHS CUSTOMER SATISFACTION - The percentage of customers rating their satisfaction with DHS above average, or excellent



Proposal	Proposed Key Performance Measures (KPMs)
Delete	DISPARITY OF FOSTER YOUTH ACHIEVING PERMANENCY (CW) - The disparity in foster youth achieving permanency with 2 years by race/ethnicity
New	REDUCTION OF RACE/ETHNICITY DISPARITIES IN LENGTH OF STAY (CW) - Outcome disparity in length of stay (reported in months) for children in substitute care by race/ethnicity
New	REDUCTION IN DISPROPORTIONALITY OF CHILDREN AT ENTRY INTO SUBSTITUTE CARE (CW) - Measure of the average disproportionality index across race/ethnicity for children at entry into substitute care

Performance Summary	Green	Yellow	Red
	= Target to -5%	= Target -5% to -15%	= Target > -15%
Summary Stats:	57.14%	23.81%	19.05%

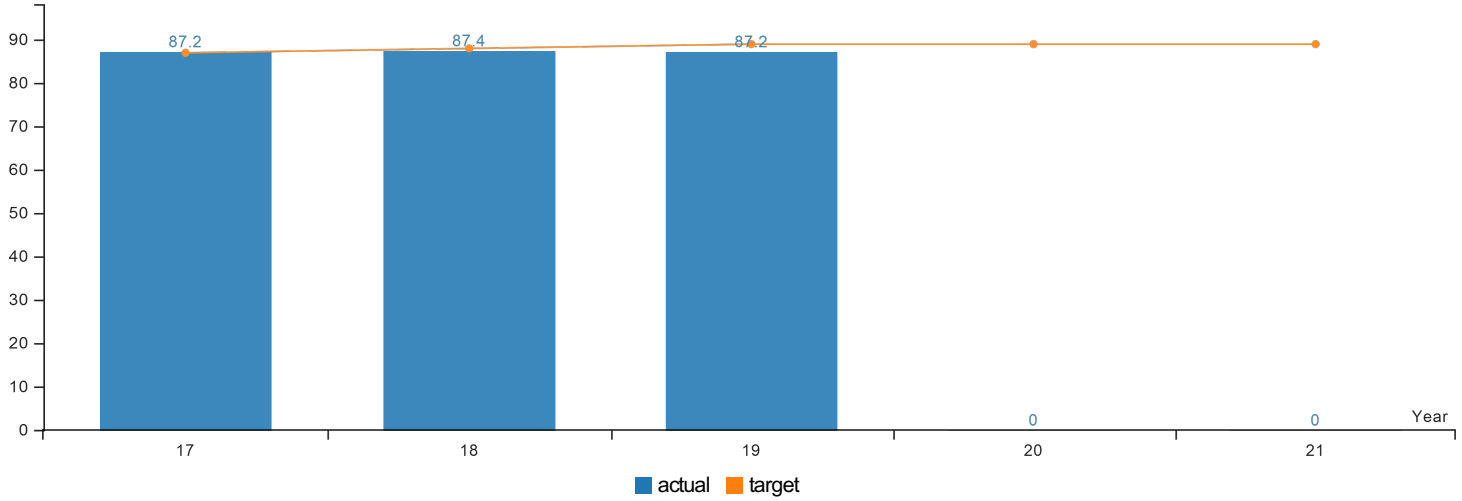
KPM #1	OLDER ADULTS NEEDING LONG TERM CARE SERVICES (APD) - The percentage of older adults (65+) needing publicly-funded long term care services
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*

Report Year	2017	2018	2019	2020	2021
LTC NEED PREVENTION					
Actual	3.12%	3.05%	2.95%	No Data	No Data
Target	3.10%	3.10%	3.08%	3.08%	3.08%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 10 to 1 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.



In 2019, only 2.95% of Oregonians 65 or older needed assistance with publicly funded long term care. This is a noticeable downward trend that exceeds legislative targets.

Factors Affecting Results

Oregon has adopted the Community First Choice Model, also known as the K Plan. This is a big driver in these results as the K Plan has numerous tools that are designed to keep people independent. Additionally, the success of the AAA network administering Oregon Project Independence, Older Americans Act programs and the Aging and Disability Resource Connection contribute towards keeping older adults independent. More preventative programs should be considered to ensure targets continue to be met, ultimately resulting in system sustainability.

KPM #2	LONG TERM CARE RECIPIENTS LIVING OUTSIDE OF NURSING FACILITIES (APD) - The percentage of Oregonians accessing publicly-funded long-term care services who are living outside of nursing facilities
	Data Collection Period: Jul 01 - Jul 31

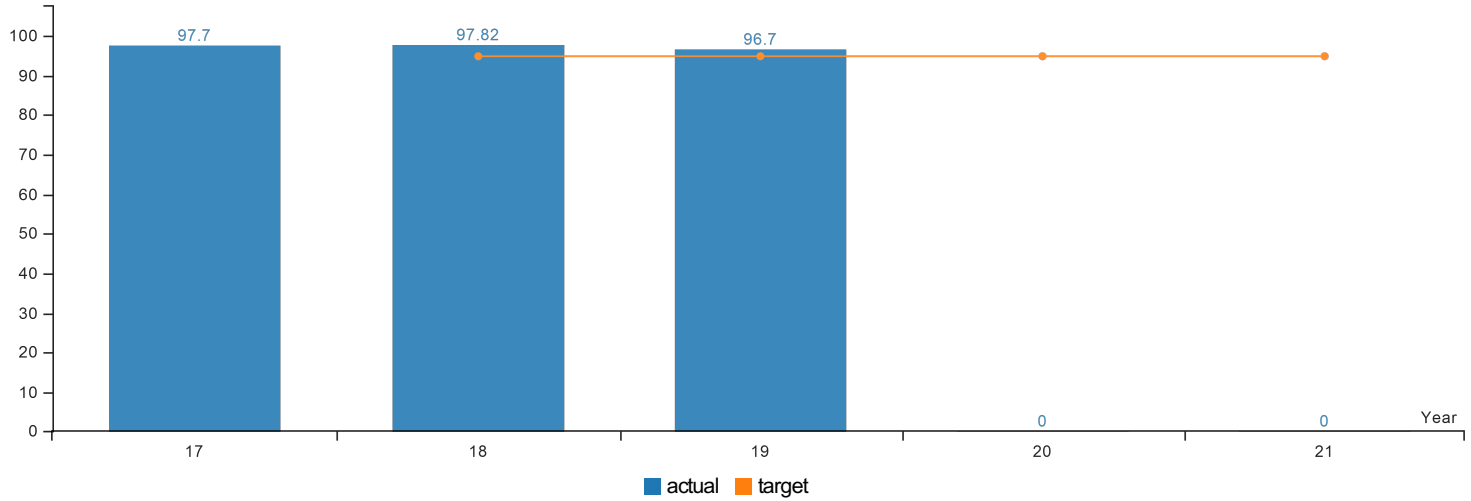
Target	87%	88%	89%	89%	89%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 11 to 2 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.



APD has begun to fall behind the goals established. Recent programmatic changes designed to promote sustainability have resulted in increased acuity levels of individuals served. As a result, continued progress towards decreasing the number of individuals served outside of nursing facilities will be challenging.

Factors Affecting Results

Hospitals continue to discharge patients “sicker and quicker.” In many cases, hospitals prefer to discharge older adults needing additional care to nursing facilities. Institutional care may be appropriate for certain individuals for short periods of time. DHS must continue to aggressively ensure that seniors are appropriately transitioned from nursing facilities when their care can be supported in less restrictive and costly settings. Doing this will allow DHS to continue meeting our targets. APD also needs to focus efforts on developing new adult foster homes and preserving our existing provider base.

KPM #3	TIMELY APD ABUSE INVESTIGATIONS - The percentage of abuse reports assigned for field contact that meet policy timelines
	Data Collection Period: Jan 01 - Dec 31

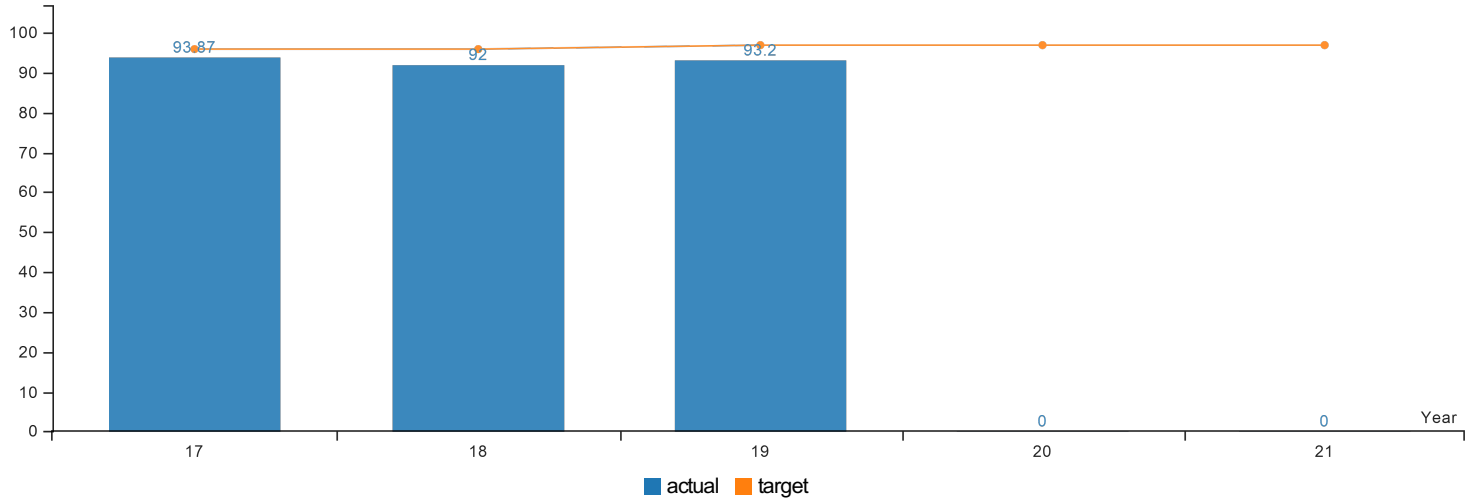
** Upward Trend = positive result*

Report Year	2017	2018	2019	2020	2021
Abuse Investigation Timeliness					
Actual	97.70%	97.82%	96.70%	No Data	No Data
Target	TBD	95%	95%	95%	95%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 16 to 3 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

Response to Abuse Allegations continues to occur at a rate higher than the target of 95%.



Factors Affecting Results

This measure includes a wide variety of assigned response times. APS Community Investigations have response times of same day, end of next business day, or within 5 business days. APS Facility Investigations have response times of same day and end of next business day. During this reporting period, there were 11,229 APS investigations. Of the 11,229 APS investigations, 99.8% were responded to within their assigned response time.

Also included in this measure are Nursing Facility Investigations completed by the Nursing Facility Survey Unit within Safety, Oversight and Quality. NF investigations have assigned timelines of two days or ten days. During this reporting period there were 508 Nursing Facility Investigations. Of the 508 Nursing Facility Investigations, 31.3% were responded to within their assigned response time.

KPM #4	ABSENCE OF REPEAT MALTREATMENT OF ABUSED/NEGLECTED CHILDREN (CW) - The percentage of abused/neglected children who were not subsequently victimized within 6 months of prior victimization
	Data Collection Period: Oct 01 - Sep 30

** Upward Trend = positive result*

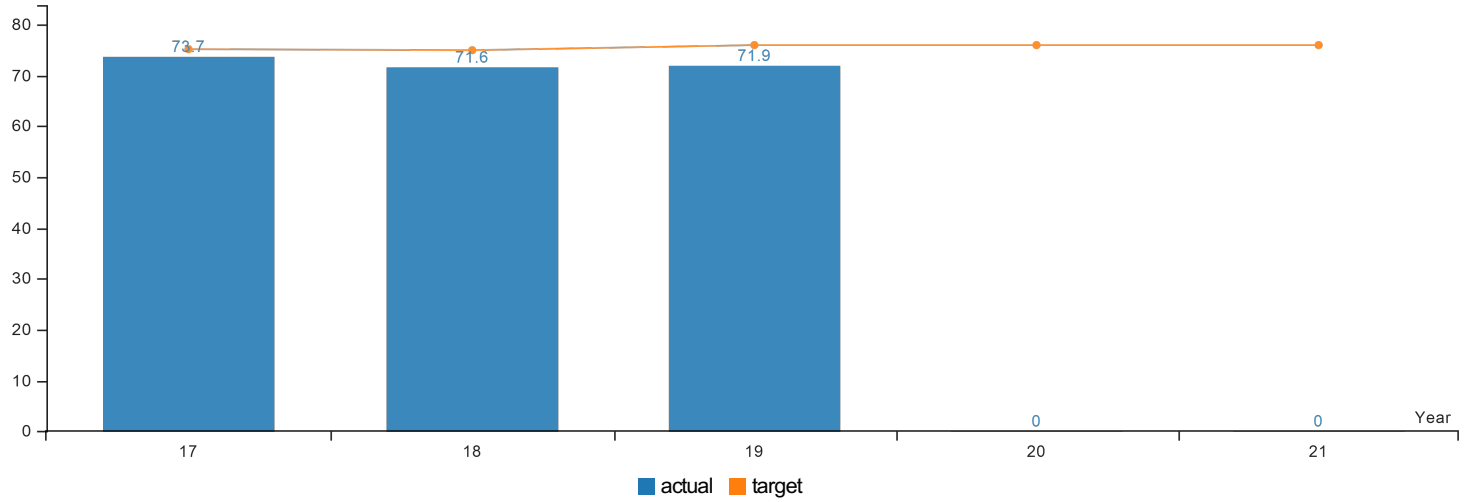
Report Year	2017	2018	2019	2020	2021
ABSENCE OF REPEAT CHILD MALTREATMENT					
Actual	93.87%	92%	93.20%	No Data	No Data
Target	96%	96%	97%	97%	97%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 7 to 4 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

The outcome of 93.2% is Federal Fiscal Year 2018 data, for Report Year 2019. While Oregon still falls short of the 97% target, much work is happening around efforts to improve this child safety outcome. Oregon continues its commitment to not only ensure the number remains consistent moving forward, but to make continued efforts to improve. The Child Safety Program consultants continue focused efforts on districts in Oregon who have sustained a high rate of recurrence of abuse. Cases with recurrence are reviewed monthly and in-depth information is shared with district leadership on a quarterly basis, including developing actions that need to be taken to improve this child safety outcome. There has been a positive shift in district leadership leading efforts in partnership with program consultants to decrease recurrence. One rural district has implemented joint Child Welfare and Self-Sufficiency case staffings to collaborate and discuss sustainability of child safety through service coordination on cases where maltreatment has occurred. This has resulted in cultivating community responses to prevent further child maltreatment. This district has subsequently seen a significant decline in recurrence of abuse. In other districts throughout the state, leadership is requiring group supervision on cases where a new maltreatment report is received following a previous founded maltreatment report to comprehensively assess and determine child safety. Child Safety Program provides training on correctly identifying dispositions which is vital for new CPS workers to ensure dispositions are in line with Oregon Administrative Rule. Child Safety Program is also reviewing CFSR debrief results for Safety Outcomes (#3) Risk and Management to develop a comprehensive plan around improving this measurement.

Factors Affecting Results



Multiple factors impact this measurement. There are notable aberrations, particularly in branches where due to small populations one case may dramatically skew data metrics. An additional area of practice impacting recurrence are assessments completed through a practice lens of disposition and legal sufficiency rather than comprehensive child safety. Ongoing training efforts on Oregon's safety model is necessary for our legal representatives and judicial partners to ensure legal interventions occur when necessary and reunification occurs when conditions for return have been met. In some cases with recurrence, children are returned home against the Department's recommendation and this has resulted in a subsequent report of child abuse.

Finally, some recurrence data is reflective of inaccurate documentation or duplication of founded dispositions. Cases resulting in recurrence of maltreatment frequently involve domestic violence and chronic neglect in root cause analysis.

The Department recognizes improving child safety by reducing the recurrence of child maltreatment cannot be achieved through one mechanism. Integration of four essential components including: hiring of additional staff including case workers and supervisors; immediate onboarding and training of supervisors; concentrating efforts to increase staff retention; and cross program collaboration and service delivery will provide a multisystem approach offering better outcomes.

KPM #5	TIMELY REUNIFICATION OF FOSTER CHILDREN (CW) - The percentage of foster children exiting to reunification within 12 months of foster care entry
	Data Collection Period: Oct 01 - Sep 30

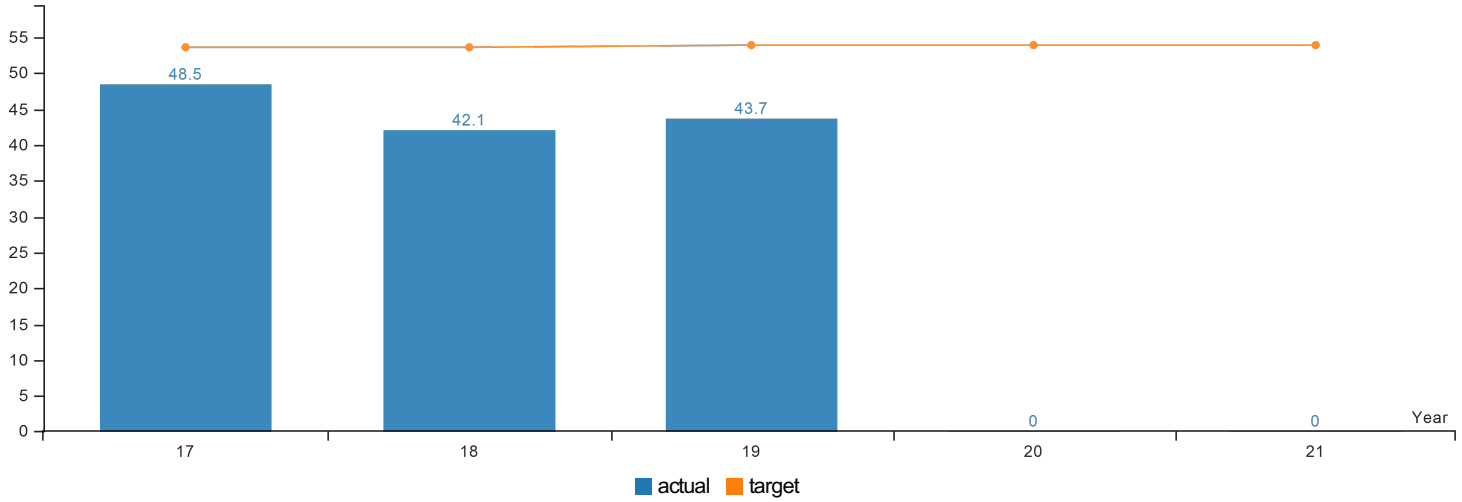
** Upward Trend = positive result*

Report Year	2017	2018	2019	2020	2021
Timely Reunification					
Actual	73.70%	71.60%	71.90%	No Data	No Data
Target	75.20%	75%	76%	76%	76%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 8 to 5 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

Over the past year, Oregon's performance in this measure has remained stable, while trending up over the last five years overall.



Factors Affecting Results

There are multiple factors- internal and external to the agency- that affect performance in this measure. Services available in the community to support families while children are served in home after reunifying vary greatly by county across the state. Additionally, the court's oversight in this area of practice varies, and effects this measure. Internally, the agency is hiring and training additional workforce, and still struggling with retention of caseworkers. Multiple workers on a case negatively impact this measure.

The passage of Family First, community efforts focused on timely reunification, and focused consulting in the field across Oregon should positively impact this measure.

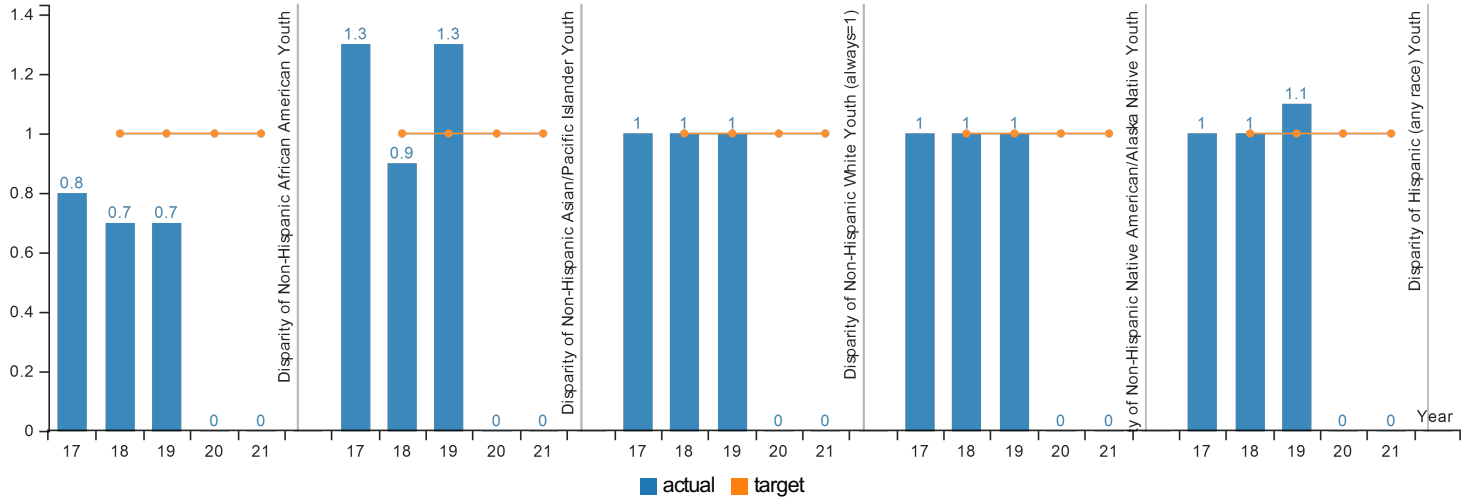
KPM #6	TIMELY ADOPTION ONCE CHILDREN ARE LEGALLY FREE (CW) - The percentage of legally free children adopted in less than 12 months
	Data Collection Period: Oct 01 - Sep 30

** Upward Trend = positive result*

Report Year	2017	2018	2019	2020	2021
Timeliness of Adoption Once Legally Free					
Actual	48.50%	42.10%	43.70%	No Data	No Data
Target	53.70%	53.70%	54%	54%	54%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 9 to 6 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.



In 2019, Oregon has improved performance in this measure from last year by 1.6%.

Factors Affecting Results

The work of finalizing adoption within 12 months of a child being legally freed is a workload that rests solely on the agency. For caseworkers who have many tasks on any given day that may include managing multiple crises, this work may be prioritized lower and thus takes longer to accomplish. Via the Performance Improvement Plan, Oregon focused on strategies to improve this measure by centralizing processes whenever possible and providing technical assistance to caseworkers managing cases where children are legally free and pending adoption finalization.

The efforts of the Performance Improvement Plan will continue through the next year, along with focused delivery of data to appropriate field management and staff. Performance in this measure should continue to improve.

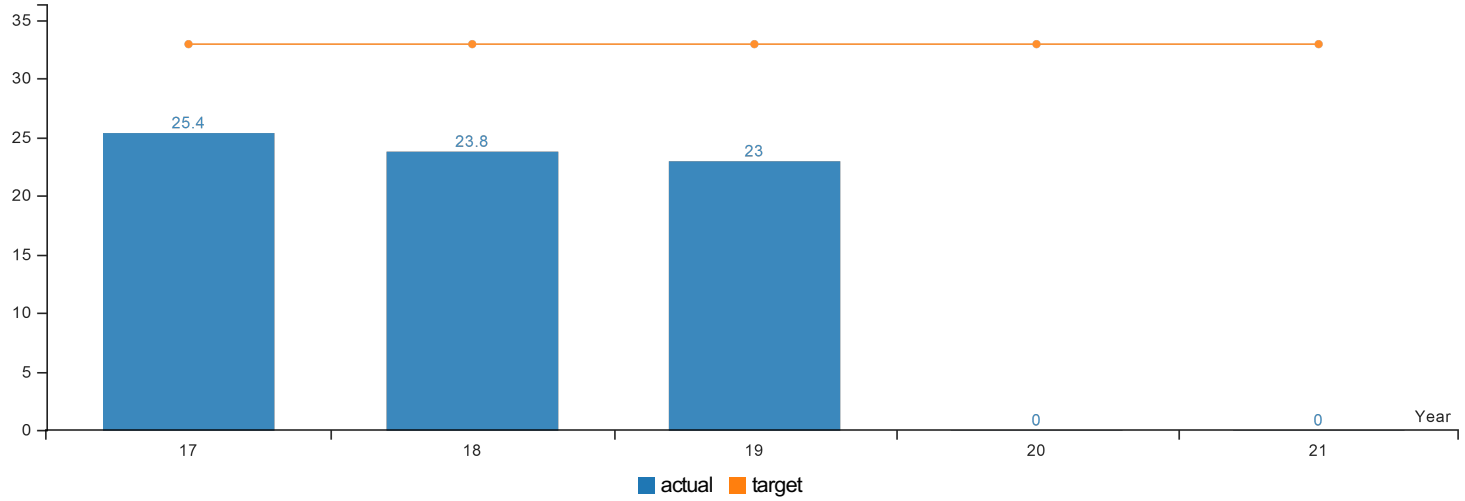
KPM #7	DISPARITY OF FOSTER YOUTH ACHIEVING PERMANENCY (CW) - The disparity in foster youth achieving permanency with 2 years by race/ethnicity
	Data Collection Period: Oct 01 - Sep 30

Report Year	2017	2018	2019	2020	2021
Disparity of Non-Hispanic African American Youth					
Actual	0.80	0.70	0.70	No Data	No Data
Target	TBD	1	1	1	1
Disparity of Non-Hispanic Asian/Pacific Islander Youth					
Actual	1.30	0.90	1.30	No Data	No Data
Target	TBD	1	1	1	1
Disparity of Non-Hispanic White Youth (always=1)					
Actual	1	1	1	No Data	No Data
Target	TBD	1	1	1	1
Disparity of Non-Hispanic Native American/Alaska Native Youth					
Actual	1	1	1	No Data	No Data
Target	TBD	1	1	1	1
Disparity of Hispanic (any race) Youth					
Actual	1	1	1.10	No Data	No Data
Target	TBD	1	1	1	1

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 18 to 7 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

Non-hispanic African-American disparity in Oregon is following the national trend. Efforts underway to address this include:



- Department is moving forward with a unified equity framework. This includes work through the Office of Equity and Multicultural Services (OEMS) to develop Child Welfare (CW) specific dashboard measures and a CW specific equity plan. OEMS and CW will work with the DHS Office of Reporting, Research, Analytics, and Implementation (ORRAI) to best understand and effectively use our data. The new dashboard measures will better reflect known disparities for children/families of color, resulting in more meaningful measures and plans regarding disproportionality and overrepresentation rates. OEMS and CW will identify strategies to ameliorate the disparities.
- Department is acknowledging institutional racism/discrimination within all levels of management, staff, and community.
- Child Welfare leadership is being trained to lead with a racial equity lens through efforts such as participation in Undoing Racism and related trainings and activities.
- Child Welfare updates to rules, policies, and procedures are increasingly viewed through an equity lens that is intending to eliminate practice that results in racial disparities.
- New worker training is focusing on engagement with families to respectfully and intentionally gather information on a family's pimary race and culture to eliminate disparate treatment or impacts.
- Community engagement and strategic planning through district leadership is focused on intentional, dedicated discussions on the practice and impact of child welfare on communities to include communities of diverse racial and ethnic persons.

Factors Affecting Results

See above. The data in this measure will undergo further analysis to include breakdown by decision points and by district as there is a significant variance across the state. Timely and accurate data entry, turnover of staff, delay in case plans, lack of culturally appropriate services and service providers, and lack of community engagement are some of the areas believed to be impacting our current state.

KPM #8	CHILDREN SERVED BY CHILD WELFARE RESIDING IN PARENTAL HOME - The percentage of children served in Child Welfare on an average daily basis (in home and foster care) who were served while residing in their parent's home
	Data Collection Period: Oct 01 - Sep 30

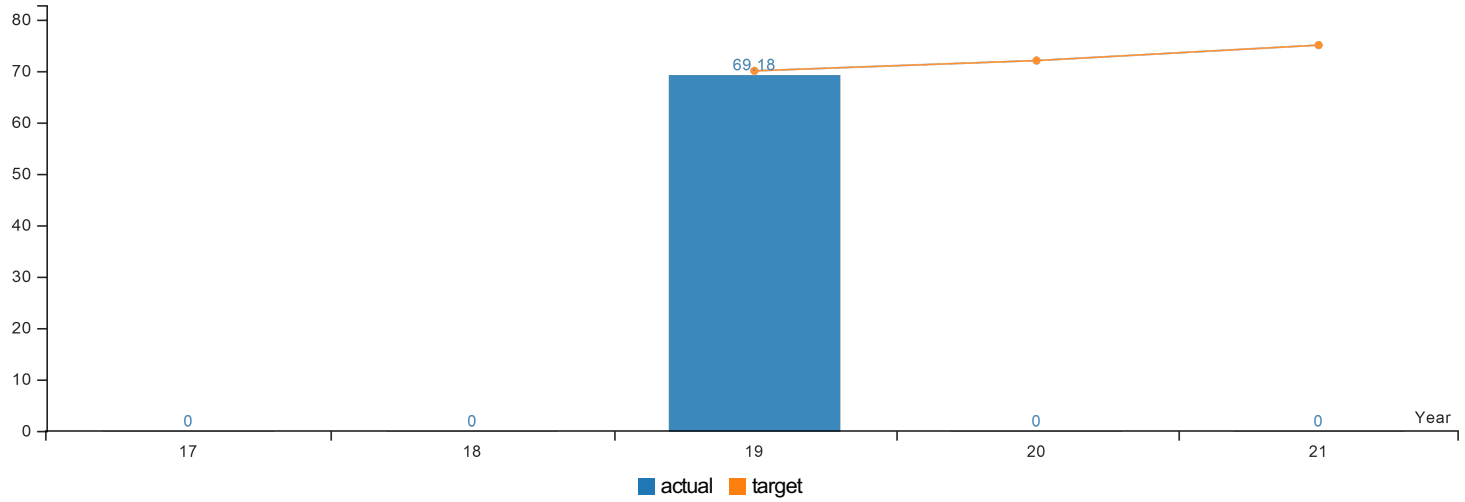
** Upward Trend = positive result*

Report Year	2017	2018	2019	2020	2021
CHILDREN RESIDING AT HOME IN LEAST RESTRICTIVE SETTING					
Actual	25.40%	23.80%	23%	No Data	No Data
Target	33%	33%	33%	33%	33%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 19 to 8 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

The outcome of 23.0% is Federal Fiscal Year 2018 data, for Report Year 2019. Oregon has seen a slight decrease in this performance measure since the previous FFY. With the impending implementation of Family First Act, Oregon's initial candidates for federal funding will include children at imminent risk for removal. This provides the Department an opportunity with a renewed focus on this population of children served in-home. Oregon's practice around serving children in-home varies around the state with some in-home cases remaining in Child Protective Service Units while services are provided, and others transitioning to Permanency units for ongoing case and safety management. Ongoing efforts to train staff on Oregon's safety practice model has resulted in the need to once again focus efforts on supervisors to ensure caseworkers have support necessary to practice fidelity to the safety model.



Factors Affecting Results

The lack of resources in communities and natural supports for families to manage safety threats while children remain in-home has been a consistent factor for numerous years. Cases where children remain in-home must receive consistent safety management until parents/caregivers have made sustainable behavior changes. Case reviews, however indicate in-home cases are often closed prior to the family conditions being fully addressed or insufficient safety planning resulting in removal and placement in foster care. While in-home services may be provided, there is a lack of sustained focus on monitoring safety. In order to manage these high-risk cases, caseworkers require in-depth knowledge of Oregon's practice model which provides specific criteria and guidance for all child safety decisions throughout the life of the case.

Placement of children in foster care is the most restrictive and least desirable outcome to manage child safety. Whenever possible, children who can be safety reunified with their family will continue to receive services in-home. Currently, Oregon's practice for offering in-home cases is inconsistent around the state. Additionally, the number of children served in-home has seen minor downward trend since the previous FFY. The Department believes the implementation of Family First Act will counter this decline and offer specific focus on children at imminent risk for removal.

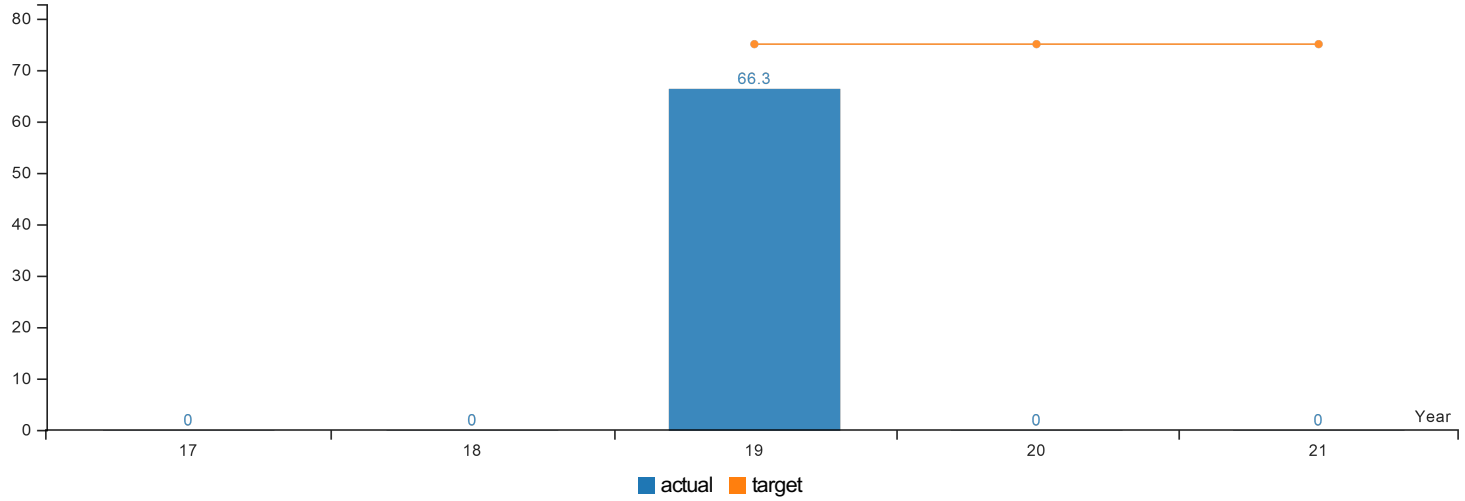
KPM #9	TIMELY ELIGIBILITY DETERMINATION FOR ODDS SERVICES - The percentage of individuals who apply for ODDS services who are determined eligible within 90 days from application
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*

Report Year	2017	2018	2019	2020	2021
SERVICE ELIGIBILITY - ODDS					
Actual	No Data	No Data	69.18%	No Data	No Data
Target	TBD	TBD	70%	72%	75%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 12 to 9 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.



This is a new measure and the first time data has been collected. Targets have been set based on this baseline data, and may be adjusted once we collect additional data. The data provided is cumulative data for calendar year 2019.

Factors Affecting Results

While the goal is to have all individuals' eligibility determined within 90 days, there are times a 90-day extension is granted (e.g., individual needs an evaluation, delays from the individual/family getting data, etc.). Additionally, because data has not been measured before, targets and ranges have not been set. As more data is collected and analyzed and discussed, benchmarks will be established.

KPM #10	ADULTS ENROLLED IN ODDS PROGRAM RECEIVING IN-HOME SERVICES - The percentage of adults enrolled in the Intellectual/Developmental Disabilities program who are receiving services in their own home, including family home
	Data Collection Period: Jan 01 - Dec 31

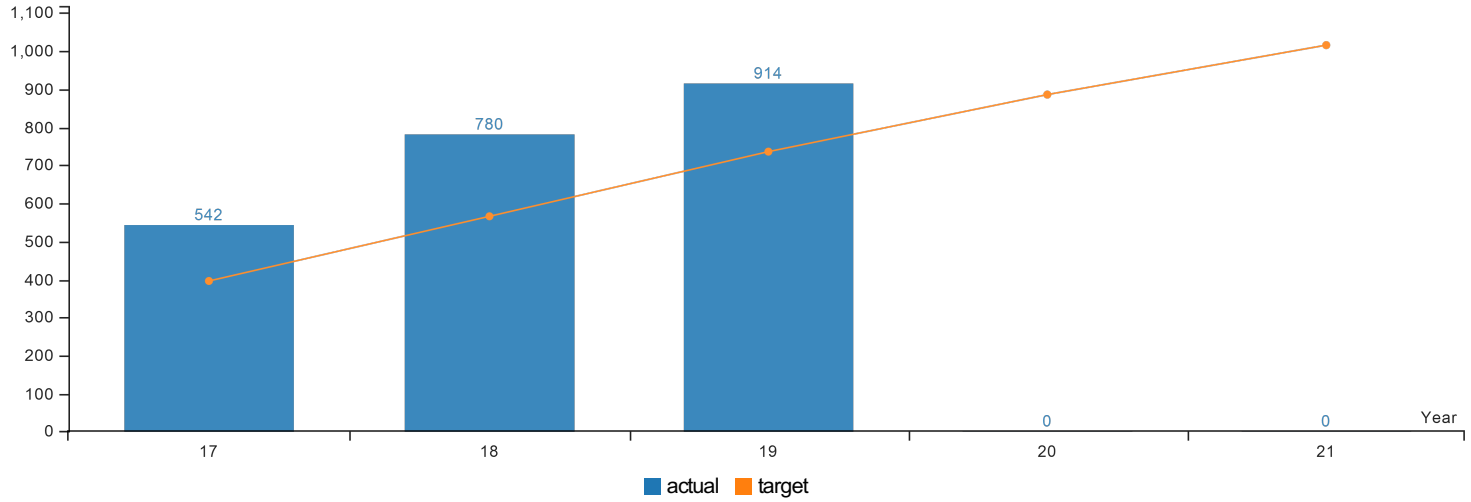
** Upward Trend = positive result*

Report Year	2017	2018	2019	2020	2021
In-Home Services					
Actual	No Data	No Data	66.30%	No Data	No Data
Target	TBD	TBD	75%	75%	75%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 13 to 10 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

Oregon does not have any institutional care settings for people with intellectual/developmental disabilities. All services are provided in a community setting. Additionally, two of our five strategic goal areas are focused on supporting people's living options and providing adequate support to individuals and families, so they can be happy, safe, and healthy in the home setting they choose.



The target is based on a comparison with others states based on data reported by the Institute on community integration through the university of Minnesota. The specific report was "In-Home & Residential Supports for Persons with Intellectual or Developmental Disabilities: Status and Trends Through 2016 Residential Information Systems Project Report (RISP)" Published in June 2018. Data represents calendar year to date.

Factors Affecting Results

Group homes and foster homes fulfill an essential role in providing supports and services to those that may not have access to in-home supports or whose support needs are specialized enough that providing them in the family home would provide a major disruption to others living in the home.

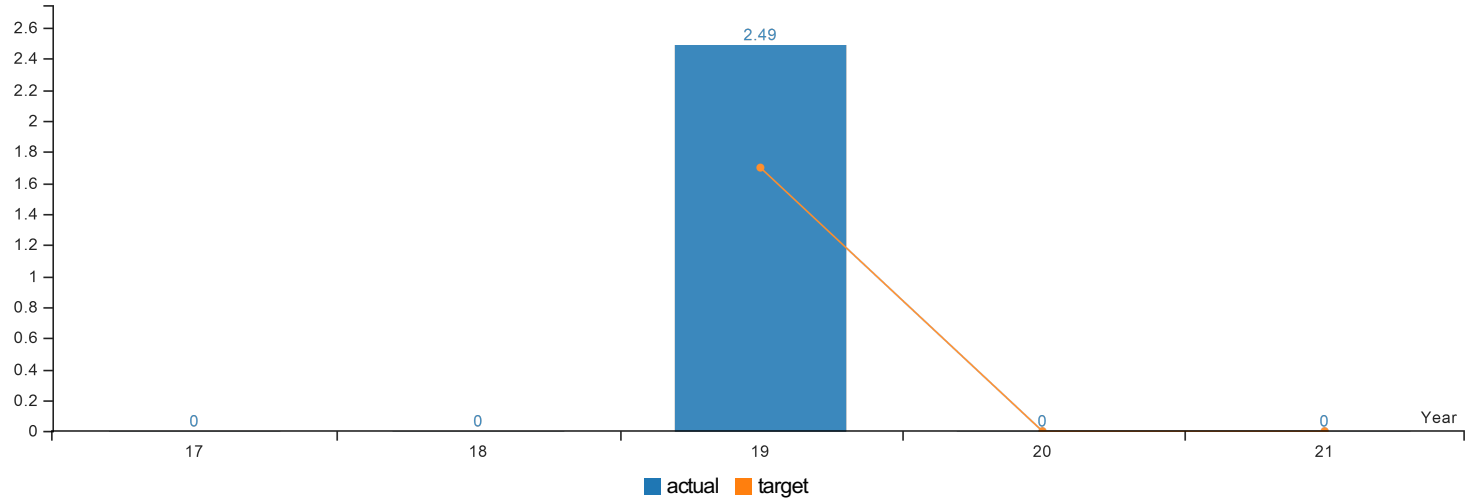
KPM #11	SUPPORTED EMPLOYMENT SERVICES TO OBTAIN COMPETITIVE INTEGRATED EMPLOYMENT - Number of individuals in sheltered workshop target population receiving supported and/or related employment services from ODDS and VR who obtain competitive integrated employment
	Data Collection Period: Jul 01 - Jun 30

** Upward Trend = positive result*

Report Year	2017	2018	2019	2020	2021
SUPPORTED EMPLOYMENT - EMPLOYMENT FIRST					
Actual	542	780	914	No Data	No Data
Target	395	565	735	885	1,015

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 14 to 11 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.



For Fiscal Year 2018 we provided supported employment services to 780 individuals who had previously been in a Sheltered Workshop and continue to be in compliance with Lane v. Brown. DHS continues to grow competitive integrated and supported employment for individuals who have I/DD as required by Lane v. Brown, as well as state initiatives. Fiscal Year 2019 demonstrates that 914 individuals who had previously been in a SW, gained competitive integrated employment.

Factors Affecting Results

The way the data was reported changed in 2016, which is why it is reflected differently here. The cumulative target is to have 1,115 working age individuals in the Sheltered Workshop Target population employed in Competitive Integrated Employment by 2022. Targets are based on Executive Order 15-01 and the Lane v Brown Settlement Agreement. Data is collected in September each year. 2019 data will be reported in the fourth quarter of this year. Supported employment providers in the state are continuing to make significant changes as they transform from traditional facility based services to community services. DHS is on target to continue to grow supported employment services for those with I/DD.

KPM #12	ABUSE/NEGLECT OF ADULTS WITH DEVELOPMENTAL DISABILITIES (ODDS) - The percentage of substantiated abuse/neglect of adults in licensed and endorsed programs
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*

Report Year	2017	2018	2019	2020	2021
ABUSE OF PEOPLE WITH DEVELOPMENTAL DISABILITIES					
Actual	No Data	No Data	2.49%	No Data	No Data
Target	TBD	TBD	1.70%	0%	0%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 15 to 12 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

Changes to the definition of the KPM make direct comparisons with previous years inappropriate. Historically, the population was based on all people with developmental disabilities—adults and children, whether they lived in residential settings, received services provided by programs with endorsements or not. In 2019, the metric changed to focus on substantiated abuse of adults in licensed and endorsed programs. The metric now applies to a smaller group of individuals, and it is a more responsive metric. Because these programs have sought licenses or endorsements, ODDS can have a direct impact on the provider agencies involved in abuse and neglect.

In previous years, the majority of reports of abuse and neglect involved licensed settings. Employees in these settings are mandatory reporters of abuse and are trained to recognize signs of abuse. It appears that abuse has increased by half a percent from last year to this. However, because the data for this year looks only at adults in licensed and endorsed programs the number of individuals in the population decreased by 59%. The apparent increase in abuse is, at least in part, due to a decreased population.

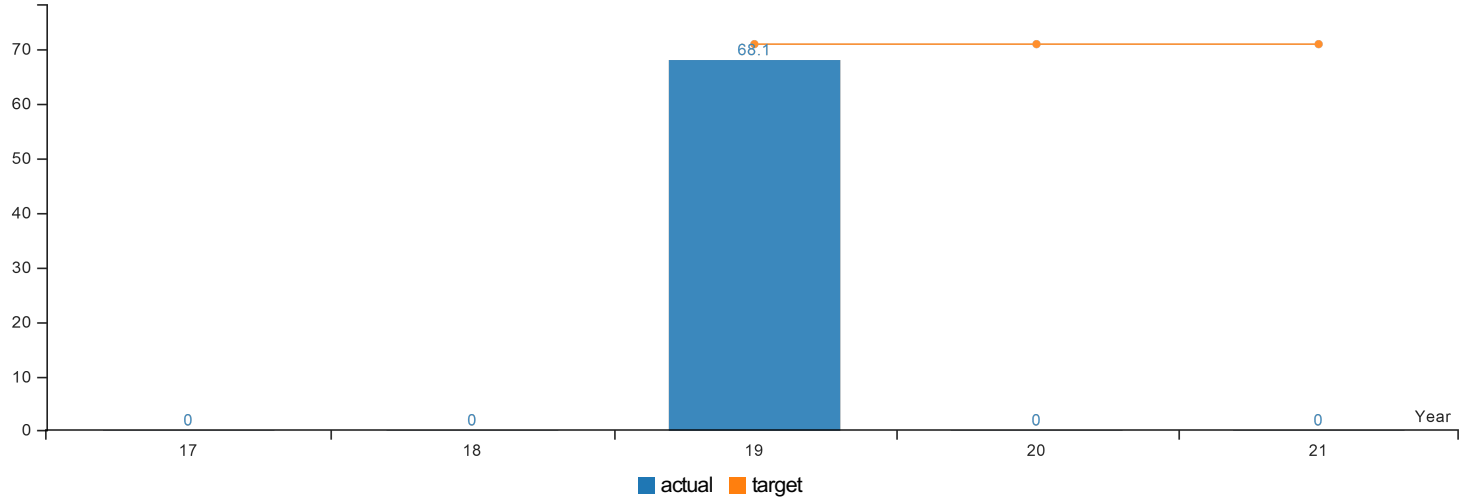
Because of a lack of national abuse data, it is a challenge drawing comparisons to the I/DD abuse rate targets. Targets are currently based on trends of historical data.

Oregon is in the process of developing a Centralized Abuse Management (CAM) information system that will allow for enhanced tracking and monitoring of abuse referrals and investigations. I/DD service cases will be included in the second phase of implementation. Piloting will begin as of October 2019, and all new I/DD investigations will be entered in the system beginning in March 2020.

The implementation of CAM will enhance access and availability of information across the state and greatly improve the ability to make data informed decisions.

Factors Affecting Results

Abuse rates for people with intellectual/developmental disabilities can be affected by many factors, including:



- The high acuity and service needs of residents being served in community-based care settings.
- High turnover rate of treatment and support staff in all settings.
- An adult's right to make decisions about their living situation, companions, etc.
- Barriers to the reporting of abuse by cognitively impaired clients.
- Limited resources available to respond and support people with intellectual/developmental disabilities who are abused (e.g. domestic violence shelters, counseling resources, etc.).
- Current data systems do not have the capacity to clearly identify risks associated with reports of abuse.

What needs to be done in this area includes:

- Ongoing training for service coordinators, personal agents, personal support workers, direct support providers, service providers and facility staff in recognizing, reporting, and preventing abuse.
- Research and collaboration with community response systems and resources, including domestic violence interventions, sexual assault response, mental health services, housing, etc.
- Coordination and participation with local area multidisciplinary teams and coordinated care organizations.
- Increased investigator access to content experts such as forensic nurses, psychologists and other health care professionals.

KPM #13	HOUSEHOLDS AT, OR ABOVE, LIVING WAGE FOUR QUARTERS AFTER LEAVING SSP PROGRAM - The median percentage of households leaving Self Sufficiency who are at, or above, a living wage four quarters out
	Data Collection Period: Jul 01 - Jun 30

** Upward Trend = positive result*

Report Year	2017	2018	2019	2020	2021
HOUSEHOLDS AT, OR ABOVE, LIVING WAGE					
Actual	No Data	No Data	68.10%	No Data	No Data
Target	TBD	TBD	71%	71%	71%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 5 to 13 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

The Office of Self-Sufficiency Programs' (SSP) mission is to provide a safety net, family stability and a connection to careers that guide Oregonians out of poverty. A key dimension to address poverty and maximize people's potential is the ability to earn living wages. It is well known that families who are employed with incomes at, or just above the federal poverty level often cannot make ends meet. In these circumstances, individuals and families find it difficult to pay for the necessities like food, housing, utilities, child care, clothing, etc. This measure tracks the median percent of participants who exit all Self-Sufficiency programs and are earning at, or above, living wages four quarters after they leave the programs. The most recent data available shows that 68.1 median percent of those participants are earning living wages.

Factors Affecting Results

This measure relies on Oregon Employment Department (OED) reported earnings for SSP participants one year after they left all SSP programs and comparing these earnings to the most recent Washington State University Self-Sufficiency Standard for Oregon. It is important to note that only the SSP exiters with income captured by OED are included in the pool. The Self-Sufficiency Standard calculates how much income a family must earn to meet basic needs, with the amount varying by family composition and where they live[1]. This measure may be affected by several things, including the status of the economy, the availability of jobs, geography, standard costs for basic living needs by county, and family composition. It can also be affected by the structure of SSP employment and training programs and the effectiveness of other agency and community partnerships that connect SSP participants into living wage jobs.

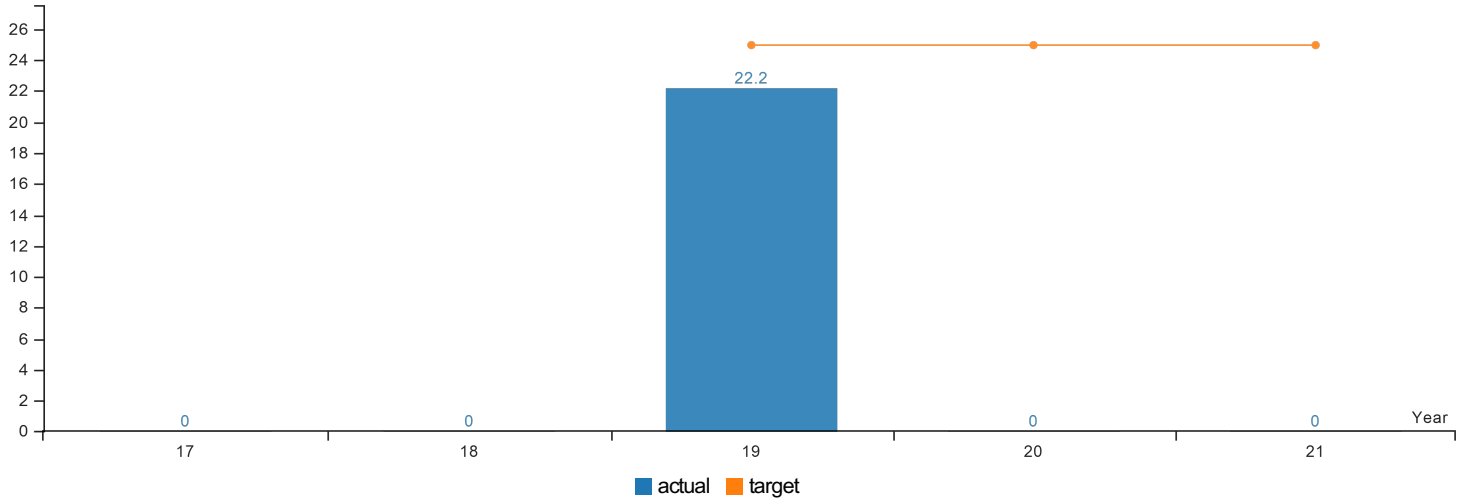
Over the past three years the Oregon Workforce System became more aligned and includes coordinated partnerships and service delivery.

- Data-sharing agreements are in place to include Supplemental Nutrition Assistance Program (SNAP) employment plans in the Oregon Employment Department's (OED) data-system.
- People served by the SNAP-Able-Bodied Adults Without Dependents (ABAWD) program now access enhanced employment services from OED.
- In the Fall 2018, DHS SSP and workforce system partners participated in regional poverty simulations to ensure goals and approach to servicing families are aligned beginning with a common understanding and framework.

Over the past three years DHS SSP invested in expanded employment and training opportunities and supports:

- SNAP Training and Employment Program (STEP) has expanded investments in partnership with OED, community colleges and local community organizations, drawing additional federal dollars to offer a more comprehensive set of training and employment opportunities for SNAP participants.
- DHS SSP invested seed money so that OED can pay for things such as uniforms, scrubs, etc. that their STEP participants need to start a new job.
- Job Opportunity and Basic Skills (JOBS) Program investments include expansion of a more comprehensive model of vocational training and education, expanded supports and payments for family stability services and housing assistance to support Temporary Assistance for Needy Families (TANF) and former TANF participants.

DHS SSP plans to continue expansion of employment and training programs in partnership with communities, participants, agencies, employers and nonprofit organizations.



We are reporting using State Fiscal Year data for 2018. The cohort is composed of participants leaving all SSP programs anytime between Quarter three 2016 and Quarter two 2017, and their wage status four quarters later. These targets are provisional as they're based on one data point. We anticipate we will modify them in the future once we collect additional data.

---

[1] Dr. Diana M. Pearce, "The Self-Sufficiency Standard for Oregon 2017", Center for Women's Welfare at the University of Washington. Available online at: http://selfsufficiencystandard.org/oregon

KPM #14	SSP PARTICIPANTS REPORTING HOUSING STABILITY - The percentage of Self Sufficiency participants who report their housing needs are fully met
	Data Collection Period: Jul 01 - Jun 30

** Upward Trend = positive result*

Report Year	2017	2018	2019	2020	2021
HOUSING STABILITY					
Actual	No Data	No Data	22.20%	No Data	No Data
Target	TBD	TBD	25%	25%	25%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 6 to 14 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

The Office of Self-Sufficiency Programs' (SSP) mission is to provide a safety net, family stability and a connection to careers that guide Oregonians out of poverty. Housing is an important dimension of poverty and a foundation for successful communities. The goal of this measure is to track the percentage of households connecting to Self-Sufficiency programs who report housing stability. In the Spring 2019, we conducted a statewide survey of Supplemental Nutrition Assistance Program (SNAP) participants who applied or reapplied for SNAP or other SSP programs. **Of 30,374 SNAP applicants in March and April 2019, there were 5,863 survey respondents which represents a 19.3% overall response rate.**

The survey found that only 22.2% of respondents reported housing stability. This means that based on the survey, over half of the respondents reported housing instability, meaning that their housing needs are not fully met.

The following is a breakdown of participant responses to the KPM question: **"Please select what you feel is most true for your family now"**

Percentage	Response
19.0%	I and/or my family need(s) immediate help getting into housing
11.8%	I and/or my family have housing, but it is temporary and/or inadequate
27.9%	I and/or my family needs help at times with rent and/or bill payment
22.2%	I and/or my family's housing needs are fully met (i.e., I can afford to pay rent/mortgage and utilities without difficulty)
19.2%	Decline to answer

The following is the breakdown of participants' responses to: "What is your current living situation?":

Percentage	Response
31.0%	Staying or living with family / friends
28.4%	Rental housing with no subsidy / rent room / exchange work for room
7.9%	Rental housing with subsidy (Section 8, public housing, or other housing assistance)
7.9%	Living on the street / no physical shelter
6.4%	Own home / own trailer
5.3%	Emergency shelter / transitional shelter
5.3%	Living in car
3.7%	Other
3.1%	About to lose housing / facing eviction
1%	Hotel / motel

The following are a few of the quotes from participants who opted to provide more input:

"We struggle day to day to make sure we have electricity and a roof over our heads. We make too much money for cash assistance but too much money still doesn't pay all the bills. Each month we have to decide what we can or can't live without. As of right now, we don't have telephone. But that was the sacrifice we had to make to keep the roof over our head".

"Rent has been raised twice since the 1st of this year. I now pay 45% of my monthly income for housing that is overpriced for my grandchild and I."

"I have two kids and because rent is so high…we have to have a roommate in our home which is not an ideal lifestyle for my kids".

"They have discovered mold in my apartment, and I have to move out and can't find a new apartment".

"I'm currently living with friends, it's hard to make ends meet. Rent is hard to pay sometimes".

"Need housing so [that] soon to be employment has a higher success rate".

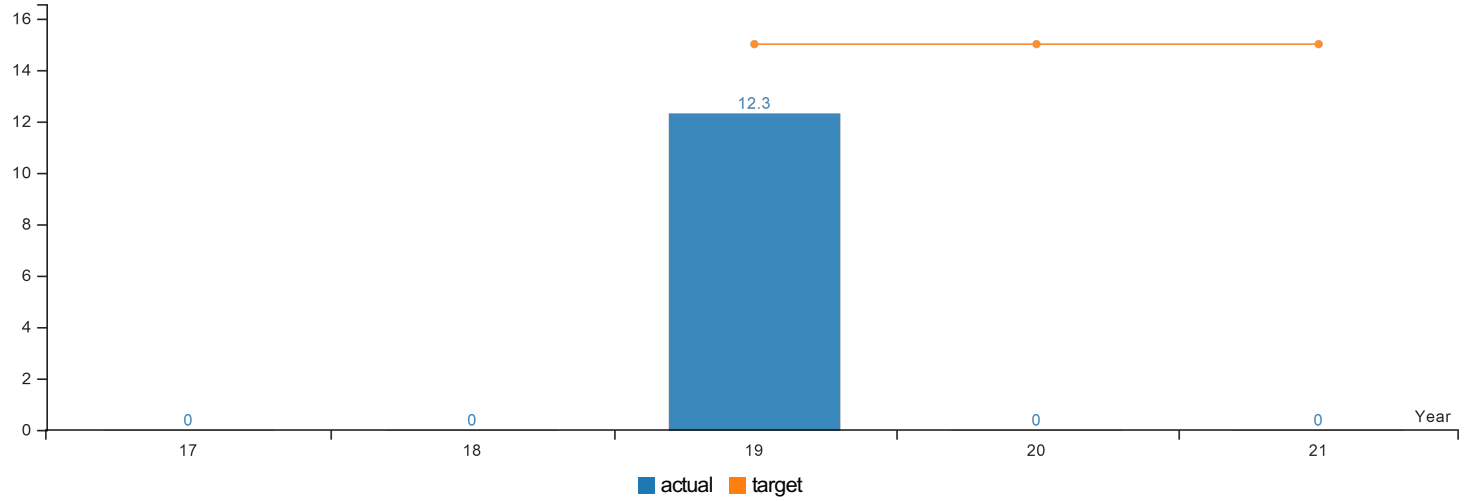
"Help for immediate housing assistance funds would be most beneficial".

Factors Affecting Results

According to the Department of Housing and Community Services, housing has emerged as a paramount concern across Oregon and the lack of available housing, high rents and high home prices are driving rapid increases in housing instability and homelessness[1]. These themes rang true and were reflected throughout the SSP well-being survey we conducted in the Spring.

Over the past two years SSP expanded TANF funded supports to cover housing related emergent needs. SSP has also provided for innovative contracting for housing related services, including navigation services, in partnership with community-based organizations and agencies.

The 2019 Oregon Legislature made a historic investment in housing and DHS SSP stands ready to collaborate with OHCS, SSP participants, and stakeholders to do our part to ensure those investments reach communities in need.



The target of 25% for housing stability is provisional and based on one data point. We anticipate we will modify these targets in the future based on the results of next year's survey which will yield one more data point.

---

[1] Oregon Statewide Housing Plan 2019-2023, Oregon Housing and Community Services. Available online at: https://www.oregon.gov/ohcs/DO/shp/SWHP-Executive-Summary.pdf

KPM #15	SSP PARTICIPANTS REPORTING FOOD SECURITY - The percentage of Self Sufficiency participants who report they did not worry about having enough food, or actually run out of food, in the past 12 months
	Data Collection Period: Jul 01 - Jun 30

** Upward Trend = positive result*

Report Year	2017	2018	2019	2020	2021
FOOD SECURITY					
Actual	No Data	No Data	12.30%	No Data	No Data
Target	TBD	TBD	15%	15%	15%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 20 to 15 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

The Office of Self-Sufficiency Programs' (SSP) mission is to provide a safety net, family stability and a connection to careers that guide Oregonians out of poverty. Food and nutrition encompass one of the dimensions of poverty. The goal of this measure is to track the percentage of households connecting to Self-Sufficiency programs who report food security. The United States Department of Agriculture defines food security as having consistent, dependable access to enough food for active, healthy living. In the Spring 2019, we conducted a statewide survey of Supplemental Nutrition Assistance Program (SNAP) participants who applied or reapplied for SNAP or other SSP programs. **Of 30,374 SNAP applicants in March and April 2019, there were 5,863 survey respondents which represents a 19.3% overall response rate.**

The survey found that only 12.3% of respondents reported experiencing food security[1]. This means that based on the survey, over two-thirds of the respondents reported experiencing food insecurity, meaning that their access to adequate food is limited by a lack of money or other resources.

The following is a breakdown of participant responses to**: "Within the past 12 months, we worried whether our food would run out before we got money to buy more"**

Percentage	Response
37.4%	Often true
41.1%	Sometimes true
12.3%	Never true
3.6%	Don't know
5.7%	Decline to answer

The following is the breakdown of participants' responses to "Within the past 12 months, the food we bought just didn't last and we didn't have money to get more"

Percentage	Response
29.0%	Often true
43.0%	Sometimes true
18.2%	Never true
3.7%	Don't know
6.1%	Decline to answer

The following are a few of the quotes from participants who opted to provide more input:

"The amount I have for money usually gets me through half the month and no more".

"Often the food stamps don't last until the end of the month unless I buy cheap food but then the kids are hungry shortly after so end of the month is skim but we try to do the best with our abilities".

"[I'm] working full time but need help with food".

"..Just trying to live within my means. Usually [by the] fourth week of the month very low with no food money".

"Single mother with no current child support. I finally broke out of the minimum wage income, believing I would be able to breathe. When in fact, all my benefits were cut abruptly. I make just over the amount to get anything more than $15 in SNAP benefits."

"With .. only being a one income household and my husband's income not being nearly enough to cover bills and other necessities for our children we are struggling severely and the $207 in SNAP benefits doesn't even make a dent in our grocery costs for a household of 5 let alone relieve some of the financial pressure/stress".

---

[1] The SSP Well-being survey incorporated the Hunger Vital Sign™, a validated 2-question food insecurity screening tool developed by Drs. Erin Hager and Anna Quigg and the Children's HealthWatch team. The Hunger Vital Sign™ identifies households as being at risk for food insecurity when they answer that either or both of the 2-question statements are "often true" or sometimes true". For more information visit the Children's HealthWatch website at: https://childrenshealthwatch.org/public-policy/hunger-vital-sign/

Factors Affecting Results

These results are derived from participants' entries on the SSP well-being survey which will be conducted by SSP each year. Our survey population is composed of persons applying or reapplying

for SNAP or other SSP benefits. Oregon has had great success in easing access to SNAP benefits. One effort has been encouraging the use of the on-line application. Another has been issuing benefits within the same or next work day after they apply for SNAP. Oregon continues to expand outreach efforts to connect with difficult to reach populations by providing information on the benefits of qualifying for and maintaining SNAP eligibility, dispelling myths, providing application assistance, advocating on behalf of participants, and numerous other strategies to reach populations in need. These strategies include identifying and removing barriers to the SNAP program across all populations. We currently collaborate with 15 different community agencies who serve as Oregon SNAP outreach partners.

Despite these efforts, people continue to experience hunger in Oregon but at an overall lower rate. The USDA Household Food Security in the United States in 2018 report found that 11.1% of Oregon households are food insecure, down from 11.8% in 2017[1]. The same report ranks Oregon as 24th in the nation for food insecurity[2].

The target of 15% for food security is provisional and based on one data point. We anticipate we will modify these targets in the future based on the results of next year's survey which will yield one more data point.

KPM #16	SSP PARTICIPANTS REPORTING GREATER SELF-EFFICACY - The percentage of Self Sufficiency participants who report they feel more confident in their ability to improve their current circumstances because of SSP and other services they were connected to
	Data Collection Period: Jul 01 - Jun 30

** Upward Trend = positive result*

Report Year	2017	2018	2019	2020	2021
SELF-EFFICACY/HOPE					
Actual	No Data	No Data	66.50%	No Data	No Data
Target	TBD	TBD	70%	70%	70%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 21 to 16 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

The Office of Self-Sufficiency Programs' (SSP) mission is to provide a safety net, family stability and a connection to careers that guide Oregonians out of poverty. Poverty is multidimensional, meaning that it is more than a lack of adequate income[1]. Multidimensional poverty asserts that there are multiple dimensions of deprivation that must be addressed for people to be equipped to exit poverty and build well-being[2]. This new measure aims to track one dimension of poverty: whether participants perceive a sense of influence over their own circumstances. Specifically, we are tracking participants' reported increased self-efficacy and hope as a result of their involvement with Self-Sufficiency Programs and the connections to other services SSP makes. In the Spring 2019, we conducted a statewide survey of Supplemental Nutrition Assistance Program (SNAP) participants who applied or reapplied for SNAP or other SSP programs. **Of 30,374 SNAP applicants in March and April 2019, there were 5,863 survey respondents which represents a 19.3% overall response rate.**

Based on the survey, 66.5% of survey respondents reported feeling more confident about their ability to improve their current circumstances as a result of their involvement with SSP and the services SSP connected them to. In addition, 67.3% of respondents reported they feel more hopeful about their future as a result of their involvement with SSP and the services SSP connected them to.

The following is a breakdown of participant responses to**: "My involvement with DHS Self-Sufficiency and the services DHS has connected me to have helped me feel more confident**

in my ability to improve my current circumstances"

Percentage	Response
24.4%	Strongly agree
42.1%	Agree
20.7%	No opinion
4.5%	Disagree
2.0%	Strongly disagree
6.2%	Decline to answer

The following is the breakdown of participants' responses to "My involvement with DHS Self-Sufficiency and the services DHS has connected me to have helped me feel more hopeful about my future":

Percentage	Response
26.0%	Strongly agree
41.3%	Agree
20.2%	No opinion
3.6%	Disagree
2.0%	Strongly disagree
6.9%	Decline to answer

The following are a few of the quotes from survey participants who opted to provide more input:

"I was feeling really hopeless and felt like giving up, but my case worker really helped me get out of that mindset. I appreciate you all for this amazing help you give".

"I am grateful for the opportunity to receive the food money. I am hopeful this year I will no longer need it at the end of the year. I am hopeful for that".

"If I had not been in this program, I might not be as able as I have become".

"I am blessed to have DHS and their wonderful employees who give hope [I] need in my life. They all treat me with dignity and respect with a smile. Who could ask for more than that?"

"Life is tough enough, without DHS probably unbearable. They keep families alive".

"The help we receive just barely keeps our heads above water. I spend inordinate amounts of time doing meal planning, shopping, and preparation to be able to get the most for my SNAP dollars, making them stretch to feed my family 3 nutritious meals a day. And we are absolutely grateful for what we get because we don't know what we would do without it. But let's be real here, it just gets us the bare minimum-it's not "hope" or "confidence" inspiring – but it does fill our bellies to be able to face another day of hard work for not enough money to pay … exorbitant rents and live in a city we can't afford to do anything in".

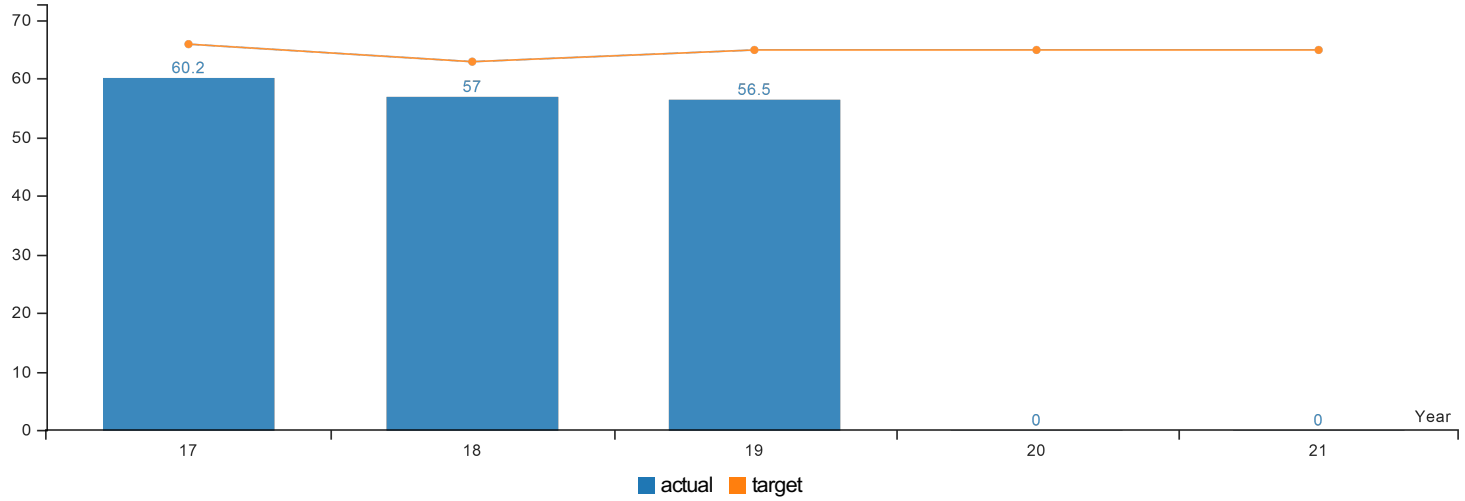
Factors Affecting Results



These results are derived entirely from participants’ entries on the SSP well-being survey which will be conducted by SSP each year. We define S*elf-efficacy* as participants having a sense of control or influence over the events and circumstances that affect them and can act on it. We define *Hope* as participants’ belief that their current circumstances will improve. Our desired outcome is that in partnership with participants, agencies and communities, SSP provides programs and services that maximize the potential that lies within everyone. Foundational to these changes are: intentionally involving families; having a philosophy and practice of being person centered; being strengths based and having resources that build broader well-being.

Hope and self-efficacy are interactively related, having influence on each other, but are also separate, stand-alone concepts. Self-efficacy often generates hope and hope can inspire a person to feel more able to achieve a goal. The SSP program decided to use two questions and measures to bring greater clarity to the impact of SSP services for each, with the primary KPM of self-efficacy.

Self-Efficacy is the primary measure included in this report while hope is also being tracked. The target of 70% for self-efficacy is provisional and based on one data point. We anticipate we will modify this target in the future based on the results of next year’s survey which will yield one more data point.

KPM #17	OVRS CONSUMERS WHO ARE SUCCESSFULLY EMPLOYED AT PROGRAM EXIT - The percentage of Office of Vocational Rehabilitation Services (OVRS) consumers with a goal of employment who are employed at program exit
	Data Collection Period: Oct 01 - Sep 30

** Upward Trend = positive result*

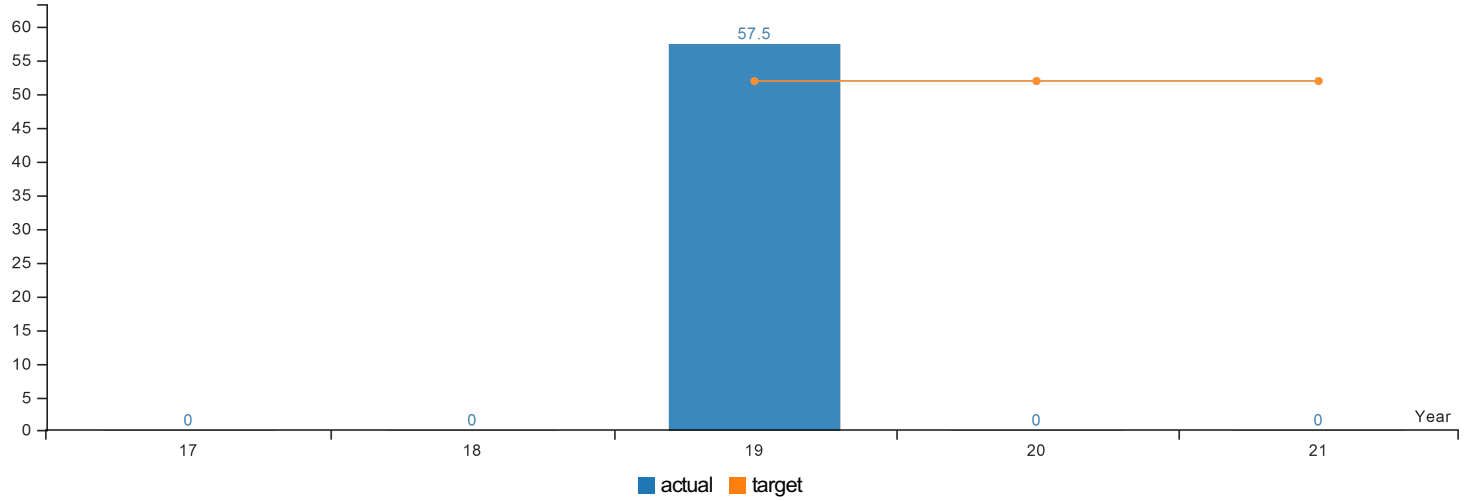
Report Year	2017	2018	2019	2020	2021
OVRS CLOSED - EMPLOYED					
Actual	60.20%	57%	56.50%	No Data	No Data
Target	66%	63%	65%	65%	65%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 1 to 17 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

Placements over the past year dipped slightly (0.5% < 25 clients). Variance in this measure has been less than 3% year-over-year and saw an increase during the period 2012 through 2016 when the overall economy saw even greater gains. Those gains in the economy have eased and we have seen a softening in the placement rates over the period 2016 through 2019.

The Oregon target of 66% has historically been optimistic when compared to federal expectations. The Oregon VR Program has met or exceeded the federal expectation. This is not longer a federally required metric under the Workforce Innovation and Opportunity Act of 2014 (WIOA). However, we will continue to work toward increasing this outcome as administrative staff see value in this measure.



Factors Affecting Results

Additionally, significant numbers of clients with intellectual and developmental disabilities as a result of the Lane v. Brown Settlement have influenced this metric in that the resources necessary to place the most significantly disabled individuals within our state has had an impact on the overall program. We anticipate and increase in this population group as we work through the initial high numbers.

We are working to improve placement opportunities by engaging in employer relationships at a much higher degree as required by WIOA and this has resulted in increased training for potential employers. Staff in Vocational Rehabilitation meet monthly with staff from the Office of Developmental Disabilities Services (ODDS) to jointly plan and coordinate services and to improve outcomes for this population and continue to develop the resources to mainstream this activity to improve on the service delivery model.

KPM #18	OVRS CONSUMERS EMPLOYED IN SECOND QUARTER FOLLOWING PROGRAM EXIT - The percentage of OVRS clients closed from plan who are employed during second quarter following program exit
	Data Collection Period: Oct 01 - Sep 30

** Upward Trend = positive result*

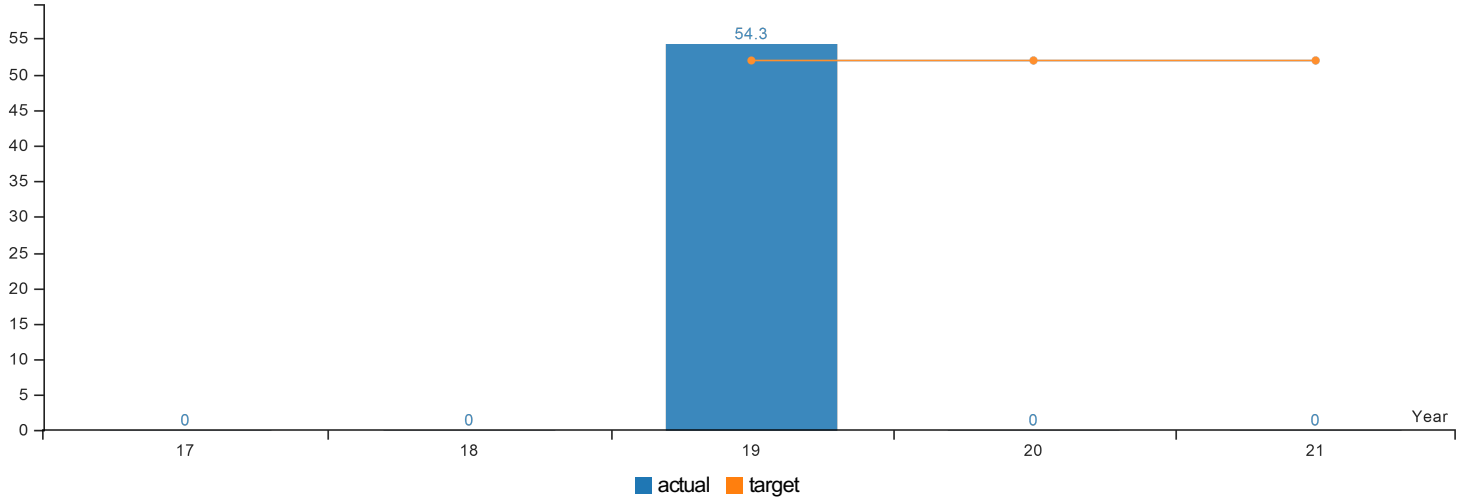
Report Year	2017	2018	2019	2020	2021
EMPLOYMENT IN SECOND QUARTER					
Actual	No Data	No Data	57.50%	No Data	No Data
Target	TBD	TBD	52%	52%	52%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 2 to 18 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

For the period October 1, 2016 through September 30, 2017, the most recent period for which all needed data are available, 57.5% of individuals exited from Vocational Rehabilitation services were employed during the second quarter following exit. Staff are working toward more effective career counseling and guidance to ensure employment longevity for our clients.

The program is working to emphasize non-technical employment skills (soft skills) to improve employability and retention in employment.



Factors Affecting Results

This result is impacted by the sophistication of the individual's skills in seeking and maintaining employment is a major factor in this measure. The economic realities of the geographic areas in which they live and the available workforce supports also impact this measure.

We have not yet set annual targets for this measure. We would prefer to wait with this until the federal Rehabilitation Services Administration has set goals for Oregon. This will occur in the federal program year 2020-2023 State Plan approval process.

KPM #19	OVRS CONSUMERS EMPLOYED IN FOURTH QUARTER FOLLOWING PROGRAM EXIT - The percentage of OVRS clients closed from plan who are employed during fourth quarter following program exit
	Data Collection Period: Oct 01 - Sep 30

** Upward Trend = positive result*

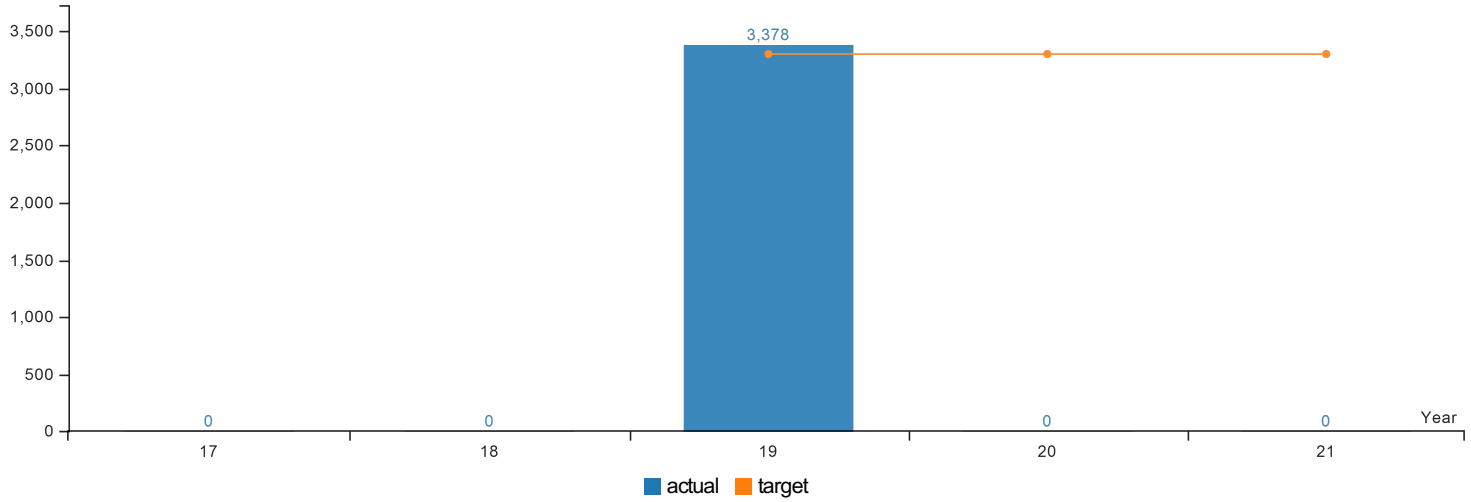
Report Year	2017	2018	2019	2020	2021
EMPLOYMENT IN FOURTH QUARTER					
Actual	No Data	No Data	54.30%	No Data	No Data
Target	TBD	TBD	52%	52%	52%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 3 to 19 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

For the period October 1, 2016 through September 30, 2017, the most recent period for which all needed data are available, 57.5% of individuals exited from Vocational Rehabilitation services were employed during the second quarter following exit. Staff are working toward more effective career counseling and guidance to ensure employment longevity for our clients.

The program is working to emphasize non-technical employment skills (soft skills) to improve employability and retention in employment.



Factors Affecting Results

This result is impacted by the sophistication of the individual's skills in seeking and maintaining employment is a major factor in this measure. The economic realities of the geographic areas in which they live and the available workforce supports also impact this measure.

We have not yet set annual targets for this measure. We would prefer to wait with this until the federal Rehabilitation Services Administration has set goals for Oregon. This will occur in the federal program year 2020-2023 State Plan approval process.

KPM #20	OVRS MEDIAN QUARTERLY WAGE AT SECOND QUARTER FOLLOWING PROGRAM EXIT - Median quarterly wage at second quarter following OVRS program exit
	Data Collection Period: Oct 01 - Sep 30

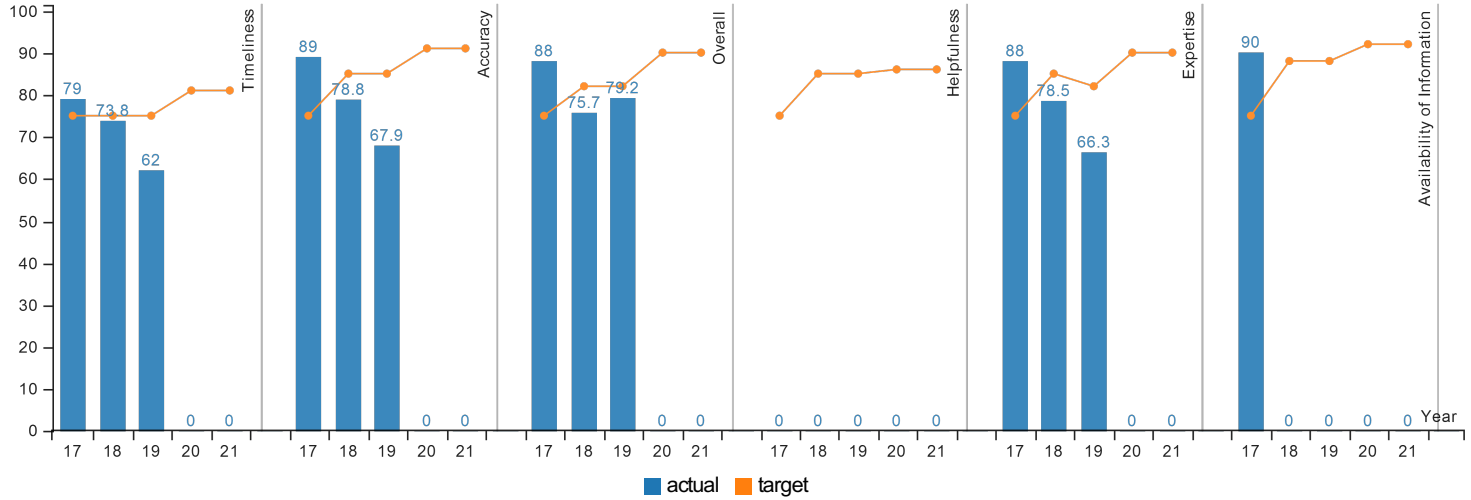
** Upward Trend = positive result*

Report Year	2017	2018	2019	2020	2021
MEDIAN QUARTERLY WAGE					
Actual	No Data	No Data	$3,378.00	No Data	No Data
Target	TBD	TBD	$3,300.00	$3,300.00	$3,300.00

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 4 to 20 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

We are working to increase both the hourly wage and the total hours worked per quarter for clients. By delivering both technical skills for employment and soft skills for maintaining and advancing in employment.



Factors Affecting Results

This is influenced by career counseling to individual job seekers to move them toward career choices that can improve income potential by increasing job skills. As a result of efforts to meet the requirements of the Lane v Brown settlement, the program is currently placing many clients with intellectually/developmentally disabled for the most part at minimum wage. This large number of minimum wage employees has depressed this number.

Staff are working to meet the needs of employers in sectors offering higher salaries. Additionally, this is impacted by both hourly wage and total hours worked.

We have not yet set annual targets for this measure. We would prefer to wait with this until the federal Rehabilitation Services Administration has set goals for Oregon. This will occur in the federal program year 2020-2023 State Plan approval process.

KPM #21	DHS CUSTOMER SATISFACTION - The percentage of customers rating their satisfaction with DHS above average, or excellent
	Data Collection Period: Jan 01 - Jan 31

Report Year	2017	2018	2019	2020	2021

Availability of Information					
Actual	90%	No Data	No Data	No Data	No Data
Target	75%	88%	88%	92%	92%

How Are We Doing

Since the 2019 legislative session, this KPM was administratively renumbered from 17 to 21 to support grouping KPMs by program area. In addition, the KPM title was also modified to improve clarity and consistency.

For 2019, we saw a decline in satisfaction with timeliness, accuracy and expertise, and an increase in overall satisfaction. Overall satisfaction results were used from the CAPI survey which is sent to individuals who have applied online for benefits. Of the 12,563 respondents, 9,961 indicated excellent or good overall satisfaction. These results were combined with our usual customer satisfaction survey that was sent to a group of Vocational Rehabilitation (VR) clients. Since VR is such a small program, we wanted to be sure we had better representation from this group. The overall response rate was still small - 82 respondents. These are the numbers used to report on timeliness, accuracy and expertise.

Factors Affecting Results

Aside from the increase in overall satisfaction, it's discouraging to see a drop in the other categories. Over the past two years, the five Programs of DHS have done a significant amount of work to advance their management systems which provides clarity around the core routine work, who our primary customers are, what they need from us, and how we successfully meet those needs. If we do the routine work well it allows us to spend more time on things that deliver new value to our customers, resulting in an improvement in satisfaction levels as well as client outcomes. This will continue to be a valuable tool to inform our actions as an agency. Over the next year, work will be happening at the DHS level, including shared and central services, to advance the agency management system.
