## DON'T FAIL TO FOLLOW DIRECTIONS

### DIRECTIONS FOR OPERATING
### THE SAFETY F. O. TYPEWRITER RECORD
(FLEXIBLE POSTS)

Patented May 1, 1900; June 4, 1907; Aug. 16, 1910; March 5, 1912; March 25, 1913

THIS PATENT STAMP MUST NOT BE COVERED

**TO UNLOCK** the book, raise cover to be unlocked to a vertical position. Insert the key at lower end of cover and push it in as far as it will go; this disconnects the lock levers and ejects the locking bar at the upper end—grasp bar and withdraw it; the cover is now unlocked and can be lifted off the posts. It is absolutely necessary to raise the cover, which is to be unlocked, to a vertical position to release the tension of the posts which would otherwise cause the rod to bind.

**TO LOCK**—Adjust the cover back into position so the notches in the cover fit over the posts, then insert rod at upper end. The key is not required in locking the Record.

**WRITING UP**—Remove rod in front of book, take out the sheets to be typewritten and return rod to former position; place written sheets in back of book in consecutive order.

Do not attempt to unlock either cover unless opposite cover is locked, as posts should always be held in one of the covers.

**TO LOCK BOOK PERMANENTLY**—This is only to be done when all the sheets are written up and placed in the binder, for once permanently locked, it is absolutely impossible to unlock or open it.

For this purpose a set of permanent locking rods are furnished with each binder. They are distinguished from the regular or temporary rods by a groove cut the entire circumference of the rod.

Insert these permanent locking rods in the same manner as the regular or temporary rods. Push them in entirely, and the lock in the mechanism will click into place. The locking mechanism concealed in the metal fixture engages the notch in the rods, and absolutely prevents the removal of the latter. Consequently, when these rods are once inserted, the binder is securely and permanently sealed.

He deposes that that during April, 1924, and again the latter part of July, 1924, he in company with Henry M. Parks, Geologist and Mining Engineer, and his assistants, made a survey of the above listed claims and that under direction of Mr. Parks elevations were taken for the purpose of preparing a contour map.

That Mr. Parks took several hundred samples from the various claims, as more particularly stated in his report on the properties as follows:

> "As a part of this report will be found a topographic and geologic map of this south slope of Lime mountain drawn on a scale of 1" -200 feet and having a contour interval of 50 feet. A study of this map together with the sections on Line C-C and D-D shows the relationship of the limestone to the igneous rocks of this area." etc.etc.

"Fifteen samples of limestone and two of volcanic tuffs, varying in length from 50 to 120 feet, were taken on the hill as shown on the map, the chemical analyses of which are given below:"

"Analyses of Limestone and other rock materials of Lime Mountain."

(Follow Analyses)

----------. "More detailed sampling should be done on the east end of Lime mountain on account of this area being so available to the factory site."

The report continues:

"Sampling and Analysis of Limestone on Langley Hill."

"On my first visit to the property of the Columbia Cement Company the latter part of April eight general samples of the limestone on Langley hill were taken, the location of which is shown on the topographic map. These samples are designated L 1 to L 8 inclusive and vary in length as taken across the limestone beds from 60 to 125 feet. The chemical analyses of these samples are as follows:"

(Follow Analyses)

"The analyses of L1, L2, L3 and L4 indicate that the limestone at the north end of Langley hill is high in Magnesia, according to present practice, hence it was thought advisable to sample Langley hill more in detail in order to more accurately delimit any areas which would be unsuitable on account of high magnesia content."

Late in July therefore, the property was resampled the samples being taken in a series of lines across the beds 100 feet apart, the series being marked R - 1 to R-15 inclusive, while the individual samples in each 100 ft. line were designated a b c etc. consecutively. 188 samples were taken on Langley hill and their respective locations noted on the map. The samples were shipped by express to Smith, Emery & Company of San Francisco on August 1st, for anaylsis. The results were received on September 15th. The tabulated results of the analyses of these limestone samples will be found as a part of this report".

J. L. Jennings hereby deposes that he received the report made by Mr. H. M. Parks including contour maps and assaying reports made by Smith-Emery & Company of San Francisco, and further that H. M. Parks valued his services and charged the Columbia Cement Company the sum of $3473.52 and that Smith-Emery & Company of San Francisco rendered a bill for assaying the samples taken from the Columbia Cement Company property above described in the amount of $1958.05.

As the Columbia Cement Company owns 16 unpatented claims, above listed, which are contiguous and adjoining to each other, the labor spent on any of these claims was for the benefit of all, and the amount of labor spent was in excess of what is required by law to be done annually for assessment work.

IN WITNESS WHEREOF, I have hereto set my hand and seal this 15th day of June, 1925.

J. L. JENNINGS.

Subscribed and sworn to before me this 15th day of June, 1925.

No. 2 Morrow Limestone Placer Mining Claim, embracing the SW¼ of Sec. 3, T. 14, S. of R. 44 E. of W. M.

No. 3 Morrow Limestone Placer Mining Claim, embracing the NW¼ of Sec. 34, T. 13, S. of R. 44 E. of W. M.

That all of the assessment work intended to be covered by this affidavit was begun on or about the 8th day of June, 1927, and was ended on or before the 30th day of June, 1927, and was intended as and for the annual assessment work required by law to be done on said

claims as a group, for the year 1926, which must be completed on or before the 30th day of June, 1927.

That said work consisted of prospect excavations on several of the above mentioned claims, besides repairing and cleaning out approximately one mile of pipe-line ditch through adobe and rock from what is known as the plant-site springs located on claims in said group to the plant-site, which is located on the easterly side of said group of claims, which claims are contiguous to each other, forming a group contiguous to and adjoining said plant-site;

Said work and labor also consisted of road work from the plant-site to the highway, and repairing road to the plant-site springs;also repairing and making passable the trail to the top of the quarry face, and cleaning out plant-site springs and bringing them together, bringing the flow of water up to approximately 208 gallons per hour.

That the total value of said work and labor thus performed and bestowed upon said group of claims was not less than $1,000, and is worth $1,000.

That said work was done for and on behalf of Columbia Cement Company, owner of said claims and said group, and same was paid for by said Columbia Cement Company,

That said labor and assessment work above referred to was for the benefit of all of the above listed claims, which are contiguous to each other, and to improve each and all of said claims and to increase the value thereof, irrespective of whether or not said work was actually done upon a particular claim, and all of said claims were and are, as a group benefited by said labor and assessment work.

That prior to the doing of said assessment work said owner expended in excess of $24,148 in improvements upon the plant-site above referred to, which improvements and the cost thereof was for the benefit of said claims, and the above mentioned group, and to benefit said claims as a group, and said improvements on said plant-site, and the labor and assessment work expended on said claims and group during the month of June, 1927, were all paid for by said Columbia Cement Company, the owner of said group and saidplant-site all of which was done for the purpose of holding said claims and said group.
