HOLD COVER IN THIS POSITION
TO UNLOCK AND LOCK

OPENING THRU
CASE AND
LOCK BAR TO
RECEIVE
PERMANENT
SEALING STUD

THIS PATENT STAMP MUST NOT BE COVERED

DON'T FAIL TO FOLLOW THESE DIRECTIONS FOR OPERATING

TO UNLOCK the book, raise cover to be unlocked to a vertical position, and pull rod out as far as it will come.

TO LOCK—Close the cover and push in locking rod.

Do not attempt to unlock either cover unless opposite cover is locked, as posts should always be held in one of the covers.

TO LOCK BOOK PERMANENTLY—This is only to be done when all the sheets are written up and placed in the binder, for once permanently locked, it is impossible to unlock or open it.

For this purpose two permanent locking buttons are furnished. Insert these sealing buttons into the round holes near end of locking case and drive in button with sufficient force to turn the ends of split button. This permanently locks and seals the book.

If desired, the end of locking lever can be broken off where scored with a pair of plyers.

MADE IN U. S. A.

PROOF OF LABOR FOR FISCAL YEAR 1961-62
 (Frank Butchart on Butchart Group Nos 1 to 7 inclusive,
 Nettie and Shale Rock Placer Claims)

STATE OF CALIFORNIA,)
 County of Los Angeles.) ss.

I, FRANK BUTCHART, being first duly sworn on oath
 depose and say:

That I am one of the co-owners of the mining claims
 hereinafter mentioned and have personal knowledge of the facts
 herein set forth. That the claims for which this proof of labor
 is filed, and upon or for the benefit of which the labor and
 improvements hereinafter mentioned were performed and made during
 the fiscal year beginning at 12:00 o'clock Meridian September 1,
 1961, and ending at 12:00 o'clock Meridian September 1, 1962, are
 that certain group of placer mining claims containing limestone
 and other minerals commonly known as the Connor Creek Group, and
 are situated along or in the vicinity of Connor Creek, a tributary
 of the Snake River, in Sections 27, 28, 33 and 34, Township 11
 South, Range 45, E.W.M., and in Section 14, Township 12 South,
 Range 45, E.W.M., near Home, in Baker County, State of Oregon.
 That the names of said claims and the volumes and pages of the
 Records of Placer Locations of Baker County, Oregon, where the
 respective location notices, or amended location notices thereof
 are recorded, are as follows:

NAME OF CLAIM	BOOK	PAGE
Butchart Group #1 Placer Mining Claim	P	104

Shale Rock Placer Mining Claim, Orig. Location	P	289
Amended Location	Q	955
Second Amended Location (reducing area and changing name to Butchart's Shale Rock Balance)	R	248-9

That reference is made to the proof of labor for the fiscal year 1953-4 appearing of record in Volume Q at pages 334 to 336 inclusive of said Records of Placer Locations for details regarding the location and contiguity of said claims and the program for the common development thereof. That as appears therefrom, all of said claims are contiguous and held as part of one project, excepting only the Shale Rock Placer, which is held as a plant site and is an essential part of the group, and the labor and improvements performed thereon during the current fiscal year and hereinafter mentioned have tended to and did develop all of the claims in such group as above described.

That reference is also made to the proof of labor for the fiscal year 1957-8 appearing of record in Book R at pages 195-7 of said records for details regarding the roads serving said property and its importance to the development and operation of the group.

That during the month of August 1962, work was commenced upon the property by R. P. Wavrick and was in progress thereon on August 31st and continued into September to apply upon the assessment work requirement for such fiscal year. Mr. Wavrick continued work until September 11th when my brother, GEORGE M. Butchart, and myself arrived on the ground from California and took over the completion of the work. We paid Mr. Wavrick a total of \$105 for the work which he had done up to that time, which was principally upon the roads, until a total of 92 hours had been put in by each of us, or 184 hours all told. That for the reasons set forth in the affidavit of Harold Banta for the fiscal year 1959-60, recorded in Book R, page 753-5, and my own supplemental affidavit for the same year, recorded in Book R at page 1030, we charged \$4 per hour each for this work. This is reasonably under the circumstances in view particularly of the fact that we boarded and maintained ourselves on the property, and no travel time was charged. This makes a total of \$736 for our work, which was com-

pleted by about September 23rd. This work was done upon the main group of claims exclusive of the Shale Rock Placer, which is separate from the remainder and my remaining balance of which is held as a plant site. As a result the roads on the property are now in better condition than I have ever seen them. On the Shale Rock Placer (now Butchart's Shale Rock Balance), the Pedro brothers during the summer, and prior to September 1st, performed \$102.69 worth of work with a bulldozer leveling the ground for prospective building and improving the road. This was the actual amount paid them, and that work also tended to and did improve the property to at least that amount. This makes a total of \$943.69 performed upon or for the benefit of such claims and applicable to such fiscal year, which is considerably more than the minimum of \$100 worth for each of the nine claims in the group. Except for the personal work of my brother and myself, the other amounts claimed were actually paid for in cash.

George M. Butchart

PROOF OF LABOR FOR FISCAL YEAR 1962-63

(Frank Butchart on Butchart Group Nos. 1 to 7 inclusive
Nettie and Shale Rock Placer Claims)

STATE OF CALIFORNIA,)

ss.

County of Los Angeles.)

I, FRANK BUTCHART, being first duly sworn on oath
depose and say:

That I am one of the co-owners of the mining claims
hereinafter mentioned and have personal knowledge of the facts
herein set forth. That the claims for which this proof of labor
is filed, and upon or for the benefit of which the labor and
improvements hereinafter mentioned were performed and made during
the fiscal year beginning at 12:00 o'clock Meridian September 1,
1962, and ending at 12:00 o'clock Meridian September 1, 1963, are
that certain group of placer mining claims containing limestone
and other minerals commonly known as the Connor Creek Group, and
are situated along or in the vicinity of Connor Creek, a tributary
of the Snake River, in Sections 27, 28, 33 and 34, Township 11
South, Range 45, E.W.M., and in Section 14, Township 12 South,
Range 45, E.W.M., near Home, in Baker County, State of Oregon.
That the names of said claims and the volumes and pages of the
Records of Placer Locations of Baker County, Oregon, where the
respective location notices, or amended location notices thereof
are recorded, are as follows:

NAME OF CLAIM	BOOK	PAGE
Butchart Group #1 Placer Mining Claim	P	104

Page 1.

That reference is made to the proof of labor for the fiscal year 1953-4 appearing of record in Volume Q at pages 334 to 336 inclusive of said Records of Placer Locations for details regarding the location and contiguity of said claims and the program for the common development thereof. That as appears therefrom, all of said claims are contiguous and held as part of one project, excepting only the Shale Rock Placer, which is held as a plant site and is an essential part of the group, and the labor and improvements performed thereon during the current fiscal year and hereinafter mentioned have tended to and did develop all of the claims in such group as above described.

That reference is also made to the proof of labor for the fiscal year 1957-8 appearing of record in Book R at pages 195-7 of said records for details regarding the roads serving said property and its importance to the development and operation of the group.

That during the spring of 1963 and continuing up to June 28, 1963, work was performed upon such property to apply upon the assessment work requirement for such fiscal year. Mr. John T. Coates performed eighty hours of labor at the rate of \$1.50 per hour on the Shale Rock claim. Further, my wife, Laura V. Butchart, and I/put in a total of 115 hours on the roads and 14½ hours on the Shale Rock Placer. Our work was started on June 12th and continued to June 28th. For the reasons shown in prior proofs of labor, we charged \$4.00 per hour for our time. In addition we paid Pedro Brothers \$20 for work with their cat on the roads and R. P. Wavrick \$40 in cash for his labor thereon. The work performed during such fiscal year is accordingly itemized as follows:

Butcharts' work--	
On roads 115 hours at \$4 per hour each---	920.00
On Shalerock, 14½ hours each at \$4 p/hr.--	116.00
Coates' work on Shalerock -----	120.00
Pedro/ work on roads -----	20.00
R. P. Wavrick work on roads -----	40.00
TOTAL	1,216.00

The said labor and services so performed were reasonably worth at least such amounts and have actually tended to and did improve and develop the claims to at least such sum. Aside from the work performed by my wife and myself, the amounts above indicated were actually paid in cash, or in case of Coates, as a credit on grazing rental.

Before the subscriber personally appeared Lloyd E. Dinger, mine operator for Robert O'Farrell and W. F. Schroeder and Robt. D. Lytle, who being first duly sworn, says that at least \$1,000.00 worth of labor or improvements were performed or made upon the LITTLE BOY GROUP mining claims 1 - 11, both inclusive, as particularly described in judgement and decree of the Circuit Court for Baker County, Oregon, judgment docket H on pages 5 and 69 placer claims Q on pages 998 and 999, being situated in Section 16, 21, 22 and 23, Township 10 South, Range 35 EWM, Baker County, State of Oregon, during the year ending September 1, 1963, consisting of the following work performed by Lloyd E. Dinger, Frank Lyon, Lillian Lyon and Melva L. Dinger, being the removal of at least 200 yards of gravel. That said work and labor involved the use of power tools and fuel, hydraulic equipment, general mining equipment, and installation of works prior to and continuously since September 1, 1962; that all such work and materials developed the mineral deposits upon and within said property generally including, but not limited to, shafts, drifts, test pits, drill holes, other forms of exploratory excavation and actual mining. Each and every of said claims receive the benefit of equal operation, as against each other, except where claims were contiguous (as against cornering) in which event, the total operation performed upon such claims as a whole, were performed upon one or more of such contiguous claims.

Such expenditures were made by or at the expense of the affiant, as mine operator for Robert O'Farrell, W. F. Schroeder and Robt. D. Lytle upon said claim for the purpose of holding such claim.

That I am one of the original locators and am now one of the co-owners of the mining claims hereinafter mentioned, and have personal knowledge of all of the facts herein set forth. That the claims for which this proof of labor is filed, and upon or for the benefit of which the labor and improvements hereinafter mentioned were performed and made during the fiscal year beginning at 12:00 o'clock Meridian, September 1, 1962, and ending at 12:00 o'clock Meridian, September 1, 1963, are situated in part along or in the vicinity of Marble Creek, and then extend over the divide onto the head of Baboon Creek, all in no organized mining district in Baker County, State of Oregon, the names of said claims and the volumes and pages of the Records of Placer Locations of Baker County, Oregon, where the respective location notices and amended location notices, if any, thereof are recorded, being as follows:

(Inadvertently designated in location notice as Lime Mountain No. 4, but name is about to be corrected by amendment)

The above claims were originally located as two groups-- one on the Marble Creek side and the other on the Baboon Creek side. They have now, however, been connected through the two

Page 1.

later locations, the Lime Mountain Nos. 4 and 5, into one continuous body, and it has been determined that a continuous deposit or body of limestone extends through and beneath the entire area. All claims are now also connected by a common road which extends up Marble Creek, then over the divide down onto the Baboon Creek area. These claims are all now being developed as one unit, and as part of one large-scale limestone mining and processing operation, with the quarry now being located on Marble Creek, and the current quarrying and removal of limestone in progress there, but with the other area being developed for future operations, all at the same treatment plant which is located at the railroad siding near Wingville. During the fiscal year 1962-63, approximately \$33,500 was spent in mining and quarrying of limestone on the Marble Creek side, and in diamond drilling and development there. The actual mining and quarrying of limestone was done by Bert Farrar and a crew of nine, using cats, drills, scoops, crushers and the like. About \$25,000 was expended in this part of the work. In addition, Fred Cox with a cat and Walter Buchanan with the drills performed about \$8,500 worth in the development. On the Lime Mountain claims connecting up and extending over into the Baboon Creek side, at least \$22,500 worth of development was completed. This was done by Clyde Golar and crew, Fred Cox, Walter Buchanan and Willie Spriet, with Les Richards doing the mapping and geology, and Bert Farrar assisting in the work. This is general testing and development. In addition, Boyles Bros. and a crew of four did 2,000 feet of diamond drilling at a cost of about \$10,000, which is still in progress. This was under the direction and with the assistance of William Johnson, geologist. The amounts expended include the labor for the men and the rental value of Chemical Lime Co. equipment used in the operation, plus the amounts paid the contract driller. All expenditures ^{were} made by Chemical Lime Co. The work was prosecuted as in previous years continuously except where winter weather rendered portions of the property inaccessible,

That I am one of the co-locators of the mining claims
hereinafter mentioned and have personal knowledge of all the facts
herein set forth. That the claims for which this proof of labor
is filed and upon and for the benefit of which the labor and
improvements hereinafter mentioned were performed and made during
the fiscal year beginning at 12:00 o'clock Meridian, September 1,
1962, and ending at 12:00 o'clock Meridian, September 1, 1963, are
situated on Virtue Flat in Baker County, Oregon, the names of said
claims and the volume and pages of the Records of Placer Locations
of Baker County, Oregon, where the respective location notices
thereof are recorded, being as follows:

That reference is made to prior proofs of labor, particu-
larly the proof of labor for fiscal year 1953-54, appearing of
record in Book Q at pages 337-8, Records of Placer Locations of
Baker County, Oregon, for details regarding the contiguity of said
claims and the fact that one continuous deposit of placer gravel
extends throughout all thereof.

That during the current fiscal year, Joe J. Davis, who
has worked on these claims for a number of years, as appears from
prior proofs of labor, was employed upon the same basis as before,
at the rate of \$100 per month. That in addition, during the spring

channel of the placer gravel underlying the same, and the ownership and method of working. That during the fiscal year 1962-63, work was continued upon the property in accordance with the original development program upon a more extensive scale than even the preceding year. During the fall of the year, and from September 1st up to the time winter conditions required them to be suspended, the crew mentioned in the 1961-62 proof of labor continued with the development work thereon. The washing plant was completed, and Hobson Brothers and the crew engaged in stripping off overburden with cats and carryall. Approximately \$8,500 was expended in that connection, and in addition thereto work was done on the ditches by William Hays, Fred Cox and others in the amount of approximately \$2,250, or a total during the fall of 1962 of \$10,750. During the spring of 1963 work was resumed as soon as weather conditions permitted. The crew during 1963 consisted of William Spriet, William Hays, A. W. Tolsma, Fred Cox, Lee Gyllenberg, Mr. and Mrs. Virgil Toney, William Parker and A. W. Woodwell. Actual mining operations, piping and sluicing were conducted upon a substantial scale, and drilling and prospecting work was undertaken. The work was done with cats, drills, ^{and} giants, and the ditches and water systems were utilized in connection therewith. Approximately \$22,500 was expended on the work. The actual placer operation continued throughout the water season, and the other general work of prospecting and development work thereafter and is still in progress. In addition thereto, Hobson Brothers did development work on their own upon the Black Beauty Extension in connection with their mining lease thereon, but I have not attempted to estimate the amount or value thereof. The same situation exists regarding the status of the said claims as is shown in prior proofs of labor. These claims are held and maintained as valid, and are being worked upon a substantial scale.

That within 60 days of and after the date of my locating and posting
of the Notice of Location on said Claim and land, I did excavate, and cause to
be excavated, to wit, on September 3, 1963, an open cut upon the said claim
removing from the said cut not less than five cubic ~~feet~~ yards of material
therefrom thereby exposing a part of the placer deposit described by the said
Notice

That on September 3, 1963, and immediately prior thereto, I did inspect,
and caused the said claim to be inspected, and I found no evidence of any
assessment work having been performed on the said claim during the 12 months
immediately prior thereto, and I say that no assessment work was done on said
Claim during such period.

That the said Claim was not occupied by the previous Locator, Brooks
Hawley, or by any other person or persons at all, and the said Claim
appeared to have been abandoned as of and prior to September 3, 1963.

AND I make this Affidavit in full compliance with ORS 517.060 as

Chapter 525 of Oregon Laws 1961 relating to the perfection of placer mining claims upon the public domain of the United States:

Section 1. As used in this Act, unless the context requires otherwise, "legal subdivision" means a subdivision of a state survey or of a United States survey which has been extended over the geographic area to be described.

Section 2. Any individual, a citizen of the United States, or one who has declared his intention to become such, who discovers a placer deposit of minerals upon the unappropriated public domain of the United States within this state, which minerals are subject to location under the mineral and mining laws of the United States, may locate a placer claim thereon by posting in a conspicuous place thereon a notice of such discovery and location. The notice shall contain:

(1) The name of the claim.
 (2) The name of the individual or individuals locating the claim.
 (3) The date of the location of the claim.
 (4) The number of feet or acres claimed, together with a description, either by legal subdivisions, if practicable, or if not, then by reference to some natural object or permanent monument in the vicinity of the claim, which will identify the claim located.

Section 3. (1) Unless the claim for placer deposit referred to in section 2 of this Act is located by legal subdivisions, the surface boundaries of the claim must be marked so that the same may be readily traced. Such boundaries shall be marked within 30 days after the posting of the notice described in section 2 of this Act by substantial posts or other monuments of the same size, materials and dimensions as in the case of quartz claims. The boundaries of the claim shall be marked at each corner or angle, and, when any side or end of the claim extends for more than 1,320 feet without a corner or angle, then at intervals of not less than 1,320 feet along such side or end.

(2) Where the claim for placer deposit referred to in section 2 of this Act is taken by legal subdivisions, no other reference in the notice of claim required to be posted and filed under the provisions of this Act than to the legal subdivisions shall be required and the boundaries of a claim so located and described need not be staked or monumented. The description by legal subdivisions in the notice required to be filed under section 5 of this Act shall be deemed the equivalent of marking the surface boundaries of the claim.

Section 3 of said Chapter 525 provides that the boundaries of a placer claim shall be marked "as in the case of quartz claims." The method of marking quartz claims is set forth in Oregon Revised Statutes Section 517.010(2) as follows:

"Such boundaries shall be marked within 30 days after posting of such notice by six substantial posts, projecting not less than three feet above the surface of the ground, and not less than four

Section 4. Within 60 days after the date of the posting of the notice of location described in section 2 of this Act, the individual locating the claim shall cause to be excavated an open cut upon the claim, removing from the cut not less than five cubic yards of material, and, if practicable, exposing thereby the placer deposit described by such notice. The individual locating the claim, the individual making the cut or any person who worked upon the excavation who has knowledge of the facts relating thereto, shall make and attach to the copy of the notice required to be filed under section 5 of this Act an affidavit showing compliance with the provisions of this section.

Section 5. The individual locating a placer deposit shall, within 60 days from the posting of the location notice upon the claim, file for record with the recorder of conveyances, if there is one, otherwise with the clerk of the county where the claim is situated, a copy of the notice posted by him upon the claim, together with the affidavit of excavation described in section 4 of this Act. The fee for filing such location notice shall be the same as required by ORS 517.030 for recording location notices of mineral-bearing rock claims. The recorder or clerk, as the case may be, shall immediately record the location notice and affidavit annexed thereto in a book kept by him for that purpose. No placer location notice shall be entitled to record or be recorded until the work required by section 4 of this Act has been done and the affidavit in proof thereof is attached to the notice to be recorded.

Section 6. Except as provided in ORS 517.060, all locations or attempted locations of placer mining claims made after the effective date of this Act that do not comply with the provisions of sections 1 to 5 of this Act are void.

Section 7. If at any time an individual who has located a mining claim within the meaning of ORS 517.010 or section 2 of this 1961 Act, or his assigns, apprehends that the original notice of location of the mining claim was defective, erroneous, or that the requirements of the law had not been complied with before the filing of the notice, such locator or assigns may post and file for record in the manner now provided by law, an amended notice of the location which shall relate back to the date of the original location; provided, that the posting and filing of the amended notice of location shall not interfere with the existing rights of others at the time of posting the amended notice.

inches square or in diameter, or by substantial mounds of stone, or earth and stone, at least two feet in height, to-wit: one such post or mound of rock at each corner and at the center ends of such claims."

Chapter 523 of Oregon Laws 1961 relating to the perfection of placer mining claims upon the public domain of the United States:

Section 1. As used in this Act, unless the context requires otherwise, "legal subdivision" means a subdivision of a state survey or of a United States survey which has been extended over the geographic area to be described.

Section 2. Any individual, a citizen of the United States, or one who has declared his intention to become such, who discovers a placer deposit of minerals upon the unappropriated public domain of the United States within this state, which minerals are subject to location under the mineral and mining laws of the United States, may locate a placer claim thereon by posting in a conspicuous place thereon a notice of such discovery and location. The notice shall contain:

- (1) The name of the claim.
- (2) The name of the individual or individuals locating the claim.
- (3) The date of the location of the claim.
- (4) The number of feet or acres claimed, together with a description, either by legal subdivisions, if practicable, or if not, then by reference to some natural object or permanent monument in the vicinity of the claim, which will identify the claim located.

Section 3. (1) Unless the claim for placer deposit referred to in section 2 of this Act is located by legal subdivisions, the surface boundaries of the claim must be marked so that the same may be readily traced. Such boundaries shall be marked within 30 days after the posting of the notice described in section 2 of this Act by substantial posts or other monuments of the same size, materials and dimensions as in the case of quartz claims. The boundaries of the claim shall be marked at each corner or angle, and, when any side or end of the claim extends for more than 1,320 feet without a corner or angle, then at intervals of not less than 1,320 feet along such side or end.

(2) Where the claim for placer deposit referred to in section 2 of this Act is taken by legal subdivisions, no other reference in the notice of claim required to be posted and filed under the provisions of this Act than to the legal subdivisions shall be required and the boundaries of a claim so located and described need not be staked or monumented. The description by legal subdivisions in the notice required to be filed under section 5 of this Act shall be deemed the equivalent of marking the surface boundaries of the claim.

Section 3 of said Chapter 523 provides that the boundaries of a placer claim shall be marked "as in the case of quartz claims." The method of marking quartz claims is set forth in Oregon Revised Statutes Section 517.910(2) as follows:

"Such boundaries shall be marked within 30 days after posting of such notice by six substantial posts, projecting not less than three feet above the surface of the ground, and not less than four

Section 4. Within 60 days after the date of the posting of the notice of location described in section 2 of this Act, the individual locating the claim shall cause to be excavated an open cut upon the claim, removing from the cut not less than five cubic yards of material, and, if practicable, exposing thereby the placer deposit described by such notice. The individual locating the claim, the individual making the cut or any person who worked upon the excavation who has knowledge of the facts relating thereto, shall make and attach to the copy of the notice required to be filed under section 5 of this Act an affidavit showing compliance with the provisions of this section.

Section 5. The individual locating a placer deposit shall, within 60 days from the posting of the location notice upon the claim, file for record with the recorder of conveyances, if there is one, otherwise with the clerk of the county where the claim is situated, a copy of the notice posted by him upon the claim, together with the affidavit of excavation described in section 4 of this Act. The fee for filing such location notice shall be the same as required by ORS 517.090 for recording location notices of mineral-bearing rock claims. The recorder or clerk, as the case may be, shall immediately record the location notice and affidavit annexed thereto in a book kept by him for that purpose. No placer location notice shall be entitled to record or be recorded until the work required by section 4 of this Act has been done and the affidavit in proof thereof is attached to the notice to be recorded.

Section 6. Except as provided in ORS 517.090, all locations or attempted locations of placer mining claims made after the effective date of this Act that do not comply with the provisions of sections 1 to 5 of this Act are void.

Section 7. If at any time an individual who has located a mining claim within the meaning of ORS 517.090 or section 2 of this 1961 Act, or his assigns, apprehends that the original notice of location of the mining claim was defective, erroneous, or that the requirements of the law had not been complied with before the filing of the notice, such locator or assigns may post and file for record in the manner now provided by law, an amended notice of the location which shall relate back to the date of the original location; provided, that the posting and filing of the amended notice of location shall not interfere with the existing rights of others at the time of posting the amended notice.

Inches square or in diameter, or by substantial mounds of stone, or earth and stone, at least two feet in height, to-wit: one such post or mound of rock at each corner and at the center ends of such claims."

I, ANTHONY BRANDENTHALER, being first duly sworn on oath
depose and say:

That I am one of the original locators and am now one
of the co-owners of the mining claims hereinafter mentioned, and
have personal knowledge of all of the facts herein set forth.
That the claims for which this proof of labor is filed, and upon
or for the benefit of which the labor and improvements hereinafter
mentioned were performed and made during the fiscal year beginning
at 12:00 o'clock Meridian, September 1, 1963, and ending at 12:00
o'clock Meridian, September 1, 1964, are situated in part along or
in the vicinity of Marble Creek, and then extend over the divide
onto the head of Baboon Creek, all in no organized mining district
in Baker County, State of Oregon, the names of said claims and the
volumes and pages of the Records of Placer Locations of Baker
County, Oregon, where the respective location notices and amended
location notices, if any, thereof are recorded, being as follows:

ing the present contiguity of the group, their connection by a
common road, and their development as part of one large-scale
limestone mining and processing operation.

During the fiscal year 1963-64, approximately \$101,000
was spent upon the property for road construction and maintenance,
prospecting and development of the limestone deposits, and the
actually quarrying, mining and removal of lime rock, and in the
installation of a power line to serve the project. The work was
done under the direction of Bert Farrar and a crew of eighteen
men, with appropriate equipment, including caterpillar tractors,
drills, trucks and the like. The work was done in connection
with the development and operating program of Chemical Lime Co.,
which is a co-partnership consisting of myself and Thomas W. Dant.
The expenditures included wages for the men, rental value of
equipment and the cost of materials and supplies used in the
prosecution of the work. Except for rental value of equipment,
the amounts expended were paid in cash by Chemical Lime Co.
As in prior instances, the work was prosecuted continuously
throughout the fiscal year, except where winter weather rendered
portions of the property inaccessible, and is still in progress.

of the same group. That the Winterville Placer Mine as now held
comprises, in addition to the said quartz locations, thirty placer
mining locations of long standing, plus four additional recent
locations later made and added to the group, or thirty-four claims
in all, in addition to these lode locations. That as will appear
from the separate proof of labor heretofore executed and filed
covering the Carranza, et al, placer mining claims, comprising
the said Winterville Placer Mine and included in said group,
approximately the sum of \$34,500 worth of labor, improvements and
development work has been performed upon or for the benefit of
said mining claims during the fiscal year from September 1, 1963,
to September 1, 1964. A considerable portion of this work,
amounting in fact to several thousand dollars worth, was of direct
benefit to the quartz claims included herein, which are, as stated,
adjacent to or in some cases actually overlap the placers.

Reference is made to prior proofs of labor regarding the
status of the said quartz locations. That the said quartz claims
so referred to and covered by this supplemental proof of labor,
and the volumes and pages of the Records of Quartz Locations of
Baker County, Oregon, where the respective locations notices
thereof are recorded, are as follows:

As stated in the proof of labor upon the placer claims
in the said Winterville Group, the work in question was done with
a D-8 cat, compressor and other appropriate equipment, was, except
for the rental value of the equipment, paid for in cash by myself
and associates, and amounted to a great deal more than the minimum
of \$100 worth per claim as required by federal law to hold the
said lode locations.

That reference is made to the proof of labor filed by me
upon said claims for the fiscal year 1954-5 and appearing of
record in Volume Q at pages 615 to 618 inclusive of the Records of
Placer Locations of Baker County, and to the proofs of labor filed
for previous years for details regarding the physical situation
of said claims, and the continuity of the pay streak, or ancient

channel of the placer gravel underlying the same, and the ownership and method of working. That during the fiscal year 1963-64, work was continued upon the property in accordance with the original development program and upon much the same scale as the preceding year. It has been prosecuted continuously throughout the year so far as weather, water and other operating conditions permitted, with a crew of ten men and cook, under the direction of Scotty Hay and William Tolsma as foremen. The work has consisted of actual mining operations, piping and sluicing, with the usual maintenance work upon the ditches, and drilling, stripping and other development and prospecting work upon the channel of pay gravel. The work was done with a cat, compressor and other appropriate equipment. Approximately \$34,500 was expended on the work during the present fiscal year. This includes the wages of the men, rental value of equipment and cost of material and supplies. The work has tended to and has actually improved the group of claims to at least that extent. Except for the rental value of the equipment, it was paid for in cash by myself and associates in the venture. The same situation exists regarding the status of the said claims as is shown in prior proofs of labor. Although patent was previously issued upon only 50 acres of the ground (40 of the Gleason and 10 of the Parkerville), all claims as described in the location notices (and/or amendments thereof) above set forth are held and maintained as valid and are being worked upon a substantial scale.

NAME OF CLAIM	BOOK	PAGE
Moon Mesa No. 1	R	550

This claim was, as shown in prior proofs, located for building stone. During the current fiscal year, principally in August, 1964, \$210 worth of work was performed thereon. The work was done by Marcel Spriet, John Wright and myself, using a D-6 cat and other appropriate equipment. It consisted of improvements on the road leading to the claim, and the actual quarrying and removing of stone. The work has tended to and has developed the claim to at least the amount above shown, and has been done by or at the request of the owners. The expenditure includes the labor of the men and the rental value of the equipment used.

PROOF OF LABOR FOR FISCAL YEAR 1963-1964 by
George M. Butchart on Butchart Group Nos. 1 to 7, both
INCLUSIVE, Nettie and Shale Rock Placer Claims, in
Baker County, Oregon

State of California)
County of Los Angeles,) ss

I, George M. Butchart, being first duly sworn on oath
depose and say:

That I am the owner of the mining claims hereinafter
mentioned, and have personal knowledge of the facts hereinafter
set forth. That the mining claims for which this proof of labor
is filed, and upon or for the benefit of which the labor and im-
provements hereinafter mentioned were performed and made during
the fiscal year beginning at 12:00 o'clock Meridian September 1,
1963 and ending at 12:00 o'clock Meridian September 1, 1964, are
that certain group of placer mining claims containing limestone and
other minerals commonly known as the Connor Creek Group, and are sit-
uated along or in the vicinity of Connor Creek, a tributary of the
Snake River, in sections 27, 28, 33 and 34, in township 11 south,
range 45 E. W. M., and in section 14, township 12 south, range
45 E. W. M., near Home, in Baker County, State of Oregon. That
the names of said mining claims and the Books and pages of the Minin-
Records of Placer Locations of Baker County, Oregon, where the re-
spective location notices, or amended location notices of each of
said mining claims are recorded in the office of the County Clerk
of said county, are as follows:

NAME OF MINING CLAIM:	WHERE RECORDED:

That reference is made to the proof of labor for the fiscal
year 1953-4 appearing of record in Volume Q at pages 334 to 336 inclu-
sive of said Records of Placer Locations for details regarding the lo-
cation and contiguity of said claims and the program for the com-
mon development thereof. That as appears therefrom, all of said claims
are contiguous and held as part of one project, excepting only the Shale
Rock Placer, which is held as a plant site and is an essential part of
the group, and the labor and improvements performed thereon during
the current fiscal year and hereinafter mentioned, have tended
to and did develop all of the claims in such group as above described.

That reference is also made to the proof of labor for the fiscal
year 1957-8 appearing of record in Book R at pages 195-7 of said
records, for details regarding the roads serving said property and
its importance to the development and operation of the said group.

That during said fiscal year, and to-wit: between 12:00 o'clock Mer-
idian, 1963 and 12:00 o'clock Meridian September 1, 1964, the follow-
ing amount of assessment work was performed on said placer mining
claims at the instance and request of the undersigned, George M.
Butchart, the owner thereof, for the benefit and improvement thereof,
by the following named parties, and that the character and value of
same is as follows:

1. John T. Coates performed 80 hours of labor in improving and
keeping up the road on the Shell Rock Placer mining claim, the reasona-
ble and actual value of which work was and is, the sum of \$120.00
2. Pedro Brothers performed work with a catapillar on the
roads on said placer mining claims, the reasonable and actual
value of which was and is the sum of, \$20.00
3. R. P. Waverick performed work in improving the roads on
said placer mining claims, the reasonable and actual value of
which was and is, \$30.00
4. Between August 13, 1964, and August 26, 1964, both
inclusive, Frank Butchart and L. V. Butchart each performed a
total of 112 hours of work in improving the roads on said plac-
er mining claims, the reasonable and actual value of all of
which, was and is the sum of

Total \$596.00
\$1066.00

Book J Page 327

That all of the work and improvements hereinbefore mentioned were completed on August ²⁶ 1964.

That the total reasonable and actual value of all of said work, performed, as aforesaid, was and is, the sum of \$10⁶00, and that all of such work tended to, and did, improve and develop said placer mining claims in the hereinbefore-mentioned respective sums and manner; and that the undersigned has fully paid said respective sums to said parties, respectively, who performed said work, as aforesaid.
