Thank you for your time and consideration in this important matter. Please know there are many of our neighbors in the Sherwood West Area who support the UGB expansion request and are hoping Metro will vote in support of the UGB expansion request of 1291 acres.

If you have any questions please feel free to reach out to me at either [redacted] or at [redacted].

Sincerely,

Diann Matthews and Marleen Mandel

Subject: [External sender]In Opposition to Sherwood West Concept Plan

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

The Sherwood West Concept plan will increase traffic and congestion (causing significant delays for day to day travel *and* first responders), create more and more of a burden on our school system (larger classroom sizes, teacher impacts, and more), increase the need for infrastructure improvements (causing a greater tax burden on Sherwood), and generally, is **NOT** what Sherwood residents want.

As anticipated, we see negative impacts of the Brookman development (*which was voted down by the citizens of Sherwood THREE times yet pushed through anyway*). We were promised better walkability and a thoughtful new traffic pattern - most definitely, not the case. The surrounding area has become a 'freeway' and/or cut through for more and more traffic without sidewalks and is unsafe for anyone to walk, run, or play (which was one of its' very selling points).

While we appreciate the need for development and perhaps even the intention to grow thoughtfully - this plan doesn't meet the needs of the existing community. Please pause and get it right.

Metro Urban Growth Management Team,

The City of Gresham appreciates the work of Metro staff and consultants over the past year to compile the draft Urban Growth Report. At this time Gresham would like to provide some comments regarding the draft report:

- A topic throughout the region this cycle has been the feasibility of industrially zoned lands. Gresham staff were informed that the Metro process considered slope as part of Sherwood's expansion proposal, which is commendable. Unfortunately, slope isn't reflected in the inventory of industrial land supply in a way that accurately reflects developable acreage. Large-lot development is widely seen as infeasible if slopes exceed 5%. Several of the region's large-lot tier 3 sites are within Gresham. One is an active gravel pit, and the others are within the Springwater area with slopes in excess of 7%.

- The UGR will be viewed statewide and can have far-reaching implications. We know funding is critical for tier 3 sites, especially large-lot sites to become shovel-ready. We need to ensure we get the industrial land supply right to effectively advocate for funding for these sites.

- The draft UGR discusses potential conditions that could be placed on a Sherwood expansion related to housing that could require a certain housing mix. Gresham would caution against overly prescriptive conditions of approval with the impending Oregon Housing Needs Analysis. It could be more appropriate to allow the OHNA housing needs allocation and Sherwood's translation of it into housing types, characteristics, and locations to help Sherwood formulate zoning and incentives for housing types within the expansion area.

We appreciate your consideration of Gresham's comments.

Sincerely,

Ashley Miller

RE: UGB Expansion
Dear Gerritt:

My name is Lou Ann Nance, and my interest in the Sherwood UGB is based upon my family's property within the Sherwood West Neighborhood, which they have owned for nearly 40 years.

Our family has huge sentimental interest in the Sherwood Area, and desire for thoughtful development of the area that support s efficient use of the land that creates new jobs and affordable housing. It will also be necessary to create a tax base that sustains the infrastructure, and the new $247 million-dollar high school.

Your foresight into a healthy UGB Plan will ensure the prosperity of the City of Sherwood for many years to come. Thank You for your time and considerations in this important matter.

Sincerely

Lou Ann Ottoman Nance

August 15, 2024

Metro Council Chair Peterson and Members of the Metro Council,

Thank you for the opportunity to provide testimony on the draft Urban Growth Report (UGR) released in July. We appreciate the work and effort staff have dedicated to the implementation of the Urban Growth Report process. We are grateful for the opportunity to have representation on the Stakeholder Roundtable.

The Washington County Chamber of Commerce represents a broad spectrum of businesses and community stakeholders who are deeply invested in the future growth and prosperity of our region. After thorough discussion with our members, we have identified several areas of concern in the UGR as currently drafted. We respectfully submit the following feedback for your consideration.

1. Definition and Classification of "Buildable Land"

One of our primary concerns revolves around the definition and classification of "buildable land," particularly in the context of industrial land supply versus housing capacity. The current draft report appears to contain significant discrepancies between what is considered "developable" land and what Metro is counting as a surplus of buildable lands.

Analysis suggests there is an oversampling of small parcels, particularly those under 10 acres, which are generally not attractive to industrial or commercial investors. Additionally, we have identified issues with several large parcels, including eight 50-acre sites that appear to be either defunct rock quarries or sites with serious constraints, making them effectively undevelopable.

We urge Metro to revisit the criteria used to classify industrial land and to apply more stringent layers of analysis to ensure that the data reflects the true potential for industrial development. It is crucial that Metro's data accurately represents the realities on the ground to avoid misguiding policy decisions based on an overestimated supply of viable industrial land. If the criteria are embedded in State Land Use laws or constraints, we believe it is incumbent upon Metro to actively seek changes to State Laws or Statute.

2. Employment Lands and Viability

Regarding employment lands, we recommend that Metro Council discount approximately 1,300 acres of land with a slope grade above 7%, as this exceeds the industry standard for commercial and industrial development. We also ask that the Council consider the fact that the average lot size for employment lands is currently 3.8 acres, with a median site size of just 1.7 acres. These dimensions are often insufficient for the needs of modern commercial and industrial developments.

3. Senate Bill 4 Super-Siting and Employment Land Expansion

During the 2023 Legislative Session, Senate Bill 4 gave the Governor super-siting authority under the Oregon CHIPS legislation (SB4) passed last session. Should the Governor choose to exercise this authority, we strongly urge the Metro Council to view this as an additive measure rather than a replacement for any employment land expansion decisions as it was contemplated by Legislators. The super-siting authority is a valuable tool for specific projects but should not substitute the broader need for increasing our employment land base.

4. Housing Capacity and the Need for Realistic Projections

The draft UGR significantly underestimates the region's housing needs. According to a report by ECOnorthwest, the Portland Metro Region is already facing a shortage of 59,488 homes, in addition to 10,683 homes needed for houseless populations. Furthermore, the report projects that the region will need to produce 294,853 new housing units over the next 20 years—far exceeding Metro's calculated range of 143,300 to 203,200 units.

We strongly recommend that Metro Council incorporate this supplementary data into the UGR and consider its implications, particularly in the context of Sherwood's expansion plans. The current projections in the UGR do not align with the on-the-ground realities of our housing market. We also urge the Council to reject the limiting housing development scenarios presented on page 38 of the report. Instead, Metro should adopt a policy framework that acknowledges both the low capacity for housing development within the Urban Growth Boundary (UGB) and the urgent, high need for new housing production.

The current scenario, which suggests a surplus of 9,050 units, is misleading and risks leaving our region severely underprepared for future housing demands. The reality points to a potential deficit of 84,000 housing units inside the UGB, a gap that Metro must address to avoid exacerbating the existing housing crisis. We believe that planning for adequate housing will help to mitigate the escalating costs of housing.

5. Planning for Growth, Not Decline

Finally, we believe that it is far wiser to plan for growth and be overprepared than to anticipate decline and risk underproducing housing and jobs. The current UGR seems to prophesy a conservative growth outlook, which could lead to economic stagnation and increased pressure on housing markets. We urge Metro Council to adopt the "High" Population growth forecast in the UGR to provide greater flexibility to local jurisdictions in meeting their communities' needs.

This recommendation is not just a matter of optimism but of prudent public policy. By planning for high growth, Metro can ensure that our region is prepared to meet the demands of a growing population, thereby avoiding future crises related to housing shortages and economic underdevelopment.

6. Washington County Chamber Support for Sherwood's Expansion Application

In addition to the concerns outlined above, the Washington County Chamber of Commerce fully supports the City of Sherwood's expansion application as presented. We believe that the Sherwood West North District Mixed Employment Area (MEA) is critical for addressing the region's growing need for industrial land and housing. The inclusion of this area within the UGB will help meet the demands of a

robust and expanding industrial market, provide opportunities for job creation, and contribute to the overall economic growth of the region.

It is essential that the final decisions reflect the true needs and potential of our community, and we remain committed to ensuring that the voices of our members and stakeholders are heard throughout this process.

We appreciate the significant amount of work that Metro has put into the Urban Growth Report, but we believe that adjustments are necessary to reflect the true needs of our region. We urge the Metro Council to take these concerns into account and to revise the UGR accordingly. The Washington County Chamber of Commerce stands ready to collaborate with Metro and other stakeholders to ensure that our region's growth is sustainable, equitable, and prosperous.

Thank you for your consideration.

Sincerely,

Subject: [External sender]Please Vote NO on the Sherwood Urban Growth request

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Dear METRO Council,

Say NO to the Sherwood request to expand the UGB. Although METRO has previously said YES to all city proposed UGB expansion requests, you should say NO to the Sherwood request. Please stick with your charter! From your website "...Portland area leaders saw an unfulfilled need to provide regionwide planning and coordination to manage growth, infrastructure and development issues that cross jurisdictional boundaries. They also saw a need to protect farms and forests from urbanization and to provide services that are regional in nature."

The Sherwood proposal uses inaccurate population growth data. Read and listen to your own Expert Analysis reports. The minimal population growth will come only from net migration. The state is also looking at alternative scenarios. Read the "Zero Migration" report from the Oregon Office of Economic Analysis at Report: Zero Migration, a Demographic Alternative Scenario | Oregon Office of Economic Analysis (oregoneconomicanalysis.com)

Job estimates - simply a Field of Dreams estimate, if you build it they will come. But, they will not come from out of state, they will come from other parts of Metro. Everyone hopes they will get a microprocessor factory, but another Amazon warehouse employing robots is more likely.

New Housing – politically correct position, but simply wrong. This will not drive housing prices down. Does anyone really believe that this growth will help solve the homeless problem?

Infrastructure – We are taxed enough already, please STOP! The proposed roadway improvements are not nearly enough to move the increased amount of traffic.

This UGB expansion is NOT needed, it is wanted. It is backed primarily by the city government and developers. Why they support this UGB expansion is unclear, but there are clues when you look at the list of Supporters provided by Sherwood in the proposal, and by this statement made by Mayor Rosener at the last MPAC meeting. He said something to the effect... "We have speculators who have bought up the land or have options on those lands, to do land assembly. There is some grease on the wheels there."

Please stop the sprawl and protect farms! Support infill. Support real estate re-development to address the housing. Support re-purposing of unused office space resulting from folks working from home.

Thank you for your consideration,

Jo and Alan Pearson

Subject: [External sender]Please REJECT Sherwood's UGB Growth Request

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To whom it may concern,

We strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. METRO needs to execute on one of their primary purposes, and stop unnecessary urban sprawl.

NOT NEEDED
In 2022 Metro projected Sherwood would grow by a scant 3% over the coming decades. The Sherwood School District has forecasted enrollment for the new high school will begin to DECLINE in 2027. Sherwood has enough vacant land to accommodate new housing and jobs for years to come, when planned and developed wisely.

Metro's research concluded there is enough industrial land inside the existing Regional UGB for another 20 years. Metro's research on Residential land shows most land brought into the UGB in the last 20 years remains undeveloped.

FALSE PREMISES
Taxes will increase. I testified and asked for a Taxpayer Impact Statement, yet none is available to my knowledge. Residents should understand how Sherwood and its residents will pay for the new roads, sidewalks, water and sewer, and not just an "agreement" to figure it out later. Yes, the developers will pay for a portion of the initial infrastructure, but WE will be left with more financial obligations to pay for the operating and maintenance costs, even though we do NOT need the new land to keep pace with growth in Sherwood.

Trust in Leadership is rapidly eroding. Statements like "Developers and speculators have already bought land or rights...", "Wheels have been greased...", and then the Washington County testimony supporting Sherwood and stating something like "WE encourage METRO to adopt the high population estimate so they could get more funding..." This is astounding, but sadly not surprising, behind the scenes behavior.

NOT WANTED
84% of the people in Sherwood who participated in an online poll in 2021 OPPOSED the UGB expansion. If you actually read the verbatims in the Sherwood proposal, there is little support for this expansion by the residents.

We stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely,

Alan and Jo Pearson

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

In reference to the above mentioned urban expansion I want to express my support for this planned expansion. There is an acute shortage of all types of developable land in the tri county area, but in particular Industrial property is lacking. AS a commercial real estate broker of 42 years focused in the Metro region but SW in particular, I have represented many of this submarkets largest employers. Lately I have seen a trend by some to relocate to other areas of the state, or out of state due to the lack of available land and/or facilities to house expansion. The housing shortage in the region is mentioned often in the press and is a focus of the state leadership, but the shortage of industrial land is more acute in our region is more acute, and in my opinion, more important. Our region cannot prosper without our industrial employers being retained and the shortage of industrial property in the metro region is causing out migration of these stalwarts of our business community.

Re: Letter of Support For Metro Council's 2024 UGB Decision For Inclusion of the Sherwood West Concept Plan Area.

Dear Councilors Peterson, Simpson, Lewis, Rosenthal, Gonzalez, Nolan, and Hwang:

Please accept this letter as our second and supplemental official Letter of Support on behalf of those Sherwood West property owners, whom we currently represent and have represented in the past from the beginning of the Sherwood West planning process nearly ten years ago, requesting that your December 5, 2024 final decision approve the City of Sherwood's "Ask" to expand the Metro UGB to include the entire Sherwood West 1,291-acre Planning Area into the current Metro UGB boundary.

We respectfully submit this testimony on behalf of our current and former mostly very long term generational Sherwood farm and community family clients, Elanna Schlichting, manager of the Schlichting Family Century Farm LLC (owners of approximately 38 acres), Nancy Perkins and Kevin Sabbe, Trustees of the Sabbe Family Trust (owners of approximately 32 acres), and the Glen T. Wetzel Family (owners of approximately 0.46 acres), all located in the North District, as well as the Mandel Farms, LLC (owner of approximately 57 acres) and Prodigal Son LLC. (owner of approximately 20 acres) both located in the West District, all of

which represents approximately 147 acres or nearly 12% of total land located within Sherwood West.

From years of experience representing a number of Oregon cities in various capacities and being intimately involved in comprehensive and concept plan since the 1970's and 1980's, and based on recent review of Metro's Draft July 2024 Urban Growth Report ("UGR"), please see the following executive summary of our written and oral testimony to both the City of Sherwood over the years, our initial April 2024 letter to you, and our review of the UGR in light of recent promising trends on the horizon of our lives and our communities, locally and nationally, which ultimately argue in favor of and support for your affirmative decision to expand the Metro UGB to include the entire Sherwood West Concept Plan:

1. The City of Sherwood and the Sherwood Community has worked very hard for many years with the help of Metro Council Staff and thousands of hours of City and County officials and staffs, with the valuable input of countless community volunteers and consultants from the entire collection of interested parties and local and state agencies and the many vital NGOs, all of which have provided important and essential input to shape and create the unique Sherwood West Vision for the future of all of its existing and future residents and businesses.

2. Sherwood West is the first time the City and Community and all players has systematically and comprehensively supported and created a visionary UGB expansion of this scope, which will provide the road map forward beyond our current lifetimes.

3. Sherwood West is the first expansion request to incorporate many of the middle housing (and thus more affordable housing) options of the continuing local and statewide Smart Growth legacy.

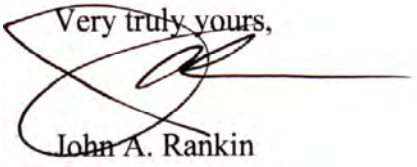
4. Sherwood West:
    a. Protects and enhances the viable farm and forest lands surrounding Sherwood.
    b. Protects and enhances the existing special natural resources of the Area that are so important and beloved throughout our community and county and state.
    c. Encourages distinct and diverse middle housing types, in livable and walkable neighborhoods close to commercial areas as built environments centered around those existing natural resources.
    d. Helps address Sherwood's local housing crisis and particularly its need for affordable housing to meet its changing demographics.
    e. Provides a much-improved Jobs/Housing Balance centered in the North District Employment Area that will help ensure that Sherwood West's vision is economically sustainable into the future.
    f. Which Balance is specifically planned to attract advanced manufacturing and high-tech support services that by purposefully reducing the need for direct "major highway access" and reducing the number of trips and miles between home and work will further enhance Sherwood's collective goal to be as "carbon neutral" as possible.
    g. Provides affordable opportunities to more small women owned and BIPOC businesses in the North District and the planned commercial areas.

5. In recent "Ask" cycles, as Sherwood continued to refine its Sherwood West Plan, other communities within the Metro UGB and especially in the South and West Metro Areas

have been given significant UGB expansions into urban reserve areas which were comprehensively planned and are being and will be comprehensively developed for many years into the future. Sherwood needs and respectfully requests that same opportunity.

6. Nationally, despite what we thankfully are seeing "in the rear-view window":
    a. Inflation appears to be under control and been reduced significantly year over year confirming the "soft landing" we all hoped for, and
    b. The Federal Reserve is this week signally that its next interest rate reduction will occur in September 2024, as the recovery continues to trend upward.
    c. All of which will encourage a return to sustainable growth in all sectors and with Sherwood's current housing crisis and need for more employment land provides the support for your December decision to expand the UGB to include all of Sherwood West.

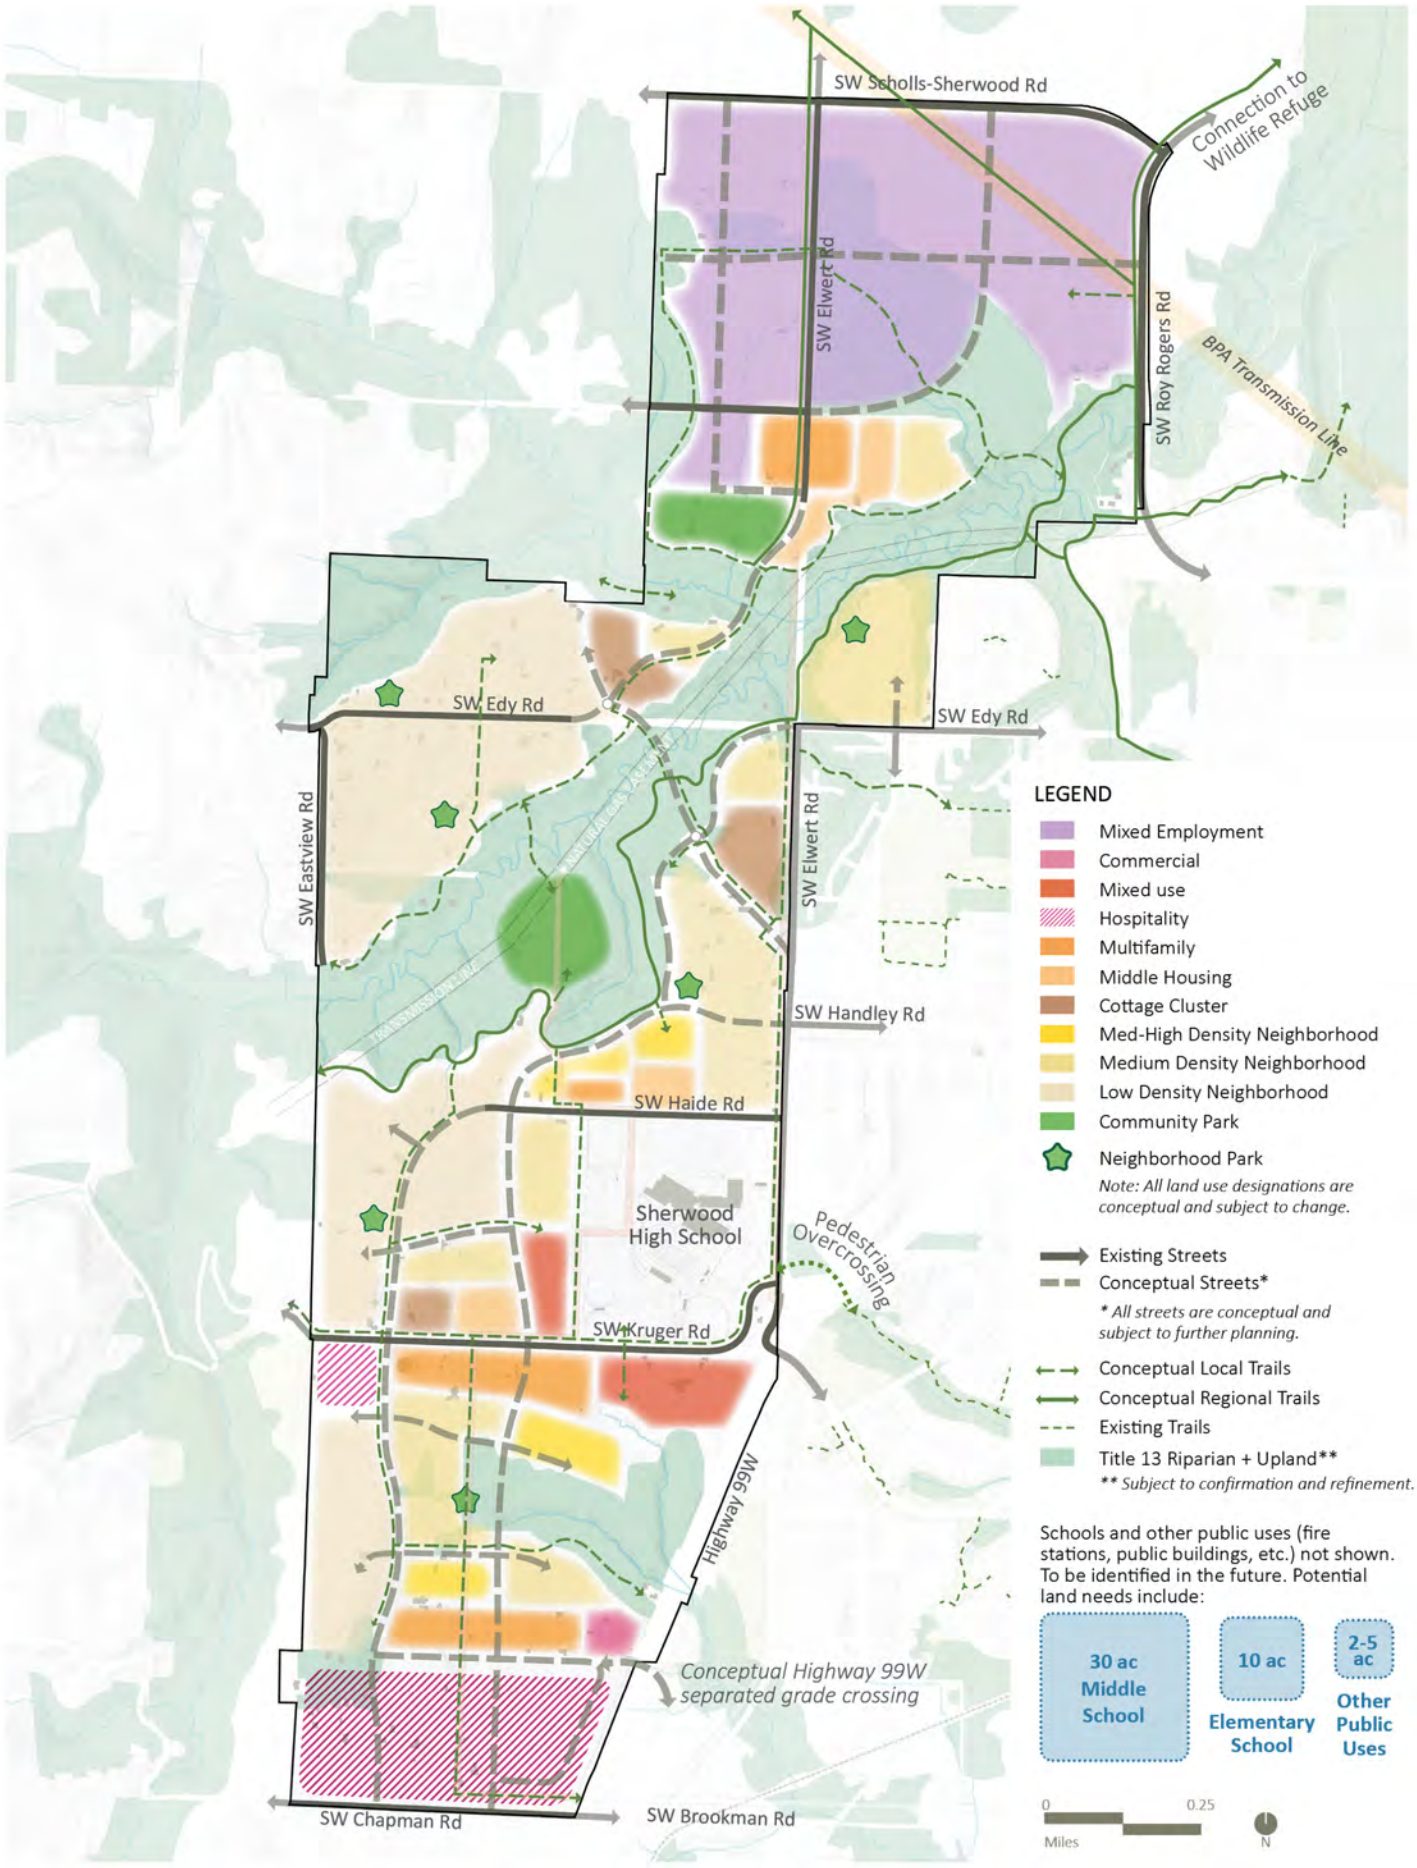
7. We continue to sincerely believe the best way to make certain a great Concept and Community Plan like Sherwood West truly succeeds is to make certain the entire Plan is fully implemented for the reasons given in our April 4, 2024 Letter of Support, including but not limited to:
    a. We need only look at the decades old and recent successful UGB expansions from Villebois in Wilsonville to River Terrace in Tigard and others in Hillsboro in West and Southwest Metro;
    b. Piecemeal or phased expansions always result in anomalies and subtle and not-so-subtle resulting amendments that blur a city's vision and frustrate the intended balancing of the complex inter-relationships of planning efforts and the natural and built environments; and
    c. The City and Community can then work on an "economies of scale" basis with all potential developers and affected agencies to ensure the City's Strategic Funding Program works most efficiently and effectively to realize the vision.



8. Sherwood has created a viable Sherwood West Final Infrastructure Strategy which will work to phase development and enhancement of the built and natural resources environments.

9. Significant interest in Sherwood West from quality members of the development community, both locally and nationally, has been generated, particularly in the industrial employment lands designated in the North Area in the last year, resulting our receipt of a purchase offer from a serious and respected national development company who has been active in the Portland Metro Area and Pacific Northwest for many years.

Again, thank you for the opportunity to present this final letter of support on behalf of all of us who live and/or work in the Sherwood and in the Sherwood West Planning Area.



We continue to look forward to your decision to expand Sherwood's UGB to include the entire Sherwood West Planning Area and give the City the ability to create and implement Sherwood West as a great addition to the City and the Sherwood Community as well as to the greater Portland Metro Area.

Finally, a profound thanks to you all and your staff's help and support of the City's long-term efforts to create the Sherwood West Plan.

Re: Draft Urban Growth Report

President Peterson and Councilors:

My name is Kelly Ritz, President of Venture Properties, Inc. and our associated home building company, Stone Bridge Homes NW, LLC. In 2015, we began development of the Mandel Farms subdivision, an 86-lot detached home community at Edy and Elwert Roads in Sherwood. We closed on our last home in October 2019. It was a successful project for us, and we are very appreciative of the support we received from the Sherwood community and city staff.

Shortly after starting Mandel Farms, we began working with City Planning staff and several property owners in the Sherwood West area to advocate for a potential urban growth boundary expansion for all or a portion of Sherwood West. Much study and discussion has taken place in the years since, culminating in an extensive two-year planning process and adoption of the Sherwood West Concept Plan in 2023. This led to a request to Metro later that year to expand the Urban Growth Boundary to include 1,300 acres within Sherwood West.

A key part of Metro's review of this request includes the recently completed draft Urban Growth Report. This report concludes that under baseline population forecasts, "approximately 150,000 additional homes are needed to meet expected population growth over the next 20 years," and to meet this demand, "we must continue to focus on public investment and removing barriers to housing production." Land to accommodate this growth will need to come from a variety of current, redevelopment, and urban expansion sources. Sherwood's UGB expansion request, created from strong community support, offers a thoughtful blueprint for a diversified residential-industrial-employment planned community. We believe that their plan has the best chance of supplying a mix of single-family, middle housing, and multi-family options for all age ranges now and into the future.

My companies and I wholeheartedly endorse your acceptance of the Urban Growth Report and recommend your continued review and approval of the Sherwood West Urban Growth Boundary expansion.

Thank you for your consideration of our testimony.

Sincerely,

Kelly Ritz, President
Venture Properties, Inc.

ABOUT SHERWOOD ECONOMIC DEVELOPMENT: Sherwood offers many strategic advantages for business investment and economic development. Conveniently located in the southwest/I-5 Corridor of Greater Portland's Silicon Forest. Rated the 2nd safest city in Oregon, Sherwood also boasts a highly skilled workforce, outstanding schools, and strong community spirit. Sherwood enjoys easy access to I-5, I-205, Highway 99W and the Portland International Airport. Sherwood has a pro-business city government and encourages a wide range of businesses to locate and grow here, from startup entrepreneurs to Main Street businesses, to high technology advanced manufacturing. Sherwood boasts an engaged and collaborative city staff. We are actively creating new locations to serve our growing business community. We invite you to explore business growth opportunities in Sherwood.

Subject: [External sender]2024 Draft UGR Comment

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Hello,

The 2024 UGR has implications for local government planning processes as Metro's subsequent distributed forecasts inform local Housing Capacity Analyses, Economic Opportunities Analyses, and Regional Transportation Plan modeling.

The City of Hillsboro recommends Metro rely on a high population growth forecast to allow our region to be nimbler in addressing current and future housing and employment needs.

The 2024 Draft UGR demand scenario 4 involves faster household growth in 2044 coming from increased in-migration of younger households, consistent with historic migration dynamics, who typically seeking multifamily and middle housing. Though younger households who migrate to the region by 2030, 2035, and 2040 may initially prefer multifamily or middle housing, many will continue to demand single-unit detached for their growing household size and other reasons. The City of Hillsboro recommends Metro add a new UGR demand scenario 5 that involves faster household growth coming from increased in-migration of younger households, consistent with historic migration dynamics, but with a larger percentage of single-unit detached to meet the demand during the next 20 years.

Though the Draft UGR shows the region as having sufficient total industrial capacity, much of the industrial land supply consists of smaller parcels with an average lot size of 3.8 acres and a median lot size of 1.7 acres. The Draft UGR mentions there are only eight sites over 50 buildable acres inside the UGB that are available to the general industrial market. The final 2024 UGR should highlight the lack of sufficient large-lot industrial sites 25 plus acres in size available to the general industrial market. The final 2024 UGR should also highlight that less than 6% of the taxlots available to the general industrial market are medium-sized sites between 10 and 25 acres.

Thank you,

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To whom it may concern,

I am writing in support of the Sherwood West Expansion Plan. Here is a link to the rationale for my support. It is my opinion that this is a very good plan for the appropriate expansion of west Sherwood and fits with the logical development surrounding the Sherwood High School and other areas.

Sincerely,

Terrel Smith
Retired teacher-Sherwood High School
[redacted]

Request that the Metro Council:

- **Approve the Sherwood West Concept Plan as proposed by the Sherwood community. Changes to the plan threaten community support.**
- Add 340 net acres of residential land to the UGB as proposed in the Sherwood West Concept Plan.
- Add 130 net acres of flex industrial land to the UGB as proposed in the Sherwood West Concept Plan.
- Add 135 net acres of commercial and hospitality land to the UGB as proposed in the Sherwood West Concept Plan.

Background Information:

Urban Reserve designation

- Sherwood West is proposed within an Urban Reserve. Urban Reserves are lands suitable for accommodating urban development over the next 50 years.
- Land that is considered most important for commercial agriculture and forestry use is in rural reserves and not eligible for urban expansion.
- City has clearly answered question of readiness and has prepared for adding Sherwood West to the UGB.

Regional Growth Projections

- Our region is growing and is expected to add an average of 15,000 new residents per year through 2044.
- Sherwood is preparing for its share of growth through the Sherwood West Concept Plan.
- The Sherwood School District supports the Sherwood West proposal. The School District Board of Directors and the Superintendent have expressed strong support for the plan.
- Our region will add approximately 315,000 new residents and 137,000 new jobs over the next 20 years under a baseline growth scenario.

Community Engagement

- Since 2021, the City has held over 30 public meetings on Sherwood West. The public engagement process was highly publicized, thorough and inclusive. The Sherwood West vision was developed by the Sherwood community.
- The diverse range of residents and stakeholders were represented on the Community Advisory Committee and Technical Advisory Committee.

- The Sherwood West Concept Plan has strong local support including unanimous approval from the Sherwood Planning Commission, Sherwood City Council, and Washington County Board of Commissioners.

Housing

- Sherwood and the Portland region are experiencing a housing crisis. The severe shortage of housing has increased prices and reduced affordability for all. Between 2017 and 2022, the Portland region experienced a 50.4% increase in homelessness.
- The Sherwood West Concept Plan will provide a minimum of 3,100 new units including mid-rise apartments, missing middle housing, and single-family detached residences. A minimum of 43% of new housing will be middle and multi-family housing.
- The plan proposes innovative zoning types including cottage cluster only and middle housing only zones will provide opportunities for first time home buyers and empty nesters to stay within or relocate to our region.
- Sherwood West proposes between 43% - 68% middle and multi-family housing. The range depends on how much middle housing is constructed in certain zones.

North District Employment Land

- The Sherwood West employment land provides opportunities for equitable economic growth.
- Employment land is not just about a simple supply and demand analysis. Economic development requires a land supply that enables specific industries to thrive.
- The average industrial parcel size in the metro region is 1.7-acres. Our region is facing an industrial land supply crisis similar to the housing crisis. Small BIPOC and women owned businesses are most vulnerable to rising business costs.
- The industrial vacancy rate in Washington County is 2.5% making business more expensive for key target industries. Small businesses are impacted the greatest by high industrial land costs and lease rates.
- Sherwood grew it's industrial and manufacturing base twice as fast than the region between 2017 and 2022.
- The Sherwood West site is competitive and will lead to new jobs for a growing part of the region.

Annexation and Development Phasing

- Sherwood is committed to thoughtful planning and careful growth over time.
- Approval of the UGB expansion does not immediately bring the land into the City of Sherwood. The land remains part of unincorporated Washington County until formally annexed into the City of Sherwood.
- Growth is expected to occur first at key nodes with access to infrastructure like near the new Sherwood High School.

- The Concept Plan includes a Preliminary Infrastructure Funding Strategy that describes how new infrastructure will be funded. Where current SDC rates do not cover the cost of infrastructure, a broad range of funding tools will be considered.

August 14, 2024

RE: Draft 2024 Urban Growth Report

Dear President Peterson and Metro Councilors:

Thank you for the opportunity to comment on the Draft 2024 Urban Growth Report (2024 UGR) and Sherwood West urban growth boundary (UGB) expansion proposal. We recognize that completing this report during these times of uncertainty is extremely challenging. The report acknowledges that while there may be slower projected population and employment growth, the on-going housing availability crisis and continual need for large-lot employment land are factors that should not be minimized.

First, we urge the Metro Council to select the **high growth rate for both population and employment**. Planning for high growth will give jurisdictions the latitude not only to attract more investment opportunities in the region, but also to appropriately balance housing needs, land use, economic development, and transportation planning. Assuming low or baseline growth rates may result in unintended, adverse effects, by constraining local jurisdictions' ability to respond in real time to address population, employment, and housing requirements. It is also critical that findings within the 2024 UGR support necessary UGB expansion without forcing the removal of land from other locations.

As part of the Oregon Housing Needs Analysis (OHNA), the State will assign specific housing targets to individual jurisdictions beginning in 2025. This new paradigm for housing accountability necessitates consideration of the specific land need within individual jurisdictions rather than a singular focus on regional land supply. Selecting the high growth rate for both population and employment will create the best opportunity to meet the coming state-mandated housing targets and will allow the region to be more responsive and proactive in attracting potential new employers.

Second, we have concerns with **Metro's methodology that asserts that we have a surplus of industrial lands (nearly 6,000 acres) available inside the UGB to serve our region's need over the next 20 years**. We appreciate the supplemental industrial lands analysis, based on site criteria, that was developed as a part of the City of Sherwood's expansion request. However, **we believe**

that Metro's methodology for determining industrial "buildable lands" is flawed because it does not consider key site criteria factors in developing the Buildable Lands Inventory.

The 2024 UGR cites that of those 6,000 surplus acres, the average industrial parcel size is 3.8 acres, with a median industrial parcel size of 1.7 acres. Market factors indicate that firms seek parcels that are a minimum of 5 acres and are developable in 7 to 30 months or less. It is also clear that there is demand for large-lot industrial sites of 20, 50 and 100 acres in Clackamas County, and Metro's current method of evaluating industrial land supply fails to address this demand. In short, the lands that Metro is considering developable are not sufficient to meet the market need.

Clackamas County continually faces the challenges of not having an inventory of available and suitable employment land to support industry and employment for our workforce. While we know that the 2024 UGR decision is only one of many factors that influences the development of land, it is essential that this decision is made in a way to best support growth in all of our communities.

Finally, the comment period for the 2024 UGR was not sufficiently long to allow a robust discussion of these important issues. In the future, we urge Metro to provide a 90-day comment period between release of the draft UGR and issuance of the Metro Chief Operating Officer's recommendation to the Metro Council. It is imperative that local jurisdictions be given an adequate opportunity to weigh in on the UGR at an early point in the process. That said, we are looking forward to future opportunities to communicate with the Council before the Urban Growth Management Decision is made later this year.

In closing, the Urban Growth Management Decision process is driven by legal obligations that do not always translate into market reality. Discussions about the future can begin with questions on whether the region has the right amount of land to support housing and job growth, but they must not end with a simple yes or no answer. We are supportive of Metro Staff's recent proposal to update the 2040 plan and look forward to the opportunity to develop a better approach to planning for a bright future for our region.

Sincerely,

Clackamas County Board of Commissioners

Tootie Smith, Chair

Commissioner Paul Savas

Commissioner Martha Schrader

Commissioner Mark Shull

Commissioner Ben West

CAUTION: This email originated from an External source. Do not open links or attachments unless you know the content is safe.

>> I am writing to express my concerns regarding the Draft Urban Growth
>> Report and the City of Sherwood's proposed Sherwood West Concept.

>> First, the Draft fails to incorporate or thoroughly analyze the
>> figures upon which the Concept is based. Instead, it seems to merely
>> assess the City's "readiness" for expansion. While the City may
>> perceive itself as prepared to expand, the more important question is whether it should expand.
>> In my opinion, the answer is no. The proposed expansion is
>> unwarranted, as Sherwood has likely already reached its peak in terms
>> of the population that should or will move into the area.

>> For instance, the new high school was justified on the basis of
>> expected population growth, yet it has not come close to meeting the
>> attendance figures used to pass the Bond measure. We must be cautious
>> and not rely on the self-serving numbers the City provides when
>> making decisions about the Sherwood West Concept.

>> Furthermore, farmland is vital and irreplaceable. It is a key part of
>> the character of our city. Sherwood has already converted enough
>> farmland into developed areas. The thought of adding light industrial
>> buildings or more housing on the west side of our beautiful city is
>> unnecessary now and in the future. The residents of Sherwood have
>> been clear in their opposition to further expansion. Even METRO's
>> data shows that Sherwood's population is expected to increase by less
>> than 1,000 people over the next 20 years. Let's preserve the beauty that surrounds our city.

>> Thank you for your time and attention to these concerns.

RE: Urban Growth Report, Draft 2024

Dear Council Members,

I am writing to provide comment on the Draft Urban Growth Report pertaining to the City of Sherwood's proposed Sherwood West Concept.

In reviewing the proposed draft report, I find the city of Sherwood's proposal to increase the city by 41% to be lacking in reliable data and concrete reasoning for such an expansion.

The west side of the city is already an area of congestion and outdated infrastructure. To add additional homes, light industrial buildings and traffic would severely impact the area, while requiring the loss of valuable, irreplaceable agricultural land and open space.

The impact on taxpayers for additional bond measures to then pay for roads, utilities, increased police and fire department services would also be a significant burden for a project that has shown no overall benefit to improving the quality of life for the residents of the community.

The layoffs currently occurring with Intel and other businesses in Washington County should be a cause for a cautious and well reasoned approach to solving a problem that does not exist for this area.

Thank you for your time in reviewing my correspondence.

Sincerely,
Michelle Standridge

Dear Metro Council,

Good evening and thank you for your time. I am writing this letter in support of the Sherwood West Concept Plan as proposed and supported by the Sherwood community and Sherwood City Council.

"New" and "fresh" are two words that come to mind in regards to this comprehensive plan. New strides and fresh faces. New ideas and fresh goals. New directions and fresh opportunities. This plan offers practical, thoughtful and forward movement; with a sustainable core based on values for healthy growth, preserving open spaces and upholding the strengths and benefits inherent in Sherwood.

Three key factors of the Sherwood West Concept Plan that in my opinion highlight its vital role:
1. Positive employment growth trends at 18% from 2017-2022.
2. Promoting a steady and robust economic growth and resdiential housing.
3. "2024 ECOnorthwest analysis North District Mixed Employment Area (MEA) of Sherwood West Concept Plan has site characteristics that make the land better suited to accomodate the industries that are growing and expanding in the Portland Metro area."

Sherwood must grow and evolve in a balanced way and I feel that the Sherwood West Concept Plan as proposed is that backbone.

Best Regards,

Metro Urban Growth Management Team
600 NE Grand Ave.
Portland, OR 97232

RE: Draft 2024 Urban Growth Report

Dear Metro Urban Growth Management Team,

Thank you for the opportunity to review and provide comments on the Draft 2024 Urban Growth Report (UGR). This memo summarizes technical comments from Washington County Land Use & Transportation staff.

We appreciate the work Metro has done for the region's livability in managing the Urban Growth Boundary (UGB) in a way that balances the need to protect rural land uses and provide an adequate supply of land that has a high likelihood of successfully developing into places to live, work, visit, and play. Staff appreciate the opportunity to participate in the process through the Land Use Technical Advisory Group (LUTAG), Metro Technical Advisory Committee (MTAC), the Transportation Policy Advisory Committee (TPAC) and the economic development forum. We also appreciate the time that Metro staff have spent sharing their work with us and other partners through various committees and organizations throughout the process.

Since the origin of the Metro Urban Boundary, jurisdictions in Washington County have shown their ability to plan for expansions of the UGB areas in a way that creates desirable communities. We respectfully request that Metro correct the number of housing units built in North Bethany since the UGB expansion in 2002. The Draft UGR reports that only 573 units have been built, but the actual number is closer to 4,000. This is an important detail because it shows the success of building communities within UGB expansion areas over the last twenty years.

The primary concerns of Washington County staff are how the technical tools have been applied to evaluate the most likely development potential and demand scenarios. These concerns have been raised by the County and other partners throughout the review process. Two examples follow:

- The scenarios that Metro prepared along with the three growth forecasts assigned a demand share for single- and multi-family units. The high growth projection was paired along with the high demand for multi-family product scenario, and we did not see results of the high growth forecast modeled with high demand for single-family product or an even split. We believe that it is important to ensure adequate land for a

Department of Land Use & Transportation
[redacted] Hillsboro, OR 97124-3072
Phone [redacted]
www.washingtoncountyor.gov

variety of housing types. Past trends have shown that much growth (both single and multi-family) is happening outside of town centers, reflecting market realities from both a supply and demand perspective. Supporting and incentivizing growth in our town center areas is a part of the solution to our housing crisis but so are carefully planned UGB expansions and infill development all around the region. The limited scenarios shared in the draft UGR did not prepare us to evaluate the effects of these options.

- For employment/industrial needs, the evaluation of industrial land supply needs to account for the available size of properties and the flat topography needed by modern large-scale industrial development. While land with slopes between 5% and 25% has been successfully developed into new residential areas, and to some extent new commercial areas, the parts of the region's industrial land supply that are this topographically challenging are unlikely to be financially viable. Flatter industrial land is a prerequisite to future growth in industrial employment. Metro should update the calculations of available employment/industrial land to remove steep slopes.

County staff worked closely with Sherwood staff as they prepared the Sherwood West Concept Plan and we support their technical work and the process that they have gone through. Again, we appreciate the collaborative spirit with which Metro staff approached this Urban Growth Report and look forward to our continued work together.

Sincerely,

Erin Wardell

Erin Wardell, Assistant Director

Portland, OR 97232

RE: Draft 2024 Urban Growth Report

Dear Chair Peterson and Metro Councilors,

Thank you for the opportunity to comment on the draft Urban Growth Report (UGR) and Sherwood West urban growth boundary (UGB) expansion proposal. The 2024 growth management decision is the blueprint for how Metro Council will lead the region in planning for future housing development and employment opportunities. We appreciate that these decisions are challenging and acknowledge there are trade-offs that must be carefully considered in this decision process.

Our Board strongly supports the City of Sherwood's application for expansion of the urban growth boundary to include the 1,291 acres within the Sherwood West urban reserve area. The city has demonstrated their readiness to serve the area with governance and infrastructure as required by Metro's Urban Growth Management Functional Plan. The City's plan envisions that up to 5,582 housing units and 4,524 jobs could be accommodated in the expansion area. As we are all grappling with ways to produce more housing in the region and across the state, adding this land to our regional urban growth boundary makes sense. In addition, Sherwood has shown that the proposed Sherwood West employment area has the site suitability characteristics to attract more of the types of industry that Sherwood has successfully recruited to the city in recent years. Even though this is a regional urban growth boundary expansion decision using regional analysis, place matters in this consideration. Sherwood has demonstrated that they are a place where people want to both work and live.

We also encourage Metro Council to strongly consider selecting the high growth rate for both population and employment. The selected growth rates guide regional policy and funding decisions around housing, employment land and supporting infrastructure. Choosing low growth rates could artificially constrain our ability to plan for or make decisions to support the development of badly needed housing of all types, or further constrain opportunities to grow our region's traded-sector employment, which provides living wage jobs for thousands of our community members.

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

When analyzing the expansion of the Portland UGB, you propose to maintain such a tight land supply that single family homes would only account for 23% of new housing. The rest of the units would be apartments of other forms of high-density living.

I believe 75% of people aspire to live in single family homes. Therefore, I am adamantly opposed to limiting single family homes to anything under 50%.

I am in favor of Sherwood's application to expand their UGB and sincerely hope they will be able to do so without this ugly single family home restriction.

Dear Gerritt,

My name is Gwen Werger and my parents have owned a 10 acre parcel of land on Elwert Road since 1981. My sisters and I are now managing the trust that holds this property. I am writing in **support of the Urban Growth Boundary expansion request for Sherwood West.**

When my parents first purchased this acreage in 1981, the land west of 99W was mainly farms. Now there are several subdivisions east of Elwert Rd. as well as the newest Elementary School. As of 2021, Sherwood High School, the largest high school in Oregon, as well as a $247 million dollar investment by the community, was built on Haide Rd, which is directly west of Elwert Rd.

The amount of traffic on Elwert Rd resulting from the new High School as well as commuters to Roy Rogers Rd and beyond makes this area much more difficult to operate as farmland. The proposed 1,291 acres to be included into the UGB is now more suitable for additional housing and light industrial than it is farmland.

By including the 1,291 acres of Sherwood West into the UGB, this would provide land for affordable homes as well as parks and green space near the schools. Additional housing will increase the tax base as well as provide increased enrollment for the school district.

Adding Sherwood West into the UGB, will also provide Sherwood with land needed for additional economic opportunities. The city of Sherwood has a plan to expand job growth in the area and with that comes the need for affordable housing.

Sherwood does not want another missed opportunity to be included in the UGB like they had in 2018. Being forced to wait another six years for the opportunity to be included in the Metro UGB would be devastating for this wonderful community.

Thank you for your interest and consideration in this important issue. We are hoping Metro will vote in favor of the Sherwood West expansion request.

Sincerely,

Gwen Werger

August 22, 2024

Dear COO Madrigal,

First, I want to thank you for convening the year-long Urban Growth Report Stakeholder table. It created an opportunity to better understand the work done by Metro staff preparing the report, while also hearing from partner organizations about concerns and challenges. While I do think it helped build goodwill among regional partners who often feel frustrated by the process, it did also lay bare some of the places where there may be an opportunity for improvements.

Beyond this Growth Management Decision, Westside Economic Alliance looks forward to continued partnership with Metro Council and staff to identify those opportunities for improving the input, process and subsequent outcomes for our region.

POPULATION & HIGH GROWTH PROJECTIONS

Turning to the 2024 Urban Growth Report, it's important that we begin with the population estimates on which so much of this report rests. The early conclusion is that regional growth is slowing because Oregon's birth rates are among the nation's lowest. Given this data point, the report correctly concludes that net in-migration will be the primary driver of regional population growth. The report goes on to state, "Slowing population growth also mean slower job growth."

What the report fails to state clearly is that if net in-migration will be the primary source of regional population growth then our region's, and our state's, housing and economic future will be overly dependent on smart policy decisions that encourage growth.

It is to that end that Westside Economic Alliance highly encourages COO Madrigal, and subsequently the Metro Council, to adopt high growth population forecasts for our region. It is far better to plan for growth and not see it realized than it is to plan for decline and risk the underproduction of housing and jobs, adding pressure that results in another housing crisis or economic stagnation.

Just as we are seeing an out-migration of a certain segment of our population due to their concerns about public policy choices, we could create in-migration through the adoption of a different set of policy choices.

Adopting the high-growth population forecast will give Metro and the local jurisdictions more flexibility to meet our communities' needs and should be viewed as a prudent public policy decision.

EMPLOYMENT LANDS

According to the Urban Growth Report, Metro staff have forecasted a surplus of Industrial land supply with a current capacity of 5,950 acres and a 20-year projection of a surplus of between 450 and 7,450 acres. However, the report also highlights some of the realities on the ground that act as major detractors to the current capacity estimate: in particular slope and lot size.

Slope

Over the course of the Urban Growth Report roundtable, we heard from developers that Oregon Revised Statute applies the definition for "buildable land" for residential construction to commercial and industrial land. As such, we learned that slopes of up to 25% are considered legally "buildable" for the purposes of all employment land, yet commercial and industrial developers say they will not consider land buildable with more than a 7% slope grade. When challenged on this, staff identified 1,300 acres with a slope greater than 7% that were counted within the buildable land inventory. **We recommend COO Madrigal and the Metro Council amend the Employment Land forecast to reflect this reality**.

Lot Size

An additional concern with the gross figure of 6,000 acres of 'surplus' industrial land is lot size. According to the Urban Growth Report the average lot size is 3.8 acres with a median lot size of 1.7 acres.

According to the data of the currently vacant industrial land, here is the breakdown of available vacant lots by acreage:

- 545 lots are less than 1 acre = 148 acres
- 97 lots are 1-1.99 acres = 142 acres
- 72 lots are 2-2.99 acres = 178 acres
- 49 lots are 3 – 3.99 acres = 167 acres

- 27 lots are 4 – 4.99 acres = 127 acres
- 22 lots are 5 – 5.99 acres = 125 acres
- 10 lots are 6 – 6.99 acres = 63.5 acres
- 13 lots are 7 – 7.99 acres = 96 acres
- 11 lots are 8 – 8.99 acres = 101 acres
- 6 lots are 9 – 9.99 acres = 66 acres
- 22 lots are 10 – 14.99 acres = 271 acres
- 12 lots are 15 – 19.99 acres = 219.5 acres
- 4 lots are 20 – 24.99 acres = 164 acres
- 6 lots are 25 – 29.99 = 107 acres
- 12 lots are 30 acres or more = 594 acres

Given the overabundance of small sites and the fact that the current vacancy rate for industrial land is below 5 percent across the region, the reality is that the vast majority of this acreage could not be used to serve the industrial market.

We recommend that COO Madrigal and the Metro Council direct staff to work with industrial developers to identify a minimum lot size that is realistic for effective industrial development. Any lots below that lot size should be removed from the overall land supply calculation.

As mentioned in the draft Urban Growth Report, the data and analysis of industrial land supply is not the only information that the Council may consider when determining whether there is a need to expand the Urban Growth Boundary. They may also consider whether there is a regional need for industrial sites with specific site characteristics such as larger sized sites.

The Oregon Semiconductor Task Force recommended that in order to be competitive over the next 5-10 growth cycle, the state needed to identify the following development ready sites:

- Two (2) sites of 500+ acres for advanced R&D or production fabrication operations
- Four (4) sites of 50-100 acres for device manufacturers or equipment manufacturers
- Eight (8) sites of 15-35 acres for key suppliers to the ecosystem

And while this site list is a statewide recommendation, we know that industries will often create clusters. Indeed, in EcoNW's report (Appendix 9) they note:

> The Metro Region already has a strong cluster for semiconductors in Hillsboro with Intel's Gordon Moore Park at Ronler Acres Research Campus, which creates 1,000 patents a year. This existing strength in semiconductor manufacturing can position the region to capture other semiconductor activities, and semiconductors are half of the state's annual exports. The semiconductor boom in the 1990s was

precipitated by the state having 2000 acres of industrial land, which led to billions of dollars of investment and doubling the industrial employee count.

To prepare for the next influx of semiconductor activity, the region will need to have a supply of industrial land to support business growth and expansion. The Semiconductor Task Force's Industrial Lands Subcommittee found that the key site characteristics that the semiconductor prefers is a location near other semiconductor businesses and labor, parcels of at least 25 acres, and sites that have infrastructure in place to support development that can begin within 6 months to three years. The subcommittee identified a lack of land that met these criteria.

And, as noted on pages 55-56 of the Urban Growth Report:

[T]he Metro Council established the following policy in the Regional Framework Plan:

'1.4.6 Consistent with policies promoting a compact urban form, ensure that the region maintains a sufficient supply of tracts 50 acres and larger to meet demand by traded-sector industries for large sites and protect those sites from conversion to non-industrial uses.'

Since the 2017 update of the Regional Industrial Site Readiness inventory of large industrial sites, 15 large industrial sites have developed. Six of the sites that developed are over 50 acres in size. There are ten remaining sites over 50 acres inside the UGB. Of those, two sites have marine or airport use restrictions, leaving eight sites over 50 buildable acres inside the UGB that are available to the general industrial market.

And so, the Semiconductor Task Force, the EcoNW Report and Metro's own policy recommends additional land of at least 25 acres with a push to identify 'sufficient supply of tracts 50 acres or larger' to meet the industrial needs of the region. And yet the overwhelming majority of vacant industrial land is LESS THAN 25 acres. There is an imbalance in acreage lot size availability and without a recommendation to discount acreage too small for real industrial development, Metro Council could stagnate the region's ability to leverage generational federal and state investment potential.

SUPERSITING AUTHORITY

Per the passage of Senate Bill 4, Oregon's CHIPs Bill, Governor Kotek maintains super-siting authority through the end of 2024. Should the Governor choose to use this authority, we urge Metro Council to see this as an additive, rather than as a replacement for, an Employment Land expansion in the Growth Management Decision.

We urge Metro to consider the generational investments that may be lost should the Governor provide the extraordinary opportunity of a regional supersite for semiconductors but the region is unable to support that work due to a lack of available mid-size lots needed for a healthy cluster.

CITY OF SHERWOOD EXPANSION PROPOSAL

We enthusiastically and without reservation support the City of Sherwood's request for expansion without any conditions. While Metro may want to make recommendations or provide incentives to encourage certain kinds of growth, we trust the rigorous public engagement process that Sherwood has already conducted and trust that they will continue to engage their community to understand how to grow reasonably and responsibly.

Metro staff made clear during our roundtable convening that Metro is not a zoning organization. To that end, we ask Metro to allow the city to work with their residents in the coming years to decide what makes most sense for their community's needs. It is imperative that policymakers recognize that every jurisdiction in our region has their own unique community needs and that heavy handed policy making to try to make suburban areas mimic urban areas is unreasonable.

We encourage Metro to engage in the process, as other regional partners plan to do, to provide input about best practice and guidance for equitable outcomes. But beyond that, **COO Madrigal and the Metro Council should allow local jurisdictions to grow within their own boundaries in a way that best reflects the community they are working with their residents to create**.

To be clear we ask COO Madrigal, and subsequently the Metro Council to:

- Add 340 net acres of residential land to the UGB as proposed in the Sherwood West Concept Plan as proposed.
- Add 130 net acres of flex industrial land to the UGB as proposed in the Sherwood West Concept Plan as proposed.
- Add 135 net acres of commercial and hospitality land to the UGB as proposed in the Sherwood West Concept Plan as proposed.

CLOSING

Westside Economic Alliance wants to again appreciate the work of Metro staff who prepared this cycle's Urban Growth Report. It is a massive undertaking, and this year another layer of public engagement was added via the Urban Growth Roundtable that took a significant amount of staff time.

To close, Westside Economic Alliance on behalf of our members, ask **COO Madrigal and the Metro Council to lean into a Growth Management Decision that is aspirational**. Throughout the region we are hearing alarm bells going off that our growth in the coming

decades will be reliant on in-migration. In-migration can be super charged through smart policy choices. Job growth can be ramped up through smart policy choices. Land readiness can be increased through smart policy choices and investments.

Adopting a high growth population scenario is the first step to unlocking the potential for smart regional policy and investments that will help our region's employers and local jurisdictions realize economic growth and prosperity.

Thank you for your time and commitment to the growth of our region.

Sincerely,

Elizabeth Mazzara Myers, Executive Director

RE: Support from Oregon Business & Industry for Sherwood West Concept Plan as proposed

Dear Metro Council,

I am writing to express Oregon Business & Industry's strong support for the Sherwood West Concept Plan as proposed. The plan would add badly needed land for housing, industrial and commercial use to Sherwood's urban growth boundary.

Oregon Business & Industry (OBI) is a statewide association representing businesses from a wide variety of industries from all of Oregon's 36 counties. In addition to being the statewide chamber of commerce, OBI is the state affiliate for the National Association of Manufacturers (our Manufacturing Council of Oregon) and the National Retail Federation. Our 1,600+ member companies, more than 80% of which are small businesses, employ more than 250,000 Oregonians. OBI's primary mission is to strengthen the business climate in Oregon.

Oregon relies upon its businesses to provide jobs for Oregonians, tax revenue for government services and many of the other benefits required by vibrant and prosperous communities. Employers need the right conditions to generate jobs and prosperity, however. These conditions include available and affordable land for growth and for housing. Denied adequate land for growth, businesses will invest elsewhere, and the jobs, revenue and other benefits they provide will follow. Unable to find housing they can afford, potential employees will do likewise.

I and my colleagues at OBI talk regularly with our members about impediments to growth and success in Oregon. Almost without exception, they cite a lack of available and ready land for expansion as well as the state's exceptionally high housing costs. The high price of housing in Oregon is in large part a function of the limited availability of buildable land.

The shortage of land routinely costs Oregon jobs and revenue. Earlier this month, the U.S. Department of Energy announced that it would lend Lebanon-based Entek $1.2 billion to finance a factory in Indiana that is expected to generate more than 600 jobs when it opens in 2027. Entek President Kim Medford cited the availability of land in Indiana as one reason for the decision to expand outside of Oregon.

The Sherwood West Concept Plan addresses this widespread problem in the local community. It is the product of a thorough, two-year public process and enjoys the support of the community. I urge you to approve the plan as proposed, which calls for the addition of 340 acres of residential land to the UGB as well as 130 acres of flex industrial land and 135 acres of commercial and hospitality land. The Sherwood community has not been consulted about the proposed conditions of approval, and pursuing them could well erode public support.

The Sherwood West Concept Plan as proposed enjoys the support of the community and Sherwood City Council. It would add badly needed industrial and residential land and, by doing so, improve Oregon's competitiveness. I urge you to adopt it as proposed.

Thank you for the opportunity to comment.

Sincerely,

Angela Wilhelms
President and CEO
Oregon Business & Industry

CAUTION: This email originated from an External source. Do not open links or attachments unless you know the content is safe.

Please do not expand the UGB anymore. I'm in Wilsonville watching with disappointment the big single family homes being built in Frog Pond West. These homes are not only unaffordable, they're not the high density we need to stop sprawl and address the climate impacts of our communities.

In Wilsonville, we have an empty large parcel, right downtown, that is ripe for high density redevelopment. Much of the city is low rise strip commercial development. We need to remove barriers and create incentives to foster affordable, high density, vibrant mixed use developments within our cities, not to expand the UGB.

Please hold the line.

Respectfully,

Dave W

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

This household is very much opposed to expanding the Urban Growth Boundary in Sherwood.

According to the Metro's research, there is plenty of industrial land inside the existing UGB for another 20 years. We also have enough vacant land to accommodate new housing and jobs for years if it is planned and developed carefully.

We really enjoy living in Sherwood. It's a beautiful community and would hate to see all the agriculture disappear when it's not necessary.

Please don't expand the UGB.

Thank you.

Kathy Gadinas

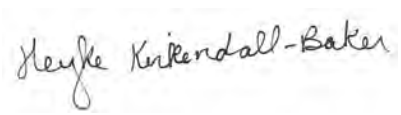
August 21, 2024

Lynn Peterson, Chair
Members of the Metro Council
Metro
600 NE Grand Ave.
Portland, OR 97232

Dear Chair Peterson and Members of the Metro Council,

The Sherwood Chamber of Commerce is a vibrant and active organization representing businesses in and around Sherwood with the primary goal of building a strong community. In that light, the Chamber especially appreciates the City of Sherwood's effort to create new business opportunities such as we currently see in the Tonquin Employment Area while also working to expand choices for people to live in Sherwood.

This same foresight is on display with the submittal to Metro of the Sherwood West concept plan, importantly funded in partnership with Metro. The thorough two-year planning process for both the Citizens Advisory Committee (CAC) and the Technical Advisory Committee (TAC) – which Metro representatives where a critical part of - has produced a concept plan that will realize a vision for housing and employment lands embraced by so many during this project.



We commend the work of CAC and TAC for creatively weaving the residential and business needs of current and future Sherwood residents into a unique plan that is created by and for our community. The 200-250 acres of potential employment lands contained in the plan makes a strong statement that the future viability of our community depends on a healthy mix of land uses that will encourage more businesses to locate in our great city while creating desirable communities for people employed by these new businesses to work and live in the city.

The Sherwood Chamber of Commerce supports the City's application and Metro's favorable consideration and adoption of the Sherwood West concept plan, moving forward with an Urban Growth Boundary (UGB) expansion. We appreciate the Metro Council partnering to help make Sherwood the best it can be for many years to come.

Sincerely,

Sherwood Chamber of Commerce

The Hon. Lynn Peterson, President
Metro Council
600 NE Grand Avenue
Portland, OR

RE: 2024 Urban Growth Report

Dear President Peterson and Councilors:

NAIOP, the Commercial Real Estate Development Association, is one of the leading organizations for developers, investors, owners & operators, brokers, and related professionals in office, industrial and mixed-use real estate throughout the United States, Canada, and Mexico. The Oregon Chapter's members represent a broad and diverse range of companies involved with commercial real estate activities in the Portland metropolitan area, including developers, owners, brokers, and managers, along with other professionals providing legal, finance, title, engineering, architectural, construction, and other services.

Thank you for the opportunity to comment on the draft 2024 Urban Growth Report which is a crucial element in planning for the future of commercial development in the region. Our testimony will focus on two areas:

- Strong support for the boundary expansion proposed by the City of Sherwood which includes our unequivocal endorsement of the findings and conclusions presented by EcoNorthwest in its *Sherwood West UGB Assessment* document found in Appendix 9;
- Concerns with the UGR's estimates of supply and capacity of industrial land

I. Support for Sherwood West UGB Expansion Proposal/Endorsement of EcoNorthwest Findings and Conclusions

NAIOP Oregon member representatives have been involved in Sherwood's planning process for the Sherwood West area for more than two years, and we very much appreciate the extensive time and effort the City has devoted to careful development of a plan that will provide much needed additional land for employment and housing. The Sherwood West Concept Plan includes land for housing, schools and civic facilities, park space, and 265 net acres for employment uses that would support about 4,500 new jobs. We strongly endorse the findings of ECONorthwest that this area has regionally

unique characteristics that would be very attractive to industrial development, including 40-to-50-acre parcels, minimal site aggregation, slopes under 5 percent, and access to Interstate 5.

Our industrial market members have long been well aware of ECONorthwest's finding that, unlike in the office and retail markets, vacancy rates for the industrial sector in the region are below 5%. This is an extremely low number and, with continuing strong demand for this type of space, has spurred a more than 20% increase in industrial rents over the last five years. These two trend lines are even more pronounced within Washington County, where the vacancy rate dipped to 2.5% in 2023 and rents increased 23%.

As ECONorthwest found, "A diverse regional market supply of sites is essential to maintaining an equilibrium in market pricing and to supporting a broad range of industries." Without such a supply, the Portland metropolitan region will be unable to compete with other national markets and will be passed over by employers looking for new locations and expansion opportunities.

The Sherwood West area fulfills this need quite well with its unique set of features as listed above by the ECONorthwest analysis. Also, it should be noted that Sherwood West is within an acknowledged Urban Reserve that was designated 14 years ago after an intensive public process to identify and compare parcels most suitable for UGB expansion and future urbanization. Expansion of the UGB to include Sherwood West is a logical and appropriate next step to ensure that the region is able to satisfy regional industrial land needs for the next twenty years.

II. Concerns with the UGR's estimates of supply and capacity of industrial land

A. Slopes and Parcel Size. According to the UGR, there are currently 5,950 acres of buildable industrial land within the region. This number, however, seriously overstates the realistic development potential for these lands since it includes properties with slopes of up to 25%, which is much steeper than is acceptable for industrial uses (the 25% slope standard is derived from Oregon Administrative Rules specifically pertaining only to residential land). A more accurate approach would be to use the acreage for "unconstrained" parcels shown on Table 5 of Appendix 6 which deducts those areas where 10% or less of the taxlot is up to a 7% slope. This amounts to 2,839 acres, but is also problematic since the average parcel size is 1.05 acres, much smaller than is typically seen for industrial development.

According to data from CoStar, since 2018 there have been 137 industrial buildings constructed within the UGB and Clark County. As shown in the table below, those 137 buildings had 21,834,448 total square-feet of net rentable area, with a total land area of 1,678 acres.

New Industrial Construction 2018-24 Within Portland UGB and Clark County, Washington	
Total Building Net Rentable Area	21,834,448 sq. ft.
Total Land Area	1,678 acres
Average Building Size	159,376 sq. ft.
Median Building Size	105,986 sq. ft.
Average Land Area	12.25 acres
Median Land Area	8.44 acres

As can be seen from these numbers, the average and median land area size of 12.25 and 8.44 acres for industrial developments over the last six years is far larger than the 1.05 acre average lot size seen in Table 5 of Appendix 6 in the UGR. This disparity is further reinforced by data presented in ECONorthwest's Sherwood West UGB Assessment (Appendix 9 of the UGR) regarding the size of industrial buildings constructed. According to the report, "Between 2019 and 2023, 7 million square feet of industrial buildings (sized 100,000 square feet or larger) were developed in the region across 33 buildings. This indicates that 39 percent of the industrial buildings built between 2019 and 2023 equal or are greater to 100,000 square feet, which shows the trend towards new industrial companies needing larger spaces."[1]

We would urge the Council to direct staff to develop recommendations for further reductions in projected industrial land capacity after taking into consideration the steep slopes and the extremely small average taxlot size of the buildable industrial acreage.

B. Projected Infill Industrial Development. A further problem with the 5,950-acre total amount of buildable industrial land is that 3,252 acres (55%) are projected to come from infill development of sites that are already considered developed. Only 2,574 acres (43%) are actual vacant, undeveloped sites. The infill projection is very aggressive for such remnant parcels and begs the question of what the historical rate of industrial infill has been.

We urge the Council to direct staff to produce this information so that it can be compared with projections for the future.

Thank you for the opportunity to comment on the Urban Growth Report and we appreciate the outreach efforts of your staff to brief in responding to our questions. Please let us know if we can provide any additional information.

Sincerely,

Kelly Ross
Public Affairs Consultant

2024 Urban Growth Management Decision: Metro Chief Operating Officer/Staff Recommendations

August 26, 2024

Metro respects civil rights

Metro fully complies with Title VI of the Civil Rights Act of 1964 that requires that no person be excluded from the participation in, be denied the benefits of, or be otherwise subjected to discrimination on the basis of race, color or national origin under any program or activity for which Metro receives federal financial assistance.

Metro fully complies with Title II of the Americans with Disabilities Act and Section 504 of the Rehabilitation Act that requires that no otherwise qualified individual with a disability be excluded from the participation in, be denied the benefits of, or be subjected to discrimination solely by reason of their disability under any program or activity for which Metro receives federal financial assistance. If any person believes they have been discriminated against regarding the receipt of benefits or services because of race, color, national origin, sex, age or disability, they have the right to file a complaint with Metro. For information on Metro's civil rights program, or to obtain a discrimination complaint form, visit oregonmetro.gov/civilrights or call 503-797-1890.

Metro provides services or accommodations upon request to persons with disabilities and people who need an interpreter at public meetings. If you need a sign language interpreter, communication aid or language assistance, call 503-797-1700 or TDD/TTY 503-797-1804 (8 a.m. to 5 p.m. weekdays) 5 business days before the meeting. All Metro meetings are wheelchair accessible. For up-to-date public transportation information, visit TriMet's website at trimet.org.

LIST OF ACRONYMS

The following is a list of acronyms used throughout this document.

COO: Metro Chief Operating Officer
CORE: Committee on Racial Equity
MPAC: Metro Policy Advisory Committee
MTAC: Metro Technical Advisory Committee
UGB: urban growth boundary
UGR: Urban Growth Report

A DELIBERATE APPROACH TO GROWTH

Under Oregon state land use law, the Metro Regional Government ("Metro") is charged with making decisions about whether to expand the urban growth boundary (UGB) in the greater Portland region. This communication from Metro's Chief Operating Officer contains the staff recommendation to the Metro Council regarding the need for a UGB expansion and the City of Sherwood's 2024 proposal to address that need.

The urban growth boundary has long been one of Metro's most important tools for focusing the development of new homes and businesses in existing downtowns, main streets, and employment areas. Residents of the region have told us time and again to hold this priority: make the most of the land inside the boundary so that outward growth on the urban edge only happens when it is necessary and provides benefit for the entire region. This deliberate approach is crucial for strengthening existing communities, protecting farms and forests, and reducing greenhouse gas emissions.

According to state law, Metro is required to make a decision about whether to expand the UGB at least every six years. In making these decisions, Metro must provide up-to-date information about demographics, population and employment growth, development trends, and estimates of buildable land inside the UGB. This thorough assessment of whether there is a regional need for expanding the UGB is not only required by law – it is central to the greater Portland region's identity. When new growth occurs at the edges of the urban growth boundary, it should be necessary, planned, and deliberate.

Today, the greater Portland region is facing a housing shortage crisis. In addition, there is agreement across the region that attracting more family-wage industrial jobs will help our communities thrive. However, it is also clear that simply providing more land won't necessarily result in jobs and housing. Experience has shown that certain conditions must be in place to ensure that UGB expansion areas produce housing and jobs in a near term time frame. Time and time again we have seen that development occurs successfully where there is a commitment from city leaders and community members, where there is a plan for paying for needed infrastructure, and where there is market demand. If these ingredients aren't present, new urban growth is extremely slow if it happens at all.

For those reasons, in 2010 the Metro Council adopted a policy to only expand the UGB into urban reserve areas that have been concept planned by a local government and that demonstrate readiness to be developed. In the current 2024 UGB cycle, the City of Sherwood is the only city that has prepared a concept plan and proposed a UGB expansion, and they have shown that these elements are in place. Sherwood's readiness for new urban growth provides an opportunity to address the regional land needs identified in the draft 2024 Urban Growth Report (UGR).

Consequently, Metro staff recommend that the Metro Council consider expanding the UGB to include the Sherwood West urban reserve. Staff further recommend that the Council consider placing conditions on this expansion to ensure that the land is used efficiently and will support regionally identified needs. These conditions could reinforce the City of Sherwood's concept plan for the expansion area by improving housing affordability and protecting industrial lands so that they produce well-paying jobs in the manufacturing sector.

The information that follows sets out the reasoning behind this recommendation and lays the groundwork for the Metro Council to consider potential conditions of approval.

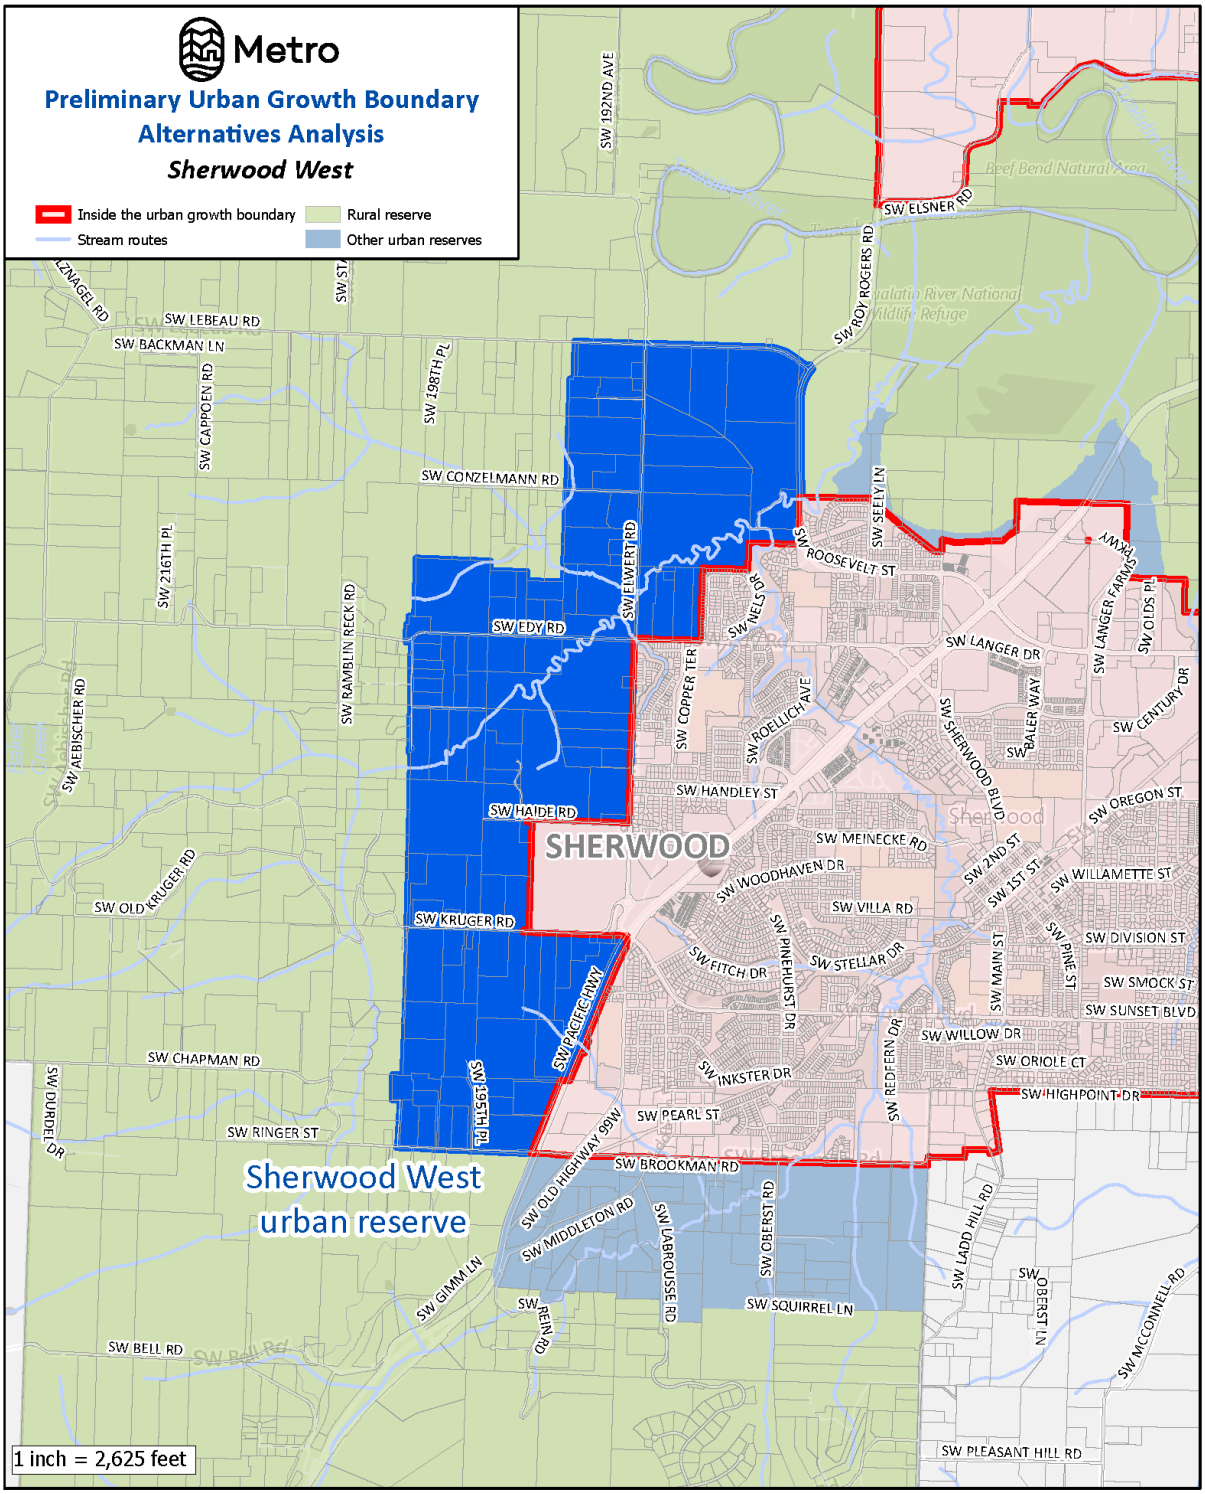
ADAPTING AND IMPROVING OUR GROWTH MANAGEMENT PROCESS

Our region's deliberate approach to growth has paid dividends for people who call this region home by helping to maintain a unique connection to nature and a high quality of life. However, as the world changes, our approach to managing growth must change too. In response to evolving needs and conditions over the years, Metro and its partners have collaborated to make improvements to the urban growth management process such as:

- Working with our regional partners to identify designated urban reserves and rural reserves that provide certainty about where the UGB may or may not be expanded over the coming decades.
- Using a 'range' forecast to acknowledge that there is inherent uncertainty in estimating future growth over the next 20 years.
- Encouraging more timely housing and business development in UGB expansion areas by requiring that a local jurisdiction complete a concept plan for an urban reserve before the area is brought into the boundary.
- Providing grant funding to cities to support local concept planning and comprehensive planning efforts.
- Adopting a fast-track expansion process for adding large industrial sites to the UGB to respond to near term opportunities.
- Providing an off-cycle UGB amendment process to address unanticipated non-residential land needs such as those identified by school districts.
- Creating a mid-cycle UGB process to be responsive to city proposals for addressing unanticipated residential land needs between the designated 6-year scheduled approval process.
- Clearly specifying in Metro's Code the factors that cities must address in UGB expansion proposals.
- Completing a land exchange in 2023 that brought concept planned land within an urban reserve inside the UGB and removed unplanned land to ensure more of the land inside the UGB will produce housing.

- Continually improving technical analyses to reflect new practices, including how to forecast redevelopment potential and estimate current and future housing needs.
- Examining regional needs for industrial lands with specific site characteristics and applying that information to evaluate expansion proposals.
- As with the forecast, using a range of estimates to acknowledge the inherent uncertainty in predicting growth capacity within the UGB.
- Increasing transparency by convening the 2024 Urban Growth Report Roundtable, comprised of diverse expertise and interests.
- Elevating youth perspectives and building future leaders by convening a UGB Youth Cohort in 2024.

One of the characteristics that makes our region unique is our ability to collaborate and work together to adapt and modernize our systems to respond to changing conditions.



CITY OF SHERWOOD READINESS

Based on the draft 2024 Urban Growth Report (UGR) in addition to discussions at the Metro Council, MPAC, MTAC and the Urban Growth Report Roundtable as well as comments received during the public comment period, Metro staff believe there is a regional need to expand the UGB to provide more land for housing and job growth. Staff also encourage the Metro Council to set clear expectations for areas added to the boundary, so the expansion addresses not just local interests, but regional needs.

The City of Sherwood has completed extensive work to propose a UGB expansion for the Metro Council's consideration. The expansion proposal indicates that Sherwood is ready to take meaningful steps toward getting homes and businesses built in the proposed UGB expansion area. The Sherwood West Concept Plan includes proposed land uses to support up to approximately 5,500 housing units and 4,500 jobs. For those reasons, staff recommend that the Metro Council consider expanding the region's UGB to include the Sherwood West urban reserve.

Considerable work remains if the Metro Council chooses to add this area to the UGB. As part of this recommendation, staff encourage the Council to identify conditions ensuring that land added to the UGB will address a range of housing needs and provide industrial sites likely to attract family wage manufacturing jobs.

Figure 1: Recommended UGB expansion in the Sherwood West urban reserve

The information on this map was derived from digital databases on Metro's GIS. Care was taken in the creation of this map. Metro cannot accept any responsibility for errors, omissions, or positional accuracy. There are no warranties, expressed or implied, including the warranty of merchantability or fitness for a particular purpose, accompanying this product.

The following pages of this report describe additional considerations that inform this staff recommendation.

THE REGION NEEDS MORE HOUSING OF ALL TYPES

It is well known that there is a national housing shortage, as well as housing shortages in Oregon and in the greater Portland region. This is reflected in housing prices and rents that remain high and in the growing number of people experiencing housing instability or houselessness. With the expectation that population growth will continue in our region – irrespective of the rate of that growth – we need more housing to be built.

The vitality of every community depends on having a diverse range of people from all backgrounds doing a broad range of work: teachers, contractors, daycare providers, nurses, and grocery store workers to name a few. As home prices rise and demand outstrips supply, we need to do more to provide housing opportunities for these essential workers in every community. Likewise, we need to provide housing options that suit people from all life stages: students seeking rental housing, growing families that need an additional bedroom, retirees seeking to downsize but remain in their community.

The primary question addressed by the Urban Growth Report is not just whether more housing is needed but whether there is enough space inside the existing UGB to meet that need. Land already available within the UGB provides opportunities for a diverse range of housing. The region's track record, as documented in the 2024 UGR, shows that there is considerable market demand for urban housing close to transit, services, and amenities. Recent statewide allowances for 'middle housing' such as townhouses and duplexes are producing results, and we expect that more of these housing options will be provided in the future.

The draft UGR also indicates that, depending on our assumptions about the future, there is potentially a need for additional land to meet the region's need for additional housing. As we consider bringing new areas into the UGB, we must make sure those areas will address the needs of a wide variety of households.

REGIONAL NEED FOR UGB EXPANSIONS FOR HOUSING

Under state law, the UGB can only be expanded when there is a demonstrated regional need for additional capacity to accommodate the next 20 years of forecasted growth. The analysis in the draft 2024 UGR's range of growth estimates shows that the Metro Council has the latitude to determine that a need for more land exists.

Housing capacity

The draft 2024 UGR describes a range of possible housing growth capacity currently available within the urban growth boundary. The specific amount of housing capacity available within that range depends on expected market conditions and development responses. Consistent with the recommendation to plan for the baseline forecast described in the following

paragraph, staff recommend capacity assumptions that fall within the middle of the ranges established in the draft 2024 UGR.

For the 2024 growth management decision, staff recommend that the Metro Council base their decision on a finding that there is capacity inside the UGB for 175,500 additional homes. Details about that assumed growth capacity can be found in Attachment 1 to this recommendation and in the draft 2024 UGR.

Household forecast and capture rate

As a basis for this growth management decision, staff recommend that the Metro Council plan for the baseline forecast for the seven-county Metropolitan Statistical Area (MSA) for the 2024 to 2044 period. The baseline forecast describes the most likely amount of growth for the region. This means planning for approximately 315,000 more people and 203,500 more households in the MSA.

The UGB "capture rate" is used to describe the share of seven-county household growth that is expected to occur in the Metro UGB. For discussion purposes, the draft 2024 UGR scenarios assumed a 70 percent UGB capture rate. Staff have heard partner opinions and share optimism that the region will regain its reputation as an attractive place to live and work. Staff therefore recommend that the Metro Council consider planning to accommodate slightly more than 70 percent of the MSA's household growth in the Metro UGB.

Notwithstanding recent declines after the pandemic-induced recession, this would represent a continuation of the historic upward trend in Metro's UGB capture rate for household growth. Adding the Sherwood West urban reserve to the UGB can provide a means of achieving this slightly higher capture rate by attracting household growth that may otherwise occur outside of the Metro UGB.

Staff recommend that the Council plan for 176,500 to 180,800 additional homes in the Metro UGB to meet current and future housing needs. Additional details about how those numbers are derived can be found in Attachment 1 and in the draft 2024 UGR.

Housing capacity deficits

Comparing UGB housing growth capacity (175,500 homes) and housing needs (176,500 to 180,800 additional homes) indicates a potential deficit of capacity for 1,000 to 5,300 homes. Additional details about those deficits can be found in Attachment 1.

Depending on the mix of housing it includes, the Sherwood West urban reserve could meet the range of identified regional housing capacity deficits. The adopted Sherwood West Concept Plan describes a range of 3,117 (9.2 dwelling units/acre) to 5,582 (16.4 dwelling units/acre) homes.

PLANNING FOR JOB GROWTH

Future job growth requires more workers to fill those jobs. This means that our job growth forecast should be generally consistent with our expectations for population growth. Consequently, as with population and household growth, staff recommend planning for the baseline employment forecast, which estimates the most likely growth scenario.

Today, there are approximately 1,261,200 jobs[1] in the seven-county MSA. Staff recommend planning for an increase of approximately 110,000 jobs, for a total of 1,371,400 jobs in the MSA by the year 2044.

Based on long-term trends, staff recommend planning for 75% of the new MSA-level jobs in the Metro UGB.[2] Today, there are approximately 996,600 jobs in the Metro UGB. By 2044, an additional 82,500 new jobs are anticipated, for a total of 1,079,000 jobs within the Metro UGB.

NEED FOR LARGE INDUSTRIAL SITES TO ACCOMMODATE HIGH-TECH MANUFACTURING GROWTH

Using the baseline employment forecast, the draft 2024 UGR identifies a surplus of 4,550 acres of industrial land in the region. However, as also explained in the draft UGR, most of the region's industrial land supply consists of smaller parcels with an average lot size of 3.8 acres and a median lot size of 1.7 acres. Although these smaller industrial spaces are in demand, they cannot serve the needs of the entire industrial market. The draft UGR describes a shortage of larger industrial sites for the expansion of existing businesses and recruitment of companies from outside the region; in particular, there is a lack of unconstrained parcels with relatively flat slopes and proximity to transportation facilities that could be aggregated into larger 50+ acre industrial sites.

The 2022 Oregon Semiconductor Taskforce Report identified a statewide need for four sites of 50 to 100 acres suitable for high tech manufacturers. As described in the draft UGR, the greater Portland region is the heart of the state's high-tech economy; however, the current regional inventory does not include enough industrial sites with characteristics that are suitable for addressing this need.

High tech manufacturing has become a major focus of incentive programs from the federal government designed to increase domestic production of critical technologies. Our region has significant competitive advantages in designing and manufacturing technologies to help adapt to and mitigate climate change and improve global connectivity. Staff analysis indicates that our region lacks enough available and unconstrained sites of sufficient size, slope, and proximity to

[1] These figures are for non-farm jobs because the task of growth management decisions is to estimate land need for urban uses.

[2] The draft 2024 UGR employment land demand analysis incorporates different UGB capture rates for different sectors. 75% is the historic UGB capture rate for the 1979-2022 period across all non-farm sectors.

existing transportation facilities and high-tech manufacturing clusters to allow for growth of these critical industries over the next 20 years. A lack of available sites would be a limiting factor in our region's ability to take advantage of historic incentives to support economic development.

Under Statewide Planning Goal 14, Metro is authorized to expand the UGB onto land that is suitable to meet a particular identified need based on specific site characteristics. Staff recommend that, based on the necessary site characteristics described above, the Metro Council address a need for two 50+ acre sites by expanding the UGB to include the mixed employment area in the north end of the Sherwood West concept plan. Staff further recommend that the Metro Council consider conditions of approval to protect these important large sites to help ensure that they will address the identified need.

ADDITIONAL LANDS TO SUPPORT COMMERCIAL JOB GROWTH

The draft 2024 UGR identified a baseline deficit of 320 buildable acres to support expected commercial job growth. Sherwood has included at least 135 acres for commercial employment in its concept plan. Staff recommend that the Metro Council address the commercial land need described in the UGR by expanding the UGB to include the Sherwood West urban reserve. The remaining deficit beyond that addressed by a potential expansion is within the margin of error for a long-range land need analysis. To the extent that there may be additional demand for commercial land, staff expect that demand would be addressed through additional redevelopment.

POTENTIAL UGB CONDITIONS OF APPROVAL

With the goal of expanding housing choices and reducing housing costs, protecting industrial sites, and continuously improving engagement for planning efforts, staff recommend that the Council consider conditions on the proposed UGB expansion. The bullets below provide suggestions for several topics that could be addressed by conditions of approval. Generally, these recommended conditions reinforce the work that the City of Sherwood has done in its Sherwood West Concept Plan. For example:

- In order to achieve a mix of housing types, the Metro Council could establish an expectation for a minimum number of homes. This could fall within the range proposed by the City of Sherwood's adopted Sherwood West Concept Plan (base density of 9.2 units per acre to a maximum density of 16.4 units per acre). The difference between these reflects the actualization of "missing middle" housing allowed by HB 2001 (2019). The city of Sherwood would determine housing mix details in their comprehensive planning process.
- The greater Portland region is in an affordable housing crisis. We need more housing options for people who make less than the region's median income (currently $116,900 for a family of four). Sherwood elected officials and staff have expressed an interest in

creating opportunities to live and work in their community. That will require us to work together to ensure housing affordability and not just leave it up to the market. The Metro Council could set out conditions to guide this work.

- Staff's recommendation to create and protect large industrial sites is intended to achieve widely shared goals to grow our region's high-tech manufacturing sectors. The Metro Council could consider specific goals or restrictions to make sure this happens.
- Creating inclusive communities means bringing a variety of perspectives into the planning process. Staff recommend a broad-based approach to community engagement that goes beyond collecting input from those who currently live near the expansion or those who have typically engaged in city planning – and include community members and Community Based Organizations representing historically marginalized groups. Staff also recommend inviting interested Tribes to engage in the city's planning processes.

ADDITIONAL RECOMMENDATIONS

Improve how we assess equity in growth management decisions

For many years, Metro has had the goal of addressing racial equity in its work, including urban growth management decisions. We've tried several approaches including:

- Using the Regional Equity Atlas to provide decision makers with contextual information.
- Requiring cities proposing expansions to describe how they are working to advance racial equity.
- When we've expanded the UGB, requiring and supporting cities in conducting broad-based community engagement for their comprehensive planning.
- Assessing equity outcomes in past UGB expansion areas.

In keeping with our tradition of always seeking to learn and do better, staff recommend that Metro Council direct staff to work with its advisory committees to identify possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to complete equity assessments when concept planning for new urban areas.

Consult with Tribes

Tribes are independent sovereigns with inherent powers of self-government and relationships with the U.S. government that derive from treaties, federal law and executive orders. These Federal-Tribal relations are political and do not derive from race or ethnicity. Treaties are listed among the elements that make up "the supreme law of the land" under Article VI of the U.S. Constitution.

The lands now known as the greater Portland metropolitan area are part of the aboriginal homelands, traditional use areas and trade networks of numerous Tribes. For millennia, Indian people resided throughout the Willamette Valley and along the Willamette and Columbia Rivers

and their tributaries in traditional villages, permanent communities and seasonal encampments. The relationship of Tribes, their lands and interests extend from time immemorial to the present day and beyond. Each Tribe's interests are distinct. These interests may overlap and intersect with the urban growth boundary in various ways.

Metro and other local governments need to do a better job of consulting with Tribes on growth management and land use issues that have the potential to impact tribal interests and priorities such as treaty rights, the protection of sensitive cultural resources, or enhancing the welfare of tribal members residing in urban areas off reservation. For that reason, staff recommend that Metro Council direct staff to work with interested Tribes, Metro's Tribal Affairs program and its advisory committees to identify possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to consult with Tribes when concept planning and comprehensive planning new urban areas. Staff also recommend that Metro identify opportunities to ensure and improve Metro's Urban Growth Report technical analyses are inclusive of relevant tribal priorities, expertise, and data sets.

Revise how we accounted for slopes on employment lands

Recent discussions at the UGR Roundtable and the Metro Policy Advisory Committee (MPAC) have raised questions about the assumptions staff make when inventorying buildable employment lands. We have heard questions about our assumed thresholds for steep slopes and whether some of those lands are viable for development.

Based on their professional expertise and review of other jurisdiction's work, Oregon Department of Land Conservation and Development staff have recently advised Metro to use a 10% slope threshold when inventorying buildable employment lands. Staff will revise the UGR analysis of employment land capacity to follow that advice. That revised analysis will be included in the final UGR presented for Metro Council adoption later this year.

Using this more conservative slope threshold does not change the analysis in the draft 2024 UGR that the baseline forecast indicates there is enough industrially-zoned land inside the UGB to match generally expected job growth, at least before assessing a more specific need for additional land with particular site characteristics. Most importantly, it doesn't change the fact that we collectively need to focus on the investments and actions necessary to make sure more of these employment lands are shovel-ready to capitalize on economic development opportunities. That includes necessary regional discussions about site aggregation, brownfield remediation, infrastructure financing, zoning changes, incentive programs and more.

Update the region's vision for its future

Our region had the foresight 30 years ago to adopt the region's Future Vision and 2040 Growth Concept. These long-range plans helped guide how greater Portland has responded to population growth in a way that reflects shared community values. The Growth Concept has

served us well and has positioned us to address the challenges of climate change and racial equity, but we know there's more work to be done to prepare for these and other future issues.

A lot has changed since the region adopted the Future Vision and the 2040 Growth Concept. Staff will bring a work program to Metro Council to renew the Future Vision and 2040 Growth Concept in Fall 2024. This work will help address many, though not all, topics and potential actions that came up while developing this urban growth management recommendation.

This work program should include an assessment of how these existing plans have performed for the region's residents: what has worked well or turned out as envisioned, and where there is still work to do or turned out differently from the vision. While we believe the fundamentals of the Vision and Growth Concept are still relevant, it is essential to demonstrate this through study.

Planning for 25 and 50 years in the future also requires understanding where today's trends may potentially take the region. The work program should include investigation of how climate change, demographics, technology, and other topics will change in the coming decades and how visioning can prepare the region to adapt to these shifts.

The updates of these long-range plans must also capture topic areas not currently addressed in the 1995 versions of these documents that are of greater importance and interest today. These include, but are not limited to: racial equity, climate resilience and adaptation, arts and culture, anti-displacement strategies, and Tribal relations. Updates must also address how Metro's purview has changed since 1995 to encompass major roles in the region's housing and parks and natural areas.

PUBLIC COMMENTS

Metro held a public comment period from the release of the draft UGR on July 9 through August 22. 349 survey responses were received during this period. We heard a variety of viewpoints about the draft Urban Growth report and the City of Sherwood's expansion proposal. Themes from comments about the expansion proposal include:

- Optimism about future growth potential, including the potential for a resurgence of high-tech manufacturing
- Interest in more housing and job opportunities in Sherwood, including housing choices for seniors, young families and other demographic groups
- Concern about the impacts of a potential UGB expansion on traffic, with the lack of transit options available in Sherwood
- Concern about impacts on farmland and agricultural activities
- Importance of housing affordability
- Concern about impacts on the environment and climate change
- Concern about impacts of new development on existing public infrastructure leading to tax increases for current residents
- Concern about potential impacts on schools

- Recommendation to use land within the UGB before expanding

We also received input about the methodology of the draft UGR. Themes include: suggestions for different approaches to the buildable land inventory, population projections, and density estimates.

These comments highlight the variety of issues that need to be balanced by the UGR. While this staff recommendation does not address every technical topic raised, it acknowledges that the UGR is a point-in-time document that seeks to balance interests and provide a reasonable range of estimates for the Metro Council to determine whether to expand the UGB and accept the City of Sherwood's proposal.

TIMELINE (SUBJECT TO CHANGE)

August 26, 2024:	Release COO recommendation
August 28, 2024:	MTAC discussion of COO recommendation and public comment themes
September 5, 2024:	Council work session on COO recommendations and public comment themes; (*full public comment summary provided at Council meeting*)
September 11, 2024:	MPAC discussion of COO recommendation and recommendations to Council; request any final MTAC advice
September 18, 2024:	MTAC advice to MPAC, if requested

ATTACHMENT 1: HOUSING CAPACITY, NEED, AND DEFICIT ASSUMPTION DETAILS

The tables below include specific numbers, but long-term estimates cannot be expressed this precisely. For that reason, the final totals are rounded to the nearest hundred.

Table 1: Recommended housing capacity assumptions (Metro UGB, 2024-2044)

	UGB Capacity Assumptions (number of homes)			
	single-detached	middle housing	multifamily	Total
Vacant land (larger mix of single-unit detached)	34,944	13,228	42,970	91,142
Redevelopment (Baseline)	12,292	11,727	24,382	48,400
Concept plan areas and planned development on vacant land	9,096	6,662	4,138	19,896
Other planned redevelopment	135	172	9,830	10,137
Office-to-residential conversion (baseline)	-	-	1,000	1,000
ADUs and middle housing conversion/infill (low)	-	4,955	-	4,955
Total UGB capacity (rounded)	**56,500**	**36,700**	**82,300**	**175,500**
Capacity housing mix	32%	21%	47%	100%

Table 2: Recommended Metro region current and future housing need assumptions (2024-2044)

7-county MSA baseline household growth (2024-2044)	203,530
Future household growth in Metro UGB (70% to 72% Metro UGB capture)	142,500 to 146,500
Add 5% vacancy rate (to convert future households to homes)	7,100 to 7,400
Subtotal of UGB future housing needs (number of homes)	149,600 to 153,900
Add current housing needs (underproduction, houselessness, 2nd and vacation rentals)	26,953
Total current and future UGB housing need (2024-2044, rounded)	176,500 to 180,800

Your testimony

Hello, I'm writing about proposed changes to the Metro urban growth boundary. I am opposed to expanding the UGB in the Sherwood area. I've recently moved here from Austin Texas, which is filled with similarly built low-density housing built at the edge of the UGB. We should not be imitating the awful civic policies of Texas, as they result in ever-increasing levels of traffic congestion and car pollution. Austin, Houston, Dallas, San Antonio: all of these cities were dense and vibrant (exactly the way Portland Metro currently is) and now? Every Texas city is a hollowed-out shell filled with highways and surrounded by an ever expanding ring of low density suburbs. We should not be copying those oil-loving morons. Please do not expand the UGB.

Is your testimony related to an item on an upcoming agenda? *	Yes

RE: Sherwood West Housing Estimates and Conditions of Approval

Dear Chair Kehe and MTAC Members,

The Sherwood West Concept Plan is the result of a 2-year planning process about growth alternatives for our community that included extensive input from community members, property owners, business owners, and public service providers. The resulting Concept Plan proposes a complete community with a range of housing and employment types connected by system of parks, trails, and open space. The Sherwood West Concept Plan demonstrates how Metro's Urban Reserve Area 5B can be incorporated into the fabric of the city and region in a manner that reflects the strong sense of community and livable neighborhoods our region is known for.

The City's proposal received letters of support from key public agencies and service providers including: Washington County, Clean Water Services, TriMet, Tualatin Valley Fire & Rescue, Sherwood School District, and Port of Portland. The letters of support demonstrate that public services can be provided to Sherwood West, and that the expansion area can support housing and job production that our region desperately needs.

The Portland region is experiencing a housing shortage crisis. The severe shortage of housing has increased prices and reduced affordability for all metro residents. Between 2017 and 2022, our region experienced a 50.4% increase in homelessness. The Sherwood West Concept Plan will help address this shortage by planning for 3,117 new residential units (9.2 units per net acre) including mid-rise apartments, missing middle housing, and single-family attached and detached residences. The Sherwood West Citizens Advisory Committee (CAC) provided direct and detailed input on the housing plan for Sherwood West to meet the needs of Sherwood and the Metro region. The housing plan includes:

- Zoned Density Range 6.3 to 9.2 units per net acre
- Overall Residential Density of 9.2 units per net acre
    - This is the estimated density at full build out of Sherwood West
- Total Housing Estimate of 3,117 new units
- Minimum of 43% middle and multi-family units
- Additional density permitted pursuant to HB 2001 (2019)
- Additional density permitted pursuant to SB 1537 (2024)

While the overall residential density is estimated at 9.2 units per acre, the final resulting density in Sherwood West is likely to be higher due to the allowances of HB 2001 (2019) and SB 1537 (2024).

The City of Sherwood supports a recommendation from the Metro Technical Advisory Committee for Sherwood West to accommodate 9.2 units per acre or 3,117 units.

Sincerely,

Eric Rutledge
Community Development Director
City of Sherwood

Your testimony

I think Metro should focus on improving quality of life for all residents through using data on life expectancy by zip code, household costs and affordability, and age-friendly communities. I don't want to expand the urban growth boundary.

Metro can ensure that the region builds the housing its residents need, where they need it, and at reasonable price points by focusing development and redevelopment in existing vacant and underused lands, where there is already public investment in infrastructure.

Metro can support different kinds of transportation options that lower air and carbon pollution, make life less expensive for residents, and reduce congestion and driving times.

Our region's resources and low weather extremes offer a position of strength, but only if Metro stewards them well.

I'm confident that the quickest way to regional success involves building upon the area's existing footprint.

Thank you so much for considering this.

Is your testimony related to an item on an	Yes

Minutes

Thursday, September 12, 2024

10:30 AM

Metro Regional Center, Council chamber and https://zoom.us/j/615079992 (Webinar ID: 615079992) or 888-475-4499 (toll free)

Council meeting

This meeting will be held electronically and in person at the Metro Regional Center Council Chamber.
You can join the meeting on your computer or other device by using this link: https://zoom.us/j/615079992 (Webinar ID: 615 079 992)

1. Call to Order and Roll Call

Council President Peterson called the Metro Council Meeting to order at 10:32 a.m.
Councilor Nolan was present from 10:48 a.m.

Present: 6 - Council President Lynn Peterson, Councilor Christine Lewis, Councilor Juan Carlos Gonzalez, Councilor Mary Nolan, Councilor Gerritt Rosenthal, and Councilor Duncan Hwang

Excused: 1 - Councilor Ashton Simpson

2. Public Communication

Public comment may be submitted in writing. It will also be heard in person and by electronic communication (video conference or telephone). Written comments should be submitted electronically by emailing legislativecoordinator@oregonmetro.gov. Written comments received by 4:00 p.m. the day before the meeting will be provided to the council prior to the meeting.

Those wishing to testify orally are encouraged to sign up in advance by either: (a) contacting the legislative coordinator by phone at 503-813-7591 and providing your name and the agenda item on which you wish to testify; or (b) registering by email by sending your name and the agenda item on which you wish to testify to legislativecoordinator@oregonmetro.gov. Those wishing to testify in person should fill out a blue card found in the back of the Council Chamber. Those requesting to comment virtually during the meeting can do so by using the “Raise Hand” feature in Zoom or emailing the legislative coordinator at legislativecoordinator@oregonmetro.gov. Individuals will have three minutes to testify unless otherwise stated at the meeting.

Council President Peterson opened the meeting to members of the public wanting to testify on non-agenda items.

There were none.

3. Consent Agenda

3.1 Consideration of the August 1, 2024 Council Meeting Minutes

Attachments: Minutes

Council President Peterson called for a motion to approve the Consent Agenda.

A motion was made by Councilor Gonzalez, seconded by Councilor Rosenthal, to approve the Consent Agenda.
The motion carried by the following vote:

Aye: 6 - Council President Peterson, Councilor Lewis, Councilor Gonzalez, Councilor Nolan, Councilor Rosenthal, and Councilor Hwang

Excused: 1 - Councilor Simpson

4. Ordinances (First Reading and Public Hearing)

4.1 **Ordinance No. 24-1518,** For the Purpose of Annexing to the Metro District approximately 6.94 Acres in Hillsboro on the North Side of NE Schaaf St at the intersection with NE 62nd Ave

Attachments: Ordinance No. 24-1518
Staff Report
Exhibit A
Attachment 1

Council President Peterson introduced Ordinance No. 24-1518 and called on Carrie MacLaren, Metro Attorney, to read the procedural requirements for the next portion of the meeting.

Staff Presentation

Glen Hamburg explained that the territory on the North Side of NE Schaaf St. was added to Urban Growth Boundary in 2004 (Metro Ordinance 04-1040B). He shared that the City of Hillsboro is scheduled to hold a public hearing to consider annexing the territory, which would rezone it for urban industrial use. The property is currently within Washington County's land use jurisdiction, and owners of the territory

have consented to the proposed annexation.

4.1.1 Public Comment for Ordinance No. 24-1518

Council President Peterson opened the meeting to members of the public wanting to testify on Ordinance No. 24-1518.

There were none.

Councilor President Peterson closed the public hearing, and second consideration was set for September 19, 2024.

5. Ordinances (Second Reading and Vote)

5.1 **Ordinance No. 24-1517** For the Purpose of Amending Metro Code Chapter 2.19.120 and Repealing Metro Code Chapter 2.19.140 To Update Procedures For Metro-Administered Community Enhancement Committees and to Sunset the North Portland Rehabilitation and Enhancement Committee

Attachments: Ordinance No. 24-1517
Exhibit A
Staff Report

Council President Peterson introduced Ordinance No. 24-1517, For the Purpose of Amending Metro Code Chapter 2.19.120 and Repealing Metro Code Chapter 2.19.140 To Update Procedures for Metro-Administered Community Enhancement Committees and to Sunset the North Portland Rehabilitation and Enhancement Committee.

Council President Peterson stated that the first reading and public hearing for Ordinance No. 24-1517 took place on Thursday, September 5, 2024, and explained that the code change updates the recruitment process for Metro-Administered Community Enhancement Committees in line with the 2030 Regional Waste Plan and Metro's Strategic Plan to advance racial equity, as well as repeals the North Portland Rehabilitation and Enhancement Committee

because the program is no longer in existence.

Council President Peterson invited Noelle Dobson, Community Enhancement Grant Program Manager, to answer questions from the Council.

Councilor Rosenthal inquired about the wording of the original document, which Dobson stated was resolved in the current legislation.

Seeing no further discussion, Council President Peterson called for a motion to approve the Ordinance No. 24-1517.

A motion was made by Councilor Gonzalez, seconded by Councilor Nolan, that the Ordinance be approved.
The motion carried by the following vote:

Aye: 6 - Council President Peterson, Councilor Lewis, Councilor Gonzalez, Councilor Nolan, Councilor Rosenthal, and Councilor Hwang

Excused: 1 - Councilor Simpson

6. Other Business

6.1 2024 Urban Growth Management: Chief Operating Officer Recommendations

Attachments: Staff report
Attachment 1
Attachment 2

Council President Peterson called on COO Marissa Madrigal to open the presentation on the 2024 Urban Growth Management: Chief Operating Officer Recommendations. Staff pulled up the 2024 Urban Growth Management: COO Recommendations slides to present to Council.

Staff Presentation

COO Marissa Madrigal conveyed that the COO/Staff Recommendation is aligned with Metro's broader goals and

seeks to balance a variety of perspectives. She expressed that the recommendations are ultimately suggestions and stated the goal of hearing the Council's initial reactions to the proposal of bringing Sherwood West inside the Urban Growth Boundary.

COO Madrigal introduced Planning, Development, and Research staff Eryn Kehe (she/her) and Ted Reid (he/him) to further present on the topic. Kehe shared the timeline for committee discussions and introducing legislation to the Council by the end of the year. She highlighted the major themes from the public comment survey, such as affordable housing. Reid stated that the majority of growth will occur within the current boundary. Regarding the proposed expansion, he described the specific need for large industrial sites and adding the urban reserve to the boundary. Kehe requested that Councilors share their initial thoughts on the topics and any conditions of approval, noting that a public hearing was scheduled for September 26, 2024.

Council Discussion

Councilor Nolan inquired about the analysis on the deficit of affordable housing and transportation-adjacent housing.

Kehe responded that the population forecasts, including demographic factors, demonstrated a need for single family housing and middle housing.

Reid explained that lifestyle and housing preferences factor into the assessment, and the need for additional land is related to need for certain types of housing.

COO Madrigal remarked that the deficit is considered in the calculations.

Councilor Hwang inquired about the broader goals and values of the expansion, such as the overall vision for Sherwood and what support is necessary to make that vision a reality.

Kehe expressed that Metro is looking for opportunities to engage with city of Sherwood, and Metro's role in the process has been to use its regional authority rather than make specific plans with the local government.

Councilor Lewis expressed support for more affordable housing but highlighted Sherwood's willingness to partner with Metro about land use as a possible condition of approval.

Councilor Rosenthal raised concerns about whether the concept plan aligns with the numbers and density proposed for housing units.

Kehe mentioned that it is difficult to know what will be produced this early in the planning phase and acknowledged the number of housing units as a potential condition, with the desired outcome to support the community in terms of both housing demand and employment demand.

Councilor Gonzalez remarked on the housing shortage at the state and regional level and expressed that there has been feedback to the city of Sherwood to find a housing solution that serves everyone.

Councilor Nolan raised the issue of climate change and expressed that the proposal should focus on mitigating greenhouse gas emissions. Councilor Nolan emphasized that the plan should maintain that most development will occur within the existing growth boundary.

Reid stated that the current Urban Growth Boundary will accommodate most of the region's growth.

COO Madrigal clarified that emissions were outside the scope of the UGM report and recommendation.

Councilor Rosenthal remarked that the southwest corridor is growing into a large and high-technology sector and advised that workforce housing should be taken into consideration along with mass transit.

Councilor Lewis raised the issue of transportation and encouraged Sherwood to not sacrifice the accessibility of "complete community" for urban density when addressing housing solutions.

Council President Peterson expressed support for the COO Recommendation on the Sherwood expansion with conditions for approval. Council President Peterson advised that staff set specific expectations for achieving practical, near-term goals and offer a different foundation for the UGM conversation going forward.

Kehe expressed gratitude for the Council's feedback and the staff participants.

COO Madrigal noted the Council's support for inclusion of the expansion area and inquired about developing draft language around affordability and Sherwood's assurances.

Council President Peterson reviewed the major points for future consideration and thanked staff and the city of Sherwood for their engagement in the process.

7. Chief Operating Officer Communication

Marissa Madrigal provided an update on the following events or items:

- Metro is beginning the next phase of implementing the statewide Pay Equity Law
- Acknowledged and thanked IT staff for the implementation of a new timekeeping system

8. Councilor Communication

Councilors provided updates on the following meetings and events:

- Councilor Lewis: Tri-County Planning Body welcomed two new members and the three counties discussed plans for the six regional goals and the budget items
- Councilor Rosenthal: for LatinA Heritage Month, there will be a celebration in the Metro Regional Center, invitation to join Centro Cultural's community celebration in Hillsboro, and the Hispanic Metropolitan Chamber's Gala at the Hilton Hotel

9. Adjourn

There being no further business, Council President Peterson adjourned the Metro Council Meeting at 12:24 p.m.

Respectfully submitted,

Emma McIntosh

Emma McIntosh, Legislative Assistant

2024 URBAN GROWTH MANAGEMENT:
CHIEF OPERATING OFFICER/STAFF RECOMMENDATIONS

Date: August 20, 2024
Department: Planning, Development, and Research
Meeting Date: September 5, 2024

Prepared by: Laura Combs, Associate Regional Planner
laura.combs@oregonmetro.gov
Presenter(s): Marissa Madrigal, COO; Ted Reid; Eryn Kehe (Metro Planning, Development, and Research)
Length: 60 minutes

ISSUE STATEMENT

The region's urban growth boundary (UGB) delineates urban and rural uses and is a tool for ensuring thoughtful and efficient growth patterns. The Metro Council is required by state law to – at least every six years – determine whether the UGB has adequate land for expected housing and job growth. The Metro Council last made this determination in December 2018 and is scheduled to do so again by the end of 2024. The Metro Council has directed staff to proceed with an approved work program and requested periodic updates.

Over the course of the year, staff has presented preliminary results for the demographic and economic regional forecast and the capacity analysis. These elements of the Urban Growth Report estimate how many people may live or work in the region over the next 20 years and if the land inside the existing UGB is sufficient to accommodate their homes and places of employment. The draft 2024 Urban Growth Report (UGR), released for discussion at the Metro Council's July 9, 2024 work session, is the analysis that supports the Metro Council as it determines if there is a demonstrated regional need for a UGB expansion.

For the 2024 urban growth management decision cycle, Metro received one proposal from the City of Sherwood to expand the UGB to include the 1,300-acre Sherwood West urban reserve area. If Metro Council determines more land is needed in the UGB to support the next 20 years of growth, they will also determine how Sherwood's proposed expansion will accommodate the needs described in the Urban Growth Report.

A public comment survey was available from July 9 – August 22 to collect feedback on the draft UGR and the Sherwood West expansion proposal. A summary of the public comment themes and main takeaways will be available for Council's review and consideration as a part of this work session.

Another part of the Council's decision-making process is consideration and discussion of the Chief Operating Officer/Staff recommendations. These recommendations include a point of view about where to fall in the housing and employment capacity gap ranges provided within the Urban Growth Report and a recommendation about the proposed expansion area for the Council to consider.

At the September 5 work session, the Metro Chief Operating Officer (COO) and staff will summarize the key elements of the recommendations and be available to answer questions about the next steps for the Council's growth management decision.

ACTION REQUESTED
Update the Council on implementation of the work program for the 2024 urban growth management decision, focusing on the 2024 COO/Staff recommendations.

IDENTIFIED POLICY OUTCOMES
State law and regional policies lay out an intention to make efficient use of land inside the UGB and to only expand the UGB if there is a demonstrable regional need to accommodate expected housing or job growth. The Metro Council makes this growth management decision for the region after significant engagement. To ensure that areas added to the UGB are ready for growth, it is the Metro Council's policy to only expand the UGB in urban reserves that have been concept planned by a city or a county. Metro provides grant funding for local jurisdictions to complete concept planning.

POLICY QUESTION(S)
- Does the Council have any direction for staff regarding next steps for its decision process?
- Does the Council have questions or direction regarding potential conditions of approval for a UGB expansion (pending its decision that there is a need for an expansion)?

POLICY OPTIONS FOR COUNCIL TO CONSIDER
The Council may provide staff with direction on:
- Advice that would be useful from MPAC or CORE
- Updates that the Council would like to have going forward

STAFF RECOMMENDATIONS
- Staff recommends proceeding with the work program shared with Council on March 7, 2023.

STRATEGIC CONTEXT & FRAMING COUNCIL DISCUSSION
Regional urban growth management decisions have long been one of the Metro Council's core responsibilities. The Metro UGB – first adopted in 1979 – is one of Metro's tools for achieving the 2040 Growth Concept's vision for compact growth, thereby protecting farms and forests outside the UGB and focusing public and private investment in existing communities. These are all key to reducing greenhouse gas emissions and expanding housing options.

The UGB is just one policy tool, however, and must be accompanied by other policies, partnerships, and investments to make good on the 2040 Growth Concept and to address challenges like housing affordability, displacement, houselessness, and economic

development. Often, growth management processes provide a venue for identifying the need for new initiatives.

Metro strives for transparency in its growth management work, which can be challenging given its highly technical aspects. The 2024 decision will provide opportunities for interested parties to inform and understand the many technical and policy aspects of this work. Those opportunities include, not only standing advisory committees, but also groups formed for this decision process such as the UGR Roundtable, the Land Use Technical Advisory Group, the regional forecast expert review panel, and the Youth Cohort.

BACKGROUND
At its March 7, 2023 work session, the Council directed staff to begin implementing the work program for the 2024 urban growth management decision. Staff have returned periodically to update the Council on the progress of key components of the work program.

2024 Urban Growth Management Decision: Metro Chief Operating Officer/Staff Recommendations

August 26, 2024

Metro respects civil rights

Metro fully complies with Title VI of the Civil Rights Act of 1964 that requires that no person be excluded from the participation in, be denied the benefits of, or be otherwise subjected to discrimination on the basis of race, color or national origin under any program or activity for which Metro receives federal financial assistance.

Metro fully complies with Title II of the Americans with Disabilities Act and Section 504 of the Rehabilitation Act that requires that no otherwise qualified individual with a disability be excluded from the participation in, be denied the benefits of, or be subjected to discrimination solely by reason of their disability under any program or activity for which Metro receives federal financial assistance. If any person believes they have been discriminated against regarding the receipt of benefits or services because of race, color, national origin, sex, age or disability, they have the right to file a complaint with Metro. For information on Metro's civil rights program, or to obtain a discrimination complaint form, visit oregonmetro.gov/civilrights or call 503-797-1890.

Metro provides services or accommodations upon request to persons with disabilities and people who need an interpreter at public meetings. If you need a sign language interpreter, communication aid or language assistance, call 503-797-1700 or TDD/TTY 503-797-1804 (8 a.m. to 5 p.m. weekdays) 5 business days before the meeting. All Metro meetings are wheelchair accessible. For up-to-date public transportation information, visit TriMet's website at trimet.org.

MPAC: Metro Policy Advisory Committee
MTAC: Metro Technical Advisory Committee
UGB: urban growth boundary
UGR: Urban Growth Report

A DELIBERATE APPROACH TO GROWTH

Under Oregon state land use law, the Metro Regional Government ("Metro") is charged with making decisions about whether to expand the urban growth boundary (UGB) in the greater Portland region. This communication from Metro's Chief Operating Officer contains the staff recommendation to the Metro Council regarding the need for a UGB expansion and the City of Sherwood's 2024 proposal to address that need.

The urban growth boundary has long been one of Metro's most important tools for focusing the development of new homes and businesses in existing downtowns, main streets, and employment areas. Residents of the region have told us time and again to hold this priority: make the most of the land inside the boundary so that outward growth on the urban edge only happens when it is necessary and provides benefit for the entire region. This deliberate approach is crucial for strengthening existing communities, protecting farms and forests, and reducing greenhouse gas emissions.

According to state law, Metro is required to make a decision about whether to expand the UGB at least every six years. In making these decisions, Metro must provide up-to-date information about demographics, population and employment growth, development trends, and estimates of buildable land inside the UGB. This thorough assessment of whether there is a regional need for expanding the UGB is not only required by law – it is central to the greater Portland region's identity. When new growth occurs at the edges of the urban growth boundary, it should be necessary, planned, and deliberate.

Today, the greater Portland region is facing a housing shortage crisis. In addition, there is agreement across the region that attracting more family-wage industrial jobs will help our communities thrive. However, it is also clear that simply providing more land won't necessarily result in jobs and housing. Experience has shown that certain conditions must be in place to ensure that UGB expansion areas produce housing and jobs in a near term time frame. Time and time again we have seen that development occurs successfully where there is a commitment from city leaders and community members, where there is a plan for paying for needed infrastructure, and where there is market demand. If these ingredients aren't present, new urban growth is extremely slow if it happens at all.

For those reasons, in 2010 the Metro Council adopted a policy to only expand the UGB into urban reserve areas that have been concept planned by a local government and that demonstrate readiness to be developed. In the current 2024 UGB cycle, the City of Sherwood is the only city that has prepared a concept plan and proposed a UGB expansion, and they have shown that these elements are in place. Sherwood's readiness for new urban growth provides an opportunity to address the regional land needs identified in the draft 2024 Urban Growth Report (UGR).

Consequently, Metro staff recommend that the Metro Council consider expanding the UGB to include the Sherwood West urban reserve. Staff further recommend that the Council consider placing conditions on this expansion to ensure that the land is used efficiently and will support regionally identified needs. These conditions could reinforce the City of Sherwood's concept plan for the expansion area by improving housing affordability and protecting industrial lands so that they produce well-paying jobs in the manufacturing sector.

The information that follows sets out the reasoning behind this recommendation and lays the groundwork for the Metro Council to consider potential conditions of approval.

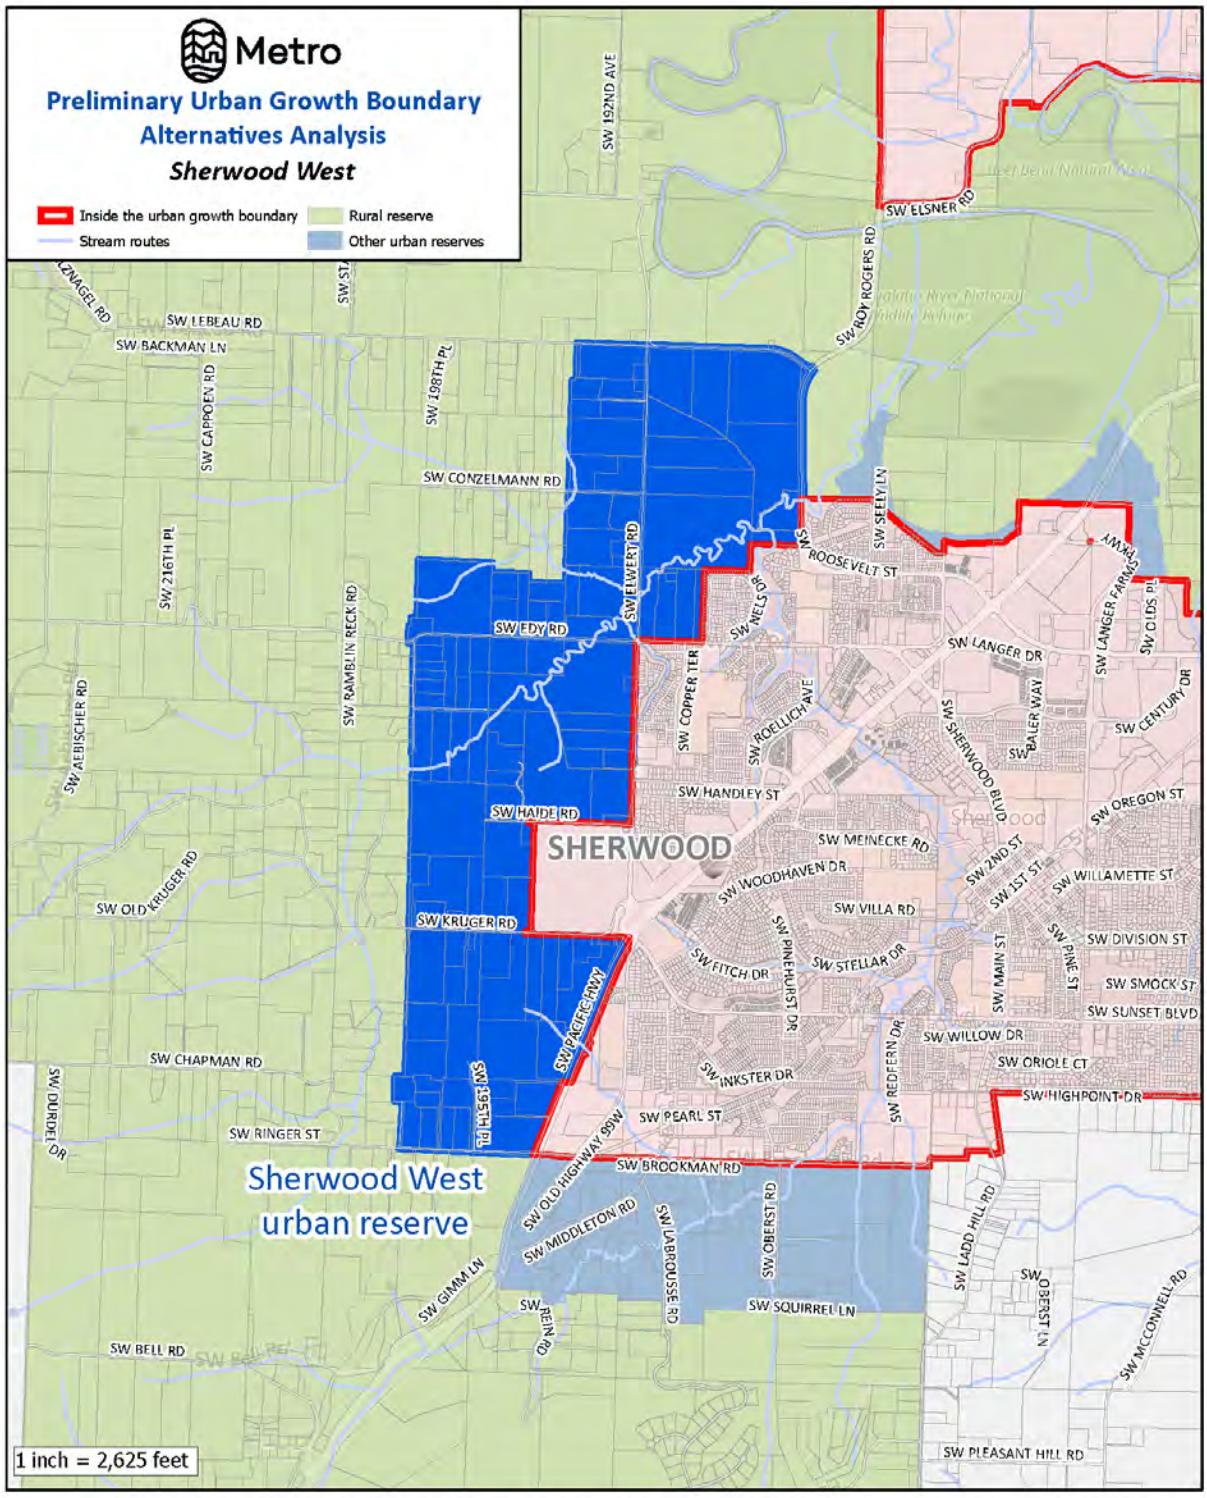
ADAPTING AND IMPROVING OUR GROWTH MANAGEMENT PROCESS

Our region's deliberate approach to growth has paid dividends for people who call this region home by helping to maintain a unique connection to nature and a high quality of life. However, as the world changes, our approach to managing growth must change too. In response to evolving needs and conditions over the years, Metro and its partners have collaborated to make improvements to the urban growth management process such as:

- Working with our regional partners to identify designated urban reserves and rural reserves that provide certainty about where the UGB may or may not be expanded over the coming decades.
- Using a 'range' forecast to acknowledge that there is inherent uncertainty in estimating future growth over the next 20 years.
- Encouraging more timely housing and business development in UGB expansion areas by requiring that a local jurisdiction complete a concept plan for an urban reserve before the area is brought into the boundary.
- Providing grant funding to cities to support local concept planning and comprehensive planning efforts.
- Adopting a fast-track expansion process for adding large industrial sites to the UGB to respond to near term opportunities.
- Providing an off-cycle UGB amendment process to address unanticipated non-residential land needs such as those identified by school districts.
- Creating a mid-cycle UGB process to be responsive to city proposals for addressing unanticipated residential land needs between the designated 6-year scheduled approval process.
- Clearly specifying in Metro's Code the factors that cities must address in UGB expansion proposals.
- Completing a land exchange in 2023 that brought concept planned land within an urban reserve inside the UGB and removed unplanned land to ensure more of the land inside the UGB will produce housing.

- Continually improving technical analyses to reflect new practices, including how to forecast redevelopment potential and estimate current and future housing needs.
- Examining regional needs for industrial lands with specific site characteristics and applying that information to evaluate expansion proposals.
- As with the forecast, using a range of estimates to acknowledge the inherent uncertainty in predicting growth capacity within the UGB.
- Increasing transparency by convening the 2024 Urban Growth Report Roundtable, comprised of diverse expertise and interests.
- Elevating youth perspectives and building future leaders by convening a UGB Youth Cohort in 2024.

One of the characteristics that makes our region unique is our ability to collaborate and work together to adapt and modernize our systems to respond to changing conditions.



CITY OF SHERWOOD READINESS

Based on the draft 2024 Urban Growth Report (UGR) in addition to discussions at the Metro Council, MPAC, MTAC and the Urban Growth Report Roundtable as well as comments received during the public comment period, Metro staff believe there is a regional need to expand the UGB to provide more land for housing and job growth. Staff also encourage the Metro Council to set clear expectations for areas added to the boundary, so the expansion addresses not just local interests, but regional needs.

The City of Sherwood has completed extensive work to propose a UGB expansion for the Metro Council's consideration. The expansion proposal indicates that Sherwood is ready to take meaningful steps toward getting homes and businesses built in the proposed UGB expansion area. The Sherwood West Concept Plan includes proposed land uses to support up to approximately 5,500 housing units and 4,500 jobs. For those reasons, staff recommend that the Metro Council consider expanding the region's UGB to include the Sherwood West urban reserve.

Considerable work remains if the Metro Council chooses to add this area to the UGB. As part of this recommendation, staff encourage the Council to identify conditions ensuring that land added to the UGB will address a range of housing needs and provide industrial sites likely to attract family wage manufacturing jobs.

Figure 1: Recommended UGB expansion in the Sherwood West urban reserve

The information on this map was derived from digital databases on Metro's GIS. Care was taken in the creation of this map. Metro cannot accept any responsibility for errors, omissions, or positional accuracy. There are no warranties, expressed or implied, including the warranty of merchantability or fitness for a particular purpose, accompanying this product.

The following pages of this report describe additional considerations that inform this staff recommendation.

THE REGION NEEDS MORE HOUSING OF ALL TYPES

It is well known that there is a national housing shortage, as well as housing shortages in Oregon and in the greater Portland region. This is reflected in housing prices and rents that remain high and in the growing number of people experiencing housing instability or houselessness. With the expectation that population growth will continue in our region – irrespective of the rate of that growth – we need more housing to be built.

The vitality of every community depends on having a diverse range of people from all backgrounds doing a broad range of work: teachers, contractors, daycare providers, nurses, and grocery store workers to name a few. As home prices rise and demand outstrips supply, we need to do more to provide housing opportunities for these essential workers in every community. Likewise, we need to provide housing options that suit people from all life stages: students seeking rental housing, growing families that need an additional bedroom, retirees seeking to downsize but remain in their community.

The primary question addressed by the Urban Growth Report is not just whether more housing is needed but whether there is enough space inside the existing UGB to meet that need. Land already available within the UGB provides opportunities for a diverse range of housing. The region's track record, as documented in the 2024 UGR, shows that there is considerable market demand for urban housing close to transit, services, and amenities. Recent statewide allowances for 'middle housing' such as townhouses and duplexes are producing results, and we expect that more of these housing options will be provided in the future.

The draft UGR also indicates that, depending on our assumptions about the future, there is potentially a need for additional land to meet the region's need for additional housing. As we consider bringing new areas into the UGB, we must make sure those areas will address the needs of a wide variety of households.

REGIONAL NEED FOR UGB EXPANSIONS FOR HOUSING

Under state law, the UGB can only be expanded when there is a demonstrated regional need for additional capacity to accommodate the next 20 years of forecasted growth. The analysis in the draft 2024 UGR's range of growth estimates shows that the Metro Council has the latitude to determine that a need for more land exists.

Housing capacity

The draft 2024 UGR describes a range of possible housing growth capacity currently available within the urban growth boundary. The specific amount of housing capacity available within that range depends on expected market conditions and development responses. Consistent with the recommendation to plan for the baseline forecast described in the following

paragraph, staff recommend capacity assumptions that fall within the middle of the ranges established in the draft 2024 UGR.

For the 2024 growth management decision, staff recommend that the Metro Council base their decision on a finding that there is capacity inside the UGB for 175,500 additional homes. Details about that assumed growth capacity can be found in Attachment 1 to this recommendation and in the draft 2024 UGR.

Household forecast and capture rate

As a basis for this growth management decision, staff recommend that the Metro Council plan for the baseline forecast for the seven-county Metropolitan Statistical Area (MSA) for the 2024 to 2044 period. The baseline forecast describes the most likely amount of growth for the region. This means planning for approximately 315,000 more people and 203,500 more households in the MSA.

The UGB "capture rate" is used to describe the share of seven-county household growth that is expected to occur in the Metro UGB. For discussion purposes, the draft 2024 UGR scenarios assumed a 70 percent UGB capture rate. Staff have heard partner opinions and share optimism that the region will regain its reputation as an attractive place to live and work. Staff therefore recommend that the Metro Council consider planning to accommodate slightly more than 70 percent of the MSA's household growth in the Metro UGB.

Notwithstanding recent declines after the pandemic-induced recession, this would represent a continuation of the historic upward trend in Metro's UGB capture rate for household growth. Adding the Sherwood West urban reserve to the UGB can provide a means of achieving this slightly higher capture rate by attracting household growth that may otherwise occur outside of the Metro UGB.

Staff recommend that the Council plan for 176,500 to 180,800 additional homes in the Metro UGB to meet current and future housing needs. Additional details about how those numbers are derived can be found in Attachment 1 and in the draft 2024 UGR.

Housing capacity deficits

Comparing UGB housing growth capacity (175,500 homes) and housing needs (176,500 to 180,800 additional homes) indicates a potential deficit of capacity for 1,000 to 5,300 homes. Additional details about those deficits can be found in Attachment 1.

Depending on the mix of housing it includes, the Sherwood West urban reserve could meet the range of identified regional housing capacity deficits. The adopted Sherwood West Concept Plan describes a range of 3,117 (9.2 dwelling units/acre) to 5,582 (16.4 dwelling units/acre) homes.

PLANNING FOR JOB GROWTH

Future job growth requires more workers to fill those jobs. This means that our job growth forecast should be generally consistent with our expectations for population growth. Consequently, as with population and household growth, staff recommend planning for the baseline employment forecast, which estimates the most likely growth scenario.

Today, there are approximately 1,261,200 jobs[1] in the seven-county MSA. Staff recommend planning for an increase of approximately 110,000 jobs, for a total of 1,371,400 jobs in the MSA by the year 2044.

Based on long-term trends, staff recommend planning for 75% of the new MSA-level jobs in the Metro UGB.[2] Today, there are approximately 996,600 jobs in the Metro UGB. By 2044, an additional 82,500 new jobs are anticipated, for a total of 1,079,000 jobs within the Metro UGB.

NEED FOR LARGE INDUSTRIAL SITES TO ACCOMMODATE HIGH-TECH MANUFACTURING GROWTH

Using the baseline employment forecast, the draft 2024 UGR identifies a surplus of 4,550 acres of industrial land in the region. However, as also explained in the draft UGR, most of the region's industrial land supply consists of smaller parcels with an average lot size of 3.8 acres and a median lot size of 1.7 acres. Although these smaller industrial spaces are in demand, they cannot serve the needs of the entire industrial market. The draft UGR describes a shortage of larger industrial sites for the expansion of existing businesses and recruitment of companies from outside the region; in particular, there is a lack of unconstrained parcels with relatively flat slopes and proximity to transportation facilities that could be aggregated into larger 50+ acre industrial sites.

The 2022 Oregon Semiconductor Taskforce Report identified a statewide need for four sites of 50 to 100 acres suitable for high tech manufacturers. As described in the draft UGR, the greater Portland region is the heart of the state's high-tech economy; however, the current regional inventory does not include enough industrial sites with characteristics that are suitable for addressing this need.

High tech manufacturing has become a major focus of incentive programs from the federal government designed to increase domestic production of critical technologies. Our region has significant competitive advantages in designing and manufacturing technologies to help adapt to and mitigate climate change and improve global connectivity. Staff analysis indicates that our region lacks enough available and unconstrained sites of sufficient size, slope, and proximity to

[1] These figures are for non-farm jobs because the task of growth management decisions is to estimate land need for urban uses.

[2] The draft 2024 UGR employment land demand analysis incorporates different UGB capture rates for different sectors. 75% is the historic UGB capture rate for the 1979-2022 period across all non-farm sectors.

existing transportation facilities and high-tech manufacturing clusters to allow for growth of these critical industries over the next 20 years. A lack of available sites would be a limiting factor in our region's ability to take advantage of historic incentives to support economic development.

Under Statewide Planning Goal 14, Metro is authorized to expand the UGB onto land that is suitable to meet a particular identified need based on specific site characteristics. Staff recommend that, based on the necessary site characteristics described above, the Metro Council address a need for two 50+ acre sites by expanding the UGB to include the mixed employment area in the north end of the Sherwood West concept plan. Staff further recommend that the Metro Council consider conditions of approval to protect these important large sites to help ensure that they will address the identified need.

ADDITIONAL LANDS TO SUPPORT COMMERCIAL JOB GROWTH

The draft 2024 UGR identified a baseline deficit of 320 buildable acres to support expected commercial job growth. Sherwood has included at least 135 acres for commercial employment in its concept plan. Staff recommend that the Metro Council address the commercial land need described in the UGR by expanding the UGB to include the Sherwood West urban reserve. The remaining deficit beyond that addressed by a potential expansion is within the margin of error for a long-range land need analysis. To the extent that there may be additional demand for commercial land, staff expect that demand would be addressed through additional redevelopment.

POTENTIAL UGB CONDITIONS OF APPROVAL

With the goal of expanding housing choices and reducing housing costs, protecting industrial sites, and continuously improving engagement for planning efforts, staff recommend that the Council consider conditions on the proposed UGB expansion. The bullets below provide suggestions for several topics that could be addressed by conditions of approval. Generally, these recommended conditions reinforce the work that the City of Sherwood has done in its Sherwood West Concept Plan. For example:

- In order to achieve a mix of housing types, the Metro Council could establish an expectation for a minimum number of homes. This could fall within the range proposed by the City of Sherwood's adopted Sherwood West Concept Plan (base density of 9.2 units per acre to a maximum density of 16.4 units per acre). The difference between these reflects the actualization of "missing middle" housing allowed by HB 2001 (2019). The city of Sherwood would determine housing mix details in their comprehensive planning process.
- The greater Portland region is in an affordable housing crisis. We need more housing options for people who make less than the region's median income (currently $116,900 for a family of four). Sherwood elected officials and staff have expressed an interest in

creating opportunities to live and work in their community. That will require us to work together to ensure housing affordability and not just leave it up to the market. The Metro Council could set out conditions to guide this work.

- Staff's recommendation to create and protect large industrial sites is intended to achieve widely shared goals to grow our region's high-tech manufacturing sectors. The Metro Council could consider specific goals or restrictions to make sure this happens.
- Creating inclusive communities means bringing a variety of perspectives into the planning process. Staff recommend a broad-based approach to community engagement that goes beyond collecting input from those who currently live near the expansion or those who have typically engaged in city planning – and include community members and Community Based Organizations representing historically marginalized groups. Staff also recommend inviting interested Tribes to engage in the city's planning processes.

ADDITIONAL RECOMMENDATIONS

Improve how we assess equity in growth management decisions

For many years, Metro has had the goal of addressing racial equity in its work, including urban growth management decisions. We've tried several approaches including:

- Using the Regional Equity Atlas to provide decision makers with contextual information.
- Requiring cities proposing expansions to describe how they are working to advance racial equity.
- When we've expanded the UGB, requiring and supporting cities in conducting broad-based community engagement for their comprehensive planning.
- Assessing equity outcomes in past UGB expansion areas.

In keeping with our tradition of always seeking to learn and do better, staff recommend that Metro Council direct staff to work with its advisory committees to identify possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to complete equity assessments when concept planning for new urban areas.

Consult with Tribes

Tribes are independent sovereigns with inherent powers of self-government and relationships with the U.S. government that derive from treaties, federal law and executive orders. These Federal-Tribal relations are political and do not derive from race or ethnicity. Treaties are listed among the elements that make up "the supreme law of the land" under Article VI of the U.S. Constitution.

The lands now known as the greater Portland metropolitan area are part of the aboriginal homelands, traditional use areas and trade networks of numerous Tribes. For millennia, Indian people resided throughout the Willamette Valley and along the Willamette and Columbia Rivers

and their tributaries in traditional villages, permanent communities and seasonal encampments. The relationship of Tribes, their lands and interests extend from time immemorial to the present day and beyond. Each Tribe's interests are distinct. These interests may overlap and intersect with the urban growth boundary in various ways.

Metro and other local governments need to do a better job of consulting with Tribes on growth management and land use issues that have the potential to impact tribal interests and priorities such as treaty rights, the protection of sensitive cultural resources, or enhancing the welfare of tribal members residing in urban areas off reservation. For that reason, staff recommend that Metro Council direct staff to work with interested Tribes, Metro's Tribal Affairs program and its advisory committees to identify possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to consult with Tribes when concept planning and comprehensive planning new urban areas. Staff also recommend that Metro identify opportunities to ensure and improve Metro's Urban Growth Report technical analyses are inclusive of relevant tribal priorities, expertise, and data sets.

Revise how we accounted for slopes on employment lands

Recent discussions at the UGR Roundtable and the Metro Policy Advisory Committee (MPAC) have raised questions about the assumptions staff make when inventorying buildable employment lands. We have heard questions about our assumed thresholds for steep slopes and whether some of those lands are viable for development.

Based on their professional expertise and review of other jurisdiction's work, Oregon Department of Land Conservation and Development staff have recently advised Metro to use a 10% slope threshold when inventorying buildable employment lands. Staff will revise the UGR analysis of employment land capacity to follow that advice. That revised analysis will be included in the final UGR presented for Metro Council adoption later this year.

Using this more conservative slope threshold does not change the analysis in the draft 2024 UGR that the baseline forecast indicates there is enough industrially-zoned land inside the UGB to match generally expected job growth, at least before assessing a more specific need for additional land with particular site characteristics. Most importantly, it doesn't change the fact that we collectively need to focus on the investments and actions necessary to make sure more of these employment lands are shovel-ready to capitalize on economic development opportunities. That includes necessary regional discussions about site aggregation, brownfield remediation, infrastructure financing, zoning changes, incentive programs and more.

Update the region's vision for its future

Our region had the foresight 30 years ago to adopt the region's Future Vision and 2040 Growth Concept. These long-range plans helped guide how greater Portland has responded to population growth in a way that reflects shared community values. The Growth Concept has

served us well and has positioned us to address the challenges of climate change and racial equity, but we know there's more work to be done to prepare for these and other future issues.

A lot has changed since the region adopted the Future Vision and the 2040 Growth Concept. Staff will bring a work program to Metro Council to renew the Future Vision and 2040 Growth Concept in Fall 2024. This work will help address many, though not all, topics and potential actions that came up while developing this urban growth management recommendation.

This work program should include an assessment of how these existing plans have performed for the region's residents: what has worked well or turned out as envisioned, and where there is still work to do or turned out differently from the vision. While we believe the fundamentals of the Vision and Growth Concept are still relevant, it is essential to demonstrate this through study.

Planning for 25 and 50 years in the future also requires understanding where today's trends may potentially take the region. The work program should include investigation of how climate change, demographics, technology, and other topics will change in the coming decades and how visioning can prepare the region to adapt to these shifts.

The updates of these long-range plans must also capture topic areas not currently addressed in the 1995 versions of these documents that are of greater importance and interest today. These include, but are not limited to: racial equity, climate resilience and adaptation, arts and culture, anti-displacement strategies, and Tribal relations. Updates must also address how Metro's purview has changed since 1995 to encompass major roles in the region's housing and parks and natural areas.

PUBLIC COMMENTS

Metro held a public comment period from the release of the draft UGR on July 9 through August 22. 349 survey responses were received during this period. We heard a variety of viewpoints about the draft Urban Growth report and the City of Sherwood's expansion proposal. Themes from comments about the expansion proposal include:

- Optimism about future growth potential, including the potential for a resurgence of high-tech manufacturing
- Interest in more housing and job opportunities in Sherwood, including housing choices for seniors, young families and other demographic groups
- Concern about the impacts of a potential UGB expansion on traffic, with the lack of transit options available in Sherwood
- Concern about impacts on farmland and agricultural activities
- Importance of housing affordability
- Concern about impacts on the environment and climate change
- Concern about impacts of new development on existing public infrastructure leading to tax increases for current residents
- Concern about potential impacts on schools

- Recommendation to use land within the UGB before expanding

We also received input about the methodology of the draft UGR. Themes include: suggestions for different approaches to the buildable land inventory, population projections, and density estimates.

These comments highlight the variety of issues that need to be balanced by the UGR. While this staff recommendation does not address every technical topic raised, it acknowledges that the UGR is a point-in-time document that seeks to balance interests and provide a reasonable range of estimates for the Metro Council to determine whether to expand the UGB and accept the City of Sherwood's proposal.

TIMELINE (SUBJECT TO CHANGE)

August 26, 2024:	Release COO recommendation
August 28, 2024:	MTAC discussion of COO recommendation and public comment themes
September 5, 2024:	Council work session on COO recommendations and public comment themes; (*full public comment summary provided at Council meeting*)
September 11, 2024:	MPAC discussion of COO recommendation and recommendations to Council; request any final MTAC advice
September 18, 2024:	MTAC advice to MPAC, if requested
September 19, 2024:	CORE recommendation to Council
September 25, 2024:	MPAC recommendation to Council
September 26, 2024:	Council holds public hearing on COO recommendations
October 8, 2024:	Council provides direction to staff at work session
November 21, 2024:	Council first reading of ordinance; public hearing
December 5, 2024:	Council second reading of ordinance; decision

ATTACHMENT 1: HOUSING CAPACITY, NEED, AND DEFICIT ASSUMPTION DETAILS

The tables below include specific numbers, but long-term estimates cannot be expressed this precisely. For that reason, the final totals are rounded to the nearest hundred.

Table 1: Recommended housing capacity assumptions (Metro UGB, 2024-2044)

	UGB Capacity Assumptions (number of homes)			
	single-detached	middle housing	multifamily	Total
Vacant land (larger mix of single-unit detached)	34,944	13,228	42,970	91,142
Redevelopment (Baseline)	12,292	11,727	24,382	48,400
Concept plan areas and planned development on vacant land	9,096	6,662	4,138	19,896
Other planned redevelopment	135	172	9,830	10,137
Office-to-residential conversion (baseline)	-	-	1,000	1,000
ADUs and middle housing conversion/infill (low)	-	4,955	-	4,955
Total UGB capacity (rounded)	**56,500**	**36,700**	**82,300**	**175,500**
Capacity housing mix	32%	21%	47%	100%

Table 2: Recommended Metro region current and future housing need assumptions (2024-2044)

7-county MSA baseline household growth (2024-2044)	203,530
Future household growth in Metro UGB (70% to 72% Metro UGB capture)	142,500 to 146,500
Add 5% vacancy rate (to convert future households to homes)	7,100 to 7,400
Subtotal of UGB future housing needs (number of homes)	149,600 to 153,900
Add current housing needs (underproduction, houselessness, 2nd and vacation rentals)	26,953
Total current and future UGB housing need (2024-2044, rounded)	176,500 to 180,800

Table 3: Metro UGB current and future housing need and deficit assuming 70% UGB capture

	UGB Housing Need at 70% UGB Capture			
	single-detached	middle housing	multifamily	Total
Future need: baseline forecast (see Table 1)	56,846	32,911	59,838	149,594
Units lost to 2nd and vacation homes	1,072	1,769	443	3,285
Historic underproduction	726	2,089	12,160	14,975
Households experiencing houselessness	-	40	8,653	8,693
Total Housing Need (rounded)	**58,600**	**36,800**	**81,100**	**176,500**
Needed housing mix	33%	21%	46%	100%
Total UGB capacity (rounded)	56,500	36,700	82,300	175,500
Deficits (rounded)	**(2,200)**	**(100)**	**1,200**	**(1,000)**

Table 4: Metro UGB current and future housing need and deficit assuming 72% UGB capture

	UGB Housing Need at 72% UGB Capture			
	single-detached	middle housing	multifamily	Total
Future need: baseline forecast (see Table 1)	58,470	33,851	61,547	153,868
Units lost to 2nd and vacation homes	1,072	1,769	443	3,285
Historic underproduction	726	2,089	12,160	14,975
Households experiencing houselessness	-	40	8,653	8,693
Total Housing Need (rounded)	**60,300**	**37,700**	**82,800**	**180,800**
Needed housing mix	33%	21%	46%	100%
Total UGB capacity (rounded)	56,500	36,700	82,300	175,500
Deficits (rounded)	**(3,800)**	**(1,000)**	**(500)**	**(5,300)**

APPENDIX B: PUBLIC COMMENT EMAILS AND LETTERS B1

DRAFT

PURPOSE AND BACKGROUND

As new people move to the greater Portland region and businesses create more jobs, our region's urban growth boundary (UGB) serves to focus development within the boundary. The focused development helps stretch limited public dollars that build and maintain the streets, water and sewer pipes, schools and parks that every community needs. Focusing development within the UGB also helps protect high-quality farmland, forests and natural habitats.

Every six years, the state directs Metro to assess whether there is enough land inside the urban growth boundary for the next 20 years of job and housing growth. These periodic decisions also provide an opportunity to support the 2040 Growth Concept, greater Portland's vision for growth. The Growth Concept envisions the region's growth in town centers and urban corridors and guides UGB expansions into urban reserves–areas best suited for future development–after careful consideration of whether those expansions are needed.

To make an urban growth management decision, Metro assesses trends for a variety of factors, from changes in population growth, household size and consumer desires to the future of workplaces and transportation. Metro publishes these assessments in the urban growth report.

If there is a regional need for land to accommodate the next 20 years of jobs and housing growth, Metro Council can consider expanding the greater Portland region's UGB. However, the region has learned that adding more land alone is not enough. Expansion areas only produce jobs or housing when a city can provide infrastructure like pipes, roads, sidewalks, parks, and schools.

If a city decides that it is ready to expand the UGB into urban reserves, the city must be ready to support development. A city demonstrates its readiness with a concept plan. A concept plan lays out the vision for the area, intended land uses, transportation network, environmental protections, additional necessary infrastructure and funding sources. Cities that are interested in expansion must submit an expansion proposal with a concept plan to Metro for consideration, along with governmental agreements, letters of support and findings.

For the 2024 urban growth management decision cycle, Metro received one proposal from the City of Sherwood to expand the UGB to include the 1,300-acre Sherwood West urban reserve area. If Metro Council determines more land is needed in the UGB to support the next 20 years of growth, they will also determine how Sherwood's proposed expansion will accommodate the needs described in the urban growth report.

From July 9 to August 22, 2024, Metro asked residents of the greater Portland region for their thoughts on the 2024 draft Urban Growth Report and the City of Sherwood's expansion proposal. Metro Council will consider public comments as they make an urban growth decision.

PUBLIC COMMENTS AT A GLANCE

From July 9 to August 22, 2024, Metro held a public comment period, inviting feedback on the draft 2024 Urban Growth Report and an urban growth boundary expansion proposal from the City of Sherwood. During the public comment period, Metro invited comments and feedback from members of the public, community and business organizations, regional advisory committees, agency partners and policymakers.

This public comment period builds on public involvement throughout the urban growth management process. Learn about the ideas and feedback provided by 15 youth who met regularly through the urban growth management process.

Metro received **72** email comments and 365 responses to an online survey.

Public comments included a variety of viewpoints about the draft Urban Growth report and the City of Sherwood's expansion proposal. Themes from comments provided in emails and the online survey about the expansion proposal include:

- Optimism about future growth potential, including the potential for a resurgence of high-tech manufacturing
- Interest in more housing and job opportunities in Sherwood, including housing choices for seniors, young families and other demographic groups
- Sentiment that the expansion is not needed at all or is not needed at the proposed site
- An interest in more infill development before the urban growth boundary is expanded
- Concern about the need for more housing, a diversity of housing and housing that is affordable
- Concern about the impacts of a potential UGB expansion on traffic; some comments pointed to limited transit options available in Sherwood
- Concern about the impacts of a potential UGB expansion on farmland and agricultural activities in the area
- Concern about potential impacts of a potential UGB expansion on the environment and climate change
- Concern that new development would have an impact on existing public infrastructure leading to tax increases for current residents

DRAFT

PUBLIC COMMENT PERIOD OVERVIEW

During the public comment period, there were a variety of resources available for review and several platforms available for submitting feedback and comments:

- **Public review draft materials**: The project webpage included the draft 2024 Urban Growth Report and City of Sherwood's expansion proposal for Sherwood West. The report and the expansion proposal were also summarized in an executive summary and factsheet that were available in English and Spanish. With a variety of informational resources, the public comment period allowed people to engage at the level of detail that worked best for them.

- **Comment platforms**: There were several ways for people to provide comments including an online survey, email, letter and voicemail.

- **Online survey**: An online survey was available and publicized in English and Spanish. The survey asked participants to prioritize primary factors for expanding the urban growth boundary, asked for feedback on the expansion proposal, and also provided space for participants to describe what they want preserved and what they want to see change as the region grows.

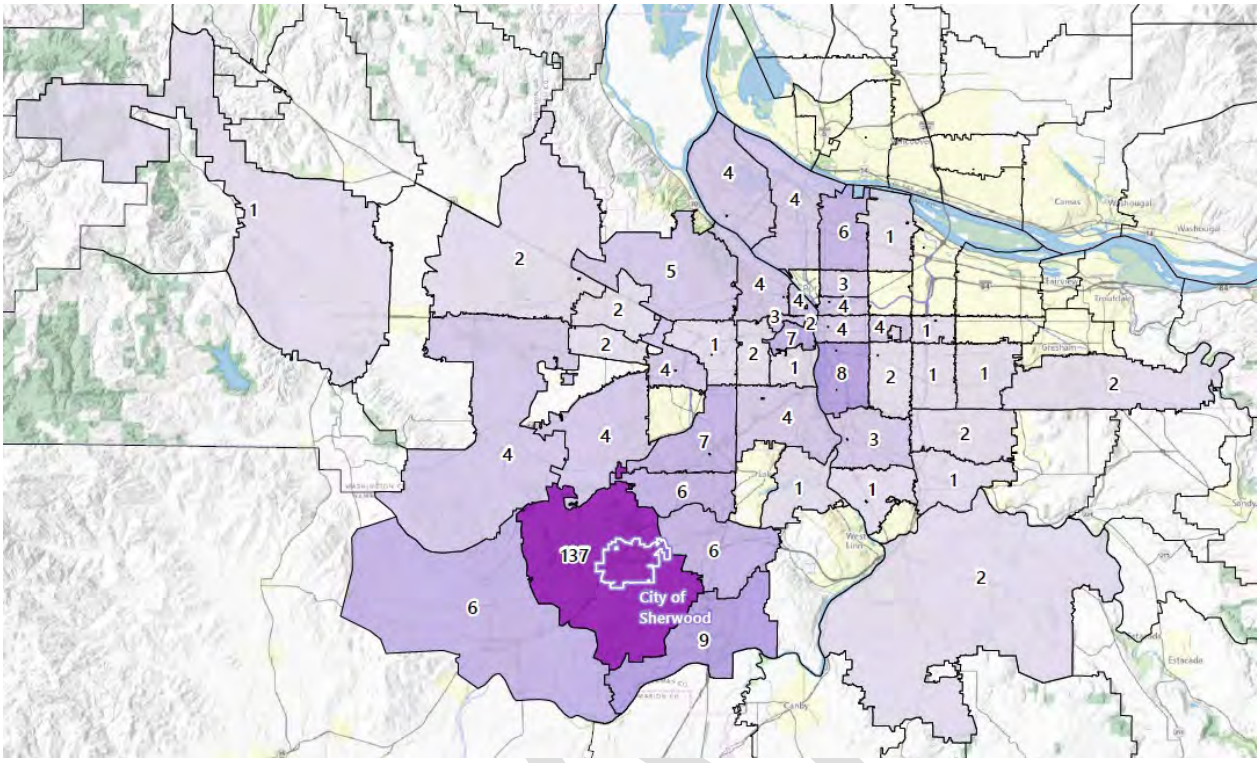
- **Notifications and notices**: Public notices of the comment period were provided to local neighborhood involvement and community outreach offices at jurisdictions across the region. Notifications were sent to community-based organizations, Metro regional advisory committees and their respective interested parties. Metro also posted the public comment period on social media and Metro News. Flyers with QR codes were posted in Sherwood and City of Sherwood and Metro staff promoted the public comment period at Sherwood's Robin Hood Festival.

- **Public hearings**: Metro Council will receive testimony about the urban growth management decision in-person, online or in writing at a public hearing on Sept. 26 and at the first reading of the ordinance on Nov. 21, 2024.

DRAFT

ONLINE SURVEY RESULTS

The online survey provided overviews of the urban growth decision process, the Urban Growth Report and the Sherwood West proposal. The survey also linked to the summarized materials in English and Spanish on the project webpage as well as the unabridged Urban Growth Report and expansion proposal. The survey asked participants six questions about growth and nine optional demographic questions. A total of 365 respondents participated in the online comment survey. A summary of the survey follows, and the results are included in Appendix A.



The survey included the following questions:

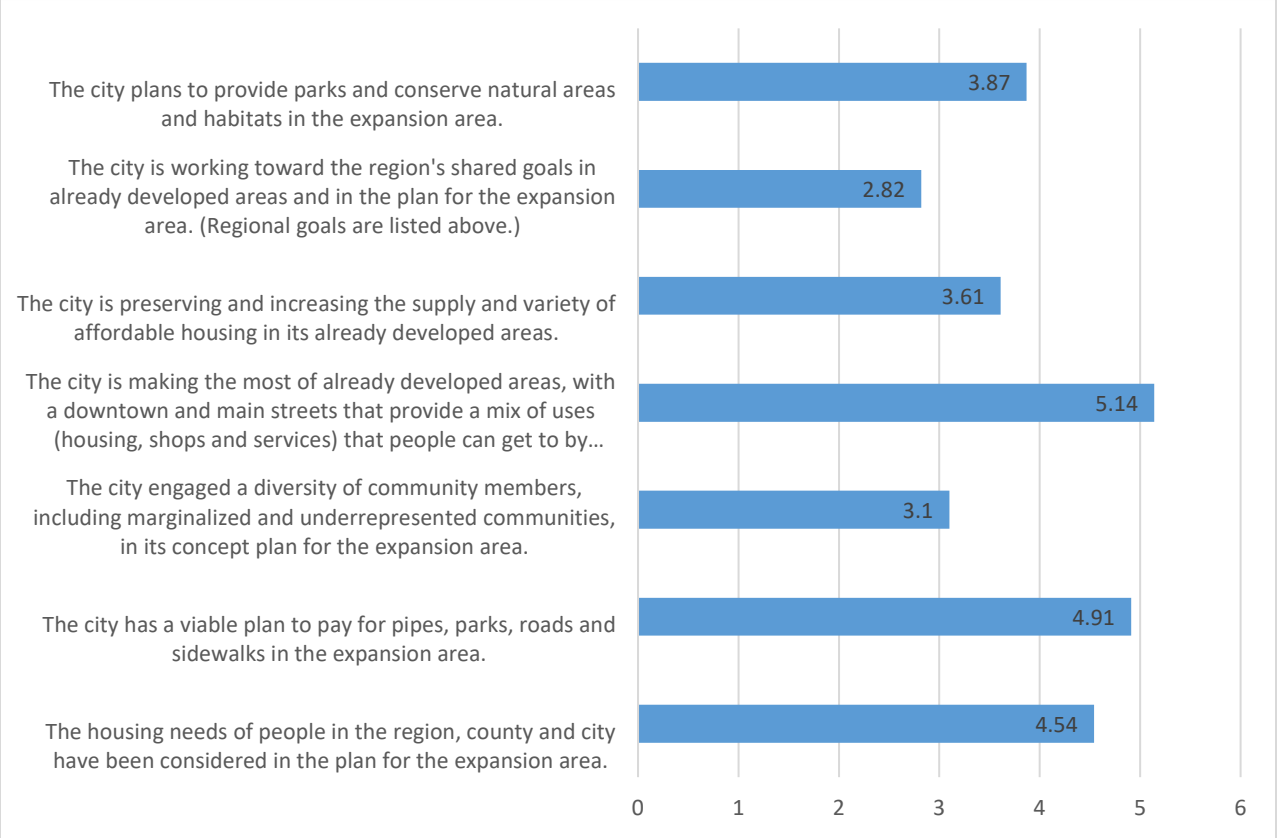
- After reviewing the Draft Urban Growth Report, is there something you think was not adequately considered in the report that you would like decision-makers to know about? (total responses=247)
- Which factors do you think are most important as a city prepares for expansion? Please rank in order of importance. (total responses=312)
- Please provide your comments on the Sherwood West proposal. (total responses=182)
- Is there anything else that you would like the Metro Council to consider as they make a decision about whether to expand the Urban Growth Boundary as described in the Sherwood proposal? (total responses=218)
- What do you most want to see preserved as greater Portland continues to grow? (total responses=340)
- What changes would you like to see as greater Portland continues to grow? (total responses=340)

Survey respondents were asked to provide their zip code. This question was optional, and 284 survey participants responded. More than 143 respondents submitted a Sherwood zip code.

DRAFT

Figure 1: Survey respondents zip codes

Survey comments on the Draft 2024 Urban Growth Report and the Sherwood West concept plan



Survey participants were invited to review the City of Sherwood's expansion proposal and Sherwood West Concept Plan and/or the fact sheet summarizing the proposal. Key elements of the proposal were also summarized in the survey.

The survey included a summary of the factors Metro considers when reviewing an expansion proposal from a city and asked survey participants: **Which factors do you think are most important as a city prepares for expansion? Please rank in order of importance. (Total responses= 312)**

Survey respondents ranked the top three factors as most important. These factors are also reflected in the comment themes. The top three factors are:

- The city is making the most of already developed areas, with a downtown and main streets that provide a mix of uses (housing, shops and services) that people can get to by walking and rolling.
- The city has a viable plan to pay for pipes, parks, roads and sidewalks in the expansion area.
- The housing needs of people in the region, county and city have been considered in the plan for the expansion area.

Figure 2: Responses to: "Which factors do you think are most important as a city prepares for expansion? Please rank in order of importance?" (Total responses= 312)

The survey included three open-ended questions that elicited comments about the City of Sherwood's proposed expansion. There were very few comments on the Draft 2024 Urban Growth Report. The responses to the following three questions are summarized below by theme. For the complete set of comments see Appendices A-1, A-2 and A-3.

Q: After reviewing the report, is there something you think was not adequately considered in the report that you would like decision-makers to know about? (Total responses=247)

Q: Please provide your comments on the Sherwood West proposal in the box below. (Total responses: 182)

Q: Is there anything else that you would like the Metro Council to consider as they make a decision about whether to expand the Urban Growth Boundary as described in the Sherwood proposal? (Total responses=218)

Most respondents opposed the expansion or questioned the need for an expansion. The most frequently cited reasons for opposition were the loss of farmland, natural resources and traffic impacts, and concerns about the tax burden on existing residents caused by the cost of new

infrastructure. Commentors expressed a desire for Sherwood and the region to make use of land already in the UGB and questioned the need for the expansion or the entirety of the proposed expansion given the expected rate of population growth. Supportive comments emphasized the need for housing and some highlighted the demand for single family housing while others expressed support for the mixed-use development proposed in the concept plan. The following are a list of the prominent issues across the survey responses with sample comments that address each issue:

- **Make use of land in the UGB**
- **There is not a need to expand**
- **An expansion will exasperate traffic congestion and safety issues.**
- **Transit is needed**
- **Building and maintaining infrastructure for new development is too costly**
- **Preserve farmland**
- **Preserve and protect natural and historic/cultural resources**
- **Climate change impacts need to be considered.**
- **More land is needed for housing and to support the single-family housing people want.**
- **Support for the expansion proposal**
- **Engage the Sherwood community**

Make use of land in the UGB

- "We have an abundance of property that is currently in the boundary. Use that effectively and build up and not out. "
- "Sherwood Oregon has a near city wide ban on apartments. They should not be granted a UGB expansion before they show true need. Build some apartments Sherwood first!"
- "We need to cheerlead all residential development and continue to chop down fees and rules until we get a deluge of infill development. it will make our place more financially productive, affordable and livable."
- "To accomplish regional goals, and even to create a healthy Sherwood, we must develop existing land within the UGB so we can create financially and environmentally sustainable population growth."
- "Lastly, the City has not maximized the current boundaries for affordable housing and jobs."
- "Work on densifying existing neighborhoods instead of focusing on sprawl."
- "The transportation connections are poor, and our region has no shortage of buildable land already in the UGB. We need infill, not more fire-prone sprawl into farms and forests."
- "I encourage Council to be extremely cautious about expanding the UGB. We should focus on further developing our existing area within the UGB rather than expanding Sherwood at this time."

DRAFT

- "There is a plethora of empty warehouses and houses that can be renovated. Do this before taking any more farmland to build more buildings."
- "The city has plenty of room for development inside city limits. In addition king city has already expanded and is working on developing a large residential area just down the road."
- Rather than building more outside of the UGB, let's focus on creating better spaces on the land that's already allocated. Densify current areas, we don't need to increase sprawl more.

There is not a need to expand

- "I am all for growth in a measured & logical manner when the need arises. There is no evidence that supports an inclusion of this magnitude."
- "Being a property owner in the proposed expansion area who farms the land this expansion pushes us closer to losing our lively hood. Developers are continually contacting us and wanting to purchase our property. We are not interested. This is a very large expansion request. Is all or any of this land really needed now?"
- "For the Sherwood West expansion plan that was submitted in 2016 doesn't reflect the more recent population decline. The concept plan should be scaled back to reflect more current data and the UGB expansion should be 50% the original submission."
- "Sherwood, Wilsonville, and Tualatin are currently in the process of wasting one of the largest industrial sites already within the UGB by each separately seeking development, often on small, 10 acre parcels. At a time when some think the region needs more large industrial parcels, these jurisdictions are wasting a huge area, already within the UGB, that should be developed as a single unit."
- "I suggest that the Metro Council take into consideration the dearth of expansion options being presented as further evidence that the demand for growth actually isn't there."
- "Even the small baseline growth assumption seems optimistic. Developing suburban land will not create "affordable housing" in locations where it is needed."

An expansion will exasperate traffic congestion and safety issues.

- "How will expansion and development of high density housing and business along this route between Roy Roger's, Lebeau, Elwert, and Edy roads not contribute to further traffic issues and noise?"
- "A UGB expansion in a part of the metro area poorly served by transit and likely to be entirely car dependent does not align with any of our regions goals. As such, it's unclear why it's being considered."
- "Most new families that would live in the homes planned would work elsewhere. Traffic congestion will increase."

DRAFT

- “Traffic on and off of Hwy 99 has major delays during rush hours. These conditions have persisted for years and will only worsen if all of Sherwood Wes tis brought in at this time. The City and County need to improve the capacity of Elwert Road,and it's Hwy 99 connection before adding so many homes.”

Transit is needed

- “However, people will want to get out of their neighborhood to access amenities, and there are not very many options for how they will do that. This makes living in the area less accessible for people with disabilities who cannot drive (like my own father) or younger people who cannot afford a car.”
- “Keep public transportation strong so I can go places. I work part-time and still drive car but not for long so please don't disregard the needs of older people like me.”
- “This project would make more sense if it was built in conjunction with a WES regional rail spur but it lacks a Right of Way reservation to build such a line.”
- “Sherwood has the right ideas in mind with mixed developments and alternative transportation but they need to take them further, transit being extended into Sherwood west should also be explored...”
- “Light rail expansion on the 99 corridor”
- “I’m nervous about continuing to focus on roads instead of public transit, and if we want housing to be affordable and Sherwood to be accessible to folks, it needs to move away from single family homes."

Building and maintaining infrastructure for new development is too costly

- “The sewer, water and gas lines have to be upsized downstream/upstream from the development and the current tax payer gets to pay for that.”
- “We aren't as dense and suburban neighborhoods don't pay for themselves in taxes once they start to require maintenance. If we built denser on our existing roads, we might actually have the tax base to support them.”
- “Based on the Sherwood West expansion proposal, I do not think that the City of Sherwood adequately demonstrates that infrastructure development is feasible.”
- “Also you are going to burden the current property owners with additional taxes for improving infrastructure, roads, schools, and fire stations that these 5,580 homes will require.”
- “The proposed infrastructure funding plan is vague at best. Relying on SDCs and ‘outside’ funding is insufficient. No expansion should be considered until there is a concrete committed plan for the infrastructure funding.”

DRAFT

Preserve farmland

- "Consider where food will come from in 20 years if there are no farmlands to sustain the animals and crops."
- "The Report does not address the consequences of replacing fertile, productive land with houses and industry."

Preserve and protect natural and historic/cultural resources

- "Protecting historic and cultural resources."
- "Previously designated Title 13properties are now being planned to be light industrial with no thought for where the wildlife they are wiping out will go to."

Climate change impacts need to be considered.

- "The report did not consider the potential impacts of climate change, in terms of population increases in the Northwest due to cooler weather and water availability relative to other parts of the country, and also impacts of climate change on the wildland urban interface and how this could impact fire risk for the edges of the Portland area."
- "Is there consideration of preservation of trees and plants for carbon sequestration and other environmental benefits?"
- "We are in a climate crisis, and these trees help us by providing shade, sequestering carbon, preventing erosion, and providing wildlife habitat."

More land is needed for housing and to support the single-family housing people want.

- "...restrict supply and the inherent demand will cause price increases. If affordability is a key driver then ensuring adequate supply of land is fundamental to affordable housing."
- "Urban densities are reaching unsustainable levels. We have vast room to expand UGB's and we shod do so. Make a plan to double the amount of land available for residential development over the next 20 years."
- "We need more land made available for single family housing and just not for apartments."
- "I think Sherwood's specific analysis at the local level should be part of the Metro Council decision making. There's a strong argument to be made about where people want to live and work that doesn't always translate to regional land availability."
- We need to build more housing desperately and are not at risk of "overbuilding" - at worst this would reverse some of the run-up in prices due to past severe undersupply. I am in favor of allowing more housing to be built as much as possible.

DRAFT

- "Expand the boundary the maximum amount possible! The region needs more single family homes-thousands more homes!"

Support for the expansion proposal

- "Creating more jobs than housing units would be a mistake. That said, I support the proposal."
- "Looking forward to more commercial zoning for jobs and businesses."
- "I'm in favor of development around the high school. Housing and mixed use should go into the surrounding acreage."
- "This expansion appears to be well thought out, and should be welcomed in the region. It is sad that the Sherwood West proposal is the only one."
- "I like the plan. I know there is an opposition group but there are those of us that support the plan too."
- "Don't let existing Sherwood residents vote down UGB expansions that are needed to help the region accommodate growth and affordability."
- "This expansion should have already happened before the School was built in 2015 - Newberg, Or has updated their area and we are left behind and deal with their traffic to Hillsboro"

Engage the Sherwood community

- "The Sherwood community needs to weigh in on the proposed north industrial zone."
- "Please consider the desires of the people who call Sherwood home."

Survey comments on about what is most important as the region grows and changes

Two survey questions asked for people to share their ideas about growth in greater Portland—what they want to see preserved and what they would like to see changed as the region grows. Responses to these questions are in Appendix A-4 and A-5. These comments will be considered in upcoming Metro planning processes, including the update to the region's vision and growth concept.

DRAFT

COMMENTS VIA EMAIL, LETTERS AND PHONE

In addition to the online survey, residents, businesses and policymakers were invited to comment on the four city expansion proposals by letter, email and phone. Metro received 72 emails and no letters or comments on voicemail. A majority of the emails were submitted by Sherwood residents, landowners, agencies, elected officials and organizations with interest in the expansion. See Appendix B for the comment emails.

Supportive comment emails highlighted a variety of reasons for their support, including:

- More housing and more employment opportunities
- Addressing a lack of land supply
- Property owners who want their property brought into the UGB
- Sherwood' unique location providing an economic advantage

Comment emails in opposition highlighted a variety of reasons for their support, including:

- Loss of farms land
- Traffic congestion
- Tax burden of new infrastructure on existing residents
- There is enough land in the UGB
- Concern about concept plan not providing affordable housing options

Other issues raised include:

- Concerns about slope in expansion areas
- Input about the methodology of the draft UGR, including suggestions for different approaches to the buildable land inventory, population projections, and density estimates.
- Several comment emails encouraged Metro to use the high growth rate for population and employment.

WHO PARTICIPATED

Survey participants were asked to provide optional demographic information to help Metro know if participants were a representative group reflecting our diverse communities and a broad range of experiences in our region. Demographic groups that are underrepresented among survey respondents compared to the metropolitan Portland

DRAFT

area demographics by 4 percent or more are highlighted in red. Greater Portland area demographics are sourced from the 2020 Census. *Demographic analysis to come.*

For complete demographic responses see Appendix A-6.

NEXT STEPS

The merits of Sherwood West's proposal will be the focus of policy discussions in the fall of 2024. Generally, decision-makers will consider whether:

- The housing needs of people in the region, county and city have been considered.
- Development of the proposed expansion area is feasible and supported by a viable plan to pay for needed pipes, parks, roads and sidewalks.
- The city has reduced barriers to mixed-use, walkable development in its downtowns and main streets.
- The city has implemented best practices for preserving and increasing the supply and diversity of affordable housing in its existing urban areas.
- The city has taken actions to advance Metro's six desired outcomes, with a particular emphasis on meaningful engagement of communities of color in community planning processes.

A final decision by the Metro Council on urban growth boundary expansion is expected in December 2024.

July 9, 2024:	Release draft UGR and appendices
August 22, 2024:	Public comment survey on draft UGR closes
September 5, 2024:	Council work session on COO/Staff recommendations
September 26, 2024:	Council holds public hearing on COO/Staff recommendations
October 1, 2024:	Council provides direction to staff at work session
October 14, 2024:	Measure 56 notices to property owners in proposed expansion areas
October 24, 2024:	35-day notice of proposed amendment to DLCD
November 4, 2024:	Postcards/report on potential impacts of UGB expansion on existing neighborhoods
November 21, 2024:	Council first reading of ordinance; public hearing
December 5, 2024:	Council second reading of ordinance; decision

APPENDIX A

Public comment online survey results

Q3 Read the Draft 2024 Urban Growth Report. Metro uses a wide variety of factors to assess whether there is enough land inside the greater Portland region's urban growth boundary for the next 20 years of job and housing growth. After reviewing the report, is there something you think was not adequately considered in the report that you would like decision-makers to know about?

Answered: 247 Skipped: 118

#	RESPONSES	DATE
1	The facts and informed opinions of the residents that are impacted by the growth plans.	8/23/2024 10:06 AM
2	Open up more buildable ground for affordable houses	8/22/2024 9:51 PM
3	Projections of growth are not lining up with actual. We are growing a lot slower, so back off.	8/22/2024 9:44 PM
4	How can you preserve farmland that borders the current UGB and not create urban sprawl w/no consideration to existing small business engaged in farming and farm related products	8/22/2024 9:38 PM
5	There is a large amount of unused land already in the UGB. This proposal is unnecessary and a wet kiss for developers.	8/22/2024 7:24 PM
6	Yes, that affordable housing is not created by shoddy buildings and neighborhoods made up of these shoddily built homes. The report does not address the current land built up by Metropolitan Land Group and how horrible these areas look. What once was beautiful farmland is now covered by what looks like Monopoly house pieces...all the same, no character, nothing denoting a neighborhood for families. Yet it's the goal to have this same company develop these new enveloped lands if the Urban Growth Boundary is expanded. Not a good solution for Oregon that is supposed to be green and an oasis of natural beauty.	8/22/2024 6:57 PM
7	There should be more plans for rezoning and growing up	8/22/2024 6:46 PM
8	All of it is inadequate! We have an abundance of property that is currently in the boundary. Use that effectively and build up and not out. You have not considered the impact to the people who live in the area regarding traffic with the addition of all the houses and business. This is the country/farmland and should be preserved as such!	8/22/2024 6:29 PM
9	There are a plethora of abandoned buildings and houses which can be renovated and utilized for future growth vs. continuing to take farmland, trees, and fields. Consider where food will come from in 20 years if there are no farmlands to sustain the animals and crops.	8/22/2024 6:28 PM
10	The 2024 UGR has implications for local government planning processes as Metro's subsequent distributed forecasts inform local Housing Capacity Analyses, Economic Opportunities Analyses, and Regional Transportation Plan modeling. The City of Hillsboro recommends Metro rely on a high population growth forecast to allow our region to be nimbler in addressing current and future housing and employment needs. The 2024 Draft UGR demand scenario 4 involves faster household growth in 2044 coming from increased in-migration of younger households, consistent with historic migration dynamics, who typically seeking multifamily and middle housing. Though younger households who migrate to the region by 2030, 2035, and 2040 may initially prefer multifamily or middle housing, many will continue to demand single-unit detached for their growing household size and other reasons. The City of Hillsboro recommends Metro add a new UGR demand scenario 5 that involves faster household growth coming from increased in-migration of younger households, consistent with historic migration dynamics, but with a larger percentage of single-unit detached to meet the demand during the next 20 years. Though the Draft UGR shows the region as having sufficient total industrial capacity, much of the industrial land supply consists of smaller parcels with an average lot size of 3.8 acres and a median lot size of 1.7 acres. The Draft UGR mentions there are only eight sites over 50 buildable acres inside the UGB that are available to the general industrial market. The final 2024 UGR should highlight the lack of sufficient large-lot industrial	8/22/2024 6:06 PM

	sites 25 plus acres in size available to the general industrial market. The final 2024 UGR should also highlight that less than 6% of the taxlots available to the general industrial market are medium-sized sites between 10 and 25 acres.	
11	No	8/22/2024 4:38 PM
12	The Executive Summary notes that “the cost of serving raw lands with needed infrastructure is a significant barrier to housing development.” Additional information should be added to the Summary and to the full report regarding the high cost of infrastructure maintenance.	8/22/2024 11:39 AM
13	That current retired property owners are getting taxed out of their homes the currently live in due to the infrastructure improvements needed when large developments go in. I understand that the developer installes the infrastructure within the development but not outside it, the sewer, water and gas lines have to be upsized downsteam/upstream from the development and the current tax payer gets to pay for that. The current tax payer also gets to pay for the additional schools and fire stations needed for these additional homes.	8/22/2024 10:11 AM
14	Per 1000 Friends of Oregon, there is currently land within the UGB that is not being developed due to lack of infrastructure. There isn't any infrastructure on the land the City of Sherwood wants to bring into the UGB either. Developers pay for roads, etc. directly in front of the housing they are building; however, they don't contribute anything to improve all of the arterial roads, Hwy 99W, etc. that become overburdened due to the thousands of people their developments add.	8/22/2024 2:52 AM
15	Protecting historic and cultural resources	8/21/2024 11:09 PM
16	The characterization of the mixed use as having unique characteristics for industrial use is way off base. To believe this seems to focus on the fact that the area is flat and undeveloped. It ignores a range of characteristics which make it unsuitable. 1. The land is sandwiched between neighborhoods to the south and west. A federal bird sanctuary lies to the immediate east. Farmland borders the area on the north. In fact the only reason it is undeveloped is it too is farmland. Finally BPA transmission lines go right through the center. If the thought that it will provide acreage for chip manufacturing, the City of Sherwood and Metro are just plain wrong. Do a little bit of research and you will find chip manufactures avoid electrical transmission lines due to the electromagnetic impact on chip fabrication. It is an ill considered scheme. It is not technically feasible for semi conductor manufacturing. In addition an industrial use would not conform with any of the current land use to the north, south, east or west.	8/21/2024 10:52 PM
17	Yes, in two areas. In "Planning amid uncertainty" in the executive summary, Metro does not include issues with the cost involved with the infrastructure and services of an expanded UGB. Cities in the metro area, and Oregon as a whole, are facing severe budget crises that all stem from over-expansion. We have built a large service area we need to provide infrastructure (roads, water, sewage) and services (police, fire, health) for, and cannot afford to. We have only gotten this far by deferring maintenance that is catching up to us. The Executive Summary also does not mention climate change once. We must pursue planning options that reduce GHG emissions. Lower-density housing leads to increased GHG emissions.	8/21/2024 10:47 PM
18	Pipe chicken Creek and add water quality facilities	8/21/2024 9:32 PM
19	there is plenty of land inside the current UGB, however much of it has locked up by garbage zoning and other rules that limits residential development's financial viability. we need to cheerlead all residential development and continue to chop down fees and rules until we get a deluge of infill development. it will make our place more financially productive, affordable and livable	8/21/2024 8:16 PM
20	I do not think the report factors in the restrictions on the land, such as existing power lines and the nature of natural wet lands. Power lines emit electromagnetic waves that greatly impact the manufacturing of microchips. Additionally, there are existing restrictions regarding industrial building on protected wetlands and their associated upland habitats.	8/21/2024 6:06 PM
21	The utlimate cost of the loss of farmland and natural areas. The proposal fails to understand the new realities and assumes more development is without this cost.	8/21/2024 5:50 PM
22	It ignores the opportunity for infill and densification of existing neighborhoods already within the UGB.	8/21/2024 4:55 PM
23	That growth has leveled off and the changing demographics of the area.	8/21/2024 4:22 PM
24	Yes, where is the money coming from for the infrastructure needed to support this proposed	8/21/2024 3:40 PM

	expansion? are builders and developers paying or are the taxpayers on the hook? In addition the discrepancy between the Growth report and the city of Sherwood projections justifying the expansion is hard to reconcile.	
25	Specifically in the Sherwood West expansion, the concept plan did not represent the will of the majority of Sherwood residents. 80% of residents did not want to see the level of expansion and were gravely concerned about how it would effect the livability and sense of community that already exists. There is no reason to add the entire amount into the UGB at this time, smaller more thoughtful expansion was never considered and the cost to add services to more of the rural portions of the reserve will be a huge burden to citizens, despite the city claiming it will not.	8/21/2024 2:58 PM
26	What's the plan to pay for the upkeep of all these new roads and sprawling infrastructure? Portland's budget is much larger than Boston's despite a smaller population in large part because we aren't as dense and suburban neighborhoods don't pay for themselves in taxes once they start to require maintenance. If we built denser on our existing roads, we might actually have the tax base to support them.	8/21/2024 2:35 PM
27	Is there consideration of preservation of trees and plants for carbon sequestration and other environmental benefits?	8/21/2024 10:54 AM
28	Land developers don't care.	8/21/2024 8:33 AM
29	Save farm land	8/21/2024 7:10 AM
30	No	8/20/2024 11:35 PM
31	Congestion is already a problem along Roy Roger's Road as it runs into Sherwood and connects to Highway 99. How will expansion and development of high density housing and business along this route between Roy Roger's, Lebeau, Elwert, and Edy roads not contribute to further traffic issues and noise? The growth projections Sherwood has provided to support this expansion are not consistent with the growth trends and true projections. As an example, the new high school was built to accommodate continued growth based on inflated projections. We now will see declining enrollment starting in just a few years. The school is struggling with budgets for the first time in years as the community is saddled with paying down the debt incurred to build a school that is proving to be too large. The housing need for the Portland Metro area is entry level to lower income affordable housing. Sherwood has become a more affluent community and is not conducive to development that will attempt to be affordable. Finally, there is no historical precedent for such a large expansion for this area. All of the above points would support reevaluation of the request to right size it for the true need for the community and support measured growth as opposed to an explosive expansion that could contribute to already tough traffic issues that impact Sherwood and the surrounding communities of Washington County.	8/20/2024 7:43 PM
32	Is property owners in Sherwood we favor the mixed use plan for Sherwood West on Kruger Road above Sherwood High School.	8/20/2024 6:24 PM
33	The amount of land proposed to be added into the urban growth boundary is staggering. Turning farmland into light industrial is sad. Sherwood still has large amounts of land available in the current boundaries. Elwert road is unsafe at its current speed limit and traffic congestion is already an issue with frequent accidents.	8/20/2024 6:21 PM
34	No	8/20/2024 6:19 PM
35	Sherwood protected land should not have zoning changes to allow for industrial growth	8/20/2024 5:00 PM
36	Traffic safety	8/20/2024 4:53 PM
37	Providing larger single family lot sizes in expansion.	8/20/2024 4:49 PM
38	The rate of growth in Sherwood area is not as substantial as the large proposal for 1291 acres, has anyone thoughtfully analyzed how long it would take to fill all the proposed housing.	8/20/2024 4:48 PM
39	Expansion for the sake of expansion. If they build it, they will come often untrue.	8/20/2024 4:25 PM
40	Sherwood area is not ready for this type of development	8/20/2024 4:20 PM
41	Quite a bit, actually. What is needed is a broader, more region-wide perspective, not mere kowtowing to Sherwood's empire building. It is not clear why Metro appears to be pushing this effort. Sherwood has ample undeveloped land within the city now, and has -0- interest in	8/20/2024 4:18 PM

	accommodating affordable housing anywhere. The northwestern portion of the proposed UGB expansion encroaches unnecessarily-almost gratuitously-upon successful agricultural operations whose success is closely linked to their rural setting. Again, it is hard to understand how or why Metro seems to have bought in on this weak, and destructive, proposal.	
42	Recognizing that the Willamette Valley is one of the richest soil areas in the world. We can increase growth inside the UGB and save our PRECIOUS farmland s	8/20/2024 4:10 PM
43	Do not expand the growth boundary in Sherwood where the high school enrollment is declining. Focus efforts on revitalizing Portland legacy neighborhoods and existing under supported schools.	8/20/2024 4:03 PM
44	There are a lot of items that we are questioning. They have been and will be submitted separately. Lot's of that data and other information is very misleading and/or obsolete and based on false assumptions.	8/20/2024 3:52 PM
45	Sherwood had enough land to build homes and businesses and industrial buildings without expanding the urban growth boundary	8/20/2024 3:52 PM
46	Expansion to the west without proper funding, study of the transportation costs including the costs of crossing fish bearing streams, condemning farm/wine property is in appropriate. Expecting the developers and existing landowners to bear the cost of development and hoping for federal funding for road improvements is narrow sighted.	8/20/2024 3:46 PM
47	The proposed plan *looks* like spraw. Even with the green spaces in the plan, there seems to be little to consideration for walkability or residential services. Also there seems to be inadequate consideration for the amount of traffic this will introduce on Elwert.	8/20/2024 3:46 PM
48	I'm concerned not enough consideration is given regarding available lands that the current owners aren't willing to sell, putting upwards pressure on land prices.	8/20/2024 3:31 PM
49	Yes, the Sherwood expansion plan is not proportional to the needs of the area and sustainability of agricultural lands. The numbers don’t add up.	8/20/2024 2:53 PM
50	The student enrollment decreasing which should be considered when planning on an unnecessary new school.	8/20/2024 10:54 AM
51	Yes, I'd like to see rail right of way reservations within the urban growth boundary area expansion. An exclusive ROW reservation is easier to set aside before development.	8/19/2024 6:09 PM
52	Use the land that is already inside the UGB first. No more tax increased and increased traffic please.	8/19/2024 12:45 PM
53	It’s incredibly disappointing that the report makes zero mention of the impact of the Urban Growth Boundary to will totally undermine any efforts to address climate change. Metro continues to ignore the science, and push for expanding car infrastructure and sprawl. We are poisoning the planet, and this action will massively increase GHG emissions.	8/18/2024 8:37 PM
54	There needs to be greater emphasis on increasing density and building up, not out	8/18/2024 8:30 PM
55	Traffic, it’s horrible and adding more houses is not keeping the town of Sherwood a great place to live	8/18/2024 7:01 PM
56	The report makes no mention of why the city of Sherwood needs to expand outward further from "Downtown Sherwood" and across 99W rather than upzoning and developing further around central services of community like libraries and grocery stores.	8/18/2024 5:10 PM
57	Sherwood has a ban on new apartment development in most of the city. Allowing an expansion of the growth boundary to this level when we are in a housing deficit will do nothing to alleviate the problems. Start with allowing these developments before agreeing to expand the growth boundary	8/18/2024 3:42 PM
58	Do not go forward with Sherwood West plans!	8/18/2024 3:25 PM
59	Greater enforcement of the UGB, do not allow Sherwood to violate it.	8/18/2024 2:25 PM
60	Sherwood Oregon has a near city wide ban on apartments. They should not be granted a UGB expansion before they show true need. Build some apartments Sherwood first!	8/18/2024 2:25 PM
61	No one wants to ask the hard questions about where the water will come from to support all this new development. We need to encourage businesses to choose small towns that have	8/18/2024 1:21 PM

	lost their timber jobs. Stop over-crowding the metro area.	
62	The complete wreckage of the farmlands, farm stands, community farm activities, scenery, peace, quiet, and character of the rural SHERWOOD community if the UGB were expanded in this way. Stop trying to make Portland better by absorbing everything around it to be ruined like Portland has been.	8/18/2024 1:20 PM
63	The fact that we do not use the existing UGB wisely.	8/18/2024 1:11 PM
64	Sherwood has an apartment ban yet wants to expand their growth boundary. This is counteractive to our housing and density goals in the Portland metro area. I ask that the council deny their UGB expansion in favor of more density within the current Sherwood city limits.	8/18/2024 12:49 PM
65	How are you going to ensure affordable housing goes to younger people without it being considered discrimination? Are you going to limit it to only Oregonians allowed to buy it?	8/18/2024 12:29 PM
66	Cities in Washington County maintain apartment bans across the overwhelming majority of residential land. Instead of lifting that ban, and finally allowing for adequate housing production, they insist that we must sprawl into more natural and agricultural land. Metro must ensure that there is a 20 year buildable lands inventory, and instead of fulfilling that through granting yet another irresponsible expansion of the UGB, it must exercise it's immense authority and compell cities to legalize more housing in existing residential areas closer to good transportation, job centers and amenities. Metro must also use its weight to compell cities to cut red tape that present a barrier to housing production, speed up permits, reduce discretionary processes, reduce permit fees and SDC charges.	8/18/2024 11:49 AM
67	This report inadequately considers the fire risk, climate impacts, and regional transportation connections for this plot of land. The notion that Metro is considering allowing more southern-California style sprawl in area with very poor automotive and transit connections in 2024 is deeply frustrating. As the last several weeks of media reporting have revealed nationally, this type of development will not be insurable in the coming years. Metro needs to think forward and better realize the context in which it is making this decisions. Developers want more land: not Oregonians.	8/18/2024 11:27 AM
68	Yes, better roads to handle the traffic.	8/18/2024 9:40 AM
69	What the decision makers already know and must reconsider, dense housing is not good for young families! There’s no place for kids to have a yard and play or have a garden. These homes are an eyesore to the landscape. It’s all about money and not the people. These home are NOT AFFORDABLE.	8/18/2024 7:48 AM
70	The area of Sherwood West is great farmland and wineries that make our city unique. While some development around the high school may be necessary, the Sherwood West concept asks for more expansion than is needed to support our community.	8/18/2024 6:28 AM
71	I think whoever has been making decisions for Sherwood has been doing a horrible job. I’d like to see more independent and family run businesses, not more hotel chains, restaurant chains, etc. I don’t think rapid growth is the right way to approach the future. Sherwood should be investing in what we currently have available in town, people who are interested in starting businesses. Preparing for challenges of the future should be the focus. Not continuing to expand. That will not solve anything, it will just make the problems we already have worse.	8/18/2024 1:08 AM
72	Don't build more homes, save our farms, and improve on what we have already	8/17/2024 8:46 PM
73	I don't see strong consideration of the potential downsides of each plan. If housing is underbuilt (because the area grows more than expected), the consequences are very bad - house prices rise again, families are priced out, people lose their housing, etc. But if we build more housing than necessary, the consequences are not so bad - we are just future proofed and ahead of schedule, dropping housing prices even more.	8/17/2024 2:48 PM
74	There are many types of housing and according to our governor, we need to address them all. When I move to Sherwood 20 years ago, I had three children and was able to find a house that has worked for us . If all that was available were apartments, or high density housing, we would not have moved to Sherwood. We need to have houses that young families can afford, perhaps creating a land trust like in Medford. I understand some that some people want to stop all development, but I believe that that will cause our beautiful schools to be empty and result in us needing to accept students from a larger area. This will have a detrimental effect on not	8/17/2024 9:10 AM

	only our community, but we would most likely attract the best and brightest that could afford to be driven to Sherwood everyday. This would diminish schools in the surrounding areas. We also typically lose people who no longer have children in the schools. We need a place for them to have affordable housing that is smaller so that they do not need to leave their social circles.	
75	The importance of preserving natural areas	8/17/2024 8:27 AM
76	I think that small outlying areas like Sherwood need to remain small. We moved here to a smaller city because we didn't want traffic and houses and excessive growth.	8/17/2024 8:02 AM
77	Climate change and public transit/alternative transit should be of utmost importance.	8/17/2024 5:18 AM
78	Zoning needs to stay where its at	8/16/2024 11:03 PM
79	How valid are your growth models? Internal and external growth appeared stalled.	8/16/2024 9:31 PM
80	I do not think that the impact of adding space as per the Sherwood plan addresses the congestion problems that will worsen or the impact on quality of life in the area.	8/16/2024 4:23 PM
81	Adding urban growth in areas lacking efficient transportation options only creates more expensive local long term costs and declining quality of life	8/16/2024 4:23 PM
82	Population in the Portland area is going down and continued to go down. We do not need to expand so much.	8/16/2024 11:44 AM
83	current roads are not capable of supporting new housing neighborhoods	8/16/2024 7:35 AM
84	Provision of shovel-ready, buildable land for housing and jobs for the next 20 years.	8/15/2024 1:41 PM
85	Growth in the Sherwood direction seems haphazard	8/14/2024 1:08 PM
86	Landowner rights near urban growth areas	8/14/2024 7:01 AM
87	There is a lot of unoccupied space in downtown Portland and surrounding areas. The economy is not in a good position now, no one can afford to purchase a house or pay the high price of rent.	8/14/2024 5:31 AM
88	No. I 100% oppose the expansion of the urban growth boundary	8/13/2024 10:06 PM
89	It says one of the goals is to protect farmland but yet everywhere I look I see more and more land being turned into industrial buildings and houses. So many farms have been lost and it is disappointing to see.	8/13/2024 7:54 PM
90	i am opposed to the Sherwood West Concept Plan, as there is not infrastructure in place to support growth of that size at this time.	8/13/2024 4:45 PM
91	I do not think the Sherwood population is growing as rapidly as stated there is enough housing to sustain growth	8/13/2024 4:06 PM
92	Stay out of Wilsonville	8/13/2024 1:58 PM
93	More transparency of Metro projects. We have a few near us and it’s difficult to get straight answers.	8/13/2024 12:55 PM
94	People need to know what the cost (not the money) is to our community when we just keep building and building and building and taking away land from people that don't want to give it. You have wildlife with nowhere to go but in the neighborhoods then people get upset they are in the neighborhoods you wonder why food is so expensive and unhealthy and it's because with every new community you have less area for farms which means our food comes from further and further away and you have no idea how it gets there or who grows it. Building more shouldn't be the only option.	8/12/2024 6:13 PM
95	Urban densities are reaching unsustainable levels. We have vast room to expand UGB's and we shod do so. Make a plan to double the amount of land available for residential development over the next 20 years. Stop trying to cram ppl in tight places. Fix it now before all the counties decide to annex into Idaho.	8/12/2024 5:29 PM
96	Funding and impact of non taxpayers on quality of life	8/12/2024 4:44 PM
97	Yes, not adequately thought out.	8/12/2024 10:01 AM

98	If Portland area can't enforce the crime there is now why grow?!? ! How about we clean up what is the problem now: homeless, drugs, etc Then when that's taken care up perhaps talk about growth. But why talk about growth when crime is through the roof with what's there now?!?!	8/12/2024 7:23 AM
99	Citizens of Sherwood are not opposed to growth. We are opposed to frivolous spending on endless, poorly planned suburbs that are not supported by current growth patterns and predictions	8/11/2024 8:32 PM
100	PRESERVE GREEN SPACES.	8/11/2024 8:15 PM
101	I need more park with big trees, MORE BIKE LANES, less cars, there is nothing of that	8/11/2024 2:32 PM
102	Traffic congestion already exists on Sunset due to new high school and turn restrictions onto 99 from Brookman/chapman. The neighborhoods back there are not all built out so we haven't seen the true impact of that traffic. It is already very difficult with the existing population adding more houses and more cars is not going to help.	8/11/2024 10:27 AM
103	The most basic of economic theory is supply and demand: restrict supply and the inherent demand will cause price increases. If affordability is a key driver then ensuring adequate supply of land is fundamental to affordable housing.	8/11/2024 8:18 AM
104	We need more land made available for single family housing and just not for apartments.	8/10/2024 11:46 AM
105	Impact on agricultural, wildlife and wetlands.	8/10/2024 10:36 AM
106	Family size is declining. Discourage large house development by charging higher fees and taxes for houses greater than 2300 sq feet.	8/10/2024 9:58 AM
107	Don't steamroll new development...require government agencies to actually and actively listen to citizens. So often over the years I've seen city councils hold meetings for public to share thoughts, but it is very obvious that a plan has already been decided on and nothing residents say is taken into consideration. Most recent example is in King City where a residential street will soon be turned into a major, multi-lane road, destroying the neighborhood with too much traffic and making it a major thoroughfare.	8/10/2024 7:37 AM
108	Many people want to own their residence or live somewhere single-family. Statistics show that kids have higher achievement if they live in a regular home as compared to an apartment. That said, the low number of single-facility homes planned doesn't line up with the priorities/preferences of residents, nor what is best for the next generation.	8/9/2024 11:15 PM
109	Have you population projections taken into account that so many people are moving out of Oregon?	8/9/2024 5:50 PM
110	As updated projections for growth shows a downward trend particularly with the enrollment of the relatively new Sherwood High School at cost of aproximately $248 million financed by taxpayers. The proposed Sherwood UGB plan if approved will again significantly impact taxpayers as well as displace current residents. Smart, prudent and realistic planning for growth is much needed. Otherwise, grabbing large parcels of land with current and productive uses in one fell swoop will have dire immediate consequences as well as unintended consequences in the future.	8/9/2024 11:13 AM
111	Impacts to natural greenspaces, waterway management.	8/9/2024 9:51 AM
112	It is painful to see "decision makers" who see vast developments as necessary instead of using the less desirable land that is available or at least not develop in patches that can be sub divided. Reserving the nature we have is important. As a native Oregonian we do not want Califonication…Mass sprawls of urbanized land. Gentrifying of old neighborhoods should happen before expanding.	8/9/2024 9:32 AM
113	Do not expand the proposed Sherwood area plan, too much traffic causes people to take country roads not built for this high volume traffic. It is causing dangerous situations with high speeds and too much volume on roads not built for this much traffic.	8/9/2024 6:58 AM
114	No	8/8/2024 9:04 PM
115	Oregon is changing many say. Lower population =charm. Higher population =more crime	8/8/2024 8:18 PM
116	Think about cleaning up what you have and not creating more that you can't take care of	8/8/2024 7:45 PM

117	Impacts of Climate change	8/8/2024 7:45 PM
118	The necessity of preserving farmland	8/8/2024 7:05 PM
119	Stop the sprawl	8/8/2024 6:28 PM
120	Keep land as is no more commercial growth	8/8/2024 6:24 PM
121	You are pushing out small family farms by expanding the urban growth boundary.	8/8/2024 1:58 PM
122	I think Sherwood's specific analysis at the local level should be part of the Metro Council decision making. There's a strong argument to be made about where people want to live and work that doesn't always translate to regional land availability.	8/8/2024 1:04 PM
123	no	8/8/2024 12:02 PM
124	I am very against the tall high rise forms of living. The people that buy them are childless. Single family homes need to be focused on. As large companies come this way, Sherwood, the employees come for the schools, and they have kids. Our schools are emptying because there are no children coming up the ranks. It is very sad and the schools get paid per child enrolled. We build all of this for the now, but not for the duration.	8/8/2024 11:42 AM
125	The report seems wise and carefully written to me.	8/8/2024 11:25 AM
126	If the population is slowing or declining why should the boundaries be expanded? Sherwood does not have the infrastructure for expansion. The roads are overcrowded now.	8/8/2024 11:04 AM
127	Traffic and dense housing increases school crowding	8/8/2024 10:47 AM
128	How about we grow in the surrounding communities outside of portland? Office space downtown is empty, people are fleeing the city yet we want to rip and build on fatmland	8/8/2024 9:54 AM
129	I think we need more responsible growth. We keep building more while there are buildings sitting empty for years. Sherwood theater has been empty the old Hagens building in Tualatin also has been empty for several years as well as my others. Maybe before expanding one should consider repurposing existing buildings.	8/8/2024 9:42 AM
130	I can see wanting to expand the boundary to the north or SE. Tigard, Tualatin or Wilsonville will want to grab that space. There doesn’t seem to be a push from the west or Sw for that space. Need to not spread to far too fast. IMO	8/8/2024 9:37 AM
131	Not considering what is best for us in Sherwood. We like small community living. Stay away !!!	8/8/2024 8:49 AM
132	I think there are other places, for example West Lynn or Wilsonville that already have the beginnings to your urban sprawl. There are just too many roads that are congested and it’s becoming Los Angeles quite frankly disgusting. Please leave some of the cities in Sherwood Canby etc., so that we can have rural areas and people that want the countryside feel. Leave them alone.	8/8/2024 7:14 AM
133	it seems clear that the statistics regarding growth (population and growth) indicate that expansion of UGB is not needed at this time. The Sherwood West proposal is the product of a few influential politicians and developers, and is not the desire of Sherwood general population.	8/7/2024 8:21 PM
134	Does not consider the exodus of people from Portland to Washington due to higher and higher taxes; recent layoff statistics and declining population does not justify the need for expansion of the UGB; no indication of jobs to be created by each business when AI and automation are replacing workerrs	8/7/2024 7:57 PM
135	we don't need UGB expansions, there are so many places for redevelopment, and developers are making way too much money, create a local lending program for building affordable housing, and for wealth building for communities of color	8/7/2024 4:34 PM
136	It looks like a good plan.	8/3/2024 8:26 PM
137	Historical aspects, the heritage of native people, the preservation of land that may contain artifacts, minerals or be of historical importance. Or, significant & with a legacy of those who came before us. The rights of farmers, especially, families who have been tending to land (much of it which could be considered some of the best in the nation for agriculture) & animals for generations. Also, the Native Americans heritage & culture as many areas in Oregon have artifacts (that can easily be missed, discarded or ignored), historical & cultural symbolism & importance.	8/3/2024 12:50 PM

138	OR 99W and Sunset Blvd intersection needs a traffic study before the UGB is expanded, not after.	8/2/2024 11:42 PM
139	There are lengthy discussions about housing and industrial building, but no mention of commercial amenities close to housing. It would be nice to have restaurants that are not in strip malls and are more integrated into each neighborhood (like old Portland, with small stores, eateries, service stations among the neighborhoods). Feels less like SPRAWL.	8/2/2024 3:13 PM
140	The land that is left for residential development isn't always workable for builders. Sometimes the land, although surrounded by neighborhoods, cant gain utilities. Or the transportation plan doesn't match the development needs of the city. I'd like to see more opportunities in Tigard, Beaverton, Bethany, and Hillsboro.	8/1/2024 12:31 PM
141	No	7/31/2024 8:37 AM
142	Decide on buildable land areas based on _middle housing_ options, not single-family zoning!	7/30/2024 7:44 PM
143	Unfunded past needs.	7/30/2024 8:55 AM
144	the public is appalled at the appearance of high density neighborhoods. people are leaving Portland becasue if the fixation on density and the lack of senior living options. The public seeks more diversity in housing choices and more complete neighborhoods.	7/30/2024 7:14 AM
145	The urban growth boundary is one of Oregon's most valuable assets. Preserving this boundary in spirit and in substance is critical to this state being the place people choose to live.	7/29/2024 11:48 AM
146	not at this time.	7/29/2024 9:35 AM
147	The consideration of houses not being available or owned by residents. It doesn't do any good for the community if corporations or individuals are purchasing homes to use as rentals or other money making ventures.	7/29/2024 7:48 AM
148	no need to expand ugb, make esisting city more dense	7/28/2024 12:50 PM
149	Climate change, both how to mitigate it in the urban area as we grow, and how to reduce everyone's carbon footprint through planning.	7/28/2024 8:34 AM
150	Yes. There's a housing crisis. Homes are unaffordable. Supply is not matching demand. We should strive to have the same housing affordability as Michigan, not just accept that the west coast is expensive. We made it this way. We need to adopt the if we built it someone will live in it and build until the affordability crisis is abated. This report does not address the immediate needs nor total volume of new housing supply with the urgency the problem deserves from an organization that has the power to make a difference.	7/25/2024 7:17 PM
151	It looks pretty good	7/24/2024 5:33 PM
152	Yes. I have several concerns and oppose approval of the proposal: 1. The City of Sherwood failed to plan for traffic infrastructure related to the proposed growth, making the plan unfeasible. 2. The proposed industrial zone has large swaths of area that are designated at Title 13 upland habitat. The plan does not address this major barrier and operates on an assumption that the designation can be removed or does not apply. 3. The proposed industrial zone has a 500KV transmission line running diagonally through a central segment contemplated for large-scale development. Use within the easement is extremely limited (parking lots, containment ponds and the like), making the area not suitable for industrial development. 4. The area is not suitable for chip and other similar types of manufacturing due to EMI (electromagnetic interference) from the transmission line. 5. The proposed industrial site is in the gateway to wine country from Hillsboro and Beaverton, threatening the agricultural use that is a major benefit to Oregon's economy. 6. The proposed industrial zone is in close proximity to the Tualatin National Wildlife refuge, raising additional concerns about environmental pollutants in this ecologically sensitive region.	7/24/2024 3:55 PM
153	I agree with Dr. Gerard Mildner, Professor Emeritus of the PSU School of Business who makes these important points: 1) Metro should reject the staff's Draft 2024 Urban Growth Report. High housing costs are real. Working at home (now 24% of workers) requires larger housing units, not smaller ones. The existing UGB includes a lot of hard-to-develop parcels, as well as private zoning that prevents middle housing. 2) In the draft, staff argues that "fertility rates in Oregon are below replacement, so high population growth only comes from attracting younger workers. Younger workers choose multi-family locations. And more multi-family apartments	7/24/2024 11:56 AM

	means less acreage needed within the UGB. Hence, no need to expand the urban growth boundary..." There are two problems. First, multi-family housing is more expensive on a per square foot basis: Two-story apartments are the lowest cost form of apartments. Five-story construction like we see in Beaverton and East Portland require rents about 50% higher to justify construction and dominate when land costs are higher. True high-story using steel and concrete (or massed timber) requires a further 50% premium in rents, and dominate in downtown Portland. Hence, Metro is exposing us to further increases in housing costs. However, housing prices are never discussed in the Draft Urban Growth Report. Staff applies their engineering metrics of people per hectare, and ignores economics. Second, people age and have families. While it's possible to recruit college graduates to move to the region, the individuals seek larger housing units as they age. The 22-year old who arrived in 2024 will be a 42-year old at the end of the planning period. And as we discovered during the pandemic, single-family homes offer great opportunities for home offices, bedrooms for relatives, and backyards for children. We need to factor in that people grow up.	
154	I can see making a special exception for UGB in the case of Intel or another massive commercial project that's going to inject billions of dollars into our local economy. But that's the only exception. Suburban sprawl is a proven GDP killer. I have found the website Strong Towns to be immensely helpful in explaining to people why suburban sprawl is actually bad for economic development in the long run	7/24/2024 7:32 AM
155	It seems Sherwood will need more housing and mixed use high-end shopping areas for its residence. Already housing prices are high because there is a shortage in the area.	7/23/2024 9:20 PM
156	Denser Development	7/23/2024 8:54 PM
157	This report shows we have a shortage in housing and employment land and we need to continue to grow in a way that enables quality of neighborhoods, affordability and attract businesses. We need to continue to grow to be healthy.	7/23/2024 8:30 PM
158	The low value of subjective assessments of the types of growth that will occur in the future. Footnote 3 on Page 38 relies on jurisdictions own estimates of what kind of demand for housing there will be in the future, despite the noted clear market incentives to the contrary. Middle housing has only really been available for a few years, and that period has been heavily punctuated by the pandemic. The real impact of those changes will take decades to see, and subjective information about past growth patterns have little value in the face of the newly unleashed market demand that will, under all other scenarios, drive new growth. This is especially important to consider when every other scenario for growth supports Metro's policy goals. Finally, I find it very strange that only a single small city in the region has interest in expansion. Either that city is misinformed about actual demand (a "hospitality zone" in Sherwood, really?) or every other jurisdiction in the region has completely missed the boat. I think I know which is more likely. I suggest that the Metro Council take into consideration the dearth of expansion options being presented as further evidence that the demand for growth actually isn't there.	7/23/2024 6:39 PM
159	The estimates assume many things, but do not factor in new work from home models, AI impacts on work models, or any other forward looking assumptions.	7/23/2024 6:19 PM
160	By enlarging growth boundary you are taking away areas which are now rural and small woodlot areas enjoyed by middle class and lower class families and replacing them with small apt, house lots. The gap between the wealthy obama like estates and what you want to do will increase. And which group do you belong to?	7/23/2024 3:19 PM
161	I agree that the boundary should not be expanded and we should work to improve the existing land	7/23/2024 3:14 PM
162	Taking into consideration the land and low traffic needed in agriculture areas where you have animals, large machinery, etc which is impacted by bringing in commuter roads.	7/23/2024 2:12 PM
163	Severe traffic problems with overburdened road systems in Sherwood Oregon and SOLUTIONS before even considering growth outside the current urban growth boundary. No need for industrial growth outside of current growth boundary - extensive options along Tualatin Sherwood Road. Adequate development land within the current Sherwood boundary.	7/23/2024 12:06 PM
164	The need for farmland is critical. Other than a gratuitous statement of its value, the Report does not address the consequences of replacing fertile, productive land with houses and industry. Build those structures on poor soil, where farming is not tenable. This should be addresses in the Report.	7/23/2024 11:17 AM

165	A UGB expansion in a part of the metro area poorly served by transit and likely to be entirely car dependent does not align with any of our regions goals. As such, it’s unclear why it’s being considered	7/23/2024 2:36 AM
166	I think the zoning is way too aggressive, I think we need to honor what Tom McCall wanted for Oregon. I don’t believe creating more homes is going to create housing that is more affordable. Supplies are too expensive and resources are limited. I think if we randomly infill without thinking ahead, then we’re just going to be damaging Oregon as a state. I think we need to address infrastructure rather than just letting infrastructure motivate us to improve it based on building more homes. No toll without a vote. Let’s stop copying municipal code in California and let’s get with with the program on why people are moving out of California. Environmental first!!	7/22/2024 3:06 PM
167	Building designs with the change in climate in mind.	7/21/2024 10:35 AM
168	The area is losing residents. There's no reason to extend the growth boundary.	7/21/2024 9:00 AM
169	Looks good to me, just want more density	7/20/2024 9:12 PM
170	Do not expand the urban growth boundaries anymore. We have enough land within their current extent to build densely. This will preserve open spaces and discourage car usage which is bad for the environment; it will also encourage transit usage which is the way of the future.	7/20/2024 7:38 PM
171	No	7/20/2024 7:41 AM
172	Inclusive community engagement; conducting an equity assessment on the concept plan	7/19/2024 4:15 PM
173	Not enough work was done to analyze changes in policy that encourage veritcal growth and density in the existing lands. The report focused on unused/available lands, which is not the only way to change policy and discourage sprawl through UGB expansion.	7/19/2024 2:06 PM
174	First, if manufacturing jobs represent only 10% of total non-farm jobs in the region, why so much emphasis on it instead of prioritizing other sectors? Second, is there any study of the effects UGB growth causes on air and water quality? Pollution is a crucial factor to consider.	7/18/2024 12:03 PM
175	Residential RV parks and mobile home parks can be a very useful tool for lower income housing, but they are prevented in many communities and not mentioned in the reports	7/18/2024 6:16 AM
176	There is too little consideration for watershed restoration in suburban areas. At this stage in development it would still be easy for us to reclaim riparian areas and sections of streams with free flowing water and designate them for public use. If we wait twenty years more of that land may be covered with pavement or sterilized of natural habitat.	7/17/2024 11:12 PM
177	TRAFFIC 🛑	7/17/2024 6:04 PM
178	The report claims that more land is needed for "welcoming families". Aside from the city of Sherwood targeting employers not residential development, the claim that there isn't enough land for either is absolutely false. Look at the development adjacent to the Tualatin-Sherwood highway. It's all auto-centric, low-rise sprawl surrounding a wide highway that only induces more driving. Even the high school is auto-dependent. If Sherwood (and the rest of Oregon and the US) developed in a similar pattern as before the car dependent suburban experiment, there would be plenty of land available for new businesses and families. Instead of looking to reverse the mistakes of the past 5 decades, Sherwood is just trying to continue the auto-dependent development. The city is claiming that they need space for all type of housing and that land scarcity is driving up costs. That's baloney. The suburban development is what's made land scarce because of inefficient use. And an efficient use of land will make land available for housing. Just not the typical suburban single family detached housing. And while the state mandates sidewalks and bike lanes, it doesn't mean that they'll be used when the destinations are far apart and the environment is hostile to the development. Finally how does all this need take into consideration the development going on in King City, Hillsboro, etc.? If you're only looking at Sherwood in a vacuum, then you are missing the cumulative impacts of development as well as trying to steal jobs from surrounding communities.	7/17/2024 2:18 PM
179	The will of the people who live here.	7/17/2024 2:00 PM
180	This expansion creates too much low density housing. If the proposal is serious about creating more housing and jobs it should only include space for multifamily housing that can be mixed with commercial spaces. We need more NW 23rds not more Lake Oswegos.	7/17/2024 9:20 AM

181	No. Please approve it	7/16/2024 11:18 PM
182	For Sherwood to maintain its quant quiet small country town feel it cannot continue to sprawl out into the countryside that makes Sherwood what it is. There is enough space currently in the city that should be reimagined and redesigned to support more homes and people	7/16/2024 8:46 PM
183	The report did not consider the potential impacts of climate change, in terms of population increases in the Northwest due to cooler weather and water availability relative to other parts of the country, and also impacts of climate change on the wildland urban interface and how this could impact fire risk for the edges of the Portland area.	7/16/2024 8:26 PM
184	Plan more roads. Stop allowing destruction of natural area and trees and require trees be preserved as well as more planted instead of grass.	7/16/2024 6:26 PM
185	I think a more in-depth analysis of how mixed use and/or dense an area needs to be in order to, at the very least, financially break even (taxes collected minus cost of local services provided), would be highly beneficial, especially if it can be put in a visual format which is much easier to understand. Urban3 (which worked with the City of Eugene) does this kind of work, and I feel Metro may gather very valuable information from this type of analysis, even for specific areas within the UGB. Financial viability should be at the core with Metro's development decisions so ensuring this single element is achieved and can be demonstrated to the public with figures and images seems an essential element to consider.	7/16/2024 5:52 PM
186	I think the decision makers have already made up their minds on what they plan to do and it many times is not in the best interests of the communities	7/16/2024 12:20 PM
187	No.	7/16/2024 10:24 AM
188	The employment and population forecasts are unduly pessimistic. This area has done better than national trends consistently over the last few decades, and the forecasts appear to anticipate decades of decline.	7/16/2024 9:04 AM
189	Funding for schools! You cannot expand boundaries and overfill our schools without discussing how these (and other entities) will see a compensatory increase in funding.	7/16/2024 8:09 AM
190	There needs to be more land opened for more housing. We need to restrict Airbnbs as almost a quarter of homes are being bought by investors and rented out increasing the cost to rent and to buy. If we limit airbnb or charge a fee for doing Airbnb we can create revenue to allow for more subsidies on housing. But the biggest need is a larger amount of buildable land so people can actually afford homes and lower price.	7/16/2024 8:00 AM
191	Metro needs to read between the lines of the Expert's analysis. Even the small baseline growth assumption seems optimistic. Developing suburban land will not create "affordable housing" in locations where it is needed.	7/15/2024 8:39 PM
192	Why do we need to create conditions to attract people to settle here? It's okay to not do that. They will go elsewhere and that is okay. We have always been fine. We already have too much congestion and need breathing room.	7/15/2024 7:50 PM
193	I think crowd control. If you are going to purchase a house, chances are you want a yard, places to safely park (or where guests can safely park), and really resources and road/traffic control. The bigger Portland gets, the more cars on the road…maybe it's time to consider different highways that avoid clustering the hwys that already exist. Wildlife also needs much more considerations. We have a lot of animals that migrate through the season and even during the day, they need safe areas to complete this. Tigard has amazing walkways through the city which follow a stream and tons of wildlife use it for traveling away from cars as well as a food, shade/shelter, and water source. It's surrounded mostly by roads with low speed limits which is helpful too.	7/15/2024 7:17 PM
194	Quit taking out property	7/15/2024 6:47 PM
195	More focus on providing good housing for all demographics and not creating slums. More focus on transportation as well as drivability. More focus on public safety, education, sustainability,	7/15/2024 5:54 PM
196	Maintaining an affordable supply of single family and mid density housing	7/15/2024 5:28 PM
197	Too many people in the boundary lines causes insane traffic for people living near the highways. I can't even get out of my neighborhood to turn on to a road because there is so much traffic	7/15/2024 5:12 PM

198	The proposed size of the UGB in Sherwood seems extraordinarily oversized, with lands that are currently used for employment in forests, farmlands and wineries being usurped by potential new employment that is uncertain. Damage to watershed and forest lands are not be duly scrutinized.	7/15/2024 3:31 PM
199	Thank you for the survey. Please remember to hear both sides of the coin in all of these affairs.	7/15/2024 3:25 PM
200	When economic development staff in the region are working to attract employers, they need quick decisions. We never have enough options. I think the semiconductor task force and the state's decision to allow an expansion if the opportunities present a quick decision. More 'optional' land could be a good policy when all the right conditions are met.	7/15/2024 2:14 PM
201	I think you are gonna see tons of commercial land come up for sale and flud the market with people working from home. Maybe a plan to convert through building or land inside the urban growth boundary to housing. That will help. And cut all the red tape to build on the land we have now. No one can developed land if it cost 125k just to see if anything can be built.	7/15/2024 1:45 PM
202	Farm land and wild spaces, especially in sherwood. It would be preferable to establish larger housing withing existing city limits vs expanding into the broader area	7/15/2024 1:41 PM
203	Build the infrastructure/roads/ammenities before allowing more residential	7/15/2024 1:35 PM
204	It's good. Let's fund it.	7/15/2024 1:17 PM
205	See above. Expanding the UGB for the sake of more single-family residential development is merely blessing sprawl. Thank you.	7/15/2024 1:12 PM
206	Underproduction on recently added lands to the UGB suggests that proponents for expansion are not honest in their assertions. Also, recent proposals for expansion of nearby UGBs, as in North Plains, utilize regional rather than local growth to make their need case. This suggests, at a minimum, that nearby cities should be added to the Metro UGB should they seek to expand their UGBs.	7/15/2024 12:58 PM
207	The cost of living is only mentioned twice in the draft report. Perhaps addressing this would help with uncertain emigration numbers.	7/15/2024 12:40 PM
208	No	7/15/2024 10:53 AM
209	Fewer parking lots, less sprawl, more dense housing, narrow freeways and add tolls, more bike paths	7/15/2024 10:35 AM
210	While you give lip service to climate change, not enough is being done.	7/15/2024 9:56 AM
211	See above. Do not open the UGB to large plots of ‘farms’ that get reduced taxes for having a llama ir Christmas trees. We all know that is a sham to allow rich people estates.	7/15/2024 7:25 AM
212	No	7/15/2024 6:07 AM
213	I am older woman, age 74 and do not think you are taking into account people like me who living long. Keep public transportation strong so I can go Places. I work part-time and still drive a car but not for long so please don't disregard the needs of older people like me.	7/14/2024 5:37 PM
214	The mobility corridor connecting Portland, Tualatin, Sherwood, Newberg, Dundee, McMinnville, Sheridan, and Lincoln City needs a major upgrade, especially with the growth planned for Sherwood West, and continued growth in Yamhill County.	7/14/2024 3:55 PM
215	Community wants. Oregon talks a big game but consistently underestimates what is needed. See the lack of lanes on 217 while light rail was promoted, people do not want mass transit but tax dollars are wasted instead of put where the community wants. Soulless development of cookie cutter houses replace rural and natural areas. Oregon is supposed to be about conservation, not how many tax revenue lots can be jammed into the urban growth boundary.	7/14/2024 3:35 PM
216	Please stay away from Sherwood'as green space, wetlands and agricultural land.	7/14/2024 3:25 PM
217	The Sherwood West proposal as it pertains to Lebeau and the nearby Edy road area. There is no need for additional industrial growth in these areas. We live in the area and are members of local wineries there, all of our neighbors are against the unnecessary growth in this area. I am concerned for the environmental impact that growth in this area would cause and for the loss of the natural beauty that drew us to Sherwood. Tualatin-Sherwood road holds plenty of space for	7/14/2024 2:16 PM

	industrial growth and it is not needed on the Lebeau/Edy side of Sherwood. Please consider the residents and the environmental beauty of these areas before approving this project as it will bring a negative impact on the community.	
218	Most important the limited water supply of Chehlam Mt. has been taken into consideration at all, particulary based on the models of the past yrs of shifted temperatures and climate. People move in , parks r created and water wasted to.kerp them all green. Chehlsm Mt. does not have an aqua fir and must rely on rain which has been heavily impacted. 2. The infrastructure and traffic patterns were not considered at all for the area. Development is allowed to come first and no infrastructure, then yrs if worthless construction and traffic jams. 3. Sherwood City council only wants the profits.	7/14/2024 1:53 PM
219	No	7/14/2024 12:44 PM
220	No	7/14/2024 11:19 AM
221	There are so many new buildings and warehouses and apartments and such in Sherwood we don't need to take up any more farmland. And we really don't need that much more congestion on that side of Sherwood.	7/14/2024 11:16 AM
222	Traffic, funding for all the growth expansion. Sherwood residents already paid for a gigantic high school that is only a 1/3 of total capacity. Sherwood residents do not want to fund more unwanted and UNNEEDED expansion into our green space and precious ag land.	7/14/2024 10:28 AM
223	Not enough infrastructure or community input	7/14/2024 10:25 AM
224	Citizen comment	7/14/2024 10:13 AM
225	The North District is currently farm land and at the base of a hill that is all agriculture. We do not ag land this developed into manufacturing and commercial space, adding more traffic to an already bottlenecked Roy Rogers road. Sherwood already expanded to develop more commercial space. This land has not been fully developed, yet the city is already asking for more. tualatin, King City, and Beaverton, All bordering cities of Sherwood, I've had massive growth or art currently in the growth process. The city of Sherwood demonstrates a lack of need. Metro must consider want verse need in this scenario. This ask would expand the city of Sherwood by 41%, an obscene amount of unnecessary growth into utilized farm and agriculture land. The land that the city is requesting, backs up to a national nature preserve, a precious creek and wetlands, and farm land that is all currently farmed. This land ask is unneeded and unwelcome but the majority of Sherwood residents. This has been demonstrated by a survey of Sherwood residents. Over 80% of residents rejected the city's proposal plan.	7/14/2024 10:03 AM
226	I think the decision-makers need to put more emphasis on how we are traveling around the city and look to boost trimet influence on the city. More bus lanes and build the southwest line.	7/14/2024 9:25 AM
227	Need to better factor in seniors	7/14/2024 12:07 AM
228	The house size was not considered. It would be wise to focus on density increase and apartments building woth mentioned family size decrease.	7/12/2024 11:40 PM
229	I appreciate the focus towards climate change and there was more focus on car free infrastructure than I was expecting. But one thing I think needs improvement is a stronger focus of prioritizing more dense housing and their proximity to green spaces. It seemed like when looking through the proposals, the low density SFH areas were closer to the nicer park areas. I also think this area needs to prioritize state of the art bike and walking infrastructure. The trails mentioned sounded good, and it would be great if they were totally separated from car right-of-ways. I would prefer all of this to not happen at all, but if it did, I want to see it done right with good urbanism design features and reducing reliance on cars.	7/12/2024 8:13 PM
230	no	7/12/2024 7:47 PM
231	Vertical development is a direction - we can build up, build density, and single family car oriented development is not necessary at this point. There is a lot of density to build and zoning + investments can make it happen.	7/12/2024 6:10 PM
232	more thought needs to go into transit access	7/12/2024 5:31 PM
233	We need housing and commercial offerings where schools and business In order to contain traffic - housing and commercial offerings must surround schools and places of events.	7/12/2024 1:10 PM

	Washington County is not well organized, there is a lot of driving to get from one place to another.	
234	Equity and access to opportunity and how severe restrictions on the urban growth impact communities of color and other disadvantaged populations.	7/12/2024 12:23 PM
235	Suburbs destroy ecosystems, increase emissions, decrease equitable access to nature and heavily reduce human interaction. They are not the right answer to expansion.	7/12/2024 7:47 AM
236	I didn’t see much of anything on the bicycle network and how it will fit in with the surrounding environment. After all at the center of the expansion is a high school and students should have access to safe and efficient routes to their schools.	7/12/2024 12:22 AM
237	Climate change, ecosystem loss, equitable access to nature. Greater density is the solution, not the occupation of land that should be wild.	7/11/2024 10:31 PM
238	Please consider housing outside of single family homes. As long as we can transit to home, to work, and to green spaces, we don’t need the suburban dream which is much harder to maintain and really limits growth	7/11/2024 6:57 PM
239	Yes. We do not need to expand the UGB, in Sherwood or anywhere, to accommodate the region's growth. UGB expansion areas always just produce more high-end housing, not the more-affordable options that we need the most. Further, building new housing at the edge forces people into their cars, increasing their household expenses -- also not great for lower-income folks. We ESPECIALLY need to stop expanding the UGB far from transit. The region really f'd up in allowing Happy Valley to happen, but not planning to extend MAX to serve it. We're not planning to expand MAX to Sherwood. Therefore, we should not expand the UGB there. Simple as that. Vote no, go home, and spend some of your vacation time.	7/11/2024 6:12 PM
240	Low density development, transportation, car dependence, cost of living including transportation	7/10/2024 10:14 PM
241	Need to consider how Sherwood can be more judicious about densifying it's existing land	7/10/2024 9:51 PM
242	Metro's regulatory process bogs down housing development - development being so needed to put young people/families into their first house and put them on a road to individual prosperity.	7/10/2024 8:30 PM
243	Low density housing should not be added. Low income housing should be 50% of all new housing in expanded area.	7/10/2024 5:14 PM
244	Transportation has to be a major factor in this decision. We must greatly decrease vehicle miles traveled while increasing access to housing.	7/10/2024 12:08 PM
245	You will kill the vineyards and wineries business around here if you keep building lower income housing. And that is an important part of Sherwood/Newberg/Dundee tourism.	7/9/2024 9:48 PM
246	I did not see enough emphasis on local (city) decision making and responsibility. Plus, I did not see enough working together between regional and local government and insufficient level of public information and reaching out to get every one involved.	7/9/2024 3:43 PM
247	?	7/9/2024 3:15 PM

Q5 Please provide your comments on the Sherwood West proposal in the box below.Proposal Summary:Name of urban reserve: Sherwood West Gross acres: 1,291 acresHomes planned: 3,120 – 5,580 unitsJobs planned: 4,500 jobsThe City of Sherwood has proposed expanding into the Sherwood West urban reserve to support development of homes and jobs. The planning for this area began in 2015 and has resulted in a concept plan that reflects the community's priorities for employment and economic growth. The plan also reflects new housing regulations meant to encourage the development of many different types of housing.To learn more about the project proposal, visit the webpage.

#	RESPONSES	DATE
1	This city has NOT done an adequate job of utilizing existing development nor accurately forecasted the growth. Our incredibly expensive high school is underutilized and we're paying for it as tax payers. This is not the right direction to go for Sherwood.	8/23/2024 10:11 AM
2	This is a land grab. There is no reason to disassemble rural properties & farmland, destroy peoples businesses, introduce commercial/industrial complexes (when there are empty & unleased inventory) create high density housing when research shows a decrease in population, deterioration of the level of education in the school system, and housing prices skyrocketing. I am all for growth in a measured & logical manner when the need arises. There is no evidence that supports an inclusion of this magnatude	8/22/2024 10:03 PM
3	I am totally against the growth proposal	8/22/2024 9:46 PM
4	this may not be the right place to put this, but I found the webpage difficult to navigate—it was hard to find the information I cared about and if I hadn't been wanting to fill out this feedback form, I probably would have clicked off before getting the answers I wanted. something about the navigation could be clearer (I wasn't even really sure if the right webpage was linked at first)	8/22/2024 9:42 PM
5	Sherwood currently has some of the most expensive utilities. There is no financially viable way to expand housing and businesses and keep the livability of Sherwood affordable. Sherwood is in the middle of wine country, a huge economic resource for the State of Oregon and the Metro area. Expanding the Urban Growth Boundary will cut into this critical agricultural land needed to help further Oregon's wine industry. On top of this Oregon is known world wide for its amazing views and natural beauty. Swaths of industrial parks and cookie cutter housing is no way to help Oregon or Oregonians in developing affordable and liveable housing. The current plan suggested is not a wise option for the viability of Oregon's future and I stand against it.	8/22/2024 7:10 PM
6	Sherwood is not ready for more growth. Part of Sherwood charm is open spaces, wineries, and fram land. It's rural and near major cities. Road s are not sufficient for the traffic as it is. Losing forested land would be a huge downfall and make Sherwood less desirable	8/22/2024 6:55 PM
7	To whom it may concern, As a resident and taxpayer of Sherwood, I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community. Keep our small town feel! Ask people why they live here...it is because of the small town feel....do not become a Beaverton! Sincerely, Patricia Hales	8/22/2024 6:34 PM

8	I disagree with the expansion of the urban growth boundary.	8/22/2024 6:31 PM
9	I support the Sherwood West Proposal	8/22/2024 4:40 PM
10	Being a property owner in the proposed expansion area who farms the land this expansion pushes us closer to losing our lively hood. Developers are continually contacting us and wanting to purchase our property. We are not interested. This is a very large expansion request. Is all or any of this land really needed now?	8/22/2024 11:53 AM
11	The Sherwood West Fact Sheet notes that, in an expansion proposal, cities are asked to show that “development of the proposed expansion area is feasible and supported by a viable plan to pay for needed pipes, parks, roads and sidewalks.” I commend Metro for asking cities to demonstrate this. Based on the Sherwood West expansion proposal, I do not think that the City of Sherwood adequately demonstrates that infrastructure development is feasible. Appendix B of the Sherwood West UGB Expansion Proposal Part 1 discusses infrastructure funding for the proposed development area. On Page 316, Leland Consulting notes: “Across both scenarios, revenues generated under a full buildout of Sherwood West are sufficient to cover estimated infrastructure costs for sanitary sewer and parks, but not for water, transportation, or storm infrastructure.” Additionally, they note, “ It is not unexpected to find a deficit for transportation infrastructure…when considering that many local governments are challenged with funding road development and maintenance.” The proposed funding strategies on subsequent pages are not guaranteed, and they largely address upfront development costs rather than maintenance costs. A city should not be allowed to expand the UGB without the ability to pay for ongoing maintenance. With our current inability to fund maintenance, people in the Metro area are already experiencing the negative effects–why exacerbate this by further sprawling outwards? The development in the proposed expansion area will not provide the tax base required to support their infrastructure in the long-term, and it is unfair for other areas of Metro to subsidize the City of Sherwood’s expanded area.	8/22/2024 11:40 AM
12	I believe very little thought has been put into the traffic these 5,580 homes will create. Average 2 cars per home so an additional 11,000 cars will be on raods that are already conjested. Also you are going to burden the current property owners with additional taxes for improving infrastructure, roads, schools, and fire stations that these 5,580 homes will require. You are taxing the current property owners right out of their own homes just to make room for people that don't even live here yet.	8/22/2024 10:22 AM
13	Doesn’t seem like the plan accounts properly for the cost of maintain this sprawl infrastructure, and they certainly have not maximized the housing and jobs potential within their current perimeter.	8/22/2024 10:10 AM
14	The Sherwood West area consists of farms, forests, and other properties in the hills of this countryside. Most of it is not suitable for the increased traffic that this development would bring. If you are inclined to approve an expansion, I strongly urge you to reduce the amount of acreage dramatically. There are few east/west roads that connect Sherwood West to Hwy 99W (which is our lifeline to everything), and the City has no plan or intention to increase those. They have only proposed new north/south roads which won't connect to Hwy 99W. I fear we will all be stuck in a logjam up the hill unable to access Hwy 99W if several thousand new residents are put here. This is an area of sloped, narrow, two-lane roads. The intersection of Edy Road and Hwy 99 can't be expanded due to Walgreens being on one side and the Providence building being on the other. It's going to create unsafe conditions and car accidents for the existing residents along the side streets who need to pull out onto Edy Road if there are thousands of additional vehicles to compete with. If you need one example of traffic dysfunction that has been created by adding thousands more homes all in roughly the same geographic area, like the South Cooper Mountain, Tigard/West Tigard, and King City expansions, look no further than SW Fischer Rd and Hwy. 99W. Traffic traveling north on Hwy 99W often comes to a stop well before this intersection, because there are so many cars making a left turn onto Fischer Rd that they have spilled over the quite long left turn lane and are now stopped waiting to turn left while in the left TRAVEL lane of Hwy 99W. This is right in front of a TVF&R station, and the results of this grid lock traffic are going to prove tragic when an emergency arises, and fire trucks can't get to where they need to go.	8/22/2024 3:04 AM
15	The City of Sherwood, according to available information, has an employment-population ratio of about 50%. This is extremely low, even compared to nearby cities. This is because Sherwood is a suburb, with a high median income, far from job centers, and dependent on freeways for access. This sort of pattern of predominant single family homes, with few jobs, connected by freeways, is catastrophically bad for regional health. The reason Sherwood wants to expand its UGB is exactly because it requires continual sprawl to fund the borrowing	8/21/2024 11:14 PM

	it made in the first place. While I appreciate Sherwood is seeking to add additional jobs and create mixed-use neighborhoods, the fact remains they must first do this within the existing city boundaries. The city has proven incapable of mixed-use neighborhoods close to jobs and schools. Giving them more land and hoping they 'get it right' does not make sense- and it shows in the proposed zoning, which is still predominantly low-density residential. In fact, the breakdown of zoning reflects existing Sherwood zoning quite directly. I don't know why we would expect a better use of new land. To accomplish regional goals, and even to create a healthy Sherwood, we must develop existing land within the UGB so we can create financially and environmentally sustainable population growth.	
16	Please make sure this doesn't turn into typical urban sprawl that's bad for the environment and pushes out low income bipoc communities.	8/21/2024 11:11 PM
17	I am against the industrial expansion. The City has been Disingenuous about the planned use of the mixed employment area during all it's public outreach. Industrial use was only mentioned during after the outreach was finished. Do not think for a minute there is support within the city for another industrial area. Just look at their actual Sherwood West Concept Plan. They did not discuss industrial use. The plans for Elwert Road are inadequate to support the regional traffic connector role for which it serves. The City made vague statements about a north south connector. Their own traffic studies showed such a connector would not be used. Plus due to the steep slopes in the area it would be too expensive to build. The City also did not represent they would be asking for the whole area to be brought in. If Metro approves the ask, given the City's lack of transparency it is quite likely there will be a major outcry by the voters and the City Council will once again be forced to withdraw the ask. Just like happened in 2017.	8/21/2024 11:04 PM
18	this land will be on the urban fringe and will increase regional VMT substantially while creating more infrastructural liabilities. This kind of development is making us poorer and needs to be stopped. We need to stop this sort of thing by a building boom in more central areas.	8/21/2024 8:18 PM
19	Land use to facilitate industry is poor use of the proposed expansion. The land is too close to existing residential land, farm land, and protected habitat. Additionally, there is minimal exploration of a feasible way to support the growing and expanding transportation needs of the aforementioned proposed industral space.	8/21/2024 6:15 PM
20	The Proposal is not reflective of actual population growth and community needs. Expansion size is ridiculous. Fails to consider long term costs to current residents in terms of taxes to support the infrastructure that would be needed to support this plan. Tax burden analysis seems to be missing altogether.	8/21/2024 5:56 PM
21	Work on densifying existing neighborhoods instead of focusing on sprawl. Expanding the boundaries of the city will force the city to stretch it tax revenue even further than it needs to now.	8/21/2024 4:57 PM
22	For the Sherwood West expansion plan that was submitted in 2016 doesn't reflect the more recent population decline. The concept plan should be scaled back to reflect more current data and the UGB expansion should be 50% the original submission. Additionally, their concept plan doesn't adequately address the funding of infrastructure. Such a large expansion is not warranted at this time. There will be opportunities for additional land to be added if necessary.	8/21/2024 4:22 PM
23	Specifically in the Sherwood West expansion, the concept plan did not represent the will of the majority of Sherwood residents. 80% of residents did not want to see the level of expansion and were gravely concerned about how it would affect the livability and sense of community that already exists. There is no reason to add the entire amount into the UGB at this time, smaller more thoughtful expansion was never considered and the cost to add services support this vision and will be a huge burden to citizens, despite the city claiming it will not. Also the inclusion of light industrial so near many farms and vineyards is just irresponsible. Many of the discussions the city mentioned was to tout Sherwood as a gateway to wine country, yet we would do major harm to the two wineries closest to us. Also the concept plan around Elwert being similar to Sunset doesn't make any sense given the already burdened use of Elwert which will grow dramatically if the planned growth of homes and light industrial actually went in. Overall citizens have been providing specific, data-driven feedback during this process raising concerns, which the City noted but never really addressed. Yes they asked for citizen feedback, but most was ignored as citizens just saying "no growth" when in actuality we were trying to raise visibility to some of the serious oversites in this plan.	8/21/2024 3:07 PM
24	Build denser, not outwards. Suburbia can't pay for itself in maintenance once it ages a couple of decades, which is why it always needs to expand outwards for new tax bases. This is just	8/21/2024 2:39 PM

	kicking the can down the road. You can achieve all your stated goals by simply building denser in the existing boundary. Don't expand the UGB.	
25	1: Proposed Gross acres is a very large percentage relative to current existing gross acres of Sherwood. 2: Projected population growth rates, as stated in Metro's report, is much smaller than what Sherwood proposes. 3: Sherwood historically has not been a large business / employment location. The proposed jobs would change the community character, not for the better, that Sherwood currently enjoys. 4: Most new jobs would be filled by people who don't live in Sherwood, for a variety of reasons. Traffic congestion will increase. 5: Most new families that would live in the homes planned would work elsewhere. Traffic congestion will increase.	8/21/2024 11:12 AM
26	We will move out of Sherwood if it goes through.	8/21/2024 8:39 AM
27	I would prefer to keep Sherwood smaller than the full Sherwood West project proposes. I don’t mind some of the expansion but I don’t think all of the proposed zones are necessary. Let’s keep Sherwood special by not making it so easy to live here that all Our property values decrease.	8/20/2024 11:41 PM
28	Sherwood does not have the infrastructure to support the amount of development proposed in this expansion and frankly there is no need for this amount of land to be added into the UGB at this time.	8/20/2024 6:27 PM
29	I think the city of SHERWOOD is asking for way too much.. I am concerned about the logistics of where they want to put light industrial. I don’t think it’s necessary. The whole reason I moved to SHERWOOD is the small town feel. Their proposal makes me feel like I will be pinned by businesses and not the kind I want to be around. Growth is good, but it needs to be smart. I think SHERWOOD is trying to ask for the world when it should be asking for a small portion.	8/20/2024 5:07 PM
30	As a resident of Sherwood, I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.	8/20/2024 4:55 PM
31	Allow all of the proposed increase. Growth will only happen at rate of needed services like water, sewer, and other facilities.	8/20/2024 4:52 PM
32	See above.	8/20/2024 4:22 PM
33	Expanding makes no sense without a viable Western Bypass Freeway to alleviate the already intolerable traffic load on rural roads. Without it, more density would be intolerable and irresponsible.	8/20/2024 4:10 PM
34	I vehemently oppose the expansion into Sherwood West. Previously designated Title 13 properties are now being planned to be light industrial with no thought for where the wildlife they are wiping out will go to. Elwert Rd. is already heavily traveled with 1000's of cars going by each day through an area of farmland, wineries and small farms. There is are multiple fish bearing streams at the confluence of Chicken Creek that will be greatly impacted by increased construction. None of the plans that have been presented adequately address how the bridge over Chicken Creek or re-routing of Elwert to mitigate costs is going to be paid for. The addition of the massive high school to the Sherwood area was done at great increase to the taxes of those within the Sherwood City limits and those that live outside the city limits. The Sherwood School District projected student population does not match what the City of Sherwood is projecting. In fact, the school district expects the high school population to go down. We don't need more development in a rural area when we are already paying for an expensive new school and the plans for the main arterial funding are unclear and nebulous. Now is not the time to expand into Sherwood West!	8/20/2024 3:55 PM
35	The roads immediately surrounding the proposed neighborhoods are county land and considered rural roads with a speed limit of 55 mph. Putting families near these roads seems dangerous without a proposal to address this. Also, we are putting physical barriers between our main thoroughfare, the 99, and our most famous wineries, Hawksview and Alloro, both of which are well known, with Alloro recently being placed on the top 100 in the world. We need to design pathways through Sherwood into wine country, rather than being a stop along the way to Newberg and Dundee.	8/20/2024 3:51 PM

36	I think this is a great plan in general. I would caution against too much vertical mixed-use, most of the ones I see end up with most of the commercial space vacant anyway which is such a waste.	8/20/2024 3:39 PM
37	This expansion is not supported by the current and expected growth of the area by Metros own numbers. The city has not provided adequate or reliable numbers to support this request.	8/20/2024 2:56 PM
38	Without funds to resolve inadequate access to I-5 for commercial transportation and efficient movement of local travel, expansion will only worsen the gridlock and further erode productivity and quality of life.	8/20/2024 2:04 PM
39	The city is grossly overestimating the growth in the next decade. There is no data to back up the request to add so much land to the UGB. With much of the agricultural and open land to the east and south (between Sherwood and Tualatin and Wilsonville) being gobbled up for light industrial and housing, the area is losing too much of the agricultural/natural land. Furthermore, the city has very little connection to public transportation so the proposal can only lead to worse congestion. Lastly, the City has not maximized the current boundaries for affordable housing and jobs. There are plenty of opportunities (considering the much more modest growth projections) within the current boundary if the City plans properly.	8/20/2024 9:54 AM
40	This project would make more sense if it was built in conjunction with a WES regional rail spur but it lacks a Right of Way reservation to build such a line. There is currently a plan to extend WES to Salem meaning smart TOD could also make Sherwood a commuter community to Salem in addition to Portland or Beaverton. WES currently underperforms, but if development took WES into account, it could turn into a system more like RTD or SEPTA.	8/19/2024 6:13 PM
41	Creating more jobs than housing units would be a mistake. That said, I support the proposal.	8/19/2024 12:08 PM
42	This is a terrible idea. There’s already so many empty lots in the Portland region. Not to mention, so many parts in Portland where buildings could be built taller. Sherwood is already on the edge of the metropolitan area, and having this development would cause more traffic, more urban sprawl, and get us away from the core ideas of the urban growth boundary.	8/18/2024 11:24 PM
43	As a resident of Sherwood, I was wrong to be okay with this. Suburban expansion must be stopped at all costs. Let the farmers keep their land, don't let us build around and effectively force them off land their families have had for generations.	8/18/2024 10:37 PM
44	Quite literally, nobody wants this. Add density to the existing boundary.	8/18/2024 9:26 PM
45	This expansion is unnecessary. Sherwood should increase density and housing within the existing boundary	8/18/2024 8:32 PM
46	I’m sick to my stomach, the city can’t is not ready for this	8/18/2024 7:06 PM
47	As a resident of Tualatin near Norwood road and the city of Tualatins Basalt Creek planning area I have witnessed first hand how promises of greater middle housing have failed to address the housing crisis in the region. Homes with shared walls selling at 450-550k and detached homes in the new development selling for 650k up to near 900k dollars. While the central city of Tualatin remains empty and uninteresting. The area around the Tualatin Commons remains an empty gravel lot and an empty parking lot at a shopping center that has lacked a primary tenet since Haggens went bankrupt 9 years ago. By voting yes on the current plan you allow cities like Sherwood to ignore urban blight like the empty parking lots around a regal movie theater that has been closed for 2 years now. If our region is serious about climate change and the housing crisis we must push for our cities to redevelop and increase density in our cores rather than building 500k dollar shared wall units and 650-800k detached homes. By voting no Metro can leverage our cities to not build out like Los Angeles and Texan cities but up like Vancouver BC and Seattle.	8/18/2024 5:12 PM
48	Do not allow Sherwood city government to do this, force them to build more infill affordable housing and less of this car dependent, road dependent suburban single family housing.	8/18/2024 2:27 PM
49	Sherwood should not be granted this UGB expansion due to the illegality of apartments and dense multi family housing in the majority of the city. Furthermore, adding sprawl to the SW metro specifically has the worst effect on traffic in the region, due to almost no high capacity public transportation. 99 is already a dumpster fire.	8/18/2024 2:27 PM
50	The citizens of Sherwood have voted several times in the past not to expand the UGB Sherwood West. We are not anti growth but we are smart growth. We don’t want this area of	8/18/2024 2:11 PM

	Sherwood looking like the areas on Roy Roger's Rd(Tigard and Beaverton). My vote and 70% of the citizens that this would directly impact do not want this area annexed into to UGB.	
51	I already gave some of them, but why we need to expand by destroying farmland instead of using the ample space between Sherwood and Tigard/King city, Sherwood and Tualatin, or Sherwood and wilsonville, is beyond me.	8/18/2024 1:22 PM
52	The City of Sherwood has an apartment ban that encourages poor land use. They should stop building sprawl and instead should focus on denser development.	8/18/2024 1:13 PM
53	Looking forward to more commercial zoning for jobs and businesses	8/18/2024 1:06 PM
54	Metro should reject this plan. Cities in Washington County have the capacity to accommodate housing growth, but they maintain apartment bans across the overwhelming majority of their existing residential land. They need only to end their exclusionary zoning practices (and reduce other barriers like exorbitant SDC fees) to get housing built. I'm less familiar with the demand for industrial land, if there is a need for more I'm not opposed to a partial rejection that only allows for the employment land component of the expansion.	8/18/2024 11:53 AM
55	As a Tualatin resident, I strongly object to this plan. The transportation connections are poor, and our region has no shortage of buildable land already in the UGB. We need infill, not more fire-prone sprawl into farms and forests. Oregonians have repeatedly said no to California-style sprawl. Please listen to us.	8/18/2024 11:30 AM
56	To much to fast.	8/18/2024 7:22 AM
57	This new area is unnecessary, and will take away what makes the community unique. I moved to Sherwood, as I loved the farms and open space.	8/18/2024 6:34 AM
58	I don't think this should even be considered until we get more than one grocery store in town. I just feel like the cities priorities are way off track.	8/18/2024 1:14 AM
59	Home prices in the Portland metro area have risen by 75% or more over the last ten years. We need to build more housing desperately and are not at risk of "overbuilding" - at worst this would reverse some of the run-up in prices due to past severe undersupply. I am in favor of allowing more housing to be built as much as possible.	8/17/2024 2:50 PM
60	Continuing to develop our important farmland leads to loss of orchards, vineyards, etc, and pushes already displaced wildlife into urban areas (we have a black bear roaming in our inner Sherwood housing area this year). Our roads are in a continuous state of upgrade and expansion that STILL cannot keep pace with development.	8/17/2024 8:32 AM
61	We don't want Sherwood West Expansion to happen. We live directly on Edy Rd which will be inundated with traffic, congestion and construction. We moved here to live in a small town and enjoy the farmland and wineries nearby. We don't want to end up like Beaverton.	8/17/2024 8:06 AM
62	Keep farm land as is	8/16/2024 11:09 PM
63	I think your growth models are antiquated. Where are the people coming from?	8/16/2024 9:34 PM
64	I am opposed to the expansion as it will utilize land that is currently agricultural and it will increase congestion in the area to the detriment of the current community. It does not address the need for fixing the existing congestion problems before adding to them.	8/16/2024 4:29 PM
65	My perspective, right or wrong, is that this proposal is naturally being driven by developers - those who will benefit the most and not the citizens of our local communities.	8/16/2024 4:29 PM
66	Building in the agricultural area that is being proposed will ruin the region and the character that we all love. No one wants housing and development next to wineries and orchards. You have clearly not heard the booms of the cannons that are used to keep birds off of the grapes during harvest season or else you wouldn't have proposed this.	8/16/2024 11:47 AM
67	Traffic is already congested at certain times during the day….how will that be addressed? Affordable housing is needed but some kind of rent control needs to be considered. Love small produce farms ….dont loose those in the expansion process. (Red Berry Barn). How will this expansion affect Newberg and the proposed by-pass?	8/15/2024 12:23 PM
68	We don't need the houses here. There are already 1000 new homes and not the infrastructure for it. Then all the farmland is gone.	8/14/2024 1:10 PM

69	This is excessive and unnecessary In 2022 Metro projected Sherwood would grow by a scant 3% over the coming decades. The Sherwood School District has forecasted enrollment for the new high school will begin to decline in 2027. Sherwood has enough vacant land to accommodate new housing and jobs for years to come, when planned and developed wisely. Metro's research concluded there is enough industrial land inside the existing Regional UGB for another 20 years. Metro's research on Residential land shows most land brought into the UGB in the last 20 years remains undeveloped. This will waste our rich farmland The UGB expansion will destroy the fertile, productive lands which grow Timber, Hazelnuts, Blueberries, and world-class Pinot Noir grapes. These thrive here and in only a few other places around the world. The lands will be replaced with generic concrete boxes for "flex" office, light industrial, and multi-family residential. This will make bad traffic congestion worse Do you enjoy being caught on Scholls-Sherwood, Roy Rogers and Elwert Roads during rush hour now? Imagine adding 5,600 new homes and 4,500 jobs to the area? The jobs will result in additional commuting to Sherwood for those employees who cannot afford to live here, having a negative impact our air quality. This will increase your Property Tax burden We have not found a Taxpayer Impact Statement showing how Sherwood and its residents will pay for the new roads, sidewalks, water and sewer; just an "agreement" to figure it out later. Yes, the developers will pay for a portion of the initial infrastructure, but YOU will be left with more financial obligations to pay for the operating and maintenance costs, even though we do NOT need the new land to keep pace with growth in Sherwood.	8/14/2024 5:35 AM
70	Im opposed	8/13/2024 10:06 PM
71	It seems like Sherwood has fallen to the urban sprawl of Portland. Our small town feel has gone down and crime has increased. Many of the farms and greenspaces that makes Sherwood so beautiful are being turned into industrial buildings and high density housing. Traffic is getting worse, our roads are constantly under construction and prices to live here continue to increase. I understand the need for housing but does it have to come at the expense of farmland, greenspaces and other natural areas?	8/13/2024 8:00 PM
72	I do not support this. This is not to develop homes and jobs that better the quality of life for sherwood residents, this is to have developers come in and build tract homes, maximize profits, and do the bare minimum to get approvals, and increase the tax base to the city, county, and state, none of these bennifit the sherwood residents.	8/13/2024 4:48 PM
73	OPPOSED to the UGB expansion!	8/13/2024 3:31 PM
74	Probably too dense, but some ugb expansion is here than none.	8/12/2024 5:33 PM
75	I don't believe we are ready for growth	8/12/2024 7:24 AM
76	Sad. Its all destruction of habitat for horrible HOA non affordable housing. Disgusting and waste of money. Money that metro is no using to clean yhe streets of Portland.	8/11/2024 2:34 PM
77	Please use all commercial space currently in the city effectively before building more. Empty storefronts in existing commercial areas can be used and already built and walkable. Preserve and enhance the business industry we have before we add new	8/11/2024 10:32 AM
78	Should be approved!	8/11/2024 8:21 AM
79	Does not consider impacts on agricultural areas, existing infrastructure	8/10/2024 10:39 AM
80	Sherwood is a perfect example of urban sprawl. Farm land is being swallowed up by single family housing.	8/10/2024 7:41 AM
81	Make sure 50% of homes are single family. Provide for one-level homes for aging population.	8/9/2024 5:52 PM
82	The proposed Sherwood West proposal as written is premature for large scale development particularly for more than 5,500 new housing units in an area that has already seen rapid housing development in surrounding communities.	8/9/2024 11:23 AM
83	Voters have already said they don't want this.	8/8/2024 7:08 PM
84	The more you take away the land from farmers the bigger food problems we will have. Not to mention the negative impact on wildlife,.water supply and I creased risk of fires. This is a terrible expansion.	8/8/2024 6:31 PM
85	No more commercial growth keep land habitat as is	8/8/2024 6:26 PM
86	We need to redevelop and make the most of unutilized already developed space. We do not	8/8/2024 1:51 PM

	need to add more housing in an already overpopulated area.	
87	I support Sherwood's proposal. They have completed a concept plan in accordance with Metro's UGMFP and have adopted documents demonstrating need and ability to serve the proposed expansion area. I like the inclusion of green spaces, parks and trails throughout the plan area as well as the plan for a diversity of housing.	8/8/2024 1:08 PM
88	We are against the expansion for Sherwood West. Go north or east with the expansion please. Let’s keep the little country we have left the country	8/8/2024 11:44 AM
89	Our cities can't pay for the infrastructure we already have. It is insane to create more liabilities rather than improving and maintaining what we have already built, which is a proven platform for growth.	8/8/2024 11:27 AM
90	The community does not want this expansion-voted it down twice. The roads are not adequate to handle this expansion. Very crowded now.	8/8/2024 11:06 AM
91	Sherwood is already getting crowded with traffic congestion	8/8/2024 10:49 AM
92	I’m not in favor of thr Sherwood West expansion. I am in favor of a Sherwood north or SE expansion. No other towns are encroaching on the west. Save that for a later time. Wilsonville, tualatin, Tigard will want land on north, se. That’s where the focus should be. Traffic can come to the area on i5/& take weight off of 99w	8/8/2024 9:41 AM
93	Conserve the natural areas of our community. Don’t agree with anything else.	8/8/2024 8:53 AM
94	Stop the urban sprawl. You guys are turning Oregon into California stop it	8/8/2024 7:17 AM
95	the growth statistics do not support the need for expansion. There is ample capacity in recent expansion in the area (Cooper Mountain, Beef Bend South and King City Sherwood West is not needed at this time.	8/7/2024 8:30 PM
96	There is no demonstrated need for this; just profit-driven developers. The homes planned will not be affordable because the costs of development and infrastructure of farmland (utilities etc) will be very expensive. Also, they will not create high paying jobs nor be close to jobs for lower income people. There is no supporting evidence in the plan for the alleged 4500 jobs. They are pulled out of the air from a time long before Covid, hybrid work, AI and automation. How many people are really employed by Allison Inn as a "precedent example?" Residents of the proposed homes will need to drive to other places of employment creating even more congestion on already clogged roads that are bottlenecks to get to I-5 corridor. The plan does not take traffic into consideration or the high cost of changing major thoroughfares and building infrastructure. The proposed area is not flat and easily buildable as suggested, there is much protected wetlands. Also, Sherwood has not yet built out other available land including the parcels that were brought into the UGB previously. Also, population growth in Sherwood has slowed while this proposal suggests there is a need for 200% growth. It doesn't meet the criteria for need nor does it adequately demonstrate preparedness for infrastructure costs and demands.	8/7/2024 8:13 PM
97	do not allow this expansion, sherwood is already too expensive and the growth at the edges is not a good idea, build up, no more single family homes allowed and 75% of all new residental should be affordable for people making $60-75,000/year	8/7/2024 4:35 PM
98	Looks like a good plan.	8/3/2024 8:34 PM
99	Like I mentioned on the previous page, I don't like that the traffic study isn't done yet. The intersection of OR 99W and Sunset was at a Level of Service of E prior to the high school being built, and was projected to reach an F. This signal likely has reached a LOS of F now. Also, the Brookman expansion was approved in 2002, and it's been 22 years since then with minimum development (1 neighborhood that has gone in only within the past 2 years, and it isn't complete yet as of August 2nd, 2024). I have not seen a plan on when the rest would be developed as said neighborhood constitutes about a quarter to third of said UGB. As such, the effect on traffic and our natural area has not been fully realized. This also exceeded the 20 year development plan as proposed by what should be included in the UGB. The Tonquin employment area also isn't complete, however since that was approved more recently, it makes since. As the Brookman expansion is primarily housing based, while Tonquin expansion is exclusively job based, and at the pace Sherwood is developing, I believe that expanding the UGB to expand into Sherwood West is too large to accommodate growth for the next 20 years, and I urge a smaller expansion, or preferably, none. These 2 areas I believe contains enough	8/2/2024 11:59 PM

	land for development for the next 15-20 years, especially with Sherwood's track record to delay Brookman's annexation and development. would also like to see a specific plan for housing and transportation (public and auto transportation). I also would like to see a cottage community, as a crossover between high density apartments/condos, and single family low density homes. Also would like to see a plan on schools, as the high school was designed for the Brookman expansion, but not further beyond that based on their arguments in their 2016 ballot measure (I forget the name of said measure). Also where would a new elementary and, if nessesary, middle school be placed?	
100	I support sherwood’s proposal	8/2/2024 12:32 PM
101	The city of Sherwood is growing at a rapid pace, most families move here for the schools and the environment. I'd like to see better options for affordable housing, however the fees and permits that come with this do not match this goal. I also would like to see the city plan for this expansion better than how they built Brookman and the High School. Having a new high school that does not have sewer and has been delayed is not an efficient plan and I would hate to watch them continue to run into these road blocks. It would be better to engage with a more sophisticated panel, like the city of Wilsonville when they planned and built Villebois. I also think it would be good to have a roundtable discussion with medium sized and national builders.	8/1/2024 12:35 PM
102	They need expanded area to expand commercial areas to provide more jobs for the residents of Sherwood to reduce travel time for the residents. They are developing one huge shopping area at 6 Corners and Old Town, but not providing any small neighborhood commercial shoppin areas.	7/30/2024 9:01 AM
103	the plan is well thought out. it has been in the works for years and asher wood is ready and willing. It is whetenthenUGB should be expanded	7/30/2024 7:17 AM
104	4,500 jobs, what type of jobs, and are they sustainable?	7/29/2024 9:37 AM
105	I question whether it is truly necessary for Sherwood to convert all those acres from rural to suburban use.	7/28/2024 8:38 AM
106	Too small. We need more. Time to start thinking big about how we create new cities, new city centers, new homes. We need this but we need more than this now.	7/25/2024 7:23 PM
107	I’m in favor of development around the high school. Housing and mixed use should go into the surrounding acreage.	7/24/2024 5:38 PM
108	This is a fabrication. Expansion here will not be affordable in the long run. Build more housing in areas already within Portland.	7/24/2024 7:34 AM
109	Our family approves expansion on Kruger Road above Sherwood High School for the purpose of housing, mixed use developments to support the residents of the community.	7/23/2024 9:24 PM
110	Just build more densely, don’t expand. The city goes from forest grove to Sandy already, it doesn’t need any more sprawl	7/23/2024 8:57 PM
111	I’m in support of this plan because it enables the growth needed and keeps the community and neighborhood design that makes Sherwood unique. It also allows for employment opportunities that is needed.	7/23/2024 8:33 PM
112	I don't buy that there's enough demand for new suburban housing to actually support this proposal. This sounds like more wishful thinking from a jurisdiction that loves its suburban sprawl. Expanding the UGB to create new housing on the farthest corners of the region purpetuates the worst car oriented development that will result in more carbon emissions, less farmland, and more suburban infrastructure that the city can't afford to maintain. The fact that the planning began in 2015, predating the middle housing infill reforms, indicates to me that the City of Sherwood already has no desire to moderate the worst kind of car-only development in the region. I encourage Metro, on the basis of the data in the urban growth analysis, to decline to expand the UGB.	7/23/2024 6:44 PM
113	This is not needed. Money is the reason this is being pushed	7/23/2024 6:22 PM
114	What is planned and what gets done are different things. But what is ruined happens first and what is not done is last. Planners are not realists and dont give excrement about what happens to individuals. This is not future it is invasion of now.	7/23/2024 3:26 PM

115	I do not think the plan adequately integrates mixed use and comercial space with spaces people actually live	7/23/2024 3:20 PM
116	Sherwood has always been known for its scenic farm and agriculture areas outside the city limits. It is important to keep that way of life in tact. Several land owners have livestock and crops that will be negatively affected by the increased traffic and pollution by putting roads through. Please keep the trafffic flow on Elwert by improving the existing road, instead of diverting traffic north, ruining the creek/wetlands and agriculture areas.	7/23/2024 2:20 PM
117	The concept plan represents the planning committee's desires, and many citizens and community groups oppose the expansion.	7/23/2024 12:12 PM
118	The City of Sherwood's plan is much too large and is predicated on population growth figures which are wlidly inaccuarte and self-serving. This area is not growing as it was when the concept was first developed and it needs to get in line with current forecasts and trends. The very nice, but VERY expensive example of relying on inaccurate numbers. We now have a current enrollment of 1,704 students. The high school has a capacity of 2,400 students. The forecast for enrollment for 2032 is 1,530 students. It is obvious the figures used to support the building of the school were inaccurate and it has caused our community to spend excessive amounts of money needlessly. It should have been a smaller school. And similarly, the City's current plan should also be scaled back to reflect CURRENT numbers of population and growth in this area. And until such time as there are no possibilities for development with the UGB, farmland should remain untouched. You can't eat a house.	7/23/2024 11:49 AM
119	The area is losing residents. There's no reason to extend the growth boundary. Gentrify downtown instead of ruining natural landscapes and destroying more farmland.	7/21/2024 9:02 AM
120	Maintain urban growth boundaries and increase density	7/20/2024 9:13 PM
121	I actually totally disagree that the urban growth boundary should be expanded at all. We must build densely within existing urbanized footprints.	7/20/2024 7:41 PM
122	The proposal gets a lot of things right. The biggest piece missing is a comprehensive plan for transit in the area. I think the number one priority for the new area should be on reducing VMT for daily errands by providing good bike paths and walkable 15-minute neighborhoods. This is something that is easier to control at this stage in the planning. However, people will want to get out of their neighborhood to access amenities, and there are not very many options for how they will do that. This makes living in the area less accessible for people with disabilities who cannot drive (like my own father) or younger people who cannot afford a car.	7/20/2024 9:49 AM
123	The UGB is one of the defining features of the region, and continuing to add sprawl instead of efficiently using our existing resources is regressive and backwards thinking. Please reject this proposal and encourage upscaling existing development and lands in already underutilized lands within the UGB.	7/19/2024 2:09 PM
124	This is the definition of car-dependent sprawl and should not be allowed.	7/18/2024 10:23 AM
125	The City of Sherwood is not making the best use of already developed area. Too much space is devoted to driving cars, parking lots, and car centric behavior. No further expansion should be considered until the current city of Sherwood is fully integrated within our regional transit infrastructure and people are able to reliably commute between the downtown Portland core and Sherwood town center.	7/17/2024 11:19 PM
126	I am very glad to see mixed use and higher density development in an area outside the city center! I hope this area surrounds a school that walking and cycling to school is a easy and safe, as well as the preferred modes of traveling to school.	7/17/2024 6:51 PM
127	This is an absolutely terrible plan !! The roads can’t handle the cars, the schools are over crowded, crime is on the rise THIS IS PURE GREED. 🛑Provide service for the people that are here, stop trying to line the pockets of already rich developers!!!!!!!!	7/17/2024 6:09 PM
128	See my earlier comments about how I think the plan is baloney and only is more of the same.	7/17/2024 2:24 PM
129	This plan creates too much low density housing. This kind of housing is not what we need to be creating to increase affordability in our region. This expansion will create an exclusive neighborhood that is only for the rich. We need more NW 23rds not more Lake Oswegos.	7/17/2024 9:23 AM
130	I do not support the expansion plan for Sherwood. Simply a land grab for easy development. Requires minimum planning and effort in a goal to just throw up more houses near the new high	7/16/2024 8:50 PM

	school. There needs to be more consideration for walkability in the town and utilizing the current space to create a tight city with an actual community. Do not continuing splitting the town on both sides of 99	
131	The proposal is too prescriptive in terms of land use. The long-term vision should focus on identifying placement of public infrastructure (roads, water, sewer), delineation of plots and parcels, and locating of public and environmental resources such as parks and other habitat/wetland areas. The market for housing, industrial or commercial areas should drive the development of plots for these uses. This will permit the maximum amount of flexibility into the future. I also see that no representative from TriMet was involved in the Technical Advisory Committee. We need to ensure that future growth areas are suitable for transit service, both in terms of operations (can the bus actually get through here efficiently) but also in terms of whether the land use is mixed enough and density high enough to support a bus line.	7/16/2024 8:38 PM
132	The City has made two concerted efforts to plan for this area. The City provides for a variety of housing, but it's harder to develop multi-family as the Council and PC prefer single-family housing. If the City can commit to achieving the densities prescribed within their proposal, they should be able to expand.	7/16/2024 4:56 PM
133	This expansion appears to be well thought out, and should be welcomed in the region. It is sad that the Sherwood West proposal is the only one.	7/16/2024 9:06 AM
134	We need it - but I’m afraid of what it is going to do to our small town.	7/16/2024 8:13 AM
135	Sherwood needs to do a better job of creating low income housing.	7/16/2024 8:00 AM
136	The survey is one-sided and useless. It is like asking whether you would prefer to be killed by poison or hanging. There is no compelling reason to do this. Sherwood does not consider current minimal population or job growth estimates. Negative responses are not considered or minimized. Public involvement was just scripted lip service. Example...open house. Vote on your preferences. "None of the above" was not an option. This is only about MONEY, tax for the city and money for developers (and a few land owners who may profit).	7/15/2024 8:47 PM
137	I do not believe this is a good idea and do not recommend it.	7/15/2024 7:54 PM
138	This is sad and horrible!	7/15/2024 6:48 PM
139	Having previously lived on the outskirts of Sherwood, I don't support the expansion: Big houses, high incomes, lack of diversity in housing and people (it's where Northern Californians relocat to be part of the nascent wine culture). You can't buy a house for less than $500K . It's lovely, don't get me wrong, and we need more high-income sprawl NOT. Its an incredibly homogenous community. No-let's see how the Roy Rogers annexation turns out first.... and what in gods name are you going todo about the traffic. Tell Sherwood they can annex once we have light-rail to Tigard.	7/15/2024 6:47 PM
140	Yes	7/15/2024 5:30 PM
141	Too much traffic. Need public transportation!	7/15/2024 5:14 PM
142	Without a westside bypass, how will existing and increased traffic access freeways?	7/15/2024 4:05 PM
143	The city of Sherwood is biting off more than it needs. The majority of people in our area are NOT for this unnecessary expansion. I am not against growth for our city, but to attempt to increase it by 42% at the expense of family farms, wineries, and forested areas is an affront to our country-like community.	7/15/2024 3:37 PM
144	those choices of three in the above question are tough! All are important so I am not necessarily committed to my choices. I think the Sherwood expansion is appropriate.	7/15/2024 2:17 PM
145	Approved	7/15/2024 1:19 PM
146	This is Sherwood West is simply more sprawling expansion that is auto-centric and auto-dependent. The housing "mix" merely gives this an acceptable veneer. Where is mass transit? Upzone areas close to mass transit. Do not put single family development and multi-family development on the outskirts of the UGB. This sprawl, plain and simple.	7/15/2024 1:16 PM
147	I do not support Metro overtaking the small quaint town of Sherwood!	7/15/2024 1:14 PM
148	This should not be approved. Sherwood, Wilsonville, and Tualatin are currently in the process of wasting one of the largest industrial sites already within the UGB by each separately	7/15/2024 1:04 PM

	seeking development, often on small, 10 acre parcels. At a time when some think the region needs more large industrial parcels, these jurisdictions are wasting a huge area, already within the UGB, that should be developed as a single unit. Consequently, giving Sherwood more land for any purpose is like rewarding them for bad behavior. Fundamentally, if jurisdictions are doing a poor job with the land they have, they shouldn't ever qualify for additional urban land. Metro needs to find a way to be firm, clear, and consistent. Right now it seems to be afraid of its shadow.	
149	Don’t let it be as awful as the development on schools and Roy Rogers. It’s so ugly and dense and doesn’t have services like grocery stores.	7/15/2024 12:44 PM
150	If you build it, they may or may not be able to afford it. Factor in housing costs before building more housing. Build up not out	7/15/2024 12:42 PM
151	Sherwood proper needs to allow apartments. As an affordable housing developer, I can tell you they are not friendly to multifamily inside the original downtown core where increased density makes a walkable community.	7/15/2024 7:29 AM
152	There's already too much growth in this area.	7/15/2024 6:36 AM
153	I am not well informed but want a full size library branch in that neighborhood.	7/14/2024 5:41 PM
154	The mixed employment area near Elwert/Scholls-Sherwood looks like a recipe for warehouse/data center blight and traffic.	7/14/2024 4:00 PM
155	Metro can’t even manage Roy Rodgers and Tualatin Sherwood Rd. as it is. Adding 3,000+ homes is just foolish and an obvious tax grab and money scheme by developers.	7/14/2024 3:39 PM
156	Leave agricultural land, green spaces and wetlands alone. Plant trees in already developed areas. Limit growth to areas with established city water supplies and leave all wells and groundwater areas out of development. Keep manufacturing and all big business ventures out of Sherwood. No data centers or any polluting influences of any kind.	7/14/2024 3:29 PM
157	Please see my thoughts on the Sherwood West Project in my previous comment. The Lebeau and connected Edy road project is unnecessary and will impact the residents of this area as well as the environment negatively. Wineries in this area are concerned with the potential negative impacts that developing this area will have. This area is home to many creatures that will be further pushed out and harmed due to this plan. Sherwood needs to have some natural areas maintained and I hope we will not lose what makes Sherwood beautiful so that others can profit. Tualatin-Sherwood road has been developed so much and is an embarrassing eyesore for our community. Please do not strip every piece of beautiful land and turn it in to a soulless development. I am very much opposed to that portion of the Sherwood West plan. Those that presented this plan did not discuss their intentions with residents of the area and have lied to Metro about the support for the plan.	7/14/2024 2:24 PM
158	Stop the Sherwood West development. The rural community that is a risk does not get to vote for Sherwood City officials who have made the choice to ask for expanding. We DO NOT want this to go in to effect. We don't want to lose our farms. We don't want to lose our land. We don't want to lose our trees. This is not necessary for Sherwood. We don't need to expand, we have other options. This would be a huge negative impact to the native plants trees and eco system that thrive in this area. We didn't need to bring that large of population and business that close to the wild life refuge. This needs to stop. The community on Lebeau Rd do not want this.	7/14/2024 12:02 PM
159	I believe that this proposal does not meet the goals of the region. To start, the proposal does not state whether there will be added transit to the region, or whether bike infastructure will be included. Combined with the fact that a large portion of the housing area that will be developed is planned to be low density means the newly developed area will just be more car dependent sprawl, as many of these new residents will have no other choice but to drive. The portland region does not need more cars driving through the area and commuting between work, home, and other activities, as it is known how bad cars are for our enviornment. More cars commuting from sherwood will also mean more traffic through the southwest area of the portland region, which already suffers from congestion around the I-5 corridor and a general lack of density and transit access. After looking over the area closely with satelite imagery through google maps, it is clear that sherwood has plenty of land to infill and add density, especially near the only 2 trimet bus lines serving the region. Through redeveloping various seas of parking lots, and empty plots of land, I believe the city of sherwood already has	7/14/2024 11:44 AM

	options to develop land and add real density where it matters, instead of continuing to develop urban sprawl as is evident by the contents of the proposal.	
160	No more expansion. Keep and maintain what is already in Sherwood. Creating more housing in not a solution	7/14/2024 10:51 AM
161	The city of Sherwood has not demonstrated a need for this large of an expansion plan. Land recently added to the UGB for commercial development has not been completed, so why would the city of Sherwood even more land for this purpose?	7/14/2024 10:30 AM
162	Too many homes!!! Please stop!!!	7/14/2024 10:27 AM
163	No more growth. We are being squeezed and traffic is horrible.	7/14/2024 10:15 AM
164	This is a poorly planned, unneeded, and irresponsible amount of growth in a region that is surrounded by and supported by active agriculture and farming land. Sherwood hasn't even fully developed the land on the East side of the city for commercial use, but says it needs additional land for increased tax revenue. This commercial land that is currently in the plan is for manufacturing, which is more geared toward robotics and mass production, with few employees, rather than employment of several community members to benefits the community. This proposal exposes the area to more pollution, environmental toxins and exposures and will damage existing agriculture, farmland, and natural space. Please reject this proposal in its entirety.	7/14/2024 10:10 AM
165	Way too much low density housing and needs more of a wetland buffer. Needs more commercial and shops by the high school for kids during lunch.	7/14/2024 9:29 AM
166	I think Metro should institute minimum density standards. Density before expansion.	7/14/2024 12:10 AM
167	The proposed infrastructure funding plan is vague at best. Relying on SDCs and "outside"funding is insufficient. No expansion should be considered until there is a concrete committed plan for the infrastructure funding.	7/13/2024 11:09 AM
168	The amount of proposed mixed use are is extremely small but this type of planning can be more beneficial for the city. With current plan it just increases sprawl and carbon footprint.	7/12/2024 11:46 PM
169	I just want to emphasize that the Portland area needs to focus on creating more density and creating spaces that are focused around building an enjoyable community. In my opinion, this would be through walkable and bikeable areas alongside spaces were the community can gather without the need of cars. This will maximize the efficiency of the space and take big steps towards addressing climate change issues. We should do this with current spaces within metro area limits rather than expanding outward, leading to more sprawl which is bad	7/12/2024 8:20 PM
170	I am against it.	7/12/2024 6:15 PM
171	My neighbors and myself are in favor of expanding into the Sherwood West reserve. There is very little farmers in the 1,291 acres. We are right above the new High School and there needs to be more growth.	7/12/2024 1:16 PM
172	The inclusion of mixed employment is a welcome one but I must restate that such space should not be made to cater to large retailers and must be kept for local small businesses, as I have stated earlier, mixed use zoning is imperative and although included it lacks slightly, as well as the amount of low density neighborhoods are too high. Something else I have also not seen anywhere is a lack of cars, although this may fall outside the scope of this proposal pedestrianized areas that restrict or exclude cars are a key part in making mixed use areas enjoyable and in encouraging biking and walking	7/12/2024 7:36 AM
173	Hopefully achieved home numbers are at the high end of the figure if not exceeding it. We do not need unnecessary sprawl.	7/12/2024 12:25 AM
174	If new urban areas are claimed from existing undeveloped land, these areas MUST be high density and transit oriented. These areas should discourage automobile transit. Reference Utah City. However, the best solution is to NOT expand urban growth and to preserve undeveloped, natural lands.	7/11/2024 10:35 PM
175	There is no plan to expand MAX or any other high capacity, high quality transit to Sherwood, much less to the expansion area. Shame on you for not even mentioning transit, or regional bicycle network connectivity, in the factors that are the most important to consider as the City, and especially the REGION, consider expansion.	7/11/2024 6:14 PM

176	No more sprawl. Sherwood needs to focus on building over their ridiculously huge parking lots and empty monoculture grass fields.	7/11/2024 4:30 PM
177	Do not expand the UGB and force our marginalized communities further out into the margins of our metro area. This plan has no vision for how people who live here will circulate or travel to jobs outside of this ultra suburban development.	7/10/2024 10:17 PM
178	Sure, allow Sherwood to expand. But don't stop there, let other cities and counties expand too.	7/10/2024 8:33 PM
179	Urbanf growth Shou only expand of housing built is all high density and half the units are reserved for low income families.	7/10/2024 5:18 PM
180	The goals of the region sound great on paper. The primary factors of consideration are whether the plan actually meets those goals, and whether implementation of the plan can result in meeting those goals. How is the proposed expansion region meeting the goal of having 'the option of living close to work' if the industrial area is separated from the large majority of the residential area (including all of the mixed use and commercial area) by the Title 13 conservation land around Chicken Creek? These considerations should at least be addressed by the plan. Additionally, how can we be sure that Sherwood as a city will be able to provide the urban density that our region needs (to meet our goals) when vanishingly little of the city's existing development is dense or mixed use? Sherwood's downtown area is barely two blocks in size. If Sherwood was able to guarantee such development, meeting our region's goals, I would be happy with the plan and its UGB expansion. More housing is more housing, and we need more housing, but we can not just keep expanding with suburbs.	7/10/2024 12:35 PM
181	No one besides the developers that will profit off building more houses/apartments wants this expansion. Please listen to the majority of the residents in Sherwood and DO NOT EXPAND. We're good as we are and the small town feel has already diminished too much even in just the past 10 years. Don't make it worse. We don't want to be the next Beaverton and then Portland. We want to feel safe.	7/9/2024 9:55 PM
182	Sorry I could not figure out how to rank the elements. Not sure I did that right. We should be able to number them 1 through whatever. Always the involvement and engagement of the total community comes first.	7/9/2024 3:48 PM

Q15 Is there anything else that you would like the Metro Council to consider as they make a decision about whether to expand the Urban Growth Boundary as described in the Sherwood proposal?

Answered: 218 Skipped: 147

#	RESPONSES	DATE
1	Consider the voice of the people who have lived and thrived in this area, those voices don't appear to be heard in this matter.	8/23/2024 10:13 AM
2	I do think there needs to be more opportunity for affordable housing . It seems crazy to have a huge high school with almost no houses around it ?	8/22/2024 9:57 PM
3	Slow down	8/22/2024 9:48 PM
4	please consider that the expansion decision should benefit all residents, including those in historically underserved communities, by providing affordable housing and accessible public services. Please also make a decision that will ensure strong environmental protections. It's a lot to balance, and reading the reports makes it clear that this is complicated without any one "answer" to what/how to decide—I think it is most important to make the decision about expansion that will guarantee that these priorities are being worked toward.	8/22/2024 9:45 PM
5	This plan is bad for Sherwood, bad for the Metro area and bad for the future of Oregon and Oregonians.	8/22/2024 7:13 PM
6	Please listen to those who live in Sherwood about what we want in terms of the UGB.	8/22/2024 6:57 PM
7	Leave Sherwood how it is and do not expand the boundary	8/22/2024 6:35 PM
8	There is a plethora of empty warehouses and houses that can be renovated. Do this before taking any more farmland to build more buildings	8/22/2024 6:32 PM
9	No. I think it is a good plan.	8/22/2024 4:41 PM
10	The expansion area intrudes into farmland. The existing/planned roads are already inadequate for traffic transiting the area. McMansions should be restricted.	8/22/2024 1:31 PM
11	Thank you, Metro Council, for listening to the public. I encourage Council to be extremely cautious about expanding the UGB. We should focus on further developing our existing area within the UGB rather than expanding Sherwood at this time.	8/22/2024 11:43 AM
12	If you are going to increase the Urban Growth Boundary in the Shewood area, Please don't approve it all. The area around the enourmous high school would be plenty. That land is already ruined so don't ruin any more.	8/22/2024 10:30 AM
13	Please do not expand urban growth boundaries, when there is so much opportunity for density and walkability in the existing perimeter.	8/22/2024 10:11 AM
14	Yes, making development pay for itself should be required. I don't mean just a one & done upfront fee/SDC. After a developer pays their one-time SDCs, they get to run away with millions of dollars in profit, while the existing residents are left with the traffic congestion (and frustration) as well as the burden of paying for new schools, new roads, new water facilities, new fire stations, and staffing in these new facilities due to the increase in population their development has created. I'd like to remind you that many of us are retired and on modest fixed incomes. "Affordable housing" means more than just the purchase price or cost of rent - it also means not taxing seniors out of our homes. Dramatically increasing our property taxes via bonds and levies is doing exactly that. Instead of giving developers price breaks and incentives, they should only be allowed to build if it doesn't adversely affect the pocketbooks of the existing population in the area. The other critical concern is the environment. As I've mentioned, this is an area with forests of mature trees. We are in a climate crisis, and these trees help us by providing shade, sequestering carbon, preventing erosion, and providing wildlife habitat. When you replace trees with concrete and asphalt, the whole area heats up.	8/22/2024 3:12 AM

	Saying that developers replant trees is a joke, because these tiny little trees with a diameter of your thumb are not even remotely equivalent to the large mature trees they have destroyed in their quest to become even richer. Many neighborhoods in Portland have "heat islands", and the City is trying to plant more trees to combat the rising temperatures - wouldn't it make more sense to not cut them down in the first place? What's even worse, is that they clear the land then set what they've cleared on fire! There is a property on Scholls-Sherwood Rd & Elwert Rd that has burned every day for months at a time. The property is very close to the Tualatin National Wildlife Refuge.	
15	The mixed employment area expansion into protected upland wetland habitat was done after the public outreach with no community input. The reference to industrial use was not used during public outreach; Only after public outreach was finished. Bringing in the industrial development on the north end of Sherwood West should not occur unless the citizens of Sherwood have a good faith opportunity to weigh in. Before Metro Commissioners decide they should have their staff review the final plan, but also the communications during the various meetings. You will see what I say here is true. The plans for Elwert Road would degrade the regional connector role it serves. Traffic on and off of Hwy 99 has major delays during rush hours. These conditions have persisted for years and will only worsen if all of Sherwood West is brought in at this time. The City and County need to improve the capacity of Elwert Road, and it's Hwy 99 connection before adding so many homes.	8/21/2024 11:19 PM
16	don't do it, don't do it, this is the opposite of what we are supposed to be doing.	8/21/2024 8:19 PM
17	The concept plan proposed described a mixed employment zone, which included, industrial use, that was not advertised untill after the public outreach peroid was complete. It is not fair, or reasonable, to state the residents of Sherwood are in agreement with industrial zoning in the northern region of the proposed expansion. During the public outreach of the Sherwood West concept plan, mixed employment was represented as a mix of office, light industrial, and flux space. However, after public outreach, the need for industal manifacutring has been a major emphasis of the plan and further dialogue. It is not a good faith statment to suggest that residents of Sherwood are informed of the expansion plan, let alone support industrial use of the aforementioned land.	8/21/2024 6:39 PM
18	Consider who is pushing for this concept - voting citizens or developers and city officials? Follow the money and you'll see. Last survey showed over 80% of voters did NOT want this.	8/21/2024 5:59 PM
19	Consider the impact it will have on current plans to make walking, biking, and transit a more viable alternative to driving.	8/21/2024 4:59 PM
20	Sherwood overbuilt their high school and now the operating and maintenance costs are more on a per student basis than projected. Don't make the same mistake with the UGB expansion, scale it to meet current needs and reflect recent data. This expansion size may have made sense with the growth from 2000 but it doesn't now. You will be trading a vibrant and valuable agricultural area into a land speculator's dream.	8/21/2024 4:31 PM
21	Oregon is a unique state due to its urban growth boundary and early efforts to preserve the beauty and productivity of agriculture. Every time the growth boundary is usurped we loose a little more of that unique quality.	8/21/2024 3:54 PM
22	I would encourage the Council to really consider is it necessary at this time to bring so much land into the UGB, given the data provided on slower population growth than expected and adequate light industrial already available in the UGB. Please tell the city to go back with a requirement to reconsider smaller parcel at this time and to have a more comprehensive traffic study done in conjunction with WA county and ODOT on what the impact will be to our roadways before allowing this much growth to be approved.	8/21/2024 3:11 PM
23	Don't do it. It can't pay for it's own maintenance in a few decades just like Portland can't now. You can achieve all those goals by building denser in the existing UGB. Something other than suburbia might even make Sherwood worth visiting.	8/21/2024 2:42 PM
24	Metro states the "Urban Growth Report" will document whether more land is needed. After a brief review of the Executive Summary, I did not see an answer to this question. Is more land needed? Evolutionary growth planning is required to enhance and maintain the quality of life in a metropolitan area. Sherwood's proposal is Revolutionary, NOT evolutionary. Given recent slowing growth trends, it seems wise to grow gradually, minimizing the occurrence of un-intended consequences. Thank you for your time and consideration.	8/21/2024 11:23 AM
25	Land developers and politicians. Somebody is getting greased.	8/21/2024 8:44 AM

26	Sherwood is asking for to much land.	8/21/2024 7:17 AM
27	Single family homes or 10k+ square foot lots.	8/20/2024 11:42 PM
28	The size of the requested expansion is not supported by facts and the City of Sherwood should be asked to reevaluate the expansion request and right size it to suit the true growth potential for this area.	8/20/2024 7:59 PM
29	Sherwood is a small town and the projected future population growth in no way reflects what is proposed in this expansion. Hundreds of homes are currently being built and retail locations sit empty as retailers have left the area. Sherwood needs to revitalize its existing areas before trying to grow.	8/20/2024 6:37 PM
30	Holly ochoa, Steve ford, and I are all interested in working with Sherwood planners to bring in our 20 combined acres for mixed use and or housing.	8/20/2024 6:28 PM
31	Think long and hard and don’t be swayed by paid consultants who will benefit from growth	8/20/2024 5:09 PM
32	once its gone its gone	8/20/2024 5:00 PM
33	Push back against the people who’ve got there’s and want to limit others.	8/20/2024 4:53 PM
34	Preserve the few remaining farms, green space, access to the outdoors.	8/20/2024 4:30 PM
35	Please see my comments above. The proposal is a wild overreach and should be denied in its entirety.	8/20/2024 4:23 PM
36	Please listen to the Sherwood Farm Alliance. We have presented facts that conflict what city leaders and builders are promoting. We DO NOT have the roads and infrastructure to support this massive increase in acreage into the UGB. Our land is too precious to pave over with the amount of housing suggested, and metros own projections of growth are SIGNIFICANTLY lower than the projections of the city. Just check out the numbers they said we were going to grow for our new high school just a few years ago, the growth numbers were way off base. We built a massive high school that is not at full capacity, and affected all of our taxes and we are still paying off all the infrastructure for that, I think the average Sherwood resident cannot support another massive build in our area that makes the builders rich and leaves the city residents to come up with money for more schools, more roads, more infrastructure and also destroys our beautiful land, thank you	8/20/2024 4:19 PM
37	Do not expand and thereby put further pressure on existing Title 13 refuges for wildlife. Current forest land should be preserved, not destroyed by replacing it with houses.	8/20/2024 4:16 PM
38	We were very involved in the 2016 Concept Plan that the City of Sherwood completed prior to the current Concept plan. It was very evident that the City had an agenda both for the 2016 concept plan and the current concept plan that while they promoted community input, despite hours of involvement, we saw little to no interest on the City's part to make any concessions or listen to the small farm owners in the area being considered. They went through the motions of "listening" to opposing interests, but there was really no interest in farm/wine/small woodland farmers interests. We provide jobs too. We bring in income that contributes to the benefit of all through our taxes, but we are not big enough to be considered as worthwhile contributing members to our community and it is better to bulldoze our properties than to allow farming/winery/woodland enterprises to continue in this area.	8/20/2024 4:00 PM
39	Please reject Sherwood proposal to expand the UGB.	8/20/2024 3:56 PM
40	Don't expand it. Enough land in current boundaries to meet needs for many years.	8/20/2024 3:56 PM
41	Available lands for housing, and SDCs, could be the single biggest driver(s) for affordable housing. The laws of supply & demand are not broken, and housing is too expensive in Oregon!	8/20/2024 3:43 PM
42	Listen to the home and property owners who will be most impacted by the permanent loss of agricultural land as well as the lack of existing roads and infrastructure costs that will impact the community.	8/20/2024 3:02 PM
43	Listen to the local citizens and what they have to say. Read the Save Sherwood West concerns.	8/20/2024 11:03 AM
44	I am STRONGLY OPPOSED to the expansion of the UGB as proposed by the City of Sherwood.	8/20/2024 9:56 AM

45	East-West transit/transportation connections, especially to Oregon city. If Sherwood was built as a denser TOD node, then it could help the region develop as a less congested grid.	8/19/2024 6:16 PM
46	develop existing land in the UGB, we will not be able to utilize an expansion, and it is a waste of money, resources and the environmental impact will be irreversible	8/19/2024 12:50 PM
47	Consider transit planning.	8/19/2024 12:08 PM
48	Expanding the urban growth boundary is a horrible idea. We need to build more housing in the land that is already a part of the UGB. We have plenty of room already. The urban growth boundary is already too large in my opinion.	8/18/2024 11:25 PM
49	I beg everyone at Metro considering this, don't let Sherwood have this land. We've already lost the kindness here, we don't need to further it with a larger population.	8/18/2024 10:42 PM
50	Eh, what’s the point. The Boomers are going to do it regardless. This process is a formality :-)	8/18/2024 9:29 PM
51	We should continue following the growth trends that allowed this area to become so unique in its development. Strong growth boundaries and ensuring walkable, inviting, and friendly places are what make the Portland area a destination, not sprawl	8/18/2024 3:47 PM
52	Don't violate the integrity of the UGB to satisfy the poorly zoned single family housing suburban expansion of Sherwood.	8/18/2024 2:29 PM
53	Density, public transit	8/18/2024 2:28 PM
54	Metro and The City of Sherwood work for us not the other way around. 70% don’t want it. Why can’t you respect the wishes of the vast vast majority of citizens!	8/18/2024 2:15 PM
55	I'd like you to consider WHY you need to expand the UGB in an area with limited growth expectations where there are no projected shortages in available space for the next 20 years? And why you need to do it in the direction of farmland?	8/18/2024 1:24 PM
56	Do not expand the UGB.	8/18/2024 1:13 PM
57	I like the plan. I know there is an opposition group but there are those of us that support the plan too	8/18/2024 1:08 PM
58	Sherwood has space for more density instead of further sprawl.	8/18/2024 12:51 PM
59	The 2040 Growth Concept Plan has been a failure. The regional centers and town centers it envisioned have almost universally not been built out. Metro needs to create a new regional plan that has very prescriptive rules for cities, and has actual mechanisms built in that ensure development happens as planned. We have a dire housing shortage, and we need to take it seriously. We have had these UGB expansions every few years for decades now and it hasn't been enough to end the shortage because the problem isnt a lack of land! The problem is and will continue to be that cities enforce apartment bans, take many months to get out permits, and charge 10s of thousands of dollars in SDC and permit fees. Reject this plan and get to work solving the actual underlying issue.	8/18/2024 12:01 PM
60	Please consider the type of climate impacts, fire risk, and transportation challenges that will accompany this proposal. Cookie-cutter suburban tract homes is not the type of housing that will be climate resilient. Please think better of this status quo proposal. We need a course correction for the better. Please vote to deny this application.	8/18/2024 11:33 AM
61	Think about the whole picture…and the impact on the land.	8/18/2024 9:42 AM
62	Our city leaders are not listening to its citizens. YOU MUST listen to us. We do not want this here!	8/18/2024 7:51 AM
63	Does Sherwood really need to look like phoenix?	8/18/2024 7:24 AM
64	I don’t think Sherwood is ready to expand the urban growth boundary	8/18/2024 1:17 AM
65	We need more housing in the entire region! Allow land owners and developers more freedom to meet the needs based on a free market.	8/17/2024 2:51 PM
66	I was offended a little bit at the Council presidents comment that we only have three people of color at Sherwood high School. I would encourage her to come visit us for our Diwali festival,	8/17/2024 9:15 AM

	or our moon lantern festival to see the hundreds of people from Sherwood who are attracted here because of our good schools.	
67	Our schools and roads are at max capacity already. We are already developing several areas with houses and industrial/commercial buildings. Sherwood needs to stop, study, and evaluate the impact before bulldozing ahead with more development to the detriment of our farms and wildlife.	8/17/2024 8:35 AM
68	Please, please do not allow this to happen. Our children are already in classes of 30+ kids, we don't need more crowding. We enjoy our small town and will be forced to leave if this happens.	8/17/2024 8:08 AM
69	Leave as is	8/16/2024 11:11 PM
70	Less multi unit housing	8/16/2024 9:56 PM
71	Sherwood doesn’t need to become another Beaverton. Is there a real need to turn Sherwood into a crowded traffic congested mess?	8/16/2024 9:37 PM
72	When deciding such a significant proposal please make sure and challenge when in doubt, that the local representatives have taken all prudent measures to insure they fairly represent their communities.	8/16/2024 4:35 PM
73	Sherwood city council has lied to you. There was no input from the residents already living in sherwood west. You are proposing something that no one wants and no one needs. We love the farmland and agriculture of our area. New residents will be very upset by the air cannons that are used during harvest season to keep the birds away. So it is clear to me you don't live here and haven't visited here or you would know this.	8/16/2024 11:49 AM
74	Expansion is not only about creating jobs and financial gains for Sherwood. We need to think long term and how adding 4,500+ homes will impact the environment, traffic, and crime. Let's keep the "small town" charm of Sherwood. Do not expand the Urban Growth Boundary.	8/16/2024 7:48 AM
75	Vote this in and you get voted out. This is dumb. We don't need it and the people here don't want it.	8/14/2024 1:11 PM
76	Our taxes are already high and would increase more. Our schools are already understaffed. Farmland is disappearing.traffic is a nightmare. People working in Sherwood can’t afford to buy in Sherwood.	8/14/2024 6:30 AM
77	A 41% increase in the size of Sherwood. It is excessive, unnecessary, wasteful of rich farmland, will increase traffic congestion, and your property taxes.	8/14/2024 5:36 AM
78	I am 100% opposed to the extension of the urban growth boundary. Communities need to work together to address the growth issues. Just because Portland can’t manage their growth/population and drug crisis (that they created) doesn’t mean that this county should accommodate future growth. Stop the expansion to the west and make the current communities support their population	8/13/2024 10:10 PM
79	Expansion of the UGB to the sherwood west would be detrimental to forests, waterways, farmers and farmland. This concept plan runs within distance of wineries and MAJOR forests that literally help keep the area more natural. The carbon footprint of this many people would not be healthy and 99W including Roy Roger's and ELWERT cannot sustain this. Look at Wilsonville with Villebois and I5. The traffic will be horrid. We live in Sherwood because of the beauty, the farmland the wineries and the community. This community is SMALL for a reason and the people here like it this way. The back of Bull mountain is expanding rapidly and Roy Roger's cannot take all this traffic. Please reconsider because this will not be a beneficial choice for waterways, forests, animals, farmers, residents and the environment. Thankyou. Sherwood resident.	8/13/2024 9:04 PM
80	Consider how the farmers are going to be impacted and the small town, neighborhood feel that people in Sherwood take pride in as well as the heritage. Think about how the nature isn't going to become just miles of houses and industrial complexes	8/13/2024 8:03 PM
81	stay out of sherwood	8/13/2024 4:49 PM
82	traffic to/from sherwood from surrounding cities is already terrible and this will only get worse and add to that as well!	8/13/2024 3:33 PM
83	Do not expand the UGB	8/13/2024 2:00 PM

84	When will the Urban Growth boundary stop being extended? When is enough is enough? Do you want Sherwood to end up like Beaverton? What about food supply when farms keep vanishing into the boundary?	8/13/2024 1:00 PM
85	Just remember who or what is being affected by your decisions and how hard they are to take back.	8/12/2024 6:15 PM
86	The pendulum will eventually swing. Start expanding the UGB's before the voters turn on you (only a matter of time)	8/12/2024 5:35 PM
87	Bus and biking lanes where possible	8/12/2024 4:48 PM
88	Less people less traffic Less large shopping centers	8/12/2024 10:04 AM
89	I feel like the crime rate that is almost impossible to enforce right now needs to be considered. More people means more crime. And if we can't take care of the problems we have now then we shouldn't add to them. That's just basic common sense	8/12/2024 7:28 AM
90	Stop sprawl. We have a very fertile valley and need to grow food.	8/11/2024 10:50 PM
91	Please don't ruin the rural natural beauty of our community.	8/11/2024 8:17 PM
92	CLEAN HOMELESS CAMPS. LIMPIEN Y ERADICATE LOS CAMPOS DE HOMELESS. Es el mayor problema de vivienda en Metro Portland.	8/11/2024 2:36 PM
93	It's needed! We need more housing options for the growth of the town	8/11/2024 11:21 AM
94	Traffic. Safe walking paths	8/11/2024 10:33 AM
95	The only real long term fix to help reduce homelessness is the expansion of the UGB. When it comes down to it housing is a supply and demand issue. Government regulation and boundaries reduce the supply.	8/10/2024 11:51 AM
96	Do not expand the UBG	8/10/2024 10:41 AM
97	Not at this time.	8/10/2024 7:43 AM
98	Expand the urban growth boundary to allow more homes with yards. This high density pack them and stack them is ruining our livability. Roads are congested and it's UNREALISTIC to believe we will give up our cars.	8/9/2024 6:12 PM
99	Industrial land should have a 7% or less slope.	8/9/2024 5:54 PM
100	Respectfully request that Metro Council consider tabling the proposed Sherwood UGB expansion plan, and require the City to reconsider its explansion goals and desires and submit a revised plan after having more meaningful input and working partnerships with affected landowners living and/or working the land within their property.	8/9/2024 11:31 AM
101	Please don't do it, too many people at present is causing dangerous traffic situations. High speeds and too much congestion on country roads not built for this volume of traffic. Too many accidents have already occurred and if Metro does not take this into account Metro will be legally responsible for future accidents and needless deaths. Study the traffic on the surrounding country roads, you will find this to be true.	8/9/2024 7:04 AM
102	Please do not expand into the country. Getting closer to ny house every year.	8/8/2024 9:08 PM
103	Just say no	8/8/2024 7:50 PM
104	Sherwood is the last smaller scale town close to I5 and we do not have the capacity to grow anymore. Traffic is already awful and we don't have the space to expand any longer.	8/8/2024 2:00 PM
105	The urban reserves were so designated to account for urban growth boundary expansion in the region. Sherwood has completed a plan for one of those designated urban reserve areas, demonstrating how it could be developed and served with utilities and governance. Metro Council should approve the UGB expansion request, finding that Sherwood has met the requirements of the Metro Urban Growth Management Functional Plan and has put forth a plan to help provide needed jobs and housing to our region.	8/8/2024 1:13 PM
106	The more time these processes take and the more complicated and prescriptive the results are, directly relates to a higher cost of land and for meeting future housing demand and employment needs.	8/8/2024 12:08 PM

107	We have lived in Sherwood for 22 years. We will soon be in a home too large for us. We would like to stay in the community we helped build, but there are no single housing 55 and older neighborhoods, preferably gated. AND they will be small homes that most likely are unaffordable. Chew on that!	8/8/2024 11:48 AM
108	I have lived in Sherwood for almost 30 years. During that time it has blown up, we are losing the small town feel we used to have. Please help keep us from growing anymore west and explore other opportunities. Keep what little beautiful country we have left just how it is.	8/8/2024 11:47 AM
109	Please don't do it.	8/8/2024 11:28 AM
110	If possible slow the expansion down. With slowing population growth & other areas expanding, infrastructure that is inadequate, this should not go forth as is. We want to preserve an Oregon life style, not become California.	8/8/2024 11:10 AM
111	No	8/8/2024 10:50 AM
112	Added info in previous page	8/8/2024 9:43 AM
113	Do not do this to Sherwood!	8/8/2024 7:19 AM
114	My ask of the Council is quite simple. Follow the outlined legislation, purpose and protocol for 20 year outlook for UGB expansion requests, and Follow the Facts. The Sherwood West Concept Plan may appear to be an impressive package; however it represents the view of politicians and commercial developers and not a demonstrated need for more developable land.	8/7/2024 8:32 PM
115	Metro has the power to protect Oregon from urban sprawl. The plan does just the opposite of that and without data to support any demonstrated need or realistic achievable benefit.	8/7/2024 8:15 PM
116	do not allow sherwood to expand the ugb, there are many places already in the region that has opportunities for additional jobs and residential growth	8/7/2024 4:36 PM
117	I hope Roy Roger's Road does not get overwhelmed. I work in Elmonica and live in Wilsonville, and during the afternoon commute, it is faster than taking I-217.	8/3/2024 8:38 PM
118	See main essay on my criticisms, but otherwise I'll mention neighboring communities each had UGB expansions in the past cycle (King City out to Roy Roger's Rd, and Wilsonville with Frog Pond) that have not been developed yet, providing more area housing needs. In addition, a mid cycle swap in benefit of Tigard, taking acres from Damascus, adds additional housing land, making additional growth unnecessary.	8/3/2024 12:03 AM
119	There are zero amenities (stores, restaurants, gas stations, etc) in that part of town. Please make developers include those in their plans. I understand the land in this area is expensive, and the more houses they can squeeze into an area, the more profit they make, but it’s counterproductive to the sense of community that all these surveys speak so much about. Please don’t force an entire town’s with of new residents to drive to 99W/Sherwood Blvd or 99W/Roy Rogers for everything. Provide these basic services for these residents closer to their homes.	8/2/2024 3:27 PM
120	Although I think that Sherwood has the right mindset with keep the goals of the state in tact with the chip manufacturing, it seems like they are behind on timing. I feel like there are better areas with freeway access for transportation, if they build out the land off of Roy Rogers as employment/industrial it seems like there's limited future growth beyond this. I would recommend areas like Hillsboro, Tualatin, and Wilsonville. I think that was a bad planning part on Sherwood and the panels.	8/1/2024 12:39 PM
121	I did not answer about the Sherwood proposal as I am not in that area. However, I did indicate my overall preferences for what should be considered in UGB decisions.	7/30/2024 7:46 PM
122	There are a lot of small acreage lots with housing already on them and I would expect most of these lots would not be available for development for more than twenty years from now. There is also farming activities going on in the area, that do not appear to be available for development in the near future. There appears to be no real adequate plan for future transportation, water and sewer, and electricity, that will adequately serve the current area, let alone any future expansion.	7/30/2024 9:09 AM
123	The west side has such heavy traffic due to the extensive growth, I hope the new streets are accommodating of this reality.	7/30/2024 8:24 AM

124	Sherwood has a comprehensive plan and they know what is best for their city. Lattititide should be given to incorporate city objectives. There is too much top down planning.	7/30/2024 7:20 AM
125	Need to have Development Pay for itself. Putting new infrastructure on the backs of current residents is not acceptable. Develop and dash ,leaving "us" to pay for fire, police, schools, etc. part of the Development Ponzi scheme we are still buying into.	7/29/2024 9:42 AM
126	Let's not eat up more rural land unnecessarily. Instead, let's focus on greater density within the existing urban area.	7/28/2024 8:39 AM
127	Housing is unaffordable. Do not accept that the west coast needs to be expensive. We made it this way. We need a reset. We can and should set our goal to be more affordable than the Mid-West. Build more housing. All kinds of housing.	7/25/2024 7:25 PM
128	I'm strongly in favor of expanding the UGB as described in the Sherwood proposal. Long overdue!	7/24/2024 5:40 PM
129	Please look at the assertions of the City of Sherwood with a critical eye. Throughout the public outreach process they have often used vagueness and begged off serious concerns with a statement of it being to early in the process to make detailed plans.	7/24/2024 4:09 PM
130	Move to California if you want sprawl. Seriously, this is so irresponsible of you.	7/24/2024 7:36 AM
131	Our family has owned property in Sherwood for more than 100 years. We love the area and are thankful that METRO and the City of Sherwood planners are carefully considering options.	7/23/2024 9:29 PM
132	Denser	7/23/2024 8:58 PM
133	I have followed the preliminary work done by the city of Sherwood and believe they have captured the needs of the community and this expansion will make Sherwood stronger and provide more "Sherwood Quality" community around the High School and green land areas. Sherwood is unique and we'd like to see more people have the opportunity to be apart of this great community.	7/23/2024 8:41 PM
134	Just don't do it. I know there's a lot of pressure from developers and right-wing politicians to eliminate the UGB, but it has served us so well. Give the new middle housing and other infill opportunities a few years to show whether, as the growth projections suggest, they will provide adequate places to develop new housing that is more suited to achieving the region's climate and lifestyle goals.	7/23/2024 6:47 PM
135	Look forward. The future doesnt call for this	7/23/2024 6:25 PM
136	Stop it. Look at your own life	7/23/2024 3:29 PM
137	The several decades of suburban expansion since the Highway boom have definitively shown us that sprawl does not creat good communities, much of what made this region great and unique has been torn apart by Highway expansion and our main goal should be to fill the void left in its wake, expanding the growth boundaries would be contrary to that	7/23/2024 3:25 PM
138	If growth continues out in farm and agriculture areas, you will find one day there will no longer be berry picking, fresh eggs, pasture raised meat, flower farms and wineries, that people love to venture out to. You will also create a traffic nightmare by putting commuter roads where livestock live and tractors and other machinery will share those same roads.	7/23/2024 2:24 PM
139	The current untenable traffic problems. The adequate amount of buildable land within the current boundary. The financial interest in builders dominates the planning proposal, not the majority of citizens.	7/23/2024 12:17 PM
140	Please give credence to the comments of the public. Don't let the developers rule or community. They are here for the profit, we live here.	7/23/2024 11:53 AM
141	I would like to see more incentive provided for increasing transit options. Considering Sherwood's location within the Greater Portland Area, I imagine the increase in UGB will result in a increase in automobiles on the roads. Can there be a way to ensure an increase of transit options as part of the increase in UGB?	7/22/2024 6:10 AM
142	The area is losing residents. There's no reason to extend the growth boundary. Gentrify downtown. Leave the surrounding wilderness and farmlands alone. You're bought and sold by developers so I don't even know why I'm filling out this stupid thing.	7/21/2024 9:04 AM

143	I. The greatest asset to the Portland area has not been and will never be humans or anything made by man, but the natural bounty provided us all by the Earth. II. If we cannot live beautifully, why should we live at all?	7/20/2024 9:02 PM
144	Please never expand urban growth boundaries. Encourage density within existing urbanized footprints. Vastly expand public transit. Stop widening freeways. Fund housing as a human right.	7/20/2024 7:43 PM
145	Thank you for reaching out for opinions,	7/20/2024 10:44 AM
146	Make sure developers are legally on the hook to live up to their obligations instead of flaunting their disregard of the rules.	7/18/2024 9:47 PM
147	n/a	7/18/2024 12:06 PM
148	This proposal is the definition of car-dependent sprawl and should NOT be allowed.	7/18/2024 10:24 AM
149	We need more housing for seniors- single level, accessibility features.	7/18/2024 6:22 AM
150	Cycling, walking, and transit should not simply be options but the preferred mode of transportation around a new neighborhood such as this.	7/17/2024 6:53 PM
151	I hope you know how much of a transparent Money Grab this proposal is. Couched in disarming political jargon. The proposed expansion is in an area that struggles to support the residents as is. Highway 99 and 217 are virtual parking lots 80% of any day. Growth without sufficient infrastructure is irresponsible bordering on nefarious.	7/17/2024 6:18 PM
152	Unless the development pattern requires reuse and redevelopment of existing built areas first, while providing space for parks and natural areas, the expansion effort is based on false pretenses.	7/17/2024 2:26 PM
153	Stop building up over our beautiful land. This is the reason so many of us moved here.	7/17/2024 2:06 PM
154	We need more NW 23rds not more Lake Oswegos. If cities want to expand they need to do so in ways that allow for more mixed housing and not restrict the expansion area only for the wealthy.	7/17/2024 9:25 AM
155	I’m gonna be so real with yall. I come from Texas, and while they have a lot of draconian social laws, they know how to build housing — fast. Which is why housing costs are so cheap compared to here. While I don’t want 20 lane highways or single family suburbs everywhere, approving more land at a faster pace to build housing can change the game. Please approve the Sherwood proposal and continue expanding the boundary piece by piece.	7/16/2024 11:23 PM
156	I think it’s probably most important to consider the nearby communities and the transportation issues. I won’t be affected at all by this given where I live and I no longer own a car. Hopefully, adequate transit will be accessible to these new residents	7/16/2024 8:52 PM
157	Sherwood is a desirable city to live in because of its charm. This expansion would take away some of that charm and spread the city further apart instead of building it together creating more community	7/16/2024 8:51 PM
158	Does Metro conduct any evaluation (or require this of the applicant cities) to determine if this is the highest and best use of this area of the urban reserve, and/or whether there is not another place within the urban reserve that is better suited for an expanded UGB (even if it's in another city)? It seems misguided that cities apply for UGB expansion, instead of Metro determining where and when they should occur.	7/16/2024 8:43 PM
159	The roads that people will use to come and go from the new area. The roads already don’t support the population.	7/16/2024 6:32 PM
160	As a regional government, I believe that Metro Councilors have a responsibility to go out and talk to communities about the vision the Metro Council has for them and to listen to community feedback where they are. Decisions at Metro are made with City and County staff attendance in morning meetings, but they should attend evening meetings with Councils and Planning Commissions to hear the citizens sides of the stories, not at Metro. My opinion.	7/16/2024 5:01 PM
161	If you plan for decline you will likely achieve it.	7/16/2024 9:07 AM
162	Better increase of diversity at Metro in the team.	7/16/2024 8:01 AM
163	Just say NO, there is no reason for it. Approving this sprawl is not what METRO is supposed	7/15/2024 8:52 PM

	to be doing.	
164	Please clean up the trails at Mount Talbert Nature Park. So much poison oak and we need to do gymnastics to avoid it when hiking.	7/15/2024 7:57 PM
165	Sad to see our farm la d go to waste, we will never have that fertil land back ever again	7/15/2024 6:50 PM
166	I'm really proud of Metro and the UGB. Let's keep moving, and do it thoughtfully and slowly.	7/15/2024 6:48 PM
167	Make sure to preserve wildlife habitat and include good solar and other renewable energy options	7/15/2024 6:00 PM
168	Prioritize affordable single family housing and safe and affordable public transit.	7/15/2024 5:23 PM
169	More public transportation. More parks and trees!	7/15/2024 5:15 PM
170	I vote for no growth, Mother Nature thanks you	7/15/2024 4:41 PM
171	Please consider the desires of the people who call Sherwood home. You only need drive down Roy Rogers Road and see the abomination of development there to understand our intense contempt at the idea of those developers getting any closer to our bucolic countryside and beautiful rural setting. A 42% increase in the size of our city is unnecessary and unwarranted. Construction of this size will be a burden to all who live in the area for years to come.	7/15/2024 3:47 PM
172	Expand the boundary the maximum amount possible! The region needs more single family homes-thousands more homes!	7/15/2024 3:03 PM
173	Our land use laws have served us well, and has strong support. Going forward, we need to be flexible to address opportunities as they arise, and act far faster.	7/15/2024 2:20 PM
174	Again, don’t mix residential with working farm ground. Example, Roy Rogers Rd, one side now high density residential and the other ACTUAL working farm ground.	7/15/2024 1:39 PM
175	Thanks	7/15/2024 1:20 PM
176	Don't encourage expansion of the UGB under the disguise of affordable housing. In-fill and up zoning in close-in locales can solve the housing needs and address traffic and transportation issues. With all the expansion, where will we be in 20 or 40 years? Sprawl is not the answer no matter what it is called. Smart in-fill and upzoning development makes sense -- especially given the aging demographics. The new single-family neighborhoods will be empty areas in 30 years. Thank you.	7/15/2024 1:20 PM
177	Metro needs to remember that UGB amendments can't be undone, and that the UGB is about the only truly effective growth management tool in the US today. Consequently, what Metro does with the UGB is central to its success as a regional government. Metro needs to embrace this critical role and lead publicly to build understanding and support for probably the only thing that it does that has true and lasting value and impact. In addition, Metro needs to work with its jurisdictional partners to maintain, revise and needed, and publicize its vision for the region. Today, the 2040 Concept Plan is now 30 years old. Metro has ignored it's fundamental role as regional planner for way too long. That vision is out of date, unknown, and not authoritative. Metro has been given the opportunity to lead with vision, but it has insisted on doing nothing of the sort. For too long, Metro leaders have insisted that no more planning is necessary while ignoring the plans and vision that it has. Further, plans only represent the consensus of the moment they were adopted. Keeping plans and visions alive is an ongoing responsibility. It require work and commitment, and Metro has provided neither. If Metro doesn't want the UGB savaged by self-interested development forces, then it needs to frame the UGB by something larger. Metro has completely failed to do that, and the result is the kind of result we saw in the last Legislative session where Democrats, led by Governor Kotek, championed UGB amendment actions that would fundamentally make Metro, and this process, irrelevant. In addition, while Metro Councilors name-check climate as a major concern, they do nothing. They continue to push for highway expansions, and they have done nothing to update the 2040 concept to reflect concerns for climate and carbon emission reduction. Frankly, the emperor, in this case Metro, has no clothes. But Metro certainly like what it sees in the mirror. Please get real! Stop playing games with the region's future and get to work, particularly on the things Metro is uniquely charged with. Time is flying and you are not in the game.	7/15/2024 1:17 PM
178	I do not support this at all! Fix downtown Portland first!	7/15/2024 1:15 PM
179	No more concrete jungle. The traffic is HORRENDOUS around here. Too many cars and new	7/15/2024 12:50 PM

	crappy homes.	
180	Wilderness spaces are important for so many reasons, especially as climate change will be making urban life even more warm and unbearable in the future. I'd rather see Metro use the space already allotted to it than paving over even more land.	7/15/2024 12:44 PM
181	Fewer parking lots, less sprawl, more dense housing, narrow freeways and add tolls, more bike paths	7/15/2024 10:36 AM
182	Quit allowing land waste with huge estates. Focus on density and cleaned up safe transit and bike paths.	7/15/2024 7:31 AM
183	No	7/15/2024 6:09 AM
184	Please don't expand. The city has plenty of room for development inside city limits. In addition king city has already expanded and is working on developing a large residential area just down the road.	7/14/2024 6:17 PM
185	Thanks for asking	7/14/2024 5:42 PM
186	Approve it	7/14/2024 5:16 PM
187	Don't let existing Sherwood residents vote down UGB expansions that are needed to help the region accommodate growth and affordability.	7/14/2024 4:02 PM
188	Just like with the Brookman Rd expansion I believe the council will push this through, regardless of your employers, the voters.	7/14/2024 3:43 PM
189	Prefer to not include Sherwood in the urban growth areas.	7/14/2024 3:30 PM
190	Please do not approve the Sherwood West Plan.	7/14/2024 2:25 PM
191	Light rail expansion on the 99 corridor	7/14/2024 12:48 PM
192	I reject the proposal. I think it’s important to keep farmlands and keep this city a somewhat “country” suburb. Tigard and tualatin are close enough and are incredibly overdeveloped. We don’t want Sherwood so overdeveloped. No one moved to Sherwood wanting it to end up like Tigard or tualatin.	7/14/2024 12:16 PM
193	This is not the right thing to do. When this was first proposed in 2015 it was a 50 year plan. Here we are 9 years later and they are moving forward full speed. We all were against this in 2015 and we still continue to be apposed now. Do not allow the sheriff expansion. With the expansion of King City it's already going to bring a huge influx of people, cars and business to this Sherwood area. We don't need more. We need land to grow food. We need trees. We need space for wild animals. This can not happen. As rural residents of Sherwood we can't vote on elected officials that make the choices that effect us and not those in town who do get to vote. Please let our voices be heard. We do not support this expansion. This is the only way we can be heard.	7/14/2024 12:09 PM
194	Do not expand Sherwood’s urban growth boundary	7/14/2024 10:52 AM
195	The city of Sherwood residents voted a resounding NO for expansion - 86% rejected this expansion plan. We are not willing to fund such expansion when we already added land into the UGB an poor planning as led to a waste of resources and ag land (massive high school that tax payers are having to pay for)	7/14/2024 10:32 AM
196	Resources are already scarce in rural Sherwood. Please don’t exacerbate that.	7/14/2024 10:29 AM
197	No more growth in Sherwood. We are being squeezed.	7/14/2024 10:16 AM
198	Metro should consider the city of Sherwood’s blatant rejection of the wants and needs of its residents and bordering residents. We have demonstrated over and over to the city and metro, that this expansion is both unneeded and unwanted. Much of developed Land within city limits sits vacant, neglected, and unused. Metro And the city of Sherwood should be protecting precious farm and agriculture space, rather than promoting urban sprawl. Please reject this proposal.	7/14/2024 10:14 AM
199	Schools cannot take any more students. Please consider grocery shops being better accessible. Growth isn’t always best.	7/14/2024 9:47 AM
200	Less low density housing. And how will Trimet serve this area?	7/14/2024 9:30 AM

201	For the love of god please get housing prices under control!	7/14/2024 8:21 AM
202	There needs to be infrastructure already IN PLACE before you expand. The 2020 bald peak fires are an excellent example of why we need to be prepared BEFORE you expand. This one incident required the involvement of many multi agencies and could have resulted in a much larger devastation and loss of forest, wildlife, domestic/farm animal life and human life if the plane dropping fire retardant wasn't diverted from Hagg Lake fire to Bald Peak.	7/14/2024 8:13 AM
203	Increase density and transit, anticipating future climate refugees.	7/14/2024 12:11 AM
204	The city has a lot of un unused or poorly used areas and they can be transformed to a better place like broadway corridor that solely adds over 1000 homes. This type of development should be a focus of the council.	7/13/2024 12:02 AM
205	Rather than building more outside of the UGB, let's focus on creating better spaces on the land that's already allocated. Densify current areas, we don't need to increase sprawl more.	7/12/2024 8:21 PM
206	Please consider the climate and the environment and understand that gasoline cars and infrastructure that prioritizes cars is killing us in heat waves. Please consider these very serious factors and look at Europe and Asia.	7/12/2024 6:16 PM
207	This expansion should have already happened before the School was built in 2015 - Newberg, Or has updated their area and we are left behind and deal with their traffic to Hillsboro.	7/12/2024 1:24 PM
208	Sherwood has the right ideas in mind with mixed developments and alternative transportation but they need to take them further, transit being extended into Sherwood west should also be explored as it's distance from the other bus lines would make access difficult and in the largest proposed area of lower cost housing in Sherwood those living in Sherwood west may be those most dependent on transit	7/12/2024 8:12 AM
209	I can't stress enough how important it is to preserve nature and avoid suburbs.	7/12/2024 8:04 AM
210	Future mass transit expansions, leave room in regional plan to allow for cheaper future expansions.	7/12/2024 12:26 AM
211	Preserve natural lands at all costs. Build up, not out. Increase density, disincentivize personal automobile ownership & provide clean, renewable public transit. Smaller urban boundaries increase access to nature for all, decrease fossil fuel emissions and preserves ecosystems. The Pacific Northwest is supposed to be a bastion of sustainability, let's live up to it.	7/11/2024 10:39 PM
212	I grew up in both Newberg and Tigard (divorced parents). I saw Sherwood go from some fields to what it is today. It sprawls a lot more than it needs too, and driving to there and through it is miserable. I'm nervous about continuing to focus on roads instead of public transit, and if we want housing to be affordable and Sherwood to be accessible to folks, it needs to move away from single family homes. Thank you	7/11/2024 7:03 PM
213	You really messed up in expanding Happy Valley without planning to run high capacity transit to serve it. You doubled down on this error by trying to run an expressway to serve the area, instead of transit. Now, you're on course to repeat your mistakes in Sherwood. Are you stupid, or just corrupt? Don't do it. Stop yourselves before you offend again.	7/11/2024 6:16 PM
214	Do not expand the UGB. No more freeways. No car dependence.	7/10/2024 10:17 PM
215	Please do what you can to encourage mixed-use transit-oriented density throughout the metro region, thanks.	7/10/2024 12:38 PM
216	Please don't expand the urban growth boundary in Sherwood. Our town has reached its limits.	7/9/2024 9:57 PM
217	Yes! The greatest consideration should be given to the plan and proposals from the local community.	7/9/2024 3:51 PM
218	no	7/9/2024 3:20 PM

Q1 What do you most want to see preserved as greater Portland continues to grow?

Answered: 340 Skipped: 25

#	RESPONSES	DATE
1	Portland and Oregon needs to keep our lands preserved, the farmland, the natural areas, and the like. There's been far too much expansion, with virtually no consideration to infrastructure. It's become so bad that I will likely move out of Oregon as the traffic is untenable. Areas like Bull Mountain and the expansion west into the Scholls area are disheartening and honestly depressing to witness. As someone who moved from Tigard to Sherwood to escape the rampant influx and horrendous planning, I'm fearful of what your plan is for Sherwood and beyond.	8/23/2024 10:06 AM
2	Parks and rec area	8/22/2024 9:51 PM
3	Farmland and rural areas	8/22/2024 9:44 PM
4	I most want to see our green spaces and parks preserved, ensuring that all generations can enjoy the natural beauty and outdoor opportunities that make Portland unique.	8/22/2024 9:42 PM
5	Farmland	8/22/2024 9:38 PM
6	Farm land	8/22/2024 7:24 PM
7	Our agricultural land!	8/22/2024 6:57 PM
8	Open space, farm land, landscape views	8/22/2024 6:51 PM
9	Mass transit	8/22/2024 6:46 PM
10	Farm land	8/22/2024 6:44 PM
11	Farm land, country roads, small town feel, less traffic,	8/22/2024 6:29 PM
12	Farmlands and fields	8/22/2024 6:28 PM
13	Partnerships across different levels of government, the private sector, and non-profit organizations.	8/22/2024 6:06 PM
14	Farmland	8/22/2024 4:57 PM
15	The Old Growth Timber 200 year plus trees	8/22/2024 4:38 PM
16	Ag land.	8/22/2024 1:13 PM
17	Farmland	8/22/2024 11:42 AM
18	Compact city (easy and quick to get from one side of the city to the other). Preservation of nature outside the city. Close proximity to nature.	8/22/2024 11:39 AM
19	I would like to see farmland and trees preserved. Everytime a developer comes in and develops land into $700K homes (not affordable to true Oregonians only california transplants) he cuts down 100's of large mature trees and plants one the size of a charlie brown christmas tree and calls it good	8/22/2024 10:11 AM
20	Our natural and rural areas.	8/22/2024 10:08 AM
21	Farmland and forest	8/22/2024 2:52 AM
22	Habitat for wildlife	8/21/2024 11:09 PM
23	As Portland grows I would like to see the beauty and charm of existing neighborhoods protected. Too often decisions are made which prioritize currently popular political priorities which end up trampling over the livability of existing neighborhoods.	8/21/2024 10:52 PM

24	Farmland, access to nature, a relatively compact city, lack of suburban sprawl, relatively low traffic congestion.	8/21/2024 10:47 PM
25	Tress and water quality	8/21/2024 9:32 PM
26	affordability	8/21/2024 8:16 PM
27	The natural beauty of Oregon should be preserved. It is also important to preserve wildlife habitat and local agriculture. Given global climate change Oregon wine country is anticipated to have large growth in industry in the upcoming future. Preserving land where this local agricultural can flourish is imperative. Protecting the water shed is also important, given the many threatened species that live in the surrounding area.	8/21/2024 6:06 PM
28	Farmlands and natural areas	8/21/2024 5:50 PM
29	The natural lands surrounding the city.	8/21/2024 4:55 PM
30	Livability. This includes affordability, connection to nature and lack of traffic congestion.	8/21/2024 4:22 PM
31	Livability and agriculture. The urban growth boundary is designed to protect farm land and preserve the livability of our state and it should be allowed to work as intended.	8/21/2024 3:40 PM
32	Continue to protect green spaces and saving older homes instead of developers coming in and bulldozing them down. incorporate more of these in newer developments. Seeing the high-density houses go in with little to no regard for trees, green space is making our area look every other area in the country instead of preserving the history and natural beauty of our state.	8/21/2024 2:58 PM
33	Preserve green spaces, prevent sprawl, increase density	8/21/2024 2:35 PM
34	1: Free Choice of how to pursue happiness, including where to live. 2: Rural acreage close to, and within greater Portland, that protects both natural and economic characteristics.	8/21/2024 10:54 AM
35	farm lands and wildlife.	8/21/2024 8:33 AM
36	Farm land	8/21/2024 7:10 AM
37	A good quality of life. Enough schools and jobs and roads to support the number of new homes being built. And preservation of the natural landscape.	8/20/2024 11:35 PM
38	Public green space Pedestrian and bike friendly community centers	8/20/2024 7:43 PM
39	Parks. Concerts, high quality establishments	8/20/2024 6:24 PM
40	Farmland and green spaces	8/20/2024 6:21 PM
41	I want to see farmland and natural areas continue to be preserved.	8/20/2024 6:19 PM
42	Green spaces, protected habitat areas	8/20/2024 5:00 PM
43	farm and forest land	8/20/2024 4:55 PM
44	Rural farmlands	8/20/2024 4:53 PM
45	Larger lot sizes	8/20/2024 4:49 PM
46	wildlife habitat, farmlands.	8/20/2024 4:48 PM
47	Farmland, green space, horizon lines.	8/20/2024 4:25 PM
48	Farm land and outdoor spaces	8/20/2024 4:20 PM
49	Productive farmland	8/20/2024 4:18 PM
50	PRESERVE Farmland, more density housing in areas already in the UGB, not increasing growth being driven by developers but SMART GROWTH	8/20/2024 4:10 PM
51	Protection of Title 13 areas in the form of small tree farms and woodlots where wildlife has take refuge, including creeks and wetlands.	8/20/2024 4:03 PM
52	Farm Land, open space, environmentally sensitive Areas	8/20/2024 3:52 PM
53	farmland, wild animal habitat, forests	8/20/2024 3:52 PM

54	Farmland, wineries, forests and parks	8/20/2024 3:46 PM
55	Green Space	8/20/2024 3:46 PM
56	Substantial wetlands & navigable water ways	8/20/2024 3:31 PM
57	Preservation of agricultural land and open space. The loss of agricultural land is disproportionate to the need for growth and expansion with industry. The focus should turn to using already developed urban land before expanding into precious agricultural areas.	8/20/2024 2:53 PM
58	Quality of life	8/20/2024 2:01 PM
59	Greenspace	8/20/2024 1:47 PM
60	Our farms, vineyards, our trees and affordable housing.	8/20/2024 10:54 AM
61	Green space and open land (used as natural reserves and agricultural areas)	8/20/2024 9:44 AM
62	Rail transit rights of way	8/19/2024 6:09 PM
63	farmland and country acreage preserved	8/19/2024 12:45 PM
64	Preserved nature, less sprawl	8/18/2024 11:22 PM
65	The current urban growth boundary boundary	8/18/2024 10:17 PM
66	Agriculture land.	8/18/2024 9:24 PM
67	Agricultural resources, our natural spaces, and our planet. Sprawl consumes more farm land, more natural habitats, and creates exponentially more GHG emissions which will destroy our planet.	8/18/2024 8:37 PM
68	Natural spaces	8/18/2024 8:30 PM
69	Slow it down, big housing developments with out the infrastructure is horrible. Take for instance, the high school the walk way across 99 3 years after the school opens. Someone had to get hurt before they did something . Now it’s just a cluster, and drop off one way in , one way out. I’m sick of the lack of common sense that goes into planning.	8/18/2024 7:01 PM
70	Farm land and green spaces near our urban centers.	8/18/2024 5:10 PM
71	Our green space and lack of sprawl. Part of what makes this area great is the density and strong urban growth boundaries that created the cities in the Portland area.	8/18/2024 3:42 PM
72	Keeping Sherwood a small town, single family homes and not apartments and condos.	8/18/2024 3:25 PM
73	Natural and agricultural land.	8/18/2024 2:37 PM
74	Farmland, keep the UGB in tact.	8/18/2024 2:25 PM
75	Our lush green spaces and forests	8/18/2024 2:25 PM
76	Keep the current UGB and grow through infill housing	8/18/2024 1:35 PM
77	Farmland & trees.	8/18/2024 1:21 PM
78	Honestly, as someone who has lived in Sherwood for 15 years, calling it part of "greater Portland" in the first place is offensive and concerning. What I want to see preserved for *Sherwood* is that the small town and surrounding farmland does not get sucked into the crime, homelessness, drug use, and other blight infecting Portland proper.	8/18/2024 1:20 PM
79	The existing UGB.	8/18/2024 1:11 PM
80	Nature and valuable farmland	8/18/2024 12:49 PM
81	Farmland - use the old and empty buildings before allowing to build more.	8/18/2024 12:29 PM
82	Farmland and forest.	8/18/2024 11:27 AM
83	Farm land	8/18/2024 10:00 AM
84	Farm land and better infrastructure to handle the growth, BEFORE you grow anymore!	8/18/2024 9:40 AM
85	Farms, woodland areas, and small town atmosphere.	8/18/2024 7:48 AM

86	Rural farm land	8/18/2024 7:19 AM
87	Agriculture, farmland, forestry. Repurpose or demo existing old buildings and land that is wasted within the current boundaries.	8/18/2024 7:08 AM
88	Parks, farms, Open space	8/18/2024 6:28 AM
89	Nature, trees, fields	8/18/2024 1:08 AM
90	farmland	8/17/2024 8:46 PM
91	Affordable housing and access to parks, state parks, green areas, etc	8/17/2024 2:48 PM
92	I value the variety of outdoor activities.	8/17/2024 9:10 AM
93	Farmland and forest	8/17/2024 8:27 AM
94	Farmland	8/17/2024 8:02 AM
95	Keeping urban sprawl limited, maintaining natural lands especially wetlands and wild habitat.	8/17/2024 5:18 AM
96	Forest and farm land	8/16/2024 11:03 PM
97	We need more space. We are ruining life for the majority in order to appease the few, often very wealthy. UGB is not a great thing.	8/16/2024 9:55 PM
98	Rural spaces and limiting growth of surrounding cities	8/16/2024 9:31 PM
99	Quality of life and open spaces. Putting high density homes in areas without transportation options will lead to excessive congestion.	8/16/2024 4:23 PM
100	Safe, clean and robust communities living in harmony with open protected spaces	8/16/2024 4:23 PM
101	Agricultural land that makes the area what it is. No more packed together houses with no character.	8/16/2024 11:44 AM
102	farmland, natural spaces, lower traffic	8/16/2024 7:35 AM
103	Water & air quality.	8/15/2024 1:41 PM
104	Green space…parks…small produce farms	8/15/2024 12:15 PM
105	Farmland and scenic beauty	8/14/2024 1:08 PM
106	Fertile Farmland, natural habitats and forests.	8/14/2024 7:01 AM
107	Farmland, which is why I bought in Sherwood 20 years ago	8/14/2024 6:25 AM
108	Farmland	8/14/2024 5:31 AM
109	I would like to see farmland and the farming communities around Portland continue to thrive. Adding additional sprawl will not allow Oregonians to continue to thrive as ranchers, farmers and country folk. It changes the landscape and ruins what makes Oregon great.	8/13/2024 10:06 PM
110	WINERIES , AND FARMLAND IN SHERWOOD OREGON.	8/13/2024 8:58 PM
111	Our green spaces are quickly disappearing and being replaced by industrial buildings and high density houses. It is having an impact on different industries, air quality, congestion and more. We are building faster than we are growing trees and it is sad to see. Oregon is beautiful because so much of nature has been protected, at least until recent years.	8/13/2024 7:54 PM
112	farmland	8/13/2024 4:45 PM
113	Family farms	8/13/2024 4:06 PM
114	Sherwood and surrounding farm land areas so that there is retained access to local fresh farm products.	8/13/2024 3:46 PM
115	rural areas, farms, wineries, parks, natural areas	8/13/2024 3:29 PM
116	Less density in building. More single family homes instead of apartments.	8/13/2024 1:58 PM
117	Old growth tall trees, all greenways, wetlands, natural habitat, waterways, farmland, open fields.	8/13/2024 12:55 PM

118	Land as mark twain said " buy land they aren't making it anymore" Meaning it's hard to get back the land that is absolutely needed for farmers who have a hard time as it is to grow food for our community and wildlife plus the more homes the more pavement ie more heat and less country.	8/12/2024 6:13 PM
119	Livable neighborhoods with yards.	8/12/2024 5:29 PM
120	old trees, convenient public transit	8/12/2024 4:56 PM
121	Parks, recreation, libraries, and open spaces and agricultural land free from future development	8/12/2024 4:44 PM
122	Less people less traffic	8/12/2024 10:01 AM
123	I want to see land, farms, and agriculture preserved	8/12/2024 7:23 AM
124	Condense cities save farm land, Forrest and open spaces	8/11/2024 10:45 PM
125	Farmland and wilderness areas - please protect Oregon agriculture	8/11/2024 8:32 PM
126	Preserve green spaces in Sherwood. Oregon’s public perception is lush greenery, and yet everywhere I look in my community the green is systematically removed. It’s ugly and heartbreaking.	8/11/2024 8:15 PM
127	Árboles, parques zonas verdes. Tree, nature rich parks, more trees.	8/11/2024 2:32 PM
128	Farmland, rural spaces, forests	8/11/2024 10:27 AM
129	The availability of single family detached homes to a wide range of homeowners. Surveys continue to say young people still desire home ownership and the changing needs of baby boomers are not being met.	8/11/2024 8:18 AM
130	Our farm land! I have lived here all my life (57 years) it truly makes me sad to see Metro being hijacked by developers. The idea of the urban growth boundary was a great vision to keep urban sprawl from ruining our way of life the way it has in so many large cities, but I have seen over the years that the Urban Growth Boundary has increasingly meant nothing. Constantly building is not sustainable. We need to revisit, at the deepest level, why the Urban Growth Boundary was created in the first place and go back to the time when it meant something. When it was used as a tool to continue a high quality of life.	8/10/2024 6:05 PM
131	I would like to see the cost of housing preserved over all other things.	8/10/2024 11:46 AM
132	Protect Farm land	8/10/2024 10:36 AM
133	Agricultural and forest land	8/10/2024 9:58 AM
134	Farm land It is very sad to see so much farm land get swallowed up by large housing developments, and now on Roy Rogers Rd. businesses are taking over farm land.	8/10/2024 7:37 AM
135	Greenspace, single family home neighborhoods, safe parks.	8/9/2024 11:15 PM
136	Single family homes with actual yards	8/9/2024 6:07 PM
137	single family homes	8/9/2024 5:50 PM
138	Open spaces, small farms, and rural lifestyle within the Sherwood UGB area. While growth is necessary to address future needs it must be done smartly and prudently considering all factors and concerns particularly from those directly affected by proposed changes .	8/9/2024 11:13 AM
139	Natural spaces without residential expansion and subdivision creation.	8/9/2024 9:51 AM
140	Natural habitats, green spaces/bridges, farmland, more density less urban sprawl.	8/9/2024 9:32 AM
141	Rural and precious farm land, forest, timber and green spaces including waterways.	8/9/2024 6:58 AM
142	Our roads being somewhat managable with traffic. As a 5th generation oregonian with a 6th gen daughter. The traffic is getting horible.	8/8/2024 9:04 PM
143	Stop building everywhere. Save the trees for weather preservations in the heat. More trees more rain, win win, end the drought. Save wildlife.	8/8/2024 8:18 PM
144	Farmland	8/8/2024 7:45 PM

145	Farm land, forests, and welands	8/8/2024 7:45 PM
146	Forests, wildlife, farmland	8/8/2024 7:28 PM
147	Farmland	8/8/2024 7:19 PM
148	Farmland, wildlife areas, green space	8/8/2024 7:05 PM
149	Farmland. No concrete jungles or suburban sprawl like California	8/8/2024 6:28 PM
150	Keep land as is. No more commercial building	8/8/2024 6:24 PM
151	Trees' and open spaces.	8/8/2024 5:38 PM
152	open farm land and large open spaces for trees and parks	8/8/2024 3:43 PM
153	Farmland and small family run farms	8/8/2024 1:58 PM
154	I'm not sure about preserved per se, but funding provided for parks and trails should be prioritized to maintain green spaces and multimodal transportation options.	8/8/2024 1:04 PM
155	Suitable land prepared for residential, commercial, and industrial use inside the urban area with fewer governmental barriers	8/8/2024 12:02 PM
156	Small town feel	8/8/2024 11:42 AM
157	Land and small town feels	8/8/2024 11:42 AM
158	We need to preserve the quality of life that Portland is known for. Outdoor beauty, healthy local economies, environmental quality.	8/8/2024 11:25 AM
159	Farm lands, green forested areas. Not urban sprawl or mini malls	8/8/2024 11:04 AM
160	Farms	8/8/2024 10:47 AM
161	Open space	8/8/2024 10:12 AM
162	Preserve farmland, do not increase traffic on already broken road infrastructure	8/8/2024 9:54 AM
163	Family farms and farm and forest land	8/8/2024 9:42 AM
164	Open spaces, wildlife preservation	8/8/2024 9:37 AM
165	The love the great non developed area we live in. Metro continues to invade our small country feel. We don’t need more bullying that Metro brings to the table.	8/8/2024 8:49 AM
166	Out beautiful trees and open spaces without city sprawl and tight housing	8/8/2024 7:14 AM
167	Trees, farms, natural beauty, clean air, TRAFFIC CONTROL	8/7/2024 11:21 PM
168	Access to green spaces, forests, natural areas	8/7/2024 8:39 PM
169	Farmlands, open spaces, parks	8/7/2024 8:21 PM
170	trees, nature, farms, agriculture, clean air, no pollution, protect environment	8/7/2024 7:57 PM
171	affordable housing, jobs, community safety, people of color in charge of decisions	8/7/2024 4:34 PM
172	Homes less than 500k with yards greater than 5,000 square feet. I like to garden, but I am not wealthy.	8/3/2024 8:26 PM
173	Strip clubs, porn theaters, a verity of convenience stores	8/3/2024 3:14 PM
174	The rights of farmers & their families, farmland, native plants & trees & wildlife including the protected nesting areas, hunting grounds & migratory routes including aerially. Once forest, farm rural land is paved it can never be restored. There's plenty of opportunities to convert un-used, partially or under-used land, buildings, homes within the UGB to better, more efficiently & effectively house people to be close to jobs, social services & stores & medical services without permanently destroying, compromising & polluting protected, finite and rich 'world class' soil, land or water. Also, with being resourceful, creative & utilizing recently passed regulation, it's possible to prevent the destruction of protected wildlife, native plants & essential tree canopies & conserve the history, beauty, rich soil, farmland, nature & topography of Oregon.	8/3/2024 12:50 PM

175	Natural areas, specifically varied wetlands.	8/2/2024 11:42 PM
176	Existing areas of non-residential community spaces, e.g. restaurants, shops, meeting spaces, gardens, etc., that are a reasonable walking/biking distance from homes	8/2/2024 3:13 PM
177	Parks and trails for the community	8/1/2024 12:31 PM
178	Farm land	7/31/2024 11:31 AM
179	Bigger natural landmarks such as lakes, river beds, and heavily, dense, forested areas far outside the current developments	7/31/2024 8:37 AM
180	Continued preservation of natural spaces such as Metro has been doing.	7/30/2024 7:44 PM
181	nature, forests	7/30/2024 2:53 PM
182	The livability of the area. Which would not include expanding the area without an adequate transportation system. Travel times on I-5 and 99W that include Sherwood have almost doubled in the last 20 years.	7/30/2024 8:55 AM
183	It is sad to see all the apartment buildings being constructed with little or no greenspace planned into the designs. People living in apartments need nature too!	7/30/2024 8:22 AM
184	character in neighborhoods and diverse housing options	7/30/2024 7:14 AM
185	Accessible commercial and residential spaces for people with mobility issues. Affordable housing. More public trash cans. More parking.	7/29/2024 11:37 PM
186	Areas con naturaleza,transportación pública.	7/29/2024 7:21 PM
187	Access to natural areas, close to the city. Green space amidst population growth.	7/29/2024 11:48 AM
188	Stafford Area- A regional Climate Action Plan should be developed. Area is surrounded by 4 of the top 5 greenhouse gas emitters in the region. Stafford is the "ONLY" open space area that would be a GREAT carbon sequestration sink. Council are on board with this.	7/29/2024 9:35 AM
189	green spaces, old growth trees, wildlife habitat, peaceful surroundings	7/29/2024 7:48 AM
190	NO SPRAWL, MORE DENSITY	7/28/2024 12:50 PM
191	Rural areas outside the urban growth boundary. Walkable/bikable neighborhoods within the urban area.	7/28/2024 8:34 AM
192	Natural áreas, forest, farmlands	7/28/2024 8:26 AM
193	I want to be able to leave the metro with a short 20 minute drive. I don't want so much congestion that I cannot leave the city/suburbs in a reasonable amount of time.	7/25/2024 7:17 PM
194	Strong neighborhoods, nice parks for recreation	7/24/2024 5:33 PM
195	Wise planning for growth, taking into consideration needs and protecting farm land and natural resources.	7/24/2024 3:55 PM
196	The opportunity to produce housing as inexpensively as possible to keep housing affordable for all regional residents.	7/24/2024 11:56 AM
197	Our current UGB. Enough sprawl. I left San Diego 16 years ago because sprawl ruined California. Let's not repeat that mistake here.	7/24/2024 7:32 AM
198	Forest/habitat for animals	7/24/2024 12:10 AM
199	Good jobs, all kinds of housing options that are attractive and safe, parks, agriculture and businesses to employ people so that we can manufacture top-notch goods in Oregon.	7/23/2024 9:20 PM
200	Denser development	7/23/2024 8:54 PM
201	Create access to good housing in good neighborhoods. Overall preserving existing neighborhood communities and enabling good communities for the future.	7/23/2024 8:30 PM
202	I want to preserve our region's phenomenally productive farm and forest land, which we have tragically failed to do in the face of exclusionary, detached single family home mandates, particularly though not exclusively in suburban areas.	7/23/2024 6:39 PM

203	Vacant land	7/23/2024 6:19 PM
204	Property rights and value	7/23/2024 3:19 PM
205	The historic human scale neighborhoods left from the old streetcar network, small city blocks, mixed use and multi family housing	7/23/2024 3:14 PM
206	Low traffic around Farm/Agriculture areas, due to animals, crops and machinery.	7/23/2024 2:12 PM
207	agricultural land and nature habitat	7/23/2024 12:06 PM
208	Farmland. We need LOCAL food sources.	7/23/2024 11:17 AM
209	Farmland and rural areas at risk of development	7/23/2024 2:36 AM
210	Environment especially our tree canopy	7/22/2024 3:06 PM
211	I want to see med-high density housing to be prioritized over single family lots	7/22/2024 6:07 AM
212	Natural beauty	7/21/2024 12:16 PM
213	Wildlife habitat	7/21/2024 10:35 AM
214	Green space	7/21/2024 9:49 AM
215	The area is losing residents. There's no reason to extend the growth boundary.	7/21/2024 9:00 AM
216	Urban growth boundaries	7/20/2024 9:12 PM
217	The forests and natural ecosystems	7/20/2024 8:57 PM
218	Our urban growth boundaries should be permanently locked in place. Any growth should occur in existing urbanized land; in other words, densify, densify, densify.	7/20/2024 7:38 PM
219	Public spaces	7/20/2024 10:41 AM
220	I want to continue to see communities that provide great access to natural areas, preferably within a short walk or bike ride for most residents. I think our parks are some of our most valuable resources and they contribute so much to the health of the community.	7/20/2024 9:28 AM
221	Park land and the proximity to natural spaces (farms, forests, etc).	7/20/2024 7:41 AM
222	As much uninhabited natural habitat as possible. Including undeveloped riverfronts and other areas adjacent to waterways. Bring back the wetlands of Portland.	7/20/2024 12:38 AM
223	Natural/green spaces.	7/19/2024 4:15 PM
224	The ability to escape the urban and suburban area in a short distance.	7/19/2024 2:06 PM
225	Washington Park, Forest Park, alongside all of our other parks in Portland.	7/19/2024 12:40 PM
226	Agricultural land should not be re-zoned without the owner paying the net back taxes instead of receiving a windfall.	7/18/2024 9:44 PM
227	Green spaces.	7/18/2024 12:03 PM
228	Farm & forest. No expansion to the UGB.	7/18/2024 10:20 AM
229	Tree canopy, green spaces, floodplains. Tree canopy is the most important.	7/18/2024 6:16 AM
230	Rivers and streams, watersheds, and walking paths that provide access for all	7/17/2024 11:12 PM
231	Green space , fields, undeveloped land!!	7/17/2024 6:04 PM
232	Wetlands, riparian areas, forest tracts	7/17/2024 2:18 PM
233	Our land	7/17/2024 2:00 PM
234	Portland's commitment to creating dense, efficient, and affordable housing where people want to live.	7/17/2024 9:20 AM
235	nature	7/17/2024 1:16 AM
236	Farmland when possible	7/16/2024 11:18 PM

237	Farm and forest areas	7/16/2024 8:46 PM
238	The core downtown businesses and restaurants as well as the neighborhood restaurants and small businesses	7/16/2024 8:44 PM
239	Protect farms, forest, rural areas, quality of life, and our smaller urban footprint	7/16/2024 8:26 PM
240	Green spaces	7/16/2024 6:51 PM
241	Trees and natural spaces	7/16/2024 6:26 PM
242	Natural areas of forest, marshes, and waterways that help absorb lower the intense heat of summer and absorb the extreme rain events we have been experiencing.	7/16/2024 5:52 PM
243	Open spaces, green space.... Just because people want to move here does not mean we need provide it	7/16/2024 12:20 PM
244	Housing Variety and natural resources.	7/16/2024 10:24 AM
245	Police presence/relationships with all community members to keep our city safe	7/16/2024 8:09 AM
246	Parks and Trails	7/16/2024 8:00 AM
247	Low cost homes	7/15/2024 10:34 PM
248	Portland isn't necessarily growing. The growth assumption relies on more in-migration than out-migration, not the case recently. Portland needs to contain and preserve METRO borders. Do not build on more farmland just because it is easy. Re-develop, re-purpose, re-use existing real estate...land and buildings.	7/15/2024 8:39 PM
249	As much forest and wetlands as possible.	7/15/2024 7:50 PM
250	Space for wildlife: safe places for birds, forested areas, wetland, river access, etc. I hate watching wildlife be killed or relocated because we don’t leave them space in our communities to live.	7/15/2024 7:17 PM
251	Our small cities and metro to be dissolved	7/15/2024 6:47 PM
252	Portland is a city of neighborhoods - I want that amazing diversity and sense of wonder (one experiences) kept (not preserved - like jam) and CELEBRATED!	7/15/2024 6:41 PM
253	Open spaces, the integrity of old neighborhoods- historic ones in particular, balance of low income to market rate to high end market rate- in other words a balance that includes all demographics, easily walkable and access to shops, schools, work, safety, safe and beautiful public spaces	7/15/2024 5:54 PM
254	Housing affordability and a strong economy	7/15/2024 5:28 PM
255	Habitat and habitat connectivity... keeping the 30 by 30 vision in mind (conserving 30% of the land by 2030)	7/15/2024 5:22 PM
256	Affordable single family housing	7/15/2024 5:19 PM
257	Forest. More TREES!!	7/15/2024 5:12 PM
258	Save the old historic houses	7/15/2024 4:37 PM
259	Safe cities, funded schools, managed traffic flow	7/15/2024 4:03 PM
260	Open spaces, farmland, winery areas, forested areas	7/15/2024 3:31 PM
261	The small town feel of my City (Tigard). I want to preserve the LACK OF homeless camps taking over our streets, parks and public spaces. I want to preserve the conservative values of neighborhoods, family and community vs. ushering in progressive and liberal ideologies.	7/15/2024 3:25 PM
262	Existing oatks	7/15/2024 3:00 PM
263	Our community. I do not want to service homeless in the “greater” area.	7/15/2024 2:52 PM
264	Green space	7/15/2024 2:38 PM
265	balance and faster decision making for UGB expansion	7/15/2024 2:14 PM

266	Old building, architecture and history preserved...	7/15/2024 1:45 PM
267	Existing wild places, farm land and native areas	7/15/2024 1:41 PM
268	DON'T mix farm land with subdivisions…. It's hard enough to farm without traffic making moving equipment harder. And the commuters are so angry at them being on the road….	7/15/2024 1:35 PM
269	Access to parks, forests, trails and biking infrastructure.	7/15/2024 1:17 PM
270	Agricultural land and wilderness. Discourage sprawl and residential that requires automobiles as the primary or only source of access.	7/15/2024 1:12 PM
271	Clean up Portland before spreading outwards to further communities!	7/15/2024 1:11 PM
272	Access to nature, clear difference between urban and nonurban.	7/15/2024 12:58 PM
273	Farm land.	7/15/2024 12:47 PM
274	Forests and farms	7/15/2024 12:44 PM
275	Forests and nature areas to protect animals	7/15/2024 12:41 PM
276	The ability to get outside the city boundaries within a short amount of time. Keep the boundary where it is and preserve the surrounding farmland and wide open spaces.	7/15/2024 12:40 PM
277	Habitat connectivity and opportunities for people to connect to nature close to where they live.	7/15/2024 10:53 AM
278	Urban growth boundary (PLEASE PREVENT SPRAWL!), parks, natural areas, bike paths	7/15/2024 10:35 AM
279	Vibrant, dense urban neighbors, along with green spaces.	7/15/2024 9:56 AM
280	Green space in the form of parks inside the UGB.	7/15/2024 7:25 AM
281	Trees and parks	7/15/2024 6:59 AM
282	Parks, greenspace, forests.	7/15/2024 6:34 AM
283	Middle income housing. Don't expand the boundary for McMansions.	7/15/2024 6:07 AM
284	Vulnerable ecosystems and natural areas.	7/15/2024 12:26 AM
285	Nature, local communities, and parks.	7/14/2024 9:17 PM
286	I want to ensure existing small businesses and minority-run businesses are preserved. I want minority neighborhoods to be preserved and not gentrified or torn down. I want to preserve nature and existing waterways.	7/14/2024 9:11 PM
287	Land. Farm fields. Country. Acres	7/14/2024 7:33 PM
288	Our natural and agricultural land outside city boundaries.	7/14/2024 6:14 PM
289	Green spaces for all	7/14/2024 5:37 PM
290	Water and land	7/14/2024 5:29 PM
291	Community	7/14/2024 5:15 PM
292	Greenways along waterways and ridgelines. Nature parks at major high points. High value agricultural land in WashCo and ClackCo.	7/14/2024 3:55 PM
293	Rural communities and farming communities.	7/14/2024 3:35 PM
294	Less growth, more green space and trees	7/14/2024 3:25 PM
295	I would like to see greenspaces preserved. I want my children to continue to see wetlands and the plentiful creatures that live there. I'd like to see the beauty of our area maintained.	7/14/2024 2:16 PM
296	Green areas, envrionment protected, private forests protected and waterways protected.	7/14/2024 1:53 PM
297	Forests and farmlands.	7/14/2024 12:58 PM
298	Green space.	7/14/2024 12:44 PM
299	Farm lands and agriculture	7/14/2024 12:12 PM

300	I would like to see our growth boundary remain the same, as the region has plenty of land that already sits empty, or ripe for redevelopment.	7/14/2024 11:25 AM
301	Farmland, rural areas, trees I want to keep these small communities small.	7/14/2024 11:24 AM
302	Our small community size of sherwood	7/14/2024 11:19 AM
303	Sherwood as a smaller town.	7/14/2024 11:16 AM
304	Land	7/14/2024 10:48 AM
305	Agriculture and farm land	7/14/2024 10:28 AM
306	Small towns stay small towns. Water in the hills is already becoming scarce.	7/14/2024 10:25 AM
307	Green space, farming communities, small towns	7/14/2024 10:13 AM
308	Farmland, agriculture and green spaces	7/14/2024 10:03 AM
309	Farms.	7/14/2024 9:43 AM
310	Wetland, existing forest, prairie, agriculture.	7/14/2024 9:25 AM
311	Not allowing transients and pan handlers in our nice city. Less small cheap housing.	7/14/2024 8:43 AM
312	Safe and pleasant biking and walking in all neighborhoods. Opportunities for neighbors to be together outside.	7/14/2024 8:17 AM
313	Stop the sprawl. Look to Los Angeles to see the negative affects. There needs to be balance.	7/14/2024 8:06 AM
314	Increase density while preserving existing greenspace	7/14/2024 12:07 AM
315	Green space, forest lands, infrastructure in existing neighborhoods.	7/13/2024 10:53 AM
316	Diversity in architecture, close attention to public transportation development	7/12/2024 11:40 PM
317	I love that Portland has beautiful nature very close to the metro area limits. It's always heartbreaking to see nature torn down and continue urban sprawl. I saw this first hand in Tigard near Roy Rogers and scholls ferry. I also really like how the Portland area doesn't feel like it has crazy urban sprawl and that you can get through the city quickly. Other cities with large urban sprawl that come to mind are phoenix, Denver, and LA. I don't want Portland to be anything like those cities.	7/12/2024 8:13 PM
318	Access to natural areas.	7/12/2024 7:47 PM
319	Transit access, bike lanes, sidewalks, neighborhood density, mixed use zoning	7/12/2024 6:10 PM
320	farmland	7/12/2024 5:31 PM
321	As a working commuter from Sherwood to Portland - there is nothing of value to preserve.	7/12/2024 1:10 PM
322	Population density and shared public spaces	7/12/2024 12:14 PM
323	Preserve park spaces, natural ecosystems, walkability/access to public transport.	7/12/2024 7:47 AM
324	Access and proximity to nature, metro in places and Sherwood itself especially have done well at incorporating/mixing natural area into its development, this should not falter and maybe even should improve and expand some.	7/12/2024 7:15 AM
325	Green spaces and parks, nature trails / natural areas, low-height buildings.	7/12/2024 7:12 AM
326	Wildlife corridors and community spaces.	7/12/2024 12:22 AM
327	Nature! Please keep the city from expanding even more in unsustainable ways.	7/11/2024 11:52 PM
328	Nature. Expanding the urban growth boundary negates needed commitments to mitigate climate change and stop ecosystem destruction. Leave land untouched, humans are not the only creatures entitled to the Earth and this land in particular.	7/11/2024 10:31 PM
329	Our green spaces. The thing that makes this place desirable (and livable as the climate warms) is our older growth wild spaces. Single family homes are not needed as much as shared green spaces.	7/11/2024 6:57 PM
330	The trees, farmland, natural areas, and historic pre-WW2 elements of our built environment	7/11/2024 6:12 PM

	that remain.	
331	Farmland and natural areas.	7/11/2024 4:27 PM
332	The semi-rural aspect of life on the outskirts of the UGB.	7/11/2024 10:33 AM
333	Forests, rural areas, non developed land outside the urban boundary	7/10/2024 10:14 PM
334	Agriculture land	7/10/2024 9:51 PM
335	Single Family Housing with a yard	7/10/2024 8:30 PM
336	Abundant close natural areas. Stewardship of those areas.	7/10/2024 5:14 PM
337	Natural areas and green spaces. Valuable historic buildings and community buildings.	7/10/2024 12:08 PM
338	The beauty and tranquility of the countryside of west Sherwood needs to be preserved. We don’t need any more subdivisions nor apartments out here.	7/9/2024 9:48 PM
339	The ability of local governments to be able to make decisions in their own cities best interest. Free of regional and state government interference. There are plenty of general guidelines in place.	7/9/2024 3:43 PM
340	individual livability, nature, neighborhoods, small businesses, small scale schools and other public facilities, good jobs, happy people and families,	7/9/2024 3:15 PM

Q2 What changes would you like to see as greater Portland continues to grow?

Answered: 340 Skipped: 25

#	RESPONSES	DATE
1	Infrastructure to support the insane influx of people. Traffic is horrific, the building is out of control, and people who have lived here longer than 20 years cannot afford to live here any longer. PDX is no longer amenable to folks, do something about the homeless issue and put checks in place on overdevelopment without infrastructure development.	8/23/2024 10:06 AM
2	More affordable housing	8/22/2024 9:51 PM
3	Less attention to Metro and more attention to individuals	8/22/2024 9:44 PM
4	I'd like to see more affordable housing options integrated into all neighborhoods, better access to public transportation, and the creation of inclusive community spaces that reflect and support the diversity of the Portland metro area.	8/22/2024 9:42 PM
5	Lower density housing w/larger lots	8/22/2024 9:38 PM
6	Growth for the people, not for the developers	8/22/2024 7:24 PM
7	More awareness and protection of our green spaces. The way to do this is NOT by these large swaths of land covered by cookie cutter housing with no yards or trees. So much of our agricultural land has already been covered with these. It needs to stop!	8/22/2024 6:57 PM
8	Less new houses and empty business buildings	8/22/2024 6:51 PM
9	Greater density, more mass transit	8/22/2024 6:46 PM
10	Road improvements	8/22/2024 6:44 PM
11	Stop the sprawl. Start building up not out. Use the land and vacant buildings already in existence! Less property taxes!!!	8/22/2024 6:29 PM
12	Less industrial. Warehouses continue to be built even though there is a plethora of empty warehouse space. The existing warehouse space should be utilized prior to any further construction, or permits for that matter, proceed.	8/22/2024 6:28 PM
13	Allow our region to be nimbler in addressing current and future housing and employment needs.	8/22/2024 6:06 PM
14	Revitalize urban areas that are abandoned and deteriorating areas.	8/22/2024 4:57 PM
15	Family Housing next to and adjoining parks and wetland areas.	8/22/2024 4:38 PM
16	Greater consideration of door to door transportation needs.	8/22/2024 1:13 PM
17	Implementation of plans to handle increased traffic that comes with development.	8/22/2024 11:42 AM
18	More infill housing in high opportunity areas so that Portlanders aren't priced out to the edges of the city. More investment in public and active transit infrastructure.	8/22/2024 11:39 AM
19	Not burdening the existing property owners with the infrastructure improvements and additional schools needed for those that don't even live here (yet).	8/22/2024 10:11 AM
20	Greater density and infill, especially such that it creates mixed-income buildings and communities	8/22/2024 10:08 AM
21	I would like to see underutilized or unused land and buildings be repurposed vs. continued sprawl into the countryside.	8/22/2024 2:52 AM
22	Smart density that positively impacts social predictors of health and safety	8/21/2024 11:09 PM
23	There should be better thought out investment in our transportation network. Prioritize auto traffic with high capacity, attractiveness, and generous amounts of off street bike routes. Pay	8/21/2024 10:52 PM

	attention to existing traffic patterns and work to make them more efficient.	
24	More density, more abundant infill housing, investment in transit so areas like Sherwood are reachable from areas like Gresham.	8/21/2024 10:47 PM
25	Homelessness and crime crack down	8/21/2024 9:32 PM
26	I would like to see a ton more infill. there are a lot of brownfield opportunities and a lot of neighborhoods that could thicken-up and benefit the existing residents as well as new ones	8/21/2024 8:16 PM
27	I would like to see policies enacted that are mindful, of and protect, the environment.	8/21/2024 6:06 PM
28	More recognition of climate changes needs in planning. We need local resources for food.	8/21/2024 5:50 PM
29	Higher density within the UGB to limit the cities impact on the environment and increase the city’s tax revenue per acre.	8/21/2024 4:55 PM
30	More affordable housing.	8/21/2024 4:22 PM
31	I would prefer growth happen through infill and greater density than the sprawling developments currently threatening our ag ground and green spaces.	8/21/2024 3:40 PM
32	More focus on reducing traffic that is not just adding public transit or tolls. With so much high-density development going in, it's becoming worse and worse everyday. Figure out and invest in roadways that make sense instead of just assuming people will take public transit. Or actually make our light rail more useable/high-speed...it takes 45 min to go from Beaverton transit center to PGE park. If we actually had express rail, I think more professionals and commuters would consider railway.	8/21/2024 2:58 PM
33	Increased density, transit, walking and biking infrastructure. "Baseline analysis conducted for this Urban Growth Report reveals that there is likely room to accommodate most, if not all, of the region’s existing and future housing needs inside the existing UGB for the next 20 years. "	8/21/2024 2:35 PM
34	Transportation options that efficiently use current and practical evolving modes of transportation. As an example, I do not want to see another bridge project (such as the Tillicum Crossing) that, through social engineering, only provides for a very small percentage of the population.	8/21/2024 10:54 AM
35	Road and traffic improvements.	8/21/2024 8:33 AM
36	Less government	8/21/2024 7:10 AM
37	Roads that are designed to alleviate congestion. Sherwood is small town but I sit in traffic a lot. There should be a traffic light at Chapman Rd and Hwy 99.	8/20/2024 11:35 PM
38	Redeveloping existing underutilized urban areas.	8/20/2024 7:43 PM
39	More safety. Traffic ease. High paying jobs so people here don't need to travel so far to work.	8/20/2024 6:24 PM
40	I would like to see revitalization of already developed areas.	8/20/2024 6:21 PM
41	I would like to see more critical thought in regards to expanding the UGB.	8/20/2024 6:19 PM
42	Less industrial near neighborhoods	8/20/2024 5:00 PM
43	better use of land already within the existing urban growth areas	8/20/2024 4:55 PM
44	Traffic congestion considered more intensly when developing neighborhoods	8/20/2024 4:53 PM
45	Urban growth expansion	8/20/2024 4:49 PM
46	thoughtful expansion rather than what is happening in Sherwood. The Sherwood proposal is way too large for a city of this size and encroaches on native habitats and pristine farmlands.	8/20/2024 4:48 PM
47	Is it truly growing or are we just following the money?	8/20/2024 4:25 PM
48	Smaller pockets of houses instead of mass acres of land covered with housing	8/20/2024 4:20 PM
49	Restoration of life in Portland's downtown core, the heart of greater Portland.	8/20/2024 4:18 PM
50	Again, more public comment, too many developers s d city councils looking for a tax base are driving decisions related to the UBB	8/20/2024 4:10 PM

51	Encourage and support business placement in downtown Portland area in order to utilize already existing business areas. Preserve rural areas and Oregon farming families.	8/20/2024 4:03 PM
52	Keep industrial in industrial areas and residential in residential areas, and do not invade the agricultural reserves	8/20/2024 3:52 PM
53	adequate roads, more dense housing, affordable housing	8/20/2024 3:52 PM
54	More infill and creative uses of office buildings and abandoned warehouses	8/20/2024 3:46 PM
55	Increased public transportation	8/20/2024 3:46 PM
56	housing to be more affordable, transportation system that works	8/20/2024 3:31 PM
57	Better review, consideration and preservation of agricultural land in the metro area for growth. The building and growth has not kept pace with our current resources, infrastructure and good land use management and planning.	8/20/2024 2:53 PM
58	Dedicated transportation corridors to expedite commerce, e.g., Tualatin Sherwood Rd. should have limited intersections and bypass Tualatin	8/20/2024 2:01 PM
59	focus on preservation of agricultural lands	8/20/2024 1:47 PM
60	Affordable housing, green spaces	8/20/2024 10:54 AM
61	Better planning (including securing funding and complete transparency about costs to the tax payers) for traffic changes BEFORE developments are allowed	8/20/2024 9:44 AM
62	Better investments in rail passenger transit and a long-term regional passenger rail plan so that new developments can include TOD. The region's investment in passenger rail has stalled.	8/19/2024 6:09 PM
63	Better infrastructure and condensed housing within already developed community areas	8/19/2024 12:45 PM
64	Increased urbanization, density, and density within non-Portland downtowns especially.	8/19/2024 12:05 PM
65	More dense housing, less car-centric developments	8/18/2024 11:22 PM
66	Denser housing and more public transit	8/18/2024 10:17 PM
67	Build up, not out. Nobody is asking for Sherwood West. It’s unnecessary sprawl that will compound the existing transportation issues of the Southwest Corridor.	8/18/2024 9:24 PM
68	Increase density within 1 mile around our frequent bus services and super dense high rises adjacent to our MAX stops. We need to build more inside the UGB.	8/18/2024 8:37 PM
69	Greater density of housing and amenities	8/18/2024 8:30 PM
70	Slow down the growth, get the traffic under control. From Sherwood it used to take me 50 minutes to the airport, now almost 2 hours. They need to fix the roads before adding more houses	8/18/2024 7:01 PM
71	Greater density and better transit connections through the Portland metro area. Interesting walkable neighborhoods that develop culture and community.	8/18/2024 5:10 PM
72	Densification of the city and its surrounded suburbs. If we want to retain the livability of the region by getting people to use alternate forms of transportation we need to continue to enforce the UGB	8/18/2024 3:42 PM
73	Better highways and main roads	8/18/2024 3:25 PM
74	Less urban sprawl, more density	8/18/2024 2:37 PM
75	More infill housing, fewer cars, more trains, buses, and protected bike lanes with bollards.	8/18/2024 2:25 PM
76	Better high capacity transit, density, less spawl. Municipalities should backfill, densify, and remove parking lots before being granted more land to sprawl out.	8/18/2024 2:25 PM
77	More density along transit corridors	8/18/2024 1:35 PM
78	Improved public transportation. Use existing land already inside UGB.	8/18/2024 1:21 PM
79	Stop trying to make everything part of Portland. Individual communities have their OWN rich history and connections. We are not just Portland's little subsets to absorb and use as needed	8/18/2024 1:20 PM

	by metro.	
80	Denser, smart land use of the existing UGB.	8/18/2024 1:11 PM
81	More density and better transit	8/18/2024 12:49 PM
82	Road expansion first!	8/18/2024 12:29 PM
83	Reducing the massive barriers to infill housing, and an end to frequent UGB expansions for suburban housing.	8/18/2024 11:49 AM
84	Infill, improved land-use, and no further sprawl.	8/18/2024 11:27 AM
85	The existing empty structures being utilized.	8/18/2024 10:00 AM
86	Protect farm land, while also providing more reasonably priced homes. And the infrastructure to support the housing.	8/18/2024 9:40 AM
87	Stop the dense housing if so called affordable housing that is NOT affordable!	8/18/2024 7:48 AM
88	Is Portland really growing?	8/18/2024 7:19 AM
89	Less focus on high density housing and Multifamily apartment living. Focus on using what is not used properly at this time within the boundaries just growth potential and forecasting/opportunity does not require tax payers to accommodate without due diligence to preserve and repurpose the existing land and structures available.	8/18/2024 7:08 AM
90	Fewer large subdivisions with houses stacked on top of each other. Proper roads and sidewalks paid for by developers	8/18/2024 6:28 AM
91	Well thought out and sustainable plans, ways to arrange cities to minimize traffic rather than continuing to expand roads.	8/18/2024 1:08 AM
92	More public transportation	8/17/2024 8:46 PM
93	New housing should be built on a variety of lot sizes rather than only very small lots	8/17/2024 2:48 PM
94	The greatest need that we have in Sherwood, is affordable housing for young families and seniors. We need to get creative in what we build in Sherwood. We do not have the infrastructure to support dense housing except right next to 99. And even then we don't have any transportation hubs. People move to Sherwood to feel like they're in the country a bit.	8/17/2024 9:10 AM
95	Preserve our important farmland and forest- less massive homes, more urban density and the public transport to support it.	8/17/2024 8:27 AM
96	Keeping our small cities small and rural.	8/17/2024 8:02 AM
97	Focus on density, not expansion out. And a priority on affordable housing, not larger single family homes.	8/17/2024 5:18 AM
98	Roads and traffic control	8/16/2024 11:03 PM
99	More space for more single family homes. Prices will go down and more people can live in our beautiful state. Also bigger roads and more infrastructure	8/16/2024 9:55 PM
100	Improve infrastructure such as roads bridges	8/16/2024 9:31 PM
101	I am against adding housing in areas that are already congested. I am also opposed to adding housing in areas currently designated as farmland	8/16/2024 4:23 PM
102	The elimination of urban sprawl and the protection of our natural resource environments	8/16/2024 4:23 PM
103	Portland is not growing. More people have moved out of Portland and Oregon than have moved in over the last couple years.	8/16/2024 11:44 AM
104	keep high density housing near Portland/metro cities downtown areas, better public transportation, less traffic	8/16/2024 7:35 AM
105	Adequate infrastructure planning to accommodate for necessary growth. More willingness from local jurisdictions to work with investors and developers to master-plan communities that allow for greater (& smarter) population growth.	8/15/2024 1:41 PM
106	Improved infrastructure needs to be established before any expansion in development needs to	8/15/2024 12:15 PM

	take place.	
107	Push Eastward and now Westward	8/14/2024 1:08 PM
108	Urban grown boundaries reduced to a lower rate, use land more efficiently for housing and roads.	8/14/2024 7:01 AM
109	There are plenty of homes and industrial properties without adding more homes and spreading more	8/14/2024 6:25 AM
110	Increased lanes on throughways and highways.	8/14/2024 5:31 AM
111	I would like to see further vertical growth in the current urban boundary as the infrastructure for the surrounding area isn't meant to support the proposed growth.	8/13/2024 10:06 PM
112	More forests, trees planted and LESS ticky tack multifamily housing put in.	8/13/2024 8:58 PM
113	Better handling of traffic congestion and improved caretaking of our nature and our green spaces.	8/13/2024 7:54 PM
114	less traffic	8/13/2024 4:45 PM
115	Use preexisting empty buildings vs clearing areas for new construction	8/13/2024 4:06 PM
116	Slowing down the expansion of large commercial facilities, industrial parks etc., that sit vacant for so long.	8/13/2024 3:46 PM
117	address congestion	8/13/2024 3:29 PM
118	Defund Metro	8/13/2024 1:58 PM
119	Maintain existing roads, less traffic, use abandoned buildings, industrial and commercial to be converted into housing instead of taking away more land.	8/13/2024 12:55 PM
120	Think about what your taking away from the community as you think your just building a community and the reasons people wanted to move to sherwokd to begin with isn't what sherwood is anymore. We used to be a rural close knit community filled with farms and hard working farm families. Those are less and less every year and it's just becoming another suburban area filled with homes and shopping. We've lost what sherwood is all about.	8/12/2024 6:13 PM
121	A road system developed to meetnot automobile traffic demands and less compromised for biking.	8/12/2024 5:29 PM
122	more mixed use developments so that people can enjoy amenities like shopping and restaurants right outside their front door	8/12/2024 4:56 PM
123	A new Max line along Sunset Hwy west from transit center to Banks	8/12/2024 4:44 PM
124	Less people less traffic, tougher on crime.	8/12/2024 10:01 AM
125	I want to see less growth, less homeless, and more crack down on crime. This would help clean up Portland and get it back to its natural beauty!	8/12/2024 7:23 AM
126	Encourage bike and walkable neighborhoods. Lessen car use. Density not sprawl. I think Orenco is a good model with green neighborhood spaces. Porches that face on another. Cars behind the houses to promote community.	8/11/2024 10:45 PM
127	THOUGHTFUL development with appropriate infrastructure… no more low cost developments of poor quality buildings that still fail to provide truly affordable housing. Build to meet the population's demands, not to put money in the pockets of developers	8/11/2024 8:32 PM
128	LESS HOMELESS, LESS CRIME, just non of that. Ya no mas indigentes peligrosos, ni crímenes. Menos fourplex. Mas edificios de 10 pisos con ZONA VERDE Y ÁRBOLES.	8/11/2024 2:32 PM
129	Less density. Better traffic planning. Major arteries in Sherwood now are overloaded with cars	8/11/2024 10:27 AM
130	As a lifelong Oregonian, I have generally been in favor of land use planning. I believe, however, at times the process has been too restrictive. For example, the report acknowledges that there is a lack of appropriate industrial land, even though the available land is within projected needs. Leaning towards the high side of projections could also more than offset demand, thereby helping with affordability.	8/11/2024 8:18 AM

131	More housing and more land available for more single family housing.	8/10/2024 11:46 AM
132	More green and open spaces	8/10/2024 10:36 AM
133	More open space and preservation of agricultural and forest land.	8/10/2024 9:58 AM
134	Sensible development	8/10/2024 7:37 AM
135	More safe parks and recreation opportunities. Affordable housing to OWN, not rent.	8/9/2024 11:15 PM
136	Less density	8/9/2024 6:07 PM
137	Allow more parking	8/9/2024 5:50 PM
138	Much has been said about the need for more housing such as multiple dwelling units where high density can be capitalized. There needs to be a balance between more housing, preservation of existing rural land uses and lifestyles. The question is how much more housing is actually needed with its impact on roads, public service infrastructure such utilities, water, sewage, etc coupled with the total financial resources that will be passed on to the taxpayers.	8/9/2024 11:13 AM
139	Less density in housing development.	8/9/2024 9:51 AM
140	Stop expanding and use what you already have. This includes proper planning so we are not stuck with traffic in 5-10 years, farmland reserves.	8/9/2024 9:32 AM
141	More high density, affordable living spaces with the existing urban growth boundary.	8/9/2024 6:58 AM
142	Less people moving here	8/8/2024 9:04 PM
143	Keeping nature	8/8/2024 8:18 PM
144	Greater Portland should not grow until Portland is cleaned up and managed properly.	8/8/2024 7:45 PM
145	Fill in. Focus on Multifamily. You'll have more than you need as BBs downsize or die.	8/8/2024 7:45 PM
146	To start and continue rejuvenating the downtown or existing empty buildings	8/8/2024 7:28 PM
147	Less new housing	8/8/2024 7:19 PM
148	More density, less sprawl	8/8/2024 7:05 PM
149	Stop spreading into agricultural/forested lands	8/8/2024 6:28 PM
150	Keep land as is no more commercial growth	8/8/2024 6:24 PM
151	More freedom with offers by the constitution. More police, fewer taxes and voting in person with a government photo document.	8/8/2024 5:38 PM
152	improve the roads before development occurs	8/8/2024 3:43 PM
153	I would like to see people buy homes and not hedge funds. We don’t need more new construction homes, we need to promote homeownership and upkeep in already established communities	8/8/2024 1:58 PM
154	Transportation connectivity prioritized to help mitigate congestion on arterial roadways.	8/8/2024 1:04 PM
155	less homeless camping on public and private land.	8/8/2024 12:02 PM
156	Better roads	8/8/2024 11:42 AM
157	Better road conditions, and not much more than that. Sick of the high rise homes, and the SAME stores/eateries in every strip mall. But that is our of your control.	8/8/2024 11:42 AM
158	We need to make it legal to thicken up our existing neighborhoods in an incremental and productive way rather than bankrupting our communities on unsustainable growth patterns that we can't maintain.	8/8/2024 11:25 AM
159	Repurpose buildings in Portland & other areas	8/8/2024 11:04 AM
160	Not to add more land around Sherwood	8/8/2024 10:47 AM
161	Stop adding more homes to cities where the traffic is already a nightmare, like Wilsonville	8/8/2024 10:12 AM
162	Expand freeway lanes	8/8/2024 9:54 AM

163	More consideration to how the growth effects our rural communities and small family farms that feed our community	8/8/2024 9:42 AM
164	Really thinking through the big picture. Not pressured by builders for $$. Infrastructure, road improvements for capacity, sidewalks, parks, natural areas. Not all filled in	8/8/2024 9:37 AM
165	Fix Portland and all their issues by helping rebuild and develop more businesses. Sherwood doesn't need Metro because we have grown more than what is acceptable and Metro needs to stay out of our part of the world.	8/8/2024 8:49 AM
166	That's some video officials. Don't make it all about getting more tax money and leave some of the spaces as they are.	8/8/2024 7:14 AM
167	Maintaining Oregon's natural beauty by NOT having tons of concrete and strip malls.	8/7/2024 11:21 PM
168	Increase urban density. Build/create more housing connected to transportation.	8/7/2024 8:39 PM
169	greater use of land currently available within UGB (example infill current space vs expansion)	8/7/2024 8:21 PM
170	less traffic, preservation of UGB, improvement of downtown portland the way it was before 2020	8/7/2024 7:57 PM
171	More leadership by people of color, in elected and also executive leadership at Metro	8/7/2024 4:34 PM
172	More efficient use of land close to job centers. I'm surprised there is still farmland inside of I-205. Also, I would like to see a bridge over the Willamette between Oregon City and Wilsonville, and a bridge over the Columbia east of I 205. Nice job with the new recreation area Chahalem Ridge.	8/3/2024 8:26 PM
173	Less homeless, legalized prostitution, bike lanes everywhere	8/3/2024 3:14 PM
174	Cited above...more housing within UGB; build up/onto current buildings, golf courses, unused land, homes, convert hotels/motels, revitalize areas inside the city, promote ADUs, offer incentives etc.	8/3/2024 12:50 PM
175	Better transportation system, specifically an I-5 to OR 99W connector between Wilsonville (or just north of), and to the south of Sherwood. Preferably an expressway.	8/2/2024 11:42 PM
176	Less car-dependent development. More new gas stations and charging stations. More small neighborhood markets. Building that is not just residential homes. The more new homes, the more new amenities needed to go with them. Otherwise it creates traffic and time bottlenecks.	8/2/2024 3:13 PM
177	A west side highway should be built, mirroring 205. Too much traffic burden is put on 217 and roads like Roy Rogers	8/2/2024 12:30 PM
178	I would like to see the ability for more PUD subdivisions, a break up of housing within a subdivision. Rather than throwing all townhomes in an area it would be nice to allow for open space, different product types, and community areas.	8/1/2024 12:31 PM
179	Use of more brownfields and infill. Replace single story multi family homes with multi story homes	7/31/2024 11:31 AM
180	Bigger tax lots. No one wants to live in a match box. I would pay MUCH higher purchase prices to have a quality property.	7/31/2024 8:37 AM
181	"Middle housing", which allows more housing within defined spaces in the city as well as in the suburban areas. Include some green areas for multiple unit buildings, e.g. courtyards.	7/30/2024 7:44 PM
182	more preservation of nature and fish and wildlife habitat	7/30/2024 2:53 PM
183	Really plan for future growth. Especially guaranteeing there is adequate infrastructure to support the past, currnet, and future growth.	7/30/2024 8:55 AM
184	Improved street designs clearing the hazards of parked cars and narrow lanes.	7/30/2024 8:22 AM
185	Less focus on density. More focus on asthetics/attractive neighborhoods	7/30/2024 7:14 AM
186	More parking in commercial areas and in new buildings. Accessible commercial and residential spaces for people with mobility issues. Reduced developer, landlord and realtor greed - so housing costs can become affordable.	7/29/2024 11:37 PM
187	Actividades familiares,viviendas para personas mayores de 55 y retirados.	7/29/2024 7:21 PM

188	More housing in old industrial areas like Portland's Central Eastside. Preserving old homes and green space. Increased density in suburban areas as well as in the city instead of development on farmland and forests.	7/29/2024 11:48 AM
189	Build Up not Out!	7/29/2024 9:35 AM
190	Investment in infrastructure like roads, bikeways, transit. There needs to be a plan to move the people around the area. How do people get from Sherwood to downtown without adding to gridlock? I would also like to see fewer corporations owning properties and renting, than affordable properties for entry level home buyers.	7/29/2024 7:48 AM
191	no sprawl more density and walkabity. abolish highways, improve public transport	7/28/2024 12:50 PM
192	More walkable/bikable neighborhoods. Less new suburban sprawl.	7/28/2024 8:34 AM
193	Denser housing options, infill development, and transit-oriented housing.	7/28/2024 8:26 AM
194	Vertical growth. More condos in dense areas. And add one or two new dense city center type location. Maybe one east and one west.	7/25/2024 7:17 PM
195	Less crime, better transportation systems, fewer homeless	7/24/2024 5:33 PM
196	See above	7/24/2024 3:55 PM
197	Additional expansion of the UGB to keep overall costs low for development while providing opportunities to access public transit and provide workforce housing for major employers and employment hubs.	7/24/2024 11:56 AM
198	Make it easier for developers to build dense mixed use in areas already within the UGB. If that means tax incentives for five story condos, or repealing parking minimums for new builds, or making the bureaucratic cost of applying for redevelopment/remodeling of office/commercial into residential, do it!	7/24/2024 7:32 AM
199	More space for affordable housing	7/24/2024 12:10 AM
200	Easing traffic quagmires and building more sustainably. Safer communities. Walking paths and farmer's markets. Manufacturing jobs and training programs for future employees.	7/23/2024 9:20 PM
201	Denser Development	7/23/2024 8:54 PM
202	Allowing more single family and multi family housing that creates quality neighborhoods and communities.	7/23/2024 8:30 PM
203	Increase density, like A LOT. The best things about cities are only really possible when adequate desnities are achieved. Even issues such as public safety can be addressed by having more people around. Portland is nowhere near the density levels needed to support the kind of sustainable urban form that most of us actually desire. Walkable neighborhoods require lots of people walking to places like grocery stores to support them. Transit only makes sense for occasional users (e.g., those of us that work from home) if service is frequent enough and reliable enough that we don't have to spend a lot of time figuring out when the next bus will arrive. Those things require density.	7/23/2024 6:39 PM
204	Redevelop and repurpose current real estate	7/23/2024 6:19 PM
205	Enforcement of current immigration laws, support for property rights of current landowners and value esp for senior citizens	7/23/2024 3:19 PM
206	A major reduction in single family housing and expansion of car dependent suburbs, a focus on walkable neighborhoods with character and dense multi unit housing projects, transit and bike oriented design, infill of the vacant parking lots across east portland	7/23/2024 3:14 PM
207	For development kept closer to city centers and leave space for areas of land and farms in tact.	7/23/2024 2:12 PM
208	higher density in current Urban areas	7/23/2024 12:06 PM
209	No expansion permitted unless accompanied by concurrent expansion of public transportation.	7/23/2024 11:17 AM
210	Increased density, better transit	7/23/2024 2:36 AM
211	That the city and state government follow environmental code and NROd as significant as	7/22/2024 3:06 PM

	addressing affordable housing. I would like the state to start doing conservation efforts to prevent forest fires before they adding more infill, especially in rural areas	
212	More passenger rail & LRT	7/22/2024 6:07 AM
213	Protection of natural and farm land	7/21/2024 12:16 PM
214	More dense affordable housing with public transportation, work space with shopping hubs	7/21/2024 10:35 AM
215	Access to rapid transit in all corners of the metro. Buses are not rapid transit unless they are given priority and actually go faster than traffic.	7/21/2024 9:49 AM
216	The area is losing residents. There's no reason to extend the growth boundary.	7/21/2024 9:00 AM
217	More density	7/20/2024 9:12 PM
218	Less ugliness and more nature	7/20/2024 8:57 PM
219	Better public transit. We must expand the MAX into the SW metro on a common-sense alignment, not the poorly planned alignment that was proposed before. We must expand streetcar service all over Portland proper. Examples for the streetcar would be down into Lake Oswego, down Sandy Blvd., north up MLK Blvd. to Lombard St., from the MAX west down Lombard all the way to St Johns, down 82nd Ave., down 122nd Ave, and much more. Other corridors need bus rapid transit. Incentivize density of housing along all transit corridors and even deep into underserved neighborhoods. We have a terrible housing shortage and density is needed.	7/20/2024 7:38 PM
220	Not fall into the "cookie cutter" trap. Make sure public transit keeps up with growth AND make sure cars aren't excluded. Parking is needed. Mass transit doesn't work for all.	7/20/2024 10:41 AM
221	I would like to see a stronger move towards mixed-use, walkable, transit-oriented communities. I think the suburbs are really lacking in this regard due to historical planning trends, but we are seeing some changes in the right direction. I think we should embrace "Vision Zero" planning, with separated bike paths, human-scaled streets, and traffic calming measures. I would love it if my kids could walk to school someday. I would love to see every neighborhood have a grocery store within a short, safe bike ride. I would love to see more starter homes that are affordable, such as townhomes and row houses, close to amenities. Bonus points if some townhome plans have a bedroom/kitchen on the first floor for aging family members.	7/20/2024 9:28 AM
222	More dense neighborhoods with increased public transit options.	7/20/2024 7:41 AM
223	Bring back the wetlands of Portland! Wetland parks everywhere! MORE DENSITY, LESS DESTRUCTION. Build townhomes! Build small apartment blocks! Build corner stores and apartments above retail!	7/20/2024 12:38 AM
224	Before we look at expanding into the urban reserve, I'd like to see local government take better care of existing areas where there are economic and racial disparities. If we can't even properly manage what we have, why add more?	7/19/2024 4:15 PM
225	We don't need to make new developments car dependent. Build new developments with biking walking and transit first	7/19/2024 2:12 PM
226	More walkable and bikable development. Encourage density and preserve the rural landscape within a short distance to Portland. Re-ruralizing landscapes is almost completely impractical, we should preserve what we have while making our cities more livable.	7/19/2024 2:06 PM
227	More development and land use planning towards dense housing centered around walkable neighborhoods and transit oriented travel. We should not be building the most inefficient form of housing that is continuously built (single family homes) in areas where a car is necessary to survive. Walkable, dense neighborhoods is vital towards creating a more sustainable future.	7/19/2024 12:40 PM
228	More enforcement of developers not following the law, including seizing property through eminent domain if they fail or refuse to produce enough affordable housing units.	7/18/2024 9:44 PM
229	More public transportation.	7/18/2024 12:03 PM
230	We have plenty of land available for development. Until literally the entire metro is covered with 3-story buildings, there should be no UGB expansions. Along these lines, we need to continue improving public transit focusing primarily on what will attract more ridership.	7/18/2024 10:20 AM
231	More emphasis on public transit for those in the outlying areas. Trimet is not keeping up with	7/18/2024 6:16 AM

	the growth, and some of the outlying areas not accessed by a Max line have more difficulties in getting where we need to go.	
232	Greater distribution of high rise residential apartment buildings outside of the downtown core area, especially in Southwest. A MAX line spur from the current Washington Park station heading south, with stops for Council Crest, Hillsdale/Wells HS, Burlingame, Multnomah Village, Capitol HWY at 99W, Jackson MS, PCC Sylvania, Gabriel Park, Six Corners/Raleigh Hills,	7/17/2024 11:12 PM
233	STOP 🛑 Oregon infrastructure is the WORST I have seen. Traffic in rural areas will become disastrous with population growth!	7/17/2024 6:04 PM
234	Less roads and parking lots, more transit and fewer vehicle Miles traveled, more middle housing and mid-rise buildings. Daylighting buried streams, better fish and other animal friendly crossings. No data centers. No single story commercial and industrial buildings.	7/17/2024 2:18 PM
235	Stop building over our greenland. Land conservation.	7/17/2024 2:00 PM
236	More mixed used areas with less signle family housing.	7/17/2024 9:20 AM
237	build up and not out, and reduce parking footprint	7/17/2024 1:16 AM
238	More housing options, density, a mixture of all housing types — not just single family homes.	7/16/2024 11:18 PM
239	Stop growing out and think of growing up! Cities should be dense and walkable. Growth does not mean just go out. Look at European cities as an example. They have been around some for thousands of years without continuing to just expand out. Utilize the space they currently occupy.	7/16/2024 8:46 PM
240	A little more room for smart growth neighborhoods with row homes, townhomes, and small lot homes. The neighborhood should mainly be served by a park and neighborhood retail, grocery, and restaurants. Walkable is very important	7/16/2024 8:44 PM
241	More density; increased infill; redevelopment of underutilized land; demolition of older buildings to make way for newer, larger, and denser buildings; improved transit to serve the increasing population and density	7/16/2024 8:26 PM
242	Higher density housing options, more walkable neighborhoods, better sidewalks	7/16/2024 6:51 PM
243	Stop high density development that takes out all trees and natural area. Plan for roads, our roads already can’t support the population we have. Metro to have parks that allow dogs and not horses.	7/16/2024 6:26 PM
244	More density and mixed uses in every city core to create its own unique identity whole creating more walkability. This would also contribute to the ease of cycling and the viability of public transit projects, even in smaller cities. Mixed use, dense city cores would also create a tax surplus for local governments and metro to use for maintaining or expanding services.	7/16/2024 5:52 PM
245	Less high density housing that makes traffic worse since know one focuses on the impacts it causes on roads	7/16/2024 12:20 PM
246	More complete street systems. Transit expansions.	7/16/2024 10:24 AM
247	I would like to see greater opportunities for affordable housing and proximate employment for residents. I would like Portland to be a place my children would be able to live in.	7/16/2024 9:04 AM
248	Improved/increased access to mental health and in/outpatient A&D drug treatment	7/16/2024 8:09 AM
249	Better transportation options. Not only mass transit but more bridges to reduce congestion. People dont want to go into some areas like Portland and Vancouver just due to the traffic.	7/16/2024 8:00 AM
250	Greater density. More ADUs in existing neighborhoods	7/15/2024 10:34 PM
251	Stimulate (incentivize) redevelopment within existing boundaries. Of course it is easier to build new on bare, flat farmland... don't do it.	7/15/2024 8:39 PM
252	Better street cycling conditions	7/15/2024 7:50 PM
253	I would like to see entire neighborhoods built that include everything the increase in population needs: more stores, expansion of roadways to deal with traffic, more schools so that the	7/15/2024 7:17 PM

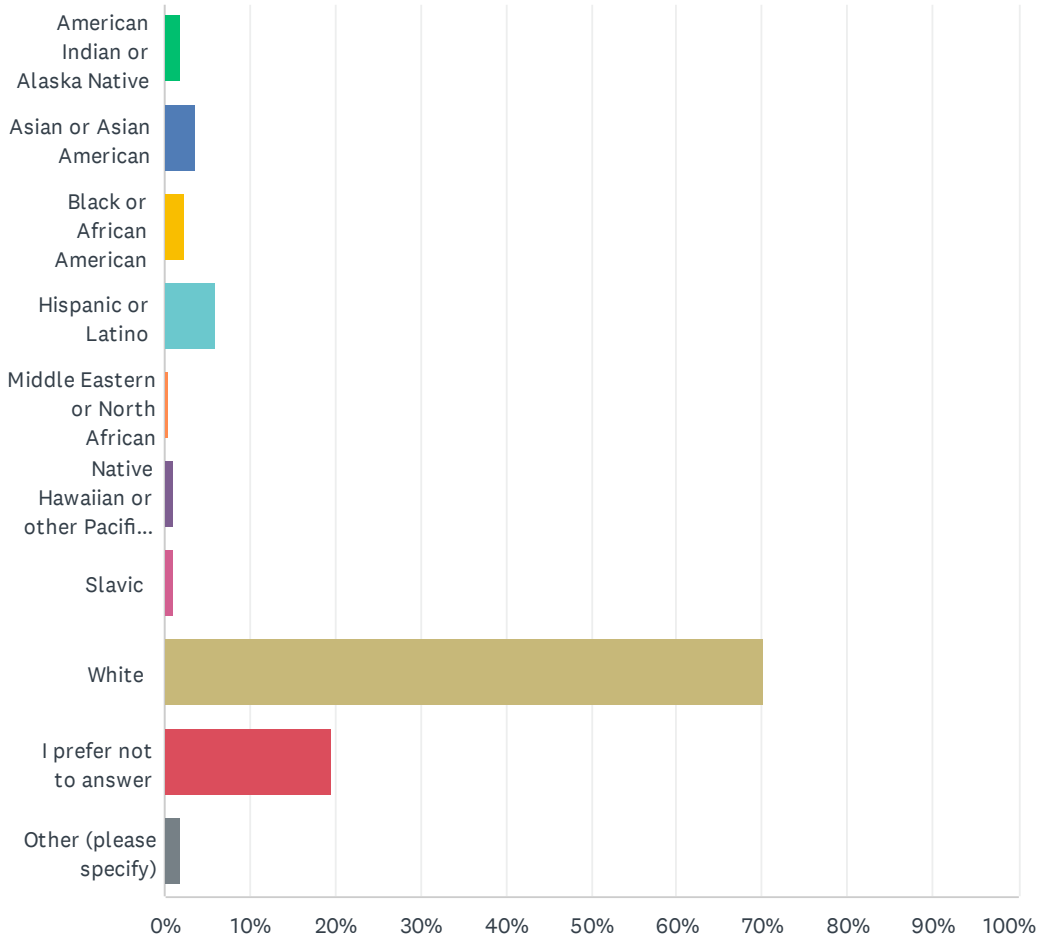
	schools that are there don't just increase class sizes, parks for families to enjoy so there isn't more crowding of the parks that exist, etc.	
254	Stopping the theft of our farm land for junk houses and o er crouding	7/15/2024 6:47 PM
255	A solution for all the empty commercial space, particularly close in, that is discouraging to the random flanneur as well as the residents. I would like the SW light rail to HAPPEN because I lived in SW (out near Tigard) and the traffic is beyond horrific - made me move back to NE Portland Yikes - it's literally untenable. And I don't want downtown to pay the price (becoming a donut hole).	7/15/2024 6:41 PM
256	Better mix of housing, better accessibility to transportation services and more. Better mass transit to suburbs and outer areas. Better job of keeping neighborhood integrity, better public safety	7/15/2024 5:54 PM
257	More land appropriately developed for a mix of single family and higher density housing. More single family is needed to help on the affordability goal.	7/15/2024 5:28 PM
258	I'm hoping for a change in mindset. or maybe more education... many people who value quality habitat and green spaces also don't like dense housing and don't see the connection. Many people want to live on acreage and in the Wildland Urban Interface, but it is damaging to wildlife	7/15/2024 5:22 PM
259	More affordable single family housing and safe, affordable public transit.	7/15/2024 5:19 PM
260	Please focus on walkability and public transit. Protected bike lanes, please! Get rid of parking lot requirements and allow mixed use zoning.	7/15/2024 5:17 PM
261	More parks, public transportation, less traffic	7/15/2024 5:12 PM
262	No growth	7/15/2024 4:37 PM
263	Increase in infrastructure - the growth continues but arterial roads are not developed/improved to support the traffic. Homes continue to be built in SW Beaverton, but nothing has been done to increase the traffic flow/capacity on Scholls Ferry - the primary freeway access point.	7/15/2024 4:03 PM
264	keeping urban sprawl under control	7/15/2024 3:31 PM
265	I'd like us to change BACK to when kids didn't have to be afraid in the streets and drugs/criminals didn't run amok in our City.	7/15/2024 3:25 PM
266	More single family homes	7/15/2024 3:00 PM
267	Safe communities -making them a priority.	7/15/2024 2:52 PM
268	A network of bike trail and larger freeways	7/15/2024 2:38 PM
269	its obvious we need more housing and job creation to support us. Metro takes too long to evaluate these expansion decisions, so we pass up opportunities.	7/15/2024 2:14 PM
270	Houses that are small for first time home buyers... not huge 4 bedroom homes with high end amenities. Small homes on large lots. With eco features like room for garden, underground water storage for watering garden, and solar panels on roof. No more granite counters and high end appliances. Your first home should be basic. That gives people something to strive for. Also stop the massive rentals of homes by non us citizens. Rent is more expensive than a mortgage. I know tons of home we're purchases in the economy crash of 2009 and purchases by foreigners to make $$ stop that practice. And you will have lower housing cost.	7/15/2024 1:45 PM
271	As few as possible	7/15/2024 1:41 PM
272	Better transportation infrastructure. Our roads have been the exact same going into/out of PDX 50 years or more	7/15/2024 1:35 PM
273	Improved public transportation and improved/increased use of multimodal trails and biking infrastructure.	7/15/2024 1:17 PM
274	High density in-fill and zoning upgrades near rapid transit access. Prioritize this BEFORE expanding the UGB.	7/15/2024 1:12 PM
275	Cheaper rates and less control	7/15/2024 1:11 PM
276	Stopping sprawl and addressing climate by building more compactly and decreasing highway	7/15/2024 12:58 PM

	modes of transportation.	
277	No more growth. No more crappy homes built tightly together. We need some countryside-trees, deer, birds, butterflies, rather than more concrete.	7/15/2024 12:47 PM
278	Fewer homeless, less garbage on the streets, more multi-family that includes parking	7/15/2024 12:44 PM
279	More requirements for affordable housing units. New apartments are ridiculously expensive and not built for families.	7/15/2024 12:41 PM
280	Grow up not out.	7/15/2024 12:40 PM
281	Smart transportation options, affordable housing within city centers and strong habitat protections for wildlife connectivity throughout our region.	7/15/2024 10:53 AM
282	Fewer parking lots, less sprawl, more dense housing, narrow freeways and add tolls, more bike paths	7/15/2024 10:35 AM
283	More bike infrastructure beyond the urban core of Portland.	7/15/2024 9:56 AM
284	Greater density. And safe transit. We can't use what we have because it is filthy and not safe. Bike paths need to be kept safe with regular more than daily patrols…bike cops or golf carts.	7/15/2024 7:25 AM
285	More protected bike lanes	7/15/2024 6:59 AM
286	Focus on basic municipal services: fix potholes, pave streets, erase graffiti, pick up the trash!	7/15/2024 6:34 AM
287	Safer highways (eg hwy 47) that include traffic circles.	7/15/2024 6:07 AM
288	Increased density and less sprawl.	7/15/2024 12:26 AM
289	I would like to see less traffic, and more public transportation options.	7/14/2024 9:17 PM
290	I would like to see more public transportation and multicultural businesses. I would like new neighborhoods to be open to everyone, both economically and culturally. We need more low and middle income housing in areas with good schools.	7/14/2024 9:11 PM
291	Continue to develop within existing boundaries.	7/14/2024 6:14 PM
292	Follow your plans and stay strong	7/14/2024 5:37 PM
293	Land conservation	7/14/2024 5:29 PM
294	Better traffic management	7/14/2024 5:15 PM
295	Better arterial transportation routes leading through the suburbs - landscaped parkways with grade separation like in NY/CT, but add transit and ped/bike. One from I-5 to the Newberg-Dundee Bypass (an actual I-5-99W Connector!) to help regional transportation. Another in the form of Sunrise Phase 2, extending to Sandy. And then a new tunnel and bridge from 26/Cornelius Pass to Rivergate in Portland.	7/14/2024 3:55 PM
296	Care for the current crumbling infrastructure before expanding.	7/14/2024 3:35 PM
297	More trees planted	7/14/2024 3:25 PM
298	Same as above plus very limited growth and only built to be part of the protected envrionment.	7/14/2024 1:53 PM
299	Solar panels over parking lots to produce power and not impede other land.	7/14/2024 12:58 PM
300	Better interconnectivity between trails, parks and green spaces.	7/14/2024 12:44 PM
301	Managing traffic, don't want more traffic lights would like to prevent Sherwood from turning into the Tigard disaster of stoplights	7/14/2024 12:12 PM
302	I would like to see the region commit to developing all of the land existing within the boundary that remains undeveloped, and also develop land that is poorly used, such as the numerous seas of parking lots that remain mostly empty. I see infill as a much better use of the regions money, as urban sprawl is not what we need and will only make our city align with other sprawling cities across the country instead of setting ourselves apart as a sustainable city.	7/14/2024 11:25 AM
303	Want to see it slow down. Making infrastructure first before adding to the population. Leaving rural areas rural. Leaving room for farms. leaving the trees.	7/14/2024 11:24 AM

304	Better roads to accommodate the traffic	7/14/2024 11:19 AM
305	Less housing a few more shops/restaurants. Traffic is so bad in Sherwood. There are already too many people that it's almost impossible to go to dinner and the lines at the stores are very long.	7/14/2024 11:16 AM
306	Fixed roads	7/14/2024 10:48 AM
307	less sprawl, and more revival of already developed space	7/14/2024 10:28 AM
308	Increased safety/security	7/14/2024 10:25 AM
309	No more row housing, no more densely packed living spaces	7/14/2024 10:13 AM
310	Updates to existing and already developed land, rather than urban sprawl into precious G land.	7/14/2024 10:03 AM
311	Better infrastructure within the city (Portland proper) farmlands don’t need 500 row homes placed on them. Concrete jungle is what we are going towards and I’m not here for that.	7/14/2024 9:43 AM
312	More density and infill and less suburban sprawl. And more mixed used development. I don’t want to have to use my car to fo everything.	7/14/2024 9:25 AM
313	More affordable housing, especially for first time homebuyers and low income renters. Densify housing without losing access to safe walking and biking and community outdoor spaces.	7/14/2024 8:17 AM
314	Stop expanding the boundaries. It isn’t appropriate to overtake agricultural land.	7/14/2024 8:06 AM
315	Increase density, particularly in downtown Portland	7/14/2024 12:07 AM
316	Increased residential density in existing neighborhoods, more extensive and more frequent rapid public transit, prioritizing pedestrian and bike safety and modes of transit over automobiles. More affordability of housing and choice of housing types that meet the needs of families and older adults.	7/13/2024 10:53 AM
317	Increase in construction density and mixed use zones.	7/12/2024 11:40 PM
318	I'd like to see Portland increase it's public transportation infrastructure with rail and bus rapid transit projects. There's no reason why Portland needs to expand more outward when we can simply just densify areas. I'd like to see Portland focus on climate change initiatives and be one of the leaders in the US, and expanding the UGB and increasing the reliance on car-centered infrastructure directly opposes those initiatives.	7/12/2024 8:13 PM
319	Denser housing and neighborhoods.	7/12/2024 7:47 PM
320	Less car oriented development. It’s 2024. Climate change. We know better.	7/12/2024 6:10 PM
321	more bike and transit friendly	7/12/2024 5:31 PM
322	Better wider and marked streets.	7/12/2024 1:10 PM
323	A focus on improving the areas that are already part of the UBG	7/12/2024 12:14 PM
324	Less implementation of luxury apartment buildings that few can afford to live in, more focus on affordable housing.	7/12/2024 7:47 AM
325	Development patterns and alternative transportation, these two are intrinsically linked and, to move into more sustainable forms of transportation means moving away from single family housing as the standard. We must move towards more varied housing options to include row-houses/townhomes, apartments, condos, cottage courts, duplexes, triplexes and anything else that can provide sustainable mid-density housing. Part of providing this too includes taking a closer look at zoning requirements and doing away with unnecessarily restrictive codes including minimum setbacks, parking requirements, and anything else that holds the area back from the most sustainable development possible which includes mixed use zoning, completely separate people from every day conveniences is absurd and past development patterns have led to strip malls and big box retailers taking over, driving out small businesses in many places and further unsustainable car oriented development. Alternative transportation too must be encouraged to include transit and cycling access for all. With sustainable mid-higher density this can be achieved much easier, however metro must commit wholly, protected/separated need to be the standard in everything but the most calm residential streets, and also not reserved only for the highest speed most dangerous roads, and transit too must be as convenient as possible for all. Trimet has been making improvements, well needed ones	7/12/2024 7:15 AM

	however there is so much more that could be done, the idea of a downtown MAX tunnel has been floating for some time but if trimet ever wants to make MAX a truly viable option for further distance travel this idea must be considered further and implemented.	
326	Density and mix use land around transit corridors. Potentially look into a MUPTE like (Eugene) to spur affordable housing.	7/12/2024 12:22 AM
327	Greater emphasis on keeping Portland green as can be. It's why we love this city so much.	7/11/2024 11:52 PM
328	Building up and not out. Don't allow Portland to become like Denver, Los Angeles or other inequitable cities that can only rely on automobile transportation. Building dense cities increase access to nature for all residents.	7/11/2024 10:31 PM
329	Better mass transit. It's the only way to grow outside of Portland and not become another hell hole like LA	7/11/2024 6:57 PM
330	Minimize the role of the automobile. Stop sprawling onto new greenfield land. Revitalize existing neighborhoods. Eliminate surface parking lots of more than 1-3 spaces (in favor of on-street, underground, structured, or no parking). Build out complete, connected, safe, high-quality regional and statewide, bicycle, pedestrian, and transit networks. Complete the Coast to Gorge Trail and begin work on other elements of the Infinity Loop concept. Make cooperative housing a permanent and meaningful housing option within the region.	7/11/2024 6:12 PM
331	More high-quality transit options like regional rail and bus-rapid transit.	7/11/2024 4:27 PM
332	Better infrastructure for getting into the city core from the outskirts. Currently the only option for many is to drive but by doing so, we add to the environmental impacts and many of the routes are not very friendly. If we are going to put more family-priced housing on the edges, then we need to provide safe, economical and quicker ways to get to work and family in the city core.	7/11/2024 10:33 AM
333	Denser walkable neighborhoods, better transit, regional connection to jobs	7/10/2024 10:14 PM
334	More density in urban areas	7/10/2024 9:51 PM
335	allow cities/counties to bring in several hundred acres at their edges into development for new single-family homes with yards - like houses with one thousand square feet in foot print and 1 to 2 thousand square feet for yard. Use these edge areas to design more technological oriented cities allowing bicycle and walking to be the main way getting to a common vehicle depot for accessing other parts of the Metro area. Allow robotic, drone delivery.	7/10/2024 8:30 PM
336	Only high density housing added to any area expanding, with abundant low income housing.	7/10/2024 5:14 PM
337	Increased density, especially along transit corridors (transit oriented development), and a greater quantity of mixed-use middle density housing.	7/10/2024 12:08 PM
338	Stop expanding ugly townhouses into our beautiful countryside.	7/9/2024 9:48 PM
339	Want to see keeping original neighborhoods, use of more technology to deal with water and sewer, and more affordable housing of all types. There are cheaper more effective solutions other than a big sewerplant.	7/9/2024 3:43 PM
340	better transportation and less traffic / less need to make long trips and fewer trips / all housing will cost 30% or less of individual or family income / more natural areas and recreation	7/9/2024 3:15 PM

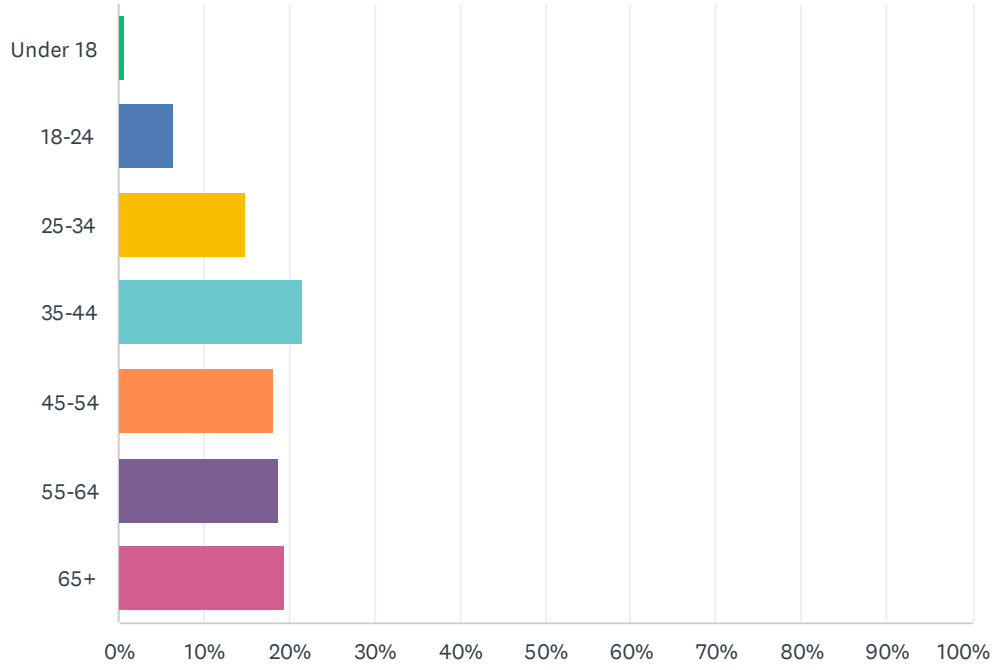
Q6 How do you identify your gender? (Select all that apply).



Answered: 307 Skipped: 58

ANSWER CHOICES	RESPONSES	
Female	41.04%	126
Male	43.97%	135
Non-binary	4.56%	14
I prefer not to answer	9.45%	29
Other (please specify)	1.30%	4
Total Respondents: 307		

Q7 Which of the below best describe your race/ethnicity? (Select all that apply).



Answered: 305 Skipped: 60

ANSWER CHOICES	RESPONSES	
American Indian or Alaska Native	1.97%	6
Asian or Asian American	3.61%	11
Black or African American	2.30%	7
Hispanic or Latino	5.90%	18
Middle Eastern or North African	0.33%	1
Native Hawaiian or other Pacific Islander	0.98%	3
Slavic	0.98%	3
White	70.16%	214
I prefer not to answer	19.67%	60

APPENDIX B

Public comment emails and letters

Miriam Hanes

From: Rachel Adams <[redacted]>
Sent: Tuesday, August 20, 2024 11:32 AM
To: Metro 2040
Subject: [External sender]Sherwood West Concept Plan Opposition

CAUTION: This email originated from an **External source.** Do not open links or attachments unless you know the content is safe.

To whom it may concern,

I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely,

Rachel Adams

BPS Comments on July Draft of Metro Urban Growth Report (UGR)

Metro is narrowly framing this decision as to whether or not the Sherwood West expansion area should be brought into the UGB. The UGR has broader implications for the region in terms of how we expect to grow in a way that is equitable and meets other regional goals, such as reducing carbon emissions.

The Urban Growth Report (UGR) is an opportunity to frame future regional planning discussions such as the regional housing production strategy, a refresh of the 2040 Growth Concept, and a regional economic development strategy.

Our concern is that the UGR is underestimating population and housing growth, underestimating residential capacity; underestimating industrial job growth, overestimating industrial land supply and underestimating commercial land supply. BPS staff raise the following issues with methodology and assumptions to better align with regional policy objectives, which are described in detail below.

Housing

The 2044 population forecast is for much slower growth, primarily due to declining birth rates. We are concerned that the Metro forecast is too low, which will affect planning for housing that will result in insufficient housing capacity in the future. The Metro forecast is based on national growth rates – which misses the important context that, historically, Oregon has grown faster than the nation and the Portland region has grown faster than the state (captured a greater share the state's growth). The UGR lacks important comparisons to state forecasts as context for selecting a growth scenario.

Metro should select the Strong Urban Market housing mix with high population/household forecast. This scenario best fits the expected older, smaller households. It also addresses affordability concerns and the need for more affordable multi-dwelling and middle housing units. The UGR notes that 81% of future households will be financially challenged or unable to purchase homes with current median sales price at roughly $550,000 in today's dollars.

Metro's scenario results indicates that this scenario results in a deficit of 24,000 multi-dwelling units. This deficit is overstated because Metro's housing capacity methodology vastly undercounts the redevelopment potential in Portland and the region. The UGR assumes that only 20% of the most feasible properties will redevelop. Buried in a footnote, the UGR states that if redevelopment rate is increased to 40% of the most feasible properties, this deficit would be eliminated. For example, under the 20% redevelopment rate, Metro assumes that Portland only has capacity for 60,000 units. Whereas in our recently adopted 2023 Housing Needs Analysis, we found that Portland has a financially feasible development capacity of 237,000 units.

Finally, the regional forecast is not just about the UGB decision. It is used in other policy decisions (not just for managing the UGB). The housing forecast will be provided to the State (OHCS/DAS) to establish the jurisdiction level housing targets. Also, the forecast will be the basis for Metro's regional housing production strategy – which will be an important regional discussion on how to address housing needs for older, smaller households with affordability challenges.

Employment

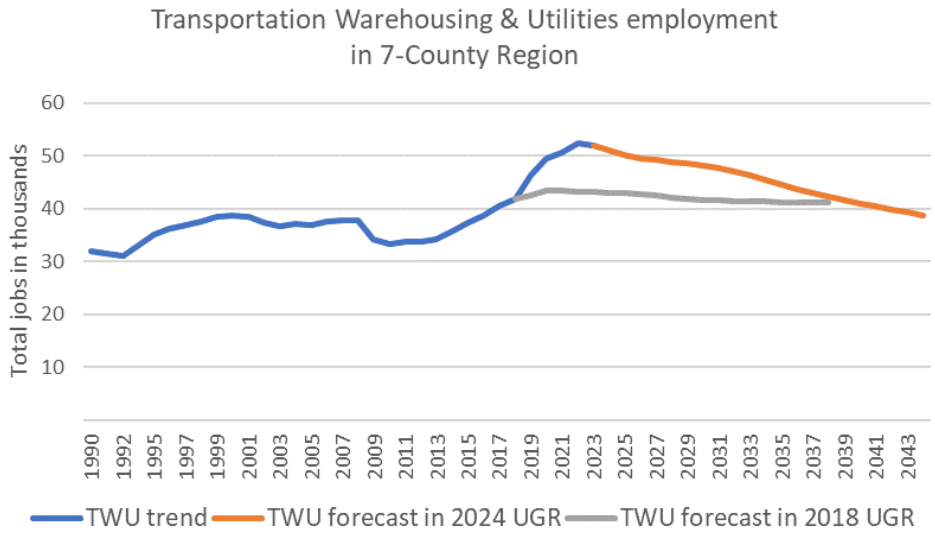
Metro's employment forecast is tied to the population forecast. Metro's fundamental assumption that lower population growth will mean slower economic growth because access to labor will be the constraining factor could be a self-fulling prophecy. Workforce is mobile. Capital is mobile. Development

capacity is not. If the region has the land capacity for businesses to expand then workers will migrate to the region. If the region does not have the land capacity, then economic growth will be constrained.

- Jobs in the Portland MSA grew 56%-63% faster than the national economy in each of the last three business cycles (Portland EOA Trends Report). Above-average regional job growth has been supported by our competitive strengths, including growing industry clusters and planned livability that attracts talent, as recognized in our economic development strategies (CEDS, Oregon Business Plan, Advance Portland). The UGR's methodology does not account for these past trends and regional advantages. The average annual growth rate (AAGR) of Oregon Employment Department's (OED's) current 2022-2032 projection is 1.1% for Total Nonfarm Employment, compared to 0.46% in the draft UGR. Why does the UGR predict that long-term regional job growth will now slow down to the national average?
- Workforce-in-migration should be a forecast variable – Economic forecasts typically analyze sector trends, capital inputs (such as land supply), and market opportunities. Economic growth will attract workers, rather than the UGR's population-trumps-economy approach.
- Noisy in-migration data – The in-migration graph cited in the UGR indicates wide variations, rather than a hard stop for job growth. In-migration also varies widely with economic trends that don't appear to be considered in the UGR's population forecast, such as business cycles, sector growth trends, and median income trends, each of which shape in-migration through economic opportunity.
- Local sectors/traded sectors – We agree that regional population growth is an important driver of market size and job growth in 'local sectors' that serve regional markets. However, market opportunities in 'traded sectors' that serve markets outside the region are unrelated to local population size. At minimum, the UGR's connection between population growth and job projections should be removed from the goods production and distribution sectors that make up most industrial land demand and primarily serve traded-sector markets.

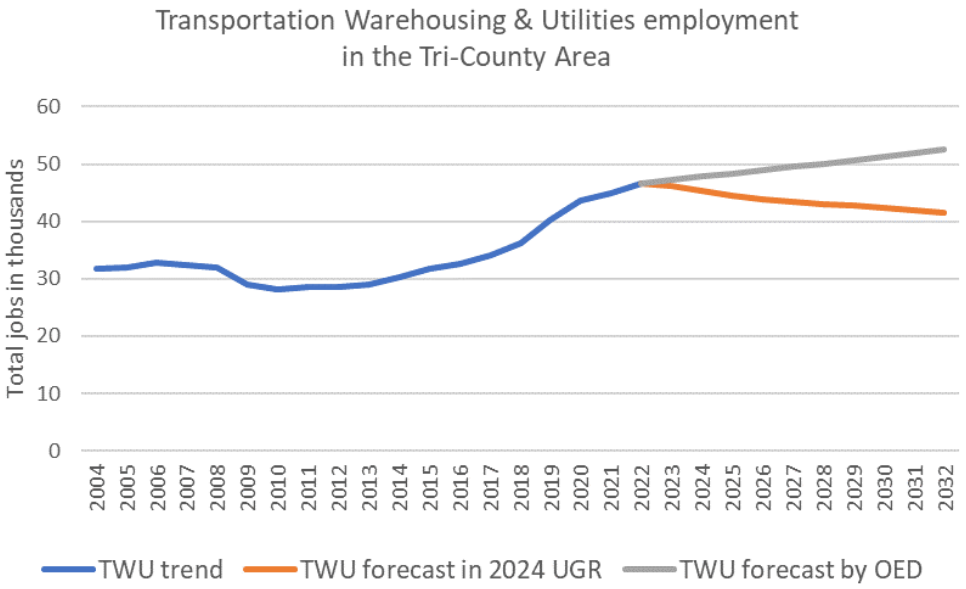
As with the population forecast, the UGR is lacking context or comparison to State of Oregon forecasts. The UGR also could benefit from an equity analysis that discusses the type of jobs and wages that will be available, especially for workers without 4-year college degrees.

The region needs a land supply strategy that includes a deeper analysis of sector and business growth opportunities and how they match with the region's employment land supply in order to create equitable economic opportunity.



Industrial

Inadequate Industrial Land Supply – The UGR widely understates industrial land demand, relative to growth trends and State of Oregon employment projections. It overstates the suitable land supply to meet the region's distinct segments of demand. Coming to the opposite conclusion of the UGR, the private market has found inadequate industrial land supply since around 2015, evident in the region's low industrial vacancy rates and rising rents of the last decade. What is Metro's rationale for such a different and low industrial demand forecast?



Transportation & Warehousing (Logistics) forecast – Metro's no-growth forecast for the logistics sector in the 2018 UGR and the declining forecast in 2024 UGR eliminates most of industrial land demand. Metro's industrial employment sector forecast is too low and not consistent with Oregon Employment Department (OED) forecasts. Specifically, BPS staff has raised concerns about the forecasted decline in

the warehouse and distribution sector when the OED and the federal Bureau of Labor Statistics (BLS) forecast continued growth. Metro made a similar assumption in 2018, when it forecasted zero-growth for logistics jobs, when, since 2015, it has been a high job-growth sector and the region's predominant employment land demand.

- The current UGR forecast for major decline in Logistics jobs is the opposite of its rapid growth trend in the last decade and current national/state/regional employment agency forecasts for continuing above-average growth, as shown in the charts below. Metro's regional projection of -1.4% annual change (AAGR) in Transportation Warehousing & Utilities jobs over the next decade (2022-2032) compares to 0.8% AAGR by Bureau of Labor Statistics nationally and 1.2% AAGR by OED in the Tri-County area. City staff would be interested in better understanding this aspect of the analysis and discussing the potential associated regional policy implications.

Sources: Trend from CES data by BLS. Forecast data by Metro in 2018 and draft 2024 Urban Growth Reports

Sources: Trend data from CES by OED. UGR forecast from July 2024 draft by Metro. Oregon Employment Department projections for 2022-2032.

- Logistics is a critical sector to get right in the UGR forecast, because Logistics businesses are the primary source of Warehouse & Distribution development (along with Wholesale Trade) and thus industrial land demand. Warehouse & Distribution buildings made up 75% of the MSA's total occupied industrial space in 2019 and 93% of the new occupied space in the recent 2008-2019 business cycle (CoStar data).

3,600-acre demand discrepancy for Logistics and Manufacturing – The draft UGR forecast for 1,400 additional industrial acres to 2044 is undercounting regional demand by about 3,600 acres relative to OED's regional projections in the Logistics and Manufacturing sectors alone (see table below). The sector-trends methodology of OED's projections is a better fit for employment land planning because of its consistency with employment and development trends and with State Planning Goal 9 requirements for trends-based forecast.

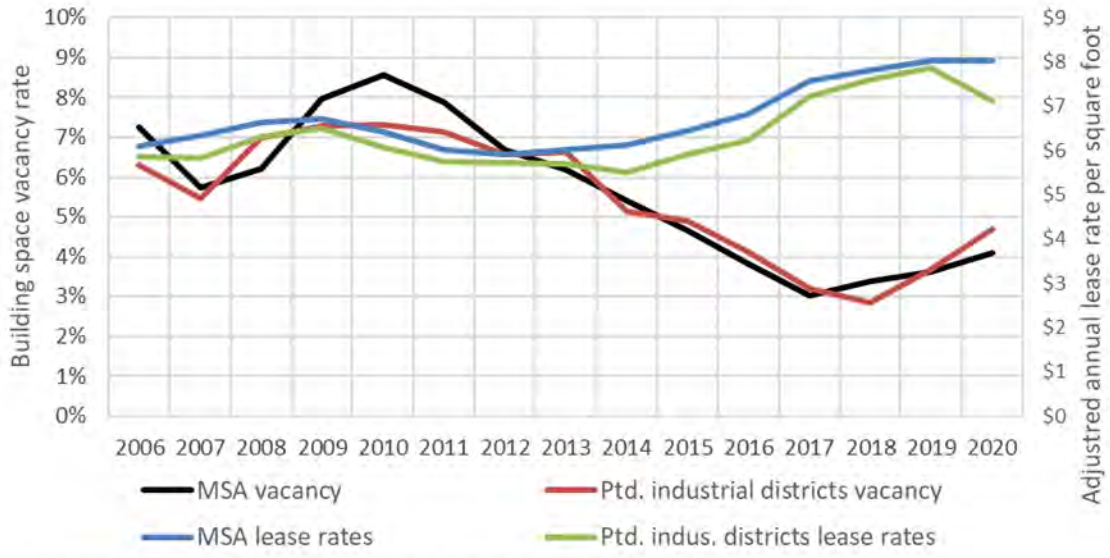
Estimated Tri-County forecast discrepancy in industrial land demand between Metro's draft 2024 UGR and Oregon Employment Department's 2032 projections						
	Forecast AAGR	Tri-County Jobs in 2024	Jobs in 2044	2024-2044 Job Change	Building SF	Land (ac.) Demand
Transportation Warehousing & Utilities						
Metro Draft UGR 2024	-1.4%	45,200	34,300	-10,900	-16,639,900	-1,273
OED, 2032 projections	1.2%	47,600	60,700	13,100	19,998,500	1,530
Discrepancy				24,000	36,638,400	2,804
Manufacturing						
Metro Draft UGR 2024	0.1%	101,400	102,900	1,500	1,037,600	72
OED, 2032 projections	0.8%	102,900	120,900	18,000	12,451,300	866
Discrepancy				16,500	11,413,700	794
Total Discrepancy				40,500	48,052,100	3,598

Automation impacts - Metro staff has offered automation as a reason for slower job growth in Logistics and Manufacturing. Other sources support different conclusions. After accounting for automation

impacts, current BLS national projections (which inform OED's regional projections) conclude that Logistics will continue to grow jobs substantially faster than the overall economy. BLS projections also indicate substantially higher output growth than employment growth in Logistics and Manufacturing, which in turn indicates increased land demand. Automated warehouses and factories still need land, and productivity gains of automation support higher land demand. Like BLS, McKinsey's projected job impacts of automation in urban areas indicate losses mainly in office support occupations, modest losses in manufacturing production, and gains in transportation occupations: Future of work in America | McKinsey. Considering the example of self-driving trucks, an extensive USDOT study in 2021 found "vast uncertainty" in future labor market impacts, including losses and gains over several decades with net impacts difficult to predict.

Other underestimated sources of industrial demand – In addition to the growth rate discrepancies for logistics and manufacturing, the UGR underestimates demand in a variety of other ways.

- Business-cycle impacts – Long-term sector growth rates span the job losses and gains of business cycles. In contrast to the predominantly industrial-sector job losses in the region's three previous recessions, the combined industrial sectors were the least impacted in recent COVID recession. The UGR misses this major source of long-term industrial growth by starting the forecast period in 2024, which particularly understates the long-term trend in Logistics.
- Target cluster incentives - The expanded growth potential of target industry clusters, supported by economic development policies and business assistance and incentive programs, is another example of undercounted demand. For example, the region's Cleantech and Electronics clusters are expected to broadly benefit from the 2022 federal industrial policy incentive of the Inflation Reduction Act and Chips Act.



Overstated industrial land supply – While the UGR's industrial land supply for Portland (1,200 acres) is relatively consistent with BPS' preliminary estimate, we are concerned that Metro has overestimated the industrial land supply in the rest of the region in a variety of ways.

- Suitable supply for location-specific demand – The UGR does not track land demand nor supply based on location-suitability criteria or a regional trend analysis by business district type. Instead, the UGR appears to assume that industrial land supply is loosely substitutable across the region. This is not the case when businesses make location decisions. The largest discrepancy is the concentration of the region's Logistics and Wholesale jobs in industrial districts near interstate highways and multimodal freight infrastructure. Some of the region's Warehouse & Distribution land demand is substitutable at dispersed locations, but most of it is not. For example, the City of Portland has 73% of tri-county Logistics jobs, but Portland's freight-hub districts are building out. Portland's 2016 EOA and current industrial land supply studies raise concerns about Portland's tight industrial land supply and ability to meet future demand in these freight-hub districts. The UGR lacks the detail in location needs for different industrial sectors and region's ability to accommodate their growth or the consequences of failing to meet the demand (sprawl to exurban areas).
- 10-acre and larger lot demand – The UGR does not appear to compare land demand and supply by site size. We are concerned that the region has an inadequate supply of 10-acres or larger sites. Larger sites made up 68% of new industrial construction in Portland in the last business cycle. While industrial land demand is present across the site-size distribution, our preliminary

land demand and supply analysis shows the potential for several hundred acres of unmet demand for sites 10 acres and larger in Portland, which are businesses that will seek locations elsewhere in the region (or outside the region).

- Industrial land readiness investment – A third major example of over-stated industrial land supply in the URG is the region's underfunded needs for industrial land readiness. Metro's Industrial Land Readiness toolkit clarifies this issue in detail.
- It is unclear if Metro's methodology adequately accounts for constraints on development for factors such as brownfields, small parcel sizes (less than 0.5 acres); and steep slopes. These factors contribute to overstating the effective supply.

Misreading the tight industrial land supply – BPS is concerned that the UGR sends the wrong message (finding more than adequate industrial land supply) at time of low vacancy rates and increasing rents and land values. The region's traded sector economic base that drives regional prosperity relies primarily on industrial land. The UGR could drive complacency that will undermine long-standing regional economic development goals. Market-effective industrial land supply has been tight in the region since 2015 (see chart below), as building vacancy rates dropping below 5% have pushed up rents to less competitive levels for growth. In turn, the metro area's tight land supply generates sprawl beyond the region. A Colliers' 2023 report on the 'I-5 OR/WA logistics corridor' (see link) identifies 62 industrial projects under construction last year that span the Portland and Seattle metro areas and the I-5 corridor between them.

Source: BPS from CoStar data; annual inflation-adjusted rates (2020 $)

Recommendations – BPS made similar comments about the 2018 UGR that were not taken into account. The UGR employment land methodology needs rethinking.

- Trend-based forecast scenario – The draft UGR employment forecast and capacity analysis is used for other purposes, such as economic development strategies and public and private investments, that go beyond the immediate decision on the UGB. Metro should acknowledge Oregon Employment Department's current sector projections for the Tri-County Area as a UGR forecast scenario that is primarily based on sector trends and not tied to Metro's population

forecast. The average annual growth rate (AAGR) of OED's current 2022-2032 projection is 1.1% for Total Nonfarm Employment, compared to 0.4% in the draft UGR. OED's projection methodology more closely fits the market-trend approach required of cities and counties by Oregon's Goal 9 for employment land planning.

- Rethink UGR employment forecast and capacity analysis - the next (2030) UGR should better align with Oregon's Goal 9 requirements for adequate employment land capacity, estimating demand from market trend opportunities of employment land types, substantially delinked from the population forecast. It should address Goal 9 requirements to analyze land supply and demand by employment land type and to analyze supply and demand by site size for each land type.
- Regional growth capacity strategy – Metro should lead work to prepare a market-responsive regional land-supply strategy to meet industrial demand in suitable locations. This work should be completed to inform the next UGR. It should include analysis and recommendations for industrial land readiness funding and Urban Reserves expansion in market-responsive locations. Current inventory gaps include predominant demand for 10+ acre sites and lack of capacity in near interstate highways or multimodal freight infrastructure. Additionally, cities and counties lack financial resources to overcome development barriers on sites in the existing industrial land supply.

<u>Commercial</u>

Commercial employment forecast appears to be reasonable, but the UGR is missing key details on office/retail/institution sector allocations and resulting demand that are needed to make an informed decision.

Please consider adjusting the commercial land supply analysis and methodology. Metro's backcasting redevelopment probability discount rates drastically reduces commercial development capacity. The proforma financial feasibility methodology is biased towards residential development, which does not adequately account for a residential/commercial split based on recent development trends. Finally, the methodology does not account for intensification of existing businesses/buildings. In the face of increased demand, businesses will add employees/shifts, expand hours and otherwise use existing building space more efficiently and increase productivity without increasing land demand.

The underestimating of commercial land capacity leads to the erroneous conclusion that the region has a deficit of commercial land.

<u>Sherwood West</u>

The UGR needs additional information on how the expected residential, industrial and commercial capacity increases in the Sherwood West area will help meet regional needs.

Generally, the city of Portland is a proponent of infill and redevelopment within the UGB and bases considerations about UGB expansions on their ability to promote urban growth patterns that fulfill the regional policy objectives of equity, housing affordability, economic opportunity and reducing carbon emissions. Those considerations include UGB expansions that:

- Promote and accommodate housing options that include middle housing and higher density multi-dwelling and/or mixed use developments;

- Address the regional need for affordable housing for a wide range of households;
- Create a land use pattern (20+ units per acre) that can be cost effectively served by transit and active transportation; and
- Accommodate large site industrial uses with protections in place to prevent conversion to non-industrial uses.

As proposed, the Sherwood West concept plan does not meet these criteria. The housing element is low-density, expensive housing with minimal opportunities for middle housing with no affordable housing strategy and will not serve the region's future housing needs or address its affordability challenge. The commercial development in the form of wine country hospitality (with no supporting plan to provide affordable housing for workers) is inappropriate to meet the regional commercial land needs. The employment area is promising but various references to "mixed" employment raise concern that the large lot industrial opportunity will not come to fruition. The employment area should be designated on Metro's Title 4 map as a Regionally Significant Industrial Area and not subject to conversion or leakage to commercial uses. Finally, the concept plan lacks an equity analysis and any discussion on how it can address racial income disparities in the region.

Equity analysis

Metro's equity analysis is limited to a look back at UGB expansion areas in Happy Valley and Bethany. These case studies lack comparison to the region as a whole and consideration of household income levels and are not representative of or informative as to how this analysis reflects a regional perspective.

There is no equity analysis of the regional forecast and land capacity analysis – both in terms of housing and employment opportunities. Nor is there any equity analysis of the Sherwood West expansion area and how it can address racial income disparities in the region.

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Thank you for the opportunity to meet and provide feedback on the draft UGR. As a follow up to our recent meeting, we would like to share these summary comments to help inform your COO recommendation. Also attached is additional detailed feedback on specific topics.

BPS' feedback is focused on the broader policy implications of growth projections beyond the implications for the pending UGB expansion proposal. Our request is that Metro consider those broader policy implications for the region in terms of how we expect to grow in a way that is equitable and meets other regional goals, such as housing affordability, equitable economic opportunity and reducing carbon emissions, when considering its recommendations to the Metro Council.
Overarchingly, by basing the regional forecast on national forecasts, the UGR is missing the important context that, historically, Oregon has grown faster than the nation and the Portland region has grown faster than the state.

While we agree that population will grow slower than in the past, we are concerned that the Metro forecast is too low, which will affect planning for housing that will result in insufficient housing capacity that will continue to exacerbate our housing affordability challenges. Metro should select the Strong Urban Market housing mix with a high population/household forecast to ensure that future growth

patterns reinforce the goals to have compact development and provide a wide range of housing types to accommodate changing socio-economic demographic factors. This scenario best fits the expected trends for older, smaller households. It also addresses affordability concerns – the future need will be for multi-dwelling and middle housing units. Eighty-one (81%) of future households will be financially challenged or unable to purchase homes with current median sales price at roughly $550,000. Metro can select this scenario without creating the need for a massive UGB expansion by adjusting the redevelopment rate in the development capacity model (see attached detailed comments).

The consequence of not planning for population growth is that it will likely constrain the state and region's economic growth. The assumption that that lower population growth will mean slower economic growth because access to labor will be the constraining factor will serve as a constraint to future economic growth and expansion. Given post-Covid trends, we know that the workforce and capital are mobile. If the region has the land capacity for businesses to expand then workers will migrate to the region. If the region does not have the land capacity, then economic growth will be constrained. The Oregon Office of Economic Analysis proscribes a similar practice (page 32) - Oregon's economic condition heavily influences the state's population growth. It is economy that determines the ability to retain existing work force as well as attract job seekers.
Similarly, our concern is low industrial job projections could also serve to constrain economic development potential in the state and the region over the longer term. Projecting low industrial employment and identifying an "oversupply" of industrial land could undermine longstanding city and regional efforts to make investments (brownfield clean up and infrastructure investment) that will make industrial land ready for development. The message that the region has an abundant supply of industrial land could dissuade decisionmakers and leaders from difficult decisions and prioritizing the investments needed to realize that economic opportunity. The net result will be a lack of middle wage job opportunities that will advance city and regional equity and climate goals. The UGR assumptions for industrial job growth vary widely relative to regional growth trends and State of Oregon employment projections. The UGR comes to the opposite conclusion of the private market, which has found inadequate industrial land supply since around 2015, as evident in the region's low industrial vacancy rates and rising rents and land values of the last decade. As it relates to the commercial land supply, Metro's redevelopment probability discount rates and a bias towards residential development drastically reduces the commercial development capacity. For example, Metro finds that Portland has 34 acres of commercial capacity, whereas BPS' analysis finds that figure to be 500 acres.

Generally, the city of Portland is a proponent of infill and redevelopment within the UGB and bases considerations about UGB expansions on their ability to promote urban growth patterns that fulfill the regional policy objectives of equity, housing affordability and reducing carbon emissions. Those considerations include UGB expansions that:

- Promote and accommodate housing options that include middle housing and higher density multi-dwelling and/or mixed-use development;
- Address the regional need for affordable housing for a wide range of households;
- Create a land use pattern (20+ units per acre) that can be cost effectively served by transit and active transportation; and
- Accommodate large site industrial uses with protections in place to prevent conversion to non-industrial uses.

As proposed, the Sherwood West concept plan does not meet these criteria. The housing element is low-density, expensive housing with minimal opportunities for middle housing and no affordable housing strategy and will not serve the region's future housing needs or address our affordability challenge. The commercial development in the form of wine country hospitality (with no supporting plan to provide affordable housing for workers) is inappropriate to meet the regional commercial land needs. The employment area is promising but various references to "mixed" employment raise concern that the large lot industrial opportunity will not come to fruition. The employment area should be designated on Metro's Title 4 map as a Regionally Significant Industrial Area and not subject to conversion or leakage to commercial uses. Finally, the concept plan lacks an equity analysis and any discussion on how it can address racial income disparities in the region.

The Urban Growth Report (UGR) is an opportunity to frame future regional planning discussions such as the regional housing production strategy, a refresh of the 2040 Growth Concept, and a needed regional discussion on economic development land needs that go beyond the technology sector.

We look forward to continuing this discussion.

Subject: RE: Sherwood West

Hi Dave,
You are correct that the City of Sherwood has submitted a proposal for adding the Sherwood West urban reserve to the urban growth boundary. I can't speculate on what the Metro Council's decision will be. Under state law, they can only add land to the UGB if there is a demonstrable regional need for it. We have not yet completed that analysis, which will be released in draft form in late June. Sorry I can't be of more assistance at this time.

Thanks,
Ted

Good afternoon,

I am working with the City of Sherwood and Clean Water Services on some land valuations in the Sherwood West expansion area.

It is my understanding that Sherwood is submitting to Metro the Sherwood West concept plan (attached) to Metro in a request for UGB expansion this year (2024).

I am hoping to report in my appraisal the likelihood or probability of Metro expanding UGB. I understand nothing is definitive, but I also want to know if there is a strong chance that the UGB expansion could be denied.

Thanks for your time. Feel free to call.

Re: Sherwood West Concept Plan Proposal

To Whom It May Concern:

My name is David Balfour, and I am a Commercial Real Estate Appraiser and am also a resident of Sherwood. As such, I would like to document my **support** to approve the Sherwood West Concept Plan as proposed by the Sherwood Planning Department as both a commercial real estate expert and a community member.

As an appraiser and investor, the Sherwood market has historically exhibited extremely limited employment land supply. While performing appraisal work and comparing real property sales in Sherwood, Tualatin, Wilsonville, Hillsboro, Beaverton, and other communities, it is consistently evident that Sherwood is the most constrained in terms of land supply as well as building supply. This creates barriers to market entry for tenant business owners. As an appraiser and investor, I believe my experience in these markets qualify me to understand the supply and demand constraints as well as the economic opportunity for the community of Sherwood (and the Portland Metropolitan Area as a whole). It should be noted that I have been monitoring the following potential expansion areas outside of Sherwood West:

- While there are lands in Hillsboro that were approved for industrial expansion, I personally have worked on +/-30 projects in that area over the past 18 months and know that every parcel is spoken for by a developer or users (all the way out to Jackson School Road where the UGB boundary lies). Thus, Hillsboro does not provide a substantive supply relief option.
- North Plains voters rejected expansion plans in May 2024, again providing no relief to the Portland Metropolitan area's industrial land shortage.
- On the east side, there are many transportation projects and funding constraints preventing parcels along Highway 212 from development based upon information I have gathered from multiple appraisal assignments. Again, the east side of Interstate 5 does not provide substantive supply relief options.
- Furthermore, it is frustrating to watch the growth that Vancouver and Clark County are experiencing (and benefiting) from our businesses and companies relocating across the Willamette River for a variety of reasons including supply constraints. While that Southwest Washington submarket is soaring, the Portland Metropolitan area is losing business, jobs, and tax revenue which I believe can be partially offset by suburban land supply creation in Sherwood West.

THE VALUATION GROUP
[redacted]
Sherwood, Oregon 97140
Voice: [redacted] [redacted]

- I want to point out that supply is constrained with hardly any fully served industrial sites. I was shocked to recently observe offers on a property that would take +/-5 years to simply perform site work (grading and utilities) to bring online for building construction.

Similarly, Sherwood has a shortage of residential housing supply which results in the available supply being significantly priced (upward pressure) and therefore unaffordable to many. I am a paid SSD employee (Football Coach) and volunteer on the Sherwood Youth Football Association Board where I hear from many parents that home pricing in Sherwood is extreme and prevents friends and family from moving to the area. Considering the planning and positioning of the Sherwood School District (which is one of the best in the state) to provide facilities that can accommodate substantive student growth, as well as surrounding lands that can support residential development, it is critical to increase residential land supply to maximize the Sherwood School District facilities and alleviate residential housing price affordability.

Lastly, and most critically, the recent roadway infrastructure improvements at two of Sherwood primary intersections (Sunset Blvd/Elwert Rd/Highway 99W and Roy Rogers Rd/Tualatin-Sherwood Rd/Highway 99WW) as well as the commuting routes of Roy Rogers Road and Tualatin-Sherwood Road, position both employment and residential users to benefit from urban expansion areas.

In closing, I believe that the community is well positioned from an infrastructure standpoint to support these expansion plans. Furthermore, expansion as proposed will strengthen the existing community and provide a highly desirable opportunity to work/live for the Portland Metropolitan area.

Therefore, I urge the Metro Council to approve the Sherwood West Concept Plan as proposed. Thank you for reading my testimony, your consideration of this matter is very much appreciated.

Sincerely,

David E. Balfour, MAI

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To whom it may concern,

As a resident and taxpayer of Sherwood, I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely,

Brittni Beers-Branco

Good Morning Metro:

As a property owner of 13 acres on 19945 & 19525 SW Kruger Rd, Sherwood, Or - outside of the UGB, I strongly support to be included in the UGB. We are directly behind the new Sherwood High School with a "turn around intersection of Elwert and Kruger which causes traffic going from Newberg to Hillsboro. The congestion from the High School Literally makes the case for growth, road improvement, local businesses so students do not have to use cars to cross 99W. Sherwood is the "gateway to the coast and wine country" it would be SAD to be like Tigard and just be a "drive though".

This also could be a promotion advertising to come to "OREGON as a DESTINATION".

Thank you,
Hella Betts

August 9, 2024

Metro Councilor Christine Lewis
(via email)

Dear Councilor Lewis:

I am writing on behalf of the Borland Property Owners Association, which represents owners located along I-205 and south of the Tualatin River (map attached) – and which has been in "Urban Reserves" for many years. It is part of the largest area within Metro's boundary that is Urban Reserves, and it is the only formerly Tier 1 Urban Reserve not yet within a UGB. Our comments focus on the need for housing, recognizing that there also is a significant market need for business/industrial land.

Metro's Draft Urban Growth Report (DUGR) as presented to Council is not merely a statistical exercise. It is in fact a package of major policy decisions that should be rigorously discussed by the Council in open, regularly scheduled Council meetings and only after that voted upon.

The DUGR appears against a backdrop of what is widely described as a housing crisis: A shortage of tens of thousands of units of housing that is affordable to working Oregonians, as well as a severe shortage of housing accessible with either direct or indirect subsidies.

In summary, we have a large supply-demand imbalance. Lack of supply has driven Portland-area costs well above comparably sized, successful cities. For example, based on National Association of Realtors sale price data from Q1 2024 (attached):

- Charlotte, North Carolina, is about 10% larger than Portland but its housing costs are about 20% less.
- Pittsburgh is of comparable size and its housing costs are about 42% of those of Portland.
- Even Phoenix, Arizona, is nearly twice Portland's size by population and yet its housing costs are about 10% less.

All these areas are prosperous, desirable places to live – and are more affordable than Metro Portland.

This crisis prompted Metro to go to the ballot and get approval for an income tax to pay for housing subsidies, and it has prompted the Legislature and Governors to collaborate on passage of major housing measures in recent years.

And yet there has been little movement of Metro-controlled urban growth boundaries, the most tangible means by which Metro can increase the supply of legally buildable land and by doing so mitigate costs. If we really are in the midst of a housing crisis, then moving UGBs should be part of the action plan to counter it.

[redacted] Portland, Oregon 97229 [redacted] · [redacted]

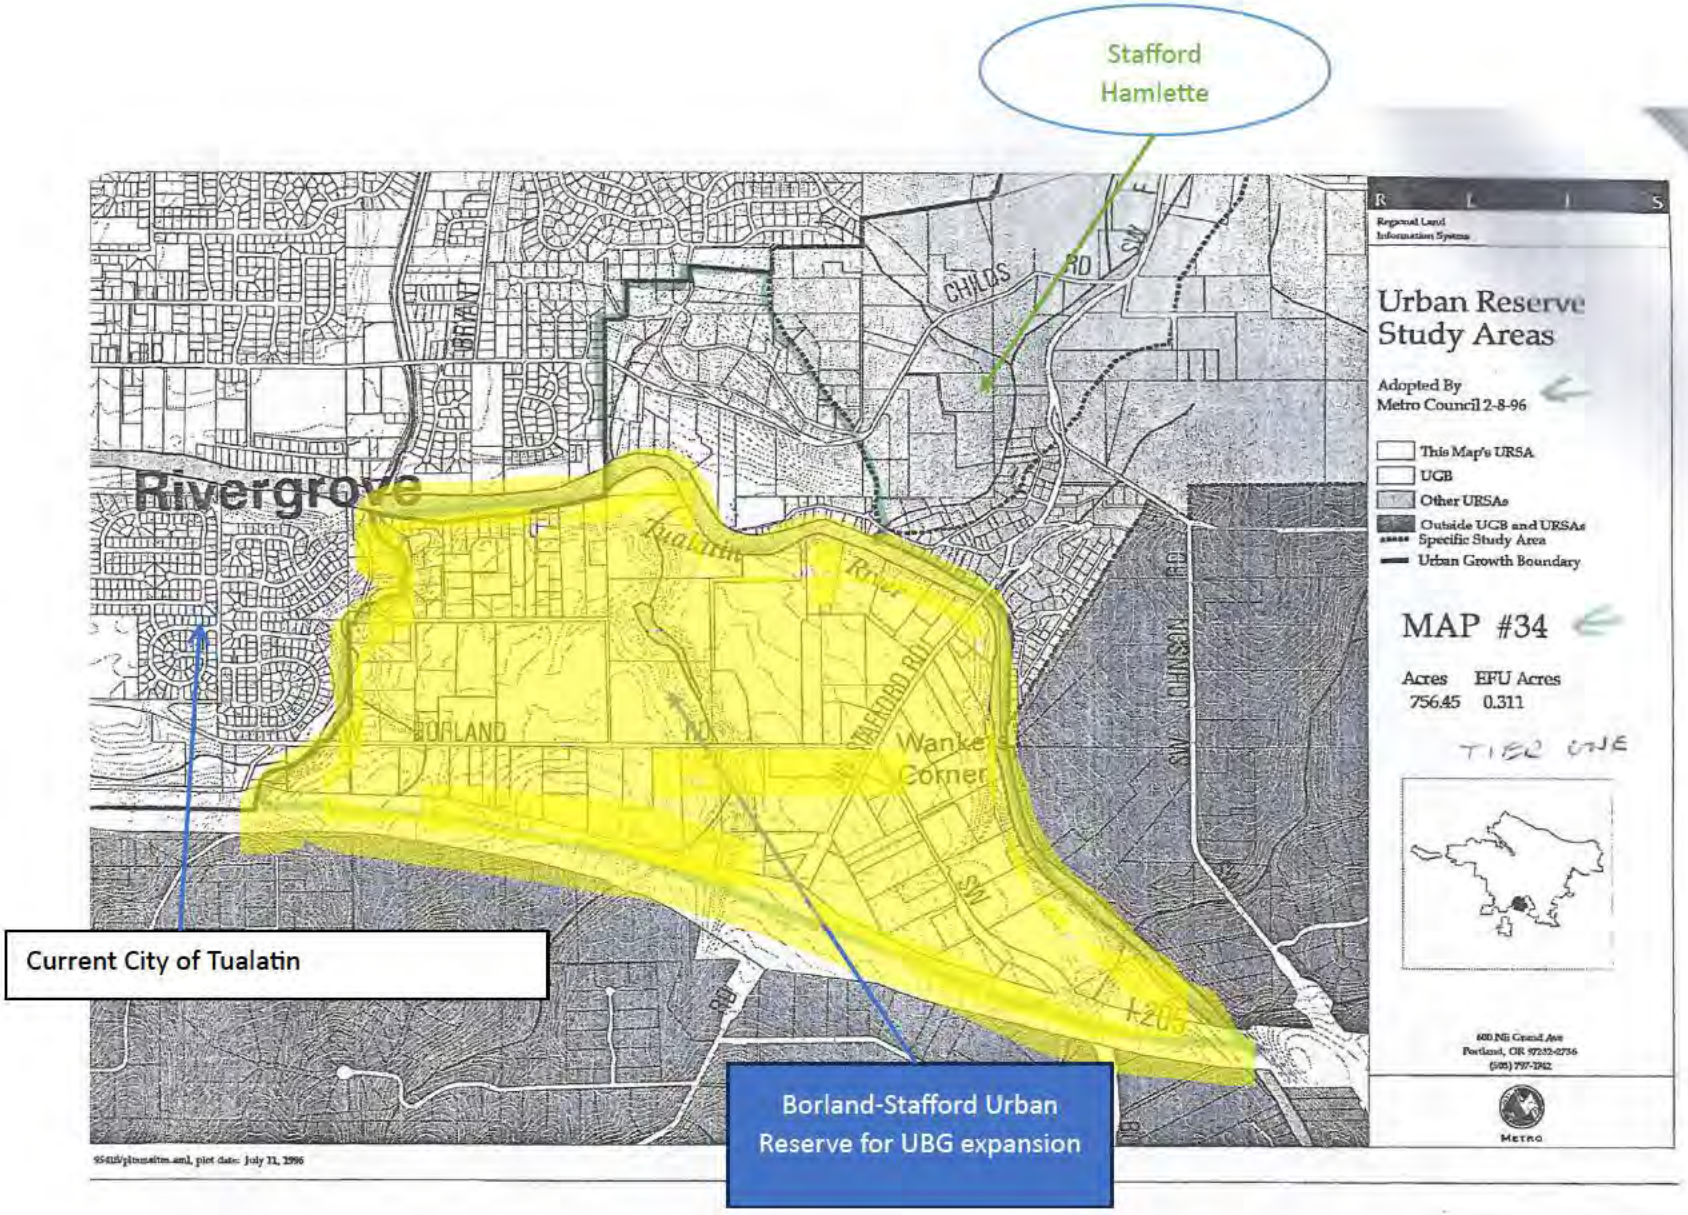
Our problem has become a negative flywheel feeding on itself: Excessive costs discourage in-migration necessary to make up for the macro trend of an aging native population, primarily driven by the Baby Boom generation and decreasing family sizes among following generations. An aging population leads toward economic stagnation and limited opportunity for the working-age population.

While Metro cannot realistically change the macro aging trend among the native population, in-migration is well within Metro's policy influence. It is not merely a matter of picking a high, medium, or low in-migration projection. *The policy choice before the Metro Council is whether to encourage in-migration*. It can do so by greatly expanding the supply of housing land.

The DUGR also makes highly questionable assumptions about acceptable density. While noting that younger people are willing or even desire to live in dense multifamily housing, it fails to note that many of today's 20-somethings soon will be 30-somethings with young families seeking single-family homes with a yard. If Metro expands UGBs now, then the housing they likely will desire could be reasonably available within 10 years.

The report also notes increasing amounts of dense or attached single-family housing such as multistory townhouses, and projects proportionately more such housing *without acknowledging the growing need of the older component of the population for single-level housing*.

Metro has a responsibility to meet these needs, which cannot be met entirely by infill and redevelopment. It cannot meet its responsibility to provide for sufficient legally developable land by merely ratifying a report that, despite its earnest statistical analysis, is a series of guesses tilted toward a slow- or no-growth policy choice.



Borland can be part of the solution and help Metro meet its statutory responsibility. Based on consultation with civil engineers and developers over many years, we are confident that the developable acreage in Borland easily could accommodate approximately 1,500 units of mixed types of housing, along with an adequate supporting retail center. Its existing access to I-205 and major arterials, with improvements, make it an ideal location from which to commute to jobs along the I-205 and I-5 corridors.

To have the deepest, broadest impact on metropolitan Portland's shortage of both housing and industrial land, Metro must make bold policy decisions like bringing Borland out of Reserves and into a developable UGB.

Best regards,

Tom Holt

RE: Comments on 2024 Draft Metro Urban Growth Report

Dear Ms. Madrigal:

Thank you for the opportunity to comment on the 2024 Draft Metro Urban Growth Report (Draft UGR) on behalf of the Port of Portland (Port).

The Port is a major industrial landowner in the region and active participant in economic development efforts statewide, such as the Governor's Semiconductor Competitiveness Task Force and Clean Tech Manufacturing Task Force. We are also active members of several Metro-convened policy committees, including the stakeholder roundtable convened to inform the 2024 growth management decision. Based on these perspectives, we have closely reviewed the Draft UGR, and submit the attached technical comments.

At a high level, we recognize the bounds of this exercise and appreciate the work Metro has done to provide insight into the process and invite a variety of perspectives. At the same time, we are concerned that industrial land demand is understated, and the effective supply is overstated. Readiness and viability for development rely on several factors beyond acerage alone, and we fear that identifying a surplus of supply without this realistic overlay could have negative policy implications by limiting much needed public and private investment in site readiness within the Urban Growth Boundary (UGB).

Creating opportunities to grow traded sector employment is essential to Oregon, which is dependent on income tax, as well as providing living wage jobs for residents. In addition, this finding impacts other important policy documents, such as the Regional Transportation Plan.

Given the importance of this topic to the region and the state, we look forward to working with Metro and other partners on processes to ensure an adequate supply of industrial land moving forward. Such partnerships could include revisiting Metro's 2040 Growth Concept to identify long term strategies to provide for an adequate industrial land supply, particularly for key traded sector industries. It would also be helpful for regional partners to update both the Site Readiness Toolkit and the Brownfields Inventory. Having this objective and current information, with mutually aligned methodology, will help us better craft and execute strategies aimed at our common economic development, land use and transportation goals.

Thank you again for the opportunity to engage and comment. Please let us know if you have questions or if you are interested in discussing any of these points in more detail.

Sincerely,

Teresa Carr,
Director, Business Development & Properties

Port of Portland

Port of Portland Technical Comments on Draft UGR

- Potential Underestimate of Land Demand: The cumulative impact of the assumption in Appendix 3 appears to be leading to an underestimate of land demand for specific use categories such as warehouse/distribution.
  - Appendix 3-assumptions about industrial building square footage appear to be too low. Several Port warehouse/distribution tenants have over 5000/sf per employee, underscoring a long-term trend toward automation and mechanization in the logistics industry.
  - Appendix 3-assumptions for industrial floor area ratio (FAR) of .25-.5 is likely too high, based on users that require extensive exterior storage and/or laydown areas, for example auto importers/exporters, ship repair and wind energy fabrication.
  - Appendix 3 Table 2 indicates that the distribution of building types for the Transportation, Warehouse & Utilities sector (NAICS 22,48- 49) is "31% Office, 6% Institution, 10% Flex/BP, 1% Gen Industrial, 43% Warehouse, 9% retail". Based on our experience, the assumed amount of warehouse building type for this sector should be much higher and certainly the majority of building space.

- Inventory Criteria: At the 7/17/24 MTAC meeting, Metro staff was asked about including industrial land with a 7% or greater slope in the inventory. A representative from Washington County noted that land with a 5% slope is typically used for industrial land inventories. When asked how much land would come out of the inventory if a 5% slope was used as the metric, Metro staff indicated "about 1,300 acres". This single correction would result in a 22% reduction of the purported 5,900 acres of industrial inventory identified in the Draft UGR.
  - Appendix 6 notes that the median size for industrial parcels in the assumed inventory is .6 acres, comprising a total of 1,934 acres. Parcels this small are not suitable for an industrial use even if they are zoned industrially. "Suitable" under OAR 660 means serviceable land designated for industri or other employment use that provides, or can be expected to provide the appropriate site characteristics for the proposed use. The implication is that likely hundreds of acres currently counted as part of the existing industrial land inventory in the Draft UGR may not be suitable for industrial purposes.

- Sherwood Expansion Proposal: The single expansion proposal under consideration for the 2024 growth management decision is from the City of Sherwood. The Port provided a letter in support of the proposal in March, 2024 and we continue our support. In particular, we support adding industrial land that could accommodate semiconductor and other traded sector industries. To ensure those lands are available for industrial use, Metro may want to consider amending the Title 4 map to apply a Regionally Significant Industrial Area (RSIA) designation. Further, while the Port is not opposed to the inclusion of "Hospitality" land per se, we feel this category (and the need for such land) should be better defined to avoid setting an unintended precedent.

- Future Urban Growth Decisions: Incorporate an Economic Opportunities Analysis (EOA)-based analysis of sector and business-district growth opportunities across distinct parts of the region. Also, de-link the demographic and employment forecasts by acknowledging the potential for additional in-migration based on traded sector job-growth opportunities. Providing additional incentives for communities on the edge of the UGB to undertake concept planning and provide infrastructure for future expansion areas, particularly for needed industrial land, is also recommended.

Subject: [External sender]Comments on City of Sherwood's UGB Expansion Proposal

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Dear MPAC, Metro Council and Metro,

We are writing with respect to the proposed Sherwood West Concept Plan ("Plan") that the City of Sherwood has submitted to Metro requesting an expansion of the Urban Growth Boundary by 1,291 acres. We have been homeowners in Sherwood since 2000, nearly 24 years and have a vested interest in seeing it grow in a positive way. This proposal is lacking in facts – both actual and demonstrated needs as well as supporting details for the costs of infrastructure and reality of job opportunities and should not be approved. During the past two years, we , and many others, have been vocal in our opposition to the Plan. We were quite surprised during the presentation to Metro on May 22, Tim Rosener (Sherwood Mayor) represented to the Council that there had been little to no organized public negative sentiment towards the expansion proposal. This is simply not true and is just one of many examples of anecdotal comments in the May 22 presentation to MPAC that were not supported by actual data and facts.

Our ask of the Council and Metro, as it considers the request in alignment with outlined legislation, purpose and protocol for UGB expansion requests, is to please Follow the Facts. The Sherwood West Concept Plan may appear to be an impressive package, however it represents the viewpoints and desires of politicians and land developers and not a demonstrated need for more developable land in Sherwood or the metro area as a whole.

- Survey 75%/85% respondents-Sherwood Residents- said NO to the expansion request.
- The data shows a need for housing for the city of Sherwood of only 600, while city of Sherwood's request ranges from 3,100 to 5,500.
- Population growth projections and data do not demonstrate need for the expansion. People are moving out of Portland Metro area to Washington state and other locations since 2020. While in 2018 it looked like the trend was to continue growth of 1.6%/year, it is clear that is steadily declining and is now 33% less than it was (2018 = 1.56%, 2024 = 1.04%). https://macrotrends.net/global-metrics/cities/23102/portland/population
- Infrastructure and Traffic impact from the Plan will likely be significant and expensive. The Plan greatly downplays and minimizes this critical issue. As an example, during the May 22 presentation it was represented that road improvements would improve Roy Rogers connection to I-5, when in fact a map will show they do not intersect. This is just one example of the glossing over, and misdirection of the Plan when very real issues are raised. Furthermore, system development charges for the proposed expanded area will be significant and make the housing itself expensive.
- There is no demonstrated NEED for a 1,291-acre expansion which is excessive especially in relation to the overall size of Sherwood today. Sherwood officials have justified and represented to its residents and concerned citizens that it is in the city of Sherwood's best interest to a) have a plan of record otherwise Metro will make a plan for Sherwood (is this true?), and b) to make a single request for as much land as possible.

- There will be significant impact to farm and forestland and a good portion of the requested expansion area is in protected areas and/or will cause runoff that impacts wildlife (can be seen on a map) and the additional pollution of so many cars and congestion on the road to get to jobs will further harm the environment.
- The planned housing will not be more affordable nor improve the homeless situation. Look at the actual cost of housing at nearby Cooper Mountain for a benchmark. A more viable solution could be turning existing vacant office real estate (which there is an abundance of) into low-income efficiency apartments.
- Similarly there is already a surplus of commercial, industrial and mixed employment real estate in the greater metro area due to hybrid work trends and due to AI and automation trends as evidenced by the announced local layoffs (Nike, Intel, etc)

We appreciate that Metro has a challenging and important role in that it must balance ensuring enough land for 20 years AND also protecting the metro area from urban sprawl. The proposal by Sherwood is not a demonstrated need, but a want of politicians and developers to increase the city of Sherwood from 3,130 acres to 4,421 acres (increase of >40% for a population of 20,000!) creating unnecessary urban sprawl, excessive and unplanned for traffic, and harm to farm and wildlife and it will not contribute to affordable housing because it will be incredibly expensive to add infrastructure and build. Metro's own 2045 Distributed Forecast shows Sherwood growing by less than 1000 people and with a need for only 800 households and Sherwood still has significant unused land opportunities that could satisfy its current housing needs (e.g. Brookman annexation, and existing available properties and land infill which could be used for multi-family and middle-housing to be centered around the Old Town hub of Sherwood and make more sense for growth).

Based on records we can find, the UGB just in the vicinity of Sherwood has already expanded by 2,270 acres since 2018 (Cooper Mountain, Beef Bend South and King City). This newer UGB land is still far from fully developed/populated and should be focused on first. Additionally, the requested 1291 acres would be the largest expansion in decades (and the second largest since Cooper Mountain was added to Beaverton – which incidentally is a city 5 times larger than Sherwood so it was less than a 10% expansion of land).

We ask ourselves and Metro whether this proposed Plan and UGB expansion is truly needed for either Sherwood or the Metro area as a whole and whether the ramifications to the environment and costs of development have been truly evaluated? Based on the facts it does not appear so, and we ask you to vote against and decide NOT to expand the Portland area UGB.

Respectfully,

Shannon and Todd Christiansen

Leapfrog Development: Corporate Capitulation and the Impact on Washington County, Oregon

Chris Christensen

Housing, Real Estate & Mortgage Specialist - Condominium Conversion Project Manager - Assumption & Loss Mitigation Specialist, Political Pundit and 2020 U S. Congressional Candidate

Published Jul 7, 2024

"*We soon found that the white men were growing rich very fast and were greedy.*"

- Chief Joseph, (or Hin-mah-too-yah-lat-kekt), Tribal leader of the Wallowa Band of Nez Perce

In the heart of Oregon's Silicon Forest, Intel's relentless advancements have epitomized the concept of leapfrogging technology. Intel CEO Pat Gelsinger often references **Moore's Law** in his speeches to investors and analysts, highlighting the company's commitment to doubling the number of transistors on a microchip approximately every two years. Yet, while the company's cutting-edge innovations have driven progress, they have also sparked a chain reaction with potentially significant economic and ecological ramifications for the surrounding communities where Intel's "fabs" are located.

The rapid pace of Intel's technological growth has, predictably, fueled a real estate frenzy in every Washington County, Oregon community. Bigger cities like Beaverton, Hillsboro, and Tigard are cashing in on the "micro-boom," and even small towns such as Banks, North Plains, Forest Grove, and the county's unincorporated agricultural areas are inflating a precarious bubble that could spell an economic and ecological "micro-bust" for the region and the state.

Technological Leapfrogging

Intel's Silicon Chip Manufacturing Footprint in Hillsboro, Oregon is Currently Undergoing a Major Expansion With Financial Assistance from the Federal CHIPS Act and Oregon Taxpayers. (Image Credit: Chris Christensen)

For some, Intel's Hillsboro campus stands as a beacon of technological prowess, consistently announcing advancements in integrated circuitry. The company's commitment to innovation has resulted in a near-constant stream of newer, faster electric circuits, each "generation" essentially rendering prior products as inferior or even functionally obsolete. With the rapid emergence of artificial intelligence and robotics, Intel is now poised to lead the sector for many years to come.

Or are they?

The Pacing Problem and Intel's High NA EUV Technology

A critical concept in technological innovation is the pacing problem, where the rate of technological advancement outstrips the ability of industries, governments, and society to adapt. Remember the 8-track tape player or the laser disk? **Intel's recent acquisition and implementation of High NA EUV (Extreme Ultraviolet) technology** is a prime example. This cutting-edge technology, which promised unprecedented advancements in semiconductor manufacturing, is already being overshadowed by **the anticipated future arrival of Hyper NA EUV technology.**

The relentless drive to stay ahead in the technology race begs the question: where will it all end? Each new leap in technology renders previous innovations obsolete almost as soon as they are introduced, creating a perpetual cycle of development and obsolescence. This breakneck pace strains the technological ecosystem and exacerbates the economic and environmental pressures on the surrounding communities.

The Real Estate Boom: Look Before You Leap

The influx of high-paying tech jobs at Intel has attracted a wave of new residents eager to capitalize on the opportunities presented by the booming tech sector. This sudden surge in population has driven up housing demand, leading to skyrocketing property prices in nearby communities such as Hillsboro, Banks, Gaston, North Plains, and Forest Grove. Once quiet agricultural areas in Washington County are now hotbeds of real estate speculation, with developers scrambling to cater to the burgeoning demand. The City of Hillsboro, for example, recently **approved over 8,000 new homes to be**

developed in South Hillsboro, once an agricultural mecca, with thousands more planned.

While this real estate boom has brought economic growth and prosperity to the region, it has also sown the seeds of potential catastrophe. The rapid pace of development has put immense pressure on local infrastructure and resources, straining the delicate balance between growth and sustainability. As property values soar, long-time residents are priced out of their communities, increasing social and economic disparity.

Drain the Swamp? The Role of Oregon's Politicians

A significant contributing factor to this unchecked development is the role played by Oregon politicians, swayed by **Intel's corporate wealth**. In exchange for the promise of higher tax revenues, these policymakers have sacrificed the **foundational principles of Oregon's land use planning system. Established to protect farmland, forests, and open spaces** while promoting orderly urban development, these principles have been sidelined in favor of ill-gotten economic gains. This abandonment of sustainable land use policies not only accelerates climate change but also **jeopardizes the environmental integrity of the region.**

The Concept of Leapfrog Development

Leapfrog development can be visualized through the metaphor of a frog leaping from lily pad to lily pad across a pond. In this context, the "lily pads" represent the various communities in Washington County—such as Beaverton, Hillsboro, Tigard, North Plains, Banks, Forest Grove, Cornelius, and Gaston. Instead of a gradual, cohesive expansion from one area to the next, development leaps over existing communities, creating new pockets of urbanization in a disjointed and sporadic manner.

This type of development results in patches of urban sprawl, often leaving significant gaps of undeveloped or underutilized land in between. These gaps disrupt infrastructure continuity, making providing consistent public services, managing traffic, and maintaining community cohesion challenging. The leapfrog metaphor vividly illustrates the haphazard nature of this growth, highlighting the inefficiencies and long-term challenges it introduces.

The Detrimental Impact of Leapfrog Development

Leapfrog development, characterized by rapid, sporadic, and disjointed urban sprawl, has far-reaching negative consequences for suburban and agricultural communities. The effects are multifaceted and profoundly detrimental, impacting traffic, congestion, crime rates, infrastructure needs, and the preservation of farms and forests.

- Traffic and Congestion

The influx of new residents and the expansion of residential areas significantly increase traffic and congestion. Roads that were once sufficient for rural communities are now overwhelmed, causing longer commute times, higher transportation costs, and increased pollution. The lack of adequate public transportation exacerbates these issues, significantly increasing daily travel, which is a burden for residents.

- Crime Rates

Rapid and poorly planned unchecked growth can also contribute to rising crime rates. As new neighborhoods emerge without the necessary social and community infrastructure, law enforcement resources are stretched thin. The absence of cohesive community planning can lead to social fragmentation and increased opportunities for criminal activities, undermining the safety and security of these newly developed areas.

- Infrastructure Needs

The sudden surge in population places immense strain on existing infrastructure. Water and sewage systems, schools, hospitals, and emergency services need help to keep up with the rapid growth. The cost of upgrading and expanding these services often falls on local taxpayers, leading to increased financial burdens and potential declines in the quality of public services.

- Preservation of Farms and Forests

One of the most significant impacts of leapfrog development is the loss of farmland and forests. The encroachment of urban sprawl threatens Oregon’s rich agricultural heritage and natural landscapes. Once fertile lands are paved for housing developments and forests are cleared, leading to habitat destruction, loss of biodiversity, and increased greenhouse gas emissions. This disrupts local ecosystems and undermines the state’s commitment to environmental sustainability.

- Water and Power Consumption: An Unsustainable Path

Another critical issue exacerbated by Intel's expansion and the accompanying real estate boom is the inevitable massive increase in water and power consumption. High-tech industries, particularly semiconductor manufacturing and data centers, are notoriously resource-intensive. Intel's operations in Hillsboro require vast amounts of water for cooling and manufacturing processes, straining local water supplies. Similarly, the power demands of these facilities are immense, further burdening the region's energy infrastructure.

As companies like Intel and other data centers continue to grow and expand in Washington County, the demand for these resources will only escalate. This increased consumption is unsustainable both economically and environmentally. Local homeowners already feel the pinch as utility rates skyrocket to meet the burgeoning industrial demand. **The competition for water between industrial uses and residential needs is becoming increasingly fierce, with industrial consumption threatening to outpace homeowners' needs.** This imbalance drives up prices and raises concerns about long-term resource availability and sustainability.

The Core Problem: Irresponsible Planning and Land Use Patterns

Oregon's Urban Growth Boundary Has Long Been the Dividing Line Between Unchecked Urban Sprawl and the Region's Agricultural and Rural Land (Image Credit: Reddit)

Leapfrog development and the resulting urban sprawl represent a terrible, politically ignorant, and egregious example of irresponsible planning and land use patterns. This

unchecked expansion is a land grab orchestrated by greedy corporate interests and the politicians they influence. The crux of the issue lies in the need to limit leapfrog development and urban sprawl by maintaining the integrity of the urban growth boundary and adhering to existing land use limitations and zoning regulations.

Expanding the urban growth boundary and relaxing zoning laws benefit developers and corporations at the expense of the community and the environment. This short-sighted approach undermines the foundational principles of Oregon's land use planning system, which were designed to protect the state's unique landscapes and promote sustainable development.

The Decay of Portland: A Case Study in Failed Political Policies

Articles People Learning Jobs Games Get the app

Image Credit: Chris Christensen - Image of Homeless Person Sleeping on Sidewalk near West Burnside Street in downtown Portland, Oregon

Compounding the issue is the decay of Portland, the region's urban core. Over the last decade, failed liberal political policies and capitulation to corporate and criminal interests have deteriorated the city's economic and cultural vitality. Rather than addressing the core issues within Portland and restoring it to its previous grandeur, political efforts have instead focused on enabling leapfrog developments farther and farther from the city center.

Portland's decline serves as a cautionary tale. The city's neglect has driven residents and businesses to seek opportunities in the outlying areas, exacerbating urban sprawl and placing additional pressure on suburban and agricultural communities. This shift undermines Portland's potential for economic and cultural revitalization and threatens the preservation of the outlying regions' natural, pristine beauty and agricultural significance.

The Looming Catastrophe: An Economic and Ecological Bust

The focus on providing corporate welfare to businesses such as Intel to attract cutting-edge technology to the region has created an unsustainable growth model that risks imploding with dire consequences. **If left unchecked, the current trajectory could culminate in a historic economic and ecological bust for the entire region.**

Economically, the inflated real estate market bears eerie similarities to past bubbles that have burst with devastating effects. The speculative frenzy surrounding property in Washington County is built on the assumption of perpetual growth and prosperity. However, as history has shown, such growth is rarely sustainable. A sudden downturn in the tech sector or a shift in corporate strategy could leave the region grappling with plummeting property values, foreclosures, and a shattered local economy.

Unchecked development threatens to irreparably harm the region's natural landscape. The agricultural areas that have defined Washington County for generations are being swallowed by urban sprawl, leading to habitat destruction, loss of biodiversity, and increased pollution. The environmental degradation resulting from rampant development could undermine the very foundations of the community, leaving behind a legacy of ecological devastation.

A Call for Caution and Sustainable Growth Policies

As Intel continues to push the boundaries of technological innovation, the surrounding communities and policymakers must adopt a more cautious and sustainable approach

to growth. The allure of quick profits and rapid advancements must be tempered with a deep understanding of the long-term consequences. Just as the relentless pursuit of leapfrogging technologies can lead to obsolescence and instability, leapfrog development can also result in fragmented communities and environmental degradation.

Both technological leapfrogging and leapfrog development share a common flaw: focusing on short-term gains at the expense of sustainable, cohesive progress. The rush to implement the latest technologies without fully considering the pacing problem mirrors the haphazard expansion of urban areas, creating patches of development that strain infrastructure and resources. The lack of strategic planning and foresight can lead to catastrophic outcomes in both cases.

For Washington County, the solution lies in curbing the sprawl by enforcing strict land use policies that prevent urban growth boundary expansion. Emphasis should be placed on revitalizing Portland, addressing its economic and social challenges, and restoring it to the vibrant urban core it once was. This approach not only preserves the natural and agricultural beauty of the surrounding areas but also fosters a more ecologically sustainable, resilient, and responsible community.

To whom it may concern,

As a resident and taxpayer of Sherwood, I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely, Brent and Michelle Christian

RE: Urban Growth Report, Draft 2024

Dear Council Members,

I am writing to provide comment on the Draft Urban Growth Report pertaining to the City of Sherwood's proposed Sherwood West Concept.

I would first like to thank the members of the Council and their staff for their efforts in managing and planning for growth in the Metro area. I am sure it is often a thankless task, but one which is greatly needed by the community.

I have carefully reviewed the Draft and have a number of concerns about the proposed expansion by the City of Sherwood.

1. **The Draft does not incorporate nor analyze the figures upon which the Concept is based.** Instead, it seems to simply analyze the "readiness" of the City for expansion. And although the City clearly perceives itself as ready to expand - the question remains to whether it should. The numbers strongly suggest, if not dictate, that the big growth this area experienced in recent years has crested and we are now in a period of declining growth. The proposed expansion is not warranted.
2. **The numbers provided by Sherwood are inaccurate and self-serving.** Sherwood has previously egregiously over-estimated growth populations. For example, the high school was bonded and built on the basis of an expanding population. It has cost the area residents millions of dollars. And it was overbuilt. The high school has a capacity for 2,400 students. It currently has 1,704 enrolled students. According to the documents submitted in 2017 for UGB expansion, the City forecast an initial enrollment in 2020 of 1,870 students with a further forecast of 2,400 students by 2045. In reality, not only did the high school not have 1,870 students in 2020, it STILL doesn't have 1,870 students and won't any time in the foreseeable future. Predicted enrollments are declining and significantly so. It is now anticipated that the 2032 enrollment will only be 1,530. The point is that the City has shown that its numbers for growth to support the expansion are at best inaccurate and at worst purposely overstated. They should not be relied upon in making your decisions.
3. **METRO has its own data to rely upon and it does *not* support an expansion in Sherwood.** As required by Ordinance No. 21-1457, the Council will need to rely upon current data for planning. Exhibit A of the Ordinance was duly accepted and adopted as such current data. It sets forth the population of Sherwood as 19,747 based on the 2020 Census and forecasts a population of 20,118 in 2030, and 20,562 in 2045 respectively. An increase of some 815 persons in the next 20 years simply cannot support an expansion of 3,120 housing units.
   Moreover, as intended, the population data contained in the Ordinance has been used and relied upon by other municipalities and cities, such as Portland (Ordinance 19157), Multnomah County

(Ordinance 1323), and Lake Oswego (Lake Oswego City Council Meeting July 16, 2024), in analyzing their own expansion needs. Likewise, METRO should also rely on its own data in determining which option to choose from among those laid out in the Draft UGB Report - especially given the City of Sherwood's propensity to exaggerate its figures.

4. **Farmland is vital to all and cannot be replaced.** To state the obvious, we all depend upon farms to produce the food we eat. The verdant soil of the farmland around Sherwood is a precious commodity. Once housing or commercial entities are sited on farmland they are never recaptured for agricultural use. The Draft UGB Report, at best, gives lip service to the need to maintain and protect farmlands. Especially in these days of heightened awareness of climate changes and the value of locally produced foodstuffs, it is difficult to support the removal of productive land. Even more to do so based upon the lack of a verifiable need for housing and commercial development. The UGB Roundtable perspectives on agricultural demand, page 57 of the Report, also positively reflects the value of farmland for employment and negatively notes the "increased cost and carbon footprint of pushing food production outside of Oregon." Commercial expansion should first use those areas already so designated and then those areas that cannot be reasonably used for food production.
5. **The proposed light industrial use / employment area is mis-characterized.** Page 56 of the Draft UGB Report states that the Oregon Semiconductor Taskforce found that, statewide, there was a need for four 50–100-acre sites for semiconductor manufacturing. Four. Statewide. Not a regional need as stated in the Report (see page 57). The Report seems to suggest that the proposed area has unique characteristics making it suitable for commercial development. One such characteristic is its proximity to the highway. The Report apparently takes this at face value. However, anyone who has tried to get to Interstate 5 or Interstate 205 from the proposed area can attest to the existing congestion and traffic woes in such an endeavor. Simply put, the Report fails to recognize or analyze the *lack* of highway accessibility.
6. **The residents of Sherwood, the people, do *not* want this expansion.** The City of Sherwood's own poll regarding the public support for this expansion is not adequately represented in the Report. The City's poll showed that 84% of respondents agreed or strongly agreed with the statement:

   > The Sherwood city council should ***not*** expand the city and preserve natural areas and farmlands in the Sherwood West area. (Sherwood West Poll Results (Mayor) Tim Rosener August 16, 2021). Emphasis added.

Thank you for your time and attention in reviewing these concerns. I can only hope that these comments, along with other public input, will have a meaningful impact on the Council's decisions. As John Muir once so aptly stated, "Not blind opposition to progress, but opposition to blind progress."

Respectfully,

Kimberly R. Cobrain

Subject: [External sender]Please Support the Sherwood West Expansion Plan

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Dear Metro Council Members,

My name is Mallory Cochrane, owner and founder of Birch Social - a consulting, marketing and events business dedicated to supporting the needs of small farms and food businesses in Oregon. My company is based in Old Town Sherwood, where I am also a resident and home owner.

I am writing to ask that you please **approve the Sherwood West Concept Plan as proposed by the Sherwood City Council and widely supported by the Sherwood community**. This Concept Plan was a result of two years of planning and public input to decide the future of our unique and special city.

As a native Oregonian, I intentionally chose to raise my family in Sherwood because of the **small town character, sense of community and amazing education system and public services**. Many other people are attracted to Sherwood for these same reasons. However, we need **more housing** for these new residents and increased **employment opportunities** to keep people working in our community rather than commuting elsewhere.

With inevitable population growth on the horizon, it is critical that **smart growth** practices be applied to the Sherwood West area so that we are future-proofing development in a way that **enhances our community, increases economic prosperity and protects farmland, natural spaces and resources**.

As outlined in the Concept Plan, I believe that Metro Council should:

- add 340 net acres of **residential land** to the Urban Growth Boundary (UGB)
  - *Comment: Our region will add approximately 315,000 new residents and 137,000 new jobs over the next 20 years under a baseline growth scenario.*
- add 130 net acres of **flex industrial land** to the UGB
  - *Comment: Sherwood West is well suited to capture new and expanding demand for industrial space due to its favorable parcel size, ownership, and low slopes.*
- add 135 net acres of **commercial and hospitality land** to the UGB
  - *Comment: Economic development requires a land supply that enables specific industries to thrive.*

Again, I request that the Metro Council stand with the residents and businesses of Sherwood and **approve the Sherwood West Concept Plan as proposed.** I would greatly appreciate a response with the Metro Council's position on this issue. I appreciate your time and thoughtful consideration.

Sincerely,
Mallory Cochrane

1000 Friends of Oregon appreciates the opportunity to participate in the Urban Growth Stakeholders Roundtable, comment on the urban growth report, and partner with Metro on multiple areas of alignment such as unlocking more funding for critical infrastructure needs, addressing our housing affordability crisis, and bringing more mobility options for Oregonians in a 2025 transportation package.

The Metro Council has an opportunity to set the region up for success for generations to come if it uses one of its strengths: data-driven long-range land use planning. Strong land use planning invites a collective imagination to create the best future possible for all residents, ones that currently call the region home and ones that will call this region home. But the best future possible has always been, and will always be, under threat by a select few seeking to exploit the region's limited resources: whether it be our world-class soils, the water we drink, the air we breathe, or the health and ingenuity of our people.

1000 Friends of Oregon shares our 5 major takeaways for how to set our region up for success as you read the draft urban growth forecast:

1. Metro Council should focus on how to improve the quality of life for all residents now and into the future.

2. The region's natural resources and low weather extremes offer us a position of strength if Metro decides to steward them well.

3. The biggest bang for buck and the quickest way to regional success is to build upon our existing footprint, support our regional network of main streets, and restore the core.

4. Prepare for "Operational Efficiency" and protect people's livelihoods.

5. Raw land is the least of our issues when it comes to setting the region up for success. Land readiness on the other hand…

***

1. Metro Council should focus on how to improve the quality of life for all residents now and into the future. We must remember the entire purpose of good land use planning and community development: to enhance the health, safety, and well-being of all Oregonians. We lose sight of this purpose when conversations are reduced to debating the number of acres. Rather, we should focus on creating measurable and meaningful indicators for success to guide our land use decisions and the limited public and private dollars we have. The region's indicators for success should include:

> **Life Expectancy by Zip Code.** Zip codes still serve as an indicator for how long and how well someone lives in the greater Portland area. Someone's life expectancy in Multnomah County (79.40 years) is less than those living in Clackamas County (80.90 years) and even less than Washington County (82.60 years[1]). Metro Council and staff should be keenly aware of this discrepancy across counties and prioritize resources and staff efforts to help areas that have the lowest life expectancy in the region. Blue Zones research could guide Metro's policy and funding decisions to better understand how to improve life expectancy and quality of life for residents in the region.
>
> **Household Costs/Affordability**. The largest household expense for the average resident is housing. The second largest household expense is transportation. Utilities and food also appear as common expenses. Metro should make land use decisions to help cut down on these household expenses for the average resident. If Metro decides to allow urban growth boundary expansions for residential, industrial, and commercial land where the majority of residents are going to feel the need to drive everywhere,

[1] Robert Wood Johnson Foundation, Accessed August 2024. https://www.rwjf.org/en/insights/our-research/interactives/whereyouliveaffectshowlongyoulive.html

Metro has made a choice to increase the household costs for the average resident. Urban growth boundary expansions not only increase driving at the edge, but they draw away investments that could be made where people already live to increase their transportation options. If Metro decides to fund planning and infrastructure efforts that allow the majority of residents to walk, roll, and bike to where they need and want to be, Metro has made a choice to decrease the household costs for the average resident.

Number and Quality of Age Friendly Communities. As presented to the Urban Growth Stakeholders Roundtable, Oregon enjoys a significant number of residents who are older in age. As our residents age, their needs change. It's no longer easier to drive where they need to get to; incomes become fixed and possibly lower than where they were working full time; and their social and civic participation styles may change.

As the World Health Organization and AARP's Livable Communities note, "age-friendly communities are places where people of all ages [and abilities] feel supported and included, and where older people can age well[2]." Age-friendly communities include three major components: physical (e.g., housing, transportation, outdoor spaces, and amenities); social (e.g., civic representation and participation, community involvement); and service (e.g., health care, emergency response). To create age-friendly communities, the Metro Council and staff should support land use decisions, planning grants, and infrastructure requests that create walkable and rollable neighborhoods where people are able to age in place, get to where they need and want to go safely and on their own, and be connected with their community on their own terms[3]. Orenco Station is a great example of incorporating age-friendly principles into planning and development by combining residential and commercial uses alongside pedestrian, bicycle, and transit investments; in contrast, planning that results in commercial and industrial development with large parking lots requires residents to use automobiles to safely navigate the community and thereby fails to create an age-friendly community.

---

[2] AARP, Livable Communities, https://www.aarp.org/livable-communities/network-age-friendly-communities/

[3] Research demonstrates that placement in a nursing home/care facility drastically reduces the life expectancy for the individual. It also adds significant costs to the individual and any family members who may be paying for this change. A monthly rate for a studio in a housing facility that provides supervision or assistance with activities of daily living is approximately $6,161.91 for the Portland area (compared to the national average: $4,999.01 per month). https://www.newyorklife.com/resources/financial-calculators/costs-of-long-term-care

Number of Communities of Concern in EPA's Environmental Justice (EJ) Screen (or regional equivalent). The Metro Council and staff should be keenly aware of the number and location of communities who are burdened with environmental pollution, climate change risks, health disparities, and critical services gaps. Often, communities ranked in EJ screen are communities that are majority low-income, speak languages other than English, qualify for free and reduced lunch, and are people of color. Metro Council and staff should set a goal to have zero communities in the greater Portland area rank highly in the EJ Screen and develop policies and align investments to reach this goal. Metro Council and staff should reject urban growth boundary expansions and other investment strategies that draw resources away from investing in communities that rank highly in EJ screen.

2. The region's natural resources and low weather extremes offer us a position of strength if Metro decides to steward them well.

The greater Portland area is positioned to be an oasis of refuge from some of the most extreme negative impacts of climate change. This is a major advantage when drawing residents and businesses to the region (even noted by the private sector[4]). While we have much work to do to adapt to the changing conditions to protect the health and safety of residents, the Pacific Northwest is rated as one of the most climate resilient areas in the United States.

Metro Council and staff should build upon our unique position by stewarding our natural resources not just through voter-approved parks and nature bond measures, but through its regulatory authority in its land use decisions. For example, development that does not require high-nutrient soils should not be permitted on these soils[5]. Likewise, Metro Council and staff should coordinate with other natural resource agencies (Soil and Water Conservation Districts, Department of Agriculture, Department of Fish & Wildfire, etc.) to develop a clear, streamlined approach toward monitoring the quantity and quality of our water sources and air sheds. Each of these water sources and air sheds have carrying capacity limits (recognized in Land Use

[5] Oregon's own Climate Action Commission has recommended "no net-loss" policy for high-quality farmland to reach our climate mitigation and resilience goals. Institute for Natural Resources at Oregon State University for the Oregon Global Warming Commission. September 26, 2023. https://static1.squarespace.com/static/59c554e0f09ca40655ea6eb0/t/6578da822755f905770c5901/1702419079574/2023-Natural-Working-Lands-Report.pdf

Planning Goal 6). Urban growth expansions should consider the carrying capacity of water resources and airsheds in order to assess and guide growth in the region. For example, if one company within an airshed applies and is awarded a permit to emit carbon monoxide to the top of the allowable limit for the entire airshed, Metro Council and staff must include that information in guiding growth away from that airshed to protect the health of residents and help businesses avoid violations of, at minimum, Clean Air Act and/or Land Use Planning Goal 6.

3. The biggest bang for buck and the quickest way to regional success is to build upon our existing footprint, support our regional network of main streets, and restore the core.

Metro Council and staff must ensure the region contributes to addressing the housing production shortfall and the affordability crisis through a holistic approach (remembering the indicators for successful quality of life including household cost/affordability). Building at the edges won't set the region up for success. And, Metro Council and staff should reject any attempt to expand the boundary or use limited public dollars without any element of guaranteed affordable housing.

We have a limited number of dollars for infrastructure, limited amount of labor for construction, and limited materials for construction. We urge Metro to prioritize developers and/or local jurisdictions who are building partnerships around transformative, catalytic (re)developments as part of holistic land use planning. Some notable opportunities to invest in our existing footprint, support our regional network of main streets, and restore the core include but are not limited to:

(Re)Development	**# of Homes (Est.)**	**Climate Friendly Area? (Y/N)**	**Guaranteed Affordability Component? (Y/N)**
Lloyd Center	5000	Y	Y
Broadway Corridor	2500	Y	Y
OMSI Revitalization District	900	Y	Y
Albina Vision Trust	1100	Y	Y
Hayden Island/Jantzen Beach (I-5 Bridge Corridor)	2000	Y (with light rail and complete street investments)	Y

Rockwood	TBD	TBD	TBD
Jade District	TBD	Y	Y
Gateway	TBD		
Hillsboro's Block 67	269	Y	Y (if the City of Hillsboro allows for affordable housing)
Willamette Falls Revitalization (West Linn and Oregon City's McLoughlin Blvd Enhancements)	TBD	TBD	TBD
122nd and Stark	TBD	TBD	TBD

4. Prepare for "Operational Efficiency" and protect people's livelihoods.

As we enter an era of mainstream artificial intelligence, more jobs in more sectors of our economy are vulnerable to automation. From manufacturing to advertising, the future is uncertain. To bring more certainty to residents and to be ready for changing technology and economic sectors, Metro and local jurisdictions must prioritize quality of life for its residents over company profits as an indicator for success. In doing so, the Metro Council and staff must be surgical about allowing any expansions for industrial lands and requiring enforceable, specific conditions on any industrial lands to create lasting high-quality jobs for residents and minimize the probability and impacts from mass layoffs due to automation and/or outsourcing.

If the Metro Council allows industrial developers to pave over our working lands for robots, residents lose their ability to provide for themselves, their families, and contribute to the region through their employment. Our region has suffered from broad definitions of industrial lands that do not result in development that brings high-quality jobs for residents. Instead, it adds a patchwork of uses: from gas stations to big-box chain retail stores to strip malls to truck stops. Our region has suffered from our lack of discipline to protect our existing industrial lands for development that can bring high-quality jobs, especially manufacturing jobs. While we still have a reported surplus of industrial lands, now is the time to protect them with specific, enforceable conditions on any industrial lands in our region.

5. Raw land is the least of our issues when it comes to setting the region up for success. Land readiness on the other hand…

The urban growth report's forecast includes a very optimistic outlook on utilizing vacant office buildings and land throughout the region, notably downtown Portland. We also see vacant or nearly vacant office parks and retail areas and their accompanying large swaths of empty parking lots throughout the region. Metro should focus its policy choices and investments on (re)developing and revitalizing these areas; they already have infrastructure in place and are located in existing communities. Recent layoffs by large international corporations illustrate that worldwide business cycles and other factors influence investment decisions, not land supply.

Even with the optimistic and arguably inflated job growth forecast, the urban growth report notes there is a surplus of industrial land even assuming the high growth scenario. We have heard for well over a decade that land readiness - bringing land to Tier 1 - is a main challenge for local jurisdictions. We also know that multiple cities and towns are faced with budget issues, whether it's structural budget deficits like Washington County and City of Portland or whether it's smaller towns that are seeking a larger revenue base like the City of Sherwood.

1000 Friends of Oregon understands and sympathizes with the funding and financing challenges local jurisdictions face when bringing land to Tier 1 readiness and maintaining this infrastructure. It's a motivating force behind our advocacy to work with our statewide membership to secure infrastructure dollars for housing construction (SB 1530 (2024), Senator Kayse Jama; HB 4134 (2024), Representatives Elmer, Gomberg, and Helfrich; and a housing project revolving loan fund (championed for multiple sessions by State Representative Pam Marsh), and to bring main street revitalization funds to towns across Oregon, especially for smaller jurisdictions.

What we know is that adding raw land doesn't pencil for local jurisdictions. What may seem like a revenue boon comes with newer, significant expenses: brand new sewer, water, fiber optic cables, roads, lighting. Suddenly, the city is back in the same predicament it started in: budget shortfalls. We are committed to working with cities and towns on real solutions to funding and financing for land readiness and core public services that are paramount to enhancing our quality of life for all Oregonians. We hope we can count on Metro's leadership to daylight the real problems and real solutions to this challenge.

***

We appreciate Metro Council and staff's time in assembling the draft urban growth report's forecasts, presenting to multiple stakeholder groups, and offering an open line of communication throughout the process. None of us know what the future holds in store; tomorrow is just a rumor after all. But, 1000 Friends of Oregon is committed to working with our statewide membership to choose land conservation and development approaches - policy decisions and funding and financing strategies - to create a future that we are proud and excited to live in.

We are available to meet Metro Council and staff to discuss these key takeaways. We are also happy to host Metro Council or staff in meetings with our partner organizations who are committed to creating a better future for all residents, now and into the future.

Sincerely,

Samuel Diaz
Executive Director

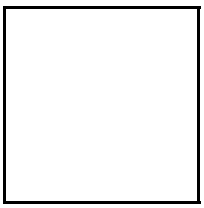
Good morning and happy Friday Marissa, Kristin, Catherine, Malu, Eryn, and Ted,

I wanted to personally send you 1000 Friends of Oregon's 5 takeaways on the draft urban growth forecast. I've been told the urban growth report isn't a policy decision by itself, but may be used to inform future policy and funding decisions. We hope these 5 takeaways can be helpful in shaping actions to create the best future possible for residents of our region.

More than happy to head to Metro or have you here at the 1000 Friends of Oregon office to chat through these takeaways and hear your perspective. Just let me know if you'd like to schedule something.



Thanks so much for your service.

Sincerely,
Sam Diaz

RE: Sherwood West UGB Expansion Plan Support

To Whom It May Concern:

As a former property owner in the Sherwood West area, and in agreement with relatives who still own properties there, this letter is in strong support of the Metro Council's efforts to reasonably expand the UGB. Recommendations from the Urban Growth Report findings are clear. After years of arduous studies and extremely detailed analyses, the Metro Council must finally act on next step growth management decisions.

A great deal of preparation and investment has been made in the Sherwood West area to accommodate necessary housing growth and affordability. The list of improvements in recent years is lengthy. Likewise, economic and job growth go hand-in-hand with future essentials. It is long past time to adopt the completed concept plan for proposed expansion within the presently designated urban reserve area. Anything less, as suggested by self-serving community members like the Sherwood Farm Alliance, would be a further irresponsible obstruction to the realities of future progress.

In place of my attendance at the upcoming Zoom meeting, thank you for including the above comments as a matter of record.

Sincerely,

Charles Digregorio

[redacted]

Portland, OR 97239

To: Metro

My name is Peter Dinsdale.

I was raised in Sherwood and my family's agriculture business is on the edge of the proposed UGB expansion area.

I am a supporter of the West of Sherwood Farm Alliance.

We were shocked and dismayed when Metro Councilor Juan Carlos Gonzalez announced his support for the controversial proposed Sherwood UGB expansion earlier this month.

By doing that, he made it perfectly clear that he doesn't have the slightest interest in the information, analysis, and values of the people who live here, or possibly from anyone, anywhere in the region.

In 2021, people in and around Sherwood responded to an online survey about this proposed UGB expansion.

84% of the respondents agreed, with this statement:
"*The Sherwood city council should NOT expand the city and* [should instead] *preserve natural areas and farmlands in the Sherwood West area*."
About 75% of respondents agreed strongly.

Let me repeat those numbers: 84% opposed the expansion and 75% strongly. That was the same result from a survey taken five years earlier.

Before you dismiss this opposition as the sentiments of a bunch of NIMBYs, you might consider some of the facts that we have been presenting to you at your monthly meetings:

FACT: Housing will be unaffordable to the people taking the jobs in the expansion area, causing more commuting, heavier traffic on our already burdened roads, and more pollution, which will NOT help in reducing greenhouse gas emissions.

FACT: Metro approved a UGB expansion in 2017, at Sherwood's request to build a new High School on 82 acres, based on projections of soaring enrollment. Today, after spending $248 million in tax dollars, the School District's consultants expect enrollment to decline within seven years.

FACT: The expansion will cause the loss of some of the best farm and forestland in the world. The result will be the loss of countless agricultural jobs and damage to Chicken Creek, which helps maintain the water quality in the nearby National Wildlife Refuge.

We are counting on you - unlike Councilor Gonzalez - to actually listen to the citizens, hear the facts, and reach an independent judgment.

Thank you for your service.

Hell no, I don't want it to get larger. That is exactly what people who have moved here want. They want to make it larger so they can snatch up those investment properties.
People from outside of Oregon came here with their deep pockets to buy up Portland and make it grow.
We the people of Oregon don't need their deep pockets and wealth. Portland laws were put in place long ago by people with the foresight to realize people would want to do this to our GEM.
Hell no, tell them go invest elsewhere. Portland is perfect the way it is.

To: Metro 2040
Cc: [redacted]
Subject: [External sender]Testimony in opposition to Sherwood expansion

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To whom it may concern:

Our nonprofit organization, Farmland First, is writing to convey our strong opposition to the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres.

This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes.

In 2022 Metro projected Sherwood would grow by a scant 3% over the coming decades. The Sherwood School District has forecasted enrollment for the new high school will begin to DECLINE in 2027. Sherwood has enough vacant land to accommodate new housing and jobs for years to come, when planned and developed wisely.

The types of industry that are planned are land-extensive, taking up farmland despite the drastic decline in farmland in the county and natural resource land despite the fact that only 15% of original significant natural resources remain in the county. It is a red herring to state that the goal is to increase the number of residents who work in the city - that correlation is not necessary for a functioning city, especially one in Metro where many people work in one city and live in another. If the city lacks jobs, it may be of its own making because it recently approved many expensive homes. It should not be rewarded for poor planning. And the type and extent of industry proposed is expensive to provide with infrastructure and services, yet there is no Taxpayer Impact Statement on the costs.

Farmland First stands with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely,
Nellie McAdams
Farmland First

Sherwood UGB expansion comments,
Brian Fields
Secretary, Eastview Road Neighborhood Association

I urge the Metro Council to scale back the Sherwood West Urban Growth expansion. We do not have the transportation infrastructure to support this growth. In addition, the City of Sherwood has not done any planning, not even "conceptual", to expand the capacity of Elwert Road, the only viable north south connector.

The current plans for Elwert Road are inadequate for the future growth planned.

Elwert road is serving as a regional connector. Even without bringing in additional land in the Sherwood West Urban Reserve we can expect the traffic flow to increase. With the addition of large amounts of new housing the burden on the existing road will only increase. How has Sherwood planned for increased capacity? They have not.

The Sherwood West concept plan shows the vision that Elwert road remain one lane in either direction with the addition of turn lanes. The city has repeatedly said that their vision of Elwert is that of a neighborhood street. This flies in the face of the current reality of an already overburdened regional connector, let alone showing any sense of planning for the future to accommodate a greatly increased local population. The only mention in the Sherwood West concept plan of planning for future connectivity is vague mentions of conceptional connectors. You can reference the "Transportation and Infrastructure" Section on page 101 of part 1 of the Sherwood UGB expansion proposal.

"North-South Connectivity – The concept of adding a route to enhance regional north-south connectivity will require future study. Additional feasibility and cost analysis will be

necessary. This should be considered as a long-term strategy, rather than an essential component of early stage transportation planning in Sherwood West."

But the truth is that the Sherwood West topography is not going to allow any new north south connectors. During the public outreach portion of the Sherwood West concept plan much feedback was provided to the city outlining specific complications for a north south connector west of Elwert Road. The City's own traffic modelling demonstrated that regional traffic could not be diverted from Elwert Road to any significant degree. The land is riddled with steep slopes and is bisected by Chicken Creek. In addition, the border of Sherwood West veers sharply east when you go north of Edy Road. If this hypothetical connector were built, as it moved north it would run into Rural Reserve land. Due to this a connection to Scholl's Sherwood Road to the north could not be completed. This means any road that was built would have to feed back onto Edy and Elwert, the existing transportation corridor.

There really is no choice but to improve the existing transportation corridor, but the City of Sherwood's West Concept plan does the opposite. Sherwood is proposing to move portions Elwert Road off it's current north south alignment and meander to the west, pass through two round-abouts, incur a new Chicken Creek crossing and then meander back to the Elwert Road current alignment in the north.

We have examples in the nearby region of what successful road planning would look like. The massive development to the north of Sherwood West, on Roy Rogers Road, has been accompanied by expansion of that road to 4 lanes. If you want to see aesthetically pleasing road expansion, we need only look to the improvements Lake Oswego has done on Boones Ferry Road. The road was both

improved to 4 lanes with a turn lane, but also includes attractive landscaped dividers and sidewalks. This is much like Sherwood has proposed, but with a critical difference, Lake Oswego recognized the need to increase capacity while making attractiveness an important part of their road design. Both can be done.

To be clear my point is not that Sherwood has not already solved the capacity problem prior to asking for an Urban Growth Boundary expansion. The problem is that Sherwood is not even planning for increased capacity. In fact, their public statements during the West Concept Plan outreach process indicated they want to discourage regional traffic and keep Elwert as a neighborhood street. See the description on page 227 of the submittal, in the Section title "SW Elwert Road Design Concept". Make note that the designation for much of Elwert Road is "Residential Boulevard". The is much risk if Sherwood doubles down on this approach that near term development will forestall any future capacity improvements on Elwert Road.

Their proposal to bring in the entire Sherwood West Urban reserve should be scaled way back until the City actual provides realistic transportation planning. Bringing the entire 1200 acres of Sherwood West now into the UGB is only going to compound a local a regional transportation quagmire which already exists. Sherwood needs to confront the reality that topography and the Urban Reserve boundaries themselves prevent any alternate north south connector. I encourage Meto to not approve Sherwood's ask to bring in the entire Sherwood West Urban Growth Reserve into the Urban Growth boundary.

Portland, OR 97232

August 20, 2024

Dear Metro Council Members,

As the largest association of housing providers in Oregon, Multifamily NW is dedicated to ensuring that our communities thrive through sustainable growth and adequate housing supply. We are writing to express our strong support for the adoption of a high-growth forecast projection as you evaluate the urban growth strategy for the Portland Metro area. As you know, our region is currently navigating the consequences of a severe housing crisis, and it is imperative that we take bold, forward-thinking action to address the urgent need for housing.

Undersupply is the Root Cause of Housing Crisis

The Portland Metro area is experiencing an unprecedented demand for housing, which far exceeds the available supply. According to an alarming report by ECONorthwest, our region is already facing a housing shortage of more than 59,000 homes, with an additional need for 10,683 homes to accommodate our growing houseless population. Moreover, it projects that the region will require the construction of 294,853 new housing units over the next 20 years. These figures significantly surpass Metro's current estimates of 143,300 to 203,200 new units.

The numbers provided by ECONorthwest paint a stark picture of the housing crisis we are facing. By adopting a high-growth forecast projection, Metro can more accurately prepare for the higher-than-baseline growth that our region will (hopefully) experience. This proactive approach will enable us to meet the housing needs of our rapidly growing population, while also mitigating the affordability challenges that threaten the livability of our communities. And, if population growth does not proceed as expected, the land will not be impacted.

Furthermore, residents in the Portland Metro area are facing increasing barriers to home ownership due to the affordability consequences that our undersupply has caused. If the council adopts and implements the high-growth forecast projection, home ownership will be more attainable for communities across the region.

Portland Metro Should Welcome Responsible Development

Additionally, Metro Council should shape a new policy that recognizes the low capacity for housing development inside UGB lands and the extreme need for new housing. The current estimates indicate a surplus of +9,050 units, which we believe is unrealistic given the actual deficit of -84,000 units needed inside the UGB.

Attempting to control where and how the market will adapt can have unintended consequences. Metro should avoid imposing restrictive policies that risk pushing housing developers to other U.S. markets with fewer regulatory barriers. Instead, we should focus on creating an environment that encourages development and investment in the Portland Metro area, ensuring that we remain competitive and capable of meeting our region's housing demands.

A crucial component of addressing our housing crisis is expanding the Urban Growth Boundary (UGB). By expanding the UGB, we can increase the availability of land for development, thereby helping to slow the escalating costs of housing. As we have all seen firsthand, the limited supply of land within the current UGB constrains development and drives up prices, making it increasingly difficult for residents to find affordable housing.

Expanding the UGB will not only create more opportunities for housing development but will also encourage competition, which can help slow the increase in housing costs and make living in the Portland Metro area more affordable. It is essential that we take this step to ensure that all residents have access to housing that meets their needs and budgets.

Acknowledgment of Employment Lands Considerations

While our primary focus is not directly within the commercial and industrial development sectors, we acknowledge that the availability and management of employment lands significantly impact the overall growth and sustainability of our communities. In this regard, we recommend that the Metro Council consider discounting the approximately 1,300 acres of land with slopes exceeding the 7% grade threshold, which is generally identified as the industry standard for commercial and industrial development. We have an obligation to ensure the land classified as viable truly meets the practical requirements for development.

By integrating these considerations, we believe that the Metro Council can better strategize the use of employment lands to foster balanced development, support economic vitality, and contribute positively to the community's housing and employment needs.

City of Sherwood Proposal Deserves Approval

Furthermore, Multifamily NW fully supports the City of Sherwood’s proposal for expansion without any conditions. Sherwood has demonstrated a commitment to responsible growth through a rigorous public engagement process, and we trust in their ability to understand and address their community's needs. Metro should respect the decisions made by local communities and support their efforts to grow in a way that aligns with their unique vision and values.

It is crucial to trust Sherwood's expertise and ongoing community engagement process. They are best positioned to determine how to grow reasonably and responsibly, ensuring that their expansion aligns with local needs and aspirations.

Conclusion

In conclusion, Multifamily NW strongly advocates for the adoption of a high-growth forecast projection as part of the urban growth strategy for the Portland Metro area. By acknowledging the true extent of the housing crisis, rejecting restrictive development scenarios, expanding the urban growth boundary, and supporting local initiatives, we can pave the way for a more prosperous, affordable, and sustainable future for our communities.

We appreciate the Metro Council's dedication to addressing these pressing issues, and we are confident that, together, we can create a housing strategy that meets the needs of our growing region. Thank you for considering our perspective and recommendations.

Sincerely,

Gary Fisher

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Good Morning,

My name is Zach Lindahl, and I am the Director of Government Affairs for Multifamily NW. Our association is the largest coalition of housing providers in the state of Oregon, representing more than 275,000 units. In addition to frequent compliance training and hundreds of networking opportunities, our association advocates for common sense housing policy at all levels of government on behalf of our members. Our top priority is to keep Oregonians housed. In a time of housing crisis across the state, it is important that we consider how all policy affects both housing supply and affordability for renters.

Attached are comments Multifamily NW submitted regarding the recent Urban Growth Report. I thought I would share via this email address as well. Please let me know if you have any questions regarding our comments.

Best,

Zach Lindahl
Director of Government Affairs

Metro Council

600 NE Grand Ave

Portland, OR 97232

Dear Metro Council Members,

I am writing to advocate for the inclusion of all land currently designated in the Sherwood West Growth Plan as proposed by the City, to ensure the future success of the City and the greater Community. The Sherwood West Plan is a good plan and the City's "control of the narrative" will be lost if the Plan is piecemealed in phases. We have strong interest in growth that will support diverse ranges of people who wish to live and work in our community. Sustainable growth, as championed by conservationists like myself, offers far more advantages to our community than no growth at all. History has shown us that the key to a prosperous society is not in stagnation, but in the careful and responsible use of our resources to meet the needs of the many and not just the few.

Our Project, Prodigal Sons, consists of a 'single farm restaurant' that will feed people locally, provide jobs and unique living opportunities, unlike grass seed and single crop export farmers. We have been diligently working with the City of Sherwood and the High school Ag and Culinary programs with intent to provide career opportunities and real-world skill development to the students. There are two types of landowners in our area. The first type are focused on growth opportunities and plan comprehension. The second type champion land preservation now that they built their homes where forest and farms used to be and dislike the middle and lower income folks in general.

Recently we have heard disturbing news that there is opposition to growth from several organized groups. As fact, the massive commercial farms with the most capital are not friends of Oregon's environment and financial future...

Organizations like Thousand Friends of Oregon, while well-intentioned in their efforts to preserve natural spaces, often fail to recognize the real-world impact of their policies on ordinary Oregonians. Their stance is reminiscent of Henry Thoreau's philosophy of naturalism—a perspective that prioritizes untouched wilderness over the needs of people, especially those of middle and lower incomes. Unfortunately, this approach is detrimental to the economy, creating a situation where "the few with the most" exert influence to protect their estate views at the expense of working and poor families who need affordable housing and job opportunities. If Metro is convinced not to act due to well organized and well-funded opposition groups representing s small percentage of the population, there will be no meaningful growth in Sherwood for many years to come and the fallout will be your (Metro's) failure because of wealthy numby influence.

Sherwood is a growing community with real needs. Leaving developable and well-planned land undeveloped in the name of preservation benefits a select few, but it does nothing to help the people of Sherwood diversify and thrive. Instead, we need to focus on sustainable development that balances environmental responsibility with economic growth. Responsible housing, jobs and infrastructure supports our town by allowing future generations to thrive in the area. At present, our next generation can't afford to live here and don't have enough local jobs here.

I urge Metro to consider the long-term benefits of sustainable growth over the short-term appeal of leaving land wild. Just as Roosevelt and Pinchot understood the value of managing natural resources for the benefit of all, we must adopt policies that ensure the land serves the people of Sherwood—not just those who can afford to prioritize untouched nature over community needs. The Sherwood West concept plan addresses that in a most impressive way.

Additionally, if City Council is given unfavorable conditions that stalemates the entire ask of the Urban Growth Management Decision, they could potentially withdraw and fail to have served

our community. Most will likely not be in service many years from now anyway. The application process is too costly. We would have to start the process all over again. By the time interest returns, if at all, and sites are permitted and built it will have been 8 years. Hopefully this letter gets into the right hands and Sherwood will maintain trajectory towards becoming one of Oregon's most desired places to live, for all, not just the few.

I look forward to your consideration of this critical issue and am confident that with timely and fair stewardship, we can create a future where Sherwood thrives economically, socially, and environmentally.

Thank you for your time and attention.

Sincerely,

OREGON CITY, OR 97045

TO: Metro Urban Growth Management Team, via email [redacted]

FROM: Clackamas County Planning Staff

RE: Technical Letter of Comment Regarding the Draft 2024 Urban Growth Report

DATE: August 22, 2024

Thank you for the opportunity to comment on the Draft 2024 Urban Growth Report (UGR). We appreciate your efforts to coordinate with our team and the many conversations you have convened in developing this report.

In addition to the Clackamas County Board's letter of comment, our technical staff would like to submit to the record the below concerns, questions and requests.

First, as raised at MTAC, it is difficult to determine how the calculations were made between the appendices and the draft UGR. We request that you provide a clearer record of computation in calculating the formal figures that are the basis for tables in the UGR.

For example, Table 9, *Summary of residential growth capacity inside the UGB by housing type* (page 32) shows "low", "mid", and "high" capacity numbers for single-unit detached, middle housing, and multifamily housing types. But the note to the table says that these capacity numbers should not be totaled, "for instance, adding up high capacity for each housing type", so it is unclear how we know how much capacity exists in the UGB and how these numbers should be used to compare capacity to the projected need. While Metro staff has provided, via email, some clarity to how the numbers in this table were calculated, it remains unclear how this table relates to Table 15 (page 40) in which the expected need is compared to some amount of capacity in each of the scenarios. To that end, additional data in an appendix that clearly walks a reader through these calculations should be provided; this would not only be helpful for reviewers, but it would also lead to more confidence in the summaries and options presented in the UGR.

Buildable Lands Inventory:

- Our team would like to thank Metro Staff and Johnson Economics for the creation of the Predictive Redevelopment Model to create a supply side response to key market parameters for anticipated development and redevelopment activity (Appendix 2, Attachment A). This is an innovative resource that is working to provide one of the missing pieces of the puzzle in matching land use with the redevelopment aspects of buildable land. That said, we do have some questions about the assumptions for redevelopment. One concern is that the proforma indicates that much of our "naturally occurring" affordable housing, such as manufactured home parks and older existing apartments will be re-developed. We are concerned that some of the assumptions may not support the retention of these critical assets, thereby leading to displacement, and also may incorrectly influence the capacity estimates.

Housing Needs Analysis:

- Data on housing underproduction show inconsistencies. In 2021, ECO Northwest conducted a study, Implementing a Regional Housing Needs Analysis Methodology in Oregon that estimated housing underproduction in the Portland Metro region to be 59,488 units (Exhibit 18, p. 35). In the draft UGR, however, the estimate for housing underproduction is estimated to be 15,000 (Table 10, p. 33). Metro Staff provide a thorough methodology for calculating underproduction (Appendix 8A, p. 4), but the UGR and accompanying appendices do not provide an explanation for this discrepancy. Further, it would be helpful to have a record of specific inputs and calculations that result in the figures listed in Table 10 on p. 33 in the UGR.
- There is detailed information about the total new housing units needed in the Metro UGB by housing type (Table 14, p. 37) but there is no equity analysis in the UGR or Appendices 8 or 8A that provide a clear understanding of who the proposed housing units in Sherwood West are going to serve or how these new housing units will be used to accommodate those working in the hospitality sector of the proposed expansion area.
- Slope requirements may not equate to affordable housing. Site design and assembly adds considerable cost and discourages a site's likelihood for affordability when entering the market after construction. Further scrutiny and discussion on housing mix, particularly aspects of its affordability, should be determined and clarified in the final UGR.

Employment Land:

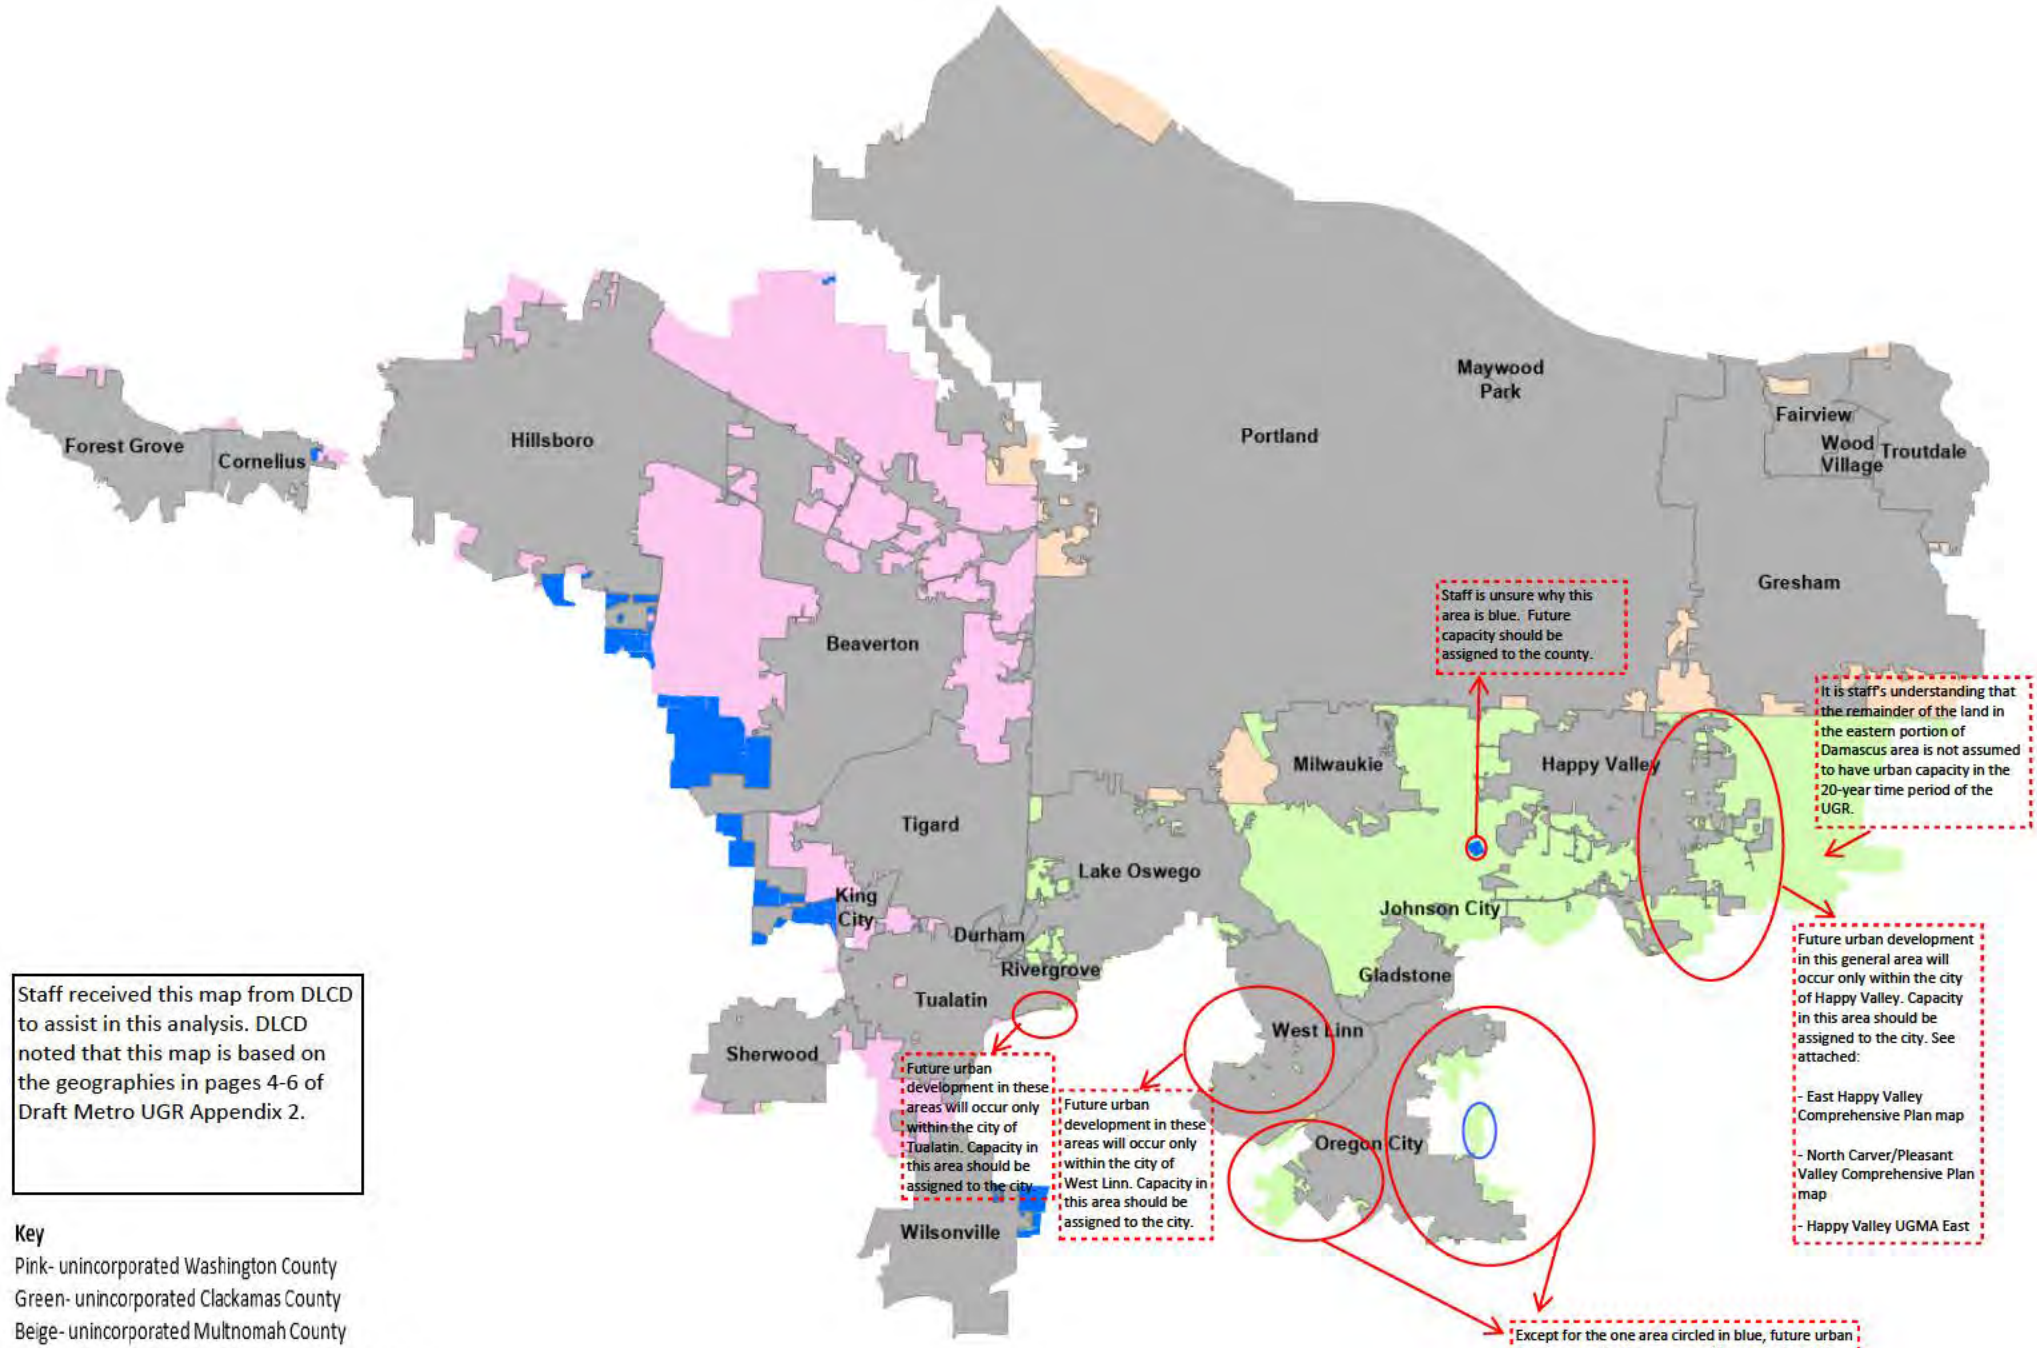
- Provide a clearer understanding of how slope requirements affect buildable land inventory. If slope requirements are at 7%, that would decrease buildable industrial land from 6,000 acres to 4,700 acres inside the UGB, on aggregate. If we are planning for high growth, this would change a 750-acre aggregate surplus into a 550-acre aggregate deficit (Table 19; p. 54 of draft UGR).
- Discussion on transportation and transit investment is almost completely missing in the report and accompanying Appendices; this must be developed and included in the UGR. Currently, there are no transit options in the proposed expansion area, and the closest bus in service is 2 miles away from Sherwood West. Addressing infrastructure needs and investment is critical for growth in the region.
- There may be a mismatch in what is presented in the Buildable Land Inventory (Figure 23; p. 55; Appendix 6) and what is desired when considering market factors. The current analysis presents Tier 3 land that is a minimum of 30 months from being development ready. Also noted in the UGR is that the average industrial parcel size is 3.8 acres, with a median industrial parcel size of 1.7 acres. Market factors indicate firms seek parcels that are a minimum of 5 acres and Tier 2 readiness (developable in 7 to 30 months or less). It would be useful for the analysis to break down data even further, describing the amount of land that is at least 5 acres and at least Tier 2 in readiness.

Capacity Analysis:

- Capacity allocated to unincorporated Clackamas County includes several areas that will not urbanize and develop at expected densities unless annexed into a city. Based on conversation with Metro staff, we understand that urban levels of capacity that are within the City of Happy Valley's North Carver/Pleasant Valley Plan area and planned areas outside of Oregon City are

included in the unincorporated county totals if the lands have not yet annexed to the respective cities. While staff also understands that this capacity is included as part of regional capacity for the purposes of assessing the regional urban growth boundary, we have several concerns about including this capacity in the unincorporated totals versus the cities where this urban development would happen.

a. County staff raised this issue several times throughout the development of the draft UGR and was assured that it would be addressed or at least acknowledged. Based on out reading of the draft UGR and associated appendices, it is neither addressed nor acknowledged.



b. The urban unincorporated land (UUL) within the Metro UGB will be allocated housing targets under the new Oregon Housing Needs Analysis (OHNA) rules. Specifically, it appears from initial drafts of the OHNA methodology for allocating housing production targets, that the state will by relying on Metro's capacity analyses and ultimately Metro's distributed forecast for these housing production allocations. It is county staff's understanding that Metro's distributed forecast is at least partially based on these capacity numbers. Therefore, it is imperative that the capacity is "assigned" to the correct jurisdiction.

c. To that end, county staff has attached several maps to this letter to help Metro identify where future capacity numbers should be assigned and is happy to work with Metro staff to resolve this issue.

- The capacity analysis also overestimates capacity allocated to residential development and underestimates capacity for commercial development in some areas identified as having "mixed use", which county staff understands to mean zoning that would allow for both residential and commercial development. Specifically, in areas along McLoughlin Blvd in Clackamas County – in which the general commercial zoning also allows fairly high-density housing - it is assumed development of buildable lands will be 95% residential and 5% commercial. Little to no residential development has occurred in this location in the last several decades despite housing being allowed by zoning.

We acknowledge that completing these analyses for the region are challenging, especially in this time of constant change in housing and employment markets and new rules coming down from the state. We appreciate Metro's efforts to create an analysis that is more nuanced and market-based, rather than the simpler demand versus supply numbers that have been used in past reports, and we recognize that this approach leads to more uncertainty.

With that in mind, we would like to reiterate our Board's request to consider selecting the high growth rates for both population and employment, which will provide jurisdictions the latitude to attract more investment opportunities, meet coming housing production targets, and better be able to balance housing, employment and transportation needs.

Staff received this map from DLCD to assist in this analysis. DLCD noted that this map is based on the geographies in pages 4-6 of Draft Metro UGR Appendix 2.

CITY OF HAPPY VALLEY/CLACKAMAS COUNTY

URBAN GROWTH MANAGEMENT AGREEMENT

This Urban Growth Management Agreement ("UGMA" or "Agreement"), by and between the City of Happy Valley, an Oregon municipal corporation ("City") and Clackamas County, a political subdivision of the State of Oregon ("County") (collectively, the "Parties," and each individually a "Party").

RECITALS

WHEREAS, authority is conferred upon local government under ORS 190.010 to enter into an agreement for the performance of functions and activities that the local government, its officers or agencies has authority to perform; and

WHEREAS, the City and the County have a common interest in coordinated comprehensive plans, compatible land uses and coordinated planning of urban facilities within the Happy Valley Urban Planning Area East ("HVUPAE"), as described in Exhibit A to this Agreement; and

WHEREAS, the exchange of information should concentrate on issues that may have a significant impact on either Party and should not entail cumbersome procedural requirements that may increase the time necessary to expedite decision making; and

WHEREAS, OAR 660-003-0010 requires management plans for unincorporated areas within an urban growth boundary to be set forth in a statement submitted to the Land Conservation and Development Commission ("LCDC") at the time of acknowledgement request; and

WHEREAS, OAR 660-011-0015 requires an urban growth management agreement to specify the entity responsible for the preparation, adoption and amendment of the public facility plan(s); and

WHEREAS, the City and County previously entered into an urban growth management agreement on January 30, 1992, and amended on June 19, 2001, and subsequently amended on November 18, 2013 for areas to the west and southwest of the existing City of Happy Valley (extending to the Veterans Memorial Highway), which is hereby referred to as the "UGMA WEST" and is a separate urban growth management agreement from this Agreement, which is hereby referred to as the "UGMA EAST".

NOW THEREFORE, the Parties agree as follows:

AGREEMENT

1. Definitions.

As used in this Agreement, the following words shall mean or include:

1.1 Comprehensive Plan. Any plan document as described in ORS 197.015(5) that is adopted by a Party and that applies within the HVUPAE.

1.1.1 City Comprehensive Plan. The City of Happy Valley Comprehensive Plan.

1.1.2 County Comprehensive Plan. The Clackamas County Comprehensive Plan.

1.2 Land Use Policies. The whole or any part of any comprehensive plan, subarea comprehensive plan, Title 16 of the City's Municipal Code ("Development Code"), the Clackamas County Zoning and Development Ordinance ("ZDO"), refinement plan, public facility plan developed under OAR Chapter 660, Division I, land use regulation as defined by ORS 197.015(11), or any other generally applicable policy regulating the use or development of land. As applied to Metro, "Land Use Policies" include Planning Goals and Objectives, Regional Urban Growth Goals and Objectives, Functional Plans, and Regional Framework Plans.

1.3 Happy Valley Urban Planning Area East ("HVUPAE"). The HVUPAE includes unincorporated land within the Portland Metropolitan Urban Growth Boundary ("UGB") located generally east of 172nd Avenue and west of 222nd Avenue, as illustrated on the map attached as Exhibit A to this Agreement.

2. Terms of this Agreement.

2.1 This UGMA EAST becomes effective as specified under Section 8.3, below, and shall continue thereafter for an initial term of 10 years, unless terminated as provided in this Section or modified consistent with Section 8.4. This Agreement automatically renews for one additional 10-year term unless, not later than 90 days prior to the expiration of the initial term of this UGMA, one of the Parties provides the other Party with written notice that it does not wish to renew the UGMA EAST, in which case this UGMA will automatically terminate upon completion of the initial 10-year term. Either Party may terminate this agreement at any time after providing at least 90 days written notice to the other Party.

3. General Provisions.

3.1 General Planning and Permitting Responsibilities

3.1.1 Comprehensive Plan/Zoning Designations and Amendments. The County Comprehensive Plan and zoning shall apply to all unincorporated land within the HVUPAE until such time as those lands are annexed into the City. Unless

otherwise provided by law, the development of a comprehensive plan map amendment or zone change for the unincorporated areas within the HVUPAE shall be a coordinated joint effort of the Parties. The County shall be responsible for preparing and making a decision on all legislative and quasi-judicial comprehensive plan amendments/zone changes for areas within the HVUPAE not annexed to the City in coordination with the City and consistent with state law and the Metro Functional Plan. The City shall have the unrestricted right to review, comment on and appeal all legislative and quasi-judicial comprehensive plan amendments/zone changes processed by the County within the HVUPAE.

3.1.2

Land Use Permitting Authority. The County Comprehensive Plan and land use regulations shall apply to an application for a permit or other land use review within the HVUPAE not annexed to the City. County shall retain responsibility and authority for all implementing regulations and land use actions for all unincorporated lands within the HVUPAE, until lands are annexed to the City.

For properties that annex into the City of Happy Valley in the HVUPAE, the City shall apply the underlying County Plan and zone provisions in accordance with the procedural framework of the City's Municipal Code until the City has adopted urban City Comprehensive Plan designations and zoning districts for the HVUPAE.

3.1.3

Urban Plan Development. The Parties agree that the City shall be responsible for developing and adopting an urban Comprehensive Plan and zoning districts for areas that do not currently have urban designations within the HVUPAE, per Section 4 of this Agreement.

3.1.4 Land Divisions. Land divisions that would create parcels smaller than 20 acres in size shall not occur within lands with a Rural Comprehensive Plan designation within the HVUPAE.

3.2 Annexation.

3.2.1 Conditions Requiring Annexation. The owner(s) of property adjacent to the City (including by extension of a public right-of-way or body of water, per the City's annexation policies), who are seeking access to City-provided services (for example, Planning, Engineering, or Building Division permits) may be required to submit an annexation petition to the City.

3.2.2 Annexation Consent. At the discretion of the Board of County Commissioners ("Board"), the County may provide consent for annexations, when such consent is required per ORS 222.170 or ORS 222.125 for properties utilizing county right-of-way for an annexation, if city agrees to accept the transfer of the section of the roadway being used to access the annexed property.

3.2.3 Annexation Plan. Any City-initiated Annexation Plan shall be developed consistent with applicable state and regional laws. Opportunity shall be provided

to citizens, the County, active Citizen Planning Organizations ("CPOs") and affected service providers to review and comment on the Annexation Plan prior to any annexation election. Annexation Plan(s) will include development of public facilities plan(s) for the Annexation Plan area(s).

3.3 Public Facilities.

3.3.1 Public Facilities Plans. Except as identified in Section 4, the City shall coordinate the preparation or amendment of public facilities plans within the HVUPAE as may be required by OAR Chapter 660, Division 11 (Public Facilities Planning) and applicable sections of ORS Chapter 195 with the appropriate service providers. Upon annexation, an area within the HVUPAE shall be provided with public facilities services through a combination of City-provided services and by way of Intergovernmental Agreements ("IGAs") with applicable service providers, which may include the following: sanitary storm services – Water Environment Services "WES"); water service providers – Sunrise Water Authority, Clackamas River Water; county road services – Clackamas County Department of Transportation and Development; fire prevention services – Clackamas Fire District No. 1; services related to the provision and maintenance of open space – Metro; mass transit services – Tri-Met; and, school facility planning – North Clackamas School District No. 12, Gresham-Barlow School District, and Centennial School District.

3.3.2 New Service Districts. County shall not form any new county service districts to serve any areas within the HVUPAE, nor shall it support the annexation of any land within the HVUPAE to any such districts or to any other service districts without the prior written consent of the City.

4. Planning for Urbanization of Rural Lands in the HVUPAE.

4.1 Planning authority. The City shall be responsible for planning for any future urbanization of rural lands within the HVUPAE. The urbanization of rural lands within the HVUPAE will only occur upon annexation to the City. The City shall coordinate with the County Planning Division and other relevant County Department of Transportation and Development ("DTD") staff regarding future urban planning and development activities and the transportation network in the HVUPAE. County staff shall be invited to participate in the proceedings of all relevant Technical Advisory Committees in the review of urban plans within the HVUPAE. The City shall notify and coordinate with the County on amendments to the City's Transportation System Plan ("City TSP").

4.2 Land use and transportation planning in the HVUPAE. Building off existing studies and previously completed planning work, the City of Happy Valley and the County will develop the following planning documents for the HVUPAE:

4.2.1 Integrated Land Use and Transportation Plans (Urban Plans):
The City may create detailed, integrated land use and transportation plans for "phases," or portions of the HVUPAE that the City determines are of sufficient size to phase development and urban service provision in a cost-effective and efficient manner. These plans shall include all elements required for a full urban

DocuSign Envelope ID 0D422339-34FF-4403-B293-E391A7AFA253

comprehensive plan for the selected area.

4.2.1.1 Coordination: All integrated land use and transportation plans shall be coordinated with the County to ensure consistency with County transportation plans and other planning in adjacent unincorporated rural areas. The City shall lead this planning undertaking with County coordination and participation in all relevant committees.

4.2.1.2 Notification: The City shall notify the County Planning Director prior to the initiation of each phase of urban land use and transportation planning. Notification shall, at a minimum, include a map of the area to be planned and an estimated timeframe for adoption of an urban plan.

4.2.1.3 Providing Employment Land: The City and County recognize the importance or providing employment land to support stronger economic growth in the County and will work together to identify opportunities to provide such lands in the HVUPAE, to potentially include employment areas different than those identified as Metro Title 4 lands.

4.2.1.4 Providing Affordable Housing Opportunities: The City and County recognize the importance or providing land for the development of affordable housing in the County and will work together to identify opportunities to provide such lands in the HVUPAE.

4.2.2 Clackamas County Transportation System Plan ("County TSP"): An update of the County TSP will be developed for the Metro UGB area illustrated within Exhibit A beyond (east of) any areas inside the HVUPAE that are not part of an integrated land use and transportation plan that is adopted or actively being completed by the City. The County TSP update will plan for transportation improvements necessary to serve travel patterns that are expected in the future in and adjacent to the HVUPAE including, without limitation, those areas within the Metro UGB but outside the HVUPAE.

4.3 State Highway System Improvements. The City and County recognize the importance of working with the Oregon Department of Transportation ("ODOT") to ensure that state transportation facilities be built/improved to accommodate expected population and employment growth in the HVUPAE and will utilize any subsequent land use and transportation plans to advocate for the timely development of the Sunrise Highway.

5. Other City Responsibilities.

5.1 Functions. All functions relating to the subject matter of this Agreement not specifically listed in this Section or any Exhibit as being the responsibility of the City will remain the responsibility of County. City shall be responsible for the timely and effective distribution to County of studies, information, requests, data and personal communications in City's possession on any matter concerning coordination between the City and County and/or regarding any infrastructure or policy issues coordinated by County.

5.2 Road Jurisdiction, Transfer and Condition. The City shall assume jurisdiction of the full width of any applicable segment of County road classified by the County as minor arterial, collector, connector, or local street that is within or immediately abutting an area annexed to the City within one year of the date of that annexation, assuming all provisions detailed below have been met. The transfer and assumption of jurisdiction shall be consistent with the provisions of ORS 373.270.

Concurrent with the date that a road is transferred, the County will upgrade the roadway or provide funds equivalent to the cost of a two-inch overlay over the existing pavement area, unless the road has a Pavement Condition Index (PCI) rating of 70 or higher, or the Parties mutually agree that overlay funds are not necessary for transfer. Alternatively, if a roadway or roadway section has a PCI of 50 or less, the City will only accept said roadway once a PCI of 70 or higher is achieved by the County or the Parties mutually agree upon a funding level equivalent to upgrading of the roadway to a PCI of 70 or higher.

5.2.1 For any County minor arterial, collector, connector or local street within the City boundary that is being transferred, but subsequent to annexation, the County shall allow improvements to be constructed to City standards and defer permitting authority to the City. The City shall issue all appropriate permits directly to the developer.

5.2.2 For any improvements to a County major arterial road within the City boundary, the County shall determine if City standards along the major arterial are acceptable to the County and do the following:

A. If the City standards are acceptable to the County, the County shall allow all improvements to be constructed to City standards. The County shall issue all appropriate permits with City concurrence.
B. If the proposed cross section standards are not acceptable to the County, the County shall require those improvements to be constructed to County standards. The County shall issue all appropriate permits.

5.3. City Notice to and Coordination with the County and CPOs.

5.3.1. The City shall provide notice to the County and the appropriate active CPOs at least 20 days prior to the first public hearing on all proposed annexations or extraterritorial service extensions into unincorporated areas.

5.3.2. The City shall provide notice to the County at least 20 days prior to the first scheduled public hearing on all proposed legislative changes to the City Comprehensive Plan or any quasi-judicial hearings regarding properties adjacent to unincorporated areas within the HVUPAE.

5.3.3. The City shall notify and coordinate with the County on amendments to the City TSP.

5.3.4. City shall provide notice and a service-provider comment letter to the applicable County Department in conjunction with the City's review of any land use application or building permit in which the proposed development activity might affect County facilities.

6. Other County Responsibilities.

6.1. County Notice to and Coordination with the City for Lands in HVUPAE.

6.1.1. The County shall provide notice to the City at least 20 days prior to the first scheduled public hearing on all proposed legislative changes to the County Comprehensive Plan text, implementing ordinances or other land use policies affecting land within the HVUPAE, and shall provide notice to the City at least 20 days prior to the first scheduled quasi-judicial public hearing regarding any properties adjacent to the City's incorporated area.

6.1.2. The County shall provide notice to the City at least 20 days prior to a staff decision on any Type II application for administrative action as provided in the ZDO for property within the HVUPAE.

6.1.3. The County shall notify and invite City staff to participate in or comment on all pre-application meetings for design review, conditional use permits, partitions, subdivisions or other significant development proposals within unincorporated areas of the HVUPAE at least 15 days prior to any such meeting.

6.1.4. Any amendments proposed by the County to the UGB within one mile of the HVUPAE will be reviewed jointly by the City and the County prior to submission to Metro.

6.1.5. In any County land use proceeding affecting property within the HVUPAE, the County shall enter all written comments received from the City into the public record and shall consider such written comments in the exercise of its planning and plan implementation responsibilities.

7. Mutual Indemnification

7.1 Subject to Article XI of the Oregon Constitution and ORS 30.260 to 30.300, the City will hold harmless, defend and indemnify the County, its elected officials, officers, and employees, for and against any claims or damages to property or injury to persons, resulting in whole or part from City's acts or omissions in performing any obligations under this Agreement.

7.2 Subject to Article XI of the Oregon Constitution and ORS 30.260 to 30.300, the County will hold harmless, defend and indemnify the City, its elected officials officers and employees for and against any claims or damages to property or injury to persons, resulting in whole or part from the County's acts or omissions in performing any obligation under this Agreement.

8. General Provisions.

8.1 Applicable Law. This Agreement shall be governed by Oregon law, without giving effect to the conflict of law provisions thereof, and the Parties agree to submit to the jurisdiction of the courts of the State of Oregon.

8.2 Insurance Coverage.

8.2.1. Commercial General Liability Insurance. Each of the Parties shall obtain and maintain at all times during the course of this Agreement commercial general liability insurance coverage pursuant to Oregon Tort Claims Act and subject to the limits of the Act covering Bodily Injury and Property Damage on an "occurrence" form in the amount of not less than $1 Million per occurrence/$2 Million general aggregate for the protection of the other Party, its officers, elected officials and employees. This coverage shall include Contractual Liability insurance for the indemnity provided under this Agreement.

8.2.2. Notice of Cancellation. There shall be no cancellation, material change, exhaustion of aggregate limits or intent not to renew any Party's insurance coverage contemplated by this Agreement without 60 days written notice to the other Party. Any failure to comply with the provision will not affect the insurance coverage provided to the Party. The 60-day notice of cancellation provision shall be physically endorsed on to the policy.

8.2.3. The County may self-insure to meet the minimum insurance requirements of this Section 8.2, to the extent that it maintains a self-insurance program that complies with the insurance requirements applicable under this Section 8.2.

8.3 Effective Date and Term. This Agreement shall become effective on the last date signed below and shall continue in effect according to its Terms.

8.4 Amendment. This Agreement may be amended at any time consistent with Section 8.9 below.

8.5 Assignment. Except as otherwise provided herein, the Parties may not assign any of their rights or responsibilities under this Agreement without prior written consent from the other Party, except that a Party may delegate or subcontract for performance of any of their responsibilities under this Agreement.

8.6 Dispute Resolution.

8.6.1. Subject to mutually agreed upon extensions of time in writing, failure or unreasonable delay by any party to substantially perform any material provision of this agreement shall constitute default. In the event of an alleged default or breach of any term or condition of this agreement, the Party alleging such default or breach shall give the other Party not less than 30 days written notice specifying the nature of the alleged default and the manner in which the default may be cured satisfactorily. During this 30-day period, the Party shall not be considered in default for purposes of termination or instituting legal proceedings.

8.6.2. The Parties shall first attempt to resolve the dispute by negotiation, followed by mediation, if negotiation fails to resolve the dispute.

8.6.3. Step One: (Negotiation). Each Party will select one or more person(s) to negotiate on behalf of the entity they represent. Those person(s) shall then meet and attempt to resolve the issue. If the dispute is resolved, there shall be a written determination of such resolution, signed by a representative of each Party and ratified by the governing bodies that shall then be binding.

8.6.4. Step Two: (Mediation). If the dispute cannot be resolved within thirty (30) days at Step One, the Parties may submit the matter to mediation. The Parties shall attempt to agree on a mediator. If they cannot agree, the Parties shall request a list of five (5) mediators from an entity or firm providing mediation services. The Parties will attempt to mutually agree on a mediator from the list provided, but if they cannot agree, each Party shall select one (1) name. The two selected shall select a third person who shall serve as the mediator. The common costs of mediation borne equally by the Parties with each bearing its own costs and fees. If the issue is resolved at this step, a written determination shall be signed by each Party and approved by the governing bodies.

8.6.5. Step Three (Legal Action). If the dispute remains unresolved following mediation, the Parties may seek remedy by appropriate proceedings filed in Clackamas County Circuit Court. In any such judicial proceeding, each Party shall be responsible for its own costs and fees.

8.7 Execution in Counterparts. This Agreement may be executed in any number of counterparts, each of which may be executed by any one or more of the parties hereto, and all of such counterparts shall constitute one Agreement. Counterparts of executed signature pages may be attached to any one or more counterparts of this Agreement. To facilitate execution of this Agreement, the Parties may execute by facsimile or e-mail transmission counterparts of the signature pages.

DocuSign Envelope ID 0D422339-34FF-4403-B293-E391A7AFA253

8.8 Severability. In the event a court of competent jurisdiction deems any portion or part of this Agreement to be unlawful or invalid, only that portion of part of the Agreement shall be considered unenforceable. The remainder of this Agreement shall continue to be valid.

8.9 Entire Agreement. This Agreement constitutes the entire agreement between the Parties and supersedes any prior oral or written agreements or representations relating to the HVUPAE. No waiver, consent, modification or change of terms of this Agreement shall bind the Parties unless in writing and signed by each party.

8.10 Non-Exclusive Rights and Remedies. Except as otherwise expressly provided herein, the rights and remedies expressly afforded under the provisions of this Agreement shall not be deemed exclusive and shall be in addition to and cumulative with all rights and remedies otherwise available at law or in equity. The exercise by either Party of any one or more of such remedies shall not preclude the exercise by it, at the same or different times, of any other remedies for the same default or breach, or for any other default or breach, by the other Party.

8.11 Debt Limitation. This Agreement is expressly subject to the debt limitation of Oregon counties set forth in Article XI, Section 10, of the Oregon Constitution, and is contingent upon funds being appropriated therefore. Any provisions herein which would conflict with law are deemed inoperative to that extent.

8.12 Waiver. The failure of either Party to enforce any provision of this Agreement shall not constitute a waiver by such Party of that or any other provision.

8.13 Interpretation. The titles of the sections of this Agreement are inserted for convenience of reference only and shall be disregarded in construing or interpreting any of its provisions.

8.14 No Third-Party Beneficiary. Neither Party intends that this Agreement benefit, or create any right or cause of action in, or on behalf of, any person or entity other than the County or the City.

8.15 Notices. All notices or other communications required or permitted under this Agreement shall be in writing, and shall be mailed or sent by scanned document (e-mailed) or faxed with hard copy to follow by post, addressed as follows:

PMAR
PORTLAND METROPOLITAN ASSOCIATION OF REALTORS®

August 22, 2024

Urban Growth Management Team
Metro
600 NE Grand Avenue
Portland, OR 97232

Dear Metro Urban Growth Management Team,

I am writing on behalf of the Portland Metropolitan Association of Realtors® (PMAR) regarding Metro's Draft Urban Growth Report. We appreciate the extensive work Metro's staff put into the Urban Growth Report. We would also like to thank Metro for inviting PMAR to the Urban Growth Report Stakeholder table; it was a welcome opportunity to better understand the report's underlying work, data, and assumptions, and to discuss some of our region's challenges and opportunities with other stakeholders.

PMAR recognizes the Portland region is lacking tens of thousands of homes necessary to meet our growing population and that people in our community suffer due to this lack of housing. Our region's current level of housing construction is 10.1% below the long-term average, and no where near on pace to catch up with past underproduction, let alone accommodate future growth. Portland in particular is struggling to keep up with needed housing production; the city is on track to produce only 500 new units this year, when the forecasted need by 2045 is more than 120,000 new homes.

As a region, we must embrace land use, development, and zoning principles that provide and encourage an abundant mix of housing types that meets community needs and provides sufficient housing for current and future residents. Restrictive land use regulations play a major role in stymying the proliferation of new housing. Accordingly, PMAR supports much needed growth in the Metro area's capacity for housing development, which removes a barrier to housing construction; getting the 2024 growth management decision right will support the continued growth and prosperity of our entire region.

In that spirit, PMAR strongly urges Metro to adopt a higher growth population forecast, and urges the Metro Council to support the City of Sherwood's request for expansion.

Population Forecast

The draft report forecasts regional population growth "only from net in-migration," due to lower

forecasted birth rates, and assumes that growth rates will be slower as a result over the next 20 years.

While this is a reasonable assumption, it fails to recognize that the policy choices we make today will impact whether or not our region is a place that attracts new residents over the next 20 years. Put another way, if we plan for low growth, we are unlikely to see anything other than low growth. But if we plan for robust growth, and make policy choices that support a vision of higher growth, our region becomes a more attractive place to future residents.

We strongly recommend adoption of the higher growth population forecasts, to set the stage for nearer term policy decisions and actions that will in turn foster stronger population growth, and help our region realize economic growth and prosperity.

City of Sherwood Expansion

PMAR supports the City of Sherwood's expansion proposal, particularly the 340 net acres of residential land proposed in the Sherwood West Concept Plan. PMAR believes that there is no one-size-fits-all to housing and that a vast array of homes of various types and at various price-points are needed to serve members of the community, accommodate new residents, and ensure that members of our community can buy a home that fits their unique needs. Accordingly, while Metro may want to make recommendations or provide incentives to encourage certain kinds of housing development, PMAR would discourage prescriptive requirements or new regulations that would limit Sherwood's housing development options.

PMAR is committed to working collaboratively with Metro and other stakeholders to ensure that our region's growth management decision is implemented in a way that benefits all residents and facilitates growth of the housing market.

To whom it may concern,

As a resident and taxpayer of Sherwood, I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely,

Patricia Hales

Portland, OR 97232

RE: Draft 2024 Urban Growth Report

Dear Chair Peterson and Metro Councilors,

Thank you for the opportunity to comment on the draft Urban Growth Report (UGR) and Sherwood West urban growth boundary (UGB) expansion proposal. The 2024 growth management decision is the blueprint for how Metro Council will lead the region in planning for future housing development and employment opportunities. We appreciate that these decisions are challenging and acknowledge there are trade-offs that must be carefully considered in this decision process.

Our Board strongly supports the City of Sherwood's application for expansion of the urban growth boundary to include the 1,291 acres within the Sherwood West urban reserve area. The city has demonstrated their readiness to serve the area with governance and infrastructure as required by Metro's Urban Growth Management Functional Plan. The City's plan envisions that up to 5,582 housing units and 4,524 jobs could be accommodated in the expansion area. As we are all grappling with ways to produce more housing in the region and across the state, adding this land to our regional urban growth boundary makes sense. In addition, Sherwood has shown that the proposed Sherwood West employment area has the site suitability characteristics to attract more of the types of industry that Sherwood has successfully recruited to the city in recent years. Even though this is a regional urban growth boundary expansion decision using regional analysis, place matters in this consideration. Sherwood has demonstrated that they are a place where people want to both work and live.

We also encourage Metro Council to strongly consider selecting the high growth rate for both population and employment. The selected growth rates guide regional policy and funding decisions around housing, employment land and supporting infrastructure. Choosing low growth rates could artificially constrain our ability to plan for or make decisions to support the development of badly needed housing of all types, or further constrain opportunities to grow our region's traded-sector employment, which provides living wage jobs for thousands of our community members.

Board of County Commissioners

Subject: [External sender]2024 Sherwood West Urban Growth Boundary Expansion Proposal - Opposition

CAUTION: This email originated from an **External source.** Do not open links or attachments unless you know the content is safe.

To whom it may concern,
As long time residents (since 1997) and taxpayers of Sherwood, we strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. We stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Brandi & Tony Hendryx
[redacted]

My name is Julie Horowitz.

My family and our family farm is on the edge of the UGB expansion area. We've lived here 25 years.

I am a supporter of the West of Sherwood Farm Alliance.

The Mayor of Sherwood and Planning Director have testified publicly that what will be built in the Sherwood UGB expansion area will be market-rate housing, not affordable housing.

According to Redfin the average rent in Sherwood is $2,704 per month.

That is $700 more per month than in Beaverton, $900 more per month compared to Portland and $1,000 more per month than in Gresham.

If you assume a household is willing - or forced - to pay 30% of its pre-tax income on rent in Sherwood, they will need to earn $108,000 per year to afford that rent.

No teacher in Sherwood schools, even one with a master's degree and many years of experience, can afford that rent. No one working in the proposed "hospitality commercial" area in the Concept Plan would even dream of renting in Sherwood.

The average home price in Sherwood, according to Zillow, is about $650,000.

A family would need a household income of about $172,000 to buy that housing, assuming they had saved $130,000 for the downpayment and could get a 6.5% interest rate. And they would still be paying 30% of their pre-tax income for their home.

The idea that adding land for housing in Sherwood will contribute to the supply of affordable housing in the region is ridiculous. Ridiculous.

If MPAC is really interested in UGB expansions that might, *might*, contribute to the supply of truly affordable housing, you should recommend that the Metro Council reject this proposal and instead wait to consider UGB expansion applications are made under Governor Kotek's Senate Bill 1537.

That bill will go into effect in January, a few weeks after Metro is scheduled to make its decision on the Sherwood luxury housing proposal.

CAUTION: This email originated from an **External source.** Do not open links or attachments unless you know the content is safe.

We Say NO to the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary
[redacted]

To whom it may concern:

As residents and taxpayers of Sherwood, we strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes.

The proposed expansion is unnecessary because:

- Metro's own projections from 2022 forecast only 3% growth for Sherwood in coming decades.
- Sherwood has sufficient land already to support additional housing and economic development - if developed wisely. The desires of Sherwood City to expand its tax base and of developers to gain additional lands for development are not adequate justification for the proposed expansion.
- Minimal support from the local community. In a 2021 poll, 84% of Sherwood residents opposed the UGB expansion in and around Sherwood.
- There are currently large areas of undeveloped land that have been brought inside the UGB in the last 20 years. According to projections, there is sufficient industrial land within the current boundary for the next 20 years. This proposed expansion (or a modified version) can be revisited in 10-12 years, but at this time it is completely unnecessary.

We stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community. Senate Bill 100 as enacted in 1973 was done specifically to prevent the kind of development that this proposed expansion clearly is - driven by private interests and profits rather than the public interest.

Sincerely,

Jim and Jan Huston

Dear Mr. Rosenthal,

I am Troy Kazebee, and together with my wife Kendra, we are the owners of the property at 19300 SW Edy Rd in Sherwood. We strongly endorse the Urban Growth Boundary expansion proposed for Sherwood West.

For the past 22 years, we have proudly called Sherwood our home, raising our four children and residing in various neighborhoods within the city. As our family grew, Sherwood provided the housing options we needed, with connected neighborhoods and walking paths that have fostered a unique community atmosphere.

Throughout this time, we have actively participated in and contributed to the Sherwood West Planning process over the last decade. The proposed plan, encompassing 1,291 acres, addresses both Sherwood's and Metro's housing and employment land shortages. It builds upon

Sherwood's established character with connected neighborhoods, walking paths, and parks, elements that have kept us committed to this community.

Recently, we have been approached by the West of Sherwood Farm Alliance urging us to oppose the UGB expansion. Their involvement at this late stage is concerning given their absence from earlier planning discussions. However, having closely followed and studied the proposal over the years, and recognizing the housing and employment land shortages faced by Metro, we firmly believe it aligns with the future needs of Sherwood and Metro.

Therefore, we wholeheartedly support the City of Sherwood's request for a 1,291-acre UGB expansion.

Thank you for your time and consideration. If you have any questions, please reach out.

Sincerely,

Troy and Kendra Kazebee

RE: Metro's 2024 Urban Growth Report and Sherwood's Urban Growth Boundary Expansion Request

Dear Ms. Madrigal,

My name is Preston Korst and I'm the Director of Government Affairs at the Home Building Association of Greater Portland. HBA is dedicated to maximizing housing choice for all who reside in our region by shaping an environment in which industry professionals can meet the diverse needs of all communities.

I'd like to start off by personally thanking you and the rest of Metro's planning staff, including Katherine Ciarlo, Eryn Kehe, Ted Reid, Malu Wilkinson (and many more) for hosting and facilitating the Urban Growth Report Stakeholder Roundtable. This broad and diverse group of interested parties met for two hours monthly for nearly a year to discuss and debate the central tenants of the Urban Growth Report (UGR) and the impacts it will have on our region. As HBA's representative in that group, I can say that it provided much needed dialogue and reflection space for us to discuss how we as a region wish to grow. Your willingness to provide that opportunity is greatly appreciated.

In this letter, we hope to outline our industry's perspective on the 2024 Draft UGR and to provide our unequivocal support for the City of Sherwood's Urban Growth Boundary (UGB) expansion request.

For housing affordability and the overall health of our economy, HBA and many others in the housing industry urge your COO Recommendation and Metro Council to take a high-growth position when evaluating our region's land supply and housing needs in this UGR and move to approve Sherwood's UGB request without conditions.

Consider for a moment the exorbitant costs to purchase a home in our region. According to Zillow, the median home sale price in June was $521,133 (Multnomah County), $579,979 (Washington County), and

$631,000 (Clackamas County). Staggering as these figures are, they come as no surprise given that Oregon is staring down a housing deficit of 140,000 units. And if our goal is to advance economic justice and racial equity, then we must reverse these trends in a way that builds wealth and increases homeownership opportunities for more families who've traditionally been locked out of the homebuying market. In other words, WE ARE IN A HOUSING CRISIS.

- -

UGR Question #1: Which population and growth projections should Council make?

With the UGR, we believe that the focal and starting point rests primarily on the population and growth scenarios presented in the report. While the draft contains a lot to applaud—including acknowledgements of an existing regional housing shortage, changing housing choices due to the pandemic, and the creation of newly allowed middle housing options—it still includes elements that are concerning for our industry.

For one, the report concludes that regional population growth is slowing because birthrates are dropping (which of course is an established national trend). This means that in-migrating residents will be the primary driver of our population growth, as it has been in recent years. This analysis makes sense. However, the report erroneously assumes that, "Slowing population growth also means slower job growth." We respectfully disagree.

Though we concur that we can't necessarily change what the data tells us, we *can* choose policies that will bend the precision of that data towards a stronger economic future. In other words, if we use this growth report to prepare for strong economic and housing growth, we believe that in-migration will adapt towards a higher-opportunity future—if you build it, they will come. On the flipside, if we plan for anemic growth and limit our ability to adapt to the market, we'll just be realizing our own economic stagnation. In either case, it's a self-fulfilling prophesy.

UGR Recommendation #1: assume and position the report with the high-growth population scenario.

We feel that Metro would not only be wise, but would be making the most responsible public-policy decision to plan for growth, despite what projections may or may not suggest. Preparing with an attitude of a high-growth scenario provides Metro and local jurisdictions with more flexibility to plan for the future that will avoid future housing crises and economic stagnation. As we hear often from planners: *failing to plan is planning to fail*.

- -

UGR Question #2: How should Council approach housing need and development scenarios?

To start, we want to acknowledge the fact that Metro staff included in this report an existing housing shortage of 23,700 units. While many in the housing industry would argue (with additional sources) that number is considerably low, it is still an important indication of how serious our housing crisis is to Metro. Moving on from there, we appreciate the difficult work that went into calculating our housing needs over the next 20 years. And we believe it would be misleading, if not negligent, to suggest that our region's housing needs are anything except *high*. Therefore, **we urge Metro to adopt the high-forecast housing need of at least 203,200 units over the next 20 years**. This reflects a greater sense of reality than the baseline or low-point figures hold.

Additionally, in the report, Metro also makes assumptions about not only the rate of our growth, but also *how we will and should grow*. Found on pages 38-39, the report contains several assumptions for development potentials using "illustrative demand and capacity scenarios." While we aren't exactly sure which data these trends were founded upon, we do feel that they all but marginalizes and unduly prevents the construction of new, single-family homes for residents. It assumes, either through economic reality or lifestyle choices, that our region's historically strong demand for homeownership isn't a viable scenario going forward. Again, we disagree.

And importantly, just after the limited scenarios are presented, the report goes on to say that "…it will be the market, not Metro's UGR calculations, that determine what mix of middle housing and single-unit detached housing gets built…" Yet, in the way that the housing needs scenarios are presented, Metro is essentially asking its Council to do just that by attaching to their decision a condition and outcome which will essentially select which types of housing should get built. Housing construction is a market-driven industry, with the overwhelming majority being built by private developers. We believe that it is not within Metro's power or provision to attempt to guide the mix of housing the market will bear, least of all with just four narrow scenarios.

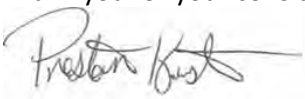
UGR Recommendation #2: Metro should adopt a high-forecast housing need. Also, it should reject the growth scenarios presented in the UGR or establish an additional scenario that creates flexibility for the housing market to adapt to the demand of consumers.

A high need scenario reflects the reality on the ground and will allow policymakers across the region take actions that will address the high cost of housing in their communities. Also, we believe that the forecasted development scenarios have been created despite the fact that nearly 4 out of 5 Oregonian's still prefer to live in a single-family home versus other housing types. And it fails to recognize the power that public-policymaking has on the creation of new housing, which could make single-family entry-level homes more affordable. Lastly, it ignores the fact that the vast majority of homeownership opportunities lie in the single-family market. We believe that Metro should consider that our region's collective desire to foster equity and economic justice will rely on the unique wealth and community-building opportunities that arise with homeownership.

City of Sherwood UGB Expansion Request

This year, the City of Sherwood is the only city requesting a UGB expansion—and we believe that it would have a tremendous impact on our region, in the form of 4,500 good-paying jobs, roughly 5,000 new homes, and the creation of hundreds of acres of parks and natural areas.

For almost two years, I had the pleasure of sitting on the Sherwood West Technical Advisory Committee which helped shape the concept planning for the area. I can say without reservation that the plan brought forward by staff, regional stakeholders, and community members has been careful, conscientious, and equitable. **We applaud the delivered outcome and encourage Metro to move forward with an approval that encompasses the entirety of the 1,291 acres as requested, *without conditions.***



As Metro knows well, bringing new lands into the UGB requires focused planning, financing for infrastructure, and a building environment that can support growth. Fortunately, Sherwood is primed for just that. Over the last several years, the city has undergone extensive public engagement to develop a plan that is innovative, forward-thinking, and contains a variety of tools that will create complete and livable communities. However, adding conditions as suggested in a recent Council Session, could be

detrimental to that extensive outreach. There are serious political costs to adding conditions, not to mention the hundreds of thousands of dollars in grants and general fund dollars would be jeopardized if onerous restrictions are placed on this community-led design.

Given the continued severity of our region's housing crisis, mixed with the budding opportunities to capitalize on historic investments for local economic development—HBA and our partners in the housing sector view this request as a great example of a planning process that will bear fruit for generations. It will help empower our region to reach its housing production goals while creating an indispensable lifeline to a struggling local economy. For affordability and the overall supply of housing, the Sherwood West proposal is an undeniably smart plan that deserves the community's support and Council's unanimous vote.

In closing, we would like to thank Metro staff and Council for the dedicated service they offer to our communities. From long-range planning to affordable housing development, the work you do is not easy and the stakeholder groups you engage are broad and not always agreeable. We appreciate the efforts taken to develop the 2024 Draft UGR and to review Sherwood's 2024 UGB Expansion. And we implore you to consider the serious housing crisis we are facing when making your ultimate recommendations and decisions.

Thank you for your consideration of our testimony,

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Dear Metro Council,

I am writing in my support of the City of Sherwoods West Expansion Plan. Like many towns and cities Sherwood is experiencing a housing shortage, unlike many others Sherwood is uniquely situated to provide planned growth that will benefit the current and future residents of Sherwood. The community engagement and dedication of the local councils and committees ensures that the rich history and appeal of Sherwood is not lost to growth but rather enhanced and capitalized upon in a way that creates everlasting ties among residents new and old alike.

The passing of the West expansion is important because it satisfies all needs in protecting the land while providing opportunities and growth in a way that brings and keeps the best of Sherwood. True progress comes from building on the past with an eye to the future; holding tight to what once was will kill any economic and social prosperity that Sherwood is poised to take. It is up to us as stewards of the town we love to pass the expansion plan and do our best for future generations.

Sherwood is growing, whether people want it to or not but we have a chance to guide that growth in a way that benefits all. Please think of all residents when choosing to support and pass this plan and not only the few with the most.

Thank you,
Amelia Larkin

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Dear Metro Council and Staff:

I urge you to support Sherwood's current request for a growth boundary expansion, having spoken with Sherwood officials and reviewed their conceptual planning for Sherwood West.

The lack of large employment sites is hampering our region's economic growth. The Portland MSA in recent months has posted the largest year-over-year job losses out of all 50 of the country's largest MSAs (nearly all metro areas gained jobs over this period). Sherwood will help provide those needed employment sites.

A wavering employment market also will worsen the housing affordability crisis we face in this region. The limited supply of land for residential development is another crucial affordability factor, by limiting new housing creation. Residential land availability and housing production were a focus of the last state legislative session due to widespead voter frustration over housing affordability in our region.

My experience as a development finance consultant, after many years of financing construction with area banks, has made clear to me the many problems that our limited land supply has caused.

Please consider the legislature's lead and support Sherwood's expansion effort.

Thank you for your consideration.

Re: Draft 2024 Urban Growth Report
Public Comments
My Client: David Marks

Dear President Peterson & Councilors:

This firm represents David Marks, who owns property in the Stafford area that is part of Metro's urban reserves area (the "Stafford Area"). Mr. Marks is submitting these comments on Metro's draft 2024 Urban Growth Report (the "Draft 2024 Report") for the Metro Council's consideration. As explained below, the Metro Council should reject the Draft 2024 Report because it is inconsistent with Goal 14, the implementing statutes and administrative rules, and the Court of Appeals' recent decision in *Marks v. LCDC*, 327 Or App 708, 536 P3d 995 (2023) ("*Marks*").

A. Introduction

In 2020, Mr. Marks filed a petition for enforcement with the Land Conservation and Development Commission ("LCDC") seeking to nullify and/or modify the five and three-party intergovernmental agreements ("IGAs") between Metro, Clackamas County, and the Cities of Lake Oswego, West Linn and Tualatin (the "Cities") that controls the future development of Stafford Area. Mr. Marks filed the petition for enforcement because Metro abdicated its regional planning authority over the Stafford Area by granting the Cities complete control over the timing of the expansion of the Urban Growth Boundary (the "UGB") into this area. Given the Cities' decades-long opposition to the urbanization of the Stafford Area, the IGAs will obstruct the State and regional efforts to increase the housing supply and address the regional housing crises.

In 2022, the Oregon Court of Appeals reversed LCDC and remanded the petition for enforcement matter to require LCDC to determine if the IGAs violate the regional framework plan and implementing goals, statutes and administrative rules. *Marks*, 327 Or App at 738. Although the

E. Michael Connors
[redacted]
Portland, OR 97209
[redacted]

Court did not resolve the merits of the petition for enforcement, the Court reiterated prior caselaw recognizing Metro's responsibility to implement a regional strategy for the metropolitan UGB as opposed to an ad hoc approach led by the metropolitan cities. The Court stated that Goal 14 and the implementing statutes and administrative rules require Metro to determine the 20-year regional housing needs and identify the best location to expand the UGB to satisfy those housing needs, not the metropolitan cities.

The Draft 2024 Report is yet another instance of Metro abdicated its regional planning authority and granting the metropolitan cities control over the timing and location of the UGB expansion. Instead of Metro determining the 20-year housing needs for the region and evaluating the urban reserve locations suited to accommodate those needs, the Draft 2024 Report confers that authority to the metropolitan cities. Metro is restricting its growth analysis to the City of Sherwood's limited proposal solely because Sherwood is the only city that requested a UGB expansion. The Draft 2024 Report takes this limited approach even though the 20-year housing needs analysis identified a need for significantly more housing units than Sherwood is proposing. This ad hoc, bottom-up type of approach to the Metro regional UGB is the opposite of what the Oregon legislature intended and is inconsistent with Goal 14 and the recent *Marks* decision.

B. Metro is required to determine the need and location for UGB expansions consistent with Goal 14 and the implementing statutes and administrative rules.

Metro is responsible for coordinating land use planning in the tri-county region consisting of Clackamas, Multnomah and Washington County. ORS 195.025; ORS 268.380(1)(c); ORS 268.385. One of Metro's primary responsibilities is the adoption and management of the regional UGB to ensure that the metropolitan regional housing and employment needs can be met. ORS 268.380-268.390; *Marks*, 327 Or App at 712-13; *Sensible Transportation v. Metro. Service Dist.*, 100 Or App 564, 567, 787 P2d 498, *rev. den.*, 310 Or. 70, 792 P2d 104 (1990). The Court of Appeals has repeatedly stated that in assigning Metro the responsibility for justifying, adopting, and securing acknowledgment of the metropolitan area UGB, the Oregon Legislative Assembly "presumably determined adoption and administration of the metropolitan area UGB required Metro's unique regional perspective, rather than leaving adoption and administration of the UGB to the large number of cities and counties making up the metropolitan area." *Marks*, 327 Or App at 712-713; *Sensible Transportation*, 100 Or App at 567. (Emphasis added).

As part of its UGB-related responsibilities, Metro is required to conduct a review of the metropolitan area UGB every six years to ensure that it continues to maintain a 20-year supply of urbanizable land within the UGB. ORS 197.299. With respect to housing, Metro must demonstrate that its regional plan has "sufficient buildable lands within the urban growth boundary . . . to accommodate estimated housing needs for 20 years." ORS 197.296(2). Metro's needs analysis must be supported by substantial evidence. *City of West Linn v. LCDC*, 201 Or App 419, 440, 119 P3d 285 (2005). If Metro determines that the land supply is inadequate, it must expand the UGB or take other measures to ensure that the identified need can be accommodated. ORS 197.296(6); ORS 197.299(2); *Marks*, 327 Or App at 713.

In considering where to expand the UGB, Metro's analysis must comply with Goal 14, which includes four "boundary location" factors that Metro must consider when determining which urban

reserve land to add to the UGB. Goal 14; *Marks*, 327 Or App at 713. The four boundary location factors are "(1) [e]fficient accommodation of identified land needs; (2) [o]rderly and economic provision of public facilities and services; (3) [c]omparative environmental, energy, economic and social consequences; and (4) [c]ompatibility of the proposed urban uses with nearby agricultural and forest activities occurring on farm and forest land outside the UGB." *Id.* A decision to add land to the UGB must compare alternative areas based on a balancing of all these factors, rather than reliance on any one factor. *Citizens Against Irresponsible Growth v. Metro*, 179 Or App 12, 17, 38 P3d 956 (2002); *1000 Friends of Or. v. Metro*, 174 Or App 406, 409–410, 26 P3d 151 (2001); *D.S. Parklane Dev., Inc. v. Metro*, 165 Or App 1, 25, 994 P2d 1205 (2000).

C. The Draft 2024 Report is inconsistent with Goal 14, the implementing statutes and administrative rules, and *Marks*.

The Draft 2024 Report has multiple problems that should concern the Metro Council. The Draft 2024 Report does not explain how Metro is going to satisfy the housing needs over the 20-year period and does not even acknowledge the Goal 14 boundary location requirements or attempt to comply with these requirements. The Draft 2024 Report appears to be designed primarily to justify Metro's policy of limiting its consideration of UGB expansion areas to Sherwood's request since it was the only city to request an expansion. As explained below, the Draft 2024 Report is inconsistent with Goal 14, the implementing statutes and administrative rules, and *Marks* in several respects.

The Draft 2024 Report does not contain any meaningful recommendations or indication of what Metro's chief operating officer and staff may ultimately recommend the Metro Council adopt for its final decision. While we understand this public comment period is designed in part to provide Metro's chief operating officer and staff additional public input to help inform their recommendations, the Draft 2024 Report is so general and ambiguous that it makes it extremely difficult to provide meaningful input and comments. The Draft 2024 Report contains a wide variety of scenarios that lead to very different results, but it lacks any indication of which scenarios are more likely or how the Metro Council should factor in these varying scenarios to its decision. If Metro is truly seeking meaningful public input, requesting that the public comment on such an amorphous and non-committal report is not very helpful or productive.

The Draft 2024 Report failed to acknowledge there is a need for significant new housing in the Metro UGB to satisfy the 20-year housing needs of the region. Currently, there is an existing need for 23,700 additional housing units in the Metro region based on Econorthwest's Existing Housing Needs Report. Draft 2024 Report, Appendix 8A. The Draft 2024 Report notes there is also a need for a significant number of new housing units to address the future growth needs, ranging from 179,500 units under the high growth model, 149,500 under the baseline growth model and 119,600 under the low growth model. In total, this data demonstrates that there is a need for 143,300 to 203,200 new housing units in the Metro UGB to satisfy the 20-year needs of the region.

Instead of acknowledging this need for a significant amount of new housing units to satisfy the 20-year needs of the region, the Draft 2024 Report suggests that the Metro Council has wide "latitude to determine <u>whether</u> additional housing capacity is needed to accommodate potential household growth." Draft 2024 Report, p.37. (Emphasis added). The sole basis for this alleged latitude is the

"uncertainty" in predicting future trends. Draft 2024 Report, p.37-38. The uncertainty in predicting future trends cannot be used as a basis for ignoring the actual data and analysis because Metro's entire process of evaluating the needs of the region for the next 20 years is inherently uncertain. If the mere uncertainty in predicting future trends was sufficient to override the actual data and analysis, there would be no reason to do a detailed analysis of the housing needs in the first place. The Draft 2024 Report appears to be an outcome driven analysis designed to grant the Metro Council maximum latitude and discretion to decide whatever it wants, rather than an evidentiary based decision. Metro's needs analysis must be supported by substantial evidence, not an outcome driven approach designed to provide maximum decision-making discretion. *City of West Linn v. LCDC,* 201 Or App at 440.

The Draft 2024 Report failed to acknowledge that the Sherwood West urban reserve area proposal, the only UGB expansion option identified in the report, is woefully insufficient to satisfy the 20-year housing needs of the region. The Sherwood West proposal will only provide 3,120 to 5,580 new housing units, which will barely put a dent in the 143,300 to 203,200 new housing units needed to satisfy the 20-year needs of the region. By limiting its consideration of UGB expansion options to the Sherwood West proposal, Metro has made it impossible to satisfy the 20-year housing needs of the region.

The Draft 2024 Report does not comply with the Goal 14 boundary location factors. The report doesn't even mention the Goal 14 boundary location factors, let alone address them. Nor could the Draft 2024 Report comply with the Goal 14 boundary location factors because Metro refused to consider any urban reserve areas unless a city proposes an UGB expansion and provides a concept plan. Given that Sherwood was the only city to submit a UGB expansion proposal, Metro's policy of requiring a concept plan as a prerequisite to UGB expansion precludes consideration of any other areas in the Metro region. As a result, the Draft 2024 Report clearly does not identify where the additional housing is most needed as required by Goal 14.

Metro's "policy" of requiring a concept plan from the city before it will consider adding urban reserve land to the UGB is itself inconsistent with Goal 14 and the implementing statutes and administrative rules. Metro's decision to add land to the UGB must compare alternative areas based on a balancing of all the Goal 14 boundary line factors and cannot rely solely on any one factor. *Citizens Against Irresponsible Growth v. Metro*, 179 Or App at 17; *1000 Friends of Or. v. Metro*, 174 Or App at 409–410; *D.S. Parklane Dev., Inc. v. Metro*, 165 Or App at 25. Moreover, Goal 14, the statutes and the administrative rules do not even reference a "concept plan," and they certainly do not require a concept plan as a prerequisite to inclusion in the UGB. Metro's policy for requiring a concept plan as a prerequisite for inclusion in the UGB is based solely on the Metro Code ("MC"), but the Metro Code cannot override the requirements under Goal 14, the statutes and the administrative rules.

As the Court acknowledged in *Marks*, LCDC and the Department of Land Conservation and Development ("DLCD") have both determined that Metro cannot avoid the Goal 14 requirement to study all urban reserve lands for inclusion in the UGB based solely on the lack of a concept plan. *Marks*, 327 Or App at 715-716. If Metro identifies a need for additional land in the UGB to accommodate the regional need for housing and employment, Metro must determine which land to add by evaluating alternative urban growth boundary locations consistent with the boundary

location factors of Goal 14. OAR 660-024-0060(1); *Marks*, 327 Or App at 725. Metro must consider and balance the boundary location factors of Goal 14 for all of the urban reserves areas and determine the UGB boundary location based on all the relevant factors. OAR 660-024-0060(3). Metro cannot use the concept plan requirement in MC 3.07.1110 to avoid the Goal 14 requirement that it study all urban reserve lands for possible inclusion in the Metro UGB. *Marks*, 327 Or App at 737.

Moreover, even the Metro Code does not support such a carte blanche policy. MC 3.07.1425 sets forth "factors and criteria for amendment of the UGB," only one of which includes "whether the area has been concept planned." MC 3.07.1425(c) & (d). MC 3.07.1110(a) provides that concept plans are generally required before land is added to the UGB, but it does not limit Metro's six-year review of the UGB to areas that have a concept plan. Additionally, MC 3.07.1110(e) provides an exception to the general requirement that concept planning occur before land is added to the UGB.

Metro's policy is not only inconsistent with State law, but it based on a unique situation that should not be driving Metro's approach to UGB expansions. Metro added the concept planning requirement due to the UGB expansion in 2002, which included 12,000 acres in the Damascus area that largely failed to urbanize after the decades long legal battle that ultimately led to the City of Damascus disincorporating. But that situation was highly unusual and the reasons why that area has not been urbanized are unique to that situation. The local residents' unusual decision to incorporate Damascus in 2004 to control the development of this urban area, and the subsequent disincorporation after years of political infighting and litigation, that was the reason this area did not get developed. It was certainly not the mere lack of a concept plan.

Had Metro considered other urban reserve areas for possible inclusion in the UGB as required by Goal 14, it would conclude that there are other areas that clearly have a need for additional urban lands. As an example, the City of Tualatin's 2019 Housing Needs Analysis concluded there is an existing lack of affordable housing and lack of capacity to accommodate certain other housing types. Tualatin is unable to accommodate these housing needs without a UGB expansion. Had Metro considered Tualatin's Housing Needs Analysis, it clearly would have concluded there is a specific need for additional urban lands in this location. By refusing to even consider other cities housing needs analysis or similar information, Metro is disregarding its responsibility to determine where the best locations for expanding the UGB in compliance with Goal 14.

D. Conclusion.

The Draft 2024 Report and Metro's whole approach to this six-year UGB expansion review has turned the process on its head. The Oregon legislature granted Metro the authority to administer the regional UGB because it "required Metro's unique regional perspective, rather than leaving adoption and administration of the UGB to the large number of cities and counties making up the metropolitan area." *Marks*, 327 Or App at 712-713. Goal 14 and the implementing statutes and administrative rules were designed to require Metro to determine the housing and employment needs in the region and the locations where those needs can be best served.

Metro's current approach is the opposite of that legislative directive and process. Now the cities dictate when and where the regional UGB expansions will occur. Even when the city proposals are

insufficient to satisfy the regional housing and employment needs, the Draft 2024 Report makes it clear that Metro will either ignore those needs or rely on the inherent uncertainty in predicting future trends as a basis for justifying a smaller UGB expansion. Metro is effectively abdicating its authority over UGB expansions to the cities in contravention of the legislature's intent.

Not only is Metro's approach to this UGB expansion process inconsistent with Goal 14 and the implementing statutes and administrative rules, but it will exacerbate the current housing crisis in the Metro region. As recognized in the Draft 2024 Report, the Metro region currently does not have a sufficient housing supply and many residents are priced out of the market. That trend will only worsen over time. Metro needs to provide leadership on this issue, comply with the required Goal 14 process and be willing to make the hard decisions necessary to address this difficult housing issue plaguing our region. The first step in doing so is to ensure the 2024 UGB expansion process follows the requirements of Goal 14 and the implementing statutes and administrative rules.

We appreciate your consideration of our comments and look forward to addressing this issue further with the Metro Council.

Very truly yours,

HATHAWAY LARSON LLP

Hi Ted and Eryn,

I talked with Diann this week and we weren't sure if this testimony needs to be resubmitted to be part of the UGB decision record?

There are a few other emails in support that came in before the UGR comment period formally opened.

Thank you!

Subject: Sherwood West UGB Support

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you are expecting this email and/or know the content is safe.

Dear Gerritt,

This is Diann Matthews. My sister, Marleen Mandel, and I own the property at 18550 SW Edy Road in Sherwood (approximately 60 acres at the southwest corner of Edy and Elwert Roads). We are writing to you **in support of the Urban Growth Boundary (UGB) expansion** request for Sherwood West.

Our family's roots run deep in Sherwood. Our father was raised on a farm directly across Elwert from ours, and the Mandel family has been in Sherwood for more than 100 years. The farm he grew up on is already in the UGB. It is the subdivision known as Mandel Farms and has nearly 90 homes. Our parents purchased our property in 1956 and we have continued to use it as a home and farm for nearly 70 years.

During our time here, we have seen many changes in the city during our time here, some good, some not so good. With the addition of the high school in Sherwood West, traffic and congestion have made it increasingly hard to maintain our property as a farm. I can attest that the City has attempted to meet the needs of the citizens and have a vision for the city that fits into the small community feel Sherwood has always had, but feel that now is the time for expansion.

In the past dozen years or so, I have been extensively involved in the Citizen's Advisory Committee. I sat on the citizens advisory committee in the first iteration back in 2012 and I have played an active supportive role in the current concept plan that just wrapped up prior to the City making an application this year to Metro. The city has spent a lot of thoughtful time making an appropriate plan to meet the City's current and future needs for housing, roads, infrastructure, schools, and parks.

Here are a few examples of the needs of the community and thus the reason for the ask from METRO for approximately 1300 acres: 1) lack for affordable housing in the area for all demographics, 2) job growth, which is a focus of the City Council and there is not any affordable housing for employees to live in the community, 3) more families increase school enrollment in the area and in the Sherwood High School which is located in the Sherwood West boundary, 4) the result of increased population will benefit the entire community in the tax base, 5) parks have been included into the plan to fit into the existing vision of the Sherwood community, 6) focus on sustainable employment beyond the existing service jobs, which will provide the community with a stronger revenue and services base, and lastly 7) Sherwood withdrew its request in 2018 for UGB expansion and the community has felt negative impact ever since.

There is a group called West of Sherwood Farm Alliance, existing of 2 wineries, Hawks View and Alloro, that are outside the growth boundary of Sherwood West and are encouraging folks to complain and cite reasons against Sherwood West UGB expansion request. Many of these folks have not been involved in the arduous process the city has gone through in the past 12 years which has resulted in the City's current request to Metro.

Thank you for your time and consideration in this important matter. Please know there are many of our neighbors in the Sherwood West Area who support the UGB expansion request and are hoping Metro will vote in support of the UGB expansion request of 1291 acres.

If you have any questions please feel free to reach out to me at either [redacted] or at [redacted].

Sincerely,

Diann Matthews and Marleen Mandel

Subject: [External sender]In Opposition to Sherwood West Concept Plan

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

The Sherwood West Concept plan will increase traffic and congestion (causing significant delays for day to day travel *and* first responders), create more and more of a burden on our school system (larger classroom sizes, teacher impacts, and more), increase the need for infrastructure improvements (causing a greater tax burden on Sherwood), and generally, is **NOT** what Sherwood residents want.

As anticipated, we see negative impacts of the Brookman development (*which was voted down by the citizens of Sherwood THREE times yet pushed through anyway*). We were promised better walkability and a thoughtful new traffic pattern - most definitely, not the case. The surrounding area has become a 'freeway' and/or cut through for more and more traffic without sidewalks and is unsafe for anyone to walk, run, or play (which was one of its' very selling points).

While we appreciate the need for development and perhaps even the intention to grow thoughtfully - this plan doesn't meet the needs of the existing community. Please pause and get it right.

8/13/2024

Metro Urban Growth Management Team,

The City of Gresham appreciates the work of Metro staff and consultants over the past year to compile the draft Urban Growth Report. At this time Gresham would like to provide some comments regarding the draft report:

- A topic throughout the region this cycle has been the feasibility of industrially zoned lands. Gresham staff were informed that the Metro process considered slope as part of Sherwood's expansion proposal, which is commendable. Unfortunately, slope isn't reflected in the inventory of industrial land supply in a way that accurately reflects developable acreage. Large-lot development is widely seen as infeasible if slopes exceed 5%. Several of the region's large-lot tier 3 sites are within Gresham. One is an active gravel pit, and the others are within the Springwater area with slopes in excess of 7%.

- The UGR will be viewed statewide and can have far-reaching implications. We know funding is critical for tier 3 sites, especially large-lot sites to become shovel-ready. We need to ensure we get the industrial land supply right to effectively advocate for funding for these sites.

- The draft UGR discusses potential conditions that could be placed on a Sherwood expansion related to housing that could require a certain housing mix. Gresham would caution against overly prescriptive conditions of approval with the impending Oregon Housing Needs Analysis. It could be more appropriate to allow the OHNA housing needs allocation and Sherwood's translation of it into housing types, characteristics, and locations to help Sherwood formulate zoning and incentives for housing types within the expansion area.

We appreciate your consideration of Gresham's comments.

Sincerely,

Ashley Miller

RE: UGB Expansion
Dear Gerritt:

My name is Lou Ann Nance, and my interest in the Sherwood UGB is based upon my family's property within the Sherwood West Neighborhood, which they have owned for nearly 40 years.

Our family has huge sentimental interest in the Sherwood Area, and desire for thoughtful development of the area that support s efficient use of the land that creates new jobs and affordable housing. It will also be necessary to create a tax base that sustains the infrastructure, and the new $247 million-dollar high school.

Your foresight into a healthy UGB Plan will ensure the prosperity of the City of Sherwood for many years to come. Thank You for your time and considerations in this important matter.

Sincerely

Lou Ann Ottoman Nance

August 15, 2024

Metro Council Chair Peterson and Members of the Metro Council,

Thank you for the opportunity to provide testimony on the draft Urban Growth Report (UGR) released in July. We appreciate the work and effort staff have dedicated to the implementation of the Urban Growth Report process. We are grateful for the opportunity to have representation on the Stakeholder Roundtable.

The Washington County Chamber of Commerce represents a broad spectrum of businesses and community stakeholders who are deeply invested in the future growth and prosperity of our region. After thorough discussion with our members, we have identified several areas of concern in the UGR as currently drafted. We respectfully submit the following feedback for your consideration.

1. Definition and Classification of "Buildable Land"

One of our primary concerns revolves around the definition and classification of "buildable land," particularly in the context of industrial land supply versus housing capacity. The current draft report appears to contain significant discrepancies between what is considered "developable" land and what Metro is counting as a surplus of buildable lands.

Analysis suggests there is an oversampling of small parcels, particularly those under 10 acres, which are generally not attractive to industrial or commercial investors. Additionally, we have identified issues with several large parcels, including eight 50-acre sites that appear to be either defunct rock quarries or sites with serious constraints, making them effectively undevelopable.

We urge Metro to revisit the criteria used to classify industrial land and to apply more stringent layers of analysis to ensure that the data reflects the true potential for industrial development. It is crucial that Metro's data accurately represents the realities on the ground to avoid misguiding policy decisions based on an overestimated supply of viable industrial land. If the criteria are embedded in State Land Use laws or constraints, we believe it is incumbent upon Metro to actively seek changes to State Laws or Statute.

2. Employment Lands and Viability

Regarding employment lands, we recommend that Metro Council discount approximately 1,300 acres of land with a slope grade above 7%, as this exceeds the industry standard for commercial and industrial development. We also ask that the Council consider the fact that the average lot size for employment lands is currently 3.8 acres, with a median site size of just 1.7 acres. These dimensions are often insufficient for the needs of modern commercial and industrial developments.

3. Senate Bill 4 Super-Siting and Employment Land Expansion

During the 2023 Legislative Session, Senate Bill 4 gave the Governor super-siting authority under the Oregon CHIPS legislation (SB4) passed last session. Should the Governor choose to exercise this authority, we strongly urge the Metro Council to view this as an additive measure rather than a replacement for any employment land expansion decisions as it was contemplated by Legislators. The super-siting authority is a valuable tool for specific projects but should not substitute the broader need for increasing our employment land base.

4. Housing Capacity and the Need for Realistic Projections

The draft UGR significantly underestimates the region's housing needs. According to a report by ECOnorthwest, the Portland Metro Region is already facing a shortage of 59,488 homes, in addition to 10,683 homes needed for houseless populations. Furthermore, the report projects that the region will need to produce 294,853 new housing units over the next 20 years—far exceeding Metro's calculated range of 143,300 to 203,200 units.

We strongly recommend that Metro Council incorporate this supplementary data into the UGR and consider its implications, particularly in the context of Sherwood's expansion plans. The current projections in the UGR do not align with the on-the-ground realities of our housing market. We also urge the Council to reject the limiting housing development scenarios presented on page 38 of the report. Instead, Metro should adopt a policy framework that acknowledges both the low capacity for housing development within the Urban Growth Boundary (UGB) and the urgent, high need for new housing production.

The current scenario, which suggests a surplus of 9,050 units, is misleading and risks leaving our region severely underprepared for future housing demands. The reality points to a potential deficit of 84,000 housing units inside the UGB, a gap that Metro must address to avoid exacerbating the existing housing crisis. We believe that planning for adequate housing will help to mitigate the escalating costs of housing.

5. Planning for Growth, Not Decline

Finally, we believe that it is far wiser to plan for growth and be overprepared than to anticipate decline and risk underproducing housing and jobs. The current UGR seems to prophesy a conservative growth outlook, which could lead to economic stagnation and increased pressure on housing markets. We urge Metro Council to adopt the "High" Population growth forecast in the UGR to provide greater flexibility to local jurisdictions in meeting their communities' needs.

This recommendation is not just a matter of optimism but of prudent public policy. By planning for high growth, Metro can ensure that our region is prepared to meet the demands of a growing population, thereby avoiding future crises related to housing shortages and economic underdevelopment.

6. Washington County Chamber Support for Sherwood's Expansion Application

In addition to the concerns outlined above, the Washington County Chamber of Commerce fully supports the City of Sherwood's expansion application as presented. We believe that the Sherwood West North District Mixed Employment Area (MEA) is critical for addressing the region's growing need for industrial land and housing. The inclusion of this area within the UGB will help meet the demands of a

robust and expanding industrial market, provide opportunities for job creation, and contribute to the overall economic growth of the region.

It is essential that the final decisions reflect the true needs and potential of our community, and we remain committed to ensuring that the voices of our members and stakeholders are heard throughout this process.

We appreciate the significant amount of work that Metro has put into the Urban Growth Report, but we believe that adjustments are necessary to reflect the true needs of our region. We urge the Metro Council to take these concerns into account and to revise the UGR accordingly. The Washington County Chamber of Commerce stands ready to collaborate with Metro and other stakeholders to ensure that our region's growth is sustainable, equitable, and prosperous.

Thank you for your consideration.

Sincerely,

Deanna Palm

Subject: [External sender]Please Vote NO on the Sherwood Urban Growth request

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Dear METRO Council,

Say NO to the Sherwood request to expand the UGB. Although METRO has previously said YES to all city proposed UGB expansion requests, you should say NO to the Sherwood request. Please stick with your charter! From your website "...Portland area leaders saw an unfulfilled need to provide regionwide planning and coordination to manage growth, infrastructure and development issues that cross jurisdictional boundaries. They also saw a need to protect farms and forests from urbanization and to provide services that are regional in nature."

The Sherwood proposal uses inaccurate population growth data. Read and listen to your own Expert Analysis reports. The minimal population growth will come only from net migration. The state is also looking at alternative scenarios. Read the "Zero Migration" report from the Oregon Office of Economic Analysis at Report: Zero Migration, a Demographic Alternative Scenario | Oregon Office of Economic Analysis (oregoneconomicanalysis.com)

Job estimates - simply a Field of Dreams estimate, if you build it they will come. But, they will not come from out of state, they will come from other parts of Metro. Everyone hopes they will get a microprocessor factory, but another Amazon warehouse employing robots is more likely.

New Housing – politically correct position, but simply wrong. This will not drive housing prices down. Does anyone really believe that this growth will help solve the homeless problem?

Infrastructure – We are taxed enough already, please STOP! The proposed roadway improvements are not nearly enough to move the increased amount of traffic.

This UGB expansion is NOT needed, it is wanted. It is backed primarily by the city government and developers. Why they support this UGB expansion is unclear, but there are clues when you look at the list of Supporters provided by Sherwood in the proposal, and by this statement made by Mayor Rosener at the last MPAC meeting. He said something to the effect... "We have speculators who have bought up the land or have options on those lands, to do land assembly. There is some grease on the wheels there."

Please stop the sprawl and protect farms! Support infill. Support real estate re-development to address the housing. Support re-purposing of unused office space resulting from folks working from home.

Thank you for your consideration,

Jo and Alan Pearson

Subject: [External sender]Please REJECT Sherwood's UGB Growth Request

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To whom it may concern,

We strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. METRO needs to execute on one of their primary purposes, and stop unnecessary urban sprawl.

NOT NEEDED
In 2022 Metro projected Sherwood would grow by a scant 3% over the coming decades. The Sherwood School District has forecasted enrollment for the new high school will begin to DECLINE in 2027. Sherwood has enough vacant land to accommodate new housing and jobs for years to come, when planned and developed wisely.

Metro's research concluded there is enough industrial land inside the existing Regional UGB for another 20 years. Metro's research on Residential land shows most land brought into the UGB in the last 20 years remains undeveloped.

FALSE PREMISES
Taxes will increase. I testified and asked for a Taxpayer Impact Statement, yet none is available to my knowledge. Residents should understand how Sherwood and its residents will pay for the new roads, sidewalks, water and sewer, and not just an "agreement" to figure it out later. Yes, the developers will pay for a portion of the initial infrastructure, but WE will be left with more financial obligations to pay for the operating and maintenance costs, even though we do NOT need the new land to keep pace with growth in Sherwood.

Trust in Leadership is rapidly eroding. Statements like "Developers and speculators have already bought land or rights...", "Wheels have been greased...", and then the Washington County testimony supporting Sherwood and stating something like "WE encourage METRO to adopt the high population estimate so they could get more funding..." This is astounding, but sadly not surprising, behind the scenes behavior.

NOT WANTED
84% of the people in Sherwood who participated in an online poll in 2021 OPPOSED the UGB expansion. If you actually read the verbatims in the Sherwood proposal, there is little support for this expansion by the residents.

We stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely,

Alan and Jo Pearson

In reference to the above mentioned urban expansion I want to express my support for this planned expansion. There is an acute shortage of all types of developable land in the tri county area, but in particular Industrial property is lacking. AS a commercial real estate broker of 42 years focused in the Metro region but SW in particular, I have represented many of this submarkets largest employers. Lately I have seen a trend by some to relocate to other areas of the state, or out of state due to the lack of available land and/or facilities to house expansion. The housing shortage in the region is mentioned often in the press and is a focus of the state leadership, but the shortage of industrial land is more acute in our region is more acute, and in my opinion, more important. Our region cannot prosper without our industrial employers being retained and the shortage of industrial property in the metro region is causing out migration of these stalwarts of our business community.

Re: Letter of Support For Metro Council's 2024 UGB Decision For Inclusion of the Sherwood West Concept Plan Area.

Dear Councilors Peterson, Simpson, Lewis, Rosenthal, Gonzalez, Nolan, and Hwang:

Please accept this letter as our second and supplemental official Letter of Support on behalf of those Sherwood West property owners, whom we currently represent and have represented in the past from the beginning of the Sherwood West planning process nearly ten years ago, requesting that your December 5, 2024 final decision approve the City of Sherwood's "Ask" to expand the Metro UGB to include the entire Sherwood West 1,291-acre Planning Area into the current Metro UGB boundary.

We respectfully submit this testimony on behalf of our current and former mostly very long term generational Sherwood farm and community family clients, Elanna Schlichting, manager of the Schlichting Family Century Farm LLC (owners of approximately 38 acres), Nancy Perkins and Kevin Sabbe, Trustees of the Sabbe Family Trust (owners of approximately 32 acres), and the Glen T. Wetzel Family (owners of approximately 0.46 acres), all located in the North District, as well as the Mandel Farms, LLC (owner of approximately 57 acres) and Prodigal Son LLC. (owner of approximately 20 acres) both located in the West District, all of

which represents approximately 147 acres or nearly 12% of total land located within Sherwood West.

From years of experience representing a number of Oregon cities in various capacities and being intimately involved in comprehensive and concept plan since the 1970's and 1980's, and based on recent review of Metro's Draft July 2024 Urban Growth Report ("UGR"), please see the following executive summary of our written and oral testimony to both the City of Sherwood over the years, our initial April 2024 letter to you, and our review of the UGR in light of recent promising trends on the horizon of our lives and our communities, locally and nationally, which ultimately argue in favor of and support for your affirmative decision to expand the Metro UGB to include the entire Sherwood West Concept Plan:

1. The City of Sherwood and the Sherwood Community has worked very hard for many years with the help of Metro Council Staff and thousands of hours of City and County officials and staffs, with the valuable input of countless community volunteers and consultants from the entire collection of interested parties and local and state agencies and the many vital NGOs, all of which have provided important and essential input to shape and create the unique Sherwood West Vision for the future of all of its existing and future residents and businesses.

2. Sherwood West is the first time the City and Community and all players has systematically and comprehensively supported and created a visionary UGB expansion of this scope, which will provide the road map forward beyond our current lifetimes.

3. Sherwood West is the first expansion request to incorporate many of the middle housing (and thus more affordable housing) options of the continuing local and statewide Smart Growth legacy.

4. Sherwood West:
    a. Protects and enhances the viable farm and forest lands surrounding Sherwood.
    b. Protects and enhances the existing special natural resources of the Area that are so important and beloved throughout our community and county and state.
    c. Encourages distinct and diverse middle housing types, in livable and walkable neighborhoods close to commercial areas as built environments centered around those existing natural resources.
    d. Helps address Sherwood's local housing crisis and particularly its need for affordable housing to meet its changing demographics.
    e. Provides a much-improved Jobs/Housing Balance centered in the North District Employment Area that will help ensure that Sherwood West's vision is economically sustainable into the future.
    f. Which Balance is specifically planned to attract advanced manufacturing and high-tech support services that by purposefully reducing the need for direct "major highway access" and reducing the number of trips and miles between home and work will further enhance Sherwood's collective goal to be as "carbon neutral" as possible.
    g. Provides affordable opportunities to more small women owned and BIPOC businesses in the North District and the planned commercial areas.

5. In recent "Ask" cycles, as Sherwood continued to refine its Sherwood West Plan, other communities within the Metro UGB and especially in the South and West Metro Areas

have been given significant UGB expansions into urban reserve areas which were comprehensively planned and are being and will be comprehensively developed for many years into the future. Sherwood needs and respectfully requests that same opportunity.

6. Nationally, despite what we thankfully are seeing "in the rear-view window":
    a. Inflation appears to be under control and been reduced significantly year over year confirming the "soft landing" we all hoped for, and
    b. The Federal Reserve is this week signally that its next interest rate reduction will occur in September 2024, as the recovery continues to trend upward.
    c. All of which will encourage a return to sustainable growth in all sectors and with Sherwood's current housing crisis and need for more employment land provides the support for your December decision to expand the UGB to include all of Sherwood West.

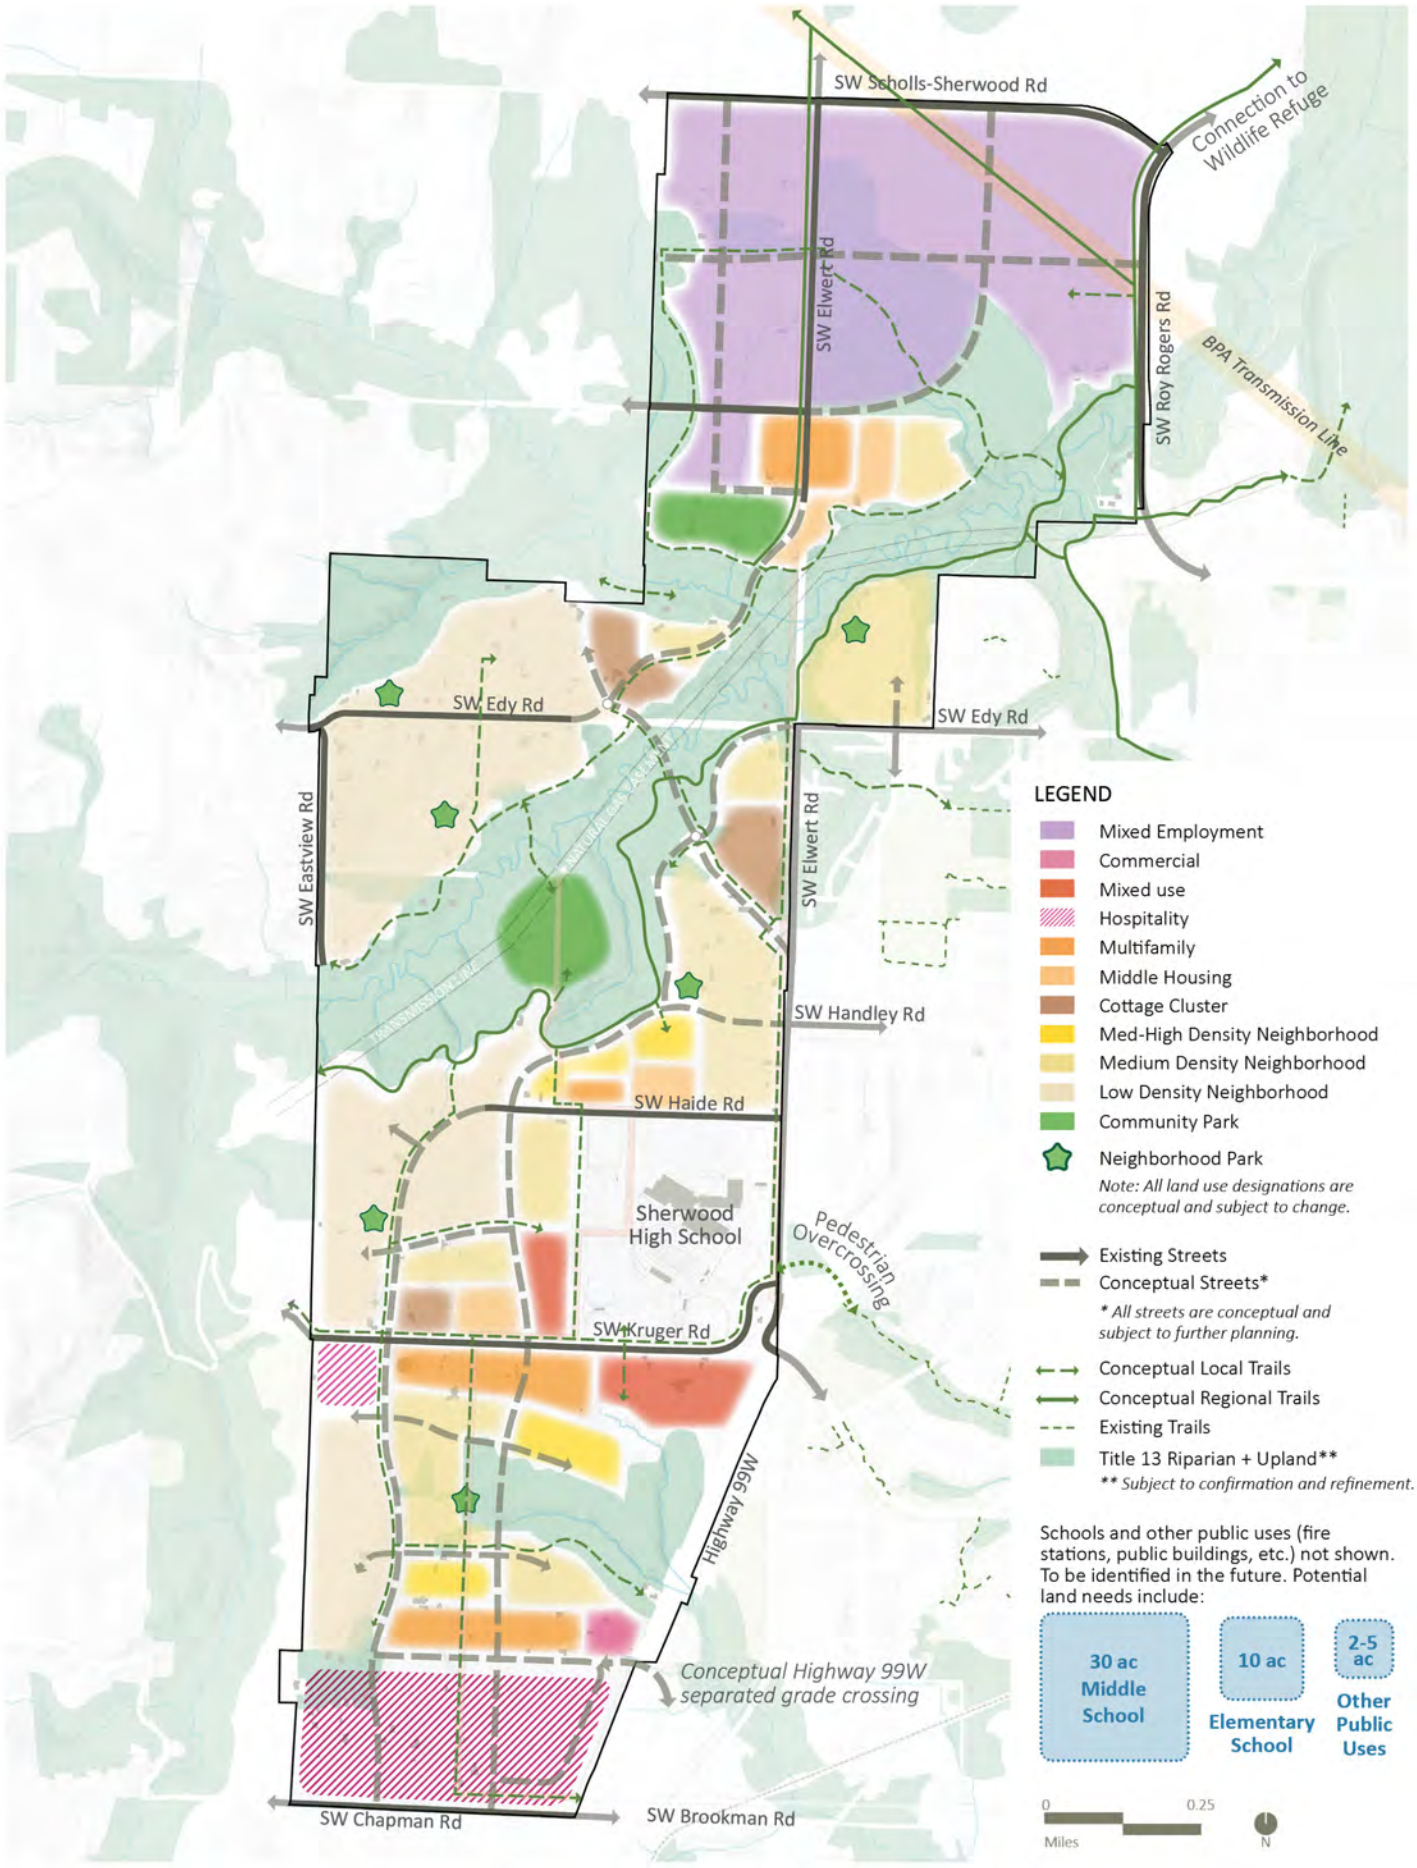
7. We continue to sincerely believe the best way to make certain a great Concept and Community Plan like Sherwood West truly succeeds is to make certain the entire Plan is fully implemented for the reasons given in our April 4, 2024 Letter of Support, including but not limited to:
    a. We need only look at the decades old and recent successful UGB expansions from Villebois in Wilsonville to River Terrace in Tigard and others in Hillsboro in West and Southwest Metro;
    b. Piecemeal or phased expansions always result in anomalies and subtle and not-so-subtle resulting amendments that blur a city's vision and frustrate the intended balancing of the complex inter-relationships of planning efforts and the natural and built environments; and
    c. The City and Community can then work on an "economies of scale" basis with all potential developers and affected agencies to ensure the City's Strategic Funding Program works most efficiently and effectively to realize the vision.

8. Sherwood has created a viable Sherwood West Final Infrastructure Strategy which will work to phase development and enhancement of the built and natural resources environments.

9. Significant interest in Sherwood West from quality members of the development community, both locally and nationally, has been generated, particularly in the industrial employment lands designated in the North Area in the last year, resulting our receipt of a purchase offer from a serious and respected national development company who has been active in the Portland Metro Area and Pacific Northwest for many years.

Again, thank you for the opportunity to present this final letter of support on behalf of all of us who live and/or work in the Sherwood and in the Sherwood West Planning Area.

We continue to look forward to your decision to expand Sherwood's UGB to include the entire Sherwood West Planning Area and give the City the ability to create and implement Sherwood West as a great addition to the City and the Sherwood Community as well as to the greater Portland Metro Area.



Finally, a profound thanks to you all and your staff's help and support of the City's long-term efforts to create the Sherwood West Plan.

Very truly yours,

John A. Rankin

Re: Draft Urban Growth Report

President Peterson and Councilors:

My name is Kelly Ritz, President of Venture Properties, Inc. and our associated home building company, Stone Bridge Homes NW, LLC. In 2015, we began development of the Mandel Farms subdivision, an 86-lot detached home community at Edy and Elwert Roads in Sherwood. We closed on our last home in October 2019. It was a successful project for us, and we are very appreciative of the support we received from the Sherwood community and city staff.

Shortly after starting Mandel Farms, we began working with City Planning staff and several property owners in the Sherwood West area to advocate for a potential urban growth boundary expansion for all or a portion of Sherwood West. Much study and discussion has taken place in the years since, culminating in an extensive two-year planning process and adoption of the Sherwood West Concept Plan in 2023. This led to a request to Metro later that year to expand the Urban Growth Boundary to include 1,300 acres within Sherwood West.

A key part of Metro's review of this request includes the recently completed draft Urban Growth Report. This report concludes that under baseline population forecasts, "approximately 150,000 additional homes are needed to meet expected population growth over the next 20 years," and to meet this demand, "we must continue to focus on public investment and removing barriers to housing production." Land to accommodate this growth will need to come from a variety of current, redevelopment, and urban expansion sources. Sherwood's UGB expansion request, created from strong community support, offers a thoughtful blueprint for a diversified residential-industrial-employment planned community. We believe that their plan has the best chance of supplying a mix of single-family, middle housing, and multi-family options for all age ranges now and into the future.

My companies and I wholeheartedly endorse your acceptance of the Urban Growth Report and recommend your continued review and approval of the Sherwood West Urban Growth Boundary expansion.

Thank you for your consideration of our testimony.

Sincerely,

Kelly Ritz, President
Venture Properties, Inc.

Subject: [External sender]2024 Draft UGR Comment

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Hello,

The 2024 UGR has implications for local government planning processes as Metro's subsequent distributed forecasts inform local Housing Capacity Analyses, Economic Opportunities Analyses, and Regional Transportation Plan modeling.

The City of Hillsboro recommends Metro rely on a high population growth forecast to allow our region to be nimbler in addressing current and future housing and employment needs.

The 2024 Draft UGR demand scenario 4 involves faster household growth in 2044 coming from increased in-migration of younger households, consistent with historic migration dynamics, who typically seeking multifamily and middle housing. Though younger households who migrate to the region by 2030, 2035, and 2040 may initially prefer multifamily or middle housing, many will continue to demand single-unit detached for their growing household size and other reasons. The City of Hillsboro recommends Metro add a new UGR demand scenario 5 that involves faster household growth coming from increased in-migration of younger households, consistent with historic migration dynamics, but with a larger percentage of single-unit detached to meet the demand during the next 20 years.

Though the Draft UGR shows the region as having sufficient total industrial capacity, much of the industrial land supply consists of smaller parcels with an average lot size of 3.8 acres and a median lot size of 1.7 acres. The Draft UGR mentions there are only eight sites over 50 buildable acres inside the UGB that are available to the general industrial market. The final 2024 UGR should highlight the lack of sufficient large-lot industrial sites 25 plus acres in size available to the general industrial market. The final 2024 UGR should also highlight that less than 6% of the taxlots available to the general industrial market are medium-sized sites between 10 and 25 acres.

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To whom it may concern,

I am writing in support of the Sherwood West Expansion Plan. Here is a link to the rationale for my support. It is my opinion that this is a very good plan for the appropriate expansion of west Sherwood and fits with the logical development surrounding the Sherwood High School and other areas.

Sincerely,

Terrel Smith
Retired teacher-Sherwood High School
[redacted]

Request that the Metro Council:

- **Approve the Sherwood West Concept Plan as proposed by the Sherwood community. Changes to the plan threaten community support.**
- Add 340 net acres of residential land to the UGB as proposed in the Sherwood West Concept Plan.
- Add 130 net acres of flex industrial land to the UGB as proposed in the Sherwood West Concept Plan.
- Add 135 net acres of commercial and hospitality land to the UGB as proposed in the Sherwood West Concept Plan.

Background Information:

Urban Reserve designation

- Sherwood West is proposed within an Urban Reserve. Urban Reserves are lands suitable for accommodating urban development over the next 50 years.
- Land that is considered most important for commercial agriculture and forestry use is in rural reserves and not eligible for urban expansion.
- City has clearly answered question of readiness and has prepared for adding Sherwood West to the UGB.

Regional Growth Projections

- Our region is growing and is expected to add an average of 15,000 new residents per year through 2044.
- Sherwood is preparing for its share of growth through the Sherwood West Concept Plan.
- The Sherwood School District supports the Sherwood West proposal. The School District Board of Directors and the Superintendent have expressed strong support for the plan.
- Our region will add approximately 315,000 new residents and 137,000 new jobs over the next 20 years under a baseline growth scenario.

Community Engagement

- Since 2021, the City has held over 30 public meetings on Sherwood West. The public engagement process was highly publicized, thorough and inclusive. The Sherwood West vision was developed by the Sherwood community.
- The diverse range of residents and stakeholders were represented on the Community Advisory Committee and Technical Advisory Committee.

- The Sherwood West Concept Plan has strong local support including unanimous approval from the Sherwood Planning Commission, Sherwood City Council, and Washington County Board of Commissioners.

Housing

- Sherwood and the Portland region are experiencing a housing crisis. The severe shortage of housing has increased prices and reduced affordability for all. Between 2017 and 2022, the Portland region experienced a 50.4% increase in homelessness.
- The Sherwood West Concept Plan will provide a minimum of 3,100 new units including mid-rise apartments, missing middle housing, and single-family detached residences. A minimum of 43% of new housing will be middle and multi-family housing.
- The plan proposes innovative zoning types including cottage cluster only and middle housing only zones will provide opportunities for first time home buyers and empty nesters to stay within or relocate to our region.
- Sherwood West proposes between 43% - 68% middle and multi-family housing. The range depends on how much middle housing is constructed in certain zones.

North District Employment Land

- The Sherwood West employment land provides opportunities for equitable economic growth.
- Employment land is not just about a simple supply and demand analysis. Economic development requires a land supply that enables specific industries to thrive.
- The average industrial parcel size in the metro region is 1.7-acres. Our region is facing an industrial land supply crisis similar to the housing crisis. Small BIPOC and women owned businesses are most vulnerable to rising business costs.
- The industrial vacancy rate in Washington County is 2.5% making business more expensive for key target industries. Small businesses are impacted the greatest by high industrial land costs and lease rates.
- Sherwood grew it's industrial and manufacturing base twice as fast than the region between 2017 and 2022.
- The Sherwood West site is competitive and will lead to new jobs for a growing part of the region.

Annexation and Development Phasing

- Sherwood is committed to thoughtful planning and careful growth over time.
- Approval of the UGB expansion does not immediately bring the land into the City of Sherwood. The land remains part of unincorporated Washington County until formally annexed into the City of Sherwood.
- Growth is expected to occur first at key nodes with access to infrastructure like near the new Sherwood High School.

- The Concept Plan includes a Preliminary Infrastructure Funding Strategy that describes how new infrastructure will be funded. Where current SDC rates do not cover the cost of infrastructure, a broad range of funding tools will be considered.

RE: Draft 2024 Urban Growth Report

Dear President Peterson and Metro Councilors:

Thank you for the opportunity to comment on the Draft 2024 Urban Growth Report (2024 UGR) and Sherwood West urban growth boundary (UGB) expansion proposal. We recognize that completing this report during these times of uncertainty is extremely challenging. The report acknowledges that while there may be slower projected population and employment growth, the on-going housing availability crisis and continual need for large-lot employment land are factors that should not be minimized.

First, we urge the Metro Council to select the **high growth rate for both population and employment**. Planning for high growth will give jurisdictions the latitude not only to attract more investment opportunities in the region, but also to appropriately balance housing needs, land use, economic development, and transportation planning. Assuming low or baseline growth rates may result in unintended, adverse effects, by constraining local jurisdictions' ability to respond in real time to address population, employment, and housing requirements. It is also critical that findings within the 2024 UGR support necessary UGB expansion without forcing the removal of land from other locations.

As part of the Oregon Housing Needs Analysis (OHNA), the State will assign specific housing targets to individual jurisdictions beginning in 2025. This new paradigm for housing accountability necessitates consideration of the specific land need within individual jurisdictions rather than a singular focus on regional land supply. Selecting the high growth rate for both population and employment will create the best opportunity to meet the coming state-mandated housing targets and will allow the region to be more responsive and proactive in attracting potential new employers.

Second, we have concerns with **Metro's methodology that asserts that we have a surplus of industrial lands (nearly 6,000 acres) available inside the UGB to serve our region's need over the next 20 years**. We appreciate the supplemental industrial lands analysis, based on site criteria, that was developed as a part of the City of Sherwood's expansion request. However, **we believe**

that Metro's methodology for determining industrial "buildable lands" is flawed because it does not consider key site criteria factors in developing the Buildable Lands Inventory.

The 2024 UGR cites that of those 6,000 surplus acres, the average industrial parcel size is 3.8 acres, with a median industrial parcel size of 1.7 acres. Market factors indicate that firms seek parcels that are a minimum of 5 acres and are developable in 7 to 30 months or less. It is also clear that there is demand for large-lot industrial sites of 20, 50 and 100 acres in Clackamas County, and Metro's current method of evaluating industrial land supply fails to address this demand. In short, the lands that Metro is considering developable are not sufficient to meet the market need.

Clackamas County continually faces the challenges of not having an inventory of available and suitable employment land to support industry and employment for our workforce. While we know that the 2024 UGR decision is only one of many factors that influences the development of land, it is essential that this decision is made in a way to best support growth in all of our communities.

Finally, the comment period for the 2024 UGR was not sufficiently long to allow a robust discussion of these important issues. In the future, we urge Metro to provide a 90-day comment period between release of the draft UGR and issuance of the Metro Chief Operating Officer's recommendation to the Metro Council. It is imperative that local jurisdictions be given an adequate opportunity to weigh in on the UGR at an early point in the process. That said, we are looking forward to future opportunities to communicate with the Council before the Urban Growth Management Decision is made later this year.

In closing, the Urban Growth Management Decision process is driven by legal obligations that do not always translate into market reality. Discussions about the future can begin with questions on whether the region has the right amount of land to support housing and job growth, but they must not end with a simple yes or no answer. We are supportive of Metro Staff's recent proposal to update the 2040 plan and look forward to the opportunity to develop a better approach to planning for a bright future for our region.

Sincerely,

Clackamas County Board of Commissioners

Tootie Smith, Chair

Commissioner Paul Savas

Commissioner Martha Schrader

Commissioner Mark Shull

CAUTION: This email originated from an External source. Do not open links or attachments unless you know the content is safe.

>> I am writing to express my concerns regarding the Draft Urban Growth
>> Report and the City of Sherwood's proposed Sherwood West Concept.

>> First, the Draft fails to incorporate or thoroughly analyze the
>> figures upon which the Concept is based. Instead, it seems to merely
>> assess the City's "readiness" for expansion. While the City may
>> perceive itself as prepared to expand, the more important question is whether it should expand.
>> In my opinion, the answer is no. The proposed expansion is
>> unwarranted, as Sherwood has likely already reached its peak in terms
>> of the population that should or will move into the area.

>> For instance, the new high school was justified on the basis of
>> expected population growth, yet it has not come close to meeting the
>> attendance figures used to pass the Bond measure. We must be cautious
>> and not rely on the self-serving numbers the City provides when
>> making decisions about the Sherwood West Concept.

>> Furthermore, farmland is vital and irreplaceable. It is a key part of
>> the character of our city. Sherwood has already converted enough
>> farmland into developed areas. The thought of adding light industrial
>> buildings or more housing on the west side of our beautiful city is
>> unnecessary now and in the future. The residents of Sherwood have
>> been clear in their opposition to further expansion. Even METRO's
>> data shows that Sherwood's population is expected to increase by less
>> than 1,000 people over the next 20 years. Let's preserve the beauty that surrounds our city.

>> Thank you for your time and attention to these concerns.

RE: Urban Growth Report, Draft 2024

Dear Council Members,

I am writing to provide comment on the Draft Urban Growth Report pertaining to the City of Sherwood's proposed Sherwood West Concept.

In reviewing the proposed draft report, I find the city of Sherwood's proposal to increase the city by 41% to be lacking in reliable data and concrete reasoning for such an expansion.

The west side of the city is already an area of congestion and outdated infrastructure. To add additional homes, light industrial buildings and traffic would severely impact the area, while requiring the loss of valuable, irreplaceable agricultural land and open space.

The impact on taxpayers for additional bond measures to then pay for roads, utilities, increased police and fire department services would also be a significant burden for a project that has shown no overall benefit to improving the quality of life for the residents of the community.

The layoffs currently occurring with Intel and other businesses in Washington County should be a cause for a cautious and well reasoned approach to solving a problem that does not exist for this area.

Thank you for your time in reviewing my correspondence.

Sincerely,
Michelle Standridge

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Dear Metro Council,

Good evening and thank you for your time. I am writing this letter in support of the Sherwood West Concept Plan as proposed and supported by the Sherwood community and Sherwood City Council.

"New" and "fresh" are two words that come to mind in regards to this comprehensive plan. New strides and fresh faces. New ideas and fresh goals. New directions and fresh opportunities. This plan offers practical, thoughtful and forward movement; with a sustainable core based on values for healthy growth, preserving open spaces and upholding the strengths and benefits inherent in Sherwood.

Three key factors of the Sherwood West Concept Plan that in my opinion highlight its vital role:
1. Positive employment growth trends at 18% from 2017-2022.
2. Promoting a steady and robust economic growth and resdiential housing.
3. "2024 ECOnorthwest analysis North District Mixed Employment Area (MEA) of Sherwood West Concept Plan has site characteristics that make the land better suited to accomodate the industries that are growing and expanding in the Portland Metro area."

Sherwood must grow and evolve in a balanced way and I feel that the Sherwood West Concept Plan as proposed is that backbone.

Best Regards,
Jodi Tsutomi

Portland, OR 97232

RE: Draft 2024 Urban Growth Report

Dear Metro Urban Growth Management Team,

Thank you for the opportunity to review and provide comments on the Draft 2024 Urban Growth Report (UGR). This memo summarizes technical comments from Washington County Land Use & Transportation staff.

We appreciate the work Metro has done for the region's livability in managing the Urban Growth Boundary (UGB) in a way that balances the need to protect rural land uses and provide an adequate supply of land that has a high likelihood of successfully developing into places to live, work, visit, and play. Staff appreciate the opportunity to participate in the process through the Land Use Technical Advisory Group (LUTAG), Metro Technical Advisory Committee (MTAC), the Transportation Policy Advisory Committee (TPAC) and the economic development forum. We also appreciate the time that Metro staff have spent sharing their work with us and other partners through various committees and organizations throughout the process.

Since the origin of the Metro Urban Boundary, jurisdictions in Washington County have shown their ability to plan for expansions of the UGB areas in a way that creates desirable communities. We respectfully request that Metro correct the number of housing units built in North Bethany since the UGB expansion in 2002. The Draft UGR reports that only 573 units have been built, but the actual number is closer to 4,000. This is an important detail because it shows the success of building communities within UGB expansion areas over the last twenty years.

The primary concerns of Washington County staff are how the technical tools have been applied to evaluate the most likely development potential and demand scenarios. These concerns have been raised by the County and other partners throughout the review process. Two examples follow:

- The scenarios that Metro prepared along with the three growth forecasts assigned a demand share for single- and multi-family units. The high growth projection was paired along with the high demand for multi-family product scenario, and we did not see results of the high growth forecast modeled with high demand for single-family product or an even split. We believe that it is important to ensure adequate land for a

Department of Land Use & Transportation
[redacted] Hillsboro, OR 97124-3072
Phone [redacted]
www.washingtoncountyor.gov

variety of housing types. Past trends have shown that much growth (both single and multi-family) is happening outside of town centers, reflecting market realities from both a supply and demand perspective. Supporting and incentivizing growth in our town center areas is a part of the solution to our housing crisis but so are carefully planned UGB expansions and infill development all around the region. The limited scenarios shared in the draft UGR did not prepare us to evaluate the effects of these options.

- For employment/industrial needs, the evaluation of industrial land supply needs to account for the available size of properties and the flat topography needed by modern large-scale industrial development. While land with slopes between 5% and 25% has been successfully developed into new residential areas, and to some extent new commercial areas, the parts of the region's industrial land supply that are this topographically challenging are unlikely to be financially viable. Flatter industrial land is a prerequisite to future growth in industrial employment. Metro should update the calculations of available employment/industrial land to remove steep slopes.

County staff worked closely with Sherwood staff as they prepared the Sherwood West Concept Plan and we support their technical work and the process that they have gone through. Again, we appreciate the collaborative spirit with which Metro staff approached this Urban Growth Report and look forward to our continued work together.

Sincerely,

Erin Wardell

RE: Draft 2024 Urban Growth Report

Dear Chair Peterson and Metro Councilors,

Thank you for the opportunity to comment on the draft Urban Growth Report (UGR) and Sherwood West urban growth boundary (UGB) expansion proposal. The 2024 growth management decision is the blueprint for how Metro Council will lead the region in planning for future housing development and employment opportunities. We appreciate that these decisions are challenging and acknowledge there are trade-offs that must be carefully considered in this decision process.

Our Board strongly supports the City of Sherwood's application for expansion of the urban growth boundary to include the 1,291 acres within the Sherwood West urban reserve area. The city has demonstrated their readiness to serve the area with governance and infrastructure as required by Metro's Urban Growth Management Functional Plan. The City's plan envisions that up to 5,582 housing units and 4,524 jobs could be accommodated in the expansion area. As we are all grappling with ways to produce more housing in the region and across the state, adding this land to our regional urban growth boundary makes sense. In addition, Sherwood has shown that the proposed Sherwood West employment area has the site suitability characteristics to attract more of the types of industry that Sherwood has successfully recruited to the city in recent years. Even though this is a regional urban growth boundary expansion decision using regional analysis, place matters in this consideration. Sherwood has demonstrated that they are a place where people want to both work and live.

We also encourage Metro Council to strongly consider selecting the high growth rate for both population and employment. The selected growth rates guide regional policy and funding decisions around housing, employment land and supporting infrastructure. Choosing low growth rates could artificially constrain our ability to plan for or make decisions to support the development of badly needed housing of all types, or further constrain opportunities to grow our region's traded-sector employment, which provides living wage jobs for thousands of our community members.

Board of County Commissioners
[redacted], Hillsboro, OR 97124-3072

When analyzing the expansion of the Portland UGB, you propose to maintain such a tight land supply that single family homes would only account for 23% of new housing. The rest of the units would be apartments of other forms of high-density living.

I believe 75% of people aspire to live in single family homes. Therefore, I am adamantly opposed to limiting single family homes to anything under 50%.

I am in favor of Sherwood's application to expand their UGB and sincerely hope they will be able to do so without this ugly single family home restriction.

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you are expecting this email and/or know the content is safe.

Dear Gerritt,

My name is Gwen Werger and my parents have owned a 10 acre parcel of land on Elwert Road since 1981. My sisters and I are now managing the trust that holds this property. I am writing in **support of the Urban Growth Boundary expansion request for Sherwood West.**

When my parents first purchased this acreage in 1981, the land west of 99W was mainly farms. Now there are several subdivisions east of Elwert Rd. as well as the newest Elementary School. As of 2021, Sherwood High School, the largest high school in Oregon, as well as a $247 million dollar investment by the community, was built on Haide Rd, which is directly west of Elwert Rd.

The amount of traffic on Elwert Rd resulting from the new High School as well as commuters to Roy Rogers Rd and beyond makes this area much more difficult to operate as farmland. The proposed 1,291 acres to be included into the UGB is now more suitable for additional housing and light industrial than it is farmland.

By including the 1,291 acres of Sherwood West into the UGB, this would provide land for affordable homes as well as parks and green space near the schools. Additional housing will increase the tax base as well as provide increased enrollment for the school district.

Adding Sherwood West into the UGB, will also provide Sherwood with land needed for additional economic opportunities. The city of Sherwood has a plan to expand job growth in the area and with that comes the need for affordable housing.

Sherwood does not want another missed opportunity to be included in the UGB like they had in 2018. Being forced to wait another six years for the opportunity to be included in the Metro UGB would be devastating for this wonderful community.

Thank you for your interest and consideration in this important issue. We are hoping Metro will vote in favor of the Sherwood West expansion request.

Sincerely,

Gwen Werger

Dear COO Madrigal,

First, I want to thank you for convening the year-long Urban Growth Report Stakeholder table. It created an opportunity to better understand the work done by Metro staff preparing the report, while also hearing from partner organizations about concerns and challenges. While I do think it helped build goodwill among regional partners who often feel frustrated by the process, it did also lay bare some of the places where there may be an opportunity for improvements.

Beyond this Growth Management Decision, Westside Economic Alliance looks forward to continued partnership with Metro Council and staff to identify those opportunities for improving the input, process and subsequent outcomes for our region.

POPULATION & HIGH GROWTH PROJECTIONS

Turning to the 2024 Urban Growth Report, it's important that we begin with the population estimates on which so much of this report rests. The early conclusion is that regional growth is slowing because Oregon's birth rates are among the nation's lowest. Given this data point, the report correctly concludes that net in-migration will be the primary driver of regional population growth. The report goes on to state, "Slowing population growth also mean slower job growth."

What the report fails to state clearly is that if net in-migration will be the primary source of regional population growth then our region's, and our state's, housing and economic future will be overly dependent on smart policy decisions that encourage growth.

It is to that end that Westside Economic Alliance highly encourages COO Madrigal, and subsequently the Metro Council, to adopt high growth population forecasts for our region. It is far better to plan for growth and not see it realized than it is to plan for decline and risk the underproduction of housing and jobs, adding pressure that results in another housing crisis or economic stagnation.

Just as we are seeing an out-migration of a certain segment of our population due to their concerns about public policy choices, we could create in-migration through the adoption of a different set of policy choices.

Adopting the high-growth population forecast will give Metro and the local jurisdictions more flexibility to meet our communities' needs and should be viewed as a prudent public policy decision.

EMPLOYMENT LANDS

According to the Urban Growth Report, Metro staff have forecasted a surplus of Industrial land supply with a current capacity of 5,950 acres and a 20-year projection of a surplus of between 450 and 7,450 acres. However, the report also highlights some of the realities on the ground that act as major detractors to the current capacity estimate: in particular slope and lot size.

Slope

Over the course of the Urban Growth Report roundtable, we heard from developers that Oregon Revised Statute applies the definition for "buildable land" for residential construction to commercial and industrial land. As such, we learned that slopes of up to 25% are considered legally "buildable" for the purposes of all employment land, yet commercial and industrial developers say they will not consider land buildable with more than a 7% slope grade. When challenged on this, staff identified 1,300 acres with a slope greater than 7% that were counted within the buildable land inventory. **We recommend COO Madrigal and the Metro Council amend the Employment Land forecast to reflect this reality**.

Lot Size

An additional concern with the gross figure of 6,000 acres of 'surplus' industrial land is lot size. According to the Urban Growth Report the average lot size is 3.8 acres with a median lot size of 1.7 acres.

According to the data of the currently vacant industrial land, here is the breakdown of available vacant lots by acreage:

- 545 lots are less than 1 acre = 148 acres
- 97 lots are 1-1.99 acres = 142 acres
- 72 lots are 2-2.99 acres = 178 acres
- 49 lots are 3 – 3.99 acres = 167 acres

- 27 lots are 4 – 4.99 acres = 127 acres
- 22 lots are 5 – 5.99 acres = 125 acres
- 10 lots are 6 – 6.99 acres = 63.5 acres
- 13 lots are 7 – 7.99 acres = 96 acres
- 11 lots are 8 – 8.99 acres = 101 acres
- 6 lots are 9 – 9.99 acres = 66 acres
- 22 lots are 10 – 14.99 acres = 271 acres
- 12 lots are 15 – 19.99 acres = 219.5 acres
- 4 lots are 20 – 24.99 acres = 164 acres
- 6 lots are 25 – 29.99 = 107 acres
- 12 lots are 30 acres or more = 594 acres

Given the overabundance of small sites and the fact that the current vacancy rate for industrial land is below 5 percent across the region, the reality is that the vast majority of this acreage could not be used to serve the industrial market.

We recommend that COO Madrigal and the Metro Council direct staff to work with industrial developers to identify a minimum lot size that is realistic for effective industrial development. Any lots below that lot size should be removed from the overall land supply calculation.

As mentioned in the draft Urban Growth Report, the data and analysis of industrial land supply is not the only information that the Council may consider when determining whether there is a need to expand the Urban Growth Boundary. They may also consider whether there is a regional need for industrial sites with specific site characteristics such as larger sized sites.

The Oregon Semiconductor Task Force recommended that in order to be competitive over the next 5-10 growth cycle, the state needed to identify the following development ready sites:

- Two (2) sites of 500+ acres for advanced R&D or production fabrication operations
- Four (4) sites of 50-100 acres for device manufacturers or equipment manufacturers
- Eight (8) sites of 15-35 acres for key suppliers to the ecosystem

And while this site list is a statewide recommendation, we know that industries will often create clusters. Indeed, in EcoNW's report (Appendix 9) they note:

> The Metro Region already has a strong cluster for semiconductors in Hillsboro with Intel's Gordon Moore Park at Ronler Acres Research Campus, which creates 1,000 patents a year. This existing strength in semiconductor manufacturing can position the region to capture other semiconductor activities, and semiconductors are half of the state's annual exports. The semiconductor boom in the 1990s was

precipitated by the state having 2000 acres of industrial land, which led to billions of dollars of investment and doubling the industrial employee count.

To prepare for the next influx of semiconductor activity, the region will need to have a supply of industrial land to support business growth and expansion. The Semiconductor Task Force's Industrial Lands Subcommittee found that the key site characteristics that the semiconductor prefers is a location near other semiconductor businesses and labor, parcels of at least 25 acres, and sites that have infrastructure in place to support development that can begin within 6 months to three years. The subcommittee identified a lack of land that met these criteria.

And, as noted on pages 55-56 of the Urban Growth Report:

[T]he Metro Council established the following policy in the Regional Framework Plan:

'1.4.6 Consistent with policies promoting a compact urban form, ensure that the region maintains a sufficient supply of tracts 50 acres and larger to meet demand by traded-sector industries for large sites and protect those sites from conversion to non-industrial uses.'

Since the 2017 update of the Regional Industrial Site Readiness inventory of large industrial sites, 15 large industrial sites have developed. Six of the sites that developed are over 50 acres in size. There are ten remaining sites over 50 acres inside the UGB. Of those, two sites have marine or airport use restrictions, leaving eight sites over 50 buildable acres inside the UGB that are available to the general industrial market.

And so, the Semiconductor Task Force, the EcoNW Report and Metro's own policy recommends additional land of at least 25 acres with a push to identify 'sufficient supply of tracts 50 acres or larger' to meet the industrial needs of the region. And yet the overwhelming majority of vacant industrial land is LESS THAN 25 acres. There is an imbalance in acreage lot size availability and without a recommendation to discount acreage too small for real industrial development, Metro Council could stagnate the region's ability to leverage generational federal and state investment potential.

SUPERSITING AUTHORITY

Per the passage of Senate Bill 4, Oregon's CHIPs Bill, Governor Kotek maintains super-siting authority through the end of 2024. Should the Governor choose to use this authority, we urge Metro Council to see this as an additive, rather than as a replacement for, an Employment Land expansion in the Growth Management Decision.

We urge Metro to consider the generational investments that may be lost should the Governor provide the extraordinary opportunity of a regional supersite for semiconductors but the region is unable to support that work due to a lack of available mid-size lots needed for a healthy cluster.

CITY OF SHERWOOD EXPANSION PROPOSAL

We enthusiastically and without reservation support the City of Sherwood's request for expansion without any conditions. While Metro may want to make recommendations or provide incentives to encourage certain kinds of growth, we trust the rigorous public engagement process that Sherwood has already conducted and trust that they will continue to engage their community to understand how to grow reasonably and responsibly.

Metro staff made clear during our roundtable convening that Metro is not a zoning organization. To that end, we ask Metro to allow the city to work with their residents in the coming years to decide what makes most sense for their community's needs. It is imperative that policymakers recognize that every jurisdiction in our region has their own unique community needs and that heavy handed policy making to try to make suburban areas mimic urban areas is unreasonable.

We encourage Metro to engage in the process, as other regional partners plan to do, to provide input about best practice and guidance for equitable outcomes. But beyond that, **COO Madrigal and the Metro Council should allow local jurisdictions to grow within their own boundaries in a way that best reflects the community they are working with their residents to create**.

To be clear we ask COO Madrigal, and subsequently the Metro Council to:

- Add 340 net acres of residential land to the UGB as proposed in the Sherwood West Concept Plan as proposed.
- Add 130 net acres of flex industrial land to the UGB as proposed in the Sherwood West Concept Plan as proposed.
- Add 135 net acres of commercial and hospitality land to the UGB as proposed in the Sherwood West Concept Plan as proposed.

CLOSING

Westside Economic Alliance wants to again appreciate the work of Metro staff who prepared this cycle's Urban Growth Report. It is a massive undertaking, and this year another layer of public engagement was added via the Urban Growth Roundtable that took a significant amount of staff time.

To close, Westside Economic Alliance on behalf of our members, ask **COO Madrigal and the Metro Council to lean into a Growth Management Decision that is aspirational**. Throughout the region we are hearing alarm bells going off that our growth in the coming

decades will be reliant on in-migration. In-migration can be super charged through smart policy choices. Job growth can be ramped up through smart policy choices. Land readiness can be increased through smart policy choices and investments.

Adopting a high growth population scenario is the first step to unlocking the potential for smart regional policy and investments that will help our region's employers and local jurisdictions realize economic growth and prosperity.

Thank you for your time and commitment to the growth of our region.

Sincerely,

Elizabeth Mazzara Myers, Executive Director

RE: Support from Oregon Business & Industry for Sherwood West Concept Plan as proposed

Dear Metro Council,

I am writing to express Oregon Business & Industry's strong support for the Sherwood West Concept Plan as proposed. The plan would add badly needed land for housing, industrial and commercial use to Sherwood's urban growth boundary.

Oregon Business & Industry (OBI) is a statewide association representing businesses from a wide variety of industries from all of Oregon's 36 counties. In addition to being the statewide chamber of commerce, OBI is the state affiliate for the National Association of Manufacturers (our Manufacturing Council of Oregon) and the National Retail Federation. Our 1,600+ member companies, more than 80% of which are small businesses, employ more than 250,000 Oregonians. OBI's primary mission is to strengthen the business climate in Oregon.

Oregon relies upon its businesses to provide jobs for Oregonians, tax revenue for government services and many of the other benefits required by vibrant and prosperous communities. Employers need the right conditions to generate jobs and prosperity, however. These conditions include available and affordable land for growth and for housing. Denied adequate land for growth, businesses will invest elsewhere, and the jobs, revenue and other benefits they provide will follow. Unable to find housing they can afford, potential employees will do likewise.

I and my colleagues at OBI talk regularly with our members about impediments to growth and success in Oregon. Almost without exception, they cite a lack of available and ready land for expansion as well as the state's exceptionally high housing costs. The high price of housing in Oregon is in large part a function of the limited availability of buildable land.

The shortage of land routinely costs Oregon jobs and revenue. Earlier this month, the U.S. Department of Energy announced that it would lend Lebanon-based Entek $1.2 billion to finance a factory in Indiana that is expected to generate more than 600 jobs when it opens in 2027. Entek President Kim Medford cited the availability of land in Indiana as one reason for the decision to expand outside of Oregon.

The Sherwood West Concept Plan addresses this widespread problem in the local community. It is the product of a thorough, two-year public process and enjoys the support of the community. I urge you to approve the plan as proposed, which calls for the addition of 340 acres of residential land to the UGB as well as 130 acres of flex industrial land and 135 acres of commercial and hospitality land. The Sherwood community has not been consulted about the proposed conditions of approval, and pursuing them could well erode public support.

The Sherwood West Concept Plan as proposed enjoys the support of the community and Sherwood City Council. It would add badly needed industrial and residential land and, by doing so, improve Oregon's competitiveness. I urge you to adopt it as proposed.

Thank you for the opportunity to comment.

Sincerely,

Angela Wilhelms
President and CEO
Oregon Business & Industry

CAUTION: This email originated from an External source. Do not open links or attachments unless you know the content is safe.

Please do not expand the UGB anymore. I'm in Wilsonville watching with disappointment the big single family homes being built in Frog Pond West. These homes are not only unaffordable, they're not the high density we need to stop sprawl and address the climate impacts of our communities.

In Wilsonville, we have an empty large parcel, right downtown, that is ripe for high density redevelopment. Much of the city is low rise strip commercial development. We need to remove barriers and create incentives to foster affordable, high density, vibrant mixed use developments within our cities, not to expand the UGB.

Please hold the line.

Respectfully,

Dave W

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

This household is very much opposed to expanding the Urban Growth Boundary in Sherwood.

According to the Metro's research, there is plenty of industrial land inside the existing UGB for another 20 years. We also have enough vacant land to accommodate new housing and jobs for years if it is planned and developed carefully.

We really enjoy living in Sherwood. It's a beautiful community and would hate to see all the agriculture disappear when it's not necessary.

Please don't expand the UGB.

Thank you.

Kathy Gadinas

August 21, 2024

Lynn Peterson, Chair
Members of the Metro Council
Metro
600 NE Grand Ave.
Portland, OR 97232

Dear Chair Peterson and Members of the Metro Council,

The Sherwood Chamber of Commerce is a vibrant and active organization representing businesses in and around Sherwood with the primary goal of building a strong community. In that light, the Chamber especially appreciates the City of Sherwood's effort to create new business opportunities such as we currently see in the Tonquin Employment Area while also working to expand choices for people to live in Sherwood.

This same foresight is on display with the submittal to Metro of the Sherwood West concept plan, importantly funded in partnership with Metro. The thorough two-year planning process for both the Citizens Advisory Committee (CAC) and the Technical Advisory Committee (TAC) – which Metro representatives where a critical part of - has produced a concept plan that will realize a vision for housing and employment lands embraced by so many during this project.

005166

We commend the work of CAC and TAC for creatively weaving the residential and business needs of current and future Sherwood residents into a unique plan that is created by and for our community. The 200-250 acres of potential employment lands contained in the plan makes a strong statement that the future viability of our community depends on a healthy mix of land uses that will encourage more businesses to locate in our great city while creating desirable communities for people employed by these new businesses to work and live in the city.

The Sherwood Chamber of Commerce supports the City's application and Metro's favorable consideration and adoption of the Sherwood West concept plan, moving forward with an Urban Growth Boundary (UGB) expansion. We appreciate the Metro Council partnering to help make Sherwood the best it can be for many years to come.

Sincerely,

Sherwood Chamber of Commerce

RE: 2024 Urban Growth Report

Dear President Peterson and Councilors:

NAIOP, the Commercial Real Estate Development Association, is one of the leading organizations for developers, investors, owners & operators, brokers, and related professionals in office, industrial and mixed-use real estate throughout the United States, Canada, and Mexico. The Oregon Chapter's members represent a broad and diverse range of companies involved with commercial real estate activities in the Portland metropolitan area, including developers, owners, brokers, and managers, along with other professionals providing legal, finance, title, engineering, architectural, construction, and other services.

Thank you for the opportunity to comment on the draft 2024 Urban Growth Report which is a crucial element in planning for the future of commercial development in the region. Our testimony will focus on two areas:

- Strong support for the boundary expansion proposed by the City of Sherwood which includes our unequivocal endorsement of the findings and conclusions presented by EcoNorthwest in its *Sherwood West UGB Assessment* document found in Appendix 9;
- Concerns with the UGR's estimates of supply and capacity of industrial land

I. Support for Sherwood West UGB Expansion Proposal/Endorsement of EcoNorthwest Findings and Conclusions

NAIOP Oregon member representatives have been involved in Sherwood's planning process for the Sherwood West area for more than two years, and we very much appreciate the extensive time and effort the City has devoted to careful development of a plan that will provide much needed additional land for employment and housing. The Sherwood West Concept Plan includes land for housing, schools and civic facilities, park space, and 265 net acres for employment uses that would support about 4,500 new jobs. We strongly endorse the findings of ECONorthwest that this area has regionally

unique characteristics that would be very attractive to industrial development, including 40-to-50-acre parcels, minimal site aggregation, slopes under 5 percent, and access to Interstate 5.

Our industrial market members have long been well aware of ECONorthwest's finding that, unlike in the office and retail markets, vacancy rates for the industrial sector in the region are below 5%. This is an extremely low number and, with continuing strong demand for this type of space, has spurred a more than 20% increase in industrial rents over the last five years. These two trend lines are even more pronounced within Washington County, where the vacancy rate dipped to 2.5% in 2023 and rents increased 23%.

As ECONorthwest found, "A diverse regional market supply of sites is essential to maintaining an equilibrium in market pricing and to supporting a broad range of industries." Without such a supply, the Portland metropolitan region will be unable to compete with other national markets and will be passed over by employers looking for new locations and expansion opportunities.

The Sherwood West area fulfills this need quite well with its unique set of features as listed above by the ECONorthwest analysis. Also, it should be noted that Sherwood West is within an acknowledged Urban Reserve that was designated 14 years ago after an intensive public process to identify and compare parcels most suitable for UGB expansion and future urbanization. Expansion of the UGB to include Sherwood West is a logical and appropriate next step to ensure that the region is able to satisfy regional industrial land needs for the next twenty years.

II. Concerns with the UGR's estimates of supply and capacity of industrial land

A. Slopes and Parcel Size. According to the UGR, there are currently 5,950 acres of buildable industrial land within the region. This number, however, seriously overstates the realistic development potential for these lands since it includes properties with slopes of up to 25%, which is much steeper than is acceptable for industrial uses (the 25% slope standard is derived from Oregon Administrative Rules specifically pertaining only to residential land). A more accurate approach would be to use the acreage for "unconstrained" parcels shown on Table 5 of Appendix 6 which deducts those areas where 10% or less of the taxlot is up to a 7% slope. This amounts to 2,839 acres, but is also problematic since the average parcel size is 1.05 acres, much smaller than is typically seen for industrial development.

According to data from CoStar, since 2018 there have been 137 industrial buildings constructed within the UGB and Clark County. As shown in the table below, those 137 buildings had 21,834,448 total square-feet of net rentable area, with a total land area of 1,678 acres.

New Industrial Construction 2018-24 Within Portland UGB and Clark County, Washington	
Total Building Net Rentable Area	21,834,448 sq. ft.
Total Land Area	1,678 acres
Average Building Size	159,376 sq. ft.
Median Building Size	105,986 sq. ft.
Average Land Area	12.25 acres
Median Land Area	8.44 acres

As can be seen from these numbers, the average and median land area size of 12.25 and 8.44 acres for industrial developments over the last six years is far larger than the 1.05 acre average lot size seen in Table 5 of Appendix 6 in the UGR. This disparity is further reinforced by data presented in ECONorthwest's Sherwood West UGB Assessment (Appendix 9 of the UGR) regarding the size of industrial buildings constructed. According to the report, "Between 2019 and 2023, 7 million square feet of industrial buildings (sized 100,000 square feet or larger) were developed in the region across 33 buildings. This indicates that 39 percent of the industrial buildings built between 2019 and 2023 equal or are greater to 100,000 square feet, which shows the trend towards new industrial companies needing larger spaces."[1]

We would urge the Council to direct staff to develop recommendations for further reductions in projected industrial land capacity after taking into consideration the steep slopes and the extremely small average taxlot size of the buildable industrial acreage.

B. Projected Infill Industrial Development. A further problem with the 5,950-acre total amount of buildable industrial land is that 3,252 acres (55%) are projected to come from infill development of sites that are already considered developed. Only 2,574 acres (43%) are actual vacant, undeveloped sites. The infill projection is very aggressive for such remnant parcels and begs the question of what the historical rate of industrial infill has been.

We urge the Council to direct staff to produce this information so that it can be compared with projections for the future.

Thank you for the opportunity to comment on the Urban Growth Report and we appreciate the outreach efforts of your staff to brief in responding to our questions. Please let us know if we can provide any additional information.

Sincerely,

Kelly Ross
Public Affairs Consultant

Urban growth management: COO/Staff Recommendations

Council work session
September 12, 2024

Project timeline

	July	August	September	October	November	December
Council	Discussion of draft Urban Growth Report *released July 9*	Public comment survey available until August 22 COO/Staff recommendation released August 26	**Public hearing** on COO/Staff recommendation	Council direction on intended decision	Council first reading; **public hearing**	**Council second reading; final decision**
MPAC			Discuss COO/Staff recommendation; *Recommendation to Council*			
MTAC			Discuss COO/Staff recommendation; *Recommendation to MPAC*			
CORE	Discussion with Sherwood staff		Discuss COO/Staff recommendation; *Recommendation to Council*			

Public comment survey themes

- Optimism about **future growth potential**
- Interest in **more housing and job opportunities** in Sherwood
- Importance of **housing affordability**
- **Housing choices** for seniors, young families and other demographic groups
- Impacts of a potential UGB expansion on **traffic,** due to lack of transit options in Sherwood
- Impacts on **farmland and agricultural activities**
- Impacts on the **environment and climate change**
- Impacts of new development on existing **public infrastructure**
- Use **land within the UGB** before expanding

Housing capacity gap range

- UGB housing capacity deficits: 1,000 – 5,300 homes

Table 4. Sherwood West Housing Estimates

	Density Range (Net)	Total Acres (Net)	% of Residential Acres	Total Housing Units (with % of Middle Housing in Neighborhood areas) 0% MH	10% MH	20% MH	50% MH
Multi-Family	16.8 to 24	33	*10%*	798	798	798	798
Middle Housing	5.5 to 11	16	*5%*	173	173	173	173
Cottage Cluster	12.8 to 16	23	*7%*	362	362	362	362
Med/High Density Nbhd	5.5 to 11	23	*7%*	248	279	311	406
Medium-Density Nbhd	5.6 to 8	102	*30%*	816	990	1,163	1,683
Low-Density Nbhd	3.5 to 5	144	*42%*	720	1,008	1,296	2,160
TOTAL		**340**	***100%***	**3,117**	**3,610**	**4,103**	**5,582**
Total Average Density				*9.2*	*10.6*	*12.1*	*16.4*
Total Average Density with Open Space				*7.8*	*9.0*	*10.3*	*13.9*

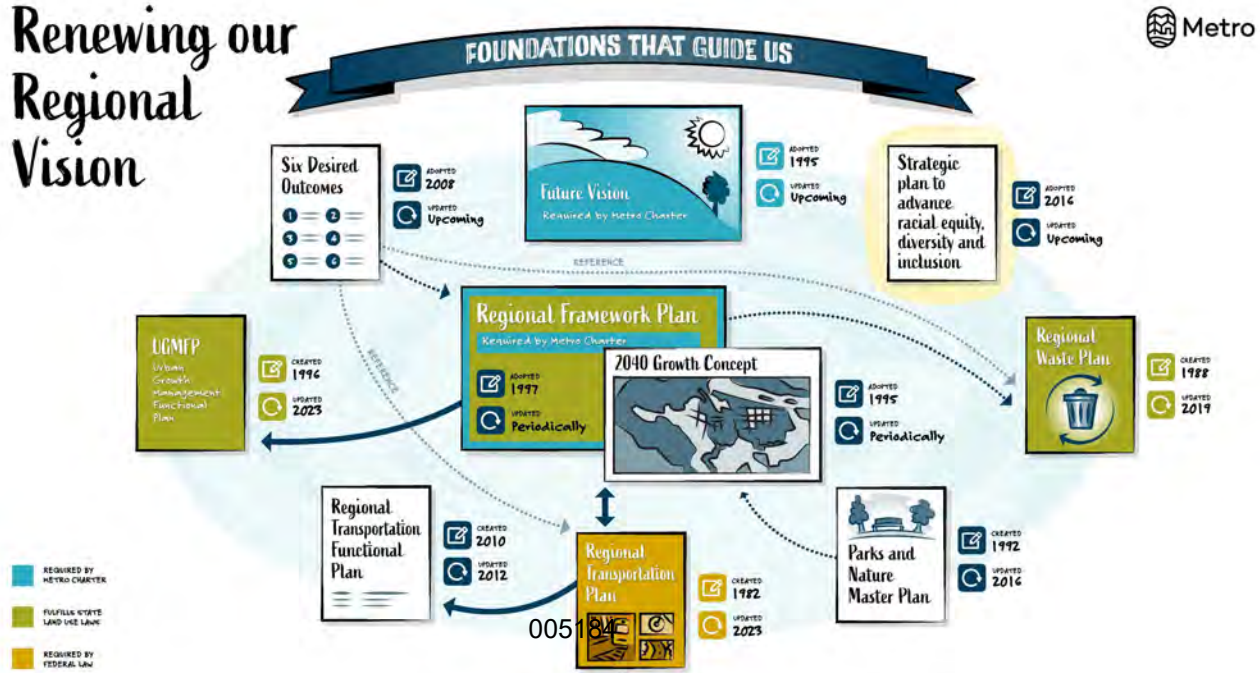
Need for large industrial sites

- Current surplus of industrial land, however, at smaller sizes
  - Average lot size: 3.8 acres; Median lot size: 1.7 acres
- 2022 Oregon Semiconductor Taskforce Report
  - Statewide need for four sites of 50 – 100 acres suitable for high tech manufacturers

Recommendations: Sherwood West

Expand the UGB to include Sherwood West urban reserve

Conditions of approval



- Minimum number of housing units
- Housing affordability
- Protections for large industrial sites to grow the region’s high-tech manufacturing sector
- Broad based community engagement
- Tribal consultation

Additional recommendations

Revise how we accounted for slopes on employment lands

- DLCD advised Metro to use a 10% slope threshold when inventorying buildable employment lands

Update the region's vision for its future

Improve how we assess equity in growth management decisions

- Possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to complete equity assessments when concept planning for new urban areas

Consult with Tribes

- Identify possible requirements for local governments to consult with Tribes when concept planning and comprehensive planning new urban areas
- Identify opportunities to ensure and improve Metro's Urban Growth Report technical analyses are inclusive of relevant tribal priorities, expertise, and data sets

Next steps

- We need your guidance – what are your initial thoughts about these topics for conditions of approval?
- Council public hearing on COO/Staff recommendation: September 26th

OTHERS PRESENT: Stephen Roberts, Kevin Cook, Adam Torres, Medha Pulla, Jessica Pelz, Eric Rutledge, Bruce Coleman, Dan Rutzick, Tom Armstrong, Anna Slatinsky, Jim Duggan, Scott Eisenstein, Marc Farrar, Mary Kyle McCurdy, Beth Cooke, Jeffrey Kleinman, Kelly Ross, Kelly Ritz, Diego Murphy-Mendez, Christina Ghan, Fiona Lyon, Glen Bolen, Hayley Still, Al Jeck

STAFF: Georgia Langer, Sam Hart, Roger Alfred, Catherine Ciarlo, Malu Wilkinson, Ted Reid, Jaye Cromwell, Eyrn Kehe, Ted Reid, Marissa Grass, Kim Ellis, Anneliese Koehler

1. CALL TO ORDER, INTRODUCTIONS, CHAIR COMMUNICATIONS

MPAC Chair Pam Treece called the meeting to order at 5:00 PM.

Metro staff Georgia Langer (she/they) called the role.

2. PUBLIC COMMUNICATION ON AGENDA ITEMS

MPAC Chair Pam Treece read aloud the instructions for providing public testimony.

Kelly Ritz – Testified in favor of the Sherwood UGB expansion, and, as a local homebuilder and developer, she urged Metro not to add too many conditions to the approval process. She noted the housing crisis and the importance of this step to plan ahead.

Seeing no further testimony, Chair Treece moved onto the next agenda item.

3. COUNCIL UPDATES

Councilor Rosenthal gave updates on Metro's housing, parks, and planning efforts. The Council is reviewing recommendations for future housing funding, including permitting reforms and a potential 2025 ballot measure for homeless services and affordable housing. Feedback from county partners and community advocates is being gathered, with possible legislation expected this fall. At Blue Lake Park, summer improvements facilitated water activities, and a public survey on the park's renovation is ongoing. In waste management, Metro staff will present plans for system facilities, policy changes, and budget development at the upcoming MPAC meeting. Additionally, Community Placemaking grants are available for equity-centered, arts-based projects.

With no further discussion, Chair Pam Treece moved to the Council Update.

4. CONSENT AGENDA – NO QUORUM

Chair Treece noted that there was one item on the consent agenda: Metro Technical Advisory Committee (MTAC) Nominations for Member/Alternative Member Positions.

Due to lack of quorum, Chair Pam Treece moved the consent agenda to the next meeting.

5. INFORMATION/ DISCUSSION ITEMS

5.1 2024 UGM Decision: Metro Chief Operating Officer/Staff recommendation and public comment feedback

Chair Treece introduced Eryn Kehe, Urban Policy and Development Manager, Metro, and Ted Reid, Principal Regional Planner, Metro, to present on the topic.

Presentation summary:

Presenters outlined the Urban Growth Boundary (UGB) decision process, focusing on the Chief Operating Officer (COO) and staff recommendations. They introduced the recommendations, discussed the public comment report, and detailed the COO's recommendation to add Sherwood West to the UGB to address housing needs, emphasizing conditions like minimum housing density and large industrial site protections. Presenters also highlighted the importance of community engagement, tribal consultation, and the need to update Metro's long-term regional planning strategies.

The presentation highlighted the complexities of planning housing in Sherwood, especially in light of House Bill 2001, which gives developers flexibility in housing types, complicating precise projections. The city aims to address regional housing needs while preserving its unique character, focusing on expanding middle housing options like duplexes and cottage clusters. Sherwood is also working to provide more affordable housing and reduce long commutes by creating local job opportunities.

MPAC Member Discussion:

Mayor Tim Roesner expressed support for the recommendation and provided additional context on how this process relates to Sherwood's wider goals. He noted that rather than choosing to turn single-family zones into middle-housing zones, they have chosen to expand into new areas that can be denser to increase the housing stock and improve affordability without compromising what they already have. He hoped to ease the fears of tension between Metro and Sherwood.

Chair Treece asked the group if they agreed with the recommendation to add Sherwood West to the UGB.

Vice Chair Brett Sherman expressed tentative for the sake of expanding both industrial areas and housing stock in a region needing more housing.

Mayor Joe Buck noted community opposition to expansion and denser housing, and commended staff members for getting the community on board with this project through successful engagement efforts. He also asked if the Sherwood concept plan met Metro's conditions for approval. Eryn Kehe responded that Metro works with their partners to ensure that their approval conditions are in line with the project's goals as well as the region's goals. Mayor Buck noted the balance between Metro's control and overburdening municipalities with requirements.

Eric Engstrom, standing in for Commissioner Rubio, expressed appreciation for the discussion and noted that the City of Portland would prefer a higher density requirement, but that he understands the obstacles to that.

Alison Tivnon expressed support for Sherwood's plan, applauding their intentional approach and community outreach efforts, and emphasized the importance of letting the local jurisdictions take the lead on these types of projects.

Chair Treece asked the group if they agree with the categories identified in the recommendation.

Vice Chair Sherman asked for clarification on the slope threshold numbers, and presenters gave more detail. He expressed support for all the categories.

Mayor Rosener also expressed support for the categories, appreciated staff for getting the slope threshold number down, and noted industrial land vacancies. He also suggested a 'truth on the ground' database as a regional resource for land use decisions.

Councilor Gerritt Rosenthal inquired about Sherwood's broadband fiber program and their ability to meet water/sewer needs of new developments. Mayor Rosener noted Sherwood's access to plenty of clean water, as well as a solid plan for sewer needs.

Mayor Steve Callaway inquired about the details for assessing equity in their requirements. Kehe noted that any major changes would come back to MPAC for discussion, and also explained the opportunity Metro has to ensure that an equity lens is used in access to new developments.

Councilor Mary Nolan brought up affordability, emphasizing that housing development alone will not solve the region's housing crisis if it is not affordable. Chair Treece clarified that Sherwood intended to work with other funding sources to establish the ability to create affordable units in their plan. Vice Chair Sherman agreed with Councilor Nolan, and explained how external funding sources are the only way to ensure new units can be affordable, because the market is not providing it on its own. Mayor Rosener reiterated Sherman's points and the intention Sherwood must find external funding sources to make affordable expansion possible.

Commissioner Sharon Meieran asked how the community will continue to be engaged in this conversation, specifically those who have not historically been engaged.

Vice Chair Sherman gave some examples of situations where adjustments would need to be made with developers, and asked if this plan would allow for that kind of flexibility. Mayor Roesner reassured the committee that there has already been interest in industrial development of the land in discussion.

Mayor Buck appreciated the way this process has been handled, but also noted that this process has been the same for this region for a long time and there is still an extreme housing shortage, and asked if they are doing it differently this time. Presenters agreed that is something they should continue to think about.

Kirstin Greene expressed support for the tribal consultation condition, and gave some additional context.

Commissioner Mark Shull recommended an analysis of already available land for site readiness, and presenters clarified that they agree but they are also concerned with a 20-year land supply.

Seeing no further discussion, MPAC Chair Treece moved onto the next agenda item

6. ADJOURN

Chair Pam Treece adjourned the meeting at 7:00 pm.

Respectfully Submitted,

Sam Hart

Metro Policy Advisory Committee (MPAC) agenda

Wednesday, September 11, 2024 **5:00 PM** **https://zoom.us/j/95889916633 (Webinar ID: 958 8991 6633)**

1. Call To Order, Declaration of a Quorum & Introductions (5:00PM)

Please note: This meeting will be held online. You can join the meeting on your computer or other device by using this link: https://zoom.us/j/95889916633 or by calling +1 669 900 6128 or +1 877 853 5257 (Toll Free).

If you wish to attend the meeting, but do not have the ability to attend by phone or computer, please contact the Legislative Coordinator at least 24 hours before the noticed meeting time by phone at 503-813-7591 or email at legislativecoordinator@oregonmetro.gov.

2. Public Communication on Agenda Items (5:05PM)

Public comment may be submitted in writing and will also be heard by electronic communication (video conference or telephone). Written comments should be submitted electronically by mailing legislativecoordinator@oregonmetro.gov. Written comments received by 4:00 pm on the Wednesday before the meeting will be provided to the committee prior to the meeting.

Those wishing to testify orally are encouraged to sign up in advance by either: (a) contacting the legislative coordinator by phone at 503-813-7591 and providing your name and the item on which you wish to testify; or (b) registering by email by sending your name and the item on which you wish to testify to legislativecoordinator@oregonmetro.gov.

Those requesting to comment during the meeting can do so by using the “Raise Hand” feature in Zoom or emailing the legislative coordinator at legislativecoordinator@oregonmetro.gov. Individuals will have three minutes to testify unless otherwise stated at the meeting.

3. Council Update (5:10PM)

January 2021

5.1 2024 UGM Decision: Metro Chief Operating Officer/

Staff recommendation and public comment feedback

Consent Agenda

Metro Policy Advisory Committee
Wednesday, September 11th, 2024

MPAC Worksheet

Agenda Item Title: 2024 UGM Decision: Metro Chief Operating Officer/Staff recommendation and public comment feedback

Presenters: Eryn Kehe, she/her; Ted Reid, he/him; Laura Combs, she/her

Contact for this worksheet/presentation: Laura Combs, she/her

Purpose/Objective
The purpose of this item is to continue MPAC's engagement in growth management topics so that it is prepared to advise the Metro Council on its regional growth management decision in late 2024.

Under state law, Metro must assess – at least every six years – whether there is a regional need to expand the urban growth boundary (UGB) to ensure adequate room for 20 years of expected housing and job growth. UGB expansions are only allowed if there is a demonstrated regional need for more land.

To assess the growth capacity of the existing UGB, Metro worked with cities and counties to inventory buildable land and used a financial feasibility model to estimate how much housing or job development may occur on already developed lands over the next two decades. To assess future demand, Metro staff prepared the regional population, household, and employment forecast and discussed how those forecasts are used for a regional housing needs analysis and the employment land demand analysis. Additionally, Metro staff completed a supplemental employment analysis specific to the Sherwood West expansion proposal to understand if the proposed expansion area offers specific site characteristics to meet regional needs for large, flat industrial sites that cannot reasonably be met with other lands inside the UGB.

This collection of technical analyses presented to MPAC throughout the year formed the draft 2024 Urban Growth Report (UGR), which was released to the public on July 9, 2024. Additionally, a public comment survey was available from July 9 – August 22 to gather feedback about the draft UGR and the Sherwood West expansion proposal. A public comment summary report will be available for MPAC's review and consideration as a part of this meeting.

Part of MPAC's decision-making process is consideration and discussion of the Metro Chief Operating Officer/Staff recommendations. These recommendations include a point of view about where to fall in the housing and employment capacity gap ranges provided within the draft Urban Growth Report and a recommendation about the proposed Sherwood West expansion area. At the September 11 meeting, staff will review the key elements of the recommendations and answer questions about the next steps for MPAC's growth management decision.

Outcome
MPAC members ask questions regarding the Metro COO/Staff Recommendations and potential topics for conditions of approval and their role in the next steps of the decision-making process.

MPAC may begin discussions about their thoughts on potential conditions of approval and the choice around the proposed expansion area. At an additional meeting on September 25, MPAC will hear recommendations from MTAC regarding the expansion and potential conditions of approval. By the end of that meeting, MPAC will finalize their own recommendations to Metro Council ahead of the public hearing on the COO/Staff Recommendation at the end of September.

What has changed since MPAC last considered this issue/item?

At the July 24, 2024 meeting, MPAC discussed the draft UGR. Since this meeting, Metro staff held a public comment period on the draft UGR and compiled the Metro COO/Staff Recommendations on the Sherwood West expansion proposal and the potential topic areas for conditions of approval.

What packet material do you plan to include?

- 2024 Urban Growth Management Decision: Metro COO/Staff Recommendation
- Public comment summary report will be made available by September 5

2024 Urban Growth Management Decision: Metro Chief Operating Officer/Staff Recommendations

August 26, 2024

Metro respects civil rights

Metro fully complies with Title VI of the Civil Rights Act of 1964 that requires that no person be excluded from the participation in, be denied the benefits of, or be otherwise subjected to discrimination on the basis of race, color or national origin under any program or activity for which Metro receives federal financial assistance.

Metro fully complies with Title II of the Americans with Disabilities Act and Section 504 of the Rehabilitation Act that requires that no otherwise qualified individual with a disability be excluded from the participation in, be denied the benefits of, or be subjected to discrimination solely by reason of their disability under any program or activity for which Metro receives federal financial assistance. If any person believes they have been discriminated against regarding the receipt of benefits or services because of race, color, national origin, sex, age or disability, they have the right to file a complaint with Metro. For information on Metro's civil rights program, or to obtain a discrimination complaint form, visit oregonmetro.gov/civilrights or call 503-797-1890.

Metro provides services or accommodations upon request to persons with disabilities and people who need an interpreter at public meetings. If you need a sign language interpreter, communication aid or language assistance, call 503-797-1700 or TDD/TTY 503-797-1804 (8 a.m. to 5 p.m. weekdays) 5 business days before the meeting. All Metro meetings are wheelchair accessible. For up-to-date public transportation information, visit TriMet's website at trimet.org.

MPAC: Metro Policy Advisory Committee
MTAC: Metro Technical Advisory Committee
UGB: urban growth boundary
UGR: Urban Growth Report

A DELIBERATE APPROACH TO GROWTH

Under Oregon state land use law, the Metro Regional Government ("Metro") is charged with making decisions about whether to expand the urban growth boundary (UGB) in the greater Portland region. This communication from Metro's Chief Operating Officer contains the staff recommendation to the Metro Council regarding the need for a UGB expansion and the City of Sherwood's 2024 proposal to address that need.

The urban growth boundary has long been one of Metro's most important tools for focusing the development of new homes and businesses in existing downtowns, main streets, and employment areas. Residents of the region have told us time and again to hold this priority: make the most of the land inside the boundary so that outward growth on the urban edge only happens when it is necessary and provides benefit for the entire region. This deliberate approach is crucial for strengthening existing communities, protecting farms and forests, and reducing greenhouse gas emissions.

According to state law, Metro is required to make a decision about whether to expand the UGB at least every six years. In making these decisions, Metro must provide up-to-date information about demographics, population and employment growth, development trends, and estimates of buildable land inside the UGB. This thorough assessment of whether there is a regional need for expanding the UGB is not only required by law – it is central to the greater Portland region's identity. When new growth occurs at the edges of the urban growth boundary, it should be necessary, planned, and deliberate.

Today, the greater Portland region is facing a housing shortage crisis. In addition, there is agreement across the region that attracting more family-wage industrial jobs will help our communities thrive. However, it is also clear that simply providing more land won't necessarily result in jobs and housing. Experience has shown that certain conditions must be in place to ensure that UGB expansion areas produce housing and jobs in a near term time frame. Time and time again we have seen that development occurs successfully where there is a commitment from city leaders and community members, where there is a plan for paying for needed infrastructure, and where there is market demand. If these ingredients aren't present, new urban growth is extremely slow if it happens at all.

For those reasons, in 2010 the Metro Council adopted a policy to only expand the UGB into urban reserve areas that have been concept planned by a local government and that demonstrate readiness to be developed. In the current 2024 UGB cycle, the City of Sherwood is the only city that has prepared a concept plan and proposed a UGB expansion, and they have shown that these elements are in place. Sherwood's readiness for new urban growth provides an opportunity to address the regional land needs identified in the draft 2024 Urban Growth Report (UGR).

Consequently, Metro staff recommend that the Metro Council consider expanding the UGB to include the Sherwood West urban reserve. Staff further recommend that the Council consider placing conditions on this expansion to ensure that the land is used efficiently and will support regionally identified needs. These conditions could reinforce the City of Sherwood's concept plan for the expansion area by improving housing affordability and protecting industrial lands so that they produce well-paying jobs in the manufacturing sector.

The information that follows sets out the reasoning behind this recommendation and lays the groundwork for the Metro Council to consider potential conditions of approval.

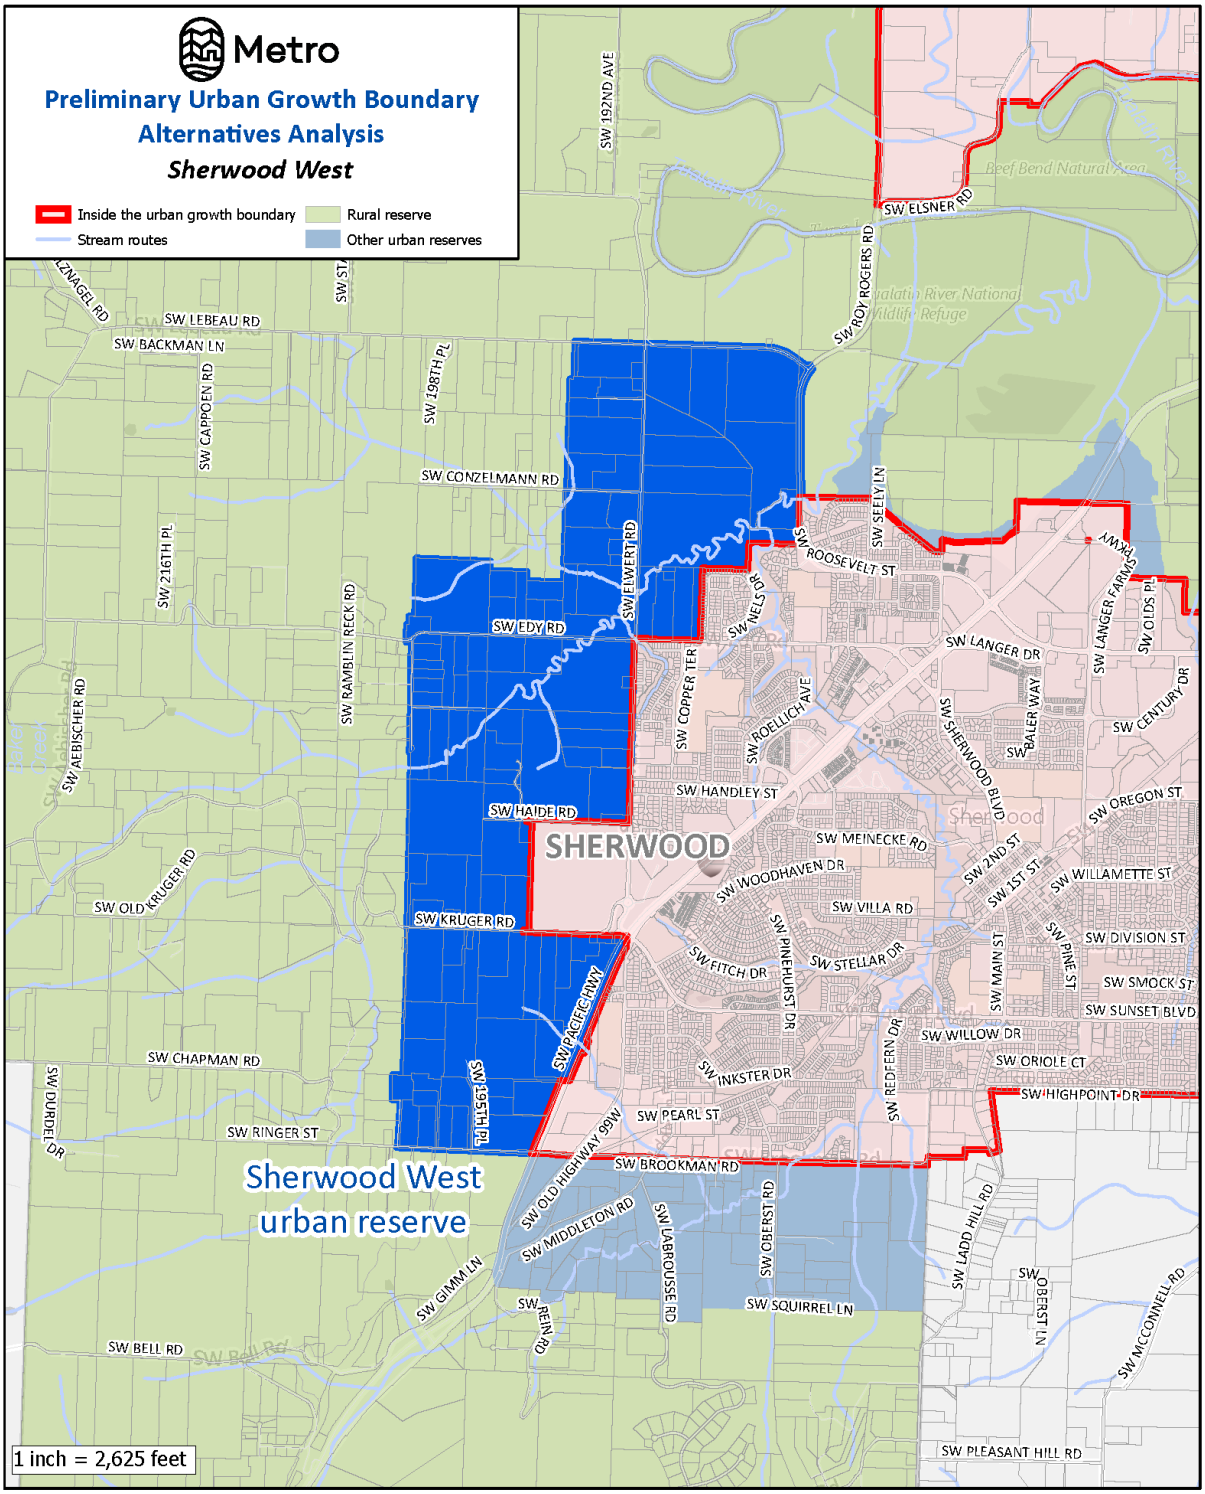
ADAPTING AND IMPROVING OUR GROWTH MANAGEMENT PROCESS

Our region's deliberate approach to growth has paid dividends for people who call this region home by helping to maintain a unique connection to nature and a high quality of life. However, as the world changes, our approach to managing growth must change too. In response to evolving needs and conditions over the years, Metro and its partners have collaborated to make improvements to the urban growth management process such as:

- Working with our regional partners to identify designated urban reserves and rural reserves that provide certainty about where the UGB may or may not be expanded over the coming decades.
- Using a 'range' forecast to acknowledge that there is inherent uncertainty in estimating future growth over the next 20 years.
- Encouraging more timely housing and business development in UGB expansion areas by requiring that a local jurisdiction complete a concept plan for an urban reserve before the area is brought into the boundary.
- Providing grant funding to cities to support local concept planning and comprehensive planning efforts.
- Adopting a fast-track expansion process for adding large industrial sites to the UGB to respond to near term opportunities.
- Providing an off-cycle UGB amendment process to address unanticipated non-residential land needs such as those identified by school districts.
- Creating a mid-cycle UGB process to be responsive to city proposals for addressing unanticipated residential land needs between the designated 6-year scheduled approval process.
- Clearly specifying in Metro's Code the factors that cities must address in UGB expansion proposals.
- Completing a land exchange in 2023 that brought concept planned land within an urban reserve inside the UGB and removed unplanned land to ensure more of the land inside the UGB will produce housing.

- Continually improving technical analyses to reflect new practices, including how to forecast redevelopment potential and estimate current and future housing needs.
- Examining regional needs for industrial lands with specific site characteristics and applying that information to evaluate expansion proposals.
- As with the forecast, using a range of estimates to acknowledge the inherent uncertainty in predicting growth capacity within the UGB.
- Increasing transparency by convening the 2024 Urban Growth Report Roundtable, comprised of diverse expertise and interests.
- Elevating youth perspectives and building future leaders by convening a UGB Youth Cohort in 2024.

One of the characteristics that makes our region unique is our ability to collaborate and work together to adapt and modernize our systems to respond to changing conditions.



CITY OF SHERWOOD READINESS

Based on the draft 2024 Urban Growth Report (UGR) in addition to discussions at the Metro Council, MPAC, MTAC and the Urban Growth Report Roundtable as well as comments received during the public comment period, Metro staff believe there is a regional need to expand the UGB to provide more land for housing and job growth. Staff also encourage the Metro Council to set clear expectations for areas added to the boundary, so the expansion addresses not just local interests, but regional needs.

The City of Sherwood has completed extensive work to propose a UGB expansion for the Metro Council's consideration. The expansion proposal indicates that Sherwood is ready to take meaningful steps toward getting homes and businesses built in the proposed UGB expansion area. The Sherwood West Concept Plan includes proposed land uses to support up to approximately 5,500 housing units and 4,500 jobs. For those reasons, staff recommend that the Metro Council consider expanding the region's UGB to include the Sherwood West urban reserve.

Considerable work remains if the Metro Council chooses to add this area to the UGB. As part of this recommendation, staff encourage the Council to identify conditions ensuring that land added to the UGB will address a range of housing needs and provide industrial sites likely to attract family wage manufacturing jobs.

Figure 1: Recommended UGB expansion in the Sherwood West urban reserve

The information on this map was derived from digital databases on Metro's GIS. Care was taken in the creation of this map. Metro cannot accept any responsibility for errors, omissions, or positional accuracy. There are no warranties, expressed or implied, including the warranty of merchantability or fitness for a particular purpose, accompanying this product.

The following pages of this report describe additional considerations that inform this staff recommendation.

THE REGION NEEDS MORE HOUSING OF ALL TYPES

It is well known that there is a national housing shortage, as well as housing shortages in Oregon and in the greater Portland region. This is reflected in housing prices and rents that remain high and in the growing number of people experiencing housing instability or houselessness. With the expectation that population growth will continue in our region – irrespective of the rate of that growth – we need more housing to be built.

The vitality of every community depends on having a diverse range of people from all backgrounds doing a broad range of work: teachers, contractors, daycare providers, nurses, and grocery store workers to name a few. As home prices rise and demand outstrips supply, we need to do more to provide housing opportunities for these essential workers in every community. Likewise, we need to provide housing options that suit people from all life stages: students seeking rental housing, growing families that need an additional bedroom, retirees seeking to downsize but remain in their community.

The primary question addressed by the Urban Growth Report is not just whether more housing is needed but whether there is enough space inside the existing UGB to meet that need. Land already available within the UGB provides opportunities for a diverse range of housing. The region's track record, as documented in the 2024 UGR, shows that there is considerable market demand for urban housing close to transit, services, and amenities. Recent statewide allowances for 'middle housing' such as townhouses and duplexes are producing results, and we expect that more of these housing options will be provided in the future.

The draft UGR also indicates that, depending on our assumptions about the future, there is potentially a need for additional land to meet the region's need for additional housing. As we consider bringing new areas into the UGB, we must make sure those areas will address the needs of a wide variety of households.

REGIONAL NEED FOR UGB EXPANSIONS FOR HOUSING

Under state law, the UGB can only be expanded when there is a demonstrated regional need for additional capacity to accommodate the next 20 years of forecasted growth. The analysis in the draft 2024 UGR's range of growth estimates shows that the Metro Council has the latitude to determine that a need for more land exists.

Housing capacity

The draft 2024 UGR describes a range of possible housing growth capacity currently available within the urban growth boundary. The specific amount of housing capacity available within that range depends on expected market conditions and development responses. Consistent with the recommendation to plan for the baseline forecast described in the following

paragraph, staff recommend capacity assumptions that fall within the middle of the ranges established in the draft 2024 UGR.

For the 2024 growth management decision, staff recommend that the Metro Council base their decision on a finding that there is capacity inside the UGB for 175,500 additional homes. Details about that assumed growth capacity can be found in Attachment 1 to this recommendation and in the draft 2024 UGR.

Household forecast and capture rate

As a basis for this growth management decision, staff recommend that the Metro Council plan for the baseline forecast for the seven-county Metropolitan Statistical Area (MSA) for the 2024 to 2044 period. The baseline forecast describes the most likely amount of growth for the region. This means planning for approximately 315,000 more people and 203,500 more households in the MSA.

The UGB "capture rate" is used to describe the share of seven-county household growth that is expected to occur in the Metro UGB. For discussion purposes, the draft 2024 UGR scenarios assumed a 70 percent UGB capture rate. Staff have heard partner opinions and share optimism that the region will regain its reputation as an attractive place to live and work. Staff therefore recommend that the Metro Council consider planning to accommodate slightly more than 70 percent of the MSA's household growth in the Metro UGB.

Notwithstanding recent declines after the pandemic-induced recession, this would represent a continuation of the historic upward trend in Metro's UGB capture rate for household growth. Adding the Sherwood West urban reserve to the UGB can provide a means of achieving this slightly higher capture rate by attracting household growth that may otherwise occur outside of the Metro UGB.

Staff recommend that the Council plan for 176,500 to 180,800 additional homes in the Metro UGB to meet current and future housing needs. Additional details about how those numbers are derived can be found in Attachment 1 and in the draft 2024 UGR.

Housing capacity deficits

Comparing UGB housing growth capacity (175,500 homes) and housing needs (176,500 to 180,800 additional homes) indicates a potential deficit of capacity for 1,000 to 5,300 homes. Additional details about those deficits can be found in Attachment 1.

Depending on the mix of housing it includes, the Sherwood West urban reserve could meet the range of identified regional housing capacity deficits. The adopted Sherwood West Concept Plan describes a range of 3,117 (9.2 dwelling units/acre) to 5,582 (16.4 dwelling units/acre) homes.

PLANNING FOR JOB GROWTH

Future job growth requires more workers to fill those jobs. This means that our job growth forecast should be generally consistent with our expectations for population growth. Consequently, as with population and household growth, staff recommend planning for the baseline employment forecast, which estimates the most likely growth scenario.

Today, there are approximately 1,261,200 jobs[1] in the seven-county MSA. Staff recommend planning for an increase of approximately 110,000 jobs, for a total of 1,371,400 jobs in the MSA by the year 2044.

Based on long-term trends, staff recommend planning for 75% of the new MSA-level jobs in the Metro UGB.[2] Today, there are approximately 996,600 jobs in the Metro UGB. By 2044, an additional 82,500 new jobs are anticipated, for a total of 1,079,000 jobs within the Metro UGB.

NEED FOR LARGE INDUSTRIAL SITES TO ACCOMMODATE HIGH-TECH MANUFACTURING GROWTH

Using the baseline employment forecast, the draft 2024 UGR identifies a surplus of 4,550 acres of industrial land in the region. However, as also explained in the draft UGR, most of the region's industrial land supply consists of smaller parcels with an average lot size of 3.8 acres and a median lot size of 1.7 acres. Although these smaller industrial spaces are in demand, they cannot serve the needs of the entire industrial market. The draft UGR describes a shortage of larger industrial sites for the expansion of existing businesses and recruitment of companies from outside the region; in particular, there is a lack of unconstrained parcels with relatively flat slopes and proximity to transportation facilities that could be aggregated into larger 50+ acre industrial sites.

The 2022 Oregon Semiconductor Taskforce Report identified a statewide need for four sites of 50 to 100 acres suitable for high tech manufacturers. As described in the draft UGR, the greater Portland region is the heart of the state's high-tech economy; however, the current regional inventory does not include enough industrial sites with characteristics that are suitable for addressing this need.

High tech manufacturing has become a major focus of incentive programs from the federal government designed to increase domestic production of critical technologies. Our region has significant competitive advantages in designing and manufacturing technologies to help adapt to and mitigate climate change and improve global connectivity. Staff analysis indicates that our region lacks enough available and unconstrained sites of sufficient size, slope, and proximity to

[1] These figures are for non-farm jobs because the task of growth management decisions is to estimate land need for urban uses.

[2] The draft 2024 UGR employment land demand analysis incorporates different UGB capture rates for different sectors. 75% is the historic UGB capture rate for the 1979-2022 period across all non-farm sectors.

existing transportation facilities and high-tech manufacturing clusters to allow for growth of these critical industries over the next 20 years. A lack of available sites would be a limiting factor in our region's ability to take advantage of historic incentives to support economic development.

Under Statewide Planning Goal 14, Metro is authorized to expand the UGB onto land that is suitable to meet a particular identified need based on specific site characteristics. Staff recommend that, based on the necessary site characteristics described above, the Metro Council address a need for two 50+ acre sites by expanding the UGB to include the mixed employment area in the north end of the Sherwood West concept plan. Staff further recommend that the Metro Council consider conditions of approval to protect these important large sites to help ensure that they will address the identified need.

ADDITIONAL LANDS TO SUPPORT COMMERCIAL JOB GROWTH

The draft 2024 UGR identified a baseline deficit of 320 buildable acres to support expected commercial job growth. Sherwood has included at least 135 acres for commercial employment in its concept plan. Staff recommend that the Metro Council address the commercial land need described in the UGR by expanding the UGB to include the Sherwood West urban reserve. The remaining deficit beyond that addressed by a potential expansion is within the margin of error for a long-range land need analysis. To the extent that there may be additional demand for commercial land, staff expect that demand would be addressed through additional redevelopment.

POTENTIAL UGB CONDITIONS OF APPROVAL

With the goal of expanding housing choices and reducing housing costs, protecting industrial sites, and continuously improving engagement for planning efforts, staff recommend that the Council consider conditions on the proposed UGB expansion. The bullets below provide suggestions for several topics that could be addressed by conditions of approval. Generally, these recommended conditions reinforce the work that the City of Sherwood has done in its Sherwood West Concept Plan. For example:

- In order to achieve a mix of housing types, the Metro Council could establish an expectation for a minimum number of homes. This could fall within the range proposed by the City of Sherwood's adopted Sherwood West Concept Plan (base density of 9.2 units per acre to a maximum density of 16.4 units per acre). The difference between these reflects the actualization of "missing middle" housing allowed by HB 2001 (2019). The city of Sherwood would determine housing mix details in their comprehensive planning process.
- The greater Portland region is in an affordable housing crisis. We need more housing options for people who make less than the region's median income (currently $116,900 for a family of four). Sherwood elected officials and staff have expressed an interest in

creating opportunities to live and work in their community. That will require us to work together to ensure housing affordability and not just leave it up to the market. The Metro Council could set out conditions to guide this work.

- Staff's recommendation to create and protect large industrial sites is intended to achieve widely shared goals to grow our region's high-tech manufacturing sectors. The Metro Council could consider specific goals or restrictions to make sure this happens.
- Creating inclusive communities means bringing a variety of perspectives into the planning process. Staff recommend a broad-based approach to community engagement that goes beyond collecting input from those who currently live near the expansion or those who have typically engaged in city planning – and include community members and Community Based Organizations representing historically marginalized groups. Staff also recommend inviting interested Tribes to engage in the city's planning processes.

ADDITIONAL RECOMMENDATIONS

Improve how we assess equity in growth management decisions

For many years, Metro has had the goal of addressing racial equity in its work, including urban growth management decisions. We've tried several approaches including:

- Using the Regional Equity Atlas to provide decision makers with contextual information.
- Requiring cities proposing expansions to describe how they are working to advance racial equity.
- When we've expanded the UGB, requiring and supporting cities in conducting broad-based community engagement for their comprehensive planning.
- Assessing equity outcomes in past UGB expansion areas.

In keeping with our tradition of always seeking to learn and do better, staff recommend that Metro Council direct staff to work with its advisory committees to identify possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to complete equity assessments when concept planning for new urban areas.

Consult with Tribes

Tribes are independent sovereigns with inherent powers of self-government and relationships with the U.S. government that derive from treaties, federal law and executive orders. These Federal-Tribal relations are political and do not derive from race or ethnicity. Treaties are listed among the elements that make up "the supreme law of the land" under Article VI of the U.S. Constitution.

The lands now known as the greater Portland metropolitan area are part of the aboriginal homelands, traditional use areas and trade networks of numerous Tribes. For millennia, Indian people resided throughout the Willamette Valley and along the Willamette and Columbia Rivers

and their tributaries in traditional villages, permanent communities and seasonal encampments. The relationship of Tribes, their lands and interests extend from time immemorial to the present day and beyond. Each Tribe's interests are distinct. These interests may overlap and intersect with the urban growth boundary in various ways.

Metro and other local governments need to do a better job of consulting with Tribes on growth management and land use issues that have the potential to impact tribal interests and priorities such as treaty rights, the protection of sensitive cultural resources, or enhancing the welfare of tribal members residing in urban areas off reservation. For that reason, staff recommend that Metro Council direct staff to work with interested Tribes, Metro's Tribal Affairs program and its advisory committees to identify possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to consult with Tribes when concept planning and comprehensive planning new urban areas. Staff also recommend that Metro identify opportunities to ensure and improve Metro's Urban Growth Report technical analyses are inclusive of relevant tribal priorities, expertise, and data sets.

Revise how we accounted for slopes on employment lands

Recent discussions at the UGR Roundtable and the Metro Policy Advisory Committee (MPAC) have raised questions about the assumptions staff make when inventorying buildable employment lands. We have heard questions about our assumed thresholds for steep slopes and whether some of those lands are viable for development.

Based on their professional expertise and review of other jurisdiction's work, Oregon Department of Land Conservation and Development staff have recently advised Metro to use a 10% slope threshold when inventorying buildable employment lands. Staff will revise the UGR analysis of employment land capacity to follow that advice. That revised analysis will be included in the final UGR presented for Metro Council adoption later this year.

Using this more conservative slope threshold does not change the analysis in the draft 2024 UGR that the baseline forecast indicates there is enough industrially-zoned land inside the UGB to match generally expected job growth, at least before assessing a more specific need for additional land with particular site characteristics. Most importantly, it doesn't change the fact that we collectively need to focus on the investments and actions necessary to make sure more of these employment lands are shovel-ready to capitalize on economic development opportunities. That includes necessary regional discussions about site aggregation, brownfield remediation, infrastructure financing, zoning changes, incentive programs and more.

Update the region's vision for its future

Our region had the foresight 30 years ago to adopt the region's Future Vision and 2040 Growth Concept. These long-range plans helped guide how greater Portland has responded to population growth in a way that reflects shared community values. The Growth Concept has

served us well and has positioned us to address the challenges of climate change and racial equity, but we know there's more work to be done to prepare for these and other future issues.

A lot has changed since the region adopted the Future Vision and the 2040 Growth Concept. Staff will bring a work program to Metro Council to renew the Future Vision and 2040 Growth Concept in Fall 2024. This work will help address many, though not all, topics and potential actions that came up while developing this urban growth management recommendation.

This work program should include an assessment of how these existing plans have performed for the region's residents: what has worked well or turned out as envisioned, and where there is still work to do or turned out differently from the vision. While we believe the fundamentals of the Vision and Growth Concept are still relevant, it is essential to demonstrate this through study.

Planning for 25 and 50 years in the future also requires understanding where today's trends may potentially take the region. The work program should include investigation of how climate change, demographics, technology, and other topics will change in the coming decades and how visioning can prepare the region to adapt to these shifts.

The updates of these long-range plans must also capture topic areas not currently addressed in the 1995 versions of these documents that are of greater importance and interest today. These include, but are not limited to: racial equity, climate resilience and adaptation, arts and culture, anti-displacement strategies, and Tribal relations. Updates must also address how Metro's purview has changed since 1995 to encompass major roles in the region's housing and parks and natural areas.

PUBLIC COMMENTS

Metro held a public comment period from the release of the draft UGR on July 9 through August 22. 349 survey responses were received during this period. We heard a variety of viewpoints about the draft Urban Growth report and the City of Sherwood's expansion proposal. Themes from comments about the expansion proposal include:

- Optimism about future growth potential, including the potential for a resurgence of high-tech manufacturing
- Interest in more housing and job opportunities in Sherwood, including housing choices for seniors, young families and other demographic groups
- Concern about the impacts of a potential UGB expansion on traffic, with the lack of transit options available in Sherwood
- Concern about impacts on farmland and agricultural activities
- Importance of housing affordability
- Concern about impacts on the environment and climate change
- Concern about impacts of new development on existing public infrastructure leading to tax increases for current residents
- Concern about potential impacts on schools

- Recommendation to use land within the UGB before expanding

We also received input about the methodology of the draft UGR. Themes include: suggestions for different approaches to the buildable land inventory, population projections, and density estimates.

These comments highlight the variety of issues that need to be balanced by the UGR. While this staff recommendation does not address every technical topic raised, it acknowledges that the UGR is a point-in-time document that seeks to balance interests and provide a reasonable range of estimates for the Metro Council to determine whether to expand the UGB and accept the City of Sherwood's proposal.

TIMELINE (SUBJECT TO CHANGE)

August 26, 2024:	Release COO recommendation
August 28, 2024:	MTAC discussion of COO recommendation and public comment themes
September 5, 2024:	Council work session on COO recommendations and public comment themes; (*full public comment summary provided at Council meeting*)
September 11, 2024:	MPAC discussion of COO recommendation and recommendations to Council; request any final MTAC advice
September 18, 2024:	MTAC advice to MPAC, if requested

ATTACHMENT 1: HOUSING CAPACITY, NEED, AND DEFICIT ASSUMPTION DETAILS

The tables below include specific numbers, but long-term estimates cannot be expressed this precisely. For that reason, the final totals are rounded to the nearest hundred.

Table 1: Recommended housing capacity assumptions (Metro UGB, 2024-2044)

	UGB Capacity Assumptions (number of homes)			
	single-detached	middle housing	multifamily	Total
Vacant land (larger mix of single-unit detached)	34,944	13,228	42,970	91,142
Redevelopment (Baseline)	12,292	11,727	24,382	48,400
Concept plan areas and planned development on vacant land	9,096	6,662	4,138	19,896
Other planned redevelopment	135	172	9,830	10,137
Office-to-residential conversion (baseline)	-	-	1,000	1,000
ADUs and middle housing conversion/infill (low)	-	4,955	-	4,955
Total UGB capacity (rounded)	**56,500**	**36,700**	**82,300**	**175,500**
Capacity housing mix	32%	21%	47%	100%

Table 2: Recommended Metro region current and future housing need assumptions (2024-2044)

7-county MSA baseline household growth (2024-2044)	203,530
Future household growth in Metro UGB (70% to 72% Metro UGB capture)	142,500 to 146,500
Add 5% vacancy rate (to convert future households to homes)	7,100 to 7,400
Subtotal of UGB future housing needs (number of homes)	149,600 to 153,900
Add current housing needs (underproduction, houselessness, 2nd and vacation rentals)	26,953
Total current and future UGB housing need (2024-2044, rounded)	176,500 to 180,800

Table 3: Metro UGB current and future housing need and deficit assuming 70% UGB capture

	UGB Housing Need at 70% UGB Capture			
	single-detached	middle housing	multifamily	Total
Future need: baseline forecast (see Table 1)	56,846	32,911	59,838	149,594
Units lost to 2nd and vacation homes	1,072	1,769	443	3,285
Historic underproduction	726	2,089	12,160	14,975
Households experiencing houselessness	-	40	8,653	8,693
Total Housing Need (rounded)	**58,600**	**36,800**	**81,100**	**176,500**
Needed housing mix	33%	21%	46%	100%
Total UGB capacity (rounded)	56,500	36,700	82,300	175,500
Deficits (rounded)	**(2,200)**	**(100)**	**1,200**	**(1,000)**

Table 4: Metro UGB current and future housing need and deficit assuming 72% UGB capture

	UGB Housing Need at 72% UGB Capture			
	single-detached	middle housing	multifamily	Total
Future need: baseline forecast (see Table 1)	58,470	33,851	61,547	153,868
Units lost to 2nd and vacation homes	1,072	1,769	443	3,285
Historic underproduction	726	2,089	12,160	14,975
Households experiencing houselessness	-	40	8,653	8,693
Total Housing Need (rounded)	**60,300**	**37,700**	**82,800**	**180,800**
Needed housing mix	33%	21%	46%	100%
Total UGB capacity (rounded)	56,500	36,700	82,300	175,500
Deficits (rounded)	**(3,800)**	**(1,000)**	**(500)**	**(5,300)**

If you picnic at Blue Lake or take your kids to the Oregon Zoo, enjoy symphonies at the Schnitz or auto shows at the convention center, put out your trash or drive your car – we've already crossed paths.

So, hello. We're Metro – nice to meet you.

In a metropolitan area as big as Portland, we can do a lot of things better together. Join us to help the region prepare for a happy, healthy future.

Stay in touch with news, stories, and things to do.

DRAFT

PURPOSE AND BACKGROUND

As new people move to the greater Portland region and businesses create more jobs, our region's urban growth boundary (UGB) serves to focus development within the boundary. The focused development helps stretch limited public dollars that build and maintain the streets, water and sewer pipes, schools and parks that every community needs. Focusing development within the UGB also helps protect high-quality farmland, forests and natural habitats.

Every six years, the state directs Metro to assess whether there is enough land inside the urban growth boundary for the next 20 years of job and housing growth. These periodic decisions also provide an opportunity to support the 2040 Growth Concept, greater Portland's vision for growth. The Growth Concept envisions the region's growth in town centers and urban corridors and guides UGB expansions into urban reserves–areas best suited for future development–after careful consideration of whether those expansions are needed.

To make an urban growth management decision, Metro assesses trends for a variety of factors, from changes in population growth, household size and consumer desires to the future of workplaces and transportation. Metro publishes these assessments in the urban growth report.

If there is a regional need for land to accommodate the next 20 years of jobs and housing growth, Metro Council can consider expanding the greater Portland region's UGB. However, the region has learned that adding more land alone is not enough. Expansion areas only produce jobs or housing when a city can provide infrastructure like pipes, roads, sidewalks, parks, and schools.

If a city decides that it is ready to expand the UGB into urban reserves, the city must be ready to support development. A city demonstrates its readiness with a concept plan. A concept plan lays out the vision for the area, intended land uses, transportation network, environmental protections, additional necessary infrastructure and funding sources. Cities that are interested in expansion must submit an expansion proposal with a concept plan to Metro for consideration, along with governmental agreements, letters of support and findings.

For the 2024 urban growth management decision cycle, Metro received one proposal from the City of Sherwood to expand the UGB to include the 1,300-acre Sherwood West urban reserve area. If Metro Council determines more land is needed in the UGB to support the next 20 years of growth, they will also determine how Sherwood's proposed expansion will accommodate the needs described in the urban growth report.

From July 9 to August 22, 2024, Metro asked residents of the greater Portland region for their thoughts on the 2024 draft Urban Growth Report and the City of Sherwood's expansion proposal. Metro Council will consider public comments as they make an urban growth decision.

PUBLIC COMMENTS AT A GLANCE

From July 9 to August 22, 2024, Metro held a public comment period, inviting feedback on the draft 2024 Urban Growth Report and an urban growth boundary expansion proposal from the City of Sherwood. During the public comment period, Metro invited comments and feedback from members of the public, community and business organizations, regional advisory committees, agency partners and policymakers.

This public comment period builds on public involvement throughout the urban growth management process. Learn about the ideas and feedback provided by 15 youth who met regularly through the urban growth management process.

Metro received **72** email comments and 365 responses to an online survey.

Public comments included a variety of viewpoints about the draft Urban Growth report and the City of Sherwood's expansion proposal. Themes from comments provided in emails and the online survey about the expansion proposal include:

- Optimism about future growth potential, including the potential for a resurgence of high-tech manufacturing
- Interest in more housing and job opportunities in Sherwood, including housing choices for seniors, young families and other demographic groups
- Sentiment that the expansion is not needed at all or is not needed at the proposed site
- An interest in more infill development before the urban growth boundary is expanded
- Concern about the need for more housing, a diversity of housing and housing that is affordable
- Concern about the impacts of a potential UGB expansion on traffic; some comments pointed to limited transit options available in Sherwood
- Concern about the impacts of a potential UGB expansion on farmland and agricultural activities in the area
- Concern about potential impacts of a potential UGB expansion on the environment and climate change
- Concern that new development would have an impact on existing public infrastructure leading to tax increases for current residents

DRAFT

PUBLIC COMMENT PERIOD OVERVIEW

During the public comment period, there were a variety of resources available for review and several platforms available for submitting feedback and comments:

- **Public review draft materials**: The project webpage included the draft 2024 Urban Growth Report and City of Sherwood's expansion proposal for Sherwood West. The report and the expansion proposal were also summarized in an executive summary and factsheet that were available in English and Spanish. With a variety of informational resources, the public comment period allowed people to engage at the level of detail that worked best for them.

- **Comment platforms**: There were several ways for people to provide comments including an online survey, email, letter and voicemail.

- **Online survey**: An online survey was available and publicized in English and Spanish. The survey asked participants to prioritize primary factors for expanding the urban growth boundary, asked for feedback on the expansion proposal, and also provided space for participants to describe what they want preserved and what they want to see change as the region grows.

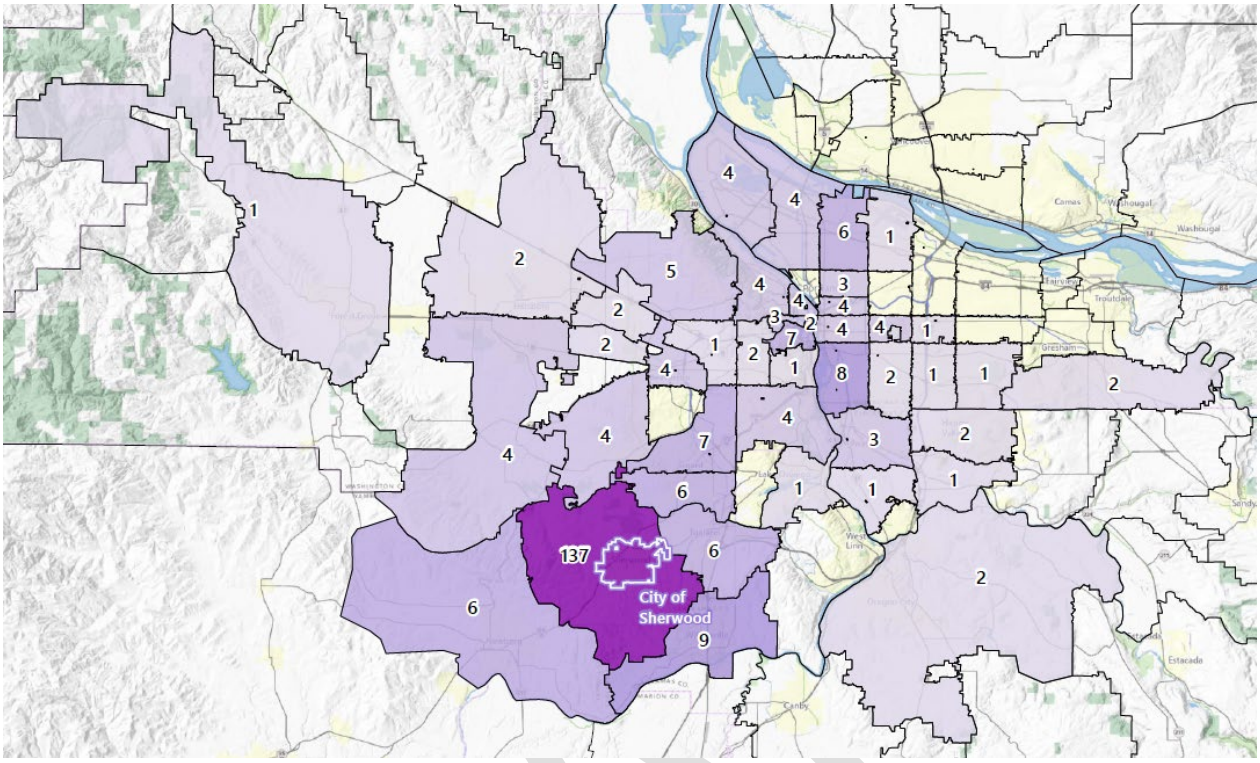
- **Notifications and notices**: Public notices of the comment period were provided to local neighborhood involvement and community outreach offices at jurisdictions across the region. Notifications were sent to community-based organizations, Metro regional advisory committees and their respective interested parties. Metro also posted the public comment period on social media and Metro News. Flyers with QR codes were posted in Sherwood and City of Sherwood and Metro staff promoted the public comment period at Sherwood's Robin Hood Festival.

- **Public hearings**: Metro Council will receive testimony about the urban growth management decision in-person, online or in writing at a public hearing on Sept. 26 and at the first reading of the ordinance on Nov. 21, 2024.

DRAFT

ONLINE SURVEY RESULTS

The online survey provided overviews of the urban growth decision process, the Urban Growth Report and the Sherwood West proposal. The survey also linked to the summarized materials in English and Spanish on the project webpage as well as the unabridged Urban Growth Report and expansion proposal. The survey asked participants six questions about growth and nine optional demographic questions. A total of 365 respondents participated in the online comment survey. A summary of the survey follows, and the results are included in Appendix A.



The survey included the following questions:

- After reviewing the Draft Urban Growth Report, is there something you think was not adequately considered in the report that you would like decision-makers to know about? (total responses=247)
- Which factors do you think are most important as a city prepares for expansion? Please rank in order of importance. (total responses=312)
- Please provide your comments on the Sherwood West proposal. (total responses=182)
- Is there anything else that you would like the Metro Council to consider as they make a decision about whether to expand the Urban Growth Boundary as described in the Sherwood proposal? (total responses=218)
- What do you most want to see preserved as greater Portland continues to grow? (total responses=340)
- What changes would you like to see as greater Portland continues to grow? (total responses=340)

Survey respondents were asked to provide their zip code. This question was optional, and 284 survey participants responded. More than 143 respondents submitted a Sherwood zip code.

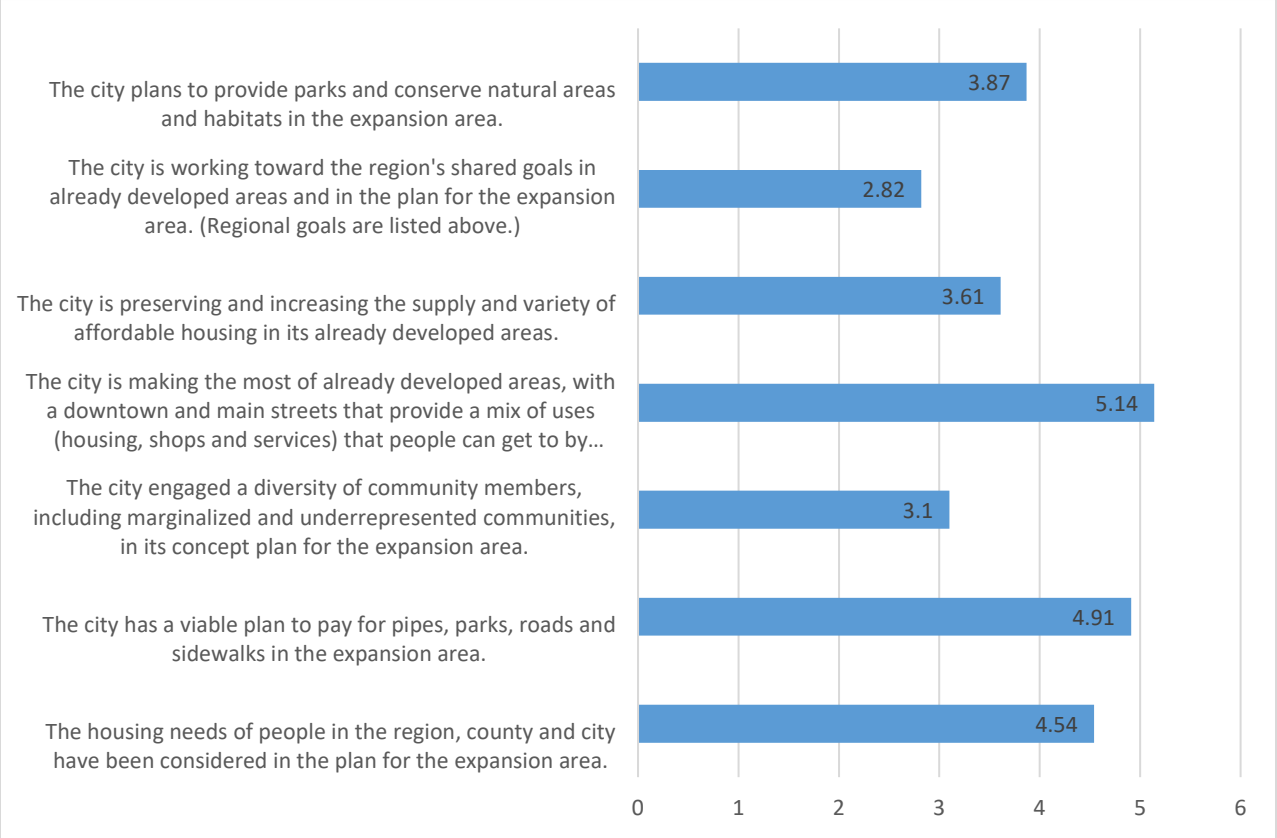
Figure 1: Survey respondents zip codes

Survey comments on the Draft 2024 Urban Growth Report and the Sherwood West concept plan



Survey participants were invited to review the City of Sherwood's expansion proposal and Sherwood West Concept Plan and/or the fact sheet summarizing the proposal. Key elements of the proposal were also summarized in the survey.

The survey included a summary of the factors Metro considers when reviewing an expansion proposal from a city and asked survey participants: **Which factors do you think are most important as a city prepares for expansion? Please rank in order of importance. (Total responses= 312)**

Survey respondents ranked the top three factors as most important. These factors are also reflected in the comment themes. The top three factors are:

- The city is making the most of already developed areas, with a downtown and main streets that provide a mix of uses (housing, shops and services) that people can get to by walking and rolling.
- The city has a viable plan to pay for pipes, parks, roads and sidewalks in the expansion area.
- The housing needs of people in the region, county and city have been considered in the plan for the expansion area.

Figure 2: Responses to: "Which factors do you think are most important as a city prepares for expansion? Please rank in order of importance?" (Total responses= 312)

The survey included three open-ended questions that elicited comments about the City of Sherwood's proposed expansion. There were very few comments on the Draft 2024 Urban Growth Report. The responses to the following three questions are summarized below by theme. For the complete set of comments see Appendices A-1, A-2 and A-3.

Q: After reviewing the report, is there something you think was not adequately considered in the report that you would like decision-makers to know about? (Total responses=247)

Q: Please provide your comments on the Sherwood West proposal in the box below. (Total responses: 182)

Q: Is there anything else that you would like the Metro Council to consider as they make a decision about whether to expand the Urban Growth Boundary as described in the Sherwood proposal? (Total responses=218)

Most respondents opposed the expansion or questioned the need for an expansion. The most frequently cited reasons for opposition were the loss of farmland, natural resources and traffic impacts, and concerns about the tax burden on existing residents caused by the cost of new

infrastructure. Commentors expressed a desire for Sherwood and the region to make use of land already in the UGB and questioned the need for the expansion or the entirety of the proposed expansion given the expected rate of population growth. Supportive comments emphasized the need for housing and some highlighted the demand for single family housing while others expressed support for the mixed-use development proposed in the concept plan. The following are a list of the prominent issues across the survey responses with sample comments that address each issue:

- **Make use of land in the UGB**
- **There is not a need to expand**
- **An expansion will exasperate traffic congestion and safety issues.**
- **Transit is needed**
- **Building and maintaining infrastructure for new development is too costly**
- **Preserve farmland**
- **Preserve and protect natural and historic/cultural resources**
- **Climate change impacts need to be considered.**
- **More land is needed for housing and to support the single-family housing people want.**
- **Support for the expansion proposal**
- **Engage the Sherwood community**

Make use of land in the UGB

- "We have an abundance of property that is currently in the boundary. Use that effectively and build up and not out. "
- "Sherwood Oregon has a near city wide ban on apartments. They should not be granted a UGB expansion before they show true need. Build some apartments Sherwood first!"
- "We need to cheerlead all residential development and continue to chop down fees and rules until we get a deluge of infill development. it will make our place more financially productive, affordable and livable."
- "To accomplish regional goals, and even to create a healthy Sherwood, we must develop existing land within the UGB so we can create financially and environmentally sustainable population growth."
- "Lastly, the City has not maximized the current boundaries for affordable housing and jobs."
- "Work on densifying existing neighborhoods instead of focusing on sprawl."
- "The transportation connections are poor, and our region has no shortage of buildable land already in the UGB. We need infill, not more fire-prone sprawl into farms and forests."
- "I encourage Council to be extremely cautious about expanding the UGB. We should focus on further developing our existing area within the UGB rather than expanding Sherwood at this time."

DRAFT

- “There is a plethora of empty warehouses and houses that can be renovated. Do this before taking any more farmland to build more buildings.”
- “The city has plenty of room for development inside city limits. In addition king city has already expanded and is working on developing a large residential area just down the road.”
- Rather than building more outside of the UGB, let's focus on creating better spaces on the land that's already allocated. Densify current areas, we don't need to increase sprawl more.

There is not a need to expand

- “I am all for growth in a measured & logical manner when the need arises. There is no evidence that supports an inclusion of this magnitude.”
- “Being a property owner in the proposed expansion area who farms the land this expansion pushes us closer to losing our lively hood. Developers are continually contacting us and wanting to purchase our property. We are not interested. This is a very large expansion request. Is all or any of this land really needed now?”
- “For the Sherwood West expansion plan that was submitted in 2016 doesn't reflect the more recent population decline. The concept plan should be scaled back to reflect more current data and the UGB expansion should be 50% the original submission.”
- “Sherwood, Wilsonville, and Tualatin are currently in the process of wasting one of the largest industrial sites already within the UGB by each separately seeking development, often on small, 10 acre parcels. At a time when some think the region needs more large industrial parcels, these jurisdictions are wasting a huge area, already within the UGB, that should be developed as a single unit.”
- “I suggest that the Metro Council take into consideration the dearth of expansion options being presented as further evidence that the demand for growth actually isn't there.”
- “Even the small baseline growth assumption seems optimistic. Developing suburban land will not create "affordable housing" in locations where it is needed.”

An expansion will exasperate traffic congestion and safety issues.

- “How will expansion and development of high density housing and business along this route between Roy Roger’s, Lebeau, Elwert, and Edy roads not contribute to further traffic issues and noise?”
- “A UGB expansion in a part of the metro area poorly served by transit and likely to be entirely car dependent does not align with any of our regions goals. As such, it’s unclear why it’s being considered.”
- “Most new families that would live in the homes planned would work elsewhere. Traffic congestion will increase.”

DRAFT

- “Traffic on and off of Hwy 99 has major delays during rush hours. These conditions have persisted for years and will only worsen if all of Sherwood Wes tis brought in at this time. The City and County need to improve the capacity of Elwert Road,and it's Hwy 99 connection before adding so many homes.”

Transit is needed

- “However, people will want to get out of their neighborhood to access amenities, and there are not very many options for how they will do that. This makes living in the area less accessible for people with disabilities who cannot drive (like my own father) or younger people who cannot afford a car.”
- “Keep public transportation strong so I can go places. I work part-time and still drive car but not for long so please don't disregard the needs of older people like me.”
- “This project would make more sense if it was built in conjunction with a WES regional rail spur but it lacks a Right of Way reservation to build such a line.”
- “Sherwood has the right ideas in mind with mixed developments and alternative transportation but they need to take them further, transit being extended into Sherwood west should also be explored...”
- “Light rail expansion on the 99 corridor”
- “I’m nervous about continuing to focus on roads instead of public transit, and if we want housing to be affordable and Sherwood to be accessible to folks, it needs to move away from single family homes."

Building and maintaining infrastructure for new development is too costly

- “The sewer, water and gas lines have to be upsized downstream/upstream from the development and the current tax payer gets to pay for that.”
- “We aren't as dense and suburban neighborhoods don't pay for themselves in taxes once they start to require maintenance. If we built denser on our existing roads, we might actually have the tax base to support them.”
- “Based on the Sherwood West expansion proposal, I do not think that the City of Sherwood adequately demonstrates that infrastructure development is feasible.”
- “Also you are going to burden the current property owners with additional taxes for improving infrastructure, roads, schools, and fire stations that these 5,580 homes will require.”
- “The proposed infrastructure funding plan is vague at best. Relying on SDCs and ‘outside’ funding is insufficient. No expansion should be considered until there is a concrete committed plan for the infrastructure funding.”

DRAFT

Preserve farmland

- "Consider where food will come from in 20 years if there are no farmlands to sustain the animals and crops."
- "The Report does not address the consequences of replacing fertile, productive land with houses and industry."

Preserve and protect natural and historic/cultural resources

- "Protecting historic and cultural resources."
- "Previously designated Title 13properties are now being planned to be light industrial with no thought for where the wildlife they are wiping out will go to."

Climate change impacts need to be considered.

- "The report did not consider the potential impacts of climate change, in terms of population increases in the Northwest due to cooler weather and water availability relative to other parts of the country, and also impacts of climate change on the wildland urban interface and how this could impact fire risk for the edges of the Portland area."
- "Is there consideration of preservation of trees and plants for carbon sequestration and other environmental benefits?"
- "We are in a climate crisis, and these trees help us by providing shade, sequestering carbon, preventing erosion, and providing wildlife habitat."

More land is needed for housing and to support the single-family housing people want.

- "...restrict supply and the inherent demand will cause price increases. If affordability is a key driver then ensuring adequate supply of land is fundamental to affordable housing."
- "Urban densities are reaching unsustainable levels. We have vast room to expand UGB's and we shod do so. Make a plan to double the amount of land available for residential development over the next 20 years."
- "We need more land made available for single family housing and just not for apartments."
- "I think Sherwood's specific analysis at the local level should be part of the Metro Council decision making. There's a strong argument to be made about where people want to live and work that doesn't always translate to regional land availability."
- We need to build more housing desperately and are not at risk of "overbuilding" - at worst this would reverse some of the run-up in prices due to past severe undersupply. I am in favor of allowing more housing to be built as much as possible.

DRAFT

- "Expand the boundary the maximum amount possible! The region needs more single family homes-thousands more homes!"

Support for the expansion proposal

- "Creating more jobs than housing units would be a mistake. That said, I support the proposal."
- "Looking forward to more commercial zoning for jobs and businesses."
- "I'm in favor of development around the high school. Housing and mixed use should go into the surrounding acreage."
- "This expansion appears to be well thought out, and should be welcomed in the region. It is sad that the Sherwood West proposal is the only one."
- "I like the plan. I know there is an opposition group but there are those of us that support the plan too."
- "Don't let existing Sherwood residents vote down UGB expansions that are needed to help the region accommodate growth and affordability."
- "This expansion should have already happened before the School was built in 2015 - Newberg, Or has updated their area and we are left behind and deal with their traffic to Hillsboro"

Engage the Sherwood community

- "The Sherwood community needs to weigh in on the proposed north industrial zone."
- "Please consider the desires of the people who call Sherwood home."

Survey comments on about what is most important as the region grows and changes

Two survey questions asked for people to share their ideas about growth in greater Portland—what they want to see preserved and what they would like to see changed as the region grows. Responses to these questions are in Appendix A-4 and A-5. These comments will be considered in upcoming Metro planning processes, including the update to the region's vision and growth concept.

DRAFT

COMMENTS VIA EMAIL, LETTERS AND PHONE

In addition to the online survey, residents, businesses and policymakers were invited to comment on the four city expansion proposals by letter, email and phone. Metro received 72 emails and no letters or comments on voicemail. A majority of the emails were submitted by Sherwood residents, landowners, agencies, elected officials and organizations with interest in the expansion. See Appendix B for the comment emails.

Supportive comment emails highlighted a variety of reasons for their support, including:

- More housing and more employment opportunities
- Addressing a lack of land supply
- Property owners who want their property brought into the UGB
- Sherwood' unique location providing an economic advantage

Comment emails in opposition highlighted a variety of reasons for their support, including:

- Loss of farms land
- Traffic congestion
- Tax burden of new infrastructure on existing residents
- There is enough land in the UGB
- Concern about concept plan not providing affordable housing options

Other issues raised include:

- Concerns about slope in expansion areas
- Input about the methodology of the draft UGR, including suggestions for different approaches to the buildable land inventory, population projections, and density estimates.
- Several comment emails encouraged Metro to use the high growth rate for population and employment.

WHO PARTICIPATED

Survey participants were asked to provide optional demographic information to help Metro know if participants were a representative group reflecting our diverse communities and a broad range of experiences in our region. Demographic groups that are underrepresented among survey respondents compared to the metropolitan Portland

DRAFT

area demographics by 4 percent or more are highlighted in red. Greater Portland area demographics are sourced from the 2020 Census. *Demographic analysis to come.*

For complete demographic responses see Appendix A-6.

NEXT STEPS

The merits of Sherwood West's proposal will be the focus of policy discussions in the fall of 2024. Generally, decision-makers will consider whether:

- The housing needs of people in the region, county and city have been considered.
- Development of the proposed expansion area is feasible and supported by a viable plan to pay for needed pipes, parks, roads and sidewalks.
- The city has reduced barriers to mixed-use, walkable development in its downtowns and main streets.
- The city has implemented best practices for preserving and increasing the supply and diversity of affordable housing in its existing urban areas.
- The city has taken actions to advance Metro's six desired outcomes, with a particular emphasis on meaningful engagement of communities of color in community planning processes.

A final decision by the Metro Council on urban growth boundary expansion is expected in December 2024.

July 9, 2024:	Release draft UGR and appendices
August 22, 2024:	Public comment survey on draft UGR closes
September 5, 2024:	Council work session on COO/Staff recommendations
September 26, 2024:	Council holds public hearing on COO/Staff recommendations
October 1, 2024:	Council provides direction to staff at work session
October 14, 2024:	Measure 56 notices to property owners in proposed expansion areas
October 24, 2024:	35-day notice of proposed amendment to DLCD
November 4, 2024:	Postcards/report on potential impacts of UGB expansion on existing neighborhoods
November 21, 2024:	Council first reading of ordinance; public hearing
December 5, 2024:	Council second reading of ordinance; decision

APPENDIX A

Public comment online survey results

Q3 Read the Draft 2024 Urban Growth Report. Metro uses a wide variety of factors to assess whether there is enough land inside the greater Portland region's urban growth boundary for the next 20 years of job and housing growth. After reviewing the report, is there something you think was not adequately considered in the report that you would like decision-makers to know about?

Answered: 247 Skipped: 118

#	RESPONSES	DATE
1	The facts and informed opinions of the residents that are impacted by the growth plans.	8/23/2024 10:06 AM
2	Open up more buildable ground for affordable houses	8/22/2024 9:51 PM
3	Projections of growth are not lining up with actual. We are growing a lot slower, so back off.	8/22/2024 9:44 PM
4	How can you preserve farmland that borders the current UGB and not create urban sprawl w/no consideration to existing small business engaged in farming and farm related products	8/22/2024 9:38 PM
5	There is a large amount of unused land already in the UGB. This proposal is unnecessary and a wet kiss for developers.	8/22/2024 7:24 PM
6	Yes, that affordable housing is not created by shoddy buildings and neighborhoods made up of these shoddily built homes. The report does not address the current land built up by Metropolitan Land Group and how horrible these areas look. What once was beautiful farmland is now covered by what looks like Monopoly house pieces...all the same, no character, nothing denoting a neighborhood for families. Yet it's the goal to have this same company develop these new enveloped lands if the Urban Growth Boundary is expanded. Not a good solution for Oregon that is supposed to be green and an oasis of natural beauty.	8/22/2024 6:57 PM
7	There should be more plans for rezoning and growing up	8/22/2024 6:46 PM
8	All of it is inadequate! We have an abundance of property that is currently in the boundary. Use that effectively and build up and not out. You have not considered the impact to the people who live in the area regarding traffic with the addition of all the houses and business. This is the country/farmland and should be preserved as such!	8/22/2024 6:29 PM
9	There are a plethora of abandoned buildings and houses which can be renovated and utilized for future growth vs. continuing to take farmland, trees, and fields. Consider where food will come from in 20 years if there are no farmlands to sustain the animals and crops.	8/22/2024 6:28 PM
10	The 2024 UGR has implications for local government planning processes as Metro's subsequent distributed forecasts inform local Housing Capacity Analyses, Economic Opportunities Analyses, and Regional Transportation Plan modeling. The City of Hillsboro recommends Metro rely on a high population growth forecast to allow our region to be nimbler in addressing current and future housing and employment needs. The 2024 Draft UGR demand scenario 4 involves faster household growth in 2044 coming from increased in-migration of younger households, consistent with historic migration dynamics, who typically seeking multifamily and middle housing. Though younger households who migrate to the region by 2030, 2035, and 2040 may initially prefer multifamily or middle housing, many will continue to demand single-unit detached for their growing household size and other reasons. The City of Hillsboro recommends Metro add a new UGR demand scenario 5 that involves faster household growth coming from increased in-migration of younger households, consistent with historic migration dynamics, but with a larger percentage of single-unit detached to meet the demand during the next 20 years. Though the Draft UGR shows the region as having sufficient total industrial capacity, much of the industrial land supply consists of smaller parcels with an average lot size of 3.8 acres and a median lot size of 1.7 acres. The Draft UGR mentions there are only eight sites over 50 buildable acres inside the UGB that are available to the general industrial market. The final 2024 UGR should highlight the lack of sufficient large-lot industrial	8/22/2024 6:06 PM

	sites 25 plus acres in size available to the general industrial market. The final 2024 UGR should also highlight that less than 6% of the taxlots available to the general industrial market are medium-sized sites between 10 and 25 acres.	
11	No	8/22/2024 4:38 PM
12	The Executive Summary notes that “the cost of serving raw lands with needed infrastructure is a significant barrier to housing development.” Additional information should be added to the Summary and to the full report regarding the high cost of infrastructure maintenance.	8/22/2024 11:39 AM
13	That current retired property owners are getting taxed out of their homes the currently live in due to the infrastructure improvements needed when large developments go in. I understand that the developer installes the infrastructure within the development but not outside it, the sewer, water and gas lines have to be upsized downsteam/upstream from the development and the current tax payer gets to pay for that. The current tax payer also gets to pay for the additional schools and fire stations needed for these additional homes.	8/22/2024 10:11 AM
14	Per 1000 Friends of Oregon, there is currently land within the UGB that is not being developed due to lack of infrastructure. There isn't any infrastructure on the land the City of Sherwood wants to bring into the UGB either. Developers pay for roads, etc. directly in front of the housing they are building; however, they don't contribute anything to improve all of the arterial roads, Hwy 99W, etc. that become overburdened due to the thousands of people their developments add.	8/22/2024 2:52 AM
15	Protecting historic and cultural resources	8/21/2024 11:09 PM
16	The characterization of the mixed use as having unique characteristics for industrial use is way off base. To believe this seems to focus on the fact that the area is flat and undeveloped. It ignores a range of characteristics which make it unsuitable. 1. The land is sandwiched between neighborhoods to the south and west. A federal bird sanctuary lies to the immediate east. Farmland borders the area on the north. In fact the only reason it is undeveloped is it too is farmland. Finally BPA transmission lines go right through the center. If the thought that it will provide acreage for chip manufacturing, the City of Sherwood and Metro are just plain wrong. Do a little bit of research and you will find chip manufactures avoid electrical transmission lines due to the electromagnetic impact on chip fabrication. It is an ill considered scheme. It is not technically feasible for semi conductor manufacturing. In addition an industrial use would not conform with any of the current land use to the north, south, east or west.	8/21/2024 10:52 PM
17	Yes, in two areas. In "Planning amid uncertainty" in the executive summary, Metro does not include issues with the cost involved with the infrastructure and services of an expanded UGB. Cities in the metro area, and Oregon as a whole, are facing severe budget crises that all stem from over-expansion. We have built a large service area we need to provide infrastructure (roads, water, sewage) and services (police, fire, health) for, and cannot afford to. We have only gotten this far by deferring maintenance that is catching up to us. The Executive Summary also does not mention climate change once. We must pursue planning options that reduce GHG emissions. Lower-density housing leads to increased GHG emissions.	8/21/2024 10:47 PM
18	Pipe chicken Creek and add water quality facilities	8/21/2024 9:32 PM
19	there is plenty of land inside the current UGB, however much of it has locked up by garbage zoning and other rules that limits residential development's financial viability. we need to cheerlead all residential development and continue to chop down fees and rules until we get a deluge of infill development. it will make our place more financially productive, affordable and livable	8/21/2024 8:16 PM
20	I do not think the report factors in the restrictions on the land, such as existing power lines and the nature of natural wet lands. Power lines emit electromagnetic waves that greatly impact the manufacturing of microchips. Additionally, there are existing restrictions regarding industrial building on protected wetlands and their associated upland habitats.	8/21/2024 6:06 PM
21	The utlimate cost of the loss of farmland and natural areas. The proposal fails to understand the new realities and assumes more development is without this cost.	8/21/2024 5:50 PM
22	It ignores the opportunity for infill and densification of existing neighborhoods already within the UGB.	8/21/2024 4:55 PM
23	That growth has leveled off and the changing demographics of the area.	8/21/2024 4:22 PM
24	Yes, where is the money coming from for the infrastructure needed to support this proposed	8/21/2024 3:40 PM

	expansion? are builders and developers paying or are the taxpayers on the hook? In addition the discrepancy between the Growth report and the city of Sherwood projections justifying the expansion is hard to reconcile.	
25	Specifically in the Sherwood West expansion, the concept plan did not represent the will of the majority of Sherwood residents. 80% of residents did not want to see the level of expansion and were gravely concerned about how it would effect the livability and sense of community that already exists. There is no reason to add the entire amount into the UGB at this time, smaller more thoughtful expansion was never considered and the cost to add services to more of the rural portions of the reserve will be a huge burden to citizens, despite the city claiming it will not.	8/21/2024 2:58 PM
26	What's the plan to pay for the upkeep of all these new roads and sprawling infrastructure? Portland's budget is much larger than Boston's despite a smaller population in large part because we aren't as dense and suburban neighborhoods don't pay for themselves in taxes once they start to require maintenance. If we built denser on our existing roads, we might actually have the tax base to support them.	8/21/2024 2:35 PM
27	Is there consideration of preservation of trees and plants for carbon sequestration and other environmental benefits?	8/21/2024 10:54 AM
28	Land developers don't care.	8/21/2024 8:33 AM
29	Save farm land	8/21/2024 7:10 AM
30	No	8/20/2024 11:35 PM
31	Congestion is already a problem along Roy Roger's Road as it runs into Sherwood and connects to Highway 99. How will expansion and development of high density housing and business along this route between Roy Roger's, Lebeau, Elwert, and Edy roads not contribute to further traffic issues and noise? The growth projections Sherwood has provided to support this expansion are not consistent with the growth trends and true projections. As an example, the new high school was built to accommodate continued growth based on inflated projections. We now will see declining enrollment starting in just a few years. The school is struggling with budgets for the first time in years as the community is saddled with paying down the debt incurred to build a school that is proving to be too large. The housing need for the Portland Metro area is entry level to lower income affordable housing. Sherwood has become a more affluent community and is not conducive to development that will attempt to be affordable. Finally, there is no historical precedent for such a large expansion for this area. All of the above points would support reevaluation of the request to right size it for the true need for the community and support measured growth as opposed to an explosive expansion that could contribute to already tough traffic issues that impact Sherwood and the surrounding communities of Washington County.	8/20/2024 7:43 PM
32	Is property owners in Sherwood we favor the mixed use plan for Sherwood West on Kruger Road above Sherwood High School.	8/20/2024 6:24 PM
33	The amount of land proposed to be added into the urban growth boundary is staggering. Turning farmland into light industrial is sad. Sherwood still has large amounts of land available in the current boundaries. Elwert road is unsafe at its current speed limit and traffic congestion is already an issue with frequent accidents.	8/20/2024 6:21 PM
34	No	8/20/2024 6:19 PM
35	Sherwood protected land should not have zoning changes to allow for industrial growth	8/20/2024 5:00 PM
36	Traffic safety	8/20/2024 4:53 PM
37	Providing larger single family lot sizes in expansion.	8/20/2024 4:49 PM
38	The rate of growth in Sherwood area is not as substantial as the large proposal for 1291 acres, has anyone thoughtfully analyzed how long it would take to fill all the proposed housing.	8/20/2024 4:48 PM
39	Expansion for the sake of expansion. If they build it, they will come often untrue.	8/20/2024 4:25 PM
40	Sherwood area is not ready for this type of development	8/20/2024 4:20 PM
41	Quite a bit, actually. What is needed is a broader, more region-wide perspective, not mere kowtowing to Sherwood's empire building. It is not clear why Metro appears to be pushing this effort. Sherwood has ample undeveloped land within the city now, and has -0- interest in	8/20/2024 4:18 PM

	accommodating affordable housing anywhere. The northwestern portion of the proposed UGB expansion encroaches unnecessarily-almost gratuitously-upon successful agricultural operations whose success is closely linked to their rural setting. Again, it is hard to understand how or why Metro seems to have bought in on this weak, and destructive, proposal.	
42	Recognizing that the Willamette Valley is one of the richest soil areas in the world. We can increase growth inside the UGB and save our PRECIOUS farmland s	8/20/2024 4:10 PM
43	Do not expand the growth boundary in Sherwood where the high school enrollment is declining. Focus efforts on revitalizing Portland legacy neighborhoods and existing under supported schools.	8/20/2024 4:03 PM
44	There are a lot of items that we are questioning. They have been and will be submitted separately. Lot's of that data and other information is very misleading and/or obsolete and based on false assumptions.	8/20/2024 3:52 PM
45	Sherwood had enough land to build homes and businesses and industrial buildings without expanding the urban growth boundary	8/20/2024 3:52 PM
46	Expansion to the west without proper funding, study of the transportation costs including the costs of crossing fish bearing streams, condemning farm/wine property is in appropriate. Expecting the developers and existing landowners to bear the cost of development and hoping for federal funding for road improvements is narrow sighted.	8/20/2024 3:46 PM
47	The proposed plan *looks* like spraw. Even with the green spaces in the plan, there seems to be little to consideration for walkability or residential services. Also there seems to be inadequate consideration for the amount of traffic this will introduce on Elwert.	8/20/2024 3:46 PM
48	I'm concerned not enough consideration is given regarding available lands that the current owners aren't willing to sell, putting upwards pressure on land prices.	8/20/2024 3:31 PM
49	Yes, the Sherwood expansion plan is not proportional to the needs of the area and sustainability of agricultural lands. The numbers don’t add up.	8/20/2024 2:53 PM
50	The student enrollment decreasing which should be considered when planning on an unnecessary new school.	8/20/2024 10:54 AM
51	Yes, I'd like to see rail right of way reservations within the urban growth boundary area expansion. An exclusive ROW reservation is easier to set aside before development.	8/19/2024 6:09 PM
52	Use the land that is already inside the UGB first. No more tax increased and increased traffic please.	8/19/2024 12:45 PM
53	It’s incredibly disappointing that the report makes zero mention of the impact of the Urban Growth Boundary to will totally undermine any efforts to address climate change. Metro continues to ignore the science, and push for expanding car infrastructure and sprawl. We are poisoning the planet, and this action will massively increase GHG emissions.	8/18/2024 8:37 PM
54	There needs to be greater emphasis on increasing density and building up, not out	8/18/2024 8:30 PM
55	Traffic, it’s horrible and adding more houses is not keeping the town of Sherwood a great place to live	8/18/2024 7:01 PM
56	The report makes no mention of why the city of Sherwood needs to expand outward further from "Downtown Sherwood" and across 99W rather than upzoning and developing further around central services of community like libraries and grocery stores.	8/18/2024 5:10 PM
57	Sherwood has a ban on new apartment development in most of the city. Allowing an expansion of the growth boundary to this level when we are in a housing deficit will do nothing to alleviate the problems. Start with allowing these developments before agreeing to expand the growth boundary	8/18/2024 3:42 PM
58	Do not go forward with Sherwood West plans!	8/18/2024 3:25 PM
59	Greater enforcement of the UGB, do not allow Sherwood to violate it.	8/18/2024 2:25 PM
60	Sherwood Oregon has a near city wide ban on apartments. They should not be granted a UGB expansion before they show true need. Build some apartments Sherwood first!	8/18/2024 2:25 PM
61	No one wants to ask the hard questions about where the water will come from to support all this new development. We need to encourage businesses to choose small towns that have	8/18/2024 1:21 PM

	lost their timber jobs. Stop over-crowding the metro area.	
62	The complete wreckage of the farmlands, farm stands, community farm activities, scenery, peace, quiet, and character of the rural SHERWOOD community if the UGB were expanded in this way. Stop trying to make Portland better by absorbing everything around it to be ruined like Portland has been.	8/18/2024 1:20 PM
63	The fact that we do not use the existing UGB wisely.	8/18/2024 1:11 PM
64	Sherwood has an apartment ban yet wants to expand their growth boundary. This is counteractive to our housing and density goals in the Portland metro area. I ask that the council deny their UGB expansion in favor of more density within the current Sherwood city limits.	8/18/2024 12:49 PM
65	How are you going to ensure affordable housing goes to younger people without it being considered discrimination? Are you going to limit it to only Oregonians allowed to buy it?	8/18/2024 12:29 PM
66	Cities in Washington County maintain apartment bans across the overwhelming majority of residential land. Instead of lifting that ban, and finally allowing for adequate housing production, they insist that we must sprawl into more natural and agricultural land. Metro must ensure that there is a 20 year buildable lands inventory, and instead of fulfilling that through granting yet another irresponsible expansion of the UGB, it must exercise it's immense authority and compell cities to legalize more housing in existing residential areas closer to good transportation, job centers and amenities. Metro must also use its weight to compell cities to cut red tape that present a barrier to housing production, speed up permits, reduce discretionary processes, reduce permit fees and SDC charges.	8/18/2024 11:49 AM
67	This report inadequately considers the fire risk, climate impacts, and regional transportation connections for this plot of land. The notion that Metro is considering allowing more southern-California style sprawl in area with very poor automotive and transit connections in 2024 is deeply frustrating. As the last several weeks of media reporting have revealed nationally, this type of development will not be insurable in the coming years. Metro needs to think forward and better realize the context in which it is making this decisions. Developers want more land: not Oregonians.	8/18/2024 11:27 AM
68	Yes, better roads to handle the traffic.	8/18/2024 9:40 AM
69	What the decision makers already know and must reconsider, dense housing is not good for young families! There’s no place for kids to have a yard and play or have a garden. These homes are an eyesore to the landscape. It’s all about money and not the people. These home are NOT AFFORDABLE.	8/18/2024 7:48 AM
70	The area of Sherwood West is great farmland and wineries that make our city unique. While some development around the high school may be necessary, the Sherwood West concept asks for more expansion than is needed to support our community.	8/18/2024 6:28 AM
71	I think whoever has been making decisions for Sherwood has been doing a horrible job. I’d like to see more independent and family run businesses, not more hotel chains, restaurant chains, etc. I don’t think rapid growth is the right way to approach the future. Sherwood should be investing in what we currently have available in town, people who are interested in starting businesses. Preparing for challenges of the future should be the focus. Not continuing to expand. That will not solve anything, it will just make the problems we already have worse.	8/18/2024 1:08 AM
72	Don't build more homes, save our farms, and improve on what we have already	8/17/2024 8:46 PM
73	I don't see strong consideration of the potential downsides of each plan. If housing is underbuilt (because the area grows more than expected), the consequences are very bad - house prices rise again, families are priced out, people lose their housing, etc. But if we build more housing than necessary, the consequences are not so bad - we are just future proofed and ahead of schedule, dropping housing prices even more.	8/17/2024 2:48 PM
74	There are many types of housing and according to our governor, we need to address them all. When I move to Sherwood 20 years ago, I had three children and was able to find a house that has worked for us . If all that was available were apartments, or high density housing, we would not have moved to Sherwood. We need to have houses that young families can afford, perhaps creating a land trust like in Medford. I understand some that some people want to stop all development, but I believe that that will cause our beautiful schools to be empty and result in us needing to accept students from a larger area. This will have a detrimental effect on not	8/17/2024 9:10 AM

	only our community, but we would most likely attract the best and brightest that could afford to be driven to Sherwood everyday. This would diminish schools in the surrounding areas. We also typically lose people who no longer have children in the schools. We need a place for them to have affordable housing that is smaller so that they do not need to leave their social circles.	
75	The importance of preserving natural areas	8/17/2024 8:27 AM
76	I think that small outlying areas like Sherwood need to remain small. We moved here to a smaller city because we didn't want traffic and houses and excessive growth.	8/17/2024 8:02 AM
77	Climate change and public transit/alternative transit should be of utmost importance.	8/17/2024 5:18 AM
78	Zoning needs to stay where its at	8/16/2024 11:03 PM
79	How valid are your growth models? Internal and external growth appeared stalled.	8/16/2024 9:31 PM
80	I do not think that the impact of adding space as per the Sherwood plan addresses the congestion problems that will worsen or the impact on quality of life in the area.	8/16/2024 4:23 PM
81	Adding urban growth in areas lacking efficient transportation options only creates more expensive local long term costs and declining quality of life	8/16/2024 4:23 PM
82	Population in the Portland area is going down and continued to go down. We do not need to expand so much.	8/16/2024 11:44 AM
83	current roads are not capable of supporting new housing neighborhoods	8/16/2024 7:35 AM
84	Provision of shovel-ready, buildable land for housing and jobs for the next 20 years.	8/15/2024 1:41 PM
85	Growth in the Sherwood direction seems haphazard	8/14/2024 1:08 PM
86	Landowner rights near urban growth areas	8/14/2024 7:01 AM
87	There is a lot of unoccupied space in downtown Portland and surrounding areas. The economy is not in a good position now, no one can afford to purchase a house or pay the high price of rent.	8/14/2024 5:31 AM
88	No. I 100% oppose the expansion of the urban growth boundary	8/13/2024 10:06 PM
89	It says one of the goals is to protect farmland but yet everywhere I look I see more and more land being turned into industrial buildings and houses. So many farms have been lost and it is disappointing to see.	8/13/2024 7:54 PM
90	i am opposed to the Sherwood West Concept Plan, as there is not infrastructure in place to support growth of that size at this time.	8/13/2024 4:45 PM
91	I do not think the Sherwood population is growing as rapidly as stated there is enough housing to sustain growth	8/13/2024 4:06 PM
92	Stay out of Wilsonville	8/13/2024 1:58 PM
93	More transparency of Metro projects. We have a few near us and it’s difficult to get straight answers.	8/13/2024 12:55 PM
94	People need to know what the cost (not the money) is to our community when we just keep building and building and building and taking away land from people that don't want to give it. You have wildlife with nowhere to go but in the neighborhoods then people get upset they are in the neighborhoods you wonder why food is so expensive and unhealthy and it's because with every new community you have less area for farms which means our food comes from further and further away and you have no idea how it gets there or who grows it. Building more shouldn't be the only option.	8/12/2024 6:13 PM
95	Urban densities are reaching unsustainable levels. We have vast room to expand UGB's and we shod do so. Make a plan to double the amount of land available for residential development over the next 20 years. Stop trying to cram ppl in tight places. Fix it now before all the counties decide to annex into Idaho.	8/12/2024 5:29 PM
96	Funding and impact of non taxpayers on quality of life	8/12/2024 4:44 PM
97	Yes, not adequately thought out.	8/12/2024 10:01 AM

98	If Portland area can't enforce the crime there is now why grow?!? ! How about we clean up what is the problem now: homeless, drugs, etc Then when that's taken care up perhaps talk about growth. But why talk about growth when crime is through the roof with what's there now?!?!	8/12/2024 7:23 AM
99	Citizens of Sherwood are not opposed to growth. We are opposed to frivolous spending on endless, poorly planned suburbs that are not supported by current growth patterns and predictions	8/11/2024 8:32 PM
100	PRESERVE GREEN SPACES.	8/11/2024 8:15 PM
101	I need more park with big trees, MORE BIKE LANES, less cars, there is nothing of that	8/11/2024 2:32 PM
102	Traffic congestion already exists on Sunset due to new high school and turn restrictions onto 99 from Brookman/chapman. The neighborhoods back there are not all built out so we haven't seen the true impact of that traffic. It is already very difficult with the existing population adding more houses and more cars is not going to help.	8/11/2024 10:27 AM
103	The most basic of economic theory is supply and demand: restrict supply and the inherent demand will cause price increases. If affordability is a key driver then ensuring adequate supply of land is fundamental to affordable housing.	8/11/2024 8:18 AM
104	We need more land made available for single family housing and just not for apartments.	8/10/2024 11:46 AM
105	Impact on agricultural, wildlife and wetlands.	8/10/2024 10:36 AM
106	Family size is declining. Discourage large house development by charging higher fees and taxes for houses greater than 2300 sq feet.	8/10/2024 9:58 AM
107	Don't steamroll new development...require government agencies to actually and actively listen to citizens. So often over the years I've seen city councils hold meetings for public to share thoughts, but it is very obvious that a plan has already been decided on and nothing residents say is taken into consideration. Most recent example is in King City where a residential street will soon be turned into a major, multi-lane road, destroying the neighborhood with too much traffic and making it a major thoroughfare.	8/10/2024 7:37 AM
108	Many people want to own their residence or live somewhere single-family. Statistics show that kids have higher achievement if they live in a regular home as compared to an apartment. That said, the low number of single-facility homes planned doesn't line up with the priorities/preferences of residents, nor what is best for the next generation.	8/9/2024 11:15 PM
109	Have you population projections taken into account that so many people are moving out of Oregon?	8/9/2024 5:50 PM
110	As updated projections for growth shows a downward trend particularly with the enrollment of the relatively new Sherwood High School at cost of aproximately $248 million financed by taxpayers. The proposed Sherwood UGB plan if approved will again significantly impact taxpayers as well as displace current residents. Smart, prudent and realistic planning for growth is much needed. Otherwise, grabbing large parcels of land with current and productive uses in one fell swoop will have dire immediate consequences as well as unintended consequences in the future.	8/9/2024 11:13 AM
111	Impacts to natural greenspaces, waterway management.	8/9/2024 9:51 AM
112	It is painful to see "decision makers" who see vast developments as necessary instead of using the less desirable land that is available or at least not develop in patches that can be sub divided. Reserving the nature we have is important. As a native Oregonian we do not want Califonication…Mass sprawls of urbanized land. Gentrifying of old neighborhoods should happen before expanding.	8/9/2024 9:32 AM
113	Do not expand the proposed Sherwood area plan, too much traffic causes people to take country roads not built for this high volume traffic. It is causing dangerous situations with high speeds and too much volume on roads not built for this much traffic.	8/9/2024 6:58 AM
114	No	8/8/2024 9:04 PM
115	Oregon is changing many say. Lower population =charm. Higher population =more crime	8/8/2024 8:18 PM
116	Think about cleaning up what you have and not creating more that you can't take care of	8/8/2024 7:45 PM

117	Impacts of Climate change	8/8/2024 7:45 PM
118	The necessity of preserving farmland	8/8/2024 7:05 PM
119	Stop the sprawl	8/8/2024 6:28 PM
120	Keep land as is no more commercial growth	8/8/2024 6:24 PM
121	You are pushing out small family farms by expanding the urban growth boundary.	8/8/2024 1:58 PM
122	I think Sherwood's specific analysis at the local level should be part of the Metro Council decision making. There's a strong argument to be made about where people want to live and work that doesn't always translate to regional land availability.	8/8/2024 1:04 PM
123	no	8/8/2024 12:02 PM
124	I am very against the tall high rise forms of living. The people that buy them are childless. Single family homes need to be focused on. As large companies come this way, Sherwood, the employees come for the schools, and they have kids. Our schools are emptying because there are no children coming up the ranks. It is very sad and the schools get paid per child enrolled. We build all of this for the now, but not for the duration.	8/8/2024 11:42 AM
125	The report seems wise and carefully written to me.	8/8/2024 11:25 AM
126	If the population is slowing or declining why should the boundaries be expanded? Sherwood does not have the infrastructure for expansion. The roads are overcrowded now.	8/8/2024 11:04 AM
127	Traffic and dense housing increases school crowding	8/8/2024 10:47 AM
128	How about we grow in the surrounding communities outside of portland? Office space downtown is empty, people are fleeing the city yet we want to rip and build on fatmland	8/8/2024 9:54 AM
129	I think we need more responsible growth. We keep building more while there are buildings sitting empty for years. Sherwood theater has been empty the old Hagens building in Tualatin also has been empty for several years as well as my others. Maybe before expanding one should consider repurposing existing buildings.	8/8/2024 9:42 AM
130	I can see wanting to expand the boundary to the north or SE. Tigard, Tualatin or Wilsonville will want to grab that space. There doesn’t seem to be a push from the west or Sw for that space. Need to not spread to far too fast. IMO	8/8/2024 9:37 AM
131	Not considering what is best for us in Sherwood. We like small community living. Stay away !!!	8/8/2024 8:49 AM
132	I think there are other places, for example West Lynn or Wilsonville that already have the beginnings to your urban sprawl. There are just too many roads that are congested and it’s becoming Los Angeles quite frankly disgusting. Please leave some of the cities in Sherwood Canby etc., so that we can have rural areas and people that want the countryside feel. Leave them alone.	8/8/2024 7:14 AM
133	it seems clear that the statistics regarding growth (population and growth) indicate that expansion of UGB is not needed at this time. The Sherwood West proposal is the product of a few influential politicians and developers, and is not the desire of Sherwood general population.	8/7/2024 8:21 PM
134	Does not consider the exodus of people from Portland to Washington due to higher and higher taxes; recent layoff statistics and declining population does not justify the need for expansion of the UGB; no indication of jobs to be created by each business when AI and automation are replacing workerrs	8/7/2024 7:57 PM
135	we don't need UGB expansions, there are so many places for redevelopment, and developers are making way too much money, create a local lending program for building affordable housing, and for wealth building for communities of color	8/7/2024 4:34 PM
136	It looks like a good plan.	8/3/2024 8:26 PM
137	Historical aspects, the heritage of native people, the preservation of land that may contain artifacts, minerals or be of historical importance. Or, significant & with a legacy of those who came before us. The rights of farmers, especially, families who have been tending to land (much of it which could be considered some of the best in the nation for agriculture) & animals for generations. Also, the Native Americans heritage & culture as many areas in Oregon have artifacts (that can easily be missed, discarded or ignored), historical & cultural symbolism & importance.	8/3/2024 12:50 PM

138	OR 99W and Sunset Blvd intersection needs a traffic study before the UGB is expanded, not after.	8/2/2024 11:42 PM
139	There are lengthy discussions about housing and industrial building, but no mention of commercial amenities close to housing. It would be nice to have restaurants that are not in strip malls and are more integrated into each neighborhood (like old Portland, with small stores, eateries, service stations among the neighborhoods). Feels less like SPRAWL.	8/2/2024 3:13 PM
140	The land that is left for residential development isn't always workable for builders. Sometimes the land, although surrounded by neighborhoods, cant gain utilities. Or the transportation plan doesn't match the development needs of the city. I'd like to see more opportunities in Tigard, Beaverton, Bethany, and Hillsboro.	8/1/2024 12:31 PM
141	No	7/31/2024 8:37 AM
142	Decide on buildable land areas based on _middle housing_ options, not single-family zoning!	7/30/2024 7:44 PM
143	Unfunded past needs.	7/30/2024 8:55 AM
144	the public is appalled at the appearance of high density neighborhoods. people are leaving Portland becasue if the fixation on density and the lack of senior living options. The public seeks more diversity in housing choices and more complete neighborhoods.	7/30/2024 7:14 AM
145	The urban growth boundary is one of Oregon's most valuable assets. Preserving this boundary in spirit and in substance is critical to this state being the place people choose to live.	7/29/2024 11:48 AM
146	not at this time.	7/29/2024 9:35 AM
147	The consideration of houses not being available or owned by residents. It doesn't do any good for the community if corporations or individuals are purchasing homes to use as rentals or other money making ventures.	7/29/2024 7:48 AM
148	no need to expand ugb, make esisting city more dense	7/28/2024 12:50 PM
149	Climate change, both how to mitigate it in the urban area as we grow, and how to reduce everyone's carbon footprint through planning.	7/28/2024 8:34 AM
150	Yes. There's a housing crisis. Homes are unaffordable. Supply is not matching demand. We should strive to have the same housing affordability as Michigan, not just accept that the west coast is expensive. We made it this way. We need to adopt the if we built it someone will live in it and build until the affordability crisis is abated. This report does not address the immediate needs nor total volume of new housing supply with the urgency the problem deserves from an organization that has the power to make a difference.	7/25/2024 7:17 PM
151	It looks pretty good	7/24/2024 5:33 PM
152	Yes. I have several concerns and oppose approval of the proposal: 1. The City of Sherwood failed to plan for traffic infrastructure related to the proposed growth, making the plan unfeasible. 2. The proposed industrial zone has large swaths of area that are designated at Title 13 upland habitat. The plan does not address this major barrier and operates on an assumption that the designation can be removed or does not apply. 3. The proposed industrial zone has a 500KV transmission line running diagonally through a central segment contemplated for large-scale development. Use within the easement is extremely limited (parking lots, containment ponds and the like), making the area not suitable for industrial development. 4. The area is not suitable for chip and other similar types of manufacturing due to EMI (electromagnetic interference) from the transmission line. 5. The proposed industrial site is in the gateway to wine country from Hillsboro and Beaverton, threatening the agricultural use that is a major benefit to Oregon's economy. 6. The proposed industrial zone is in close proximity to the Tualatin National Wildlife refuge, raising additional concerns about environmental pollutants in this ecologically sensitive region.	7/24/2024 3:55 PM
153	I agree with Dr. Gerard Mildner, Professor Emeritus of the PSU School of Business who makes these important points: 1) Metro should reject the staff's Draft 2024 Urban Growth Report. High housing costs are real. Working at home (now 24% of workers) requires larger housing units, not smaller ones. The existing UGB includes a lot of hard-to-develop parcels, as well as private zoning that prevents middle housing. 2) In the draft, staff argues that "fertility rates in Oregon are below replacement, so high population growth only comes from attracting younger workers. Younger workers choose multi-family locations. And more multi-family apartments	7/24/2024 11:56 AM

	means less acreage needed within the UGB. Hence, no need to expand the urban growth boundary..." There are two problems. First, multi-family housing is more expensive on a per square foot basis: Two-story apartments are the lowest cost form of apartments. Five-story construction like we see in Beaverton and East Portland require rents about 50% higher to justify construction and dominate when land costs are higher. True high-story using steel and concrete (or massed timber) requires a further 50% premium in rents, and dominate in downtown Portland. Hence, Metro is exposing us to further increases in housing costs. However, housing prices are never discussed in the Draft Urban Growth Report. Staff applies their engineering metrics of people per hectare, and ignores economics. Second, people age and have families. While it's possible to recruit college graduates to move to the region, the individuals seek larger housing units as they age. The 22-year old who arrived in 2024 will be a 42-year old at the end of the planning period. And as we discovered during the pandemic, single-family homes offer great opportunities for home offices, bedrooms for relatives, and backyards for children. We need to factor in that people grow up.	
154	I can see making a special exception for UGB in the case of Intel or another massive commercial project that's going to inject billions of dollars into our local economy. But that's the only exception. Suburban sprawl is a proven GDP killer. I have found the website Strong Towns to be immensely helpful in explaining to people why suburban sprawl is actually bad for economic development in the long run	7/24/2024 7:32 AM
155	It seems Sherwood will need more housing and mixed use high-end shopping areas for its residence. Already housing prices are high because there is a shortage in the area.	7/23/2024 9:20 PM
156	Denser Development	7/23/2024 8:54 PM
157	This report shows we have a shortage in housing and employment land and we need to continue to grow in a way that enables quality of neighborhoods, affordability and attract businesses. We need to continue to grow to be healthy.	7/23/2024 8:30 PM
158	The low value of subjective assessments of the types of growth that will occur in the future. Footnote 3 on Page 38 relies on jurisdictions own estimates of what kind of demand for housing there will be in the future, despite the noted clear market incentives to the contrary. Middle housing has only really been available for a few years, and that period has been heavily punctuated by the pandemic. The real impact of those changes will take decades to see, and subjective information about past growth patterns have little value in the face of the newly unleashed market demand that will, under all other scenarios, drive new growth. This is especially important to consider when every other scenario for growth supports Metro's policy goals. Finally, I find it very strange that only a single small city in the region has interest in expansion. Either that city is misinformed about actual demand (a "hospitality zone" in Sherwood, really?) or every other jurisdiction in the region has completely missed the boat. I think I know which is more likely. I suggest that the Metro Council take into consideration the dearth of expansion options being presented as further evidence that the demand for growth actually isn't there.	7/23/2024 6:39 PM
159	The estimates assume many things, but do not factor in new work from home models, AI impacts on work models, or any other forward looking assumptions.	7/23/2024 6:19 PM
160	By enlarging growth boundary you are taking away areas which are now rural and small woodlot areas enjoyed by middle class and lower class families and replacing them with small apt, house lots. The gap between the wealthy obama like estates and what you want to do will increase. And which group do you belong to?	7/23/2024 3:19 PM
161	I agree that the boundary should not be expanded and we should work to improve the existing land	7/23/2024 3:14 PM
162	Taking into consideration the land and low traffic needed in agriculture areas where you have animals, large machinery, etc which is impacted by bringing in commuter roads.	7/23/2024 2:12 PM
163	Severe traffic problems with overburdened road systems in Sherwood Oregon and SOLUTIONS before even considering growth outside the current urban growth boundary. No need for industrial growth outside of current growth boundary - extensive options along Tualatin Sherwood Road. Adequate development land within the current Sherwood boundary.	7/23/2024 12:06 PM
164	The need for farmland is critical. Other than a gratuitous statement of its value, the Report does not address the consequences of replacing fertile, productive land with houses and industry. Build those structures on poor soil, where farming is not tenable. This should be addresses in the Report.	7/23/2024 11:17 AM

165	A UGB expansion in a part of the metro area poorly served by transit and likely to be entirely car dependent does not align with any of our regions goals. As such, it’s unclear why it’s being considered	7/23/2024 2:36 AM
166	I think the zoning is way too aggressive, I think we need to honor what Tom McCall wanted for Oregon. I don’t believe creating more homes is going to create housing that is more affordable. Supplies are too expensive and resources are limited. I think if we randomly infill without thinking ahead, then we’re just going to be damaging Oregon as a state. I think we need to address infrastructure rather than just letting infrastructure motivate us to improve it based on building more homes. No toll without a vote. Let’s stop copying municipal code in California and let’s get with with the program on why people are moving out of California. Environmental first!!	7/22/2024 3:06 PM
167	Building designs with the change in climate in mind.	7/21/2024 10:35 AM
168	The area is losing residents. There's no reason to extend the growth boundary.	7/21/2024 9:00 AM
169	Looks good to me, just want more density	7/20/2024 9:12 PM
170	Do not expand the urban growth boundaries anymore. We have enough land within their current extent to build densely. This will preserve open spaces and discourage car usage which is bad for the environment; it will also encourage transit usage which is the way of the future.	7/20/2024 7:38 PM
171	No	7/20/2024 7:41 AM
172	Inclusive community engagement; conducting an equity assessment on the concept plan	7/19/2024 4:15 PM
173	Not enough work was done to analyze changes in policy that encourage veritcal growth and density in the existing lands. The report focused on unused/available lands, which is not the only way to change policy and discourage sprawl through UGB expansion.	7/19/2024 2:06 PM
174	First, if manufacturing jobs represent only 10% of total non-farm jobs in the region, why so much emphasis on it instead of prioritizing other sectors? Second, is there any study of the effects UGB growth causes on air and water quality? Pollution is a crucial factor to consider.	7/18/2024 12:03 PM
175	Residential RV parks and mobile home parks can be a very useful tool for lower income housing, but they are prevented in many communities and not mentioned in the reports	7/18/2024 6:16 AM
176	There is too little consideration for watershed restoration in suburban areas. At this stage in development it would still be easy for us to reclaim riparian areas and sections of streams with free flowing water and designate them for public use. If we wait twenty years more of that land may be covered with pavement or sterilized of natural habitat.	7/17/2024 11:12 PM
177	TRAFFIC 🛑	7/17/2024 6:04 PM
178	The report claims that more land is needed for "welcoming families". Aside from the city of Sherwood targeting employers not residential development, the claim that there isn't enough land for either is absolutely false. Look at the development adjacent to the Tualatin-Sherwood highway. It's all auto-centric, low-rise sprawl surrounding a wide highway that only induces more driving. Even the high school is auto-dependent. If Sherwood (and the rest of Oregon and the US) developed in a similar pattern as before the car dependent suburban experiment, there would be plenty of land available for new businesses and families. Instead of looking to reverse the mistakes of the past 5 decades, Sherwood is just trying to continue the auto-dependent development. The city is claiming that they need space for all type of housing and that land scarcity is driving up costs. That's baloney. The suburban development is what's made land scarce because of inefficient use. And an efficient use of land will make land available for housing. Just not the typical suburban single family detached housing. And while the state mandates sidewalks and bike lanes, it doesn't mean that they'll be used when the destinations are far apart and the environment is hostile to the development. Finally how does all this need take into consideration the development going on in King City, Hillsboro, etc.? If you're only looking at Sherwood in a vacuum, then you are missing the cumulative impacts of development as well as trying to steal jobs from surrounding communities.	7/17/2024 2:18 PM
179	The will of the people who live here.	7/17/2024 2:00 PM
180	This expansion creates too much low density housing. If the proposal is serious about creating more housing and jobs it should only include space for multifamily housing that can be mixed with commercial spaces. We need more NW 23rds not more Lake Oswegos.	7/17/2024 9:20 AM

181	No. Please approve it	7/16/2024 11:18 PM
182	For Sherwood to maintain its quant quiet small country town feel it cannot continue to sprawl out into the countryside that makes Sherwood what it is. There is enough space currently in the city that should be reimagined and redesigned to support more homes and people	7/16/2024 8:46 PM
183	The report did not consider the potential impacts of climate change, in terms of population increases in the Northwest due to cooler weather and water availability relative to other parts of the country, and also impacts of climate change on the wildland urban interface and how this could impact fire risk for the edges of the Portland area.	7/16/2024 8:26 PM
184	Plan more roads. Stop allowing destruction of natural area and trees and require trees be preserved as well as more planted instead of grass.	7/16/2024 6:26 PM
185	I think a more in-depth analysis of how mixed use and/or dense an area needs to be in order to, at the very least, financially break even (taxes collected minus cost of local services provided), would be highly beneficial, especially if it can be put in a visual format which is much easier to understand. Urban3 (which worked with the City of Eugene) does this kind of work, and I feel Metro may gather very valuable information from this type of analysis, even for specific areas within the UGB. Financial viability should be at the core with Metro's development decisions so ensuring this single element is achieved and can be demonstrated to the public with figures and images seems an essential element to consider.	7/16/2024 5:52 PM
186	I think the decision makers have already made up their minds on what they plan to do and it many times is not in the best interests of the communities	7/16/2024 12:20 PM
187	No.	7/16/2024 10:24 AM
188	The employment and population forecasts are unduly pessimistic. This area has done better than national trends consistently over the last few decades, and the forecasts appear to anticipate decades of decline.	7/16/2024 9:04 AM
189	Funding for schools! You cannot expand boundaries and overfill our schools without discussing how these (and other entities) will see a compensatory increase in funding.	7/16/2024 8:09 AM
190	There needs to be more land opened for more housing. We need to restrict Airbnbs as almost a quarter of homes are being bought by investors and rented out increasing the cost to rent and to buy. If we limit airbnb or charge a fee for doing Airbnb we can create revenue to allow for more subsidies on housing. But the biggest need is a larger amount of buildable land so people can actually afford homes and lower price.	7/16/2024 8:00 AM
191	Metro needs to read between the lines of the Expert's analysis. Even the small baseline growth assumption seems optimistic. Developing suburban land will not create "affordable housing" in locations where it is needed.	7/15/2024 8:39 PM
192	Why do we need to create conditions to attract people to settle here? It's okay to not do that. They will go elsewhere and that is okay. We have always been fine. We already have too much congestion and need breathing room.	7/15/2024 7:50 PM
193	I think crowd control. If you are going to purchase a house, chances are you want a yard, places to safely park (or where guests can safely park), and really resources and road/traffic control. The bigger Portland gets, the more cars on the road…maybe it's time to consider different highways that avoid clustering the hwys that already exist. Wildlife also needs much more considerations. We have a lot of animals that migrate through the season and even during the day, they need safe areas to complete this. Tigard has amazing walkways through the city which follow a stream and tons of wildlife use it for traveling away from cars as well as a food, shade/shelter, and water source. It's surrounded mostly by roads with low speed limits which is helpful too.	7/15/2024 7:17 PM
194	Quit taking out property	7/15/2024 6:47 PM
195	More focus on providing good housing for all demographics and not creating slums. More focus on transportation as well as drivability. More focus on public safety, education, sustainability,	7/15/2024 5:54 PM
196	Maintaining an affordable supply of single family and mid density housing	7/15/2024 5:28 PM
197	Too many people in the boundary lines causes insane traffic for people living near the highways. I can't even get out of my neighborhood to turn on to a road because there is so much traffic	7/15/2024 5:12 PM

198	The proposed size of the UGB in Sherwood seems extraordinarily oversized, with lands that are currently used for employment in forests, farmlands and wineries being usurped by potential new employment that is uncertain. Damage to watershed and forest lands are not be duly scrutinized.	7/15/2024 3:31 PM
199	Thank you for the survey. Please remember to hear both sides of the coin in all of these affairs.	7/15/2024 3:25 PM
200	When economic development staff in the region are working to attract employers, they need quick decisions. We never have enough options. I think the semiconductor task force and the state's decision to allow an expansion if the opportunities present a quick decision. More 'optional' land could be a good policy when all the right conditions are met.	7/15/2024 2:14 PM
201	I think you are gonna see tons of commercial land come up for sale and flud the market with people working from home. Maybe a plan to convert through building or land inside the urban growth boundary to housing. That will help. And cut all the red tape to build on the land we have now. No one can developed land if it cost 125k just to see if anything can be built.	7/15/2024 1:45 PM
202	Farm land and wild spaces, especially in sherwood. It would be preferable to establish larger housing withing existing city limits vs expanding into the broader area	7/15/2024 1:41 PM
203	Build the infrastructure/roads/ammenities before allowing more residential	7/15/2024 1:35 PM
204	It's good. Let's fund it.	7/15/2024 1:17 PM
205	See above. Expanding the UGB for the sake of more single-family residential development is merely blessing sprawl. Thank you.	7/15/2024 1:12 PM
206	Underproduction on recently added lands to the UGB suggests that proponents for expansion are not honest in their assertions. Also, recent proposals for expansion of nearby UGBs, as in North Plains, utilize regional rather than local growth to make their need case. This suggests, at a minimum, that nearby cities should be added to the Metro UGB should they seek to expand their UGBs.	7/15/2024 12:58 PM
207	The cost of living is only mentioned twice in the draft report. Perhaps addressing this would help with uncertain emigration numbers.	7/15/2024 12:40 PM
208	No	7/15/2024 10:53 AM
209	Fewer parking lots, less sprawl, more dense housing, narrow freeways and add tolls, more bike paths	7/15/2024 10:35 AM
210	While you give lip service to climate change, not enough is being done.	7/15/2024 9:56 AM
211	See above. Do not open the UGB to large plots of ‘farms’ that get reduced taxes for having a llama ir Christmas trees. We all know that is a sham to allow rich people estates.	7/15/2024 7:25 AM
212	No	7/15/2024 6:07 AM
213	I am older woman, age 74 and do not think you are taking into account people like me who living long. Keep public transportation strong so I can go Places. I work part-time and still drive a car but not for long so please don't disregard the needs of older people like me.	7/14/2024 5:37 PM
214	The mobility corridor connecting Portland, Tualatin, Sherwood, Newberg, Dundee, McMinnville, Sheridan, and Lincoln City needs a major upgrade, especially with the growth planned for Sherwood West, and continued growth in Yamhill County.	7/14/2024 3:55 PM
215	Community wants. Oregon talks a big game but consistently underestimates what is needed. See the lack of lanes on 217 while light rail was promoted, people do not want mass transit but tax dollars are wasted instead of put where the community wants. Soulless development of cookie cutter houses replace rural and natural areas. Oregon is supposed to be about conservation, not how many tax revenue lots can be jammed into the urban growth boundary.	7/14/2024 3:35 PM
216	Please stay away from Sherwood'as green space, wetlands and agricultural land.	7/14/2024 3:25 PM
217	The Sherwood West proposal as it pertains to Lebeau and the nearby Edy road area. There is no need for additional industrial growth in these areas. We live in the area and are members of local wineries there, all of our neighbors are against the unnecessary growth in this area. I am concerned for the environmental impact that growth in this area would cause and for the loss of the natural beauty that drew us to Sherwood. Tualatin-Sherwood road holds plenty of space for	7/14/2024 2:16 PM

	industrial growth and it is not needed on the Lebeau/Edy side of Sherwood. Please consider the residents and the environmental beauty of these areas before approving this project as it will bring a negative impact on the community.	
218	Most important the limited water supply of Chehlam Mt. has been taken into consideration at all, particulary based on the models of the past yrs of shifted temperatures and climate. People move in , parks r created and water wasted to.kerp them all green. Chehlsm Mt. does not have an aqua fir and must rely on rain which has been heavily impacted. 2. The infrastructure and traffic patterns were not considered at all for the area. Development is allowed to come first and no infrastructure, then yrs if worthless construction and traffic jams. 3. Sherwood City council only wants the profits.	7/14/2024 1:53 PM
219	No	7/14/2024 12:44 PM
220	No	7/14/2024 11:19 AM
221	There are so many new buildings and warehouses and apartments and such in Sherwood we don't need to take up any more farmland. And we really don't need that much more congestion on that side of Sherwood.	7/14/2024 11:16 AM
222	Traffic, funding for all the growth expansion. Sherwood residents already paid for a gigantic high school that is only a 1/3 of total capacity. Sherwood residents do not want to fund more unwanted and UNNEEDED expansion into our green space and precious ag land.	7/14/2024 10:28 AM
223	Not enough infrastructure or community input	7/14/2024 10:25 AM
224	Citizen comment	7/14/2024 10:13 AM
225	The North District is currently farm land and at the base of a hill that is all agriculture. We do not ag land this developed into manufacturing and commercial space, adding more traffic to an already bottlenecked Roy Rogers road. Sherwood already expanded to develop more commercial space. This land has not been fully developed, yet the city is already asking for more. tualatin, King City, and Beaverton, All bordering cities of Sherwood, I've had massive growth or art currently in the growth process. The city of Sherwood demonstrates a lack of need. Metro must consider want verse need in this scenario. This ask would expand the city of Sherwood by 41%, an obscene amount of unnecessary growth into utilized farm and agriculture land. The land that the city is requesting, backs up to a national nature preserve, a precious creek and wetlands, and farm land that is all currently farmed. This land ask is unneeded and unwelcome but the majority of Sherwood residents. This has been demonstrated by a survey of Sherwood residents. Over 80% of residents rejected the city's proposal plan.	7/14/2024 10:03 AM
226	I think the decision-makers need to put more emphasis on how we are traveling around the city and look to boost trimet influence on the city. More bus lanes and build the southwest line.	7/14/2024 9:25 AM
227	Need to better factor in seniors	7/14/2024 12:07 AM
228	The house size was not considered. It would be wise to focus on density increase and apartments building woth mentioned family size decrease.	7/12/2024 11:40 PM
229	I appreciate the focus towards climate change and there was more focus on car free infrastructure than I was expecting. But one thing I think needs improvement is a stronger focus of prioritizing more dense housing and their proximity to green spaces. It seemed like when looking through the proposals, the low density SFH areas were closer to the nicer park areas. I also think this area needs to prioritize state of the art bike and walking infrastructure. The trails mentioned sounded good, and it would be great if they were totally separated from car right-of-ways. I would prefer all of this to not happen at all, but if it did, I want to see it done right with good urbanism design features and reducing reliance on cars.	7/12/2024 8:13 PM
230	no	7/12/2024 7:47 PM
231	Vertical development is a direction - we can build up, build density, and single family car oriented development is not necessary at this point. There is a lot of density to build and zoning + investments can make it happen.	7/12/2024 6:10 PM
232	more thought needs to go into transit access	7/12/2024 5:31 PM
233	We need housing and commercial offerings where schools and business In order to contain traffic - housing and commercial offerings must surround schools and places of events.	7/12/2024 1:10 PM

	Washington County is not well organized, there is a lot of driving to get from one place to another.	
234	Equity and access to opportunity and how severe restrictions on the urban growth impact communities of color and other disadvantaged populations.	7/12/2024 12:23 PM
235	Suburbs destroy ecosystems, increase emissions, decrease equitable access to nature and heavily reduce human interaction. They are not the right answer to expansion.	7/12/2024 7:47 AM
236	I didn’t see much of anything on the bicycle network and how it will fit in with the surrounding environment. After all at the center of the expansion is a high school and students should have access to safe and efficient routes to their schools.	7/12/2024 12:22 AM
237	Climate change, ecosystem loss, equitable access to nature. Greater density is the solution, not the occupation of land that should be wild.	7/11/2024 10:31 PM
238	Please consider housing outside of single family homes. As long as we can transit to home, to work, and to green spaces, we don’t need the suburban dream which is much harder to maintain and really limits growth	7/11/2024 6:57 PM
239	Yes. We do not need to expand the UGB, in Sherwood or anywhere, to accommodate the region's growth. UGB expansion areas always just produce more high-end housing, not the more-affordable options that we need the most. Further, building new housing at the edge forces people into their cars, increasing their household expenses -- also not great for lower-income folks. We ESPECIALLY need to stop expanding the UGB far from transit. The region really f'd up in allowing Happy Valley to happen, but not planning to extend MAX to serve it. We're not planning to expand MAX to Sherwood. Therefore, we should not expand the UGB there. Simple as that. Vote no, go home, and spend some of your vacation time.	7/11/2024 6:12 PM
240	Low density development, transportation, car dependence, cost of living including transportation	7/10/2024 10:14 PM
241	Need to consider how Sherwood can be more judicious about densifying it's existing land	7/10/2024 9:51 PM
242	Metro's regulatory process bogs down housing development - development being so needed to put young people/families into their first house and put them on a road to individual prosperity.	7/10/2024 8:30 PM
243	Low density housing should not be added. Low income housing should be 50% of all new housing in expanded area.	7/10/2024 5:14 PM
244	Transportation has to be a major factor in this decision. We must greatly decrease vehicle miles traveled while increasing access to housing.	7/10/2024 12:08 PM
245	You will kill the vineyards and wineries business around here if you keep building lower income housing. And that is an important part of Sherwood/Newberg/Dundee tourism.	7/9/2024 9:48 PM
246	I did not see enough emphasis on local (city) decision making and responsibility. Plus, I did not see enough working together between regional and local government and insufficient level of public information and reaching out to get every one involved.	7/9/2024 3:43 PM
247	?	7/9/2024 3:15 PM

Q5 Please provide your comments on the Sherwood West proposal in the box below.Proposal Summary:Name of urban reserve: Sherwood West Gross acres: 1,291 acresHomes planned: 3,120 – 5,580 unitsJobs planned: 4,500 jobsThe City of Sherwood has proposed expanding into the Sherwood West urban reserve to support development of homes and jobs. The planning for this area began in 2015 and has resulted in a concept plan that reflects the community's priorities for employment and economic growth. The plan also reflects new housing regulations meant to encourage the development of many different types of housing.To learn more about the project proposal, visit the webpage.

#	RESPONSES	DATE
1	This city has NOT done an adequate job of utilizing existing development nor accurately forecasted the growth. Our incredibly expensive high school is underutilized and we're paying for it as tax payers. This is not the right direction to go for Sherwood.	8/23/2024 10:11 AM
2	This is a land grab. There is no reason to disassemble rural properties & farmland, destroy peoples businesses, introduce commercial/industrial complexes (when there are empty & unleased inventory) create high density housing when research shows a decrease in population, deterioration of the level of education in the school system, and housing prices skyrocketing. I am all for growth in a measured & logical manner when the need arises. There is no evidence that supports an inclusion of this magnatude	8/22/2024 10:03 PM
3	I am totally against the growth proposal	8/22/2024 9:46 PM
4	this may not be the right place to put this, but I found the webpage difficult to navigate—it was hard to find the information I cared about and if I hadn't been wanting to fill out this feedback form, I probably would have clicked off before getting the answers I wanted. something about the navigation could be clearer (I wasn't even really sure if the right webpage was linked at first)	8/22/2024 9:42 PM
5	Sherwood currently has some of the most expensive utilities. There is no financially viable way to expand housing and businesses and keep the livability of Sherwood affordable. Sherwood is in the middle of wine country, a huge economic resource for the State of Oregon and the Metro area. Expanding the Urban Growth Boundary will cut into this critical agricultural land needed to help further Oregon's wine industry. On top of this Oregon is known world wide for its amazing views and natural beauty. Swaths of industrial parks and cookie cutter housing is no way to help Oregon or Oregonians in developing affordable and liveable housing. The current plan suggested is not a wise option for the viability of Oregon's future and I stand against it.	8/22/2024 7:10 PM
6	Sherwood is not ready for more growth. Part of Sherwood charm is open spaces, wineries, and fram land. It's rural and near major cities. Road s are not sufficient for the traffic as it is. Losing forested land would be a huge downfall and make Sherwood less desirable	8/22/2024 6:55 PM
7	To whom it may concern, As a resident and taxpayer of Sherwood, I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community. Keep our small town feel! Ask people why they live here...it is because of the small town feel....do not become a Beaverton! Sincerely, Patricia Hales	8/22/2024 6:34 PM

8	I disagree with the expansion of the urban growth boundary.	8/22/2024 6:31 PM
9	I support the Sherwood West Proposal	8/22/2024 4:40 PM
10	Being a property owner in the proposed expansion area who farms the land this expansion pushes us closer to losing our lively hood. Developers are continually contacting us and wanting to purchase our property. We are not interested. This is a very large expansion request. Is all or any of this land really needed now?	8/22/2024 11:53 AM
11	The Sherwood West Fact Sheet notes that, in an expansion proposal, cities are asked to show that “development of the proposed expansion area is feasible and supported by a viable plan to pay for needed pipes, parks, roads and sidewalks.” I commend Metro for asking cities to demonstrate this. Based on the Sherwood West expansion proposal, I do not think that the City of Sherwood adequately demonstrates that infrastructure development is feasible. Appendix B of the Sherwood West UGB Expansion Proposal Part 1 discusses infrastructure funding for the proposed development area. On Page 316, Leland Consulting notes: “Across both scenarios, revenues generated under a full buildout of Sherwood West are sufficient to cover estimated infrastructure costs for sanitary sewer and parks, but not for water, transportation, or storm infrastructure.” Additionally, they note, “ It is not unexpected to find a deficit for transportation infrastructure…when considering that many local governments are challenged with funding road development and maintenance.” The proposed funding strategies on subsequent pages are not guaranteed, and they largely address upfront development costs rather than maintenance costs. A city should not be allowed to expand the UGB without the ability to pay for ongoing maintenance. With our current inability to fund maintenance, people in the Metro area are already experiencing the negative effects–why exacerbate this by further sprawling outwards? The development in the proposed expansion area will not provide the tax base required to support their infrastructure in the long-term, and it is unfair for other areas of Metro to subsidize the City of Sherwood’s expanded area.	8/22/2024 11:40 AM
12	I believe very little thought has been put into the traffic these 5,580 homes will create. Average 2 cars per home so an additional 11,000 cars will be on raods that are already conjested. Also you are going to burden the current property owners with additional taxes for improving infrastructure, roads, schools, and fire stations that these 5,580 homes will require. You are taxing the current property owners right out of their own homes just to make room for people that don't even live here yet.	8/22/2024 10:22 AM
13	Doesn’t seem like the plan accounts properly for the cost of maintain this sprawl infrastructure, and they certainly have not maximized the housing and jobs potential within their current perimeter.	8/22/2024 10:10 AM
14	The Sherwood West area consists of farms, forests, and other properties in the hills of this countryside. Most of it is not suitable for the increased traffic that this development would bring. If you are inclined to approve an expansion, I strongly urge you to reduce the amount of acreage dramatically. There are few east/west roads that connect Sherwood West to Hwy 99W (which is our lifeline to everything), and the City has no plan or intention to increase those. They have only proposed new north/south roads which won't connect to Hwy 99W. I fear we will all be stuck in a logjam up the hill unable to access Hwy 99W if several thousand new residents are put here. This is an area of sloped, narrow, two-lane roads. The intersection of Edy Road and Hwy 99 can't be expanded due to Walgreens being on one side and the Providence building being on the other. It's going to create unsafe conditions and car accidents for the existing residents along the side streets who need to pull out onto Edy Road if there are thousands of additional vehicles to compete with. If you need one example of traffic dysfunction that has been created by adding thousands more homes all in roughly the same geographic area, like the South Cooper Mountain, Tigard/West Tigard, and King City expansions, look no further than SW Fischer Rd and Hwy. 99W. Traffic traveling north on Hwy 99W often comes to a stop well before this intersection, because there are so many cars making a left turn onto Fischer Rd that they have spilled over the quite long left turn lane and are now stopped waiting to turn left while in the left TRAVEL lane of Hwy 99W. This is right in front of a TVF&R station, and the results of this grid lock traffic are going to prove tragic when an emergency arises, and fire trucks can't get to where they need to go.	8/22/2024 3:04 AM
15	The City of Sherwood, according to available information, has an employment-population ratio of about 50%. This is extremely low, even compared to nearby cities. This is because Sherwood is a suburb, with a high median income, far from job centers, and dependent on freeways for access. This sort of pattern of predominant single family homes, with few jobs, connected by freeways, is catastrophically bad for regional health. The reason Sherwood wants to expand its UGB is exactly because it requires continual sprawl to fund the borrowing	8/21/2024 11:14 PM

	it made in the first place. While I appreciate Sherwood is seeking to add additional jobs and create mixed-use neighborhoods, the fact remains they must first do this within the existing city boundaries. The city has proven incapable of mixed-use neighborhoods close to jobs and schools. Giving them more land and hoping they 'get it right' does not make sense- and it shows in the proposed zoning, which is still predominantly low-density residential. In fact, the breakdown of zoning reflects existing Sherwood zoning quite directly. I don't know why we would expect a better use of new land. To accomplish regional goals, and even to create a healthy Sherwood, we must develop existing land within the UGB so we can create financially and environmentally sustainable population growth.	
16	Please make sure this doesn't turn into typical urban sprawl that's bad for the environment and pushes out low income bipoc communities.	8/21/2024 11:11 PM
17	I am against the industrial expansion. The City has been Disingenuous about the planned use of the mixed employment area during all it's public outreach. Industrial use was only mentioned during after the outreach was finished. Do not think for a minute there is support within the city for another industrial area. Just look at their actual Sherwood West Concept Plan. They did not discuss industrial use. The plans for Elwert Road are inadequate to support the regional traffic connector role for which it serves. The City made vague statements about a north south connector. Their own traffic studies showed such a connector would not be used. Plus due to the steep slopes in the area it would be too expensive to build. The City also did not represent they would be asking for the whole area to be brought in. If Metro approves the ask, given the City's lack of transparency it is quite likely there will be a major outcry by the voters and the City Council will once again be forced to withdraw the ask. Just like happened in 2017.	8/21/2024 11:04 PM
18	this land will be on the urban fringe and will increase regional VMT substantially while creating more infrastructural liabilities. This kind of development is making us poorer and needs to be stopped. We need to stop this sort of thing by a building boom in more central areas.	8/21/2024 8:18 PM
19	Land use to facilitate industry is poor use of the proposed expansion. The land is too close to existing residential land, farm land, and protected habitat. Additionally, there is minimal exploration of a feasible way to support the growing and expanding transportation needs of the aforementioned proposed industral space.	8/21/2024 6:15 PM
20	The Proposal is not reflective of actual population growth and community needs. Expansion size is ridiculous. Fails to consider long term costs to current residents in terms of taxes to support the infrastructure that would be needed to support this plan. Tax burden analysis seems to be missing altogether.	8/21/2024 5:56 PM
21	Work on densifying existing neighborhoods instead of focusing on sprawl. Expanding the boundaries of the city will force the city to stretch it tax revenue even further than it needs to now.	8/21/2024 4:57 PM
22	For the Sherwood West expansion plan that was submitted in 2016 doesn't reflect the more recent population decline. The concept plan should be scaled back to reflect more current data and the UGB expansion should be 50% the original submission. Additionally, their concept plan doesn't adequately address the funding of infrastructure. Such a large expansion is not warranted at this time. There will be opportunities for additional land to be added if necessary.	8/21/2024 4:22 PM
23	Specifically in the Sherwood West expansion, the concept plan did not represent the will of the majority of Sherwood residents. 80% of residents did not want to see the level of expansion and were gravely concerned about how it would affect the livability and sense of community that already exists. There is no reason to add the entire amount into the UGB at this time, smaller more thoughtful expansion was never considered and the cost to add services support this vision and will be a huge burden to citizens, despite the city claiming it will not. Also the inclusion of light industrial so near many farms and vineyards is just irresponsible. Many of the discussions the city mentioned was to tout Sherwood as a gateway to wine country, yet we would do major harm to the two wineries closest to us. Also the concept plan around Elwert being similar to Sunset doesn't make any sense given the already burdened use of Elwert which will grow dramatically if the planned growth of homes and light industrial actually went in. Overall citizens have been providing specific, data-driven feedback during this process raising concerns, which the City noted but never really addressed. Yes they asked for citizen feedback, but most was ignored as citizens just saying "no growth" when in actuality we were trying to raise visibility to some of the serious oversites in this plan.	8/21/2024 3:07 PM
24	Build denser, not outwards. Suburbia can't pay for itself in maintenance once it ages a couple of decades, which is why it always needs to expand outwards for new tax bases. This is just	8/21/2024 2:39 PM

	kicking the can down the road. You can achieve all your stated goals by simply building denser in the existing boundary. Don't expand the UGB.	
25	1: Proposed Gross acres is a very large percentage relative to current existing gross acres of Sherwood. 2: Projected population growth rates, as stated in Metro's report, is much smaller than what Sherwood proposes. 3: Sherwood historically has not been a large business / employment location. The proposed jobs would change the community character, not for the better, that Sherwood currently enjoys. 4: Most new jobs would be filled by people who don't live in Sherwood, for a variety of reasons. Traffic congestion will increase. 5: Most new families that would live in the homes planned would work elsewhere. Traffic congestion will increase.	8/21/2024 11:12 AM
26	We will move out of Sherwood if it goes through.	8/21/2024 8:39 AM
27	I would prefer to keep Sherwood smaller than the full Sherwood West project proposes. I don’t mind some of the expansion but I don’t think all of the proposed zones are necessary. Let’s keep Sherwood special by not making it so easy to live here that all Our property values decrease.	8/20/2024 11:41 PM
28	Sherwood does not have the infrastructure to support the amount of development proposed in this expansion and frankly there is no need for this amount of land to be added into the UGB at this time.	8/20/2024 6:27 PM
29	I think the city of SHERWOOD is asking for way too much.. I am concerned about the logistics of where they want to put light industrial. I don’t think it’s necessary. The whole reason I moved to SHERWOOD is the small town feel. Their proposal makes me feel like I will be pinned by businesses and not the kind I want to be around. Growth is good, but it needs to be smart. I think SHERWOOD is trying to ask for the world when it should be asking for a small portion.	8/20/2024 5:07 PM
30	As a resident of Sherwood, I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.	8/20/2024 4:55 PM
31	Allow all of the proposed increase. Growth will only happen at rate of needed services like water, sewer, and other facilities.	8/20/2024 4:52 PM
32	See above.	8/20/2024 4:22 PM
33	Expanding makes no sense without a viable Western Bypass Freeway to alleviate the already intolerable traffic load on rural roads. Without it, more density would be intolerable and irresponsible.	8/20/2024 4:10 PM
34	I vehemently oppose the expansion into Sherwood West. Previously designated Title 13 properties are now being planned to be light industrial with no thought for where the wildlife they are wiping out will go to. Elwert Rd. is already heavily traveled with 1000's of cars going by each day through an area of farmland, wineries and small farms. There is are multiple fish bearing streams at the confluence of Chicken Creek that will be greatly impacted by increased construction. None of the plans that have been presented adequately address how the bridge over Chicken Creek or re-routing of Elwert to mitigate costs is going to be paid for. The addition of the massive high school to the Sherwood area was done at great increase to the taxes of those within the Sherwood City limits and those that live outside the city limits. The Sherwood School District projected student population does not match what the City of Sherwood is projecting. In fact, the school district expects the high school population to go down. We don't need more development in a rural area when we are already paying for an expensive new school and the plans for the main arterial funding are unclear and nebulous. Now is not the time to expand into Sherwood West!	8/20/2024 3:55 PM
35	The roads immediately surrounding the proposed neighborhoods are county land and considered rural roads with a speed limit of 55 mph. Putting families near these roads seems dangerous without a proposal to address this. Also, we are putting physical barriers between our main thoroughfare, the 99, and our most famous wineries, Hawksview and Alloro, both of which are well known, with Alloro recently being placed on the top 100 in the world. We need to design pathways through Sherwood into wine country, rather than being a stop along the way to Newberg and Dundee.	8/20/2024 3:51 PM

36	I think this is a great plan in general. I would caution against too much vertical mixed-use, most of the ones I see end up with most of the commercial space vacant anyway which is such a waste.	8/20/2024 3:39 PM
37	This expansion is not supported by the current and expected growth of the area by Metros own numbers. The city has not provided adequate or reliable numbers to support this request.	8/20/2024 2:56 PM
38	Without funds to resolve inadequate access to I-5 for commercial transportation and efficient movement of local travel, expansion will only worsen the gridlock and further erode productivity and quality of life.	8/20/2024 2:04 PM
39	The city is grossly overestimating the growth in the next decade. There is no data to back up the request to add so much land to the UGB. With much of the agricultural and open land to the east and south (between Sherwood and Tualatin and Wilsonville) being gobbled up for light industrial and housing, the area is losing too much of the agricultural/natural land. Furthermore, the city has very little connection to public transportation so the proposal can only lead to worse congestion. Lastly, the City has not maximized the current boundaries for affordable housing and jobs. There are plenty of opportunities (considering the much more modest growth projections) within the current boundary if the City plans properly.	8/20/2024 9:54 AM
40	This project would make more sense if it was built in conjunction with a WES regional rail spur but it lacks a Right of Way reservation to build such a line. There is currently a plan to extend WES to Salem meaning smart TOD could also make Sherwood a commuter community to Salem in addition to Portland or Beaverton. WES currently underperforms, but if development took WES into account, it could turn into a system more like RTD or SEPTA.	8/19/2024 6:13 PM
41	Creating more jobs than housing units would be a mistake. That said, I support the proposal.	8/19/2024 12:08 PM
42	This is a terrible idea. There’s already so many empty lots in the Portland region. Not to mention, so many parts in Portland where buildings could be built taller. Sherwood is already on the edge of the metropolitan area, and having this development would cause more traffic, more urban sprawl, and get us away from the core ideas of the urban growth boundary.	8/18/2024 11:24 PM
43	As a resident of Sherwood, I was wrong to be okay with this. Suburban expansion must be stopped at all costs. Let the farmers keep their land, don't let us build around and effectively force them off land their families have had for generations.	8/18/2024 10:37 PM
44	Quite literally, nobody wants this. Add density to the existing boundary.	8/18/2024 9:26 PM
45	This expansion is unnecessary. Sherwood should increase density and housing within the existing boundary	8/18/2024 8:32 PM
46	I’m sick to my stomach, the city can’t is not ready for this	8/18/2024 7:06 PM
47	As a resident of Tualatin near Norwood road and the city of Tualatins Basalt Creek planning area I have witnessed first hand how promises of greater middle housing have failed to address the housing crisis in the region. Homes with shared walls selling at 450-550k and detached homes in the new development selling for 650k up to near 900k dollars. While the central city of Tualatin remains empty and uninteresting. The area around the Tualatin Commons remains an empty gravel lot and an empty parking lot at a shopping center that has lacked a primary tenet since Haggens went bankrupt 9 years ago. By voting yes on the current plan you allow cities like Sherwood to ignore urban blight like the empty parking lots around a regal movie theater that has been closed for 2 years now. If our region is serious about climate change and the housing crisis we must push for our cities to redevelop and increase density in our cores rather than building 500k dollar shared wall units and 650-800k detached homes. By voting no Metro can leverage our cities to not build out like Los Angeles and Texan cities but up like Vancouver BC and Seattle.	8/18/2024 5:12 PM
48	Do not allow Sherwood city government to do this, force them to build more infill affordable housing and less of this car dependent, road dependent suburban single family housing.	8/18/2024 2:27 PM
49	Sherwood should not be granted this UGB expansion due to the illegality of apartments and dense multi family housing in the majority of the city. Furthermore, adding sprawl to the SW metro specifically has the worst effect on traffic in the region, due to almost no high capacity public transportation. 99 is already a dumpster fire.	8/18/2024 2:27 PM
50	The citizens of Sherwood have voted several times in the past not to expand the UGB Sherwood West. We are not anti growth but we are smart growth. We don’t want this area of	8/18/2024 2:11 PM

	Sherwood looking like the areas on Roy Roger's Rd(Tigard and Beaverton). My vote and 70% of the citizens that this would directly impact do not want this area annexed into to UGB.	
51	I already gave some of them, but why we need to expand by destroying farmland instead of using the ample space between Sherwood and Tigard/King city, Sherwood and Tualatin, or Sherwood and wilsonville, is beyond me.	8/18/2024 1:22 PM
52	The City of Sherwood has an apartment ban that encourages poor land use. They should stop building sprawl and instead should focus on denser development.	8/18/2024 1:13 PM
53	Looking forward to more commercial zoning for jobs and businesses	8/18/2024 1:06 PM
54	Metro should reject this plan. Cities in Washington County have the capacity to accommodate housing growth, but they maintain apartment bans across the overwhelming majority of their existing residential land. They need only to end their exclusionary zoning practices (and reduce other barriers like exorbitant SDC fees) to get housing built. I'm less familiar with the demand for industrial land, if there is a need for more I'm not opposed to a partial rejection that only allows for the employment land component of the expansion.	8/18/2024 11:53 AM
55	As a Tualatin resident, I strongly object to this plan. The transportation connections are poor, and our region has no shortage of buildable land already in the UGB. We need infill, not more fire-prone sprawl into farms and forests. Oregonians have repeatedly said no to California-style sprawl. Please listen to us.	8/18/2024 11:30 AM
56	To much to fast.	8/18/2024 7:22 AM
57	This new area is unnecessary, and will take away what makes the community unique. I moved to Sherwood, as I loved the farms and open space.	8/18/2024 6:34 AM
58	I don't think this should even be considered until we get more than one grocery store in town. I just feel like the cities priorities are way off track.	8/18/2024 1:14 AM
59	Home prices in the Portland metro area have risen by 75% or more over the last ten years. We need to build more housing desperately and are not at risk of "overbuilding" - at worst this would reverse some of the run-up in prices due to past severe undersupply. I am in favor of allowing more housing to be built as much as possible.	8/17/2024 2:50 PM
60	Continuing to develop our important farmland leads to loss of orchards, vineyards, etc, and pushes already displaced wildlife into urban areas (we have a black bear roaming in our inner Sherwood housing area this year). Our roads are in a continuous state of upgrade and expansion that STILL cannot keep pace with development.	8/17/2024 8:32 AM
61	We don't want Sherwood West Expansion to happen. We live directly on Edy Rd which will be inundated with traffic, congestion and construction. We moved here to live in a small town and enjoy the farmland and wineries nearby. We don't want to end up like Beaverton.	8/17/2024 8:06 AM
62	Keep farm land as is	8/16/2024 11:09 PM
63	I think your growth models are antiquated. Where are the people coming from?	8/16/2024 9:34 PM
64	I am opposed to the expansion as it will utilize land that is currently agricultural and it will increase congestion in the area to the detriment of the current community. It does not address the need for fixing the existing congestion problems before adding to them.	8/16/2024 4:29 PM
65	My perspective, right or wrong, is that this proposal is naturally being driven by developers - those who will benefit the most and not the citizens of our local communities.	8/16/2024 4:29 PM
66	Building in the agricultural area that is being proposed will ruin the region and the character that we all love. No one wants housing and development next to wineries and orchards. You have clearly not heard the booms of the cannons that are used to keep birds off of the grapes during harvest season or else you wouldn't have proposed this.	8/16/2024 11:47 AM
67	Traffic is already congested at certain times during the day….how will that be addressed? Affordable housing is needed but some kind of rent control needs to be considered. Love small produce farms ….dont loose those in the expansion process. (Red Berry Barn). How will this expansion affect Newberg and the proposed by-pass?	8/15/2024 12:23 PM
68	We don't need the houses here. There are already 1000 new homes and not the infrastructure for it. Then all the farmland is gone.	8/14/2024 1:10 PM

69	This is excessive and unnecessary In 2022 Metro projected Sherwood would grow by a scant 3% over the coming decades. The Sherwood School District has forecasted enrollment for the new high school will begin to decline in 2027. Sherwood has enough vacant land to accommodate new housing and jobs for years to come, when planned and developed wisely. Metro's research concluded there is enough industrial land inside the existing Regional UGB for another 20 years. Metro's research on Residential land shows most land brought into the UGB in the last 20 years remains undeveloped. This will waste our rich farmland The UGB expansion will destroy the fertile, productive lands which grow Timber, Hazelnuts, Blueberries, and world-class Pinot Noir grapes. These thrive here and in only a few other places around the world. The lands will be replaced with generic concrete boxes for "flex" office, light industrial, and multi-family residential. This will make bad traffic congestion worse Do you enjoy being caught on Scholls-Sherwood, Roy Rogers and Elwert Roads during rush hour now? Imagine adding 5,600 new homes and 4,500 jobs to the area? The jobs will result in additional commuting to Sherwood for those employees who cannot afford to live here, having a negative impact our air quality. This will increase your Property Tax burden We have not found a Taxpayer Impact Statement showing how Sherwood and its residents will pay for the new roads, sidewalks, water and sewer; just an "agreement" to figure it out later. Yes, the developers will pay for a portion of the initial infrastructure, but YOU will be left with more financial obligations to pay for the operating and maintenance costs, even though we do NOT need the new land to keep pace with growth in Sherwood.	8/14/2024 5:35 AM
70	Im opposed	8/13/2024 10:06 PM
71	It seems like Sherwood has fallen to the urban sprawl of Portland. Our small town feel has gone down and crime has increased. Many of the farms and greenspaces that makes Sherwood so beautiful are being turned into industrial buildings and high density housing. Traffic is getting worse, our roads are constantly under construction and prices to live here continue to increase. I understand the need for housing but does it have to come at the expense of farmland, greenspaces and other natural areas?	8/13/2024 8:00 PM
72	I do not support this. This is not to develop homes and jobs that better the quality of life for sherwood residents, this is to have developers come in and build tract homes, maximize profits, and do the bare minimum to get approvals, and increase the tax base to the city, county, and state, none of these bennifit the sherwood residents.	8/13/2024 4:48 PM
73	OPPOSED to the UGB expansion!	8/13/2024 3:31 PM
74	Probably too dense, but some ugb expansion is here than none.	8/12/2024 5:33 PM
75	I don't believe we are ready for growth	8/12/2024 7:24 AM
76	Sad. Its all destruction of habitat for horrible HOA non affordable housing. Disgusting and waste of money. Money that metro is no using to clean yhe streets of Portland.	8/11/2024 2:34 PM
77	Please use all commercial space currently in the city effectively before building more. Empty storefronts in existing commercial areas can be used and already built and walkable. Preserve and enhance the business industry we have before we add new	8/11/2024 10:32 AM
78	Should be approved!	8/11/2024 8:21 AM
79	Does not consider impacts on agricultural areas, existing infrastructure	8/10/2024 10:39 AM
80	Sherwood is a perfect example of urban sprawl. Farm land is being swallowed up by single family housing.	8/10/2024 7:41 AM
81	Make sure 50% of homes are single family. Provide for one-level homes for aging population.	8/9/2024 5:52 PM
82	The proposed Sherwood West proposal as written is premature for large scale development particularly for more than 5,500 new housing units in an area that has already seen rapid housing development in surrounding communities.	8/9/2024 11:23 AM
83	Voters have already said they don't want this.	8/8/2024 7:08 PM
84	The more you take away the land from farmers the bigger food problems we will have. Not to mention the negative impact on wildlife,.water supply and I creased risk of fires. This is a terrible expansion.	8/8/2024 6:31 PM
85	No more commercial growth keep land habitat as is	8/8/2024 6:26 PM
86	We need to redevelop and make the most of unutilized already developed space. We do not	8/8/2024 1:51 PM

	need to add more housing in an already overpopulated area.	
87	I support Sherwood's proposal. They have completed a concept plan in accordance with Metro's UGMFP and have adopted documents demonstrating need and ability to serve the proposed expansion area. I like the inclusion of green spaces, parks and trails throughout the plan area as well as the plan for a diversity of housing.	8/8/2024 1:08 PM
88	We are against the expansion for Sherwood West. Go north or east with the expansion please. Let’s keep the little country we have left the country	8/8/2024 11:44 AM
89	Our cities can't pay for the infrastructure we already have. It is insane to create more liabilities rather than improving and maintaining what we have already built, which is a proven platform for growth.	8/8/2024 11:27 AM
90	The community does not want this expansion-voted it down twice. The roads are not adequate to handle this expansion. Very crowded now.	8/8/2024 11:06 AM
91	Sherwood is already getting crowded with traffic congestion	8/8/2024 10:49 AM
92	I’m not in favor of thr Sherwood West expansion. I am in favor of a Sherwood north or SE expansion. No other towns are encroaching on the west. Save that for a later time. Wilsonville, tualatin, Tigard will want land on north, se. That’s where the focus should be. Traffic can come to the area on i5/& take weight off of 99w	8/8/2024 9:41 AM
93	Conserve the natural areas of our community. Don’t agree with anything else.	8/8/2024 8:53 AM
94	Stop the urban sprawl. You guys are turning Oregon into California stop it	8/8/2024 7:17 AM
95	the growth statistics do not support the need for expansion. There is ample capacity in recent expansion in the area (Cooper Mountain, Beef Bend South and King City Sherwood West is not needed at this time.	8/7/2024 8:30 PM
96	There is no demonstrated need for this; just profit-driven developers. The homes planned will not be affordable because the costs of development and infrastructure of farmland (utilities etc) will be very expensive. Also, they will not create high paying jobs nor be close to jobs for lower income people. There is no supporting evidence in the plan for the alleged 4500 jobs. They are pulled out of the air from a time long before Covid, hybrid work, AI and automation. How many people are really employed by Allison Inn as a "precedent example?" Residents of the proposed homes will need to drive to other places of employment creating even more congestion on already clogged roads that are bottlenecks to get to I-5 corridor. The plan does not take traffic into consideration or the high cost of changing major thoroughfares and building infrastructure. The proposed area is not flat and easily buildable as suggested, there is much protected wetlands. Also, Sherwood has not yet built out other available land including the parcels that were brought into the UGB previously. Also, population growth in Sherwood has slowed while this proposal suggests there is a need for 200% growth. It doesn't meet the criteria for need nor does it adequately demonstrate preparedness for infrastructure costs and demands.	8/7/2024 8:13 PM
97	do not allow this expansion, sherwood is already too expensive and the growth at the edges is not a good idea, build up, no more single family homes allowed and 75% of all new residental should be affordable for people making $60-75,000/year	8/7/2024 4:35 PM
98	Looks like a good plan.	8/3/2024 8:34 PM
99	Like I mentioned on the previous page, I don't like that the traffic study isn't done yet. The intersection of OR 99W and Sunset was at a Level of Service of E prior to the high school being built, and was projected to reach an F. This signal likely has reached a LOS of F now. Also, the Brookman expansion was approved in 2002, and it's been 22 years since then with minimum development (1 neighborhood that has gone in only within the past 2 years, and it isn't complete yet as of August 2nd, 2024). I have not seen a plan on when the rest would be developed as said neighborhood constitutes about a quarter to third of said UGB. As such, the effect on traffic and our natural area has not been fully realized. This also exceeded the 20 year development plan as proposed by what should be included in the UGB. The Tonquin employment area also isn't complete, however since that was approved more recently, it makes since. As the Brookman expansion is primarily housing based, while Tonquin expansion is exclusively job based, and at the pace Sherwood is developing, I believe that expanding the UGB to expand into Sherwood West is too large to accommodate growth for the next 20 years, and I urge a smaller expansion, or preferably, none. These 2 areas I believe contains enough	8/2/2024 11:59 PM

	land for development for the next 15-20 years, especially with Sherwood's track record to delay Brookman's annexation and development. would also like to see a specific plan for housing and transportation (public and auto transportation). I also would like to see a cottage community, as a crossover between high density apartments/condos, and single family low density homes. Also would like to see a plan on schools, as the high school was designed for the Brookman expansion, but not further beyond that based on their arguments in their 2016 ballot measure (I forget the name of said measure). Also where would a new elementary and, if nessesary, middle school be placed?	
100	I support sherwood’s proposal	8/2/2024 12:32 PM
101	The city of Sherwood is growing at a rapid pace, most families move here for the schools and the environment. I'd like to see better options for affordable housing, however the fees and permits that come with this do not match this goal. I also would like to see the city plan for this expansion better than how they built Brookman and the High School. Having a new high school that does not have sewer and has been delayed is not an efficient plan and I would hate to watch them continue to run into these road blocks. It would be better to engage with a more sophisticated panel, like the city of Wilsonville when they planned and built Villebois. I also think it would be good to have a roundtable discussion with medium sized and national builders.	8/1/2024 12:35 PM
102	They need expanded area to expand commercial areas to provide more jobs for the residents of Sherwood to reduce travel time for the residents. They are developing one huge shopping area at 6 Corners and Old Town, but not providing any small neighborhood commercial shoppin areas.	7/30/2024 9:01 AM
103	the plan is well thought out. it has been in the works for years and asher wood is ready and willing. It is whetenthenUGB should be expanded	7/30/2024 7:17 AM
104	4,500 jobs, what type of jobs, and are they sustainable?	7/29/2024 9:37 AM
105	I question whether it is truly necessary for Sherwood to convert all those acres from rural to suburban use.	7/28/2024 8:38 AM
106	Too small. We need more. Time to start thinking big about how we create new cities, new city centers, new homes. We need this but we need more than this now.	7/25/2024 7:23 PM
107	I’m in favor of development around the high school. Housing and mixed use should go into the surrounding acreage.	7/24/2024 5:38 PM
108	This is a fabrication. Expansion here will not be affordable in the long run. Build more housing in areas already within Portland.	7/24/2024 7:34 AM
109	Our family approves expansion on Kruger Road above Sherwood High School for the purpose of housing, mixed use developments to support the residents of the community.	7/23/2024 9:24 PM
110	Just build more densely, don’t expand. The city goes from forest grove to Sandy already, it doesn’t need any more sprawl	7/23/2024 8:57 PM
111	I’m in support of this plan because it enables the growth needed and keeps the community and neighborhood design that makes Sherwood unique. It also allows for employment opportunities that is needed.	7/23/2024 8:33 PM
112	I don't buy that there's enough demand for new suburban housing to actually support this proposal. This sounds like more wishful thinking from a jurisdiction that loves its suburban sprawl. Expanding the UGB to create new housing on the farthest corners of the region purpetuates the worst car oriented development that will result in more carbon emissions, less farmland, and more suburban infrastructure that the city can't afford to maintain. The fact that the planning began in 2015, predating the middle housing infill reforms, indicates to me that the City of Sherwood already has no desire to moderate the worst kind of car-only development in the region. I encourage Metro, on the basis of the data in the urban growth analysis, to decline to expand the UGB.	7/23/2024 6:44 PM
113	This is not needed. Money is the reason this is being pushed	7/23/2024 6:22 PM
114	What is planned and what gets done are different things. But what is ruined happens first and what is not done is last. Planners are not realists and dont give excrement about what happens to individuals. This is not future it is invasion of now.	7/23/2024 3:26 PM

115	I do not think the plan adequately integrates mixed use and comercial space with spaces people actually live	7/23/2024 3:20 PM
116	Sherwood has always been known for its scenic farm and agriculture areas outside the city limits. It is important to keep that way of life in tact. Several land owners have livestock and crops that will be negatively affected by the increased traffic and pollution by putting roads through. Please keep the trafffic flow on Elwert by improving the existing road, instead of diverting traffic north, ruining the creek/wetlands and agriculture areas.	7/23/2024 2:20 PM
117	The concept plan represents the planning committee's desires, and many citizens and community groups oppose the expansion.	7/23/2024 12:12 PM
118	The City of Sherwood's plan is much too large and is predicated on population growth figures which are wlidly inaccuarte and self-serving. This area is not growing as it was when the concept was first developed and it needs to get in line with current forecasts and trends. The very nice, but VERY expensive example of relying on inaccurate numbers. We now have a current enrollment of 1,704 students. The high school has a capacity of 2,400 students. The forecast for enrollment for 2032 is 1,530 students. It is obvious the figures used to support the building of the school were inaccurate and it has caused our community to spend excessive amounts of money needlessly. It should have been a smaller school. And similarly, the City's current plan should also be scaled back to reflect CURRENT numbers of population and growth in this area. And until such time as there are no possibilities for development with the UGB, farmland should remain untouched. You can't eat a house.	7/23/2024 11:49 AM
119	The area is losing residents. There's no reason to extend the growth boundary. Gentrify downtown instead of ruining natural landscapes and destroying more farmland.	7/21/2024 9:02 AM
120	Maintain urban growth boundaries and increase density	7/20/2024 9:13 PM
121	I actually totally disagree that the urban growth boundary should be expanded at all. We must build densely within existing urbanized footprints.	7/20/2024 7:41 PM
122	The proposal gets a lot of things right. The biggest piece missing is a comprehensive plan for transit in the area. I think the number one priority for the new area should be on reducing VMT for daily errands by providing good bike paths and walkable 15-minute neighborhoods. This is something that is easier to control at this stage in the planning. However, people will want to get out of their neighborhood to access amenities, and there are not very many options for how they will do that. This makes living in the area less accessible for people with disabilities who cannot drive (like my own father) or younger people who cannot afford a car.	7/20/2024 9:49 AM
123	The UGB is one of the defining features of the region, and continuing to add sprawl instead of efficiently using our existing resources is regressive and backwards thinking. Please reject this proposal and encourage upscaling existing development and lands in already underutilized lands within the UGB.	7/19/2024 2:09 PM
124	This is the definition of car-dependent sprawl and should not be allowed.	7/18/2024 10:23 AM
125	The City of Sherwood is not making the best use of already developed area. Too much space is devoted to driving cars, parking lots, and car centric behavior. No further expansion should be considered until the current city of Sherwood is fully integrated within our regional transit infrastructure and people are able to reliably commute between the downtown Portland core and Sherwood town center.	7/17/2024 11:19 PM
126	I am very glad to see mixed use and higher density development in an area outside the city center! I hope this area surrounds a school that walking and cycling to school is a easy and safe, as well as the preferred modes of traveling to school.	7/17/2024 6:51 PM
127	This is an absolutely terrible plan !! The roads can’t handle the cars, the schools are over crowded, crime is on the rise THIS IS PURE GREED. 🛑Provide service for the people that are here, stop trying to line the pockets of already rich developers!!!!!!!!	7/17/2024 6:09 PM
128	See my earlier comments about how I think the plan is baloney and only is more of the same.	7/17/2024 2:24 PM
129	This plan creates too much low density housing. This kind of housing is not what we need to be creating to increase affordability in our region. This expansion will create an exclusive neighborhood that is only for the rich. We need more NW 23rds not more Lake Oswegos.	7/17/2024 9:23 AM
130	I do not support the expansion plan for Sherwood. Simply a land grab for easy development. Requires minimum planning and effort in a goal to just throw up more houses near the new high	7/16/2024 8:50 PM

	school. There needs to be more consideration for walkability in the town and utilizing the current space to create a tight city with an actual community. Do not continuing splitting the town on both sides of 99	
131	The proposal is too prescriptive in terms of land use. The long-term vision should focus on identifying placement of public infrastructure (roads, water, sewer), delineation of plots and parcels, and locating of public and environmental resources such as parks and other habitat/wetland areas. The market for housing, industrial or commercial areas should drive the development of plots for these uses. This will permit the maximum amount of flexibility into the future. I also see that no representative from TriMet was involved in the Technical Advisory Committee. We need to ensure that future growth areas are suitable for transit service, both in terms of operations (can the bus actually get through here efficiently) but also in terms of whether the land use is mixed enough and density high enough to support a bus line.	7/16/2024 8:38 PM
132	The City has made two concerted efforts to plan for this area. The City provides for a variety of housing, but it's harder to develop multi-family as the Council and PC prefer single-family housing. If the City can commit to achieving the densities prescribed within their proposal, they should be able to expand.	7/16/2024 4:56 PM
133	This expansion appears to be well thought out, and should be welcomed in the region. It is sad that the Sherwood West proposal is the only one.	7/16/2024 9:06 AM
134	We need it - but I’m afraid of what it is going to do to our small town.	7/16/2024 8:13 AM
135	Sherwood needs to do a better job of creating low income housing.	7/16/2024 8:00 AM
136	The survey is one-sided and useless. It is like asking whether you would prefer to be killed by poison or hanging. There is no compelling reason to do this. Sherwood does not consider current minimal population or job growth estimates. Negative responses are not considered or minimized. Public involvement was just scripted lip service. Example...open house. Vote on your preferences. "None of the above" was not an option. This is only about MONEY, tax for the city and money for developers (and a few land owners who may profit).	7/15/2024 8:47 PM
137	I do not believe this is a good idea and do not recommend it.	7/15/2024 7:54 PM
138	This is sad and horrible!	7/15/2024 6:48 PM
139	Having previously lived on the outskirts of Sherwood, I don't support the expansion: Big houses, high incomes, lack of diversity in housing and people (it's where Northern Californians relocat to be part of the nascent wine culture). You can't buy a house for less than $500K . It's lovely, don't get me wrong, and we need more high-income sprawl NOT. Its an incredibly homogenous community. No-let's see how the Roy Rogers annexation turns out first.... and what in gods name are you going todo about the traffic. Tell Sherwood they can annex once we have light-rail to Tigard.	7/15/2024 6:47 PM
140	Yes	7/15/2024 5:30 PM
141	Too much traffic. Need public transportation!	7/15/2024 5:14 PM
142	Without a westside bypass, how will existing and increased traffic access freeways?	7/15/2024 4:05 PM
143	The city of Sherwood is biting off more than it needs. The majority of people in our area are NOT for this unnecessary expansion. I am not against growth for our city, but to attempt to increase it by 42% at the expense of family farms, wineries, and forested areas is an affront to our country-like community.	7/15/2024 3:37 PM
144	those choices of three in the above question are tough! All are important so I am not necessarily committed to my choices. I think the Sherwood expansion is appropriate.	7/15/2024 2:17 PM
145	Approved	7/15/2024 1:19 PM
146	This is Sherwood West is simply more sprawling expansion that is auto-centric and auto-dependent. The housing "mix" merely gives this an acceptable veneer. Where is mass transit? Upzone areas close to mass transit. Do not put single family development and multi-family development on the outskirts of the UGB. This sprawl, plain and simple.	7/15/2024 1:16 PM
147	I do not support Metro overtaking the small quaint town of Sherwood!	7/15/2024 1:14 PM
148	This should not be approved. Sherwood, Wilsonville, and Tualatin are currently in the process of wasting one of the largest industrial sites already within the UGB by each separately	7/15/2024 1:04 PM

	seeking development, often on small, 10 acre parcels. At a time when some think the region needs more large industrial parcels, these jurisdictions are wasting a huge area, already within the UGB, that should be developed as a single unit. Consequently, giving Sherwood more land for any purpose is like rewarding them for bad behavior. Fundamentally, if jurisdictions are doing a poor job with the land they have, they shouldn't ever qualify for additional urban land. Metro needs to find a way to be firm, clear, and consistent. Right now it seems to be afraid of its shadow.	
149	Don’t let it be as awful as the development on schools and Roy Rogers. It’s so ugly and dense and doesn’t have services like grocery stores.	7/15/2024 12:44 PM
150	If you build it, they may or may not be able to afford it. Factor in housing costs before building more housing. Build up not out	7/15/2024 12:42 PM
151	Sherwood proper needs to allow apartments. As an affordable housing developer, I can tell you they are not friendly to multifamily inside the original downtown core where increased density makes a walkable community.	7/15/2024 7:29 AM
152	There's already too much growth in this area.	7/15/2024 6:36 AM
153	I am not well informed but want a full size library branch in that neighborhood.	7/14/2024 5:41 PM
154	The mixed employment area near Elwert/Scholls-Sherwood looks like a recipe for warehouse/data center blight and traffic.	7/14/2024 4:00 PM
155	Metro can’t even manage Roy Rodgers and Tualatin Sherwood Rd. as it is. Adding 3,000+ homes is just foolish and an obvious tax grab and money scheme by developers.	7/14/2024 3:39 PM
156	Leave agricultural land, green spaces and wetlands alone. Plant trees in already developed areas. Limit growth to areas with established city water supplies and leave all wells and groundwater areas out of development. Keep manufacturing and all big business ventures out of Sherwood. No data centers or any polluting influences of any kind.	7/14/2024 3:29 PM
157	Please see my thoughts on the Sherwood West Project in my previous comment. The Lebeau and connected Edy road project is unnecessary and will impact the residents of this area as well as the environment negatively. Wineries in this area are concerned with the potential negative impacts that developing this area will have. This area is home to many creatures that will be further pushed out and harmed due to this plan. Sherwood needs to have some natural areas maintained and I hope we will not lose what makes Sherwood beautiful so that others can profit. Tualatin-Sherwood road has been developed so much and is an embarrassing eyesore for our community. Please do not strip every piece of beautiful land and turn it in to a soulless development. I am very much opposed to that portion of the Sherwood West plan. Those that presented this plan did not discuss their intentions with residents of the area and have lied to Metro about the support for the plan.	7/14/2024 2:24 PM
158	Stop the Sherwood West development. The rural community that is a risk does not get to vote for Sherwood City officials who have made the choice to ask for expanding. We DO NOT want this to go in to effect. We don't want to lose our farms. We don't want to lose our land. We don't want to lose our trees. This is not necessary for Sherwood. We don't need to expand, we have other options. This would be a huge negative impact to the native plants trees and eco system that thrive in this area. We didn't need to bring that large of population and business that close to the wild life refuge. This needs to stop. The community on Lebeau Rd do not want this.	7/14/2024 12:02 PM
159	I believe that this proposal does not meet the goals of the region. To start, the proposal does not state whether there will be added transit to the region, or whether bike infastructure will be included. Combined with the fact that a large portion of the housing area that will be developed is planned to be low density means the newly developed area will just be more car dependent sprawl, as many of these new residents will have no other choice but to drive. The portland region does not need more cars driving through the area and commuting between work, home, and other activities, as it is known how bad cars are for our enviornment. More cars commuting from sherwood will also mean more traffic through the southwest area of the portland region, which already suffers from congestion around the I-5 corridor and a general lack of density and transit access. After looking over the area closely with satelite imagery through google maps, it is clear that sherwood has plenty of land to infill and add density, especially near the only 2 trimet bus lines serving the region. Through redeveloping various seas of parking lots, and empty plots of land, I believe the city of sherwood already has	7/14/2024 11:44 AM

	options to develop land and add real density where it matters, instead of continuing to develop urban sprawl as is evident by the contents of the proposal.	
160	No more expansion. Keep and maintain what is already in Sherwood. Creating more housing in not a solution	7/14/2024 10:51 AM
161	The city of Sherwood has not demonstrated a need for this large of an expansion plan. Land recently added to the UGB for commercial development has not been completed, so why would the city of Sherwood even more land for this purpose?	7/14/2024 10:30 AM
162	Too many homes!!! Please stop!!!	7/14/2024 10:27 AM
163	No more growth. We are being squeezed and traffic is horrible.	7/14/2024 10:15 AM
164	This is a poorly planned, unneeded, and irresponsible amount of growth in a region that is surrounded by and supported by active agriculture and farming land. Sherwood hasn't even fully developed the land on the East side of the city for commercial use, but says it needs additional land for increased tax revenue. This commercial land that is currently in the plan is for manufacturing, which is more geared toward robotics and mass production, with few employees, rather than employment of several community members to benefits the community. This proposal exposes the area to more pollution, environmental toxins and exposures and will damage existing agriculture, farmland, and natural space. Please reject this proposal in its entirety.	7/14/2024 10:10 AM
165	Way too much low density housing and needs more of a wetland buffer. Needs more commercial and shops by the high school for kids during lunch.	7/14/2024 9:29 AM
166	I think Metro should institute minimum density standards. Density before expansion.	7/14/2024 12:10 AM
167	The proposed infrastructure funding plan is vague at best. Relying on SDCs and "outside"funding is insufficient. No expansion should be considered until there is a concrete committed plan for the infrastructure funding.	7/13/2024 11:09 AM
168	The amount of proposed mixed use are is extremely small but this type of planning can be more beneficial for the city. With current plan it just increases sprawl and carbon footprint.	7/12/2024 11:46 PM
169	I just want to emphasize that the Portland area needs to focus on creating more density and creating spaces that are focused around building an enjoyable community. In my opinion, this would be through walkable and bikeable areas alongside spaces were the community can gather without the need of cars. This will maximize the efficiency of the space and take big steps towards addressing climate change issues. We should do this with current spaces within metro area limits rather than expanding outward, leading to more sprawl which is bad	7/12/2024 8:20 PM
170	I am against it.	7/12/2024 6:15 PM
171	My neighbors and myself are in favor of expanding into the Sherwood West reserve. There is very little farmers in the 1,291 acres. We are right above the new High School and there needs to be more growth.	7/12/2024 1:16 PM
172	The inclusion of mixed employment is a welcome one but I must restate that such space should not be made to cater to large retailers and must be kept for local small businesses, as I have stated earlier, mixed use zoning is imperative and although included it lacks slightly, as well as the amount of low density neighborhoods are too high. Something else I have also not seen anywhere is a lack of cars, although this may fall outside the scope of this proposal pedestrianized areas that restrict or exclude cars are a key part in making mixed use areas enjoyable and in encouraging biking and walking	7/12/2024 7:36 AM
173	Hopefully achieved home numbers are at the high end of the figure if not exceeding it. We do not need unnecessary sprawl.	7/12/2024 12:25 AM
174	If new urban areas are claimed from existing undeveloped land, these areas MUST be high density and transit oriented. These areas should discourage automobile transit. Reference Utah City. However, the best solution is to NOT expand urban growth and to preserve undeveloped, natural lands.	7/11/2024 10:35 PM
175	There is no plan to expand MAX or any other high capacity, high quality transit to Sherwood, much less to the expansion area. Shame on you for not even mentioning transit, or regional bicycle network connectivity, in the factors that are the most important to consider as the City, and especially the REGION, consider expansion.	7/11/2024 6:14 PM

176	No more sprawl. Sherwood needs to focus on building over their ridiculously huge parking lots and empty monoculture grass fields.	7/11/2024 4:30 PM
177	Do not expand the UGB and force our marginalized communities further out into the margins of our metro area. This plan has no vision for how people who live here will circulate or travel to jobs outside of this ultra suburban development.	7/10/2024 10:17 PM
178	Sure, allow Sherwood to expand. But don't stop there, let other cities and counties expand too.	7/10/2024 8:33 PM
179	Urbanf growth Shou only expand of housing built is all high density and half the units are reserved for low income families.	7/10/2024 5:18 PM
180	The goals of the region sound great on paper. The primary factors of consideration are whether the plan actually meets those goals, and whether implementation of the plan can result in meeting those goals. How is the proposed expansion region meeting the goal of having 'the option of living close to work' if the industrial area is separated from the large majority of the residential area (including all of the mixed use and commercial area) by the Title 13 conservation land around Chicken Creek? These considerations should at least be addressed by the plan. Additionally, how can we be sure that Sherwood as a city will be able to provide the urban density that our region needs (to meet our goals) when vanishingly little of the city's existing development is dense or mixed use? Sherwood's downtown area is barely two blocks in size. If Sherwood was able to guarantee such development, meeting our region's goals, I would be happy with the plan and its UGB expansion. More housing is more housing, and we need more housing, but we can not just keep expanding with suburbs.	7/10/2024 12:35 PM
181	No one besides the developers that will profit off building more houses/apartments wants this expansion. Please listen to the majority of the residents in Sherwood and DO NOT EXPAND. We're good as we are and the small town feel has already diminished too much even in just the past 10 years. Don't make it worse. We don't want to be the next Beaverton and then Portland. We want to feel safe.	7/9/2024 9:55 PM
182	Sorry I could not figure out how to rank the elements. Not sure I did that right. We should be able to number them 1 through whatever. Always the involvement and engagement of the total community comes first.	7/9/2024 3:48 PM

Q15 Is there anything else that you would like the Metro Council to consider as they make a decision about whether to expand the Urban Growth Boundary as described in the Sherwood proposal?

Answered: 218 Skipped: 147

#	RESPONSES	DATE
1	Consider the voice of the people who have lived and thrived in this area, those voices don't appear to be heard in this matter.	8/23/2024 10:13 AM
2	I do think there needs to be more opportunity for affordable housing . It seems crazy to have a huge high school with almost no houses around it ?	8/22/2024 9:57 PM
3	Slow down	8/22/2024 9:48 PM
4	please consider that the expansion decision should benefit all residents, including those in historically underserved communities, by providing affordable housing and accessible public services. Please also make a decision that will ensure strong environmental protections. It's a lot to balance, and reading the reports makes it clear that this is complicated without any one "answer" to what/how to decide—I think it is most important to make the decision about expansion that will guarantee that these priorities are being worked toward.	8/22/2024 9:45 PM
5	This plan is bad for Sherwood, bad for the Metro area and bad for the future of Oregon and Oregonians.	8/22/2024 7:13 PM
6	Please listen to those who live in Sherwood about what we want in terms of the UGB.	8/22/2024 6:57 PM
7	Leave Sherwood how it is and do not expand the boundary	8/22/2024 6:35 PM
8	There is a plethora of empty warehouses and houses that can be renovated. Do this before taking any more farmland to build more buildings	8/22/2024 6:32 PM
9	No. I think it is a good plan.	8/22/2024 4:41 PM
10	The expansion area intrudes into farmland. The existing/planned roads are already inadequate for traffic transiting the area. McMansions should be restricted.	8/22/2024 1:31 PM
11	Thank you, Metro Council, for listening to the public. I encourage Council to be extremely cautious about expanding the UGB. We should focus on further developing our existing area within the UGB rather than expanding Sherwood at this time.	8/22/2024 11:43 AM
12	If you are going to increase the Urban Growth Boundary in the Shewood area, Please don't approve it all. The area around the enourmous high school would be plenty. That land is already ruined so don't ruin any more.	8/22/2024 10:30 AM
13	Please do not expand urban growth boundaries, when there is so much opportunity for density and walkability in the existing perimeter.	8/22/2024 10:11 AM
14	Yes, making development pay for itself should be required. I don't mean just a one & done upfront fee/SDC. After a developer pays their one-time SDCs, they get to run away with millions of dollars in profit, while the existing residents are left with the traffic congestion (and frustration) as well as the burden of paying for new schools, new roads, new water facilities, new fire stations, and staffing in these new facilities due to the increase in population their development has created. I'd like to remind you that many of us are retired and on modest fixed incomes. "Affordable housing" means more than just the purchase price or cost of rent - it also means not taxing seniors out of our homes. Dramatically increasing our property taxes via bonds and levies is doing exactly that. Instead of giving developers price breaks and incentives, they should only be allowed to build if it doesn't adversely affect the pocketbooks of the existing population in the area. The other critical concern is the environment. As I've mentioned, this is an area with forests of mature trees. We are in a climate crisis, and these trees help us by providing shade, sequestering carbon, preventing erosion, and providing wildlife habitat. When you replace trees with concrete and asphalt, the whole area heats up.	8/22/2024 3:12 AM

	Saying that developers replant trees is a joke, because these tiny little trees with a diameter of your thumb are not even remotely equivalent to the large mature trees they have destroyed in their quest to become even richer. Many neighborhoods in Portland have "heat islands", and the City is trying to plant more trees to combat the rising temperatures - wouldn't it make more sense to not cut them down in the first place? What's even worse, is that they clear the land then set what they've cleared on fire! There is a property on Scholls-Sherwood Rd & Elwert Rd that has burned every day for months at a time. The property is very close to the Tualatin National Wildlife Refuge.	
15	The mixed employment area expansion into protected upland wetland habitat was done after the public outreach with no community input. The reference to industrial use was not used during public outreach; Only after public outreach was finished. Bringing in the industrial development on the north end of Sherwood West should not occur unless the citizens of Sherwood have a good faith opportunity to weigh in. Before Metro Commissioners decide they should have their staff review the final plan, but also the communications during the various meetings. You will see what I say here is true. The plans for Elwert Road would degrade the regional connector role it serves. Traffic on and off of Hwy 99 has major delays during rush hours. These conditions have persisted for years and will only worsen if all of Sherwood West is brought in at this time. The City and County need to improve the capacity of Elwert Road, and it's Hwy 99 connection before adding so many homes.	8/21/2024 11:19 PM
16	don't do it, don't do it, this is the opposite of what we are supposed to be doing.	8/21/2024 8:19 PM
17	The concept plan proposed described a mixed employment zone, which included, industrial use, that was not advertised untill after the public outreach peroid was complete. It is not fair, or reasonable, to state the residents of Sherwood are in agreement with industrial zoning in the northern region of the proposed expansion. During the public outreach of the Sherwood West concept plan, mixed employment was represented as a mix of office, light industrial, and flux space. However, after public outreach, the need for industal manifacutring has been a major emphasis of the plan and further dialogue. It is not a good faith statment to suggest that residents of Sherwood are informed of the expansion plan, let alone support industrial use of the aforementioned land.	8/21/2024 6:39 PM
18	Consider who is pushing for this concept - voting citizens or developers and city officials? Follow the money and you'll see. Last survey showed over 80% of voters did NOT want this.	8/21/2024 5:59 PM
19	Consider the impact it will have on current plans to make walking, biking, and transit a more viable alternative to driving.	8/21/2024 4:59 PM
20	Sherwood overbuilt their high school and now the operating and maintenance costs are more on a per student basis than projected. Don't make the same mistake with the UGB expansion, scale it to meet current needs and reflect recent data. This expansion size may have made sense with the growth from 2000 but it doesn't now. You will be trading a vibrant and valuable agricultural area into a land speculator's dream.	8/21/2024 4:31 PM
21	Oregon is a unique state due to its urban growth boundary and early efforts to preserve the beauty and productivity of agriculture. Every time the growth boundary is usurped we loose a little more of that unique quality.	8/21/2024 3:54 PM
22	I would encourage the Council to really consider is it necessary at this time to bring so much land into the UGB, given the data provided on slower population growth than expected and adequate light industrial already available in the UGB. Please tell the city to go back with a requirement to reconsider smaller parcel at this time and to have a more comprehensive traffic study done in conjunction with WA county and ODOT on what the impact will be to our roadways before allowing this much growth to be approved.	8/21/2024 3:11 PM
23	Don't do it. It can't pay for it's own maintenance in a few decades just like Portland can't now. You can achieve all those goals by building denser in the existing UGB. Something other than suburbia might even make Sherwood worth visiting.	8/21/2024 2:42 PM
24	Metro states the "Urban Growth Report" will document whether more land is needed. After a brief review of the Executive Summary, I did not see an answer to this question. Is more land needed? Evolutionary growth planning is required to enhance and maintain the quality of life in a metropolitan area. Sherwood's proposal is Revolutionary, NOT evolutionary. Given recent slowing growth trends, it seems wise to grow gradually, minimizing the occurrence of un-intended consequences. Thank you for your time and consideration.	8/21/2024 11:23 AM
25	Land developers and politicians. Somebody is getting greased.	8/21/2024 8:44 AM

26	Sherwood is asking for to much land.	8/21/2024 7:17 AM
27	Single family homes or 10k+ square foot lots.	8/20/2024 11:42 PM
28	The size of the requested expansion is not supported by facts and the City of Sherwood should be asked to reevaluate the expansion request and right size it to suit the true growth potential for this area.	8/20/2024 7:59 PM
29	Sherwood is a small town and the projected future population growth in no way reflects what is proposed in this expansion. Hundreds of homes are currently being built and retail locations sit empty as retailers have left the area. Sherwood needs to revitalize its existing areas before trying to grow.	8/20/2024 6:37 PM
30	Holly ochoa, Steve ford, and I are all interested in working with Sherwood planners to bring in our 20 combined acres for mixed use and or housing.	8/20/2024 6:28 PM
31	Think long and hard and don’t be swayed by paid consultants who will benefit from growth	8/20/2024 5:09 PM
32	once its gone its gone	8/20/2024 5:00 PM
33	Push back against the people who’ve got there’s and want to limit others.	8/20/2024 4:53 PM
34	Preserve the few remaining farms, green space, access to the outdoors.	8/20/2024 4:30 PM
35	Please see my comments above. The proposal is a wild overreach and should be denied in its entirety.	8/20/2024 4:23 PM
36	Please listen to the Sherwood Farm Alliance. We have presented facts that conflict what city leaders and builders are promoting. We DO NOT have the roads and infrastructure to support this massive increase in acreage into the UGB. Our land is too precious to pave over with the amount of housing suggested, and metros own projections of growth are SIGNIFICANTLY lower than the projections of the city. Just check out the numbers they said we were going to grow for our new high school just a few years ago, the growth numbers were way off base. We built a massive high school that is not at full capacity, and affected all of our taxes and we are still paying off all the infrastructure for that, I think the average Sherwood resident cannot support another massive build in our area that makes the builders rich and leaves the city residents to come up with money for more schools, more roads, more infrastructure and also destroys our beautiful land, thank you	8/20/2024 4:19 PM
37	Do not expand and thereby put further pressure on existing Title 13 refuges for wildlife. Current forest land should be preserved, not destroyed by replacing it with houses.	8/20/2024 4:16 PM
38	We were very involved in the 2016 Concept Plan that the City of Sherwood completed prior to the current Concept plan. It was very evident that the City had an agenda both for the 2016 concept plan and the current concept plan that while they promoted community input, despite hours of involvement, we saw little to no interest on the City's part to make any concessions or listen to the small farm owners in the area being considered. They went through the motions of "listening" to opposing interests, but there was really no interest in farm/wine/small woodland farmers interests. We provide jobs too. We bring in income that contributes to the benefit of all through our taxes, but we are not big enough to be considered as worthwhile contributing members to our community and it is better to bulldoze our properties than to allow farming/winery/woodland enterprises to continue in this area.	8/20/2024 4:00 PM
39	Please reject Sherwood proposal to expand the UGB.	8/20/2024 3:56 PM
40	Don't expand it. Enough land in current boundaries to meet needs for many years.	8/20/2024 3:56 PM
41	Available lands for housing, and SDCs, could be the single biggest driver(s) for affordable housing. The laws of supply & demand are not broken, and housing is too expensive in Oregon!	8/20/2024 3:43 PM
42	Listen to the home and property owners who will be most impacted by the permanent loss of agricultural land as well as the lack of existing roads and infrastructure costs that will impact the community.	8/20/2024 3:02 PM
43	Listen to the local citizens and what they have to say. Read the Save Sherwood West concerns.	8/20/2024 11:03 AM
44	I am STRONGLY OPPOSED to the expansion of the UGB as proposed by the City of Sherwood.	8/20/2024 9:56 AM

45	East-West transit/transportation connections, especially to Oregon city. If Sherwood was built as a denser TOD node, then it could help the region develop as a less congested grid.	8/19/2024 6:16 PM
46	develop existing land in the UGB, we will not be able to utilize an expansion, and it is a waste of money, resources and the environmental impact will be irreversible	8/19/2024 12:50 PM
47	Consider transit planning.	8/19/2024 12:08 PM
48	Expanding the urban growth boundary is a horrible idea. We need to build more housing in the land that is already a part of the UGB. We have plenty of room already. The urban growth boundary is already too large in my opinion.	8/18/2024 11:25 PM
49	I beg everyone at Metro considering this, don't let Sherwood have this land. We've already lost the kindness here, we don't need to further it with a larger population.	8/18/2024 10:42 PM
50	Eh, what’s the point. The Boomers are going to do it regardless. This process is a formality :-)	8/18/2024 9:29 PM
51	We should continue following the growth trends that allowed this area to become so unique in its development. Strong growth boundaries and ensuring walkable, inviting, and friendly places are what make the Portland area a destination, not sprawl	8/18/2024 3:47 PM
52	Don't violate the integrity of the UGB to satisfy the poorly zoned single family housing suburban expansion of Sherwood.	8/18/2024 2:29 PM
53	Density, public transit	8/18/2024 2:28 PM
54	Metro and The City of Sherwood work for us not the other way around. 70% don’t want it. Why can’t you respect the wishes of the vast vast majority of citizens!	8/18/2024 2:15 PM
55	I'd like you to consider WHY you need to expand the UGB in an area with limited growth expectations where there are no projected shortages in available space for the next 20 years? And why you need to do it in the direction of farmland?	8/18/2024 1:24 PM
56	Do not expand the UGB.	8/18/2024 1:13 PM
57	I like the plan. I know there is an opposition group but there are those of us that support the plan too	8/18/2024 1:08 PM
58	Sherwood has space for more density instead of further sprawl.	8/18/2024 12:51 PM
59	The 2040 Growth Concept Plan has been a failure. The regional centers and town centers it envisioned have almost universally not been built out. Metro needs to create a new regional plan that has very prescriptive rules for cities, and has actual mechanisms built in that ensure development happens as planned. We have a dire housing shortage, and we need to take it seriously. We have had these UGB expansions every few years for decades now and it hasn't been enough to end the shortage because the problem isnt a lack of land! The problem is and will continue to be that cities enforce apartment bans, take many months to get out permits, and charge 10s of thousands of dollars in SDC and permit fees. Reject this plan and get to work solving the actual underlying issue.	8/18/2024 12:01 PM
60	Please consider the type of climate impacts, fire risk, and transportation challenges that will accompany this proposal. Cookie-cutter suburban tract homes is not the type of housing that will be climate resilient. Please think better of this status quo proposal. We need a course correction for the better. Please vote to deny this application.	8/18/2024 11:33 AM
61	Think about the whole picture…and the impact on the land.	8/18/2024 9:42 AM
62	Our city leaders are not listening to its citizens. YOU MUST listen to us. We do not want this here!	8/18/2024 7:51 AM
63	Does Sherwood really need to look like phoenix?	8/18/2024 7:24 AM
64	I don’t think Sherwood is ready to expand the urban growth boundary	8/18/2024 1:17 AM
65	We need more housing in the entire region! Allow land owners and developers more freedom to meet the needs based on a free market.	8/17/2024 2:51 PM
66	I was offended a little bit at the Council presidents comment that we only have three people of color at Sherwood high School. I would encourage her to come visit us for our Diwali festival,	8/17/2024 9:15 AM

	or our moon lantern festival to see the hundreds of people from Sherwood who are attracted here because of our good schools.	
67	Our schools and roads are at max capacity already. We are already developing several areas with houses and industrial/commercial buildings. Sherwood needs to stop, study, and evaluate the impact before bulldozing ahead with more development to the detriment of our farms and wildlife.	8/17/2024 8:35 AM
68	Please, please do not allow this to happen. Our children are already in classes of 30+ kids, we don't need more crowding. We enjoy our small town and will be forced to leave if this happens.	8/17/2024 8:08 AM
69	Leave as is	8/16/2024 11:11 PM
70	Less multi unit housing	8/16/2024 9:56 PM
71	Sherwood doesn’t need to become another Beaverton. Is there a real need to turn Sherwood into a crowded traffic congested mess?	8/16/2024 9:37 PM
72	When deciding such a significant proposal please make sure and challenge when in doubt, that the local representatives have taken all prudent measures to insure they fairly represent their communities.	8/16/2024 4:35 PM
73	Sherwood city council has lied to you. There was no input from the residents already living in sherwood west. You are proposing something that no one wants and no one needs. We love the farmland and agriculture of our area. New residents will be very upset by the air cannons that are used during harvest season to keep the birds away. So it is clear to me you don't live here and haven't visited here or you would know this.	8/16/2024 11:49 AM
74	Expansion is not only about creating jobs and financial gains for Sherwood. We need to think long term and how adding 4,500+ homes will impact the environment, traffic, and crime. Let's keep the "small town" charm of Sherwood. Do not expand the Urban Growth Boundary.	8/16/2024 7:48 AM
75	Vote this in and you get voted out. This is dumb. We don't need it and the people here don't want it.	8/14/2024 1:11 PM
76	Our taxes are already high and would increase more. Our schools are already understaffed. Farmland is disappearing.traffic is a nightmare. People working in Sherwood can’t afford to buy in Sherwood.	8/14/2024 6:30 AM
77	A 41% increase in the size of Sherwood. It is excessive, unnecessary, wasteful of rich farmland, will increase traffic congestion, and your property taxes.	8/14/2024 5:36 AM
78	I am 100% opposed to the extension of the urban growth boundary. Communities need to work together to address the growth issues. Just because Portland can’t manage their growth/population and drug crisis (that they created) doesn’t mean that this county should accommodate future growth. Stop the expansion to the west and make the current communities support their population	8/13/2024 10:10 PM
79	Expansion of the UGB to the sherwood west would be detrimental to forests, waterways, farmers and farmland. This concept plan runs within distance of wineries and MAJOR forests that literally help keep the area more natural. The carbon footprint of this many people would not be healthy and 99W including Roy Roger's and ELWERT cannot sustain this. Look at Wilsonville with Villebois and I5. The traffic will be horrid. We live in Sherwood because of the beauty, the farmland the wineries and the community. This community is SMALL for a reason and the people here like it this way. The back of Bull mountain is expanding rapidly and Roy Roger's cannot take all this traffic. Please reconsider because this will not be a beneficial choice for waterways, forests, animals, farmers, residents and the environment. Thankyou. Sherwood resident.	8/13/2024 9:04 PM
80	Consider how the farmers are going to be impacted and the small town, neighborhood feel that people in Sherwood take pride in as well as the heritage. Think about how the nature isn't going to become just miles of houses and industrial complexes	8/13/2024 8:03 PM
81	stay out of sherwood	8/13/2024 4:49 PM
82	traffic to/from sherwood from surrounding cities is already terrible and this will only get worse and add to that as well!	8/13/2024 3:33 PM
83	Do not expand the UGB	8/13/2024 2:00 PM

84	When will the Urban Growth boundary stop being extended? When is enough is enough? Do you want Sherwood to end up like Beaverton? What about food supply when farms keep vanishing into the boundary?	8/13/2024 1:00 PM
85	Just remember who or what is being affected by your decisions and how hard they are to take back.	8/12/2024 6:15 PM
86	The pendulum will eventually swing. Start expanding the UGB's before the voters turn on you (only a matter of time)	8/12/2024 5:35 PM
87	Bus and biking lanes where possible	8/12/2024 4:48 PM
88	Less people less traffic Less large shopping centers	8/12/2024 10:04 AM
89	I feel like the crime rate that is almost impossible to enforce right now needs to be considered. More people means more crime. And if we can't take care of the problems we have now then we shouldn't add to them. That's just basic common sense	8/12/2024 7:28 AM
90	Stop sprawl. We have a very fertile valley and need to grow food.	8/11/2024 10:50 PM
91	Please don't ruin the rural natural beauty of our community.	8/11/2024 8:17 PM
92	CLEAN HOMELESS CAMPS. LIMPIEN Y ERADICATE LOS CAMPOS DE HOMELESS. Es el mayor problema de vivienda en Metro Portland.	8/11/2024 2:36 PM
93	It's needed! We need more housing options for the growth of the town	8/11/2024 11:21 AM
94	Traffic. Safe walking paths	8/11/2024 10:33 AM
95	The only real long term fix to help reduce homelessness is the expansion of the UGB. When it comes down to it housing is a supply and demand issue. Government regulation and boundaries reduce the supply.	8/10/2024 11:51 AM
96	Do not expand the UBG	8/10/2024 10:41 AM
97	Not at this time.	8/10/2024 7:43 AM
98	Expand the urban growth boundary to allow more homes with yards. This high density pack them and stack them is ruining our livability. Roads are congested and it's UNREALISTIC to believe we will give up our cars.	8/9/2024 6:12 PM
99	Industrial land should have a 7% or less slope.	8/9/2024 5:54 PM
100	Respectfully request that Metro Council consider tabling the proposed Sherwood UGB expansion plan, and require the City to reconsider its explansion goals and desires and submit a revised plan after having more meaningful input and working partnerships with affected landowners living and/or working the land within their property.	8/9/2024 11:31 AM
101	Please don't do it, too many people at present is causing dangerous traffic situations. High speeds and too much congestion on country roads not built for this volume of traffic. Too many accidents have already occurred and if Metro does not take this into account Metro will be legally responsible for future accidents and needless deaths. Study the traffic on the surrounding country roads, you will find this to be true.	8/9/2024 7:04 AM
102	Please do not expand into the country. Getting closer to ny house every year.	8/8/2024 9:08 PM
103	Just say no	8/8/2024 7:50 PM
104	Sherwood is the last smaller scale town close to I5 and we do not have the capacity to grow anymore. Traffic is already awful and we don't have the space to expand any longer.	8/8/2024 2:00 PM
105	The urban reserves were so designated to account for urban growth boundary expansion in the region. Sherwood has completed a plan for one of those designated urban reserve areas, demonstrating how it could be developed and served with utilities and governance. Metro Council should approve the UGB expansion request, finding that Sherwood has met the requirements of the Metro Urban Growth Management Functional Plan and has put forth a plan to help provide needed jobs and housing to our region.	8/8/2024 1:13 PM
106	The more time these processes take and the more complicated and prescriptive the results are, directly relates to a higher cost of land and for meeting future housing demand and employment needs.	8/8/2024 12:08 PM

107	We have lived in Sherwood for 22 years. We will soon be in a home too large for us. We would like to stay in the community we helped build, but there are no single housing 55 and older neighborhoods, preferably gated. AND they will be small homes that most likely are unaffordable. Chew on that!	8/8/2024 11:48 AM
108	I have lived in Sherwood for almost 30 years. During that time it has blown up, we are losing the small town feel we used to have. Please help keep us from growing anymore west and explore other opportunities. Keep what little beautiful country we have left just how it is.	8/8/2024 11:47 AM
109	Please don't do it.	8/8/2024 11:28 AM
110	If possible slow the expansion down. With slowing population growth & other areas expanding, infrastructure that is inadequate, this should not go forth as is. We want to preserve an Oregon life style, not become California.	8/8/2024 11:10 AM
111	No	8/8/2024 10:50 AM
112	Added info in previous page	8/8/2024 9:43 AM
113	Do not do this to Sherwood!	8/8/2024 7:19 AM
114	My ask of the Council is quite simple. Follow the outlined legislation, purpose and protocol for 20 year outlook for UGB expansion requests, and Follow the Facts. The Sherwood West Concept Plan may appear to be an impressive package; however it represents the view of politicians and commercial developers and not a demonstrated need for more developable land.	8/7/2024 8:32 PM
115	Metro has the power to protect Oregon from urban sprawl. The plan does just the opposite of that and without data to support any demonstrated need or realistic achievable benefit.	8/7/2024 8:15 PM
116	do not allow sherwood to expand the ugb, there are many places already in the region that has opportunities for additional jobs and residential growth	8/7/2024 4:36 PM
117	I hope Roy Roger's Road does not get overwhelmed. I work in Elmonica and live in Wilsonville, and during the afternoon commute, it is faster than taking I-217.	8/3/2024 8:38 PM
118	See main essay on my criticisms, but otherwise I'll mention neighboring communities each had UGB expansions in the past cycle (King City out to Roy Roger's Rd, and Wilsonville with Frog Pond) that have not been developed yet, providing more area housing needs. In addition, a mid cycle swap in benefit of Tigard, taking acres from Damascus, adds additional housing land, making additional growth unnecessary.	8/3/2024 12:03 AM
119	There are zero amenities (stores, restaurants, gas stations, etc) in that part of town. Please make developers include those in their plans. I understand the land in this area is expensive, and the more houses they can squeeze into an area, the more profit they make, but it’s counterproductive to the sense of community that all these surveys speak so much about. Please don’t force an entire town’s with of new residents to drive to 99W/Sherwood Blvd or 99W/Roy Rogers for everything. Provide these basic services for these residents closer to their homes.	8/2/2024 3:27 PM
120	Although I think that Sherwood has the right mindset with keep the goals of the state in tact with the chip manufacturing, it seems like they are behind on timing. I feel like there are better areas with freeway access for transportation, if they build out the land off of Roy Rogers as employment/industrial it seems like there's limited future growth beyond this. I would recommend areas like Hillsboro, Tualatin, and Wilsonville. I think that was a bad planning part on Sherwood and the panels.	8/1/2024 12:39 PM
121	I did not answer about the Sherwood proposal as I am not in that area. However, I did indicate my overall preferences for what should be considered in UGB decisions.	7/30/2024 7:46 PM
122	There are a lot of small acreage lots with housing already on them and I would expect most of these lots would not be available for development for more than twenty years from now. There is also farming activities going on in the area, that do not appear to be available for development in the near future. There appears to be no real adequate plan for future transportation, water and sewer, and electricity, that will adequately serve the current area, let alone any future expansion.	7/30/2024 9:09 AM
123	The west side has such heavy traffic due to the extensive growth, I hope the new streets are accommodating of this reality.	7/30/2024 8:24 AM

124	Sherwood has a comprehensive plan and they know what is best for their city. Lattititide should be given to incorporate city objectives. There is too much top down planning.	7/30/2024 7:20 AM
125	Need to have Development Pay for itself. Putting new infrastructure on the backs of current residents is not acceptable. Develop and dash ,leaving "us" to pay for fire, police, schools, etc. part of the Development Ponzi scheme we are still buying into.	7/29/2024 9:42 AM
126	Let's not eat up more rural land unnecessarily. Instead, let's focus on greater density within the existing urban area.	7/28/2024 8:39 AM
127	Housing is unaffordable. Do not accept that the west coast needs to be expensive. We made it this way. We need a reset. We can and should set our goal to be more affordable than the Mid-West. Build more housing. All kinds of housing.	7/25/2024 7:25 PM
128	I'm strongly in favor of expanding the UGB as described in the Sherwood proposal. Long overdue!	7/24/2024 5:40 PM
129	Please look at the assertions of the City of Sherwood with a critical eye. Throughout the public outreach process they have often used vagueness and begged off serious concerns with a statement of it being to early in the process to make detailed plans.	7/24/2024 4:09 PM
130	Move to California if you want sprawl. Seriously, this is so irresponsible of you.	7/24/2024 7:36 AM
131	Our family has owned property in Sherwood for more than 100 years. We love the area and are thankful that METRO and the City of Sherwood planners are carefully considering options.	7/23/2024 9:29 PM
132	Denser	7/23/2024 8:58 PM
133	I have followed the preliminary work done by the city of Sherwood and believe they have captured the needs of the community and this expansion will make Sherwood stronger and provide more "Sherwood Quality" community around the High School and green land areas. Sherwood is unique and we'd like to see more people have the opportunity to be apart of this great community.	7/23/2024 8:41 PM
134	Just don't do it. I know there's a lot of pressure from developers and right-wing politicians to eliminate the UGB, but it has served us so well. Give the new middle housing and other infill opportunities a few years to show whether, as the growth projections suggest, they will provide adequate places to develop new housing that is more suited to achieving the region's climate and lifestyle goals.	7/23/2024 6:47 PM
135	Look forward. The future doesnt call for this	7/23/2024 6:25 PM
136	Stop it. Look at your own life	7/23/2024 3:29 PM
137	The several decades of suburban expansion since the Highway boom have definitively shown us that sprawl does not creat good communities, much of what made this region great and unique has been torn apart by Highway expansion and our main goal should be to fill the void left in its wake, expanding the growth boundaries would be contrary to that	7/23/2024 3:25 PM
138	If growth continues out in farm and agriculture areas, you will find one day there will no longer be berry picking, fresh eggs, pasture raised meat, flower farms and wineries, that people love to venture out to. You will also create a traffic nightmare by putting commuter roads where livestock live and tractors and other machinery will share those same roads.	7/23/2024 2:24 PM
139	The current untenable traffic problems. The adequate amount of buildable land within the current boundary. The financial interest in builders dominates the planning proposal, not the majority of citizens.	7/23/2024 12:17 PM
140	Please give credence to the comments of the public. Don't let the developers rule or community. They are here for the profit, we live here.	7/23/2024 11:53 AM
141	I would like to see more incentive provided for increasing transit options. Considering Sherwood's location within the Greater Portland Area, I imagine the increase in UGB will result in a increase in automobiles on the roads. Can there be a way to ensure an increase of transit options as part of the increase in UGB?	7/22/2024 6:10 AM
142	The area is losing residents. There's no reason to extend the growth boundary. Gentrify downtown. Leave the surrounding wilderness and farmlands alone. You're bought and sold by developers so I don't even know why I'm filling out this stupid thing.	7/21/2024 9:04 AM

143	I. The greatest asset to the Portland area has not been and will never be humans or anything made by man, but the natural bounty provided us all by the Earth. II. If we cannot live beautifully, why should we live at all?	7/20/2024 9:02 PM
144	Please never expand urban growth boundaries. Encourage density within existing urbanized footprints. Vastly expand public transit. Stop widening freeways. Fund housing as a human right.	7/20/2024 7:43 PM
145	Thank you for reaching out for opinions,	7/20/2024 10:44 AM
146	Make sure developers are legally on the hook to live up to their obligations instead of flaunting their disregard of the rules.	7/18/2024 9:47 PM
147	n/a	7/18/2024 12:06 PM
148	This proposal is the definition of car-dependent sprawl and should NOT be allowed.	7/18/2024 10:24 AM
149	We need more housing for seniors- single level, accessibility features.	7/18/2024 6:22 AM
150	Cycling, walking, and transit should not simply be options but the preferred mode of transportation around a new neighborhood such as this.	7/17/2024 6:53 PM
151	I hope you know how much of a transparent Money Grab this proposal is. Couched in disarming political jargon. The proposed expansion is in an area that struggles to support the residents as is. Highway 99 and 217 are virtual parking lots 80% of any day. Growth without sufficient infrastructure is irresponsible bordering on nefarious.	7/17/2024 6:18 PM
152	Unless the development pattern requires reuse and redevelopment of existing built areas first, while providing space for parks and natural areas, the expansion effort is based on false pretenses.	7/17/2024 2:26 PM
153	Stop building up over our beautiful land. This is the reason so many of us moved here.	7/17/2024 2:06 PM
154	We need more NW 23rds not more Lake Oswegos. If cities want to expand they need to do so in ways that allow for more mixed housing and not restrict the expansion area only for the wealthy.	7/17/2024 9:25 AM
155	I’m gonna be so real with yall. I come from Texas, and while they have a lot of draconian social laws, they know how to build housing — fast. Which is why housing costs are so cheap compared to here. While I don’t want 20 lane highways or single family suburbs everywhere, approving more land at a faster pace to build housing can change the game. Please approve the Sherwood proposal and continue expanding the boundary piece by piece.	7/16/2024 11:23 PM
156	I think it’s probably most important to consider the nearby communities and the transportation issues. I won’t be affected at all by this given where I live and I no longer own a car. Hopefully, adequate transit will be accessible to these new residents	7/16/2024 8:52 PM
157	Sherwood is a desirable city to live in because of its charm. This expansion would take away some of that charm and spread the city further apart instead of building it together creating more community	7/16/2024 8:51 PM
158	Does Metro conduct any evaluation (or require this of the applicant cities) to determine if this is the highest and best use of this area of the urban reserve, and/or whether there is not another place within the urban reserve that is better suited for an expanded UGB (even if it's in another city)? It seems misguided that cities apply for UGB expansion, instead of Metro determining where and when they should occur.	7/16/2024 8:43 PM
159	The roads that people will use to come and go from the new area. The roads already don’t support the population.	7/16/2024 6:32 PM
160	As a regional government, I believe that Metro Councilors have a responsibility to go out and talk to communities about the vision the Metro Council has for them and to listen to community feedback where they are. Decisions at Metro are made with City and County staff attendance in morning meetings, but they should attend evening meetings with Councils and Planning Commissions to hear the citizens sides of the stories, not at Metro. My opinion.	7/16/2024 5:01 PM
161	If you plan for decline you will likely achieve it.	7/16/2024 9:07 AM
162	Better increase of diversity at Metro in the team.	7/16/2024 8:01 AM
163	Just say NO, there is no reason for it. Approving this sprawl is not what METRO is supposed	7/15/2024 8:52 PM

	to be doing.	
164	Please clean up the trails at Mount Talbert Nature Park. So much poison oak and we need to do gymnastics to avoid it when hiking.	7/15/2024 7:57 PM
165	Sad to see our farm la d go to waste, we will never have that fertil land back ever again	7/15/2024 6:50 PM
166	I'm really proud of Metro and the UGB. Let's keep moving, and do it thoughtfully and slowly.	7/15/2024 6:48 PM
167	Make sure to preserve wildlife habitat and include good solar and other renewable energy options	7/15/2024 6:00 PM
168	Prioritize affordable single family housing and safe and affordable public transit.	7/15/2024 5:23 PM
169	More public transportation. More parks and trees!	7/15/2024 5:15 PM
170	I vote for no growth, Mother Nature thanks you	7/15/2024 4:41 PM
171	Please consider the desires of the people who call Sherwood home. You only need drive down Roy Rogers Road and see the abomination of development there to understand our intense contempt at the idea of those developers getting any closer to our bucolic countryside and beautiful rural setting. A 42% increase in the size of our city is unnecessary and unwarranted. Construction of this size will be a burden to all who live in the area for years to come.	7/15/2024 3:47 PM
172	Expand the boundary the maximum amount possible! The region needs more single family homes-thousands more homes!	7/15/2024 3:03 PM
173	Our land use laws have served us well, and has strong support. Going forward, we need to be flexible to address opportunities as they arise, and act far faster.	7/15/2024 2:20 PM
174	Again, don’t mix residential with working farm ground. Example, Roy Rogers Rd, one side now high density residential and the other ACTUAL working farm ground.	7/15/2024 1:39 PM
175	Thanks	7/15/2024 1:20 PM
176	Don't encourage expansion of the UGB under the disguise of affordable housing. In-fill and up zoning in close-in locales can solve the housing needs and address traffic and transportation issues. With all the expansion, where will we be in 20 or 40 years? Sprawl is not the answer no matter what it is called. Smart in-fill and upzoning development makes sense -- especially given the aging demographics. The new single-family neighborhoods will be empty areas in 30 years. Thank you.	7/15/2024 1:20 PM
177	Metro needs to remember that UGB amendments can't be undone, and that the UGB is about the only truly effective growth management tool in the US today. Consequently, what Metro does with the UGB is central to its success as a regional government. Metro needs to embrace this critical role and lead publicly to build understanding and support for probably the only thing that it does that has true and lasting value and impact. In addition, Metro needs to work with its jurisdictional partners to maintain, revise and needed, and publicize its vision for the region. Today, the 2040 Concept Plan is now 30 years old. Metro has ignored it's fundamental role as regional planner for way too long. That vision is out of date, unknown, and not authoritative. Metro has been given the opportunity to lead with vision, but it has insisted on doing nothing of the sort. For too long, Metro leaders have insisted that no more planning is necessary while ignoring the plans and vision that it has. Further, plans only represent the consensus of the moment they were adopted. Keeping plans and visions alive is an ongoing responsibility. It require work and commitment, and Metro has provided neither. If Metro doesn't want the UGB savaged by self-interested development forces, then it needs to frame the UGB by something larger. Metro has completely failed to do that, and the result is the kind of result we saw in the last Legislative session where Democrats, led by Governor Kotek, championed UGB amendment actions that would fundamentally make Metro, and this process, irrelevant. In addition, while Metro Councilors name-check climate as a major concern, they do nothing. They continue to push for highway expansions, and they have done nothing to update the 2040 concept to reflect concerns for climate and carbon emission reduction. Frankly, the emperor, in this case Metro, has no clothes. But Metro certainly like what it sees in the mirror. Please get real! Stop playing games with the region's future and get to work, particularly on the things Metro is uniquely charged with. Time is flying and you are not in the game.	7/15/2024 1:17 PM
178	I do not support this at all! Fix downtown Portland first!	7/15/2024 1:15 PM
179	No more concrete jungle. The traffic is HORRENDOUS around here. Too many cars and new	7/15/2024 12:50 PM

	crappy homes.	
180	Wilderness spaces are important for so many reasons, especially as climate change will be making urban life even more warm and unbearable in the future. I'd rather see Metro use the space already allotted to it than paving over even more land.	7/15/2024 12:44 PM
181	Fewer parking lots, less sprawl, more dense housing, narrow freeways and add tolls, more bike paths	7/15/2024 10:36 AM
182	Quit allowing land waste with huge estates. Focus on density and cleaned up safe transit and bike paths.	7/15/2024 7:31 AM
183	No	7/15/2024 6:09 AM
184	Please don't expand. The city has plenty of room for development inside city limits. In addition king city has already expanded and is working on developing a large residential area just down the road.	7/14/2024 6:17 PM
185	Thanks for asking	7/14/2024 5:42 PM
186	Approve it	7/14/2024 5:16 PM
187	Don't let existing Sherwood residents vote down UGB expansions that are needed to help the region accommodate growth and affordability.	7/14/2024 4:02 PM
188	Just like with the Brookman Rd expansion I believe the council will push this through, regardless of your employers, the voters.	7/14/2024 3:43 PM
189	Prefer to not include Sherwood in the urban growth areas.	7/14/2024 3:30 PM
190	Please do not approve the Sherwood West Plan.	7/14/2024 2:25 PM
191	Light rail expansion on the 99 corridor	7/14/2024 12:48 PM
192	I reject the proposal. I think it’s important to keep farmlands and keep this city a somewhat “country” suburb. Tigard and tualatin are close enough and are incredibly overdeveloped. We don’t want Sherwood so overdeveloped. No one moved to Sherwood wanting it to end up like Tigard or tualatin.	7/14/2024 12:16 PM
193	This is not the right thing to do. When this was first proposed in 2015 it was a 50 year plan. Here we are 9 years later and they are moving forward full speed. We all were against this in 2015 and we still continue to be apposed now. Do not allow the sheriff expansion. With the expansion of King City it's already going to bring a huge influx of people, cars and business to this Sherwood area. We don't need more. We need land to grow food. We need trees. We need space for wild animals. This can not happen. As rural residents of Sherwood we can't vote on elected officials that make the choices that effect us and not those in town who do get to vote. Please let our voices be heard. We do not support this expansion. This is the only way we can be heard.	7/14/2024 12:09 PM
194	Do not expand Sherwood’s urban growth boundary	7/14/2024 10:52 AM
195	The city of Sherwood residents voted a resounding NO for expansion - 86% rejected this expansion plan. We are not willing to fund such expansion when we already added land into the UGB an poor planning as led to a waste of resources and ag land (massive high school that tax payers are having to pay for)	7/14/2024 10:32 AM
196	Resources are already scarce in rural Sherwood. Please don’t exacerbate that.	7/14/2024 10:29 AM
197	No more growth in Sherwood. We are being squeezed.	7/14/2024 10:16 AM
198	Metro should consider the city of Sherwood’s blatant rejection of the wants and needs of its residents and bordering residents. We have demonstrated over and over to the city and metro, that this expansion is both unneeded and unwanted. Much of developed Land within city limits sits vacant, neglected, and unused. Metro And the city of Sherwood should be protecting precious farm and agriculture space, rather than promoting urban sprawl. Please reject this proposal.	7/14/2024 10:14 AM
199	Schools cannot take any more students. Please consider grocery shops being better accessible. Growth isn’t always best.	7/14/2024 9:47 AM
200	Less low density housing. And how will Trimet serve this area?	7/14/2024 9:30 AM

201	For the love of god please get housing prices under control!	7/14/2024 8:21 AM
202	There needs to be infrastructure already IN PLACE before you expand. The 2020 bald peak fires are an excellent example of why we need to be prepared BEFORE you expand. This one incident required the involvement of many multi agencies and could have resulted in a much larger devastation and loss of forest, wildlife, domestic/farm animal life and human life if the plane dropping fire retardant wasn't diverted from Hagg Lake fire to Bald Peak.	7/14/2024 8:13 AM
203	Increase density and transit, anticipating future climate refugees.	7/14/2024 12:11 AM
204	The city has a lot of un unused or poorly used areas and they can be transformed to a better place like broadway corridor that solely adds over 1000 homes. This type of development should be a focus of the council.	7/13/2024 12:02 AM
205	Rather than building more outside of the UGB, let's focus on creating better spaces on the land that's already allocated. Densify current areas, we don't need to increase sprawl more.	7/12/2024 8:21 PM
206	Please consider the climate and the environment and understand that gasoline cars and infrastructure that prioritizes cars is killing us in heat waves. Please consider these very serious factors and look at Europe and Asia.	7/12/2024 6:16 PM
207	This expansion should have already happened before the School was built in 2015 - Newberg, Or has updated their area and we are left behind and deal with their traffic to Hillsboro.	7/12/2024 1:24 PM
208	Sherwood has the right ideas in mind with mixed developments and alternative transportation but they need to take them further, transit being extended into Sherwood west should also be explored as it's distance from the other bus lines would make access difficult and in the largest proposed area of lower cost housing in Sherwood those living in Sherwood west may be those most dependent on transit	7/12/2024 8:12 AM
209	I can't stress enough how important it is to preserve nature and avoid suburbs.	7/12/2024 8:04 AM
210	Future mass transit expansions, leave room in regional plan to allow for cheaper future expansions.	7/12/2024 12:26 AM
211	Preserve natural lands at all costs. Build up, not out. Increase density, disincentivize personal automobile ownership & provide clean, renewable public transit. Smaller urban boundaries increase access to nature for all, decrease fossil fuel emissions and preserves ecosystems. The Pacific Northwest is supposed to be a bastion of sustainability, let's live up to it.	7/11/2024 10:39 PM
212	I grew up in both Newberg and Tigard (divorced parents). I saw Sherwood go from some fields to what it is today. It sprawls a lot more than it needs too, and driving to there and through it is miserable. I'm nervous about continuing to focus on roads instead of public transit, and if we want housing to be affordable and Sherwood to be accessible to folks, it needs to move away from single family homes. Thank you	7/11/2024 7:03 PM
213	You really messed up in expanding Happy Valley without planning to run high capacity transit to serve it. You doubled down on this error by trying to run an expressway to serve the area, instead of transit. Now, you're on course to repeat your mistakes in Sherwood. Are you stupid, or just corrupt? Don't do it. Stop yourselves before you offend again.	7/11/2024 6:16 PM
214	Do not expand the UGB. No more freeways. No car dependence.	7/10/2024 10:17 PM
215	Please do what you can to encourage mixed-use transit-oriented density throughout the metro region, thanks.	7/10/2024 12:38 PM
216	Please don't expand the urban growth boundary in Sherwood. Our town has reached its limits.	7/9/2024 9:57 PM
217	Yes! The greatest consideration should be given to the plan and proposals from the local community.	7/9/2024 3:51 PM
218	no	7/9/2024 3:20 PM

Q1 What do you most want to see preserved as greater Portland continues to grow?

Answered: 340 Skipped: 25

#	RESPONSES	DATE
1	Portland and Oregon needs to keep our lands preserved, the farmland, the natural areas, and the like. There's been far too much expansion, with virtually no consideration to infrastructure. It's become so bad that I will likely move out of Oregon as the traffic is untenable. Areas like Bull Mountain and the expansion west into the Scholls area are disheartening and honestly depressing to witness. As someone who moved from Tigard to Sherwood to escape the rampant influx and horrendous planning, I'm fearful of what your plan is for Sherwood and beyond.	8/23/2024 10:06 AM
2	Parks and rec area	8/22/2024 9:51 PM
3	Farmland and rural areas	8/22/2024 9:44 PM
4	I most want to see our green spaces and parks preserved, ensuring that all generations can enjoy the natural beauty and outdoor opportunities that make Portland unique.	8/22/2024 9:42 PM
5	Farmland	8/22/2024 9:38 PM
6	Farm land	8/22/2024 7:24 PM
7	Our agricultural land!	8/22/2024 6:57 PM
8	Open space, farm land, landscape views	8/22/2024 6:51 PM
9	Mass transit	8/22/2024 6:46 PM
10	Farm land	8/22/2024 6:44 PM
11	Farm land, country roads, small town feel, less traffic,	8/22/2024 6:29 PM
12	Farmlands and fields	8/22/2024 6:28 PM
13	Partnerships across different levels of government, the private sector, and non-profit organizations.	8/22/2024 6:06 PM
14	Farmland	8/22/2024 4:57 PM
15	The Old Growth Timber 200 year plus trees	8/22/2024 4:38 PM
16	Ag land.	8/22/2024 1:13 PM
17	Farmland	8/22/2024 11:42 AM
18	Compact city (easy and quick to get from one side of the city to the other). Preservation of nature outside the city. Close proximity to nature.	8/22/2024 11:39 AM
19	I would like to see farmland and trees preserved. Everytime a developer comes in and develops land into $700K homes (not affordable to true Oregonians only california transplants) he cuts down 100's of large mature trees and plants one the size of a charlie brown christmas tree and calls it good	8/22/2024 10:11 AM
20	Our natural and rural areas.	8/22/2024 10:08 AM
21	Farmland and forest	8/22/2024 2:52 AM
22	Habitat for wildlife	8/21/2024 11:09 PM
23	As Portland grows I would like to see the beauty and charm of existing neighborhoods protected. Too often decisions are made which prioritize currently popular political priorities which end up trampling over the livability of existing neighborhoods.	8/21/2024 10:52 PM

24	Farmland, access to nature, a relatively compact city, lack of suburban sprawl, relatively low traffic congestion.	8/21/2024 10:47 PM
25	Tress and water quality	8/21/2024 9:32 PM
26	affordability	8/21/2024 8:16 PM
27	The natural beauty of Oregon should be preserved. It is also important to preserve wildlife habitat and local agriculture. Given global climate change Oregon wine country is anticipated to have large growth in industry in the upcoming future. Preserving land where this local agricultural can flourish is imperative. Protecting the water shed is also important, given the many threatened species that live in the surrounding area.	8/21/2024 6:06 PM
28	Farmlands and natural areas	8/21/2024 5:50 PM
29	The natural lands surrounding the city.	8/21/2024 4:55 PM
30	Livability. This includes affordability, connection to nature and lack of traffic congestion.	8/21/2024 4:22 PM
31	Livability and agriculture. The urban growth boundary is designed to protect farm land and preserve the livability of our state and it should be allowed to work as intended.	8/21/2024 3:40 PM
32	Continue to protect green spaces and saving older homes instead of developers coming in and bulldozing them down. incorporate more of these in newer developments. Seeing the high-density houses go in with little to no regard for trees, green space is making our area look every other area in the country instead of preserving the history and natural beauty of our state.	8/21/2024 2:58 PM
33	Preserve green spaces, prevent sprawl, increase density	8/21/2024 2:35 PM
34	1: Free Choice of how to pursue happiness, including where to live. 2: Rural acreage close to, and within greater Portland, that protects both natural and economic characteristics.	8/21/2024 10:54 AM
35	farm lands and wildlife.	8/21/2024 8:33 AM
36	Farm land	8/21/2024 7:10 AM
37	A good quality of life. Enough schools and jobs and roads to support the number of new homes being built. And preservation of the natural landscape.	8/20/2024 11:35 PM
38	Public green space Pedestrian and bike friendly community centers	8/20/2024 7:43 PM
39	Parks. Concerts, high quality establishments	8/20/2024 6:24 PM
40	Farmland and green spaces	8/20/2024 6:21 PM
41	I want to see farmland and natural areas continue to be preserved.	8/20/2024 6:19 PM
42	Green spaces, protected habitat areas	8/20/2024 5:00 PM
43	farm and forest land	8/20/2024 4:55 PM
44	Rural farmlands	8/20/2024 4:53 PM
45	Larger lot sizes	8/20/2024 4:49 PM
46	wildlife habitat, farmlands.	8/20/2024 4:48 PM
47	Farmland, green space, horizon lines.	8/20/2024 4:25 PM
48	Farm land and outdoor spaces	8/20/2024 4:20 PM
49	Productive farmland	8/20/2024 4:18 PM
50	PRESERVE Farmland, more density housing in areas already in the UGB, not increasing growth being driven by developers but SMART GROWTH	8/20/2024 4:10 PM
51	Protection of Title 13 areas in the form of small tree farms and woodlots where wildlife has take refuge, including creeks and wetlands.	8/20/2024 4:03 PM
52	Farm Land, open space, environmentally sensitive Areas	8/20/2024 3:52 PM
53	farmland, wild animal habitat, forests	8/20/2024 3:52 PM

54	Farmland, wineries, forests and parks	8/20/2024 3:46 PM
55	Green Space	8/20/2024 3:46 PM
56	Substantial wetlands & navigable water ways	8/20/2024 3:31 PM
57	Preservation of agricultural land and open space. The loss of agricultural land is disproportionate to the need for growth and expansion with industry. The focus should turn to using already developed urban land before expanding into precious agricultural areas.	8/20/2024 2:53 PM
58	Quality of life	8/20/2024 2:01 PM
59	Greenspace	8/20/2024 1:47 PM
60	Our farms, vineyards, our trees and affordable housing.	8/20/2024 10:54 AM
61	Green space and open land (used as natural reserves and agricultural areas)	8/20/2024 9:44 AM
62	Rail transit rights of way	8/19/2024 6:09 PM
63	farmland and country acreage preserved	8/19/2024 12:45 PM
64	Preserved nature, less sprawl	8/18/2024 11:22 PM
65	The current urban growth boundary boundary	8/18/2024 10:17 PM
66	Agriculture land.	8/18/2024 9:24 PM
67	Agricultural resources, our natural spaces, and our planet. Sprawl consumes more farm land, more natural habitats, and creates exponentially more GHG emissions which will destroy our planet.	8/18/2024 8:37 PM
68	Natural spaces	8/18/2024 8:30 PM
69	Slow it down, big housing developments with out the infrastructure is horrible. Take for instance, the high school the walk way across 99 3 years after the school opens. Someone had to get hurt before they did something . Now it’s just a cluster, and drop off one way in , one way out. I’m sick of the lack of common sense that goes into planning.	8/18/2024 7:01 PM
70	Farm land and green spaces near our urban centers.	8/18/2024 5:10 PM
71	Our green space and lack of sprawl. Part of what makes this area great is the density and strong urban growth boundaries that created the cities in the Portland area.	8/18/2024 3:42 PM
72	Keeping Sherwood a small town, single family homes and not apartments and condos.	8/18/2024 3:25 PM
73	Natural and agricultural land.	8/18/2024 2:37 PM
74	Farmland, keep the UGB in tact.	8/18/2024 2:25 PM
75	Our lush green spaces and forests	8/18/2024 2:25 PM
76	Keep the current UGB and grow through infill housing	8/18/2024 1:35 PM
77	Farmland & trees.	8/18/2024 1:21 PM
78	Honestly, as someone who has lived in Sherwood for 15 years, calling it part of "greater Portland" in the first place is offensive and concerning. What I want to see preserved for *Sherwood* is that the small town and surrounding farmland does not get sucked into the crime, homelessness, drug use, and other blight infecting Portland proper.	8/18/2024 1:20 PM
79	The existing UGB.	8/18/2024 1:11 PM
80	Nature and valuable farmland	8/18/2024 12:49 PM
81	Farmland - use the old and empty buildings before allowing to build more.	8/18/2024 12:29 PM
82	Farmland and forest.	8/18/2024 11:27 AM
83	Farm land	8/18/2024 10:00 AM
84	Farm land and better infrastructure to handle the growth, BEFORE you grow anymore!	8/18/2024 9:40 AM
85	Farms, woodland areas, and small town atmosphere.	8/18/2024 7:48 AM

86	Rural farm land	8/18/2024 7:19 AM
87	Agriculture, farmland, forestry. Repurpose or demo existing old buildings and land that is wasted within the current boundaries.	8/18/2024 7:08 AM
88	Parks, farms, Open space	8/18/2024 6:28 AM
89	Nature, trees, fields	8/18/2024 1:08 AM
90	farmland	8/17/2024 8:46 PM
91	Affordable housing and access to parks, state parks, green areas, etc	8/17/2024 2:48 PM
92	I value the variety of outdoor activities.	8/17/2024 9:10 AM
93	Farmland and forest	8/17/2024 8:27 AM
94	Farmland	8/17/2024 8:02 AM
95	Keeping urban sprawl limited, maintaining natural lands especially wetlands and wild habitat.	8/17/2024 5:18 AM
96	Forest and farm land	8/16/2024 11:03 PM
97	We need more space. We are ruining life for the majority in order to appease the few, often very wealthy. UGB is not a great thing.	8/16/2024 9:55 PM
98	Rural spaces and limiting growth of surrounding cities	8/16/2024 9:31 PM
99	Quality of life and open spaces. Putting high density homes in areas without transportation options will lead to excessive congestion.	8/16/2024 4:23 PM
100	Safe, clean and robust communities living in harmony with open protected spaces	8/16/2024 4:23 PM
101	Agricultural land that makes the area what it is. No more packed together houses with no character.	8/16/2024 11:44 AM
102	farmland, natural spaces, lower traffic	8/16/2024 7:35 AM
103	Water & air quality.	8/15/2024 1:41 PM
104	Green space…parks…small produce farms	8/15/2024 12:15 PM
105	Farmland and scenic beauty	8/14/2024 1:08 PM
106	Fertile Farmland, natural habitats and forests.	8/14/2024 7:01 AM
107	Farmland, which is why I bought in Sherwood 20 years ago	8/14/2024 6:25 AM
108	Farmland	8/14/2024 5:31 AM
109	I would like to see farmland and the farming communities around Portland continue to thrive. Adding additional sprawl will not allow Oregonians to continue to thrive as ranchers, farmers and country folk. It changes the landscape and ruins what makes Oregon great.	8/13/2024 10:06 PM
110	WINERIES , AND FARMLAND IN SHERWOOD OREGON.	8/13/2024 8:58 PM
111	Our green spaces are quickly disappearing and being replaced by industrial buildings and high density houses. It is having an impact on different industries, air quality, congestion and more. We are building faster than we are growing trees and it is sad to see. Oregon is beautiful because so much of nature has been protected, at least until recent years.	8/13/2024 7:54 PM
112	farmland	8/13/2024 4:45 PM
113	Family farms	8/13/2024 4:06 PM
114	Sherwood and surrounding farm land areas so that there is retained access to local fresh farm products.	8/13/2024 3:46 PM
115	rural areas, farms, wineries, parks, natural areas	8/13/2024 3:29 PM
116	Less density in building. More single family homes instead of apartments.	8/13/2024 1:58 PM
117	Old growth tall trees, all greenways, wetlands, natural habitat, waterways, farmland, open fields.	8/13/2024 12:55 PM

118	Land as mark twain said " buy land they aren't making it anymore" Meaning it's hard to get back the land that is absolutely needed for farmers who have a hard time as it is to grow food for our community and wildlife plus the more homes the more pavement ie more heat and less country.	8/12/2024 6:13 PM
119	Livable neighborhoods with yards.	8/12/2024 5:29 PM
120	old trees, convenient public transit	8/12/2024 4:56 PM
121	Parks, recreation, libraries, and open spaces and agricultural land free from future development	8/12/2024 4:44 PM
122	Less people less traffic	8/12/2024 10:01 AM
123	I want to see land, farms, and agriculture preserved	8/12/2024 7:23 AM
124	Condense cities save farm land, Forrest and open spaces	8/11/2024 10:45 PM
125	Farmland and wilderness areas - please protect Oregon agriculture	8/11/2024 8:32 PM
126	Preserve green spaces in Sherwood. Oregon’s public perception is lush greenery, and yet everywhere I look in my community the green is systematically removed. It’s ugly and heartbreaking.	8/11/2024 8:15 PM
127	Árboles, parques zonas verdes. Tree, nature rich parks, more trees.	8/11/2024 2:32 PM
128	Farmland, rural spaces, forests	8/11/2024 10:27 AM
129	The availability of single family detached homes to a wide range of homeowners. Surveys continue to say young people still desire home ownership and the changing needs of baby boomers are not being met.	8/11/2024 8:18 AM
130	Our farm land! I have lived here all my life (57 years) it truly makes me sad to see Metro being hijacked by developers. The idea of the urban growth boundary was a great vision to keep urban sprawl from ruining our way of life the way it has in so many large cities, but I have seen over the years that the Urban Growth Boundary has increasingly meant nothing. Constantly building is not sustainable. We need to revisit, at the deepest level, why the Urban Growth Boundary was created in the first place and go back to the time when it meant something. When it was used as a tool to continue a high quality of life.	8/10/2024 6:05 PM
131	I would like to see the cost of housing preserved over all other things.	8/10/2024 11:46 AM
132	Protect Farm land	8/10/2024 10:36 AM
133	Agricultural and forest land	8/10/2024 9:58 AM
134	Farm land It is very sad to see so much farm land get swallowed up by large housing developments, and now on Roy Rogers Rd. businesses are taking over farm land.	8/10/2024 7:37 AM
135	Greenspace, single family home neighborhoods, safe parks.	8/9/2024 11:15 PM
136	Single family homes with actual yards	8/9/2024 6:07 PM
137	single family homes	8/9/2024 5:50 PM
138	Open spaces, small farms, and rural lifestyle within the Sherwood UGB area. While growth is necessary to address future needs it must be done smartly and prudently considering all factors and concerns particularly from those directly affected by proposed changes .	8/9/2024 11:13 AM
139	Natural spaces without residential expansion and subdivision creation.	8/9/2024 9:51 AM
140	Natural habitats, green spaces/bridges, farmland, more density less urban sprawl.	8/9/2024 9:32 AM
141	Rural and precious farm land, forest, timber and green spaces including waterways.	8/9/2024 6:58 AM
142	Our roads being somewhat managable with traffic. As a 5th generation oregonian with a 6th gen daughter. The traffic is getting horible.	8/8/2024 9:04 PM
143	Stop building everywhere. Save the trees for weather preservations in the heat. More trees more rain, win win, end the drought. Save wildlife.	8/8/2024 8:18 PM
144	Farmland	8/8/2024 7:45 PM

145	Farm land, forests, and welands	8/8/2024 7:45 PM
146	Forests, wildlife, farmland	8/8/2024 7:28 PM
147	Farmland	8/8/2024 7:19 PM
148	Farmland, wildlife areas, green space	8/8/2024 7:05 PM
149	Farmland. No concrete jungles or suburban sprawl like California	8/8/2024 6:28 PM
150	Keep land as is. No more commercial building	8/8/2024 6:24 PM
151	Trees' and open spaces.	8/8/2024 5:38 PM
152	open farm land and large open spaces for trees and parks	8/8/2024 3:43 PM
153	Farmland and small family run farms	8/8/2024 1:58 PM
154	I'm not sure about preserved per se, but funding provided for parks and trails should be prioritized to maintain green spaces and multimodal transportation options.	8/8/2024 1:04 PM
155	Suitable land prepared for residential, commercial, and industrial use inside the urban area with fewer governmental barriers	8/8/2024 12:02 PM
156	Small town feel	8/8/2024 11:42 AM
157	Land and small town feels	8/8/2024 11:42 AM
158	We need to preserve the quality of life that Portland is known for. Outdoor beauty, healthy local economies, environmental quality.	8/8/2024 11:25 AM
159	Farm lands, green forested areas. Not urban sprawl or mini malls	8/8/2024 11:04 AM
160	Farms	8/8/2024 10:47 AM
161	Open space	8/8/2024 10:12 AM
162	Preserve farmland, do not increase traffic on already broken road infrastructure	8/8/2024 9:54 AM
163	Family farms and farm and forest land	8/8/2024 9:42 AM
164	Open spaces, wildlife preservation	8/8/2024 9:37 AM
165	The love the great non developed area we live in. Metro continues to invade our small country feel. We don’t need more bullying that Metro brings to the table.	8/8/2024 8:49 AM
166	Out beautiful trees and open spaces without city sprawl and tight housing	8/8/2024 7:14 AM
167	Trees, farms, natural beauty, clean air, TRAFFIC CONTROL	8/7/2024 11:21 PM
168	Access to green spaces, forests, natural areas	8/7/2024 8:39 PM
169	Farmlands, open spaces, parks	8/7/2024 8:21 PM
170	trees, nature, farms, agriculture, clean air, no pollution, protect environment	8/7/2024 7:57 PM
171	affordable housing, jobs, community safety, people of color in charge of decisions	8/7/2024 4:34 PM
172	Homes less than 500k with yards greater than 5,000 square feet. I like to garden, but I am not wealthy.	8/3/2024 8:26 PM
173	Strip clubs, porn theaters, a verity of convenience stores	8/3/2024 3:14 PM
174	The rights of farmers & their families, farmland, native plants & trees & wildlife including the protected nesting areas, hunting grounds & migratory routes including aerially. Once forest, farm rural land is paved it can never be restored. There's plenty of opportunities to convert un-used, partially or under-used land, buildings, homes within the UGB to better, more efficiently & effectively house people to be close to jobs, social services & stores & medical services without permanently destroying, compromising & polluting protected, finite and rich 'world class' soil, land or water. Also, with being resourceful, creative & utilizing recently passed regulation, it's possible to prevent the destruction of protected wildlife, native plants & essential tree canopies & conserve the history, beauty, rich soil, farmland, nature & topography of Oregon.	8/3/2024 12:50 PM

175	Natural areas, specifically varied wetlands.	8/2/2024 11:42 PM
176	Existing areas of non-residential community spaces, e.g. restaurants, shops, meeting spaces, gardens, etc., that are a reasonable walking/biking distance from homes	8/2/2024 3:13 PM
177	Parks and trails for the community	8/1/2024 12:31 PM
178	Farm land	7/31/2024 11:31 AM
179	Bigger natural landmarks such as lakes, river beds, and heavily, dense, forested areas far outside the current developments	7/31/2024 8:37 AM
180	Continued preservation of natural spaces such as Metro has been doing.	7/30/2024 7:44 PM
181	nature, forests	7/30/2024 2:53 PM
182	The livability of the area. Which would not include expanding the area without an adequate transportation system. Travel times on I-5 and 99W that include Sherwood have almost doubled in the last 20 years.	7/30/2024 8:55 AM
183	It is sad to see all the apartment buildings being constructed with little or no greenspace planned into the designs. People living in apartments need nature too!	7/30/2024 8:22 AM
184	character in neighborhoods and diverse housing options	7/30/2024 7:14 AM
185	Accessible commercial and residential spaces for people with mobility issues. Affordable housing. More public trash cans. More parking.	7/29/2024 11:37 PM
186	Areas con naturaleza,transportación pública.	7/29/2024 7:21 PM
187	Access to natural areas, close to the city. Green space amidst population growth.	7/29/2024 11:48 AM
188	Stafford Area- A regional Climate Action Plan should be developed. Area is surrounded by 4 of the top 5 greenhouse gas emitters in the region. Stafford is the "ONLY" open space area that would be a GREAT carbon sequestration sink. Council are on board with this.	7/29/2024 9:35 AM
189	green spaces, old growth trees, wildlife habitat, peaceful surroundings	7/29/2024 7:48 AM
190	NO SPRAWL, MORE DENSITY	7/28/2024 12:50 PM
191	Rural areas outside the urban growth boundary. Walkable/bikable neighborhoods within the urban area.	7/28/2024 8:34 AM
192	Natural áreas, forest, farmlands	7/28/2024 8:26 AM
193	I want to be able to leave the metro with a short 20 minute drive. I don't want so much congestion that I cannot leave the city/suburbs in a reasonable amount of time.	7/25/2024 7:17 PM
194	Strong neighborhoods, nice parks for recreation	7/24/2024 5:33 PM
195	Wise planning for growth, taking into consideration needs and protecting farm land and natural resources.	7/24/2024 3:55 PM
196	The opportunity to produce housing as inexpensively as possible to keep housing affordable for all regional residents.	7/24/2024 11:56 AM
197	Our current UGB. Enough sprawl. I left San Diego 16 years ago because sprawl ruined California. Let's not repeat that mistake here.	7/24/2024 7:32 AM
198	Forest/habitat for animals	7/24/2024 12:10 AM
199	Good jobs, all kinds of housing options that are attractive and safe, parks, agriculture and businesses to employ people so that we can manufacture top-notch goods in Oregon.	7/23/2024 9:20 PM
200	Denser development	7/23/2024 8:54 PM
201	Create access to good housing in good neighborhoods. Overall preserving existing neighborhood communities and enabling good communities for the future.	7/23/2024 8:30 PM
202	I want to preserve our region's phenomenally productive farm and forest land, which we have tragically failed to do in the face of exclusionary, detached single family home mandates, particularly though not exclusively in suburban areas.	7/23/2024 6:39 PM

203	Vacant land	7/23/2024 6:19 PM
204	Property rights and value	7/23/2024 3:19 PM
205	The historic human scale neighborhoods left from the old streetcar network, small city blocks, mixed use and multi family housing	7/23/2024 3:14 PM
206	Low traffic around Farm/Agriculture areas, due to animals, crops and machinery.	7/23/2024 2:12 PM
207	agricultural land and nature habitat	7/23/2024 12:06 PM
208	Farmland. We need LOCAL food sources.	7/23/2024 11:17 AM
209	Farmland and rural areas at risk of development	7/23/2024 2:36 AM
210	Environment especially our tree canopy	7/22/2024 3:06 PM
211	I want to see med-high density housing to be prioritized over single family lots	7/22/2024 6:07 AM
212	Natural beauty	7/21/2024 12:16 PM
213	Wildlife habitat	7/21/2024 10:35 AM
214	Green space	7/21/2024 9:49 AM
215	The area is losing residents. There's no reason to extend the growth boundary.	7/21/2024 9:00 AM
216	Urban growth boundaries	7/20/2024 9:12 PM
217	The forests and natural ecosystems	7/20/2024 8:57 PM
218	Our urban growth boundaries should be permanently locked in place. Any growth should occur in existing urbanized land; in other words, densify, densify, densify.	7/20/2024 7:38 PM
219	Public spaces	7/20/2024 10:41 AM
220	I want to continue to see communities that provide great access to natural areas, preferably within a short walk or bike ride for most residents. I think our parks are some of our most valuable resources and they contribute so much to the health of the community.	7/20/2024 9:28 AM
221	Park land and the proximity to natural spaces (farms, forests, etc).	7/20/2024 7:41 AM
222	As much uninhabited natural habitat as possible. Including undeveloped riverfronts and other areas adjacent to waterways. Bring back the wetlands of Portland.	7/20/2024 12:38 AM
223	Natural/green spaces.	7/19/2024 4:15 PM
224	The ability to escape the urban and suburban area in a short distance.	7/19/2024 2:06 PM
225	Washington Park, Forest Park, alongside all of our other parks in Portland.	7/19/2024 12:40 PM
226	Agricultural land should not be re-zoned without the owner paying the net back taxes instead of receiving a windfall.	7/18/2024 9:44 PM
227	Green spaces.	7/18/2024 12:03 PM
228	Farm & forest. No expansion to the UGB.	7/18/2024 10:20 AM
229	Tree canopy, green spaces, floodplains. Tree canopy is the most important.	7/18/2024 6:16 AM
230	Rivers and streams, watersheds, and walking paths that provide access for all	7/17/2024 11:12 PM
231	Green space , fields, undeveloped land!!	7/17/2024 6:04 PM
232	Wetlands, riparian areas, forest tracts	7/17/2024 2:18 PM
233	Our land	7/17/2024 2:00 PM
234	Portland's commitment to creating dense, efficient, and affordable housing where people want to live.	7/17/2024 9:20 AM
235	nature	7/17/2024 1:16 AM
236	Farmland when possible	7/16/2024 11:18 PM

237	Farm and forest areas	7/16/2024 8:46 PM
238	The core downtown businesses and restaurants as well as the neighborhood restaurants and small businesses	7/16/2024 8:44 PM
239	Protect farms, forest, rural areas, quality of life, and our smaller urban footprint	7/16/2024 8:26 PM
240	Green spaces	7/16/2024 6:51 PM
241	Trees and natural spaces	7/16/2024 6:26 PM
242	Natural areas of forest, marshes, and waterways that help absorb lower the intense heat of summer and absorb the extreme rain events we have been experiencing.	7/16/2024 5:52 PM
243	Open spaces, green space.... Just because people want to move here does not mean we need provide it	7/16/2024 12:20 PM
244	Housing Variety and natural resources.	7/16/2024 10:24 AM
245	Police presence/relationships with all community members to keep our city safe	7/16/2024 8:09 AM
246	Parks and Trails	7/16/2024 8:00 AM
247	Low cost homes	7/15/2024 10:34 PM
248	Portland isn't necessarily growing. The growth assumption relies on more in-migration than out-migration, not the case recently. Portland needs to contain and preserve METRO borders. Do not build on more farmland just because it is easy. Re-develop, re-purpose, re-use existing real estate...land and buildings.	7/15/2024 8:39 PM
249	As much forest and wetlands as possible.	7/15/2024 7:50 PM
250	Space for wildlife: safe places for birds, forested areas, wetland, river access, etc. I hate watching wildlife be killed or relocated because we don't leave them space in our communities to live.	7/15/2024 7:17 PM
251	Our small cities and metro to be dissolved	7/15/2024 6:47 PM
252	Portland is a city of neighborhoods - I want that amazing diversity and sense of wonder (one experiences) kept (not preserved - like jam) and CELEBRATED!	7/15/2024 6:41 PM
253	Open spaces, the integrity of old neighborhoods- historic ones in particular, balance of low income to market rate to high end market rate- in other words a balance that includes all demographics, easily walkable and access to shops, schools, work, safety, safe and beautiful public spaces	7/15/2024 5:54 PM
254	Housing affordability and a strong economy	7/15/2024 5:28 PM
255	Habitat and habitat connectivity... keeping the 30 by 30 vision in mind (conserving 30% of the land by 2030)	7/15/2024 5:22 PM
256	Affordable single family housing	7/15/2024 5:19 PM
257	Forest. More TREES!!	7/15/2024 5:12 PM
258	Save the old historic houses	7/15/2024 4:37 PM
259	Safe cities, funded schools, managed traffic flow	7/15/2024 4:03 PM
260	Open spaces, farmland, winery areas, forested areas	7/15/2024 3:31 PM
261	The small town feel of my City (Tigard). I want to preserve the LACK OF homeless camps taking over our streets, parks and public spaces. I want to preserve the conservative values of neighborhoods, family and community vs. ushering in progressive and liberal ideologies.	7/15/2024 3:25 PM
262	Existing oatks	7/15/2024 3:00 PM
263	Our community. I do not want to service homeless in the "greater" area.	7/15/2024 2:52 PM
264	Green space	7/15/2024 2:38 PM
265	balance and faster decision making for UGB expansion	7/15/2024 2:14 PM

266	Old building, architecture and history preserved...	7/15/2024 1:45 PM
267	Existing wild places, farm land and native areas	7/15/2024 1:41 PM
268	DON'T mix farm land with subdivisions…. It's hard enough to farm without traffic making moving equipment harder. And the commuters are so angry at them being on the road….	7/15/2024 1:35 PM
269	Access to parks, forests, trails and biking infrastructure.	7/15/2024 1:17 PM
270	Agricultural land and wilderness. Discourage sprawl and residential that requires automobiles as the primary or only source of access.	7/15/2024 1:12 PM
271	Clean up Portland before spreading outwards to further communities!	7/15/2024 1:11 PM
272	Access to nature, clear difference between urban and nonurban.	7/15/2024 12:58 PM
273	Farm land.	7/15/2024 12:47 PM
274	Forests and farms	7/15/2024 12:44 PM
275	Forests and nature areas to protect animals	7/15/2024 12:41 PM
276	The ability to get outside the city boundaries within a short amount of time. Keep the boundary where it is and preserve the surrounding farmland and wide open spaces.	7/15/2024 12:40 PM
277	Habitat connectivity and opportunities for people to connect to nature close to where they live.	7/15/2024 10:53 AM
278	Urban growth boundary (PLEASE PREVENT SPRAWL!), parks, natural areas, bike paths	7/15/2024 10:35 AM
279	Vibrant, dense urban neighbors, along with green spaces.	7/15/2024 9:56 AM
280	Green space in the form of parks inside the UGB.	7/15/2024 7:25 AM
281	Trees and parks	7/15/2024 6:59 AM
282	Parks, greenspace, forests.	7/15/2024 6:34 AM
283	Middle income housing. Don't expand the boundary for McMansions.	7/15/2024 6:07 AM
284	Vulnerable ecosystems and natural areas.	7/15/2024 12:26 AM
285	Nature, local communities, and parks.	7/14/2024 9:17 PM
286	I want to ensure existing small businesses and minority-run businesses are preserved. I want minority neighborhoods to be preserved and not gentrified or torn down. I want to preserve nature and existing waterways.	7/14/2024 9:11 PM
287	Land. Farm fields. Country. Acres	7/14/2024 7:33 PM
288	Our natural and agricultural land outside city boundaries.	7/14/2024 6:14 PM
289	Green spaces for all	7/14/2024 5:37 PM
290	Water and land	7/14/2024 5:29 PM
291	Community	7/14/2024 5:15 PM
292	Greenways along waterways and ridgelines. Nature parks at major high points. High value agricultural land in WashCo and ClackCo.	7/14/2024 3:55 PM
293	Rural communities and farming communities.	7/14/2024 3:35 PM
294	Less growth, more green space and trees	7/14/2024 3:25 PM
295	I would like to see greenspaces preserved. I want my children to continue to see wetlands and the plentiful creatures that live there. I'd like to see the beauty of our area maintained.	7/14/2024 2:16 PM
296	Green areas, envrionment protected, private forests protected and waterways protected.	7/14/2024 1:53 PM
297	Forests and farmlands.	7/14/2024 12:58 PM
298	Green space.	7/14/2024 12:44 PM
299	Farm lands and agriculture	7/14/2024 12:12 PM

300	I would like to see our growth boundary remain the same, as the region has plenty of land that already sits empty, or ripe for redevelopment.	7/14/2024 11:25 AM
301	Farmland, rural areas, trees I want to keep these small communities small.	7/14/2024 11:24 AM
302	Our small community size of sherwood	7/14/2024 11:19 AM
303	Sherwood as a smaller town.	7/14/2024 11:16 AM
304	Land	7/14/2024 10:48 AM
305	Agriculture and farm land	7/14/2024 10:28 AM
306	Small towns stay small towns. Water in the hills is already becoming scarce.	7/14/2024 10:25 AM
307	Green space, farming communities, small towns	7/14/2024 10:13 AM
308	Farmland, agriculture and green spaces	7/14/2024 10:03 AM
309	Farms.	7/14/2024 9:43 AM
310	Wetland, existing forest, prairie, agriculture.	7/14/2024 9:25 AM
311	Not allowing transients and pan handlers in our nice city. Less small cheap housing.	7/14/2024 8:43 AM
312	Safe and pleasant biking and walking in all neighborhoods. Opportunities for neighbors to be together outside.	7/14/2024 8:17 AM
313	Stop the sprawl. Look to Los Angeles to see the negative affects. There needs to be balance.	7/14/2024 8:06 AM
314	Increase density while preserving existing greenspace	7/14/2024 12:07 AM
315	Green space, forest lands, infrastructure in existing neighborhoods.	7/13/2024 10:53 AM
316	Diversity in architecture, close attention to public transportation development	7/12/2024 11:40 PM
317	I love that Portland has beautiful nature very close to the metro area limits. It's always heartbreaking to see nature torn down and continue urban sprawl. I saw this first hand in Tigard near Roy Rogers and scholls ferry. I also really like how the Portland area doesn't feel like it has crazy urban sprawl and that you can get through the city quickly. Other cities with large urban sprawl that come to mind are phoenix, Denver, and LA. I don't want Portland to be anything like those cities.	7/12/2024 8:13 PM
318	Access to natural areas.	7/12/2024 7:47 PM
319	Transit access, bike lanes, sidewalks, neighborhood density, mixed use zoning	7/12/2024 6:10 PM
320	farmland	7/12/2024 5:31 PM
321	As a working commuter from Sherwood to Portland - there is nothing of value to preserve.	7/12/2024 1:10 PM
322	Population density and shared public spaces	7/12/2024 12:14 PM
323	Preserve park spaces, natural ecosystems, walkability/access to public transport.	7/12/2024 7:47 AM
324	Access and proximity to nature, metro in places and Sherwood itself especially have done well at incorporating/mixing natural area into its development, this should not falter and maybe even should improve and expand some.	7/12/2024 7:15 AM
325	Green spaces and parks, nature trails / natural areas, low-height buildings.	7/12/2024 7:12 AM
326	Wildlife corridors and community spaces.	7/12/2024 12:22 AM
327	Nature! Please keep the city from expanding even more in unsustainable ways.	7/11/2024 11:52 PM
328	Nature. Expanding the urban growth boundary negates needed commitments to mitigate climate change and stop ecosystem destruction. Leave land untouched, humans are not the only creatures entitled to the Earth and this land in particular.	7/11/2024 10:31 PM
329	Our green spaces. The thing that makes this place desirable (and livable as the climate warms) is our older growth wild spaces. Single family homes are not needed as much as shared green spaces.	7/11/2024 6:57 PM
330	The trees, farmland, natural areas, and historic pre-WW2 elements of our built environment	7/11/2024 6:12 PM

	that remain.	
331	Farmland and natural areas.	7/11/2024 4:27 PM
332	The semi-rural aspect of life on the outskirts of the UGB.	7/11/2024 10:33 AM
333	Forests, rural areas, non developed land outside the urban boundary	7/10/2024 10:14 PM
334	Agriculture land	7/10/2024 9:51 PM
335	Single Family Housing with a yard	7/10/2024 8:30 PM
336	Abundant close natural areas. Stewardship of those areas.	7/10/2024 5:14 PM
337	Natural areas and green spaces. Valuable historic buildings and community buildings.	7/10/2024 12:08 PM
338	The beauty and tranquility of the countryside of west Sherwood needs to be preserved. We don’t need any more subdivisions nor apartments out here.	7/9/2024 9:48 PM
339	The ability of local governments to be able to make decisions in their own cities best interest. Free of regional and state government interference. There are plenty of general guidelines in place.	7/9/2024 3:43 PM
340	individual livability, nature, neighborhoods, small businesses, small scale schools and other public facilities, good jobs, happy people and families,	7/9/2024 3:15 PM

Q2 What changes would you like to see as greater Portland continues to grow?

Answered: 340 Skipped: 25

#	RESPONSES	DATE
1	Infrastructure to support the insane influx of people. Traffic is horrific, the building is out of control, and people who have lived here longer than 20 years cannot afford to live here any longer. PDX is no longer amenable to folks, do something about the homeless issue and put checks in place on overdevelopment without infrastructure development.	8/23/2024 10:06 AM
2	More affordable housing	8/22/2024 9:51 PM
3	Less attention to Metro and more attention to individuals	8/22/2024 9:44 PM
4	I'd like to see more affordable housing options integrated into all neighborhoods, better access to public transportation, and the creation of inclusive community spaces that reflect and support the diversity of the Portland metro area.	8/22/2024 9:42 PM
5	Lower density housing w/larger lots	8/22/2024 9:38 PM
6	Growth for the people, not for the developers	8/22/2024 7:24 PM
7	More awareness and protection of our green spaces. The way to do this is NOT by these large swaths of land covered by cookie cutter housing with no yards or trees. So much of our agricultural land has already been covered with these. It needs to stop!	8/22/2024 6:57 PM
8	Less new houses and empty business buildings	8/22/2024 6:51 PM
9	Greater density, more mass transit	8/22/2024 6:46 PM
10	Road improvements	8/22/2024 6:44 PM
11	Stop the sprawl. Start building up not out. Use the land and vacant buildings already in existence! Less property taxes!!!	8/22/2024 6:29 PM
12	Less industrial. Warehouses continue to be built even though there is a plethora of empty warehouse space. The existing warehouse space should be utilized prior to any further construction, or permits for that matter, proceed.	8/22/2024 6:28 PM
13	Allow our region to be nimbler in addressing current and future housing and employment needs.	8/22/2024 6:06 PM
14	Revitalize urban areas that are abandoned and deteriorating areas.	8/22/2024 4:57 PM
15	Family Housing next to and adjoining parks and wetland areas.	8/22/2024 4:38 PM
16	Greater consideration of door to door transportation needs.	8/22/2024 1:13 PM
17	Implementation of plans to handle increased traffic that comes with development.	8/22/2024 11:42 AM
18	More infill housing in high opportunity areas so that Portlanders aren't priced out to the edges of the city. More investment in public and active transit infrastructure.	8/22/2024 11:39 AM
19	Not burdening the existing property owners with the infrastructure improvements and additional schools needed for those that don't even live here (yet).	8/22/2024 10:11 AM
20	Greater density and infill, especially such that it creates mixed-income buildings and communities	8/22/2024 10:08 AM
21	I would like to see underutilized or unused land and buildings be repurposed vs. continued sprawl into the countryside.	8/22/2024 2:52 AM
22	Smart density that positively impacts social predictors of health and safety	8/21/2024 11:09 PM
23	There should be better thought out investment in our transportation network. Prioritize auto traffic with high capacity, attractiveness, and generous amounts of off street bike routes. Pay	8/21/2024 10:52 PM

	attention to existing traffic patterns and work to make them more efficient.	
24	More density, more abundant infill housing, investment in transit so areas like Sherwood are reachable from areas like Gresham.	8/21/2024 10:47 PM
25	Homelessness and crime crack down	8/21/2024 9:32 PM
26	I would like to see a ton more infill. there are a lot of brownfield opportunities and a lot of neighborhoods that could thicken-up and benefit the existing residents as well as new ones	8/21/2024 8:16 PM
27	I would like to see policies enacted that are mindful, of and protect, the environment.	8/21/2024 6:06 PM
28	More recognition of climate changes needs in planning. We need local resources for food.	8/21/2024 5:50 PM
29	Higher density within the UGB to limit the cities impact on the environment and increase the city’s tax revenue per acre.	8/21/2024 4:55 PM
30	More affordable housing.	8/21/2024 4:22 PM
31	I would prefer growth happen through infill and greater density than the sprawling developments currently threatening our ag ground and green spaces.	8/21/2024 3:40 PM
32	More focus on reducing traffic that is not just adding public transit or tolls. With so much high-density development going in, it's becoming worse and worse everyday. Figure out and invest in roadways that make sense instead of just assuming people will take public transit. Or actually make our light rail more useable/high-speed...it takes 45 min to go from Beaverton transit center to PGE park. If we actually had express rail, I think more professionals and commuters would consider railway.	8/21/2024 2:58 PM
33	Increased density, transit, walking and biking infrastructure. "Baseline analysis conducted for this Urban Growth Report reveals that there is likely room to accommodate most, if not all, of the region’s existing and future housing needs inside the existing UGB for the next 20 years. "	8/21/2024 2:35 PM
34	Transportation options that efficiently use current and practical evolving modes of transportation. As an example, I do not want to see another bridge project (such as the Tillicum Crossing) that, through social engineering, only provides for a very small percentage of the population.	8/21/2024 10:54 AM
35	Road and traffic improvements.	8/21/2024 8:33 AM
36	Less government	8/21/2024 7:10 AM
37	Roads that are designed to alleviate congestion. Sherwood is small town but I sit in traffic a lot. There should be a traffic light at Chapman Rd and Hwy 99.	8/20/2024 11:35 PM
38	Redeveloping existing underutilized urban areas.	8/20/2024 7:43 PM
39	More safety. Traffic ease. High paying jobs so people here don't need to travel so far to work.	8/20/2024 6:24 PM
40	I would like to see revitalization of already developed areas.	8/20/2024 6:21 PM
41	I would like to see more critical thought in regards to expanding the UGB.	8/20/2024 6:19 PM
42	Less industrial near neighborhoods	8/20/2024 5:00 PM
43	better use of land already within the existing urban growth areas	8/20/2024 4:55 PM
44	Traffic congestion considered more intensly when developing neighborhoods	8/20/2024 4:53 PM
45	Urban growth expansion	8/20/2024 4:49 PM
46	thoughtful expansion rather than what is happening in Sherwood. The Sherwood proposal is way too large for a city of this size and encroaches on native habitats and pristine farmlands.	8/20/2024 4:48 PM
47	Is it truly growing or are we just following the money?	8/20/2024 4:25 PM
48	Smaller pockets of houses instead of mass acres of land covered with housing	8/20/2024 4:20 PM
49	Restoration of life in Portland's downtown core, the heart of greater Portland.	8/20/2024 4:18 PM
50	Again, more public comment, too many developers s d city councils looking for a tax base are driving decisions related to the UBB	8/20/2024 4:10 PM

51	Encourage and support business placement in downtown Portland area in order to utilize already existing business areas. Preserve rural areas and Oregon farming families.	8/20/2024 4:03 PM
52	Keep industrial in industrial areas and residential in residential areas, and do not invade the agricultural reserves	8/20/2024 3:52 PM
53	adequate roads, more dense housing, affordable housing	8/20/2024 3:52 PM
54	More infill and creative uses of office buildings and abandoned warehouses	8/20/2024 3:46 PM
55	Increased public transportation	8/20/2024 3:46 PM
56	housing to be more affordable, transportation system that works	8/20/2024 3:31 PM
57	Better review, consideration and preservation of agricultural land in the metro area for growth. The building and growth has not kept pace with our current resources, infrastructure and good land use management and planning.	8/20/2024 2:53 PM
58	Dedicated transportation corridors to expedite commerce, e.g., Tualatin Sherwood Rd. should have limited intersections and bypass Tualatin	8/20/2024 2:01 PM
59	focus on preservation of agricultural lands	8/20/2024 1:47 PM
60	Affordable housing, green spaces	8/20/2024 10:54 AM
61	Better planning (including securing funding and complete transparency about costs to the tax payers) for traffic changes BEFORE developments are allowed	8/20/2024 9:44 AM
62	Better investments in rail passenger transit and a long-term regional passenger rail plan so that new developments can include TOD. The region's investment in passenger rail has stalled.	8/19/2024 6:09 PM
63	Better infrastructure and condensed housing within already developed community areas	8/19/2024 12:45 PM
64	Increased urbanization, density, and density within non-Portland downtowns especially.	8/19/2024 12:05 PM
65	More dense housing, less car-centric developments	8/18/2024 11:22 PM
66	Denser housing and more public transit	8/18/2024 10:17 PM
67	Build up, not out. Nobody is asking for Sherwood West. It’s unnecessary sprawl that will compound the existing transportation issues of the Southwest Corridor.	8/18/2024 9:24 PM
68	Increase density within 1 mile around our frequent bus services and super dense high rises adjacent to our MAX stops. We need to build more inside the UGB.	8/18/2024 8:37 PM
69	Greater density of housing and amenities	8/18/2024 8:30 PM
70	Slow down the growth, get the traffic under control. From Sherwood it used to take me 50 minutes to the airport, now almost 2 hours. They need to fix the roads before adding more houses	8/18/2024 7:01 PM
71	Greater density and better transit connections through the Portland metro area. Interesting walkable neighborhoods that develop culture and community.	8/18/2024 5:10 PM
72	Densification of the city and its surrounded suburbs. If we want to retain the livability of the region by getting people to use alternate forms of transportation we need to continue to enforce the UGB	8/18/2024 3:42 PM
73	Better highways and main roads	8/18/2024 3:25 PM
74	Less urban sprawl, more density	8/18/2024 2:37 PM
75	More infill housing, fewer cars, more trains, buses, and protected bike lanes with bollards.	8/18/2024 2:25 PM
76	Better high capacity transit, density, less spawl. Municipalities should backfill, densify, and remove parking lots before being granted more land to sprawl out.	8/18/2024 2:25 PM
77	More density along transit corridors	8/18/2024 1:35 PM
78	Improved public transportation. Use existing land already inside UGB.	8/18/2024 1:21 PM
79	Stop trying to make everything part of Portland. Individual communities have their OWN rich history and connections. We are not just Portland's little subsets to absorb and use as needed	8/18/2024 1:20 PM

	by metro.	
80	Denser, smart land use of the existing UGB.	8/18/2024 1:11 PM
81	More density and better transit	8/18/2024 12:49 PM
82	Road expansion first!	8/18/2024 12:29 PM
83	Reducing the massive barriers to infill housing, and an end to frequent UGB expansions for suburban housing.	8/18/2024 11:49 AM
84	Infill, improved land-use, and no further sprawl.	8/18/2024 11:27 AM
85	The existing empty structures being utilized.	8/18/2024 10:00 AM
86	Protect farm land, while also providing more reasonably priced homes. And the infrastructure to support the housing.	8/18/2024 9:40 AM
87	Stop the dense housing if so called affordable housing that is NOT affordable!	8/18/2024 7:48 AM
88	Is Portland really growing?	8/18/2024 7:19 AM
89	Less focus on high density housing and Multifamily apartment living. Focus on using what is not used properly at this time within the boundaries just growth potential and forecasting/opportunity does not require tax payers to accommodate without due diligence to preserve and repurpose the existing land and structures available.	8/18/2024 7:08 AM
90	Fewer large subdivisions with houses stacked on top of each other. Proper roads and sidewalks paid for by developers	8/18/2024 6:28 AM
91	Well thought out and sustainable plans, ways to arrange cities to minimize traffic rather than continuing to expand roads.	8/18/2024 1:08 AM
92	More public transportation	8/17/2024 8:46 PM
93	New housing should be built on a variety of lot sizes rather than only very small lots	8/17/2024 2:48 PM
94	The greatest need that we have in Sherwood, is affordable housing for young families and seniors. We need to get creative in what we build in Sherwood. We do not have the infrastructure to support dense housing except right next to 99. And even then we don't have any transportation hubs. People move to Sherwood to feel like they're in the country a bit.	8/17/2024 9:10 AM
95	Preserve our important farmland and forest- less massive homes, more urban density and the public transport to support it.	8/17/2024 8:27 AM
96	Keeping our small cities small and rural.	8/17/2024 8:02 AM
97	Focus on density, not expansion out. And a priority on affordable housing, not larger single family homes.	8/17/2024 5:18 AM
98	Roads and traffic control	8/16/2024 11:03 PM
99	More space for more single family homes. Prices will go down and more people can live in our beautiful state. Also bigger roads and more infrastructure	8/16/2024 9:55 PM
100	Improve infrastructure such as roads bridges	8/16/2024 9:31 PM
101	I am against adding housing in areas that are already congested. I am also opposed to adding housing in areas currently designated as farmland	8/16/2024 4:23 PM
102	The elimination of urban sprawl and the protection of our natural resource environments	8/16/2024 4:23 PM
103	Portland is not growing. More people have moved out of Portland and Oregon than have moved in over the last couple years.	8/16/2024 11:44 AM
104	keep high density housing near Portland/metro cities downtown areas, better public transportation, less traffic	8/16/2024 7:35 AM
105	Adequate infrastructure planning to accommodate for necessary growth. More willingness from local jurisdictions to work with investors and developers to master-plan communities that allow for greater (& smarter) population growth.	8/15/2024 1:41 PM
106	Improved infrastructure needs to be established before any expansion in development needs to	8/15/2024 12:15 PM

	take place.	
107	Push Eastward and now Westward	8/14/2024 1:08 PM
108	Urban grown boundaries reduced to a lower rate, use land more efficiently for housing and roads.	8/14/2024 7:01 AM
109	There are plenty of homes and industrial properties without adding more homes and spreading more	8/14/2024 6:25 AM
110	Increased lanes on throughways and highways.	8/14/2024 5:31 AM
111	I would like to see further vertical growth in the current urban boundary as the infrastructure for the surrounding area isn't meant to support the proposed growth.	8/13/2024 10:06 PM
112	More forests, trees planted and LESS ticky tack multifamily housing put in.	8/13/2024 8:58 PM
113	Better handling of traffic congestion and improved caretaking of our nature and our green spaces.	8/13/2024 7:54 PM
114	less traffic	8/13/2024 4:45 PM
115	Use preexisting empty buildings vs clearing areas for new construction	8/13/2024 4:06 PM
116	Slowing down the expansion of large commercial facilities, industrial parks etc., that sit vacant for so long.	8/13/2024 3:46 PM
117	address congestion	8/13/2024 3:29 PM
118	Defund Metro	8/13/2024 1:58 PM
119	Maintain existing roads, less traffic, use abandoned buildings, industrial and commercial to be converted into housing instead of taking away more land.	8/13/2024 12:55 PM
120	Think about what your taking away from the community as you think your just building a community and the reasons people wanted to move to sherwokd to begin with isn't what sherwood is anymore. We used to be a rural close knit community filled with farms and hard working farm families. Those are less and less every year and it's just becoming another suburban area filled with homes and shopping. We've lost what sherwood is all about.	8/12/2024 6:13 PM
121	A road system developed to meetnot automobile traffic demands and less compromised for biking.	8/12/2024 5:29 PM
122	more mixed use developments so that people can enjoy amenities like shopping and restaurants right outside their front door	8/12/2024 4:56 PM
123	A new Max line along Sunset Hwy west from transit center to Banks	8/12/2024 4:44 PM
124	Less people less traffic, tougher on crime.	8/12/2024 10:01 AM
125	I want to see less growth, less homeless, and more crack down on crime. This would help clean up Portland and get it back to its natural beauty!	8/12/2024 7:23 AM
126	Encourage bike and walkable neighborhoods. Lessen car use. Density not sprawl. I think Orenco is a good model with green neighborhood spaces. Porches that face on another. Cars behind the houses to promote community.	8/11/2024 10:45 PM
127	THOUGHTFUL development with appropriate infrastructure… no more low cost developments of poor quality buildings that still fail to provide truly affordable housing. Build to meet the population's demands, not to put money in the pockets of developers	8/11/2024 8:32 PM
128	LESS HOMELESS, LESS CRIME, just non of that. Ya no mas indigentes peligrosos, ni crímenes. Menos fourplex. Mas edificios de 10 pisos con ZONA VERDE Y ÁRBOLES.	8/11/2024 2:32 PM
129	Less density. Better traffic planning. Major arteries in Sherwood now are overloaded with cars	8/11/2024 10:27 AM
130	As a lifelong Oregonian, I have generally been in favor of land use planning. I believe, however, at times the process has been too restrictive. For example, the report acknowledges that there is a lack of appropriate industrial land, even though the available land is within projected needs. Leaning towards the high side of projections could also more than offset demand, thereby helping with affordability.	8/11/2024 8:18 AM

131	More housing and more land available for more single family housing.	8/10/2024 11:46 AM
132	More green and open spaces	8/10/2024 10:36 AM
133	More open space and preservation of agricultural and forest land.	8/10/2024 9:58 AM
134	Sensible development	8/10/2024 7:37 AM
135	More safe parks and recreation opportunities. Affordable housing to OWN, not rent.	8/9/2024 11:15 PM
136	Less density	8/9/2024 6:07 PM
137	Allow more parking	8/9/2024 5:50 PM
138	Much has been said about the need for more housing such as multiple dwelling units where high density can be capitalized. There needs to be a balance between more housing, preservation of existing rural land uses and lifestyles. The question is how much more housing is actually needed with its impact on roads, public service infrastructure such utilities, water, sewage, etc coupled with the total financial resources that will be passed on to the taxpayers.	8/9/2024 11:13 AM
139	Less density in housing development.	8/9/2024 9:51 AM
140	Stop expanding and use what you already have. This includes proper planning so we are not stuck with traffic in 5-10 years, farmland reserves.	8/9/2024 9:32 AM
141	More high density, affordable living spaces with the existing urban growth boundary.	8/9/2024 6:58 AM
142	Less people moving here	8/8/2024 9:04 PM
143	Keeping nature	8/8/2024 8:18 PM
144	Greater Portland should not grow until Portland is cleaned up and managed properly.	8/8/2024 7:45 PM
145	Fill in. Focus on Multifamily. You'll have more than you need as BBs downsize or die.	8/8/2024 7:45 PM
146	To start and continue rejuvenating the downtown or existing empty buildings	8/8/2024 7:28 PM
147	Less new housing	8/8/2024 7:19 PM
148	More density, less sprawl	8/8/2024 7:05 PM
149	Stop spreading into agricultural/forested lands	8/8/2024 6:28 PM
150	Keep land as is no more commercial growth	8/8/2024 6:24 PM
151	More freedom with offers by the constitution. More police, fewer taxes and voting in person with a government photo document.	8/8/2024 5:38 PM
152	improve the roads before development occurs	8/8/2024 3:43 PM
153	I would like to see people buy homes and not hedge funds. We don’t need more new construction homes, we need to promote homeownership and upkeep in already established communities	8/8/2024 1:58 PM
154	Transportation connectivity prioritized to help mitigate congestion on arterial roadways.	8/8/2024 1:04 PM
155	less homeless camping on public and private land.	8/8/2024 12:02 PM
156	Better roads	8/8/2024 11:42 AM
157	Better road conditions, and not much more than that. Sick of the high rise homes, and the SAME stores/eateries in every strip mall. But that is our of your control.	8/8/2024 11:42 AM
158	We need to make it legal to thicken up our existing neighborhoods in an incremental and productive way rather than bankrupting our communities on unsustainable growth patterns that we can't maintain.	8/8/2024 11:25 AM
159	Repurpose buildings in Portland & other areas	8/8/2024 11:04 AM
160	Not to add more land around Sherwood	8/8/2024 10:47 AM
161	Stop adding more homes to cities where the traffic is already a nightmare, like Wilsonville	8/8/2024 10:12 AM
162	Expand freeway lanes	8/8/2024 9:54 AM

163	More consideration to how the growth effects our rural communities and small family farms that feed our community	8/8/2024 9:42 AM
164	Really thinking through the big picture. Not pressured by builders for $$. Infrastructure, road improvements for capacity, sidewalks, parks, natural areas. Not all filled in	8/8/2024 9:37 AM
165	Fix Portland and all their issues by helping rebuild and develop more businesses. Sherwood doesn't need Metro because we have grown more than what is acceptable and Metro needs to stay out of our part of the world.	8/8/2024 8:49 AM
166	That's some video officials. Don't make it all about getting more tax money and leave some of the spaces as they are.	8/8/2024 7:14 AM
167	Maintaining Oregon's natural beauty by NOT having tons of concrete and strip malls.	8/7/2024 11:21 PM
168	Increase urban density. Build/create more housing connected to transportation.	8/7/2024 8:39 PM
169	greater use of land currently available within UGB (example infill current space vs expansion)	8/7/2024 8:21 PM
170	less traffic, preservation of UGB, improvement of downtown portland the way it was before 2020	8/7/2024 7:57 PM
171	More leadership by people of color, in elected and also executive leadership at Metro	8/7/2024 4:34 PM
172	More efficient use of land close to job centers. I'm surprised there is still farmland inside of I-205. Also, I would like to see a bridge over the Willamette between Oregon City and Wilsonville, and a bridge over the Columbia east of I 205. Nice job with the new recreation area Chahalem Ridge.	8/3/2024 8:26 PM
173	Less homeless, legalized prostitution, bike lanes everywhere	8/3/2024 3:14 PM
174	Cited above...more housing within UGB; build up/onto current buildings, golf courses, unused land, homes, convert hotels/motels, revitalize areas inside the city, promote ADUs, offer incentives etc.	8/3/2024 12:50 PM
175	Better transportation system, specifically an I-5 to OR 99W connector between Wilsonville (or just north of), and to the south of Sherwood. Preferably an expressway.	8/2/2024 11:42 PM
176	Less car-dependent development. More new gas stations and charging stations. More small neighborhood markets. Building that is not just residential homes. The more new homes, the more new amenities needed to go with them. Otherwise it creates traffic and time bottlenecks.	8/2/2024 3:13 PM
177	A west side highway should be built, mirroring 205. Too much traffic burden is put on 217 and roads like Roy Rogers	8/2/2024 12:30 PM
178	I would like to see the ability for more PUD subdivisions, a break up of housing within a subdivision. Rather than throwing all townhomes in an area it would be nice to allow for open space, different product types, and community areas.	8/1/2024 12:31 PM
179	Use of more brownfields and infill. Replace single story multi family homes with multi story homes	7/31/2024 11:31 AM
180	Bigger tax lots. No one wants to live in a match box. I would pay MUCH higher purchase prices to have a quality property.	7/31/2024 8:37 AM
181	"Middle housing", which allows more housing within defined spaces in the city as well as in the suburban areas. Include some green areas for multiple unit buildings, e.g. courtyards.	7/30/2024 7:44 PM
182	more preservation of nature and fish and wildlife habitat	7/30/2024 2:53 PM
183	Really plan for future growth. Especially guaranteeing there is adequate infrastructure to support the past, currnet, and future growth.	7/30/2024 8:55 AM
184	Improved street designs clearing the hazards of parked cars and narrow lanes.	7/30/2024 8:22 AM
185	Less focus on density. More focus on asthetics/attractive neighborhoods	7/30/2024 7:14 AM
186	More parking in commercial areas and in new buildings. Accessible commercial and residential spaces for people with mobility issues. Reduced developer, landlord and realtor greed - so housing costs can become affordable.	7/29/2024 11:37 PM
187	Actividades familiares,viviendas para personas mayores de 55 y retirados.	7/29/2024 7:21 PM

188	More housing in old industrial areas like Portland's Central Eastside. Preserving old homes and green space. Increased density in suburban areas as well as in the city instead of development on farmland and forests.	7/29/2024 11:48 AM
189	Build Up not Out!	7/29/2024 9:35 AM
190	Investment in infrastructure like roads, bikeways, transit. There needs to be a plan to move the people around the area. How do people get from Sherwood to downtown without adding to gridlock? I would also like to see fewer corporations owning properties and renting, than affordable properties for entry level home buyers.	7/29/2024 7:48 AM
191	no sprawl more density and walkabity. abolish highways, improve public transport	7/28/2024 12:50 PM
192	More walkable/bikable neighborhoods. Less new suburban sprawl.	7/28/2024 8:34 AM
193	Denser housing options, infill development, and transit-oriented housing.	7/28/2024 8:26 AM
194	Vertical growth. More condos in dense areas. And add one or two new dense city center type location. Maybe one east and one west.	7/25/2024 7:17 PM
195	Less crime, better transportation systems, fewer homeless	7/24/2024 5:33 PM
196	See above	7/24/2024 3:55 PM
197	Additional expansion of the UGB to keep overall costs low for development while providing opportunities to access public transit and provide workforce housing for major employers and employment hubs.	7/24/2024 11:56 AM
198	Make it easier for developers to build dense mixed use in areas already within the UGB. If that means tax incentives for five story condos, or repealing parking minimums for new builds, or making the bureaucratic cost of applying for redevelopment/remodeling of office/commercial into residential, do it!	7/24/2024 7:32 AM
199	More space for affordable housing	7/24/2024 12:10 AM
200	Easing traffic quagmires and building more sustainably. Safer communities. Walking paths and farmer's markets. Manufacturing jobs and training programs for future employees.	7/23/2024 9:20 PM
201	Denser Development	7/23/2024 8:54 PM
202	Allowing more single family and multi family housing that creates quality neighborhoods and communities.	7/23/2024 8:30 PM
203	Increase density, like A LOT. The best things about cities are only really possible when adequate desnities are achieved. Even issues such as public safety can be addressed by having more people around. Portland is nowhere near the density levels needed to support the kind of sustainable urban form that most of us actually desire. Walkable neighborhoods require lots of people walking to places like grocery stores to support them. Transit only makes sense for occasional users (e.g., those of us that work from home) if service is frequent enough and reliable enough that we don't have to spend a lot of time figuring out when the next bus will arrive. Those things require density.	7/23/2024 6:39 PM
204	Redevelop and repurpose current real estate	7/23/2024 6:19 PM
205	Enforcement of current immigration laws, support for property rights of current landowners and value esp for senior citizens	7/23/2024 3:19 PM
206	A major reduction in single family housing and expansion of car dependent suburbs, a focus on walkable neighborhoods with character and dense multi unit housing projects, transit and bike oriented design, infill of the vacant parking lots across east portland	7/23/2024 3:14 PM
207	For development kept closer to city centers and leave space for areas of land and farms in tact.	7/23/2024 2:12 PM
208	higher density in current Urban areas	7/23/2024 12:06 PM
209	No expansion permitted unless accompanied by concurrent expansion of public transportation.	7/23/2024 11:17 AM
210	Increased density, better transit	7/23/2024 2:36 AM
211	That the city and state government follow environmental code and NROd as significant as	7/22/2024 3:06 PM

	addressing affordable housing. I would like the state to start doing conservation efforts to prevent forest fires before they adding more infill, especially in rural areas	
212	More passenger rail & LRT	7/22/2024 6:07 AM
213	Protection of natural and farm land	7/21/2024 12:16 PM
214	More dense affordable housing with public transportation, work space with shopping hubs	7/21/2024 10:35 AM
215	Access to rapid transit in all corners of the metro. Buses are not rapid transit unless they are given priority and actually go faster than traffic.	7/21/2024 9:49 AM
216	The area is losing residents. There's no reason to extend the growth boundary.	7/21/2024 9:00 AM
217	More density	7/20/2024 9:12 PM
218	Less ugliness and more nature	7/20/2024 8:57 PM
219	Better public transit. We must expand the MAX into the SW metro on a common-sense alignment, not the poorly planned alignment that was proposed before. We must expand streetcar service all over Portland proper. Examples for the streetcar would be down into Lake Oswego, down Sandy Blvd., north up MLK Blvd. to Lombard St., from the MAX west down Lombard all the way to St Johns, down 82nd Ave., down 122nd Ave, and much more. Other corridors need bus rapid transit. Incentivize density of housing along all transit corridors and even deep into underserved neighborhoods. We have a terrible housing shortage and density is needed.	7/20/2024 7:38 PM
220	Not fall into the "cookie cutter" trap. Make sure public transit keeps up with growth AND make sure cars aren't excluded. Parking is needed. Mass transit doesn't work for all.	7/20/2024 10:41 AM
221	I would like to see a stronger move towards mixed-use, walkable, transit-oriented communities. I think the suburbs are really lacking in this regard due to historical planning trends, but we are seeing some changes in the right direction. I think we should embrace "Vision Zero" planning, with separated bike paths, human-scaled streets, and traffic calming measures. I would love it if my kids could walk to school someday. I would love to see every neighborhood have a grocery store within a short, safe bike ride. I would love to see more starter homes that are affordable, such as townhomes and row houses, close to amenities. Bonus points if some townhome plans have a bedroom/kitchen on the first floor for aging family members.	7/20/2024 9:28 AM
222	More dense neighborhoods with increased public transit options.	7/20/2024 7:41 AM
223	Bring back the wetlands of Portland! Wetland parks everywhere! MORE DENSITY, LESS DESTRUCTION. Build townhomes! Build small apartment blocks! Build corner stores and apartments above retail!	7/20/2024 12:38 AM
224	Before we look at expanding into the urban reserve, I'd like to see local government take better care of existing areas where there are economic and racial disparities. If we can't even properly manage what we have, why add more?	7/19/2024 4:15 PM
225	We don't need to make new developments car dependent. Build new developments with biking walking and transit first	7/19/2024 2:12 PM
226	More walkable and bikable development. Encourage density and preserve the rural landscape within a short distance to Portland. Re-ruralizing landscapes is almost completely impractical, we should preserve what we have while making our cities more livable.	7/19/2024 2:06 PM
227	More development and land use planning towards dense housing centered around walkable neighborhoods and transit oriented travel. We should not be building the most inefficient form of housing that is continuously built (single family homes) in areas where a car is necessary to survive. Walkable, dense neighborhoods is vital towards creating a more sustainable future.	7/19/2024 12:40 PM
228	More enforcement of developers not following the law, including seizing property through eminent domain if they fail or refuse to produce enough affordable housing units.	7/18/2024 9:44 PM
229	More public transportation.	7/18/2024 12:03 PM
230	We have plenty of land available for development. Until literally the entire metro is covered with 3-story buildings, there should be no UGB expansions. Along these lines, we need to continue improving public transit focusing primarily on what will attract more ridership.	7/18/2024 10:20 AM
231	More emphasis on public transit for those in the outlying areas. Trimet is not keeping up with	7/18/2024 6:16 AM

	the growth, and some of the outlying areas not accessed by a Max line have more difficulties in getting where we need to go.	
232	Greater distribution of high rise residential apartment buildings outside of the downtown core area, especially in Southwest. A MAX line spur from the current Washington Park station heading south, with stops for Council Crest, Hillsdale/Wells HS, Burlingame, Multnomah Village, Capitol HWY at 99W, Jackson MS, PCC Sylvania, Gabriel Park, Six Corners/Raleigh Hills,	7/17/2024 11:12 PM
233	STOP 🛑 Oregon infrastructure is the WORST I have seen. Traffic in rural areas will become disastrous with population growth!	7/17/2024 6:04 PM
234	Less roads and parking lots, more transit and fewer vehicle Miles traveled, more middle housing and mid-rise buildings. Daylighting buried streams, better fish and other animal friendly crossings. No data centers. No single story commercial and industrial buildings.	7/17/2024 2:18 PM
235	Stop building over our greenland. Land conservation.	7/17/2024 2:00 PM
236	More mixed used areas with less signle family housing.	7/17/2024 9:20 AM
237	build up and not out, and reduce parking footprint	7/17/2024 1:16 AM
238	More housing options, density, a mixture of all housing types — not just single family homes.	7/16/2024 11:18 PM
239	Stop growing out and think of growing up! Cities should be dense and walkable. Growth does not mean just go out. Look at European cities as an example. They have been around some for thousands of years without continuing to just expand out. Utilize the space they currently occupy.	7/16/2024 8:46 PM
240	A little more room for smart growth neighborhoods with row homes, townhomes, and small lot homes. The neighborhood should mainly be served by a park and neighborhood retail, grocery, and restaurants. Walkable is very important	7/16/2024 8:44 PM
241	More density; increased infill; redevelopment of underutilized land; demolition of older buildings to make way for newer, larger, and denser buildings; improved transit to serve the increasing population and density	7/16/2024 8:26 PM
242	Higher density housing options, more walkable neighborhoods, better sidewalks	7/16/2024 6:51 PM
243	Stop high density development that takes out all trees and natural area. Plan for roads, our roads already can’t support the population we have. Metro to have parks that allow dogs and not horses.	7/16/2024 6:26 PM
244	More density and mixed uses in every city core to create its own unique identity whole creating more walkability. This would also contribute to the ease of cycling and the viability of public transit projects, even in smaller cities. Mixed use, dense city cores would also create a tax surplus for local governments and metro to use for maintaining or expanding services.	7/16/2024 5:52 PM
245	Less high density housing that makes traffic worse since know one focuses on the impacts it causes on roads	7/16/2024 12:20 PM
246	More complete street systems. Transit expansions.	7/16/2024 10:24 AM
247	I would like to see greater opportunities for affordable housing and proximate employment for residents. I would like Portland to be a place my children would be able to live in.	7/16/2024 9:04 AM
248	Improved/increased access to mental health and in/outpatient A&D drug treatment	7/16/2024 8:09 AM
249	Better transportation options. Not only mass transit but more bridges to reduce congestion. People dont want to go into some areas like Portland and Vancouver just due to the traffic.	7/16/2024 8:00 AM
250	Greater density. More ADUs in existing neighborhoods	7/15/2024 10:34 PM
251	Stimulate (incentivize) redevelopment within existing boundaries. Of course it is easier to build new on bare, flat farmland... don't do it.	7/15/2024 8:39 PM
252	Better street cycling conditions	7/15/2024 7:50 PM
253	I would like to see entire neighborhoods built that include everything the increase in population needs: more stores, expansion of roadways to deal with traffic, more schools so that the	7/15/2024 7:17 PM

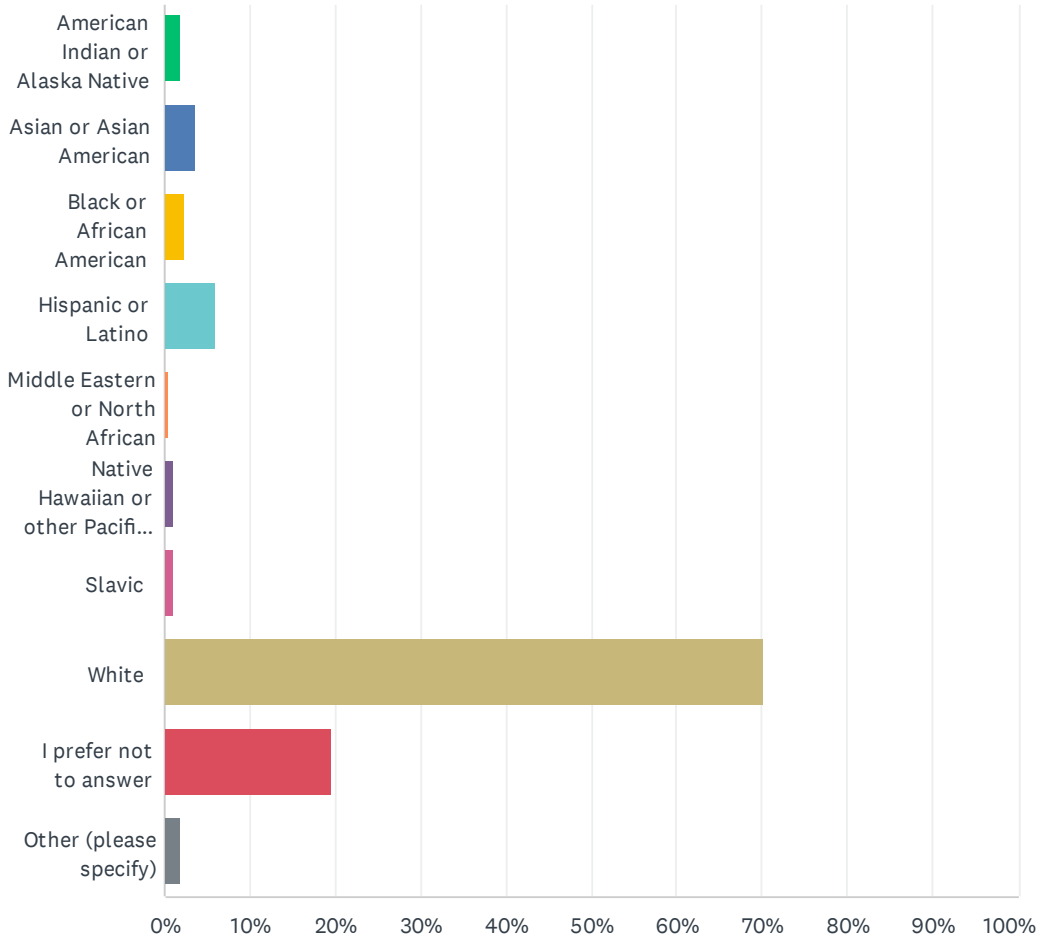
	schools that are there don't just increase class sizes, parks for families to enjoy so there isn't more crowding of the parks that exist, etc.	
254	Stopping the theft of our farm land for junk houses and o er crouding	7/15/2024 6:47 PM
255	A solution for all the empty commercial space, particularly close in, that is discouraging to the random flanneur as well as the residents. I would like the SW light rail to HAPPEN because I lived in SW (out near Tigard) and the traffic is beyond horrific - made me move back to NE Portland Yikes - it's literally untenable. And I don't want downtown to pay the price (becoming a donut hole).	7/15/2024 6:41 PM
256	Better mix of housing, better accessibility to transportation services and more. Better mass transit to suburbs and outer areas. Better job of keeping neighborhood integrity, better public safety	7/15/2024 5:54 PM
257	More land appropriately developed for a mix of single family and higher density housing. More single family is needed to help on the affordability goal.	7/15/2024 5:28 PM
258	I'm hoping for a change in mindset. or maybe more education... many people who value quality habitat and green spaces also don't like dense housing and don't see the connection. Many people want to live on acreage and in the Wildland Urban Interface, but it is damaging to wildlife	7/15/2024 5:22 PM
259	More affordable single family housing and safe, affordable public transit.	7/15/2024 5:19 PM
260	Please focus on walkability and public transit. Protected bike lanes, please! Get rid of parking lot requirements and allow mixed use zoning.	7/15/2024 5:17 PM
261	More parks, public transportation, less traffic	7/15/2024 5:12 PM
262	No growth	7/15/2024 4:37 PM
263	Increase in infrastructure - the growth continues but arterial roads are not developed/improved to support the traffic. Homes continue to be built in SW Beaverton, but nothing has been done to increase the traffic flow/capacity on Scholls Ferry - the primary freeway access point.	7/15/2024 4:03 PM
264	keeping urban sprawl under control	7/15/2024 3:31 PM
265	I'd like us to change BACK to when kids didn't have to be afraid in the streets and drugs/criminals didn't run amok in our City.	7/15/2024 3:25 PM
266	More single family homes	7/15/2024 3:00 PM
267	Safe communities -making them a priority.	7/15/2024 2:52 PM
268	A network of bike trail and larger freeways	7/15/2024 2:38 PM
269	its obvious we need more housing and job creation to support us. Metro takes too long to evaluate these expansion decisions, so we pass up opportunities.	7/15/2024 2:14 PM
270	Houses that are small for first time home buyers... not huge 4 bedroom homes with high end amenities. Small homes on large lots. With eco features like room for garden, underground water storage for watering garden, and solar panels on roof. No more granite counters and high end appliances. Your first home should be basic. That gives people something to strive for. Also stop the massive rentals of homes by non us citizens. Rent is more expensive than a mortgage. I know tons of home we're purchases in the economy crash of 2009 and purchases by foreigners to make $$ stop that practice. And you will have lower housing cost.	7/15/2024 1:45 PM
271	As few as possible	7/15/2024 1:41 PM
272	Better transportation infrastructure. Our roads have been the exact same going into/out of PDX 50 years or more	7/15/2024 1:35 PM
273	Improved public transportation and improved/increased use of multimodal trails and biking infrastructure.	7/15/2024 1:17 PM
274	High density in-fill and zoning upgrades near rapid transit access. Prioritize this BEFORE expanding the UGB.	7/15/2024 1:12 PM
275	Cheaper rates and less control	7/15/2024 1:11 PM
276	Stopping sprawl and addressing climate by building more compactly and decreasing highway	7/15/2024 12:58 PM

	modes of transportation.	
277	No more growth. No more crappy homes built tightly together. We need some countryside-trees, deer, birds, butterflies, rather than more concrete.	7/15/2024 12:47 PM
278	Fewer homeless, less garbage on the streets, more multi-family that includes parking	7/15/2024 12:44 PM
279	More requirements for affordable housing units. New apartments are ridiculously expensive and not built for families.	7/15/2024 12:41 PM
280	Grow up not out.	7/15/2024 12:40 PM
281	Smart transportation options, affordable housing within city centers and strong habitat protections for wildlife connectivity throughout our region.	7/15/2024 10:53 AM
282	Fewer parking lots, less sprawl, more dense housing, narrow freeways and add tolls, more bike paths	7/15/2024 10:35 AM
283	More bike infrastructure beyond the urban core of Portland.	7/15/2024 9:56 AM
284	Greater density. And safe transit. We can't use what we have because it is filthy and not safe. Bike paths need to be kept safe with regular more than daily patrols…bike cops or golf carts.	7/15/2024 7:25 AM
285	More protected bike lanes	7/15/2024 6:59 AM
286	Focus on basic municipal services: fix potholes, pave streets, erase graffiti, pick up the trash!	7/15/2024 6:34 AM
287	Safer highways (eg hwy 47) that include traffic circles.	7/15/2024 6:07 AM
288	Increased density and less sprawl.	7/15/2024 12:26 AM
289	I would like to see less traffic, and more public transportation options.	7/14/2024 9:17 PM
290	I would like to see more public transportation and multicultural businesses. I would like new neighborhoods to be open to everyone, both economically and culturally. We need more low and middle income housing in areas with good schools.	7/14/2024 9:11 PM
291	Continue to develop within existing boundaries.	7/14/2024 6:14 PM
292	Follow your plans and stay strong	7/14/2024 5:37 PM
293	Land conservation	7/14/2024 5:29 PM
294	Better traffic management	7/14/2024 5:15 PM
295	Better arterial transportation routes leading through the suburbs - landscaped parkways with grade separation like in NY/CT, but add transit and ped/bike. One from I-5 to the Newberg-Dundee Bypass (an actual I-5-99W Connector!) to help regional transportation. Another in the form of Sunrise Phase 2, extending to Sandy. And then a new tunnel and bridge from 26/Cornelius Pass to Rivergate in Portland.	7/14/2024 3:55 PM
296	Care for the current crumbling infrastructure before expanding.	7/14/2024 3:35 PM
297	More trees planted	7/14/2024 3:25 PM
298	Same as above plus very limited growth and only built to be part of the protected envrionment.	7/14/2024 1:53 PM
299	Solar panels over parking lots to produce power and not impede other land.	7/14/2024 12:58 PM
300	Better interconnectivity between trails, parks and green spaces.	7/14/2024 12:44 PM
301	Managing traffic, don't want more traffic lights would like to prevent Sherwood from turning into the Tigard disaster of stoplights	7/14/2024 12:12 PM
302	I would like to see the region commit to developing all of the land existing within the boundary that remains undeveloped, and also develop land that is poorly used, such as the numerous seas of parking lots that remain mostly empty. I see infill as a much better use of the regions money, as urban sprawl is not what we need and will only make our city align with other sprawling cities across the country instead of setting ourselves apart as a sustainable city.	7/14/2024 11:25 AM
303	Want to see it slow down. Making infrastructure first before adding to the population. Leaving rural areas rural. Leaving room for farms. leaving the trees.	7/14/2024 11:24 AM

304	Better roads to accommodate the traffic	7/14/2024 11:19 AM
305	Less housing a few more shops/restaurants. Traffic is so bad in Sherwood. There are already too many people that it's almost impossible to go to dinner and the lines at the stores are very long.	7/14/2024 11:16 AM
306	Fixed roads	7/14/2024 10:48 AM
307	less sprawl, and more revival of already developed space	7/14/2024 10:28 AM
308	Increased safety/security	7/14/2024 10:25 AM
309	No more row housing, no more densely packed living spaces	7/14/2024 10:13 AM
310	Updates to existing and already developed land, rather than urban sprawl into precious G land.	7/14/2024 10:03 AM
311	Better infrastructure within the city (Portland proper) farmlands don’t need 500 row homes placed on them. Concrete jungle is what we are going towards and I’m not here for that.	7/14/2024 9:43 AM
312	More density and infill and less suburban sprawl. And more mixed used development. I don’t want to have to use my car to fo everything.	7/14/2024 9:25 AM
313	More affordable housing, especially for first time homebuyers and low income renters. Densify housing without losing access to safe walking and biking and community outdoor spaces.	7/14/2024 8:17 AM
314	Stop expanding the boundaries. It isn’t appropriate to overtake agricultural land.	7/14/2024 8:06 AM
315	Increase density, particularly in downtown Portland	7/14/2024 12:07 AM
316	Increased residential density in existing neighborhoods, more extensive and more frequent rapid public transit, prioritizing pedestrian and bike safety and modes of transit over automobiles. More affordability of housing and choice of housing types that meet the needs of families and older adults.	7/13/2024 10:53 AM
317	Increase in construction density and mixed use zones.	7/12/2024 11:40 PM
318	I'd like to see Portland increase it's public transportation infrastructure with rail and bus rapid transit projects. There's no reason why Portland needs to expand more outward when we can simply just densify areas. I'd like to see Portland focus on climate change initiatives and be one of the leaders in the US, and expanding the UGB and increasing the reliance on car-centered infrastructure directly opposes those initiatives.	7/12/2024 8:13 PM
319	Denser housing and neighborhoods.	7/12/2024 7:47 PM
320	Less car oriented development. It’s 2024. Climate change. We know better.	7/12/2024 6:10 PM
321	more bike and transit friendly	7/12/2024 5:31 PM
322	Better wider and marked streets.	7/12/2024 1:10 PM
323	A focus on improving the areas that are already part of the UBG	7/12/2024 12:14 PM
324	Less implementation of luxury apartment buildings that few can afford to live in, more focus on affordable housing.	7/12/2024 7:47 AM
325	Development patterns and alternative transportation, these two are intrinsically linked and, to move into more sustainable forms of transportation means moving away from single family housing as the standard. We must move towards more varied housing options to include row-houses/townhomes, apartments, condos, cottage courts, duplexes, triplexes and anything else that can provide sustainable mid-density housing. Part of providing this too includes taking a closer look at zoning requirements and doing away with unnecessarily restrictive codes including minimum setbacks, parking requirements, and anything else that holds the area back from the most sustainable development possible which includes mixed use zoning, completely separate people from every day conveniences is absurd and past development patterns have led to strip malls and big box retailers taking over, driving out small businesses in many places and further unsustainable car oriented development. Alternative transportation too must be encouraged to include transit and cycling access for all. With sustainable mid-higher density this can be achieved much easier, however metro must commit wholly, protected/separated need to be the standard in everything but the most calm residential streets, and also not reserved only for the highest speed most dangerous roads, and transit too must be as convenient as possible for all. Trimet has been making improvements, well needed ones	7/12/2024 7:15 AM

	however there is so much more that could be done, the idea of a downtown MAX tunnel has been floating for some time but if trimet ever wants to make MAX a truly viable option for further distance travel this idea must be considered further and implemented.	
326	Density and mix use land around transit corridors. Potentially look into a MUPTE like (Eugene) to spur affordable housing.	7/12/2024 12:22 AM
327	Greater emphasis on keeping Portland green as can be. It's why we love this city so much.	7/11/2024 11:52 PM
328	Building up and not out. Don't allow Portland to become like Denver, Los Angeles or other inequitable cities that can only rely on automobile transportation. Building dense cities increase access to nature for all residents.	7/11/2024 10:31 PM
329	Better mass transit. It's the only way to grow outside of Portland and not become another hell hole like LA	7/11/2024 6:57 PM
330	Minimize the role of the automobile. Stop sprawling onto new greenfield land. Revitalize existing neighborhoods. Eliminate surface parking lots of more than 1-3 spaces (in favor of on-street, underground, structured, or no parking). Build out complete, connected, safe, high-quality regional and statewide, bicycle, pedestrian, and transit networks. Complete the Coast to Gorge Trail and begin work on other elements of the Infinity Loop concept. Make cooperative housing a permanent and meaningful housing option within the region.	7/11/2024 6:12 PM
331	More high-quality transit options like regional rail and bus-rapid transit.	7/11/2024 4:27 PM
332	Better infrastructure for getting into the city core from the outskirts. Currently the only option for many is to drive but by doing so, we add to the environmental impacts and many of the routes are not very friendly. If we are going to put more family-priced housing on the edges, then we need to provide safe, economical and quicker ways to get to work and family in the city core.	7/11/2024 10:33 AM
333	Denser walkable neighborhoods, better transit, regional connection to jobs	7/10/2024 10:14 PM
334	More density in urban areas	7/10/2024 9:51 PM
335	allow cities/counties to bring in several hundred acres at their edges into development for new single-family homes with yards - like houses with one thousand square feet in foot print and 1 to 2 thousand square feet for yard. Use these edge areas to design more technological oriented cities allowing bicycle and walking to be the main way getting to a common vehicle depot for accessing other parts of the Metro area. Allow robotic, drone delivery.	7/10/2024 8:30 PM
336	Only high density housing added to any area expanding, with abundant low income housing.	7/10/2024 5:14 PM
337	Increased density, especially along transit corridors (transit oriented development), and a greater quantity of mixed-use middle density housing.	7/10/2024 12:08 PM
338	Stop expanding ugly townhouses into our beautiful countryside.	7/9/2024 9:48 PM
339	Want to see keeping original neighborhoods, use of more technology to deal with water and sewer, and more affordable housing of all types. There are cheaper more effective solutions other than a big sewerplant.	7/9/2024 3:43 PM
340	better transportation and less traffic / less need to make long trips and fewer trips / all housing will cost 30% or less of individual or family income / more natural areas and recreation	7/9/2024 3:15 PM

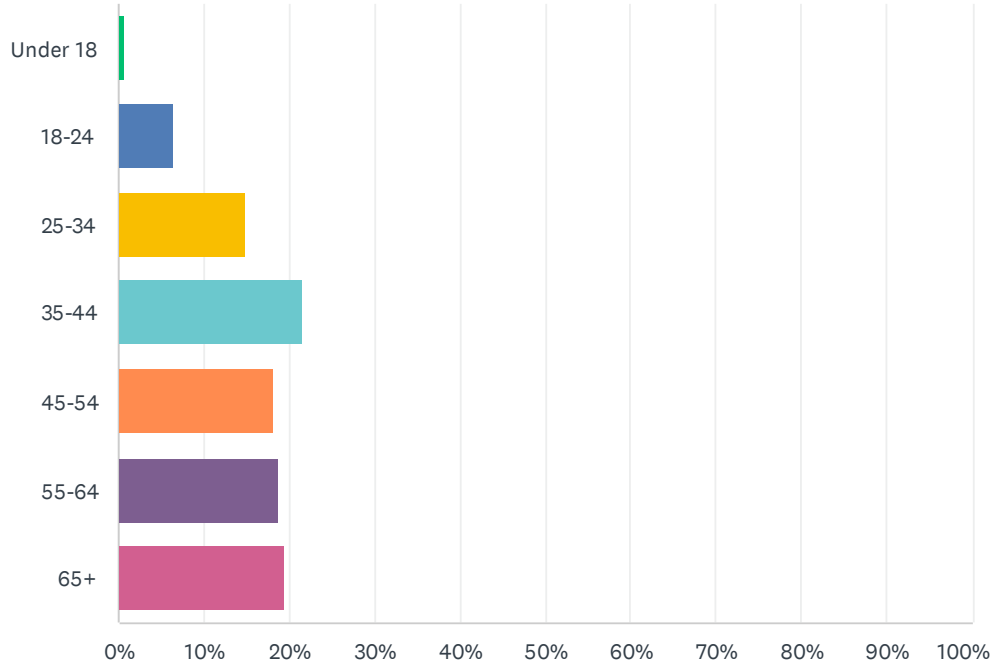
Q6 How do you identify your gender? (Select all that apply).



Answered: 307 Skipped: 58

ANSWER CHOICES	RESPONSES	
Female	41.04%	126
Male	43.97%	135
Non-binary	4.56%	14
I prefer not to answer	9.45%	29
Other (please specify)	1.30%	4
Total Respondents: 307		

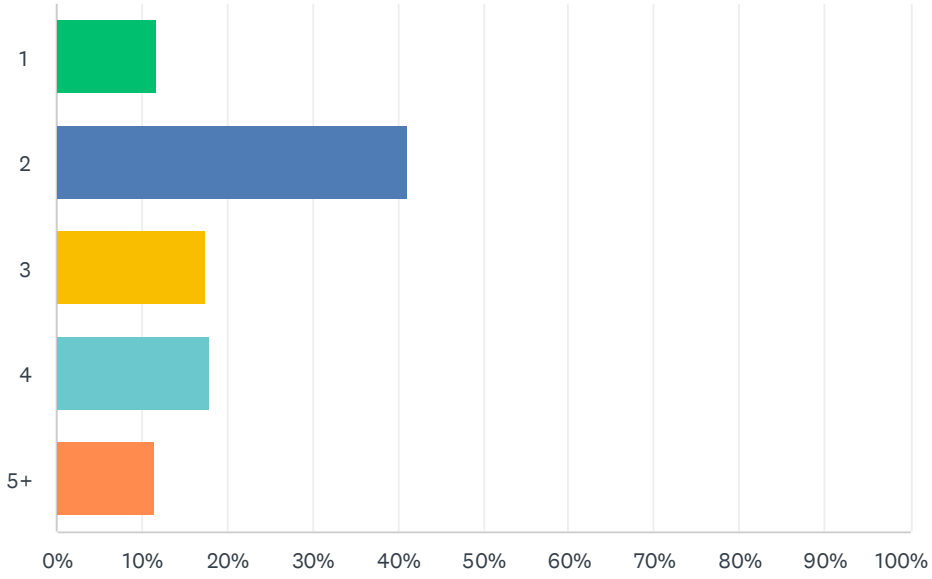
Q7 Which of the below best describe your race/ethnicity? (Select all that apply).



Answered: 305 Skipped: 60

ANSWER CHOICES	RESPONSES	
American Indian or Alaska Native	1.97%	6
Asian or Asian American	3.61%	11
Black or African American	2.30%	7
Hispanic or Latino	5.90%	18
Middle Eastern or North African	0.33%	1
Native Hawaiian or other Pacific Islander	0.98%	3
Slavic	0.98%	3
White	70.16%	214
I prefer not to answer	19.67%	60
Other (please specify)	1.97%	6
Total Respondents: 305		

Q8 What is your age?



Answered: 293 Skipped: 72

ANSWER CHOICES	RESPONSES	
Under 18	0.68%	2
18-24	6.48%	19
25-34	15.02%	44
35-44	21.50%	63
45-54	18.09%	53
55-64	18.77%	55
65+	19.45%	57

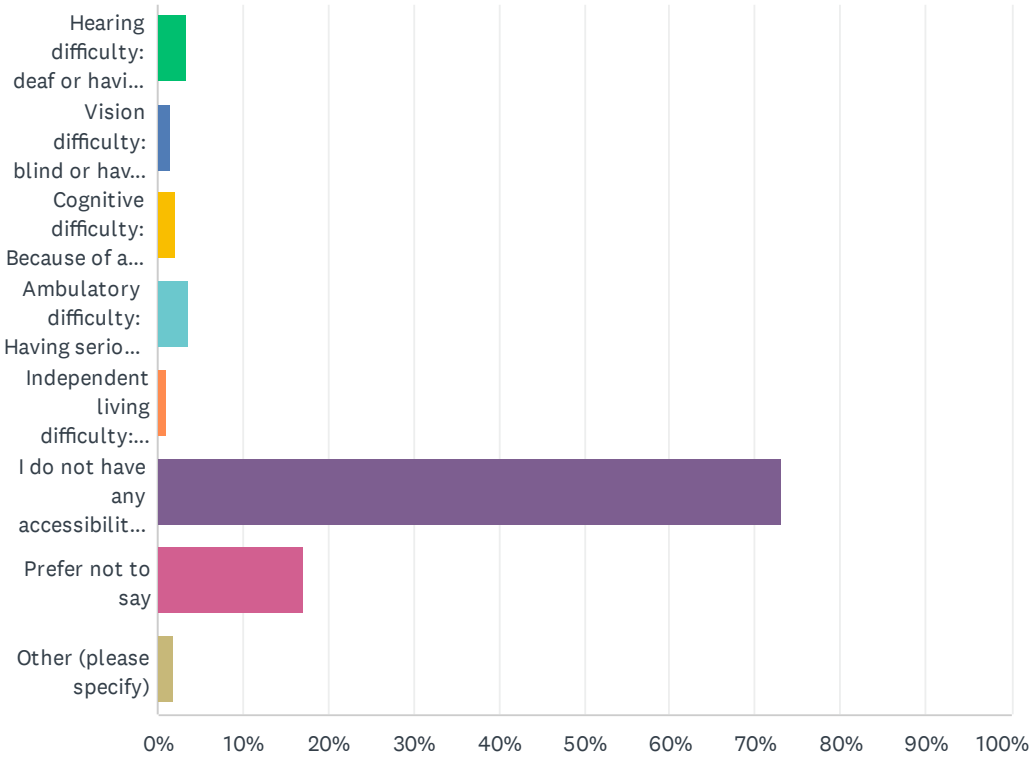
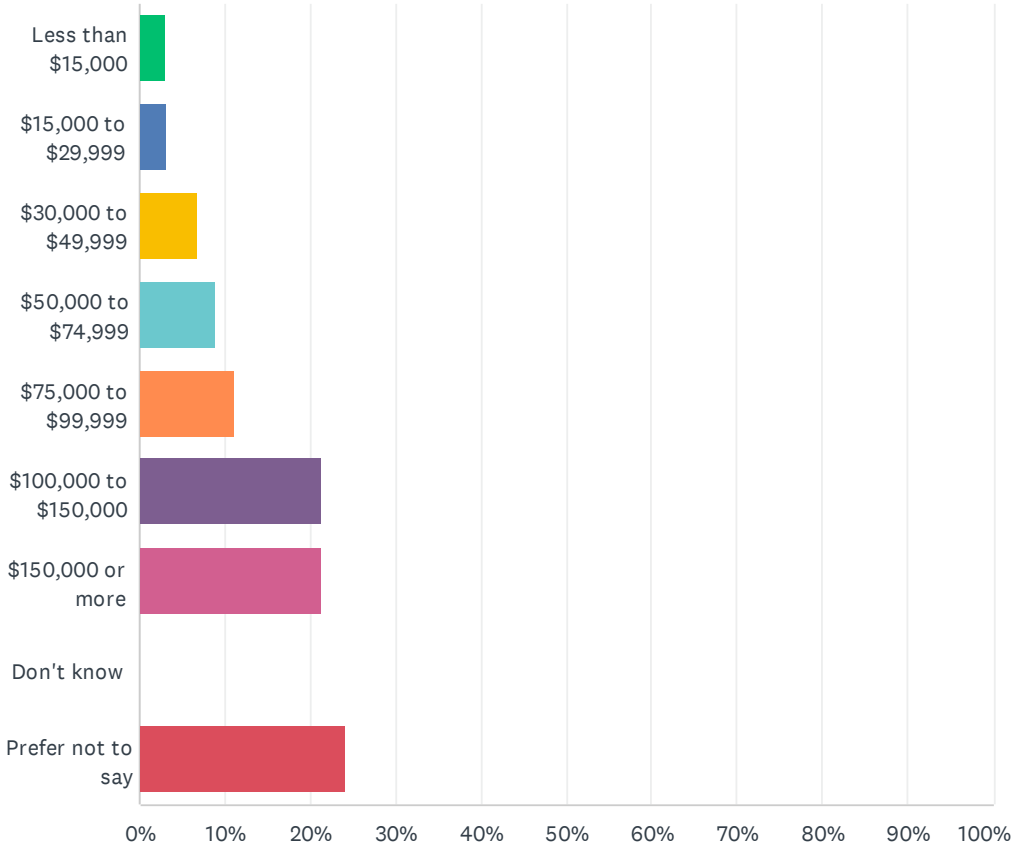
Q9 How many people live in your home (including yourself)?



Answered: 296 Skipped: 69

ANSWER CHOICES	RESPONSES	
1	11.82%	35
2	41.22%	122
3	17.57%	52
4	17.91%	53
5+	11.49%	34
TOTAL		296

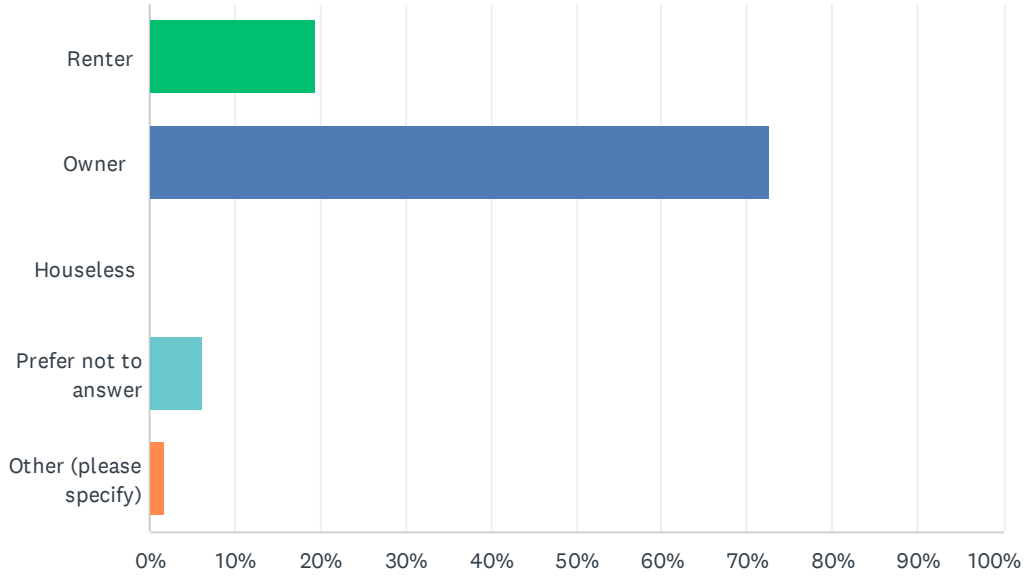
Q10 Do you have any accessibility difficulties that you would like us to be aware of? (Select all that apply).



Answered: 271 Skipped: 94

ANSWER CHOICES	RESPONSES	
Hearing difficulty: deaf or having serious difficulty hearing	3.32%	9
Vision difficulty: blind or having serious difficulty seeing, even when wearing glasses	1.48%	4
Cognitive difficulty: Because of a physical, mental, or emotional problem, having difficulty remembering, concentrating, or making decisions	2.21%	6
Ambulatory difficulty: Having serious difficulty walking or climbing stairs	3.69%	10
Independent living difficulty: Because of a physical, mental, or emotional problem, having difficulty doing errands alone such as visiting a doctor's office or shopping	1.11%	3
I do not have any accessibility requirements	73.06%	198
Prefer not to say	16.97%	46
Other (please specify)	1.85%	5
Total Respondents: 271		

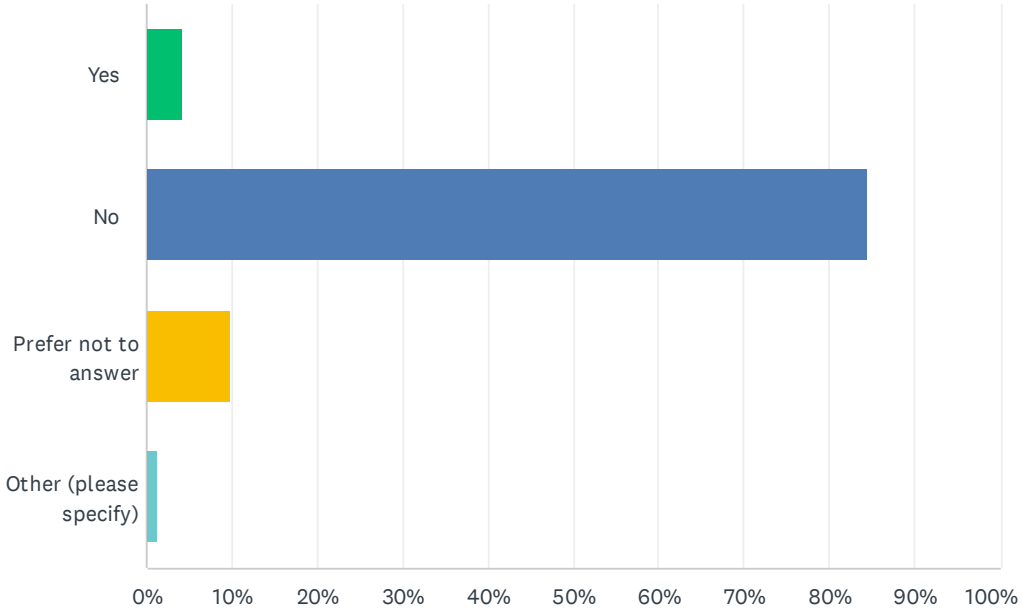
Q11 How would you describe your income?



Answered: 304 Skipped: 61

ANSWER CHOICES	RESPONSES	
Less than $15,000	2.96%	9
$15,000 to $29,999	3.29%	10
$30,000 to $49,999	6.91%	21
$50,000 to $74,999	8.88%	27
$75,000 to $99,999	11.18%	34
$100,000 to $150,000	21.38%	65
$150,000 or more	21.38%	65
Don't know	0.00%	0
Prefer not to say	24.01%	73
TOTAL		304

Q12 How would you describe your housing tenure?



Answered: 303 Skipped: 62

ANSWER CHOICES	RESPONSES	
Renter	19.47%	59
Owner	72.61%	220
Houseless	0.00%	0
Prefer not to answer	6.27%	19
Other (please specify)	1.65%	5

To: Metro 2040
Subject: [External sender]Sherwood West Concept Plan Opposition

CAUTION: This email originated from an **External source.** Do not open links or attachments unless you know the content is safe.

To whom it may concern,

I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely,

Rachel Adams

BPS Comments on July Draft of Metro Urban Growth Report (UGR)

Metro is narrowly framing this decision as to whether or not the Sherwood West expansion area should be brought into the UGB. The UGR has broader implications for the region in terms of how we expect to grow in a way that is equitable and meets other regional goals, such as reducing carbon emissions.

The Urban Growth Report (UGR) is an opportunity to frame future regional planning discussions such as the regional housing production strategy, a refresh of the 2040 Growth Concept, and a regional economic development strategy.

Our concern is that the UGR is underestimating population and housing growth, underestimating residential capacity; underestimating industrial job growth, overestimating industrial land supply and underestimating commercial land supply. BPS staff raise the following issues with methodology and assumptions to better align with regional policy objectives, which are described in detail below.

Housing

The 2044 population forecast is for much slower growth, primarily due to declining birth rates. We are concerned that the Metro forecast is too low, which will affect planning for housing that will result in insufficient housing capacity in the future. The Metro forecast is based on national growth rates – which misses the important context that, historically, Oregon has grown faster than the nation and the Portland region has grown faster than the state (captured a greater share the state's growth). The UGR lacks important comparisons to state forecasts as context for selecting a growth scenario.

Metro should select the Strong Urban Market housing mix with high population/household forecast. This scenario best fits the expected older, smaller households. It also addresses affordability concerns and the need for more affordable multi-dwelling and middle housing units. The UGR notes that 81% of future households will be financially challenged or unable to purchase homes with current median sales price at roughly $550,000 in today's dollars.

Metro's scenario results indicates that this scenario results in a deficit of 24,000 multi-dwelling units. This deficit is overstated because Metro's housing capacity methodology vastly undercounts the redevelopment potential in Portland and the region. The UGR assumes that only 20% of the most feasible properties will redevelop. Buried in a footnote, the UGR states that if redevelopment rate is increased to 40% of the most feasible properties, this deficit would be eliminated. For example, under the 20% redevelopment rate, Metro assumes that Portland only has capacity for 60,000 units. Whereas in our recently adopted 2023 Housing Needs Analysis, we found that Portland has a financially feasible development capacity of 237,000 units.

Finally, the regional forecast is not just about the UGB decision. It is used in other policy decisions (not just for managing the UGB). The housing forecast will be provided to the State (OHCS/DAS) to establish the jurisdiction level housing targets. Also, the forecast will be the basis for Metro's regional housing production strategy – which will be an important regional discussion on how to address housing needs for older, smaller households with affordability challenges.

Employment

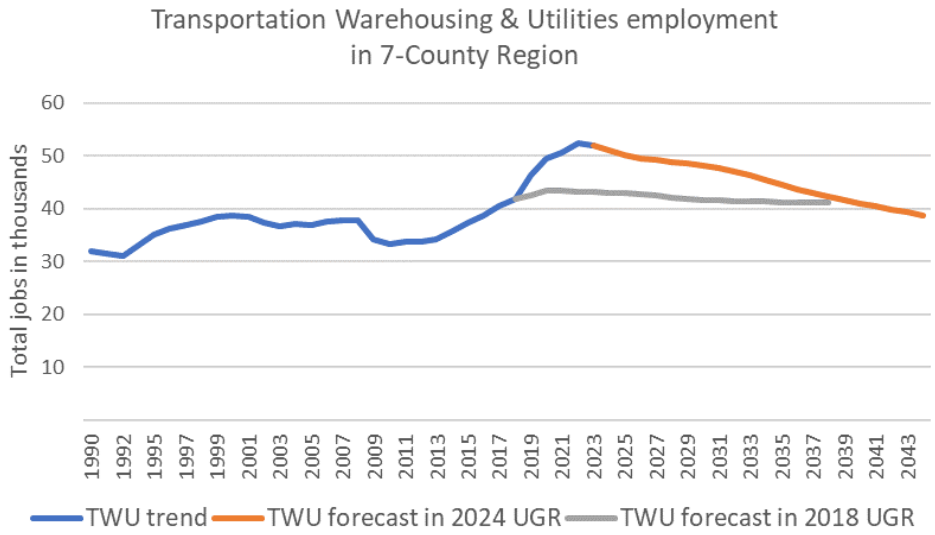
Metro's employment forecast is tied to the population forecast. Metro's fundamental assumption that lower population growth will mean slower economic growth because access to labor will be the constraining factor could be a self-fulling prophecy. Workforce is mobile. Capital is mobile. Development

capacity is not. If the region has the land capacity for businesses to expand then workers will migrate to the region. If the region does not have the land capacity, then economic growth will be constrained.

- Jobs in the Portland MSA grew 56%-63% faster than the national economy in each of the last three business cycles (Portland EOA Trends Report). Above-average regional job growth has been supported by our competitive strengths, including growing industry clusters and planned livability that attracts talent, as recognized in our economic development strategies (CEDS, Oregon Business Plan, Advance Portland). The UGR's methodology does not account for these past trends and regional advantages. The average annual growth rate (AAGR) of Oregon Employment Department's (OED's) current 2022-2032 projection is 1.1% for Total Nonfarm Employment, compared to 0.46% in the draft UGR. Why does the UGR predict that long-term regional job growth will now slow down to the national average?
- Workforce-in-migration should be a forecast variable – Economic forecasts typically analyze sector trends, capital inputs (such as land supply), and market opportunities. Economic growth will attract workers, rather than the UGR's population-trumps-economy approach.
- Noisy in-migration data – The in-migration graph cited in the UGR indicates wide variations, rather than a hard stop for job growth. In-migration also varies widely with economic trends that don't appear to be considered in the UGR's population forecast, such as business cycles, sector growth trends, and median income trends, each of which shape in-migration through economic opportunity.
- Local sectors/traded sectors – We agree that regional population growth is an important driver of market size and job growth in 'local sectors' that serve regional markets. However, market opportunities in 'traded sectors' that serve markets outside the region are unrelated to local population size. At minimum, the UGR's connection between population growth and job projections should be removed from the goods production and distribution sectors that make up most industrial land demand and primarily serve traded-sector markets.

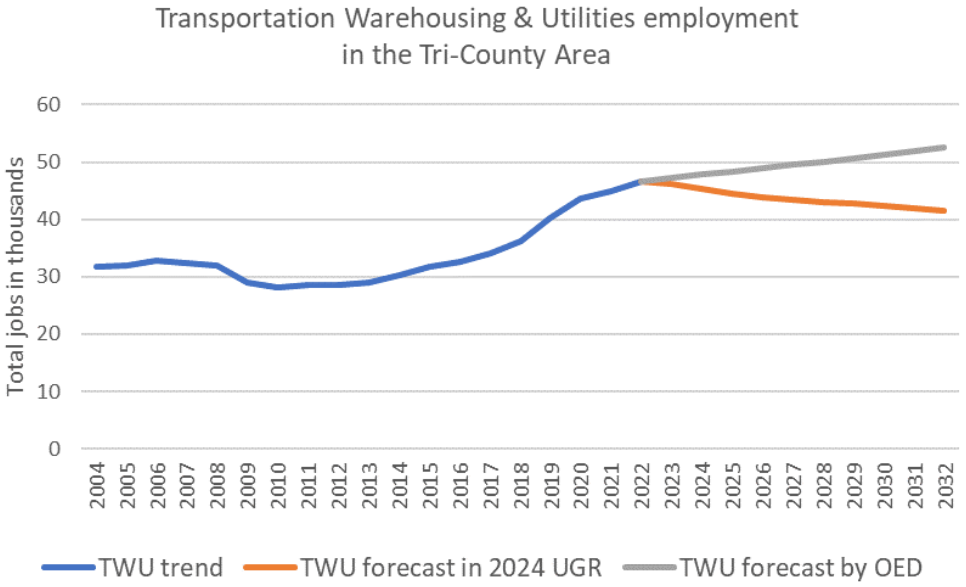
As with the population forecast, the UGR is lacking context or comparison to State of Oregon forecasts. The UGR also could benefit from an equity analysis that discusses the type of jobs and wages that will be available, especially for workers without 4-year college degrees.

The region needs a land supply strategy that includes a deeper analysis of sector and business growth opportunities and how they match with the region's employment land supply in order to create equitable economic opportunity.



Industrial

Inadequate Industrial Land Supply – The UGR widely understates industrial land demand, relative to growth trends and State of Oregon employment projections. It overstates the suitable land supply to meet the region's distinct segments of demand. Coming to the opposite conclusion of the UGR, the private market has found inadequate industrial land supply since around 2015, evident in the region's low industrial vacancy rates and rising rents of the last decade. What is Metro's rationale for such a different and low industrial demand forecast?



Transportation & Warehousing (Logistics) forecast – Metro's no-growth forecast for the logistics sector in the 2018 UGR and the declining forecast in 2024 UGR eliminates most of industrial land demand. Metro's industrial employment sector forecast is too low and not consistent with Oregon Employment Department (OED) forecasts. Specifically, BPS staff has raised concerns about the forecasted decline in

the warehouse and distribution sector when the OED and the federal Bureau of Labor Statistics (BLS) forecast continued growth. Metro made a similar assumption in 2018, when it forecasted zero-growth for logistics jobs, when, since 2015, it has been a high job-growth sector and the region's predominant employment land demand.

- The current UGR forecast for major decline in Logistics jobs is the opposite of its rapid growth trend in the last decade and current national/state/regional employment agency forecasts for continuing above-average growth, as shown in the charts below. Metro's regional projection of -1.4% annual change (AAGR) in Transportation Warehousing & Utilities jobs over the next decade (2022-2032) compares to 0.8% AAGR by Bureau of Labor Statistics nationally and 1.2% AAGR by OED in the Tri-County area. City staff would be interested in better understanding this aspect of the analysis and discussing the potential associated regional policy implications.

Sources: Trend from CES data by BLS. Forecast data by Metro in 2018 and draft 2024 Urban Growth Reports

Sources: Trend data from CES by OED. UGR forecast from July 2024 draft by Metro. Oregon Employment Department projections for 2022-2032.

- Logistics is a critical sector to get right in the UGR forecast, because Logistics businesses are the primary source of Warehouse & Distribution development (along with Wholesale Trade) and thus industrial land demand. Warehouse & Distribution buildings made up 75% of the MSA's total occupied industrial space in 2019 and 93% of the new occupied space in the recent 2008-2019 business cycle (CoStar data).

3,600-acre demand discrepancy for Logistics and Manufacturing – The draft UGR forecast for 1,400 additional industrial acres to 2044 is undercounting regional demand by about 3,600 acres relative to OED's regional projections in the Logistics and Manufacturing sectors alone (see table below). The sector-trends methodology of OED's projections is a better fit for employment land planning because of its consistency with employment and development trends and with State Planning Goal 9 requirements for trends-based forecast.

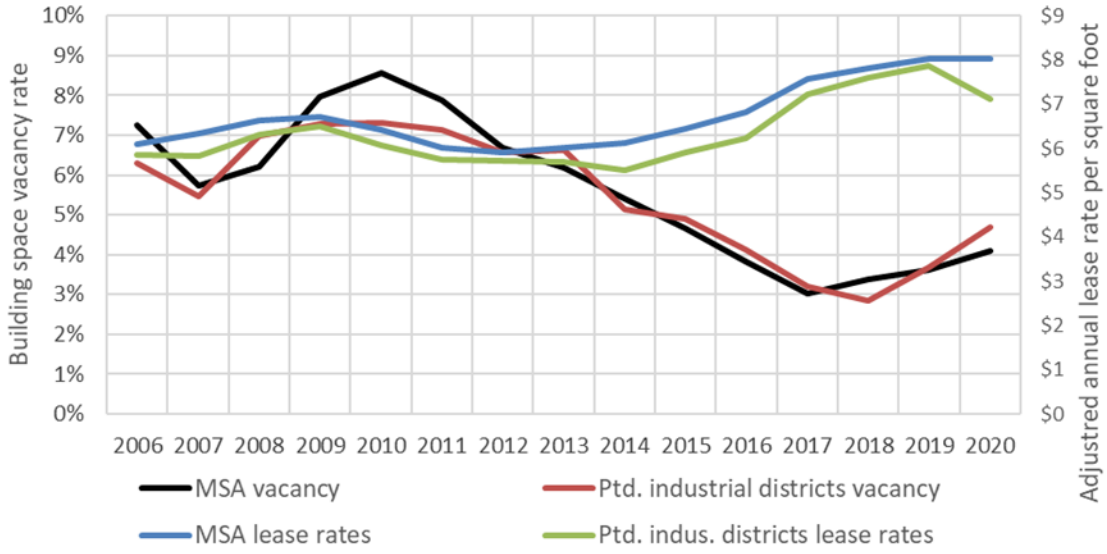
Estimated Tri-County forecast discrepancy in industrial land demand between Metro's draft 2024 UGR and Oregon Employment Department's 2032 projections						
	Forecast AAGR	Tri-County Jobs in 2024	Jobs in 2044	2024-2044 Job Change	Building SF	Land (ac.) Demand
Transportation Warehousing & Utilities						
Metro Draft UGR 2024	-1.4%	45,200	34,300	-10,900	-16,639,900	-1,273
OED, 2032 projections	1.2%	47,600	60,700	13,100	19,998,500	1,530
Discrepancy				24,000	36,638,400	2,804
Manufacturing						
Metro Draft UGR 2024	0.1%	101,400	102,900	1,500	1,037,600	72
OED, 2032 projections	0.8%	102,900	120,900	18,000	12,451,300	866
Discrepancy				16,500	11,413,700	794
Total Discrepancy				40,500	48,052,100	3,598

Automation impacts - Metro staff has offered automation as a reason for slower job growth in Logistics and Manufacturing. Other sources support different conclusions. After accounting for automation

impacts, current BLS national projections (which inform OED's regional projections) conclude that Logistics will continue to grow jobs substantially faster than the overall economy. BLS projections also indicate substantially higher output growth than employment growth in Logistics and Manufacturing, which in turn indicates increased land demand. Automated warehouses and factories still need land, and productivity gains of automation support higher land demand. Like BLS, McKinsey's projected job impacts of automation in urban areas indicate losses mainly in office support occupations, modest losses in manufacturing production, and gains in transportation occupations: Future of work in America | McKinsey. Considering the example of self-driving trucks, an extensive USDOT study in 2021 found "vast uncertainty" in future labor market impacts, including losses and gains over several decades with net impacts difficult to predict.

Other underestimated sources of industrial demand – In addition to the growth rate discrepancies for logistics and manufacturing, the UGR underestimates demand in a variety of other ways.

- Business-cycle impacts – Long-term sector growth rates span the job losses and gains of business cycles. In contrast to the predominantly industrial-sector job losses in the region's three previous recessions, the combined industrial sectors were the least impacted in recent COVID recession. The UGR misses this major source of long-term industrial growth by starting the forecast period in 2024, which particularly understates the long-term trend in Logistics.
- Target cluster incentives - The expanded growth potential of target industry clusters, supported by economic development policies and business assistance and incentive programs, is another example of undercounted demand. For example, the region's Cleantech and Electronics clusters are expected to broadly benefit from the 2022 federal industrial policy incentive of the Inflation Reduction Act and Chips Act.



Overstated industrial land supply – While the UGR's industrial land supply for Portland (1,200 acres) is relatively consistent with BPS' preliminary estimate, we are concerned that Metro has overestimated the industrial land supply in the rest of the region in a variety of ways.

- Suitable supply for location-specific demand – The UGR does not track land demand nor supply based on location-suitability criteria or a regional trend analysis by business district type. Instead, the UGR appears to assume that industrial land supply is loosely substitutable across the region. This is not the case when businesses make location decisions. The largest discrepancy is the concentration of the region's Logistics and Wholesale jobs in industrial districts near interstate highways and multimodal freight infrastructure. Some of the region's Warehouse & Distribution land demand is substitutable at dispersed locations, but most of it is not. For example, the City of Portland has 73% of tri-county Logistics jobs, but Portland's freight-hub districts are building out. Portland's 2016 EOA and current industrial land supply studies raise concerns about Portland's tight industrial land supply and ability to meet future demand in these freight-hub districts. The UGR lacks the detail in location needs for different industrial sectors and region's ability to accommodate their growth or the consequences of failing to meet the demand (sprawl to exurban areas).
- 10-acre and larger lot demand – The UGR does not appear to compare land demand and supply by site size. We are concerned that the region has an inadequate supply of 10-acres or larger sites. Larger sites made up 68% of new industrial construction in Portland in the last business cycle. While industrial land demand is present across the site-size distribution, our preliminary

land demand and supply analysis shows the potential for several hundred acres of unmet demand for sites 10 acres and larger in Portland, which are businesses that will seek locations elsewhere in the region (or outside the region).

- Industrial land readiness investment – A third major example of over-stated industrial land supply in the URG is the region's underfunded needs for industrial land readiness. Metro's Industrial Land Readiness toolkit clarifies this issue in detail.
- It is unclear if Metro's methodology adequately accounts for constraints on development for factors such as brownfields, small parcel sizes (less than 0.5 acres); and steep slopes. These factors contribute to overstating the effective supply.

Misreading the tight industrial land supply – BPS is concerned that the UGR sends the wrong message (finding more than adequate industrial land supply) at time of low vacancy rates and increasing rents and land values. The region's traded sector economic base that drives regional prosperity relies primarily on industrial land. The UGR could drive complacency that will undermine long-standing regional economic development goals. Market-effective industrial land supply has been tight in the region since 2015 (see chart below), as building vacancy rates dropping below 5% have pushed up rents to less competitive levels for growth. In turn, the metro area's tight land supply generates sprawl beyond the region. A Colliers' 2023 report on the 'I-5 OR/WA logistics corridor' (see link) identifies 62 industrial projects under construction last year that span the Portland and Seattle metro areas and the I-5 corridor between them.

Source: BPS from CoStar data; annual inflation-adjusted rates (2020 $)

Recommendations – BPS made similar comments about the 2018 UGR that were not taken into account. The UGR employment land methodology needs rethinking.

- Trend-based forecast scenario – The draft UGR employment forecast and capacity analysis is used for other purposes, such as economic development strategies and public and private investments, that go beyond the immediate decision on the UGB. Metro should acknowledge Oregon Employment Department's current sector projections for the Tri-County Area as a UGR forecast scenario that is primarily based on sector trends and not tied to Metro's population

forecast. The average annual growth rate (AAGR) of OED's current 2022-2032 projection is 1.1% for Total Nonfarm Employment, compared to 0.4% in the draft UGR. OED's projection methodology more closely fits the market-trend approach required of cities and counties by Oregon's Goal 9 for employment land planning.

- Rethink UGR employment forecast and capacity analysis - the next (2030) UGR should better align with Oregon's Goal 9 requirements for adequate employment land capacity, estimating demand from market trend opportunities of employment land types, substantially delinked from the population forecast. It should address Goal 9 requirements to analyze land supply and demand by employment land type and to analyze supply and demand by site size for each land type.
- Regional growth capacity strategy – Metro should lead work to prepare a market-responsive regional land-supply strategy to meet industrial demand in suitable locations. This work should be completed to inform the next UGR. It should include analysis and recommendations for industrial land readiness funding and Urban Reserves expansion in market-responsive locations. Current inventory gaps include predominant demand for 10+ acre sites and lack of capacity in near interstate highways or multimodal freight infrastructure. Additionally, cities and counties lack financial resources to overcome development barriers on sites in the existing industrial land supply.

<u>Commercial</u>

Commercial employment forecast appears to be reasonable, but the UGR is missing key details on office/retail/institution sector allocations and resulting demand that are needed to make an informed decision.

Please consider adjusting the commercial land supply analysis and methodology. Metro's backcasting redevelopment probability discount rates drastically reduces commercial development capacity. The proforma financial feasibility methodology is biased towards residential development, which does not adequately account for a residential/commercial split based on recent development trends. Finally, the methodology does not account for intensification of existing businesses/buildings. In the face of increased demand, businesses will add employees/shifts, expand hours and otherwise use existing building space more efficiently and increase productivity without increasing land demand.

The underestimating of commercial land capacity leads to the erroneous conclusion that the region has a deficit of commercial land.

<u>Sherwood West</u>

The UGR needs additional information on how the expected residential, industrial and commercial capacity increases in the Sherwood West area will help meet regional needs.

Generally, the city of Portland is a proponent of infill and redevelopment within the UGB and bases considerations about UGB expansions on their ability to promote urban growth patterns that fulfill the regional policy objectives of equity, housing affordability, economic opportunity and reducing carbon emissions. Those considerations include UGB expansions that:

- Promote and accommodate housing options that include middle housing and higher density multi-dwelling and/or mixed use developments;

- Address the regional need for affordable housing for a wide range of households;
- Create a land use pattern (20+ units per acre) that can be cost effectively served by transit and active transportation; and
- Accommodate large site industrial uses with protections in place to prevent conversion to non-industrial uses.

As proposed, the Sherwood West concept plan does not meet these criteria. The housing element is low-density, expensive housing with minimal opportunities for middle housing with no affordable housing strategy and will not serve the region's future housing needs or address its affordability challenge. The commercial development in the form of wine country hospitality (with no supporting plan to provide affordable housing for workers) is inappropriate to meet the regional commercial land needs. The employment area is promising but various references to "mixed" employment raise concern that the large lot industrial opportunity will not come to fruition. The employment area should be designated on Metro's Title 4 map as a Regionally Significant Industrial Area and not subject to conversion or leakage to commercial uses. Finally, the concept plan lacks an equity analysis and any discussion on how it can address racial income disparities in the region.

Equity analysis

Metro's equity analysis is limited to a look back at UGB expansion areas in Happy Valley and Bethany. These case studies lack comparison to the region as a whole and consideration of household income levels and are not representative of or informative as to how this analysis reflects a regional perspective.

There is no equity analysis of the regional forecast and land capacity analysis – both in terms of housing and employment opportunities. Nor is there any equity analysis of the Sherwood West expansion area and how it can address racial income disparities in the region.

Subject: [External sender]BPS comments on the draft UGR

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Thank you for the opportunity to meet and provide feedback on the draft UGR. As a follow up to our recent meeting, we would like to share these summary comments to help inform your COO recommendation. Also attached is additional detailed feedback on specific topics.

BPS' feedback is focused on the broader policy implications of growth projections beyond the implications for the pending UGB expansion proposal. Our request is that Metro consider those broader policy implications for the region in terms of how we expect to grow in a way that is equitable and meets other regional goals, such as housing affordability, equitable economic opportunity and reducing carbon emissions, when considering its recommendations to the Metro Council.
Overarchingly, by basing the regional forecast on national forecasts, the UGR is missing the important context that, historically, Oregon has grown faster than the nation and the Portland region has grown faster than the state.

While we agree that population will grow slower than in the past, we are concerned that the Metro forecast is too low, which will affect planning for housing that will result in insufficient housing capacity that will continue to exacerbate our housing affordability challenges. Metro should select the Strong Urban Market housing mix with a high population/household forecast to ensure that future growth

patterns reinforce the goals to have compact development and provide a wide range of housing types to accommodate changing socio-economic demographic factors. This scenario best fits the expected trends for older, smaller households. It also addresses affordability concerns – the future need will be for multi-dwelling and middle housing units. Eighty-one (81%) of future households will be financially challenged or unable to purchase homes with current median sales price at roughly $550,000. Metro can select this scenario without creating the need for a massive UGB expansion by adjusting the redevelopment rate in the development capacity model (see attached detailed comments).

The consequence of not planning for population growth is that it will likely constrain the state and region's economic growth. The assumption that that lower population growth will mean slower economic growth because access to labor will be the constraining factor will serve as a constraint to future economic growth and expansion. Given post-Covid trends, we know that the workforce and capital are mobile. If the region has the land capacity for businesses to expand then workers will migrate to the region. If the region does not have the land capacity, then economic growth will be constrained. The Oregon Office of Economic Analysis proscribes a similar practice (page 32) - Oregon's economic condition heavily influences the state's population growth. It is economy that determines the ability to retain existing work force as well as attract job seekers.
Similarly, our concern is low industrial job projections could also serve to constrain economic development potential in the state and the region over the longer term. Projecting low industrial employment and identifying an "oversupply" of industrial land could undermine longstanding city and regional efforts to make investments (brownfield clean up and infrastructure investment) that will make industrial land ready for development. The message that the region has an abundant supply of industrial land could dissuade decisionmakers and leaders from difficult decisions and prioritizing the investments needed to realize that economic opportunity. The net result will be a lack of middle wage job opportunities that will advance city and regional equity and climate goals. The UGR assumptions for industrial job growth vary widely relative to regional growth trends and State of Oregon employment projections. The UGR comes to the opposite conclusion of the private market, which has found inadequate industrial land supply since around 2015, as evident in the region's low industrial vacancy rates and rising rents and land values of the last decade. As it relates to the commercial land supply, Metro's redevelopment probability discount rates and a bias towards residential development drastically reduces the commercial development capacity. For example, Metro finds that Portland has 34 acres of commercial capacity, whereas BPS' analysis finds that figure to be 500 acres.

Generally, the city of Portland is a proponent of infill and redevelopment within the UGB and bases considerations about UGB expansions on their ability to promote urban growth patterns that fulfill the regional policy objectives of equity, housing affordability and reducing carbon emissions. Those considerations include UGB expansions that:

- Promote and accommodate housing options that include middle housing and higher density multi-dwelling and/or mixed-use development;
- Address the regional need for affordable housing for a wide range of households;
- Create a land use pattern (20+ units per acre) that can be cost effectively served by transit and active transportation; and
- Accommodate large site industrial uses with protections in place to prevent conversion to non-industrial uses.

As proposed, the Sherwood West concept plan does not meet these criteria. The housing element is low-density, expensive housing with minimal opportunities for middle housing and no affordable housing strategy and will not serve the region's future housing needs or address our affordability challenge. The commercial development in the form of wine country hospitality (with no supporting plan to provide affordable housing for workers) is inappropriate to meet the regional commercial land needs. The employment area is promising but various references to "mixed" employment raise concern that the large lot industrial opportunity will not come to fruition. The employment area should be designated on Metro's Title 4 map as a Regionally Significant Industrial Area and not subject to conversion or leakage to commercial uses. Finally, the concept plan lacks an equity analysis and any discussion on how it can address racial income disparities in the region.

The Urban Growth Report (UGR) is an opportunity to frame future regional planning discussions such as the regional housing production strategy, a refresh of the 2040 Growth Concept, and a needed regional discussion on economic development land needs that go beyond the technology sector.

We look forward to continuing this discussion.

When: Tuesday, August 6, 2024 2:30 PM-3:30 PM (UTC-08:00) Pacific Time (US & Canada).
Where: Teams/virtual

Thank you for making time for this meeting to follow up on draft Urban Growth Report technical questions. (Adding Patricia Diefenderfer to this meeting per Catherine's request.)
Below is a draft agenda:

- Welcome and introductions
- Project schedules
    - Growth management schedule
    - 2040 Future Vision schedule
    - Distributed forecast schedule

- City of Portland and Port concerns
- Next steps

Kind regards,
Lisa Hunrichs (she, her)
Executive Assistant to the Director and Deputy Director

Subject: RE: Sherwood West

Hi Dave,
You are correct that the City of Sherwood has submitted a proposal for adding the Sherwood West urban reserve to the urban growth boundary. I can't speculate on what the Metro Council's decision will be. Under state law, they can only add land to the UGB if there is a demonstrable regional need for it. We have not yet completed that analysis, which will be released in draft form in late June. Sorry I can't be of more assistance at this time.

Thanks,
Ted

Good afternoon,

I am working with the City of Sherwood and Clean Water Services on some land valuations in the Sherwood West expansion area.

It is my understanding that Sherwood is submitting to Metro the Sherwood West concept plan (attached) to Metro in a request for UGB expansion this year (2024).

I am hoping to report in my appraisal the likelihood or probability of Metro expanding UGB. I understand nothing is definitive, but I also want to know if there is a strong chance that the UGB expansion could be denied.

Thanks for your time. Feel free to call.

Dave

Re: Sherwood West Concept Plan Proposal

To Whom It May Concern:

My name is David Balfour, and I am a Commercial Real Estate Appraiser and am also a resident of Sherwood. As such, I would like to document my **support** to approve the Sherwood West Concept Plan as proposed by the Sherwood Planning Department as both a commercial real estate expert and a community member.

As an appraiser and investor, the Sherwood market has historically exhibited extremely limited employment land supply. While performing appraisal work and comparing real property sales in Sherwood, Tualatin, Wilsonville, Hillsboro, Beaverton, and other communities, it is consistently evident that Sherwood is the most constrained in terms of land supply as well as building supply. This creates barriers to market entry for tenant business owners. As an appraiser and investor, I believe my experience in these markets qualify me to understand the supply and demand constraints as well as the economic opportunity for the community of Sherwood (and the Portland Metropolitan Area as a whole). It should be noted that I have been monitoring the following potential expansion areas outside of Sherwood West:

- While there are lands in Hillsboro that were approved for industrial expansion, I personally have worked on +/-30 projects in that area over the past 18 months and know that every parcel is spoken for by a developer or users (all the way out to Jackson School Road where the UGB boundary lies). Thus, Hillsboro does not provide a substantive supply relief option.
- North Plains voters rejected expansion plans in May 2024, again providing no relief to the Portland Metropolitan area's industrial land shortage.
- On the east side, there are many transportation projects and funding constraints preventing parcels along Highway 212 from development based upon information I have gathered from multiple appraisal assignments. Again, the east side of Interstate 5 does not provide substantive supply relief options.
- Furthermore, it is frustrating to watch the growth that Vancouver and Clark County are experiencing (and benefiting) from our businesses and companies relocating across the Willamette River for a variety of reasons including supply constraints. While that Southwest Washington submarket is soaring, the Portland Metropolitan area is losing business, jobs, and tax revenue which I believe can be partially offset by suburban land supply creation in Sherwood West.

- I want to point out that supply is constrained with hardly any fully served industrial sites. I was shocked to recently observe offers on a property that would take +/-5 years to simply perform site work (grading and utilities) to bring online for building construction.

Similarly, Sherwood has a shortage of residential housing supply which results in the available supply being significantly priced (upward pressure) and therefore unaffordable to many. I am a paid SSD employee (Football Coach) and volunteer on the Sherwood Youth Football Association Board where I hear from many parents that home pricing in Sherwood is extreme and prevents friends and family from moving to the area. Considering the planning and positioning of the Sherwood School District (which is one of the best in the state) to provide facilities that can accommodate substantive student growth, as well as surrounding lands that can support residential development, it is critical to increase residential land supply to maximize the Sherwood School District facilities and alleviate residential housing price affordability.

Lastly, and most critically, the recent roadway infrastructure improvements at two of Sherwood primary intersections (Sunset Blvd/Elwert Rd/Highway 99W and Roy Rogers Rd/Tualatin-Sherwood Rd/Highway 99WW) as well as the commuting routes of Roy Rogers Road and Tualatin-Sherwood Road, position both employment and residential users to benefit from urban expansion areas.

In closing, I believe that the community is well positioned from an infrastructure standpoint to support these expansion plans. Furthermore, expansion as proposed will strengthen the existing community and provide a highly desirable opportunity to work/live for the Portland Metropolitan area.

Therefore, I urge the Metro Council to approve the Sherwood West Concept Plan as proposed. Thank you for reading my testimony, your consideration of this matter is very much appreciated.

Sincerely,

David E. Balfour, MAI

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To whom it may concern,

As a resident and taxpayer of Sherwood, I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely,

Brittni Beers-Branco

Subject: [External sender]Metro decision on a UGB expansion request end of this year (2024) Sherwood, OR

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Good Morning Metro:

As a property owner of 13 acres on 19945 & 19525 SW Kruger Rd, Sherwood, Or - outside of the UGB, I strongly support to be included in the UGB. We are directly behind the new Sherwood High School with a "turn around intersection of Elwert and Kruger which causes traffic going from Newberg to Hillsboro. The congestion from the High School Literally makes the case for growth, road improvement, local businesses so students do not have to use cars to cross 99W. Sherwood is the "gateway to the coast and wine country" it would be SAD to be like Tigard and just be a "drive though".

This also could be a promotion advertising to come to "OREGON as a DESTINATION".

Thank you,
Hella Betts

Metro Councilor Christine Lewis
(via email)

Dear Councilor Lewis:

I am writing on behalf of the Borland Property Owners Association, which represents owners located along I-205 and south of the Tualatin River (map attached) – and which has been in "Urban Reserves" for many years. It is part of the largest area within Metro's boundary that is Urban Reserves, and it is the only formerly Tier 1 Urban Reserve not yet within a UGB. Our comments focus on the need for housing, recognizing that there also is a significant market need for business/industrial land.

Metro's Draft Urban Growth Report (DUGR) as presented to Council is not merely a statistical exercise. It is in fact a package of major policy decisions that should be rigorously discussed by the Council in open, regularly scheduled Council meetings and only after that voted upon.

The DUGR appears against a backdrop of what is widely described as a housing crisis: A shortage of tens of thousands of units of housing that is affordable to working Oregonians, as well as a severe shortage of housing accessible with either direct or indirect subsidies.

In summary, we have a large supply-demand imbalance. Lack of supply has driven Portland-area costs well above comparably sized, successful cities. For example, based on National Association of Realtors sale price data from Q1 2024 (attached):

- Charlotte, North Carolina, is about 10% larger than Portland but its housing costs are about 20% less.
- Pittsburgh is of comparable size and its housing costs are about 42% of those of Portland.
- Even Phoenix, Arizona, is nearly twice Portland's size by population and yet its housing costs are about 10% less.

All these areas are prosperous, desirable places to live – and are more affordable than Metro Portland.

This crisis prompted Metro to go to the ballot and get approval for an income tax to pay for housing subsidies, and it has prompted the Legislature and Governors to collaborate on passage of major housing measures in recent years.

And yet there has been little movement of Metro-controlled urban growth boundaries, the most tangible means by which Metro can increase the supply of legally buildable land and by doing so mitigate costs. If we really are in the midst of a housing crisis, then moving UGBs should be part of the action plan to counter it.

[redacted] Portland, Oregon 97229 [redacted] · [redacted]

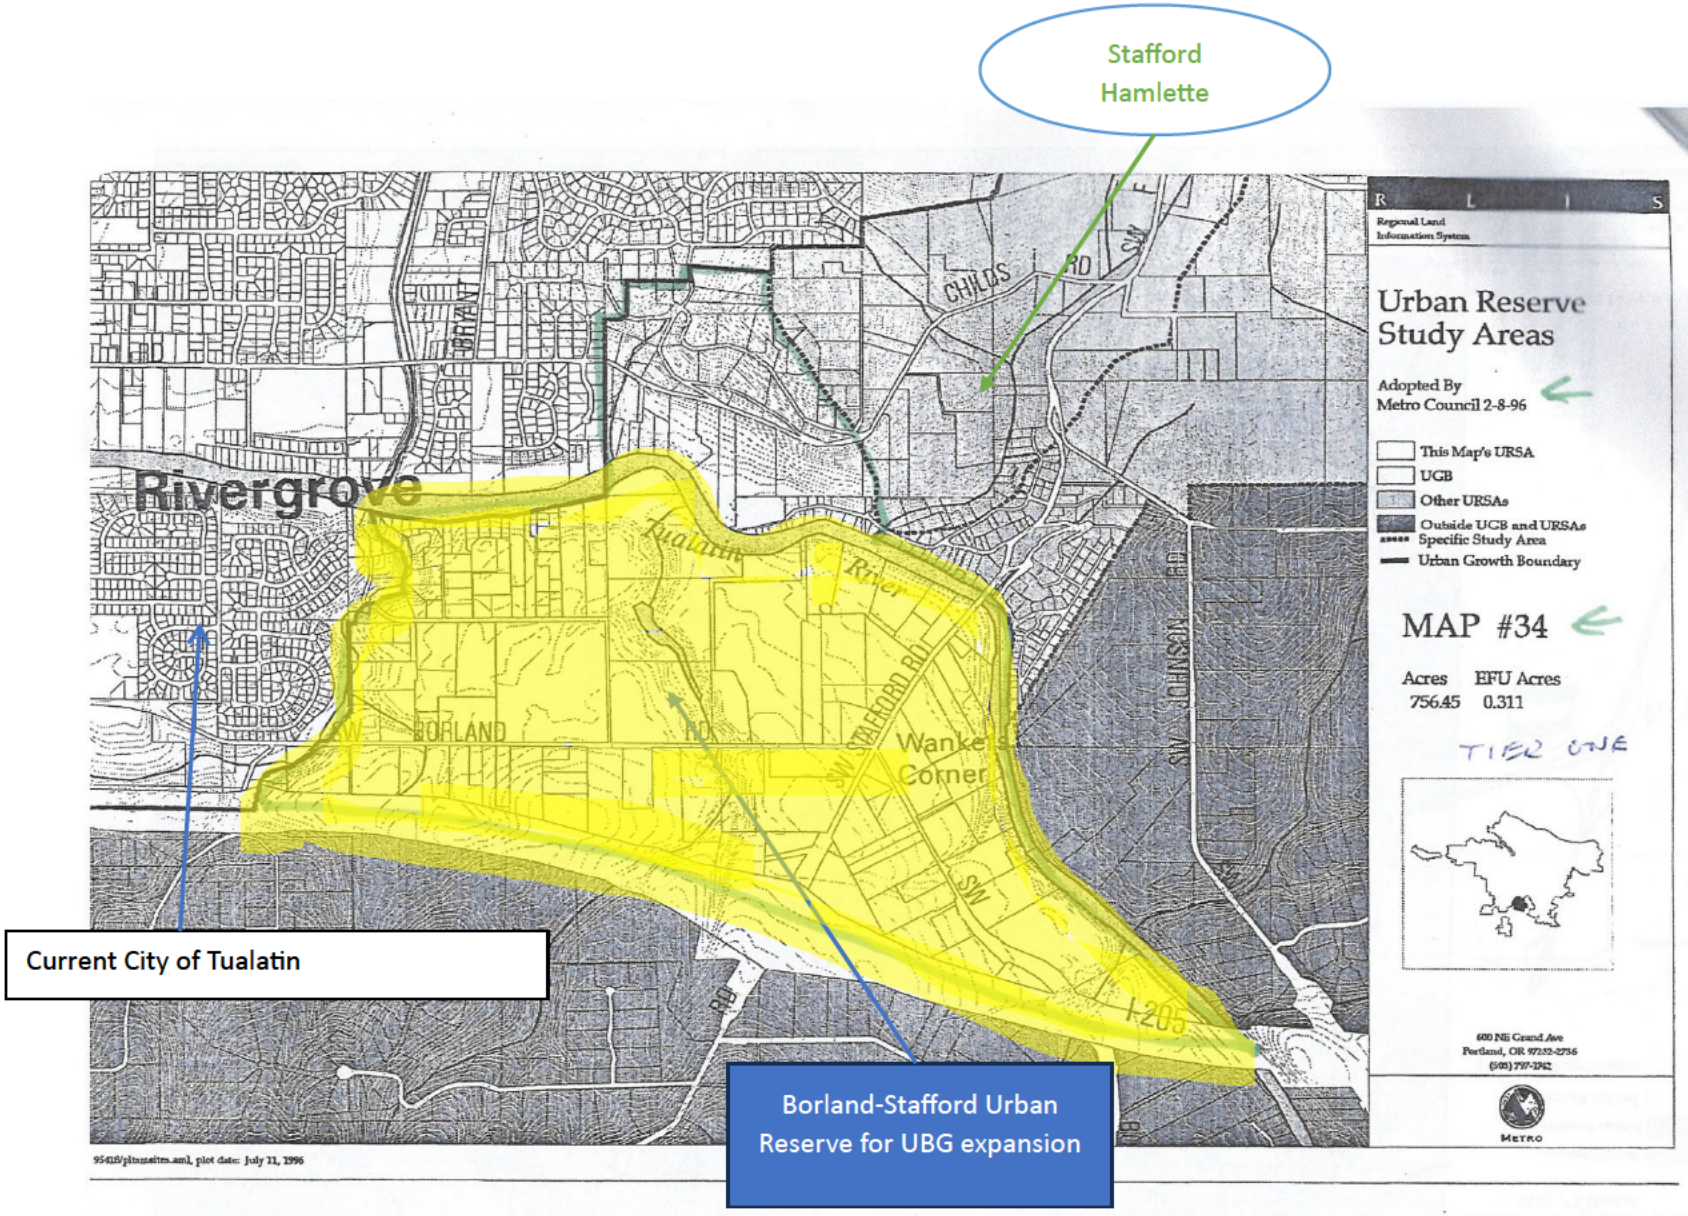
Our problem has become a negative flywheel feeding on itself: Excessive costs discourage in-migration necessary to make up for the macro trend of an aging native population, primarily driven by the Baby Boom generation and decreasing family sizes among following generations. An aging population leads toward economic stagnation and limited opportunity for the working-age population.

While Metro cannot realistically change the macro aging trend among the native population, in-migration is well within Metro's policy influence. It is not merely a matter of picking a high, medium, or low in-migration projection. *The policy choice before the Metro Council is whether to encourage in-migration*. It can do so by greatly expanding the supply of housing land.

The DUGR also makes highly questionable assumptions about acceptable density. While noting that younger people are willing or even desire to live in dense multifamily housing, it fails to note that many of today's 20-somethings soon will be 30-somethings with young families seeking single-family homes with a yard. If Metro expands UGBs now, then the housing they likely will desire could be reasonably available within 10 years.

The report also notes increasing amounts of dense or attached single-family housing such as multistory townhouses, and projects proportionately more such housing *without acknowledging the growing need of the older component of the population for single-level housing*.

Metro has a responsibility to meet these needs, which cannot be met entirely by infill and redevelopment. It cannot meet its responsibility to provide for sufficient legally developable land by merely ratifying a report that, despite its earnest statistical analysis, is a series of guesses tilted toward a slow- or no-growth policy choice.



Borland can be part of the solution and help Metro meet its statutory responsibility. Based on consultation with civil engineers and developers over many years, we are confident that the developable acreage in Borland easily could accommodate approximately 1,500 units of mixed types of housing, along with an adequate supporting retail center. Its existing access to I-205 and major arterials, with improvements, make it an ideal location from which to commute to jobs along the I-205 and I-5 corridors.

To have the deepest, broadest impact on metropolitan Portland's shortage of both housing and industrial land, Metro must make bold policy decisions like bringing Borland out of Reserves and into a developable UGB.

Best regards,

Tom Holt

RE: Comments on 2024 Draft Metro Urban Growth Report

Dear Ms. Madrigal:

Thank you for the opportunity to comment on the 2024 Draft Metro Urban Growth Report (Draft UGR) on behalf of the Port of Portland (Port).

The Port is a major industrial landowner in the region and active participant in economic development efforts statewide, such as the Governor's Semiconductor Competitiveness Task Force and Clean Tech Manufacturing Task Force. We are also active members of several Metro-convened policy committees, including the stakeholder roundtable convened to inform the 2024 growth management decision. Based on these perspectives, we have closely reviewed the Draft UGR, and submit the attached technical comments.

At a high level, we recognize the bounds of this exercise and appreciate the work Metro has done to provide insight into the process and invite a variety of perspectives. At the same time, we are concerned that industrial land demand is understated, and the effective supply is overstated. Readiness and viability for development rely on several factors beyond acerage alone, and we fear that identifying a surplus of supply without this realistic overlay could have negative policy implications by limiting much needed public and private investment in site readiness within the Urban Growth Boundary (UGB).

Creating opportunities to grow traded sector employment is essential to Oregon, which is dependent on income tax, as well as providing living wage jobs for residents. In addition, this finding impacts other important policy documents, such as the Regional Transportation Plan.

Given the importance of this topic to the region and the state, we look forward to working with Metro and other partners on processes to ensure an adequate supply of industrial land moving forward. Such partnerships could include revisiting Metro's 2040 Growth Concept to identify long term strategies to provide for an adequate industrial land supply, particularly for key traded sector industries. It would also be helpful for regional partners to update both the Site Readiness Toolkit and the Brownfields Inventory. Having this objective and current information, with mutually aligned methodology, will help us better craft and execute strategies aimed at our common economic development, land use and transportation goals.

Thank you again for the opportunity to engage and comment. Please let us know if you have questions or if you are interested in discussing any of these points in more detail.

Sincerely,

Teresa Carr,
Director, Business Development & Properties

Port of Portland

Port of Portland Technical Comments on Draft UGR

- Potential Underestimate of Land Demand: The cumulative impact of the assumption in Appendix 3 appears to be leading to an underestimate of land demand for specific use categories such as warehouse/distribution.
  - Appendix 3-assumptions about industrial building square footage appear to be too low. Several Port warehouse/distribution tenants have over 5000/sf per employee, underscoring a long-term trend toward automation and mechanization in the logistics industry.
  - Appendix 3-assumptions for industrial floor area ratio (FAR) of .25-.5 is likely too high, based on users that require extensive exterior storage and/or laydown areas, for example auto importers/exporters, ship repair and wind energy fabrication.
  - Appendix 3 Table 2 indicates that the distribution of building types for the Transportation, Warehouse & Utilities sector (NAICS 22,48- 49) is "31% Office, 6% Institution, 10% Flex/BP, 1% Gen Industrial, 43% Warehouse, 9% retail". Based on our experience, the assumed amount of warehouse building type for this sector should be much higher and certainly the majority of building space.

- Inventory Criteria: At the 7/17/24 MTAC meeting, Metro staff was asked about including industrial land with a 7% or greater slope in the inventory. A representative from Washington County noted that land with a 5% slope is typically used for industrial land inventories. When asked how much land would come out of the inventory if a 5% slope was used as the metric, Metro staff indicated "about 1,300 acres". This single correction would result in a 22% reduction of the purported 5,900 acres of industrial inventory identified in the Draft UGR.
  - Appendix 6 notes that the median size for industrial parcels in the assumed inventory is .6 acres, comprising a total of 1,934 acres. Parcels this small are not suitable for an industrial use even if they are zoned industrially. "Suitable" under OAR 660 means serviceable land designated for industri or other employment use that provides, or can be expected to provide the appropriate site characteristics for the proposed use. The implication is that likely hundreds of acres currently counted as part of the existing industrial land inventory in the Draft UGR may not be suitable for industrial purposes.

- Sherwood Expansion Proposal: The single expansion proposal under consideration for the 2024 growth management decision is from the City of Sherwood. The Port provided a letter in support of the proposal in March, 2024 and we continue our support. In particular, we support adding industrial land that could accommodate semiconductor and other traded sector industries. To ensure those lands are available for industrial use, Metro may want to consider amending the Title 4 map to apply a Regionally Significant Industrial Area (RSIA) designation. Further, while the Port is not opposed to the inclusion of "Hospitality" land per se, we feel this category (and the need for such land) should be better defined to avoid setting an unintended precedent.

- Future Urban Growth Decisions: Incorporate an Economic Opportunities Analysis (EOA)-based analysis of sector and business-district growth opportunities across distinct parts of the region. Also, de-link the demographic and employment forecasts by acknowledging the potential for additional in-migration based on traded sector job-growth opportunities. Providing additional incentives for communities on the edge of the UGB to undertake concept planning and provide infrastructure for future expansion areas, particularly for needed industrial land, is also recommended.

Subject: [External sender]Comments on City of Sherwood's UGB Expansion Proposal

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Dear MPAC, Metro Council and Metro,

We are writing with respect to the proposed Sherwood West Concept Plan ("Plan") that the City of Sherwood has submitted to Metro requesting an expansion of the Urban Growth Boundary by 1,291 acres. We have been homeowners in Sherwood since 2000, nearly 24 years and have a vested interest in seeing it grow in a positive way. This proposal is lacking in facts – both actual and demonstrated needs as well as supporting details for the costs of infrastructure and reality of job opportunities and should not be approved. During the past two years, we , and many others, have been vocal in our opposition to the Plan. We were quite surprised during the presentation to Metro on May 22, Tim Rosener (Sherwood Mayor) represented to the Council that there had been little to no organized public negative sentiment towards the expansion proposal. This is simply not true and is just one of many examples of anecdotal comments in the May 22 presentation to MPAC that were not supported by actual data and facts.

Our ask of the Council and Metro, as it considers the request in alignment with outlined legislation, purpose and protocol for UGB expansion requests, is to please Follow the Facts. The Sherwood West Concept Plan may appear to be an impressive package, however it represents the viewpoints and desires of politicians and land developers and not a demonstrated need for more developable land in Sherwood or the metro area as a whole.

- Survey 75%/85% respondents-Sherwood Residents- said NO to the expansion request.
- The data shows a need for housing for the city of Sherwood of only 600, while city of Sherwood's request ranges from 3,100 to 5,500.
- Population growth projections and data do not demonstrate need for the expansion. People are moving out of Portland Metro area to Washington state and other locations since 2020. While in 2018 it looked like the trend was to continue growth of 1.6%/year, it is clear that is steadily declining and is now 33% less than it was (2018 = 1.56%, 2024 = 1.04%). https://macrotrends.net/global-metrics/cities/23102/portland/population
- Infrastructure and Traffic impact from the Plan will likely be significant and expensive. The Plan greatly downplays and minimizes this critical issue. As an example, during the May 22 presentation it was represented that road improvements would improve Roy Rogers connection to I-5, when in fact a map will show they do not intersect. This is just one example of the glossing over, and misdirection of the Plan when very real issues are raised. Furthermore, system development charges for the proposed expanded area will be significant and make the housing itself expensive.
- There is no demonstrated NEED for a 1,291-acre expansion which is excessive especially in relation to the overall size of Sherwood today. Sherwood officials have justified and represented to its residents and concerned citizens that it is in the city of Sherwood's best interest to a) have a plan of record otherwise Metro will make a plan for Sherwood (is this true?), and b) to make a single request for as much land as possible.

- There will be significant impact to farm and forestland and a good portion of the requested expansion area is in protected areas and/or will cause runoff that impacts wildlife (can be seen on a map) and the additional pollution of so many cars and congestion on the road to get to jobs will further harm the environment.
- The planned housing will not be more affordable nor improve the homeless situation. Look at the actual cost of housing at nearby Cooper Mountain for a benchmark. A more viable solution could be turning existing vacant office real estate (which there is an abundance of) into low-income efficiency apartments.
- Similarly there is already a surplus of commercial, industrial and mixed employment real estate in the greater metro area due to hybrid work trends and due to AI and automation trends as evidenced by the announced local layoffs (Nike, Intel, etc)

We appreciate that Metro has a challenging and important role in that it must balance ensuring enough land for 20 years AND also protecting the metro area from urban sprawl. The proposal by Sherwood is not a demonstrated need, but a want of politicians and developers to increase the city of Sherwood from 3,130 acres to 4,421 acres (increase of >40% for a population of 20,000!) creating unnecessary urban sprawl, excessive and unplanned for traffic, and harm to farm and wildlife and it will not contribute to affordable housing because it will be incredibly expensive to add infrastructure and build. Metro's own 2045 Distributed Forecast shows Sherwood growing by less than 1000 people and with a need for only 800 households and Sherwood still has significant unused land opportunities that could satisfy its current housing needs (e.g. Brookman annexation, and existing available properties and land infill which could be used for multi-family and middle-housing to be centered around the Old Town hub of Sherwood and make more sense for growth).

Based on records we can find, the UGB just in the vicinity of Sherwood has already expanded by 2,270 acres since 2018 (Cooper Mountain, Beef Bend South and King City). This newer UGB land is still far from fully developed/populated and should be focused on first. Additionally, the requested 1291 acres would be the largest expansion in decades (and the second largest since Cooper Mountain was added to Beaverton – which incidentally is a city 5 times larger than Sherwood so it was less than a 10% expansion of land).

We ask ourselves and Metro whether this proposed Plan and UGB expansion is truly needed for either Sherwood or the Metro area as a whole and whether the ramifications to the environment and costs of development have been truly evaluated? Based on the facts it does not appear so, and we ask you to vote against and decide NOT to expand the Portland area UGB.

Respectfully,

Shannon and Todd Christiansen

Leapfrog Development: Corporate Capitulation and the Impact on Washington County, Oregon

Chris Christensen

Housing, Real Estate & Mortgage Specialist - Condominium Conversion Project Manager - Assumption & Loss Mitigation Specialist, Political Pundit and 2020 U S. Congressional Candidate

Published Jul 7, 2024

"*We soon found that the white men were growing rich very fast and were greedy.*"

- Chief Joseph, (or Hin-mah-too-yah-lat-kekt), Tribal leader of the Wallowa Band of Nez Perce

In the heart of Oregon's Silicon Forest, Intel's relentless advancements have epitomized the concept of leapfrogging technology. Intel CEO Pat Gelsinger often references **Moore's Law** in his speeches to investors and analysts, highlighting the company's commitment to doubling the number of transistors on a microchip approximately every two years. Yet, while the company's cutting-edge innovations have driven progress, they have also sparked a chain reaction with potentially significant economic and ecological ramifications for the surrounding communities where Intel's "fabs" are located.

The rapid pace of Intel's technological growth has, predictably, fueled a real estate frenzy in every Washington County, Oregon community. Bigger cities like Beaverton, Hillsboro, and Tigard are cashing in on the "micro-boom," and even small towns such as Banks, North Plains, Forest Grove, and the county's unincorporated agricultural areas are inflating a precarious bubble that could spell an economic and ecological "micro-bust" for the region and the state.

Technological Leapfrogging

Intel's Silicon Chip Manufacturing Footprint in Hillsboro, Oregon is Currently Undergoing a Major Expansion With Financial Assistance from the Federal CHIPS Act and Oregon Taxpayers. (Image Credit: Chris Christensen)

For some, Intel's Hillsboro campus stands as a beacon of technological prowess, consistently announcing advancements in integrated circuitry. The company's commitment to innovation has resulted in a near-constant stream of newer, faster electric circuits, each "generation" essentially rendering prior products as inferior or even functionally obsolete. With the rapid emergence of artificial intelligence and robotics, Intel is now poised to lead the sector for many years to come.

Or are they?

The Pacing Problem and Intel's High NA EUV Technology

A critical concept in technological innovation is the pacing problem, where the rate of technological advancement outstrips the ability of industries, governments, and society to adapt. Remember the 8-track tape player or the laser disk? **Intel's recent acquisition and implementation of High NA EUV (Extreme Ultraviolet) technology** is a prime example. This cutting-edge technology, which promised unprecedented advancements in semiconductor manufacturing, is already being overshadowed by **the anticipated future arrival of Hyper NA EUV technology.**

The relentless drive to stay ahead in the technology race begs the question: where will it all end? Each new leap in technology renders previous innovations obsolete almost as soon as they are introduced, creating a perpetual cycle of development and obsolescence. This breakneck pace strains the technological ecosystem and exacerbates the economic and environmental pressures on the surrounding communities.

The Real Estate Boom: Look Before You Leap

The influx of high-paying tech jobs at Intel has attracted a wave of new residents eager to capitalize on the opportunities presented by the booming tech sector. This sudden surge in population has driven up housing demand, leading to skyrocketing property prices in nearby communities such as Hillsboro, Banks, Gaston, North Plains, and Forest Grove. Once quiet agricultural areas in Washington County are now hotbeds of real estate speculation, with developers scrambling to cater to the burgeoning demand. The City of Hillsboro, for example, recently **approved over 8,000 new homes to be**

developed in South Hillsboro, once an agricultural mecca, with thousands more planned.

While this real estate boom has brought economic growth and prosperity to the region, it has also sown the seeds of potential catastrophe. The rapid pace of development has put immense pressure on local infrastructure and resources, straining the delicate balance between growth and sustainability. As property values soar, long-time residents are priced out of their communities, increasing social and economic disparity.

Drain the Swamp? The Role of Oregon's Politicians

A significant contributing factor to this unchecked development is the role played by Oregon politicians, swayed by **Intel's corporate wealth**. In exchange for the promise of higher tax revenues, these policymakers have sacrificed the **foundational principles of Oregon's land use planning system. Established to protect farmland, forests, and open spaces** while promoting orderly urban development, these principles have been sidelined in favor of ill-gotten economic gains. This abandonment of sustainable land use policies not only accelerates climate change but also **jeopardizes the environmental integrity of the region.**

The Concept of Leapfrog Development

Leapfrog development can be visualized through the metaphor of a frog leaping from lily pad to lily pad across a pond. In this context, the "lily pads" represent the various communities in Washington County—such as Beaverton, Hillsboro, Tigard, North Plains, Banks, Forest Grove, Cornelius, and Gaston. Instead of a gradual, cohesive expansion from one area to the next, development leaps over existing communities, creating new pockets of urbanization in a disjointed and sporadic manner.

This type of development results in patches of urban sprawl, often leaving significant gaps of undeveloped or underutilized land in between. These gaps disrupt infrastructure continuity, making providing consistent public services, managing traffic, and maintaining community cohesion challenging. The leapfrog metaphor vividly illustrates the haphazard nature of this growth, highlighting the inefficiencies and long-term challenges it introduces.

The Detrimental Impact of Leapfrog Development

Leapfrog development, characterized by rapid, sporadic, and disjointed urban sprawl, has far-reaching negative consequences for suburban and agricultural communities. The effects are multifaceted and profoundly detrimental, impacting traffic, congestion, crime rates, infrastructure needs, and the preservation of farms and forests.

- Traffic and Congestion

The influx of new residents and the expansion of residential areas significantly increase traffic and congestion. Roads that were once sufficient for rural communities are now overwhelmed, causing longer commute times, higher transportation costs, and increased pollution. The lack of adequate public transportation exacerbates these issues, significantly increasing daily travel, which is a burden for residents.

- Crime Rates

Rapid and poorly planned unchecked growth can also contribute to rising crime rates. As new neighborhoods emerge without the necessary social and community infrastructure, law enforcement resources are stretched thin. The absence of cohesive community planning can lead to social fragmentation and increased opportunities for criminal activities, undermining the safety and security of these newly developed areas.

- Infrastructure Needs

The sudden surge in population places immense strain on existing infrastructure. Water and sewage systems, schools, hospitals, and emergency services need help to keep up with the rapid growth. The cost of upgrading and expanding these services often falls on local taxpayers, leading to increased financial burdens and potential declines in the quality of public services.

- Preservation of Farms and Forests

One of the most significant impacts of leapfrog development is the loss of farmland and forests. The encroachment of urban sprawl threatens Oregon’s rich agricultural heritage and natural landscapes. Once fertile lands are paved for housing developments and forests are cleared, leading to habitat destruction, loss of biodiversity, and increased greenhouse gas emissions. This disrupts local ecosystems and undermines the state’s commitment to environmental sustainability.

- Water and Power Consumption: An Unsustainable Path

Another critical issue exacerbated by Intel's expansion and the accompanying real estate boom is the inevitable massive increase in water and power consumption. High-tech industries, particularly semiconductor manufacturing and data centers, are notoriously resource-intensive. Intel's operations in Hillsboro require vast amounts of water for cooling and manufacturing processes, straining local water supplies. Similarly, the power demands of these facilities are immense, further burdening the region's energy infrastructure.

As companies like Intel and other data centers continue to grow and expand in Washington County, the demand for these resources will only escalate. This increased consumption is unsustainable both economically and environmentally. Local homeowners already feel the pinch as utility rates skyrocket to meet the burgeoning industrial demand. **The competition for water between industrial uses and residential needs is becoming increasingly fierce, with industrial consumption threatening to outpace homeowners' needs.** This imbalance drives up prices and raises concerns about long-term resource availability and sustainability.

The Core Problem: Irresponsible Planning and Land Use Patterns

Oregon's Urban Growth Boundary Has Long Been the Dividing Line Between Unchecked Urban Sprawl and the Region's Agricultural and Rural Land (Image Credit: Reddit)

Leapfrog development and the resulting urban sprawl represent a terrible, politically ignorant, and egregious example of irresponsible planning and land use patterns. This

unchecked expansion is a land grab orchestrated by greedy corporate interests and the politicians they influence. The crux of the issue lies in the need to limit leapfrog development and urban sprawl by maintaining the integrity of the urban growth boundary and adhering to existing land use limitations and zoning regulations.

Expanding the urban growth boundary and relaxing zoning laws benefit developers and corporations at the expense of the community and the environment. This short-sighted approach undermines the foundational principles of Oregon's land use planning system, which were designed to protect the state's unique landscapes and promote sustainable development.

The Decay of Portland: A Case Study in Failed Political Policies

Articles People Learning Jobs Games Get the app

Image Credit: Chris Christensen - Image of Homeless Person Sleeping on Sidewalk near West Burnside Street in downtown Portland, Oregon

Compounding the issue is the decay of Portland, the region's urban core. Over the last decade, failed liberal political policies and capitulation to corporate and criminal interests have deteriorated the city's economic and cultural vitality. Rather than addressing the core issues within Portland and restoring it to its previous grandeur, political efforts have instead focused on enabling leapfrog developments farther and farther from the city center.

Portland's decline serves as a cautionary tale. The city's neglect has driven residents and businesses to seek opportunities in the outlying areas, exacerbating urban sprawl and placing additional pressure on suburban and agricultural communities. This shift undermines Portland's potential for economic and cultural revitalization and threatens the preservation of the outlying regions' natural, pristine beauty and agricultural significance.

The Looming Catastrophe: An Economic and Ecological Bust

The focus on providing corporate welfare to businesses such as Intel to attract cutting-edge technology to the region has created an unsustainable growth model that risks imploding with dire consequences. **If left unchecked, the current trajectory could culminate in a historic economic and ecological bust for the entire region.**

Economically, the inflated real estate market bears eerie similarities to past bubbles that have burst with devastating effects. The speculative frenzy surrounding property in Washington County is built on the assumption of perpetual growth and prosperity. However, as history has shown, such growth is rarely sustainable. A sudden downturn in the tech sector or a shift in corporate strategy could leave the region grappling with plummeting property values, foreclosures, and a shattered local economy.

Unchecked development threatens to irreparably harm the region's natural landscape. The agricultural areas that have defined Washington County for generations are being swallowed by urban sprawl, leading to habitat destruction, loss of biodiversity, and increased pollution. The environmental degradation resulting from rampant development could undermine the very foundations of the community, leaving behind a legacy of ecological devastation.

A Call for Caution and Sustainable Growth Policies

As Intel continues to push the boundaries of technological innovation, the surrounding communities and policymakers must adopt a more cautious and sustainable approach

to growth. The allure of quick profits and rapid advancements must be tempered with a deep understanding of the long-term consequences. Just as the relentless pursuit of leapfrogging technologies can lead to obsolescence and instability, leapfrog development can also result in fragmented communities and environmental degradation.

Both technological leapfrogging and leapfrog development share a common flaw: focusing on short-term gains at the expense of sustainable, cohesive progress. The rush to implement the latest technologies without fully considering the pacing problem mirrors the haphazard expansion of urban areas, creating patches of development that strain infrastructure and resources. The lack of strategic planning and foresight can lead to catastrophic outcomes in both cases.

For Washington County, the solution lies in curbing the sprawl by enforcing strict land use policies that prevent urban growth boundary expansion. Emphasis should be placed on revitalizing Portland, addressing its economic and social challenges, and restoring it to the vibrant urban core it once was. This approach not only preserves the natural and agricultural beauty of the surrounding areas but also fosters a more ecologically sustainable, resilient, and responsible community.

To whom it may concern,

As a resident and taxpayer of Sherwood, I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely, Brent and Michelle Christian

RE: Urban Growth Report, Draft 2024

Dear Council Members,

I am writing to provide comment on the Draft Urban Growth Report pertaining to the City of Sherwood's proposed Sherwood West Concept.

I would first like to thank the members of the Council and their staff for their efforts in managing and planning for growth in the Metro area. I am sure it is often a thankless task, but one which is greatly needed by the community.

I have carefully reviewed the Draft and have a number of concerns about the proposed expansion by the City of Sherwood.

1. **The Draft does not incorporate nor analyze the figures upon which the Concept is based.** Instead, it seems to simply analyze the "readiness" of the City for expansion. And although the City clearly perceives itself as ready to expand - the question remains to whether it should. The numbers strongly suggest, if not dictate, that the big growth this area experienced in recent years has crested and we are now in a period of declining growth. The proposed expansion is not warranted.
2. **The numbers provided by Sherwood are inaccurate and self-serving.** Sherwood has previously egregiously over-estimated growth populations. For example, the high school was bonded and built on the basis of an expanding population. It has cost the area residents millions of dollars. And it was overbuilt. The high school has a capacity for 2,400 students. It currently has 1,704 enrolled students. According to the documents submitted in 2017 for UGB expansion, the City forecast an initial enrollment in 2020 of 1,870 students with a further forecast of 2,400 students by 2045. In reality, not only did the high school not have 1,870 students in 2020, it STILL doesn't have 1,870 students and won't any time in the foreseeable future. Predicted enrollments are declining and significantly so. It is now anticipated that the 2032 enrollment will only be 1,530. The point is that the City has shown that its numbers for growth to support the expansion are at best inaccurate and at worst purposely overstated. They should not be relied upon in making your decisions.
3. **METRO has its own data to rely upon and it does *not* support an expansion in Sherwood.** As required by Ordinance No. 21-1457, the Council will need to rely upon current data for planning. Exhibit A of the Ordinance was duly accepted and adopted as such current data. It sets forth the population of Sherwood as 19,747 based on the 2020 Census and forecasts a population of 20,118 in 2030, and 20,562 in 2045 respectively. An increase of some 815 persons in the next 20 years simply cannot support an expansion of 3,120 housing units.
   Moreover, as intended, the population data contained in the Ordinance has been used and relied upon by other municipalities and cities, such as Portland (Ordinance 19157), Multnomah County

(Ordinance 1323), and Lake Oswego (Lake Oswego City Council Meeting July 16, 2024), in analyzing their own expansion needs. Likewise, METRO should also rely on its own data in determining which option to choose from among those laid out in the Draft UGB Report - especially given the City of Sherwood's propensity to exaggerate its figures.

4. **Farmland is vital to all and cannot be replaced.** To state the obvious, we all depend upon farms to produce the food we eat. The verdant soil of the farmland around Sherwood is a precious commodity. Once housing or commercial entities are sited on farmland they are never recaptured for agricultural use. The Draft UGB Report, at best, gives lip service to the need to maintain and protect farmlands. Especially in these days of heightened awareness of climate changes and the value of locally produced foodstuffs, it is difficult to support the removal of productive land. Even more to do so based upon the lack of a verifiable need for housing and commercial development. The UGB Roundtable perspectives on agricultural demand, page 57 of the Report, also positively reflects the value of farmland for employment and negatively notes the "increased cost and carbon footprint of pushing food production outside of Oregon." Commercial expansion should first use those areas already so designated and then those areas that cannot be reasonably used for food production.
5. **The proposed light industrial use / employment area is mis-characterized.** Page 56 of the Draft UGB Report states that the Oregon Semiconductor Taskforce found that, statewide, there was a need for four 50–100-acre sites for semiconductor manufacturing. Four. Statewide. Not a regional need as stated in the Report (see page 57). The Report seems to suggest that the proposed area has unique characteristics making it suitable for commercial development. One such characteristic is its proximity to the highway. The Report apparently takes this at face value. However, anyone who has tried to get to Interstate 5 or Interstate 205 from the proposed area can attest to the existing congestion and traffic woes in such an endeavor. Simply put, the Report fails to recognize or analyze the *lack* of highway accessibility.
6. **The residents of Sherwood, the people, do *not* want this expansion.** The City of Sherwood's own poll regarding the public support for this expansion is not adequately represented in the Report. The City's poll showed that 84% of respondents agreed or strongly agreed with the statement:

   > The Sherwood city council should ***not*** expand the city and preserve natural areas and farmlands in the Sherwood West area. (Sherwood West Poll Results (Mayor) Tim Rosener August 16, 2021). Emphasis added.

Thank you for your time and attention in reviewing these concerns. I can only hope that these comments, along with other public input, will have a meaningful impact on the Council's decisions. As John Muir once so aptly stated, "Not blind opposition to progress, but opposition to blind progress."

Respectfully,

Kimberly R. Cobrain

Subject: [External sender]Please Support the Sherwood West Expansion Plan

CAUTION: This email originated from an **External source.** Do not open links or attachments unless you know the content is safe.

Dear Metro Council Members,

My name is Mallory Cochrane, owner and founder of Birch Social - a consulting, marketing and events business dedicated to supporting the needs of small farms and food businesses in Oregon. My company is based in Old Town Sherwood, where I am also a resident and home owner.

I am writing to ask that you please **approve the Sherwood West Concept Plan as proposed by the Sherwood City Council and widely supported by the Sherwood community**. This Concept Plan was a result of two years of planning and public input to decide the future of our unique and special city.

As a native Oregonian, I intentionally chose to raise my family in Sherwood because of the **small town character, sense of community and amazing education system and public services**. Many other people are attracted to Sherwood for these same reasons. However, we need **more housing** for these new residents and increased **employment opportunities** to keep people working in our community rather than commuting elsewhere.

With inevitable population growth on the horizon, it is critical that **smart growth** practices be applied to the Sherwood West area so that we are future-proofing development in a way that **enhances our community, increases economic prosperity and protects farmland, natural spaces and resources**.

As outlined in the Concept Plan, I believe that Metro Council should:

- add 340 net acres of **residential land** to the Urban Growth Boundary (UGB)
    - *Comment: Our region will add approximately 315,000 new residents and 137,000 new jobs over the next 20 years under a baseline growth scenario.*
- add 130 net acres of **flex industrial land** to the UGB
    - *Comment: Sherwood West is well suited to capture new and expanding demand for industrial space due to its favorable parcel size, ownership, and low slopes.*
- add 135 net acres of **commercial and hospitality land** to the UGB
    - *Comment: Economic development requires a land supply that enables specific industries to thrive.*

Again, I request that the Metro Council stand with the residents and businesses of Sherwood and **approve the Sherwood West Concept Plan as proposed.** I would greatly appreciate a response with the Metro Council's position on this issue. I appreciate your time and thoughtful consideration.

Sincerely,
Mallory Cochrane

1000 Friends of Oregon appreciates the opportunity to participate in the Urban Growth Stakeholders Roundtable, comment on the urban growth report, and partner with Metro on multiple areas of alignment such as unlocking more funding for critical infrastructure needs, addressing our housing affordability crisis, and bringing more mobility options for Oregonians in a 2025 transportation package.

The Metro Council has an opportunity to set the region up for success for generations to come if it uses one of its strengths: data-driven long-range land use planning. Strong land use planning invites a collective imagination to create the best future possible for all residents, ones that currently call the region home and ones that will call this region home. But the best future possible has always been, and will always be, under threat by a select few seeking to exploit the region's limited resources: whether it be our world-class soils, the water we drink, the air we breathe, or the health and ingenuity of our people.

1000 Friends of Oregon shares our 5 major takeaways for how to set our region up for success as you read the draft urban growth forecast:

1. Metro Council should focus on how to improve the quality of life for all residents now and into the future.

2. The region's natural resources and low weather extremes offer us a position of strength if Metro decides to steward them well.

3. The biggest bang for buck and the quickest way to regional success is to build upon our existing footprint, support our regional network of main streets, and restore the core.

4. Prepare for "Operational Efficiency" and protect people's livelihoods.

5. Raw land is the least of our issues when it comes to setting the region up for success. Land readiness on the other hand…

***

1. Metro Council should focus on how to improve the quality of life for all residents now and into the future. We must remember the entire purpose of good land use planning and community development: to enhance the health, safety, and well-being of all Oregonians. We lose sight of this purpose when conversations are reduced to debating the number of acres. Rather, we should focus on creating measurable and meaningful indicators for success to guide our land use decisions and the limited public and private dollars we have. The region's indicators for success should include:

> **Life Expectancy by Zip Code.** Zip codes still serve as an indicator for how long and how well someone lives in the greater Portland area. Someone's life expectancy in Multnomah County (79.40 years) is less than those living in Clackamas County (80.90 years) and even less than Washington County (82.60 years[1]). Metro Council and staff should be keenly aware of this discrepancy across counties and prioritize resources and staff efforts to help areas that have the lowest life expectancy in the region. Blue Zones research could guide Metro's policy and funding decisions to better understand how to improve life expectancy and quality of life for residents in the region.
>
> **Household Costs/Affordability**. The largest household expense for the average resident is housing. The second largest household expense is transportation. Utilities and food also appear as common expenses. Metro should make land use decisions to help cut down on these household expenses for the average resident. If Metro decides to allow urban growth boundary expansions for residential, industrial, and commercial land where the majority of residents are going to feel the need to drive everywhere,

[1] Robert Wood Johnson Foundation, Accessed August 2024. https://www.rwjf.org/en/insights/our-research/interactives/whereyouliveaffectshowlongyoulive.html

Metro has made a choice to increase the household costs for the average resident. Urban growth boundary expansions not only increase driving at the edge, but they draw away investments that could be made where people already live to increase their transportation options. If Metro decides to fund planning and infrastructure efforts that allow the majority of residents to walk, roll, and bike to where they need and want to be, Metro has made a choice to decrease the household costs for the average resident.

Number and Quality of Age Friendly Communities. As presented to the Urban Growth Stakeholders Roundtable, Oregon enjoys a significant number of residents who are older in age. As our residents age, their needs change. It's no longer easier to drive where they need to get to; incomes become fixed and possibly lower than where they were working full time; and their social and civic participation styles may change.

As the World Health Organization and AARP's Livable Communities note, "age-friendly communities are places where people of all ages [and abilities] feel supported and included, and where older people can age well[2]." Age-friendly communities include three major components: physical (e.g., housing, transportation, outdoor spaces, and amenities); social (e.g., civic representation and participation, community involvement); and service (e.g., health care, emergency response). To create age-friendly communities, the Metro Council and staff should support land use decisions, planning grants, and infrastructure requests that create walkable and rollable neighborhoods where people are able to age in place, get to where they need and want to go safely and on their own, and be connected with their community on their own terms[3]. Orenco Station is a great example of incorporating age-friendly principles into planning and development by combining residential and commercial uses alongside pedestrian, bicycle, and transit investments; in contrast, planning that results in commercial and industrial development with large parking lots requires residents to use automobiles to safely navigate the community and thereby fails to create an age-friendly community.

---

[2] AARP, Livable Communities, https://www.aarp.org/livable-communities/network-age-friendly-communities/

[3] Research demonstrates that placement in a nursing home/care facility drastically reduces the life expectancy for the individual. It also adds significant costs to the individual and any family members who may be paying for this change. A monthly rate for a studio in a housing facility that provides supervision or assistance with activities of daily living is approximately $6,161.91 for the Portland area (compared to the national average: $4,999.01 per month). https://www.newyorklife.com/resources/financial-calculators/costs-of-long-term-care

Number of Communities of Concern in EPA's Environmental Justice (EJ) Screen (or regional equivalent). The Metro Council and staff should be keenly aware of the number and location of communities who are burdened with environmental pollution, climate change risks, health disparities, and critical services gaps. Often, communities ranked in EJ screen are communities that are majority low-income, speak languages other than English, qualify for free and reduced lunch, and are people of color. Metro Council and staff should set a goal to have zero communities in the greater Portland area rank highly in the EJ Screen and develop policies and align investments to reach this goal. Metro Council and staff should reject urban growth boundary expansions and other investment strategies that draw resources away from investing in communities that rank highly in EJ screen.

2. The region's natural resources and low weather extremes offer us a position of strength if Metro decides to steward them well.

The greater Portland area is positioned to be an oasis of refuge from some of the most extreme negative impacts of climate change. This is a major advantage when drawing residents and businesses to the region (even noted by the private sector[4]). While we have much work to do to adapt to the changing conditions to protect the health and safety of residents, the Pacific Northwest is rated as one of the most climate resilient areas in the United States.

Metro Council and staff should build upon our unique position by stewarding our natural resources not just through voter-approved parks and nature bond measures, but through its regulatory authority in its land use decisions. For example, development that does not require high-nutrient soils should not be permitted on these soils[5]. Likewise, Metro Council and staff should coordinate with other natural resource agencies (Soil and Water Conservation Districts, Department of Agriculture, Department of Fish & Wildfire, etc.) to develop a clear, streamlined approach toward monitoring the quantity and quality of our water sources and air sheds. Each of these water sources and air sheds have carrying capacity limits (recognized in Land Use

[4] Visit Quicken Loans for an example of how Portland, Oregon's environmental stewardship and temperate climate risks are used to guide private investment. https://www.quickenloans.com/learn/best-places-to-climate-change

[5] Oregon's own Climate Action Commission has recommended "no net-loss" policy for high-quality farmland to reach our climate mitigation and resilience goals. Institute for Natural Resources at Oregon State University for the Oregon Global Warming Commission. September 26, 2023. https://static1.squarespace.com/static/59c554e0f09ca40655ea6eb0/t/6578da822755f905770c5901/1702419079574/2023-Natural-Working-Lands-Report.pdf

Planning Goal 6). Urban growth expansions should consider the carrying capacity of water resources and airsheds in order to assess and guide growth in the region. For example, if one company within an airshed applies and is awarded a permit to emit carbon monoxide to the top of the allowable limit for the entire airshed, Metro Council and staff must include that information in guiding growth away from that airshed to protect the health of residents and help businesses avoid violations of, at minimum, Clean Air Act and/or Land Use Planning Goal 6.

3. The biggest bang for buck and the quickest way to regional success is to build upon our existing footprint, support our regional network of main streets, and restore the core.

Metro Council and staff must ensure the region contributes to addressing the housing production shortfall and the affordability crisis through a holistic approach (remembering the indicators for successful quality of life including household cost/affordability). Building at the edges won't set the region up for success. And, Metro Council and staff should reject any attempt to expand the boundary or use limited public dollars without any element of guaranteed affordable housing.

We have a limited number of dollars for infrastructure, limited amount of labor for construction, and limited materials for construction. We urge Metro to prioritize developers and/or local jurisdictions who are building partnerships around transformative, catalytic (re)developments as part of holistic land use planning. Some notable opportunities to invest in our existing footprint, support our regional network of main streets, and restore the core include but are not limited to:

(Re)Development	**# of Homes (Est.)**	**Climate Friendly Area? (Y/N)**	**Guaranteed Affordability Component? (Y/N)**
Lloyd Center	5000	Y	Y
Broadway Corridor	2500	Y	Y
OMSI Revitalization District	900	Y	Y
Albina Vision Trust	1100	Y	Y
Hayden Island/Jantzen Beach (I-5 Bridge Corridor)	2000	Y (with light rail and complete street investments)	Y

Rockwood	TBD	TBD	TBD
Jade District	TBD	Y	Y
Gateway	TBD		
Hillsboro's Block 67	269	Y	Y (if the City of Hillsboro allows for affordable housing)
Willamette Falls Revitalization (West Linn and Oregon City's McLoughlin Blvd Enhancements)	TBD	TBD	TBD
122nd and Stark	TBD	TBD	TBD

4. Prepare for "Operational Efficiency" and protect people's livelihoods.

As we enter an era of mainstream artificial intelligence, more jobs in more sectors of our economy are vulnerable to automation. From manufacturing to advertising, the future is uncertain. To bring more certainty to residents and to be ready for changing technology and economic sectors, Metro and local jurisdictions must prioritize quality of life for its residents over company profits as an indicator for success. In doing so, the Metro Council and staff must be surgical about allowing any expansions for industrial lands and requiring enforceable, specific conditions on any industrial lands to create lasting high-quality jobs for residents and minimize the probability and impacts from mass layoffs due to automation and/or outsourcing.

If the Metro Council allows industrial developers to pave over our working lands for robots, residents lose their ability to provide for themselves, their families, and contribute to the region through their employment. Our region has suffered from broad definitions of industrial lands that do not result in development that brings high-quality jobs for residents. Instead, it adds a patchwork of uses: from gas stations to big-box chain retail stores to strip malls to truck stops. Our region has suffered from our lack of discipline to protect our existing industrial lands for development that can bring high-quality jobs, especially manufacturing jobs. While we still have a reported surplus of industrial lands, now is the time to protect them with specific, enforceable conditions on any industrial lands in our region.

5. Raw land is the least of our issues when it comes to setting the region up for success. Land readiness on the other hand…

The urban growth report's forecast includes a very optimistic outlook on utilizing vacant office buildings and land throughout the region, notably downtown Portland. We also see vacant or nearly vacant office parks and retail areas and their accompanying large swaths of empty parking lots throughout the region. Metro should focus its policy choices and investments on (re)developing and revitalizing these areas; they already have infrastructure in place and are located in existing communities. Recent layoffs by large international corporations illustrate that worldwide business cycles and other factors influence investment decisions, not land supply.

Even with the optimistic and arguably inflated job growth forecast, the urban growth report notes there is a surplus of industrial land even assuming the high growth scenario. We have heard for well over a decade that land readiness - bringing land to Tier 1 - is a main challenge for local jurisdictions. We also know that multiple cities and towns are faced with budget issues, whether it's structural budget deficits like Washington County and City of Portland or whether it's smaller towns that are seeking a larger revenue base like the City of Sherwood.

1000 Friends of Oregon understands and sympathizes with the funding and financing challenges local jurisdictions face when bringing land to Tier 1 readiness and maintaining this infrastructure. It's a motivating force behind our advocacy to work with our statewide membership to secure infrastructure dollars for housing construction (SB 1530 (2024), Senator Kayse Jama; HB 4134 (2024), Representatives Elmer, Gomberg, and Helfrich; and a housing project revolving loan fund (championed for multiple sessions by State Representative Pam Marsh), and to bring main street revitalization funds to towns across Oregon, especially for smaller jurisdictions.

What we know is that adding raw land doesn't pencil for local jurisdictions. What may seem like a revenue boon comes with newer, significant expenses: brand new sewer, water, fiber optic cables, roads, lighting. Suddenly, the city is back in the same predicament it started in: budget shortfalls. We are committed to working with cities and towns on real solutions to funding and financing for land readiness and core public services that are paramount to enhancing our quality of life for all Oregonians. We hope we can count on Metro's leadership to daylight the real problems and real solutions to this challenge.

***

We appreciate Metro Council and staff's time in assembling the draft urban growth report's forecasts, presenting to multiple stakeholder groups, and offering an open line of communication throughout the process. None of us know what the future holds in store; tomorrow is just a rumor after all. But, 1000 Friends of Oregon is committed to working with our statewide membership to choose land conservation and development approaches - policy decisions and funding and financing strategies - to create a future that we are proud and excited to live in.

We are available to meet Metro Council and staff to discuss these key takeaways. We are also happy to host Metro Council or staff in meetings with our partner organizations who are committed to creating a better future for all residents, now and into the future.

Sincerely,

Samuel Diaz
Executive Director

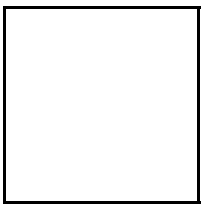
Good morning and happy Friday Marissa, Kristin, Catherine, Malu, Eryn, and Ted,

I wanted to personally send you 1000 Friends of Oregon's 5 takeaways on the draft urban growth forecast. I've been told the urban growth report isn't a policy decision by itself, but may be used to inform future policy and funding decisions. We hope these 5 takeaways can be helpful in shaping actions to create the best future possible for residents of our region.

More than happy to head to Metro or have you here at the 1000 Friends of Oregon office to chat through these takeaways and hear your perspective. Just let me know if you'd like to schedule something.



Thanks so much for your service.

Sincerely,
Sam Diaz

RE: Sherwood West UGB Expansion Plan Support

To Whom It May Concern:

As a former property owner in the Sherwood West area, and in agreement with relatives who still own properties there, this letter is in strong support of the Metro Council's efforts to reasonably expand the UGB. Recommendations from the Urban Growth Report findings are clear. After years of arduous studies and extremely detailed analyses, the Metro Council must finally act on next step growth management decisions.

A great deal of preparation and investment has been made in the Sherwood West area to accommodate necessary housing growth and affordability. The list of improvements in recent years is lengthy. Likewise, economic and job growth go hand-in-hand with future essentials. It is long past time to adopt the completed concept plan for proposed expansion within the presently designated urban reserve area. Anything less, as suggested by self-serving community members like the Sherwood Farm Alliance, would be a further irresponsible obstruction to the realities of future progress.

In place of my attendance at the upcoming Zoom meeting, thank you for including the above comments as a matter of record.

Sincerely,

Charles Digregorio

[redacted]

Portland, OR 97239

To: Metro

My name is Peter Dinsdale.

I was raised in Sherwood and my family's agriculture business is on the edge of the proposed UGB expansion area.

I am a supporter of the West of Sherwood Farm Alliance.

We were shocked and dismayed when Metro Councilor Juan Carlos Gonzalez announced his support for the controversial proposed Sherwood UGB expansion earlier this month.

By doing that, he made it perfectly clear that he doesn't have the slightest interest in the information, analysis, and values of the people who live here, or possibly from anyone, anywhere in the region.

In 2021, people in and around Sherwood responded to an online survey about this proposed UGB expansion.

84% of the respondents agreed, with this statement:
"*The Sherwood city council should NOT expand the city and* [should instead] *preserve natural areas and farmlands in the Sherwood West area*."
About 75% of respondents agreed strongly.

Let me repeat those numbers: 84% opposed the expansion and 75% strongly. That was the same result from a survey taken five years earlier.

Before you dismiss this opposition as the sentiments of a bunch of NIMBYs, you might consider some of the facts that we have been presenting to you at your monthly meetings:

FACT: Housing will be unaffordable to the people taking the jobs in the expansion area, causing more commuting, heavier traffic on our already burdened roads, and more pollution, which will NOT help in reducing greenhouse gas emissions.

FACT: Metro approved a UGB expansion in 2017, at Sherwood's request to build a new High School on 82 acres, based on projections of soaring enrollment. Today, after spending $248 million in tax dollars, the School District's consultants expect enrollment to decline within seven years.

FACT: The expansion will cause the loss of some of the best farm and forestland in the world. The result will be the loss of countless agricultural jobs and damage to Chicken Creek, which helps maintain the water quality in the nearby National Wildlife Refuge.

We are counting on you - unlike Councilor Gonzalez - to actually listen to the citizens, hear the facts, and reach an independent judgment.

Thank you for your service.

Hell no, I don't want it to get larger. That is exactly what people who have moved here want. They want to make it larger so they can snatch up those investment properties.
People from outside of Oregon came here with their deep pockets to buy up Portland and make it grow.
We the people of Oregon don't need their deep pockets and wealth. Portland laws were put in place long ago by people with the foresight to realize people would want to do this to our GEM.
Hell no, tell them go invest elsewhere. Portland is perfect the way it is.

Subject: [External sender]Testimony in opposition to Sherwood expansion

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To whom it may concern:

Our nonprofit organization, Farmland First, is writing to convey our strong opposition to the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres.

This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes.

In 2022 Metro projected Sherwood would grow by a scant 3% over the coming decades. The Sherwood School District has forecasted enrollment for the new high school will begin to DECLINE in 2027. Sherwood has enough vacant land to accommodate new housing and jobs for years to come, when planned and developed wisely.

The types of industry that are planned are land-extensive, taking up farmland despite the drastic decline in farmland in the county and natural resource land despite the fact that only 15% of original significant natural resources remain in the county. It is a red herring to state that the goal is to increase the number of residents who work in the city - that correlation is not necessary for a functioning city, especially one in Metro where many people work in one city and live in another. If the city lacks jobs, it may be of its own making because it recently approved many expensive homes. It should not be rewarded for poor planning. And the type and extent of industry proposed is expensive to provide with infrastructure and services, yet there is no Taxpayer Impact Statement on the costs.

Farmland First stands with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely,
Nellie McAdams
Farmland First

Sherwood UGB expansion comments,
Brian Fields
Secretary, Eastview Road Neighborhood Association

I urge the Metro Council to scale back the Sherwood West Urban Growth expansion. We do not have the transportation infrastructure to support this growth. In addition, the City of Sherwood has not done any planning, not even "conceptual", to expand the capacity of Elwert Road, the only viable north south connector.

The current plans for Elwert Road are inadequate for the future growth planned.

Elwert road is serving as a regional connector. Even without bringing in additional land in the Sherwood West Urban Reserve we can expect the traffic flow to increase. With the addition of large amounts of new housing the burden on the existing road will only increase. How has Sherwood planned for increased capacity? They have not.

The Sherwood West concept plan shows the vision that Elwert road remain one lane in either direction with the addition of turn lanes. The city has repeatedly said that their vision of Elwert is that of a neighborhood street. This flies in the face of the current reality of an already overburdened regional connector, let alone showing any sense of planning for the future to accommodate a greatly increased local population. The only mention in the Sherwood West concept plan of planning for future connectivity is vague mentions of conceptional connectors. You can reference the "Transportation and Infrastructure" Section on page 101 of part 1 of the Sherwood UGB expansion proposal.

"North-South Connectivity – The concept of adding a route to enhance regional north-south connectivity will require future study. Additional feasibility and cost analysis will be

necessary. This should be considered as a long-term strategy, rather than an essential component of early stage transportation planning in Sherwood West."

But the truth is that the Sherwood West topography is not going to allow any new north south connectors. During the public outreach portion of the Sherwood West concept plan much feedback was provided to the city outlining specific complications for a north south connector west of Elwert Road. The City's own traffic modelling demonstrated that regional traffic could not be diverted from Elwert Road to any significant degree. The land is riddled with steep slopes and is bisected by Chicken Creek. In addition, the border of Sherwood West veers sharply east when you go north of Edy Road. If this hypothetical connector were built, as it moved north it would run into Rural Reserve land. Due to this a connection to Scholl's Sherwood Road to the north could not be completed. This means any road that was built would have to feed back onto Edy and Elwert, the existing transportation corridor.

There really is no choice but to improve the existing transportation corridor, but the City of Sherwood's West Concept plan does the opposite. Sherwood is proposing to move portions Elwert Road off it's current north south alignment and meander to the west, pass through two round-abouts, incur a new Chicken Creek crossing and then meander back to the Elwert Road current alignment in the north.

We have examples in the nearby region of what successful road planning would look like. The massive development to the north of Sherwood West, on Roy Rogers Road, has been accompanied by expansion of that road to 4 lanes. If you want to see aesthetically pleasing road expansion, we need only look to the improvements Lake Oswego has done on Boones Ferry Road. The road was both

improved to 4 lanes with a turn lane, but also includes attractive landscaped dividers and sidewalks. This is much like Sherwood has proposed, but with a critical difference, Lake Oswego recognized the need to increase capacity while making attractiveness an important part of their road design. Both can be done.

To be clear my point is not that Sherwood has not already solved the capacity problem prior to asking for an Urban Growth Boundary expansion. The problem is that Sherwood is not even planning for increased capacity. In fact, their public statements during the West Concept Plan outreach process indicated they want to discourage regional traffic and keep Elwert as a neighborhood street. See the description on page 227 of the submittal, in the Section title "SW Elwert Road Design Concept". Make note that the designation for much of Elwert Road is "Residential Boulevard". The is much risk if Sherwood doubles down on this approach that near term development will forestall any future capacity improvements on Elwert Road.

Their proposal to bring in the entire Sherwood West Urban reserve should be scaled way back until the City actual provides realistic transportation planning. Bringing the entire 1200 acres of Sherwood West now into the UGB is only going to compound a local a regional transportation quagmire which already exists. Sherwood needs to confront the reality that topography and the Urban Reserve boundaries themselves prevent any alternate north south connector. I encourage Meto to not approve Sherwood's ask to bring in the entire Sherwood West Urban Growth Reserve into the Urban Growth boundary.

Tigard, OR 97224

Metro Council
600 NE Grand Ave
Portland, OR 97232

August 20, 2024

Dear Metro Council Members,

As the largest association of housing providers in Oregon, Multifamily NW is dedicated to ensuring that our communities thrive through sustainable growth and adequate housing supply. We are writing to express our strong support for the adoption of a high-growth forecast projection as you evaluate the urban growth strategy for the Portland Metro area. As you know, our region is currently navigating the consequences of a severe housing crisis, and it is imperative that we take bold, forward-thinking action to address the urgent need for housing.

Undersupply is the Root Cause of Housing Crisis

The Portland Metro area is experiencing an unprecedented demand for housing, which far exceeds the available supply. According to an alarming report by ECONorthwest, our region is already facing a housing shortage of more than 59,000 homes, with an additional need for 10,683 homes to accommodate our growing houseless population. Moreover, it projects that the region will require the construction of 294,853 new housing units over the next 20 years. These figures significantly surpass Metro's current estimates of 143,300 to 203,200 new units.

The numbers provided by ECONorthwest paint a stark picture of the housing crisis we are facing. By adopting a high-growth forecast projection, Metro can more accurately prepare for the higher-than-baseline growth that our region will (hopefully) experience. This proactive approach will enable us to meet the housing needs of our rapidly growing population, while also mitigating the affordability challenges that threaten the livability of our communities. And, if population growth does not proceed as expected, the land will not be impacted.

Furthermore, residents in the Portland Metro area are facing increasing barriers to home ownership due to the affordability consequences that our undersupply has caused. If the council adopts and implements the high-growth forecast projection, home ownership will be more attainable for communities across the region.

Portland Metro Should Welcome Responsible Development

Additionally, Metro Council should shape a new policy that recognizes the low capacity for housing development inside UGB lands and the extreme need for new housing. The current estimates indicate a surplus of +9,050 units, which we believe is unrealistic given the actual deficit of -84,000 units needed inside the UGB.

Attempting to control where and how the market will adapt can have unintended consequences. Metro should avoid imposing restrictive policies that risk pushing housing developers to other U.S. markets with fewer regulatory barriers. Instead, we should focus on creating an environment that encourages development and investment in the Portland Metro area, ensuring that we remain competitive and capable of meeting our region's housing demands.

A crucial component of addressing our housing crisis is expanding the Urban Growth Boundary (UGB). By expanding the UGB, we can increase the availability of land for development, thereby helping to slow the escalating costs of housing. As we have all seen firsthand, the limited supply of land within the current UGB constrains development and drives up prices, making it increasingly difficult for residents to find affordable housing.

Expanding the UGB will not only create more opportunities for housing development but will also encourage competition, which can help slow the increase in housing costs and make living in the Portland Metro area more affordable. It is essential that we take this step to ensure that all residents have access to housing that meets their needs and budgets.

Acknowledgment of Employment Lands Considerations

While our primary focus is not directly within the commercial and industrial development sectors, we acknowledge that the availability and management of employment lands significantly impact the overall growth and sustainability of our communities. In this regard, we recommend that the Metro Council consider discounting the approximately 1,300 acres of land with slopes exceeding the 7% grade threshold, which is generally identified as the industry standard for commercial and industrial development. We have an obligation to ensure the land classified as viable truly meets the practical requirements for development.

By integrating these considerations, we believe that the Metro Council can better strategize the use of employment lands to foster balanced development, support economic vitality, and contribute positively to the community's housing and employment needs.

City of Sherwood Proposal Deserves Approval

Furthermore, Multifamily NW fully supports the City of Sherwood’s proposal for expansion without any conditions. Sherwood has demonstrated a commitment to responsible growth through a rigorous public engagement process, and we trust in their ability to understand and address their community's needs. Metro should respect the decisions made by local communities and support their efforts to grow in a way that aligns with their unique vision and values.

It is crucial to trust Sherwood's expertise and ongoing community engagement process. They are best positioned to determine how to grow reasonably and responsibly, ensuring that their expansion aligns with local needs and aspirations.

Conclusion

In conclusion, Multifamily NW strongly advocates for the adoption of a high-growth forecast projection as part of the urban growth strategy for the Portland Metro area. By acknowledging the true extent of the housing crisis, rejecting restrictive development scenarios, expanding the urban growth boundary, and supporting local initiatives, we can pave the way for a more prosperous, affordable, and sustainable future for our communities.

We appreciate the Metro Council's dedication to addressing these pressing issues, and we are confident that, together, we can create a housing strategy that meets the needs of our growing region. Thank you for considering our perspective and recommendations.

Sincerely,

Gary Fisher
Executive Director
Multifamily NW

Good Morning,

My name is Zach Lindahl, and I am the Director of Government Affairs for Multifamily NW. Our association is the largest coalition of housing providers in the state of Oregon, representing more than 275,000 units. In addition to frequent compliance training and hundreds of networking opportunities, our association advocates for common sense housing policy at all levels of government on behalf of our members. Our top priority is to keep Oregonians housed. In a time of housing crisis across the state, it is important that we consider how all policy affects both housing supply and affordability for renters.

Attached are comments Multifamily NW submitted regarding the recent Urban Growth Report. I thought I would share via this email address as well. Please let me know if you have any questions regarding our comments.

Best,

Zach Lindahl

8.22.2024

Metro Council

600 NE Grand Ave

Portland, OR 97232

Dear Metro Council Members,

I am writing to advocate for the inclusion of all land currently designated in the Sherwood West Growth Plan as proposed by the City, to ensure the future success of the City and the greater Community. The Sherwood West Plan is a good plan and the City's "control of the narrative" will be lost if the Plan is piecemealed in phases. We have strong interest in growth that will support diverse ranges of people who wish to live and work in our community. Sustainable growth, as championed by conservationists like myself, offers far more advantages to our community than no growth at all. History has shown us that the key to a prosperous society is not in stagnation, but in the careful and responsible use of our resources to meet the needs of the many and not just the few.

Our Project, Prodigal Sons, consists of a 'single farm restaurant' that will feed people locally, provide jobs and unique living opportunities, unlike grass seed and single crop export farmers. We have been diligently working with the City of Sherwood and the High school Ag and Culinary programs with intent to provide career opportunities and real-world skill development to the students. There are two types of landowners in our area. The first type are focused on growth opportunities and plan comprehension. The second type champion land preservation now that they built their homes where forest and farms used to be and dislike the middle and lower income folks in general.

Recently we have heard disturbing news that there is opposition to growth from several organized groups. As fact, the massive commercial farms with the most capital are not friends of Oregon's environment and financial future...

Organizations like Thousand Friends of Oregon, while well-intentioned in their efforts to preserve natural spaces, often fail to recognize the real-world impact of their policies on ordinary Oregonians. Their stance is reminiscent of Henry Thoreau's philosophy of naturalism—a perspective that prioritizes untouched wilderness over the needs of people, especially those of middle and lower incomes. Unfortunately, this approach is detrimental to the economy, creating a situation where "the few with the most" exert influence to protect their estate views at the expense of working and poor families who need affordable housing and job opportunities. If Metro is convinced not to act due to well organized and well-funded opposition groups representing s small percentage of the population, there will be no meaningful growth in Sherwood for many years to come and the fallout will be your (Metro's) failure because of wealthy numby influence.

Sherwood is a growing community with real needs. Leaving developable and well-planned land undeveloped in the name of preservation benefits a select few, but it does nothing to help the people of Sherwood diversify and thrive. Instead, we need to focus on sustainable development that balances environmental responsibility with economic growth. Responsible housing, jobs and infrastructure supports our town by allowing future generations to thrive in the area. At present, our next generation can't afford to live here and don't have enough local jobs here.

I urge Metro to consider the long-term benefits of sustainable growth over the short-term appeal of leaving land wild. Just as Roosevelt and Pinchot understood the value of managing natural resources for the benefit of all, we must adopt policies that ensure the land serves the people of Sherwood—not just those who can afford to prioritize untouched nature over community needs. The Sherwood West concept plan addresses that in a most impressive way.

Additionally, if City Council is given unfavorable conditions that stalemates the entire ask of the Urban Growth Management Decision, they could potentially withdraw and fail to have served

our community. Most will likely not be in service many years from now anyway. The application process is too costly. We would have to start the process all over again. By the time interest returns, if at all, and sites are permitted and built it will have been 8 years. Hopefully this letter gets into the right hands and Sherwood will maintain trajectory towards becoming one of Oregon's most desired places to live, for all, not just the few.

I look forward to your consideration of this critical issue and am confident that with timely and fair stewardship, we can create a future where Sherwood thrives economically, socially, and environmentally.

Thank you for your time and attention.

Sincerely,

RE: Technical Letter of Comment Regarding the Draft 2024 Urban Growth Report

DATE: August 22, 2024

Thank you for the opportunity to comment on the Draft 2024 Urban Growth Report (UGR). We appreciate your efforts to coordinate with our team and the many conversations you have convened in developing this report.

In addition to the Clackamas County Board's letter of comment, our technical staff would like to submit to the record the below concerns, questions and requests.

First, as raised at MTAC, it is difficult to determine how the calculations were made between the appendices and the draft UGR. We request that you provide a clearer record of computation in calculating the formal figures that are the basis for tables in the UGR.

For example, Table 9, *Summary of residential growth capacity inside the UGB by housing type* (page 32) shows "low", "mid", and "high" capacity numbers for single-unit detached, middle housing, and multifamily housing types. But the note to the table says that these capacity numbers should not be totaled, "for instance, adding up high capacity for each housing type", so it is unclear how we know how much capacity exists in the UGB and how these numbers should be used to compare capacity to the projected need. While Metro staff has provided, via email, some clarity to how the numbers in this table were calculated, it remains unclear how this table relates to Table 15 (page 40) in which the expected need is compared to some amount of capacity in each of the scenarios. To that end, additional data in an appendix that clearly walks a reader through these calculations should be provided; this would not only be helpful for reviewers, but it would also lead to more confidence in the summaries and options presented in the UGR.

Buildable Lands Inventory:

- Our team would like to thank Metro Staff and Johnson Economics for the creation of the Predictive Redevelopment Model to create a supply side response to key market parameters for anticipated development and redevelopment activity (Appendix 2, Attachment A). This is an innovative resource that is working to provide one of the missing pieces of the puzzle in matching land use with the redevelopment aspects of buildable land. That said, we do have some questions about the assumptions for redevelopment. One concern is that the proforma indicates that much of our "naturally occurring" affordable housing, such as manufactured home parks and older existing apartments will be re-developed. We are concerned that some of the assumptions may not support the retention of these critical assets, thereby leading to displacement, and also may incorrectly influence the capacity estimates.

Housing Needs Analysis:

- Data on housing underproduction show inconsistencies. In 2021, ECO Northwest conducted a study, Implementing a Regional Housing Needs Analysis Methodology in Oregon that estimated housing underproduction in the Portland Metro region to be 59,488 units (Exhibit 18, p. 35). In the draft UGR, however, the estimate for housing underproduction is estimated to be 15,000 (Table 10, p. 33). Metro Staff provide a thorough methodology for calculating underproduction (Appendix 8A, p. 4), but the UGR and accompanying appendices do not provide an explanation for this discrepancy. Further, it would be helpful to have a record of specific inputs and calculations that result in the figures listed in Table 10 on p. 33 in the UGR.
- There is detailed information about the total new housing units needed in the Metro UGB by housing type (Table 14, p. 37) but there is no equity analysis in the UGR or Appendices 8 or 8A that provide a clear understanding of who the proposed housing units in Sherwood West are going to serve or how these new housing units will be used to accommodate those working in the hospitality sector of the proposed expansion area.
- Slope requirements may not equate to affordable housing. Site design and assembly adds considerable cost and discourages a site's likelihood for affordability when entering the market after construction. Further scrutiny and discussion on housing mix, particularly aspects of its affordability, should be determined and clarified in the final UGR.

Employment Land:

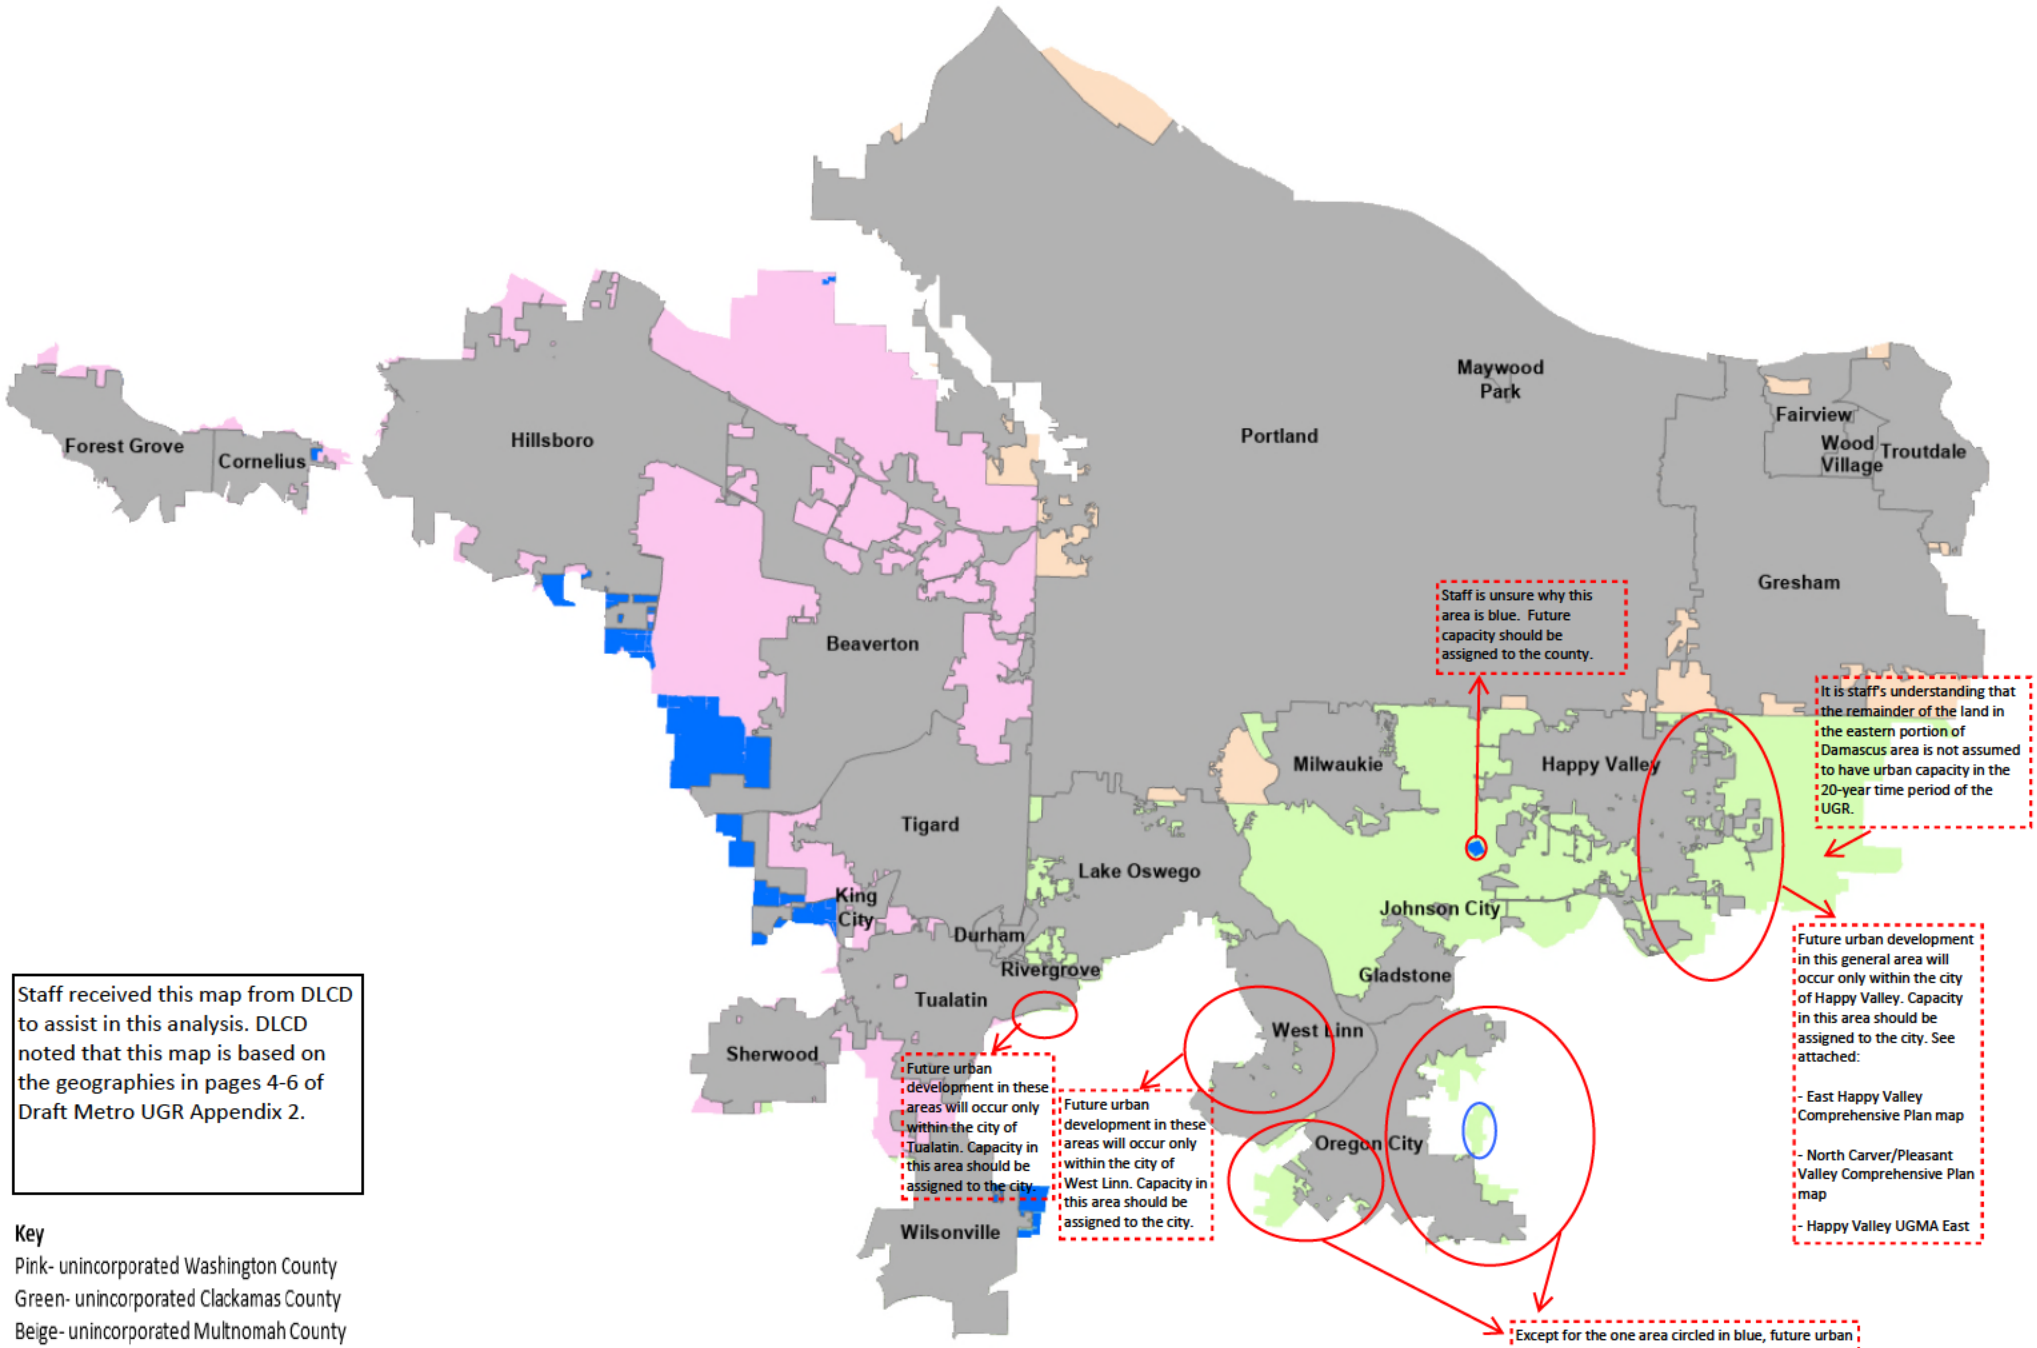
- Provide a clearer understanding of how slope requirements affect buildable land inventory. If slope requirements are at 7%, that would decrease buildable industrial land from 6,000 acres to 4,700 acres inside the UGB, on aggregate. If we are planning for high growth, this would change a 750-acre aggregate surplus into a 550-acre aggregate deficit (Table 19; p. 54 of draft UGR).
- Discussion on transportation and transit investment is almost completely missing in the report and accompanying Appendices; this must be developed and included in the UGR. Currently, there are no transit options in the proposed expansion area, and the closest bus in service is 2 miles away from Sherwood West. Addressing infrastructure needs and investment is critical for growth in the region.
- There may be a mismatch in what is presented in the Buildable Land Inventory (Figure 23; p. 55; Appendix 6) and what is desired when considering market factors. The current analysis presents Tier 3 land that is a minimum of 30 months from being development ready. Also noted in the UGR is that the average industrial parcel size is 3.8 acres, with a median industrial parcel size of 1.7 acres. Market factors indicate firms seek parcels that are a minimum of 5 acres and Tier 2 readiness (developable in 7 to 30 months or less). It would be useful for the analysis to break down data even further, describing the amount of land that is at least 5 acres and at least Tier 2 in readiness.

Capacity Analysis:

- Capacity allocated to unincorporated Clackamas County includes several areas that will not urbanize and develop at expected densities unless annexed into a city. Based on conversation with Metro staff, we understand that urban levels of capacity that are within the City of Happy Valley's North Carver/Pleasant Valley Plan area and planned areas outside of Oregon City are

included in the unincorporated county totals if the lands have not yet annexed to the respective cities. While staff also understands that this capacity is included as part of regional capacity for the purposes of assessing the regional urban growth boundary, we have several concerns about including this capacity in the unincorporated totals versus the cities where this urban development would happen.

a. County staff raised this issue several times throughout the development of the draft UGR and was assured that it would be addressed or at least acknowledged. Based on out reading of the draft UGR and associated appendices, it is neither addressed nor acknowledged.



b. The urban unincorporated land (UUL) within the Metro UGB will be allocated housing targets under the new Oregon Housing Needs Analysis (OHNA) rules. Specifically, it appears from initial drafts of the OHNA methodology for allocating housing production targets, that the state will by relying on Metro's capacity analyses and ultimately Metro's distributed forecast for these housing production allocations. It is county staff's understanding that Metro's distributed forecast is at least partially based on these capacity numbers. Therefore, it is imperative that the capacity is "assigned" to the correct jurisdiction.

c. To that end, county staff has attached several maps to this letter to help Metro identify where future capacity numbers should be assigned and is happy to work with Metro staff to resolve this issue.

- The capacity analysis also overestimates capacity allocated to residential development and underestimates capacity for commercial development in some areas identified as having "mixed use", which county staff understands to mean zoning that would allow for both residential and commercial development. Specifically, in areas along McLoughlin Blvd in Clackamas County – in which the general commercial zoning also allows fairly high-density housing - it is assumed development of buildable lands will be 95% residential and 5% commercial. Little to no residential development has occurred in this location in the last several decades despite housing being allowed by zoning.

We acknowledge that completing these analyses for the region are challenging, especially in this time of constant change in housing and employment markets and new rules coming down from the state. We appreciate Metro's efforts to create an analysis that is more nuanced and market-based, rather than the simpler demand versus supply numbers that have been used in past reports, and we recognize that this approach leads to more uncertainty.

With that in mind, we would like to reiterate our Board's request to consider selecting the high growth rates for both population and employment, which will provide jurisdictions the latitude to attract more investment opportunities, meet coming housing production targets, and better be able to balance housing, employment and transportation needs.

Staff received this map from DLCD to assist in this analysis. DLCD noted that this map is based on the geographies in pages 4-6 of Draft Metro UGR Appendix 2.

CITY OF HAPPY VALLEY/CLACKAMAS COUNTY

URBAN GROWTH MANAGEMENT AGREEMENT

This Urban Growth Management Agreement ("UGMA" or "Agreement"), by and between the City of Happy Valley, an Oregon municipal corporation ("City") and Clackamas County, a political subdivision of the State of Oregon ("County") (collectively, the "Parties," and each individually a "Party").

RECITALS

WHEREAS, authority is conferred upon local government under ORS 190.010 to enter into an agreement for the performance of functions and activities that the local government, its officers or agencies has authority to perform; and

WHEREAS, the City and the County have a common interest in coordinated comprehensive plans, compatible land uses and coordinated planning of urban facilities within the Happy Valley Urban Planning Area East ("HVUPAE"), as described in Exhibit A to this Agreement; and

WHEREAS, the exchange of information should concentrate on issues that may have a significant impact on either Party and should not entail cumbersome procedural requirements that may increase the time necessary to expedite decision making; and

WHEREAS, OAR 660-003-0010 requires management plans for unincorporated areas within an urban growth boundary to be set forth in a statement submitted to the Land Conservation and Development Commission ("LCDC") at the time of acknowledgement request; and

WHEREAS, OAR 660-011-0015 requires an urban growth management agreement to specify the entity responsible for the preparation, adoption and amendment of the public facility plan(s); and

WHEREAS, the City and County previously entered into an urban growth management agreement on January 30, 1992, and amended on June 19, 2001, and subsequently amended on November 18, 2013 for areas to the west and southwest of the existing City of Happy Valley (extending to the Veterans Memorial Highway), which is hereby referred to as the "UGMA WEST" and is a separate urban growth management agreement from this Agreement, which is hereby referred to as the "UGMA EAST".

NOW THEREFORE, the Parties agree as follows:

AGREEMENT

1. Definitions.

As used in this Agreement, the following words shall mean or include:

1.1 Comprehensive Plan. Any plan document as described in ORS 197.015(5) that is adopted by a Party and that applies within the HVUPAE.

1.1.1 City Comprehensive Plan. The City of Happy Valley Comprehensive Plan.

1.1.2 County Comprehensive Plan. The Clackamas County Comprehensive Plan.

1.2 Land Use Policies. The whole or any part of any comprehensive plan, subarea comprehensive plan, Title 16 of the City's Municipal Code ("Development Code"), the Clackamas County Zoning and Development Ordinance ("ZDO"), refinement plan, public facility plan developed under OAR Chapter 660, Division I, land use regulation as defined by ORS 197.015(11), or any other generally applicable policy regulating the use or development of land. As applied to Metro, "Land Use Policies" include Planning Goals and Objectives, Regional Urban Growth Goals and Objectives, Functional Plans, and Regional Framework Plans.

1.3 Happy Valley Urban Planning Area East ("HVUPAE"). The HVUPAE includes unincorporated land within the Portland Metropolitan Urban Growth Boundary ("UGB") located generally east of 172nd Avenue and west of 222nd Avenue, as illustrated on the map attached as Exhibit A to this Agreement.

2. Terms of this Agreement.

2.1 This UGMA EAST becomes effective as specified under Section 8.3, below, and shall continue thereafter for an initial term of 10 years, unless terminated as provided in this Section or modified consistent with Section 8.4. This Agreement automatically renews for one additional 10-year term unless, not later than 90 days prior to the expiration of the initial term of this UGMA, one of the Parties provides the other Party with written notice that it does not wish to renew the UGMA EAST, in which case this UGMA will automatically terminate upon completion of the initial 10-year term. Either Party may terminate this agreement at any time after providing at least 90 days written notice to the other Party.

3. General Provisions.

3.1 General Planning and Permitting Responsibilities

3.1.1 Comprehensive Plan/Zoning Designations and Amendments. The County Comprehensive Plan and zoning shall apply to all unincorporated land within the HVUPAE until such time as those lands are annexed into the City. Unless

otherwise provided by law, the development of a comprehensive plan map amendment or zone change for the unincorporated areas within the HVUPAE shall be a coordinated joint effort of the Parties. The County shall be responsible for preparing and making a decision on all legislative and quasi-judicial comprehensive plan amendments/zone changes for areas within the HVUPAE not annexed to the City in coordination with the City and consistent with state law and the Metro Functional Plan. The City shall have the unrestricted right to review, comment on and appeal all legislative and quasi-judicial comprehensive plan amendments/zone changes processed by the County within the HVUPAE.

3.1.2

Land Use Permitting Authority. The County Comprehensive Plan and land use regulations shall apply to an application for a permit or other land use review within the HVUPAE not annexed to the City. County shall retain responsibility and authority for all implementing regulations and land use actions for all unincorporated lands within the HVUPAE, until lands are annexed to the City.

For properties that annex into the City of Happy Valley in the HVUPAE, the City shall apply the underlying County Plan and zone provisions in accordance with the procedural framework of the City's Municipal Code until the City has adopted urban City Comprehensive Plan designations and zoning districts for the HVUPAE.

3.1.3

Urban Plan Development. The Parties agree that the City shall be responsible for developing and adopting an urban Comprehensive Plan and zoning districts for areas that do not currently have urban designations within the HVUPAE, per Section 4 of this Agreement.

3.1.4 Land Divisions. Land divisions that would create parcels smaller than 20 acres in size shall not occur within lands with a Rural Comprehensive Plan designation within the HVUPAE.

3.2 Annexation.

3.2.1 Conditions Requiring Annexation. The owner(s) of property adjacent to the City (including by extension of a public right-of-way or body of water, per the City's annexation policies), who are seeking access to City-provided services (for example, Planning, Engineering, or Building Division permits) may be required to submit an annexation petition to the City.

3.2.2 Annexation Consent. At the discretion of the Board of County Commissioners ("Board"), the County may provide consent for annexations, when such consent is required per ORS 222.170 or ORS 222.125 for properties utilizing county right-of-way for an annexation, if city agrees to accept the transfer of the section of the roadway being used to access the annexed property.

3.2.3 Annexation Plan. Any City-initiated Annexation Plan shall be developed consistent with applicable state and regional laws. Opportunity shall be provided

to citizens, the County, active Citizen Planning Organizations ("CPOs") and affected service providers to review and comment on the Annexation Plan prior to any annexation election. Annexation Plan(s) will include development of public facilities plan(s) for the Annexation Plan area(s).

3.3 Public Facilities.

3.3.1 Public Facilities Plans. Except as identified in Section 4, the City shall coordinate the preparation or amendment of public facilities plans within the HVUPAE as may be required by OAR Chapter 660, Division 11 (Public Facilities Planning) and applicable sections of ORS Chapter 195 with the appropriate service providers. Upon annexation, an area within the HVUPAE shall be provided with public facilities services through a combination of City-provided services and by way of Intergovernmental Agreements ("IGAs") with applicable service providers, which may include the following: sanitary storm services – Water Environment Services "WES"); water service providers – Sunrise Water Authority, Clackamas River Water; county road services – Clackamas County Department of Transportation and Development; fire prevention services – Clackamas Fire District No. 1; services related to the provision and maintenance of open space – Metro; mass transit services – Tri-Met; and, school facility planning – North Clackamas School District No. 12, Gresham-Barlow School District, and Centennial School District.

3.3.2 New Service Districts. County shall not form any new county service districts to serve any areas within the HVUPAE, nor shall it support the annexation of any land within the HVUPAE to any such districts or to any other service districts without the prior written consent of the City.

4. Planning for Urbanization of Rural Lands in the HVUPAE.

4.1 Planning authority. The City shall be responsible for planning for any future urbanization of rural lands within the HVUPAE. The urbanization of rural lands within the HVUPAE will only occur upon annexation to the City. The City shall coordinate with the County Planning Division and other relevant County Department of Transportation and Development ("DTD") staff regarding future urban planning and development activities and the transportation network in the HVUPAE. County staff shall be invited to participate in the proceedings of all relevant Technical Advisory Committees in the review of urban plans within the HVUPAE. The City shall notify and coordinate with the County on amendments to the City's Transportation System Plan ("City TSP").

4.2 Land use and transportation planning in the HVUPAE. Building off existing studies and previously completed planning work, the City of Happy Valley and the County will develop the following planning documents for the HVUPAE:

4.2.1 Integrated Land Use and Transportation Plans (Urban Plans):
The City may create detailed, integrated land use and transportation plans for "phases," or portions of the HVUPAE that the City determines are of sufficient size to phase development and urban service provision in a cost-effective and efficient manner. These plans shall include all elements required for a full urban

comprehensive plan for the selected area.

4.2.1.1 Coordination: All integrated land use and transportation plans shall be coordinated with the County to ensure consistency with County transportation plans and other planning in adjacent unincorporated rural areas. The City shall lead this planning undertaking with County coordination and participation in all relevant committees.

4.2.1.2 Notification: The City shall notify the County Planning Director prior to the initiation of each phase of urban land use and transportation planning. Notification shall, at a minimum, include a map of the area to be planned and an estimated timeframe for adoption of an urban plan.

4.2.1.3 Providing Employment Land: The City and County recognize the importance or providing employment land to support stronger economic growth in the County and will work together to identify opportunities to provide such lands in the HVUPAE, to potentially include employment areas different than those identified as Metro Title 4 lands.

4.2.1.4 Providing Affordable Housing Opportunities: The City and County recognize the importance or providing land for the development of affordable housing in the County and will work together to identify opportunities to provide such lands in the HVUPAE.

4.2.2 Clackamas County Transportation System Plan ("County TSP"): An update of the County TSP will be developed for the Metro UGB area illustrated within Exhibit A beyond (east of) any areas inside the HVUPAE that are not part of an integrated land use and transportation plan that is adopted or actively being completed by the City. The County TSP update will plan for transportation improvements necessary to serve travel patterns that are expected in the future in and adjacent to the HVUPAE including, without limitation, those areas within the Metro UGB but outside the HVUPAE.

4.3 State Highway System Improvements. The City and County recognize the importance of working with the Oregon Department of Transportation ("ODOT") to ensure that state transportation facilities be built/improved to accommodate expected population and employment growth in the HVUPAE and will utilize any subsequent land use and transportation plans to advocate for the timely development of the Sunrise Highway.

5. Other City Responsibilities.

5.1 Functions. All functions relating to the subject matter of this Agreement not specifically listed in this Section or any Exhibit as being the responsibility of the City will remain the responsibility of County. City shall be responsible for the timely and effective distribution to County of studies, information, requests, data and personal communications in City's possession on any matter concerning coordination between the City and County and/or regarding any infrastructure or policy issues coordinated by County.

5.2 Road Jurisdiction, Transfer and Condition. The City shall assume jurisdiction of the full width of any applicable segment of County road classified by the County as minor arterial, collector, connector, or local street that is within or immediately abutting an area annexed to the City within one year of the date of that annexation, assuming all provisions detailed below have been met. The transfer and assumption of jurisdiction shall be consistent with the provisions of ORS 373.270.

Concurrent with the date that a road is transferred, the County will upgrade the roadway or provide funds equivalent to the cost of a two-inch overlay over the existing pavement area, unless the road has a Pavement Condition Index (PCI) rating of 70 or higher, or the Parties mutually agree that overlay funds are not necessary for transfer. Alternatively, if a roadway or roadway section has a PCI of 50 or less, the City will only accept said roadway once a PCI of 70 or higher is achieved by the County or the Parties mutually agree upon a funding level equivalent to upgrading of the roadway to a PCI of 70 or higher.

5.2.1 For any County minor arterial, collector, connector or local street within the City boundary that is being transferred, but subsequent to annexation, the County shall allow improvements to be constructed to City standards and defer permitting authority to the City. The City shall issue all appropriate permits directly to the developer.

5.2.2 For any improvements to a County major arterial road within the City boundary, the County shall determine if City standards along the major arterial are acceptable to the County and do the following:

A. If the City standards are acceptable to the County, the County shall allow all improvements to be constructed to City standards. The County shall issue all appropriate permits with City concurrence.
B. If the proposed cross section standards are not acceptable to the County, the County shall require those improvements to be constructed to County standards. The County shall issue all appropriate permits.

5.3. City Notice to and Coordination with the County and CPOs.

5.3.1. The City shall provide notice to the County and the appropriate active CPOs at least 20 days prior to the first public hearing on all proposed annexations or extraterritorial service extensions into unincorporated areas.

5.3.2. The City shall provide notice to the County at least 20 days prior to the first scheduled public hearing on all proposed legislative changes to the City Comprehensive Plan or any quasi-judicial hearings regarding properties adjacent to unincorporated areas within the HVUPAE.

5.3.3. The City shall notify and coordinate with the County on amendments to the City TSP.

5.3.4. City shall provide notice and a service-provider comment letter to the applicable County Department in conjunction with the City's review of any land use application or building permit in which the proposed development activity might affect County facilities.

6. Other County Responsibilities.

6.1. County Notice to and Coordination with the City for Lands in HVUPAE.

6.1.1. The County shall provide notice to the City at least 20 days prior to the first scheduled public hearing on all proposed legislative changes to the County Comprehensive Plan text, implementing ordinances or other land use policies affecting land within the HVUPAE, and shall provide notice to the City at least 20 days prior to the first scheduled quasi-judicial public hearing regarding any properties adjacent to the City's incorporated area.

6.1.2. The County shall provide notice to the City at least 20 days prior to a staff decision on any Type II application for administrative action as provided in the ZDO for property within the HVUPAE.

6.1.3. The County shall notify and invite City staff to participate in or comment on all pre-application meetings for design review, conditional use permits, partitions, subdivisions or other significant development proposals within unincorporated areas of the HVUPAE at least 15 days prior to any such meeting.

6.1.4. Any amendments proposed by the County to the UGB within one mile of the HVUPAE will be reviewed jointly by the City and the County prior to submission to Metro.

6.1.5. In any County land use proceeding affecting property within the HVUPAE, the County shall enter all written comments received from the City into the public record and shall consider such written comments in the exercise of its planning and plan implementation responsibilities.

7. Mutual Indemnification

7.1 Subject to Article XI of the Oregon Constitution and ORS 30.260 to 30.300, the City will hold harmless, defend and indemnify the County, its elected officials, officers, and employees, for and against any claims or damages to property or injury to persons, resulting in whole or part from City's acts or omissions in performing any obligations under this Agreement.

7.2 Subject to Article XI of the Oregon Constitution and ORS 30.260 to 30.300, the County will hold harmless, defend and indemnify the City, its elected officials officers and employees for and against any claims or damages to property or injury to persons, resulting in whole or part from the County's acts or omissions in performing any obligation under this Agreement.

8. General Provisions.

8.1 Applicable Law. This Agreement shall be governed by Oregon law, without giving effect to the conflict of law provisions thereof, and the Parties agree to submit to the jurisdiction of the courts of the State of Oregon.

8.2 Insurance Coverage.

8.2.1. Commercial General Liability Insurance. Each of the Parties shall obtain and maintain at all times during the course of this Agreement commercial general liability insurance coverage pursuant to Oregon Tort Claims Act and subject to the limits of the Act covering Bodily Injury and Property Damage on an "occurrence" form in the amount of not less than $1 Million per occurrence/$2 Million general aggregate for the protection of the other Party, its officers, elected officials and employees. This coverage shall include Contractual Liability insurance for the indemnity provided under this Agreement.

8.2.2. Notice of Cancellation. There shall be no cancellation, material change, exhaustion of aggregate limits or intent not to renew any Party's insurance coverage contemplated by this Agreement without 60 days written notice to the other Party. Any failure to comply with the provision will not affect the insurance coverage provided to the Party. The 60-day notice of cancellation provision shall be physically endorsed on to the policy.

8.2.3. The County may self-insure to meet the minimum insurance requirements of this Section 8.2, to the extent that it maintains a self-insurance program that complies with the insurance requirements applicable under this Section 8.2.

8.3 Effective Date and Term. This Agreement shall become effective on the last date signed below and shall continue in effect according to its Terms.

8.4 Amendment. This Agreement may be amended at any time consistent with Section 8.9 below.

8.5 Assignment. Except as otherwise provided herein, the Parties may not assign any of their rights or responsibilities under this Agreement without prior written consent from the other Party, except that a Party may delegate or subcontract for performance of any of their responsibilities under this Agreement.

8.6 Dispute Resolution.

8.6.1. Subject to mutually agreed upon extensions of time in writing, failure or unreasonable delay by any party to substantially perform any material provision of this agreement shall constitute default. In the event of an alleged default or breach of any term or condition of this agreement, the Party alleging such default or breach shall give the other Party not less than 30 days written notice specifying the nature of the alleged default and the manner in which the default may be cured satisfactorily. During this 30-day period, the Party shall not be considered in default for purposes of termination or instituting legal proceedings.

8.6.2. The Parties shall first attempt to resolve the dispute by negotiation, followed by mediation, if negotiation fails to resolve the dispute.

8.6.3. Step One: (Negotiation). Each Party will select one or more person(s) to negotiate on behalf of the entity they represent. Those person(s) shall then meet and attempt to resolve the issue. If the dispute is resolved, there shall be a written determination of such resolution, signed by a representative of each Party and ratified by the governing bodies that shall then be binding.

8.6.4. Step Two: (Mediation). If the dispute cannot be resolved within thirty (30) days at Step One, the Parties may submit the matter to mediation. The Parties shall attempt to agree on a mediator. If they cannot agree, the Parties shall request a list of five (5) mediators from an entity or firm providing mediation services. The Parties will attempt to mutually agree on a mediator from the list provided, but if they cannot agree, each Party shall select one (1) name. The two selected shall select a third person who shall serve as the mediator. The common costs of mediation borne equally by the Parties with each bearing its own costs and fees. If the issue is resolved at this step, a written determination shall be signed by each Party and approved by the governing bodies.

8.6.5. Step Three (Legal Action). If the dispute remains unresolved following mediation, the Parties may seek remedy by appropriate proceedings filed in Clackamas County Circuit Court. In any such judicial proceeding, each Party shall be responsible for its own costs and fees.

8.7 Execution in Counterparts. This Agreement may be executed in any number of counterparts, each of which may be executed by any one or more of the parties hereto, and all of such counterparts shall constitute one Agreement. Counterparts of executed signature pages may be attached to any one or more counterparts of this Agreement. To facilitate execution of this Agreement, the Parties may execute by facsimile or e-mail transmission counterparts of the signature pages.

8.8 Severability. In the event a court of competent jurisdiction deems any portion or part of this Agreement to be unlawful or invalid, only that portion of part of the Agreement shall be considered unenforceable. The remainder of this Agreement shall continue to be valid.

8.9 Entire Agreement. This Agreement constitutes the entire agreement between the Parties and supersedes any prior oral or written agreements or representations relating to the HVUPAE. No waiver, consent, modification or change of terms of this Agreement shall bind the Parties unless in writing and signed by each party.

8.10 Non-Exclusive Rights and Remedies. Except as otherwise expressly provided herein, the rights and remedies expressly afforded under the provisions of this Agreement shall not be deemed exclusive and shall be in addition to and cumulative with all rights and remedies otherwise available at law or in equity. The exercise by either Party of any one or more of such remedies shall not preclude the exercise by it, at the same or different times, of any other remedies for the same default or breach, or for any other default or breach, by the other Party.

8.11 Debt Limitation. This Agreement is expressly subject to the debt limitation of Oregon counties set forth in Article XI, Section 10, of the Oregon Constitution, and is contingent upon funds being appropriated therefore. Any provisions herein which would conflict with law are deemed inoperative to that extent.

8.12 Waiver. The failure of either Party to enforce any provision of this Agreement shall not constitute a waiver by such Party of that or any other provision.

8.13 Interpretation. The titles of the sections of this Agreement are inserted for convenience of reference only and shall be disregarded in construing or interpreting any of its provisions.

8.14 No Third-Party Beneficiary. Neither Party intends that this Agreement benefit, or create any right or cause of action in, or on behalf of, any person or entity other than the County or the City.

8.15 Notices. All notices or other communications required or permitted under this Agreement shall be in writing, and shall be mailed or sent by scanned document (e-mailed) or faxed with hard copy to follow by post, addressed as follows:

PORTLAND METROPOLITAN ASSOCIATION OF REALTORS®

August 22, 2024

Urban Growth Management Team
Metro
600 NE Grand Avenue
Portland, OR 97232

Dear Metro Urban Growth Management Team,

I am writing on behalf of the Portland Metropolitan Association of Realtors® (PMAR) regarding Metro's Draft Urban Growth Report. We appreciate the extensive work Metro's staff put into the Urban Growth Report. We would also like to thank Metro for inviting PMAR to the Urban Growth Report Stakeholder table; it was a welcome opportunity to better understand the report's underlying work, data, and assumptions, and to discuss some of our region's challenges and opportunities with other stakeholders.

PMAR recognizes the Portland region is lacking tens of thousands of homes necessary to meet our growing population and that people in our community suffer due to this lack of housing. Our region's current level of housing construction is 10.1% below the long-term average, and no where near on pace to catch up with past underproduction, let alone accommodate future growth. Portland in particular is struggling to keep up with needed housing production; the city is on track to produce only 500 new units this year, when the forecasted need by 2045 is more than 120,000 new homes.

As a region, we must embrace land use, development, and zoning principles that provide and encourage an abundant mix of housing types that meets community needs and provides sufficient housing for current and future residents. Restrictive land use regulations play a major role in stymying the proliferation of new housing. Accordingly, PMAR supports much needed growth in the Metro area's capacity for housing development, which removes a barrier to housing construction; getting the 2024 growth management decision right will support the continued growth and prosperity of our entire region.

In that spirit, PMAR strongly urges Metro to adopt a higher growth population forecast, and urges the Metro Council to support the City of Sherwood's request for expansion.

Population Forecast

The draft report forecasts regional population growth "only from net in-migration," due to lower

forecasted birth rates, and assumes that growth rates will be slower as a result over the next 20 years.

While this is a reasonable assumption, it fails to recognize that the policy choices we make today will impact whether or not our region is a place that attracts new residents over the next 20 years. Put another way, if we plan for low growth, we are unlikely to see anything other than low growth. But if we plan for robust growth, and make policy choices that support a vision of higher growth, our region becomes a more attractive place to future residents.

We strongly recommend adoption of the higher growth population forecasts, to set the stage for nearer term policy decisions and actions that will in turn foster stronger population growth, and help our region realize economic growth and prosperity.

City of Sherwood Expansion

PMAR supports the City of Sherwood's expansion proposal, particularly the 340 net acres of residential land proposed in the Sherwood West Concept Plan. PMAR believes that there is no one-size-fits-all to housing and that a vast array of homes of various types and at various price-points are needed to serve members of the community, accommodate new residents, and ensure that members of our community can buy a home that fits their unique needs. Accordingly, while Metro may want to make recommendations or provide incentives to encourage certain kinds of housing development, PMAR would discourage prescriptive requirements or new regulations that would limit Sherwood's housing development options.

PMAR is committed to working collaboratively with Metro and other stakeholders to ensure that our region's growth management decision is implemented in a way that benefits all residents and facilitates growth of the housing market.

Portland, OR 97232

RE: Draft 2024 Urban Growth Report

Dear Chair Peterson and Metro Councilors,

Thank you for the opportunity to comment on the draft Urban Growth Report (UGR) and Sherwood West urban growth boundary (UGB) expansion proposal. The 2024 growth management decision is the blueprint for how Metro Council will lead the region in planning for future housing development and employment opportunities. We appreciate that these decisions are challenging and acknowledge there are trade-offs that must be carefully considered in this decision process.

Our Board strongly supports the City of Sherwood's application for expansion of the urban growth boundary to include the 1,291 acres within the Sherwood West urban reserve area. The city has demonstrated their readiness to serve the area with governance and infrastructure as required by Metro's Urban Growth Management Functional Plan. The City's plan envisions that up to 5,582 housing units and 4,524 jobs could be accommodated in the expansion area. As we are all grappling with ways to produce more housing in the region and across the state, adding this land to our regional urban growth boundary makes sense. In addition, Sherwood has shown that the proposed Sherwood West employment area has the site suitability characteristics to attract more of the types of industry that Sherwood has successfully recruited to the city in recent years. Even though this is a regional urban growth boundary expansion decision using regional analysis, place matters in this consideration. Sherwood has demonstrated that they are a place where people want to both work and live.

We also encourage Metro Council to strongly consider selecting the high growth rate for both population and employment. The selected growth rates guide regional policy and funding decisions around housing, employment land and supporting infrastructure. Choosing low growth rates could artificially constrain our ability to plan for or make decisions to support the development of badly needed housing of all types, or further constrain opportunities to grow our region's traded-sector employment, which provides living wage jobs for thousands of our community members.

Board of County Commissioners
[redacted] Hillsboro, OR 97124-3072
[redacted]

Thank you for your consideration. We look forward to continued partnership with Metro in planning to accommodate future growth to keep our region a thriving and great place to live.

Sincerely,

Subject: [External sender]2024 Sherwood West Urban Growth Boundary Expansion Proposal - Opposition

CAUTION: This email originated from an **External source.** Do not open links or attachments unless you know the content is safe.

To whom it may concern,
As long time residents (since 1997) and taxpayers of Sherwood, we strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. We stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Brandi & Tony Hendryx
[redacted]

My name is Julie Horowitz.

My family and our family farm is on the edge of the UGB expansion area. We've lived here 25 years.

I am a supporter of the West of Sherwood Farm Alliance.

The Mayor of Sherwood and Planning Director have testified publicly that what will be built in the Sherwood UGB expansion area will be market-rate housing, not affordable housing.

According to Redfin the average rent in Sherwood is $2,704 per month.

That is $700 more per month than in Beaverton, $900 more per month compared to Portland and $1,000 more per month than in Gresham.

If you assume a household is willing - or forced - to pay 30% of its pre-tax income on rent in Sherwood, they will need to earn $108,000 per year to afford that rent.

No teacher in Sherwood schools, even one with a master's degree and many years of experience, can afford that rent. No one working in the proposed "hospitality commercial" area in the Concept Plan would even dream of renting in Sherwood.

The average home price in Sherwood, according to Zillow, is about $650,000.

A family would need a household income of about $172,000 to buy that housing, assuming they had saved $130,000 for the downpayment and could get a 6.5% interest rate. And they would still be paying 30% of their pre-tax income for their home.

The idea that adding land for housing in Sherwood will contribute to the supply of affordable housing in the region is ridiculous. Ridiculous.

If MPAC is really interested in UGB expansions that might, *might*, contribute to the supply of truly affordable housing, you should recommend that the Metro Council reject this proposal and instead wait to consider UGB expansion applications are made under Governor Kotek's Senate Bill 1537.

That bill will go into effect in January, a few weeks after Metro is scheduled to make its decision on the Sherwood luxury housing proposal.
****

Subject: [External sender]We Say NO to the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary

CAUTION: This email originated from an **External source.** Do not open links or attachments unless you know the content is safe.

We Say NO to the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary
[redacted]

To whom it may concern:

As residents and taxpayers of Sherwood, we strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes.

The proposed expansion is unnecessary because:

- Metro's own projections from 2022 forecast only 3% growth for Sherwood in coming decades.
- Sherwood has sufficient land already to support additional housing and economic development - if developed wisely. The desires of Sherwood City to expand its tax base and of developers to gain additional lands for development are not adequate justification for the proposed expansion.
- Minimal support from the local community. In a 2021 poll, 84% of Sherwood residents opposed the UGB expansion in and around Sherwood.
- There are currently large areas of undeveloped land that have been brought inside the UGB in the last 20 years. According to projections, there is sufficient industrial land within the current boundary for the next 20 years. This proposed expansion (or a modified version) can be revisited in 10-12 years, but at this time it is completely unnecessary.

We stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community. Senate Bill 100 as enacted in 1973 was done specifically to prevent the kind of development that this proposed expansion clearly is - driven by private interests and profits rather than the public interest.

Sincerely,

Jim and Jan Huston

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you are expecting this email and/or know the content is safe.

Dear Mr. Rosenthal,

I am Troy Kazebee, and together with my wife Kendra, we are the owners of the property at 19300 SW Edy Rd in Sherwood. We strongly endorse the Urban Growth Boundary expansion proposed for Sherwood West.

For the past 22 years, we have proudly called Sherwood our home, raising our four children and residing in various neighborhoods within the city. As our family grew, Sherwood provided the housing options we needed, with connected neighborhoods and walking paths that have fostered a unique community atmosphere.

Throughout this time, we have actively participated in and contributed to the Sherwood West Planning process over the last decade. The proposed plan, encompassing 1,291 acres, addresses both Sherwood's and Metro's housing and employment land shortages. It builds upon

Sherwood's established character with connected neighborhoods, walking paths, and parks, elements that have kept us committed to this community.

Recently, we have been approached by the West of Sherwood Farm Alliance urging us to oppose the UGB expansion. Their involvement at this late stage is concerning given their absence from earlier planning discussions. However, having closely followed and studied the proposal over the years, and recognizing the housing and employment land shortages faced by Metro, we firmly believe it aligns with the future needs of Sherwood and Metro.

Therefore, we wholeheartedly support the City of Sherwood's request for a 1,291-acre UGB expansion.

Thank you for your time and consideration. If you have any questions, please reach out.

Sincerely,

Troy and Kendra Kazebee

RE: Metro's 2024 Urban Growth Report and Sherwood's Urban Growth Boundary Expansion Request

Dear Ms. Madrigal,

My name is Preston Korst and I'm the Director of Government Affairs at the Home Building Association of Greater Portland. HBA is dedicated to maximizing housing choice for all who reside in our region by shaping an environment in which industry professionals can meet the diverse needs of all communities.

I'd like to start off by personally thanking you and the rest of Metro's planning staff, including Katherine Ciarlo, Eryn Kehe, Ted Reid, Malu Wilkinson (and many more) for hosting and facilitating the Urban Growth Report Stakeholder Roundtable. This broad and diverse group of interested parties met for two hours monthly for nearly a year to discuss and debate the central tenants of the Urban Growth Report (UGR) and the impacts it will have on our region. As HBA's representative in that group, I can say that it provided much needed dialogue and reflection space for us to discuss how we as a region wish to grow. Your willingness to provide that opportunity is greatly appreciated.

In this letter, we hope to outline our industry's perspective on the 2024 Draft UGR and to provide our unequivocal support for the City of Sherwood's Urban Growth Boundary (UGB) expansion request.

For housing affordability and the overall health of our economy, HBA and many others in the housing industry urge your COO Recommendation and Metro Council to take a high-growth position when evaluating our region's land supply and housing needs in this UGR and move to approve Sherwood's UGB request without conditions.

Consider for a moment the exorbitant costs to purchase a home in our region. According to Zillow, the median home sale price in June was $521,133 (Multnomah County), $579,979 (Washington County), and

$631,000 (Clackamas County). Staggering as these figures are, they come as no surprise given that Oregon is staring down a housing deficit of 140,000 units. And if our goal is to advance economic justice and racial equity, then we must reverse these trends in a way that builds wealth and increases homeownership opportunities for more families who've traditionally been locked out of the homebuying market. In other words, WE ARE IN A HOUSING CRISIS.

- -

UGR Question #1: Which population and growth projections should Council make?

With the UGR, we believe that the focal and starting point rests primarily on the population and growth scenarios presented in the report. While the draft contains a lot to applaud—including acknowledgements of an existing regional housing shortage, changing housing choices due to the pandemic, and the creation of newly allowed middle housing options—it still includes elements that are concerning for our industry.

For one, the report concludes that regional population growth is slowing because birthrates are dropping (which of course is an established national trend). This means that in-migrating residents will be the primary driver of our population growth, as it has been in recent years. This analysis makes sense. However, the report erroneously assumes that, "Slowing population growth also means slower job growth." We respectfully disagree.

Though we concur that we can't necessarily change what the data tells us, we *can* choose policies that will bend the precision of that data towards a stronger economic future. In other words, if we use this growth report to prepare for strong economic and housing growth, we believe that in-migration will adapt towards a higher-opportunity future—if you build it, they will come. On the flipside, if we plan for anemic growth and limit our ability to adapt to the market, we'll just be realizing our own economic stagnation. In either case, it's a self-fulfilling prophesy.

UGR Recommendation #1: assume and position the report with the high-growth population scenario.

We feel that Metro would not only be wise, but would be making the most responsible public-policy decision to plan for growth, despite what projections may or may not suggest. Preparing with an attitude of a high-growth scenario provides Metro and local jurisdictions with more flexibility to plan for the future that will avoid future housing crises and economic stagnation. As we hear often from planners: *failing to plan is planning to fail*.

- -

UGR Question #2: How should Council approach housing need and development scenarios?

To start, we want to acknowledge the fact that Metro staff included in this report an existing housing shortage of 23,700 units. While many in the housing industry would argue (with additional sources) that number is considerably low, it is still an important indication of how serious our housing crisis is to Metro. Moving on from there, we appreciate the difficult work that went into calculating our housing needs over the next 20 years. And we believe it would be misleading, if not negligent, to suggest that our region's housing needs are anything except *high*. Therefore, **we urge Metro to adopt the high-forecast housing need of at least 203,200 units over the next 20 years**. This reflects a greater sense of reality than the baseline or low-point figures hold.

Additionally, in the report, Metro also makes assumptions about not only the rate of our growth, but also *how we will and should grow*. Found on pages 38-39, the report contains several assumptions for development potentials using "illustrative demand and capacity scenarios." While we aren't exactly sure which data these trends were founded upon, we do feel that they all but marginalizes and unduly prevents the construction of new, single-family homes for residents. It assumes, either through economic reality or lifestyle choices, that our region's historically strong demand for homeownership isn't a viable scenario going forward. Again, we disagree.

And importantly, just after the limited scenarios are presented, the report goes on to say that "…it will be the market, not Metro's UGR calculations, that determine what mix of middle housing and single-unit detached housing gets built…" Yet, in the way that the housing needs scenarios are presented, Metro is essentially asking its Council to do just that by attaching to their decision a condition and outcome which will essentially select which types of housing should get built. Housing construction is a market-driven industry, with the overwhelming majority being built by private developers. We believe that it is not within Metro's power or provision to attempt to guide the mix of housing the market will bear, least of all with just four narrow scenarios.

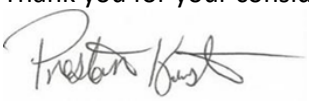
UGR Recommendation #2: Metro should adopt a high-forecast housing need. Also, it should reject the growth scenarios presented in the UGR or establish an additional scenario that creates flexibility for the housing market to adapt to the demand of consumers.

A high need scenario reflects the reality on the ground and will allow policymakers across the region take actions that will address the high cost of housing in their communities. Also, we believe that the forecasted development scenarios have been created despite the fact that nearly 4 out of 5 Oregonian's still prefer to live in a single-family home versus other housing types. And it fails to recognize the power that public-policymaking has on the creation of new housing, which could make single-family entry-level homes more affordable. Lastly, it ignores the fact that the vast majority of homeownership opportunities lie in the single-family market. We believe that Metro should consider that our region's collective desire to foster equity and economic justice will rely on the unique wealth and community-building opportunities that arise with homeownership.

City of Sherwood UGB Expansion Request

This year, the City of Sherwood is the only city requesting a UGB expansion—and we believe that it would have a tremendous impact on our region, in the form of 4,500 good-paying jobs, roughly 5,000 new homes, and the creation of hundreds of acres of parks and natural areas.

For almost two years, I had the pleasure of sitting on the Sherwood West Technical Advisory Committee which helped shape the concept planning for the area. I can say without reservation that the plan brought forward by staff, regional stakeholders, and community members has been careful, conscientious, and equitable. **We applaud the delivered outcome and encourage Metro to move forward with an approval that encompasses the entirety of the 1,291 acres as requested, *without conditions.***



As Metro knows well, bringing new lands into the UGB requires focused planning, financing for infrastructure, and a building environment that can support growth. Fortunately, Sherwood is primed for just that. Over the last several years, the city has undergone extensive public engagement to develop a plan that is innovative, forward-thinking, and contains a variety of tools that will create complete and livable communities. However, adding conditions as suggested in a recent Council Session, could be

detrimental to that extensive outreach. There are serious political costs to adding conditions, not to mention the hundreds of thousands of dollars in grants and general fund dollars would be jeopardized if onerous restrictions are placed on this community-led design.

Given the continued severity of our region's housing crisis, mixed with the budding opportunities to capitalize on historic investments for local economic development—HBA and our partners in the housing sector view this request as a great example of a planning process that will bear fruit for generations. It will help empower our region to reach its housing production goals while creating an indispensable lifeline to a struggling local economy. For affordability and the overall supply of housing, the Sherwood West proposal is an undeniably smart plan that deserves the community's support and Council's unanimous vote.

In closing, we would like to thank Metro staff and Council for the dedicated service they offer to our communities. From long-range planning to affordable housing development, the work you do is not easy and the stakeholder groups you engage are broad and not always agreeable. We appreciate the efforts taken to develop the 2024 Draft UGR and to review Sherwood's 2024 UGB Expansion. And we implore you to consider the serious housing crisis we are facing when making your ultimate recommendations and decisions.

Thank you for your consideration of our testimony,

Preston Korst
Director of Public Policy and Government Affairs
Home Building Association of Greater Portland

Subject: [External sender]In Support of Sherwood West Expansion Plan

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Dear Metro Council,

I am writing in my support of the City of Sherwoods West Expansion Plan. Like many towns and cities Sherwood is experiencing a housing shortage, unlike many others Sherwood is uniquely situated to provide planned growth that will benefit the current and future residents of Sherwood. The community engagement and dedication of the local councils and committees ensures that the rich history and appeal of Sherwood is not lost to growth but rather enhanced and capitalized upon in a way that creates everlasting ties among residents new and old alike.

The passing of the West expansion is important because it satisfies all needs in protecting the land while providing opportunities and growth in a way that brings and keeps the best of Sherwood. True progress comes from building on the past with an eye to the future; holding tight to what once was will kill any economic and social prosperity that Sherwood is poised to take. It is up to us as stewards of the town we love to pass the expansion plan and do our best for future generations.

Sherwood is growing, whether people want it to or not but we have a chance to guide that growth in a way that benefits all. Please think of all residents when choosing to support and pass this plan and not only the few with the most.

Thank you,
Amelia Larkin

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Dear Metro Council and Staff:

I urge you to support Sherwood's current request for a growth boundary expansion, having spoken with Sherwood officials and reviewed their conceptual planning for Sherwood West.

The lack of large employment sites is hampering our region's economic growth. The Portland MSA in recent months has posted the largest year-over-year job losses out of all 50 of the country's largest MSAs (nearly all metro areas gained jobs over this period). Sherwood will help provide those needed employment sites.

A wavering employment market also will worsen the housing affordability crisis we face in this region. The limited supply of land for residential development is another crucial affordability factor, by limiting new housing creation. Residential land availability and housing production were a focus of the last state legislative session due to widespead voter frustration over housing affordability in our region.

My experience as a development finance consultant, after many years of financing construction with area banks, has made clear to me the many problems that our limited land supply has caused.

Please consider the legislature's lead and support Sherwood's expansion effort.

Thank you for your consideration.

Re: Draft 2024 Urban Growth Report
Public Comments
My Client: David Marks

Dear President Peterson & Councilors:

This firm represents David Marks, who owns property in the Stafford area that is part of Metro's urban reserves area (the "Stafford Area"). Mr. Marks is submitting these comments on Metro's draft 2024 Urban Growth Report (the "Draft 2024 Report") for the Metro Council's consideration. As explained below, the Metro Council should reject the Draft 2024 Report because it is inconsistent with Goal 14, the implementing statutes and administrative rules, and the Court of Appeals' recent decision in *Marks v. LCDC*, 327 Or App 708, 536 P3d 995 (2023) ("*Marks*").

A. Introduction

In 2020, Mr. Marks filed a petition for enforcement with the Land Conservation and Development Commission ("LCDC") seeking to nullify and/or modify the five and three-party intergovernmental agreements ("IGAs") between Metro, Clackamas County, and the Cities of Lake Oswego, West Linn and Tualatin (the "Cities") that controls the future development of Stafford Area. Mr. Marks filed the petition for enforcement because Metro abdicated its regional planning authority over the Stafford Area by granting the Cities complete control over the timing of the expansion of the Urban Growth Boundary (the "UGB") into this area. Given the Cities' decades-long opposition to the urbanization of the Stafford Area, the IGAs will obstruct the State and regional efforts to increase the housing supply and address the regional housing crises.

In 2022, the Oregon Court of Appeals reversed LCDC and remanded the petition for enforcement matter to require LCDC to determine if the IGAs violate the regional framework plan and implementing goals, statutes and administrative rules. *Marks*, 327 Or App at 738. Although the

E. Michael Connors
[redacted]
Portland, OR 97209
[redacted]

Court did not resolve the merits of the petition for enforcement, the Court reiterated prior caselaw recognizing Metro's responsibility to implement a regional strategy for the metropolitan UGB as opposed to an ad hoc approach led by the metropolitan cities. The Court stated that Goal 14 and the implementing statutes and administrative rules require Metro to determine the 20-year regional housing needs and identify the best location to expand the UGB to satisfy those housing needs, not the metropolitan cities.

The Draft 2024 Report is yet another instance of Metro abdicated its regional planning authority and granting the metropolitan cities control over the timing and location of the UGB expansion. Instead of Metro determining the 20-year housing needs for the region and evaluating the urban reserve locations suited to accommodate those needs, the Draft 2024 Report confers that authority to the metropolitan cities. Metro is restricting its growth analysis to the City of Sherwood's limited proposal solely because Sherwood is the only city that requested a UGB expansion. The Draft 2024 Report takes this limited approach even though the 20-year housing needs analysis identified a need for significantly more housing units than Sherwood is proposing. This ad hoc, bottom-up type of approach to the Metro regional UGB is the opposite of what the Oregon legislature intended and is inconsistent with Goal 14 and the recent *Marks* decision.

B. Metro is required to determine the need and location for UGB expansions consistent with Goal 14 and the implementing statutes and administrative rules.

Metro is responsible for coordinating land use planning in the tri-county region consisting of Clackamas, Multnomah and Washington County. ORS 195.025; ORS 268.380(1)(c); ORS 268.385. One of Metro's primary responsibilities is the adoption and management of the regional UGB to ensure that the metropolitan regional housing and employment needs can be met. ORS 268.380-268.390; *Marks*, 327 Or App at 712-13; *Sensible Transportation v. Metro. Service Dist.*, 100 Or App 564, 567, 787 P2d 498, *rev. den.*, 310 Or. 70, 792 P2d 104 (1990). The Court of Appeals has repeatedly stated that in assigning Metro the responsibility for justifying, adopting, and securing acknowledgment of the metropolitan area UGB, the Oregon Legislative Assembly "presumably determined adoption and administration of the metropolitan area UGB required Metro's unique regional perspective, rather than leaving adoption and administration of the UGB to the large number of cities and counties making up the metropolitan area." *Marks*, 327 Or App at 712-713; *Sensible Transportation*, 100 Or App at 567. (Emphasis added).

As part of its UGB-related responsibilities, Metro is required to conduct a review of the metropolitan area UGB every six years to ensure that it continues to maintain a 20-year supply of urbanizable land within the UGB. ORS 197.299. With respect to housing, Metro must demonstrate that its regional plan has "sufficient buildable lands within the urban growth boundary . . . to accommodate estimated housing needs for 20 years." ORS 197.296(2). Metro's needs analysis must be supported by substantial evidence. *City of West Linn v. LCDC*, 201 Or App 419, 440, 119 P3d 285 (2005). If Metro determines that the land supply is inadequate, it must expand the UGB or take other measures to ensure that the identified need can be accommodated. ORS 197.296(6); ORS 197.299(2); *Marks*, 327 Or App at 713.

In considering where to expand the UGB, Metro's analysis must comply with Goal 14, which includes four "boundary location" factors that Metro must consider when determining which urban

reserve land to add to the UGB. Goal 14; *Marks*, 327 Or App at 713. The four boundary location factors are "(1) [e]fficient accommodation of identified land needs; (2) [o]rderly and economic provision of public facilities and services; (3) [c]omparative environmental, energy, economic and social consequences; and (4) [c]ompatibility of the proposed urban uses with nearby agricultural and forest activities occurring on farm and forest land outside the UGB." *Id.* A decision to add land to the UGB must compare alternative areas based on a balancing of all these factors, rather than reliance on any one factor. *Citizens Against Irresponsible Growth v. Metro*, 179 Or App 12, 17, 38 P3d 956 (2002); *1000 Friends of Or. v. Metro*, 174 Or App 406, 409–410, 26 P3d 151 (2001); *D.S. Parklane Dev., Inc. v. Metro*, 165 Or App 1, 25, 994 P2d 1205 (2000).

C. The Draft 2024 Report is inconsistent with Goal 14, the implementing statutes and administrative rules, and *Marks*.

The Draft 2024 Report has multiple problems that should concern the Metro Council. The Draft 2024 Report does not explain how Metro is going to satisfy the housing needs over the 20-year period and does not even acknowledge the Goal 14 boundary location requirements or attempt to comply with these requirements. The Draft 2024 Report appears to be designed primarily to justify Metro's policy of limiting its consideration of UGB expansion areas to Sherwood's request since it was the only city to request an expansion. As explained below, the Draft 2024 Report is inconsistent with Goal 14, the implementing statutes and administrative rules, and *Marks* in several respects.

The Draft 2024 Report does not contain any meaningful recommendations or indication of what Metro's chief operating officer and staff may ultimately recommend the Metro Council adopt for its final decision. While we understand this public comment period is designed in part to provide Metro's chief operating officer and staff additional public input to help inform their recommendations, the Draft 2024 Report is so general and ambiguous that it makes it extremely difficult to provide meaningful input and comments. The Draft 2024 Report contains a wide variety of scenarios that lead to very different results, but it lacks any indication of which scenarios are more likely or how the Metro Council should factor in these varying scenarios to its decision. If Metro is truly seeking meaningful public input, requesting that the public comment on such an amorphous and non-committal report is not very helpful or productive.

The Draft 2024 Report failed to acknowledge there is a need for significant new housing in the Metro UGB to satisfy the 20-year housing needs of the region. Currently, there is an existing need for 23,700 additional housing units in the Metro region based on Econorthwest's Existing Housing Needs Report. Draft 2024 Report, Appendix 8A. The Draft 2024 Report notes there is also a need for a significant number of new housing units to address the future growth needs, ranging from 179,500 units under the high growth model, 149,500 under the baseline growth model and 119,600 under the low growth model. In total, this data demonstrates that there is a need for 143,300 to 203,200 new housing units in the Metro UGB to satisfy the 20-year needs of the region.

Instead of acknowledging this need for a significant amount of new housing units to satisfy the 20-year needs of the region, the Draft 2024 Report suggests that the Metro Council has wide "latitude to determine <u>whether</u> additional housing capacity is needed to accommodate potential household growth." Draft 2024 Report, p.37. (Emphasis added). The sole basis for this alleged latitude is the

"uncertainty" in predicting future trends. Draft 2024 Report, p.37-38. The uncertainty in predicting future trends cannot be used as a basis for ignoring the actual data and analysis because Metro's entire process of evaluating the needs of the region for the next 20 years is inherently uncertain. If the mere uncertainty in predicting future trends was sufficient to override the actual data and analysis, there would be no reason to do a detailed analysis of the housing needs in the first place. The Draft 2024 Report appears to be an outcome driven analysis designed to grant the Metro Council maximum latitude and discretion to decide whatever it wants, rather than an evidentiary based decision. Metro's needs analysis must be supported by substantial evidence, not an outcome driven approach designed to provide maximum decision-making discretion. *City of West Linn v. LCDC,* 201 Or App at 440.

The Draft 2024 Report failed to acknowledge that the Sherwood West urban reserve area proposal, the only UGB expansion option identified in the report, is woefully insufficient to satisfy the 20-year housing needs of the region. The Sherwood West proposal will only provide 3,120 to 5,580 new housing units, which will barely put a dent in the 143,300 to 203,200 new housing units needed to satisfy the 20-year needs of the region. By limiting its consideration of UGB expansion options to the Sherwood West proposal, Metro has made it impossible to satisfy the 20-year housing needs of the region.

The Draft 2024 Report does not comply with the Goal 14 boundary location factors. The report doesn't even mention the Goal 14 boundary location factors, let alone address them. Nor could the Draft 2024 Report comply with the Goal 14 boundary location factors because Metro refused to consider any urban reserve areas unless a city proposes an UGB expansion and provides a concept plan. Given that Sherwood was the only city to submit a UGB expansion proposal, Metro's policy of requiring a concept plan as a prerequisite to UGB expansion precludes consideration of any other areas in the Metro region. As a result, the Draft 2024 Report clearly does not identify where the additional housing is most needed as required by Goal 14.

Metro's "policy" of requiring a concept plan from the city before it will consider adding urban reserve land to the UGB is itself inconsistent with Goal 14 and the implementing statutes and administrative rules. Metro's decision to add land to the UGB must compare alternative areas based on a balancing of all the Goal 14 boundary line factors and cannot rely solely on any one factor. *Citizens Against Irresponsible Growth v. Metro*, 179 Or App at 17; *1000 Friends of Or. v. Metro*, 174 Or App at 409–410; *D.S. Parklane Dev., Inc. v. Metro*, 165 Or App at 25. Moreover, Goal 14, the statutes and the administrative rules do not even reference a "concept plan," and they certainly do not require a concept plan as a prerequisite to inclusion in the UGB. Metro's policy for requiring a concept plan as a prerequisite for inclusion in the UGB is based solely on the Metro Code ("MC"), but the Metro Code cannot override the requirements under Goal 14, the statutes and the administrative rules.

As the Court acknowledged in *Marks*, LCDC and the Department of Land Conservation and Development ("DLCD") have both determined that Metro cannot avoid the Goal 14 requirement to study all urban reserve lands for inclusion in the UGB based solely on the lack of a concept plan. *Marks*, 327 Or App at 715-716. If Metro identifies a need for additional land in the UGB to accommodate the regional need for housing and employment, Metro must determine which land to add by evaluating alternative urban growth boundary locations consistent with the boundary

location factors of Goal 14. OAR 660-024-0060(1); *Marks*, 327 Or App at 725. Metro must consider and balance the boundary location factors of Goal 14 for all of the urban reserves areas and determine the UGB boundary location based on all the relevant factors. OAR 660-024-0060(3). Metro cannot use the concept plan requirement in MC 3.07.1110 to avoid the Goal 14 requirement that it study all urban reserve lands for possible inclusion in the Metro UGB. *Marks*, 327 Or App at 737.

Moreover, even the Metro Code does not support such a carte blanche policy. MC 3.07.1425 sets forth "factors and criteria for amendment of the UGB," only one of which includes "whether the area has been concept planned." MC 3.07.1425(c) & (d). MC 3.07.1110(a) provides that concept plans are generally required before land is added to the UGB, but it does not limit Metro's six-year review of the UGB to areas that have a concept plan. Additionally, MC 3.07.1110(e) provides an exception to the general requirement that concept planning occur before land is added to the UGB.

Metro's policy is not only inconsistent with State law, but it based on a unique situation that should not be driving Metro's approach to UGB expansions. Metro added the concept planning requirement due to the UGB expansion in 2002, which included 12,000 acres in the Damascus area that largely failed to urbanize after the decades long legal battle that ultimately led to the City of Damascus disincorporating. But that situation was highly unusual and the reasons why that area has not been urbanized are unique to that situation. The local residents' unusual decision to incorporate Damascus in 2004 to control the development of this urban area, and the subsequent disincorporation after years of political infighting and litigation, that was the reason this area did not get developed. It was certainly not the mere lack of a concept plan.

Had Metro considered other urban reserve areas for possible inclusion in the UGB as required by Goal 14, it would conclude that there are other areas that clearly have a need for additional urban lands. As an example, the City of Tualatin's 2019 Housing Needs Analysis concluded there is an existing lack of affordable housing and lack of capacity to accommodate certain other housing types. Tualatin is unable to accommodate these housing needs without a UGB expansion. Had Metro considered Tualatin's Housing Needs Analysis, it clearly would have concluded there is a specific need for additional urban lands in this location. By refusing to even consider other cities housing needs analysis or similar information, Metro is disregarding its responsibility to determine where the best locations for expanding the UGB in compliance with Goal 14.

D. Conclusion.

The Draft 2024 Report and Metro's whole approach to this six-year UGB expansion review has turned the process on its head. The Oregon legislature granted Metro the authority to administer the regional UGB because it "required Metro's unique regional perspective, rather than leaving adoption and administration of the UGB to the large number of cities and counties making up the metropolitan area." *Marks*, 327 Or App at 712-713. Goal 14 and the implementing statutes and administrative rules were designed to require Metro to determine the housing and employment needs in the region and the locations where those needs can be best served.

Metro's current approach is the opposite of that legislative directive and process. Now the cities dictate when and where the regional UGB expansions will occur. Even when the city proposals are

insufficient to satisfy the regional housing and employment needs, the Draft 2024 Report makes it clear that Metro will either ignore those needs or rely on the inherent uncertainty in predicting future trends as a basis for justifying a smaller UGB expansion. Metro is effectively abdicating its authority over UGB expansions to the cities in contravention of the legislature's intent.

Not only is Metro's approach to this UGB expansion process inconsistent with Goal 14 and the implementing statutes and administrative rules, but it will exacerbate the current housing crisis in the Metro region. As recognized in the Draft 2024 Report, the Metro region currently does not have a sufficient housing supply and many residents are priced out of the market. That trend will only worsen over time. Metro needs to provide leadership on this issue, comply with the required Goal 14 process and be willing to make the hard decisions necessary to address this difficult housing issue plaguing our region. The first step in doing so is to ensure the 2024 UGB expansion process follows the requirements of Goal 14 and the implementing statutes and administrative rules.

We appreciate your consideration of our comments and look forward to addressing this issue further with the Metro Council.

Very truly yours,

HATHAWAY LARSON LLP

[redacted]
Subject: Sherwood West UGB Support

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you are expecting this email and/or know the content is safe.

Dear Gerritt,

This is Diann Matthews. My sister, Marleen Mandel, and I own the property at 18550 SW Edy Road in Sherwood (approximately 60 acres at the southwest corner of Edy and Elwert Roads). We are writing to you **in support of the Urban Growth Boundary (UGB) expansion** request for Sherwood West.

Our family's roots run deep in Sherwood. Our father was raised on a farm directly across Elwert from ours, and the Mandel family has been in Sherwood for more than 100 years. The farm he grew up on is already in the UGB. It is the subdivision known as Mandel Farms and has nearly 90 homes. Our parents purchased our property in 1956 and we have continued to use it as a home and farm for nearly 70 years.

During our time here, we have seen many changes in the city during our time here, some good, some not so good. With the addition of the high school in Sherwood West, traffic and congestion have made it increasingly hard to maintain our property as a farm. I can attest that the City has attempted to meet the needs of the citizens and have a vision for the city that fits into the small community feel Sherwood has always had, but feel that now is the time for expansion.

In the past dozen years or so, I have been extensively involved in the Citizen's Advisory Committee. I sat on the citizens advisory committee in the first iteration back in 2012 and I have played an active supportive role in the current concept plan that just wrapped up prior to the City making an application this year to Metro. The city has spent a lot of thoughtful time making an appropriate plan to meet the City's current and future needs for housing, roads, infrastructure, schools, and parks.

Here are a few examples of the needs of the community and thus the reason for the ask from METRO for approximately 1300 acres: 1) lack for affordable housing in the area for all demographics, 2) job growth, which is a focus of the City Council and there is not any affordable housing for employees to live in the community, 3) more families increase school enrollment in the area and in the Sherwood High School which is located in the Sherwood West boundary, 4) the result of increased population will benefit the entire community in the tax base, 5) parks have been included into the plan to fit into the existing vision of the Sherwood community, 6) focus on sustainable employment beyond the existing service jobs, which will provide the community with a stronger revenue and services base, and lastly 7) Sherwood withdrew its request in 2018 for UGB expansion and the community has felt negative impact ever since.

There is a group called West of Sherwood Farm Alliance, existing of 2 wineries, Hawks View and Alloro, that are outside the growth boundary of Sherwood West and are encouraging folks to complain and cite reasons against Sherwood West UGB expansion request. Many of these folks have not been involved in the arduous process the city has gone through in the past 12 years which has resulted in the City's current request to Metro.

Thank you for your time and consideration in this important matter. Please know there are many of our neighbors in the Sherwood West Area who support the UGB expansion request and are hoping Metro will vote in support of the UGB expansion request of 1291 acres.

If you have any questions please feel free to reach out to me at either [redacted] or at [redacted].

Sincerely,

Diann Matthews and Marleen Mandel

Subject: [External sender]Objection to Urban Growth Boundary Expansion

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To whom it may concern,

As a resident and taxpayer of Sherwood for the past 23 years, I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely,

Kelly Melillo

Subject: [External sender]In Opposition to Sherwood West Concept Plan

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

The Sherwood West Concept plan will increase traffic and congestion (causing significant delays for day to day travel *and* first responders), create more and more of a burden on our school system (larger classroom sizes, teacher impacts, and more), increase the need for infrastructure improvements (causing a greater tax burden on Sherwood), and generally, is **NOT** what Sherwood residents want.

As anticipated, we see negative impacts of the Brookman development (*which was voted down by the citizens of Sherwood THREE times yet pushed through anyway*). We were promised better walkability and a thoughtful new traffic pattern - most definitely, not the case. The surrounding area has become a 'freeway' and/or cut through for more and more traffic without sidewalks and is unsafe for anyone to walk, run, or play (which was one of its' very selling points).

While we appreciate the need for development and perhaps even the intention to grow thoughtfully - this plan doesn't meet the needs of the existing community. Please pause and get it right.

Metro Urban Growth Management Team,

The City of Gresham appreciates the work of Metro staff and consultants over the past year to compile the draft Urban Growth Report. At this time Gresham would like to provide some comments regarding the draft report:

- A topic throughout the region this cycle has been the feasibility of industrially zoned lands. Gresham staff were informed that the Metro process considered slope as part of Sherwood's expansion proposal, which is commendable. Unfortunately, slope isn't reflected in the inventory of industrial land supply in a way that accurately reflects developable acreage. Large-lot development is widely seen as infeasible if slopes exceed 5%. Several of the region's large-lot tier 3 sites are within Gresham. One is an active gravel pit, and the others are within the Springwater area with slopes in excess of 7%.

- The UGR will be viewed statewide and can have far-reaching implications. We know funding is critical for tier 3 sites, especially large-lot sites to become shovel-ready. We need to ensure we get the industrial land supply right to effectively advocate for funding for these sites.

- The draft UGR discusses potential conditions that could be placed on a Sherwood expansion related to housing that could require a certain housing mix. Gresham would caution against overly prescriptive conditions of approval with the impending Oregon Housing Needs Analysis. It could be more appropriate to allow the OHNA housing needs allocation and Sherwood's translation of it into housing types, characteristics, and locations to help Sherwood formulate zoning and incentives for housing types within the expansion area.

We appreciate your consideration of Gresham's comments.

Sincerely,

Ashley Miller

Good Afternoon!

I am concerned about expanding the Urban Growth Boundary when there is space for more housing right now. I own a home in Sherwood (and thus pay taxes) and want you to reject the Expansion of the West Urban Growth Boundary by 1,291 acres!

Thanks for hearing my concern,
Julie

RE: UGB Expansion
Dear Gerritt:

My name is Lou Ann Nance, and my interest in the Sherwood UGB is based upon my family's property within the Sherwood West Neighborhood, which they have owned for nearly 40 years.

Our family has huge sentimental interest in the Sherwood Area, and desire for thoughtful development of the area that support s efficient use of the land that creates new jobs and affordable housing. It will also be necessary to create a tax base that sustains the infrastructure, and the new $247 million-dollar high school.

Your foresight into a healthy UGB Plan will ensure the prosperity of the City of Sherwood for many years to come. Thank You for your time and considerations in this important matter.

Sincerely

Lou Ann Ottoman Nance

August 15, 2024

Metro Council Chair Peterson and Members of the Metro Council,

Thank you for the opportunity to provide testimony on the draft Urban Growth Report (UGR) released in July. We appreciate the work and effort staff have dedicated to the implementation of the Urban Growth Report process. We are grateful for the opportunity to have representation on the Stakeholder Roundtable.

The Washington County Chamber of Commerce represents a broad spectrum of businesses and community stakeholders who are deeply invested in the future growth and prosperity of our region. After thorough discussion with our members, we have identified several areas of concern in the UGR as currently drafted. We respectfully submit the following feedback for your consideration.

1. Definition and Classification of "Buildable Land"

One of our primary concerns revolves around the definition and classification of "buildable land," particularly in the context of industrial land supply versus housing capacity. The current draft report appears to contain significant discrepancies between what is considered "developable" land and what Metro is counting as a surplus of buildable lands.

Analysis suggests there is an oversampling of small parcels, particularly those under 10 acres, which are generally not attractive to industrial or commercial investors. Additionally, we have identified issues with several large parcels, including eight 50-acre sites that appear to be either defunct rock quarries or sites with serious constraints, making them effectively undevelopable.

We urge Metro to revisit the criteria used to classify industrial land and to apply more stringent layers of analysis to ensure that the data reflects the true potential for industrial development. It is crucial that Metro's data accurately represents the realities on the ground to avoid misguiding policy decisions based on an overestimated supply of viable industrial land. If the criteria are embedded in State Land Use laws or constraints, we believe it is incumbent upon Metro to actively seek changes to State Laws or Statute.

2. Employment Lands and Viability

Regarding employment lands, we recommend that Metro Council discount approximately 1,300 acres of land with a slope grade above 7%, as this exceeds the industry standard for commercial and industrial development. We also ask that the Council consider the fact that the average lot size for employment lands is currently 3.8 acres, with a median site size of just 1.7 acres. These dimensions are often insufficient for the needs of modern commercial and industrial developments.

3. Senate Bill 4 Super-Siting and Employment Land Expansion

During the 2023 Legislative Session, Senate Bill 4 gave the Governor super-siting authority under the Oregon CHIPS legislation (SB4) passed last session. Should the Governor choose to exercise this authority, we strongly urge the Metro Council to view this as an additive measure rather than a replacement for any employment land expansion decisions as it was contemplated by Legislators. The super-siting authority is a valuable tool for specific projects but should not substitute the broader need for increasing our employment land base.

4. Housing Capacity and the Need for Realistic Projections

The draft UGR significantly underestimates the region's housing needs. According to a report by ECOnorthwest, the Portland Metro Region is already facing a shortage of 59,488 homes, in addition to 10,683 homes needed for houseless populations. Furthermore, the report projects that the region will need to produce 294,853 new housing units over the next 20 years—far exceeding Metro's calculated range of 143,300 to 203,200 units.

We strongly recommend that Metro Council incorporate this supplementary data into the UGR and consider its implications, particularly in the context of Sherwood's expansion plans. The current projections in the UGR do not align with the on-the-ground realities of our housing market. We also urge the Council to reject the limiting housing development scenarios presented on page 38 of the report. Instead, Metro should adopt a policy framework that acknowledges both the low capacity for housing development within the Urban Growth Boundary (UGB) and the urgent, high need for new housing production.

The current scenario, which suggests a surplus of 9,050 units, is misleading and risks leaving our region severely underprepared for future housing demands. The reality points to a potential deficit of 84,000 housing units inside the UGB, a gap that Metro must address to avoid exacerbating the existing housing crisis. We believe that planning for adequate housing will help to mitigate the escalating costs of housing.

5. Planning for Growth, Not Decline

Finally, we believe that it is far wiser to plan for growth and be overprepared than to anticipate decline and risk underproducing housing and jobs. The current UGR seems to prophesy a conservative growth outlook, which could lead to economic stagnation and increased pressure on housing markets. We urge Metro Council to adopt the "High" Population growth forecast in the UGR to provide greater flexibility to local jurisdictions in meeting their communities' needs.

This recommendation is not just a matter of optimism but of prudent public policy. By planning for high growth, Metro can ensure that our region is prepared to meet the demands of a growing population, thereby avoiding future crises related to housing shortages and economic underdevelopment.

6. Washington County Chamber Support for Sherwood's Expansion Application

In addition to the concerns outlined above, the Washington County Chamber of Commerce fully supports the City of Sherwood's expansion application as presented. We believe that the Sherwood West North District Mixed Employment Area (MEA) is critical for addressing the region's growing need for industrial land and housing. The inclusion of this area within the UGB will help meet the demands of a

robust and expanding industrial market, provide opportunities for job creation, and contribute to the overall economic growth of the region.

It is essential that the final decisions reflect the true needs and potential of our community, and we remain committed to ensuring that the voices of our members and stakeholders are heard throughout this process.

We appreciate the significant amount of work that Metro has put into the Urban Growth Report, but we believe that adjustments are necessary to reflect the true needs of our region. We urge the Metro Council to take these concerns into account and to revise the UGR accordingly. The Washington County Chamber of Commerce stands ready to collaborate with Metro and other stakeholders to ensure that our region's growth is sustainable, equitable, and prosperous.

Thank you for your consideration.

Sincerely,

Subject: [External sender]Please Vote NO on the Sherwood Urban Growth request

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Dear METRO Council,

Say NO to the Sherwood request to expand the UGB. Although METRO has previously said YES to all city proposed UGB expansion requests, you should say NO to the Sherwood request. Please stick with your charter! From your website "...Portland area leaders saw an unfulfilled need to provide regionwide planning and coordination to manage growth, infrastructure and development issues that cross jurisdictional boundaries. They also saw a need to protect farms and forests from urbanization and to provide services that are regional in nature."

The Sherwood proposal uses inaccurate population growth data. Read and listen to your own Expert Analysis reports. The minimal population growth will come only from net migration. The state is also looking at alternative scenarios. Read the "Zero Migration" report from the Oregon Office of Economic Analysis at Report: Zero Migration, a Demographic Alternative Scenario | Oregon Office of Economic Analysis (oregoneconomicanalysis.com)

Job estimates - simply a Field of Dreams estimate, if you build it they will come. But, they will not come from out of state, they will come from other parts of Metro. Everyone hopes they will get a microprocessor factory, but another Amazon warehouse employing robots is more likely.

New Housing – politically correct position, but simply wrong. This will not drive housing prices down. Does anyone really believe that this growth will help solve the homeless problem?

Infrastructure – We are taxed enough already, please STOP! The proposed roadway improvements are not nearly enough to move the increased amount of traffic.

This UGB expansion is NOT needed, it is wanted. It is backed primarily by the city government and developers. Why they support this UGB expansion is unclear, but there are clues when you look at the list of Supporters provided by Sherwood in the proposal, and by this statement made by Mayor Rosener at the last MPAC meeting. He said something to the effect... "We have speculators who have bought up the land or have options on those lands, to do land assembly. There is some grease on the wheels there."

Please stop the sprawl and protect farms! Support infill. Support real estate re-development to address the housing. Support re-purposing of unused office space resulting from folks working from home.

Thank you for your consideration,

Jo and Alan Pearson

Subject: [External sender]Please REJECT Sherwood's UGB Growth Request

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To whom it may concern,

We strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. METRO needs to execute on one of their primary purposes, and stop unnecessary urban sprawl.

NOT NEEDED
In 2022 Metro projected Sherwood would grow by a scant 3% over the coming decades. The Sherwood School District has forecasted enrollment for the new high school will begin to DECLINE in 2027. Sherwood has enough vacant land to accommodate new housing and jobs for years to come, when planned and developed wisely.

Metro's research concluded there is enough industrial land inside the existing Regional UGB for another 20 years. Metro's research on Residential land shows most land brought into the UGB in the last 20 years remains undeveloped.

FALSE PREMISES
Taxes will increase. I testified and asked for a Taxpayer Impact Statement, yet none is available to my knowledge. Residents should understand how Sherwood and its residents will pay for the new roads, sidewalks, water and sewer, and not just an "agreement" to figure it out later. Yes, the developers will pay for a portion of the initial infrastructure, but WE will be left with more financial obligations to pay for the operating and maintenance costs, even though we do NOT need the new land to keep pace with growth in Sherwood.

Trust in Leadership is rapidly eroding. Statements like "Developers and speculators have already bought land or rights...", "Wheels have been greased...", and then the Washington County testimony supporting Sherwood and stating something like "WE encourage METRO to adopt the high population estimate so they could get more funding..." This is astounding, but sadly not surprising, behind the scenes behavior.

NOT WANTED
84% of the people in Sherwood who participated in an online poll in 2021 OPPOSED the UGB expansion. If you actually read the verbatims in the Sherwood proposal, there is little support for this expansion by the residents.

We stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely,

Alan and Jo Pearson

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

In reference to the above mentioned urban expansion I want to express my support for this planned expansion. There is an acute shortage of all types of developable land in the tri county area, but in particular Industrial property is lacking. AS a commercial real estate broker of 42 years focused in the Metro region but SW in particular, I have represented many of this submarkets largest employers. Lately I have seen a trend by some to relocate to other areas of the state, or out of state due to the lack of available land and/or facilities to house expansion. The housing shortage in the region is mentioned often in the press and is a focus of the state leadership, but the shortage of industrial land is more acute in our region is more acute, and in my opinion, more important. Our region cannot prosper without our industrial employers being retained and the shortage of industrial property in the metro region is causing out migration of these stalwarts of our business community.

Re: Letter of Support For Metro Council's 2024 UGB Decision For Inclusion of the Sherwood West Concept Plan Area.

Dear Councilors Peterson, Simpson, Lewis, Rosenthal, Gonzalez, Nolan, and Hwang:

Please accept this letter as our second and supplemental official Letter of Support on behalf of those Sherwood West property owners, whom we currently represent and have represented in the past from the beginning of the Sherwood West planning process nearly ten years ago, requesting that your December 5, 2024 final decision approve the City of Sherwood's "Ask" to expand the Metro UGB to include the entire Sherwood West 1,291-acre Planning Area into the current Metro UGB boundary.

We respectfully submit this testimony on behalf of our current and former mostly very long term generational Sherwood farm and community family clients, Elanna Schlichting, manager of the Schlichting Family Century Farm LLC (owners of approximately 38 acres), Nancy Perkins and Kevin Sabbe, Trustees of the Sabbe Family Trust (owners of approximately 32 acres), and the Glen T. Wetzel Family (owners of approximately 0.46 acres), all located in the North District, as well as the Mandel Farms, LLC (owner of approximately 57 acres) and Prodigal Son LLC. (owner of approximately 20 acres) both located in the West District, all of

which represents approximately 147 acres or nearly 12% of total land located within Sherwood West.

From years of experience representing a number of Oregon cities in various capacities and being intimately involved in comprehensive and concept plan since the 1970's and 1980's, and based on recent review of Metro's Draft July 2024 Urban Growth Report ("UGR"), please see the following executive summary of our written and oral testimony to both the City of Sherwood over the years, our initial April 2024 letter to you, and our review of the UGR in light of recent promising trends on the horizon of our lives and our communities, locally and nationally, which ultimately argue in favor of and support for your affirmative decision to expand the Metro UGB to include the entire Sherwood West Concept Plan:

1. The City of Sherwood and the Sherwood Community has worked very hard for many years with the help of Metro Council Staff and thousands of hours of City and County officials and staffs, with the valuable input of countless community volunteers and consultants from the entire collection of interested parties and local and state agencies and the many vital NGOs, all of which have provided important and essential input to shape and create the unique Sherwood West Vision for the future of all of its existing and future residents and businesses.

2. Sherwood West is the first time the City and Community and all players has systematically and comprehensively supported and created a visionary UGB expansion of this scope, which will provide the road map forward beyond our current lifetimes.

3. Sherwood West is the first expansion request to incorporate many of the middle housing (and thus more affordable housing) options of the continuing local and statewide Smart Growth legacy.

4. Sherwood West:
    a. Protects and enhances the viable farm and forest lands surrounding Sherwood.
    b. Protects and enhances the existing special natural resources of the Area that are so important and beloved throughout our community and county and state.
    c. Encourages distinct and diverse middle housing types, in livable and walkable neighborhoods close to commercial areas as built environments centered around those existing natural resources.
    d. Helps address Sherwood's local housing crisis and particularly its need for affordable housing to meet its changing demographics.
    e. Provides a much-improved Jobs/Housing Balance centered in the North District Employment Area that will help ensure that Sherwood West's vision is economically sustainable into the future.
    f. Which Balance is specifically planned to attract advanced manufacturing and high-tech support services that by purposefully reducing the need for direct "major highway access" and reducing the number of trips and miles between home and work will further enhance Sherwood's collective goal to be as "carbon neutral" as possible.
    g. Provides affordable opportunities to more small women owned and BIPOC businesses in the North District and the planned commercial areas.

5. In recent "Ask" cycles, as Sherwood continued to refine its Sherwood West Plan, other communities within the Metro UGB and especially in the South and West Metro Areas

have been given significant UGB expansions into urban reserve areas which were comprehensively planned and are being and will be comprehensively developed for many years into the future. Sherwood needs and respectfully requests that same opportunity.

6. Nationally, despite what we thankfully are seeing "in the rear-view window":
    a. Inflation appears to be under control and been reduced significantly year over year confirming the "soft landing" we all hoped for, and
    b. The Federal Reserve is this week signally that its next interest rate reduction will occur in September 2024, as the recovery continues to trend upward.
    c. All of which will encourage a return to sustainable growth in all sectors and with Sherwood's current housing crisis and need for more employment land provides the support for your December decision to expand the UGB to include all of Sherwood West.

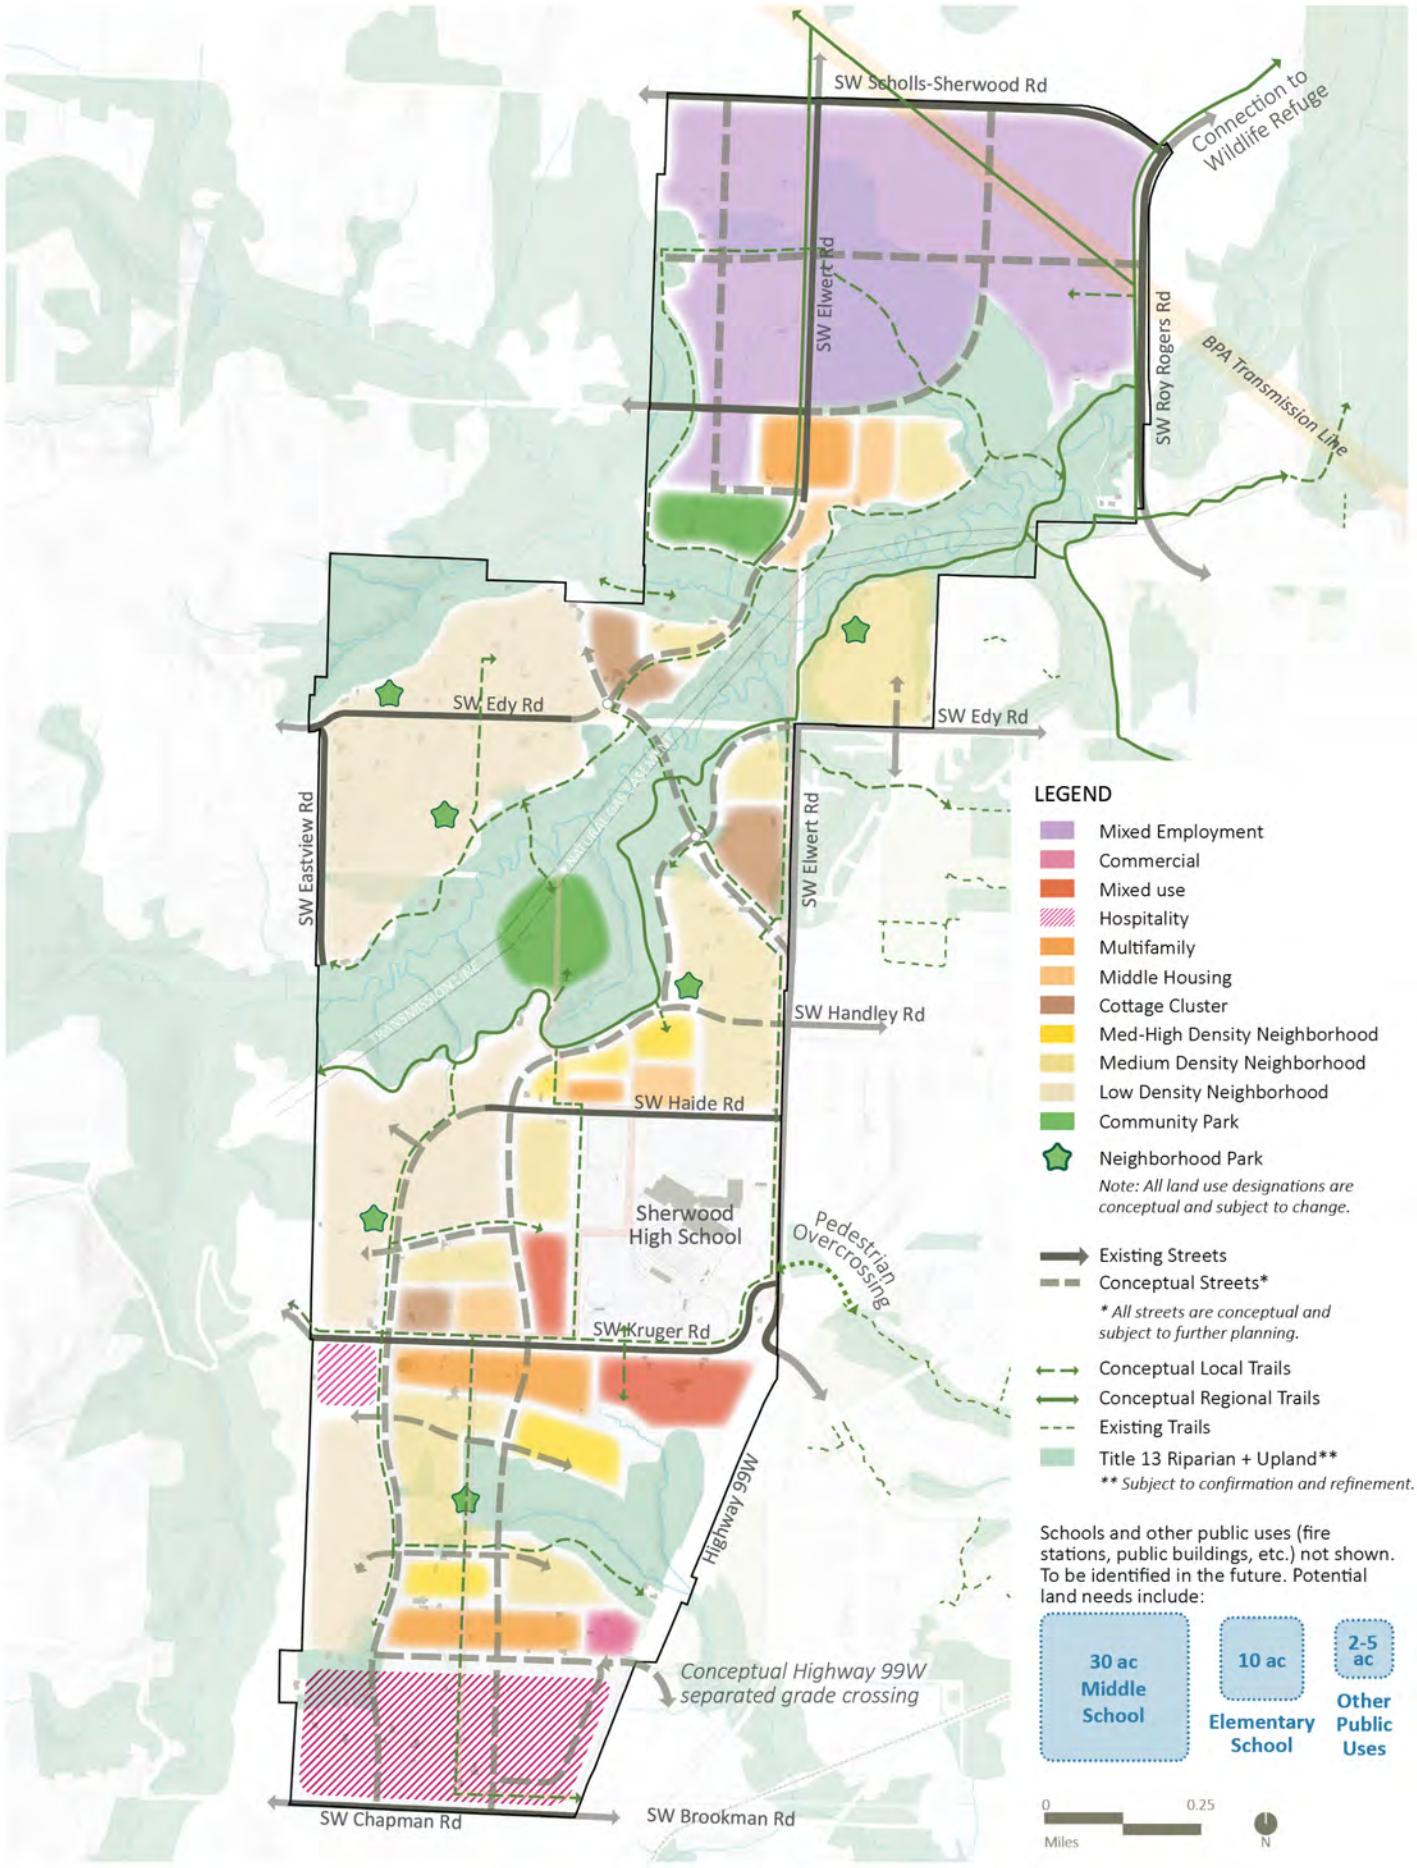
7. We continue to sincerely believe the best way to make certain a great Concept and Community Plan like Sherwood West truly succeeds is to make certain the entire Plan is fully implemented for the reasons given in our April 4, 2024 Letter of Support, including but not limited to:
    a. We need only look at the decades old and recent successful UGB expansions from Villebois in Wilsonville to River Terrace in Tigard and others in Hillsboro in West and Southwest Metro;
    b. Piecemeal or phased expansions always result in anomalies and subtle and not-so-subtle resulting amendments that blur a city's vision and frustrate the intended balancing of the complex inter-relationships of planning efforts and the natural and built environments; and
    c. The City and Community can then work on an "economies of scale" basis with all potential developers and affected agencies to ensure the City's Strategic Funding Program works most efficiently and effectively to realize the vision.

8. Sherwood has created a viable Sherwood West Final Infrastructure Strategy which will work to phase development and enhancement of the built and natural resources environments.

9. Significant interest in Sherwood West from quality members of the development community, both locally and nationally, has been generated, particularly in the industrial employment lands designated in the North Area in the last year, resulting our receipt of a purchase offer from a serious and respected national development company who has been active in the Portland Metro Area and Pacific Northwest for many years.

Again, thank you for the opportunity to present this final letter of support on behalf of all of us who live and/or work in the Sherwood and in the Sherwood West Planning Area.

We continue to look forward to your decision to expand Sherwood's UGB to include the entire Sherwood West Planning Area and give the City the ability to create and implement Sherwood West as a great addition to the City and the Sherwood Community as well as to the greater Portland Metro Area.



Finally, a profound thanks to you all and your staff's help and support of the City's long-term efforts to create the Sherwood West Plan.

Very truly yours,

John A. Rankin

Re: Draft Urban Growth Report

President Peterson and Councilors:

My name is Kelly Ritz, President of Venture Properties, Inc. and our associated home building company, Stone Bridge Homes NW, LLC. In 2015, we began development of the Mandel Farms subdivision, an 86-lot detached home community at Edy and Elwert Roads in Sherwood. We closed on our last home in October 2019. It was a successful project for us, and we are very appreciative of the support we received from the Sherwood community and city staff.

Shortly after starting Mandel Farms, we began working with City Planning staff and several property owners in the Sherwood West area to advocate for a potential urban growth boundary expansion for all or a portion of Sherwood West. Much study and discussion has taken place in the years since, culminating in an extensive two-year planning process and adoption of the Sherwood West Concept Plan in 2023. This led to a request to Metro later that year to expand the Urban Growth Boundary to include 1,300 acres within Sherwood West.

A key part of Metro's review of this request includes the recently completed draft Urban Growth Report. This report concludes that under baseline population forecasts, "approximately 150,000 additional homes are needed to meet expected population growth over the next 20 years," and to meet this demand, "we must continue to focus on public investment and removing barriers to housing production." Land to accommodate this growth will need to come from a variety of current, redevelopment, and urban expansion sources. Sherwood's UGB expansion request, created from strong community support, offers a thoughtful blueprint for a diversified residential-industrial-employment planned community. We believe that their plan has the best chance of supplying a mix of single-family, middle housing, and multi-family options for all age ranges now and into the future.

My companies and I wholeheartedly endorse your acceptance of the Urban Growth Report and recommend your continued review and approval of the Sherwood West Urban Growth Boundary expansion.

Thank you for your consideration of our testimony.

Sincerely,

Kelly Ritz, President
Venture Properties, Inc.

ABOUT SHERWOOD ECONOMIC DEVELOPMENT: Sherwood offers many strategic advantages for business investment and economic development. Conveniently located in the southwest/I-5 Corridor of Greater Portland's Silicon Forest. Rated the 2nd safest city in Oregon, Sherwood also boasts a highly skilled workforce, outstanding schools, and strong community spirit. Sherwood enjoys easy access to I-5, I-205, Highway 99W and the Portland International Airport. Sherwood has a pro-business city government and encourages a wide range of businesses to locate and grow here, from startup entrepreneurs to Main Street businesses, to high technology advanced manufacturing. Sherwood boasts an engaged and collaborative city staff. We are actively creating new locations to serve our growing business community. We invite you to explore business growth opportunities in Sherwood.

To: Metro 2040
Subject: [External sender]2024 Draft UGR Comment

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Hello,

The 2024 UGR has implications for local government planning processes as Metro's subsequent distributed forecasts inform local Housing Capacity Analyses, Economic Opportunities Analyses, and Regional Transportation Plan modeling.

The City of Hillsboro recommends Metro rely on a high population growth forecast to allow our region to be nimbler in addressing current and future housing and employment needs.

The 2024 Draft UGR demand scenario 4 involves faster household growth in 2044 coming from increased in-migration of younger households, consistent with historic migration dynamics, who typically seeking multifamily and middle housing. Though younger households who migrate to the region by 2030, 2035, and 2040 may initially prefer multifamily or middle housing, many will continue to demand single-unit detached for their growing household size and other reasons. The City of Hillsboro recommends Metro add a new UGR demand scenario 5 that involves faster household growth coming from increased in-migration of younger households, consistent with historic migration dynamics, but with a larger percentage of single-unit detached to meet the demand during the next 20 years.

Though the Draft UGR shows the region as having sufficient total industrial capacity, much of the industrial land supply consists of smaller parcels with an average lot size of 3.8 acres and a median lot size of 1.7 acres. The Draft UGR mentions there are only eight sites over 50 buildable acres inside the UGB that are available to the general industrial market. The final 2024 UGR should highlight the lack of sufficient large-lot industrial sites 25 plus acres in size available to the general industrial market. The final 2024 UGR should also highlight that less than 6% of the taxlots available to the general industrial market are medium-sized sites between 10 and 25 acres.

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To whom it may concern,

I am writing in support of the Sherwood West Expansion Plan. Here is a link to the rationale for my support. It is my opinion that this is a very good plan for the appropriate expansion of west Sherwood and fits with the logical development surrounding the Sherwood High School and other areas.

Sincerely,

Terrel Smith
Retired teacher-Sherwood High School
[redacted]

Request that the Metro Council:

- **Approve the Sherwood West Concept Plan as proposed by the Sherwood community. Changes to the plan threaten community support.**
- Add 340 net acres of residential land to the UGB as proposed in the Sherwood West Concept Plan.
- Add 130 net acres of flex industrial land to the UGB as proposed in the Sherwood West Concept Plan.
- Add 135 net acres of commercial and hospitality land to the UGB as proposed in the Sherwood West Concept Plan.

Background Information:

Urban Reserve designation

- Sherwood West is proposed within an Urban Reserve. Urban Reserves are lands suitable for accommodating urban development over the next 50 years.
- Land that is considered most important for commercial agriculture and forestry use is in rural reserves and not eligible for urban expansion.
- City has clearly answered question of readiness and has prepared for adding Sherwood West to the UGB.

Regional Growth Projections

- Our region is growing and is expected to add an average of 15,000 new residents per year through 2044.
- Sherwood is preparing for its share of growth through the Sherwood West Concept Plan.
- The Sherwood School District supports the Sherwood West proposal. The School District Board of Directors and the Superintendent have expressed strong support for the plan.
- Our region will add approximately 315,000 new residents and 137,000 new jobs over the next 20 years under a baseline growth scenario.

Community Engagement

- Since 2021, the City has held over 30 public meetings on Sherwood West. The public engagement process was highly publicized, thorough and inclusive. The Sherwood West vision was developed by the Sherwood community.
- The diverse range of residents and stakeholders were represented on the Community Advisory Committee and Technical Advisory Committee.

- The Sherwood West Concept Plan has strong local support including unanimous approval from the Sherwood Planning Commission, Sherwood City Council, and Washington County Board of Commissioners.

Housing

- Sherwood and the Portland region are experiencing a housing crisis. The severe shortage of housing has increased prices and reduced affordability for all. Between 2017 and 2022, the Portland region experienced a 50.4% increase in homelessness.
- The Sherwood West Concept Plan will provide a minimum of 3,100 new units including mid-rise apartments, missing middle housing, and single-family detached residences. A minimum of 43% of new housing will be middle and multi-family housing.
- The plan proposes innovative zoning types including cottage cluster only and middle housing only zones will provide opportunities for first time home buyers and empty nesters to stay within or relocate to our region.
- Sherwood West proposes between 43% - 68% middle and multi-family housing. The range depends on how much middle housing is constructed in certain zones.

North District Employment Land

- The Sherwood West employment land provides opportunities for equitable economic growth.
- Employment land is not just about a simple supply and demand analysis. Economic development requires a land supply that enables specific industries to thrive.
- The average industrial parcel size in the metro region is 1.7-acres. Our region is facing an industrial land supply crisis similar to the housing crisis. Small BIPOC and women owned businesses are most vulnerable to rising business costs.
- The industrial vacancy rate in Washington County is 2.5% making business more expensive for key target industries. Small businesses are impacted the greatest by high industrial land costs and lease rates.
- Sherwood grew it's industrial and manufacturing base twice as fast than the region between 2017 and 2022.
- The Sherwood West site is competitive and will lead to new jobs for a growing part of the region.

Annexation and Development Phasing

- Sherwood is committed to thoughtful planning and careful growth over time.
- Approval of the UGB expansion does not immediately bring the land into the City of Sherwood. The land remains part of unincorporated Washington County until formally annexed into the City of Sherwood.
- Growth is expected to occur first at key nodes with access to infrastructure like near the new Sherwood High School.

- The Concept Plan includes a Preliminary Infrastructure Funding Strategy that describes how new infrastructure will be funded. Where current SDC rates do not cover the cost of infrastructure, a broad range of funding tools will be considered.

RE: Draft 2024 Urban Growth Report

Dear President Peterson and Metro Councilors:

Thank you for the opportunity to comment on the Draft 2024 Urban Growth Report (2024 UGR) and Sherwood West urban growth boundary (UGB) expansion proposal. We recognize that completing this report during these times of uncertainty is extremely challenging. The report acknowledges that while there may be slower projected population and employment growth, the on-going housing availability crisis and continual need for large-lot employment land are factors that should not be minimized.

First, we urge the Metro Council to select the **high growth rate for both population and employment**. Planning for high growth will give jurisdictions the latitude not only to attract more investment opportunities in the region, but also to appropriately balance housing needs, land use, economic development, and transportation planning. Assuming low or baseline growth rates may result in unintended, adverse effects, by constraining local jurisdictions' ability to respond in real time to address population, employment, and housing requirements. It is also critical that findings within the 2024 UGR support necessary UGB expansion without forcing the removal of land from other locations.

As part of the Oregon Housing Needs Analysis (OHNA), the State will assign specific housing targets to individual jurisdictions beginning in 2025. This new paradigm for housing accountability necessitates consideration of the specific land need within individual jurisdictions rather than a singular focus on regional land supply. Selecting the high growth rate for both population and employment will create the best opportunity to meet the coming state-mandated housing targets and will allow the region to be more responsive and proactive in attracting potential new employers.

Second, we have concerns with **Metro's methodology that asserts that we have a surplus of industrial lands (nearly 6,000 acres) available inside the UGB to serve our region's need over the next 20 years**. We appreciate the supplemental industrial lands analysis, based on site criteria, that was developed as a part of the City of Sherwood's expansion request. However, **we believe**

that Metro's methodology for determining industrial "buildable lands" is flawed because it does not consider key site criteria factors in developing the Buildable Lands Inventory.

The 2024 UGR cites that of those 6,000 surplus acres, the average industrial parcel size is 3.8 acres, with a median industrial parcel size of 1.7 acres. Market factors indicate that firms seek parcels that are a minimum of 5 acres and are developable in 7 to 30 months or less. It is also clear that there is demand for large-lot industrial sites of 20, 50 and 100 acres in Clackamas County, and Metro's current method of evaluating industrial land supply fails to address this demand. In short, the lands that Metro is considering developable are not sufficient to meet the market need.

Clackamas County continually faces the challenges of not having an inventory of available and suitable employment land to support industry and employment for our workforce. While we know that the 2024 UGR decision is only one of many factors that influences the development of land, it is essential that this decision is made in a way to best support growth in all of our communities.

Finally, the comment period for the 2024 UGR was not sufficiently long to allow a robust discussion of these important issues. In the future, we urge Metro to provide a 90-day comment period between release of the draft UGR and issuance of the Metro Chief Operating Officer's recommendation to the Metro Council. It is imperative that local jurisdictions be given an adequate opportunity to weigh in on the UGR at an early point in the process. That said, we are looking forward to future opportunities to communicate with the Council before the Urban Growth Management Decision is made later this year.

In closing, the Urban Growth Management Decision process is driven by legal obligations that do not always translate into market reality. Discussions about the future can begin with questions on whether the region has the right amount of land to support housing and job growth, but they must not end with a simple yes or no answer. We are supportive of Metro Staff's recent proposal to update the 2040 plan and look forward to the opportunity to develop a better approach to planning for a bright future for our region.

Sincerely,

Clackamas County Board of Commissioners

Tootie Smith, Chair

Commissioner Paul Savas

Commissioner Martha Schrader

Commissioner Mark Shull

Commissioner Ben West

CAUTION: This email originated from an External source. Do not open links or attachments unless you know the content is safe.

>> I am writing to express my concerns regarding the Draft Urban Growth
>> Report and the City of Sherwood's proposed Sherwood West Concept.

>> First, the Draft fails to incorporate or thoroughly analyze the
>> figures upon which the Concept is based. Instead, it seems to merely
>> assess the City's "readiness" for expansion. While the City may
>> perceive itself as prepared to expand, the more important question is whether it should expand.
>> In my opinion, the answer is no. The proposed expansion is
>> unwarranted, as Sherwood has likely already reached its peak in terms
>> of the population that should or will move into the area.

>> For instance, the new high school was justified on the basis of
>> expected population growth, yet it has not come close to meeting the
>> attendance figures used to pass the Bond measure. We must be cautious
>> and not rely on the self-serving numbers the City provides when
>> making decisions about the Sherwood West Concept.

>> Furthermore, farmland is vital and irreplaceable. It is a key part of
>> the character of our city. Sherwood has already converted enough
>> farmland into developed areas. The thought of adding light industrial
>> buildings or more housing on the west side of our beautiful city is
>> unnecessary now and in the future. The residents of Sherwood have
>> been clear in their opposition to further expansion. Even METRO's
>> data shows that Sherwood's population is expected to increase by less
>> than 1,000 people over the next 20 years. Let's preserve the beauty that surrounds our city.

>> Thank you for your time and attention to these concerns.

RE: Urban Growth Report, Draft 2024

Dear Council Members,

I am writing to provide comment on the Draft Urban Growth Report pertaining to the City of Sherwood's proposed Sherwood West Concept.

In reviewing the proposed draft report, I find the city of Sherwood's proposal to increase the city by 41% to be lacking in reliable data and concrete reasoning for such an expansion.

The west side of the city is already an area of congestion and outdated infrastructure. To add additional homes, light industrial buildings and traffic would severely impact the area, while requiring the loss of valuable, irreplaceable agricultural land and open space.

The impact on taxpayers for additional bond measures to then pay for roads, utilities, increased police and fire department services would also be a significant burden for a project that has shown no overall benefit to improving the quality of life for the residents of the community.

The layoffs currently occurring with Intel and other businesses in Washington County should be a cause for a cautious and well reasoned approach to solving a problem that does not exist for this area.

Thank you for your time in reviewing my correspondence.

Sincerely,
Michelle Standridge

Dear Metro Council,

Good evening and thank you for your time. I am writing this letter in support of the Sherwood West Concept Plan as proposed and supported by the Sherwood community and Sherwood City Council.

"New" and "fresh" are two words that come to mind in regards to this comprehensive plan. New strides and fresh faces. New ideas and fresh goals. New directions and fresh opportunities. This plan offers practical, thoughtful and forward movement; with a sustainable core based on values for healthy growth, preserving open spaces and upholding the strengths and benefits inherent in Sherwood.

Three key factors of the Sherwood West Concept Plan that in my opinion highlight its vital role:
1. Positive employment growth trends at 18% from 2017-2022.
2. Promoting a steady and robust economic growth and resdiential housing.
3. "2024 ECOnorthwest analysis North District Mixed Employment Area (MEA) of Sherwood West Concept Plan has site characteristics that make the land better suited to accomodate the industries that are growing and expanding in the Portland Metro area."

Sherwood must grow and evolve in a balanced way and I feel that the Sherwood West Concept Plan as proposed is that backbone.

Best Regards,

Metro Urban Growth Management Team
600 NE Grand Ave.
Portland, OR 97232

RE: Draft 2024 Urban Growth Report

Dear Metro Urban Growth Management Team,

Thank you for the opportunity to review and provide comments on the Draft 2024 Urban Growth Report (UGR). This memo summarizes technical comments from Washington County Land Use & Transportation staff.

We appreciate the work Metro has done for the region's livability in managing the Urban Growth Boundary (UGB) in a way that balances the need to protect rural land uses and provide an adequate supply of land that has a high likelihood of successfully developing into places to live, work, visit, and play. Staff appreciate the opportunity to participate in the process through the Land Use Technical Advisory Group (LUTAG), Metro Technical Advisory Committee (MTAC), the Transportation Policy Advisory Committee (TPAC) and the economic development forum. We also appreciate the time that Metro staff have spent sharing their work with us and other partners through various committees and organizations throughout the process.

Since the origin of the Metro Urban Boundary, jurisdictions in Washington County have shown their ability to plan for expansions of the UGB areas in a way that creates desirable communities. We respectfully request that Metro correct the number of housing units built in North Bethany since the UGB expansion in 2002. The Draft UGR reports that only 573 units have been built, but the actual number is closer to 4,000. This is an important detail because it shows the success of building communities within UGB expansion areas over the last twenty years.

The primary concerns of Washington County staff are how the technical tools have been applied to evaluate the most likely development potential and demand scenarios. These concerns have been raised by the County and other partners throughout the review process. Two examples follow:

- The scenarios that Metro prepared along with the three growth forecasts assigned a demand share for single- and multi-family units. The high growth projection was paired along with the high demand for multi-family product scenario, and we did not see results of the high growth forecast modeled with high demand for single-family product or an even split. We believe that it is important to ensure adequate land for a

Department of Land Use & Transportation
[redacted] Hillsboro, OR 97124-3072
Phone [redacted]
www.washingtoncountyor.gov

variety of housing types. Past trends have shown that much growth (both single and multi-family) is happening outside of town centers, reflecting market realities from both a supply and demand perspective. Supporting and incentivizing growth in our town center areas is a part of the solution to our housing crisis but so are carefully planned UGB expansions and infill development all around the region. The limited scenarios shared in the draft UGR did not prepare us to evaluate the effects of these options.

- For employment/industrial needs, the evaluation of industrial land supply needs to account for the available size of properties and the flat topography needed by modern large-scale industrial development. While land with slopes between 5% and 25% has been successfully developed into new residential areas, and to some extent new commercial areas, the parts of the region's industrial land supply that are this topographically challenging are unlikely to be financially viable. Flatter industrial land is a prerequisite to future growth in industrial employment. Metro should update the calculations of available employment/industrial land to remove steep slopes.

County staff worked closely with Sherwood staff as they prepared the Sherwood West Concept Plan and we support their technical work and the process that they have gone through. Again, we appreciate the collaborative spirit with which Metro staff approached this Urban Growth Report and look forward to our continued work together.

Sincerely,

Erin Wardell

Portland, OR 97232

RE: Draft 2024 Urban Growth Report

Dear Chair Peterson and Metro Councilors,

Thank you for the opportunity to comment on the draft Urban Growth Report (UGR) and Sherwood West urban growth boundary (UGB) expansion proposal. The 2024 growth management decision is the blueprint for how Metro Council will lead the region in planning for future housing development and employment opportunities. We appreciate that these decisions are challenging and acknowledge there are trade-offs that must be carefully considered in this decision process.

Our Board strongly supports the City of Sherwood's application for expansion of the urban growth boundary to include the 1,291 acres within the Sherwood West urban reserve area. The city has demonstrated their readiness to serve the area with governance and infrastructure as required by Metro's Urban Growth Management Functional Plan. The City's plan envisions that up to 5,582 housing units and 4,524 jobs could be accommodated in the expansion area. As we are all grappling with ways to produce more housing in the region and across the state, adding this land to our regional urban growth boundary makes sense. In addition, Sherwood has shown that the proposed Sherwood West employment area has the site suitability characteristics to attract more of the types of industry that Sherwood has successfully recruited to the city in recent years. Even though this is a regional urban growth boundary expansion decision using regional analysis, place matters in this consideration. Sherwood has demonstrated that they are a place where people want to both work and live.

We also encourage Metro Council to strongly consider selecting the high growth rate for both population and employment. The selected growth rates guide regional policy and funding decisions around housing, employment land and supporting infrastructure. Choosing low growth rates could artificially constrain our ability to plan for or make decisions to support the development of badly needed housing of all types, or further constrain opportunities to grow our region's traded-sector employment, which provides living wage jobs for thousands of our community members.

Board of County Commissioners

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

When analyzing the expansion of the Portland UGB, you propose to maintain such a tight land supply that single family homes would only account for 23% of new housing. The rest of the units would be apartments of other forms of high-density living.

I believe 75% of people aspire to live in single family homes. Therefore, I am adamantly opposed to limiting single family homes to anything under 50%.

I am in favor of Sherwood's application to expand their UGB and sincerely hope they will be able to do so without this ugly single family home restriction.

Dear Gerritt,

My name is Gwen Werger and my parents have owned a 10 acre parcel of land on Elwert Road since 1981. My sisters and I are now managing the trust that holds this property. I am writing in **support of the Urban Growth Boundary expansion request for Sherwood West.**

When my parents first purchased this acreage in 1981, the land west of 99W was mainly farms. Now there are several subdivisions east of Elwert Rd. as well as the newest Elementary School. As of 2021, Sherwood High School, the largest high school in Oregon, as well as a $247 million dollar investment by the community, was built on Haide Rd, which is directly west of Elwert Rd.

The amount of traffic on Elwert Rd resulting from the new High School as well as commuters to Roy Rogers Rd and beyond makes this area much more difficult to operate as farmland. The proposed 1,291 acres to be included into the UGB is now more suitable for additional housing and light industrial than it is farmland.

By including the 1,291 acres of Sherwood West into the UGB, this would provide land for affordable homes as well as parks and green space near the schools. Additional housing will increase the tax base as well as provide increased enrollment for the school district.

Adding Sherwood West into the UGB, will also provide Sherwood with land needed for additional economic opportunities. The city of Sherwood has a plan to expand job growth in the area and with that comes the need for affordable housing.

Sherwood does not want another missed opportunity to be included in the UGB like they had in 2018. Being forced to wait another six years for the opportunity to be included in the Metro UGB would be devastating for this wonderful community.

Thank you for your interest and consideration in this important issue. We are hoping Metro will vote in favor of the Sherwood West expansion request.

Sincerely,

Gwen Werger

Marissa Madrigal, COO
Metro
600 NE Grand Avenue
Portland OR 97232

August 22, 2024

Dear COO Madrigal,

First, I want to thank you for convening the year-long Urban Growth Report Stakeholder table. It created an opportunity to better understand the work done by Metro staff preparing the report, while also hearing from partner organizations about concerns and challenges. While I do think it helped build goodwill among regional partners who often feel frustrated by the process, it did also lay bare some of the places where there may be an opportunity for improvements.

Beyond this Growth Management Decision, Westside Economic Alliance looks forward to continued partnership with Metro Council and staff to identify those opportunities for improving the input, process and subsequent outcomes for our region.

POPULATION & HIGH GROWTH PROJECTIONS

Turning to the 2024 Urban Growth Report, it's important that we begin with the population estimates on which so much of this report rests. The early conclusion is that regional growth is slowing because Oregon's birth rates are among the nation's lowest. Given this data point, the report correctly concludes that net in-migration will be the primary driver of regional population growth. The report goes on to state, "Slowing population growth also mean slower job growth."

What the report fails to state clearly is that if net in-migration will be the primary source of regional population growth then our region's, and our state's, housing and economic future will be overly dependent on smart policy decisions that encourage growth.

It is to that end that Westside Economic Alliance highly encourages COO Madrigal, and subsequently the Metro Council, to adopt high growth population forecasts for our region. It is far better to plan for growth and not see it realized than it is to plan for decline and risk the underproduction of housing and jobs, adding pressure that results in another housing crisis or economic stagnation.

Just as we are seeing an out-migration of a certain segment of our population due to their concerns about public policy choices, we could create in-migration through the adoption of a different set of policy choices.

Adopting the high-growth population forecast will give Metro and the local jurisdictions more flexibility to meet our communities' needs and should be viewed as a prudent public policy decision.

EMPLOYMENT LANDS

According to the Urban Growth Report, Metro staff have forecasted a surplus of Industrial land supply with a current capacity of 5,950 acres and a 20-year projection of a surplus of between 450 and 7,450 acres. However, the report also highlights some of the realities on the ground that act as major detractors to the current capacity estimate: in particular slope and lot size.

Slope

Over the course of the Urban Growth Report roundtable, we heard from developers that Oregon Revised Statute applies the definition for "buildable land" for residential construction to commercial and industrial land. As such, we learned that slopes of up to 25% are considered legally "buildable" for the purposes of all employment land, yet commercial and industrial developers say they will not consider land buildable with more than a 7% slope grade. When challenged on this, staff identified 1,300 acres with a slope greater than 7% that were counted within the buildable land inventory. **We recommend COO Madrigal and the Metro Council amend the Employment Land forecast to reflect this reality**.

Lot Size

An additional concern with the gross figure of 6,000 acres of 'surplus' industrial land is lot size. According to the Urban Growth Report the average lot size is 3.8 acres with a median lot size of 1.7 acres.

According to the data of the currently vacant industrial land, here is the breakdown of available vacant lots by acreage:

- 545 lots are less than 1 acre = 148 acres
- 97 lots are 1-1.99 acres = 142 acres
- 72 lots are 2-2.99 acres = 178 acres
- 49 lots are 3 – 3.99 acres = 167 acres

- 27 lots are 4 – 4.99 acres = 127 acres
- 22 lots are 5 – 5.99 acres = 125 acres
- 10 lots are 6 – 6.99 acres = 63.5 acres
- 13 lots are 7 – 7.99 acres = 96 acres
- 11 lots are 8 – 8.99 acres = 101 acres
- 6 lots are 9 – 9.99 acres = 66 acres
- 22 lots are 10 – 14.99 acres = 271 acres
- 12 lots are 15 – 19.99 acres = 219.5 acres
- 4 lots are 20 – 24.99 acres = 164 acres
- 6 lots are 25 – 29.99 = 107 acres
- 12 lots are 30 acres or more = 594 acres

Given the overabundance of small sites and the fact that the current vacancy rate for industrial land is below 5 percent across the region, the reality is that the vast majority of this acreage could not be used to serve the industrial market.

We recommend that COO Madrigal and the Metro Council direct staff to work with industrial developers to identify a minimum lot size that is realistic for effective industrial development. Any lots below that lot size should be removed from the overall land supply calculation.

As mentioned in the draft Urban Growth Report, the data and analysis of industrial land supply is not the only information that the Council may consider when determining whether there is a need to expand the Urban Growth Boundary. They may also consider whether there is a regional need for industrial sites with specific site characteristics such as larger sized sites.

The Oregon Semiconductor Task Force recommended that in order to be competitive over the next 5-10 growth cycle, the state needed to identify the following development ready sites:

- Two (2) sites of 500+ acres for advanced R&D or production fabrication operations
- Four (4) sites of 50-100 acres for device manufacturers or equipment manufacturers
- Eight (8) sites of 15-35 acres for key suppliers to the ecosystem

And while this site list is a statewide recommendation, we know that industries will often create clusters. Indeed, in EcoNW's report (Appendix 9) they note:

> The Metro Region already has a strong cluster for semiconductors in Hillsboro with Intel's Gordon Moore Park at Ronler Acres Research Campus, which creates 1,000 patents a year. This existing strength in semiconductor manufacturing can position the region to capture other semiconductor activities, and semiconductors are half of the state's annual exports. The semiconductor boom in the 1990s was

precipitated by the state having 2000 acres of industrial land, which led to billions of dollars of investment and doubling the industrial employee count.

To prepare for the next influx of semiconductor activity, the region will need to have a supply of industrial land to support business growth and expansion. The Semiconductor Task Force's Industrial Lands Subcommittee found that the key site characteristics that the semiconductor prefers is a location near other semiconductor businesses and labor, parcels of at least 25 acres, and sites that have infrastructure in place to support development that can begin within 6 months to three years. The subcommittee identified a lack of land that met these criteria.

And, as noted on pages 55-56 of the Urban Growth Report:

[T]he Metro Council established the following policy in the Regional Framework Plan:

'1.4.6 Consistent with policies promoting a compact urban form, ensure that the region maintains a sufficient supply of tracts 50 acres and larger to meet demand by traded-sector industries for large sites and protect those sites from conversion to non-industrial uses.'

Since the 2017 update of the Regional Industrial Site Readiness inventory of large industrial sites, 15 large industrial sites have developed. Six of the sites that developed are over 50 acres in size. There are ten remaining sites over 50 acres inside the UGB. Of those, two sites have marine or airport use restrictions, leaving eight sites over 50 buildable acres inside the UGB that are available to the general industrial market.

And so, the Semiconductor Task Force, the EcoNW Report and Metro's own policy recommends additional land of at least 25 acres with a push to identify 'sufficient supply of tracts 50 acres or larger' to meet the industrial needs of the region. And yet the overwhelming majority of vacant industrial land is LESS THAN 25 acres. There is an imbalance in acreage lot size availability and without a recommendation to discount acreage too small for real industrial development, Metro Council could stagnate the region's ability to leverage generational federal and state investment potential.

SUPERSITING AUTHORITY

Per the passage of Senate Bill 4, Oregon's CHIPs Bill, Governor Kotek maintains super-siting authority through the end of 2024. Should the Governor choose to use this authority, we urge Metro Council to see this as an additive, rather than as a replacement for, an Employment Land expansion in the Growth Management Decision.

We urge Metro to consider the generational investments that may be lost should the Governor provide the extraordinary opportunity of a regional supersite for semiconductors but the region is unable to support that work due to a lack of available mid-size lots needed for a healthy cluster.

CITY OF SHERWOOD EXPANSION PROPOSAL

We enthusiastically and without reservation support the City of Sherwood's request for expansion without any conditions. While Metro may want to make recommendations or provide incentives to encourage certain kinds of growth, we trust the rigorous public engagement process that Sherwood has already conducted and trust that they will continue to engage their community to understand how to grow reasonably and responsibly.

Metro staff made clear during our roundtable convening that Metro is not a zoning organization. To that end, we ask Metro to allow the city to work with their residents in the coming years to decide what makes most sense for their community's needs. It is imperative that policymakers recognize that every jurisdiction in our region has their own unique community needs and that heavy handed policy making to try to make suburban areas mimic urban areas is unreasonable.

We encourage Metro to engage in the process, as other regional partners plan to do, to provide input about best practice and guidance for equitable outcomes. But beyond that, **COO Madrigal and the Metro Council should allow local jurisdictions to grow within their own boundaries in a way that best reflects the community they are working with their residents to create**.

To be clear we ask COO Madrigal, and subsequently the Metro Council to:

- Add 340 net acres of residential land to the UGB as proposed in the Sherwood West Concept Plan as proposed.
- Add 130 net acres of flex industrial land to the UGB as proposed in the Sherwood West Concept Plan as proposed.
- Add 135 net acres of commercial and hospitality land to the UGB as proposed in the Sherwood West Concept Plan as proposed.

CLOSING

Westside Economic Alliance wants to again appreciate the work of Metro staff who prepared this cycle's Urban Growth Report. It is a massive undertaking, and this year another layer of public engagement was added via the Urban Growth Roundtable that took a significant amount of staff time.

To close, Westside Economic Alliance on behalf of our members, ask **COO Madrigal and the Metro Council to lean into a Growth Management Decision that is aspirational**. Throughout the region we are hearing alarm bells going off that our growth in the coming

decades will be reliant on in-migration. In-migration can be super charged through smart policy choices. Job growth can be ramped up through smart policy choices. Land readiness can be increased through smart policy choices and investments.

Adopting a high growth population scenario is the first step to unlocking the potential for smart regional policy and investments that will help our region's employers and local jurisdictions realize economic growth and prosperity.

Thank you for your time and commitment to the growth of our region.

Sincerely,

Elizabeth Mazzara Myers, Executive Director

RE: Support from Oregon Business & Industry for Sherwood West Concept Plan as proposed

Dear Metro Council,

I am writing to express Oregon Business & Industry's strong support for the Sherwood West Concept Plan as proposed. The plan would add badly needed land for housing, industrial and commercial use to Sherwood's urban growth boundary.

Oregon Business & Industry (OBI) is a statewide association representing businesses from a wide variety of industries from all of Oregon's 36 counties. In addition to being the statewide chamber of commerce, OBI is the state affiliate for the National Association of Manufacturers (our Manufacturing Council of Oregon) and the National Retail Federation. Our 1,600+ member companies, more than 80% of which are small businesses, employ more than 250,000 Oregonians. OBI's primary mission is to strengthen the business climate in Oregon.

Oregon relies upon its businesses to provide jobs for Oregonians, tax revenue for government services and many of the other benefits required by vibrant and prosperous communities. Employers need the right conditions to generate jobs and prosperity, however. These conditions include available and affordable land for growth and for housing. Denied adequate land for growth, businesses will invest elsewhere, and the jobs, revenue and other benefits they provide will follow. Unable to find housing they can afford, potential employees will do likewise.

I and my colleagues at OBI talk regularly with our members about impediments to growth and success in Oregon. Almost without exception, they cite a lack of available and ready land for expansion as well as the state's exceptionally high housing costs. The high price of housing in Oregon is in large part a function of the limited availability of buildable land.

The shortage of land routinely costs Oregon jobs and revenue. Earlier this month, the U.S. Department of Energy announced that it would lend Lebanon-based Entek $1.2 billion to finance a factory in Indiana that is expected to generate more than 600 jobs when it opens in 2027. Entek President Kim Medford cited the availability of land in Indiana as one reason for the decision to expand outside of Oregon.

The Sherwood West Concept Plan addresses this widespread problem in the local community. It is the product of a thorough, two-year public process and enjoys the support of the community. I urge you to approve the plan as proposed, which calls for the addition of 340 acres of residential land to the UGB as well as 130 acres of flex industrial land and 135 acres of commercial and hospitality land. The Sherwood community has not been consulted about the proposed conditions of approval, and pursuing them could well erode public support.

The Sherwood West Concept Plan as proposed enjoys the support of the community and Sherwood City Council. It would add badly needed industrial and residential land and, by doing so, improve Oregon's competitiveness. I urge you to adopt it as proposed.

Thank you for the opportunity to comment.

Sincerely,

Angela Wilhelms
President and CEO
Oregon Business & Industry

Date: Wednesday, June 28, 2023 7:04:50 PM

CAUTION: This email originated from an External source. Do not open links or attachments unless you know the content is safe.

Please do not expand the UGB anymore. I'm in Wilsonville watching with disappointment the big single family homes being built in Frog Pond West. These homes are not only unaffordable, they're not the high density we need to stop sprawl and address the climate impacts of our communities.

In Wilsonville, we have an empty large parcel, right downtown, that is ripe for high density redevelopment. Much of the city is low rise strip commercial development. We need to remove barriers and create incentives to foster affordable, high density, vibrant mixed use developments within our cities, not to expand the UGB.

Please hold the line.

Respectfully,

Dave W

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

This household is very much opposed to expanding the Urban Growth Boundary in Sherwood.

According to the Metro's research, there is plenty of industrial land inside the existing UGB for another 20 years. We also have enough vacant land to accommodate new housing and jobs for years if it is planned and developed carefully.

We really enjoy living in Sherwood. It's a beautiful community and would hate to see all the agriculture disappear when it's not necessary.

Please don't expand the UGB.

Thank you.

Kathy Gadinas

August 21, 2024

Lynn Peterson, Chair
Members of the Metro Council
Metro
600 NE Grand Ave.
Portland, OR 97232

Dear Chair Peterson and Members of the Metro Council,

The Sherwood Chamber of Commerce is a vibrant and active organization representing businesses in and around Sherwood with the primary goal of building a strong community. In that light, the Chamber especially appreciates the City of Sherwood's effort to create new business opportunities such as we currently see in the Tonquin Employment Area while also working to expand choices for people to live in Sherwood.

This same foresight is on display with the submittal to Metro of the Sherwood West concept plan, importantly funded in partnership with Metro. The thorough two-year planning process for both the Citizens Advisory Committee (CAC) and the Technical Advisory Committee (TAC) – which Metro representatives where a critical part of - has produced a concept plan that will realize a vision for housing and employment lands embraced by so many during this project.

We commend the work of CAC and TAC for creatively weaving the residential and business needs of current and future Sherwood residents into a unique plan that is created by and for our community. The 200-250 acres of potential employment lands contained in the plan makes a strong statement that the future viability of our community depends on a healthy mix of land uses that will encourage more businesses to locate in our great city while creating desirable communities for people employed by these new businesses to work and live in the city.

The Sherwood Chamber of Commerce supports the City's application and Metro's favorable consideration and adoption of the Sherwood West concept plan, moving forward with an Urban Growth Boundary (UGB) expansion. We appreciate the Metro Council partnering to help make Sherwood the best it can be for many years to come.

Sincerely,

Sherwood Chamber of Commerce

RE: 2024 Urban Growth Report

Dear President Peterson and Councilors:

NAIOP, the Commercial Real Estate Development Association, is one of the leading organizations for developers, investors, owners & operators, brokers, and related professionals in office, industrial and mixed-use real estate throughout the United States, Canada, and Mexico. The Oregon Chapter's members represent a broad and diverse range of companies involved with commercial real estate activities in the Portland metropolitan area, including developers, owners, brokers, and managers, along with other professionals providing legal, finance, title, engineering, architectural, construction, and other services.

Thank you for the opportunity to comment on the draft 2024 Urban Growth Report which is a crucial element in planning for the future of commercial development in the region. Our testimony will focus on two areas:

- Strong support for the boundary expansion proposed by the City of Sherwood which includes our unequivocal endorsement of the findings and conclusions presented by EcoNorthwest in its *Sherwood West UGB Assessment* document found in Appendix 9;
- Concerns with the UGR's estimates of supply and capacity of industrial land

I. Support for Sherwood West UGB Expansion Proposal/Endorsement of EcoNorthwest Findings and Conclusions

NAIOP Oregon member representatives have been involved in Sherwood's planning process for the Sherwood West area for more than two years, and we very much appreciate the extensive time and effort the City has devoted to careful development of a plan that will provide much needed additional land for employment and housing. The Sherwood West Concept Plan includes land for housing, schools and civic facilities, park space, and 265 net acres for employment uses that would support about 4,500 new jobs. We strongly endorse the findings of ECONorthwest that this area has regionally

unique characteristics that would be very attractive to industrial development, including 40-to-50-acre parcels, minimal site aggregation, slopes under 5 percent, and access to Interstate 5.

Our industrial market members have long been well aware of ECONorthwest's finding that, unlike in the office and retail markets, vacancy rates for the industrial sector in the region are below 5%. This is an extremely low number and, with continuing strong demand for this type of space, has spurred a more than 20% increase in industrial rents over the last five years. These two trend lines are even more pronounced within Washington County, where the vacancy rate dipped to 2.5% in 2023 and rents increased 23%.

As ECONorthwest found, "A diverse regional market supply of sites is essential to maintaining an equilibrium in market pricing and to supporting a broad range of industries." Without such a supply, the Portland metropolitan region will be unable to compete with other national markets and will be passed over by employers looking for new locations and expansion opportunities.

The Sherwood West area fulfills this need quite well with its unique set of features as listed above by the ECONorthwest analysis. Also, it should be noted that Sherwood West is within an acknowledged Urban Reserve that was designated 14 years ago after an intensive public process to identify and compare parcels most suitable for UGB expansion and future urbanization. Expansion of the UGB to include Sherwood West is a logical and appropriate next step to ensure that the region is able to satisfy regional industrial land needs for the next twenty years.

II. Concerns with the UGR's estimates of supply and capacity of industrial land

A. Slopes and Parcel Size. According to the UGR, there are currently 5,950 acres of buildable industrial land within the region. This number, however, seriously overstates the realistic development potential for these lands since it includes properties with slopes of up to 25%, which is much steeper than is acceptable for industrial uses (the 25% slope standard is derived from Oregon Administrative Rules specifically pertaining only to residential land). A more accurate approach would be to use the acreage for "unconstrained" parcels shown on Table 5 of Appendix 6 which deducts those areas where 10% or less of the taxlot is up to a 7% slope. This amounts to 2,839 acres, but is also problematic since the average parcel size is 1.05 acres, much smaller than is typically seen for industrial development.

According to data from CoStar, since 2018 there have been 137 industrial buildings constructed within the UGB and Clark County. As shown in the table below, those 137 buildings had 21,834,448 total square-feet of net rentable area, with a total land area of 1,678 acres.

New Industrial Construction 2018-24 Within Portland UGB and Clark County, Washington	
Total Building Net Rentable Area	21,834,448 sq. ft.
Total Land Area	1,678 acres
Average Building Size	159,376 sq. ft.
Median Building Size	105,986 sq. ft.
Average Land Area	12.25 acres
Median Land Area	8.44 acres

As can be seen from these numbers, the average and median land area size of 12.25 and 8.44 acres for industrial developments over the last six years is far larger than the 1.05 acre average lot size seen in Table 5 of Appendix 6 in the UGR. This disparity is further reinforced by data presented in ECONorthwest's Sherwood West UGB Assessment (Appendix 9 of the UGR) regarding the size of industrial buildings constructed. According to the report, "Between 2019 and 2023, 7 million square feet of industrial buildings (sized 100,000 square feet or larger) were developed in the region across 33 buildings. This indicates that 39 percent of the industrial buildings built between 2019 and 2023 equal or are greater to 100,000 square feet, which shows the trend towards new industrial companies needing larger spaces."[1]

We would urge the Council to direct staff to develop recommendations for further reductions in projected industrial land capacity after taking into consideration the steep slopes and the extremely small average taxlot size of the buildable industrial acreage.

B. Projected Infill Industrial Development. A further problem with the 5,950-acre total amount of buildable industrial land is that 3,252 acres (55%) are projected to come from infill development of sites that are already considered developed. Only 2,574 acres (43%) are actual vacant, undeveloped sites. The infill projection is very aggressive for such remnant parcels and begs the question of what the historical rate of industrial infill has been.

We urge the Council to direct staff to produce this information so that it can be compared with projections for the future.

Thank you for the opportunity to comment on the Urban Growth Report and we appreciate the outreach efforts of your staff to brief in responding to our questions. Please let us know if we can provide any additional information.

Sincerely,

Kelly Ross
Public Affairs Consultant

Urban growth management: COO/Staff Recommendations

MPAC
September 11, 2024

Project timeline

Technical work and analysis: Developing the urban growth report	City expansion proposals	Metro Council decision
• Buildable land inventory (BLI) • Regional forecast • Capacity analysis • Employment trends and site characteristics • Housing needs analysis • Residential readiness analyses • Draft urban growth report (UGR)	• Letters of interest • Expansion proposals *2040 planning and development grants available*	• Consider Metro staff and advisory group recommendations • Public hearings • Policy direction • Final decision

Engagement

- MTAC
- MPAC
- CORE
- Land Use Technical Advisory Group
- Jurisdictional outreach
- Urban growth report roundtable
- Youth cohort
- Interest group presentations

	July	August	September	October	November	December
Council	Discussion of draft Urban Growth Report *released July 9*	Public comment survey available until August 22 COO/Staff recommendation released August 26	**Public hearing** on COO/Staff recommendation	Council direction on intended decision	Council first reading; **public hearing**	**Council second reading; final decision**
MPAC			Discuss COO/Staff recommendation; *Recommendation to Council*			
MTAC			Discuss COO/Staff recommendation; *Recommendation to MPAC*			
CORE	Discussion with Sherwood staff		Discuss COO/Staff recommendation; *Recommendation to Council*			

Public comment survey themes

- Optimism about **future growth potential**
- Interest in **more housing and job opportunities** in Sherwood
- Importance of **housing affordability**
- **Housing choices** for seniors, young families and other demographic groups
- Impacts of a potential UGB expansion on **traffic,** due to lack of transit options in Sherwood
- Impacts on **farmland and agricultural activities**
- Impacts on the **environment and climate change**
- Impacts of new development on existing **public infrastructure**
- Use **land within the UGB** before expanding

Housing capacity gap range

- UGB housing capacity deficits: 1,000 – 5,300 homes

Table 4. Sherwood West Housing Estimates

	Density Range (Net)	Total Acres (Net)	% of Residential Acres	Total Housing Units (with % of Middle Housing in Neighborhood areas) 0% MH	10% MH	20% MH	50% MH
Multi-Family	16.8 to 24	33	10%	798	798	798	798
Middle Housing	5.5 to 11	16	5%	173	173	173	173
Cottage Cluster	12.8 to 16	23	7%	362	362	362	362
Med/High Density Nbhd	5.5 to 11	23	7%	248	279	311	406
Medium-Density Nbhd	5.6 to 8	102	30%	816	990	1,163	1,683
Low-Density Nbhd	3.5 to 5	144	42%	720	1,008	1,296	2,160
TOTAL		**340**	**100%**	**3,117**	**3,610**	**4,103**	**5,582**
Total Average Density				*9.2*	*10.6*	*12.1*	*16.4*
Total Average Density with Open Space				*7.8*	*9.0*	*10.3*	*13.9*

005540

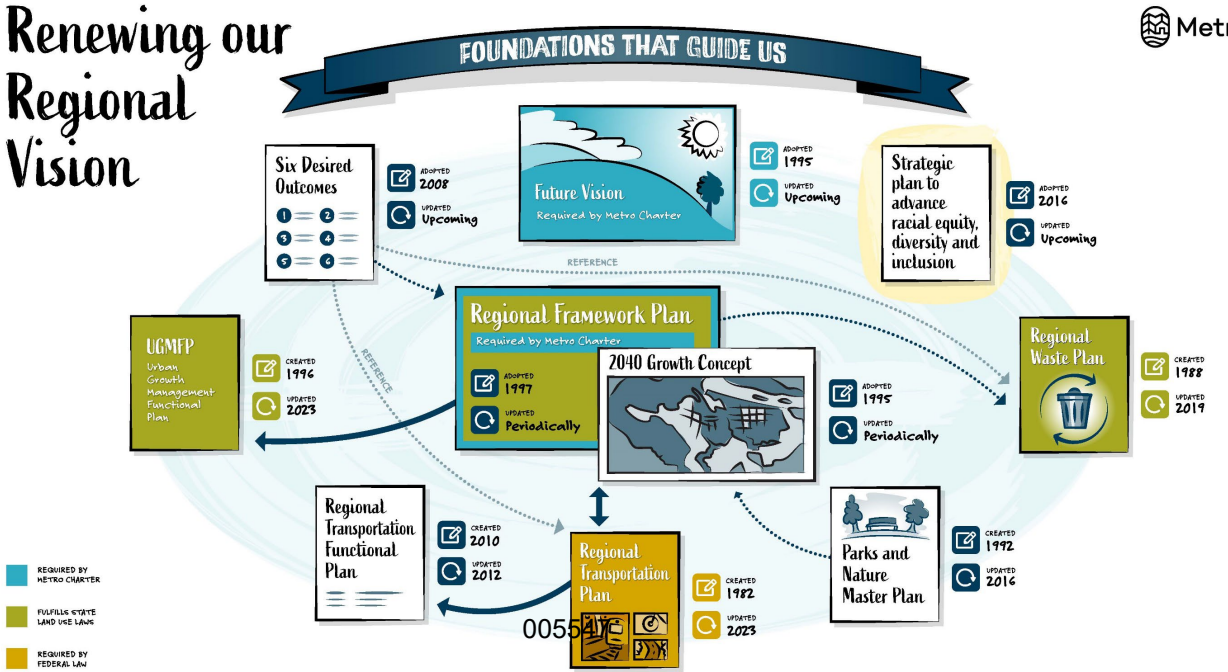
Need for large industrial sites

- Current surplus of industrial land, however, at smaller sizes
  - Average lot size: 3.8 acres; Median lot size: 1.7 acres
- 2022 Oregon Semiconductor Taskforce Report
  - Statewide need for four sites of 50 – 100 acres suitable for high tech manufacturers

Recommendations: Sherwood West

Expand the UGB to include Sherwood West urban reserve

Conditions of approval



- Amount of housing
- Housing affordability
- Protections for large industrial sites to grow the region’s high-tech manufacturing sector
- Broad based community engagement
- Tribal consultation

Additional recommendations for Metro

Revise how we accounted for slopes on employment lands

- DLCD advised Metro to use a 10% slope threshold when inventorying buildable employment lands

Update the region's vision for its future

Improve how we assess equity in growth management decisions

- Possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to complete equity assessments when concept planning for new urban areas

Consult with Tribes

- Identify possible requirements for local governments to consult with Tribes when concept planning and comprehensive planning new urban areas
- Identify opportunities to ensure and improve Metro's Urban Growth Report technical analyses are inclusive of relevant tribal priorities, expertise, and data sets

Questions?

Questions for MPAC

1. Do you agree with the COO recommendation that there is a need to add Sherwood West to the UGB?
2. Do you agree with the categories identified in the COO recommendation?
   - Recommendations for Metro
   - Conditions of approval for Sherwood

Next steps

- MPAC will determine their recommendation to Metro Council at the next meeting on September 25th
- Council public hearing on COO/Staff recommendation: September 26th

oregonmetro.gov

Examples of recent expansions

Table 1: Expansion area density comparisons

Expansion Area	Concept Plan^	Community Plan/Master Plan
2018: Cooper Mountain (Beaverton)	10.6 du/na	12 du/na
2018: Frog Pond East and South (Wilsonville)#	9.9 du/na	13.3 du/na
2018: Witch Hazel Village South (Hillsboro)	11.7 du/na	12.9 – 18 du/na
2018: Kingston Terrace (King City)	11.2 du/na	11.9 du/na
2023: River Terrace 2.0 (Tigard)	13.6 du/na	In progress

#Frog Pond West was subject of 2002 UGB expansion – average density was 6.3 units/na
^These numbers come from concept plans, when available, and in some cases do not include ROW takeouts

Example from SB 1537

At least 30% of residential units subject to affordability restrictions

- Rentals for households with income 80% or less of area median income - *$94,400 for a family of four*
- Ownership for households with income 130% or less of area median income - *$151,970 for a family of four*

Re: 2024 Growth Management Decision

Dear Chair Peterson and Metro Councilors,

Thank you for the opportunity to comment on the draft Urban Growth Report (UGR) and Sherwood West urban growth boundary (UGB) expansion proposal. The 2024 growth management decision is the blueprint for how Metro Council will lead the region in planning for future housing development and employment opportunities. This decision will have a particular impact on Washington County with Metro Council's consideration of the City of Sherwood's UGB expansion proposal.

The Washington County Coordinating Committee strongly supports the Metro Chief Operating Officer's recommendation to expand the Metro UGB to include the 1,291 acres within the Sherwood West urban reserve area.

The city has demonstrated their readiness to serve the area with governance and infrastructure as required by Metro's Urban Growth Management Functional Plan. The City's plan envisions that up to 5,582 housing units and 4,524 jobs could be accommodated in the expansion area. We all understand that providing housing is of paramount importance in our region and statewide.

Sherwood has demonstrated, through their local analysis and planning efforts, that the proposed Sherwood West employment area has the site suitability characteristics to attract more of the types of industry that Sherwood has successfully recruited to the city in recent years. The draft

phone: 503-846-4530
email: lutdir@co.washington.or.us

UGR shows there is employment land in the Metro region; however, it is largely made up of small to medium-sized parcels which are not especially conducive to attracting industrial development. Sherwood West can provide larger lot industrial land to help meet the needs of employers. In addition, Washington County's employment rate is higher than that of the region, and employers are currently developing within Sherwood and adjacent cities. Sherwood has demonstrated that they are a place where people want to both work and live.

Thank you for your consideration. We look forward to continued partnership with Metro to make Washington County a great place to live and work.

Sincerely,

Frank Bubenik
Chair, Washington County Coordinating Committee

Call to Order, Quorum Declaration and Introductions

Chair Eryn Kehe called the meeting to order at 9:00 a.m. A quorum was declared. Introductions were made.

Comments from the Chair and Committee Members

Chair Kehe reminded the committee the MTAC September 18 meeting will be in-person with online option via Zoom. The meeting will be held in Metro Council Chambers starting at 9:00 a.m. There will be a vote taken at this meeting on the Urban Growth Management Decision with recommendation to MPAC. Parking information and other information will be shared prior to the meeting.

The Regional Housing Coordination Strategy was noted by Chair Kehe. This is a state required plan that Metro will develop for coordination and strategy within one year of our urban growth boundary decision to help increase housing production and support all the cities and counties who are working on their plans as well. An update on this work plan is scheduled for the October MTAC meeting. It was pointed out typically Metro's distributed forecast follows our Urban Growth Boundary decision by at least a year that is approved by Metro Council. It's likely to be late in 2025 or 2026. There has been some confusion around the production targets, and it will be coordinated with our Urban Growth Report and information around the Urban Growth Boundary decision. But our distributed forecast won't be out in time for this year's target. More information will be discussed at the October meeting.

Chair Kehe announced Metro is preparing and working on scoping for Metro's Future Vision and the 2040 Growth Concept. You may not know that we have a future vision that guides that growth concept. It hasn't been updated since the late 1990's. We need to update that as well as the framework plan. The 2040 growth concept is part of the framework plan. We will start with putting together a big vision process. This is dictated in our charter. More information on this will be brought to MTAC in future meetings.

Public Communications on Agenda Items Eric Rutledge from the City of Sherwood provided testimony on Urban Growth Decision – Metro COO / Staff Recommendation and Conditions of Approval, appearing on the agenda. The letter submitted to the committee that accompanied this verbal testimony was added to the meeting packet, page 37.

Consideration of MTAC minutes July 17, 2024 meeting
Chair Kehe moved to accept as written minutes from MTAC July 17, 2024 meeting.
ACTION: Motion passed unanimously.

Urban Growth Management Decision: Metro Chief Operating Officer recommendation (Ted Reid, Laura Combs, Metro) Laura Combs began the presentation with a review of the project timeline. The public comment period provided themes that was shared with the committee:
- Optimism about future growth potential
- Interest in more housing and job opportunities in Sherwood
- Importance of housing affordability
- Housing choices for seniors, young families and other demographic groups
- Impacts of a potential UGB expansion on traffic, due to lack of transit options in Sherwood
- Impacts on farmland and agricultural activities
- Impacts on the environment and climate change
- Impacts of new development on existing public infrastructure
- Use land within the UGB before expanding

The regional need for housing was reviewed. The forecast for 2024-2044 was used with a baseline UGB capacity, 175,500 homes expected. The capture rate for growth forecast in the seven-county MSA was planned for an estimated 70% - 72%. From this the UGB housing demand was estimated at 176,500 – 180,800 homes. Using the baseline capacity estimates from the COO staff recommendations as well as the baseline household forecast results in the deficit for growth capacity for housing, shown in the capacity gap range slide.

Job growth was reported at estimates for capture rate: 75% of jobs in the MSA, anticipating 82,500 new jobs by 2044 in the Metro UGB for a total of 1,079,000 jobs. The Sherwood West Concept Plan: Up to 4,500 jobs. The need for large industrial sites was reviewed. There is a current surplus of industrial land, however, at smaller sizes. The 2022 Oregon Semiconductor Taskforce Report showed a Statewide need for four sites of 50 – 100 acres suitable for high tech manufacturers.

The COO staff recommendations include expansion of the UGB to include Sherwood West urban reserve with conditions of approval:
- Minimum number of housing units
- Housing affordability
- Protections for large industrial sites to grow the region's high-tech manufacturing sector

• Broad based community engagement
• Tribal consultation

Additional recommendations include revising how we accounted for slopes on employment lands. The DLCD advised Metro to use a 10% slope threshold when inventorying buildable employment lands. It was recommended and planned to update the region's vision for its future. It was recommended to improve how we assess equity in growth management decisions. Possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to complete equity assessments when concept planning for new urban areas could be proposed. It was recommended that staff to work with interested Tribes, Metro's Tribal Affairs program and its advisory committees to identify possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to consult with Tribes when concept planning and comprehensive planning new urban areas This could help identify opportunities to ensure and improve Metro's Urban Growth Report technical analyses are inclusive of relevant tribal priorities, expertise, and data sets.

Comments from the committee:
Preston Korst appreciated Sherwood's comments about the city's due diligence and concept planning, noting that's a requirement that Metro has stipulated for at least a decade, that cities need to be putting forward their own concept plans before Metro considers an urban growth boundary. When it comes to the recommendations, we are concerned about the political risks that come with adding recommendations that are a little bit too prescriptive in their nature in terms of how they're presented from Council. We've seen whenever there is an opportunity for the political risks of an urban growth boundary to take place it's more than likely to derail the entire process. With that being the frame of how I'm presenting it, is how do you plan to present the recommendations in a way that allows the cities the autonomy to be flexible in their planning. Is there a way that is planned to set the recommendation that gives some flexibility to the City of Sherwood, or having as in 2018, setting the expectation for making these a little bit more aspirational more so than required.

Chair Kehe started with what's typical. It goes further back than 2018 and it is typical for conditions of approval to exist. When the expansion was made in 2018 there were conditions of approval that had a number of dwelling units as a minimum that is planned for in comprehensive planning for each of these cities, numbers that were obtained from the range that was presented in the concept plans by that city. In terms of how conditions of approval will be decided in this process this year, those conditions are set by our Council. They were in 2018 and they will be in 2024. Right now, the COO recommendation does not have a number for Sherwood for a condition on that number of units. It's presenting a range of choices for the Council to consider. Comments made by the City of Sherwood that range by Metro starts at nine dwelling units per acre, and Sherwood's plan is six. That range will be a political conversation at MTAC and Council.

Planned next steps for the September 18 MTAC meeting was a two-piece recommendation.
– Agree with recommendation to expand the UGB to include the Sherwood West urban reserve? You can agree with the recommendation with some caveats, separate from any conditions of approval.
– List of thoughts to share with MPAC on the topic areas for potential conditions of approval. You are the technical advisory committee to MPAC and provide that expertise on topic areas about the conditions of approval. You mentioned the number range of housing production. You may want to provide input on other conditions regarding general areas of affordability, the protection of large lot industrial areas and more. In many ways the conditions only come into play if the UGB has expanded.

Mr. Korst noted looking at the potential UGB conditions of approval section on page eight. It just seems vague to me. There isn't necessarily an expectation. Basically, it will be saying Metro in the COO recommendation. It also says Metro Council could add a condition. Chair Kehe noted this recommendation isn't recommending an affordability concept. It's just saying Council should consider some kind of condition related to affordability and lets Metro Council determine what that condition would be. It was noted in the past we had draft COO recommendations that did include some draft conditions of approval, but also in the past some conditions of approval happened in the Metro Council process late in the game. It's not unusual for conditions to be undefined at this stage, but this is more undefined than they have been in the past.

Mary Kyle McCurdy noted this is very much a legal decision as well as a political one. There are requirements to meet needed housing and Metro has its own six desired outcomes, which I've not seen mentioned in the COO's Report, which also among other things govern this decision. Given what the City of Sherwood said today abut their unwillingness to go above 6.2 dwelling units per acre, will the COO and staff be going back to reanalyze its recommendation that changes quite a bit, included needed housing, whether any of the needed housing, most of the housing that's needed in the state and in the region is for those at 120%. The primary funder of affordable housing is litech. To even qualify for litech housing you need about 40 units per lot. That means none of that would qualify. Regarding climate strategies that Metro has committed to, will the COO be going back and redoing this analysis COO recommendations?

Chair Kehe noted all of those are decisions that our Council has the opportunity to make in their deliberations. Ms. McCurdy added that the last UGB expansion in 2018 had a requirement for minimum density that was 15 units per acre. The Governor's UGB expansion bill in 2024 required for any Metro expansions underneath that bill to be 17 units per acre. This is different from the past decade.

Nina Carlson focused questions and comments on industrial lands. One, I would be curious to know if or why there was no scrubbing the amount of industrial land that was deemed available in the UGB with commercial real estate folks. Knowing the folks in the industry, anything under five acres is very difficult to do. Any sort of larger industrial, or heavy medium to heavy industrial, you need larger pieces than that. Three acres or under and it's disaggregated around the region. I struggle with that being included in the number.

Additionally, I appreciate you dropping the slope down to 10%, but again, those same folks who do this development every day won't look at anything that has a grade of over 7%. So that's concerning in that number. Lastly, I appreciate all the work that's gone into this. But for those industrial areas to be really meaningful a lot of those are brownfield or areas that have real struggles with their infrastructure. I think a cost needs to be put on those places and potentially those that won't pencil in with those kinds of costs be take out or put in an ancillary bucket that aren't considered unless state or federal funding are found to be able to bring that into something that would pencil out because there's no sense counting properties that will not get developed. We have enough of those around that we see today.

Ted Reid started a reply with the small sites less than five acres. We have done some work on small site competitiveness and our analysis found those smaller sites actually do play a very important role in the regional economy. In particular, they serve smaller businesses that are often owned by people of color, that serve as an incubator for these small businesses in the economy. Our sense is we shouldn't ignore them completely. But as you noted there is a segment of the industrial market that does require larger sites since we've attempted to recognize that in the work we've been doing.

Chair Kehe added that it does get to the function of the center of what this UGB decision is about. If we discount vacant land completely and say that vacant land inside the UGB is useless, and therefore we need to expand the growth boundary. I think that's something we need to talk more about. I think it gets away from the fundamental idea that we use land effectively. It makes me question if we have vacant land inside the growth boundary and it's useless as industrial land, which is what you're saying, nobody wants to develop it, then we need to make some changes so that that land can be developed and become efficient use of the land inside the growth boundary, not discount it and let it stay vacant forever while we continue to grow out on the edge.

It does raise a really important issue, and you're not the only one to raise this, and it's really critical that we make sure that those areas do develop. Mr. Reid noted one way in which they can. But you are correct about the need for investment. Many of those are Brownfield and taking them out of that status and making sure that they're cleaned up is a problem that we need to address. We've found a way to specifically address this industrial need for large lots that supports the Sherwood proposal, and that's what's in the COO's recommendation.

Tom Armstrong noted following up from a previous conversation and hearing Sherwood is taking a pretty hard stand at six units per acre, this is significantly less than any of the previous UGB expansions at least recent past. In the previous draft UGR it had an analysis of what it would take or how you would adjust the redevelopment rate which is a pretty low 20%. I'm wondering if you're going to be able to provide an alternative analysis that says that if Sherwood is not agreeable to a higher density to help meet some of our housing needs, affordable housing needs, then Metro Council would have to adjust the redevelopment rate to create the capacity to meet those needs. I think there was a reference for the high scenario of going from 20 to 40%. I'm curious now that you've zeroed in on a regional forecast, what the redevelopment rate would need to be to meet the 5,000 units of additional capacity that you've identified as a need. You are saying meet that capacity inside the existing UGB by increasing the redevelopment rate for 20% to what? Is it 25%? Is it 23%? Is it a reasonable number or is it a huge stretch goal. Having that additional information would help.

Mr. Reid this was noted as something that got mentioned in the draft Urban Growth Report. We have a fairly conservative approach to how we assess redevelopment capacity in this work. There's the initial question about is redevelopment financially feasible on any particular property. And then we've also looked back at redevelopment in the past and acknowledged that even if a site is financially feasible to redevelop it doesn't mean that it necessarily does. As Mr. Armstrong is recounting, we've assumed that about 20% of the financially feasible parcels will actually redevelop in the future. He is correct on that. We have not gotten to the point of talking about how we would redo this analysis. I think right now we are in the phase having presented the COO recommendation and we anticipate some good policy discussions about expectations for any areas added to the boundary.

Mr. Armstrong asked do you think you could provide that information for us for our September 18 meeting? Mr. Reid noted he would check with his colleagues. I think there's another sort of complicating question here about the COO recommendation. As it stands, the housing need that is identified talks about middle housing and single unit detached housing in particular, which are a bit more challenging to address through redevelopment. Let me think about this and we'll see what we can do.

Dan Rutzick noted as I think about the Urban Growth Report, I am mindful about the Sherwood West UGB expansion. The 2024 Urban Growth Report will have implications for city and county planning

processes in the coming years. We'll identify the subsequent distributed forecast, as was mentioned earlier, to then inform the local housing capacity analysis and the regional transportation plan remodeling. A question I would pose to MTAC today is beyond the Sept. 18 meeting, talking about agreeing with the recommendation to expand the UGB to include Sherwood West, thoughts to share with MPAC on the topic, potential conditions of approval. I would encourage MTAC to also have a play with other input to share with MPAC regarding the 2024 UGR that can help inform overall thoughts on the work. Sherwood West, obviously, as we talk about at Metro multiple times, is front and center as part of this work, but I don't want to lose track of the overall urban growth report and some concerns I think local governments may have and others about other building blocks. I have a question with the baseline scenario, the Metro COO recommending the baseline scenario. Is that falling within the category of the new normal scenario two, or the new normal scenario three that we've been talking about in the last couple months.

Mr. Reid noted you'll recall we talked about the draft urban growth report with some of the housing demand scenarios. One was following in footsteps where future generations make choices similar to those that proceed them. There was the strong urban market scenario where there was a lot of very urban high-density development that would look a lot like the 2010, 2018 timeframe with that kind of development that we saw. In the middle was this new normal that was basically a blend of those two. We had two variations on that new normal, one that they used some initial capacity estimates that we had developed. Then a variation on that that attempted to respond to some of the feedback we got from suburban jurisdictions in particular. In their experience residential zones that are zoned for single unit detached housing that also allow middle housing, they tend to see a higher mix of single unit detached, not so much the middle housing. That variation was also included in the draft urban growth report. I've lost track of what the numbering for those scenarios was, but the COO recommendation is essentially what I described as the baseline capacity leaning a bit more towards single unit detached on vacant lands.

Mr. Rutzick noted it's closer to scenario three. It was asked is there an opening in September to have MTAC make recommendations beyond just the Sherwood West area? I know that at our MTAC meeting last month there was talk about, as Mr. Reid described, we have following in footsteps that we have the new normal, we have the strong urban market. There was a question mark where there could be another scenario and that was put out there. The City of Hillsboro put in public comment there's an opening for another scenario that falls in the line of strong population growth, but it also leans more towards a larger mix of single detached in addition to middle housing and apartments. I think it might be helpful to get some clarification if there's an opening to talk about another scenario, that question mark scenario, that Metro put out there last month.

Chair Kehe noted a change to the UGR like that would change the analysis and therefore the decision to expand the growth boundary for Sherwood. So that MTAC recommendation about the expansion is related to how the analysis identifies the need. Those are absolutely related. If the needs were for more single-family housing, then Sherwood would either have to provide higher densities of single-family housing in their concept plan or Metro would have to expand the growth boundary in some other location that's not Sherwood.

Mr. Rutzick noted when Metro showed that question mark it acknowledged staff ran through a variety of scenarios, but possible there could be other scenarios, too. What I'm hearing is there's not going to be an opening to assess whether Sherwood's proposal falls within a scenario beyond the four that have been looked at so far. Chair Kehe noted saying that if you want to do that, MTAC will need to make a

new recommendation about the UGB. Mr. Rutzick noted that makes sense. I guess that's an outstanding question for today to help inform for the Sept. 18 meeting. With that question mark being opened up Metro ran work with all these scenarios. There could be a lightly different scenario where there's more population growth than Metro has identified. It's a strong urban market but ultimately there's more single detached than is being shown. It's just a higher number of single detached than the new normal scenario three shows.

Chair Kehe asked where you would propose to MTAC a suggested on what should be done about the UGB to accommodate that additional single family residential need. Are you suggesting an additional expansion area beyond Sherwood? Mr. Rutzick noted I view this Urban Growth Report as obviously Sherwood West, but it's about more than that. As we think about the population forecast scenarios, let's put Sherwood West to the side, then for our region for the coming years all these building blocks that this sets the tone for. It's an acknowledgement there are other scenarios out there that can inform us. Maybe it's less about MTAC making a recommendation that's different, but maybe recommending to MPAC that the final UGR acknowledges there are other scenarios than the four that have been identified, which does not preclude the UGB expansion in 2024 for Sherwood West. There's a bunch of local governments in the coming years that are going to be leaning on these both growth forecast and scenarios to inform planning work we do at the local level.

Mr. Reid added the scenarios, and their draft urban growth report were always intended to be illustrative. Based on conversations we had with our consultant team they were intended to be within the balance of what felt plausible. Our consultant team advised us that a scenario that contemplates high population growth would necessarily mean that population growth is coming from younger migrants to the region who will not have the financial resources to purchase a single unit detached home. This was in the category of yes, you could create that kind of scenario, but they weren't convinced that it was actually informative in any practical sense. Mr. Rutzick noted if we're looking by 20 years out with your people moving to the region, they may choose middle housing or apartments. A number of them will have growing households and for other reasons gravitate towards single detached. When the urban growth report gets finalized, it can call out a variety of scenarios that could play out in the coming 20 years.

Preston Korst asked wouldn't the adjustment or alternative scenario that Dan is suggesting be actionable by a mid-cycle UGB expansion opportunity? Mr. Reid noted it could be. We do have this mid-cycle process that was developed in partnership with a number of the organizations here. We got to some changes to state law that allow this mid-cycle process, essentially three years after these cyclical decisions there. This is intended as a pressure relief valve. If our region in fact is experiencing faster growth than we expected, then a city can come forward and propose one of these mid-cycle expansions with that evidence that was missed in the most recent urban growth report.

Jessica Pelz noted we support expanding the UGB and would like to have a discussion of draft conditions of approval (more detailed) for MPAC consideration at the 9/18 meeting.

Anna Slatinsky noted I'm curious about the identified minimum number of units that would be created as a condition. Obviously previous decisions included those figures and Metro Council need not identify a particular density, but simply identifying a number of units and Sherwood would be able to take a flexible approach in figuring out how to target that figure. I would also add I would encourage Sherwood not to be too worried about middle housing. In the Cooper Mountain community planning process we've found ways to not just meet, but target significantly exceeding Metro's minimum

housing numbers. There are a lot of different ways to do it that can result in great outcomes for community character and all of the tings that folks care about. That said, I know there are lots of details involved, and I'm not familiar with the Sherwood area and the plans that have been made so far.

My question is the minimum number of units that Metro Council would be choosing related to that range of needed housing that is being identified by the Urban Growth Report. From what I can see that range is between a thousand and 5,500. I'm curious how much of that informs where that condition would be. There are lots of other incentives for looking at some of the higher ends of the density including potentially eligibility for some infrastructure funds from the state. I would be interested to know from Metro staff's perspective how they are thinking about identifying potential housing targets for this area. Picking a density doesn't actually make a ton of sense because that's not how density really works. You have a variety of density, different kind of development. How are you thinking about identifying what the right number of units is for a particular expansion area?

Mr. Reid noted from the City of Beaverton and other cities experience in the 2018 decision there were conditions approval that essentially said the City of Beaverton, you shall plan for at least this number of homes. And the city has been doing that work along with Hillsboro, King City, Wilsonville to do the comprehensive planning to hit those levels and in many cases exceeding those expectations that were laid out. You are correct that the COO recommendation lays out a range of potential need from a thousand to 5,500 homes. You're also correct that the conclusion about need needs to sync up with the conditions that get applied to the expansion area. That's how we're thinking about it. That need will again reflect that direction from the council about what their expectations are for the minimum number of units to provide in that expansion area.

Ms. Slatinsky noted but from a Metro perspective I'm assuming that staff is going to be formulating potential numbers for that housing target for Sherwood. I'm curious how is staff approaching that. How do you determine what that proposal is for, what the options are that you identified for council. Mr. Reid noted what you've seen in the COO recommendation includes the reference to the planning the City of Sherwood has done. You've heard from the City of Sherwood what they believe their intention was with their concept plan, as well as that table that I shared that showed the range in their concept plan. Right now we're presenting this as these are all within the realm of what the council could decide. We think there's a policy discussion to be had about what those expectations should be.

The slide showing Sherwood West Concept Plan UGB housing capacity gap range was shown again. Ms. Slatinsky noted what I'm hearing is that Metro staff isn't quite sure how they're going to come up with options to consider. Chair Kehe noted Council is going to start work within the range that's in the COO recommendation.

Ms. Slatinsky noted a brief comment about the affordable housing, the suggested for some kind of condition related to affordable housing. I want to note that for Beaverton we've exceeded our own expectations for creating low-income housing in South Cooper Mountain which was two or three UGB cycles ago. The community plan was in 2015 and there is no way we would have been able to see low-income housing built in South Cooper Mountain without the Metro affordable housing bond. I think that the Metro affordable housing bond is an example of something that Metro did really well in terms of providing significant resources that have moved the needle.

I also want to mention there was an article in the Oregonian that came out recently about the dire straits that a number of affordable housing provider organizations are in right now. Without functional

low-income housing organizations to develop and provide that housing in the long term any obligation that's put on local jurisdictions is just meaningless. To be perfectly honest any kind of explicit target or requirement on local jurisdictions through UGB decision will also be meaningless because cities don't fund and develop affordable housing. I think that Metro has an important role to plan in affordable housing. But setting explicit requirements for jurisdictions through the UGB process I do not believe is one of them.

I want to encourage other jurisdictions to consider devoting resources to facilitating affordable housing development. However, it requires $$ any way you cut it. I would strongly oppose Metro placing additional financial obligations on cities with UGB decisions in addition to the already very daunting cost of providing infrastructure to new growth areas.

Chair Kehe noted that's a good example of what could fall into that second category of the decision for MTAC to bring to MPAC with the list of your technical recommendations. In this instance about affordable housing and possible conditions, essentially asking that those don't be too prescriptive because cities don't have the resources to build that housing themselves without significant support. Please talk more about some of those ideas which is one way we could separate this decision into the UGB expansion or not recommendation to MPAC and your technical expertise about those condition areas.

Carol Chesarek asked what if we support the expansion but only with certain conditions. In that case separating out those two decisions might be challenging. That's just a comment to think about. When I started working on this stuff years ago, we talked about developable acres when we were talking about residential densities, and I'm not hearing that developable acre's word used now. I'm confused about the different numbers I'm hearing today. I'm hearing from Sherwood 6.2 dwelling units per acre. I'm seeing on the chart the minimum number was 9.2 units per acre. I'm hearing from Ms. McCurdy talk about a state requirement for 17 units per acre. I'm wondering if those are all equivalent numbers with the same kind of underlying basis and calculation, or if there's some difference in how we're calculating what's developable and what's not. If someone could explain that it would be helpful.

Eric Rutledge noted the way to look at the capacity gap range table, the number that you see, 9.2 at the mid-bottom, that is the high end of the density range when no middle housing is provided in what we call neighborhood zones. You see 0% at the top, then all the way down to the bottom and you get to 9.2. If we were to clarify this table, we would add another column that would provide the minimum density with 0% middle housing in addition to the maximum density 0% middle housing. The reason whey this table got put together this way is because we were focused on the impacts of HB2001 and that's where the 0%, 10%, 20%, 50% come in. More examples from the table were described.

Addressing comments at the meeting, the density is going to go higher. In my opinion we're probably going to hit about 10 units per acre after the planning is done. Developers take advantage of HB2001 as they're allowed. I want to clarify 6.2 is the minimum lower than recently approved concept plans, but not by a lot. Frog Pond was approved at approximately eight units per acre. So, it's less than 10. Again, what we've seen is that the base density always goes up. What we're saying is we don't want the base, or the minimum density increased. Because that is likely to increase things across the board down the line as we get into full development subdivisions and just straight up building permits as developers take advantage of middle housing with HB2001.

What we'd like to do is stick with the base minimum density 6.2 which is in the concept plan. There doesn't need to be a correction there. We know the 6.2 is supported by the Sherwood community. Based on our conversations with how we approach this with our community, allow the market to take it up further. That's what we're proposing. Based on comments today it seems that the minimum density is going to be much higher than 6.2 in the end. We have a significant concern that if we accept a condition that is higher than what was proposed, that as a lot of political risk and community acceptance risk. The other point around density, we have HB2001, we have SB1537 that assed last year, which allows additional density, basically outright, as long as you show that it increases affordability, or the unit count developers can go now. Regarding HB2000, three from 2019 related to density and affordability.

We are going to have to take specific actions. We are going to be subject to the new housing accountability and production office. All these are state mandates that are going to force the city's hand in a certain direction for affordability and density. The additional Metro conditions that go beyond that just might be that final straw. That's what I'm concerned about. Our community has a lot of concern about preemption both at the state level and the regional level. We want to be a good partner. We're proposing a minimum of about 2100 units. We think we can deliver those quickly, and likely the density will be much higher. But all the imposed conditions threaten that. The main thing is that it has been vetted and approved by the Sherwood community.

Ms. McCurdy noted the 17 units per acre referred to the Governor's one time expansion for residential. In SB1537 if a city in the Metro area uses that to expand the urban growth boundary for residential, it's 17 units per acre. Chair Kehe added that's not this process but something we can refer to as something recent. That was coming from the Governor's office. Sherwood is not asking for that one time expansion so they're not asking for that. Then I think you last question was could MTAC recommend to MPAC that recommends to Metro Council an expansion of the growth boundary but with some specific conditions. Yes, you absolutely can, but you'll need to have a vote of everybody that agrees with that, or we'll have a majority vote that agrees with that. There is some negotiation that has to happen in this group to try to get to what those would be.

Ms. Chesarek noted I'm a little frustrated because I feel like we're sliding backwards in the density housing space at a time when we need more density for climate reasons and also for walkable communities. I remember hearing a report some years ago that stated 12 or 15 units per acre is the minimum number you have to get to for supporting a truly walkable community that has enough density to support the corner coffee shop, the bakery, those local businesses that you can actually walk to as opposed to getting in your car and driving. We know there's a need for more housing in the region. So, to be walking back from 30 years ago the minimum requirement was 10 units per developable acre, I feel like we're sliding backwards in terms of the requirements and the minimums and we're not going in the right direction.

Gery Keck spoke of building off what Ms. Chesarek talked about. I see for as far as walkable communities the chart showed two different averages. One was the density average, and one was with open space, and the open space density was lower. My two cents is that if we're going to be making these communities with denser housing, we need the infrastructure to support those to be livable, which open space is one of the items. My question is the 9.2 to 16.4 that the COO's recommending. Does that take in consideration open space to help these communities become livable. Mr. Reid noted noticing in some table that described their density assumptions, some notes about open space and how those factored in.

Mr. Rutledge noted the Metro definition as far as I understand includes open space as part of the density calculation. So, the 9.2 would be the correct based on Metro and the City of Sherwood definitions. Chair Kehe noted they absolutely have a lot of open space worked into their concept plan. It's in how you measure density, which again, that most of the time Metro Council conditions have included number of units and not density. Density tends to get into these questions of what you use as a denominator, whether you're including roads or parks, or it can get a little complicated in its calculation. But that's what the table was showing, just a different way of looking at the calculation, one set of numbers of units, but changing the denominator of what's considered in the buildable land.

Rachel Loftin wanted to address what was being noted about affordable housing and how that's paid for and how that functions. While I understand the cities don't want to have CET prescriptive path to get affordable housing, we absolutely know that we need it. Those cities aren't the primary funding source. They are what actually kicks off this whole process. So, when we're going to the state and we're asking for tax credits, the only way that we get that funding source is if we can show significant community support from that city in order to get those initial awards.

On top of that we also have a major crisis within the entire United States that we don't have enough funding for these Litech properties. We're out of PABs across most the United States right now. We are going to depend on the local funding sources to make affordable housing happen. So, we need cities. Beaverton has done an amazing job about bringing affordable housing into this area. For instance, we're working on the senior housing at Fifth Property now. The reason we were able to make that happen and able to get a commitment for Litech is because Beaverton set aside a property that they would want converted into affordable housing. We need jurisdictions to commit to that across the board. If you want affordable housing, you can't just hope that Metro is going to come up with another funding source or that the state is going to step in. You need to help plan for that and make it happen.

Chair Kehe appreciated the perspective. This is making my point on why I think it could be helpful for us to make a list of these considerations for our September meeting. You want to make sure to forward to MPAC your expertise about some of these topic areas because you bring different perspectives and don't have to agree. We just have to bring all those perspectives to MPAC and Metro Council following that to hear and understand those perspectives.

When asked to define the acronyms used, Ms. Loftin noted litech is the low-income housing tax credit. It is thew ay that 90% of affordable housing projects are funded. We get tax credits from the federal government. We sell them to private investors, and they that is what gives us the money that we need to build the housing. Those are funded through private activity bonds, PABs, which are awarded across the United States based on the size of your area. But what we're seeing is that with construction costs and insurance and all the other issues right now, there's not enough funding coming in to build the amount of affordable housing that is needed. So, we're at a little bit of a holding pattern even here within Oregon. The Oregon Housing and Community Services for the first time froze their 4% OHCS tax. They are the ones who distribute the funding for low-income housing tax credits. And they've stopped accepting application because there is not enough money to go around right now.

Mary Kyle McCurdy asked which Metro area cities have adopted a CET for affordable housing? Given that UGR says @ 80% of future households cannot afford median home price, we need housing numbers and densities that support market provided moderate income housing and affordable housing. It is not reasonable to expect Metro to always provide an affordability bond. Anna Slatinsky noted state law limits CET to a maximum of 1% of the permit value on residential construction. In

Beaverton, that would yield less than $1M per year. Other significant funding sources are needed. Ms. McCurdy added the CET issue addresses the point raised by CPAH about need for cities to step up for affordable housing as well; it takes many pieces to put in place to support affordable housing.

Fiona Lyon wanted to echo comments from Ms. McCurdy and Ms. Chesarek on the density piece. I think that's a pretty big game changer for this process. When I google six units per acre it's an eye-opening visual to see what that means in real life. It looks like there was a maximum density, the 16.4 referenced as one of the conditions of approval. I know this is within that capacity table that was in Sherwood's concept plan. But I guess my question is why Metro's recommendation would include a max density. Echoing what I saw in the public comments on traffic concerns and the lack of transit service here. I would tie the pieces together that in order to get good transit service you do need to provide density. I would encourage those two pieces. I'm not a transit planner but I can definitely lean on my colleagues to share some of those density figures for how to best position the community to receive future transit investments.

I would be helpful for me to understand more about the assessment that was done to make sure that we turned over every stone within the UGB. I don't know if there's a one-pager on that process or all the things we looked at. There's a variety of things that come to mind. Looking at the Senate Bill, was that a consideration for looking at how to add density within the Urban Growth Boundary? Looking at underutilized parking throughout our region? It may be too late in the process to fold these things in, but I would like to maybe brainstorm for the next round, are there more creative things that we can be doing to make sure we're maximizing everything that we already have, just as a point of process.

It feels like so many of these expansion areas carry over large arterials that used to be farmland that don't quite get the investments of pedestrian and bike improvements of actual protected crossings in any regular interval. It remains a huge barrier for a lot of our region to be able to create walkable communities. If there's any way that we can bridge that gap in a more creative way to help trigger that investment. I feel that it's an outstanding need that we keep seeing throughout the region.

Mr. Reid thanks Ms. Lyon for the comments about the need for density to support transit provision. That is absolutely our senses as well. It'd be helpful to hear from TriMet what some of these threshold numbers may be to ensure that we an provide those options. Thank you for your comments about ways that we can use land more efficiently. The urban growth report process is a snapshot of what we think is today, but I think your point is a good one about are there other efforts we could undertake to think about using land more efficiently. I think probably a lot of my colleagues from cities and counties have some good ideas about that based on their local experience. Chair Kehe added the update to the region's vision and the 2040 growth concept and framework plan will be an opportunity to form understanding for efficient use of land inside the growth boundary. The scoping is going on now. Information on this will be coming to the committee.

Joseph Edge noted Ms. Lyon and Ms. Chesarek bring up great points about the thresholds required to support transit, walkable neighborhoods, neighborhood commercial, etc. We've heard from other suburban jurisdictions about wanting TriMet to provide better service to certain of their communities. As planners, we should be familiar with these thresholds, and these should be leveraged to set expectations for jurisdictions that are asking for additional transit service. We should invite TriMet planners to present to us on the thresholds required to support different intensities of transit service (local, frequent, high capacity) so we can have a shared understanding of this data for our technical recommendations.

Kevin Cook noted it seems appropriate to require conditions for affordable housing even while recognizing the challenges around funding. Vee Paykar noted also appropriate to continue talking about transportation - goal 14, states UGBs coming from cities over 2,500 in population will need to have a transportation system plan including encouraging efficient use of land to provide livable walkable and densely built communities.

Anna Slatinsky noted many of the comments here about local toolkits for affordable housing and transportation planning are already in place as a state mandate - Housing Production Strategies, and community plan requirements for planning goal consistency.

Nina Carlson noted I respect that we need walkable bikeable neighborhoods and all the amenities but every time we do that our cities are already struggling mightily with their budgets and requiring all these additional things that are going to make it that less likely for cities to be able to do these things. I'd love to have all the bells and whistles but right now we need to focus on housing and getting more people housed. Sometimes that means we don't get to have all the niceties. Before we weigh in on this, I think people need to drive around and understand what that land out there looks like.

Preston Korst noted I want to put into the conversation that whatever recommendations we do decide in the future meetings is going to set a precedent for the next urban growth boundaries, what we do in the future. I believe the truth is that the more prescriptive that we are in these urban growth boundary recommendations it means that it will be less likely that future cities in the future iterations of urban growth boundaries are willing to go after these urban growth boundaries because they feel either their hands will be tied or that whatever they do propose will get changed so much or will be killed through political in-fighting, essentially due to the fact that there are so many additional burdens on top of the years and hundreds of thousands of dollars that have been spent towards creating what a plan they think is appropriate for their community. Again, I keep referencing King City and North Plains. I want to be respectful to the political leaders that have taken the risk to go after the current urban growth boundaries. What we're deciding now will not impact just this potential development in community, but it may end up having detrimental effects and preventing other cities from wanting to do the same.

Glen Bolen noted I think that there's a longstanding history here of having conditions attached to the urban growth expansion areas. I think they've helped lead to better outcomes. One of the notes that I've got for this particular case is we're looking at job lands, large site industrial specifically. I agree with the statement about some protections for those large sites. There are some examples out there like North Hillsboro that has done some of that minimizing the number of restaurants and things that can go in there just to serve people, but not to be a draw itself. I also looked through the city's code, and their current industrial zones have a small minimum acreage size, so that would have to be updated.

And there's conditional uses allowed like recreation that are heavy trip generating low wage. I think we've seen this happen in the region where we lose some nice industrial sites to recreational uses for a long time and are not going to be real base employment jobs. From a transportation perspective they are higher trip generating. I'd like to see those protections in place. I agree with the statement that having a production number that matches the identified need is a reasonable approach. Numbers are just numbers. There are different ways to do development to make all kinds of things work. It really comes down to creativity.

Tom Armstrong noted I wanted to agree with Mr. Bolen's comments around the industrial land protections. Given that Metro has identified a need for large lot industrial, I think it is wholly

appropriate that Metro designate this as regionally significant industrial area. That would adopt the Title IV protections that eliminate the recreation use and provide the protection so that we don't see leakage with things like indoor go-karts, and Topgolf, and other things that belong more in the hospitality commercial area of their concept plan.

Chair Kehe asked for the Next Steps slide to be shown again. I'm going to go back to what I laid out in terms of decision-making next month and my suggestions as your Chair. I hope that this conversation has gotten you thinking about it and making you curious to find out more information. Ms. Carlson suggested going out and driving the Sherwood West area. You can look at the Sherwood West concept plan. It's easy to find online. You can look at Sherwood's proposal, it's on Metro's website as well.

I wanted to reflect back on this and make sure you're all ready for what's ahead. Ultimately, most of the time MTAC has recommended something in line essentially reflecting off the COO recommendation. That's what I'm suggesting here, is that you take the COO recommendation and then work from that, and that you either support it or you reject it. You can support it with conditions as was noted. But you are a very big group and getting a majority of this group means you need to come to something that will work for everyone. That will be the work of September.

I encourage you to work with your colleagues to come up with proposals that you're ready to present at that September 18 meeting. This is similar to the last big decision with the Regional Transportation Plan. We walked through the recommendation and folks had suggestions, we worked on those together and voted on them. Ultimately, this is forwarded to MPAC. I will review notes of the meeting with your initial thoughts shared and bring some of that in a list to you as a starting point for this list of topic areas. But I hope that you'll come with more of those. It's very possible that I may ask for a straw poll on the first question about this recommendation to expand the UGB just to get us started and see where everybody is at. We might start the meeting that way. I also want to hear any proposals that you've brought with you. We'll go from there at the meeting on the 18th.

Nina Carlson noted I see the growth report in two separate sections, the residential and the industrial. Do we have to approve it all, such as make recommendations on the whole thing total? Chair Kehe noted in terms of expansion of the UGB, what's on the table right now is a full expansion for Sherwood West. That includes their employment areas and their housing areas. That' what's on the table. That's what I'm asking you to respond to. Could you respond to something that's separate? You could bring in part but not the other, yes. That's an adjustment that you could suggest. With bringing this information in front of MPAC it can help inform their decision. As a technical group your role is to provide your technical expertise to MPAC. I think by discussing these topic areas and your thoughts about potential conditions it can be helpful.

Adjournment

There being no further business, meeting was adjourned by Chair Kehe at 11:03 a.m.
Respectfully submitted,

Marie Miller

Agenda

Metro
600 NE Grand Ave.
Portland, OR 97232-2736

Meeting:	Metro Technical Advisory Committee (MTAC)
Date:	Wednesday, August 28, 2024
Time:	9:00 a.m. to 12:00 p.m.
Place:	Virtual meeting held via Zoom
	video recording is available online within a week of meeting
	Connect with Zoom Passcode: 982966 Phone: 888-475-4499 (Toll Free)

9:00 a.m. **Call meeting to order, Declaration of Quorum and Introductions** — Chair Kehe

9:10 a.m. **Comments from the Chair and Committee Members**

- UGB Decision Schedule (Chair Kehe)
- Updates from committee members around the Region (all)

Public communications on agenda items

Consideration of MTAC minutes, July 17, 2024 — Chair Kehe

9:25 a.m. **Urban Growth Management Decision: Metro Chief Operating Officer recommendation** — Ted Reid, Metro

Purpose: To share and explain the urban growth boundary recommendation from Metro's Chief Operating Officer and initiate discussion prior to MTAC forms a technical recommendation for MPAC in September.

Packet materials for this agenda item on the August 28 meeting will be later than usual. This is because we intend to provide the Metro Chief Operating Officer (COO) recommendations for the 2024 urban growth management decision. However, those recommendations are not yet completed because the public comment period on the draft 2024 Urban Growth Report does not conclude until August 22. ***We intend to release the COO recommendations on Monday, August 26 and will email it to you then.***

11:00 a.m. **Adjournment** — Chair Kehe

Metro respects civil rights

Metro fully complies with Title VI of the Civil Rights Act of 1964, Title II of the Americans with Disabilities Act , Section 504 of the Rehabilitation Act and other statutes that ban discrimination. If any person believes they have been discriminated against regarding the receipt of benefits or services because of race, color, national origin, sex, age or disability, they have the right to file a complaint with Metro. For information on Metro's civil rights program, or to obtain a discrimination complaint form, visit oregonmetro.gov/civilrights or call 503-797-1890. Metro provides services or accommodations upon request to persons with disabilities and people who need an interpreter at public meetings. If you need a sign language interpreter, communication aid or language assistance, call 503-797-1890 or TDD/TTY 503-797-1804 (8 a.m. to 5 p.m. weekdays) 5 business days before the meeting. All Metro meetings are wheelchair accessible. Individuals with service animals are welcome at Metro facilities, even where pets are generally prohibited. 2024 Urban Growth Management Decision: Metro Chief Operating Officer/Staff Recommendations

August 26, 2024

Metro respects civil rights

Metro fully complies with Title VI of the Civil Rights Act of 1964 that requires that no person be excluded from the participation in, be denied the benefits of, or be otherwise subjected to discrimination on the basis of race, color or national origin under any program or activity for which Metro receives federal financial assistance.

Metro fully complies with Title II of the Americans with Disabilities Act and Section 504 of the Rehabilitation Act that requires that no otherwise qualified individual with a disability be excluded from the participation in, be denied the benefits of, or be subjected to discrimination solely by reason of their disability under any program or activity for which Metro receives federal financial assistance. If any person believes they have been discriminated against regarding the receipt of benefits or services because of race, color, national origin, sex, age or disability, they have the right to file a complaint with Metro. For information on Metro's civil rights program, or to obtain a discrimination complaint form, visit oregonmetro.gov/civilrights or call 503-797-1890.

Metro provides services or accommodations upon request to persons with disabilities and people who need an interpreter at public meetings. If you need a sign language interpreter, communication aid or language assistance, call 503-797-1700 or TDD/TTY 503-797-1804 (8 a.m. to 5 p.m. weekdays) 5 business days before the meeting. All Metro meetings are wheelchair accessible. For up-to-date public transportation information, visit TriMet's website at trimet.org.

COO: Metro Chief Operating Officer
CORE: Committee on Racial Equity
MPAC: Metro Policy Advisory Committee
MTAC: Metro Technical Advisory Committee
UGB: urban growth boundary
UGR: Urban Growth Report

A DELIBERATE APPROACH TO GROWTH

Under Oregon state land use law, the Metro Regional Government ("Metro") is charged with making decisions about whether to expand the urban growth boundary (UGB) in the greater Portland region. This communication from Metro's Chief Operating Officer contains the staff recommendation to the Metro Council regarding the need for a UGB expansion and the City of Sherwood's 2024 proposal to address that need.

The urban growth boundary has long been one of Metro's most important tools for focusing the development of new homes and businesses in existing downtowns, main streets, and employment areas. Residents of the region have told us time and again to hold this priority: make the most of the land inside the boundary so that outward growth on the urban edge only happens when it is necessary and provides benefit for the entire region. This deliberate approach is crucial for strengthening existing communities, protecting farms and forests, and reducing greenhouse gas emissions.

According to state law, Metro is required to make a decision about whether to expand the UGB at least every six years. In making these decisions, Metro must provide up-to-date information about demographics, population and employment growth, development trends, and estimates of buildable land inside the UGB. This thorough assessment of whether there is a regional need for expanding the UGB is not only required by law – it is central to the greater Portland region's identity. When new growth occurs at the edges of the urban growth boundary, it should be necessary, planned, and deliberate.

Today, the greater Portland region is facing a housing shortage crisis. In addition, there is agreement across the region that attracting more family-wage industrial jobs will help our communities thrive. However, it is also clear that simply providing more land won't necessarily result in jobs and housing. Experience has shown that certain conditions must be in place to ensure that UGB expansion areas produce housing and jobs in a near term time frame. Time and time again we have seen that development occurs successfully where there is a commitment from city leaders and community members, where there is a plan for paying for needed infrastructure, and where there is market demand. If these ingredients aren't present, new urban growth is extremely slow if it happens at all.

For those reasons, in 2010 the Metro Council adopted a policy to only expand the UGB into urban reserve areas that have been concept planned by a local government and that demonstrate readiness to be developed. In the current 2024 UGB cycle, the City of Sherwood is the only city that has prepared a concept plan and proposed a UGB expansion, and they have shown that these elements are in place. Sherwood's readiness for new urban growth provides an opportunity to address the regional land needs identified in the draft 2024 Urban Growth Report (UGR).

Consequently, Metro staff recommend that the Metro Council consider expanding the UGB to include the Sherwood West urban reserve. Staff further recommend that the Council consider placing conditions on this expansion to ensure that the land is used efficiently and will support regionally identified needs. These conditions could reinforce the City of Sherwood's concept plan for the expansion area by improving housing affordability and protecting industrial lands so that they produce well-paying jobs in the manufacturing sector.

The information that follows sets out the reasoning behind this recommendation and lays the groundwork for the Metro Council to consider potential conditions of approval.

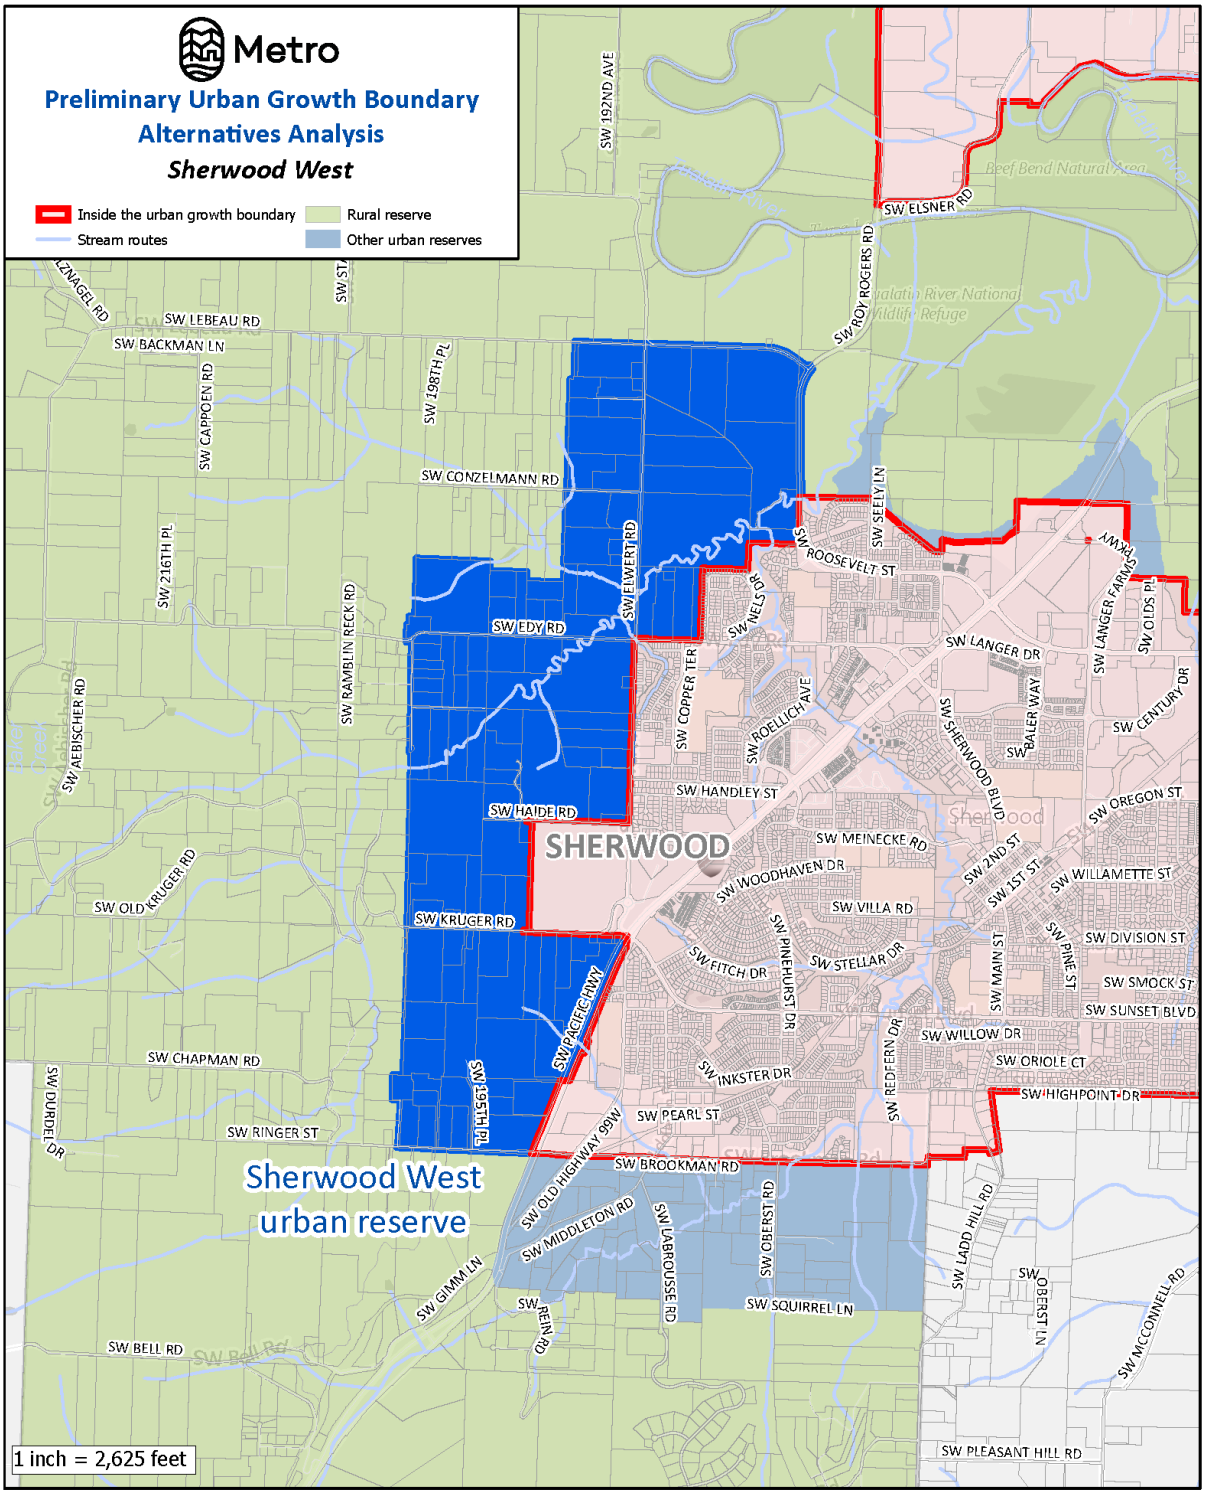
ADAPTING AND IMPROVING OUR GROWTH MANAGEMENT PROCESS

Our region's deliberate approach to growth has paid dividends for people who call this region home by helping to maintain a unique connection to nature and a high quality of life. However, as the world changes, our approach to managing growth must change too. In response to evolving needs and conditions over the years, Metro and its partners have collaborated to make improvements to the urban growth management process such as:

- Working with our regional partners to identify designated urban reserves and rural reserves that provide certainty about where the UGB may or may not be expanded over the coming decades.
- Using a 'range' forecast to acknowledge that there is inherent uncertainty in estimating future growth over the next 20 years.
- Encouraging more timely housing and business development in UGB expansion areas by requiring that a local jurisdiction complete a concept plan for an urban reserve before the area is brought into the boundary.
- Providing grant funding to cities to support local concept planning and comprehensive planning efforts.
- Adopting a fast-track expansion process for adding large industrial sites to the UGB to respond to near term opportunities.
- Providing an off-cycle UGB amendment process to address unanticipated non-residential land needs such as those identified by school districts.
- Creating a mid-cycle UGB process to be responsive to city proposals for addressing unanticipated residential land needs between the designated 6-year scheduled approval process.
- Clearly specifying in Metro's Code the factors that cities must address in UGB expansion proposals.
- Completing a land exchange in 2023 that brought concept planned land within an urban reserve inside the UGB and removed unplanned land to ensure more of the land inside the UGB will produce housing.

- Continually improving technical analyses to reflect new practices, including how to forecast redevelopment potential and estimate current and future housing needs.
- Examining regional needs for industrial lands with specific site characteristics and applying that information to evaluate expansion proposals.
- As with the forecast, using a range of estimates to acknowledge the inherent uncertainty in predicting growth capacity within the UGB.
- Increasing transparency by convening the 2024 Urban Growth Report Roundtable, comprised of diverse expertise and interests.
- Elevating youth perspectives and building future leaders by convening a UGB Youth Cohort in 2024.

One of the characteristics that makes our region unique is our ability to collaborate and work together to adapt and modernize our systems to respond to changing conditions.



CITY OF SHERWOOD READINESS

Based on the draft 2024 Urban Growth Report (UGR) in addition to discussions at the Metro Council, MPAC, MTAC and the Urban Growth Report Roundtable as well as comments received during the public comment period, Metro staff believe there is a regional need to expand the UGB to provide more land for housing and job growth. Staff also encourage the Metro Council to set clear expectations for areas added to the boundary, so the expansion addresses not just local interests, but regional needs.

The City of Sherwood has completed extensive work to propose a UGB expansion for the Metro Council's consideration. The expansion proposal indicates that Sherwood is ready to take meaningful steps toward getting homes and businesses built in the proposed UGB expansion area. The Sherwood West Concept Plan includes proposed land uses to support up to approximately 5,500 housing units and 4,500 jobs. For those reasons, staff recommend that the Metro Council consider expanding the region's UGB to include the Sherwood West urban reserve.

Considerable work remains if the Metro Council chooses to add this area to the UGB. As part of this recommendation, staff encourage the Council to identify conditions ensuring that land added to the UGB will address a range of housing needs and provide industrial sites likely to attract family wage manufacturing jobs.

Figure 1: Recommended UGB expansion in the Sherwood West urban reserve

The information on this map was derived from digital databases on Metro's GIS. Care was taken in the creation of this map. Metro cannot accept any responsibility for errors, omissions, or positional accuracy. There are no warranties, expressed or implied, including the warranty of merchantability or fitness for a particular purpose, accompanying this product.

The following pages of this report describe additional considerations that inform this staff recommendation.

THE REGION NEEDS MORE HOUSING OF ALL TYPES

It is well known that there is a national housing shortage, as well as housing shortages in Oregon and in the greater Portland region. This is reflected in housing prices and rents that remain high and in the growing number of people experiencing housing instability or houselessness. With the expectation that population growth will continue in our region – irrespective of the rate of that growth – we need more housing to be built.

The vitality of every community depends on having a diverse range of people from all backgrounds doing a broad range of work: teachers, contractors, daycare providers, nurses, and grocery store workers to name a few. As home prices rise and demand outstrips supply, we need to do more to provide housing opportunities for these essential workers in every community. Likewise, we need to provide housing options that suit people from all life stages: students seeking rental housing, growing families that need an additional bedroom, retirees seeking to downsize but remain in their community.

The primary question addressed by the Urban Growth Report is not just whether more housing is needed but whether there is enough space inside the existing UGB to meet that need. Land already available within the UGB provides opportunities for a diverse range of housing. The region's track record, as documented in the 2024 UGR, shows that there is considerable market demand for urban housing close to transit, services, and amenities. Recent statewide allowances for 'middle housing' such as townhouses and duplexes are producing results, and we expect that more of these housing options will be provided in the future.

The draft UGR also indicates that, depending on our assumptions about the future, there is potentially a need for additional land to meet the region's need for additional housing. As we consider bringing new areas into the UGB, we must make sure those areas will address the needs of a wide variety of households.

REGIONAL NEED FOR UGB EXPANSIONS FOR HOUSING

Under state law, the UGB can only be expanded when there is a demonstrated regional need for additional capacity to accommodate the next 20 years of forecasted growth. The analysis in the draft 2024 UGR's range of growth estimates shows that the Metro Council has the latitude to determine that a need for more land exists.

Housing capacity

The draft 2024 UGR describes a range of possible housing growth capacity currently available within the urban growth boundary. The specific amount of housing capacity available within that range depends on expected market conditions and development responses. Consistent with the recommendation to plan for the baseline forecast described in the following

paragraph, staff recommend capacity assumptions that fall within the middle of the ranges established in the draft 2024 UGR.

For the 2024 growth management decision, staff recommend that the Metro Council base their decision on a finding that there is capacity inside the UGB for 175,500 additional homes. Details about that assumed growth capacity can be found in Attachment 1 to this recommendation and in the draft 2024 UGR.

Household forecast and capture rate

As a basis for this growth management decision, staff recommend that the Metro Council plan for the baseline forecast for the seven-county Metropolitan Statistical Area (MSA) for the 2024 to 2044 period. The baseline forecast describes the most likely amount of growth for the region. This means planning for approximately 315,000 more people and 203,500 more households in the MSA.

The UGB "capture rate" is used to describe the share of seven-county household growth that is expected to occur in the Metro UGB. For discussion purposes, the draft 2024 UGR scenarios assumed a 70 percent UGB capture rate. Staff have heard partner opinions and share optimism that the region will regain its reputation as an attractive place to live and work. Staff therefore recommend that the Metro Council consider planning to accommodate slightly more than 70 percent of the MSA's household growth in the Metro UGB.

Notwithstanding recent declines after the pandemic-induced recession, this would represent a continuation of the historic upward trend in Metro's UGB capture rate for household growth. Adding the Sherwood West urban reserve to the UGB can provide a means of achieving this slightly higher capture rate by attracting household growth that may otherwise occur outside of the Metro UGB.

Staff recommend that the Council plan for 176,500 to 180,800 additional homes in the Metro UGB to meet current and future housing needs. Additional details about how those numbers are derived can be found in Attachment 1 and in the draft 2024 UGR.

Housing capacity deficits

Comparing UGB housing growth capacity (175,500 homes) and housing needs (176,500 to 180,800 additional homes) indicates a potential deficit of capacity for 1,000 to 5,300 homes. Additional details about those deficits can be found in Attachment 1.

Depending on the mix of housing it includes, the Sherwood West urban reserve could meet the range of identified regional housing capacity deficits. The adopted Sherwood West Concept Plan describes a range of 3,117 (9.2 dwelling units/acre) to 5,582 (16.4 dwelling units/acre) homes.

PLANNING FOR JOB GROWTH

Future job growth requires more workers to fill those jobs. This means that our job growth forecast should be generally consistent with our expectations for population growth. Consequently, as with population and household growth, staff recommend planning for the baseline employment forecast, which estimates the most likely growth scenario.

Today, there are approximately 1,261,200 jobs[1] in the seven-county MSA. Staff recommend planning for an increase of approximately 110,000 jobs, for a total of 1,371,400 jobs in the MSA by the year 2044.

Based on long-term trends, staff recommend planning for 75% of the new MSA-level jobs in the Metro UGB.[2] Today, there are approximately 996,600 jobs in the Metro UGB. By 2044, an additional 82,500 new jobs are anticipated, for a total of 1,079,000 jobs within the Metro UGB.

NEED FOR LARGE INDUSTRIAL SITES TO ACCOMMODATE HIGH-TECH MANUFACTURING GROWTH

Using the baseline employment forecast, the draft 2024 UGR identifies a surplus of 4,550 acres of industrial land in the region. However, as also explained in the draft UGR, most of the region's industrial land supply consists of smaller parcels with an average lot size of 3.8 acres and a median lot size of 1.7 acres. Although these smaller industrial spaces are in demand, they cannot serve the needs of the entire industrial market. The draft UGR describes a shortage of larger industrial sites for the expansion of existing businesses and recruitment of companies from outside the region; in particular, there is a lack of unconstrained parcels with relatively flat slopes and proximity to transportation facilities that could be aggregated into larger 50+ acre industrial sites.

The 2022 Oregon Semiconductor Taskforce Report identified a statewide need for four sites of 50 to 100 acres suitable for high tech manufacturers. As described in the draft UGR, the greater Portland region is the heart of the state's high-tech economy; however, the current regional inventory does not include enough industrial sites with characteristics that are suitable for addressing this need.

High tech manufacturing has become a major focus of incentive programs from the federal government designed to increase domestic production of critical technologies. Our region has significant competitive advantages in designing and manufacturing technologies to help adapt to and mitigate climate change and improve global connectivity. Staff analysis indicates that our region lacks enough available and unconstrained sites of sufficient size, slope, and proximity to

[1] These figures are for non-farm jobs because the task of growth management decisions is to estimate land need for urban uses.

[2] The draft 2024 UGR employment land demand analysis incorporates different UGB capture rates for different sectors. 75% is the historic UGB capture rate for the 1979-2022 period across all non-farm sectors.

existing transportation facilities and high-tech manufacturing clusters to allow for growth of these critical industries over the next 20 years. A lack of available sites would be a limiting factor in our region's ability to take advantage of historic incentives to support economic development.

Under Statewide Planning Goal 14, Metro is authorized to expand the UGB onto land that is suitable to meet a particular identified need based on specific site characteristics. Staff recommend that, based on the necessary site characteristics described above, the Metro Council address a need for two 50+ acre sites by expanding the UGB to include the mixed employment area in the north end of the Sherwood West concept plan. Staff further recommend that the Metro Council consider conditions of approval to protect these important large sites to help ensure that they will address the identified need.

ADDITIONAL LANDS TO SUPPORT COMMERCIAL JOB GROWTH

The draft 2024 UGR identified a baseline deficit of 320 buildable acres to support expected commercial job growth. Sherwood has included at least 135 acres for commercial employment in its concept plan. Staff recommend that the Metro Council address the commercial land need described in the UGR by expanding the UGB to include the Sherwood West urban reserve. The remaining deficit beyond that addressed by a potential expansion is within the margin of error for a long-range land need analysis. To the extent that there may be additional demand for commercial land, staff expect that demand would be addressed through additional redevelopment.

POTENTIAL UGB CONDITIONS OF APPROVAL

With the goal of expanding housing choices and reducing housing costs, protecting industrial sites, and continuously improving engagement for planning efforts, staff recommend that the Council consider conditions on the proposed UGB expansion. The bullets below provide suggestions for several topics that could be addressed by conditions of approval. Generally, these recommended conditions reinforce the work that the City of Sherwood has done in its Sherwood West Concept Plan. For example:

- In order to achieve a mix of housing types, the Metro Council could establish an expectation for a minimum number of homes. This could fall within the range proposed by the City of Sherwood's adopted Sherwood West Concept Plan (base density of 9.2 units per acre to a maximum density of 16.4 units per acre). The difference between these reflects the actualization of "missing middle" housing allowed by HB 2001 (2019). The city of Sherwood would determine housing mix details in their comprehensive planning process.
- The greater Portland region is in an affordable housing crisis. We need more housing options for people who make less than the region's median income (currently $116,900 for a family of four). Sherwood elected officials and staff have expressed an interest in

creating opportunities to live and work in their community. That will require us to work together to ensure housing affordability and not just leave it up to the market. The Metro Council could set out conditions to guide this work.

- Staff's recommendation to create and protect large industrial sites is intended to achieve widely shared goals to grow our region's high-tech manufacturing sectors. The Metro Council could consider specific goals or restrictions to make sure this happens.
- Creating inclusive communities means bringing a variety of perspectives into the planning process. Staff recommend a broad-based approach to community engagement that goes beyond collecting input from those who currently live near the expansion or those who have typically engaged in city planning – and include community members and Community Based Organizations representing historically marginalized groups. Staff also recommend inviting interested Tribes to engage in the city's planning processes.

ADDITIONAL RECOMMENDATIONS

Improve how we assess equity in growth management decisions

For many years, Metro has had the goal of addressing racial equity in its work, including urban growth management decisions. We've tried several approaches including:

- Using the Regional Equity Atlas to provide decision makers with contextual information.
- Requiring cities proposing expansions to describe how they are working to advance racial equity.
- When we've expanded the UGB, requiring and supporting cities in conducting broad-based community engagement for their comprehensive planning.
- Assessing equity outcomes in past UGB expansion areas.

In keeping with our tradition of always seeking to learn and do better, staff recommend that Metro Council direct staff to work with its advisory committees to identify possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to complete equity assessments when concept planning for new urban areas.

Consult with Tribes

Tribes are independent sovereigns with inherent powers of self-government and relationships with the U.S. government that derive from treaties, federal law and executive orders. These Federal-Tribal relations are political and do not derive from race or ethnicity. Treaties are listed among the elements that make up "the supreme law of the land" under Article VI of the U.S. Constitution.

The lands now known as the greater Portland metropolitan area are part of the aboriginal homelands, traditional use areas and trade networks of numerous Tribes. For millennia, Indian people resided throughout the Willamette Valley and along the Willamette and Columbia Rivers

and their tributaries in traditional villages, permanent communities and seasonal encampments. The relationship of Tribes, their lands and interests extend from time immemorial to the present day and beyond. Each Tribe's interests are distinct. These interests may overlap and intersect with the urban growth boundary in various ways.

Metro and other local governments need to do a better job of consulting with Tribes on growth management and land use issues that have the potential to impact tribal interests and priorities such as treaty rights, the protection of sensitive cultural resources, or enhancing the welfare of tribal members residing in urban areas off reservation. For that reason, staff recommend that Metro Council direct staff to work with interested Tribes, Metro's Tribal Affairs program and its advisory committees to identify possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to consult with Tribes when concept planning and comprehensive planning new urban areas. Staff also recommend that Metro identify opportunities to ensure and improve Metro's Urban Growth Report technical analyses are inclusive of relevant tribal priorities, expertise, and data sets.

Revise how we accounted for slopes on employment lands

Recent discussions at the UGR Roundtable and the Metro Policy Advisory Committee (MPAC) have raised questions about the assumptions staff make when inventorying buildable employment lands. We have heard questions about our assumed thresholds for steep slopes and whether some of those lands are viable for development.

Based on their professional expertise and review of other jurisdiction's work, Oregon Department of Land Conservation and Development staff have recently advised Metro to use a 10% slope threshold when inventorying buildable employment lands. Staff will revise the UGR analysis of employment land capacity to follow that advice. That revised analysis will be included in the final UGR presented for Metro Council adoption later this year.

Using this more conservative slope threshold does not change the analysis in the draft 2024 UGR that the baseline forecast indicates there is enough industrially-zoned land inside the UGB to match generally expected job growth, at least before assessing a more specific need for additional land with particular site characteristics. Most importantly, it doesn't change the fact that we collectively need to focus on the investments and actions necessary to make sure more of these employment lands are shovel-ready to capitalize on economic development opportunities. That includes necessary regional discussions about site aggregation, brownfield remediation, infrastructure financing, zoning changes, incentive programs and more.

Update the region's vision for its future

Our region had the foresight 30 years ago to adopt the region's Future Vision and 2040 Growth Concept. These long-range plans helped guide how greater Portland has responded to population growth in a way that reflects shared community values. The Growth Concept has

served us well and has positioned us to address the challenges of climate change and racial equity, but we know there's more work to be done to prepare for these and other future issues.

A lot has changed since the region adopted the Future Vision and the 2040 Growth Concept. Staff will bring a work program to Metro Council to renew the Future Vision and 2040 Growth Concept in Fall 2024. This work will help address many, though not all, topics and potential actions that came up while developing this urban growth management recommendation.

This work program should include an assessment of how these existing plans have performed for the region's residents: what has worked well or turned out as envisioned, and where there is still work to do or turned out differently from the vision. While we believe the fundamentals of the Vision and Growth Concept are still relevant, it is essential to demonstrate this through study.

Planning for 25 and 50 years in the future also requires understanding where today's trends may potentially take the region. The work program should include investigation of how climate change, demographics, technology, and other topics will change in the coming decades and how visioning can prepare the region to adapt to these shifts.

The updates of these long-range plans must also capture topic areas not currently addressed in the 1995 versions of these documents that are of greater importance and interest today. These include, but are not limited to: racial equity, climate resilience and adaptation, arts and culture, anti-displacement strategies, and Tribal relations. Updates must also address how Metro's purview has changed since 1995 to encompass major roles in the region's housing and parks and natural areas.

PUBLIC COMMENTS

Metro held a public comment period from the release of the draft UGR on July 9 through August 22. 349 survey responses were received during this period. We heard a variety of viewpoints about the draft Urban Growth report and the City of Sherwood's expansion proposal. Themes from comments about the expansion proposal include:

- Optimism about future growth potential, including the potential for a resurgence of high-tech manufacturing
- Interest in more housing and job opportunities in Sherwood, including housing choices for seniors, young families and other demographic groups
- Concern about the impacts of a potential UGB expansion on traffic, with the lack of transit options available in Sherwood
- Concern about impacts on farmland and agricultural activities
- Importance of housing affordability
- Concern about impacts on the environment and climate change
- Concern about impacts of new development on existing public infrastructure leading to tax increases for current residents
- Concern about potential impacts on schools

- Recommendation to use land within the UGB before expanding

We also received input about the methodology of the draft UGR. Themes include: suggestions for different approaches to the buildable land inventory, population projections, and density estimates.

These comments highlight the variety of issues that need to be balanced by the UGR. While this staff recommendation does not address every technical topic raised, it acknowledges that the UGR is a point-in-time document that seeks to balance interests and provide a reasonable range of estimates for the Metro Council to determine whether to expand the UGB and accept the City of Sherwood's proposal.

TIMELINE (SUBJECT TO CHANGE)

August 26, 2024:	Release COO recommendation
August 28, 2024:	MTAC discussion of COO recommendation and public comment themes
September 5, 2024:	Council work session on COO recommendations and public comment themes; (*full public comment summary provided at Council meeting*)
September 11, 2024:	MPAC discussion of COO recommendation and recommendations to Council; request any final MTAC advice
September 18, 2024:	MTAC advice to MPAC, if requested
September 19, 2024:	CORE recommendation to Council
September 25, 2024:	MPAC recommendation to Council
September 26, 2024:	Council holds public hearing on COO recommendations
October 8, 2024:	Council provides direction to staff at work session
November 21, 2024:	Council first reading of ordinance; public hearing
December 5, 2024:	Council second reading of ordinance; decision

ATTACHMENT 1: HOUSING CAPACITY, NEED, AND DEFICIT ASSUMPTION DETAILS

The tables below include specific numbers, but long-term estimates cannot be expressed this precisely. For that reason, the final totals are rounded to the nearest hundred.

Table 1: Recommended housing capacity assumptions (Metro UGB, 2024-2044)

	UGB Capacity Assumptions (number of homes)			
	single-detached	middle housing	multifamily	Total
Vacant land (larger mix of single-unit detached)	34,944	13,228	42,970	91,142
Redevelopment (Baseline)	12,292	11,727	24,382	48,400
Concept plan areas and planned development on vacant land	9,096	6,662	4,138	19,896
Other planned redevelopment	135	172	9,830	10,137
Office-to-residential conversion (baseline)	-	-	1,000	1,000
ADUs and middle housing conversion/infill (low)	-	4,955	-	4,955
Total UGB capacity (rounded)	**56,500**	**36,700**	**82,300**	**175,500**
Capacity housing mix	32%	21%	47%	100%

Table 2: Recommended Metro region current and future housing need assumptions (2024-2044)

7-county MSA baseline household growth (2024-2044)	203,530
Future household growth in Metro UGB (70% to 72% Metro UGB capture)	142,500 to 146,500
Add 5% vacancy rate (to convert future households to homes)	7,100 to 7,400
Subtotal of UGB future housing needs (number of homes)	149,600 to 153,900
Add current housing needs (underproduction, houselessness, 2nd and vacation rentals)	26,953
Total current and future UGB housing need (2024-2044, rounded)	176,500 to 180,800

Table 3: Metro UGB current and future housing need and deficit assuming 70% UGB capture

	UGB Housing Need at 70% UGB Capture			
	single-detached	middle housing	multifamily	Total
Future need: baseline forecast (see Table 1)	56,846	32,911	59,838	149,594
Units lost to 2nd and vacation homes	1,072	1,769	443	3,285
Historic underproduction	726	2,089	12,160	14,975
Households experiencing houselessness	-	40	8,653	8,693
Total Housing Need (rounded)	**58,600**	**36,800**	**81,100**	**176,500**
Needed housing mix	33%	21%	46%	100%
Total UGB capacity (rounded)	56,500	36,700	82,300	175,500
Deficits (rounded)	**(2,200)**	**(100)**	**1,200**	**(1,000)**

Table 4: Metro UGB current and future housing need and deficit assuming 72% UGB capture

	UGB Housing Need at 72% UGB Capture			
	single-detached	middle housing	multifamily	Total
Future need: baseline forecast (see Table 1)	58,470	33,851	61,547	153,868
Units lost to 2nd and vacation homes	1,072	1,769	443	3,285
Historic underproduction	726	2,089	12,160	14,975
Households experiencing houselessness	-	40	8,653	8,693
Total Housing Need (rounded)	**60,300**	**37,700**	**82,800**	**180,800**
Needed housing mix	33%	21%	46%	100%
Total UGB capacity (rounded)	56,500	36,700	82,300	175,500
Deficits (rounded)	**(3,800)**	**(1,000)**	**(500)**	**(5,300)**

If you picnic at Blue Lake or take your kids to the Oregon Zoo, enjoy symphonies at the Schnitz or auto shows at the convention center, put out your trash or drive your car – we've already crossed paths.

So, hello. We're Metro – nice to meet you.

In a metropolitan area as big as Portland, we can do a lot of things better together. Join us to help the region prepare for a happy, healthy future.

Stay in touch with news, stories, and things to do.

RE: Urban Growth Decision – Metro COO / Staff Recommendation and Conditions of Approval

Dear Chair Kehe and MTAC Members,

Thank you for the opportunity to review 2024 Urban Growth Decision COO / Staff Recommendation. The recommendation includes density references for Sherwood West that require clarification and correction.

- Pages 6 and 8 of the recommendation refer to a "base density" of 9.2 units per acre. The minimum density in the Sherwood West Concept Plan is 6.2 units per acre (Table 4, Sherwood West Concept Plan).
- The high-end density range of 16.4 units per acre would require 50% middle housing production in residential zones pursuant to HB 2001 (Table 4, Sherwood West Concept Plan). The plan indicates a realistic percentage is between 5 – 10% given current market conditions. The final density amount of middle housing will be determined through land use applications and building permits after planning for a minimum density has occurred.

The recommendation states that the Metro Council could choose to reinforce the Sherwood West Concept Plan by requiring a minimum density, ranging from 9.2 to 16.4 units per acre. Any condition of approval that requires a minimum density above 6.2 units per acre would no longer be reinforcing Sherwood's proposal but would be requiring a new minimum density.

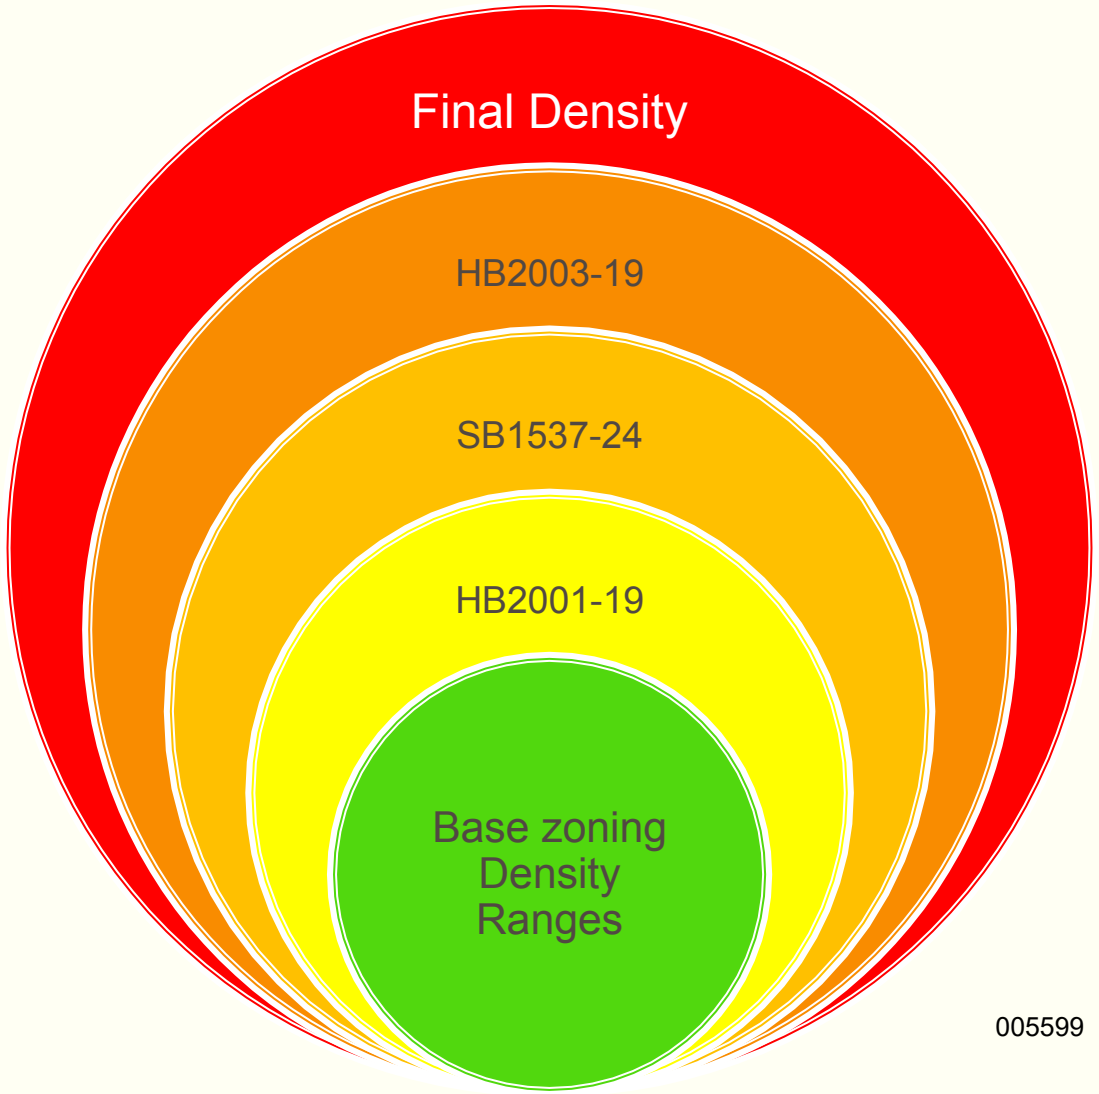
Sherwood is concerned that requiring a minimum density that is materially higher than what was reviewed and approved by the Sherwood West TAC and CAC, Planning Commission, and City Council, would be contrary to Statewide Planning Goal 1 (Citizen Involvement). The Sherwood West Concept Plan satisfied Goal 1 through a robust 2-year planning process, culminating in unanimous approvals by the Sherwood Planning Commission and City Council. Any condition of approval

that modifies the plan and increases the minimum density has not been informed by robust community engagement with the Sherwood community.

Since requiring concept plans in 2010, Metro has never required a higher density than what was proposed by the local jurisdiction, with the exception of a 3 unit increase in Frog Pond and a 40 unit increase in With Hazel Village South. Both increases did not materially change the nature of the community being planned by the local jurisdiction. Attachment A shows how Sherwood West and the proposed conditions of approval compare to other recently approved concept plans.

Sincerely,

Eric Rutledge
Community Development Director
City of Sherwood



Attachments
A. Concept Plan Comparison
B. Legislative Impacts to Minimum Density
C. Detailed Table Clarifying Sherwood West Density and Impacts of HB 2001

2018 / 2023 UGB Expansions

Proposed Unit Count and Associated Conditions of Approval

	Proposed Units	COA
Frog Pond	1,322	1,325
Cooper Mountain	3,760	3,760
River Terrace	4,546	3,000
Witch Hazel Village South	810	850
Sherwood West	2,139	3,117 - 5,500

Planning Vs. Post Planning Regulatory Impacts

005599

Our future adopted comprehensive plan serves as the starting point for land use and development. However, state legislation such as HB 2001, HB 2003, and SB 1537 will inevitably increase density beyond what was originally planned.

- **HB 2001**: Allows for middle housing, boosting density in single-family zones.
- **HB 2003**: Requires housing strategies that meet affordability targets and may intensify density over time.
- **SB 1537**: Offers variances that can increase density, lot size, building height, reduced community space, etc..

These regulations inherently lift density, influencing long-term development beyond our original plans.

Sherwood Concept Plan – Post Planning Impacts

Sherwood West Concept Plan Expanded Housing Production Analysis

Zoning	Net Acres	Denisty Analysis		Housing Units Analysis						Housing Units with Potential HB2001 Impact					
		Units Per Acre		Housing Units						10%		20%		50%	
		Low	High	Low	%		High	%		Low	High	Low	High	Low	High
Multi-family	33	16.8	24	555	26%	44%	792	25%	43%	555	792	555	792	555	792
Middle Housing	16	5.5	11	88	4%	MF&HD	176	6%	MF&HD	88	176	88	176	88	176
Cottage Cluster	23	12.8	16	295	14%	Zones	368	12%	Zones	295	368	295	368	295	368
Med/High Density	23	5.5	11	126	6%	56%	253	8%	57%	139	279	152	311	190	406
Medium Density	102	5.6	8	571	27%	SFD	816	26%	SFD	693	990	815	1163	1180	1683
Low Density	144	3.5	5	504	24%	Zones	720	23%	Zones	706	1008	706	1296	1512	2160
Total	**341**			**2,139**			**3,125**			2476	3612	2610	4105	3820	5585
			Net Density:	**6.3**		**Net Density:**	**9.2**			7.3	10.6	7.7	12.0	11.2	16.4

The Sherwood Concept Plan sets baseline densities, but HB2001 will significantly increase units beyond these planned levels, especially in medium and low-density zones. The plan is a starting point, with post-planning regulatory impacts driving further density.

SUBJECT: Urban Growth Report Draft Comments

To Whom it May Concern:

I apologize that I was unable to share my comments during the 8/28 MTAC meeting due to a conflict but wanted to forward some comments based on my review to-date of the information. These comments reflect my position as an alternate representing private sector economic development organizations.

I have several concerns with the current iteration of the UGR.

- I consider the employment and population forecasts to be both overly pessimistic, and as a result understate the need for employment and residential capacity.
- For the employment forecasts, the rationale for the forecasts is extensively documented but the resulting forecasts are well below those generated by the State of Oregon Employment Department. I also am uncomfortable with the distribution of growth by sector, which has a substantive impact on the nature of employment land needs.
- The population growth estimates are partially driven by employment forecasts, and the modest employment forecast depresses the population forecast and associated need for residential capacity.
- The need for employment land is substantively impacted by the assumed work from home assumptions. We find these to be unreasonably high over the forecast period, and they directly decrease the demand for employment capacity within the UGB.
- The focus of the recommendations regarding employment capacity is on the need for large lot manufacturing capacity. I fully agree that this is a need, but manufacturers come with significant supply and distribution chains which require a range of space types.

The underlying growth forecast and assumptions all contribute to a reduced finding of employment capacity need. The State of Oregon allows jurisdictions to be aspirational in their future employment forecasts under Goal 9, and I believe we are far from aspirational in these forecasts. It is possible that the forecasts will prove to be correct, but there is also a risk that the prophecy is self-fulfilling. If you plan for negligible growth, you are more likely to achieve it. I believe the region should actively encourage economic expansion, and the draft UGR does not reflect this.

Sincerely,

Jerry Johnson

Urban growth management: COO/Staff Recommendations

MTAC
August 28, 2024

Project timeline

Technical work and analysis: Developing the urban growth report	City expansion proposals	Metro Council decision
• Buildable land inventory (BLI) • Regional forecast • Capacity analysis • Employment trends and site characteristics • Housing needs analysis • Residential readiness analyses • Draft urban growth report (UGR)	• Letters of interest • Expansion proposals *2040 planning and development grants available*	• Consider Metro staff and advisory group recommendations • Public hearings • Policy direction • Final decision

Engagement

- MTAC
- MPAC
- CORE
- Land Use Technical Advisory Group
- Jurisdictional outreach
- Urban growth report roundtable
- Youth cohort
- Interest group presentations

	July	August	September	October	November	December
Council	Discussion of draft Urban Growth Report *released July 9*	Public comment survey available until August 22 COO/Staff recommendation released August 26	**Public hearing** on COO/Staff recommendation	Council direction on intended decision	Council first reading; **public hearing**	**Council second reading; final decision**
MPAC			Discuss COO/Staff recommendation; *Recommendation to Council*			
MTAC			Discuss COO/Staff recommendation; *Recommendation to MPAC*			
CORE	Discussion with Sherwood staff		Discuss COO/Staff recommendation; *Recommendation to Council*			

Public comment survey themes

- Optimism about **future growth potential**
- Interest in **more housing and job opportunities** in Sherwood
- Importance of **housing affordability**
- **Housing choices** for seniors, young families and other demographic groups
- Impacts of a potential UGB expansion on **traffic,** due to lack of transit options in Sherwood
- Impacts on **farmland and agricultural activities**
- Impacts on the **environment and climate change**
- Impacts of new development on existing **public infrastructure**
- Use **land within the UGB** before expanding

Regional need for housing

- Forecast for 2024-2044
- Baseline UGB capacity: 175,500 homes
- Capture rate: 70% - 72% of growth forecast for the seven-county MSA
- UGB housing demand: 176,500 – 180,800 homes

Capacity gap range

- UGB housing capacity deficits: 1,000 – 5,300 homes

Table 4. Sherwood West Housing Estimates

	Density Range (Net)	Total Acres (Net)	*% of Residential Acres*	Total Housing Units (with % of Middle Housing in Neighborhood areas) 0% MH	10% MH	20% MH	50% MH
Multi-Family	16.8 to 24	33	*10%*	798	798	798	798
Middle Housing	5.5 to 11	16	*5%*	173	173	173	173
Cottage Cluster	12.8 to 16	23	*7%*	362	362	362	362
Med/High Density Nbhd	5.5 to 11	23	*7%*	248	279	311	406
Medium-Density Nbhd	5.6 to 8	102	*30%*	816	990	1,163	1,683
Low-Density Nbhd	3.5 to 5	144	*42%*	720	1,008	1,296	2,160
TOTAL		**340**	***100%***	**3,117**	**3,610**	**4,103**	**5,582**
Total Average Density				*9.2*	*10.6*	*12.1*	*16.4*
Total Average Density with Open Space				*7.8*	*9.0*	*10.3*	*13.9*

005607

Job growth

- Capture rate: 75% of jobs in the MSA
- Anticipating 82,500 new jobs by 2044 in the Metro UGB for a total of 1,079,000 jobs
- Sherwood West Concept Plan: Up to 4,500 jobs

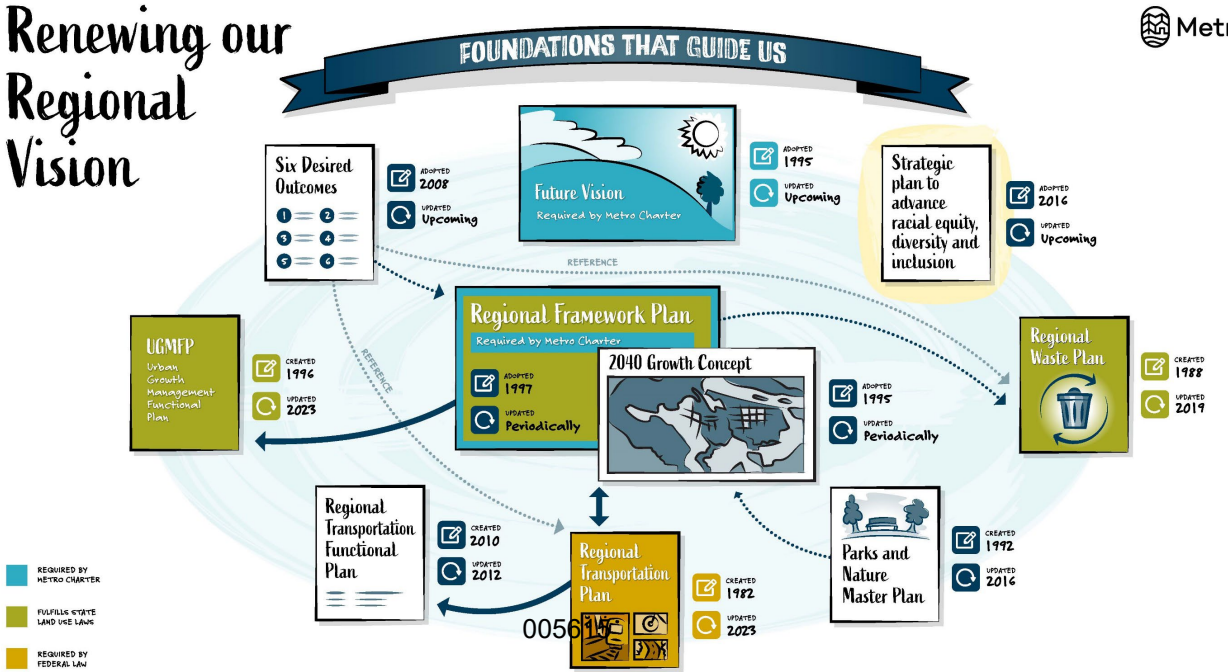
Need for large industrial sites

- Current surplus of industrial land, however, at smaller sizes
  - Average lot size: 3.8 acres; Median lot size: 1.7 acres
- 2022 Oregon Semiconductor Taskforce Report
  - Statewide need for four sites of 50 – 100 acres suitable for high tech manufacturers

Recommendations: Sherwood West

Expand the UGB to include Sherwood West urban reserve

Conditions of approval



- Minimum number of housing units
- Housing affordability
- Protections for large industrial sites to grow the region’s high-tech manufacturing sector
- Broad based community engagement
- Tribal consultation

Additional recommendations

Revise how we accounted for slopes on employment lands

- DLCD advised Metro to use a 10% slope threshold when inventorying buildable employment lands

Update the region's vision for its future

Improve how we assess equity in growth management decisions

- Possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to complete equity assessments when concept planning for new urban areas

Consult with Tribes

- Staff to work with interested Tribes, Metro's Tribal Affairs program and its advisory committees to identify possible amendments to Title 11 of the Urban Growth Management Functional Plan to require local governments to consult with Tribes when concept planning and comprehensive planning new urban areas
- Identify opportunities to ensure and improve Metro's Urban Growth Report technical analyses are inclusive of relevant tribal priorities, expertise, and data sets

Questions?

Next steps

- Provide recommendation to MPAC at meeting on September 18th
  - Agree with recommendation to expand the UGB to include the Sherwood West urban reserve?
  - List of thoughts to share with MPAC on the topic areas for potential conditions of approval
- Meeting in person at Metro Regional Center

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

This household is very much opposed to expanding the Urban Growth Boundary in Sherwood.

According to the Metro's research, there is plenty of industrial land inside the existing UGB for another 20 years. We also have enough vacant land to accommodate new housing and jobs for years if it is planned and developed carefully.

We really enjoy living in Sherwood. It's a beautiful community and would hate to see all the agriculture disappear when it's not necessary.

Please don't expand the UGB.

Thank you.

August 23, 2024

1000 Friends of Oregon appreciates the opportunity to participate in the Urban Growth Stakeholders Roundtable, comment on the urban growth report, and partner with Metro on multiple areas of alignment such as unlocking more funding for critical infrastructure needs, addressing our housing affordability crisis, and bringing more mobility options for Oregonians in a 2025 transportation package.

The Metro Council has an opportunity to set the region up for success for generations to come if it uses one of its strengths: data-driven long-range land use planning. Strong land use planning invites a collective imagination to create the best future possible for all residents, ones that currently call the region home and ones that will call this region home. But the best future possible has always been, and will always be, under threat by a select few seeking to exploit the region's limited resources: whether it be our world-class soils, the water we drink, the air we breathe, or the health and ingenuity of our people.

1000 Friends of Oregon shares our 5 major takeaways for how to set our region up for success as you read the draft urban growth forecast:

1. Metro Council should focus on how to improve the quality of life for all residents now and into the future.

2. The region's natural resources and low weather extremes offer us a position of strength if Metro decides to steward them well.

3. The biggest bang for buck and the quickest way to regional success is to build upon our existing footprint, support our regional network of main streets, and restore the core.

4. Prepare for "Operational Efficiency" and protect people's livelihoods.

5. Raw land is the least of our issues when it comes to setting the region up for success. Land readiness on the other hand…

***

1. Metro Council should focus on how to improve the quality of life for all residents now and into the future. We must remember the entire purpose of good land use planning and community development: to enhance the health, safety, and well-being of all Oregonians. We lose sight of this purpose when conversations are reduced to debating the number of acres. Rather, we should focus on creating measurable and meaningful indicators for success to guide our land use decisions and the limited public and private dollars we have. The region's indicators for success should include:

> **Life Expectancy by Zip Code.** Zip codes still serve as an indicator for how long and how well someone lives in the greater Portland area. Someone's life expectancy in Multnomah County (79.40 years) is less than those living in Clackamas County (80.90 years) and even less than Washington County (82.60 years[1]). Metro Council and staff should be keenly aware of this discrepancy across counties and prioritize resources and staff efforts to help areas that have the lowest life expectancy in the region. Blue Zones research could guide Metro's policy and funding decisions to better understand how to improve life expectancy and quality of life for residents in the region.
>
> **Household Costs/Affordability**. The largest household expense for the average resident is housing. The second largest household expense is transportation. Utilities and food also appear as common expenses. Metro should make land use decisions to help cut down on these household expenses for the average resident. If Metro decides to allow urban growth boundary expansions for residential, industrial, and commercial land where the majority of residents are going to feel the need to drive everywhere,

[1] Robert Wood Johnson Foundation, Accessed August 2024. https://www.rwjf.org/en/insights/our-research/interactives/whereyouliveaffectshowlongyoulive.html

Metro has made a choice to increase the household costs for the average resident. Urban growth boundary expansions not only increase driving at the edge, but they draw away investments that could be made where people already live to increase their transportation options. If Metro decides to fund planning and infrastructure efforts that allow the majority of residents to walk, roll, and bike to where they need and want to be, Metro has made a choice to decrease the household costs for the average resident.

Number and Quality of Age Friendly Communities. As presented to the Urban Growth Stakeholders Roundtable, Oregon enjoys a significant number of residents who are older in age. As our residents age, their needs change. It's no longer easier to drive where they need to get to; incomes become fixed and possibly lower than where they were working full time; and their social and civic participation styles may change.

As the World Health Organization and AARP's Livable Communities note, "age-friendly communities are places where people of all ages [and abilities] feel supported and included, and where older people can age well[2]." Age-friendly communities include three major components: physical (e.g., housing, transportation, outdoor spaces, and amenities); social (e.g., civic representation and participation, community involvement); and service (e.g., health care, emergency response). To create age-friendly communities, the Metro Council and staff should support land use decisions, planning grants, and infrastructure requests that create walkable and rollable neighborhoods where people are able to age in place, get to where they need and want to go safely and on their own, and be connected with their community on their own terms[3]. Orenco Station is a great example of incorporating age-friendly principles into planning and development by combining residential and commercial uses alongside pedestrian, bicycle, and transit investments; in contrast, planning that results in commercial and industrial development with large parking lots requires residents to use automobiles to safely navigate the community and thereby fails to create an age-friendly community.

---

[2] AARP, Livable Communities, https://www.aarp.org/livable-communities/network-age-friendly-communities/

[3] Research demonstrates that placement in a nursing home/care facility drastically reduces the life expectancy for the individual. It also adds significant costs to the individual and any family members who may be paying for this change. A monthly rate for a studio in a housing facility that provides supervision or assistance with activities of daily living is approximately $6,161.91 for the Portland area (compared to the national average: $4,999.01 per month). https://www.newyorklife.com/resources/financial-calculators/costs-of-long-term-care

Number of Communities of Concern in EPA's Environmental Justice (EJ) Screen (or regional equivalent). The Metro Council and staff should be keenly aware of the number and location of communities who are burdened with environmental pollution, climate change risks, health disparities, and critical services gaps. Often, communities ranked in EJ screen are communities that are majority low-income, speak languages other than English, qualify for free and reduced lunch, and are people of color. Metro Council and staff should set a goal to have zero communities in the greater Portland area rank highly in the EJ Screen and develop policies and align investments to reach this goal. Metro Council and staff should reject urban growth boundary expansions and other investment strategies that draw resources away from investing in communities that rank highly in EJ screen.

2. The region's natural resources and low weather extremes offer us a position of strength if Metro decides to steward them well.

The greater Portland area is positioned to be an oasis of refuge from some of the most extreme negative impacts of climate change. This is a major advantage when drawing residents and businesses to the region (even noted by the private sector[4]). While we have much work to do to adapt to the changing conditions to protect the health and safety of residents, the Pacific Northwest is rated as one of the most climate resilient areas in the United States.

Metro Council and staff should build upon our unique position by stewarding our natural resources not just through voter-approved parks and nature bond measures, but through its regulatory authority in its land use decisions. For example, development that does not require high-nutrient soils should not be permitted on these soils[5]. Likewise, Metro Council and staff should coordinate with other natural resource agencies (Soil and Water Conservation Districts, Department of Agriculture, Department of Fish & Wildfire, etc.) to develop a clear, streamlined approach toward monitoring the quantity and quality of our water sources and air sheds. Each of these water sources and air sheds have carrying capacity limits (recognized in Land Use

[4] Visit Quicken Loans for an example of how Portland, Oregon's environmental stewardship and temperate climate risks are used to guide private investment. https://www.quickenloans.com/learn/best-places-to-climate-change

[5] Oregon's own Climate Action Commission has recommended "no net-loss" policy for high-quality farmland to reach our climate mitigation and resilience goals. Institute for Natural Resources at Oregon State University for the Oregon Global Warming Commission. September 26, 2023. https://static1.squarespace.com/static/59c554e0f09ca40655ea6eb0/t/6578da822755f905770c5901/1702419079574/2023-Natural-Working-Lands-Report.pdf

Planning Goal 6). Urban growth expansions should consider the carrying capacity of water resources and airsheds in order to assess and guide growth in the region. For example, if one company within an airshed applies and is awarded a permit to emit carbon monoxide to the top of the allowable limit for the entire airshed, Metro Council and staff must include that information in guiding growth away from that airshed to protect the health of residents and help businesses avoid violations of, at minimum, Clean Air Act and/or Land Use Planning Goal 6.

3. The biggest bang for buck and the quickest way to regional success is to build upon our existing footprint, support our regional network of main streets, and restore the core.

Metro Council and staff must ensure the region contributes to addressing the housing production shortfall and the affordability crisis through a holistic approach (remembering the indicators for successful quality of life including household cost/affordability). Building at the edges won't set the region up for success. And, Metro Council and staff should reject any attempt to expand the boundary or use limited public dollars without any element of guaranteed affordable housing.

We have a limited number of dollars for infrastructure, limited amount of labor for construction, and limited materials for construction. We urge Metro to prioritize developers and/or local jurisdictions who are building partnerships around transformative, catalytic (re)developments as part of holistic land use planning. Some notable opportunities to invest in our existing footprint, support our regional network of main streets, and restore the core include but are not limited to:

(Re)Development	**# of Homes (Est.)**	**Climate Friendly Area? (Y/N)**	**Guaranteed Affordability Component? (Y/N)**
Lloyd Center	5000	Y	Y
Broadway Corridor	2500	Y	Y
OMSI Revitalization District	900	Y	Y
Albina Vision Trust	1100	Y	Y
Hayden Island/Jantzen Beach (I-5 Bridge Corridor)	2000	Y (with light rail and complete street investments)	Y

Rockwood	TBD	TBD	TBD
Jade District	TBD	Y	Y
Gateway	TBD		
Hillsboro's Block 67	269	Y	Y (if the City of Hillsboro allows for affordable housing)
Willamette Falls Revitalization (West Linn and Oregon City's McLoughlin Blvd Enhancements)	TBD	TBD	TBD
122nd and Stark	TBD	TBD	TBD

4. Prepare for "Operational Efficiency" and protect people's livelihoods.

As we enter an era of mainstream artificial intelligence, more jobs in more sectors of our economy are vulnerable to automation. From manufacturing to advertising, the future is uncertain. To bring more certainty to residents and to be ready for changing technology and economic sectors, Metro and local jurisdictions must prioritize quality of life for its residents over company profits as an indicator for success. In doing so, the Metro Council and staff must be surgical about allowing any expansions for industrial lands and requiring enforceable, specific conditions on any industrial lands to create lasting high-quality jobs for residents and minimize the probability and impacts from mass layoffs due to automation and/or outsourcing.

If the Metro Council allows industrial developers to pave over our working lands for robots, residents lose their ability to provide for themselves, their families, and contribute to the region through their employment. Our region has suffered from broad definitions of industrial lands that do not result in development that brings high-quality jobs for residents. Instead, it adds a patchwork of uses: from gas stations to big-box chain retail stores to strip malls to truck stops. Our region has suffered from our lack of discipline to protect our existing industrial lands for development that can bring high-quality jobs, especially manufacturing jobs. While we still have a reported surplus of industrial lands, now is the time to protect them with specific, enforceable conditions on any industrial lands in our region.

5. Raw land is the least of our issues when it comes to setting the region up for success. Land readiness on the other hand…

The urban growth report's forecast includes a very optimistic outlook on utilizing vacant office buildings and land throughout the region, notably downtown Portland. We also see vacant or nearly vacant office parks and retail areas and their accompanying large swaths of empty parking lots throughout the region. Metro should focus its policy choices and investments on (re)developing and revitalizing these areas; they already have infrastructure in place and are located in existing communities. Recent layoffs by large international corporations illustrate that worldwide business cycles and other factors influence investment decisions, not land supply.

Even with the optimistic and arguably inflated job growth forecast, the urban growth report notes there is a surplus of industrial land even assuming the high growth scenario. We have heard for well over a decade that land readiness - bringing land to Tier 1 - is a main challenge for local jurisdictions. We also know that multiple cities and towns are faced with budget issues, whether it's structural budget deficits like Washington County and City of Portland or whether it's smaller towns that are seeking a larger revenue base like the City of Sherwood.

1000 Friends of Oregon understands and sympathizes with the funding and financing challenges local jurisdictions face when bringing land to Tier 1 readiness and maintaining this infrastructure. It's a motivating force behind our advocacy to work with our statewide membership to secure infrastructure dollars for housing construction (SB 1530 (2024), Senator Kayse Jama; HB 4134 (2024), Representatives Elmer, Gomberg, and Helfrich; and a housing project revolving loan fund (championed for multiple sessions by State Representative Pam Marsh), and to bring main street revitalization funds to towns across Oregon, especially for smaller jurisdictions.

What we know is that adding raw land doesn't pencil for local jurisdictions. What may seem like a revenue boon comes with newer, significant expenses: brand new sewer, water, fiber optic cables, roads, lighting. Suddenly, the city is back in the same predicament it started in: budget shortfalls. We are committed to working with cities and towns on real solutions to funding and financing for land readiness and core public services that are paramount to enhancing our quality of life for all Oregonians. We hope we can count on Metro's leadership to daylight the real problems and real solutions to this challenge.

***

We appreciate Metro Council and staff's time in assembling the draft urban growth report's forecasts, presenting to multiple stakeholder groups, and offering an open line of communication throughout the process. None of us know what the future holds in store; tomorrow is just a rumor after all. But, 1000 Friends of Oregon is committed to working with our statewide membership to choose land conservation and development approaches - policy decisions and funding and financing strategies - to create a future that we are proud and excited to live in.

We are available to meet Metro Council and staff to discuss these key takeaways. We are also happy to host Metro Council or staff in meetings with our partner organizations who are committed to creating a better future for all residents, now and into the future.

Sincerely,

Samuel Diaz

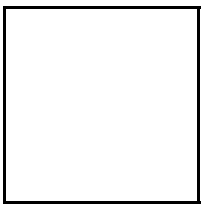
Good morning and happy Friday Marissa, Kristin, Catherine, Malu, Eryn, and Ted,

I wanted to personally send you 1000 Friends of Oregon's 5 takeaways on the draft urban growth forecast. I've been told the urban growth report isn't a policy decision by itself, but may be used to inform future policy and funding decisions. We hope these 5 takeaways can be helpful in shaping actions to create the best future possible for residents of our region.

More than happy to head to Metro or have you here at the 1000 Friends of Oregon office to chat through these takeaways and hear your perspective. Just let me know if you'd like to schedule something.



Thanks so much for your service.

Sincerely,
Sam Diaz

Metro Council

600 NE Grand Ave

Portland, OR 97232

Dear Metro Council Members,

I am writing to advocate for the inclusion of all land currently designated in the Sherwood West Growth Plan as proposed by the City, to ensure the future success of the City and the greater Community. The Sherwood West Plan is a good plan and the City's "control of the narrative" will be lost if the Plan is piecemealed in phases. We have strong interest in growth that will support diverse ranges of people who wish to live and work in our community. Sustainable growth, as championed by conservationists like myself, offers far more advantages to our community than no growth at all. History has shown us that the key to a prosperous society is not in stagnation, but in the careful and responsible use of our resources to meet the needs of the many and not just the few.

Our Project, Prodigal Sons, consists of a 'single farm restaurant' that will feed people locally, provide jobs and unique living opportunities, unlike grass seed and single crop export farmers. We have been diligently working with the City of Sherwood and the High school Ag and Culinary programs with intent to provide career opportunities and real-world skill development to the students. There are two types of landowners in our area. The first type are focused on growth opportunities and plan comprehension. The second type champion land preservation now that they built their homes where forest and farms used to be and dislike the middle and lower income folks in general.

Recently we have heard disturbing news that there is opposition to growth from several organized groups. As fact, the massive commercial farms with the most capital are not friends of Oregon's environment and financial future...

Organizations like Thousand Friends of Oregon, while well-intentioned in their efforts to preserve natural spaces, often fail to recognize the real-world impact of their policies on ordinary Oregonians. Their stance is reminiscent of Henry Thoreau's philosophy of naturalism—a perspective that prioritizes untouched wilderness over the needs of people, especially those of middle and lower incomes. Unfortunately, this approach is detrimental to the economy, creating a situation where "the few with the most" exert influence to protect their estate views at the expense of working and poor families who need affordable housing and job opportunities. If Metro is convinced not to act due to well organized and well-funded opposition groups representing s small percentage of the population, there will be no meaningful growth in Sherwood for many years to come and the fallout will be your (Metro's) failure because of wealthy numby influence.

Sherwood is a growing community with real needs. Leaving developable and well-planned land undeveloped in the name of preservation benefits a select few, but it does nothing to help the people of Sherwood diversify and thrive. Instead, we need to focus on sustainable development that balances environmental responsibility with economic growth. Responsible housing, jobs and infrastructure supports our town by allowing future generations to thrive in the area. At present, our next generation can't afford to live here and don't have enough local jobs here.

I urge Metro to consider the long-term benefits of sustainable growth over the short-term appeal of leaving land wild. Just as Roosevelt and Pinchot understood the value of managing natural resources for the benefit of all, we must adopt policies that ensure the land serves the people of Sherwood—not just those who can afford to prioritize untouched nature over community needs. The Sherwood West concept plan addresses that in a most impressive way.

Additionally, if City Council is given unfavorable conditions that stalemates the entire ask of the Urban Growth Management Decision, they could potentially withdraw and fail to have served

our community. Most will likely not be in service many years from now anyway. The application process is too costly. We would have to start the process all over again. By the time interest returns, if at all, and sites are permitted and built it will have been 8 years. Hopefully this letter gets into the right hands and Sherwood will maintain trajectory towards becoming one of Oregon's most desired places to live, for all, not just the few.

I look forward to your consideration of this critical issue and am confident that with timely and fair stewardship, we can create a future where Sherwood thrives economically, socially, and environmentally.

Thank you for your time and attention.

Sincerely,

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To whom it may concern,

As a resident and taxpayer of Sherwood, I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely, Brent and Michelle Christian

RE: Technical Letter of Comment Regarding the Draft 2024 Urban Growth Report

DATE: August 22, 2024

Thank you for the opportunity to comment on the Draft 2024 Urban Growth Report (UGR). We appreciate your efforts to coordinate with our team and the many conversations you have convened in developing this report.

In addition to the Clackamas County Board's letter of comment, our technical staff would like to submit to the record the below concerns, questions and requests.

First, as raised at MTAC, it is difficult to determine how the calculations were made between the appendices and the draft UGR. We request that you provide a clearer record of computation in calculating the formal figures that are the basis for tables in the UGR.

For example, Table 9, *Summary of residential growth capacity inside the UGB by housing type* (page 32) shows "low", "mid", and "high" capacity numbers for single-unit detached, middle housing, and multifamily housing types. But the note to the table says that these capacity numbers should not be totaled, "for instance, adding up high capacity for each housing type", so it is unclear how we know how much capacity exists in the UGB and how these numbers should be used to compare capacity to the projected need. While Metro staff has provided, via email, some clarity to how the numbers in this table were calculated, it remains unclear how this table relates to Table 15 (page 40) in which the expected need is compared to some amount of capacity in each of the scenarios. To that end, additional data in an appendix that clearly walks a reader through these calculations should be provided; this would not only be helpful for reviewers, but it would also lead to more confidence in the summaries and options presented in the UGR.

Buildable Lands Inventory:

- Our team would like to thank Metro Staff and Johnson Economics for the creation of the Predictive Redevelopment Model to create a supply side response to key market parameters for anticipated development and redevelopment activity (Appendix 2, Attachment A). This is an innovative resource that is working to provide one of the missing pieces of the puzzle in matching land use with the redevelopment aspects of buildable land. That said, we do have some questions about the assumptions for redevelopment. One concern is that the proforma indicates that much of our "naturally occurring" affordable housing, such as manufactured home parks and older existing apartments will be re-developed. We are concerned that some of the assumptions may not support the retention of these critical assets, thereby leading to displacement, and also may incorrectly influence the capacity estimates.

Housing Needs Analysis:

- Data on housing underproduction show inconsistencies. In 2021, ECO Northwest conducted a study, Implementing a Regional Housing Needs Analysis Methodology in Oregon that estimated housing underproduction in the Portland Metro region to be 59,488 units (Exhibit 18, p. 35). In the draft UGR, however, the estimate for housing underproduction is estimated to be 15,000 (Table 10, p. 33). Metro Staff provide a thorough methodology for calculating underproduction (Appendix 8A, p. 4), but the UGR and accompanying appendices do not provide an explanation for this discrepancy. Further, it would be helpful to have a record of specific inputs and calculations that result in the figures listed in Table 10 on p. 33 in the UGR.
- There is detailed information about the total new housing units needed in the Metro UGB by housing type (Table 14, p. 37) but there is no equity analysis in the UGR or Appendices 8 or 8A that provide a clear understanding of who the proposed housing units in Sherwood West are going to serve or how these new housing units will be used to accommodate those working in the hospitality sector of the proposed expansion area.
- Slope requirements may not equate to affordable housing. Site design and assembly adds considerable cost and discourages a site's likelihood for affordability when entering the market after construction. Further scrutiny and discussion on housing mix, particularly aspects of its affordability, should be determined and clarified in the final UGR.

Employment Land:

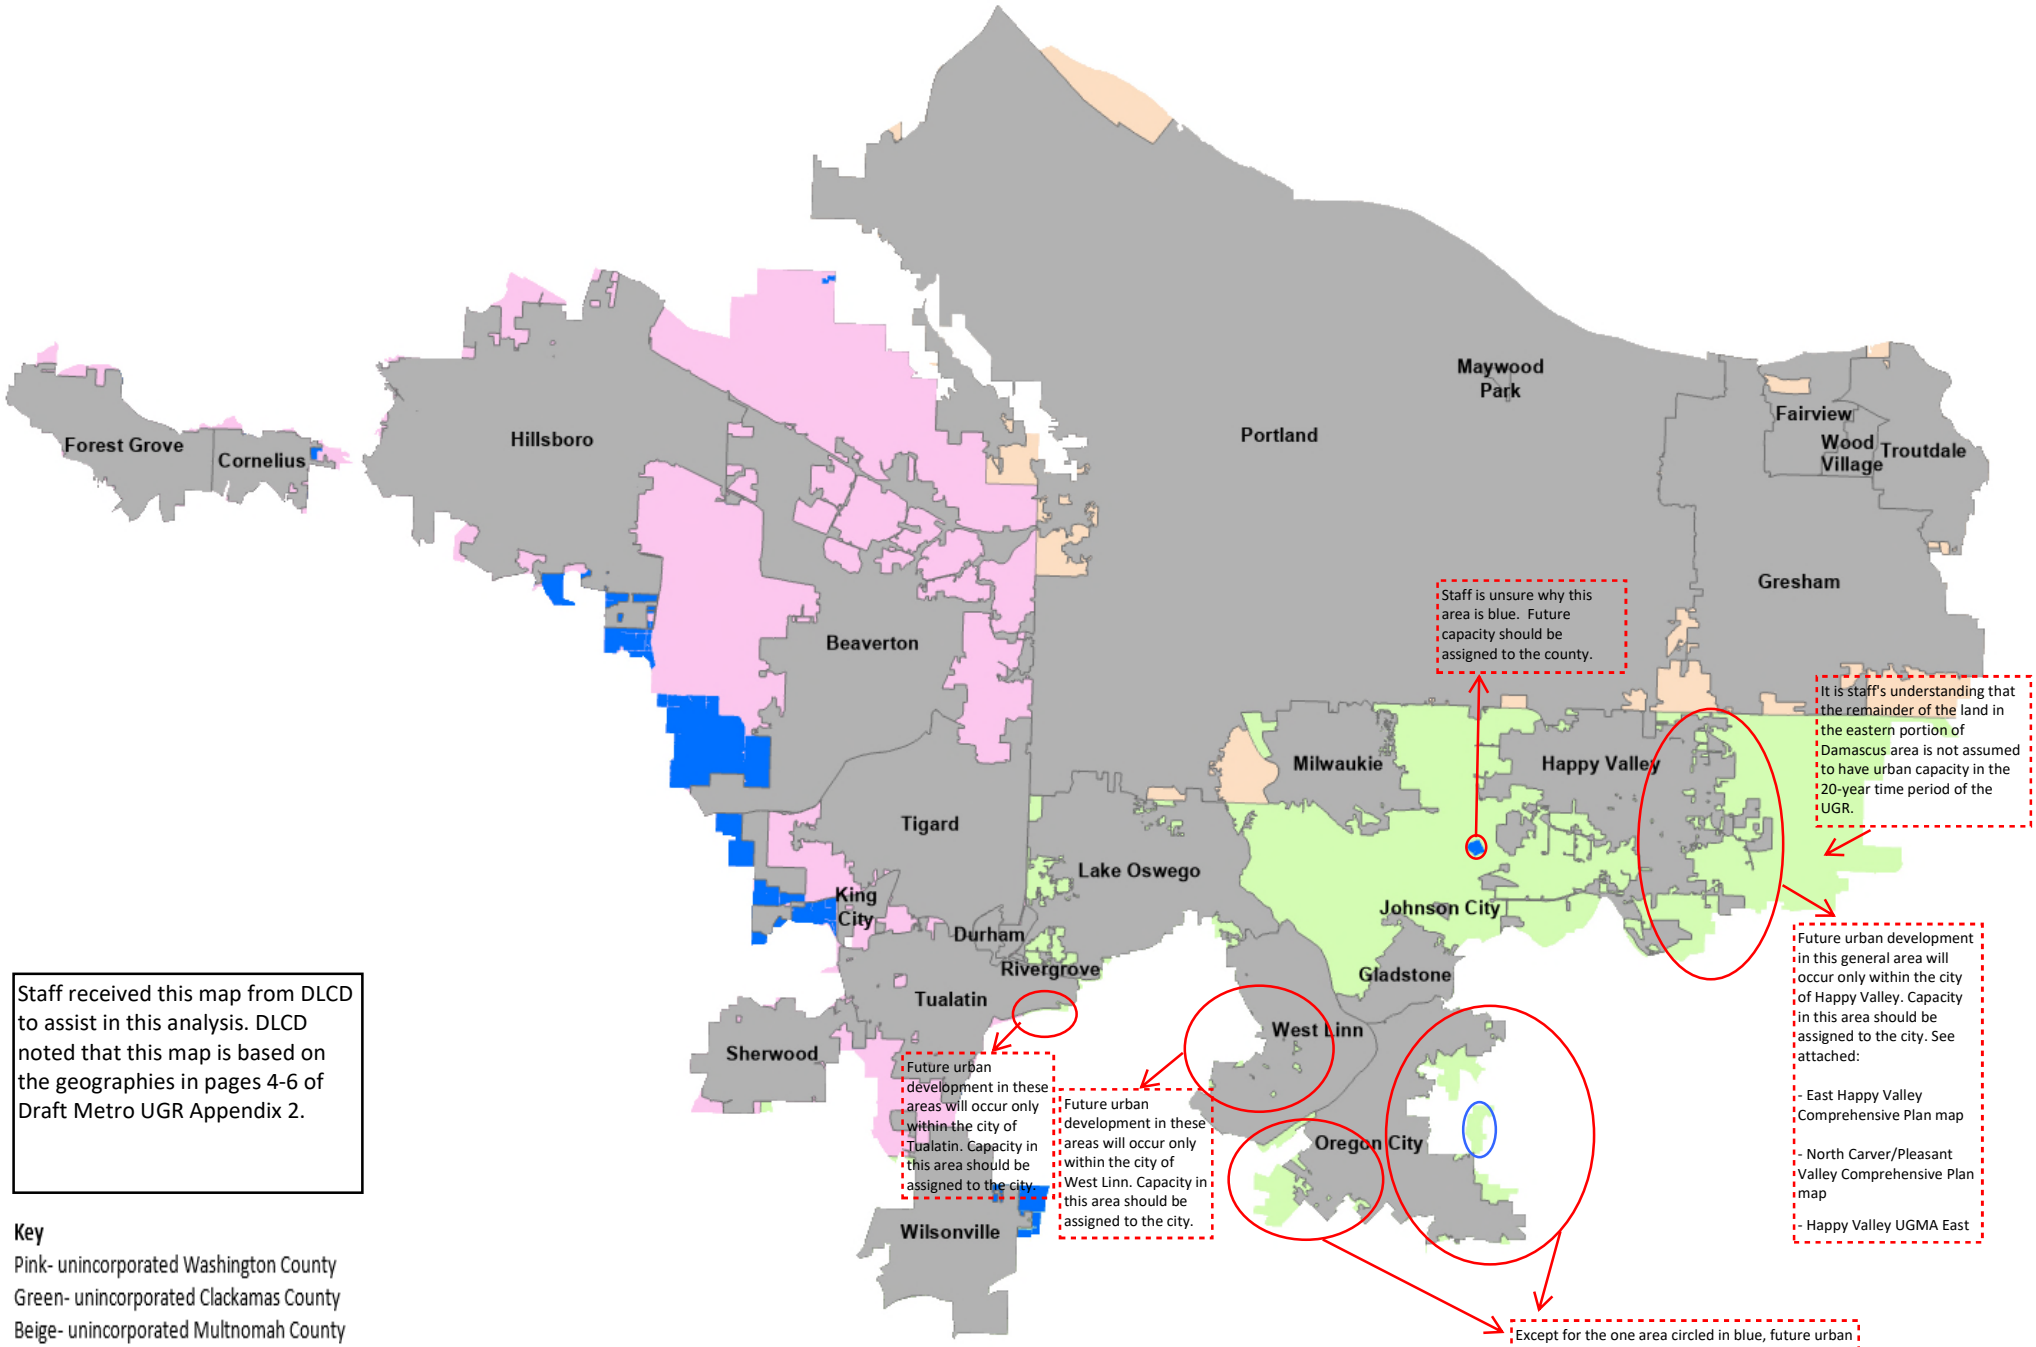
- Provide a clearer understanding of how slope requirements affect buildable land inventory. If slope requirements are at 7%, that would decrease buildable industrial land from 6,000 acres to 4,700 acres inside the UGB, on aggregate. If we are planning for high growth, this would change a 750-acre aggregate surplus into a 550-acre aggregate deficit (Table 19; p. 54 of draft UGR).
- Discussion on transportation and transit investment is almost completely missing in the report and accompanying Appendices; this must be developed and included in the UGR. Currently, there are no transit options in the proposed expansion area, and the closest bus in service is 2 miles away from Sherwood West. Addressing infrastructure needs and investment is critical for growth in the region.
- There may be a mismatch in what is presented in the Buildable Land Inventory (Figure 23; p. 55; Appendix 6) and what is desired when considering market factors. The current analysis presents Tier 3 land that is a minimum of 30 months from being development ready. Also noted in the UGR is that the average industrial parcel size is 3.8 acres, with a median industrial parcel size of 1.7 acres. Market factors indicate firms seek parcels that are a minimum of 5 acres and Tier 2 readiness (developable in 7 to 30 months or less). It would be useful for the analysis to break down data even further, describing the amount of land that is at least 5 acres and at least Tier 2 in readiness.

Capacity Analysis:

- Capacity allocated to unincorporated Clackamas County includes several areas that will not urbanize and develop at expected densities unless annexed into a city. Based on conversation with Metro staff, we understand that urban levels of capacity that are within the City of Happy Valley's North Carver/Pleasant Valley Plan area and planned areas outside of Oregon City are

included in the unincorporated county totals if the lands have not yet annexed to the respective cities. While staff also understands that this capacity is included as part of regional capacity for the purposes of assessing the regional urban growth boundary, we have several concerns about including this capacity in the unincorporated totals versus the cities where this urban development would happen.

a. County staff raised this issue several times throughout the development of the draft UGR and was assured that it would be addressed or at least acknowledged. Based on out reading of the draft UGR and associated appendices, it is neither addressed nor acknowledged.



b. The urban unincorporated land (UUL) within the Metro UGB will be allocated housing targets under the new Oregon Housing Needs Analysis (OHNA) rules. Specifically, it appears from initial drafts of the OHNA methodology for allocating housing production targets, that the state will by relying on Metro's capacity analyses and ultimately Metro's distributed forecast for these housing production allocations. It is county staff's understanding that Metro's distributed forecast is at least partially based on these capacity numbers. Therefore, it is imperative that the capacity is "assigned" to the correct jurisdiction.

c. To that end, county staff has attached several maps to this letter to help Metro identify where future capacity numbers should be assigned and is happy to work with Metro staff to resolve this issue.

- The capacity analysis also overestimates capacity allocated to residential development and underestimates capacity for commercial development in some areas identified as having "mixed use", which county staff understands to mean zoning that would allow for both residential and commercial development. Specifically, in areas along McLoughlin Blvd in Clackamas County – in which the general commercial zoning also allows fairly high-density housing - it is assumed development of buildable lands will be 95% residential and 5% commercial. Little to no residential development has occurred in this location in the last several decades despite housing being allowed by zoning.

We acknowledge that completing these analyses for the region are challenging, especially in this time of constant change in housing and employment markets and new rules coming down from the state. We appreciate Metro's efforts to create an analysis that is more nuanced and market-based, rather than the simpler demand versus supply numbers that have been used in past reports, and we recognize that this approach leads to more uncertainty.

With that in mind, we would like to reiterate our Board's request to consider selecting the high growth rates for both population and employment, which will provide jurisdictions the latitude to attract more investment opportunities, meet coming housing production targets, and better be able to balance housing, employment and transportation needs.

Staff is unsure why this area is blue. Future capacity should be assigned to the county.
It is staff's understanding that the remainder of the land in the eastern portion of Damascus area is not assumed to have urban capacity in the 20-year time period of the UGR.
Future urban development in this general area will occur only within the city of Happy Valley. Capacity in this area should be assigned to the city. See attached:
- East Happy Valley Comprehensive Plan map
- North Carver/Pleasant Valley Comprehensive Plan map
- Happy Valley UGMA East
Future urban development in these areas will occur only within the city of Tualatin. Capacity in this area should be assigned to the city.
Future urban development in these areas will occur only within the city of West Linn. Capacity in this area should be assigned to the city.
Except for the one area circled in blue, future urban development in these areas will occur only within the city of Oregon City. Capacity in this area should be assigned to the city. See attached:

CITY OF HAPPY VALLEY/CLACKAMAS COUNTY

URBAN GROWTH MANAGEMENT AGREEMENT

This Urban Growth Management Agreement ("UGMA" or "Agreement"), by and between the City of Happy Valley, an Oregon municipal corporation ("City") and Clackamas County, a political subdivision of the State of Oregon ("County") (collectively, the "Parties," and each individually a "Party").

RECITALS

WHEREAS, authority is conferred upon local government under ORS 190.010 to enter into an agreement for the performance of functions and activities that the local government, its officers or agencies has authority to perform; and

WHEREAS, the City and the County have a common interest in coordinated comprehensive plans, compatible land uses and coordinated planning of urban facilities within the Happy Valley Urban Planning Area East ("HVUPAE"), as described in Exhibit A to this Agreement; and

WHEREAS, the exchange of information should concentrate on issues that may have a significant impact on either Party and should not entail cumbersome procedural requirements that may increase the time necessary to expedite decision making; and

WHEREAS, OAR 660-003-0010 requires management plans for unincorporated areas within an urban growth boundary to be set forth in a statement submitted to the Land Conservation and Development Commission ("LCDC") at the time of acknowledgement request; and

WHEREAS, OAR 660-011-0015 requires an urban growth management agreement to specify the entity responsible for the preparation, adoption and amendment of the public facility plan(s); and

WHEREAS, the City and County previously entered into an urban growth management agreement on January 30, 1992, and amended on June 19, 2001, and subsequently amended on November 18, 2013 for areas to the west and southwest of the existing City of Happy Valley (extending to the Veterans Memorial Highway), which is hereby referred to as the "UGMA WEST" and is a separate urban growth management agreement from this Agreement, which is hereby referred to as the "UGMA EAST".

NOW THEREFORE, the Parties agree as follows:

AGREEMENT

1. Definitions.

As used in this Agreement, the following words shall mean or include:

1.1 Comprehensive Plan. Any plan document as described in ORS 197.015(5) that is adopted by a Party and that applies within the HVUPAE.

1.1.1 City Comprehensive Plan. The City of Happy Valley Comprehensive Plan.

1.1.2 County Comprehensive Plan. The Clackamas County Comprehensive Plan.

1.2 Land Use Policies. The whole or any part of any comprehensive plan, subarea comprehensive plan, Title 16 of the City's Municipal Code ("Development Code"), the Clackamas County Zoning and Development Ordinance ("ZDO"), refinement plan, public facility plan developed under OAR Chapter 660, Division I, land use regulation as defined by ORS 197.015(11), or any other generally applicable policy regulating the use or development of land. As applied to Metro, "Land Use Policies" include Planning Goals and Objectives, Regional Urban Growth Goals and Objectives, Functional Plans, and Regional Framework Plans.

1.3 Happy Valley Urban Planning Area East ("HVUPAE"). The HVUPAE includes unincorporated land within the Portland Metropolitan Urban Growth Boundary ("UGB") located generally east of 172nd Avenue and west of 222nd Avenue, as illustrated on the map attached as Exhibit A to this Agreement.

2. Terms of this Agreement.

2.1 This UGMA EAST becomes effective as specified under Section 8.3, below, and shall continue thereafter for an initial term of 10 years, unless terminated as provided in this Section or modified consistent with Section 8.4. This Agreement automatically renews for one additional 10-year term unless, not later than 90 days prior to the expiration of the initial term of this UGMA, one of the Parties provides the other Party with written notice that it does not wish to renew the UGMA EAST, in which case this UGMA will automatically terminate upon completion of the initial 10-year term. Either Party may terminate this agreement at any time after providing at least 90 days written notice to the other Party.

3. General Provisions.

3.1 General Planning and Permitting Responsibilities

3.1.1 Comprehensive Plan/Zoning Designations and Amendments. The County Comprehensive Plan and zoning shall apply to all unincorporated land within the HVUPAE until such time as those lands are annexed into the City. Unless

otherwise provided by law, the development of a comprehensive plan map amendment or zone change for the unincorporated areas within the HVUPAE shall be a coordinated joint effort of the Parties. The County shall be responsible for preparing and making a decision on all legislative and quasi-judicial comprehensive plan amendments/zone changes for areas within the HVUPAE not annexed to the City in coordination with the City and consistent with state law and the Metro Functional Plan. The City shall have the unrestricted right to review, comment on and appeal all legislative and quasi-judicial comprehensive plan amendments/zone changes processed by the County within the HVUPAE.

3.1.2

Land Use Permitting Authority. The County Comprehensive Plan and land use regulations shall apply to an application for a permit or other land use review within the HVUPAE not annexed to the City. County shall retain responsibility and authority for all implementing regulations and land use actions for all unincorporated lands within the HVUPAE, until lands are annexed to the City.

For properties that annex into the City of Happy Valley in the HVUPAE, the City shall apply the underlying County Plan and zone provisions in accordance with the procedural framework of the City's Municipal Code until the City has adopted urban City Comprehensive Plan designations and zoning districts for the HVUPAE.

3.1.3

Urban Plan Development. The Parties agree that the City shall be responsible for developing and adopting an urban Comprehensive Plan and zoning districts for areas that do not currently have urban designations within the HVUPAE, per Section 4 of this Agreement.

3.1.4 Land Divisions. Land divisions that would create parcels smaller than 20 acres in size shall not occur within lands with a Rural Comprehensive Plan designation within the HVUPAE.

3.2 Annexation.

3.2.1 Conditions Requiring Annexation. The owner(s) of property adjacent to the City (including by extension of a public right-of-way or body of water, per the City's annexation policies), who are seeking access to City-provided services (for example, Planning, Engineering, or Building Division permits) may be required to submit an annexation petition to the City.

3.2.2 Annexation Consent. At the discretion of the Board of County Commissioners ("Board"), the County may provide consent for annexations, when such consent is required per ORS 222.170 or ORS 222.125 for properties utilizing county right-of-way for an annexation, if city agrees to accept the transfer of the section of the roadway being used to access the annexed property.

3.2.3 Annexation Plan. Any City-initiated Annexation Plan shall be developed consistent with applicable state and regional laws. Opportunity shall be provided

to citizens, the County, active Citizen Planning Organizations ("CPOs") and affected service providers to review and comment on the Annexation Plan prior to any annexation election. Annexation Plan(s) will include development of public facilities plan(s) for the Annexation Plan area(s).

3.3 Public Facilities.

3.3.1 Public Facilities Plans. Except as identified in Section 4, the City shall coordinate the preparation or amendment of public facilities plans within the HVUPAE as may be required by OAR Chapter 660, Division 11 (Public Facilities Planning) and applicable sections of ORS Chapter 195 with the appropriate service providers. Upon annexation, an area within the HVUPAE shall be provided with public facilities services through a combination of City-provided services and by way of Intergovernmental Agreements ("IGAs") with applicable service providers, which may include the following: sanitary storm services – Water Environment Services "WES"); water service providers – Sunrise Water Authority, Clackamas River Water; county road services – Clackamas County Department of Transportation and Development; fire prevention services – Clackamas Fire District No. 1; services related to the provision and maintenance of open space – Metro; mass transit services – Tri-Met; and, school facility planning – North Clackamas School District No. 12, Gresham-Barlow School District, and Centennial School District.

3.3.2 New Service Districts. County shall not form any new county service districts to serve any areas within the HVUPAE, nor shall it support the annexation of any land within the HVUPAE to any such districts or to any other service districts without the prior written consent of the City.

4. Planning for Urbanization of Rural Lands in the HVUPAE.

4.1 Planning authority. The City shall be responsible for planning for any future urbanization of rural lands within the HVUPAE. The urbanization of rural lands within the HVUPAE will only occur upon annexation to the City. The City shall coordinate with the County Planning Division and other relevant County Department of Transportation and Development ("DTD") staff regarding future urban planning and development activities and the transportation network in the HVUPAE. County staff shall be invited to participate in the proceedings of all relevant Technical Advisory Committees in the review of urban plans within the HVUPAE. The City shall notify and coordinate with the County on amendments to the City's Transportation System Plan ("City TSP").

4.2 Land use and transportation planning in the HVUPAE. Building off existing studies and previously completed planning work, the City of Happy Valley and the County will develop the following planning documents for the HVUPAE:

4.2.1 Integrated Land Use and Transportation Plans (Urban Plans):
The City may create detailed, integrated land use and transportation plans for "phases," or portions of the HVUPAE that the City determines are of sufficient size to phase development and urban service provision in a cost-effective and efficient manner. These plans shall include all elements required for a full urban

comprehensive plan for the selected area.

4.2.1.1 Coordination: All integrated land use and transportation plans shall be coordinated with the County to ensure consistency with County transportation plans and other planning in adjacent unincorporated rural areas. The City shall lead this planning undertaking with County coordination and participation in all relevant committees.

4.2.1.2 Notification: The City shall notify the County Planning Director prior to the initiation of each phase of urban land use and transportation planning. Notification shall, at a minimum, include a map of the area to be planned and an estimated timeframe for adoption of an urban plan.

4.2.1.3 Providing Employment Land: The City and County recognize the importance or providing employment land to support stronger economic growth in the County and will work together to identify opportunities to provide such lands in the HVUPAE, to potentially include employment areas different than those identified as Metro Title 4 lands.

4.2.1.4 Providing Affordable Housing Opportunities: The City and County recognize the importance or providing land for the development of affordable housing in the County and will work together to identify opportunities to provide such lands in the HVUPAE.

4.2.2 Clackamas County Transportation System Plan ("County TSP"): An update of the County TSP will be developed for the Metro UGB area illustrated within Exhibit A beyond (east of) any areas inside the HVUPAE that are not part of an integrated land use and transportation plan that is adopted or actively being completed by the City. The County TSP update will plan for transportation improvements necessary to serve travel patterns that are expected in the future in and adjacent to the HVUPAE including, without limitation, those areas within the Metro UGB but outside the HVUPAE.

4.3 State Highway System Improvements. The City and County recognize the importance of working with the Oregon Department of Transportation ("ODOT") to ensure that state transportation facilities be built/improved to accommodate expected population and employment growth in the HVUPAE and will utilize any subsequent land use and transportation plans to advocate for the timely development of the Sunrise Highway.

5. Other City Responsibilities.

5.1 Functions. All functions relating to the subject matter of this Agreement not specifically listed in this Section or any Exhibit as being the responsibility of the City will remain the responsibility of County. City shall be responsible for the timely and effective distribution to County of studies, information, requests, data and personal communications in City's possession on any matter concerning coordination between the City and County and/or regarding any infrastructure or policy issues coordinated by County.

5.2 Road Jurisdiction, Transfer and Condition. The City shall assume jurisdiction of the full width of any applicable segment of County road classified by the County as minor arterial, collector, connector, or local street that is within or immediately abutting an area annexed to the City within one year of the date of that annexation, assuming all provisions detailed below have been met. The transfer and assumption of jurisdiction shall be consistent with the provisions of ORS 373.270.

Concurrent with the date that a road is transferred, the County will upgrade the roadway or provide funds equivalent to the cost of a two-inch overlay over the existing pavement area, unless the road has a Pavement Condition Index (PCI) rating of 70 or higher, or the Parties mutually agree that overlay funds are not necessary for transfer. Alternatively, if a roadway or roadway section has a PCI of 50 or less, the City will only accept said roadway once a PCI of 70 or higher is achieved by the County or the Parties mutually agree upon a funding level equivalent to upgrading of the roadway to a PCI of 70 or higher.

5.2.1 For any County minor arterial, collector, connector or local street within the City boundary that is being transferred, but subsequent to annexation, the County shall allow improvements to be constructed to City standards and defer permitting authority to the City. The City shall issue all appropriate permits directly to the developer.

5.2.2 For any improvements to a County major arterial road within the City boundary, the County shall determine if City standards along the major arterial are acceptable to the County and do the following:

A. If the City standards are acceptable to the County, the County shall allow all improvements to be constructed to City standards. The County shall issue all appropriate permits with City concurrence.
B. If the proposed cross section standards are not acceptable to the County, the County shall require those improvements to be constructed to County standards. The County shall issue all appropriate permits.

5.3. City Notice to and Coordination with the County and CPOs.

5.3.1. The City shall provide notice to the County and the appropriate active CPOs at least 20 days prior to the first public hearing on all proposed annexations or extraterritorial service extensions into unincorporated areas.

5.3.2. The City shall provide notice to the County at least 20 days prior to the first scheduled public hearing on all proposed legislative changes to the City Comprehensive Plan or any quasi-judicial hearings regarding properties adjacent to unincorporated areas within the HVUPAE.

5.3.3. The City shall notify and coordinate with the County on amendments to the City TSP.

5.3.4. City shall provide notice and a service-provider comment letter to the applicable County Department in conjunction with the City's review of any land use application or building permit in which the proposed development activity might affect County facilities.

6. Other County Responsibilities.

6.1. County Notice to and Coordination with the City for Lands in HVUPAE.

6.1.1. The County shall provide notice to the City at least 20 days prior to the first scheduled public hearing on all proposed legislative changes to the County Comprehensive Plan text, implementing ordinances or other land use policies affecting land within the HVUPAE, and shall provide notice to the City at least 20 days prior to the first scheduled quasi-judicial public hearing regarding any properties adjacent to the City's incorporated area.

6.1.2. The County shall provide notice to the City at least 20 days prior to a staff decision on any Type II application for administrative action as provided in the ZDO for property within the HVUPAE.

6.1.3. The County shall notify and invite City staff to participate in or comment on all pre-application meetings for design review, conditional use permits, partitions, subdivisions or other significant development proposals within unincorporated areas of the HVUPAE at least 15 days prior to any such meeting.

6.1.4. Any amendments proposed by the County to the UGB within one mile of the HVUPAE will be reviewed jointly by the City and the County prior to submission to Metro.

6.1.5. In any County land use proceeding affecting property within the HVUPAE, the County shall enter all written comments received from the City into the public record and shall consider such written comments in the exercise of its planning and plan implementation responsibilities.

7. Mutual Indemnification

7.1 Subject to Article XI of the Oregon Constitution and ORS 30.260 to 30.300, the City will hold harmless, defend and indemnify the County, its elected officials, officers, and employees, for and against any claims or damages to property or injury to persons, resulting in whole or part from City's acts or omissions in performing any obligations under this Agreement.

7.2 Subject to Article XI of the Oregon Constitution and ORS 30.260 to 30.300, the County will hold harmless, defend and indemnify the City, its elected officials officers and employees for and against any claims or damages to property or injury to persons, resulting in whole or part from the County's acts or omissions in performing any obligation under this Agreement.

8. General Provisions.

8.1 Applicable Law. This Agreement shall be governed by Oregon law, without giving effect to the conflict of law provisions thereof, and the Parties agree to submit to the jurisdiction of the courts of the State of Oregon.

8.2 Insurance Coverage.

8.2.1. Commercial General Liability Insurance. Each of the Parties shall obtain and maintain at all times during the course of this Agreement commercial general liability insurance coverage pursuant to Oregon Tort Claims Act and subject to the limits of the Act covering Bodily Injury and Property Damage on an "occurrence" form in the amount of not less than $1 Million per occurrence/$2 Million general aggregate for the protection of the other Party, its officers, elected officials and employees. This coverage shall include Contractual Liability insurance for the indemnity provided under this Agreement.

8.2.2. Notice of Cancellation. There shall be no cancellation, material change, exhaustion of aggregate limits or intent not to renew any Party's insurance coverage contemplated by this Agreement without 60 days written notice to the other Party. Any failure to comply with the provision will not affect the insurance coverage provided to the Party. The 60-day notice of cancellation provision shall be physically endorsed on to the policy.

8.2.3. The County may self-insure to meet the minimum insurance requirements of this Section 8.2, to the extent that it maintains a self-insurance program that complies with the insurance requirements applicable under this Section 8.2.

8.3 Effective Date and Term. This Agreement shall become effective on the last date signed below and shall continue in effect according to its Terms.

8.4 Amendment. This Agreement may be amended at any time consistent with Section 8.9 below.

8.5 Assignment. Except as otherwise provided herein, the Parties may not assign any of their rights or responsibilities under this Agreement without prior written consent from the other Party, except that a Party may delegate or subcontract for performance of any of their responsibilities under this Agreement.

8.6 Dispute Resolution.

8.6.1. Subject to mutually agreed upon extensions of time in writing, failure or unreasonable delay by any party to substantially perform any material provision of this agreement shall constitute default. In the event of an alleged default or breach of any term or condition of this agreement, the Party alleging such default or breach shall give the other Party not less than 30 days written notice specifying the nature of the alleged default and the manner in which the default may be cured satisfactorily. During this 30-day period, the Party shall not be considered in default for purposes of termination or instituting legal proceedings.

8.6.2. The Parties shall first attempt to resolve the dispute by negotiation, followed by mediation, if negotiation fails to resolve the dispute.

8.6.3. Step One: (Negotiation). Each Party will select one or more person(s) to negotiate on behalf of the entity they represent. Those person(s) shall then meet and attempt to resolve the issue. If the dispute is resolved, there shall be a written determination of such resolution, signed by a representative of each Party and ratified by the governing bodies that shall then be binding.

8.6.4. Step Two: (Mediation). If the dispute cannot be resolved within thirty (30) days at Step One, the Parties may submit the matter to mediation. The Parties shall attempt to agree on a mediator. If they cannot agree, the Parties shall request a list of five (5) mediators from an entity or firm providing mediation services. The Parties will attempt to mutually agree on a mediator from the list provided, but if they cannot agree, each Party shall select one (1) name. The two selected shall select a third person who shall serve as the mediator. The common costs of mediation borne equally by the Parties with each bearing its own costs and fees. If the issue is resolved at this step, a written determination shall be signed by each Party and approved by the governing bodies.

8.6.5. Step Three (Legal Action). If the dispute remains unresolved following mediation, the Parties may seek remedy by appropriate proceedings filed in Clackamas County Circuit Court. In any such judicial proceeding, each Party shall be responsible for its own costs and fees.

8.7 Execution in Counterparts. This Agreement may be executed in any number of counterparts, each of which may be executed by any one or more of the parties hereto, and all of such counterparts shall constitute one Agreement. Counterparts of executed signature pages may be attached to any one or more counterparts of this Agreement. To facilitate execution of this Agreement, the Parties may execute by facsimile or e-mail transmission counterparts of the signature pages.

DocuSign Envelope ID 0D422339-34FF-4403-B293-E391A7AFA253

8.8 Severability. In the event a court of competent jurisdiction deems any portion or part of this Agreement to be unlawful or invalid, only that portion of part of the Agreement shall be considered unenforceable. The remainder of this Agreement shall continue to be valid.

8.9 Entire Agreement. This Agreement constitutes the entire agreement between the Parties and supersedes any prior oral or written agreements or representations relating to the HVUPAE. No waiver, consent, modification or change of terms of this Agreement shall bind the Parties unless in writing and signed by each party.

8.10 Non-Exclusive Rights and Remedies. Except as otherwise expressly provided herein, the rights and remedies expressly afforded under the provisions of this Agreement shall not be deemed exclusive and shall be in addition to and cumulative with all rights and remedies otherwise available at law or in equity. The exercise by either Party of any one or more of such remedies shall not preclude the exercise by it, at the same or different times, of any other remedies for the same default or breach, or for any other default or breach, by the other Party.

8.11 Debt Limitation. This Agreement is expressly subject to the debt limitation of Oregon counties set forth in Article XI, Section 10, of the Oregon Constitution, and is contingent upon funds being appropriated therefore. Any provisions herein which would conflict with law are deemed inoperative to that extent.

8.12 Waiver. The failure of either Party to enforce any provision of this Agreement shall not constitute a waiver by such Party of that or any other provision.

8.13 Interpretation. The titles of the sections of this Agreement are inserted for convenience of reference only and shall be disregarded in construing or interpreting any of its provisions.

8.14 No Third-Party Beneficiary. Neither Party intends that this Agreement benefit, or create any right or cause of action in, or on behalf of, any person or entity other than the County or the City.

8.15 Notices. All notices or other communications required or permitted under this Agreement shall be in writing, and shall be mailed or sent by scanned document (e-mailed) or faxed with hard copy to follow by post, addressed as follows:

To City: City of Happy Valley
Economic & Community Development Department
16000 SE Misty Drive
Happy Valley, OR 97086

To County: Clackamas County Planning & Zoning Division

PORTLAND METROPOLITAN ASSOCIATION OF REALTORS®

August 22, 2024

Urban Growth Management Team
Metro
600 NE Grand Avenue
Portland, OR 97232

Dear Metro Urban Growth Management Team,

I am writing on behalf of the Portland Metropolitan Association of Realtors® (PMAR) regarding Metro's Draft Urban Growth Report. We appreciate the extensive work Metro's staff put into the Urban Growth Report. We would also like to thank Metro for inviting PMAR to the Urban Growth Report Stakeholder table; it was a welcome opportunity to better understand the report's underlying work, data, and assumptions, and to discuss some of our region's challenges and opportunities with other stakeholders.

PMAR recognizes the Portland region is lacking tens of thousands of homes necessary to meet our growing population and that people in our community suffer due to this lack of housing. Our region's current level of housing construction is 10.1% below the long-term average, and no where near on pace to catch up with past underproduction, let alone accommodate future growth. Portland in particular is struggling to keep up with needed housing production; the city is on track to produce only 500 new units this year, when the forecasted need by 2045 is more than 120,000 new homes.

As a region, we must embrace land use, development, and zoning principles that provide and encourage an abundant mix of housing types that meets community needs and provides sufficient housing for current and future residents. Restrictive land use regulations play a major role in stymying the proliferation of new housing. Accordingly, PMAR supports much needed growth in the Metro area's capacity for housing development, which removes a barrier to housing construction; getting the 2024 growth management decision right will support the continued growth and prosperity of our entire region.

In that spirit, PMAR strongly urges Metro to adopt a higher growth population forecast, and urges the Metro Council to support the City of Sherwood's request for expansion.

Population Forecast

The draft report forecasts regional population growth "only from net in-migration," due to lower

forecasted birth rates, and assumes that growth rates will be slower as a result over the next 20 years.

While this is a reasonable assumption, it fails to recognize that the policy choices we make today will impact whether or not our region is a place that attracts new residents over the next 20 years. Put another way, if we plan for low growth, we are unlikely to see anything other than low growth. But if we plan for robust growth, and make policy choices that support a vision of higher growth, our region becomes a more attractive place to future residents.

We strongly recommend adoption of the higher growth population forecasts, to set the stage for nearer term policy decisions and actions that will in turn foster stronger population growth, and help our region realize economic growth and prosperity.

City of Sherwood Expansion

PMAR supports the City of Sherwood's expansion proposal, particularly the 340 net acres of residential land proposed in the Sherwood West Concept Plan. PMAR believes that there is no one-size-fits-all to housing and that a vast array of homes of various types and at various price-points are needed to serve members of the community, accommodate new residents, and ensure that members of our community can buy a home that fits their unique needs. Accordingly, while Metro may want to make recommendations or provide incentives to encourage certain kinds of housing development, PMAR would discourage prescriptive requirements or new regulations that would limit Sherwood's housing development options.

PMAR is committed to working collaboratively with Metro and other stakeholders to ensure that our region's growth management decision is implemented in a way that benefits all residents and facilitates growth of the housing market.

To whom it may concern,

As a resident and taxpayer of Sherwood, I strongly oppose the 2024 Sherwood West Urban Growth Boundary Expansion Proposal and the proposed expansion of the Urban Growth Boundary by 1,291 acres. This excessive and unnecessary plan would destroy vital farmland, increase traffic congestion, and burden residents with higher property taxes. I stand with the West of Sherwood Farm Alliance in urging you to reject this proposal and preserve the unique character and agricultural heritage of our community.

Sincerely,

Patricia Hales

RE: Metro's 2024 Urban Growth Report and Sherwood's Urban Growth Boundary Expansion Request

Dear Ms. Madrigal,

My name is Preston Korst and I'm the Director of Government Affairs at the Home Building Association of Greater Portland. HBA is dedicated to maximizing housing choice for all who reside in our region by shaping an environment in which industry professionals can meet the diverse needs of all communities.

I'd like to start off by personally thanking you and the rest of Metro's planning staff, including Katherine Ciarlo, Eryn Kehe, Ted Reid, Malu Wilkinson (and many more) for hosting and facilitating the Urban Growth Report Stakeholder Roundtable. This broad and diverse group of interested parties met for two hours monthly for nearly a year to discuss and debate the central tenants of the Urban Growth Report (UGR) and the impacts it will have on our region. As HBA's representative in that group, I can say that it provided much needed dialogue and reflection space for us to discuss how we as a region wish to grow. Your willingness to provide that opportunity is greatly appreciated.

In this letter, we hope to outline our industry's perspective on the 2024 Draft UGR and to provide our unequivocal support for the City of Sherwood's Urban Growth Boundary (UGB) expansion request.

For housing affordability and the overall health of our economy, HBA and many others in the housing industry urge your COO Recommendation and Metro Council to take a high-growth position when evaluating our region's land supply and housing needs in this UGR and move to approve Sherwood's UGB request without conditions.

Consider for a moment the exorbitant costs to purchase a home in our region. According to Zillow, the median home sale price in June was $521,133 (Multnomah County), $579,979 (Washington County), and

$631,000 (Clackamas County). Staggering as these figures are, they come as no surprise given that Oregon is staring down a housing deficit of 140,000 units. And if our goal is to advance economic justice and racial equity, then we must reverse these trends in a way that builds wealth and increases homeownership opportunities for more families who've traditionally been locked out of the homebuying market. In other words, WE ARE IN A HOUSING CRISIS.

- -

UGR Question #1: Which population and growth projections should Council make?

With the UGR, we believe that the focal and starting point rests primarily on the population and growth scenarios presented in the report. While the draft contains a lot to applaud—including acknowledgements of an existing regional housing shortage, changing housing choices due to the pandemic, and the creation of newly allowed middle housing options—it still includes elements that are concerning for our industry.

For one, the report concludes that regional population growth is slowing because birthrates are dropping (which of course is an established national trend). This means that in-migrating residents will be the primary driver of our population growth, as it has been in recent years. This analysis makes sense. However, the report erroneously assumes that, "Slowing population growth also means slower job growth." We respectfully disagree.

Though we concur that we can't necessarily change what the data tells us, we *can* choose policies that will bend the precision of that data towards a stronger economic future. In other words, if we use this growth report to prepare for strong economic and housing growth, we believe that in-migration will adapt towards a higher-opportunity future—if you build it, they will come. On the flipside, if we plan for anemic growth and limit our ability to adapt to the market, we'll just be realizing our own economic stagnation. In either case, it's a self-fulfilling prophesy.

UGR Recommendation #1: assume and position the report with the high-growth population scenario.

We feel that Metro would not only be wise, but would be making the most responsible public-policy decision to plan for growth, despite what projections may or may not suggest. Preparing with an attitude of a high-growth scenario provides Metro and local jurisdictions with more flexibility to plan for the future that will avoid future housing crises and economic stagnation. As we hear often from planners: *failing to plan is planning to fail*.

- -

UGR Question #2: How should Council approach housing need and development scenarios?

To start, we want to acknowledge the fact that Metro staff included in this report an existing housing shortage of 23,700 units. While many in the housing industry would argue (with additional sources) that number is considerably low, it is still an important indication of how serious our housing crisis is to Metro. Moving on from there, we appreciate the difficult work that went into calculating our housing needs over the next 20 years. And we believe it would be misleading, if not negligent, to suggest that our region's housing needs are anything except *high*. Therefore, **we urge Metro to adopt the high-forecast housing need of at least 203,200 units over the next 20 years**. This reflects a greater sense of reality than the baseline or low-point figures hold.

Additionally, in the report, Metro also makes assumptions about not only the rate of our growth, but also *how we will and should grow*. Found on pages 38-39, the report contains several assumptions for development potentials using "illustrative demand and capacity scenarios." While we aren't exactly sure which data these trends were founded upon, we do feel that they all but marginalizes and unduly prevents the construction of new, single-family homes for residents. It assumes, either through economic reality or lifestyle choices, that our region's historically strong demand for homeownership isn't a viable scenario going forward. Again, we disagree.

And importantly, just after the limited scenarios are presented, the report goes on to say that "…it will be the market, not Metro's UGR calculations, that determine what mix of middle housing and single-unit detached housing gets built…" Yet, in the way that the housing needs scenarios are presented, Metro is essentially asking its Council to do just that by attaching to their decision a condition and outcome which will essentially select which types of housing should get built. Housing construction is a market-driven industry, with the overwhelming majority being built by private developers. We believe that it is not within Metro's power or provision to attempt to guide the mix of housing the market will bear, least of all with just four narrow scenarios.

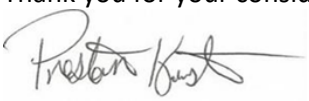
UGR Recommendation #2: Metro should adopt a high-forecast housing need. Also, it should reject the growth scenarios presented in the UGR or establish an additional scenario that creates flexibility for the housing market to adapt to the demand of consumers.

A high need scenario reflects the reality on the ground and will allow policymakers across the region take actions that will address the high cost of housing in their communities. Also, we believe that the forecasted development scenarios have been created despite the fact that nearly 4 out of 5 Oregonian's still prefer to live in a single-family home versus other housing types. And it fails to recognize the power that public-policymaking has on the creation of new housing, which could make single-family entry-level homes more affordable. Lastly, it ignores the fact that the vast majority of homeownership opportunities lie in the single-family market. We believe that Metro should consider that our region's collective desire to foster equity and economic justice will rely on the unique wealth and community-building opportunities that arise with homeownership.

City of Sherwood UGB Expansion Request

This year, the City of Sherwood is the only city requesting a UGB expansion—and we believe that it would have a tremendous impact on our region, in the form of 4,500 good-paying jobs, roughly 5,000 new homes, and the creation of hundreds of acres of parks and natural areas.

For almost two years, I had the pleasure of sitting on the Sherwood West Technical Advisory Committee which helped shape the concept planning for the area. I can say without reservation that the plan brought forward by staff, regional stakeholders, and community members has been careful, conscientious, and equitable. **We applaud the delivered outcome and encourage Metro to move forward with an approval that encompasses the entirety of the 1,291 acres as requested, *without conditions.***



As Metro knows well, bringing new lands into the UGB requires focused planning, financing for infrastructure, and a building environment that can support growth. Fortunately, Sherwood is primed for just that. Over the last several years, the city has undergone extensive public engagement to develop a plan that is innovative, forward-thinking, and contains a variety of tools that will create complete and livable communities. However, adding conditions as suggested in a recent Council Session, could be

detrimental to that extensive outreach. There are serious political costs to adding conditions, not to mention the hundreds of thousands of dollars in grants and general fund dollars would be jeopardized if onerous restrictions are placed on this community-led design.

Given the continued severity of our region's housing crisis, mixed with the budding opportunities to capitalize on historic investments for local economic development—HBA and our partners in the housing sector view this request as a great example of a planning process that will bear fruit for generations. It will help empower our region to reach its housing production goals while creating an indispensable lifeline to a struggling local economy. For affordability and the overall supply of housing, the Sherwood West proposal is an undeniably smart plan that deserves the community's support and Council's unanimous vote.

In closing, we would like to thank Metro staff and Council for the dedicated service they offer to our communities. From long-range planning to affordable housing development, the work you do is not easy and the stakeholder groups you engage are broad and not always agreeable. We appreciate the efforts taken to develop the 2024 Draft UGR and to review Sherwood's 2024 UGB Expansion. And we implore you to consider the serious housing crisis we are facing when making your ultimate recommendations and decisions.

Thank you for your consideration of our testimony,

Preston Korst
Director of Public Policy and Government Affairs
Home Building Association of Greater Portland

Marissa Madrigal, COO
Metro
600 NE Grand Avenue
Portland OR 97232

August 22, 2024

Dear COO Madrigal,

First, I want to thank you for convening the year-long Urban Growth Report Stakeholder table. It created an opportunity to better understand the work done by Metro staff preparing the report, while also hearing from partner organizations about concerns and challenges. While I do think it helped build goodwill among regional partners who often feel frustrated by the process, it did also lay bare some of the places where there may be an opportunity for improvements.

Beyond this Growth Management Decision, Westside Economic Alliance looks forward to continued partnership with Metro Council and staff to identify those opportunities for improving the input, process and subsequent outcomes for our region.

POPULATION & HIGH GROWTH PROJECTIONS

Turning to the 2024 Urban Growth Report, it's important that we begin with the population estimates on which so much of this report rests. The early conclusion is that regional growth is slowing because Oregon's birth rates are among the nation's lowest. Given this data point, the report correctly concludes that net in-migration will be the primary driver of regional population growth. The report goes on to state, "Slowing population growth also mean slower job growth."

What the report fails to state clearly is that if net in-migration will be the primary source of regional population growth then our region's, and our state's, housing and economic future will be overly dependent on smart policy decisions that encourage growth.

It is to that end that Westside Economic Alliance highly encourages COO Madrigal, and subsequently the Metro Council, to adopt high growth population forecasts for our region. It is far better to plan for growth and not see it realized than it is to plan for decline and risk the underproduction of housing and jobs, adding pressure that results in another housing crisis or economic stagnation.

Just as we are seeing an out-migration of a certain segment of our population due to their concerns about public policy choices, we could create in-migration through the adoption of a different set of policy choices.

Adopting the high-growth population forecast will give Metro and the local jurisdictions more flexibility to meet our communities' needs and should be viewed as a prudent public policy decision.

EMPLOYMENT LANDS

According to the Urban Growth Report, Metro staff have forecasted a surplus of Industrial land supply with a current capacity of 5,950 acres and a 20-year projection of a surplus of between 450 and 7,450 acres. However, the report also highlights some of the realities on the ground that act as major detractors to the current capacity estimate: in particular slope and lot size.

Slope

Over the course of the Urban Growth Report roundtable, we heard from developers that Oregon Revised Statute applies the definition for "buildable land" for residential construction to commercial and industrial land. As such, we learned that slopes of up to 25% are considered legally "buildable" for the purposes of all employment land, yet commercial and industrial developers say they will not consider land buildable with more than a 7% slope grade. When challenged on this, staff identified 1,300 acres with a slope greater than 7% that were counted within the buildable land inventory. **We recommend COO Madrigal and the Metro Council amend the Employment Land forecast to reflect this reality**.

Lot Size

An additional concern with the gross figure of 6,000 acres of 'surplus' industrial land is lot size. According to the Urban Growth Report the average lot size is 3.8 acres with a median lot size of 1.7 acres.

According to the data of the currently vacant industrial land, here is the breakdown of available vacant lots by acreage:

- 545 lots are less than 1 acre = 148 acres
- 97 lots are 1-1.99 acres = 142 acres
- 72 lots are 2-2.99 acres = 178 acres
- 49 lots are 3 – 3.99 acres = 167 acres

- 27 lots are 4 – 4.99 acres = 127 acres
- 22 lots are 5 – 5.99 acres = 125 acres
- 10 lots are 6 – 6.99 acres = 63.5 acres
- 13 lots are 7 – 7.99 acres = 96 acres
- 11 lots are 8 – 8.99 acres = 101 acres
- 6 lots are 9 – 9.99 acres = 66 acres
- 22 lots are 10 – 14.99 acres = 271 acres
- 12 lots are 15 – 19.99 acres = 219.5 acres
- 4 lots are 20 – 24.99 acres = 164 acres
- 6 lots are 25 – 29.99 = 107 acres
- 12 lots are 30 acres or more = 594 acres

Given the overabundance of small sites and the fact that the current vacancy rate for industrial land is below 5 percent across the region, the reality is that the vast majority of this acreage could not be used to serve the industrial market.

We recommend that COO Madrigal and the Metro Council direct staff to work with industrial developers to identify a minimum lot size that is realistic for effective industrial development. Any lots below that lot size should be removed from the overall land supply calculation.

As mentioned in the draft Urban Growth Report, the data and analysis of industrial land supply is not the only information that the Council may consider when determining whether there is a need to expand the Urban Growth Boundary. They may also consider whether there is a regional need for industrial sites with specific site characteristics such as larger sized sites.

The Oregon Semiconductor Task Force recommended that in order to be competitive over the next 5-10 growth cycle, the state needed to identify the following development ready sites:

- Two (2) sites of 500+ acres for advanced R&D or production fabrication operations
- Four (4) sites of 50-100 acres for device manufacturers or equipment manufacturers
- Eight (8) sites of 15-35 acres for key suppliers to the ecosystem

And while this site list is a statewide recommendation, we know that industries will often create clusters. Indeed, in EcoNW's report (Appendix 9) they note:

> The Metro Region already has a strong cluster for semiconductors in Hillsboro with Intel's Gordon Moore Park at Ronler Acres Research Campus, which creates 1,000 patents a year. This existing strength in semiconductor manufacturing can position the region to capture other semiconductor activities, and semiconductors are half of the state's annual exports. The semiconductor boom in the 1990s was

precipitated by the state having 2000 acres of industrial land, which led to billions of dollars of investment and doubling the industrial employee count.

To prepare for the next influx of semiconductor activity, the region will need to have a supply of industrial land to support business growth and expansion. The Semiconductor Task Force's Industrial Lands Subcommittee found that the key site characteristics that the semiconductor prefers is a location near other semiconductor businesses and labor, parcels of at least 25 acres, and sites that have infrastructure in place to support development that can begin within 6 months to three years. The subcommittee identified a lack of land that met these criteria.

And, as noted on pages 55-56 of the Urban Growth Report:

[T]he Metro Council established the following policy in the Regional Framework Plan:

'1.4.6 Consistent with policies promoting a compact urban form, ensure that the region maintains a sufficient supply of tracts 50 acres and larger to meet demand by traded-sector industries for large sites and protect those sites from conversion to non-industrial uses.'

Since the 2017 update of the Regional Industrial Site Readiness inventory of large industrial sites, 15 large industrial sites have developed. Six of the sites that developed are over 50 acres in size. There are ten remaining sites over 50 acres inside the UGB. Of those, two sites have marine or airport use restrictions, leaving eight sites over 50 buildable acres inside the UGB that are available to the general industrial market.

And so, the Semiconductor Task Force, the EcoNW Report and Metro's own policy recommends additional land of at least 25 acres with a push to identify 'sufficient supply of tracts 50 acres or larger' to meet the industrial needs of the region. And yet the overwhelming majority of vacant industrial land is LESS THAN 25 acres. There is an imbalance in acreage lot size availability and without a recommendation to discount acreage too small for real industrial development, Metro Council could stagnate the region's ability to leverage generational federal and state investment potential.

SUPERSITING AUTHORITY

Per the passage of Senate Bill 4, Oregon's CHIPs Bill, Governor Kotek maintains super-siting authority through the end of 2024. Should the Governor choose to use this authority, we urge Metro Council to see this as an additive, rather than as a replacement for, an Employment Land expansion in the Growth Management Decision.

We urge Metro to consider the generational investments that may be lost should the Governor provide the extraordinary opportunity of a regional supersite for semiconductors but the region is unable to support that work due to a lack of available mid-size lots needed for a healthy cluster.

CITY OF SHERWOOD EXPANSION PROPOSAL

We enthusiastically and without reservation support the City of Sherwood's request for expansion without any conditions. While Metro may want to make recommendations or provide incentives to encourage certain kinds of growth, we trust the rigorous public engagement process that Sherwood has already conducted and trust that they will continue to engage their community to understand how to grow reasonably and responsibly.

Metro staff made clear during our roundtable convening that Metro is not a zoning organization. To that end, we ask Metro to allow the city to work with their residents in the coming years to decide what makes most sense for their community's needs. It is imperative that policymakers recognize that every jurisdiction in our region has their own unique community needs and that heavy handed policy making to try to make suburban areas mimic urban areas is unreasonable.

We encourage Metro to engage in the process, as other regional partners plan to do, to provide input about best practice and guidance for equitable outcomes. But beyond that, **COO Madrigal and the Metro Council should allow local jurisdictions to grow within their own boundaries in a way that best reflects the community they are working with their residents to create**.

To be clear we ask COO Madrigal, and subsequently the Metro Council to:

- Add 340 net acres of residential land to the UGB as proposed in the Sherwood West Concept Plan as proposed.
- Add 130 net acres of flex industrial land to the UGB as proposed in the Sherwood West Concept Plan as proposed.
- Add 135 net acres of commercial and hospitality land to the UGB as proposed in the Sherwood West Concept Plan as proposed.

CLOSING

Westside Economic Alliance wants to again appreciate the work of Metro staff who prepared this cycle's Urban Growth Report. It is a massive undertaking, and this year another layer of public engagement was added via the Urban Growth Roundtable that took a significant amount of staff time.

To close, Westside Economic Alliance on behalf of our members, ask **COO Madrigal and the Metro Council to lean into a Growth Management Decision that is aspirational**. Throughout the region we are hearing alarm bells going off that our growth in the coming

decades will be reliant on in-migration. In-migration can be super charged through smart policy choices. Job growth can be ramped up through smart policy choices. Land readiness can be increased through smart policy choices and investments.

Adopting a high growth population scenario is the first step to unlocking the potential for smart regional policy and investments that will help our region's employers and local jurisdictions realize economic growth and prosperity.

Thank you for your time and commitment to the growth of our region.

Sincerely,

Elizabeth Mazzara Myers, Executive Director

RE: 2024 Urban Growth Report

Dear President Peterson and Councilors:

NAIOP, the Commercial Real Estate Development Association, is one of the leading organizations for developers, investors, owners & operators, brokers, and related professionals in office, industrial and mixed-use real estate throughout the United States, Canada, and Mexico. The Oregon Chapter's members represent a broad and diverse range of companies involved with commercial real estate activities in the Portland metropolitan area, including developers, owners, brokers, and managers, along with other professionals providing legal, finance, title, engineering, architectural, construction, and other services.

Thank you for the opportunity to comment on the draft 2024 Urban Growth Report which is a crucial element in planning for the future of commercial development in the region. Our testimony will focus on two areas:

- Strong support for the boundary expansion proposed by the City of Sherwood which includes our unequivocal endorsement of the findings and conclusions presented by EcoNorthwest in its *Sherwood West UGB Assessment* document found in Appendix 9;
- Concerns with the UGR's estimates of supply and capacity of industrial land

I. Support for Sherwood West UGB Expansion Proposal/Endorsement of EcoNorthwest Findings and Conclusions

NAIOP Oregon member representatives have been involved in Sherwood's planning process for the Sherwood West area for more than two years, and we very much appreciate the extensive time and effort the City has devoted to careful development of a plan that will provide much needed additional land for employment and housing. The Sherwood West Concept Plan includes land for housing, schools and civic facilities, park space, and 265 net acres for employment uses that would support about 4,500 new jobs. We strongly endorse the findings of ECONorthwest that this area has regionally

unique characteristics that would be very attractive to industrial development, including 40-to-50-acre parcels, minimal site aggregation, slopes under 5 percent, and access to Interstate 5.

Our industrial market members have long been well aware of ECONorthwest's finding that, unlike in the office and retail markets, vacancy rates for the industrial sector in the region are below 5%. This is an extremely low number and, with continuing strong demand for this type of space, has spurred a more than 20% increase in industrial rents over the last five years. These two trend lines are even more pronounced within Washington County, where the vacancy rate dipped to 2.5% in 2023 and rents increased 23%.

As ECONorthwest found, "A diverse regional market supply of sites is essential to maintaining an equilibrium in market pricing and to supporting a broad range of industries." Without such a supply, the Portland metropolitan region will be unable to compete with other national markets and will be passed over by employers looking for new locations and expansion opportunities.

The Sherwood West area fulfills this need quite well with its unique set of features as listed above by the ECONorthwest analysis. Also, it should be noted that Sherwood West is within an acknowledged Urban Reserve that was designated 14 years ago after an intensive public process to identify and compare parcels most suitable for UGB expansion and future urbanization. Expansion of the UGB to include Sherwood West is a logical and appropriate next step to ensure that the region is able to satisfy regional industrial land needs for the next twenty years.

II. Concerns with the UGR's estimates of supply and capacity of industrial land

A. Slopes and Parcel Size. According to the UGR, there are currently 5,950 acres of buildable industrial land within the region. This number, however, seriously overstates the realistic development potential for these lands since it includes properties with slopes of up to 25%, which is much steeper than is acceptable for industrial uses (the 25% slope standard is derived from Oregon Administrative Rules specifically pertaining only to residential land). A more accurate approach would be to use the acreage for "unconstrained" parcels shown on Table 5 of Appendix 6 which deducts those areas where 10% or less of the taxlot is up to a 7% slope. This amounts to 2,839 acres, but is also problematic since the average parcel size is 1.05 acres, much smaller than is typically seen for industrial development.

According to data from CoStar, since 2018 there have been 137 industrial buildings constructed within the UGB and Clark County. As shown in the table below, those 137 buildings had 21,834,448 total square-feet of net rentable area, with a total land area of 1,678 acres.

New Industrial Construction 2018-24 Within Portland UGB and Clark County, Washington	
Total Building Net Rentable Area	21,834,448 sq. ft.
Total Land Area	1,678 acres
Average Building Size	159,376 sq. ft.
Median Building Size	105,986 sq. ft.
Average Land Area	12.25 acres
Median Land Area	8.44 acres

As can be seen from these numbers, the average and median land area size of 12.25 and 8.44 acres for industrial developments over the last six years is far larger than the 1.05 acre average lot size seen in Table 5 of Appendix 6 in the UGR. This disparity is further reinforced by data presented in ECONorthwest's Sherwood West UGB Assessment (Appendix 9 of the UGR) regarding the size of industrial buildings constructed. According to the report, "Between 2019 and 2023, 7 million square feet of industrial buildings (sized 100,000 square feet or larger) were developed in the region across 33 buildings. This indicates that 39 percent of the industrial buildings built between 2019 and 2023 equal or are greater to 100,000 square feet, which shows the trend towards new industrial companies needing larger spaces."[1]

We would urge the Council to direct staff to develop recommendations for further reductions in projected industrial land capacity after taking into consideration the steep slopes and the extremely small average taxlot size of the buildable industrial acreage.

B. Projected Infill Industrial Development. A further problem with the 5,950-acre total amount of buildable industrial land is that 3,252 acres (55%) are projected to come from infill development of sites that are already considered developed. Only 2,574 acres (43%) are actual vacant, undeveloped sites. The infill projection is very aggressive for such remnant parcels and begs the question of what the historical rate of industrial infill has been.

We urge the Council to direct staff to produce this information so that it can be compared with projections for the future.

Thank you for the opportunity to comment on the Urban Growth Report and we appreciate the outreach efforts of your staff to brief in responding to our questions. Please let us know if we can provide any additional information.

Sincerely,

Kelly Ross
Public Affairs Consultant

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Hello,

The 2024 UGR has implications for local government planning processes as Metro's subsequent distributed forecasts inform local Housing Capacity Analyses, Economic Opportunities Analyses, and Regional Transportation Plan modeling.

The City of Hillsboro recommends Metro rely on a high population growth forecast to allow our region to be nimbler in addressing current and future housing and employment needs.

The 2024 Draft UGR demand scenario 4 involves faster household growth in 2044 coming from increased in-migration of younger households, consistent with historic migration dynamics, who typically seeking multifamily and middle housing. Though younger households who migrate to the region by 2030, 2035, and 2040 may initially prefer multifamily or middle housing, many will continue to demand single-unit detached for their growing household size and other reasons. The City of Hillsboro recommends Metro add a new UGR demand scenario 5 that involves faster household growth coming from increased in-migration of younger households, consistent with historic migration dynamics, but with a larger percentage of single-unit detached to meet the demand during the next 20 years.

Though the Draft UGR shows the region as having sufficient total industrial capacity, much of the industrial land supply consists of smaller parcels with an average lot size of 3.8 acres and a median lot size of 1.7 acres. The Draft UGR mentions there are only eight sites over 50 buildable acres inside the UGB that are available to the general industrial market. The final 2024 UGR should highlight the lack of sufficient large-lot industrial sites 25 plus acres in size available to the general industrial market. The final 2024 UGR should also highlight that less than 6% of the taxlots available to the general industrial market are medium-sized sites between 10 and 25 acres.

RE: Draft 2024 Urban Growth Report

Dear Metro Urban Growth Management Team,

Thank you for the opportunity to review and provide comments on the Draft 2024 Urban Growth Report (UGR). This memo summarizes technical comments from Washington County Land Use & Transportation staff.

We appreciate the work Metro has done for the region's livability in managing the Urban Growth Boundary (UGB) in a way that balances the need to protect rural land uses and provide an adequate supply of land that has a high likelihood of successfully developing into places to live, work, visit, and play. Staff appreciate the opportunity to participate in the process through the Land Use Technical Advisory Group (LUTAG), Metro Technical Advisory Committee (MTAC), the Transportation Policy Advisory Committee (TPAC) and the economic development forum. We also appreciate the time that Metro staff have spent sharing their work with us and other partners through various committees and organizations throughout the process.

Since the origin of the Metro Urban Boundary, jurisdictions in Washington County have shown their ability to plan for expansions of the UGB areas in a way that creates desirable communities. We respectfully request that Metro correct the number of housing units built in North Bethany since the UGB expansion in 2002. The Draft UGR reports that only 573 units have been built, but the actual number is closer to 4,000. This is an important detail because it shows the success of building communities within UGB expansion areas over the last twenty years.

The primary concerns of Washington County staff are how the technical tools have been applied to evaluate the most likely development potential and demand scenarios. These concerns have been raised by the County and other partners throughout the review process. Two examples follow:

- The scenarios that Metro prepared along with the three growth forecasts assigned a demand share for single- and multi-family units. The high growth projection was paired along with the high demand for multi-family product scenario, and we did not see results of the high growth forecast modeled with high demand for single-family product or an even split. We believe that it is important to ensure adequate land for a

variety of housing types. Past trends have shown that much growth (both single and multi-family) is happening outside of town centers, reflecting market realities from both a supply and demand perspective. Supporting and incentivizing growth in our town center areas is a part of the solution to our housing crisis but so are carefully planned UGB expansions and infill development all around the region. The limited scenarios shared in the draft UGR did not prepare us to evaluate the effects of these options.

- For employment/industrial needs, the evaluation of industrial land supply needs to account for the available size of properties and the flat topography needed by modern large-scale industrial development. While land with slopes between 5% and 25% has been successfully developed into new residential areas, and to some extent new commercial areas, the parts of the region's industrial land supply that are this topographically challenging are unlikely to be financially viable. Flatter industrial land is a prerequisite to future growth in industrial employment. Metro should update the calculations of available employment/industrial land to remove steep slopes.

County staff worked closely with Sherwood staff as they prepared the Sherwood West Concept Plan and we support their technical work and the process that they have gone through. Again, we appreciate the collaborative spirit with which Metro staff approached this Urban Growth Report and look forward to our continued work together.

Sincerely,

Erin Wardell

RE: Draft 2024 Urban Growth Report

Dear Chair Peterson and Metro Councilors,

Thank you for the opportunity to comment on the draft Urban Growth Report (UGR) and Sherwood West urban growth boundary (UGB) expansion proposal. The 2024 growth management decision is the blueprint for how Metro Council will lead the region in planning for future housing development and employment opportunities. We appreciate that these decisions are challenging and acknowledge there are trade-offs that must be carefully considered in this decision process.

Our Board strongly supports the City of Sherwood's application for expansion of the urban growth boundary to include the 1,291 acres within the Sherwood West urban reserve area. The city has demonstrated their readiness to serve the area with governance and infrastructure as required by Metro's Urban Growth Management Functional Plan. The City's plan envisions that up to 5,582 housing units and 4,524 jobs could be accommodated in the expansion area. As we are all grappling with ways to produce more housing in the region and across the state, adding this land to our regional urban growth boundary makes sense. In addition, Sherwood has shown that the proposed Sherwood West employment area has the site suitability characteristics to attract more of the types of industry that Sherwood has successfully recruited to the city in recent years. Even though this is a regional urban growth boundary expansion decision using regional analysis, place matters in this consideration. Sherwood has demonstrated that they are a place where people want to both work and live.

We also encourage Metro Council to strongly consider selecting the high growth rate for both population and employment. The selected growth rates guide regional policy and funding decisions around housing, employment land and supporting infrastructure. Choosing low growth rates could artificially constrain our ability to plan for or make decisions to support the development of badly needed housing of all types, or further constrain opportunities to grow our region's traded-sector employment, which provides living wage jobs for thousands of our community members.

Board of County Commissioners
