2. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total "Net Acres" per unit in this table may not equal the total "Net Acres" per unit in table 1.

- These stands were planted and were commercially thinned in 1997.

- Green Tree Retention Area:

No clear green tree strategy was determined as the timber is roughly homogenous throughout the sale. Attempt to leave mid slope leave tree clumps of 10-15 trees if the opportunity arises. Foresters will work with wildlife biologist during sale layout.
