

2026 ODF Resource Rate Guidance Information

The resource rates in this guidance have been identified as 2026 median 'wet' rates for the ODF Incident Resource Agreement (IRA) resource types in the Oregon/Washington region. 2026 rates reflect a 3% increase across the board for all resources based on the Consumer Price Index (west region) all items index, annual percent change from 2025.

When determining the rate of their resources, Resource Providers must adhere to rates no more than 20% above the median recommended rates below. Any proposed resource rate that goes beyond that 20% will result in a denial of the resource(s), and the Resource Provider will be encouraged to resubmit the resource(s) with a reduced rate.

Dispatchers and ordering managers for ODF incidents will be strongly encouraged to sort resources by proposed rates. IRA resources with rates closest to 20% above the recommended median rates may be subject to being offered assignments only after all other resources (including available federal resources) are depleted.

Resource Providers must check the individual resource appendixes to determine eligibility for delivery, mileage, and/or relocation fees.

Rates for resources that are not listed in this guidance will be reviewed by ODF for appropriateness and may require additional discussions with the vendor before the complete execution of the IRA.

Rates are based on a 14-hour shift.
