Route Map 6 Legend

Route Map 6 shows authorized routes up to 14 feet 0 inches in width for the movement of mobile or modular units by annual permit. Refer to Route Map 2 for pilot vehicle requirements.

- Black routes are authorized routes up to 14 feet 0 inches in width for the movement of mobile or modular units by annual permit.
- Red routes are **Not** authorized routes up to 14 feet 0 inches in width for the movement of mobile or modular units by annual permit. Refer to your permit for widths allowed by annual permit on red routes on this map.

Additional Notes

US26 Between Sandy and Madras (Both Directions of Travel)

Mobile homes or modular units exceeding 12 feet in width, but not exceeding 14 feet in width, may haul over this section only during bare pavement conditions. Movement is not allowed when ice or snow is present on the highway, whether or not the highway has been sanded.

US20 / OR126 in Sisters (Both Directions of Travel)

The movement of two wide loads each exceeding 12 feet in width traveling in opposing directions through the City of Sisters is not allowed through a six-block section of the downtown merchant area between South Pine Street and South Larch Street due to horizontal width constraints. The lead pilot vehicle operator is responsible for ensuring that there are no oversize loads over 12 feet in width entering this restricted section from the opposite direction before the permitted vehicle enters the width restricted section.

Pilot vehicles escorting wide loads exceeding 12 feet in width must announce their approaching presence on CB radio channel 17 prior to entering the six-block section of the downtown merchant area between South Pine Street and South Larch Street.

In the event of an oncoming oversize load, one of the lead pilot vehicle operators must direct their piloted load to wait and allow the approaching oversize load to pass safely before proceeding.

US20 Between US101 and OR229, and OR229 Between US101 and Siletz

Movement is allowed from 9 a.m. to 4 p.m. only.
