HEALTH POLICY AND ANALYTICS DIVISION
SUSTAINABLE HEALTH CARE COST GROWTH TARGET PROGRAM**

In the Matter of:

Hillsboro Pediatric Clinic, LLC, an
Oregon Limited Liability Company

For the Cost Growth Target
measurement period: 2021-2022

Agency No. **CGT-2023-PROV-48**

**NOTICE OF PROPOSED DETERMINATION
AND RIGHT TO REQUEST A HEARING**

Oregon Health Authority's (OHA) Sustainable Health Care Cost Growth Target Program (CGT) is tasked with monitoring the cost of health care in Oregon and holding payers and provider organizations accountable for cost growth that exceeds the annual target with statistical confidence and without an acceptable reason. The CGT is governed by Oregon Revised Statutes (ORS) 442.385 through 442.386 and Oregon Administrative Rules (OAR) Chapter 409, Division 65.

Per ORS 442.386 and OAR 409-065-0035, OHA reviews underlying cost drivers and reasons for cost growth and makes a determination as to whether such conditions or factors, or combination of such conditions or factors, suffices as reasonable cause for an entity to exceed the cost growth target for the measurement period.

Now, therefore, upon due consideration of the circumstances, including the mandatory cost growth target data submissions, supplemental information provided by the entity, and the entirety of OHA's record, OHA enters the following Notice of Proposed Determination.

Procedural History and Findings of Fact

OHA's CGT conducted its cost growth review under OAR 409-065-0035 which requires that OHA conduct analyses to understand potential systematic causes or other factors that might result in payers or provider organizations exceeding the cost growth target. The cost growth target for 2021 through 2025 is 3.4%.¹

Hillsboro Pediatric Clinic, LLC, an Oregon Limited Liability Company ("Hillsboro Pediatric Clinic") is a provider organization in Oregon and was identified as an accountable organization for the 2021-2022 measurement period. To be accountable to the target, provider organizations must have at least 10,000 unique patient lives or 5,000 lives within any one CGT market (Medicaid, Medicare, Commercial) attributed to them across CGT data submissions for the measurement period.²

On or around December 13, 2023, OHA notified Hillsboro Pediatric Clinic that it had sufficient attributed patient volume to be accountable to the cost growth target. On or around January 10, 2024, OHA generated a data output summary and shared it with Hillsboro Pediatric Clinic on or around January 26. On or around March 1, 2024, OHA met with Hillsboro Pediatric Clinic to review its data for the 2023 data cycle and

discuss and resolve any data validation concerns. On or around March 1, 2024, OHA completed CGT-1 data validation with Hillsboro Pediatric Clinic.

On or around May 7, 2024, OHA notified Hillsboro Pediatric Clinic of the cost growth data that were to be reported publicly in OHA's 2024 Cost Growth Target Annual Report, for the 2021-2022 cost growth measurement period. This report was released publicly on or around May 28, 2024.

OHA identified Hillsboro Pediatric Clinic as having cost growth over the target between calendar years 2021 and 2022 for the following markets: **Medicaid, 9.8%.**

On or around July 25, 2024, OHA notified Hillsboro Pediatric Clinic that it had exceeded the cost growth target for the 2021-2022 measurement period pursuant to OAR 409-065-0035(3).

Pediatric Provider Organizations and the Determining Reasonableness Process

OHA did not require organizations solely providing pediatric care to have a meeting or provide any data or other information to determine reasonableness for this measurement period. Pediatric providers play a critical role in managing health care costs by focusing on preventative care and early intervention. During the period under review, pediatric providers were also faced with challenges related to the pandemic, including the COVID-19, RSV and flu "triple-demic" in the fall of 2022. As it is a pediatric provider, Hillsboro Pediatric Clinic was not required to attend a meeting with OHA to discuss the reasons for its excess 2021-2022 cost growth.

Based on an analysis of Hillsboro Pediatric Clinic's cost growth target data and on its data validation conversation with Hillsboro Pediatric Clinic, OHA did identify a few key areas driving 2021-2022 Medicaid cost growth, which are detailed below.

- 1. Care for Newborns** – In 2022, Hillsboro Pediatric Clinic provided care for an unusually high number of newborn infants, which tend to have higher costs. The population receiving care had some intensive needs that may have driven up hospital costs.
- 2. Increased non-claims performance incentive payments** – Hillsboro Pediatric Clinic also saw an increase in performance incentive payments. These non-claims

payments are often made to provider organizations for meeting or exceeding quality benchmarks. Many entities also saw their incentives grow during this period for their role in managing the COVID-19 pandemic.

PROPOSED DETERMINATION

Following a review of CGT data and additional information on health care spending, OHA has determined that Hillsboro Pediatric Clinic's health care cost growth for the Medicaid market from 2021-2022 was:

- **Due to acceptable reason(s).** Hillsboro Pediatric Clinic will not be held accountable for cost growth in this measurement period and no further action is required for this measurement period.

Please see Attachment 1 for a running summary of Hillsboro Pediatric Clinic's cost growth performance over time.
