Spending Your Expansion Grant Funds

You are requesting up to \$5,000 in NSA funding to enhance your clinic space in alignment with trauma-informed principles and practice. Yay!

So, what can you buy?

This grant aims to foster welcoming, supportive spaces that reflect trauma-informed principles and improve overall program experience by helping local agencies cover costs that are not typically approved by county administration. These funds may not be used for office furniture or equipment that your department usually supplies. Purchasing guidelines now prohibit the purchase or delivery of computer equipment.

Examples of some allowable purchases may include but not limited to:

- waiting room toys,
- furnishings that create a more accessible environment (e.g. bench seating)
- Trauma-informed artwork,
- ambient noise reduction equipment,
- visual/auditory dividers to enhance confidentiality,
- scales to meet special needs.

Don't know where to start? Which vendors can you source products from?

Great question! The State uses price agreements negotiated with vendors that will give us great pricing. The list below gives you a way to locate your product and to get an estimated price. Please remember to factor in the shipping costs for those extra-large items so you don't exceed the budget! We will arrange delivery and shipping times into the clinic. The State is not able to use Amazon as a vendor. There are no exceptions.

Begin exploring the vendors listed below to help you find the product you are looking for. Remember that we will locate your chosen items from vendors who have price agreements with the State.

MarketLab

<https://www.marketlab.com/>
